Approval of research plan by the graduate committee At least one colloquium presentation per year Preliminary exam Oral defense of Ph.D. dissertation Approval of Ph.D. dissertation by the graduate committee Ph.D. requires a minimum of 72 graduate hours, with at least 42 hours in formal coursework. This includes appropriate coursework from a master's degree. Additional credits toward the 72 credit hour requirement may include dissertation research hours, internship hours, or additional coursework. 24 in-residence coursework hours

Required Courses

These courses are required for the master's program.

ATSC 5010: Physical Meteorology. 4.

ATSC 5011: Physical Meteorology II. 4.

ATSC 5014: Dynamic Meteorology. 4.

ATSC 5016: Synoptic Meteorology. 4.

ATSC 5018: Ethics & Research Methods. 1.

UW Elective(s) to be determined by committee. 9 minimum

Department Head: Patrick Johnson

Professors:

VLADIMIR ALVARADO, B.Sc. Universidad Central de Venezuela 1987; M.S. Institut Francais du Pétrole 2002; Ph.D. University of Minnesota 1996; Professor of Chemical Engineering 2017, 2006.

DAVID M. BAGLEY, B.S. Colorado School of Mines 1984; M.S. Cornell University 1989; Ph.D. 1993; Professor of Chemical Engineering 2011, 2005.

DAVID A. BELL, B.S. University of Washington 1976; M.S. Rice University 1979; Ph.D. Colorado State University 1992; Professor of Chemical Engineering 2019, 1993.

JOSEPH HOLLES, B.S. Iowa State University 1990; M.E. University of Virginia 1998; Ph.D. 2000; Associate Professor of Chemical Engineering 2010.

JOHN OAKEY, B.S. The Pennsylvania State University 1997; M.S. Colorado School of Mines 1999; Ph.D. 2003; Professor of Chemical Engineering 2019, 2010.

MICHAEL V. PISHKO, B.S. University of Missouri-Columbia 1986; M.S. 1987; Ph.D. University of Texas at Austin 1992; Professor of Chemical Engineering 2015.

PATRICK JOHNSON, B.S. Lehigh University 1992; M.S. University of Virginia 1994; Ph.D. Columbia University 2004; Associate Professor of Chemical Engineering 2012,2006.

Associate Professors:

SAMAN ARYANA, B.S. University of Texas at Arlington 2003; M.S. 2006; Ph.D. Stanford University 2012; Assistant Professor of Chemical Engineering 2013.

KATIE DONGMEI LI-OAKEY, B.S. Shandong University of Technology 1994; M.S. Tianjin University 1997; M.S. University of Colorado at Boulder 1999; Ph.D. 2003; Associate Professor of Chemical Engineering 2018, 2011.

Associate Professor of Practice:

JOHN TATARKO JR., B. ChE, cum laude: 2008 Cleveland State University. MS ChE: 2010 Cleveland State University. MS EE: 2013 University of Louisville. PhD ChE: 2015 University of Louisville.

Assistant Professors:

KAREN WAWROUSEK, B.S. The College of St. Rose 2001; Ph.D. California Institute of Technology 2009; Assistant Professor of Chemical Engineering 2014.

Adjunct Professors:

John Ackerman
Morris Argyle
Youqing Shen
John Schabron

Professors Emeriti:

Chang Yul Cha
H. Gordon Harris
Henry W. Haynes

Chemical Engineering is one of the most versatile of the engineering programs. It prepares students for employment in many diverse fields, such as production of pharmaceuticals, polymers and plastics, semiconductors, heavy industrial chemicals, synthetic fuels, petrochemicals and petroleum refining. Chemical engineers also work in biological engineering, environmental engineering, enhanced oil recovery, corrosion control, metallurgy and microelectronics. Undergraduate chemical engineering training has been found to be an excellent background for graduate work not only in engineering, but also in a number of other fields, including medicine, law, business, and the natural sciences.

The chemical engineering curriculum is based on a sound background in chemistry, mathematics, physics, and biology. The essentials of engineering are added to this foundation, including fluid dynamics and thermodynamics. In order to develop the individual's social consciousness and to broaden the student's educational background, an integrated program of study in the humanities and social sciences is included in the curriculum. Chemical engineering courses in multicomponent thermodynamics, transport phenomena, kinetics, process control and process design are concentrated in the junior and senior years. This program provides training for engineers to enter production, research, product and process development, process design, technical sales and engineering management positions. Training in chemical engineering equips the graduate to solve many of the problems facing society today: human health, energy shortages, synthetic fuels production, water and air pollution, toxic chemical control, and food production. Furthermore, our

program prepares students interested in a career in medicine or the life sciences and is suitable for pre-medical and pre-dental students.

The department offers an 18-credit-hour block of approved technical electives. Students select an emphasis in Biological Engineering, Environmental Engineering, Materials Science and Engineering, Chemical Process Industry, Petroleum Engineering, Graduate School Preparation, and Pre-Medicine. Students can also pursue a concurrent major in Chemistry, minors in Physics, Chemistry, Math, Computer Science, Molecular Biology and Business. See department for details. Students are required to take a minimum of 3 credits of Chemical Engineering Technical electives. The Chemical Engineering Program requires that the number of credits of upper division courses be satisfied (i.e., 10 credits of Technical electives must be 3000+). The Chemical Engineering program requires 48 hours of 3000 and 4000-level coursework. This is fulfilled by required courses and approved technical electives.

Chemical Engineering degree candidates must meet the academic requirements of the college and, in addition, must have a GPA of 2.000 in Chemical Engineering courses attempted at UW that are applied toward graduation for the B.S. degree from the department.

Students must achieve a C- or better in all chemical engineering courses serving as a prerequisite for another chemical engineering course.

Chemical Engineering Program Educational Objectives

Three to six years after graduation, graduates who choose to practice in Chemical Engineering should:

- Successfully practice the profession of Chemical Engineering;
- Demonstrate successful career growth

Chemical Engineering Program Outcomes

During the course of study in Chemical Engineering, the student should demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Graduate Study

The Department of Chemical Engineering offers graduate programs leading to the M.S. and Ph.D. degrees in chemical engineering. The M.S. degree is offered under Plan A and Plan B. In addition, an environmental engineering program, run jointly by the Department of Chemical Engineering, the Department of Petroleum Engineering, and the Department

of Civil and Architectural Engineering, offers graduate programs leading to an M.S. in environmental engineering under either Plan A or Plan B.

Program Specific Admission Requirements

Admission Process and Requirements

Standard Admission

Admission is open to students with at least a bachelor's degree who meet the minimum requirements:

1. A GPA of 3.000 (A = 4.000), or equivalent;
2. A GRE score (there is no minimum GRE score requirement)
3. For international applicants who did not attend an English-speaking program in an English-speaking country for all years of their highest degree:

A TOEFL score of 600 (paper-based), 250 (computer-based), or 80 (Internet based) or an IELTS score of 6.5.

Unofficial transcripts of all prior college-level coursework, test scores and recommendations from three references must be uploaded as parts of the application.

If admission is granted, then official transcripts, GRE and TOEFL scores are required.

Applications submitted by February 1 will be given priority consideration for the fall semester.

The application will not be processed until all the necessary documents have been uploaded.

JON A. GARDZELEWSKI, B.S. University of Wyoming 2002; M.Arch. University of Oregon 2005; Associate Lecturer, 2016, 2010.

SHELLEY MACY, B.S. University of Wyoming 2002; M.S. University of Wyoming, 2013; Assistant Lecturer, 2021.

Adjunct Faculty:

Aaron Cvar, Song Jin, Mark Kilgore, Robert Loane, Marci Miller, Alan Moore, Evan O'Toole, Chris Schabron, Dennis Moulard, Nathan Bergh.

Professors Emeriti:

Patricia J.S. Colberg, Charles W. Dolan, Thomas V. Edgar, K. James Fornstrom, Victor R. Hasfurther, Michael Humenick, Anton Munari, Larry O. Pochop, Jay Puckett, Richard J. Schmidt, James L. Smith, John P. Turner.

Civil Engineering

The mission of the department of Civil and Architectural Engineering and Construction Management at the University of Wyoming is:

- To educate and prepare Civil & Architectural Engineering and Construction Management students to lead as designers, builders, project managers and entrepreneurs as it relates to the sustainable built and natural environments.
- To develop technical solutions through research, innovation, and improved infrastructure to diversify and grow the economies that serve Wyoming and the world.

The Civil Engineering curriculum begins with a basic education in the physical, engineering, mathematical and computer sciences. This foundation supports further development of engineering topics that prepare the engineer to address critical societal needs. To meet these needs, the Civil Engineer designs and builds bridges, buildings, dams and hydraulic structures, pipelines and canals, power plants, transportation facilities, sanitary and environmental engineering facilities, surveying and mapping systems, space and ocean platforms, as well as numerous other engineering systems. The civil engineer must also be aware of the social, humanistic, and political aspects of their projects. Therefore, course work in the humanities and social sciences is required to better understand the social aspects of public works. During the last two years of their program, students may pursue several areas of Civil Engineering or, depending upon their interests, more specialized courses in one or more of the specific technical areas listed below. All students must have a comprehensive design experience.

Structural engineering: Analysis and design of structural systems including buildings, bridges, towers and other structures. Structural engineering also includes the study of solid mechanics and advanced structural materials.

Environmental engineering: Analysis, design and development of engineering systems to provide potable water supplies, treat municipal, industrial and hazardous wastes and protect human health and the environment.

Water resource engineering: Planning, analysis and design of hydraulic and hydrologic systems with respect to watersheds, municipalities, irrigation and drainage, and flood control. Conservation and management of groundwater and surface water are emphasized.

Transportation engineering: Planning, analysis and design of highways, traffic engineering and control, traffic safety, and pavement maintenance, design and rehabilitation.

Geotechnical engineering: Design and analysis of foundations, dams, embankments, slope stability and construction practices in soil and rock.

The Civil Engineering curriculum prepares the graduate to engage in professional practice, and upon completion of post-graduate requirements, to obtain registration as a Professional Engineer. It also provides the graduate with an excellent preparation for graduate studies in engineering, business or law.

Civil Engineering degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 (C) in courses required for the major. Students must complete a minimum of 42 upper division (junior/senior) or graduate-level semester credit hours. Students may have a maximum of 6 credits in courses with a grade of D in upper division CE courses that apply towards their degree program.

Computer Requirement

Many courses in Civil Engineering require students to have a laptop or tablet computer to bring to class, and to be able to download various software program (normally free). See www.uwyo.edu/civil/undergrad/laptop.html for more information.

CE Objectives

Three to six years after graduation, graduates of the University of Wyoming Civil Engineering Program will:

CE-OB1. Be able to successfully practice the profession of Civil Engineering.

CE-OB2. Be prepared and motivated to accept challenging assignments and responsibilities.

CE-OB3. Demonstrate successful professional growth through leadership development and career progression.

CE Outcomes

The Civil Engineering department regularly evaluates the following student skills.

Specifically, every University of Wyoming Civil Engineering graduate shall have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Transfer Coursework: The Civil Engineering program accepts transfer course equivalents listed in the Wyoming Transfer Catalog. Other transfer courses will be considered by petition to the Department. The Department has a Policy on Transfer Courses for Continuing Students, which says continuing students should not plan to substitute "core" courses with transfer credits from other institutions, and that transfer credits for continuing students are evaluated on a case-by case basis. For upper-division coursework, no more than two upper division courses may be transferred and applied to the CE degree. CE 4010 and CE 4900 cannot be transferred to UW.

Advanced Civil and Architectural Engineering Standing

All undergraduate students in Civil and Architectural Engineering must fulfill the Gateway Requirement prior to enrolling in any upper-division (3000-5000 level) courses taught in the College of Engineering and Applied Science.

To meet the Civil and Architectural Engineering Gateway Requirement, the student must earn a minimum of 57 Quality Points from any combination of the following seven classes or their equivalent. It is not necessary to complete all seven courses to fulfill the Gateway Requirement.

Gateway Courses

- CHEM1020 - General Chemistry I
- PHYS1210 - Engineering Physics I
OR
- PHYS1220 - Engineering Physics II

- MATH2200 - Calculus I
- MATH2205 - Calculus II
- ES2110 - Statics
- ES2120 - Dynamics
- ES 2410 Mechanics of Material I

See the advising pages on the Civil and Architectural Engineering website for more information.

Graduate Study

Graduate Programs

An advanced degree in civil and architectural engineering is professionally and economically attractive. Advanced degrees are important for professional civil engineers in many specialized areas of civil engineering. Many consulting firms and industrial design groups require advanced knowledge gained from graduate studies. Engineers in such firms often work at the forefront of their profession. UW alumni are involved in design and construction of major projects worldwide.

An advanced degree is also required for careers in university teaching and research. A university career is highly recommended for those motivated students who are interested in becoming leaders in education and in the development of new concepts, processes and inventions.

The Department of Civil and Architectural Engineering offers programs leading to the degrees of master of science and doctor of philosophy. Areas of study in the M.S. and Ph.D. programs include: environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. The department also

offers a master of science in architectural engineering and a master of science in environmental engineering in cooperation with the Department of Chemical and Petroleum Engineering. Additional information is available from the department or from the Web page.

Program Specific Admission Requirements

Admission is open to all students holding a bachelor's degree with at least a 3.000 GPA from an accredited engineering curriculum and a GRE combined minimum score of 298.

Ph.D. applicants are reviewed with regard to stated interests, objectives and the ability of the department to provide a quality experience for the applicant.

International students must achieve a TOEFL score of 550 on the paper-based, a minimum of 76 on the internet-based or a minimum of 6.0 on the IELTS.

Architectural Engineering

Architectural Engineering is a rapidly expanding profession that deals with the myriad aspects of buildings and their design, construction and operation. Architectural Engineers are typically specialists, responsible for the design and integration of such building elements as the structural, plumbing, fire protection, heating and air conditioning, or lighting and electrical systems. The curriculum in architectural engineering is designed to acquaint students with the various aspects of building design and construction and exposes them to a variety of courses dealing with different building materials and systems. The curriculum also includes course work in the humanities and social sciences, both to enrich the student's academic experience and assist in dealing with and contributing to society. The program leads to a Bachelor of Science in Architectural Engineering, preparing graduates to engage in practice as Professional Engineers upon completion of post-graduate registration requirements. Graduate work with emphasis in Architectural Engineering leading to a Master of Science and Doctor of Philosophy degree is offered through the Civil and Mechanical Engineering Programs. Additionally, advanced study can also be pursued in allied areas such as architecture, business or other engineering fields.

Students choose an area of emphasis in either structural or mechanical systems and select courses from approved electives, usually beginning their elective sequence in the second semester of their junior year. Consult with the Civil and Architectural Engineering Department for current elective lists.

Architectural Engineering degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 (C) in courses required for the major. Students must complete a minimum of 42 upper division (junior/senior) or graduate-level semester credit hours.

Students may have a maximum of 6 credits in courses with a grade of D in upper division ARE courses that apply towards their degree program.

Computer Requirement

Many courses in Architectural Engineering require students to have a laptop or tablet computer to bring to class, and to be able to download various software programs (normally free). See www.uwyo.edu/civil/undergrad/laptop.html for more information.

Architectural Engineering Objectives

Three to six years after graduation, graduates of the University of Wyoming Civil Engineering Program will:

ARE-OB1 Be able to successfully practice the profession of Architectural Engineering.

ARE-OB2 Be prepared and motivated to accept challenging assignments and responsibilities.

ARE-OB3 Demonstrate successful professional growth through leadership development and career progression.

ARE Outcomes

The Architectural Engineering department regularly evaluates the following student skills. Specifically, every University of Wyoming Architectural Engineering graduate shall have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Transfer Coursework: The Architectural Engineering program accepts transfer course equivalents listed in the Wyoming Transfer Catalog. Other transfer courses will be considered by petition to the Department. The Department has a Policy on Transfer Courses for Continuing Students, which says continuing students should not plan to substitute "core" courses with transfer credits from other institutions, and that transfer credits for continuing students are evaluated on a case-by case basis. For upper-division coursework, no more than two upper division courses may be transferred and applied to the ARE degree. ARE 4720 and ARE 4740 cannot be transferred to UW.

Advanced Civil and Architectural Engineering Standing

All undergraduate students in Civil and Architectural Engineering must fulfill the Gateway Requirement prior to enrolling in any upper-division (3000-5000 level) courses taught in the College of Engineering and Applied Science.

To meet the Civil and Architectural Engineering Gateway Requirement, the student must earn a minimum of 57 Quality Points from any combination of the following seven classes or their equivalent. It is not necessary to complete all seven courses to fulfill the Gateway Requirement.

Gateway Courses

- CHEM1020 - General Chemistry I
- PHYS1210 - Engineering Physics I
- **OR**
- PHYS1220 - Engineering Physics II

- MATH2200 - Calculus I
- MATH2205 - Calculus II
- ES2110 - Statics
- ES2120 - Dynamics
- ES 2410 Mechanics of Material I

Graduate Study

Graduate Programs

An advanced degree in architectural engineering is professionally and economically attractive. Advanced degrees are important for professional civil engineers in many specialized areas of civil engineering. Many consulting firms and industrial design groups require advanced knowledge gained from graduate studies. Engineers in such firms often work at the forefront of their profession. UW alumni are involved in design and construction of major projects worldwide.

An advanced degree is also required for careers in university teaching and research. A university career is highly recommended for those motivated students who are interested in becoming leaders in education and in the development of new concepts, processes and inventions.

The Department of Civil and Architectural Engineering offers programs leading to the degrees of master of science and Areas of study in the M.S. programs include: building mechanical systems engineering, environmental engineering, geotechnical engineering, structural engineering, and building energy modeling. Additional information is available from the department or from the Web page.

Students choose an area of emphasis in either, building, structural or mechanical systems and select courses from approved electives, usually beginning their elective sequence in the second semester of their junior year. Consult with the Civil and Architectural Engineering Department for current elective lists. Students are required to have a lap top computer.

Architectural engineering degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 (C) in civil and architectural engineering courses attempted at this university.

Construction Management

Construction Management is a rapidly-growing discipline, that is focused on the planning and oversight required to deliver construction projects on-time and on-budget. Students learn skills such as project management, decision making, budgeting, scheduling, and site logistics including safety planning, surveying, and building information modeling.

The Construction Management curriculum is designed to prepare students for success in a wide variety of career paths available in the construction sector. The curriculum includes course work in construction, business, humanities and social sciences to enrich the student's academic experience and to assist them in making a positive contribution to society. The program leads to a four-year Bachelor of Science in Construction Management degree.

Construction Management degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 in courses required for the major.

A grade of C or better is required in all required courses with a CM prefix.

Construction Management Learning Objectives

Upon graduation students shall be able to:

1. Create written communications appropriate to the construction discipline.

2. Create oral presentations appropriate to the construction discipline.
3. Create a construction project safety plan.
4. Create construction project cost estimates.
5. Create construction project schedules.
6. Analyze professional decisions based on ethical principles.
7. Analyze construction documents for planning and management of construction processes.
8. Analyze methods, materials, and equipment used to construct projects.
9. Apply electronic-based technology to manage the construction process.
10. Apply basic surveying techniques for construction layout and control.
11. Understand construction management skills as a member of a multi-disciplinary team.
12. Understand different methods for project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
13. Understand construction risk management.
14. Understand construction accounting and cost control.
15. Understand construction quality assurance and control.
16. Understand construction project control processes.
17. Understand the legal implications of contract, common, and regulatory law to manage a construction project.
18. Understand the basic principles of sustainable construction.
19. Understand the basic principles of structural behavior.
20. Understand the basic principles of mechanical, electrical and piping system.

Environmental Engineering

**3074/4055 Engineering Building,
766-5255/766-2500**

E-mail: cae.info@uwyo.edu

Web site: www.uwyo.edu/chemical/graduate/prospective/environmental/index.html

A master of science in environmental engineering is available in the College of Engineering through a joint effort of the Department of Civil and Architectural Engineering and the Department of Chemical Engineering. This interdisciplinary degree offers students an engineering perspective for solutions to environmental problems. Emphasis is on minimization, monitoring, control, and processing of waste products as well as treatment and disposal associated with point and non-point pollution sources. Integration of engineering with science, regulatory, and policy aspects of environmental engineering is an important component of this unique program. Further information is available from the environmental engineering graduate studies program office and/or departments involved.

Program Specific Admission Requirements

Admission is open to students with at least a bachelor's degree who meet the minimum requirements:

1. A GPA of 3.000 (A=4.000), or equivalent;
2. A GRE score of 291 (combined verbal and quantitative sections);
3. For international applicants who did not attend an English-speaking program in an English-speaking country for all years of their highest degree: A TOEFL score of 76 (Internet based) or an IELTS score of 6.0.

Complete official transcripts of all prior college-level coursework and recommendations from three references must be submitted as parts of the application.

The deadline to submit application credentials is February 1 (to be considered for fall semester), and October 1 (to be considered for spring semester).

The application will not be processed until all the necessary documents have been submitted.

JOHN E. McINROY, B.S. University of Wyoming 1986; M.S. Rensselaer Polytechnic Institute 1988; Ph.D. 1991; Professor of Electrical Engineering 2002, 1991.

SURESH S. MUKNAHALLIPATNA, B.E. University of Bangalore, India 1988; M.E. 1991; Ph.D. University of Wyoming 1995; Professor of Electrical Engineering 2010, 1997.

JOHN W. PIERRE, B.S. Montana State University 1986; M.S. University of Minnesota 1989; Ph.D. 1991; Professor of Electrical Engineering 2002, 1991.

CAMERON H.G. WRIGHT, B.S. Louisiana Tech University 1983; M.S. Purdue University 1988; Ph.D. University of Texas 1996; Professor of Electrical Engineering 2016, 2003.

Associate Professors:

AMY BANIC, B.S. Duquesne University 2003; M.S. University of North Carolina 2005; Ph.D. 2008; Associate Professor of Computer Science 2012, 2010.

MIKE BOROWCZAK, B.S. University of Cincinnati 2007; Ph.D. 2013; Associate Professor of Computer Science 2022.

DONGLIANG DUAN, B.E. Huazhong University of Science and Technology 2006; M.S. University of Florida 2009; Ph.D. Colorado State University 2012; Associate Professor of Electrical Engineering 2019, 2012.

EVA S. FERRE-PIKAL, B.S. University of Puerto Rico 1988; M.S. University of Michigan 1989; Ph.D. University of Colorado 1996; Associate Professor of Electrical Engineering 2004, 1998.

JOHN F. O'BRIEN, B.S. California State Polytechnic University, Pomona 1991; M.S. University of Wyoming 1997; Ph.D. Rensselaer Polytechnic Institute 2001; Associate Professor of Electrical Engineering 2009, 2003.

JON M. PIKAL, B.S. Purdue University 1988; M.S. University of Colorado 1993; Ph.D. Colorado State University 1999; Associate Professor of Electrical Engineering 2005, 1999.

Assistant Professors:

CHAO JIANG, B.E. Chongqing University 2009; Ph.D. Stevens Institute of Technology 2019; Assistant Professor of Electrical and Computer Engineering 2019.

LARS KOTTHOFF, Diplom (M.Sc.) University of Leipzig 2007; Ph.D. University of St. Andrews 2012; Assistant Professor of Computer Science 2017.

NGA NGUYEN, B.S. Hanoi University of Science and Technology 2005; M.S. 2007; Ph.D. Michigan State University 2017; Assistant Professor of Electrical and Computer Engineering 2018.

DIKSHA SHUKLA, B.S. Kanpur University 2008; M.C.A. Jawaharlal Nehru University 2011; M.S. Louisiana Tech University 2014; Ph.D. Syracuse University 2019; Assistant Professor of Computer Science 2019.

Senior Lecturer:

JAMES S. WARD, B.S. University of Wyoming 1993; M.S. 1997; Senior Lecturer of Computer Science 2011, 2000.

Associate Lecturer:

KIM BUCKNER, B.S. Chapman University 1993; M.S. University of Tennessee, Knoxville 1998; Ph.D. 2003; Associate Lecturer of Computer Science 2014, 2008.

Adjunct Faculty:

Robin Hill, Elena Oggero, Guido Pagnacco

Professors Emeriti:

Thomas A. Bailey, Jr., Mark Balas, Henry R. Bauer III, James L. Caldwell, Christos T. Constantinides, John R. Cowles, Jerry J. Cupal, Clifford D. Ferris, Jerry Hamann, Raymond G. Jacquot, Robert F. Kubichek, Stanislaw Legowski, John Rowland, John W. Steadman, A.H.M. Sadrul Ula, David Whitman

Lecturer Emeritus:

Jeri R. Hanly

Computer Science

A Bachelor of Science degree (B.S.) in Computer Science prepares students for careers in virtually any industry or to continue on with graduate study in Computer Science and many other fields. Computer science students learn to approach problems from a computational (algorithmic) point of view, and this approach to problem solving often leads to better and more general solutions. Software systems, information technology, and large scale data applications are core technologies in every area and the applications continue to grow with software and information systems becoming more and more embedded in the fabric of everyday life. These systems are essential tools in science and engineering,

for business and finance, government, communications, medicine, and entertainment. Software systems make the world go round and smart devices, such as phones, tablets, glasses, wearable devices, medical implants are ubiquitous. As a result, computer science has grown from a specialized field to an independent, broadly based area that studies all aspects of the use and understanding of software systems, information, and computational processes. Students studying B.S. in Computer Science at the University of Wyoming have the option to focus their studies by taking a concentration in Business, Big Data, or the Cybersecurity certificate. The Cybersecurity certificate captures core technical cyber security foundations and principles, from databases and networks to advanced threat detection and mitigation. All of the Computer Science concentrations lead to a Bachelor of Science in Computer Science and all programs are ABET accredited.

Program Objectives

The following are the objectives that the Computer Science program is preparing its graduates to achieve:

Success: Graduates will be employed in a computer science-related field or making progress toward an advanced graduate degree.

Growing: Graduates show continued learning and leading in computing-related professions.

Ethics: Graduates exhibit ethical and responsible behavior in all professional and community endeavors.

Program Learning Outcomes

The program of study in Computer Science enables students to achieve, by the time of graduation:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Graduate Study - Computer Science

The Department offers graduate work leading to the Master of Science degree in computer science and the Doctor of Philosophy in computer science. The Department also offers a graduate minor in computer science.

Program Specific Admission Requirement

Applicants for a graduate degree in computer science are expected to have completed undergraduate courses in Algorithms and Data Structures (COSC 3020 equivalent), Theory of Computing (COSC 4100 or COSC 4200 equivalent), Operating Systems (COSC 4740 equivalent), and Programming languages or Compilers (COSC 4780 or COSC 4785 equivalent). Applicants to the doctoral program must have completed a bachelor's or master's degree in computer science or a closely related discipline at an accredited university or college.

The Graduate Record Examination (GRE) is required of all applicants. GRE scores are required with minimums of 40th percentile for the verbal score and 65th percentile for the quantitative score. Our strongest students tend to have scores substantially above these minimums, with quantitative scores often around the 90th percentile or higher.

Students whose native language is not English must also complete the Test of English as a Foreign Language (TOEFL) with a score of at least 550 on the paper based TOEFL; 213 on the computerized test including a 58 or better in section 1-Reading; 80 for the Internet based TOEFL (iBT) including a score of 23 or better in section 1-Reading or the International English Language Testing System (IELTS) test with a 6.5 score or better. Students may also use the Duolingo exam, with a minimum of 105 overall and 125 in the Literacy section.

You must submit to the online application system contact information for three references that can evaluate your potential for graduate study in computer science. If you wish to pursue a Ph.D., the letters should address your ability to pursue quality original research. Letters should also evaluate your oral and written communication skills.

If you meet the minimum criteria and would like to formally apply for admission you will also need to submit the following information during the completion of your application via the application portal:

Copies of transcripts from all colleges and universities (minimum GPA or equivalent 3.000 on a scale of 4.000) for all degrees attained. International applicants must submit copies of individual semester transcripts, consolidated transcripts will not be accepted.

Copy of GRE scores a minimum percentile of 40% on verbal and 65% on quantitative portions of the exam. The majority of admitted students tend to have scores substantially above these minimums.

Contact information for three recommendation letters (applicants should follow-up with recommenders to ensure this requirement is fulfilled; applications will not be processed further until all recommendations have been received).

International students will also need to submit a copy of TOEFL scores, IELTS scores, or Duolingo scores.

High performing undergraduates in computer science can elect for Quick Start admission to the graduate program, allowing the sharing of up to six credit hours of 5000-level coursework toward the completion of both the B.S. and the graduate degree programs.

Electrical Engineering

The program of study outlined in the curriculum has been planned to provide the depth of understanding necessary to meet challenges of changing technology while being flexible enough to allow students to pursue in-depth study in at least one area of electrical engineering. In order to attain this, students are required to gain an understanding of mathematics and the basic engineering sciences. The fundamental electrical engineering education consists of courses in circuits, networks, electromagnetics, electronics, digital systems, communications, controls and energy conversion. Selection of elective courses, in consultation with the academic adviser, enables students to specialize in the above mentioned areas, as well as in robotics, microcircuits, microprocessors and high frequency electronics.

Laboratory work associated with electrical engineering courses is an important part of the curricula. This work helps students gain experience in applying the theoretical knowledge they acquire to practical engineering problems. Engineering design is an important component of the curriculum that concludes with a significant design experience in the senior year. Additional programs are described below.

F.M. Long Bioengineering Option. Named in honor of UW Professor Francis M. Long, this area offers excellent opportunities for those interested in applying the techniques of the electronic engineer to problems of environmental science, biology and medicine. Employment opportunities exist in state and federal agencies, industry and medical institutions. Career placement includes such areas as environmental monitoring, design and development of biological and medical instrumentation and clinical engineering. With minor modifications, the curriculum shown may be used as preparation for entrance to medical or dental school.

Computer Engineering

Computer Engineering is a blend of Computer Science and Electrical Engineering. In fact, a Computer Engineering student can change majors to Computer Science within the first three semesters without losing any credits. More careful planning is required to switch from Computer Science to Computer Engineering. Computer Engineering students receive training that allows them to design complex computer systems and embed them in custom applications such as robots, spacecraft, automobiles, etc. A typical system may interface with a sensor to measure the world, then decide how to best use the information to achieve goals and eventually turn on actuators which perform the needed task. They also develop computer vision systems, high performance computers and software, and the internet of things. They take many of the same required courses as Electrical Engineers, but fill in their electives with computer specific courses. Graduates have the ability to design electric circuits, understand network hardware, design computer systems, and write the software inside those systems. Compared to Electrical Engineers, Computer Engineers have less breadth of knowledge in Electrical Engineering but more depth in software and computer hardware. Compared to Computer Scientists, Computer Engineers know much more about hardware and signal/system theory. Computer Engineers sometimes also major in either Electrical Engineering or Computer Science to get two degrees.

Grade Policy

Electrical and computer engineering majors must achieve a grade of C (2.000) or better on courses that are prerequisites for courses within the student's course of study. Students must also achieve a grade of C (2.000) or better in all required mathematics courses.

Concurrent Major and Minor

The department offers a concurrent major and minor in both the electrical engineering and computer engineering programs. Consult the department office for a current detailed list of requirements.

Program Educational Objectives for Electrical and Computer Engineering

Graduates of the University of Wyoming Electrical and Computer Engineering Program will:

- Be able to successfully practice the profession of Electrical or Computer Engineering.
- Be prepared and motivated to accept challenging assignments and responsibilities and be productive members of society.
- Demonstrate successful career growth (e.g., professional registration, graduate school, promotion and advancement, patents, publications).

University of Wyoming, Electrical and Computer Engineering Program, Student Outcomes

All Electrical (Computer) Engineering graduates shall demonstrate:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Graduate Program - Electrical Engineering

The department offers programs of study leading to the Master of Science and Doctor of Philosophy degrees in electrical engineering. Study programs are individually planned to students' interests in both course work and research. The areas of major concentration at the graduate level are:

- Bio-Engineering
- Controls
- Electrical Energy Systems
- Electronic Systems and Devices
- Robotics
- Signal Processing and Computer Networks

The department also offers a combined B.S./M.S. program for exceptional students wishing to obtain both degrees in a shorter period of time.

Program Specific Admission Requirements

Statement of purpose

Official transcripts from all post-secondary institutions attended

GRE verbal percentile minimum of 45 percent. GRE quantitative percentile minimum of 65 percent.

TOEFL total of 79 iBT or IELTS total 6.5.

Program Specific Graduate Assistantships

Additionally, all international students who are state-funded teaching assistantships or any international student with teaching responsibilities are required to complete an Oral Proficiency Interview (OPI). Students will need to follow the recommendations to improve their English skills. Students on state-funding who fail to follow the recommendations or do not meet the minimum proficiency by the end of their first semester will not be able to receive any state-funding until they have demonstrated proficiency.

Department of Mathematics and Statistics

DAN STANESCU, B.Eng. Polytechnic Institute, Romania 1986; M.Eng. McGill University, 1994; Ph.D. Concordia University 1999; Associate Professor of Mathematics 2008, 2003.

MAN-CHUNG YEUNG, B.S. Jinan University, China 1986; M.Ph. University of Hong Kong 1990; Ph.D. University of California-Los Angeles 1997; Associate Professor of Mathematics 2005, 2001.

Assistant Professor:

PING ZHONG, B.S. Huanzhong University 2005; M.S. Peking University 2008; Ph.D. Indiana University 2014; Assistant Professor of Mathematics 2018.

Senior Lecturers:

DAVID ANTON, B.S. North Dakota State University 2001; M.S. University of Wyoming 2007; Senior Lecturer in Mathematics 2017, 2005.

WILLIAM WEBER, B.S. Colorado State University 1979; B.S. University of Wyoming 1988; M.S. 1992; Senior Lecturer in Mathematics 2012, 2001.

Associate Lecturer:

NATHAN CLEMENTS, B.S. Brigham Young University-Idaho 2007; M.S. Idaho State University 2009; D.A. 2012; Associate Lecturer in Mathematics 2019, 2012.

Assistant Lecturer:

CHRISTINA G. KNOX, B.S. California State Polytechnic University, Pomona 2012; M.S. 2014; Ph.D. University of California, Riverside, 2019; Assistant Lecturer of Mathematics 2019.

JORGE FLORES, B.S. Chadron State College 2015; M.S. University of Wyoming 2018; Assistant Lecturer of Mathematics 2020.

Adjunct Professors:

Saman Aryana, Hakima Bessaih, Li Deng Douglas, George Elliot, Benedetta Ferrario, Maria Garrido-Atienda, John Hitchcock, Robert Kansky, David Meyer, Bjorn Schmalfuss, Gerald Schuster, Dongwoo Sheen, Marie-Agnés Tellier

Professors Emeriti:

Charles Angevine, Leonard Asimow, Robert Buschman, Benito M. Chen-Carpentier, George C. Gastl, John H. George, Sylvia A. Hobart, Syed Husain, Peter Polyakov, A. Duane Porter, Ben G. Roth, John Rowland, Chanyoung Lee Shader, Raymond Smithson, John Spitler, Myron B. Allen III, Farhad Jarari.

"For the things of this world cannot be made known without a knowledge of mathematics."--Roger Bacon

Virtually every student at UW will take one or more math courses to fulfill graduation requirements. The intent is to illustrate the esthetics inherent in mathematics, and to provide students with the quantitative skills needed for today's careers.

Mathematics majors receive a broad and deep view of the mathematical sciences. They develop their mathematical thinking and communications skills in algebra, analysis, and applied math. They learn a variety of technological tools necessary for jobs in education, business, government, and industry. In addition to our math classes, the department

offers a variety of opportunities to enrich the undergraduate experience. Students can participate in weekly seminars, summer research projects, Putnam Team competitions, and the math club.

Mathematics Placement

All UW math courses have prerequisites which are detailed in the course listings below. These are to assure that each student has the best possible opportunity for success in the course. In accordance with this, *all students registering for a math course will have their records checked in order to determine whether the prerequisite is satisfied.*

A computerized prerequisite check is run prior to the start of every semester. *Students who preregistered for a math course but have not satisfied the prerequisites at the time of the check will be automatically dropped from the course.*

Prerequisites for courses numbered 2200 or lower (except MATH 1105 and MATH 2120), and MATH2350 - Business Calculus, may be satisfied in one of four ways:

1. Obtain a grade of C or better in a prerequisite course. Note that noncredit courses from out-of-state colleges are not accepted as prerequisites.
2. Pass the Mathematics Placement Exam (MPE) at the stated level within one year of the start of the course.
3. Obtain a sufficiently high score on one of the following standardized exams within three years of the start of the course: ACT math score or SAT quantitative score.
4. Obtain a sufficiently high score on one of the following standardized exams: AP Calculus, CLEP, or IB.

More information on mathematics placement may be obtained from 766-4221, or at www.uwo.edu/mathstats/math-placement.

Duplication of Courses (MATH 1400, MATH 1405, MATH 1450)

To avoid loss of credit because of duplication of course content, please note the following: (a) students with credit for both MATH 1400 and MATH 1405 will not receive new credit by taking MATH 1450; (b) students with credit for one of MATH 1400 or MATH 1405 will receive only 2 additional credits by taking MATH 1450; (c) students with credit for MATH 1450 will receive only 1 additional credit by taking both MATH 1400 and MATH 1405. Note that the GPA calculation for these situations is unusual, and students should ask the Registrar's Office for details.

Note that MATH 1450 counts as one attempt at each of MATH 1400 and MATH 1405 for the purposes of repeating classes.

Graduate Study

The Mathematics Program offers programs leading to the degrees of master of arts, master of science, master of arts in teaching, master of science in teaching, and the doctor of philosophy.

The requirements for these degrees reflect our belief that mathematicians should have a broad foundation in the core areas of algebra, analysis, and applied mathematics as well as the experience of a more intensive investigation of a specialized area. We provide this within a flexible structure that recognizes the individual interests and varied backgrounds of our students.

Program Specific Admission Requirements

To be competitive for admission, applicants must have strong backgrounds in mathematics. Generally, this means a bachelor's degree in mathematics or a closely related discipline. All applicants should have substantial coursework

beyond the calculus sequence; courses in differential equations, linear algebra, and, in particular, courses in abstract algebra and analysis are highly recommended. A solid performance on the GRE Subject Test in Mathematics can demonstrate the applicant's mastery of these subjects. The GRE Subject Test in Mathematics is therefore recommended but is not required.

The GRE General Test is required, with a minimum Quantitative Reasoning score of 157 and Verbal score of 143. International applicants need a composite TOEFL score of 76 or an IELTS score of 6.5.

ETS only reports TOEFL scores taken within two years of the date of request.

Graduate Assistantships

The mathematics program employs approximately 22 graduate assistants each year. Assistantships include a full tuition and fee waiver, a monthly living stipend, and health insurance. Ph.D. students normally receive a higher stipend than master's students.

Teaching assistants teach or assist with the teaching of an undergraduate course each semester.

Students may also compete for research assistantships, provided that their interests align with an externally funded research project.

Summer support is not guaranteed but is usually available through teaching and research opportunities.

Renewal of funding and continuation in the mathematics graduate program is dependent upon the student's adequate progress towards graduation and satisfactory completion of assistantship duties.

Statistics

223 Ross Hall, (307) 766-4221

FAX: (307) 766-6838

Web site: www.uwyo.edu/mathstats

Program Director: Ken Gerow

Professors:

KENNETH G. GEROW, B.S. University of Guelph, Canada 1981; M.Sc. 1984; Ph.D. Cornell University 1992; Professor of Statistics 2007, 1993.

TIMOTHY J. ROBINSON, B.S. James Madison University 1989; M.S. Virginia Polytechnic Institute and State University 1994; Ph.D. 1997; Professor of Statistics 2012

SHAUN S. WULFF, B.S. Montana State University 1991; M.S. 1994; Ph.D. Oregon State University 1999; Professor of Statistics 2019, 1999.

Assistant Professors:

ANNALISA PICCORELLI, B.A. Miami University of Ohio 2003; M.S. Case Western Reserve University 2007; Ph.D. 2010. Assistant Professor of Statistics 2015.

Assistant Lecturer:

MICHELE BIRD, B.A. University of Nevada, Las Vegas 1996; M.A. 2000; Assistant Lecturer of Statistics 2019.

JARED STUDYVIN, B.S. University of Wyoming 2009; Ph.D. University of Wyoming 2015; Assistant Lecturer 2021.

Adjunct Professors:

Robert Petit

Emeriti Faculty:

Stephen L. Bieber, Burke Grandjean, Richard Anderson-Sprecher.

The curriculum in statistics includes a firm foundation in mathematics and computer science, in addition to course work in statistical theory and methodology. Statistics majors are also required to obtain a minor in an area of application. The nature of statistical work is to design and analyze research projects through the application of the principles of mathematics, computer science, and statistics.

The student who wishes to make valid inferences from empirical data will find the field of statistics fascinating and rewarding. The study of statistics as a separate professional field is comparatively recent. The wide demand for graduates with special training in research and development techniques has fostered development of statistical curricula in colleges and universities. A pioneer in this field, the University of Wyoming is one of the few schools in the nation where a coordinated undergraduate training program in statistics is available.

We expect that students graduating with a statistics degree will be able to: 1) recognize the importance of variation and uncertainty in the world, 2) understand how statistics improves decisions when faced with uncertainty, 3) become proficient with a broad range of statistical tools, 4) develop critical thinking skills that enable application of statistics in new and unusual settings, and 5) communicate effectively. With these skills, graduates will be able to work effectively as statistical professionals and, if desired, successfully pursue further training at the master's and doctorate levels.

Graduates with statistical training are employed in a broad spectrum of areas which include the business world, the sciences (social, biological, physical and health), as well as engineering and education. For this reason, an area of application is required of each student.

The statistics program also offers graduate programs leading to a minor in statistics, and to a Master of Science (Plan A, Plan B), and Doctor of Philosophy in statistics.

Graduate Study

The Statistics Program offers graduate programs leading to a minor in statistics, and to a master of science in applied statistics (Plan B Option 1). The minor is designed to enhance the M.S. or Ph.D. program of any student enrolled in one of the graduate programs at the University of Wyoming. All of these programs emphasize the understanding and application of a broad variety of statistical methods on real projects. Students will be provided with numerous opportunities to perform analyses and communicate findings. The M.S. program in statistics is grounded in statistical theory.

Program Specific Admission Requirements

The prerequisite for admission to graduate study is an undergraduate degree from an accredited institution, including work in mathematics through calculus III, Linear Algebra and at least one second-level class in statistical methods. Prospective students are encouraged to have had Math Analysis and upper level introduction to probability and

mathematical statistics. A score of at least 150 on the verbal reasoning section and a score of at least 141 on the quantitative reasoning section is required for the Master's Degree and the TOEFL exam is required for international students. The minimum score for the TOEFL is 540 (76 Internet-based Test) or for IELTS minimum score is 6.5. Students who do not have prerequisites in mathematics and statistics may make up this deficiency at the beginning of their graduate program; however, such work does not count toward graduation requirements.

Department of Mechanical Engineering

2052 Engineering Building, (307) 766-2122

Web site: www.uwyo.edu/mechanical

E-mail: me.info@uwyo.edu

Department Head: Erica Belmont

Professors:

DENNIS N. COON, B.S. Alfred University New York; M.S. 1984; Ph.D. Pennsylvania State University 1986; Professor of Mechanical Engineering 1999, 1988.

DIMITRI J. MAVRIPLIS, B.S. McGill University 1982; M.Eng. 1982; Ph.D. Princeton University 1987; Professor of Mechanical Engineering 2003.

JONATHAN W. NAUGHTON, B.S. Cornell University 1986; Ph.D. Pennsylvania State University 1993; Professor of Mechanical Engineering 2012, 1997.

Associate Professors:

DILPUNEET S. AIDHY, B.E. Punjab Engineering College 2004; Ph.D. University of Florida 2009; Associate Professor of Mechanical Engineering 2021, 2015.

ERICA L. BELMONT, B.S. Tufts University 2004; M.S. 2008; Ph.D. University of Texas at Austin 2014; Associate Professor of Mechanical Engineering 2020, 2014.

RAY S. FERTIG III, B.S. University of Wyoming 2001; M.S. 2003; Ph.D. Cornell University 2010; Associate Professor of Mechanical Engineering 2017, 2011.

MICHAEL STOELLINGER, M.S. Technical University Munich 2005; Ph.D. University of Wyoming 2010; Associate Professor of Mechanical Engineering 2018, 2012.

Assistant Professors:

MAYSAM MOUSAVIRAAD, B.S. Sharif University of Technology 2002; M.S. 2004; Ph.D. University of Iowa 2010; Assistant Professor of Mechanical Engineering 2017.

XIANG ZHANG, B.S. Northeastern University (China) 2009; M.S. Beihang University (China) 2012; Ph.D. Vanderbilt University 2017; Assistant Professor of Mechanical Engineering 2019.

Instructional Professors:

RAMSANKAR VEERAKUMAR, B.S in Mechanical Engineering , University of Kerala, India, 2005. M.S. in Mechanical Engineering , Birla Institute of Technology and Science (BITS Pilani), India, 2014. Ph.D. in Aerospace Engineering, Iowa State University 2021. Instructional Assistant Professor, 2021.

Lecturers:

KARI STRUBE, BS in Electrical Engineering (bioengineering option), University of Wyoming 2007. MS in Electrical Engineering, University of Wyoming, 2009. Assistant Lecturer, 2021

Professors Emeriti:

Donald F. Adams, Paul A. Dellenback, Bruce R. Dewey, Andrew Hansen, William R. Lindberg, Kynric M. Pell, Ovid A. Plumb, David E. Walrath, Robert A. Wheasler

Mechanical Engineering B.S.

Mechanical Engineering is the broadest area of study in engineering. In contrast to other engineering disciplines, mechanical engineers are employed in significant percentages in almost all industrial and governmental organizations that employ engineers.

The spectrum of activities in which mechanical engineers are engaged continues to expand. The curriculum has in turn become flexible to allow for the education of mechanical engineering students in many diverse and allied areas, or for graduate school preparation.

The educational objectives of the of Mechanical Engineering B.S. program are to prepare students to:

- Successfully practice the profession of engineering.
- Demonstrate career growth (e.g. increasing complexity of job assignment, career promotions, professional registration, patents, publications, and completion of advanced degrees).
- Apply Mechanical Engineering knowledge to find creative solutions to evolving challenges with global, economic, environmental, and societal impacts.
- Successfully serve in a range of leadership and collaborative roles in the profession in the community.
- Exhibit high professional standards and commitment to ethical action.

The undergraduate program includes a foundation in mathematics, science, and engineering sciences. The three key elements of the mechanical engineering undergraduate program include core engineering principles, laboratory experience, and development of communication skills.

The mechanical engineering curriculum affords the student the flexibility to pursue specific professional goals within the discipline. Such an opportunity needs to be carefully considered by each student, so that elective courses are chosen with these goals in mind. During the junior and senior years, the student selects 15 credit hours of technical electives.

