# UNIVERSITY OF WYOMING

College of Engineering and Applied Science

Engineering and computer science students at UW are offered the opportunity to live in the same residence hall as a way of offering a supportive and friendly environment. In McIntyre Hall, we have an all-male floor (12th) and two co-ed floors with men and women living in different wings (10th and 11th floors). In addition, the 11th floor includes a computer facility that is available to residents of both floors.

Resident Assistants (RAs) for both floors and the Teaching Assistant (TA) for the computer lab are students from the College. The RAs and the TA are carefully chosen upperclassmen who have demonstrated excellence in leadership and academics. They organize course review sessions for common courses, orientation programs for new students, and social events to build a sense of community among residents of the floors.

Living in McIntyre Hall is a great way to share experiences with fellow engineering and computer science students!

Please contact Residence Life and Dining Services at 307-766-3175 or reslife-dining@uwyo.edu for more information.