Mechanical and Energy Systems Engineering degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 (C) in Mechanical and/or Energy Systems engineering courses completed at this university. A grade of C or better must be earned in all engineering science (ES) and required mathematics courses.

Mechanical Engineering, B.S.

Energy Systems Engineering B.S.

Energy Systems Engineering (ESE) is an ABET-accredited undergraduate degree offering in the Department of Mechanical Engineering. The ESE program was designed to train engineers to address one of this country's foremost challenges: to achieve energy independence and meet the growing demand for energy, while at the same time addressing critical environmental concerns. The program is intended to help meet these challenges by preparing students to be:

- technology leaders in energy conversion and environmental protection systems
- capable managers in the energy industry
- versatile overseers of energy development by the governmental sector
- technically-trained and environmentally-sensitive liaisons between the energy industry and the public.

ESE students will be trained in alternative and environmentally-friendly energy conversion systems, as well as more traditional technologies that will continue to play an important role for the foreseeable future.

Although the discipline of mechanical engineering has historically been responsible for the design of energy conversion cycles and equipment, issues outside the conventional realms of engineering are increasingly important to address as new and improved energy conversion systems are implemented. The engineer trained in Energy Systems will be better equipped than traditional mechanical engineers to deal with the environmental, legal, political, economic, and permitting aspects of new energy projects.

The educational objectives of the of Energy Systems Engineering B.S. program are to prepare students to:

- Successfully practice the profession of engineering.
- Demonstrate career growth (e.g. increasing complexity of job assignment, career promotions, professional registration, patents, publications, and completion of advanced degrees).
- Apply Energy Systems Engineering knowledge to find creative solutions to evolving challenges with global, economic, environmental, and societal impacts.
- Successfully serve in a range of leadership and collaborative roles in the profession in the community.
- Exhibit high professional standards and commitment to ethical action.

The ESE degree has many coursework requirements in common with the Mechanical Engineering degree, particularly in the thermal, fluids, and energy conversion sciences. However, the ESE program emphasizes energy conversion aspects of Mechanical Engineering and requires coursework from UW's School of Environment and Natural Resources (ENR), course work in environmental law, and electives picked from a list of classes that focus attention on energy and the environment. The ENR courses expose students to issues related to permitting such as preparation of environmental impact studies, and related regulations such as the Endangered Species Act. In addition, technical electives allow students to choose more detailed study in personal areas of interest including, for example, courses in environmental engineering, wind engineering, solar engineering, and petroleum engineering.

Mechanical and Energy Systems Engineering degree candidates must meet the academic requirements of the college and in addition must have an average GPA of 2.000 (C) in Mechanical and/or Energy Systems engineering courses completed at this university. A grade of C or better must be earned in all engineering science (ES) and required mathematics courses.

Energy Systems Engineering, B.S.

Concurrent ME/ESE Degrees

In the event that a student desires concurrent majors in ME and ESE, University policy requires that ALL requirements for each program are met. The student must select which will be the primary major.

Graduate Study

The Department of Mechanical Engineering offers graduate study leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering. Faculty in Mechanical Engineering conduct research in the areas of aerodynamics, biomaterials, composite materials, computational material science, computational fluid dynamics, combustion, continuum mechanics, heat transfer, materials reliability, mechanical behavior of materials, nanomechanics of surfaces and interfaces, and wind energy.

Department Specific Graduate Admission Requirements

Applicants should possess a Bachelor of Science (B.S.) degree or equivalent in Mechanical Engineering with a minimum GPA of 3.000 on a 4.000 grade scale or equivalent. Students that do not hold B.S.M.E. degrees may qualify as M.S. candidates by completing, without credit, certain prerequisite courses as specified by the Department. These prerequisites would depend upon the candidate's background and upon the area in which he/ she plans to specialize.

A minimum composite score of 294 (MS) or 307 (PhD) on the Verbal and Quantitative sections of the GRE is required for admission to the Mechanical Engineering Department. For international students, a minimum TOEFL score of 90 on the Internet-based test (iBT) (or a minimum IELTS score ≥ 6.5 or a DuoLingo ≥ 110) is required. If an international applicant wishes to be considered for Graduate Teaching Assistantship funding, the following minimum English Proficiency must be met: OPI \geq Advanced Mid, TOEFL Speaking ≥ 23 , IELTS Speaking ≥ 6.5 , DuoLingo Conversation & Production (average) ≥ 110 . If an international applicant wishes to be considered for Graduate Teaching Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/study-iep-esl/grad-ta-support/index.html>) if you have questions regarding the English proficiency requirements. Admittance to the graduate program is competitive, and the average applicant that is accepted with assistantship support will likely have well above the minimum qualifications.

In order to apply, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>): resume, copy of academic transcript, copy of GRE scores, copies of TOEFL (or IELTS or DuoLingo) scores for international non-native English speaking applicants, three letters of reference, and a Statement of Purpose indicating the applicant's technical area of interest, abilities, and objectives in completing a graduate degree in mechanical engineering. If you are applying for the BS/MS program, please choose "QuickStart - Mechanical Engineering BS/MS" as the program (no GRE score and Statement of Purpose are needed for the BS/MS application). Applicants to the joint MBA/MS-ME program should chose the MS degree program for the application. To be considered for Assistantships, applications must be submitted before March 15 for the Fall semester or October 15 for the Spring semester.

For Quickstart B.S./M.S. admissions requirement, see degree link below.

Department of Petroleum Engineering

4015 Engineering Building, (307) 766-4258

Web site: www.uwyo.edu/petroleum

Department Head: Dennis Coon, Ph.D., Interim

Professors:

HERTANTO ADIDHARMA, B.Sc. Institute of Technology, Surabaya 1987; Ph.D. Louisiana State University 1999; Professor of Chemical Engineering 2019.

MAOHONG FAN, B.S. Wuhan University of Science and Engineering 1984; M.S. Beijing University of Science and Tech. 1992; Ph.D. Chinese Academy of Sciences 1997; Ph.D. Iowa State University 2000; Ph.D. Osaka University 2003; Professor of Chemical Engineering 2014.

KHALED A.M. GASEM, B.Sc. University of California at Berkley 1976; M.Sc. Colorado School of Mines 1979; Ph.D. Oklahoma State University 1986; Professor of Chemical Engineering 2014.

LAMIA GOUAL, B.Sc. Ecole Nationale Polytechnique 1993; M.Sc. Imperial College, London 1998; Ph.D. 2003; Professor of Petroleum Engineering 2021.

MOHAMMAD PIRI, B.Sc. Azad University, Arak 1995; M.Sc. Azad University, Tehran 1998; M.Sc. Imperial College, London 2000; Ph.D. 2004; Professor of Petroleum Engineering 2018.

Associate Professors:

PEJMAN TAHMASEBI, B.S. Sahand University of Technology 2007; M.Sc. Amirkabir University 2009; Ph.D. University of Southern California/Amirkabir University 2012; Associate Professor of Petroleum Engineering 2021.

MORTEZA DEJAM, B.Sc. Petroleum University of Technology 2007; M.Sc. Sharif University of Technology 2009; Ph.D. University of Calgary 2016; Associate Professor of Petroleum Engineering 2022.

SOHEIL SARAJI, B.S. Petroleum University of Technology 2004; M.Sc. Sharif University of Technology 2007; Ph.D. University of Wyoming 2013; Associate Professor of Petroleum Engineering 2022.

Academic Professionals:

TAWFIK ELSHEHABI, B.Sc. Suez Canal University 2003; M.Sc. 2007; Ph.D. West Virginia University 2017; Senior Lecturer of Petroleum Engineering 2019.

Instructional Professors:

REZA TAHERI, B.Sc. Amirkabir University 1997; M.S. University of Twente, Netherlands 2001; Ph.D. Curtin University 2008; Assistant Instructional Professor of Petroleum Engineering 2020.

Professors of Practice:

DOUGLAS CUTHBERTSON, B.S. University of Wyoming 1985; Professor of Practice in Petroleum Engineering 2016.

BRIAN TOELLE, B.S. Texas A&M University 1978; M.S. Austin State University 1981; Ph.D. West Virginia University 2013; Professor of Practice in Petroleum Engineering 2015.

Professors Emeriti:

Jack Evers
H. Gordon Harris
Norman R. Morrow

Mrityunjai P. Sharma
Brian Towler

Petroleum Engineering trains students for Wyoming's largest industries, the production of crude oil and gas. With the recognition of the state's and nation's vast reserves of natural gas, the curriculum emphasizes the production and processing of this important resource. Because of American predominance in petroleum technology, career opportunities are available throughout most of the world.

The curriculum in petroleum engineering is based upon sound preparation in fundamental sciences, mathematics, physics, chemistry, and geology. The essentials of engineering are added to this foundation: computer programming, statics, dynamics, materials science, hydraulics, and thermodynamics. To aid in developing individuals' social potential and broaden their educational background, an integrated program in humanities and social sciences is included in the curriculum. Petroleum engineering courses, which are primarily concerned with application of previously acquired knowledge to problems of the oil and gas industry, are concentrated in the junior and senior years.

Petroleum Engineering degree candidates must meet the academic requirements of the college and must have a GPA of 2.000 or greater in Petroleum Engineering (PETE) courses attempted at UW that are applied toward graduation for the B.S. degree from the department. For approved electives, students must have prior approval of their advisor and department head. Elective courses must be chosen from a list provided by the department. Students must complete a minimum of 48 upper division (junior/senior) or graduate-level credit hours for this program.

Program Vision

As a highly respected community of scholars and practitioners, we are committed to providing outstanding petroleum engineering education, conducting internationally recognized research in key focus areas, and improving the well-being of the people of Wyoming and the world through education, technical innovation and economic development.

Program Mission

Provide outstanding, contemporary, ABET-accredited education in petroleum engineering to highly qualified undergraduates who will serve as an economic resource for Wyoming and the world.

Provide excellent, research-based graduate educations at the master's and doctoral levels in petroleum engineering to top students who will drive technical and economic innovation for Wyoming and the world.

Conduct internationally recognized research in key focus areas that leads to new technologies while also enhancing economic development for Wyoming and the world.

Program Educational Objectives

Three to six years after graduation, graduates who choose to practice in Petroleum Engineering should:

- (PETE-OB1) Successfully practice the profession/field of petroleum engineering or related discipline.
- (PETE-OB2) Demonstrate successful career accomplishment and civic engagement.

Program Outcomes

During the course of study in Petroleum Engineering, the student should develop:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Undergraduate "Major Only" Courses

Upper division PETE core courses are restricted to petroleum engineering majors only.

Technical Electives Policy

The technical electives in the petroleum engineering curriculum can be used to complete a curriculum emphasis option or a minor. The number of credits of upper division courses must be satisfied, therefore, 13 elective credits must be 3000-level courses or higher.

Note: Technical Electives must be selected with your advisor's documented approval.

Transfer Credit Limit

To graduate with a degree in Petroleum Engineering from UW, students must successfully complete at least 20 credit hours of required PETE courses at UW.

1. Once a student has transferred to UW's Department of Petroleum Engineering from another institution, they may transfer no more than 9 additional credits from other institutions.
2. Non-transfer students may transfer up to 18 credits from other institutions.

Repeating a Course

Students who fail a PETE class three times can no longer enroll in that class.

Academic Suspension

Students who have been academically suspended from UW twice are no longer eligible to enroll in PETE courses.

Curriculum Emphases

The Department of Petroleum Engineering has established curriculum emphases that could shape your interest further or acquire useful transferable skills. A curriculum emphasis is not a minor or concentration and will not be stated on your diploma. If you choose to follow a curriculum emphasis option, you should discuss it with your academic advisor so they can assist you in planning your courses.

Petroleum Engineering offers the following curriculum emphasis options:

- Unconventional Reservoirs
- Chemical Engineering
- Mechanical Engineering
- Graduate School Preparation

BS/MS Quick Start Program

The BS/MS Quick Start program in Petroleum Engineering (PETE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their Bachelor of Science (B.S.) degree in Petroleum Engineering. These students may apply for admission to the Quick Start program during the first or second semester of their junior year or *before* starting their senior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and better planned use of time should result in reduction of the time required for obtaining the Master of Science in Petroleum Engineering degree. Students who enter the Quick Start program must accept primary responsibility for actively planning their Programs of Study to assure timely completion of their course work and research programs.

The Quick Start program contains two essential elements:

1. Qualified students may receive provisional admission to the Petroleum Engineering graduate program by submitting a quick start application through the online graduate application system. This provisional admission will permit students to make their long-term educational plans earlier in their studies and before graduating the B.S. program, thus providing enhanced opportunities for course selection and involvement in research.
2. Students in the program may apply up to 6 credit hours of graduate-level courses toward both the B.S. and M.S. degree programs. By successfully completing up to 6 credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level course work as undergraduates, easing their transition to the Petroleum Engineering graduate program.

For additional information, visit our website for admissions information

<http://www.uwyo.edu/petroleum/undergraduate/current-students/quickstart.html> or contact our graduate admissions coordinator at pete-info@uwyo.edu.

Graduate Study

The Department of Petroleum Engineering offers graduate programs leading to the M.S. and Ph.D. degrees in petroleum engineering. The M.S. degree is offered with Plan A and Plan B options.

In addition, the Department offers an M.B.A./M.S. in Petroleum Engineering Dual Degree Program, in conjunction with the College of Business M.B.A. Program. Students pursuing this option must apply to and be offered admission from both programs.

Admission Process and Requirements

Graduate admission is open to students with at least a B.S. degree in petroleum engineering or closely related field and who meet the minimum requirements as shown below. Please note that test scores must be dated within the previous two years to be considered valid.

- A GPA of 3.000, or equivalent;
- A GRE score;

- A TOEFL score of 600 (paper-based), 250 (computer-based), or 80 (Internet based) **or** an IELTS score of 6.5 in each category for international applicants. We are also accepting the DuoLingo exam with a minimum score of 110 required.

Applications must include the following documents uploaded with the online application:

1. Complete official transcripts of all prior college-level coursework,
2. Current resume or curriculum vitae,
3. Recommendations from at least three academic or professional references,
4. A statement of purpose, and
5. Unofficial test score certificates for both GRE and English proficiency exams.

Applications will not be reviewed or accepted until all required documents have been submitted.

The deadlines to submit applications are February 1 each year (to be considered for Fall semester), and September 15 each year (to be considered for Spring semester).

For additional information, visit our website for admissions information <http://www.uwyo.edu/petroleum/graduate/prospective/index.html> or contact our graduate admissions coordinator at pete-info@uwyo.edu.

Graduate Courses of Study

Incoming graduate students, not preselected by a faculty member, must meet with Petroleum faculty members to obtain information regarding research areas and current availability. The student must formally request a Petroleum faculty member of their choosing to oversee their degree study program.

Masters Program

1. All Petroleum M.S. students with a B.S. in Petroleum Engineering from an accredited program must take the following courses:

Required Courses	Hrs.
PETE 5355.....	3
PETE 5890.....	2

At least three Core Courses from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5310.....	3
PETE 5350.....	3

Plan A Thesis Additional Course

Requirements:

4000-level or above approved electives.....	12
PETE 5960.....	4

Total Credits 30

Plan B Non-Thesis Additional Course

Requirements:

4000-level or above approved electives.....	14
PETE 5970.....	2

Total Credits 30

2. All Petroleum M.S. students with a B.S. in Chemical or Mechanical Engineering from an accredited program must take the following courses:

Required Courses	Hrs.
PETE 5055	3
PETE 5340	3
PETE 5355	3
PETE 5715	3
PETE 5890	2

At least four Core Courses from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5310.....	3
PETE 5350.....	3

Plan A Thesis Additional Course

Requirements:

4000-level or above approved electives.....	7
GEOL 5190.....	3
PETE 5960.....	4

Total Credits 40

Plan B Non-Thesis Additional Course

Requirements:

4000-level or above approved electives.....	7
GEOL 5190.....	3
PETE 5970.....	4

Total Credits 40

Dual Degree Program - M.B.A./M.S. degree in Petroleum Engineering

3. All Dual Degree M.S. students with a B.S. in Petroleum Engineering from an accredited program must take the following required courses:

Required Courses	Hrs.
PETE 5355.....	3
PETE 5890.....	2

At least three Core Courses from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5310.....	3
PETE 5350.....	3

Plan A Thesis Additional Course

Requirements:

4000-level or above approved electives.....	3
M.B.A. approved electives:	

MBAM 5XXX, MBAM 5301, MBAM 5305.....9
 PETE 5960.....4

Total Credits 30

Plan B Non-Thesis Additional Course

Requirements:

4000-level or above approved electives.....5
 M.B.A. approved electives:
 MBAM 5XXX, MBAM 5301, MBAM 5305.....9
 PETE 5970.....2

Total Credits 30

4. All Dual Degree students with a B.S. in Chemical or Mechanical Engineering from an accredited program must take the following required courses:

Required Courses	Hrs.
PETE 5055	3
PETE 5340	3
PETE 5355	3
PETE 5715	3
PETE 5890	2

At least four Core Courses from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5310.....	3
PETE 5350.....	3

Plan A Thesis Additional Course

Requirements:

4000-level or above approved electives.....3
 M.B.A. approved electives:
 MBAM 5XXX, MBAM 5301, MBAM 5305.....9
 PETE 5960.....4

Total Credits 42

Plan B Non-Thesis Additional Course

Requirements:

4000-level or above approved electives.....5
 M.B.A. approved electives:
 MBAM 5XXX, MBAM 5301, MBAM 5305.....9
 PETE 5970.....2

Total Credits 42

Note: For a student with a B.S. in another discipline, upon acceptance into the M.S. program, the Graduate Program Committee will develop a plan of study with the consent of the advisor.

Doctoral Program

1. All Petroleum Ph.D. students with a B.S. in Petroleum Engineering must take the following required courses:

Required Courses	Hrs.
PETE 5090.....	3
PETE 5355.....	3
PETE 5890.....	6

At least four Core Courses* from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5255.....	3
PETE 5310.....	3
PETE 5350.....	3

Electives**

4000-level or above approved electives.....18

Research

PETE 5980..... 30

Total Credits 72

2. All Petroleum Ph.D. students with an B.S. in Other Majors must take the following required courses:

Required Courses	Hrs.
PETE 5090.....	3
PETE 5355.....	3
PETE 5890.....	6

At least five Core Courses* from the following:

PETE 5010.....	3
PETE 5020.....	3
PETE 5060.....	3
PETE 5080.....	3
PETE 5255.....	3
PETE 5310.....	3
PETE 5350.....	3

Electives**

4000-level or above approved electives.....15

Research

PETE 5980..... 30

Total Credits 72

**Transferable from MS degree if applicable.*

***Up to 14 credits of electives transferable from MS degree if applicable.*

Graduate Seminar Requirements

All petroleum engineering graduate students must enroll in PETE 5890, Petroleum Engineering Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester.

Graduate Teaching Requirement

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by any source other than state funds will work with their supervisor or faculty mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

Ph.D. Preliminary Examination

Candidacy in the doctorate occurs upon certification of successful completion of the preliminary examination. The preliminary examination will be held at least 15 weeks prior to the final examination. The preliminary examination may not be given before: (a) the research tool requirements, if any, have been met and certification approved; (b) at least 30 hours of coursework have been completed; and (c) the doctoral program of study has been approved.

The goal of the preliminary exam is for the student to present the research proposition that is being investigated and will lead to the final dissertation, and demonstrate progress to-date. The preliminary exam consists of three components:

- a written document provided to each member of the student's graduate committee at least three weeks prior to the oral presentation;
- a public oral presentation; and
- a private examination by the student's graduate committee immediately following the oral presentation.

The written document may be in any format but must concisely provide a survey of the relevant literature, a summary of the student's progress to-date, and a clear, detailed plan for the successful completion of the proposed work. The preliminary exam oral presentation should be consistent with the written document. It should provide an appropriate literature background, demonstrate proficiency with proposed experimental/computational techniques, identify details of the experiments to be performed, and provide a timeline to final defense.

The student's committee will pass or fail the student on the strength of the preliminary examination, with an option to conditionally pass the student while requiring an interim committee meeting prior to the final Ph.D. examination. The Report on Preliminary Examination for Admission to Candidacy form sent to the Office of the Registrar reports the results of the examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

School of Computing

College of Health Sciences

235 Health Sciences Center

David Jones, Dean

Phone: (307)766-6556 FAX: (307)766-6608

Web site: www.uwyo.edu/hs

The College of Health Sciences is the place for students interested in improving and maintaining the physical, mental, and social health of others. We offer challenging degree programs in the "helping professions" and serve as the gateway to schools of medicine, dentistry, physical and occupational therapy, physician's assistant study, optometry, and more.

Health sciences students receive not only a superior education from knowledgeable and caring faculty but also precise and personal guidance from conscientious advising personnel. Students benefit, too, from practicums and internships that help them refine and test the skills acquired in lectures and labs as well as opportunities to participate in dynamic, interdisciplinary research projects.

The college is also the home of the Wyoming Institute for Disabilities (WIND); two Family Medicine Residency Centers; and the WWAMI Medical Education Program.

We serve as the state certifying office for the Wyoming, Washington, Alaska, Montana, and Idaho (WWAMI) medical education contract program with the University of Washington School of Medicine; WYDENT, the dental education contract program with the University of Nebraska and Creighton University; and two programs for the Western Interstate Commission of Higher Education (WICHE): the Professional Student Exchange Program (PSEP) and the Western Regional Graduate Program (WRGP). Refer to the sections on WWAMI, WYDENT, and WICHE in this catalog for program descriptions or go to www.uwyo.edu/certwy.

Any student seeking admission to programs in the College of Health Sciences will be required to obtain a background check as specified by college policy. Please contact your school or division for specific information.

The College of Health Sciences retains the right to deny or revoke admission to any of its programs for academic, disciplinary, ethical, or professional standards reasons.

Programs of Study

Undergraduate Degrees

Bachelor of Science

Kinesiology and Health Promotion

Medical Laboratory Science

Physical Education Teacher Education K-12
Speech, Language and Hearing Sciences

Bachelor of Science in Dental Hygiene
Bachelor of Science in Nursing
Bachelor of Social Work

Graduate Degrees

Master of Science

Health Services Administration
Nursing
Kinesiology and Health
Speech-Language Pathology

Master of Social Work

Professional Degrees

Doctor of Nursing Practice
Doctor of Pharmacy

Minor in the College of Health Sciences

Disability Studies

Disability studies is a diverse interdisciplinary field that investigates broad questions about the nature, meanings, and consequences of disability from interrelated social, historical, cultural, and political perspectives. Students will gain a broad understanding of disability issues for working with people with disabilities rather than specific disciplinary skills and techniques. The minor complements any major and consists of 18 credit hours. See www.uwyo.edu/hs/divisions-and-programs/minor-indisability-studies.html.

Undergraduate and Pre-Health Advising Office

Health Sciences Center, 110

The Undergraduate and Pre-Health Advising Office (UPHAO) in the College of Health Sciences (www.uwyo.edu/preprof/) provides pre-professional health advising to all UW students regardless of their academic majors, who are interested in pursuing future study in athletic training, chiropractic, dentistry, medicine, optometry, occupational therapy, physical therapy, physician assistant, or other health care careers such as public health. A bachelor's degree is usually required for admission to a professional school. The University of Wyoming does not offer degrees in pre-professional areas. Students may pursue any UW degree program in which they have an interest and at the same time complete the admission requirements for the professional schools they wish to attend. The UPHAO advises students for their professional program prerequisites as well as other aspects of becoming solid candidates. Each student will also have an advisor in his/her major.

Through this office, pre-health students can access current information about admission requirements, entrance examinations, application process, professional school curriculums, interviewing skills, and test preparation. Specific schools may have additional requirements; students are urged to check with the schools they wish to attend.

Information and Wyoming state residency applications for the WICHE PSEP program, the WWAMI medical education program, and the WYDENT dental education program, may be found online at <http://www.uwyo.edu/certwy>.

Please view individual division and program pages list for full course and curriculum listings

Division of Communication Disorders

265 Health Sciences, (307) 766-6427

FAX: (307) 766-6829

Web site: www.uwyo.edu/comdis

Director: Mark Guiberson

Professors:

MARK GUIBERSON, B.A. University of Colorado 1997; M.A. 1999; Ph.D. Colorado State University 2006; Professor of Speech-Language Pathology 2019, 2011.

Assistant Professors:

KATELYN J. KOTLAREK, B.S. University of Wisconsin-Madison 2012; M.S. Florida State University 2014; Ph.D. East Carolina University 2019; Assistant Professor 2019.

BREANNA KRUEGER, B.A. University of Wyoming 2007; M.A. University of Kansas 2011; M.A. 2013; Ph.D. 2017; Assistant Professor 2017.

Lecturers:

SHELLEY BARTON, B.A. University of Wyoming 2005; M.S. 2008; Instructor 2018.

ESTHER HARTSKY, B.A. Adams State University 2000; A.A.S. Pikes Peak Community College 2004; Assistant Lecturer 2017.

KARLEE SMITH, B.S. University of Wyoming 2014; M.S. University of Wyoming 2013; Lecturer 2020.

Clinical Professors:

TERESA J. GARCIA, B.S. University of Wyoming 1989; M.S. 1991; Clinical Professor 2020, 2016, 1995.

Assistant Clinical Professors:

CORRI SANDOVAL, B.S. University of Wyoming 2000; M.S. 2010; Assistant Clinical Professor 2020.

HEIDI CLARK, B.S. University of Virginia 1998; M.A. Kent State University 2000; Assistant Clinical Professor 2020.

Adjunct Clinical Instructor:

Melissa Denker, M.S., CCC-SLP

Professors Emeriti:

Janis A. Jelinek, Douglas W. Laws, Michael A. Primus, Mary Hardin-Jones, David L. Jones

About the Division of Communication Disorders

The Division of Communication Disorders offers three academic programs: a certificate in American Sign Language Studies, a Bachelor's of Science (B.S.) degree in Speech, Language and Hearing Science, and a Master of Science (MS) degree in Speech-Language Pathology. Information on these programs can be found on the links on the bottom of this page. In addition, the College of Education's Curriculum and Instruction, Ph.D., Concentration in Literacy Education, is a doctorate degree in which affiliated Division of Communication Disorders faculty can offer doctorate coursework, advising, and other involvement. See the College of Education website for details. The Division is also home to the University of Wyoming Speech & Hearing Clinic. Information about the Division's Vision, Mission, and Strategic Plan can be found on the Division website, as well as important information about the Division's Diversity, Equity, and Inclusion statement (<http://www.uwyo.edu/comdis/>).

Speech and Hearing Clinic

The UW Speech and Hearing Clinic is a training center for students from the Division of Communication Disorders, including B.S. students in the Speech, Language, and Hearing Sciences program and M.S. students in the Speech-Language Pathology program. Student clinical experiences occur under the direct supervision of state licensed and ASHA-certified speech-language pathologists (CCC-SLP). The clinic also provides audiology services from a ASHA-certified and state licensed audiologists (CCC-A). In addition to on-campus services, the clinic provides telepractice speech-language pathology services. Clinical services are available to students, faculty as well as the larger community. More information can be found on the UW Speech and Hearing Clinic website <http://www.uwyo.edu/comdis/uw-speech-and-hearing-clinic/index.html>.

Director: Derek Smith

Professors:

TAMI BENHAM DEAL, B.S. Indiana University 1981; M.S. 1988; P.E.D. 1989; Professor of Kinesiology and Health 2012.

CHRISTINE M. PORTER, B.S. University of Maryland 1993; M.A. University of London 2002; Ph.D. Cornell University 2010; Professor of Kinesiology and Health 2021, 2016, 2010.

TRISTAN WALLHEAD, B.S. Loughborough University 1994; M.S. Leeds Metropolitan University 2000; Ph.D. Ohio State University 2004; Professor of Kinesiology and Health 2017, 2010, 2004.

QIN ZHU, B.S. Shanghai University of Sports 1999; M.Ed. 2002; Ph.D. Indiana University 2008; Professor of Kinesiology and Health 2020, 2014, 2008.

Associate Professors:

BOYI DAI, B.Ed. Beijing Sport University 2007; M.S. Iowa State University 2009; Ph.D. University of North Carolina at Chapel Hill 2012; Associate Professor of Kinesiology and Health 2017, 2012.

EVAN C. JOHNSON, B.A. The George Washington University 2004; M.A. University of Connecticut 2008; Ph.D. 2014; Associate Professor of Kinesiology and Health 2020, 2015.

R. TUCKER READDY, B.A. University of California, Berkeley 2000; M.A. San Diego State University 2004; Ph.D. Oregon State University 2009; Associate Professor of Kinesiology and Health 2016, 2010.

DEREK SMITH, B.S. Colorado State University 1997; M.S. Wake Forest University 1999; Ph.D. University of Colorado 2003; Associate Professor of Kinesiology and Health 2009, 2003.

Assistant Professors:

DANIELLE BRUNS, B.S. Linfield College-McMinnville 2008; M.S. Colorado State University 2010; Ph.D. 2013; Assistant Professor of Kinesiology and Health 2018.

BEN KERN, B.A. Western Colorado University 1999; M.A. Adams State University 2002; Ph.D. University of Illinois Urbana-Campaign 2017; Assistant Professor Kinesiology and Health 2020.

EMILY E. SCHMITT, B.S. Elon University 2007; M.S. University of North Carolina at Charlotte 2009; Ph.D. Texas A&M University 2015; Assistant Professor of Kinesiology and Health 2018.

KELLY SIMONTON, B.S. University of Wyoming 2014; M.S. Louisiana State University 2016; Ph.D. Louisiana State University 2018; Assistant Professor of Kinesiology and Health 2021.

Academic Professional:

MARCI SMITH, B.S. Colorado State University 1995; M.S. Wake Forest University 1998; Senior Lecturer in Kinesiology and Health 2015, 2003.

Adjunct Faculty:

Laurence Deal, Shane Tweeter

Professors Emeriti:

Paul Dunham, Ward Gates, Charles W. Huff, Donna Marburger, D. Paul Thomas, Mark Byra, Jayne Jenkins

The Division of Kinesiology and Health offers the Kinesiology and Health Promotion (K&HP) major and the Physical Education Teacher Education (PHET) major. These two majors prepare students in kinesiology and health promotion for a variety of clinical and nonclinical settings including teaching physical and health education in schools K-12. Students enrolled in these programs must meet academic standards as determined by the Division of Kinesiology and Health, College of Health Sciences, and the University of Wyoming.

The K&HP major prepares students well for admission to physical therapy school and occupational therapy school, as well as other health professions (e.g., physician, physician assistant, dentist, chiropractor, optometrist, etc.). Approximately 60% of students majoring in K&HP apply to one of these health professional schools once they have completed their B.S. degree in Kinesiology and Health. Other students majoring in training, fitness, recreation, and leisure, and health promotion with state agencies enter a very diverse job market.

The PHET program prepares students to teach physical and health education (PHET) in K-12 schools. The PHET major is a nationally recognized program for meeting the NASPE/NCATE Initial Physical Education Teacher Education Accreditation Standards. This program offers individuals opportunity to combine certifications/endorsements in health education K-12, adapted physical education K-12, and coaching.

A graduate program leading to a Master of Science degree in Kinesiology and Health is offered by the Division.

Professional Program

Students who meet University of Wyoming entry requirements are admitted to the university in one of the two undergraduate majors that leads to the Bachelor of Science degree. The Division's undergraduate majors are open at the freshman level to all graduates of accredited high schools. Advanced placement for students with previous college credit is based on evaluation of transcripts of previous academic work.

Students in the Kinesiology & Health Promotion (K&HP) program are ready to move forward in the junior year of the program when they complete the pre-requisite requirements to enroll in KIN 3021 and KIN 3022, Physiology of Exercise lecture and laboratory. To be eligible for the K&HP Professional Program (junior/senior years), students must have completed all program course prerequisites and have a minimum cumulative grade point average of 2.750, preferred GPA of 3.000. Advancement in the K&HP Professional Program is complete once prerequisite criteria is met.

The entry course for admission to the Physical Education Teacher Education (PHET) program is KIN3012 - Teaching Laboratory I. To be eligible, for the PHET professional program, students must have completed all program course prerequisites and have a minimum cumulative grade point average of 2.750, preferred GPA of 3.000. Admission to the last two years of the PHET major is a competitive process. Application to the PHET majors is conducted only for fall. The application deadline is early April.

Undergraduate Majors

Kinesiology and Health Promotion, B.S.

Physical Education Teacher Education K-12, B.S.

Additional School Endorsements K-12

Adapted Physical Education K-12 Endorsement

School Health Education K-12 Endorsement (For Physical Education Teacher Education Majors)

Affiliated Options

The Division of Kinesiology and Health offers two options for the general undergraduate population. They require course work beyond degree requirements.

Athletic Coaching Endorsement / Permit

School Health Education K-12 Endorsement (For non-Physical Education Teacher Education Majors)

Graduate Study

Program Specific Admission Requirements

Admissions into the M.S. degree program is open to people who have obtained an undergraduate degree with a major program of study in exercise and sport science, health, kinesiology, physical education, or other area in human movement sciences. Students who do not have a bachelor's degree in kinesiology, physical education or health are required to complete four undergraduate courses in kinesiology and/or health in addition to the courses required for the graduate program of study. Individuals interested in applying are encouraged to contact the Graduate Program Coordinator, Dr. Tucker Readdy (tucker.readdy@uwyo.edu) for more information.

In order to apply, please submit the following via the University of Wyoming's online application system (www.uwyo.edu/admissions/apply.html): K&H supplemental application, copies of GRE scores, transcripts, a sample of professional writing, and three letters of recommendation. Applications must be submitted no later than February 1 to be considered for Fall admission; Spring admissions are also considered on a case by case basis.

GRE scores are required for admission but can be waived in specific situations. A minimum of a 3.000 undergraduate cumulative GPA is also necessary for admission. International students who are not native English speakers must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (www.uwyo.edu/ele/) if you have questions regarding English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies in the front section of the UW Catalog for more information.

Program Specific Graduate Assistantships

Graduate assistantships are available on a competitive basis. Teaching opportunities exist within the laboratory portions of the human anatomy and exercise physiology courses, the teaching laboratory portions of the pedagogy practical courses, and HLED1006 - Personal Health. A graduate assistantship also involves some research opportunities with assigned graduate faculty advisors.

A stipend for a full time graduate assistant is \$12,333.00 per academic year. Tuition and fees are covered according to the percentage of assistantship allocated to the student.

Program Specific Degree Requirements Master's Programs

Kinesiology and Health, Exercise and Sport Science Emphasis, M.S. *Plan A (thesis)*

Kinesiology and Health, Health Emphasis, M.S. *Plan A (thesis)*

Kinesiology and Health, Physical Education Teacher Education Emphasis, M.S. *Plan A (thesis)*

Kinesiology and Health, M.S. *Plan B (paper and experiential learning option)*

MICHAEL MILLER, B.A. Wheaton College 1992; D.O. Kirksville College of Osteopathic Medicine 2000, Clinical Professor of Family Medicine, Cheyenne.

BETH ROBITAILLE, B.A. University of Notre Dame 1991; M.D. Creighton University School of Medicine 1995; Clinical Professor of Family Medicine, Casper.

BRIAN M. VEAUTHIER, B.S. University of Notre Dame 1996; M.D. Georgetown University School of Medicine 2001; Clinical Professor of Family Medicine, Casper.

Associate Professors:

ZACH DEISS, B.A. University of Wyoming 1979; M.D. Creighton University School of Medicine 1987; Clinical Associate Professor of Family Medicine, Casper.

RONALD L. MALM, B.S. University of Wyoming 1988; D.O. The University of Health Sciences, College of Osteopathic Medicine 1992; Clinical Associate Professor of Family Medicine, Cheyenne.

LEENA MYRAN, B.S. University of Wyoming 2012; PharmD. University of Wyoming School of Pharmacy 2012; Clinical Associate Professor of Pharmacy Practice, Family Medicine, Casper.

SHARON KARNES, B.S. University of Washington School of Medicine 1997; M.D. University of Washington School of Medicine 2001; Clinical Associate Professor of Family Medicine, Casper.

CAROLINE KIRSCH, B.S. University of Wyoming 1993, 2002; M.S. University of Wyoming 1996; D.O. New York College of Osteopathic Medicine 2007; Clinical Associate Professor of Family Medicine, Casper.

DOUGLAS S. PARKS, B.S. Baker University 1978; M.D. University of Kansas 1984; Associate Professor of Family Medicine, Cheyenne.

CYNTHIA WORKS, B.A. Creighton University 1981; M.D. University of Arizona College of Medicine 1985; Clinical Associate Professor of Family Medicine, Casper

Assistant Professors:

RACHELLE BOND, B.S. University of Arizona 2005; D.O. A.T. Still University School of Osteopathic Medicine 2012; Clinical Assistant Professor of Family Medicine, Cheyenne.

GENOMARY KRIGBAUM-PE'REZ, B.A. Carroll College 2003; M.A. Arizona School of Professional Psychology 2007; PsyD. Arizona School of Professional Psychology 2009; Clinical Assistant Professor of Family Medicine, Casper.

BLAINE LEVY, B.S. Midwestern University 2008; D.O. Arizona College of Osteopathic Medicine of Midwestern University 2012; Clinical Assistant Professor of Family Medicine, Casper.

EVAN NORBY, B.S. Brigham Young University 2007; D.O. Arizona College of Osteopathic Medicine 2012; Clinical Assistant Professor of Family Medicine, Cheyenne.

TABITHA THRASHER, B.S. University of Central Missouri 2001; D.O. Rocky Vista College of Osteopathic Medicine 2012; Clinical Assistant Professor of Family Medicine, Cheyenne.

Lecturers

LAURA CAPASSO, B.A. University of Wyoming 2012; M.S. University of Wyoming 2014; Ph.D. University of Northern Colorado, 2019; Assistant Lecturer, Family Medicine, Cheyenne.

PAMELA OILER, B.S.W. University of Wyoming 1999; M.S.W. Colorado State University 2005; Associate Lecturer, Family Medicine, Cheyenne.

To address the need for broadly trained primary care physicians in Wyoming, the Wyoming Legislature established two residency programs in the specialty of family medicine. These two accredited, university-administered, community-hospital based family medicine residency programs are located in Casper and Cheyenne. They enroll up to 42 residents (14 in each of three years). The two family medicine centers maintain a 1:4 faculty to resident ratio. The program at Casper began in 1976 and is affiliated with Wyoming Medical Center. The program utilized the services and facilities provided by the Educational Health Center of Wyoming. The Rural Training Track Program is a partnership with the Casper core program and Hot Springs County Memorial Hospital that provides a unique, hands-on experience for rural practice by training in the rural community of Thermopolis, Wyoming. It enrolls up to 3 residents (1 in each of three years). Casper's Geriatric fellowship is Wyoming's only post-graduate medical education training program. The fellowship provides training specialized in geriatrics to produce Board-certified geriatricians to care for the state's aging population. The Cheyenne program became active in 1980 and is affiliated with Cheyenne Regional Medical Center. The program utilizes the services and facilities provided by the Educational Health Center of Wyoming and has a close working relationship with the Veterans Administration Hospital. Both centers include spacious examining rooms; treatment and casting rooms; x-ray facilities; offices for faculty, residents and staff; complete laboratories; multiphasic research areas; conference rooms; business offices and roomy waiting rooms with play areas in the clinical component. In the educational component, both include large auditoriums; learning resource centers and administrative offices. Particular emphasis in both centers is placed on preparing physicians for rural practice and other facets of medical practice that are unique to Wyoming.

WWAMI Medical Education Program

The University of Wyoming medical contract program enhances medical education opportunities for Wyoming residents. In March 1996, the University of Wyoming became a partner in the WWAMI (Washington, Wyoming, Alaska, Montana, Idaho) Program. The WWAMI program is Wyoming's medical school and the program delivers the first two years of the University of Washington School of Medicine (UWSOM) medical school curriculum on the University of Wyoming campus. The remaining two years of the curriculum are spent in clinical rotations throughout the five-state WWAMI region. Twenty Wyoming residents are accepted into the WWAMI program each year and receive their M.D. degree from the UWSOM. For further information, contact the Wyoming WWAMI Office, College of Health Sciences, Laramie, Wyoming 82071, (307) 766-2496.

The Fay W. Whitney School of Nursing (FWWSON) has well established B.S.N, M.S., and D.N.P. programs based upon national nursing education standards.

Mission

The FWWSON educates, conducts research and provides service and practice to improve, protect and promote health.

Accreditation and Membership

The baccalaureate and graduate programs are accredited by the Commission on Collegiate Nursing Education (CCNE).

The baccalaureate program (Basic BSN, BRAND) is approved by the Wyoming State Board of Nursing (WSBN). Graduates of the Basic BSN and BRAND options are qualified to apply to take national licensing examination: NCLEX. Graduates of the DNP Program are eligible to take the national certification exams as a nurse practitioner.

Technical Standards for Admission

All nursing students must be able to perform the essential functions of a nurse, including observation/sensory motor; communication; psychomotor; intellectual-conceptual, integrative and quantitative; and behavioral and social attributes. Please refer to the "Technical Standards for Admission", including information on reasonable accommodations, on the school's website: <http://www.uwyo.edu/nursing/programs/technical-standards-for-admission.html>.

Background Checks Requirement

Students enrolled in clinical training programs within the College of Health Sciences are placed in educational and clinical settings where highly vulnerable clients such as minor children, individuals with disabilities, and/or the elderly, are routinely served. These clinical/ practice training sites (including schools, hospitals, pharmacies, and other university sites) routinely require criminal background checks for all students who engage in clinical activities. Therefore, background checks shall be required on all applicants to programs in the College of Health Sciences prior to admission into their prospective program.

Students applying for admission into the nursing major component of the BSN Program, the MS Program, and the DNP Program will be notified by the FWWSON at the time of any admission offer the process for completing the required background check. Previous background checks (e.g. CNA Certification, LPN or RN Licensure) are not acceptable to fulfill this expectation. The results of the background check may determine final admittance to the program.

Students may also be required to update the criminal background check. Each clinical training site will be informed that students have passed a background check prior to placement at that site; some sites may require a more current background check. Clinical agencies may bar a student access to their facility for clinical experiences based on the results of the background check. If faculty and staff are not able to place the student in an alternative setting, the student will not be able to complete the program. In addition, students seeking readmission into the program are required to complete a new background check. Students are responsible for the costs associated with the admission background check and any other background checks that may be required.

Drug Screening Requirement

Drug screening may be required by some clinical training sites. Students will be notified by the FWWSON should this be an expectation of them. Students may incur charges for this screening and will be notified of such at that time. Drug and/or alcohol testing for any student can be requested by the FWWSON.

The Fay W. Whitney School of Nursing provides a curriculum based on the solid foundation of a general studies program. University students are individuals who come with learning preferences, different experiences, varied goals, and therefore, have unique learning needs. The primary responsibility of faculty is to empower students to become self-directed learners. Active learning is a teaching/learning partnership.

Health Insurance Requirement

Health insurance coverage is a requirement of the Fay W. Whitney School of Nursing for participation in any clinical rotation. It is the responsibility of the student to obtain and maintain coverage for **ALL** clinical rotations. Students will be notified by the FWWSON should this be an expectation for them as well as timing for completion of the FWWSON Student Verification of Health Insurance Form.

Undergraduate Study

Bachelor of Science in Nursing (BSN) Program

The Fay W. Whitney School of Nursing provides a curriculum based on the solid foundation of a general studies program. University students are individuals who come with learning preferences, different experiences, varied goals, and therefore, have unique learning needs. The primary responsibility of faculty is to empower students to become self-directed learners. Active learning is a teaching/learning partnership.

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

1. Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
2. Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
3. Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
4. Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
5. Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
6. Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
7. Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
8. Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
9. Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
10. Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
11. Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Bachelor of Science in Nursing (BSN) Program Options

The Fay W. Whitney School of Nursing offers a baccalaureate program with three options to obtain the BSN degree:

1. Basic BSN - a four-year, on-campus BSN option for the student who wishes to become a registered nurse at the baccalaureate level.
2. BRAND (Bachelors Reach for Accelerated Nursing Degree) - an accelerated BSN outreach option for the student who has already achieved a previous non-nursing baccalaureate degree and who wishes to become a registered nurse at the baccalaureate level.
3. BSN Completion - two online BSN options (ReNEW and RN-BSN):
 - ReNEW (Revolutionizing Nursing Education in Wyoming) - an online BSN option for the student or graduate of a Wyoming community college ReNEW nursing program who wishes to become a baccalaureate-prepared nurse.

- RN-BSN - an online BSN option for the graduate of a non-ReNEW associate degree or diploma nursing program who wishes to become a baccalaureate-prepared nurse.

Please refer to the appropriate BSN program option section that follows below.

Graduate Study

The Fay W. Whitney School of Nursing offers two graduate programs leading to: 1) a Master of Science (M.S.) degree and 2) a Doctor of Nursing Practice (D.N.P.) degree.

Master of Science (MS) Program

The MS program of study is for nurses who desire to become nurse educators or nurse leaders in any academic or health-related setting. The program mission is to prepare transformational learners and leaders to advance nursing education and practice, thus, addressing the complexities in the 21st century healthcare system. Core curricular concepts woven through the curriculum include transformation, communication, interconnected global perspective, outcomes orientation, and rural population health.

Expected Student Learning Outcomes

MS graduates are prepared to ensure better care, better health, and lower costs through their knowledge, skills, and abilities to:

- Demonstrate competence and caring in the advanced professional nurse role to serve Wyoming, the region, and the world in urban, rural, and frontier health care settings as a provider, leader, and/or educator in the health care system.
- Transform rural health through leadership, service, and clinical scholarship that reflects an interconnected and comprehensive global health perspective.
- Demonstrate an advanced understanding of nursing and other sciences and humanities and integrates this knowledge to manage and improve health care across settings
- Synthesize broad organizational, financial, economic, client-centered, and culturally appropriate concepts from nursing and other sciences to address population health.
- Engage in scholarly inquiry and evidence-based practice to lead change for quality outcomes and implement safe health care to diverse populations in a variety of settings.

Core Concepts:

- **Transformation:**
Transformation includes learning, education, leadership, and nursing as a whole; engaging creativity with theory and evidence-based practice to result in critical reflection and cognitive flexibility.
- **Rurality/Frontier:**
Practice in a low population area where resources and/or access to care are limited and be able to innovate accordingly.
- **Service:**
Providing advanced practice nursing care and services to individuals, families, groups, communities, and populations includes altruism, leadership, decision-making, cooperation, education, listening, problem-solving, person-centered care, fidelity, advocacy, ethical behavior, and practice.

- **Comprehensive Global Healthcare System Perspective:**
An interconnected and comprehensive global health care system perspective incorporating the following attributes: advocacy, altruism, creativity, ethical conduct, effective communication skills, leadership, problem-solving skills, professionalism, and scholarship.
- **Clinical Scholarship:**
Activities that systematically advance nursing science, including its teaching, research, and practice through rigorous inquiry that 1) is significant to the profession, 2) is creative, 3) can be documented, 4) can be replicated or elaborated, and 5) can be peer-reviewed through various methods and includes discovery, teaching, practice, and integration.

Master of Science (MS) Program Concentrations

The Fay W. Whitney School of Nursing offers a masters program with two concentrations to obtain the MS degree:

1. Nurse Educator - a two and a half-year, online MS concentration for the registered nurse with a Bachelor of Science in Nursing (BSN) who desire to become nurse educators.
2. Nurse Leader - a two and a half-year, online MS concentration for the registered nurse with a Bachelor of Science in Nursing (BSN) who desire to become nurse leaders.

Please refer to the MS program section that follows below.

Doctor of Nursing Practice (DNP) Program

The Doctor of Nursing Practice (DNP) degree is the new standard for advanced practice nursing education. The DNP program is open to registered nurses with a minimum of a baccalaureate degree in nursing from a program nationally accredited by an approved nursing education accrediting body.

Expected Student Learning Outcomes

DNP graduates will:

1. engage in evidence-based practice to optimize health outcomes;
2. engage in leadership activities to promote excellence in rural health care.

Doctor of Nursing Practice (DNP) Program Concentrations

The Fay W. Whitney School of Nursing offers a doctoral program with two concentrations to obtain the DNP degree:

1. Family Nurse Practitioner (FMY) - a three-year, DNP concentration for the registered nurse with a Bachelor of Science in Nursing (BSN) that prepares students for careers in rural primary care.
2. Psychiatric Mental Health Nurse Practitioner (PSH) - a three-year, DNP concentration for the registered nurse with a Bachelor of Science in Nursing (BSN) that prepares students for careers in rural psychiatric mental health care.

Please refer to the appropriate DNP program concentration section that follows below.

School of Pharmacy

292 Health Sciences, (307) 766-6120

FAX: (307) 766-2953

Web site: www.uwyo.edu/Pharmacy

Dean: Kem Krueger

Associate Dean of Students: Tonja Woods

Professor:

SREEJAYAN NAIR, B.S. College of Pharmaceutical Sciences, Manipal, India 1989; M.S. 1991; Ph.D. 1996; Professor of Pharmacology 2014, 2002.

Associate Professors:

JARED S. BUSHMAN, B.A. University of Utah 2003; M.S. University of Rochester 2006; Ph.D. 2008; Assistant Professor of Pharmaceutical Science 2020.

E. KURT DOLENCE, B.S. University of Wyoming 1983; Ph.D. University of Kentucky 1987; Associate Professor of Medicinal Chemistry 2005, 1999.

GUANGLONG HE, B.S. Anhui Normal University 1986; M.S. Chinese Academy of Sciences 1994; Ph.D. 1997; Associate Professor of Medicinal Chemistry 2019, 2013.

KEM P. KRUEGER, Pharm.D. University of Missouri-Kansas City; Ph.D. University of Arizona 1998; Associate Professor of Social and Administrative Pharmacy 2011, 2005.

TRACY D. MAHVAN, B.S. University of Colorado 1995; Pharm.D. 1998; Associate Professor of Pharmacy Practice 2006, 2000.

RESHMI L. SINGH, B.S. Bombay University 1999; M.S. University of Toledo 2001; Ph.D. University of Minnesota 2005; Associate Professor of Social and Administrative Pharmacy 2019, 2013.

Assistant Professors:

MICHELLE BLAKELY, B.A. University of South Alabama 2005; M.Ed. Auburn University 2008; Ph.D. 2011; Assistant Professor of Social and Administrative Pharmacy 2018.

ANNA CLARA BOBADILLA, B.S. Pierre & Marie Curie University 2008; M.S. 2010; Ph.D. 2014; Assistant Professor of Pharmaceutical Sciences 2020.

NERVANA ELKHADRAGY, B.S. Cairo University 2004; Pharm.D. Purdue University 2008; M.S. 2018; Ph.D. 2020. Assistant Professor of Social and Administrative Pharmacy 2020.

KAREN MRUK, B.A. Drew University 2003; Ph.D. University of Massachusetts Medical School 2012; Assistant Professor of Pharmaceutical Science 2018.

Clinical Professor:

MICHELLE L. HILAIRE, Pharm.D. Duquesne University 2002; Clinical Professor of Pharmacy Practice 2016, 2010, 2004.

JAMIE R. HORNECKER, B.S. Texas Tech University 1999; Pharm.D. University of Wyoming 2003; Clinical Professor of Pharmacy Practice 2012, 2005.

Clinical Associate Professors:

LAUREN BIEHLE, Pharm.D. University of Georgia 2010; Clinical Associate Professor 2020.

BECKY S. LINN, B.A. University of Wyoming 1997; Pharm.D. 2002; Clinical Associate Professor 2020.

JANELLE L. KRUEGER, B.S. University of Wyoming 1992; M.S. University of Kansas 1997; Clinical Associate Professor of Pharmacy Practice 2013, 2005.

ALLISON M. MANN, B.S. University of Colorado Boulder 2004; Pharm.D. University of Colorado Denver 2009; Clinical Associate Professor of Pharmacy Practice 2020.

LEENA D. MYRAN, B.S. University of Wyoming 2000; Pharm.D. 2012; Clinical Associate Professor of Pharmacy Practice 2020.

ALIVN OUNG, Pharm.D. MCPHS University 2014; Clinical Associate Professor 2022.

JEREMY VANDIVER, B.A. University of Colorado 2006; Pharm.D. University of Colorado 2010; Clinical Associate Professor 2020.

TONJA M. WOODS, Pharm.D. University of Wyoming 2002; Clinical Associate Professor of Pharmacy Practice 2009, 2003.

Clinical Assistant Professors:

JED DOXTATER, B.S. University of Montana 2006; M.S. University of North Dakota 2013; Clinical Assistant Professor 2015.

JESSICA PAPKE, PharmD, University of Wyoming 2017; Clinical Assistant Professor 2020.

Assistant Lecturers:

ANTOINETTE K. BROWN, B.S. University of Wyoming 1992; Assistant Lecturer 2013.

DAVID C. BRUCH, B.S. University of Wyoming 1998; Pharm.D. 2010; Assistant Lecturer 2012.

CHARLIE P. CRUZ, B.S. Lorma Colleges 1998; M.A. Don Mariano Marcos Memorial State University 2003; M.S. Lyceum of the Philippines University Batangas 2016; Ph.D. Saint Louis College 2014; Assistant Lecturer of Medical Laboratory Science 2016.

Drug Information Director:

MELISSA L. HUNTER, B.S. University of Wyoming 2000; Pharm.D. 2004; Associate Research Scientist 2013, 2007.

Professors Emeriti:

Emery Brunett, Ph.D.
Bruce W. Culver, Ph.D.
Linda Gore Martin, Pharm.D.
Kenneth F. Nelson, Ph.D.
Robert B. Nelson, Ph.D.
Robert D. Scalley, Pharm.D.
Beverly, Sullivan, Pharm.D.
M. Glauca Teixeira, Ph.D.
Weeranuj Yamreudeewong, Pharm.D.

Deans Emeriti:

John H. Vandel, B.S. Pharmacy
Linda Gore Martin, Pharm.D.

Vision, Mission and Values

Vision

The University of Wyoming School of Pharmacy (UWSOP) is nationally recognized for its distinguished and collaborative teaching, research, pharmacy practice, and its entrepreneurial spirit.

Our graduates are highly skilled health professionals and leaders. Our graduates thrive and innovate in diverse and dynamic environments.

Mission

The University of Wyoming School of Pharmacy (UWSOP) advances the holistic development of our learners, preparing them to embrace change and positively impact the health and well-being of the communities that they serve. We engage in interdisciplinary teaching, research, practice, and service that results in meaningful innovations in healthcare, and improves the health and wellness of Wyoming, national, and global communities.

Statement of Values

The University of Wyoming School of Pharmacy community is committed to supporting and promoting individual and collective excellence in teaching, research, service, and pharmacy practice.

We value learning, collaboration, responsibility, compassion, respect, integrity, diversity, equity, and inclusion in all endeavors.

Graduate Expectations

Our graduates will be recognized and respected for:

- Leading positive change in the communities, organizations, industries, and professions that they serve
- Engaging in collaborative opportunities across disciplines and professions
- Providing evidence-based, empathetic, patient-centered care
- Thinking critically, creatively, ethically, and pragmatically
- Thriving and innovating in dynamic, diverse, and digital environments
- Ability to adapt in an ever-changing environment
- Dedication to excellence and integrity
- Communicating effectively across a wide range of audiences
- Embracing an entrepreneurial spirit

Learning Outcomes

The University of Wyoming adheres to the American Association of Colleges of Pharmacy Center for Advancement of Pharmaceutical Education (CAPE) educational outcomes 2013. This multipage document (and its supplements) can be accessed at www.aacp.org. The school has outlined student/curriculum learning outcomes; these are available on the school website.

Student/Faculty Relations

The faculty and staff at the School of Pharmacy treat students as adults and expect appropriate behavior as beginning professionals. The School of Pharmacy recognizes that the profession of pharmacy demands of its members the utmost degree of professional competence, ethical behavior, and integrity. Upon enrolling at the University of Wyoming SOP and at the start of each academic year, all students will sign a pledge acknowledging that they have received and read the current Honor Code and that they have made a personal commitment to uphold the code and abide by its principles. Similarly, the School of Pharmacy Professionalism Policy for faculty and staff is built on the foundation of respect for others, personal responsibility, the creation and maintenance of trust, and honesty and truthfulness. The administration, faculty, staff, students, and alumni of the School of Pharmacy at the University of Wyoming should strive to set an example of ethical leadership and professional behavior as those traits are essential for good social and business interactions.

Accreditation and Membership

In Wyoming, as in most other states, one requirement for examination and registration as a pharmacist is graduation from an accredited entry-level professional program at a school or college of pharmacy. The Accreditation Council for Pharmacy Education (ACPE), the national accrediting agency for pharmacy, accredits pharmacy degree programs.

The Doctor of Pharmacy program at UW was most recently accredited in 2020 following an on-site evaluation by the ACPE in October 2020. Verification of current accreditation status may be made by: a) contacting the Dean's Office, School of Pharmacy; b) connecting to www.uwyo.edu/pharmacy/; c) contacting the Accreditation Council for Pharmacy Education (190 South LaSalle Street, suite 2850 Chicago IL 60603, (312) 664-3575; info@acpe-accredit.org) or d) by checking the latest Annual Directory of Accredited Professional Programs published by ACPE.

The school is a member of the American Association of Colleges of Pharmacy and adheres to its educational standards.

Preprofessional Program and Requirements

Applicants for the professional program in pharmacy must complete preprofessional requirements before they can be admitted. Usually, two academic years totaling 72 credit hours (which may include summer and J-Term semesters) is required to complete preprofessional requirements.

All preprofessional coursework must be completed by the end of the spring semester prior to matriculation in the professional program.

Graduates of fully accredited high schools may be admitted to the preprofessional program with a math placement score of 3 or an ACT math score of 23.

Early Assurance Program: Students are accepted to the EAP program based on their high school GPA and ACT/SAT scores. High School students can apply to the professional program as they are applying for admission to the University of Wyoming as first-year students.

Preprofessional Pharmacy Program (PPCY)

Students will not receive a degree in prepharmacy. The prepharmacy curriculum guides students as they fulfill requirements for admission to the professional pharmacy degree program.

Required Curriculum

- CHEM1020 - General Chemistry I Credits: 4
- CHEM1030 - General Chemistry II Credits: 4
- LIFE1010 - General Biology Credits: 4
- LIFE2022 - Animal Biology Credits: 4
- MATH2200 - Calculus I Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- CHEM2420 - Organic Chemistry I Credits: 4
- CHEM2440 - Organic Chemistry II Credits: 4
- KIN2040 - Human Anatomy Credits: 3
- KIN2041 - Human Anatomy Laboratory Credits: 1
- MOLB2021 - General Microbiology Credits: 4
- MOLB3610 - Principles of Biochemistry Credits: 4
- ZOO3115 - Human Systems Physiology Credits: 4
- General Electives (6 credits total)

USP Requirement

The USP-COM 3 requirement is fulfilled in the professional doctoral program.

- FYS-First Year - Seminar Credits: 3

- COM1 - Communication 1 Credits: 3
- COM2 - Communication 2 Credits: 3
- Q- - Quantitative Reasoning Credits: 3
- PN- - Physical and Natural World (1) Credits: 3
- PN- - Physical and Natural World (2) Credits: 3
- H- - Human Culture (1) Credits: 3
- H- - Human Culture (2) Credits: 3
- V- - U.S. & WY Constitution Credits: 3

Professional Doctoral Program

Admission

Admission to the professional program leading to the entry-level Pharm. D. degree is limited to 52 students per year and is highly competitive. Admission is granted by the School of Pharmacy Dean upon the advice of the School of Pharmacy Admissions Committee. Students can apply to the professional program as freshman via the Pharmacy Early Assurance program. All students applying to the UW School of Pharmacy must use the PharmCAS application (www.pharmacas.org) process. All materials (PCAT scores, and Letters of Recommendation) are submitted to UW using this service. The School of Pharmacy requires no supplemental application. Students granted admission to the professional program will have to pay a one-time, non-refundable, seat fee to guarantee their placement into the entering class. In addition students will be required to complete any immunizations necessary for experiential rotations. As part of a College of Health Sciences requirement students are also expected to complete and pass a background check prior to final admission to the professional program.

Students must meet, with or without accommodation, specified requirements. The School of Pharmacy's Technical Standards can be found at http://www.uwyo.edu/pharmacy/_files/documents/admin/uwsop-technical-stds-3-2013.pdf.

The School of Pharmacy provides opportunities to ensure that our students have co-curricular experiences in both our didactic and experiential program. Providing options for students that are co-curricular allows students to choose activities that interest them and will allow them to grow as future health professionals. A portion of co-curricular activities throughout the degree program will be required and assessed.

Students at the University of Wyoming SOP are immersed in interprofessional education opportunities during all years of the professional program. Interprofessional education provides experiences for Pharm.D. students to collaborate and share knowledge with learners in other health sciences disciplines, which fosters readiness for working in team-based care environments in their future careers.

Program of Study

Requirements for Graduation

The degree of Doctor of Pharmacy (Pharm.D.) is granted upon satisfactory completion of 146 hours in the professional curriculum in accordance to the school's academic standards and the fulfillment of the general university requirements. Transfer students who have previous professional pharmacy credits accepted as partial completion of residence work may not earn a degree from this university for less than 30 semester hours of resident credit in the professional program of this School of Pharmacy over a minimum of two resident semesters.

Graduation with Honors

The University of Wyoming School of Pharmacy is authorized to grant honors for academic excellence. A Doctor of Pharmacy with honors designation is awarded by the University of Wyoming to students who graduate with exceptional scholarship in Pharmacy.

Exceptional scholarship in pharmacy is defined as a student who is on track to graduate with their class from the University of Wyoming School of Pharmacy and is in the top 5% of their class based on their pharmacy GPA (as assessed at the end of the fall semester of the P4 year). The Pharmacy GPA is calculated on the basis of required professional pharmacy curriculum coursework and excludes required or selected elective hours. The honors distinction must be approved by a School of Pharmacy faculty vote.

Academic Honesty and Professional Conduct

Students admitted to the professional program are required to participate and sign the University of Wyoming School of Pharmacy Honor Code. Failure to sign the honor code will result in a withdrawal of admission offer or termination from the professional program.

Academic Standards for Progression and Graduation

The course of study in the School of Pharmacy (SOP) is four academic years leading to a Doctor of Pharmacy degree (PharmD). The required professional coursework is organized in a prescribed, non-negotiable, sequential manner. All students have a P-designation identifying their year in the program (P1, P2, P3, P4). Required professional courses (PHCY courses) from any national or international pharmacy programs will not be applied to the UW PharmD degree. The student may petition that coursework to be applied to the program but must replace those credit hours with additional elective courses. Courses taken as S/U, including electives, are usually considered unacceptable in fulfilling program requirements. Auditing courses for the PharmD degree is not allowed.

The academic standards herein described are expected to be followed by all students admitted to the professional program. Any violation will constitute grounds for probation or termination from the professional program and will delay progression towards advanced coursework. Probation is a period of time in which the student is allowed to continue in the program under supervision. Students that do not meet academic standards and are placed on probation will have to submit a petition that includes an individualized plan of study for the next semester. This plan must be developed by the student in agreement with and signed by the academic advisor. The petition will be reviewed by the Student Affairs Committee (SAC), which will send a recommendation to the Dean for approval or denial. A leave of absence may be necessary in cases where poor academic performance is due to a medical or personal hardship. The student may appeal sanctions related to violations of the academic standards and decisions that result in probation and termination in the program. Appeals start at the School level, followed by College and University levels, according to policy.

Academic Standards

1. A grade of D or lower, or course withdrawal, in any required course of the professional program constitutes failure to progress toward the PharmD degree and result in probation.
2. A grade of D or lower, in any elective course of the professional program constitutes failure to progress toward the PharmD degree and result in probation.
3. Students must earn a GPA of 2.000 or better in both University coursework and professional program courses each semester and cumulatively.

4. Students must be considered full time with coursework applicable to the pharmacy degree during each semester while in good standing.
5. Incomplete coursework must be completed prior to progression into the next academic semester and will halt progression in experiential coursework.
6. Students who earn a D or lower in any experiential coursework will have their rotation sequence halted.
7. A course taken in the professional pharmacy program course can be repeated only once.
8. A maximum of three required courses are allowed to be repeated during the degree program.
9. Failure to meet any academic standards for two semesters (not necessarily consecutive) in didactic and/or experiential coursework results in automatic termination from the professional program.
10. Failure of two experiential courses, not necessarily consecutive, results in termination from the professional program.

Elective Credits Policy

The purpose of electives at the School of Pharmacy (SOP) is to complement the pharmacy curriculum, expand knowledge within a specific pharmacy discipline and to ensure completion of the general liberal arts education of the University of Wyoming. Therefore, the following policies have been approved by the faculty for the Doctor of Pharmacy professional program (hereafter, Program).

As published in the University Catalog and SOP students are required to complete a minimum number of electives, specific for the student's year of matriculation into the Program. This number may vary and may be modified as adjustments are made to the professional curriculum to comply with accreditation standards. Students will be made aware of this number during initial orientation into the Program and kept informed of any changes during their stay in the academic program.

Students must take elective courses to satisfy first the requirements of the University Studies Program (hereafter, USP) and then complete the remaining required elective credits as general elective coursework (Program-approved required number of elective hours).

- Students are required to complete all USP requirements even if they exceed the minimum number of elective hours initially defined in their Program in order to graduate from UW.
- Transfer or online courses from other accredited institutions may be honored as elective credits toward the Program. Students are solely responsible to have all transcripts from other schools sent to the University and make sure that the Director of Student Services and advisors are aware of any transfer work in the professional program.
- All required hours (including electives) must be completed by students before progressing into the P4 rotation year. Students will not be allowed to progress toward the 4th year rotations if university studies requirements were not fulfilled.
- Students shall not take electives as Satisfactory/ Unsatisfactory (S/U) credit.
- All courses taken in the preprofessional program or to fulfill requirements in a previous degree cannot be retaken to count as elective hours in the Program. In addition, students cannot use previously taken credit (prior to the professional program) as elective credit in the professional program.
- Credit by exam through the Foreign Languages Dept. will not be accepted as fulfillment of elective requirements in the Program. However, it is a student's right to earn credit by exam for Wyoming History and Government, while receiving elective credits toward the Program and fulfilling USP requirements.
- For procedures and handling of all exceptions to these policies, the students should consult the student handbook, the pharmacy student Share Point site, the SOP website, or check with the Director of Pharmacy Student Services or the Associate Dean of Students.

Curriculum

Pharmacy, Pharm.D.

The School of Pharmacy offers only the four-year curriculum leading to the Doctor of Pharmacy (Pharm.D.) degree. Students admitted to the professional pharmacy program follow a four year program of study leading to the Doctor of Pharmacy Degree. Students complete a total of 146 hours.

In order to keep abreast with changes in pharmaceutical education, the following curriculum is subject to change or modification as required by the accrediting agency. Students should be aware that changes must be expected and they will be included in their academic program. The School of Pharmacy does not plan to change graduation requirements inadvertently, but does reserve the right to change any provisions or requirement deemed necessary at any time within the student's term of residence.

Required Curriculum

- ZOO4125 - Integrative Physiology Credits: 5
- PHCY6100 - Dose Form Design Credits: 4
- PHCY6106 - Pharmaceutical Calculations Credits: 2
- PHCY6110 - Medicinal and Natural Products Chemistry I Credits: 3
- PHCY6140 - Introduction to Social Administrative Pharmacy Credits: 2
- PHCY6160 - Pharmacist Skills I Credits: 1
- PHCY6102 - Biopharmaceutics and Pharmacokinetics Credits: 4
- PHCY6111 - Medicinal and Natural Products Chemistry II Credits: 3
- PHCY6120 - Advanced Pathophysiology Credits: 3
- PHCY6151 - Pharmacy Practice Credits: 2
- PHCY6152 - Therapeutics I Credits: 3
- PHCY6161 - Pharmacist Skills II Credits: 1
- PHCY6170 - Introductory Pharmacy Practice Experience-IPPE1 Credits: 1
- PHCY6480 - Introduction to Community Pharmacy Practice Credits: 4
- PHCY6482 - Introduction to Hospital Pharmacy Practice Credits: 4
- PHCY6215 - Medicinal and Natural Products Chemistry III Credits: 3
- PHCY6230 - Pharmacology I Credits: 4
- PHCY 6230 - Pharmacology I Discussion Credits: 0
- PHCY6240 - Research and Evaluation Methods in Pharmacy Credits: 3
- PHCY6245 - Patient/Professional Interactions Credits: 3
- PHCY6260 - Pharmacist Skills III Credits: 1
- PHCY6231 - Pharmacology II Credits: 4
- PHCY 6231 - Pharmacology II Discussion Credits: 0
- PHCY6246 - Pharmacy Management, Marketing and Finance Credits: 3
- PHCY6251 - Therapeutics II Credits: 3
- PHCY6261 - Pharmacist Skills IV Credits: 2
- PHCY6270 - Intermediate Pharmacy Practice Experience-IPPE2 Credits: 1
- PHCY6312 - Clinical Toxicology Credits: 3
- PHCY6341 - Pharmacy Practice Law Credits: 3
- PHCY6344 - Pharmacy Ethics Credits: 1
- PHCY6350 - Therapeutics III Credits: 4

- PHCY6357 - Clinical Pharmacokinetics Credits: 2
- PHCY6360 - Pharmacist Skills V Credits: 1
- PHCY6300 - Sterile Products Credits: 2
- PHCY6301 - Sterile Products Laboratory Credits: 1
- PHCY6340 - Health Care Policy and Advocacy Credits: 2
- PHCY6351 - Therapeutics IV Credits: 4
- PHCY6353 - Drug Literature Application Credits: 2
- PHCY6361 - Pharmacist Skills VI Credits: 2
- PHCY6370 - Advanced Pharmacy Practice Experience-IPPE3 Credits: 2
- PHCY6485 - Reflective Learning in Pharmacy Credits: 1
- Students complete 3 sections of PHCY 6485, 1 credit each.

- PHCY6470 - Internal Medicine I Credits: 4
- PHCY6473 - Ambulatory Pharmaceutical Care Credits: 4
- (Students complete a second semester of either Internal Medicine or Ambulatory Care)

- PHCY6471 - Internal Medicine II Credits: 4
- PHCY6474 - Ambulatory Pharmacy Care II Credits: 4
- PHCY6481 - Advanced Community Pharmacy Credits: 4
- PHCY6483 - Advanced Institutional Pharmacy Credits: 4
- PHCY6465 - Elective Rotation In: Credits: 4
- Students complete 4 sections of PHCY 6465, 4 credits each.

- Students complete 7 hours of electives during the P1-P3 year.

Total Hours 146

Fourth Year [PH4]:

Consists of nine experiential rotations of four credit hours each and three reflective learning weeks. Rotations are considered full-time. Students may not enroll in any other coursework concurrent with rotations. Consequently, all other coursework (107 credits) must be satisfactorily completed before enrollment in P4 coursework. Note: Students will be required to live in locations other than Laramie when enrolled in experiential rotations. Responsibility for living cost and travel arrangements associated with experimental rotations rests with the student. Students participating in all experimental activities will be required to have a vehicle or an acceptable approved alternative.

Students must complete the following Core or Required Experiential Rotations (subject to change):

- PHCY6470 - Internal Medicine I Credits: 4
- PHCY6473 - Ambulatory Pharmaceutical Care Credits: 4
- PHCY6471 - Internal Medicine II Credits: 4
- or
- PHCY6474 - Ambulatory Pharmacy Care II Credits: 4

Graduate Study

The School of Pharmacy offers the Master of Science in Health Services Administration and the Master of Business Administration/Doctor of Pharmacy (M.B.A./Pharm.D.) dual degree.

Health Services Administration, M.S.

The School of Pharmacy offers a Master of Science online degree in health services administration (MSHSA).

Specialty Tracks

All students select one specialty track.

Biopharmaceutical Regulatory Compliance Group Specialty Listings

Specialty Tracks through the Biopharmaceutical Regulatory Compliance Group

- o Biopharmaceutical Regulatory Compliance
- o Healthcare Risk Management
- o Forensic Pharmacy
- o Healthcare Policy Analysis
- o Biopharmaceutical Product Representation
- o Clinical Research Administration
- o Patient Safety Systems
- o Healthcare Security Systems
- o Healthcare Ethics & Equity

Health Institution Leadership Group Specialty Listings

Specialty Tracks through the Health Institution Leadership Group

- o Health Institution Leadership
- o Health Economics & Outcomes
- o Healthcare Quality & Improvement
- o Rural Healthcare Coordination
- o Geriatric Care Systems
- o Healthcare Entrepreneurism
- o Healthcare Financing
- o Health Information Technology
- o Healthcare Writing and Reporting

Biopharmaceutical Regulatory Compliance Group

MS-HSA Curriculum

The following table provides a list of the core courses required for all tracks.

- PHCY5040 - The Evolution of American Health Credits: 2
- PHCY5042 - Statistics for Health Services Credits: 3
- PHCY5043 - Empirical Analysis for Health Services Administration Credits: 3
- PHCY5045 - Health Services Administration Applied Research Credits: 1-4
- PHCY5046 - Health Services Administration Seminar1 Credits: 1
- PHCY5041 - Health Services Administration Research Methods Credits: 2
- Sub-Total Program Required Coursework: 15 credit hours

Biopharmaceutical Regulation & Compliance Track

The following tables provides a list of required courses for the track listed

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5242 - The Food and Drug Administration Credits: 2
- PHCY5243 - The Drug Enforcement Administration Credits: 2
- PHCY5244 - State Regulations of Health Professions Credits: 2
- Specialty Track Electives (choose 6 hours)

Healthcare Risk Management Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5342 - Healthcare Risk and Quality Credits: 3
- PHCY5670 - Medication Malpractice Credits: 2
- PHCY5240 - Pharmaceutical Homicide Credits: 2
- Specialty Track Electives (Choose 6 hours)

Forensic Pharmacy Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5240 - Pharmaceutical Homicide Credits: 2
- PHCY 5XXX The Chemistry of Poisonings 2 Credits
- PHCY 5XXX Thr Process of Forensic Science 2 Credits

Specialty Track Electives (choose 6 hours)

Healthcare Policy Analysis Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5047 - Pandemic Preparedness Policy Credits: 2
- PHCY5148 - Health Economics and Policy Credits: 2
- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5246 - Prescription Drug Costs Credits: 2
-

Biopharmaceutical Product Representation Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- PHCY5541 - Introduction to Biopharmaceutical Marketing and Production Credits: 3
- Specialty Track Electives (choose 6 hours)

Clinical Research Administration Track

Specialty Track Required Coursework (10 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5242 - The Food and Drug Administration Credits: 2
- PHCY 5XXX Biomedical Ethics 3 Credits

PHCY 5XXX Clinical Research Regulation 2 Credits

Specialty Track Electives (choose 5 hours from list)

Patient Safety Systems Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5341 - Principles of Healthcare Quality Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- Specialty Track Electives (choose 6 hours)

Healthcare Security Systems Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY 5XXX Cybersecurity 2 Credits

PHCY 5XXX HIPPA Compliance 2 Credits

PHCY 5XXX Disaster Management 2 Credits

Specialty Track Electives (choose 6 hours)

Healthcare Ethics & Equity Track

Specialty Track Required Coursework (10 Credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY 5XXX Biomedical Ethics 3 Credits

PHCY 5XXX HIPAA Compliance 2 Credits

PHCY 5XXX Clinical Research Regulation 2 Credits

Specialty Track Electives (choose 5 hours)

Health Institution Leadership Group

MS-HSA Curriculum

The following table provides a list of the core courses required for all tracks

- PHCY5040 - The Evolution of American Health Credits: 2
- PHCY5041 - Health Services Administration Research Methods Credits: 2
- PHCY5042 - Statistics for Health Services Credits: 3
- PHCY5043 - Empirical Analysis for Health Services Administration Credits: 3
- PHCY5045 - Health Services Administration Applied Research Credits: 1-4
- PHCY5046 - Health Services Administration Seminar1 Credits: 1
- Sub-Total Program Required Coursework: 15 Hours

Health Institution Leadership Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5441 - Introduction to Health Leadership Credits: 3
- PHCY5442 - Healthcare Financial Planning Credits: 2
- PHCY5443 - Healthcare Human Capital Plan Credits: 2
- PHCY5444 - Healthcare Strategic Innovation Credits: 2
- Specialty Track Electives (choose 6 hours)

Health Economics and Outcomes

Specialty Track Required Coursework (10 credit hours)

- PHCY5141 - Principles of Health Econ and Outcomes Credits: 3
- PHCY5142 - Health Economic Decision Analysis Credits: 2
- PHCY5143 - Comparative Effectiveness Research Credits: 2
- PHCY5441 - Introduction to Health Leadership Credits: 3
- Specialty Track Electives (Choose 5 hours)

Healthcare Quality & Outcomes Track

Specialty Track Required Coursework (8 credit hours)

- PHCY5341 - Principles of Healthcare Quality Credits: 3
- PHCY5342 - Healthcare Risk and Quality Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- Specialty Track Electives (choose 7 hours)

Rural Healthcare Coordination Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5141 - Principles of Health Econ and Outcomes Credits: 3
- PHCY5341 - Principles of Healthcare Quality Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- Specialty Track Electives (choose 6 hours)

Geriatric Care Systems Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5341 - Principles of Healthcare Quality Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- Specialty Track Electives (choose 6 hours)

Healthcare Entrepreneurism Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance Credits: 3
- PHCY5541 - Introduction to Biopharmaceutical Marketing and Production Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3

- Specialty Track Electives (choose 6 hours)

Healthcare Financing Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5141 - Principles of Health Econ and Outcomes Credits: 3
- PHCY5441 - Introduction to Health Leadership Credits: 3
- PHCY5541 - Introduction to Biopharmaceutical Marketing and Production Credits: 3
- Specialty Track Electives (choose 6 hours)

Health Information Technology Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5441 - Introduction to Health Leadership Credits: 3
- PHCY 5XXX Information Design and Analysis 2 Credits

PHCY 5XXX Healthcare Information Systems 2 Credits

PHCY 5XXX Information Management 2 Credits

Specialty Track Electives (choose 6 hours from list)

Healthcare Writing & Reporting Track

Specialty Track Required Coursework (9 credit hours)

- PHCY5441 - Introduction to Health Leadership Credits: 3
- PHCY 5XXX Professional Writing in Healthcare 2 Credits

PHCY 5XXX Health Data in Figures, Tables & Graphs 2 Credits

PHCY 5XXX The Healthcare Message 2 Credits

Specialty Track Electives (choose 6 hours)

Additional Notes

NOTE: Specialty track electives can be any course provided in the MSHSA program.

Please consult with the program director if you have questions on the electives to choose for a specific track.

Those course numbers with PHCYXXXX are currently being built or waiting on approval from the University. Please contact the MS HSA program for questions.

Additional Requirements

This degree is geared toward new and mid-career practitioners including pharmacists, nurses, physicians, social workers, and other health care professionals who want to become department directors, patient safety coordinators and/or directors, regulatory compliance officers, clinical research associates, health outcomes researchers or take on leadership roles as advanced practice practitioners.

The program also benefits health care workers in fields such as management positions, pharmaceutical sales representatives, medical science liaisons, and pharmacy technician educators as well as new clinical faculty at newly established pharmacy colleges.

Available nationwide the master's program is delivered via a mix of online self-study and online project-based coursework.

The program can be completed in two years of part-time study. Students are requested to travel to the UW Laramie campus for two weekend seminars during the two-year program (based on travel restrictions during the pandemic this course was held online). Graduates will be expected to complete 30 credit hours of coursework and pass a comprehensive final exam. Coursework will be completed over five consecutive semesters however students can take up to 6 years to complete the program.

A prospective student should have earned at least a bachelor's degree from a regionally accredited institution. To find out more about the application process please see the following website www.uwyo.edu/pharmacy/online-ms-program or contact the Student Services Office.

Medical Laboratory Science

Aley Hall, UW-Casper, (307) 268-2753

FAX: (307) 268-2416

Web site: www.uwyo.edu/pharmacy/mls-program/index.html

Director: Jed M. Doxtater, MS MLS (ASCP)^{CM}

Assistant Clinical Faculty:

JED M. DOXTATER, B.S. University of Montana 2007; M.S. University of North Dakota 2013; Assistant Clinical Faculty of Medical Laboratory Science 2015.

Assistant Lecturer

CHARLIE P. CRUZ, B.S. Lorma Colleges 1998; M.A. Don Mariano Marcos Memorial State University 2003; M.S. Lyceum of the Philippines University Batangas 2016; Ph.D. Saint Louis College 2014; Assistant Lecturer of Medical Laboratory Science 2016.

Mission and Goals

The mission of the Bachelor of Science in Medical Laboratory Science program at the University of Wyoming-Casper is to educate, train, and produce highly competent, ethical professionals who are committed to lifelong learning. Curriculum is designed to prepare students to meet current and future workplace challenges and technological advancements in the profession.

Program Goals

1. Provide education in accordance with the National Accrediting Agency for clinical Laboratory Sciences (NAACLS) standards for Medical Laboratory Science programs.
2. Provide students with adequate knowledge and background experience to successfully complete the national certification examination appropriate to their level of training.
3. Provide opportunity for students to develop skills in effective communication sufficient to serve the needs of patients, public, and other healthcare professionals.
4. Graduate well qualified Medical Laboratory Scientists who can function at a career entry level, and are prepared to meet the workforce needs of the state of Wyoming and the nation.
5. Provide students with professional role models so that they may develop and practice professional behaviors, attitudes and ethics necessary to work in, and promote the field of Medical Laboratory Science.
6. Periodically undergo program review to meet the diverse educational needs of students, accreditation standards and industry demands for qualified, skilled entry level practitioners.
7. Establish an advisory board of professionals, community partners and stakeholders for program development, evaluation and improvement.
8. Promote membership and active participation in professional societies.

Outcomes

Description of Entry Level Competencies of the Medical Laboratory Scientist

At entry level, the medical laboratory scientist will possess the entry level competencies necessary to perform the full range of clinical laboratory tests in areas such as Clinical Chemistry, Hematology/Hemostasis, Immunology, Immunohematology/Transfusion medicine, Microbiology, Urine and Body Fluid Analysis and Laboratory Operations, and other emerging diagnostics, and will play a role in the development and evaluation of test systems and interpretive algorithms.

The medical laboratory scientist will have diverse responsibilities in areas of analysis and clinical decision making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed or performed.

At entry level, the medical laboratory scientist will have the following basic knowledge and skills in:

- Application of safety and governmental regulations and standards as applied to clinical laboratory science;
- Principles and practices of professional conduct and the significance of continuing professional development;
- Communications sufficient to serve the needs of patients, the public and members of the health care team;
- Principles and practices of administration and supervision as applied to clinical laboratory science;
- Educational methodologies and terminology sufficient to train/educate users and providers of laboratory services;
- Principles and practices of clinical study design, implementation and dissemination of results;
- Theoretical knowledge and technical skills of concepts relating to all content areas required by NAACLS, including Clinical Chemistry, Hematology/Hemostasis, Immunology, Immunohematology, Microbiology, Urine and Body Fluid Analysis, Laboratory Operations and biohazard and safety.

Accreditation

The Medical Laboratory Science Program at the University of Wyoming is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Accreditation is a process of external peer review in which an agency grants public recognition to a program of study or an institution that meets established qualification and educational standards. Participation in the accreditation process is voluntary since there is not a legal requirement for

specialized programs and institutions to participate. However, when students complete a NAACLS accredited program they become eligible to sit for national certification examinations for the profession.

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) is a nonprofit organization that independently accredits medical technologist (MLS), clinical laboratory technician/medical laboratory technician (CLT/MLT), histotechnologist (HTL), histologic technician (HT), pathologists' assistant (Path Asst), diagnostic molecular scientist (DMS) and cytogenetic technology (CT), Phlebotomist (PBT), and clinical assistant (CA) educational programs.

Contract information:

National Accrediting Agency for Clinical Laboratory Sciences, 5600 North River Road, Suite 720, Rosemont, IL 60018-5119

<http://www.naacls.org>

Prerequisites for Admission to the MLS Professional Program

Students must meet the following minimum criteria to be considered for Admitted Major status:

- Completion of the Casper College A.S. degree in MLT within 5 years or B.S. degree in a related science.
- Minimum grade point average (GPA) of 2.000 on all course work transferred into the University of Wyoming at Casper from other academic institutions.
- Successful completion of the Medical Laboratory Technician BOC exam is preferred. Students that have not completed the BOC may be admitted with MLS program directors approval.
- Students admitted to the program that do not hold an A.S. in MLT or a B.S. in a related science may be required to complete the University of Wyoming University Studies program in addition to the basic requirements for the Bachelor of Science in Medical Laboratory Science degree. See the current requirements at <http://www.uwyo.edu/unst/>

Applying for Admission to MLS Professional Program

Students may enter the MLS professional program in the fall or spring semester of their junior year. Application for the program must be submitted to the MLS program director before finals week of the first semester the student has declared the MLS major and is enrolled in a MLS course.

Prior to participating in the enrichment experiences, students will be subject to that agency's requirements for a background check, drug testing and/or drug abuse prevention policies. Students are then subject to the random drug testing policy of that agency. These background checks are routinely required by schools, hospitals, and other agencies that participate in on-site training. Background check should be obtained from Viewpoint screening (<https://www.viewpointscreening.com/uwyo>). The Casper College MLT background check is a valid substitute if final semester of MLS program falls within 1 year of check.

After completion and submission of the program application, the student must schedule an interview with the program director for an evaluation for acceptance to the MLS program. Interviews must be completed before the student enrolls in the succeeding semester of coursework. It is the students' responsibility to complete and submit applications, and to schedule an interview with the MLS program director by the due dates.

Students are required to complete an observational enrichment experience during the final MLS semester. This observational experience is designed to demonstrate advanced concepts and topics presented in the MLS curriculum, in a practical setting.

The MLS program will provide documentation requirements, as each site may have different requirements for participation (e.g. vaccination records, HIPPA training, safety training, background check/drug screen etc.). If a student finds an appropriate observational enrichment experience outside of the opportunities available through the MLS program, the student must communicate the site to the MLS program director for approval. It will be the responsibility of the student to arrange the experience with the appropriate site personnel/HR, and program director to ensure all required documentation is provided.

Liability insurance will be required for students entering their senior year coursework. Liability insurance is provided through the University of Wyoming at a cost of \$13.00/year to the student.

Health Requirements: The student must provide proof of health insurance and Hepatitis B vaccination (or declination) to participate in on-campus student laboratory sessions. Hepatitis B vaccinations are available on the UW-C campus at student health, or at the county health department for a small fee. Other health records may be required to participate in enrichment activities including MMR, Tetanus, drug screen, and background check/drug screen.

Essential Functions

Applicants must meet certain essential functions as defined by NAACLS. If you feel that you do not meet these essential functions, careful consideration should be made and advisement received before entering the MLS Program. Essential functions are the abilities and essential functions that a student must be able to perform to be successful in the learning experiences and completion of the program.

Observational Requirements

The MLS student must be able to:

- Observe laboratory demonstrations in which biologicals are tested for their biochemical, hematological, immunological, microbiological, and histochemical components.
- Characterize the color, odor, clarity, and viscosity of biologicals, reagents or chemical reaction products.
- Employ a clinical grade binocular microscope to discriminate among the structural and color (hue, shading, and intensity) differences of microscopic specimens.
- Read and comprehend text, numbers, and graphs displayed in print and on a video monitor.

Movement Requirements

The MLS student must be able to:

- Move freely and safely about a laboratory.
- Reach laboratory bench-tops and shelves, patients lying in hospital beds or patients seated in specimen collection furniture.
- Travel to numerous clinical laboratory sites for practical experience.
- Perform moderately taxing continuous physical work, often requiring prolonged sitting, over several hours.
- Maneuver phlebotomy and culture acquisition equipment to safely collect valid laboratory specimens from patients.
- Control laboratory equipment (i.e., pipettes, inoculating loops, test tubes) and adjust instruments to perform laboratory procedures.
- Use an electronic keyboard to operate laboratory instruments and to calculate, record, evaluate, and transmit laboratory information.
- Perform fine hand manipulations with dexterity.

Communication Requirements

The MLS student must be able to:

- Read and comprehend technical and professional materials.

- Follow verbal and written instructions in order to correctly and independently perform laboratory test procedures.
- Clearly instruct patients prior to specimen collection.
- Effectively, confidentially and sensitively converse with patients regarding laboratory tests.
- Communicate with faculty members, fellow students, staff, and other health care professionals verbally and in a recorded format.
- Independently prepare papers, prepare laboratory reports, and take paper, computer, and laboratory practical examinations.

Behavioral Requirements

The MLS student must:

- Be able to manage the use of time and be able to systematize actions in order to complete professional and technical tasks within realistic constraints.
- Possess the emotional health necessary to effectively employ intellect and exercise appropriate judgment.
- Be able to provide professional and technical services while experiencing the stresses of task-related uncertainty and a distracting environment.
- Be flexible and creative and adapt to professional and technical change.
- Recognize potentially hazardous materials, equipment, and situation and proceed safely in order to minimize risk of injury to patients, self, and nearby individuals.
- Adapt to working with unpleasant biologicals.
- Support and promote the activities of fellow students and of health care professionals.
- Realize that the promotion of peers helps furnish a team approach to learning, task completion, problem solving and patient care.
- Be honest, compassionate, ethical and responsible.

Request for Accommodation

All students are held to the same academic and technical standards. Applicants/students with disabilities seeking accommodation must discuss their disability and accommodation needs with the University Disability Support Services (udss@uwyo.edu or (307) 766-6189; TTY: (307) 766-3073). If appropriate and upon request and registration of the applicant, a reasonable accommodation will be made consistent with University of Wyoming guidelines.

Medical Laboratory Science, B.S.

A degree in Medical Laboratory Science prepares healthcare professionals to perform clinical diagnostic testing in the areas of microbiology, hematology, chemistry, immunohematology, urinalysis, serology, and molecular biology.

USP - University Studies Program Requirements

Completion of all University Studies Program requirements is necessary to obtain a bachelors degree from the University of Wyoming. These requirements may be covered by the Medical Laboratory Technician Associates degree at Casper College. Please work with your advisor to ensure these requirements are fulfilled.

- FYS-First Year - Seminar Credits: 3
- COM1 - Communication 1 Credits: 3

- COM2 - Communication 2 Credits: 3
- COM3 - Communication 3 Credits: 3
- Q- - Quantitative Reasoning Credits: 3
- PN- - Physical and Natural World (1) Credits: 3
- PN- - Physical and Natural World (2) Credits: 3
- H- - Human Culture (1) Credits: 3
- H- - Human Culture (2) Credits: 3

Casper College Requirements

MLTK and PEAC courses are available through an articulation agreement with Casper College **and can be taken only through Casper College**. Students are responsible for fulfilling all University Studies requirements. The articulation agreement, with a proposed semester-by-semester sequence, is available at:

<http://www.uwyo.edu/TRANSFER/articulation/agreements/medical-laboratory-science.html>

- MATH1400 - College Algebra Credits: 3 (Meets Quantitative USP requirement) 4 credits at Casper College
- MICR2021 - General Microbiology Credits: 4
- **OR** MOLB 2021 General Microbiology (Casper College equivalent: MOLB 2210)
- SOC1000 - Sociological Principles Credits: 3 OR ANTH 1200 Introduction to Cultural Anthropology
- ENGL1010 - College Composition and Rhetoric Credits: 3 (Meets Communication I USP requirement)
- LIFE1010 - General Biology Credits: 4 (Meets Physical and Natural World USP requirement; Casper College equivalent: BIOL 1010)
- ENGL2005 - Writing in Technology and the Sciences Credits: 3 (Meets Communication II USP requirement)
- POLS1000 - American and Wyoming Government Credits: 3 (Meets U.S. and Wyoming Constitution USP requirement)
- CHEM1020 - General Chemistry I Credits: 4 (Meets Physical and Natural World USP requirement; Casper College equivalent: CHEM 1025 & CHEM 1028)
- PEAC xxxx: Online Activity Credits: 1
- CMAP 1505 Introduction to Computers Credits: 1
- Elective Credits: 3
- MLTK 1500 - Hematology Credits: 3
- MLTK 1600 - Clinical Immunohematology Credits: 3
- MLTK 1700 - Microscopy: UA Body Fluids Credits: 2
- MLTK 2600 - Clinical Microbiology I Credits: 2
- MLTK 2500 - Clinical Chemistry Credits: 3
- MLTK 2650 - Clinical Microbiology II Credits: 2
- MLTK 2700 - Immunology Credits: 4
- MLTK 2971 - Clinical Practicum: Hematology Credits: 2
- MLTK 2972 - Clinical Practicum: Chemistry Credits: 2
- MLTK 2973 - Clinical Practicum: Immunohematology Credits: 2
- MLTK 2974 - Clinical Practicum: Microbiology Credits: 2
- MLTK 2976 - Clinical Practicum: Serology Credits: 1
- MLTK 2977 - Clinical Practicum: UA / Body Fluids Credits: 1
- MLTK 2978 - MLT Professionalism Credits: 1
- MLTK 2800 - Clinical Pathophysiology Credits: 4
- MLTK 1800 - Principles of Phlebotomy Credits: 3

University of Wyoming Requirements

Upper-division courses required to complete the Bachelor of Science in Medical Laboratory Science (**All MLSK courses are only available through UW-Casper.**):

- CHEM1030 - General Chemistry II Credits: 4
- CHEM2300 - Introductory Organic Chemistry Credits: 4
- LIFE3050 - Genetics Credits: 4
- LIFE3600 - Cell Biology Credits: 4
- STAT2050 - Fundamentals of Statistics Credits: 4
- MOLB3000 - Introduction to Molecular Biology Credits: 3
- MOLB3610 - Principles of Biochemistry Credits: 4
- MLSK4840 - Laboratory Education Methodology Credits: 1
- MLSK4850 - Clinical Research Design Credits: 2
- MLSK4860 - Laboratory Management Credits: 3 (Meets Communication III USP requirement)
- MLSK4870 - Advanced Clinical Chemistry Credits: 4
- MLSK4880 - Advanced Hematology: Erythrocytes Credits: 2
- MLSK4981 - Advanced Clinical Practicum-Hematology Credits: 3
- MLSK4982 - Advanced Clinical Practicum-Molecular Credits: 3
- MLSK4983 - Advanced Clinical Practicum-Immunohematology Credits: 3
- MLSK4984 - Advanced Clinical Practicum- Microbiology Credits: 3
- MLSK4890 - Professional Career Paths and Review Credits: 2
- Upper-division elective credits: 1 (see below, consult your academic advisor)

Upper Division Elective Credit Hours

One upper division elective credit hour must be completed in the student's junior or senior year to meet the total 42 required upper division credits to graduate. Students may take a three credit class to meet this requirement.

These credits must be 3000 and above, and achieved through online outreach or on campus courses. A list of courses that are acceptable to fulfil this requirement can be made available to the student. If a course is in question, it is highly suggested to the student to contact the UW-C advising department or the MLS program director for requirement fulfillment confirmation.

Enrichment Rotations and Laboratory Sessions

The final semester of the student's senior year is comprised of didactic material being delivered in an online hybrid manner, supplemented with on campus lab sessions at the UW-Casper campus. These lab sessions will be accompanied by an observational enrichment rotation at a clinical site. This enrichment rotation will allow for the observation of advanced methodologies in a practical environment. It will be the students' responsibility for all travel and housing costs associated with the advanced clinical practicum courses.

Probation

Students who do not meet the minimum grade requirements stated above for MLSK course work will be placed on probation. In this period of time, students will be allowed to continue in the program under supervision, but will submit

a petition which is an individualized plan of study for the next semester that is developed by the student in agreement with and signed by an academic advisor. All completed MLSK courses that fail to meet minimum grade requirements (C or 2.000 or better) must be repeated by the student. Students shall not be allowed to progress to the final semester until all courses in the previous semesters are successfully completed and a GPA of 2.000 is obtained.

Additional Requirements

The program requires 124 credit hours total, with 54 credit hours obtained in the junior/senior years to graduate. Students must complete a minimum of 42 upper division hours, 30 of which must be earned from the University of Wyoming.

Prerequisite for admission to the Medical Laboratory Sciences degree is completion of the Medical Laboratory Technician program at Casper College, or another accredited MLT program. Students interested in the MLS degree who already hold a bachelors degree should contact program director Jed Doxtater at jdoxtate@uwyo.edu.

Division of Social Work

Health Sciences Building, (307) 766-6112

FAX: (307) 766-6839

Web site: www.uwyo.edu/socialwork

Director: Eleanor Pepi Downey, M.S.W., Ph.D

Associate Professors:

ELEANOR PEPI DOWNEY, B.A. Queens College (NC) 1966; M.S.W. Rutgers University 1971; Ph.D. University of Denver 1998; Associate Professor of Social Work 2019.

DIANE A. KEMPSON, B.A. Columbia College 1968; M.S.W. Florida State University 1970; Ph.D. University of South Carolina 1998; Associate Professor of Social Work 2010.

NEELY MAHAPATRA, B.Sc. Utkal University, India 1991; M.Sc. 1993; M.S.S.W. University of Texas-Austin 2003; Ph.D. 2008; Associate Professor of Social Work 2016.

VALERIE THOMPSON-EBANKS, B.Sc. University of the West Indies 2002; M.S.W. 2007; Ph.D. Colorado State University 2012; Associate Professor of Social Work 2018.

Assistant Professors:

SANDY LEOTTI, B.A. Prescott College 2002; M.S.W. University of Montana 2006; Ph.D. Portland State University 2019; Assistant Professor of Social Work 2019.

SUKYUNG YOON, B.A. Chung-Ang University 2002; M.S.W. Yonsei University 2008; Ph.D. University of Tennessee 2019; Assistant Professor of Social Work 2019.

Assistant Lecturers:

BILLIE CHAPMAN, B.A. University of Wyoming 2005; M.S.W. 2008; Assistant Lecturer of Social Work 2018.

KYM CODALLOS, B.A. California State University, Sacramento 1999; M.S.W. California State University, Stanislaus 2006; M.A. 2011; Assistant Lecturer of Social Work 2018.

SARAH S. GREEN, B.A. University of Wyoming, 2015; M.S.W. 2019; Assistant Lecturer 2021.

GRETA MAXFIELD, B.S. University of Wyoming 1994; M.S.W. Washington University 1999; Assistant Lecturer of Social Work 2019.

Social workers are uniquely qualified to help people in their own environments by looking at different aspects of their lives and cultures. We work to ensure the client's personal well-being, prevent crises, counsel individuals, support families, and strengthen communities. We make sure people get the help they need, with the best resources available.

For more than 100 years, social workers have cared for people in every stage of life. Social workers help others overcome life's most difficult challenges and manage the troubles of everyday living, including the troubles that exist due to poverty, stress, addiction, abuse, unemployment, mental illness, family change, and social violence. Social workers advocate for social justice.

Undergraduate Study

The Division of Social Work prepares students for entry-level generalist social work practice. Two locations offer the social work program: the Laramie campus and the University of Wyoming-Casper campus. Graduates receive a Bachelor of Social Work (BSW) and are prepared to work as generalist social work practitioners with individuals, groups, families, organizations, communities, and institutions to achieve more effective and efficient social functioning.

Our program is accredited by the Council on Social Work Education. The curriculum is designed to help students acquire important knowledge and skills in the areas of values and ethics, diversity, social and economic justice, human behavior and the social environment, social welfare policy and services, social work practice, and research. A competency-based curriculum prepares students to meet an "initial level" of competence in nine core areas (CSWE, 2015). Students also select elective courses in areas such as aging, child and adolescent services, health and mental health, and disability services. The program culminates in a 450-hour supervised field practicum, which allows students to work as social workers in one of Wyoming's many human service agencies.

Social Work Major

Social work is a professional degree program. Prior to admission to the professional degree program, students who are working to complete program prerequisites and most University Studies courses are "Social Work-Pre-Admit" majors. Students must be accepted into the BSW program as an admitted "Social Work" major in order to proceed in the program and enroll in professional degree courses beginning in the fall semester (usually of the junior year). Application for Admitted Major status are due in the middle of the Spring semester or in the middle of the Fall semester. Students should apply during the semester they are completing all social work prerequisite courses. Acceptance to Admitted Major (professional degree program) is competitive and requires an application. Please see application requirements on the Division of Social Work website. Students accepted into the professional degree program are expected to complete their degree in a timely manner. Students who have not completed social work classes for one year or more must reapply for Admitted Major and submit a plan for readiness to continue in the social work degree program. A plan may include, but is not limited to, repeating or auditing a course taken at an earlier point in the student's academic experience, completing an independent study that may provide updated social work content for the student, demonstrating knowledge or practice skills. Readmission is not guaranteed.

Criteria for Admission as an Admitted Major

The admissions process is competitive. Students must meet the following minimum criteria to be considered for Admitted Major status.

1. Students must earn a minimum grade point average (GPA) of 2.500 on all UW course work as well as all course work transferred into the University of Wyoming from other academic institutions.
2. Complete the following prerequisites: a. SOC 1000 b. PSYC 1000 c. POLS 1000 d. SOWK 2000 e. Human Biology (KIN/ZOO 2040 or PSYC 2080) f. STAT 2070 g. ECON 1010
3. Students must earn a grade of C or higher in all SOWK prerequisite classes.
4. Students must adhere to the UW Student Code of Conduct and the NASW Code of Ethics.
5. Students cannot exhibit behavior that will impinge on the student's present or future ability to fulfill professional responsibilities as a social work professional.
6. All students seeking admission to programs in the College of Health Sciences are required to undergo a background check as specified by college policy. Criminal convictions may result in rejection of the candidate for admission to Admitted Major.
7. Students must submit an application and an application fee. (See UW Fee Book)
8. Applicants to the social work program cannot receive credit for life experience.

Requirements for Admitted Majors

Once admitted, social work students must:

1. Achieve a C or better in all social work courses, including six hours of required social work electives.
2. Social work classes are offered and must be completed in sequential order.
3. Maintain a 2.500 or above GPA overall every semester after admittance to Admitted Major.
4. Maintain a 2.500 or above GPA overall in all social work course work every semester after admittance to Admitted Major.
5. Registration is restricted and students must meet with their advisor each semester for enrollment.
6. Complete SOWK 4990 with a satisfactory grade.
7. Students must adhere to the UW Student Code of Conduct and the NASW Code of Ethics.

Individuals failing to meet any of the above requirements will be reviewed by faculty and one of the following actions may be taken: remediation, probation, sanction, and/or dismissal from the program. Because many social work courses have prerequisite requirements, receiving a grade lower than a C in a social work course may prevent the individual from moving forward in the social work program.

BSW Field Practicum

All students complete a 450-hour (10 credit hours) field practicum experience in a community-based social agency or social program. Field practicum sites exist throughout the state of Wyoming and students may be placed outside Laramie. Students apply for this program the semester before their actual placement. Students must complete a Field Placement Application and meet with the Field Coordinator prior to determining a practicum site (please review Field

Practicum Manual). Background checks and drug screenings may be required by some agencies even though the College of Health Sciences has received a background check during admission to the major.

For the practicum, a grade of U is interpreted as performing below expectations and will not be considered satisfactory completion of the practicum, hence of the BSW program. Based on input from the student, the field instructor, and the faculty liaison during the field evaluation, the field coordinator will determine what remediation would be required. The plan will clarify course objectives and professional skills upon which the student needs to improve. A student wishing to continue in the program would need to reapply for a field placement. Upon the field committee's approval of the request for placement, the student may then repeat the practicum experience. Consistent with University policy, the most recent grade would be the grade calculated into the GPA. The grade of U is interpreted as not meeting minimal requirements of the course; failure to complete the minimum clock hours in the field placement; failure to complete written assignments in a satisfactory manner; violation of one or more of the tenets of the NASW Code of Ethics (see Appendix B and Termination of Practicum section in the practicum manual); and/or failure to withdraw formally or to terminate the course. A student receiving a U in the practicum will be automatically dismissed from the BSW program with no opportunity to reapply or re-enter. Grades and dismissals may be appealed. (See most current BSW Student Handbook for appeal procedures.)

Requirements for Graduation

The program requires 120 credit hours to graduate. Students must have completed all social work requirements, 42 upper-division hours, maintain a 2.500 GPA overall, a 2.500 GPA in social work coursework, and have achieved a grade of C or better in all social work courses. Courses must be taken for a letter grade unless offered for S/U only. USP H and PN courses must be taken outside the major subject but can be cross listed with the major.

BSW Curriculum

Social Work B.S.W. degree plan

Graduate Study

The Master of Social Work (MSW) prepares professional social workers for advanced level social work practice and leadership positions in frontier and rural human service environments. The Advanced Generalist MSW program is accredited by the Council on Social Work Education. The MSW program graduates advanced integrated practitioners who work within and negotiate complex multi-dimensional problem settings for both clients and practitioners while embracing the profession's values of service, social justice, dignity and worth of the person, importance of human relationships, integrity, competence, human rights, and scientific inquiry. The MSW is a full time, campus-based hybrid program that utilizes different course delivery methods to accommodate its widespread student population.

Wyoming School Social Work Certification

The Division offers the necessary requirements to obtain Wyoming School Social Work certification. Students in the last year of the MSW Program need to successfully complete SOWK 5810 Working with Children and Families in the Schools and complete their field placement within an approved school setting. Upon graduation, students must apply to the Wyoming Department of Education to obtain formal certification. For the most current certification information go to the PTSB website <http://wyomingptsb.com/>

Graduate Admissions Requirements

The Division of Social Work's Graduate Admissions Committee bases recommendations on review of all application materials (applicant's grades, personal statement, academic essay, professional references, and any related social service experience) as they reflect the applicant's commitment to social work, social and economic justice, values and ethics of the social work profession, and applicant's potential as a graduate student, social work practitioner, colleague and leader in the social work field. The Committee also looks for the intangible qualities that an applicant brings to the classroom and campus environment and to professional social work.

Once the committee recommends admission of an applicant, the Office of Admissions in Academic Affairs makes the final decision of admission.

Requirements for the Standard MSW Program

- A baccalaureate degree from an accredited college or university that reflects a broad liberal arts preparation. This consists of having completed at least 21 credit hours in social and behavioral sciences and 6 credit hours each in natural sciences, humanities, visual and performing arts, and quantitative reasoning;
- A human biology course (beyond introductory biology), receiving a grade of C or better;
- A statistics course, receiving a grade of C or better;
- An undergraduate cumulative grade point average (GPA) of 3.000 or above on a 4-point scale.

Requirements for the Advanced Standing MSW Program

- A bachelor's degree in Social Work from a Council on Social Work Education accredited social work program;
- An undergraduate social work GPA of 3.250 or above;
- An overall undergraduate GPA of 3.000 or above;
- Received a B or better and/or a Satisfactory grade in BSW Field Education Practicum.

*International students have special requirements for admission to UW. All are encouraged to contact the International Students and Scholars Office for details before applying.

All Applicants

All applicants will be evaluated on:

- a. Intellectual and personal qualities essential to successful practice of social work, such as sensitivity and responsiveness in relationships, concern for the needs of others, adaptability, good judgment, creativity and integrity;
- b. Commitment to social justice and equality;
- c. Written and verbal communication skills;
- d. Professional references; and
- e. Compatibility of career goals with the MSW program's advanced generalist perspective.

All applicants meeting minimum criteria will be considered for admission. Admitted applicants will be required to complete a criminal background check through College of Health Sciences.

Program Specific Degree Requirements

All incoming students enter the MSW program in the summer semester of their first year, completing introductory and/or bridge courses as needed for their specific program phase. The MSW program is divided into two levels: generalist and advanced generalist. The generalist year of the MSW program prepares students without a BSW degree for the advanced generalist curriculum in the second year. Students who have already obtained the BSW degree may apply for Advanced Generalist in the MSW program. These students complete only the second-year courses.

Master of Social Work Field Practicum

All students, regardless of status, participate in a field practicum experience, starting in their first fall semester. New students submit an initial application for placement upon acceptance into the program.

Foundation students will complete 900 hours in practicum over the course of their two years of study, 400 and 500 hours respectively. Advanced Standing students will complete 500 hours in their one year of study. All students in practicum will take a corresponding field seminar class each semester.

Grading is done as Satisfactory/Unsatisfactory. Receiving a grade of U is considered a failing grade and can result in termination from the practicum. If the practicum is terminated, the student may be offered a remediation plan to retake the required hours. This opportunity is only offered one time. The student may also be referred to the DOSW faculty for review according to the Student Academic and Professional Performance policy.

Specific information and procedures relating to all aspects of the field practicum experience can be found in the Field Practicum Manual located on the Division of Social Work's website.

Master of Social Work requirements

- Students complete all SOWK required courses.
- Students complete either the SOWK 5755 Capstone course or the optional SOWK 5960 - Thesis Research.

For students who complete the Capstone course:

- Complete SOWK 5755. The SOWK 5755 portfolio project requires a minimum of 2 credit hours, usually taken as 1 credit in the fall semester and 1 credit in the spring of the advanced year.
- A final written paper with oral defense is required.
- Thesis is NOT required.

For students who choose the optional thesis:

- Complete SOWK 5960 - Thesis Research. SOWK 5960 requires a minimum of 4 credit hours, usually take as 2 in the fall semester and 2 in the spring semester.
- Students who choose to produce a thesis are required to carry out original research.
- Thesis proposal defense, thesis implementation, and final defense are required per university regulations for a thesis project.

Wyoming Institute for Disabilities (WIND)

147 Health Sciences Building, (307) 766-2761
FAX: (307) 766-2763
Web site: www.uwyo.edu/wind
Executive Director: Sandra Root-Elledge, M.A.

Senior Lecturer, Executive Director:

SANDRA ROOT-ELLEDDGE, B.S. University of Wyoming 2001; M.A. 2003; Senior Lecturer, 2018, 2009, 2004.

Associate Professor, Director Disability Studies:

MICHELLE JARMAN, B.A. University of California at Berkeley 1989; M.A. Northern Michigan University 2000; Ph.D. University of Illinois at Chicago 2006; Associate Professor of Disability Studies 2014, 2007.

Associate UCEDD Directors:

ERIC J. MOODY, B.S. Pacific Lutheran University 1998; M.A. University of Denver 2004; Ph.D. 2007; Postdoc University of Colorado School of Medicine 2011; Research Professor, Director of Research and Evaluation 2018.

CANYON HARDESTY, B.S. University of Wyoming 2004; M.S. 2007; M.S. Creighton University 2011; Associate Lecturer 2018, 2013.

Associate Lecturer:

ALISON QUAGGIN HARKIN, B.A. University of Toronto 1981; M.A. Athabasca University 2010; Assistant Lecturer 2014.

Assistant Lecturers:

TERRI WOFFORD, B.S. University of Central Florida 1994; M.S. East Tennessee State University 1998; Assistant Lecturer 2017.

The Wyoming Institute for Disabilities (WIND) is part of a national network of University Centers of Excellence in Developmental Disabilities Education, Research and Service (UCEDD). These centers provide a broad array of interdisciplinary academic, clinical, and research experiences of people with disabilities-particularly developmental disabilities. A wide variety of disciplines contribute to the study of disabilities.

WIND offers a Disability Studies Minor which investigates broad questions about the nature, meanings, and consequences of disability from interrelated social, historical, cultural, and political perspectives. The undergraduate minor in disability studies examines disability issues from multiple lenses, and draws specifically from social sciences, humanities, and health sciences.

Disability studies has an ethical commitment to place the interests and voices of people with disabilities at the center of our curricula and training activities. The minor balances theoretical exploration with practical application, and provides students with a vibrant understanding of disability history, cultural representation, policy concerns, and current debates. Ultimately, students in the minor will work closely with people with disabilities, and gain the skills and perspectives to participate in unique disability research and advocacy.

Medical Laboratory Science

Aley Hall, UW-Casper, (307) 268-2753

FAX: (307) 268-2416

Web site: www.uwyo.edu/pharmacy/mlsprogram/index.html

Director: Jed M. Doxtater, MS MLS (ASCP)

Assistant Clinical Faculty:

JED M. DOXTATER, B.S. University of Montana 2007; M.S. University of North Dakota 2013; Assistant Clinical Faculty of Medical Laboratory Science 2015.

Assistant Lecturer:

CHARLIE P. CRUZ, B.S. Lorma Colleges 1998; M.A. Don Mariano Marcos Memorial State University 2003; M.S. Lyceum of the Philippines University Batangas 2016; Ph.D. Saint Louis College 2014; Assistant Lecturer of Medical Laboratory Science 2016.

Mission and Goals

The mission of the Bachelor of Science in Medical Laboratory Science program at the University of Wyoming-Casper is to educate, train, and produce highly competent, ethical professionals who are committed to lifelong learning. Curriculum is designed to prepare students to meet current and future workplace challenges and technological advancements in the profession.

Program Goals

1. Provide education in accordance with the National Accrediting Agency for clinical Laboratory Sciences (NAACLS) standards for Medical Laboratory Science programs.
2. Provide students with adequate knowledge and background experience to successfully complete the national certification examination appropriate to their level of training.
3. Provide opportunity for students to develop skills in effective communication sufficient to serve the needs of patients, public, and other healthcare professionals.
4. Graduate well qualified Medical Laboratory Scientists who can function at a career entry level, and are prepared to meet the workforce needs of the state of Wyoming and the nation.
5. Provide students with professional role models so that they may develop and practice professional behaviors, attitudes and ethics necessary to work in, and promote the field of Medical Laboratory Science.
6. Periodically undergo program review to meet the diverse educational needs of students, accreditation standards and industry demands for qualified, skilled entry level practitioners.
7. Establish an advisory board of professionals, community partners and stakeholders for program development, evaluation and improvement.
8. Promote membership and active participation in professional societies.

Outcomes

Description of Entry Level Competencies of the Medical Laboratory Scientist

At entry level, the medical laboratory scientist will possess the entry level competencies necessary to perform the full range of clinical laboratory tests in areas such as Clinical Chemistry, Hematology/Hemostasis, Immunology, Immunohematology/Transfusion medicine, Microbiology, Urine and Body Fluid Analysis and Laboratory Operations, and other emerging diagnostics, and will play a role in the development and evaluation of test systems and interpretive algorithms.

The medical laboratory scientist will have diverse responsibilities in areas of analysis and clinical decision making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed or performed.

At entry level, the medical laboratory scientist will have the following basic knowledge and skills in:

- Application of safety and governmental regulations and standards as applied to clinical laboratory science;
- Principles and practices of professional conduct and the significance of continuing professional development;
- Communications sufficient to serve the needs of patients, the public and members of the health care team;
- Principles and practices of administration and supervision as applied to clinical laboratory science;
- Educational methodologies and terminology sufficient to train/ educate users and providers of laboratory services;
- Principles and practices of clinical study design, implementation and dissemination of results;
- Theoretical knowledge and technical skills of concepts relating to all content areas required by NAACLS, including Clinical Chemistry, Hematology/Hemostasis, Immunology, Immunohematology, Microbiology, Urine and Body Fluid Analysis, Laboratory Operations and

biohazard and safety

Accreditation

The Medical Laboratory Science Program at the University of Wyoming is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Accreditation is a process of external peer review in which an agency grants public recognition to a program of study or an institution that meets established qualification and educational standards. Participation in the accreditation process is voluntary since there is not a legal requirement for specialized programs and institutions to participate. However, when students complete a NAACLS accredited program they become eligible to sit for national certification examinations for the profession. The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) is a nonprofit organization that independently accredits medical technologist (MLS), clinical laboratory technician/medical laboratory technician (CLT/MLT), histotechnologist (HTL), histologic technician (HT), pathologists' assistant (Path Asst), diagnostic molecular scientist (DMS) and cytogenetic technology (CT), Phlebotomist (PBT), and clinical assistant (CA) educational programs. *Contract information:* National Accrediting Agency for Clinical Laboratory Sciences, 5600 North River Road, Suite 720, Rosemont, IL 60018-5119 <http://www.naacls.org>

Prerequisites for Admission to the MLS Professional Program

Students must meet the following minimum criteria to be considered for Admitted Major status:

- Completion of the Casper College A.S. degree in MLT within 5 years or B.S. degree in a related science.
- Minimum grade point average (GPA) of 2.000 on all course work transferred into the University of Wyoming at Casper from other academic institutions.
- Successful completion of the Medical Laboratory Technician BOC exam is preferred. Students that have not completed the BOC may be admitted with MLS program directors approval.
- Students admitted to the program that do not hold an A.S. in MLT or a B.S. in a related science may be required to complete the University of Wyoming University Studies program in addition to the basic requirements for the Bachelor of Science in Medical Laboratory
Science degree.

See the current requirements at <http://www.uwyo.edu/unst/>

Applying for Admission to MLS Professional Program

Upon completion of the prerequisite requirements of the program, students may apply to the professional program in the fall semester of their senior year. Applications for the program must be submitted to the MLS program director before finals week of the fall semester prior to entering the professional program Advanced Clinical Practicum (ACP) coursework. It is the students' responsibility to complete and submit applications by the defined due date.

Students are required to complete an observational enrichment experience during the final MLS semester. This observational experience is designed to demonstrate advanced concepts and topics presented in the MLS curriculum, in a practical setting.

Prior to participating in the enrichment experience, students may be subjected to that agency's requirements for HIPAA training, a background check, drug testing and/or drug abuse prevention policies. Students may be subject to the random drug testing policy of that agency. These background checks are routinely required by schools, hospitals, and other agencies that participate in on-site training. Background checks should be obtained from Viewpoint screening (<https://www.viewpointscreening.com/uwyo>).

Students must meet the vaccination and health insurance requirements of the university. Vaccinations are available through the county health department or through student health on the UW-C campus, and liability health insurance is available through the University of Wyoming. Current enrichment site affiliates do not require a background check, drug screen or proof of vaccination, as the university vaccination requirements exceed that of the facility. If a student finds an appropriate observational enrichment experience outside of the opportunities available through the MLS program, the student must communicate the site to the MLS program director for approval. This notification should occur well in advance to entering the professional program. It will be the responsibility of the student to arrange the experience with the appropriate site personnel/HR and program director, to ensure all required documentation is provided. The student must provide proof of health insurance and Hepatitis B vaccination (or declination) to participate in on-campus student laboratory sessions. Hepatitis B vaccinations are available on the UW-C campus at student health, or at the county health department for a small fee.

Essential Functions

Applicants must meet certain essential functions as defined by NAACLS. If you feel that you do not meet these essential functions, careful consideration should be made and advisement received before entering the MLS Program. Essential functions are the abilities and essential functions that a student must be able to perform to be successful in the learning experiences and completion of the program.

Observational Requirements

The MLS student must be able to:

- Observe laboratory demonstrations in which biologicals are tested for their biochemical, hematological, immunological, microbiological, and histochemical components.
- Characterize the color, odor, clarity, and viscosity of biologicals, reagents or chemical reaction products.
- Employ a clinical grade binocular microscope to discriminate among the structural and color (hue, shading, and intensity) differences of microscopic specimens.
- Read and comprehend text, numbers, and graphs displayed in print and on a video monitor.

Movement Requirements

The MLS student must be able to:

- Move freely and safely about a laboratory.
- Reach laboratory bench-tops and shelves, patients lying in hospital beds or patients seated in specimen collection furniture.
- Travel to numerous clinical laboratory sites for practical experience. • Perform moderately taxing continuous physical work, often requiring prolonged sitting, over several hours.
- Maneuver phlebotomy and culture acquisition equipment to safely collect valid laboratory specimens from patients.
- Control laboratory equipment (i.e., pipettes, inoculating loops, test tubes) and adjust instruments to perform laboratory procedures.
- Use an electronic keyboard to operate laboratory instruments and to calculate, record, evaluate, and transmit laboratory information.
- Perform fine hand manipulations with dexterity.

Communication Requirements

The MLS student must be able to:

- Read and comprehend technical and professional materials.
- Follow verbal and written instructions in order to correctly and independently perform laboratory test procedures.
- Clearly instruct patients prior to specimen collection.
- Effectively, confidentially and sensitively converse with patients regarding laboratory tests.
- Communicate with faculty members, fellow students, staff, and other health care professionals verbally and in a recorded format.
- Independently prepare papers, prepare laboratory reports, and take paper, computer, and laboratory practical examinations.

Behavioral Requirements

The MLS student must:

- Be able to manage the use of time and be able to systematize actions in order to complete professional and technical tasks within realistic constraints.
- Possess the emotional health necessary to effectively employ intellect and exercise appropriate judgment.
- Be able to provide professional and technical services while experiencing the stresses of task-related uncertainty and a distracting environment.
- Be flexible and creative and adapt to professional and technical change.
- Recognize potentially hazardous materials, equipment, and situation and proceed safely in order to minimize risk of injury to patients, self, and nearby individuals.
- Adapt to working with unpleasant biologicals.
- Support and promote the activities of fellow students and of health care professionals.
- Realize that the promotion of peers helps furnish a team approach to learning, task completion, problem solving and patient care.
- Be honest, compassionate, ethical and responsible.

Request for Accommodation

All students are held to the same academic and technical standards. Applicants/students with disabilities seeking accommodation must discuss their disability and accommodation needs with the University Disability Support Services (udss@uwyo.edu or (307) 766-6189; TTY: (307) 766-3073). If appropriate and upon request and registration of the applicant, a reasonable accommodation will be made consistent with University of Wyoming guidelines.

Requirements for the Bachelor of Science in Medical Laboratory Science

Medical Laboratory Science, B.S. degree plan

Dental Hygiene

Health Sciences Advising Office

Craig Vaske, Manager

Phone: (307) 766-3878

Email: hsadvise@uwyo.edu

Web site: <http://www.uwyo.edu/hs/divisions-and-programs/dental-hygiene-program.html>

The University of Wyoming and Sheridan College offer a cooperative program of dental hygiene education which, when completed, results in two degrees. An Associate of Applied Science degree in dental hygiene is awarded by

Sheridan College following completion of the prerequisites and dental hygiene prescribed study. An optional Bachelor of Science in Dental Hygiene (BSDH) degree is awarded by the University of Wyoming following completion of the Associate of Applied Science in dental hygiene, the University Studies Program, and other requirements of the University of Wyoming, for a total of 120 credit hours including 42 upper level hours, 30 of which must be from the University of Wyoming. See www.uwyo.edu/hs/divisions-and-programs/dental-hygiene-program.html.

The American Dental Association has awarded full accreditation to the Associate of Applied Science degree in dental hygiene at Sheridan College. Graduates are eligible to take the National Board of Dental Hygiene exam, as well as regional and state exams for licensure, as registered dental hygienists.

Applicants should visit www.sheridan.edu/academics/programs-a-z/dental-hygiene for specific prerequisites and application materials. Applications are due to Sheridan College prior to February 15 of the year they wish to enter the program. Class sizes are limited. Admission is contingent upon successful completion of a background check.

All prerequisite coursework must be completed with a cumulative grade point of 2.750 (on a 4.000 point scale). Courses in anatomy, physiology, and microbiology must be current within five years at the time of application to the Dental Hygiene professional program. Students must also complete a minimum of 20 hours of dental hygiene observation prior to application. Completion of the prerequisite courses and observation does not guarantee admission to the professional program. If admitted, students complete their coursework in Sheridan, Wyoming.

Prospective applicants can take prerequisite courses at any higher education institution. To view a list of prerequisites, see the degree program page in this catalog. Students who are completing prerequisite courses at the University of Wyoming are advised by the Health Sciences Advising Office (hsadvise@uwyo.edu). These students apply to UW as "Pre-Dental Hygiene" students.

NOTE: This major is not appropriate for students preparing to apply to dental school.

Learning Outcomes

The primary objective of the program is to assure that graduates have knowledge and abilities necessary to successfully practice dental hygiene.

Interdisciplinary Programs

Biomedical Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website <http://www.uwyo.edu/biomedphd/>
Email: bms@uwyo.edu

Program Director: Sreejayan Nair, Ph.D.

Degree Offered

Ph.D. in Biomedical Sciences

Biomedical sciences is the study of human biological processes; the complex interactions between physiological, genetic and environmental factors that influence disease and health. It spans the spectrum from fundamental discovery to innovation and application.

Areas of focus may include but not limited to cardiac health, nutrition, reproductive biology, toxicology, diagnostic & imaging and medical engineering.

The PhD program in biomedical sciences is designed to position graduates for long-term competitive success in the rapidly changing and multifaceted health-related arena in the 21st century. It is a comprehensive, interdisciplinary program, making connections between various disciplines to gain new insights, discover and apply new knowledge, and promote self-directed, life-long learning.

Biomedical Sciences is a research & discovery focused program balancing depth and breadth of content knowledge with "enabling" skills including problem solving, innovation, entrepreneurship, communication and leadership.

Program Specific Admission Requirements

1. Minimum requirements. Applicants who do not meet the minimum requirements may be conditionally accepted at the discretion of the BMS Admission Committee. Please submit the application packet comprising the following documents for pre-admission screening:

a. Faculty sponsor. Contact potential biomedical sciences graduate program faculty sponsor in your area of interest prior to submitting an application. NOTE: a letter indicating the sponsorship by a faculty is strongly recommended as the program does not have sufficient number of graduate assistantships to support all students.

b. Official academic transcripts. Successful completion of a bachelor's degree from an accredited institution with one or more semesters of biology, physics, anatomy, physiology, chemistry, biochemistry/molecular biology, math are recommended. All applicants should have at least a 3.0 cumulative GPA (scale of 4.0). While a master's degree is not required for admissions into the biomedical sciences Ph.D. program, a master's degree with a strong background in the research area of focus is a plus.

c. TOEFL/IELTS/Duolingo: The minimum acceptable scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries may be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia, Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/ cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency, until further notice.

d. GRE: A composite minimum score of 291 on the verbal and quantitative sections of the GRE is recommended. The GRE may be waived at the discretion of the admission committee if the applicant already possesses a master's degree, and/or documented research accomplishment in the chosen discipline.

e. Three letters of recommendation.

f. Statement of research interests and career objectives. A letter stating research & career interests and goals, prior research experience and outcomes, reasons for interest in BMS program. Include your contact information in the letter.

g. Current professional resume

2. Application Process. The BMS admissions committee reviews the completed application.

- a. Contact faculty in your area of interest and obtain their endorsement. Faculty may choose to interview the candidate on-campus or via zoom.
- b. Submit your application materials (pdf files of cover letter/statement of purpose, letter of sponsorship from the faculty, three letters of reference, transcripts, TOEFL/GRE scores to the admissions office via the University's admission portal.
- c. To ensure full application review for fall semester admission, applications should be received by **February 15**.
- d. Review by BMS Admissions Committee.
- e. Forward application packet with BMS recommendation to the faculty and host department.
- f. Notification of decision to applicant by **May 1**.

Program of Study

Rationale: The program of study is designed according to student learning goals and research opportunities. It blends depth and breadth of preparation by providing broad core requirements with electives promoting specialization in a "parent" discipline. This is recognized on program documentation by a Doctorate in Biomedical Sciences/"specialization" area. For example, Doctorate in Biomedical Sciences/Reproductive Biology.

Student Learning Outcomes: The BMS program provides unique array of formal courses and informal discovery experiences focused on ensuring aptitudes, behaviors, and skills necessary for leadership and competitive success in the biomedical science arena.

Although the foundation enabling innovative, independent thinking and knowledge discovery is deep discipline knowledge, the BMS program is also designed to promote student competency in information assessment, synthesis and integration, communication and translation to the broader community, teamwork, leadership, and project management.

The BMS program trains graduates to be competent, skilled experimentalists, problem solvers, critical and independent thinkers, expert in their field, with both depth and breadth of knowledge.

In addition, the program aims to instill characteristics that are essential to long-term professional success, preparing scientists who are effective and dedicated mentors and teachers, organized administrators, exemplars of high ethical standards, and effective collaborators.

Upon completion of the program, graduates will demonstrate:

- Independent, critical thinking skills
- Ability to identify appropriate biographical resources
- Knowledge of recent advances in discipline and related areas
- Understanding of a broad spectrum of research methodologies and their applications
- Ability to critically analyze research findings
- Ability to design and independently execute research
- Ability to use appropriate information technology to record, manage, and disseminate information
- Understanding of issues related to researcher and subject rights
- Motivation and aptitude needed to acquire knowledge
- Communication skills that are appropriate for a range of audiences and purposes
- Ability to construct and articulate arguments to a wide range of audiences
- Ability to effectively support the acquisition of knowledge by others when teaching or mentoring students
- Willingness to assume responsibility for their work

- Ability to design and teach undergraduate or graduate courses
- Ability to publish single/first authored papers in peer-reviewed journals.

Program in Ecology, Ph.D. Program

Office of Graduate Education
 Old Main 310
 Phone: (307) 766-4128
 Website: <http://www.uwyo.edu/pie/>
 Email: ecology@uwyo.edu

Program Director: Melanie Murphy, Ph.D.

Degree Offered

Ph.D. in Ecology

The Program in Ecology prepares doctoral students to lead the discipline of ecology during the coming decades. The program is grounded in the natural history of organisms in their environment, but incorporates tools and perspectives from across the biological, physical, mathematical, computational, and earth sciences. Students develop conceptual, historical, and philosophical perspectives spanning the entire range of subdisciplines in ecology, while receiving advanced training in the subdiscipline of their individual interest.

The program fosters long-term career development by exploring the linkages of ecology with other disciplines, and by scanning the ecological horizon for emerging questions, concepts, and approaches that will shape the field in years to come.

Faculty members from 11 departments and 3 colleges participate in the Program in Ecology. Their interests span the full range of topics covered in the field of ecology, and students in the program reflect this diversity.

Program Specific Admission Requirements

The Program in Ecology (PiE) is an interdisciplinary graduate program leading to the Doctor of Philosophy degree in Ecology. Students and faculty from multiple departments and colleges at the University of Wyoming participate in the Program. Graduate students admitted to the Program will have a home department, which will typically be the home department of the respective committee chair or co-chair. Those interested in graduate study in this program, are encouraged to contact individual faculty members in the potential student's area of interest (http://www.uwyo.edu/pie/who_we_are/faculty.html) and the Program in Ecology (307-766-4128; ecology@uwyo.edu) for more information and guidance regarding applying.

In order to apply: 1) **Contact:** Identify a faculty advisor (all PiE students **must** be sponsored by a faculty advisor (http://www.uwyo.edu/pie/who_we_are/faculty.html)). These contacts are generally made in the fall the year before submission, but successful contacts may be made later. 2) **Admission to home department:** Apply to the University of Wyoming via the online application system (<http://www.uwyo.edu/admissions/apply.html>): letter of intent, CV, transcripts, and three letters of recommendation. For department, please select the department of the potential advisor. A minimum of three letters of recommendation are required and up to two additional letters may be submitted. A suggested deadline for application is January 31 to be considered for fall admission, but applications will be continued to be considered. A minimum of a 3.0 undergraduate cumulative GPA is required for admission or MS degree. International applicants, who are not native English-speakers, must submit TOEFL (recommended minimum 525) or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the

applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements. 3) **Admission to PiE:** Submit a letter of interest to the Program in Ecology (ecology@uwyo.edu), stating explicitly why you would wish to be considered for PiE and identifying the faculty advisor immediately after completing your online application. Admission to PiE requires admission is predicated on admission to home department. All applications to the Program will be reviewed by the Graduate Affairs Committee, which has authority on admissions. Students applying to the Program who lack a Master's degree must show exceptional promise and commitment (e.g., through undergraduate or post-graduate research experiences, peer-reviewed publications, and/or success in competing for research fellowships). Such students are encouraged to consult with their prospective advisor on whether to apply directly to PiE or to Master's programs in individual home departments of PiE faculty.

Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the Program. Students who wish to transfer into the Program from department-based doctoral programs must submit a formal application and must satisfy all the admission requirements specified above. Such application will consist of copies of all the application materials originally submitted to the program in which the student is currently enrolled, as well as a letter of recommendation from their prospective PiE advisor. In addition, they must submit a letter stating their reasons for seeking this transfer. All applications will be reviewed by the Graduate Affairs Committee. In addition, the following apply to transfer students:

- Students enrolled in departmental programs who have not yet taken their preliminary examinations may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules before they take their preliminary examinations, and (b) fulfill the curricular requirements.
- Students who have been admitted to departmental programs, and who have already taken their preliminary examinations, may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules within one month of admission to the Program, and (b) fulfill the curricular requirements. The student's Advisory Committee has the option of requiring a new preliminary examination.

Program Specific Degree Requirements

Advisory Committee

Before the end of the second semester of study, the student should nominate a (minimum) five-member advisory committee to the Office of the Registrar. At least three members of the committee, including the committee chair (usually the student's adviser), will be members of the PiE faculty. One other member, who will serve as Graduate Faculty representative, must be from outside the home department of the major adviser, although (s)he can be a faculty member in a department that participates in the program and/or a faculty member of PiE. The committee will advise the student on his/her program of graduate study, execute and evaluate the student's preliminary examination, evaluate the student's dissertation proposal and dissertation, and conduct the student's dissertation defense.

Program of Study

All students are required to take ECOL 5100 or equivalent. This course should be taken during the first year of residency. Exceptions or substitutions of these requirements are subject to approval by the graduate affairs committee.

The program of study must include at least 6 credit hours aimed at developing a tool skill, which except for rare cases shall be in the quantitative/analytical domain (e.g., statistics, modeling, GIS, remote sensing, bioinformatics). Courses relating to research tools should be taken early in the student's residency to ensure that they can be used in thesis research and advanced studies. Specific coursework and tool-skill development for the student's program of study will be developed in consultation with and subject to approval by the student's advisory committee.

Admission to Candidacy

Admission to candidacy for the Ph.D. requires two steps: 1) providing evidence that the student is prepared to identify a research question, design an approach for investigating that question, and a plan for executing the approach, all in the format of an NSF-style research proposal, and 2) illustrating adequate proficiency in the subject matter of ecology through a process involving both written and oral exams.

Proposal

Students must submit a NSF-style proposal to their committee outlining their project, typically by the end of the fourth semester. Each committee member will provide feedback to the student on the proposed research and indicate approval of the proposal or request revision. The proposal must be approved by all committee members prior to starting the preliminary exams.

While this proposal should be a plan for actual dissertation research, unforeseen circumstances may require altering the student's dissertation work after the proposal has been approved by the committee. In the case of a major alteration, the student should reformulate a research plan and submit it to the committee in writing for committee approval.

Preliminary Exam

Passing the preliminary exam is the official admission to candidacy.

Written Portion of the Preliminary Exam. The student will take the written exam portion of the preliminary exam no fewer than two weeks following approval of the research proposal. The goal of this exam is to test breadth of knowledge in ecology. The design of this exam will be coordinated by the graduate committee under the leadership of the adviser. Each written exam will cover the following topics:

Ecological topics ranging from organismal/evolutionary to ecosystem-level perspectives, integrating concepts and perspectives from across the discipline, over a wide range of spatial and temporal scales.

The philosophical and historical development of ecology.

The conceptual background of the student's area of specialization.

The exam will consist of four to six questions developed collectively by the committee and organized by the student's major professor. The exam will be open book; however, the answers will be solely the work of the student. Answers should be fully cited and collectively should be no longer than 30 pages double-spaced exclusive of references cited. Students will have one full week (seven days) to complete the exam. Committee members will indicate pass/fail within one week following completion of written exams. Four of five passing votes are required.

Oral Portion of the Preliminary Exam. No sooner than two weeks after successfully passing the written exam, the student may proceed to an oral exam administered by his/her graduate committee. Oral exams center around three goals from which questions will be derived:

To verify that the student is prepared, conceptually and methodologically, to carry out successful dissertation research.

To evaluate the student's ability to conceptualize specific questions in a broad, integrative context.

To evaluate the student's ability to think spontaneously and creatively and to articulate responses about unexpected or novel questions.

The advisory committee will discuss and organize specific questions based on these goals in a short session at the beginning of the exam period before admitting the student to the examination room and starting the exam. Following the exam each committee member will provide non-binding paper votes of pass/ fail for each of the three goals of the

oral exam. Following discussion of the student's performance, committee members will each assign a grade of pass/fail for the overall exam. Four of five committee members must vote for passing the overall oral exam.

Students whose performance is unsatisfactory will be given one opportunity for retaking the oral examination. This retake will occur no later than the academic-year semester following the first examination.

Public Seminars

Students are required to give two oral presentations on their research. The purposes of these presentations are to provide the student with practice in oral presentations and to keep the PiE community informed of the student's progress. The first will describe the student's dissertation research proposal. This presentation will be given before the student submits his/her thesis proposal. The second presentation will summarize the student's completed dissertation research, and will normally be given the same semester as the student's dissertation defense. Under extraordinary circumstances (subject to approval by the Graduate Affairs Committee), this presentation may be given at an earlier time. These presentations must be open to the public, and may comprise part of a departmental or Program in Ecology seminar or brown-bag series.

Hydrologic Sciences (WRESE), Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/wrese>
E-mail: wrese@uwyo.edu

Program Director: Andrew D. Parsekian, Ph.D.

Degree Offered

Ph.D. in Hydrologic Sciences

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D. level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

The WRESE Program grants a PhD in Hydrological Sciences.

Program Specific Admission Requirements

Ph.D. in Hydrologic Sciences

The WRESE Program only admits students seeking a doctoral degree.

Those interested in graduate study in this program, are encouraged to contact the WRESE program (wrese@uwyo.edu) for more information and guidance regarding applying. In order to apply, please submit an application to the program via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>). Prospective

students applying to the WRESE program must satisfy the minimum criteria for admission of their advisor's home department (i.e., number of reference letters required; minimum GRE scores, if requested; other supporting documents, if requested; etc.). Similarly, applicants should adhere to the submission deadline indicated by their advisor's home department.

Minimum criteria for admission to the WRESE Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under certain circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the WRESE program.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences.

Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary

exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

The written exam will consist of a series of questions as decided upon by the committee and should take no more than two weeks to complete.

Each committee member shall grade their portion of the exam as pass/fail. The student shall be viewed as passing the written exam if no more than one person grades their portion of the exam as failing.

The oral examination will be held no sooner than two weeks after the written exams, and only after the student has passed their written examinations. The oral exam should be no less than 90 minutes long and no longer than 3 hours.

Following the exam, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Dissertation

The student will prepare a dissertation and make the document available to the committee at least two weeks in advance of an oral defense of the document. The oral defense must be at least 15 weeks after the student has been advanced to candidacy. Students shall present a public defense to the university community that is expected to be approximately 45 minutes long, with a public question-and-answer period after the presentation. If the committee determines that the student has presented a suitable oral presentation of his/her research findings, a closed session meeting will be held in which the student defends their research to the committee. At the conclusion of the defense, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Other information:

Students in the WRESE Program may participate from any college, with the expectation that their program of study and dissertation will focus on quantitative issues of hydrology and water resources. The Program welcomes academic diversity, and students in WRESE have entered into the Program from a wide range of academic backgrounds and have hailed from numerous home departments, including Ecosystem Science and Management, Civil and Architectural Engineering, Botany, Zoology and Physiology, and Geology and Geophysics.

Molecular and Cellular Life Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/mcls/>
Email: mcls@uwyo.edu

Program Director: Daniel Levy, Ph.D.

Degree Offered

Ph.D. in Molecular and Cellular Life Sciences

This interdisciplinary program with more than 30 faculty participants spans a wide range of research topics, such as:

Biotechnology-bioengineering, biomaterials, pharmacology, cell biology and signaling, genetics and development, genomics, proteomics, computational biology, microbiology and infectious disease, structural biology, and biophysics.

Coursework focuses on core courses in biochemistry and molecular biology, with electives that include such diverse courses as:

Topics in Genomics, Biophysics, Microbial Physiology and Metabolism, Cell and Developmental Genetics, Mass Spectrometry and Analytical Chemistry, Biomedical Engineering, Mammalian Endocrinology, Cell Culture and Virology, Introduction to Bioinformatics, Protein Structure and Function, Microbial Genetics, Computational Biology, and Quantitative Microscopy.

Program Specific Admission Requirements

1. Applicants should apply through the online graduate application link. This process requires uploading a statement of purpose, a CV, academic transcripts, and test scores. The statement of purpose should include a brief narrative that describes the applicant's motivation to pursue graduate studies in the life sciences, relevant experiences, and specific reasons for applying to the MCLS program at the University of Wyoming. The program does not adhere to strict test score minimums, however, for international applicants minimum suggested scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS, respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries will be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency until further notice. More information for international applicants can be found on the University of Wyoming graduate admissions website. The application also requests that three reference letters be submitted in support of the candidate's application. Completed applications are due on January 1.
2. The MCLS admissions committee reviews completed applications starting in early January of each application cycle. Promising applications are selected based on research experience, grades, test scores, and reference letters. The most compelling statements of purpose convincingly describe why the applicant is interested in pursuing graduate studies in the life sciences, detailing relevant past research experience and how it has prepared the student for PhD studies. Reference letters that include specific details and anecdotes about the applicant are most useful. The committee generally looks for grades of B or better in life science and chemistry courses, although lower grades can be balanced by a sufficiently strong research background. Successful applicants will be notified of admission decisions by May 1 at the latest, although the majority of decisions will be made by March 15.
3. Following the initial reviews, selected applicants are invited for a Zoom interview. Applicants will be provided with a primary research paper that they should read in preparation for the interview.
4. Zoom interviews are conducted with at least two members of the admissions committee. Applicants are asked a variety of questions, including why they are interested in the MCLS program, how their previous research experience has prepared them for PhD studies, their perceived strengths and weaknesses as a scientist, and future career goals. The interviewers also ask questions about the research paper and more general molecular biology questions to determine if the applicants have a sufficiently strong background to succeed in the MCLS program.
5. Shortly after the interview sessions, the MCLS admissions committee discusses the results of the Zoom interviews and ranks applicants for offers of admission, conditional upon approval by the Office of Admissions.

Program Specific Degree Requirements

MCLS doctoral students must fulfill the minimum requirements outlined by the university. In addition, students must obtain a high level of proficiency in the core foundations of the molecular and cellular life sciences through required courses in biochemistry/ molecular biology, scientific literature analysis proficiency, and the MCLS cornerstone course. Because of the broad range of research interests pursued by MCLS faculty and students, considerable flexibility will be exercised regarding the specific nature of the graduate level elective courses that students may take. Students must successfully complete four eight-week rotations in MCLS laboratories of their choice during the first year. Additionally, students must pass a comprehensive assessment exam at the end of the first year. Near the end of their second year in the program, students will undertake a qualifying examination in order to be formally admitted to graduate degree candidacy. This exam will have both written and oral components and will cover areas of science that are relevant to the students' proposed research. Annual meetings with a research-specific dissertation committee will facilitate and evaluate the research progress of MCLS students beginning in the second year. Students must also attend weekly outside seminars on topics in the molecular life sciences for the durations of their studies. For more information, please see the program's Website at: <http://www.uwyo.edu/MCLS/>.

Neuroscience, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/neuroscience/>
Email: neuroscience@uwyo.edu

Program Director: Kara Pratt, Ph.D.

Degree Offered

Ph.D. in Neuroscience

The Graduate Neuroscience Program offers training leading to the Ph.D. degree in Neuroscience. The Neuroscience Program emphasizes systems and integrative approaches, and our goal is to provide the students with the necessary background to be broadly trained research neuroscientists and to carry out independent research in neuroscience. The Neuroscience Program emphasizes continuing interaction with faculty from several departments and we have a low student to faculty ratio. Advisors spend considerable time supervising and training each doctoral student. The educational philosophy of the Neuroscience Program is to encourage a problem-oriented rather than a strict discipline-bound approach to research. You will emerge from this program with the scientific and experimental training needed to comprehensively address a very wide range of research questions using a variety of techniques and analytic tools.

The Graduate Neuroscience Program is designed to enable graduate students to acquire competence in the various disciplines necessary for research and teaching careers in neuroscience. The current interests of the Neuroscience faculty include sensory neurophysiology, behavioral neuropharmacology, neurodevelopment, neurodegeneration, and synaptic plasticity.

Students and faculty have access to outstanding resources established by NIH Neuroscience and Sensory Biology Core grants. The Microscopy Core houses both light (Zeiss laser scanning, fluorescent) and electron (Transmission and Scanning) microscopes. Resources needed to conduct research ranging from molecular, cellular circuit level to behavior are readily available within the Neuroscience Center.

Program Specific Admission Requirements

Steps for applying to the Program in Neuroscience:

Step 1: Contact faculty whose research is of interest.

Although not mandatory, applicants are encouraged to read through the faculty research summaries to identify faculty that they are interested in training with. It is strongly recommended that prospective students contact individual faculty for more information regarding their research programs and openings in their laboratories before submitting an application. This initial step is recommended because, due to the limited availability of Graduate Assistantships (GA's), graduate students are oftentimes recruited directly into a laboratory and supported straight away by the advisor's NIH or NSF funding.

Step 2: Submit the online application packet via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>).

For full consideration for fall and spring admissions, applications should be submitted by January 1 and June 30, respectively. The application packet is comprised of the following items:

- **Application form**
- **Official academic transcripts:** Applicants should have at least a 3.0 cumulative GPA (scale of 4.0), and a bachelor's degree in a discipline that is related to neuroscience such as biology, psychology, physiology, chemistry, physics, or chemical or bioengineering. We encourage motivated applicants from degrees in diverse areas that are interested in transitioning to neuroscience. Students with an MS degree in neuroscience or related fields are also encouraged to apply.
- **GRE scores:** Accepted but not required
- **Three letters of recommendation**
- **TOEFL/IELTS:** For international students whose native language is not English. The minimum acceptable scores are 550 (79 iBT) and 6.5 for TOEFL and IELTS, respectively. (The University of Wyoming's school code for TOEFL = 4855.)
- **Personal statement:** A 1-3 page personal statement describing the student's motivation for pursuing a PhD in the field of neuroscience. Please describe areas of interest and any specific research topics or techniques with which you have experience. If your interests are still broad, indicate your general interests and graduate training goals.
- We are also interested in learning about your long-term career goals. What do you aspire to do after graduation? What are you specifically interested in the University of Wyoming? Finally, if you have established a potential faculty advisor (step 1), this should be clearly stated here in the personal statement.

Step 3: The interview

The graduate advisory committee reviews submitted application packets. Only complete packets are reviewed. Applicants deemed strong by the committee will be invited to participate in either an in-person or virtual (via zoom or phone) interview. The interview allows for the committee to learn more about the applicant, and, likewise, for the applicant to interview the committee.

Step 4: Verification of admittance by UW Admissions Office. Applicants that are chosen for admission to the Program in Neuroscience will then be requested to complete the application process through the University of Wyoming Admissions Department. Eligibility for enrollment will be verified by the UW Admissions Office, including the receipt of official transcripts and documents.

Program Specific Degree Requirements

Doctoral Program

All doctoral Neuroscience students are required to complete a program of core classwork that includes the following required courses: Introduction to Neuroscience, Structure and Function of the Nervous System and Neurophysiology. Students are required to take one course in Statistics (e.g. STAT 5050, STAT 5210) and the course that meets this requirement will be arranged with the student's committee. The statistics requirement must be met by the end of the second year. The Neuroscience Program is a research-oriented program and students are expected to take a minimum of 2 to 3 credit hours of research per semester. Students are also expected to enroll in an on-going Seminar in Neuroscience. The Neuroscience Seminar, which meets weekly and is attended by students and faculty members, provides an opportunity for intellectual and social exchange, as well as for the development of professional skills in critical thinking. The topic for seminar and the faculty member directing the seminar changes each semester. The remainder of the coursework for the doctor of philosophy degree is selected from designated courses in Neuroscience, physiology, pharmacology, and molecular biology. A grade of B or better is required for all Neuroscience courses.

A student is expected to have a graduate adviser at all times. The faculty adviser must be a participating member of the Neuroscience faculty. The adviser is responsible for directing the student's research and academic coursework. During the second year, the student will have an advisory committee. The advisory committee will consist of at least three neuroscience faculty members and an outside member. Normally, the student's adviser will chair the committee and help identify members of the committee who best match the student's area of interest. The role of the advisory committee is to oversee all aspects of the student's education after the first year.

In the student's second or third year, the advisory committee will set and evaluate the student's qualifying examination. After successful completion of the preliminary examination the student will profess to Ph.D. candidate status.

The dissertation is the single most important component of the graduate program. It reports the results and significance of the student's research. In addition to the written dissertation, the doctoral candidate will deliver a formal seminar based on their research. The seminar will be followed by an examination by the student's advisory committee.

Science and Mathematics Teaching Center Master's Degrees

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/smtc/>
Email: smtc@uwyo.edu

Program Director: Sylvia Parker

The Science and Mathematics Teaching Center (SMTC) was established in 1970 and is committed to excellence in science, mathematics, technology and STEM education. As part of the Office of Graduate Education in Academic Affairs, the SMTC, in cooperation with the Wyoming Department of Education (WDE) and the Professional Teaching Standards Board (PTSB), serves as a resource and professional development center for the state. The SMTC offers transdisciplinary graduate degree programs with multiple degree concentrations, certification options, and endorsement options. All of the programs emphasize both strong content knowledge and instructional practices. The affiliate faculty for the SMTC includes faculty from the Colleges of Agriculture and Natural Resources, Arts and Science, Education, and Engineering and Applied Science, and the Haub School of Environment and Natural Sciences.

The SMTC provides extensive off-campus professional development that serves teachers, students, administrators, school districts and communities throughout Wyoming and the region. SMTC in-service and extension courses,

workshops, institutes, and conferences are designed collaboratively to improve science and mathematics teaching in Wyoming.

The SMTC administers and supports five master's degree programs:

- (1) the Master of Science degrees in Natural Science with concentrations in Middle Level Math (MMA) and
- (2) Middle Level Science (MSC); these programs are designed for Wyoming's in-service elementary, middle, and high school teachers. They focus on general science and mathematics content with an emphasis on teaching middle school level learners. The course work leads to middle level endorsement provided by the Wyoming PTSB. Teachers must have two years of teaching experience to participate in these programs.
- (3) Master of Science in Teaching - Natural Science (MST - Natural Science). This is a self-directed master's degree program working with the SMTC, SER, and the Haub School as well as other colleges. The program is developed individually with the guidance of a graduate committee based on the interests of the graduate student. This program may be used by teachers to take the 18 graduate-level credits often needed to teach Advanced Placement and community college courses.
- (4) Master of Science - Natural Science (MS - Natural Science). This is a self-directed master's degree program working with the SMTC, the College of Arts and Sciences, SER, and the Haub School and other colleges. The program is developed individually based on the interests of the graduate student and may emphasize formal or informal learning settings. Interdisciplinary study is encouraged.
- (5) Master of Science in Natural Science with a concentration in Natural Science Education (NED). This Master's degree program is designed for students pursuing careers as environmental and natural science educators in non-public school or non-formal education settings. These students spend one year at the Teton Science Schools (TSS) in Jackson. A long-standing MOU between the SMTC and TSS allows students to use 15 graduate credit hours earned at TSS towards a master's degree if they are accepted into the second year at UW within the SMTC.

SMTC Student Learner Outcomes

Upon successful completion of the MS degree program in Natural Science, a student will be able to:

- Engage in teacher research to transform STEM instruction:
 - Design and implement a research project that asks and answers a question using appropriate materials, concepts and methods, and ethical practices, and
 - Effectively communicate all aspects of the research project in both oral and written forms.
- Use professional and academic standards to ensure high-quality interdisciplinary instruction (i.e., place-based, culturally relevant, and/or social justice pedagogy) to maximize learning for all students.
- Engage in mathematical and/or scientific discourse and scientific thinking as active participants in communities of practice.
- Use emerging technology and science investigations as tools to engage students.

Program Specific Admission Requirements

For the MSC, MMA, MST and MS-Natural Science Master's Degrees:

Two years of teaching experience and a valid teaching license (required for MSC and MMA; may be waived for MST and MS-Natural Science)

Application Fee, unless a UW Graduate

Official Transcripts from all Institutions attended and Bachelor Degree conferring institution

3.0 undergraduate grade point average; provisional admission with a lesser GPA only with consent from Academic Affairs

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence (These items are not required of applicants who hold a prior master's degree)

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from the teacher's principal and two other colleagues.

The NED Degree - First Year Application:

Official Transcripts from all institutions attended and Bachelor Degree conferring institution Application Fee, unless a UW Graduate

Acceptance and admission by the Graduate Program at the Teton Science Schools in Jackson, WY

The NED Degree - Second Year Application:

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from a TSS Graduate Program Faculty Member, one from another TSS employee such as a Classroom Instructor or Field Instructor, and one from the first year application

Applicants complete a UW graduate application and upload all of the information on the Admissions Office website (<http://www.uwyo.edu/admissions/apply.html>). Application packets are reviewed by SMTC Admissions Committees and recommendations for admissions are submitted to the University of Wyoming Admissions Office. Any of the above requirements plus the university's minimum 3.00 grade point average may be waived if proper documentation and reasoning are given by the SMTC and approved by the Associate Vice Provost of Graduate Education.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) for more information.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Application Due Dates for Master of Science - Natural Science with Concentrations in the following areas:

Middle-level Science (MSC): applications are accepted on an ongoing basis; new students may begin only in summer each year; final due date for admission in summer is April 1.

Middle-level Mathematics (MMA): applications are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Natural Science Education (NED): applications deadlines for Year 1 are established by Teton Science Schools (<https://www.tetonscience.org/programs/graduate-program/admissions/>); due date for admission to begin Year 2 in the fall at UW is February 1.

MST and the MS- Natural Science Masters Degree: applications for these self-designed programs are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Graduate Assistantships and Scholarships

The SMTC often has scholarships and graduate assistantships available for graduates accepted for the above Master's degree programs. More information upon admission and acceptance.

College of Law

102 Law Building

Klint Alexander, Dean

Phone: (307)766-6416 FAX: (307)766-6417

Web site: www.uwyo.edu/law

Professors:

KLINT ALEXANDER, B.A. Yale University 1991; Ph.D./M.Phil. Cambridge University 1997; J.D. University of Virginia 1999; Dean & Professor of Law 2015.

MELISSA ALEXANDER, B.A. Yale University 1996; J.D. University of Virginia 1999; Professor of Law 2019, 2015.

JACQUELYN BRIDGEMAN, B.A. Stanford University 1996; J.D. University of Chicago 1999; Associate Dean for Academic Affairs and Professor of Law 2008, 2002.

KENNETH CHESTEK, B.A. Pennsylvania State University 1975; J.D. University of Pittsburg School of Law 1979; Professor of Law 2018, 2012.

DANIELLE R. COVER, B.A. University of Maryland 1994; J.D. Tulane University School of Law 1997; Professor of Law 2020, 2014; Director of Legal Services Clinic.

JAMES M. DELANEY, B.A. University of Washington 1985; J.D. Gonzaga University School of Law 1992; LL.M. in Taxation, University of Florida 1997; Professor of Law 2013.

STEPHEN M. FELDMAN, B.A. Hamilton College 1977; J.D. University of Oregon 1982; J.S.M. Stanford University 1986; Jerry W. Housel/ Carl F. Arnold Distinguished Professor of Law 2002.

MARK GLOVER, B.A. Washington University in St. Louis 2002; J.D. Boston University School of Law 2008; LL.M. Harvard Law School 2011; Professor of Law 2019, 2015.

DARRELL D. JACKSON, B.A. College of William and Mary 1987; J.D. George Mason University School of Law 1990; Ph.D. University of Colorado School of Education 2011; Professor of Law 2018, 2013.

SAM KALEN, B.A. Clark University 1980; J.D. Washington University 1984; Professor of Law 2014, 2009.

GEORGE MOCSARY, B.E. The Cooper Union School of Engineering 1995; MBA University of Rochester 1995; J.D. Fordham University School of Law 2009; Professor of Law 2019.

NOAH B. NOVOGRODSKY, B.A. Swarthmore College 1992; J.D. Yale Law School 1997; Professor of Law 2013, 2009.

TARA RIGHETTI, B.A. University of Colorado Boulder 2005; J.D. 2007; Professor of Law 2020, 2014.

JASON ROBISON, B.S. University of Utah 2003; J.D. University of Oregon 2006; LL.M. Harvard Law School 2009; S.J.D. 2013; Professor of Law 2019, 2015.

ALAN ROMERO, B.A. Brigham Young University 1990; J.D. Harvard University 1993; Professor of Law 2007, 2003.

MICHAEL R. SMITH, B.S. Florida State University 1982; J.D. University of Florida 1985; Professor of Law 2006.

Associate Professors:

LAUREN MCLANE, B.S. Radford University 2002; J.D. Seattle University School of Law 2008; Associate Professor of Law 2021, 2018; Director, Defender Aid Clinic.

DONA PLAYTON, B.S. University of Wyoming 1989; J.D. University of Wyoming 1993; Associate Professor of Law 2002, 2018; Director, Family and Child Legal Advocacy Clinic.

Assistant Professors:

JERRY FOWLER, B.A. Princeton University 1983; J.D. Stanford University 1990; Assistant Professor of Law 2019; Director, International Human Rights Clinic.

Academic Professionals:

DEBORA PERSON, B.A. Arizona State University 1981; M.L.S. Rutgers University 1992; Library Associate 1993; Administrative Law Librarian 2005, 1994.

TAWNYA PLUMB, B.A. University of Wyoming 1996; M.L.I.S. University of Texas at Austin 1998; Electronic Services and Assistant Librarian 2004.

Professors Emeritus

Debra L. Donahue, Harvey Gelb, Timothy Kearley, Jerry R. Parkinson, Dee Pridgen, Joel Selig, Elaine A. Welle

The College of Law was founded in 1920. The goal of the college is to provide a sound and thorough education in the law that will prepare the student to practice law in accordance with the highest standards of professional competence and responsibility. The emphasis in instruction is on analysis and understanding of legal principles and the

development of skills necessary to the practice of the profession. The course of study will prepare a graduate to practice in any jurisdiction which has adopted the Anglo-American system of law.

The curriculum of the College of Law consists of three years of study within the college. Required courses necessary to basic legal knowledge make up the first two semesters of study, while courses in the final four semesters are largely elective. Students become eligible to receive the Juris Doctor (J.D.) degree upon successful completion of 90 semester credit hours of law courses with a grade point average of at least 2.000.

The college acts as a law center for Wyoming. It serves lawyers, judges, and government by a program of continuing legal education for attorneys and others interested in significant legal developments, by research projects aimed at improving state law, and by publishing the Wyoming Law Review.

Accreditation

The college is approved by the American Bar Association and its graduates are eligible for admission to the bar in every state. A student planning to practice in a particular state should check its rules for admission to the bar.

The college is also a member of the Association of American Law Schools. Membership is conditioned upon the maintenance of an adequate teaching staff and library, the offering of a sound educational program and adherence to prescribed standards for the admission and graduation of students.

Prelegal Curriculum

There is no prescribed or required set of courses for prelegal work. A student must usually have a B.A. or B.S. degree before beginning the professional study of law. There are no restrictions on the field in which the degree is earned.

The objective of prelegal study should be to acquire knowledge and skills useful in the study and practice of law. College study should prepare the student for law school by developing language comprehension and use, understanding of political, economic, social and cultural institutions, and the ability to think logically and creatively. Courses promoting these objectives are included in the basic requirements for most undergraduate degrees. The choice of a major should be determined by the student's academic interest and professional objective in law.

Valuable background may be acquired through the study of English, history, philosophy, economics, political science, psychology, sociology, business administration, mathematics and the natural sciences.

For additional information, see the College of Law web site, (www.uwyo.edu/law).

Admission Requirements and Procedures

Admission to the professional curriculum in law is granted by the admissions committee of the College of Law. The College of Law restricts the number of entering students to a class size consistent with its facilities and its educational objectives. In evaluating an application, the committee considers the applicant's undergraduate college scholastic record and score on the Law School Admission Test (LSAT).

Other criteria relevant to the probability of success in the study and practice of law will also be considered.

1. Prior to beginning work in the College of Law, applicants must have a bachelor's degree from an accredited college or university, unless they have requested and been granted following exception:
 - a. An applicant who needs not more than 6 semester hours of college credit to qualify for a bachelor's degree may be admitted in exceptional cases to law school if the committee determines that the applicant has sufficient education and preparation for the study of law; has an outstanding

- undergraduate scholastic record; and has an approved program signed by the appropriate undergraduate official indicating that the remaining requirements for the bachelor's degree may be met by summer school attendance or by other means that will not interfere with the study of law.
2. Every applicant must take the Law School Admission Test. A packet giving information about the test, the dates on which it is given, and centers at which it can be taken, sample questions and an application form, may be obtained from Law School Admission Council, Box 2000, Newtown, PA 18940, by phone at (215) 968-1001, online at www.lsac.org.
 3. Every applicant must register with the Law School Admission Council Credential Assembly Service, CAS. Registration may be done through the LSAC website (www.lsac.org). The CAS will prepare a report that is transferred to the college.
 4. Every applicant must complete the electronic University of Wyoming College of Law Application through LSAC between October 15 and April 30. Applications received by December 15 will be considered for early admission.
 5. If admitted, official transcripts sent directly to the College of Law from each college attended must be on file in the Admissions Office at least 30 days before the student's registration date.

Application Deadline

An initial entering class will be selected from completed applications on file on April 30. Students who submit an application by December 15 will be considered for early admission. An application is complete only when the college has received the LSAT score, the CAS report, applications, and all supporting documents.

Admission With Advanced Standing

Transfer students are admitted only when the College of Law facilities and curriculum permit. A transfer student may transfer up to the number of credits the student could have earned had the student completed his or her first year at the University of Wyoming College of Law. Transfer credit will be given only for courses in which the student earned a grade of C or higher. Applicants admitted must satisfy the requirements for graduation established by the College of Law, including such other requirements as may be imposed as a condition of admission. Students interested in transferring should contact the College of Law for information concerning application procedures.

Academic Regulations

The Juris Doctor (J.D.) degree is awarded by the College of Law faculty to candidates who meet the following requirements:

Curriculum is subject to change at the College of Law Faculty's discretion, which may cause the annually updated university catalog to be out of date. For students matriculating in or after the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of "C" or better for courses taken elsewhere) 90 credit hours (required for graduation) of law coursework in accordance with the official curriculum as adopted by the College of Law faculty. At least 59 of these credits must be completed at the University of Wyoming College of Law. Courses taken for S/U grades count toward the hours required for the J.D. degree only if the course is offered for the S/U grade only. Regardless of the matriculation date, students must complete at least 76 credit hours through graded (A-F) courses.

The course of study must be completed no earlier than 24 months (2 years) and not later than 84 months (7 years) after a student has commenced law study. No student shall be permitted to enroll at any time in coursework that, if successfully completed, would exceed 20 percent (18 hours) of the total coursework required for graduation.

Second and third year students may take up to six of 90 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students must receive a letter

grade of B or better for these non-law courses to count toward graduation requirements. Additionally, these courses will transfer in with a satisfactory grade of 'S' and will not impact their law school GPA. Students who wish to enroll in a non-law course on this basis must secure the prior approval of the course professor and the Associate Dean of Academic Affairs at the College of Law. Approval will be based on the student's submission of a Non-Law Grad Course Request form with a brief written statement explaining how the proposed coursework relates to and enhances the student's legal education. Students should be aware that non-law courses completed on this basis will not count toward the 76 hours that students must complete in graded courses as a requirement for graduation. The non-law coursework will instead be counted as credits the law students are permitted to take on an S/U basis.

The College of Law automatically approves up to 9 hours of any joint degree core courses with the corresponding prefix to their joint degree (i.e. MBAM, POLS, ENR) that meet the grade requirement to transfer in toward their law degree. If additional courses are needed outside of these respective prefixes, these will be approved on a case by case basis. Those students enrolled in a joint degree program may take up to 9 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students in a joint degree program who use 9 non-law credit hours toward their J.D. degree may reduce their required number of graded credits from 76 to 73 so that they can participate in other S/U offerings at the College of Law. To receive law school credit for the non-law course, a student will be required to earn a grade of B or better in the non-law course. The grade will not count, however, toward the student's law school GPA. The course will be counted as a "satisfactory" grade for purposes of the student's law school GPA. Joint degree students should be aware that non-law courses completed on this basis will not count toward the 73 hours that joint degree students must complete in graded courses as a requirement for graduation. The non-law coursework will instead be counted as credits the law students are permitted to take on an S/U basis.

To graduate, all students must earn a cumulative grade point average of 2.000 for all courses taken at the College of Law. If a course is repeated, both grades shall be included in computing the average. The student, except in exceptional circumstances, must have a baccalaureate degree. Candidates who meet these requirements are eligible for graduation at the end of any semester.

Academic Standing

The following requirements apply to any coursework at the College of Law. Courses that law students may complete outside of the College of Law do not count in calculation of the required College of Law grade point average (GPA).

In the first year, a student who fails to make a 1.800 GPA after the first semester, or fails to make a 1.900 cumulative GPA overall in the first year's work, shall be excluded from the College of Law. A student who at any time fails to make a passing grade in two of the courses for which the student is registered in any semester shall be excluded from the College of Law.

A student who enters the second year with a GPA lower than 2.000 but at 1.900 or above, or who fails to maintain a 2.000 cumulative GPA after the first year, shall be placed on academic probation. A student on academic probation who does not attain an overall grade point average of 2.000 within one semester shall be excluded.

A student excluded from the College of Law may petition the faculty for readmission. The faculty may, in its discretion, readmit the student upon receipt of satisfactory evidence of extenuating circumstances or marked improvement in grades and study habits. Readmission may be subject to conditions, including, but not limited to, the repeating of any or all courses, as the faculty may decide. If a student's petition for reinstatement is denied, the student must wait nine months before petitioning again for readmission. Also, all students are limited to two petitions for readmission. The entire faculty will automatically hear and consider a student's initial petition. In the event of a second petition for readmission, a committee selected by the Dean will hear and consider the petition. The committee will present a report and recommendation to the faculty for adoption. Denial of a second petition is final.

Advanced Writing Requirement

As a condition of graduation, all students must complete an upper-level writing requirement consisting of a research paper of a minimum length of 5,000 words, exclusive of footnotes. All students must follow a designated standard citation form. Students must submit a detailed outline of the paper to the supervising professor, then must rewrite the paper at least once after the professor reviews the first draft. With the professor's approval, the student can meet the advanced writing requirement in any law school elective course, including a seminar, as long as the above requirements are met. The supervising professor must certify that the writing requirement has been fulfilled.

All student articles written for law review, whether published or unpublished, must have a supervising faculty member and otherwise meet all other provisions of the College of Law Advanced Writing Requirement. A student may also fulfill the requirement through an independent study or by writing a case note or comment for the law review, under the supervision of a professor. It cannot be satisfied through participation in a clinic.

Attendance Requirement

Students must attend at least 75 percent of regularly scheduled classes in each required course. A professor in a required course may impose an attendance requirement of greater than 75 percent if the policy is announced in writing on the first day the class meets.

In elective courses, students must attend at least 75 percent of regularly scheduled classes unless the professor announces a different policy in writing on the first day the class meets. Any alternative policy must comply with the American Bar Association (ABA) requirement of regular and punctual attendance.

A student who fails to meet the minimum class attendance requirement in any class will be dropped from the course and receive a grade of F, unless extenuating circumstances are present, in which case the student shall receive a grade of W. A professor may impose sanctions for students who have met the minimum class attendance requirement but in other respects have violated specified attendance guidelines, if the professor announces the guidelines and possible sanctions in writing on the first day the class meets.

The following table indicates the number of classes a student must attend under the 75 percent rule in a two hour or three hour course, depending on the number of class meetings. Students must verify with the professor the number of classes required in a one or four hour course.

The ABA requires attendance at 75 percent of all scheduled class times.

3-Credit Course (meeting three times a week for 55 minutes each):

<u>Class Meetings</u>	<u>Must Attend</u>
40	30
41	31
42	32

2-Credit Course (meeting twice a week for 55 minutes each) or a 3-Credit Course (meeting twice a week for 80 minutes each):

<u>Class Meetings</u>	<u>Must Attend</u>
26	20
27	20
28	21

Class Rank

Students are ranked by class at the end of each of the fall and spring semesters once the faculty have submitted all grades. Class rankings will be available in the Front Office. Students can choose to have their spring class ranking letter mailed to them if they provide the Front Office with a self-addressed, stamped envelope. Transfer students to the College of Law shall not be ranked with other UW students until they have completed two full-time semesters at UW (or a minimum of 24 UW credits). Students who visit out at other ABA accredited law schools or who graduate early are ranked based on their ranking at the end of their last semester at UW.

Experiential Learning Requirement

As a condition of graduation, each student must successfully complete no fewer than 6.0 credit hours in experiential learning courses. Experiential learning courses include a simulation course, a law clinic, or an externship field placement. Simulation courses provide substantial experience not involving legal representation of an actual client, that (1) is reasonably similar to the experience of a lawyer advising or representing a client or engaging in other lawyering tasks in a set of facts and circumstances devised or adopted by a faculty member; and (2) includes: direct supervision of the student's performance by the faculty member; opportunities for performance, feedback from a faculty member, and self-evaluation; and a classroom instructional component (ABA Standard 303).

Typically students may fulfill the experiential learning requirement by successfully completing 6.0 credit hours in any of the following upper- class elective courses:

- Advanced Appellate Advocacy (LAW 6520)
- Advanced Legal Research (LAW 6990)
- Advanced Oil & Gas Law (LAW 6992)
- Advanced Persuasive Writing (LAW 6925)
- Alternative Dispute Resolution (LAW 6915)
- Business Planning (LAW 6560)
- Civil Pretrial Practice (LAW 6565)
- Clinic: Civil Legal Services (LAW 6930 or LAW 6931)
- Clinic: Defender Aid (LAW 6932 or LAW 6930)
- Clinic: Energy, Environ. & Natural Resources (LAW 6933 or LAW 6930)
- Clinic: Family & Child Advocacy (LAW 6930 or LAW 6934)
- Clinic: International Human Rights (LAW 6930)
- Clinic: Prosecution Assistance (LAW 6930 or LAW 6936)
- Contract Drafting (LAW 6935)
- Estate Planning (LAW 6670)
- Estate Planning Practicum (LAW 6937 or LAW 6930 or LAW 6915)
- Externships (LAW 6960)
- Interviewing, Counseling & Negotiation (LAW 6166 or LAW 6915)
- Summer Trial Institute (LAW 6850)
- Trial Practice (LAW 6850)

Note: classes may be removed from and/or added to this list each semester.

Grading

Grades are assigned on a plus/minus system. Grades of incomplete (I), and withdrawal (W), are disregarded. A required course in which a grade of F or W or U is received must be repeated. A course cannot otherwise be repeated without

the consent of the faculty. If a course is repeated, both grades are included in computing the student's grade point average.

A4.00	B +3.333	C+2.333	D+1.333	F0.000
A-3.667	B3.000	C2.000	D1.000	WF0.000
	B-2.667	C-1.667	D-0.667	

Satisfactory (S) or unsatisfactory (U) grading applies only if the course is offered on an S/U basis or a student takes a non-law graduate-level course as explained above. Students from other colleges who are permitted to take professional courses in the College of Law must take them for S/U credit. The grading scale is at discretion of the instructor for each course.

Bar Exam Passage Rate Improvement Program

Students matriculating after August 2021, a student whose first-year GPA is in the bottom one-third of the class will be required to pass four of the following courses as a requirement of graduation: Business Organizations (or one of either Agency and Partnership or Corporations); Secured Transactions; Trusts and Estates; Criminal Procedure; Criminal Adjudication; Family Law; Constitutional Law II; or Real Estate Finance. During the fall and spring semesters after the 1L year it is required to take at least one of these courses as a minimum each semester, until the requirement has been satisfied.

In order to graduate, a student whose first-year GPA is in the bottom one-third of the class will also be required to take and pass a law school-offered bar examination course as a 3L (typically in their final spring semester), unless for unanticipated reasons the College of Law does not offer that course in a particular year.

Curriculum

Required Courses: First (1L) Year Students (*Additional courses cannot be taken the first year without special permission from a dean.*)

Fall Semester

Civil Procedure I (6240) - 3

Contracts I (6110) - 3

Legal Research (6165) - 1

Legal Writing I (6160) - 3

Property I (6120) - 3

Torts I (6130) - 4

Spring Semester

Civil Procedure II (6340) - 2

Constitutional Law I (6250) - 3

Contracts II (6210) - 2

Criminal Law (6140) - 3

Legal Writing II (6260) - 2

Property II (6220) - 2

Required Courses: Second (2L) Year Students (offered once per year)

Evidence (6410) - 3

Professional Responsibility (6420) - 3

Elective Courses: Second (2L) & Third (3L) Year Students (* subject to availability)

See Law Courses section

Graduation with Honors

The degree of Juris Doctor is awarded with honors if the student achieves a grade point average of 3.400 or better on all resident credit in the College of Law.

Honor Roll

Students enrolled in a minimum of 12.0 semester hours of law courses carrying A-F grades, and who have no semester grades of incomplete (I), are eligible for the President's Honor Roll and the Dean's Honor Roll. Students with a semester average of 4.000 will be named to the President's Honor Roll. First-year students with a semester average of 3.250 or better and second-year and third-year students with a semester average of 3.400 or better will be named to the Dean's Honor Roll.

Minimum Hours

The College of Law does not permit students to attend on a part-time basis. Students are required to take the full load of required courses during their first two semesters and to carry at least 9 credit hours in each of the remaining semesters of law study. Notwithstanding, if a student has less than 9 credits remaining in their final semester of study, then said student may register for only the number of remaining credits (e.g. if a student only has 4 credits left to graduate, that student will only be required to register for 4 credits). First year students will be allowed to take less than the full load of required courses only if they present exceptional circumstances, as determined by the Dean or his/her delegate.

Transfer Credits

The College of Law admits transfer students only in the fall of their second year. A student granted transfer admission may transfer credits earned in courses taken at another ABA-accredited law school toward a degree from the UW College of Law up to the number of credits that a traditional UW student would have earned during the student's first year at the University of Wyoming (32 credits as of the 2020-21 academic year). In addition, University of Wyoming law students who visit out for a semester or full year may also transfer credits from other ABA approved law schools, as long as 59 credits are completed at the University of Wyoming. The College of Law will also accept up to 15 hours of transfer credit from another ABA accredited school for an international student previously enrolled in an LL.M. or other post-J.D. program. To receive transfer credit from a course, a grade must be a "C" or better. Transfer credits are recorded on the JD transcript as an "S" (Satisfactory), instead of graded credits. All transfer credits must be approved by the Associate Dean of Academic Affairs in advance.

Withdrawing from a Course &/or the University

Failure to attend class or failure to pay tuition does not constitute withdrawal from a class or from the University. Students who pre-register for classes on WyoWeb will be assessed tuition and fees. Students who drop or withdraw from their last or only class for a given term after the end of the drop/add time period must also meet with the Assistant Dean of the College of Law and complete the official withdraw forms required by the Office of Registrar. Financial aid recipients who withdraw from courses or reduce credit hours must consult with a financial aid counselor regarding repayment of financial aid funds if applicable. For more complete details regarding deadlines, refunds, and cancellations, see the University's Accounts Receivable web page <http://www.uwyo.edu/fsbo/accounts-receivable/>

Exam Procedures and Policies

1. Review the Honor Code before beginning the exam period. It applies to all examinations. If you have any questions about the materials allowed by a professor, please see the professor in advance of the exam.
2. A copy of the final exam schedule will be posted on the web, please check dates and times carefully.
3. We use exam numbers, rather than students' names, so that professors cannot identify the students' exams they are grading. Exam numbers will be available in ExamSoft one to two weeks before the exam period. You must write this number on all of your exams and blue books, or as your identification number for typed exams. **DO NOT** write your name on your exam. Midterm exams and final exams have unique numbers. Save these numbers, as you will use the same number for all of your midterm and final exams respectively. New numbers are assigned each semester.
4. All examinations must be: (A) written in ink in 8 1/2 x 11 size "blue books," OR (B) typed on the student's laptop using the ExamSoft software. Students provide their own blue books, pens or laptops. The law school will supply answer sheets and pencils for any multiple choice exams.
5. If you are using a laptop:
 - Exemplify (SofTest) is operable for PC's and Mac's. Please reference this site for the most up to date Minimum System Requirements, Exemplify: Minimum System Requirements - ExamSoft
 - You must download the exam software (free for students) well in advance of the exam day.
 - Have your laptop set up and the software running in the designated room before the time to begin the exam.
 - Instructions for using the ExamSoft Exemplify (SofTest) software are available at the Examssoft website (use Chrome or Firefox ONLY).
 - If you experience any problems with your computer during the exam, come to the front office immediately and someone will assist you.
 - Once you complete the exam, and have turned in your exam questions, be sure you receive the "upload successful" message to assure that your exam answers have been transmitted.
6. All exam reschedules must be approved by COL Assistant Dean, Lindsay Hoyt or the Registrar. You must meet the criteria published within the exam schedule to reschedule an exam, i.e., two exams on one day, three exams in three days, or four exams in five days. Fill out the exam reschedule request form and turn it into COL Registrar, Dave

Bluemel. Please note, that if possible, an elective will be rescheduled rather than a large required class, and rescheduled to a later, rather than an earlier date.

7. Students who are handwriting their exams must return the exam questions and blue books to a staff member in the lobby outside the Dean's office at or before the time indicated on the exam. Laptop users should exit the exam software and turn in the exam questions to a staff member at or before the time indicated. It is your responsibility to determine the precise time the exam is to be returned and to ensure that you meet the deadline. Use the clock in the exam room for reference, not the clock that may appear on your computer or the time on your wristwatch.

8. During the exam, turn off (or leave outside the room) all cell phones, smart watches, pagers, and PDA's. Do not leave them on vibrate, as this may be disturbing to other students.

9. When you finish your exam, please be courteous/quiet as you gather your belongings and leave the exam room. You MAY NOT return to the room to gather your belongings after you have turned in your exam, unless it is after the collection time indicated on the exam. **Be** aware that students are taking exams in both the morning and the afternoon and are taking exams that have differing ending times -- so please curb your talking in the classroom areas and halls during the administration of exams.

10. If you cannot take the exam at the set time due to illness, or other emergency, you must notify Assistant Dean Lindsay Hoyt, as soon as possible, prior to the exam and be prepared to supply appropriate documentation.

11. Final grades will be available on WyoWeb. No grades will be given over the telephone.

Final Exam Reschedule Policy

No student is required to take exams in the following circumstances as long as they submit a reschedule form two weeks prior to the first day of exams:

- two exams on one day
- Three exams in three consecutive days
- four exams in five consecutive days

Students who have six final exams cannot be provided relief due to the limited number of exam days. Efforts will be made, however, to distribute the six exams so as to avoid three in a row. A student who meets the above criteria must see Assistant Dean Lindsay Hoyt to reschedule. Exams are not normally rescheduled outside of the regular exam period.

Disability Assistance

The University of Wyoming College of Law is committed to making its programs accessible to individuals with disabilities and ensuring a robust academic experience for all students. The College of Law works closely with the Disability Support Services office on the University's main campus to coordinate a variety of services for students with disabilities. The Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973 guarantee equal access to programs and services to those with disabilities. In order to be a qualified individual subject to the protections of these Acts, a person must demonstrate that he or she has a disability that substantially limits a major life activity (e.g., seeing, hearing, walking, breathing, performing manual tasks, learning, caring for oneself, and working) and, as such, requires a reasonable accommodation in order to have equal access. This section of the College of Law's policies explains a student's rights and responsibilities in seeking to receive accommodations from the College of Law because of a disability. The process and procedures outlined here apply to law school classroom accommodations, exam accommodations, and accommodations related to accessing the University's facilities.

I. Rights and Responsibilities in Requesting Reasonable Accommodations

A. Accommodation Request Deadlines

1. The deadlines for students requesting accommodations is 2 weeks before the start of the academic year or semester for classroom and exam accommodations.
2. Extensions to these deadlines may be granted to students who were unable to meet the deadline due to extenuating circumstances. Accommodations are prospective; retroactive accommodations are not available. For this reason, it is important that the student timely submit requests for accommodations.

B. Accommodation Process and Procedure for Classroom and Exam Accommodations

1. A student who believes that he or she has a qualifying disability warranting accommodation for academic programs, exams or access to the University's facilities should submit their requests for accommodations through the University of Wyoming's Disability Support Services (DSS), by contacting udss@uwyo.edu or 307 766-3073 or applying through the website found here: <https://www.uwyo.edu/udss/>.
2. The DSS application process is required and separate from any communication with College of Law staff. Students *should not* go directly to any faculty in an effort to arrange accommodations for disabilities.
3. Once the student submits the completed application and supporting medical documentation, DSS will review the documentation to verify the existence of a qualifying and make a decision regarding the student's eligibility for services. DSS also may request additional documentation at any time or may request that the student's physician or other licensed health professional speak directly to the DSS staff.
4. Following the determination that the student has a qualified disability, DSS and the Assistant Dean of the College of Law, as the designated liaison for the College and its faculty, will consult together to make a determination regarding the student's requested accommodations related to the student's courses, exams, and access to university facilities.
5. A reasonable accommodation is an accommodation that does not impose an undue financial or administrative burden on the College of Law and does not fundamentally alter the nature of the educational service, program, or activity at the College of Law.
6. DSS is responsible for making determinations about reasonable accommodations after consulting with the Assistant Dean of the College of Law and will then notify the student by email of the decision to deny, grant, or partially grant or provide a reasonable alternative to the requested accommodations. This email is required prior to any accommodations being made.
7. Information regarding a student's disability and any accommodations provided shall be disclosed only when necessary in furtherance of the student's education or to individuals who have a need to know the information as determined by the University. As a general rule, when feasible, student anonymity will be maintained.
8. For any exam condition accommodations, DSS will notify the Assistant Dean of the College of Law who will oversee the implementation of the accommodation. DSS will also notify any other law school staff designated by the Assistant Dean of the College of Law who are needed to implement the accommodation (e.g. the designated testing coordinator, faculty etc.). Students will be provided notice of the time and place of their accommodated testing by DSS.
9. For classroom accommodations, the Assistant Dean of the College of Law will oversee implementation of the accommodations and notify the faculty of the particular course if the accommodations provided affect the conduct of the class.

10. If a student is denied eligibility for DSS or requested reasonable accommodations, the student may request a review of these determinations by the Vice President for Student Affairs consistent with the process mentioned here <https://www.uwyo.edu/udss/laws-and-complaint-processes/if-and-when-you-disagree.html> Students who have questions about the review process may contact DSS for more information. The Vice President for Student Affairs may consult with the Dean of the College of Law prior to making a final determination.

II. Rights and Responsibilities of the Student after Receiving Classroom and Exam Accommodations

- A. A student must renew his or her request for accommodations each semester by meeting with DSS in order to determine whether new and different accommodations are necessary for the student's disability to be accommodated. Requests for classroom and exam accommodations must be made two weeks prior to the beginning of the semester. At these meetings, DSS may request that the student submit updated documentation verifying the nature and extent of the student's disability.
- B. If a student's condition changes at any time, thereby affecting the nature and extent of his or her disability, the student must notify the DSS immediately and DSS will consult with the Assistant Dean of the College of Law, as the designated liaison for the College to engage in the interactive process set forth in section I(B)(4).
- C. If there is a problem with any accommodations that a student receives, whether it is related to a course, an exam, or access to a facility, the student must promptly notify DSS who will coordinate with the Assistant Dean of the College of Law so that steps may be taken, to the extent practicable, to resolve the problem.
- D. Communication via accommodations (including exam schedules and room assignments) will be made using the student's email account. A student is responsible for checking email on a timely basis to determine the status of any issue relating to the accommodation that has been put in place for a particular disability. If the student's disability prevents physical access to email, an alternative method of communication will be determined in consultation with DSS, the College of Law, and the student.

III. Requests for Accommodations Related to the College of Law Facilities

Any requests for disability accommodations related to the College of Law buildings or University grounds may be initiated by contacting DSS or the Assistant Dean of the College. DSS and/or the College of Law will work collaboratively regarding any requests and may involve other campus units, including but not limited to the UW Operations, in order to process and/or implement reasonable accommodations related to the College of Law facilities.

Joint Degree Programs

JD/MA in ENR Program

A joint Juris Doctor/Master of Arts of Environment and Natural Resources degree is available to all admitted law students upon application. Students in this joint degree program must take 18 credits outside the law school in ENR courses, and must take 12 law school credits from a menu of ENR related law courses to qualify for this joint degree. Students in the joint degree program must also complete a supervised research project. Additionally, nine (9) credits of approved MA coursework (see Academic Regulations) will be applied to the Juris Doctor degree.

Current core courses: ENR 5000, ENR 5900, ENR 5890.

JD/MBA Program

A joint Juris Doctor/Master of Business Administration program is available in the College of Law and the College of Business. This program will take approximately four years to complete. Students spend three years on-campus engaged in law studies. In either their second or third year, students will be enrolled full-time in the MBA Program, taking core Fall and Spring business courses followed by participation in an MBA Summer Project. The MBA Capstone course will be completed during the student's third year for a total of 38 MBA Program credits. Nine (9) credit hours of approved Law coursework will be transferred as elective hours to the MBA Program for a total of 47 credit hours. Additionally, nine (9) credits of approved MBA coursework (see Academic Regulations) will be applied to the Juris Doctor degree. Students successfully completing this lock-step program will earn dual Juris Doctor and Masters of Business Administration degrees.

Current core courses: MBAM 5102, MBAM 5104, MBAM 5107, MBAM 5202, MBAM 5204, MBAM 5207, MBAM 5208, MBAM 5209, MBAM 5305, MBAM 5330.

JD/MPA Program

A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in specified courses in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.

Current core courses: POLS 5000, POLS 5400, POLS 5410, POLS 5440, POLS 5684, POLS 5510, POLS 5690, POLS 5080, POLS 5060, POLS 5450, POLS 5460, POLS 5480

Nonprofessional Degree Students

Graduate students from other colleges of the University of Wyoming may be permitted to take one or more law courses on an S/U basis for non-law credit when the following conditions are met: the law course taken is acceptable for their degree program and the prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean has been obtained. In order to obtain audit or visitor privileges, students must obtain prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean. For further information and requirements contact the Associate Dean of Academic Affairs, College of Law, Dept. 3035, 1000 E. University Ave., Laramie, WY 82071.

Course descriptions may be obtained online at www.uwyo.edu/law.

Armed Forces Services

LTC George R. Riggin, Commander, Army ROTC
LtCol. Anthony Kusek, Commander, Air Force ROTC

It has been the consistent policy of the university in cooperation with the federal government to make courses in military science and aerospace studies available on a voluntary basis to all qualified students.

Academic credits for Army and Air Force Reserve Officers' Training Corps (ROTC) are applied toward baccalaureate and graduate degrees in varying amounts depending upon the degree plan of the student and as determined by the college concerned.

Department of Military Science

Army ROTC

137 Hill Hall, (307) 766-3390

FAX: (307) 766-3383

Web site: www.uwyo.edu/armyrotc

Professor:

JONATHAN CURTIS, U.S. Military, Military Intelligence West Point B.S.; MSA Central Michigan University 2019; Professor of Military Science 2020.

Lecturer:

JEREMIAH SCHUCHARDT, Master Sergeant, U.S. Army; Senior Military Instructor 2019.

The Department of Military Science - Army ROTC faculty is composed of U.S. Army officers and senior noncommissioned officers. These officers hold bachelors' and masters' degrees in a variety of fields. Noncommissioned officers hold associate degrees in a variety of fields. Officers' military education includes completion of the Officer Basic Course and the Officer Advanced Course. Several faculty are graduates of the Army's Command and General Staff College and have completed military specialty schools such as: Flight School, Ranger School, Airborne School, Air Assault School, Special Forces School, Jumpmaster Course, Special Operations Training and Language School.

General Information

Army ROTC is a program which offers qualified college students the opportunity to graduate as officers and serve tours in the U.S. Army, the Army National Guard or the U.S. Army Reserve. The four-year program is divided into two parts called the basic course and the advanced course. The basic course, consisting of 8 credit hours, is usually taken during the first two years of college. No military obligation is incurred by enrolling in the basic course.

The advanced course, usually taken during the junior and senior years or during graduate school, involves 19 credit hours of study and a five-week Leadership Development and Assessment Course during the summer. Advanced course students incur a military obligation, and they receive up to \$500.00 per month in tax-free subsistence throughout the academic year.

Army ROTC is not itself a major. Participants pursue the degree of their choice and take Army ROTC as an elective program. Those who complete the program may receive federal commissions from the President of the United States.

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

ARMY 3010.....	3
ARMY 3020.....	3
ARMY 3025.....	1
ARMY 3026.....	1

ARMY 3030.....	3
ARMY 4010.....	2
ARMY 4020.....	2
ARMY 4015.....	1
ARMY 4016.....	1
ARMY 4025.....	1
ARMY 4026.....	1
HIST 2020 or HP 4900.....	3

Total credit hours 22

The military science minor, encompassing 22 credit hours, will prepare selected students for commissioning and establish a sound basis for their future professional development.

To be eligible for a commission, U. S. citizens must meet prescribed physical, intellectual, and moral standards in addition to completing Army ROTC studies and successful completion of Professional Military Education (PME) courses. These PME courses include written communication skills, military history and computer literacy. A two-year option is available for sophomore and junior students, students with prior military service (see below), and those completing a masters program.

In the Army ROTC classroom the student is exposed to a wide variety of subjects designed to instill confidence, self-discipline, integrity and responsibility. Students gain an appreciation for the role of national defense, and learn what a leader must be, know and do in order to gain the respect and support of their subordinates.

Skills learned in Army ROTC, including resource management, leadership and planning are valuable and complement any university major. Young commissioned officers returning to civilian sectors after military service find an abundance of career opportunities.

Uniforms, Pay and Allowances

All uniforms, books and other instructional materials required in Army ROTC are provided to basic and advance course students at no cost. The cadet uniform is the same as the U.S. Army uniform except for the distinctive ROTC insignia.

Advanced course participants are paid a tax-free subsistence allowance of up to \$500.00 per month during the school year. During the summer training period students receive pay, travel, rations, quarters, clothing, and medical and dental services.

Two Year ROTC Program

The two-year program is designed for community college graduates and university students of sophomore or junior standing who did not take Army ROTC during the first two years of school. The program may also apply to seniors and graduates who have at least two years remaining in post graduate study.

To enter the two-year program, students must first attend a paid 28-day internship during the summer or be a veteran who has graduated from advanced individual training.

Special Scholarship Program

Special Scholarship Program Two-, three-, and four-year scholarships are offered by Army ROTC. These scholarships pay full tuition, laboratory fees and a \$1200 per year book fee. While on scholarship, the student receives up to \$500.00 a month during the school year. In addition to active duty scholarships, Army ROTC offers scholarships to students wishing to join the U.S. Army Reserve or Army National Guard upon commissioning. These reserve scholarships also pay full tuition, laboratory fees, book fees, and up to \$500.00 a month. Graduate students and undergraduate students are eligible to apply for the two- and three-year scholarships. These scholarships are awarded by the Professor of Military Science. Students do not have to be enrolled in ROTC to apply for these scholarships. Certain restrictions apply. High school juniors and seniors seeking a four-year scholarship should contact the Professor of Military Science, Army ROTC, Dept. 3167, 1000 E. University Ave., Laramie, WY 82071. College students desiring a scholarship should contact the Professor of Military Science in 154 Wyoming Hall, (307) 766-3390.

Scholarships are offered to ROTC cadets from several military associations. The Reserve Officers Association (ROA), Association of the U.S. Army (AUSA), Cowboy Battalion Alumni Association (CBAA), the United Services Automobile Association (USAA) and First Command offer annual cash awards to ROTC cadets.

Room and board scholarships are available to students who enroll in Army ROTC. Scholarship awards are based on merit and the student's potential to become a commissioned officer. The number of scholarships and dollar amount vary dependent on funds available. Room and board scholarships may only be used in UW residence halls or university apartments.

Leadership Laboratory

Leadership laboratory provides instruction that complements the classroom. This time provides practical application on subject matter taught in class. Leadership and management dynamics are inherent in this practical application. All students enrolled in a military science course must enroll in the appropriate leadership laboratory unless consent is obtained from the Professor of Military Science. Training includes land navigation, first aid, communications, basic rifle marksmanship, drill and ceremonies, decision making, squad movement and problem solving. This instruction is cadet planned and presented with immediate instructor feedback. The goals of this period are to instill self-confidence, self-discipline and responsibility in each cadet.

Land navigation skills are practiced in a variety of terrain locations near campus. The training instills trust and confidence in the cadet's ability to accurately plot and follow a compass course. Communication, such as radio, telephone and interpersonal skills, are taught and practiced. Marksmanship is taught in the Half-Acre rifle range and on other ranges, weather permitting. Finally, drill and ceremonies teaches methods of organizing and moving groups of individuals in an orderly manner resulting in team building while establishing esprit de corps.

Veterans' Option

Veterans of active military service and members of the National Guard or U.S. Army Reserve may qualify to go directly into the advanced Army ROTC program if they will be an academic junior. In these cases, basic training fulfills the requirement of the first two years of ROTC (Basic Course). Academic freshmen and sophomores are not required to take basic course classes but are highly encouraged to do so. It is common for members of the National Guard to study to become commissioned officers via the ROTC program. The Simultaneous Membership Program (SMP) is a formalized program for advanced course Guard members and Reservists to combine their unit training with ROTC training. In many cases the SMP program will result in increased financial benefit to the individual.

Military Obligation

There is no military obligation for taking the basic course, freshman and sophomore years. When an individual starts the advanced course, he or she incurs an obligation. The nature of that obligation depends upon whether the individual elects to serve in the National Guard, the Army Reserve or the active Army, and whether the individual has an Army scholarship. Those who desire guard or reserve duty may contract specifically for that purpose. The guard and reserve obligation is six years of monthly training meetings and two years of inactive ready reserve (IRR). The active duty obligation is four years Active duty, and four years of inactive ready reserve (IRR).

Extracurricular Activities

Army ROTC offers a variety of activities which are designed to promote an interest in the military and provide relaxing, enjoyable leisure activities for cadets.

The Cowboy Battalion has its own Ranger Challenge team, which is a varsity-level team that competes with other universities in military skills such as orienteering and soldier skills. The battalion also has a cannon crew, mounted color guard, 10-miler team, Bataan Death March team, and participates in intramural sports.

The department periodically sponsors other activities such as rappelling demonstrations, ranger weekends, battlefield tours, leadership exercises and other adventure training, such as mountaineering, land navigation exercises, patrolling and wilderness survival.

Suggested Course Sequence

FRESHMAN YEAR: Fall Hrs.

ARMY 1010	2
Lab (mandatory).....	0

Department of Aerospace Studies

Department of Aerospace Studies
110 Wyoming Hall, (307) 766-2338
FAX: (307) 766-2357
Web site: www.uwyo.edu/airrotc

Professor:

ANTHONY KUSEK, Lt. Colonel, U.S. Air Force; B.S. Parks College 1995; M.A. Webster University 2007; Professor of Aerospace Studies 2019.

RICHARD LANDSVERK, Major, U.S. Air Force; B.S. Thomas Edison State College 2008; M.A. Bellevue University 2012; Professor of Aerospace Studies 2019.

SAMUEL R. SHEARER, Lt. Colonel, U.S. Air Force; B.S. University of Utah 1996; M.S. Troy State University 2003; M.A. Naval Postgraduate School 2004; Ph.D. 2013; Professor of Aerospace Studies 2016.

Air Force Reserve Officers' Training Corps (AFROTC) provides University of Wyoming students a path toward earning a commission as an officer in the United States Air Force. The curriculum provides college students a solid understanding of the leadership and military fundamentals an Air Force officer requires. AFROTC cadets supplement their normal university coursework with studies in Air Force fundamentals, history, leadership, and national security affairs. In addition, cadets have the opportunity to learn about various careers in the Air Force through their studies, guest lectures, base visits, and other military training opportunities. While enrolled in AFROTC, the Air Force provides uniforms, AFROTC textbooks, and the necessary Air Force equipment. Upon successful completion of the program and earning their bachelor's degree, cadets are commissioned as 2nd lieutenants in the U.S. Air Force.

Application and enrollment in the program is voluntary. Students should simply register for the appropriate Air Force (AIR) courses. In addition, prospective cadets will need to complete an application package upon arrival at the detachment in order to ensure minimum qualifications for military service. Contact the AFROTC Department for additional details or with any questions regarding registration. All university students, both male and female, are eligible to apply for admission in the program.

Four-Year Program

The four-year program is divided into two phases. The first two years comprise the General Military Course (GMC) consisting of one class period (1 hour) per week in the classroom and one class period (2 hours) per week in leadership laboratory. The GMC is a prerequisite for continuation in the Professional Officer Course (POC), the last two years in the program. Other prerequisites include passing the Air Force Officer Qualifying Test (AFOQT), maintaining at least a minimum grade point average of 2.0 (GMC) and 2.5 (POC), having the physical qualifications for an Air Force commission, and participating in a four-week field training session. The advanced course consists of one class period (3 hours) per week in the classroom and one class period (2 hours) per week in leadership laboratory.

Three-Year Program

Students may enroll in ROTC on a three or three and one-half year program where the GMC component is shorter. To complete the GMC requirements, the student must simultaneously enroll in AIR 1000 and AIR 2000 courses to complete all four academic terms of the GMC program. After successfully completing the GMC program and Field Training, students may enter the two-year POC program. This program is especially suitable for sophomores and junior college transfers. Students that participated in high school Junior ROTC, or have prior-enlisted service, can apply documented participation toward a portion of the GMC requirement.

Leadership Laboratory

The concept of leadership laboratory is to provide leadership training experiences which will improve a cadet's ability to perform as a USAF officer. Leadership laboratory is largely cadet planned and directed.

Field Training

Field training is a four-week program conducted in residence at an Air Force base during the summer.

While at field training, each cadet is provided subsistence, uniforms/equipment, and receives approximately \$28.00/day plus reimbursement for travel to and from the field training base.

Financial Benefits

Freshmen and Sophomores on AFROTC scholarships receive \$300 and \$350, per month, respectively. Juniors enrolled in the Professional Officers Course receive \$450 per month and seniors \$500 per month tax-free during the school year for subsistence. Uniforms, required texts and all necessary Air Force equipment are furnished by the government. In addition, all POC and scholarship cadets are allowed to travel anywhere in the continental United States on military aircraft (on a space available basis).

Special Scholarship Program

Two-, three- and four-year scholarships are offered by AFROTC on a competitive basis. These scholarships pay for a \$900 book allowance per year, tuition (amount dependent on type of scholarship awarded), fees and other required expenses except room and board. The university and the State of Wyoming offer additional room and board funding to Air Force ROTC cadets (who have or have not been awarded an Air Force ROTC scholarship) and reside in university housing. High School seniors seeking a four-year scholarship should contact their high school counselors or the Recruiting Flight Commander, AFROTC Detachment 940, Dept. 3005, 1000 E. University Avenue, Laramie, WY 82071; telephone (307)766-3710; email at airforce.rotc@uwyo.edu, early in the fall of their senior year. Sophomore or transfer students interested in competing for a scholarship should contact the Recruiting Flight Commander before the fall semester prior to junior standing.

Military Obligation

Students enrolling in the first two years of the AFROTC Program (the General Military Course) are not obligated to military service of any kind, unless on an Air Force scholarship their sophomore year. Cadets accepting an AFROTC scholarship and those entering the Professional Officer Course become members of the inactive reserve of the United States Air Force. Upon being commissioned a Second Lieutenant in the Air Force, graduates in nonflying career fields agree to serve four years on active duty; pilot candidates agree to serve on active duty for 10 years after completion of

flight training; RPA, navigator, and air battle manager candidates agree to serve on active duty for six years after completion of their respective training.

Extracurricular Activities

To familiarize students with Air Force life and social customs, the AFROTC Program offers on a voluntary basis a wide range of extracurricular activities. Civil Air Patrol gives cadets an opportunity to experience flying first hand with a trained instructor pilot. The Arnold Air Society, a national professional honorary society, is a service organization active on campus. The color guard supports various university and local activities. Visits to Air Force bases across the nation provide insight into the function of Air Force operational units. Throughout the year, AFROTC teams participate in the university intramural sports program, while cadet-sponsored social events build the spirit of comradeship inherent in military life.

Haub School of Environment and Natural Resources

Helga Otto Haub School of Environment and Natural Resources

John Koprowski, Dean
Bim Kendall House, 804 E. Fremont St.

Phone: (307) 766-5080 FAX: (307) 766-5099
Web site: www.uwyo.edu/haub

Degrees Offered

The Haub School offers undergraduate and graduate degrees, concurrent majors and minors, certificates, and a graduate degree in partnership with the College of Law:

Bachelor of Science in Environmental Systems Science (for baccalaureate students)

Bachelor of Science in Environment & Natural Resources (for baccalaureate students, required concurrent major)

Environment & Natural Resources concurrent major (for baccalaureate or master's students earning a degree from UW)

Bachelor of Science in Outdoor Recreation & Tourism Management (for baccalaureate students)

Environment & Natural Resources minor (for baccalaureate, master's, and doctoral students)

Sustainability minor (for baccalaureate students)

Outdoor Leadership minor (for baccalaureate students)

Master of Science in Environment, Natural Resources & Society (for master's students)

Master of Arts in Environment & Natural Resources (J.D./M.A. for law students only)

Collaborative Practice minor (for master's and doctoral students)

Program Admission

Undergraduate students will apply for admission to the University of Wyoming, and then declare a major or minor within the Haub School at any point during their course of study. To declare a major or minor, students must meet with a Haub School academic advisor.

Graduate students interested in the concurrent major or minor in Environment & Natural Resources (ENR) will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR major or minor. A one-page Statement of Purpose is required to apply. Visit the Haub School website at <https://www.uwyo.edu/haub> for details.

Applicants to the M.S. in Environment, Natural Resources & Society must apply to the University of Wyoming. Applications for graduate assistantships should be directed to the Haub School. Current application requirements are available online.

Applicants to the J.D./M.A. in ENR must apply to both the College of Law and the Haub School. Admission to the joint degree program is contingent on acceptance to the College of Law. Current application requirements are available online.

More information, including complete curricula for each academic offering, is available from the Haub School.

Haub School Requirements for Undergraduate Programs

All students declared in undergraduate Haub School programs, including majors and minors, must earn a C or better in all Haub School program requirements. Students enrolled in multiple Haub School programs must earn 12 credits unique to each program.

Undergraduate students earning a B.S. in Environmental Systems Science, a B.S. in Outdoor Recreation & Tourism Management, and/or a B.S. in Environment & Natural Resources (plus a concurrent major in another field) must also fulfill the additional following Haub School Requirements:

- Complete two courses (totaling a minimum of 6 credit hours), one to meet the U.S. Diversity (ASD) requirement and one to meet the Global Awareness (ASG) requirement. Courses approved to meet these requirements are searchable within WyoRecords under the Browse Classes feature.
- Meet all University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program (USP) requirements and maintaining a minimum 2.0 cumulative GPA for good academic standing and graduation.

National Outdoor Leadership School

**Administered by the Haub School of Environment and Natural Resources

Haub School Advising Center

Phone: (307)766-5080 FAX: (307)766-5099; Web site: www.uwyo.edu/haub

The University of Wyoming (UW) and National Outdoor Leadership School (NOLS) Articulation Agreement provides the opportunity for UW students to receive UW academic credit for NOLS courses.

When NOLS students step into the world's wild places, they bring not only their backpacks, but also more than 40 years of experience in expeditioning. NOLS founder Paul Petzoldt's idea was simple: take people into the wilderness for an extended period of time, teach them the right things, feed them well and when they walk out of the mountains, they will be skilled leaders. The core of his idea was the extended expedition, one of sufficient length that a person could learn and practice the skills over and over again. That is the backbone of every NOLS course and today the school is widely recognized as the world's leader in the extended expedition, from two weeks to twelve.

This articulation agreement covers domestic and international NOLS courses. This agreement also covers some individual shortterm courses (14 days or less; including mountaineering, rock climbing, sailing, kayaking, skiing, snowboarding, and backpacking) and the Wilderness First Responder (WFR) course.

Application/Eligibility

Current UW students, or students who have been fully or conditionally admitted to UW may receive articulated NOLS credit. Students who have already taken a NOLS course cannot receive credit retroactively (i.e. if a student embarked on a NOLS course and requested to get credit after the course was completed).

Credit and Credit Transfer

UW credit hours will be awarded in the approved courses, which require prior approval. Upon completion of the NOLS courses, provided a grade equivalent to a UW grade of C or better was obtained at NOLS. These UW course grades will be included in your UW GPA. Students who withdraw or are expelled from a NOLS course may receive an incomplete or an F for all enrolled UW credit.

Students should be aware that for internship credits to be awarded, additional academic work requirements determined by the internship course will need to be met. Those additional requirements vary between academic programs and amount of credit desired, but may include a satisfactory evaluation from NOLS, a weekly journal, a substantial written report, and an oral presentation. Internship requirements are established prior to your participating in the NOLS course.

Academic Advising

Prior to participating in a NOLS course for UW credit, students must make an appointment with the Haub School by emailing haub.school@uwoyo.edu or calling (307) 766-5080. If your academic program is outside of the Haub School, students should also meet with their assigned academic advisor to determine if these courses will count towards their major. The Haub School will approve the student's schedule, provide the appropriate course numbers, and liaise with the NOLS Registrar.

Financial Arrangements

Each UW student will pay to NOLS:

- The NOLS tuition and related fees (any changes to be advised in writing by NOLS at least three months in advance of the change coming into effect), related fees would include equipment deposit;
- Complete medical and evacuation health insurance;
- Other fees (e.g. tuition protection program, local transportation, and gear purchases), air transportation and additional living expenses will be paid directly by the student to the provider of the service.

Each UW student will pay to UW:

- The published per credit registration fees to register UW credits earned at NOLS

Financial Aid

Students enrolled in the NOLS program may apply their financial aid to the cost of the program if they are enrolled as a full-time degree seeking student at the University of Wyoming. To do so, please work with the UW Office of Scholarships and Financial Aid.

Rules, Law, and Regulations

UW students studying at NOLS will be bound by all rules, regulations and by-laws in operation at NOLS. In addition, since UW students remain enrolled as degree candidates at UW, they must also adhere to UW standards of conduct, rules and regulations. UW and NOLS both abide by the Federal Right to Privacy Act (FERPA).

Steps to Follow

1. Determine the NOLS course that best fits your needs/interests and/or goals online at: www.nols.edu/courses
2. Make an appointment with an advisor from the Haub School to determine the UW academic credit that best suits your degree program by e-mailing haub.school@uwyo.edu or by calling (307) 766-5080.
3. Meet with your academic advisor (if your academic program is not in the Haub School).
4. Apply and be admitted into NOLS.
5. Prior to leaving for your NOLS course, enroll in the credit offered for the course.
6. Secure your financial aid (if any) with the UW Office of Scholarships and Financial Aid.
7. Attend and successfully complete the course (grade C or better).
8. Grades will be posted the semester of completion of your course.

UW Credit Options for NOLS

UW recognizes the following credit options for taking a NOLS course:

Short Courses (less than 14 days)

Students may be eligible to complete 2 Hours of UW credits in the following course(s).

- ENR4960 - Field Studies in: Credits: 1-6 **

Quarter Length Courses (14-65 days)

Students may be eligible to complete up to 9 hours in the following courses.

- ENR2800 - Introduction to Outdoor Leadership Credits: 3 **

- ENR4960 - Field Studies in: Credits: 1-6 **
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6 **
- ENR4970 - ENR Internship Credits: 1-6 **

Semester & Year-long Courses (more than 65 days)

Students may be eligible to complete up to 12-24 hours in the following courses.

For year-long courses, independent study credits are also available.

- ENR2800 - Introduction to Outdoor Leadership Credits: 3 **
- ENR4960 - Field Studies in: Credits: 1-6 **
- ENR4970 - ENR Internship Credits: 1-6 **
- ENR4890 - Topics in Environment and Natural Resources Credits: 1-6 **
- ENR3900 - Seminar in Environment and Natural Resources Credits: 1-3 ***

Note:

**There are additional course requirements for 4000-level NOLS credit. Syllabi and course expectations will be shared upon enrollment.

***For courses with a Wilderness First Responder component only.

Information Literacy

Coe Library 304

Phone: (307) 766-5313

The University Libraries offer research assistance and information literacy instruction to students and faculty. Librarians provide customized class orientations to information sources in every discipline, as well as individual research consultations. Students needing research help may call, text, email, instant message, or visit any library branch.

The University of Wyoming addresses information competencies utilizing the [Framework for Information Literacy for Higher Education](#) as approved by the Association of College & Research Libraries (ACRL) and endorsed by the American Association for Higher Education. Librarians collaborate with teaching faculty in addressing these information competencies in course assignments or lectures. Information literacy is the ability to recognize and define the need for information, then locate, evaluate, and use that information effectively and ethically.

Information literacy learning outcomes are included in University Studies First Year Seminar (FYS) and Communication (COM) courses and are similar to the critical thinking learning outcomes in the H, PN, and V courses.

The Libraries also offer credit courses to help students improve research skills and to meet the Communications 2 requirement of the University Studies Program.

Learning Outcomes

We expect that students completing LBRY courses will become knowledgeable consumers of information through learning how to:

1. Recognize and define the need for information;
2. Efficiently locate information in the library or on the Internet;
3. Evaluate the quality of information;
4. Utilize information effectively, ethically, and legally.

Librarians

TAMSEN EMERSON HERT, B.A. Colorado State University 1979; M.L.S. Emporia State University 1984; M.A. 1988; Librarian, 2014, 1986.

DAVID D. KRUGER, B.S. South Dakota State University 1991; B.S.Ed. Minot State University 1994; M.A. Kansas State University 1996; M.L.S. University of Missouri at Columbia 1998; Librarian 2016, 1998.

LAWRENCE O. SCHMIDT, B.S. Montana State University 1987; M.S. 1995; M.L.S. Emporia State University 2002; Librarian 2020, 2008.

Associate Librarians

KAIJSA J. CALKINS, B.A. University of Washington, Bothell 2001, M.L.I.S. University of Washington, Seattle 2004; Associate Librarian 2012, 2006.

JANICE GROVER, B.A. University of Wyoming 2005; M.L.S. Emporia State University 2009; M.A. University of Wyoming 2017; Associate Librarian 2021.

Assistant Librarians

SAMANTHA PETER, B.A. University of Wyoming 2016; M.S.I.S. University of Texas at Austin 2018; Assistant Librarian 2018.

JESSICA RARDIN, B.A. Beloit College 2013; M.L.I.S. University of Wisconsin-Milwaukee 2021; Assistant Librarian 2021.

Geospatial Information Science and Technology

Wyoming Geographic Information Science Center
337 Agriculture C Building

Ramesh Sivanpillai, Program Director
(307)766-2532

Web site: www.uwyo.edu/WyGISC

The Wyoming Geographic Information Science Center (WyGISC) offers undergraduate and graduate courses, degrees, and certificates in Geospatial Information Science and Technology under the GIST prefix. These provide fundamental geospatial science education to undergraduate and graduate students from across disciplines at UW and are appropriate for science and non-science majors. They cover core and advanced geospatial concepts and subdisciplines including

Geographic Information Systems (GIS), remote sensing, spatial data analysis, spatial visualization, spatial databases, cartography, programming, and other topics.

Faculty:

SHANNON E. ALBEKE, B.A. University of Colorado, Boulder 1997; Ph.D. University of Georgia 2010. Associate Research Scientist 2019, 2010.

KENNETH L. DRIESE, B.S. University of Virginia 1981; M.S. University of Wyoming 1992; Ph.D. 2004; Senior Lecturer in Geospatial Information Science and Technology 2019, 2002.

JEFFREY D. HAMERLINCK, B.S. University of North Dakota 1988; M.P. University of Wyoming 1992; Ph.D. University of Colorado - Boulder 2011; Senior Research Scientist 2004.

PADDINGTON HODZA, BSC, University of Zimbabwe, 1994; MSC, University of Zimbabwe, 1998; Ph.D. West Virginia University, 2007; Associate Research Scientist 2016, 2013.

AUSTIN MADSON, B.A. University of California, Los Angeles 2012; M.A. 2015; Ph.D. 2020; Assistant Professor of Geospatial Information Science and Technology 2021.

RAMESH SIVANPILLAI, B.Sc. Bharathiar University 1987; M.Sc. Cochin University of Science and Technology 1990; M.Phil. Bharathiar University 1992; M.S. University of Wisconsin, Green Bay 1995; Ph.D. Texas A&M University 2002; Senior Research Scientist 2012.

CHEN XU, B.S. Sichuan University, China 1999; M.S. Sam Houston State University 2005; Ph.D. Texas A&M University 2010; Associate Professor of Geospatial Information Science and Technology 2019.

DI YANG, B.S. Liaoning University of Petroleum and Chemical Technology 2011; M.S. Texas A&M 2013; Ph.D. University of Florida 2019; Assistant Professor of Geospatial Information Science and Technology 2020.

Geographic Information Science and Technology Degrees and Certificates

GIST degrees and certificates include a Bachelor of Science Degree in GIST (to launch Fall 2022 contingent on demonstration of student demand), undergraduate certificates in GIST and Remote Sensing, each of which can contribute to the B.S. degree; a Research Master's Degree (with thesis), an online Professional Master's Degree (no thesis), and three online graduate certificates, in GIST, Remote Sensing, and Unmanned Aerial Systems (UAS, a.k.a. drones).

Drawing on expertise from geography, computer science, mathematics, statistics, psychology, design, and others, geospatial information science refers to the multi-disciplinary research enterprise that addresses the nature of geospatial information and the application of geospatial technologies to scientific questions. Geospatial information technology is a specialized set of information and communication technologies that support the acquisition, management, analysis, and visualization of geo-referenced data. Examples include: geographic information systems; global navigation satellite systems; and satellite, airborne, drone-based, shipboard and ground-based remote sensing and image processing systems.

Successful students in Geospatial Information Science and Technology (GIST) combine proficiency in spatial thinking and geospatial data science analysis with fluency in geographic information systems, remote sensing, data analytics, and visualization. As professionals, graduates apply their knowledge and skills in a wide range of fields, from environmental management and public health, to civil engineering and urban planning, to economic analysis and marketing.

Any courses listed in degree plans that are not described in the GIST course list are under development and will be added in future catalogs as they are approved.

Undergraduate Certificates

Undergraduate certificates in GIS and Remote Sensing provide a means of adding credentials to your degree that reflect expertise in geospatial science.

Graduate Certificates

Graduate certificates provide a means for students and professionals to earn marketable credentials over the course of 1-2 semesters. These certificates require a combination of core and elective courses as outlined below and will be delivered primarily online.

School of Energy Resources

301 Energy Innovation Center
Phone: (307)766-6879 FAX (307)766-6701

Holly Krutka, Executive Director
Website: www.uwyo.edu/ser

The School of Energy Resources facilitates interdisciplinary academic and research programs in engineering and science, economics, and environment and natural resources policy to address critical energy-related issues faced by our society.

Our mission is to leverage and add to the already significant energy-related talent and resources in the University of Wyoming colleges to develop human resources, know-how, and technical solutions to ensure a secure and sustainable energy future for the state, region, and nation.

The University of Wyoming (UW) School of Energy Resources (SER) was created in 2006 by the Wyoming Legislature through State Statute 21-17-117. Our goal is to enhance the university's energy-related education, research, and engagement. SER directs and funds cutting-edge energy research and technology development, which integrates with the formulation and conduct of academic programs at UW and bridges academics and industry through targeted engagement efforts. The bridges formed between academics and industry ensure programs are relevant, current, and deliver impact and high value to stakeholders and the state. Since its inception in 2006, SER has maintained flexibility in its focus and structure to meet the changing needs of Wyoming's energy industries and the state's economy which is now more critical than ever.

Professors:

TIMOTHY J. CONSIDINE, B.A. Loyola University 1975; M.S. Purdue University 1977; Ph.D. Cornell University 1981; SER Professor of Energy Economics 2008.

CRAIG C. DOUGLAS, A.B. Chicago University 1977; M.S. Yale University 1978; M.Phil. 1980; Ph.D. 1982; SER Professor of Mathematics 2008.

MAOHONG FAN, B.S. Wuhan University of Science and Engineering, 1984; M.S. Beijing University of Science and Technology, 1992; Ph.D. Chinese Academy of Sciences, 1997; Ph.D. Iowa State University, 2000; Ph.D. Osaka University 2003; SER Professor of Chemical Engineering 2015, 2008.

JOHN P. KASZUBA, B.S. Beloit College, 1982; M.S. Virginia Polytechnic Institute & State University 1986; Ph.D. Colorado School of Mines, 1997; SER Professor Geology & Geophysics, 2019, 2008.

SUBHASHIS MALLICK, B.Sc. Indian Institute of Technology 1976; M.Sc. 1978; Ph.D. University of Hawaii 1987; SER Professor of Geology & Geophysics 2008.

BRUCE A. PARKINSON, B.S. Iowa State University 1972; Ph.D. California Institute of Technology 1977; SER Professor of Chemistry 2008.

TARA RIGHETTI, B.A. University of Colorado Boulder 2005; J.D. 2007; SER Professor of Law 2020, 2017, 2014.

Associate Professors:

PO CHEN, B.S. Beijing University 2000; Ph.D. University of Southern California 2005; SER Associate Professor of Geology and Geophysics 2014, 2008.

DARIO GRANA, B.S. University of Pavia, 2003; M.S. 2005; M.S. University of Milano Bicocca, 2006; Ph.D. Stanford University, 2013; SER Associate Professor of Geology and Geophysics 2019, 2013.

Academic Professional:

KRISTOPHER KOSKI, B.S. Colorado School of Mines, 2005; J.D. University of Wyoming, 2008; Associate Lecturer 2017.

Accreditation

All programs at the University of Wyoming are accredited by The Higher Learning Commission, a commission of the North Central Association of Colleges and Schools Commission on Institutions of Higher Education. In addition, the Professional Land Management Concentration is one of only a few programs accredited nationally by the American Association of Professional Landmen.

Graduates from the PLM program are afforded the opportunity to sit for the Registered Landman exam. Individuals with certification can increase their salary by 20% on average. Visit landman.org to learn more.

SER Vision Statement

SER pursues the creation, sharing, and implementation of technology and knowledge for sustainable economic production of Wyoming's natural resources to generate additional employment and revenue opportunities for the state that include supply of clean energy and materials and products.

SER Mission Statement

The School of Energy Resources' academic mission is to ensure students within its interdisciplinary academic programs can illustrate a foundational understanding of fundamentals relative to energy companies and systems. In order to prepare students to meet the demands of the modern-day workforce, students will utilize critical thinking skills, negotiation techniques, and problem-solving methods applicable to a diverse array of energy projects.

Program Admission

Undergraduate students will apply for admission to the University of Wyoming and then declare a major or minor within SER at any point during their course of study. To declare a major, students must meet with the SER academic advisor. Any student can add the SER minor without meeting with an SER advisor.

One of the most important challenges of the 21st century will be to develop and manage energy resources in a sustainable manner. Projections show energy consumption worldwide will increase nearly 50 percent by 2035. And half of the leadership in the energy industries is expected to retire in the next five to ten years.

The future of energy will be characterized by increasing knowledge, relentless change, and technological innovation. As global energy industry increases in complexity, demand will dramatically grow for professionals with a multidisciplinary, entrepreneurial skillset. Future leaders must understand complex technology within the context of business, legal, social, and public policy in order to create comprehensive and sustainable solutions.

The Energy Resource Management and Development (ERMD) B.S. program is designed to fill this need through a combination of rigorous courses, real-world internships, and undergraduate research experiences. The curriculum balances depth of learning with the breadth of understanding to train graduates for sustained competitive success in the energy workforce at the frontiers of knowledge and for self-directed, life-long learning. Students learn to focus on continuous improvement, constant assessment, and the importance of a sense of urgency and consideration of profit motive in the energy industry

Our program emphasizes career planning and provides constant one-on-one guidance and assistance to ensure optimal workforce placement. Students are strongly encouraged to complete an industry internship (the minimum GPA requirement is typically 3.000). Opportunities are also available for undergraduate research, a study abroad experience, or a summer field trip. Multiple events during the year connect students to energy industry professionals.

General Policies

- A minimum 2.00 UW GPA is required to apply for the minor.
- It is the student's responsibility to monitor requirements for the minor, along with their advisor.
- Additional courses may be required to meet individual course prerequisites.
- All classes in the minor must be passed with a grade of "C" or better.

Student Learning Outcomes

The School of Energy Resources was created in 2006 to enhance the University of Wyoming's energy-related education, research, and outreach. The Energy Resource Management and Development Program is designed to meet the demands of the energy workforce and enhance social literacy related to complex energy issues. Competency-based learning that integrates problem-solving, critical analysis of uncertain and complex issues, and constant improvement in performance are overarching components of our undergraduate program.

Energy Resource Management and Development B.S. Program Learning Outcomes:

- Identify or describe fundamental concepts of energy systems.
- Illustrate a foundational understanding of business fundamentals relative to energy companies, including organizational structure, management, entrepreneurship, and international commerce.
- Make use of critical thinking and problem-solving methods within a written group energy project.

Energy and Environmental Systems Concentration

Learning Outcomes:

- Outline the skills in environmental monitoring and compliance.
- Explain energy regulation and management.
- Demonstrate the necessary skills related to the physical and social science dimensions of sustainability.

Professional Land Management Concentration Learning

Outcomes:

- Apply concepts and skills to real-world problems to gain practical understanding and experience.
- Identify and navigate a valid real property transaction from contract to transfer of title.
- Define and navigate the legal and regulatory hurdles for energy development on federal, state, and fee lands.

Energy Resource Management Minor Learning Outcomes:

- Gain appreciation and understanding of fundamental concepts of energy systems.
- Acquire a foundational understanding of the commercial aspects of energy industries.
- Exhibit critical thinking and problem solving related to energy and environmental problems.
- Apply knowledge of energy technology to societal problems requiring economic and policy analysis while working in a multidisciplinary environment.

Minor

Students looking to create a focus for their coursework can add minors to the ERMD program. Courses applying towards the minor must be completed with a grade of "C" or better.

Students not already majoring in BS-Energy Resource Management and Development may add the SER minor to their program of study. More information can be found on the SER website: <http://www.uwyo.edu/ser/academic-programs/minor-erm.html>

University Honors College

Guthrie House

Peter Parolin, Dean

Phone: (307) 766-4110

Web site: uwyo.edu/honors

The Honors College provides academically ambitious students with a series of curricular and co-curricular opportunities. Through these opportunities, students gain the breadth of knowledge needed by citizens, professionals, and family members to be effective in a lifetime of stimulating and enriching pursuits. Honors students learn to write cogently for a variety of audiences in their academic disciplines and beyond. They learn to locate and use reliable information and trustworthy opinion. Through appropriate coursework, they learn how to become engaged citizens and to understand the ethnic and cultural diversity of America and the world. They learn the purposes and values of the arts, humanities, sciences and social sciences. The Capstone Project is a sustained research or creative activity through which students demonstrate what they have learned: to formulate a project independently, to develop the intellectual and creative means to complete it, and to write and speak effectively about their work. The Capstone Project is frequently used as evidence of critical thinking in graduate and career applications.

Honors College Learning Outcomes

Students graduating from the Honors College will be able to: (1) engage in problemsolving, research, and creative pursuits that utilize an interdisciplinary approach (2) articulate the value of international and diversity-focused perspectives (3) develop their own styles of leadership and service and identify meaningful opportunities for engagement in these areas and (4) create intentional pathways through career development, including utilizing internship opportunities.

Honors College Admissions

The Honors College seeks well-rounded, ambitious, and curious learners and leaders. Students are invited to apply to the college prior to their first year. First year applicants should apply to the Honors College when submitting their general application to UW. The Honors College admissions committee considers academic performance and test scores holistically alongside an application essay and high school transcript.

Students admitted into the Honors College who are College of Engineering majors will automatically be accepted as Honors College Engineering students.

The Honors College reviews applications on a rolling basis. Students are admitted to the Honors College only after they have been accepted to UW. Incoming, continuing, and transfer students who are interested in applying to Honors should consult our Admissions page: <https://www.uwyo.edu/honors/applications/>

The Honors College also welcomes application from new transfer students. Transfer students entering the Honors College typically have an overall college GPA of 3.25 or higher. The college also admits transfer students and current UW students with at least three semesters remaining prior to graduation.

To maintain good standing in the college, a student must achieve a 3.0 GPA at the conclusion of the student's first year of study. A 3.25 GPA at the conclusion of the student's second year of study is required, with this standard remaining throughout their academic career. Interested high school seniors and transfer students are encouraged to come by the Honors College or to write to the Dean, The Honors College, Dept. 3413, 1000 University Ave, Laramie, WY 82071. The email address is honors@uwyo.edu.

Scholarships

The Honors College supports UW in financial aid packages for students. In keeping with the vision of Honors to facilitate an international experience, Honors provides scholarships to assist with study abroad. Fellowships for supporting research or creative projects for the senior thesis may also be available.

Program Requirements

To earn a minor in Honors, Honors students must complete a total of five courses in Honors and a Capstone Project, and complete the First-Year and Advanced Honors SOAR badge requirements. They must also graduate with a 3.25 GPA. Students who transfer to UW or join Honors as continuing UW students may have some of their required Honors courses and SOAR requirements waived.

The Honors curriculum immerses students in multi-disciplinary inquiry. Students begin by taking the First Year Colloquium, a two-semester course sequence that takes a complex topic - for example, *Dreams and Reality - or- What Does it Mean to be a Human* and explores it with readings based in the humanities, arts, sciences, and social sciences. The course includes visits to the theatre, the Art Museum, and other UW resources, building community while learning about UW. Thereafter, students enroll in three additional courses: an Honors Non-Western Perspectives course and six hours of upper-division coursework in Honors that emphasize interdisciplinarity. At the upper division, it is strongly recommended that students take at least one Honors course per year. Throughout their Honors academic track, students will complete each level of the Honors SOAR Badge.

The Honors experience concludes with a Capstone Project, either a paper or project, done under faculty mentorship and presented publicly. This requirement ensures that students gain creative or research experience in an area of their interest. These projects often lead to graduate studies or a special career path.

Honors College Minor Curriculum

Specific details about required Honors College coursework can be found at:

[Honors College Minor Curriculum](#)

Honors College SOAR Badge requirements

Students are required to complete each level of the Honors SOAR Badge program. Assistance is available from the Honors College.

[Honors College SOAR Badge Requirements](#)

Capstone Project (Creative or Research-based)

- Students are not required to register for a specific course to complete the Capstone Project. There is no specific Capstone Project course; students complete the project independently in coordination with a faculty mentor.
- Honors offers optional research and capstone methods courses (i.e. HP 4990) that prepare students for independent capstone projects and in some cases work directly on those projects.
- Honors does offer an optional independent study course if desired. Up to 6 hours of credit in the optional HP4976 - Independent Study are allowed.
- HP 4976, HP 4990, and any other research methods courses contribute to the capstone projects. As such, they do not count toward required Honors coursework or USP requirements.
- Students may be pursuing a major that requires a senior or capstone project, and a major-specific project may also meet the requirement for the Honors College Capstone Project. Please contact the Capstone Project Coordinator for details. Email: honorscapstone@uwyo.edu

Honors College Additional Requirements

Students must also graduate with a 3.25 cumulative UW GPA.

Successful completion of the program is indicated on transcripts and diplomas, and seniors are recognized at graduation ceremonies.

Priority registration for enrollment in Honors courses is given to Honors College students, although non-Honors students with a 3.25 GPA or with permission of the instructor are eligible and encouraged to enroll once the general registration period begins, if space is available.

Honors College Advising

The Honors College offers supplemental advising that supports the work that students do with their primary major advisors. Honors Advising instructs students on Honors curriculum requirements and helps students select their Honors courses as well as take advantage of special Honors College opportunities. Students cannot register for Fall or Spring classes without meeting with their primary major advisor.

UWYO

UWYO courses are designed to help students acculturate to college life and coursework and learn key academic skills. Course content is combined with training in critical reading, academic writing, research, formal presentation, and many other emphases. UWYO courses have low student-teacher ratios in an effort to help students experience richer connection with the instructor and students in the course. Most UWYO courses imbed intellectual self-awareness within the course goals. Several UWYO courses are part of UW learning communities and provide additional opportunities for students to engage with and work together in their cohort.

Advising Career Exploratory Studies

STEP

USP Codes are listed in brackets by the 2003 USP code followed by the 2015 USP code (e.g. [QB><Q]).

STEP courses are housed within the Learning Resource Network (LeaRN) Program and comprise first-year and academic success courses aimed at supporting students in college research, written and professional communication,

major and career exploration, and general transition strategies. STEP courses are often embedded in first-year programs including Fall Bridge, First-Year Experience, First-Year Interest Groups (FIGs), and First-Year Seminars.

English Language Center

Cheney International Center 28

Frederica Suess, Director

Phone: (307) 766-3630

Web site: www.uwyo.edu/geo/elc

Our Mission

The English Language Center serves the University of Wyoming and surrounding community by preparing non-native speakers of English linguistically, culturally, and academically to meet the requirements for success in U.S. higher education environments and to fully engage in campus life.

IEP Conditional Admission: Conditional admission is available for undergraduate applicants who are academically eligible but have low language proficiency scores. Students need to do 2 applications; one for IEP and one for a degree program for consideration. *Only one application fee is needed. Contact us directly if you are interested in this option: elc@uwyo.edu.

University of Wyoming at Casper

University of Wyoming at Casper

Brent L. Pickett, Ph.D., Dean

125 College Drive, Casper WY 82601

(307) 268-2713

Web site: <https://www.uwyo.edu/uwcasper/>

Since 1976, the University of Wyoming at Casper (UWC), in partnership with Casper College, has offered on-site courses and a slate of university degree programs in Casper. UW-Casper is also the location in Natrona County for statewide degree programs and classes offered through Distance Credit Programs.

UW-Casper was established to meet the needs of students unable to move to Laramie. Some of these students are nontraditional students who may be older or have families, homes, or jobs in the Casper area. UW-Casper is designed to meet the academic needs of students in a setting that provides small class sizes, dedicated staff, and award-winning faculty. Courses are taught by resident and visiting faculty who are regular or part-time members of UW academic departments. A full-service student success office handles admission, registration, financial aid, and advising.

Classes are taught onsite on the Casper College campus. More than 4,000 students have received their UW degrees through UW at Casper support and programs.

UW-Casper also has the Bachelor's of Applied Science (BAS) program. This fully online program is designed to stack onto an associate's degree to help persons already in the job market further develop their skills and advance their career potential. There are two areas of concentration available in the BAS, one in Health Services Administration and the other in Organizational Leadership.

Undergraduate Majors

Organizational Leadership, B.A.S.

Biology, B.S.

Secondary Career & Technical Education, B.A.S.

Communication, B.A.

Elementary Education, B.A.

Elementary Education/Special Education, B.A.

English, B.A.

Medical Laboratory Science, B.S.

Psychology, B.S.

Secondary Science - Biological Science Education with Concurrent Major in Biology (BSSE), B.A.

Social Work, B.S.W.

Zoology, B.S. UW - Casper

Graduate Majors

Armed Forces Services

Armed Forces Services

LTC George R. Rigglin, Commander, Army ROTC
LtCol. Anthony Kusek, Commander, Air Force ROTC

It has been the consistent policy of the university in cooperation with the federal government to make courses in military science and aerospace studies available on a voluntary basis to all qualified students.

Academic credits for Army and Air Force Reserve Officers' Training Corps (ROTC) are applied toward baccalaureate and graduate degrees in varying amounts depending upon the degree plan of the student and as determined by the college concerned.

Department of Military Science

Army ROTC

Web site: www.uwyo.edu/armyrotc

Professor:

JONATHAN CURTIS, U.S. Military, Military Intelligence West Point B.S.; MSA Central Michigan University 2019;
Professor of Military Science 2020.

Lecturer:

JEREMIAH SCHUCHARDT, Master Sergeant, U.S. Army; Senior Military Instructor 2019.

The Department of Military Science - Army ROTC faculty is composed of U.S. Army officers and senior noncommissioned officers. These officers hold bachelors' and masters' degrees in a variety of fields. Noncommissioned officers hold associate degrees in a variety of fields. Officers' military education includes completion of the Officer Basic Course and the Officer Advanced Course. Several faculty are graduates of the Army's Command and General Staff College and have completed military specialty schools such as: Flight School, Ranger School, Airborne School, Air Assault School, Special Forces School, Jumpmaster Course, Special Operations Training and Language School.

General Information

Army ROTC is a program which offers qualified college students the opportunity to graduate as officers and serve tours in the U.S. Army, the Army National Guard or the U.S. Army Reserve. The four-year program is divided into two parts called the basic course and the advanced course. The basic course, consisting of 8 credit hours, is usually taken during the first two years of college. No military obligation is incurred by enrolling in the basic course.

The advanced course, usually taken during the junior and senior years or during graduate school, involves 19 credit hours of study and a five-week Leadership Development and Assessment Course during the summer. Advanced course students incur a military obligation, and they receive up to \$500.00 per month in tax-free subsistence throughout the academic year.

Army ROTC is not itself a major. Participants pursue the degree of their choice and take Army ROTC as an elective program. Those who complete the program may receive federal commissions from the President of the United States.

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

ARMY 3010.....	3
ARMY 3020.....	3
ARMY 3025.....	1
ARMY 3026.....	1
ARMY 3030.....	3
ARMY 4010.....	2
ARMY 4020.....	2
ARMY 4015.....	1
ARMY 4016.....	1
ARMY 4025.....	1
ARMY 4026.....	1
HIST 2020 or HP 4900.....	3

Total credit hours 22

The military science minor, encompassing 22 credit hours, will prepare selected students for commissioning and establish a sound basis for their future professional development.

To be eligible for a commission, U. S. citizens must meet prescribed physical, intellectual, and moral standards in addition to completing Army ROTC studies and successful completion of Professional Military Education (PME) courses. These PME courses include written communication skills, military history and computer literacy. A two-year option is available for sophomore and junior students, students with prior military service (see below), and those completing a masters program.

In the Army ROTC classroom the student is exposed to a wide variety of subjects designed to instill confidence, self-discipline, integrity and responsibility. Students gain an appreciation for the role of national defense, and learn what a leader must be, know and do in order to gain the respect and support of their subordinates.

Skills learned in Army ROTC, including resource management, leadership and planning are valuable and complement any university major. Young commissioned officers returning to civilian sectors after military service find an abundance of career opportunities.

Uniforms, Pay and Allowances

All uniforms, books and other instructional materials required in Army ROTC are provided to basic and advance course students at no cost. The cadet uniform is the same as the U.S. Army uniform except for the distinctive ROTC insignia.

Advanced course participants are paid a tax-free subsistence allowance of up to \$500.00 per month during the school year. During the summer training period students receive pay, travel, rations, quarters, clothing, and medical and dental services.

Two Year ROTC Program

The two-year program is designed for community college graduates and university students of sophomore or junior standing who did not take Army ROTC during the first two years of school. The program may also apply to seniors and graduates who have at least two years remaining in post graduate study.

To enter the two-year program, students must first attend a paid 28-day internship during the summer or be a veteran who has graduated from advanced individual training.

Special Scholarship Program

Special Scholarship Program Two-, three-, and four-year scholarships are offered by Army ROTC. These scholarships pay full tuition, laboratory fees and a \$1200 per year book fee. While on scholarship, the student receives up to \$500.00 a month during the school year. In addition to active duty scholarships, Army ROTC offers scholarships to students wishing to join the U.S. Army Reserve or Army National Guard upon commissioning. These reserve scholarships also pay full tuition, laboratory fees, book fees, and up to \$500.00 a month. Graduate students and undergraduate students are eligible to apply for the two- and three-year scholarships. These scholarships are awarded by the Professor of Military Science. Students do not have to be enrolled in ROTC to apply for these scholarships. Certain restrictions apply. High school juniors and seniors seeking a four-year scholarship should contact the Professor of Military Science, Army ROTC, Dept. 3167, 1000 E. University Ave., Laramie, WY 82071. College students desiring a scholarship should contact the Professor of Military Science in 154 Wyoming Hall, (307) 766-3390.

Scholarships are offered to ROTC cadets from several military associations. The Reserve Officers Association (ROA), Association of the U.S. Army (AUSA), Cowboy Battalion Alumni Association (CBAA), the United Services Automobile Association (USAA) and First Command offer annual cash awards to ROTC cadets.

Room and board scholarships are available to students who enroll in Army ROTC. Scholarship awards are based on merit and the student's potential to become a commissioned officer. The number of scholarships and dollar amount vary dependent on funds available. Room and board scholarships may only be used in UW residence halls or university apartments.

Leadership Laboratory

Leadership laboratory provides instruction that complements the classroom. This time provides practical application on subject matter taught in class. Leadership and management dynamics are inherent in this practical application. All students enrolled in a military science course must enroll in the appropriate leadership laboratory unless consent is obtained from the Professor of Military Science. Training includes land navigation, first aid, communications, basic rifle marksmanship, drill and ceremonies, decision making, squad movement and problem solving. This instruction is cadet planned and presented with immediate instructor feedback. The goals of this period are to instill self-confidence, self-discipline and responsibility in each cadet.

Land navigation skills are practiced in a variety of terrain locations near campus. The training instills trust and confidence in the cadet's ability to accurately plot and follow a compass course. Communication, such as radio, telephone and interpersonal skills, are taught and practiced. Marksmanship is taught in the Half-Acre rifle range and on other ranges, weather permitting. Finally, drill and ceremonies teaches methods of organizing and moving groups of individuals in an orderly manner resulting in team building while establishing esprit de corps.

Veterans' Option

Veterans of active military service and members of the National Guard or U.S. Army Reserve may qualify to go directly into the advanced Army ROTC program if they will be an academic junior. In these cases, basic training fulfills the requirement of the first two years of ROTC (Basic Course). Academic freshmen and sophomores are not required to take basic course classes but are highly encouraged to do so. It is common for members of the National Guard to study to become commissioned officers via the ROTC program. The Simultaneous Membership Program (SMP) is a formalized program for advanced course Guard members and Reservists to combine their unit training with ROTC training. In many cases the SMP program will result in increased financial benefit to the individual.

Military Obligation

There is no military obligation for taking the basic course, freshman and sophomore years. When an individual starts the advanced course, he or she incurs an obligation. The nature of that obligation depends upon whether the individual elects to serve in the National Guard, the Army Reserve or the active Army, and whether the individual has an Army scholarship. Those who desire guard or reserve duty may contract specifically for that purpose. The guard and reserve obligation is six years of monthly training meetings and two years of inactive ready reserve (IRR). The active duty obligation is four years Active duty, and four years of inactive ready reserve (IRR).

Extracurricular Activities

Army ROTC offers a variety of activities which are designed to promote an interest in the military and provide relaxing, enjoyable leisure activities for cadets.

The Cowboy Battalion has its own Ranger Challenge team, which is a varsity-level team that competes with other universities in military skills such as orienteering and soldier skills. The battalion also has a cannon crew, mounted color guard, 10-miler team, Bataan Death March team, and participates in intramural sports.

The department periodically sponsors other activities such as rappelling demonstrations, ranger weekends, battlefield tours, leadership exercises and other adventure training, such as mountaineering, land navigation exercises, patrolling and wilderness survival.

Suggested Course Sequence

FRESHMAN YEAR: Fall Hrs.

Minor

Army ROTC Military Science Minor

The military science minor, encompassing 22 credit hours, will prepare selected students for commissioning and establish a sound basis for their future professional development.

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

Minor Requirements

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

ARMY3010 - Leadership and Tactics I

Credits: 3

Studies leadership techniques and tactical operations at the small-unit level. Instruction covers the decision-making process, troop leading procedures, land navigation and operation orders. In-depth analysis of team/squad tactical procedures and techniques. Numerous student oral presentations and practical exercises.

USP 2003-2014 Code U30

Prerequisite: ARMY 2010, ARMY 2020, basic camp or consent of department head.

ARMY3020 - Leadership and Tactics II

Credits: 3

Studies platoon-level tactics and leadership techniques. Instruction covers the solving of complex tactical problems. Illustrates techniques for properly managing personnel, resources and time to accomplish organizational goals. Introduces Army staff functions and prepares students for successful completion of ARMY 3030.

Prerequisite: ARMY 3010.

ARMY3025 - Conduct of Training

Credits: 1

Introduces the Army's system of conducting training exercises. Covers prerequisite training, pre-execution checks, officer/NCO responsibilities, training presentation techniques, sustainment training and training assessment.

Prerequisite: consent of instructor.

ARMY3026 - Assessment of Training

Credits: 1

Introduces the Army's system of training assessment. Covers formal and informal after-action reviews (AARs); preparation for, conduct of, and goals of an AAR; and writing of Army after-action reports.

Prerequisite: consent of instructor.

ARMY3030 - Practicum in Leadership

Credits: 3

Encompasses Leadership Development and Assessment Course, a five week test of the cadet's leadership ability. Each cadet is evaluated in ten different positions. Positions include both garrison and tactical situations. Each position requires the cadet to plan, implement and execute a wide variety of tasks. The cadet must control all personnel under this command. The cadet is extensively evaluated by cadre Tactical Officer/Non-commissioned Officer on twelve leadership dimensions. Successful completion of the Leadership Development and Assessment course is required for commissioning.

Prerequisite: successful completion of ARMY 3010 and ARMY 3020.

ARMY4010 - Dynamics of the Military Organization I

Credits: 2

Studies and analyzes organization, resources and functions of military staff. Reviews formal staff problem-solving procedures, including student effective writing and briefing presentations. Introduces ethics and the military profession.

Former Course Number [4030]

Prerequisite: ARMY 3010, ARMY 3020 or consent of department head.

ARMY4020 - Dynamics of the Military Organization II

Credits: 2

Introduces military law; planning and management of personal affairs; Army transportation, logistics and personnel management systems. Studies officer/NCO relations. Includes student writing and briefing presentations on assigned

topics.

Former Course Number [4040]

Prerequisite: ARMY 4010 or consent of department head.

ARMY4015 - Staff Officer Practicum I

Credits: 1

Gives students practical experience in serving on an Army staff. Under supervision of an Army ROTC cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4010.

ARMY4016 - Staff Officer Practicum II

Credits: 1

Gives students experience in serving on an Army staff. Under the supervision of an Army ROTC Cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4020.

ARMY4025 - Principles of Training Management

Credits: 1

Introduces students to the Army's system of training management. Covers principles and philosophy of training, training guidance, training cycles, soldiers/leader tasks, techniques for collective and multi-echelon training, as well as procedures for short-term planning.

Prerequisite: consent of instructor.

ARMY4026 - Preparation of Training

Credits: 1

Introduces the Army's system of training preparation. Covers short-range training plans, training meetings, development of timelines, publishing of training schedules, training and evaluation outlines, as well as rehearsals.

Prerequisite: consent of instructor.

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

OR

- HP 4900 Credits: 3

Total Credit Hours: 22

Department of Aerospace Studies

Department of Aerospace Studies
110 Wyoming Hall, (307) 766-2338
FAX: (307) 766-2357
Web site: www.uwyo.edu/airrotc

Professor:

ANTHONY KUSEK, Lt. Colonel, U.S. Air Force; B.S. Parks College 1995; M.A. Webster University 2007; Professor of Aerospace Studies 2019.

RICHARD LANDSVERK, Major, U.S. Air Force; B.S. Thomas Edison State College 2008; M.A. Bellevue University 2012; Professor of Aerospace Studies 2019.

SAMUEL R. SHEARER, Lt. Colonel, U.S. Air Force; B.S. University of Utah 1996; M.S. Troy State University 2003; M.A. Naval Postgraduate School 2004; Ph.D. 2013; Professor of Aerospace Studies 2016.

Air Force Reserve Officers' Training Corps (AFROTC) provides University of Wyoming students a path toward earning a commission as an officer in the United States Air Force. The curriculum provides college students a solid understanding of the leadership and military fundamentals an Air Force officer requires. AFROTC cadets supplement their normal university coursework with studies in Air Force fundamentals, history, leadership, and national security affairs. In addition, cadets have the opportunity to learn about various careers in the Air Force through their studies, guest lectures, base visits, and other military training opportunities. While enrolled in AFROTC, the Air Force provides uniforms, AFROTC textbooks, and the necessary Air Force equipment. Upon successful completion of the program and earning their bachelor's degree, cadets are commissioned as 2nd lieutenants in the U.S. Air Force.

Application and enrollment in the program is voluntary. Students should simply register for the appropriate Air Force (AIR) courses. In addition, prospective cadets will need to complete an application package upon arrival at the detachment in order to ensure minimum qualifications for military service. Contact the AFROTC Department for additional details or with any questions regarding registration. All university students, both male and female, are eligible to apply for admission in the program.

Four-Year Program

The four-year program is divided into two phases. The first two years comprise the General Military Course (GMC) consisting of one class period (1 hour) per week in the classroom and one class period (2 hours) per week in leadership laboratory. The GMC is a prerequisite for continuation in the Professional Officer Course (POC), the last two years in the program. Other prerequisites include passing the Air Force Officer Qualifying Test (AFOQT), maintaining at least a minimum grade point average of 2.0 (GMC) and 2.5 (POC), having the physical qualifications for an Air Force commission, and participating in a four-week field training session. The advanced course consists of one class period (3 hours) per week in the classroom and one class period (2 hours) per week in leadership laboratory.

Three-Year Program

Students may enroll in ROTC on a three or three and one-half year program where the GMC component is shorter. To complete the GMC requirements, the student must simultaneously enroll in AIR 1000 and AIR 2000 courses to complete all four academic terms of the GMC program. After successfully completing the GMC program and Field Training, students may enter the two-year POC program. This program is especially suitable for sophomores and junior college transfers. Students that participated in high school Junior ROTC, or have prior-enlisted service, can apply documented participation toward a portion of the GMC requirement.

Leadership Laboratory

The concept of leadership laboratory is to provide leadership training experiences which will improve a cadet's ability to perform as a USAF officer. Leadership laboratory is largely cadet planned and directed.

Field Training

Field training is a four-week program conducted in residence at an Air Force base during the summer.

While at field training, each cadet is provided subsistence, uniforms/equipment, and receives approximately \$28.00/day plus reimbursement for travel to and from the field training base.

Financial Benefits

Freshmen and Sophomores on AFROTC scholarships receive \$300 and \$350, per month, respectively. Juniors enrolled in the Professional Officers Course receive \$450 per month and seniors \$500 per month tax-free during the school year for subsistence. Uniforms, required texts and all necessary Air Force equipment are furnished by the government. In addition, all POC and scholarship cadets are allowed to travel anywhere in the continental United States on military aircraft (on a space available basis).

Special Scholarship Program

Two-, three- and four-year scholarships are offered by AFROTC on a competitive basis. These scholarships pay for a \$900 book allowance per year, tuition (amount dependent on type of scholarship awarded), fees and other required expenses except room and board. The university and the State of Wyoming offer additional room and board funding to Air Force ROTC cadets (who have or have not been awarded an Air Force ROTC scholarship) and reside in university housing. High School seniors seeking a four-year scholarship should contact their high school counselors or the Recruiting Flight Commander, AFROTC Detachment 940, Dept. 3005, 1000 E. University Avenue, Laramie, WY 82071; telephone (307)766-3710; email at airforce.rotc@uwyo.edu, early in the fall of their senior year. Sophomore or transfer students interested in competing for a scholarship should contact the Recruiting Flight Commander before the fall semester prior to junior standing.

Military Obligation

Students enrolling in the first two years of the AFROTC Program (the General Military Course) are not obligated to military service of any kind, unless on an Air Force scholarship their sophomore year. Cadets accepting an AFROTC scholarship and those entering the Professional Officer Course become members of the inactive reserve of the United

States Air Force. Upon being commissioned a Second Lieutenant in the Air Force, graduates in nonflying career fields agree to serve four years on active duty; pilot candidates agree to serve on active duty for 10 years after completion of flight training; RPA, navigator, and air battle manager candidates agree to serve on active duty for six years after completion of their respective training.

Extracurricular Activities

To familiarize students with Air Force life and social customs, the AFROTC Program offers on a voluntary basis a wide range of extracurricular activities. Civil Air Patrol gives cadets an opportunity to experience flying first hand with a trained instructor pilot. The Arnold Air Society, a national professional honorary society, is a service organization active on campus. The color guard supports various university and local activities. Visits to Air Force bases across the nation provide insight into the function of Air Force operational units. Throughout the year, AFROTC teams participate in the university intramural sports program, while cadet-sponsored social events build the spirit of comradeship inherent in military life.

Minor

Aerospace Studies Minor

Air Force ROTC offers an Aerospace Studies minor.

The 24 credit hours required to accomplish the Aerospace Studies minor will effectively compliment many majors, provide a sound basis for future professional development, and increase the career opportunities of a UW graduate.

Minor Requirements

For the Aerospace Studies minor, the student must complete the core AFROTC program plus:

- 3 credit hours in any Management (MGT) course in the current UW catalog **AND**
 - 3 credit hours in one Political Science (POLS) course listed below
- OR**
- 6 credit hours of Political Science courses listed below.

Political Science

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

POLS2290 - Governments and Politics of Latin America

Credits: 3

Studies chief cultural and historical factors influencing Latin American political process. Surveys major institutions and political patterns of the region.

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

- POLS 2300

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

POLS3220 - Government and Politics of Russia and FSU

Credits: 3

Examines the political, economic and identity transitions of Russia and other states of the former Soviet Union during the post-communist era. Explores how current challenges relate to past Soviet practices.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post-World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3300 - Model United Nations

Credits: 1-3
Max Credit (Max. 6)

Focuses on the United Nations (UN) system and multilateral diplomacy to prepare students to participate in a Model UN simulation. Students learn to evaluate the UN system, learn strategies to address international problems, and develop skills to effectively represent a country in a role-playing exercise.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

- POLS 4220

POLS4230 - Governments and Politics of Asia

Credits: 3
Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 5230.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4255 - Politics of Developing Nations

Credits: 3
An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed INST 4255.

Dual Listed POLS 5255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

- POLS 4300

POLS4340 - International Organizations

Credits: 3
Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4360 - International Peace and Conflict

Credits: 3
Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed INST 4360.

Dual Listed POLS 5360.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4870 - Seminar in International Relations

Credits: 3

Max Credit (Max. 6)

Encompasses reading and research in international law and politics.

Dual Listed POLS 5870.

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

English Language Center

English Language Center

Cheney International Center 28

Frederica Suess, Director

Phone: (307) 766-3630

Web site: www.uwyo.edu/geo/elc

Our Mission

The English Language Center serves the University of Wyoming and surrounding community by preparing non-native speakers of English linguistically, culturally, and academically to meet the requirements for success in U.S. higher education environments and to fully engage in campus life.

IEP Conditional Admission: Conditional admission is available for undergraduate applicants who are academically eligible but have low language proficiency scores. Students need to do 2 applications; one for IEP and one for a degree program for consideration. *Only one application fee is needed. Contact us directly if you are interested in this option: elc@uwyo.edu.

Other Programs

Intensive ESL Program

The Intensive ESL Program is a full-time English language study program. Students are in class 20 hours every week for one whole semester of 15 weeks. To study in the Intensive ESL Program, students must have an F-1 Student Visa. All instructors are experienced ESL professionals and qualified with a Masters Degree or higher in TESOL or a relevant field of study.

Courses

Students take three classes daily, Monday through Thursday:

- Reading & Vocabulary: College vocabulary skills, reading strategies, and study skills.
- Listening & Speaking: Pronunciation/conversation, lecture listening, note-taking skills, and academic presentations.
- Integrated Skills: Grammar-focused reading, writing, and speaking class using topics from academic content areas.

ESL1110 - Introduction to Academic Writing Skills

Credits: 3

Designed to introduce non-native speakers of English, who do not demonstrate the required competency in writing to enter ESL 1210, to academic writing skills. Includes instruction in grammar and sentence structure, paragraph and essay writing.

Former Course Number [AS 1110]

Prerequisite: TOEFL of 18 or lower; IELTS of 5 or lower.

ESL1210 - English Composition for International Students

Credits: 3

The objective is to equip international students with procedural knowledge

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

Former Course Number [AS 1210; ENGL 1210]

Prerequisite: TOEFL Writing sub-score of 18 or higher, IELTS Writing sub-score of 5 or higher, or instructor's consent.

ESL1310 - Academic Listening for International Students

Credits: 3

This course equips non-native speakers with focused listening strategies and note-taking skills that can be applied across a variety of academic content areas and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Listening subscore of 18 or lower IELTS subscore 5.0 or lower; or instructor's consent.

ESL1410 - Academic Reading for International Students

Credits: 3

This course equips non-native speakers with focused academic reading strategies across a variety of academic content

areas, introduces the Academic Core Vocabulary lists, and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Reading subscore of 18 or lower, IELTS Reading subscore of 5.0 or lower, or instructor's consent.

ESL2110 - English Oral Skills

Credits: 3

Instruction for Novice to advanced Low speakers in refining English pronunciation, stress and intonation, listening comprehension, oral grammar practice and building vocabulary.

Former Course Number [AS 2110; ENGL 2110]

Prerequisite: consent of instructor.

ESL3050 - Advanced Academic Writing for International Students

Credits: 3

Through ESL learner targeted instruction, practices, and feedback, the course will emphasize and progressively develop transferrable skills for students' academic work and future professions. It will continue to build on writing skills and emphasize foundational oral and digital communication skills.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: WA/COM1.

ESL4010 - Technical Writing for International Students

Credits: 3

Prepares students from a culturally diverse background for the communication demands of the 21st century. Students conduct rhetorical analysis of various audiences and purposes in order to design, develop, revise and edit disciplinary and interdisciplinary technical communications, such as reports, proposals, job applications, research related documents and oral presentations.

USP 2003-2014 Code [WC< >COM3]

Prerequisite: WA/COM1, WA/COM2, and junior standing.

ESL5910 - International TA Preparation

Credits: 4

Prepares international teaching assistants for the challenges language, culture, and instruction in the American classroom impose on them: training includes pronunciation/intonation, presentation skills, basics of methodology, understanding of cultural differences, and mock-lessons. One Oral Skills Lab hour per week is included.

Prerequisite: graduate standing.

Faculty Index

AADLAND, DAVID M., Economics

ADELT, ULRICH, School of Culture, Gender, and Social Justice

ADIDHARMA, HERTANTO, Petroleum Engineering

AHERN, JAMES C., Anthropology

AHMED, ABDELATY AHMED, Construction Management

AIDHY, DILPUNEET S., Mechanical Engineering

AIKEN, NEVIN, School of Politics, Public Affairs, and International Studies

ALBEKE, SHANNON, WyGIS, Geospatial Information Science and Technology

ALBERS, H. JO, Economics

ALEXANDER, ANNE, School of Politics, Public Affairs, and International Studies, Economics

ALEXANDER, BRENDA M., Animal Science

ALEXANDER, KLINT, Law

ALEXANDER, MELISSA, Law

ALEXANDROVA, EKATERINA, Modern and Classical Languages

ALLEN III, MYRON B., Mathematics and Statistics

ALVARADO, VLADIMIR, Chemical Engineering

ANATCHKOVA, BISTRA, WySAC

ANDERSON, ALLYSON, Computer Science

ANDERSON, CAROLYN, English

ANDERSON, DAVID T., Chemistry

ANDERSON, JEFFREY R., Electrical and Computer Engineering

ANDERSON, STEPHANIE, School of Politics, Public Affairs, and International Studies

ANDERSON-SPRECHER, RICHARD, Mathematics and Statistics

ANDREWS, GERARD P., Veterinary Sciences

ANTON, DAVID, Mathematics and Statistics

ARAGÓN, CECILIA, Theatre and Dance

ARNETTE, ANDREW, Management and Marketing

ARONSTEIN, SUSAN, English

ARULSAMY, NAVAMONEY, Chemistry

ARYANA, SAMAN, Chemical Engineering

ASAY, R. CLIFFORD, Management and Marketing

AUERBACH, DANIEL, Sociology

BAGLEY, DAVID M., Chemical Engineering

BALDWIN, NIKKI, School of Teacher Education

BALDWIN, RONALD, Family Practice

BANGOURA, BERIT, Veterinary Sciences

BANIC, AMY, Computer Science

BARKER, MICHAEL G., Civil and Architectural Engineering and Construction Management

BARRETT, STEVEN F., Electrical and Computer Engineering

BARTSCH ESTES, KAREN, Psychology

BARTON, SHELLEY, Communication Disorders

BASILE, FRANCO, Chemistry

BASTIAN, CHRISTOPHER T., Agricultural and Applied Economics

BAUMBACH, DIANE, Art and Art History

BEACH, Megan, Nursing

BECK, JEFFREY L., Ecosystem Science and Management

BECKETT, CARLA DEE, Chemistry

BEDFORD, NICOLE, Zoology and Physiology

BELL, DAVID A., Chemical Engineering

BELLAMY, WILLIAM, Civil and Architectural Engineering

BELMONT, ERICA L., Mechanical Engineering

BELSER, ROBERT, Music

BEN-DAVID, MERAV, Zoology and Physiology

BENHAM DEAL, TAMI, Kinesiology and Health

BENKMAN, CRAIG, Zoology and Physiology

BENNETT, DREW, Haub School of Environment and Natural Resources

BERGSTRAESSER, PAUL, English, Creative Writing

BERNARD, RILEY FEHR, Zoology and Physiology

BESSAIH, HAKIMA, Mathematics and Statistics

BIALOSTOK, STEVEN, School of Teacher Education

BICER, ALI, School of Teacher Education

BICER, AYSENUR, Physics and Astronomy

BIEBER, STEPHEN L., Mathematics and Statistics

BIEHLE, LAUREN R., Pharmacy

BILLINGTON, COREY, Management and Marketing

BINGHAM, BEAU, Communication and Journalism

BIRD, MICHELE, Mathematics and Statistics

BISHA, BLENDAR, Animal Science

BJÖRKENWALL, RUTH, School of Politics, Public Affairs, and International Studies

MATTHEW J. WHISENANT, B.S. East Tennessee State University 1996; M.A. 1999; PhD Ohio State 2001; Deputy Director of Athletics 2002.

Mission Statement

The University of Wyoming Department of Intercollegiate Athletics is committed to the development of tomorrow's leaders by creating an environment that promotes personal growth, academic and athletic excellence in a progressive, inclusive, and transparent manner. The Department of Intercollegiate Athletics will support the overall University of Wyoming mission, provide an outstanding fan experience, encourage community engagement, and serve as a source of pride for alumni, supporters, and the state of Wyoming.

Guiding Principles

- **Dedication to Student-Athletes:** We will promote the well-being of studentathletes and provide opportunities for academic, athletic, and personal success. We will foster academic excellence, graduate student-athletes, support their development as citizens, and prepare them to be leaders.
- **Integrity:** We will demonstrate integrity in all areas. We are dedicated to financial stability, rules compliance, diversity, and personal accountability.
- **Respect:** We will celebrate a climate of mutual respect, inclusiveness, loyalty, and sportsmanship by recognizing contributions to our teams, our department, and the university.
- **Competitive Success:** We will endeavor to be the very best when representing the University of Wyoming and our state. We are committed to providing the resources and personnel for our teams to achieve success.
- **Tradition:** The legacy of the University of Wyoming athletics is proud and strong. We will honor our outstanding tradition.
- **Excellence:** We believe in a spirit of comprehensive excellence. We will strive for excellence in all we do.

General Information

The University of Wyoming Department of Intercollegiate Athletics (DIA) consists of 17 teams competing at the NCAA Division I level: men's and women's basketball, men's and women's cross country, football (FBS), men's and women's golf, women's soccer, men's and women's swimming, women's tennis, women's volleyball, men's and women's indoor track, men's and women's outdoor track and wrestling. All sports all fully-funded up to the NCAA maximum for grant-in-aids (i.e., scholarships).

The University of Wyoming competes in the Mountain West Conference (MWC), the Western Athletic Conference (WAC), and the Big 12 Conference. In addition to the University of Wyoming the MWC consists of the U.S. Air Force Academy, Boise State University, Colorado State University, University of Nevada-Las Vegas, University of New Mexico, and San Diego State University, University of Nevada, Utah State, University of Hawaii, San Jose State University and Fresno State.

The DIA is managed by the Director of Intercollegiate Athletics who reports directly to the President of the University. The Director of Intercollegiate Athletics ensures the department operates in a manner consistent with the rules and regulations of the University, the MWC and the NCAA.

*For additional information please visit the University's official athletic website at: www.gowyo.com

National Outdoor Leadership School

The University of Wyoming (UW) and National Outdoor Leadership School (NOLS) Articulation Agreement provides the opportunity for UW students to receive UW academic credit for NOLS courses.

When NOLS students step into the world's wild places, they bring not only their backpacks, but also more than 40 years of experience in expeditioning. NOLS founder Paul Petzoldt's idea was simple: take people into the wilderness for an extended period of time, teach them the right things, feed them well and when they walk out of the mountains, they will be skilled leaders. The core of his idea was the extended expedition, one of sufficient length that a person could learn and practice the skills over and over again. That is the backbone of every NOLS course and today the school is widely recognized as the world's leader in the extended expedition, from two weeks to twelve.

This articulation agreement covers domestic and international NOLS courses. This agreement also covers some individual shortterm courses (14 days or less; including mountaineering, rock climbing, sailing, kayaking, skiing, snowboarding, and backpacking) and the Wilderness First Responder (WFR) course.

Application/Eligibility

Current UW students, or students who have been fully or conditionally admitted to UW may receive articulated NOLS credit. Students who have already taken a NOLS course cannot receive credit retroactively (i.e. if a student embarked on a NOLS course and requested to get credit after the course was completed).

Credit and Credit Transfer

UW credit hours will be awarded in the approved courses, which require prior approval. Upon completion of the NOLS courses, provided a grade equivalent to a UW grade of C or better was obtained at NOLS. These UW course grades will be included in your UW GPA. Students who withdraw or are expelled from a NOLS course may receive an incomplete or an F for all enrolled UW credit.

Students should be aware that for internship credits to be awarded, additional academic work requirements determined by the internship course will need to be met. Those additional requirements vary between academic programs and amount of credit desired, but may include a satisfactory evaluation from NOLS, a weekly journal, a substantial written report, and an oral presentation. Internship requirements are established prior to your participating in the NOLS course.

Academic Advising

Prior to participating in a NOLS course for UW credit, students must make an appointment with the Haub School by emailing haub.school@uwoyo.edu or calling (307) 766-5080. If your academic program is outside of the Haub School, students should also meet with their assigned academic advisor to determine if these courses will count towards their major. The Haub School will approve the student's schedule, provide the appropriate course numbers, and liaise with the NOLS Registrar.

Financial Arrangements

Each UW student will pay to NOLS:

- The NOLS tuition and related fees (any changes to be advised in writing by NOLS at least three months in advance of the change coming into effect), related fees would include equipment deposit;
- Complete medical and evacuation health insurance;
- Other fees (e.g. tuition protection program, local transportation, and gear purchases), air transportation and additional living expenses will be paid directly by the student to the provider of the service.

Each UW student will pay to UW:

- The published per credit registration fees to register UW credits earned at NOLS

Financial Aid

Students enrolled in the NOLS program may apply their financial aid to the cost of the program if they are enrolled as a full-time degree seeking student at the University of Wyoming. To do so, please work with the UW Office of Scholarships and Financial Aid.

Rules, Law, and Regulations

UW students studying at NOLS will be bound by all rules, regulations and by-laws in operation at NOLS. In addition, since UW students remain enrolled as degree candidates at UW, they must also adhere to UW standards of conduct, rules and regulations. UW and NOLS both abide by the Federal Right to Privacy Act (FERPA).

Steps to Follow

1. Determine the NOLS course that best fits your needs/interests and/or goals online at: www.nols.edu/courses
2. Make an appointment with an advisor from the Haub School to determine the UW academic credit that best suits your degree program by e-mailing haub.school@uwyo.edu or by calling (307) 766-5080.
3. Meet with your academic advisor (if your academic program is not in the Haub School).
4. Apply and be admitted into NOLS.
5. Prior to leaving for your NOLS course, enroll in the credit offered for the course.
6. Secure your financial aid (if any) with the UW Office of Scholarships and Financial Aid.
7. Attend and successfully complete the course (grade C or better).
8. Grades will be posted the semester of completion of your course.

STEP

USP Codes are listed in brackets by the 2003 USP code followed by the 2015 USP code (e.g. [QB><Q]).

STEP courses are housed within the Learning Resource Network (LeaRN) Program and comprise first-year and academic success courses aimed at supporting students in college research, written and professional communication, major and career exploration, and general transition strategies. STEP courses are often embedded in first-year programs including Fall Bridge, First-Year Experience, First-Year Interest Groups (FIGs), and First-Year Seminars.

STEP1060 - College Athletics and Society

Credits: 3

This course will examine the unique relationship between intercollegiate athletics and higher education, as well as intersections that occur with gender, politics, and race.

STEP1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

STEP1102 - Step Into College

Credits: 1

Helps students interact with UW campus resources, staff, and faculty; learn about resources for academic support and wellness; and explore academic and co-curricular opportunities for students' professional and personal interests.

Restricted Restricted to new full-time, first-year freshmen.

Prerequisite: Freshman or sophomore class standing.

STEP1105 - Academic Success Skills

Credits: 1-2

Designed to provide students the necessary skill set to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation and more.

STEP3000 - Student Leadership in Supplemental Instruction

Credits: 2

Focuses on theoretical perspectives of group tutoring and peer leadership, best practices in supplemental instruction, and student reflection. Will strengthen leadership knowledge and skills and introduce effective methods for group facilitation and SI curriculum.

Prerequisite: closed to general enrollment.

UWYO

UWYO courses are designed to help students acculturate to college life and coursework and learn key academic skills. Course content is combined with training in critical reading, academic writing, research, formal presentation, and many other emphases. UWYO courses have low student-teacher ratios in an effort to help students experience richer connection with the instructor and students in the course. Most UWYO courses imbed intellectual self-awareness

within the course goals. Several UWYO courses are part of UW learning communities and provide additional opportunities for students to engage with and work together in their cohort.

Commonly Used Terms

A-F: Letter grades of A, A-, B+, B, B-, C+, C, C-, D+, D, or F.

Academic load: The total semester hours of credit for all courses taken during a specified time-semester or summer session.

Academic probation: Probation is the status of an undergraduate student who is not progressing satisfactorily toward his or her degree. An undergraduate student shall be placed on probation at the end of the semester or term when his or her cumulative grade point average (GPA) falls below a 2.000 (3.000 for graduate students).

Academic reinstatement: Restoration of a student's eligibility to register for courses after being on academic suspension. This process requires a petition that is first reviewed by the dean of the student's college or the Center for Advising and Career Services. Academic reinstatement does not guarantee restoration of financial aid eligibility which is a separate process handled by the financial aid office.

Academic suspension: The status of a person whose enrollment at UW has been terminated because of unsatisfactory academic progress towards either an undergraduate or graduate degree.

Accredited: A term applied to a school or specific program which has been recognized by a national or regional organization as meeting certain academic standards for quality and educational environment. The University of Wyoming, and all UW academic programs, are accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools Commission on Institutions of Higher Education. This is the highest level of accreditation in the United States. Some academic programs have professional standards established by their respective accrediting associations.

Add and drop deadlines: The latest date in an academic term when a course may be added or dropped from a student's class schedule *without* approval of someone other than the student. Adding and dropping of courses is done through WyoRecords.

Admission: The process of being admitted to the university with the opportunity to take classes.

AP exam: An Advanced Placement Examination from the College Entrance Examination Board (CEEB) in a specific subject area available nationally to high school students. Information on taking the examination may be obtained from a high school guidance counselor. Information on university course credit for these examinations is available from the Office of the Registrar.

Audit: Individuals who want to take a course but who do not want either a grade or credit for taking it may register as an audit. The instructor for the course determines the amount of work and/or participation that is required. Marks of either Audit/Satisfactory or Audit/Unsatisfactory are assigned. Audit hours are charged tuition at the normal rate. Audit hours are not used to determine full- or part-time status.

Banner: Banner is a suite of products that are used as the university's student information system.

Class schedule: A publication containing a listing of all courses scheduled to be offered during a specific semester or summer session. *Class Schedules* are available on the Office of the Registrar's website.

CLEP test: Subject area examination administered by the College Entrance Examination Board (CEEB).

Concentration: A collection of courses within a major which focuses on a particular subject area.

Concurrent major: A double major. Only one degree will be awarded based on the student's primary major.

Continuing probation: An undergraduate student on academic probation is considered on continuing probation in subsequent semesters if the student earns a term GPA of 2.000 or above but whose cumulative GPA is still below a 2.000.

Corequisite: A course to be taken or a requirement to be fulfilled at the same time as a particular course is being taken. Departments reserve the right to drop a student from a class if the student does not have the corequisite.

Cross-listed course: A course which is identical in content, title, credit hours, and requirements which is offered by one or more academic departments. The four-digit course number must be the same. This designation must be approved by the University Course Review Committee.

Curriculum: The set of courses in a particular degree program. More generally, the courses (in total) offered in a college or university.

Degree requirements: Degree requirements include all requirements of the university (including University Studies Program), college, academic department, and major. All requirements must be successfully met in order to obtain a specific degree.

Drop: To discontinue enrollment in a course or courses prior to the end of the drop/add period at the beginning of a term. A dropped course does not appear on the student's academic transcript. Dropping from a class does not influence a student's Satisfactory Academic Progress measurement, but may impact the amount of financial aid a student earns for the semester in question.

Dual degree: Two degrees are awarded, and students must complete all of the degree requirements for the colleges of both majors. Dual degree require additional credits above the minimum required for one degree.

Dual-listed course: A course which is offered at both the 4000- and 5000-level that is identical in course prefix, content, title, and credit hours. The last three digits of the four-digit course number must be the same. The 5000-level course must require additional work beyond that required for the 4000-level course. This designation must be approved by the University Course Review Committee.

Financial aid reinstatement: Restoration of one's financial aid eligibility based on being granted an exception to financial aid or scholarship rules. Financial aid restoration is a separate process from and is not guaranteed by academic reinstatement.

Full-time: A student taking 12 or more credit hours at the undergraduate level or 9 or more credit hours at the graduate level is considered a full-time student. During the summer session, students enrolled in 6 or more credit hours are considered full-time.

Grade point average: The semester grade point average (GPA) is the sum of all grade points earned in a semester or term divided by all credit hours attempted for letter grade. Credit hours in courses in which marks of I, W, S, or U were assigned are excluded. The cumulative grade point average is the sum of all grade points earned at UW divided by the sum of all credit hours attempted at UW for a letter grade, for all non-excluded courses.

Lower-division course: Courses normally taken during the freshman and sophomore years. Lower division courses are those numbered between 1000 and 2999, inclusive.

Major: The primary disciplinary interest or academic subject area of a student as represented by one of the curricula offered by the various academic departments. The undergraduate degree may or may not carry the same title as the major. Every student has one or more majors but may or may not have a minor or concentration.

Minor: A secondary subject area interest (to the major) represented by a specified set of hours and/or courses. Differs from a concentration in that a minor is not a subdivision of the major subject area.

Option: A collection of elective courses within a major which emphasize one aspect of the major, chosen by a student according to his or her interests.

Orientation: A program of one to three days on campus designed to acquaint a new student with the facilities, policies, sources of information and assistance, and academic and social environment. Academic advising and registration are also included.

Prerequisite: A requirement to be completed before enrollment in a course or a degree program. Prerequisites for individual courses are listed in their course description in this catalog. The statement "or consent of instructor" is implied for all prerequisites. Students are responsible for being aware of a course's prerequisites prior to enrolling in the course. Departments reserve the right to drop a student from a class if the student does not have the prerequisite.

Registration: The process of officially enrolling into one or more courses at the university.

Satisfactory academic progress: Satisfactory Academic Progress only applies to federal financial aid applicants and recipients. Three measures of a student's advancement toward the earning of his or her stated degree objective are: 1) a grade point average putting the student in good academic standing, 2) a ratio of credit hours earned compared to credit hours attempted in the student's most recent academic year, and 3) a comparison of the number of credit hours attempted in a college career compared to the number of hours required to earn the pursued degree.

Semester: The division of the calendar year used in academic scheduling. A semester is roughly 15 weeks in length.

Semester credit hour: The unit of academic credit for course work.

Transfer credit evaluations: An evaluation of previous college-level course work from another regionally-accredited academic institution, international post-secondary institution, standardized test, or military course work to determine whether courses are transferable to UW as well as to determine any UW equivalents.

University Catalog: The *University Catalog* is the official document of the university which includes information on all undergraduate academic programs and their requirements, courses offered by each academic department, lists of faculty, policies and procedures related to admission, financial aid, all registration activity, and tuition and fees. A student's degree requirements are based on the *University Catalog* in effect the year he or she enters either UW or another catalog year as approved with a petition.

Upper-division course: Courses normally taken during the junior and senior years. These courses are numbered from 3000 - 4999, inclusive. "W" Number: A student's unique identifier in WyoRecords will begin with "W". This "W" number replaces the Social Security Number as a student's unique identifier.

Withdrawal: To discontinue enrollment in a course or courses after the end of the drop/add period. When withdrawing from one or more, but not all, courses, a student should complete the process on WyoRecords. To withdraw from all courses in a semester, a student should begin the process in the Dean of Students Office. A mark of W will be placed on the student's academic transcript for each course. Withdrawal from a course or from the university may impact both a student's current and future receipt of financial aid. Ask a financial aid office professional before withdrawing.

WyoRecords: The University of Wyoming portal used for communication with the campus community, registration activity, grade posting, financial aid, course management, and advising. A specialized version of WyoRecords is available for all enrolled students, faculty, staff, and alumni.

University of Wyoming at Casper

University of Wyoming at Casper

University of Wyoming at Casper

Brent L. Pickett, Ph.D., Dean
125 College Drive, Casper WY 82601
(307) 268-2713
Web site: <https://www.uwyo.edu/uwcasper/>

Since 1976, the University of Wyoming at Casper (UWC), in partnership with Casper College, has offered on-site courses and a slate of university degree programs in Casper. UW-Casper is also the location in Natrona County for statewide degree programs and classes offered through Distance Credit Programs.

UW-Casper was established to meet the needs of students unable to move to Laramie. Some of these students are nontraditional students who may be older or have families, homes, or jobs in the Casper area. UW-Casper is designed to meet the academic needs of students in a setting that provides small class sizes, dedicated staff, and award-winning faculty. Courses are taught by resident and visiting faculty who are regular or part-time members of UW academic departments. A full-service student success office handles admission, registration, financial aid, and advising.

Classes are taught onsite on the Casper College campus. More than 4,000 students have received their UW degrees through UW at Casper support and programs.

UW-Casper also has the Bachelor's of Applied Science (BAS) program. This fully online program is designed to stack onto an associate's degree to help persons already in the job market further develop their skills and advance their career potential. There are two areas of concentration available in the BAS, one in Health Services Administration and the other in Organizational Leadership.

Undergraduate Majors

Organizational Leadership, B.A.S.
Biology, B.S.

Secondary Career & Technical Education, B.A.S.
Communication, B.A.
Elementary Education, B.A.

Elementary Education/Special Education, B.A.
English, B.A.
Medical Laboratory Science, B.S.
Psychology, B.S.
Secondary Science - Biological Science Education with Concurrent Major in Biology (BSSE), B.A.
Social Work, B.S.W.

Zoology, B.S. UW - Casper

Graduate Majors

Counseling, M.S., Concentration in Mental Health Counseling or Counseling, M.S., Concentration in School Counseling

Minors and Endorsements

Secondary Biology Endorsement

Biology, Minor

Secondary Chemistry Endorsement

Communication Minor

Early Childhood Endorsement

Early Childhood Education Options

Psychology Minor

Sociology Minor

Zoology Minor

For more information, contact UW at Casper at 125 College Drive, Casper, WY 82601; (307) 268-2713, (877) 264-9930; or by e-mail at uwcasper@uwyo.edu.

Organizational Leadership, B.A.S.

The Bachelor of Applied Science degree (BAS) is a completely online program designed for individuals who have completed an associate's degree and who need or desire the additional breadth in skills, knowledge, and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

Major Requirements (12 credits)

FCSC3110 is REQUIRED for Option A.

AGRI4350 is REQUIRED for Option B.

PHCY4441 is REQUIRED for Option C.

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3

Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP 2003-2014 Code U3I, U3L

Prerequisite: WA and junior status.

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

OR

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

OR

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3

Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

PHCY4441 - Intro Health Institution Leadership

Credits: 3

Max Credit 3

This course provides undergraduates information through analysis of theory and application. The course will use discussion boards to highlight examples of leadership roles and discuss differences in types of leadership roles. Organizational, team, and individual dimensions of leadership are examined.

Restricted Selection of leadership track in BAS program

Contemporary Society Requirement (2 courses, 6 credits)

Pick **two courses** from the following courses listed:

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply

and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political

tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOC3150 - Collective Behavior and Social Movements

Credits: 3

Analyzes and explains fads, fashions, rumors, riots and mass behavior in light of theoretical frameworks. Studies social movements including blacks, women, labor, religions and students.

Prerequisite: SOC 1000.

SOC4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed INST 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 3000.

Career Electives (9 credits)

Students will work with their advisor to identify these career electives.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Option A: Community Resources (12 Credits)

The Community Resources option guides students through an examination of how managers operate effectively with stakeholders and employees in community leadership and non-profit settings.

AGEC4720 - Water Resource Economics

Credits: 3
Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3
Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.
Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3
Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3
Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Option B: Business Management (12 Credits)

The Business Management option guides students through an examination of how managers create value by understanding and developing employee and customer relationships.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

Option C: Health Services Administration (HSA) Concentration (11 Credits)

The Health Services Administration (HSA) concentration allows students to meet their career goals. This concentration:

Is designed for students who are interested in careers such as health services administrators, patient service associates, community outreach coordinators, healthcare office managers, and various positions in community health agencies and the health care industry.

Benefits students who are interested in working side by side with health care workers.

Provides an excellent option for those who want to advance in healthcare but who do not want to pursue additional clinical education.

Students pursuing this concentration must take the business management track and will substitute PHCY 4160/4441 Intro to Health Leadership in lieu of AGRI 4350.

PHCY4050 - Evolution of American Health

Credits: 2

PHCY4141 - Health Economics and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

PHCY4241 - Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

PHCY4341 - Intro to Healthcare Quality

Credits: 3

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Program Overview

Dr. Josh Valk, Director- Bachelor of Applied Science Program

jvalk@uwyo.edu

This program is available by distance delivery only. Entry into the program requires an application process. Students must apply for admission to UW first. Official transcripts from all institutions attended must be submitted to UW Admissions. Entry into this program requires an existing associate's degree. Transcripts will not be analyzed prior to application.

All students pursuing a bachelor's of applied science degree in Organizational Leadership are required to complete: a) University Studies Program (USP) requirements, b) 120 approved credits, 42 of which must be upper division (with 30 coming from UW), and c) courses within the program checklist. The program is designed to be completed in two years, but students may move at a pace that works for them.

All courses within the Bachelor of Applied Science must be completed with a grade of C or better. If you do not pass the course with a grade of C or better after three attempts you will be dismissed from your organizational leadership major.

Each student is assigned an advisor, who can be reached at (bas@uwyo.edu), and will be advised each semester. It is important that you work closely with your advisor to plan your course schedule.

University Requirement - All degrees at the University of Wyoming require 42 upper division credit hours (3000+).

Residency Requirement - All degrees must include a minimum of 30 upper division credit hours from UW

Zoology, B.S. UW - Casper

Zoology is the study of animals: their structure, physiology, development and evolution. One of the enduring fascinations of zoology is that we can learn so much about ourselves and our environment by studying what our fellow creatures do.

At the end of this program students will have a comprehensive knowledge of zoology, will be well prepared for graduate education, and will be equipped to enter any of the many employment opportunities that are available.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Foundation Courses

Foundation Courses

MATH1400 - College Algebra

Credits: 3
Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3
Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the

lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: PHYS 1110.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy

relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Advanced Zoology Course

* if more than one of the required courses is completed, additional courses can count towards the Zoology Approved Core Electives below.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

Zoology Approved Core Electives

A minimum of 10 of 18 Zoology Approved Core Electives must be exclusive to the ZOOL major.

Choose a total of 18 credits from:

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on

the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current

literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application or remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

College of Agriculture and Natural Resources

College of Agriculture, Life Science and Natural Resources

151 Agriculture Building

Barbara Rasco, Dean

Phone: (307)766-4135 Fax: (307)766-4030

Web site: www.uwyo.edu/uwag

The College of Agriculture and Natural Resources offers a wide variety of course work in agriculture, natural resources, molecular biology, and family and consumer sciences. The curriculum provides a sound background in basic sciences and the choice of a number of fields in which to specialize. Students are trained in principles which apply throughout the world, with special emphasis on agriculture and natural resources found in the Rocky Mountain region.

Laboratory work and other experiential learning opportunities are stressed in all programs. Students receive excellent training from case studies and practical experience provided at research and extension centers. Other facilities include modern laboratories and classrooms, an abattoir, meat processing rooms, livestock and crop farms and greenhouses.

In addition to the academic departments, the college includes the Agricultural Experiment Station and the UW Extension. Materials and techniques resulting from this effective triple combination benefit students in the never-ending search for problem-solving information. The close relationship between teachers, researchers, and extension educators creates a learning atmosphere that encourages the development of the finest students.

Programs of Study

Undergraduate Degrees

Bachelor of Science

Agricultural business
Agricultural communications
Animal and veterinary science
Microbiology
Molecular biology

Plant Production and Protection
Rangeland ecology and watershed management

Bachelor of Science in Family and Consumer Sciences

Graduate Degrees

Master of Arts

Molecular biology

Master of Science

Agricultural and applied economics
Agricultural economics/water resources

Animal and veterinary sciences
 Entomology
 Entomology/water resources
 Family and consumer sciences
 Food science and human nutrition
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Rangeland ecology and watershed management/water resources
 Reproductive biology
 Soil science
 Soil science/water resources

Doctor of Philosophy

Animal and veterinary science

Biomedical Sciences
 Entomology
 Molecular and cellular life sciences
 Molecular biology
 Plant sciences
 Rangeland ecology and watershed management
 Reproductive biology
 Soil science

The following certificates and/or degrees in the College of Agriculture and Natural Resources are available through Distance Education:

Certificate: Early Childhood Program Director
 Online bachelor's degrees: Family and Consumer Sciences (Professional Child Development Option)

For more information, contact the College of Agriculture and Natural Resources Office of Academic and Student Programs. Phone: (307)-766-4135

The College of Agriculture and Natural Resources also offers a graduate certificate in reclamation and restoration ecology. For more information, contact the Department of Ecosystem Science and Management.

Basic Education Core

All undergraduates in the College of Agriculture and Natural Resources curriculums are required to follow the basic education core as noted below.

Core Components (USP 2015).....Hrs.

- First-Year Seminar (FYS).....3
- Quantitative Reasoning (Q)3
- Communication 1 (COM1).....3
- Communication 2 (COM2).....3

Communication 3 (COM3).....	3
Human Culture (H)	6
Physical & Natural World (PN).....	6
U.S. and Wyoming Constitutions (V).....	3
Subtotal (min. core requirements)	30
Hours for major, support areas and electives as determined by division... 90-98	
Total Hours 120-128	

Core Components (USP 2003)

Core Components (USP 2003) Hrs.

Intellectual Community (I)	1-3
Writing 1 (WA)	3
Oral Communication (O).....	3
Quantitative Reasoning 1 (QA)*	3
Quantitative Reasoning 2 (QB).....	3
Science (S, SB, SP, SE).....	4-8
Cultural Context (C, CH, CS, CA).....	9
U.S. and Wyoming Constitutions (V).....	3
Physical Activity and Health (P).....	1
Subtotal (min. core requirements)	30-36
Hours for major, support areas and electives as determined by division....79-91	
Total Hours 120-128	

*Core Components are mutually exclusive of each other; hence, two core components may not be fulfilled by the same course. Except for the QA, core courses may have topics from the embeddable components list included in their curriculum, where appropriate.

Courses taken for S/U

A maximum of 20 elective hours with a grade of S (satisfactory) may be included as part of the total credit requirements for graduation; but no S/U hours may be used to satisfy university, major requirements or required electives, unless the course is offered for S/U grading only.

Minors in Agriculture and Natural Resources

Minors provide a formalized recognition of concentrated study in a specific subject area. A minor offers recognition for academic achievement outside of the students' major course curriculum and gives students a focus of work in the chosen minor area. A minors program can enable students to enhance and expand career opportunities. A minor will also improve the possibility of admission to graduate programs in any chosen major, minor, or related field of study.

Minors Available in the College of Agriculture and Natural Resources Include:

Agricultural business
Animal and veterinary science
Apparel design

Agroecology

Agronomy
Equine
Farm and ranch management
Forest resources
General agricultural economics
Horticulture
Human development and family sciences
Human nutrition
Insect biology
Interior design
International agricultural economics
Molecular biology
Natural resource economics
Plant Protection
Rangeland ecology and watershed management
Reclamation and restoration ecology
Soil science

Agricultural Communications Major

A wide variety of courses in agriculture, communications, and journalism provides students with basic preparation for positions as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio and television stations, and commercial businesses. Communication skills are also distinct assets in agricultural sales, research, service and teaching. Students enrolled in agricultural courses acquire up-to-date and knowledgeable backgrounds of the subject matter. Courses in communication and journalism develop proficiencies demanded by employers of communication professionals.

Minimum Requirements for Agricultural Communications Majors (B.S.)

Hrs.

University Studies Program requirements..... 30

Communications/journalism core..... 24

COJO 1000, 1040, 2010, 2100 and minimum of 12 hours of communication/journalism elective. (Minimum grade of C required)

Agriculture core requirements..... 42

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 24 hours must be upper division (Ag 3000-4000) elective courses and include AGRI 4975.

Supporting course requirement4

STAT 2050 or 2070

Additional hours for major and electives 20

Total Hrs: 120

Students wishing to pursue an agricultural communications degree are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work. Agricultural communications majors may also complete an internship in their field. A variety of opportunities are available and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Bachelor of Applied Science

160 Agriculture Building

Awarded by the College of Agriculture and Natural Resources

Phone: (307)766-4034 Fax: (307)766-4030; Web site: www.uwyo.edu/basa/

Organizations need leaders at all levels who can effectively understand the environment and society in which they operate; analyze situations and solve problems; supervise and manage, interact and communicate appropriately within and outside the organization; anticipate changes; and plan for the future. The Bachelor of Applied Science degree (B.A.S.) is designed for individuals with a completed Associate of Applied Science, Associate of Science, Associate of Business or an Associate of Arts degree at a Wyoming Community College (or an equivalent degree at another accredited institution) and who need or desire the additional breadth in skills, knowledge and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

The fundamental philosophy of the B.A.S. degree is that the student must complete the general education (University Studies Program - USP) requirements expected of all UW bachelor's degrees and must engage in upperdivision coursework sufficient to provide focus and depth of learning. Following this philosophy, the B.A.S. has four basic components. These components are university studies, career specialty, professional concentration, and electives. The fundamental elements of the baccalaureate degree are provided by the general education core (USP) and the upper division professional concentration. At the end of the program, students are expected to meet the following Student Learning Outcomes:

1. to develop proficiency in accessing, evaluating and utilizing information, ideas, and data;
2. to develop proficiency in communicating information and ideas effectively and responsibly;
3. to gain an appreciation for leadership development as a tool for individual, organization and community problem solving;
4. to demonstrate an understanding of organizational design, behavior, ethical practices, and effective managerial and supervisory practices;
5. to gain an understanding of social, cultural, economic and environmental contexts essential for effective leadership and the management of change.

The University Studies Program (USP 2015) consists of a minimum of 27 credit hours as adopted by the UW faculty, and the Articulation Agreement between UW and the Wyoming Community Colleges. Students with an Associate of Applied Science degree from a Wyoming community college will normally matriculate with 15-20 hours of credit that count toward this component. The remainder may be required as part of a UW student's coursework, including the Professional Concentration or Electives coursework.

The Career Specialty Component is fulfilled with the Associate of Applied Science, the Associate of Science, or Associate of Arts degrees. This component will consist of a minimum of 40 credit hours in the major.

The Professional Concentration Component is the advanced component of the program and the courses are selected by the student and the advisor. All students are required to take a range of courses from the prescribed set of areas of concentration within this component in order to provide them with the breadth and depth of learning necessary for a baccalaureate degree. This component will consist of 36-40 upper division or articulated equivalent credit hours. Note: Within the Professional Concentration, students have a choice between two Organizational Leadership areas. Option A focuses on Community Leadership; Option B focuses on Business Leadership.

The Elective Component will consist of the number of credit hours needed (after completing the other three components) to complete the degree components. A minimum of 120 hours is required for the B.A.S.

All University of Wyoming Students must earn a total of 42 upper division hours (at least 30 hours taken from UW), to earn their degree. Students in the B.A.S. program must earn a "C" in all courses on the B.A.S. checklist. Failure to do so will require repeating the course. Per university regulations, students may only attempt a course three times; an "F" or "W" count as attempts.

Application Process

All students must apply to the Bachelor of Applied Science program, including those who would like to change their major to the B.A.S. in Organizational Leadership. Students cannot just fill out a change of major form and have Admissions change their status. These are the steps for application:

1. Apply to the University of Wyoming through Admissions, declaring the Bachelor of Applied Science in Organizational Leadership.
2. Have official transcripts from all institutions attended sent to Admissions.
3. Email BAS@uwyo.edu when you have received your acceptance to UW. Include your W# in the message. We can then track your files to evaluate them for the BAS program.
4. Students will receive a letter telling the application decision. If a student is denied admission to the BAS, an explanation for the denial will be provided. If accepted, the student will be given information for how to work with the program advisor, Rosalind Grenfell (rgrenfel@uwyo.edu), to enroll in classes.

Professors Emeritus:

Nicole Ballenger, Edward Bradley, Larry J. Held, James J. Jacobs, Dale Menkhaus, Carl Olson, Alan C. Schroeder, David T. Taylor, Glen D. Whipple

The Department of Agricultural and Applied Economics offers three concentrations within the agricultural business bachelor of science degree program. They are agribusiness management, farm and ranch management, and livestock business management. All three concentrations focus on the development of critical thinking, research, and communication skills for students interested in

1. agricultural operations,
2. small rural businesses,
3. community economics,
4. financial institutions,
5. agricultural and natural resources development, and
6. other pursuits where applied economic tools will be useful.

A brief description of minimum course requirements for each of the three concentrations in agricultural business is given below. In addition, professional advisers will work with students to tailor a curriculum to individual interests and goals.

Agribusiness Management Concentration

This curriculum is for students preparing for careers in the agribusiness field. Applied agricultural economics courses are supplemented with marketing, management, finance and other courses from the College of Business and production-oriented courses from other departments in the College of Agriculture and Natural Resources.

Minimum Course Requirements for Agricultural Business (B.S.) Majors within the Agribusiness Management Concentration¹

Hrs.

First-Year Seminar (FYS).....3

Writing9

ENGL 10102 (COM1), Communication II (COM2), AGECE 4965 or AGECE 4970 (COM3)	
Quantitative (Q) (required for major).....	7
MATH 1400; 2350	
Science (PN)	6
Human Culture (H)	6
U.S. & Wyoming Constitutions (V).....	3
Agricultural Economics	24
1010, 1020, 3400, 4050 or MKT 3210 (count for either upper-division AGECE or business credit, but not both), 4060, 4500; either 4450 or 4830 or 4840 or 4880; 3 hours of AGECE electives	
Supporting Agriculture	9
AG College hours other than Agricultural Economics	
Statistics	4
Computers	3
Supporting Economics.....	6
ECON 3010 and 3020	
Business	15
ACCT 2010 and 2020; and 9 hours of 3000-4000 level business courses	
Electives	25

Total Hours 120

¹ A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

²Recommend or equivalent COM1 course.

³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended.

24 credit hours in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

COSC 1200 recommended, or IMGT 2400.

Farm and Ranch Management Concentration

This curriculum is for students intending to become operators or professional managers of farms, ranches or feedlots. It is also well suited for students interested in the field of agricultural finance, or a minor in biological fields such as agroecology or range management. In this concentration, courses in farm and ranch management, finance, and

marketing are supplemented by courses in crops, range management, veterinary sciences and animal science, with electives in other areas.

Minimum Course Requirements for Agricultural Business (B.S.) Majors within the Farm and Ranch Management Concentration ¹

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW. ² Recommend or equivalent COM1 course. ³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits. H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended. 24 credits in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level. COSC 1200 recommended, or IMGT 2400.

Livestock Business Management Concentration

This curriculum is for students intending to work in any sector of the livestock and meat industry, ranging from input suppliers, to ranches, feedlots, meat packing companies, marketing and sales agents, futures/commodities exchange groups, policy makers, and international trade organizations. In this option, courses in farm and ranch management, agricultural finance, marketing, and trade are supplemented with courses in animal science, biology, range management, food science, data analysis, and other disciplines. Students may pursue a minor in Animal Science as part of this option, but can choose the non-minor version instead. Students will gain a broad understanding of both the business and science of the livestock industry.

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW. ² Must earn a "C" or better. ³PN and H may not be fulfilled by AGECE or ECON courses. 31 credits in Ag Econ beyond those earned to satisfy University Studies requirements; 21 of these 31 credit hours must be earned at the 3000-4000 level. AGECE 4840 may not be double-counted towards both Agricultural Economics and Quantitative Skills. Suggest COSC 1200 for most, or IMGT 2400 (for advanced users). Must earn a "C" or better in all courses required in the minor to earn the minor.

Environment and Natural Resources

Students interested in natural resource or environmental issues or careers may complete any of the four options within agricultural business offered by the department with an environment and natural resource emphasis. Inquiries about environment and natural resource concentrations in agricultural business should be directed to the Department of Agricultural and Applied Economics.

Minor Programs

The department also offers five minor programs. These five minors are to give students majoring in other undergraduate curricula in the university a concentration of work in any of the specialized undergraduate curricula offered by the department or in general agricultural economics. Each minor requires 27 hours in prescribed course work including 6 hours in supporting agriculture. Students need to plan their course work to meet course prerequisites.

Agricultural Business Minor. AGECE 1010, 1020, 4050 or MKT 3210, and 4060; ACCT 2010; 6 additional hours in upper-level agricultural economics courses; 6 hours in supporting agriculture courses.

Farm and Ranch Management Minor. AGECE 1010, 1020, 2020 and 4640; 9 additional hours in upper-level agricultural economics courses; 6 hours in supporting agriculture courses.

International Agriculture Minor. AGECE 1010, 1020, 3860 and 4880; 6 additional hours in upper-level agricultural economics courses; 3 hours in foreign culture or language; 6 hours in supporting agriculture courses.

Natural Resource Economics Minor. AGECE 1020, 3750, 4700, 4720; choose 9 additional hours from: AGECE 4450, 4600, 4710, ECON 2400, 4400, 4410, 4520 (note: College of Business prerequisites), ENR 4500.

General Agricultural Economics Minor. AGEC 1010, 1020 and 15 additional hours in agricultural economics courses with 12 hours at the upper-level; 6 hours in supporting agriculture courses.

Graduate Study

The Department of Agricultural and Applied Economics offers graduate work leading to the Master of Science degree. Students may choose among major options in the areas of agricultural and applied economics and agricultural business. The Plan A agricultural economics major emphasizes research with any of the following focus areas:

production economics and management, marketing and market analysis, resource and environmental economics, international agriculture, and economic and rural development.

The Plan B agricultural business option offers advanced skills to students who desire professional careers in the business sector. Students in the agricultural business option may concentrate their coursework and writing in management, marketing, or finance. Dual majors in water resources, and environment and natural resources are also offered.

Finally, the Department offers a graduate minor in applied economics. This program is for currently enrolled graduate students in other disciplines seeking a foundation in economics as well as their major discipline.

Program Specific Admission Requirements

Undergraduate major in agricultural economics or economics is not required.

Students may be required to complete program prerequisite courses, without graduate credit, that were not completed in their undergraduate education.

Specifically, students who have not completed at least one course in calculus, statistics, and intermediate microeconomic theory may be required to complete these courses without graduate credit during their first semester in residence.

Program Specific Degree Requirements

Master of Science in Agricultural Economics

The following courses constitute the M.S. in Agricultural Economics core requirements and are required of all Plan A candidates (22 hours).

Economic Theory

AGEC 5310 Theory of Producer Behavior...	3
AGEC 5630 Advanced Natural Resource Economics	3
AGEC 5710 Advanced Agricultural Market Theory	3
AGEC 5740 Theory of Consumer Behavior	3

Quantitative Methods

AGEC 5230 Intermediate Econometric Theory	3
AGEC 5320 Quantitative Methods in Agricultural Economics.....	3

Research

AGEC 5650 Communicating Research.....3

AGEC 5880 Advanced Seminar.....1

Plan A (thesis):

Minimum of 30 credit hours including AGEC M.S. core requirements, thesis hours and electives. No more than three hours of AGEC coursework numbered below 5000-level count toward the 30 hour requirement. Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements. The student's graduate committee, nominated by the major professor, the student, and the department head determine the final program of study and thesis research topic. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Plan B (non-thesis):

Minimum of 32 hours of coursework; Non-thesis business analysis paper accepted by the student's graduate committee. Minimum of 13 credit hours of agricultural economics coursework numbered at the 5000-level are required, including:

AGEC 5310

AGEC 5740

AGEC 5880

AGEC 5630 or 5710

AGEC 5320 or 5230

In addition, students are required to complete 3 credit hours from each of the following three areas:

Management:

AGEC 4060, 4640 or 5460; or MGT 4410, 4420, 4440, 4470, or 4520

Marketing:

AGEC 4050, 4830, 4840, 4880, or 5710; or MKT 4240, 4430, 4520, or 4540

Finance:

AGEC 4500; or FIN 4510, 4520, 4610, 4810; or ECON 4740

Remaining credit hours will be filled with electives. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic. Presentation of the business analysis paper at a formal public seminar. An internship experience is strongly encouraged as part of the agricultural business option (AGEC 5990).

Master of Science in Agricultural Economics/ Water Resources; Plan A (thesis):

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 10 credit hours in water resources approved courses. Please refer to Water Resources Degree program in this Catalog for updated degree requirements. Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the water resources area. Presentation of research

results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Master of Science in Agricultural Economics/Environment and Natural Resources (ENR); Plan A (thesis):

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 15 credit hours in environment and natural resources, as approved by the student's committee and the ENR academic adviser. Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements. The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the area of environment and natural resources. Presentation of research results at a formal public seminar. Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Graduate Minor in Applied Economics:

Graduate standing. AGECE 4640, AGECE 5310 or 5740, AGECE 5320 or 5230, and 6 additional credits of approved courses. Committee selection for the student's major thesis or dissertation committee should include at least one faculty member from AGECE.

Major

Agricultural Business, Agribusiness Management Option, B.S.

Prepare for careers across agribusiness and business sectors. Agricultural economics is supplemented with business and agricultural science courses to prepare you for a wide range of careers in the agricultural supply chain.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW1

- First-Year Seminar Credits: 3 (FYS)
- Science Credits: 6³ (PN)
- Human Culture Credits: 6⁴ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Supporting Agriculture Credits: 9 (AG College hours other than Agricultural Economics)
- Statistics Credits: 4
- Computers Credits: 3⁶
- Electives Credits: 25

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing: 9 Hours

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

- Communication II (COM2)

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

OR

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

Quantitative (Q): 7 Hours

(Required for Major)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

Agricultural Economics: 24 Hours

⁵24 credit hours in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)
USP 2003-2014 Code U3WB
Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)
Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.
OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

OR

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or equivalent.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

OR

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

- 3 hours of AGECElectives

Supporting Economics: 6 Hours

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Business: 15 Hours

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

- 9 hours of 3000-4000 level business courses

Total Hours: 120

² Recommend or equivalent COM1 course.

³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

⁴ H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended.

⁶ COSC 1200 recommended, or IMGT 2400.

Agricultural Business, B.S.

The Department of Agricultural and Applied Economics offers three options within the agricultural business bachelor of science degree program. They are agribusiness management, farm and ranch management, and livestock business management. All three options focus on the development of critical thinking, research, and communication skills for students interested in

1. agricultural operations,
2. small rural businesses
3. community economics,
4. financial institutions,
5. agricultural and natural resources development, and
6. other pursuits where applied economic tools will be useful.

The agricultural business curriculum is designed to enable our students to:

1. communicate effectively economic, agricultural, business decision-making and natural resource concepts,
2. fit into a business, agency, or academic environment and use economic concepts to quantify and analyze relevant issues, and
3. be familiar with issues related to agriculture, natural resources, and rural communities.

Options

A brief description of minimum course requirements for each of the four options in agricultural business is given below. In addition, professional advisers will work with students to tailor a curriculum to individual interests and goals.

- Agricultural Business, Agribusiness Management Option, B.S.
- Agricultural Business, Farm and Ranch Management Option, B.S.
- Agricultural Business, Livestock Business Management Option, B.S.

Environment and Natural Resources

Students interested in natural resource or environmental issues or careers may complete any of the four options within agricultural business offered by the department with an environment and natural resource emphasis. Inquiries about environment and natural resource concentrations in agricultural business should be directed to the Department of Agricultural and Applied Economics.

Agricultural Business, Farm and Ranch Management Option, B.S.

Combine courses in farm and ranch management, finance and marketing with crop, range, veterinary and animal sciences to prepare for a career managing farms, ranches, or feedlots.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

- First-Year Seminar Credits: 3 (FYS)
- Human Culture Credits: 6 ⁴ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Statistics Credits: 4
- Computers Credits: 3 ⁶
- Electives Credits: 29

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing: 9 Hours

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

- Communication II (COM2)

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

OR

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

Quantitative (Q): 7 Hours

(Required for Major)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

Science (PN):

³Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- One additional PN course Credits: 3

Agricultural Economics: 28 Hours

24 credits in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

- 12 hours AGEC electives

Supporting Agriculture: 12 Hours

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- 8 AG College hours other than Agricultural Economics

Supporting Economics: 6 Hours

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Business: 3 Hours

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

Total Hours: 120

² Recommend or equivalent COM1 course.

⁴ H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended.

⁶ COSC 1200 recommended, or IMGT 2400.

Agricultural Business, Livestock Business Management Option, B.S.

Build skills to work in any sector of the livestock and meat industry, from input suppliers to meat processing, by combining courses in farm and ranch management, finance and marketing, with animal, range and food science, biology, and data analysis.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

- First-Year Seminar Credits: 3 ² (FYS)
- Human Culture Credits: 6 ³ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Electives Credits: 3-4

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing - Communication: 9 Hours

²Must earn a "C" or better.

- COM1 ²
- COM2 ²

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

OR

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

Quantitative (Q): 7 Hours

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

Science (PN): 8 Hours

³PN and H may not be fulfilled by AGEC or ECON courses.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Agricultural Economics: 31 Hours

⁴31 credits in Ag Econ beyond those earned to satisfy University Studies requirements; 21 of these 31 credit hours must be earned at the 3000-4000 level.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

OR

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction;

branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or equivalent.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

OR

AGEC4280 - International Food and Farm Cultures

Credits: 3

Study-tour course in western France of lectures, fieldtrips, and other cultural activities are integrated into a curriculum to study sustainable food cultures and farming systems. Students live with host families and learn about current policies, belief systems and cultural practices that guide food production, consumption and marketing in Europe.

USP 2003-2014 Code U3G

Prerequisite: completion of WA/COM1 and I/FYS.

OR

ECON4720 - International Trade

Credits: 3

The gains from specialization and trade are studied, as are explanations of trade patterns among countries, policies affecting trade such as tariffs, quotas, tax breaks, subsidies, cartels and price stabilization plans. Topics on labor migration and multinational corporations are covered.

When Offered (Normally offered fall semester)

Prerequisite: ECON 3020 and Junior class standing.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

Additional Quantitative Skills: 10 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

OR

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

OR

- AGRI 1010 ⁶

AGEC4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 4230

Dual Listed AGEC 5230

When Offered (Normally offered spring semester)

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

OR

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

OR

- IMGT2400 - Introduction to Information Management Credits: 3

OR

MATH2355 - Mathematical Applications for Business

Credits: 4

Primarily for students in the College of Business. Includes the mathematics of finance; systems of linear equations and matrices; linear programming; sets, counting, and probability. Students will learn to use Excel spreadsheets to solve business application problems in a computer lab that meets one day per week.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

OR

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

OR

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

Biology of Livestock: 17 Hours

- LIFE 2020

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3

Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3

Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

Additional Biology of Livestock

For Animal Science minor: 19 Hours

⁷Must earn a "C" or better in all courses required in the minor to earn the minor.

ANSC2010 - Domestic Animal Metabolism

Credits: 3

Integrates cellular and whole-animal metabolism through introduction to metabolic regulation. Introduces students to the nomenclature, structures and functions of cellular metabolites and vitamins. Knowledge of chemical structure will be applied to cellular reactions in various tissues of domestic animals. Ruminants and non-ruminants will be contrasted.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

OR

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

OR

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

OR

ANSC4240 - Advanced Swine Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in swine production management schemes. Consists of two hours of lecture and two hours of lab, with at least one-half of labs meeting at Animal Science Livestock Center.

Former Course Number [3330]

Prerequisite: ANSC 3100, ANSC 4120, or ANSC 4540.

For Non-minor: 20 Hours

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC4050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 5050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

OR

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

Supporting Economics: 3 Hours

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Total: 120 Hours

²Must earn a "C" or better.

⁵AGEC 4840 may not be double-counted towards both Agricultural Economics and Quantitative Skills.

⁶Suggest COSC 1200 for most, or IMGT 2400 (for advanced users).

⁷Must earn a "C" or better in all courses required in the minor to earn the minor.

Agricultural Communications, B.S.

Courses in agriculture, communications, and journalism prepare students for careers as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio, television, and commercial businesses.

Minimum Requirements

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Communications/Journalism Core: 36 Hours

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

AND

3 hours COJO/COMM Elective - ANY LEVEL

AND

12 hours COJO Electives - UPPER DIVISION

Agriculture Core Requirements: 36 Hours

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 12 hours must be upper division (Ag 3000-4000) elective courses and include

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB
USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FDSC1410 - Scientific Study of Food

Credits: 3

Scientific Study of Food is an introductory course in the science of food, which includes selection, preparation, to meet physical, psychological, and social needs. This course fulfills the Physical and Natural World USP.

When Offered (Normally offered fall semester)
USP 2003-2014 Code PN

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)
OR

ANSC2020 - Feeds and Feeding

Credits: 4
Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3
Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)
OR

PLNT2200 - Field Crop Production

Credits: 3
Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment
OR

REWM2000 - Principles of Rangeland Management

Credits: 3
Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

AND

12 hours of UPPER DIVISION Electives from AECL, AGECL, AGRI, ANSC, ENTO, FCSC, FDSC, MICR, MOLB, PATB, PLNT, REWM, SOIL

AGRI4975 - Agricultural Communications Senior Project

Credits: 1
A baccalaureate degree capstone experience incorporating self assessments of student learning, reflective writings, and an analysis, synthesis and evaluation of the agricultural communications curriculum. Students develop and present a

personalized, comprehensive, professional portfolio.

Prerequisite: agricultural communication major with senior standing and WB.

Supporting Course Requirement: 4 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Additional Hours for Major and Electives: 14 Hours

8 hours of General Electives ANY DIVISION

6 hours of General Electives UPPER DIVISION

Total Hours: 120

Additional Requirements

Agricultural communication majors will also complete an internship in their field. A variety of opportunities are available, and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Students wishing to pursue an area of emphasis in the agricultural communications option are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work.

Minor

Agricultural Business Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and

inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)
Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.
OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)
Prerequisite: AGEC 1020 and MATH 1400.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

- 6 additional hours in upper-level agricultural economics courses;
- 6 hours in supporting agriculture courses.

Applied Economics Minor

Graduate standing.

Committee selection for the student's major thesis or dissertation committee should include at least one faculty member from AGECE.

Courses Required

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020, AGECE 2020 and MATH 1400.

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

- 6 additional credits of approved courses.

Farm and Ranch Management Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

AGEC3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed INST 3860.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3G

USP 2015 Code U5H

Former Course Number [4860]

Prerequisite: AGEC 1010/ECON 1010 or AGEC 1020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

- 6 additional hours in upper-level agricultural economics courses;
- 3 hours in foreign culture or language;
- 6 hours in supporting agriculture courses.

Natural Resource Economics Minor

Courses Required

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

Choose 9 Additional Hours From:

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP 2015 Code U5H

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4520 - Public Economics

Credits: 3

Studies the role of government within a market economy. The focus is on how governments fund and provide non-market goods demanded by society, e. g. , health care, military, education. Examines public goods, taxation, environmental challenges, affects on economic growth and stability, benefit-cost analysis, and state/local finance.

Prerequisite: ECON 3010, ECON 3020.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication,

management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

Graduate

Agricultural Economics, M.S.

Degree Requirements

The following courses constitute the M.S. in Agricultural Economics core requirements and are required of all Plan A candidates (22 hours).

Economic Theory

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

Quantitative Methods

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

Research

AGEC5650 - Communicating Research

Credits: 3

Focuses on the broad methods, and written and oral communication of research in applied economics. Topics include formulating a research question, organizing a manuscript, editing for clarity and conciseness, building effective figures and tables, finding and citing literature, developing and delivering effective presentations, and upholding research ethics.

Prerequisite: graduate standing.

AGEC5880 - Advanced Seminar

Credits: 1-2
Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGECE and/or ECON.

Plan A (Thesis):

Minimum of 30 credit hours including AGECE M.S. core requirements, thesis hours and electives.

No more than three hours of AGECE coursework numbered below 5000-level count toward the 30 hour requirement.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student, and the department head determine the final program of study and thesis research topic.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Plan B (Non-thesis):

Minimum of 32 hours of coursework;

Non-thesis business analysis paper accepted by the student's graduate committee.

Minimum of 13 credit hours of agricultural economics coursework numbered at the 5000-level are required, including:

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5880 - Advanced Seminar

Credits: 1-2
Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGECE and/or ECON.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3
An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.
OR

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3
Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3
Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.
OR

AGEC5230 - Intermediate Econometric Theory

Credits: 3
Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy

variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

In Addition:

Students are required to complete 3 credit hours from each of the following three areas:

Management:

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

OR

- AGEC 5460

OR

- MGT 4410
- MGT 4420
- MGT 4440

MGT4470 - Negotiations and Conflict Resolution

Credits: 3

Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

OR

- MGT 4520

Marketing:

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

OR

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

OR

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4430 - Marketing Management

Credits: 3

Analysis of policy-making and operating decisions of the marketing manager and the tools available to aid in solving marketing problems.

Prerequisite: MKT 2100, MGT 2100, STAT 2050 or equivalent.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

OR

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 2100 and junior class standing.

Finance:

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

OR

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

- FIN 4520
- FIN 4610

FIN4810 - Real Estate Investment

Credits: 3

Covers advance real estate investment topics such as investments risk and valuation sensitivity analysis, futures and real options, liquid real estate investments, analysis of development projects, and commercial mortgage backed securities. While the theory the topics will be presented, the course focus is on the application of the material.

Prerequisite: FIN 2100 and advanced business standing

OR

ECON4740 - International Economics and Policy

Credits: 3

The focus is on foreign exchange markets, balance of payments analysis and effects of international trade and capital flows on the domestic economy. Policies to correct payment deficits, gold, international liquidity and international financial institutions are studied.

Prerequisite: ECON 3010 and ECON 3020; QA.

Remaining Credit Hours

Remaining credit hours will be filled with electives.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic.

Presentation of the business analysis paper at a formal public seminar.

An internship experience is strongly encouraged as part of the agricultural business option (AGEC 5990).

Agricultural Economics/Environment and Natural Resources, M.S.

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 15 credit hours in environment and natural resources, as approved by the student's committee and the ENR academic adviser.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the area of environment and natural resources.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Agricultural Economics/Water Resources, M.S.

The objective of this program is to provide students with specialized study in water resources and to signify this specialization by the designation of the water resources interdisciplinary major on the transcript.

Coursework and Thesis

Students must complete the 24 credit hour agricultural and applied economics including M.S. core requirements plus 4 thesis hours and 9 credit hours in water resources approved courses.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The candidate's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and thesis research topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the graduate committee.

Oral Exam Requirement

In addition to coursework and a Plan A Thesis, students must pass a final oral examination. The student's committee may also require a written examination.

Interdisciplinary Component

nine hours (see Water Resources degree requirements)

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 10 credit hours in water resources approved courses.

Please refer to Water Resources Degree program in this *Catalog* for updated degree requirements.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Department of Animal Science

Animal Science/Molecular Biology Bldg., Rm 101

(307) 766-2224

FAX: (307) 766-2355

Web site: uwyo.edu/anisci

Department Head: Bledar Bisha

Professors:

BRENDA M. ALEXANDER, B.S. University of Wyoming 1986; M.S. 1988; Ph.D. 1999; Professor of Animal Science 2019, 2006.

SCOTT L. LAKE, B.S. University of Nevada 1998; M.S. 2001; Ph.D. University of Wyoming 2005; Professor of Animal Science 2021, 2014, 2008. Extension Livestock Specialist. Director of Laramie R&E Center.

JAMES K. PRU, B.S. 1991 and M.S. 1993 Zoology and Physiology, University of Wyoming; Ph.D. Molecular Reproductive Biology University of Wyoming 2000; Professor and Rochelle Chair of Animal Science 2021.

Associate Professors:

BLEDAR BISHA, D.V.M. Agricultural University of Tirana-Albania 1999; M.S. Iowa State University 2004; Ph.D. 2009; Associate Professor of Animal Science 2019, 2013.

PAUL A. LUDDEN, B.S. University of Nebraska-Lincoln 1991; M.S. Purdue University 1994; Ph.D. University of Missouri-Columbia 1997; Associate Professor of Animal Science 2004, 1998.

WARRIE J. MEANS, B.S. Colorado State University 1979; M.S. 1982; Ph.D. 1985; Associate Professor of Animal Science 2002, 1992.

STEVEN I. PAISLEY, B.S. University of Wyoming 1993; M.S. 1995; Ph.D. Oklahoma State University 1998; Extension Beef Cattle Specialist; Associate Professor of Animal Science 2007, 2001. Director of SAREC R&E Center.

Assistant Professors:

JEREMY BLOCK, B.S. University of Missouri 1998; M.S. University of Florida 2003; Ph.D. 2007; Assistant Professor of Animal Science 2020.

HANNAH C. CUNNINGHAM-HOLLINGER, B.A. St. Olaf College 2012; M.S. University of Wyoming 2014; Ph.D. 2018; Assistant Professor of Animal Science 2019.

CODY GIFFORD, B.S. 2013, M.S. 2016; Ph.D. Colorado State University 2019; Assistant Professor of Animal Science 2019.

SHELBY ROSASCO, B.S. California State University 2012; M.S. New Mexico State University 2016; Ph.D. New Mexico State University 2020; Assistant Professor of Animal Science 2020.

WHIT STEWART, B.S. Brigham Young University-Idaho 2008; M.S. Oregon State University 2010; Ph.D. New Mexico State University 2015; Assistant Professor of Animal Science 2017.

Academic Professional Lecturers:

JENNIFER A. INGWERSON-NIEMANN, B.S. University of Nebraska-Lincoln 2005; M.S. Iowa State University 2014; Academic Professional Lecturer in Animal Science 2014.

McKENZIE K. PHILLIPS, B.S. University of Wyoming 2015; M.S. Texas A&M University 2017; Assistant Lecturer in Animal Science 2018.

Adjunct Professors:

Kristi Cammack, Jeff Chandler, Thomas Hansen, John Johnston, Tom McDonald, Peter Nathanielsz, Mark Nijland, Heywood Sawyer, Donal Skinner, D. Paul Thomas, Meijun Zhu

Professors Emeriti:

Ray Field, Bret Hess, Frank Hinds, Doug Hixon, Steven W. Horn, Conrad Kercher, Richard J. McCormick, Gary Moss, William Murdoch, Johannes Nel, Bibek Ray

The Department of Animal Science offers a variety of courses in animal and food science. The department uses modern laboratories and excellent animal facilities including a livestock teaching arena and a meat processing facility.

The Department of Animal Science and the Department of Veterinary Science have a combined curriculum, under Animal and Veterinary Science (ANVS). The curriculum has options in production, range livestock, business,

communication, animal biology, preveterinary medicine, meat science and food technology, and equine science. The curriculum leads to a wide variety of career opportunities for animal and veterinary science graduates.

B.S. in Animal and Veterinary Science

The Department of Animal Science and the Department of Veterinary Sciences have combined their efforts to offer several degree options leading to the bachelor of science degree in animal and veterinary science. Courses in animal science, food science, and pathobiology are the core offerings in the various options. Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered. Several degree options allow for specialization and graduate or professional school preparation. A brief description of each option and the educational opportunities they provide is given with the course requirements. A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, 3100, 4120, 4540, 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, 2022. Students are encouraged to participate in activities related to their degree option. The university has livestock, horse and meats judging teams. Each team travels and participates in at least one major exposition a year. Each year, the Academic Quadrathlon competition is held, combining practical and classroom skills for students. Field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Microbiology Club, Range Club, the Pre-vet Club, Wyoming Collegiate Cattlemens Association, and the Ranch Horse Team provide additional educational and recreational opportunities.

Production Option

This option provides a strong background in livestock production and management. Students interested in livestock production should enroll in this option.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, or 4250; FDSC 2040, 3060*; PATB 4110*

Agricultural Sciences.....

Required courses: AGEC 1020 (H), 2020; REWM 2000

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Range Livestock Option

This option emphasizes range livestock management. Students interested in the management of livestock and range resources should enroll in this option.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 2020, 3010*, 3100*, 4120*, 4150, 4220, and one course selected from ANSC 3150, 4230, or 4250; 4540*, 4630* (COM3); FDSC 2040, 3060*; PATB 4110*

Rangeland Ecology and Watershed Management.....

Required courses: REWM 2000, 2400, 4000, 4330; LIFE 3400

Agricultural Sciences.....

Required courses: AGECE 1020 (H), 2020

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Business Option

Students desiring a strong background in business in addition to the basic courses in animal and veterinary science should enroll in this option. Graduates will be qualified for careers in the livestock agribusiness industry.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, or 4250; FDSC 3060*; PATB 4110*

Agricultural Economics and Business.....

Required courses: AGECE 1010 (H), 1020 (H), 3860 or 4880; AGECE 4060 or MGT 3210; AGECE 4050 or MKT 3210; ACCT 2010

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Communication Option

Students in this option obtain a basic education in animal and veterinary science and also acquire in-depth communication skills. Students interested in careers in agriculture communications with emphasis on the livestock industry should enroll in this option.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses:

ANSC 1010, 2020, 3010*, 3100*, 4120*, 4540*, 4630* (COM3) and two courses selected from ANSC 3150, 4220, 4230, 4240, or 4250; FDSC 3060*; PATB 4110*

Communication.....

Required courses: COMM 2010* (COM2), plus 14 additional credit hours in COJO/COMM

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Animal Biology Option

This option within the major requires more complete and stringent basic sciences. Students may complete premedical requirements or other pre-professional allied health requirements while completing a B.S. degree that prepares them for alternate career choices. Selected courses provide opportunity for more complete exposure in both biological sciences and pathobiology. Possible alternatives to professional schools include graduate school admission or employment by government or industry in research, promotion or sales. Because of the variation in pre-professional requirements for different professional programs, students are encouraged to determine the specific requirements of the programs in which they are interested.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 3010*, 3100*, 4120*, 4630* (COM3); FDSC 3060*

Agricultural Sciences.....

Required courses: MICR/ MOLB 2021 or 2240; MOLB 3610; MOLB 4100 or MOLB 4600 and 4610

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1020 (PN), 1030 (PN), 2300 or CHEM 2420 and 2440; PHYS 1050 or PHYS 1110 and PHYS 1120; ZOO/PSYC 3600; MATH 1400 (Q) and 1405 (Q) or MATH 1450 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Meat Science and Food Technology Option

Students taking this option will have an excellent background for entering the meat industry. The food industry is the largest employer in this country and offers a wide variety of career opportunities.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 3010*, 3100*, 4050, 4630* (COM3); PATB 4110*

Food Science.....

Required courses: FDSC 1410, 2040, 3060*, 3062, 3063, 3720, 4090, 4100, 4900

Agricultural Sciences.....

Required courses: AGECE 1020 (H), AGECE 3860, MICR/MOLB 2021

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN); CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); Stat 2050 (Q) or 2070 (Q)

Suggested courses.....

FDSC 3061

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Pre-Veterinary Medicine Option

This option is especially designed to prepare students for application to colleges of veterinary medicine. There is a strong emphasis on the biological, biomedical and physical sciences. This curriculum is also appropriate for students wishing to pursue graduate school opportunities, other professional school applications, or careers in many areas of agribusiness. A minimum of three years of formal course work is required before one can apply to a college of veterinary medicine. Students accepted before completion of their B.S. degree can transfer credits back to UW to complete their degree requirements. Wyoming does not have a college of veterinary medicine. Faculty advisers insure that students meet the variable preveterinary requirements for application to colleges of veterinary medicine in their home state or region.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 3010*, 3100*, 4120*; one course selected from ANSC 3150, 4220, 4230, or 4250; ANSC 4630* (COM3) or PATB 4130* (COM3); PATB 4110*, 4500, 4710, PATB/MOLB 4400

Agricultural Sciences.....

Required courses: MICR/MOLB 2021, MICR/PATB 2220; MOLB 3610

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1020 (PN), 1030 (PN), 2420, 2440; PHYS 1110, 1120; MATH 1400 (Q) and 1405 (Q) or MATH 1450 (Q); STAT 2050 (Q) or 2070 (Q)

Suggested courses.....

ANSC 4050, 4132, 4150, 4260, 4540; FDSC 3060; PATB 4001, 4130, 4170, 4360; ANSC/PATB 4111

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Equine Science Option

This option provides a strong background in equine production and management. Students interested in equine should enroll in this option.

University Studies Program.....

Courses with 2015 University Studies Program designations of FYS, COM1, COM2, COM3, Q, PN (2 courses), H (2 courses), and V are required. Note that some USP requirements may be satisfied upon completion of required courses as denoted below.

Animal and Veterinary Science.....

Required courses: ANSC 1010, 1030, 3010*, 3100*, 3150*, 3250, 4120, 4132, 4250*, 4540*, 4630* (COM3); ANSC/ PATB 4111*; FDSC 3060*

Agricultural Sciences.....

Required courses: AGECE 2020; REWM 2000

Other math/science courses.....

Required courses: LIFE 1010* (PN), 2022* (PN), 3050; CHEM 1000 (PN), ANSC 2010 or CHEM 2300, MATH 1400 (Q); STAT 2050 (Q) or 2070 (Q)

Required credits 128**

*A grade of C or better must be earned in these courses for successful completion of degree. **Required credits: 128 total credit hours, 42 credit hours or more at the 3000-level or above.

Agriculture Education with Concentration in Animal and Veterinary Science

This program consists of 128 total hours. Minimum 2.750 cumulative GPA and minimum 2.500 content GPA required. This major will be advised in the College of Education with a secondary adviser in Animal Science. Refer to the College of Education for specific curriculum requirements.

Undergraduate Minors

The Departments of Animal Science and Veterinary Sciences offers two minors: a minor in animal and veterinary science for non-majors and a minor in Equine Science.

Animal and Veterinary Science Minor

The courses required for this minor must be taken for a letter grade and the student must receive a grade of C or better in each course. Courses required are: ANSC 3010, 3100, 4120, 4540; FDSC 3060; PATB 4110 and at least one of the following: ANSC 3150, 4220 or 4230. The Department of Animal Science may be contacted by students needing assistance or having questions.

Equine Science Minor

The courses required for this minor must be taken for a letter grade and the student must receive a grade of C or better in each course. Courses required are: ANSC 1030, 3150, 3250, ANSC/PATB 4111 (12 credit hours), and a minimum of 3 courses (minimum of 8 credits) chosen from ANSC 2020, 3555, 3560 (max 3 credits allowed), 4132, 4250. The Department of Animal Science may be contacted by students needing assistance or having questions.

Graduate Study

The Departments of Animal Science and Veterinary Science offer programs leading to the M.S. (Plan A and Plan B) and Ph.D. degrees in animal and veterinary science. A M.S. degree in food science and human nutrition is offered in cooperation with the Department of Family and Consumer Sciences. The Department of Animal Science also participates in the interdisciplinary M.S./Ph.D. The Department of Animal Science also participates in the interdisciplinary M.S./Ph.D. Biomedical Science. Program.

Program Specific Degree Requirements

Master's Program - Plan A (thesis)

The student, major professor, and graduate committee determine the program of study and research project, which meets the needs of the individual student. The candidate's graduate committee should be established and functioning by the time the student has completed 12 semester hours of formal coursework. The master of science program should be approved and filed by the end of the student's second semester of graduate study in animal science. This committee shall also determine if the student is making satisfactory progress to be advanced to a candidate for a master's degree or continued in a doctoral program by the end of the student's third semester following matriculation. The student can specialize in breeding, food science and human nutrition, nutrition, physiology, meat science, reproduction or wool for coursework and thesis/dissertation project. In addition, supporting coursework is available in agricultural economics, biochemistry, microbiology, range management, genetics, statistics, and other areas of interest to the individual. In certain cases it is possible to develop a joint research project between animal science and another department. Students may use the research facilities and herds of beef cattle, sheep, and swine at the university livestock center near the university or at one of the university research and extension centers in the state. Research laboratories are located on campus and include a modern meat processing facility. The Thesis program is a 30 hour program, 26 hours of coursework and 4 hours of thesis research.

Master's Program - Plan B (non-thesis)

The Non-thesis program requires a coursework-intensive, non-thesis master of science program for those students whose career paths may not require a thesis research program. The program requires 32 hours of coursework in addition to an acceptable non-thesis research paper as defined by the student's graduate committee.

Doctoral Program

The program requires 72 hours. Students must follow minimum graduate requirements.

Food Science

Food science is the application of basic sciences to the processing, quality control, storage, distribution and consumer use of food products. The microbiological, chemical and physical characteristics of foods as related to food processing and product quality are studied. Major emphasis is placed in the area of animal food products.

Major

Animal and Veterinary Science, B.S.

The Depts of Animal Science and Veterinary Sciences jointly offer the B.S. degree in Animal and Veterinary Science. Courses in animal science, food science, and pathobiology form eight degree options tailored to the student's interests/career goals.

Options

- Animal and Veterinary Science, Production Option, B.S.
- Animal and Veterinary Science, Range Livestock Option, B.S.
- Animal and Veterinary Science, Business Option, B.S.
- Animal and Veterinary Science, Communication Option, B.S.
- Animal and Veterinary Science, Animal Biology Option, B.S.
- Animal and Veterinary Science, Meat Science and Food Technology Option, B.S.
- Animal and Veterinary Science, Pre-Veterinary Medicine Option, B.S.
- Animal and Veterinary Science, Equine Science Option, B.S.

Additional Information

Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine or graduate school, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered.

A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, ANSC 3100, ANSC 4120, ANSC 4540, ANSC 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, LIFE 2022.

Students are encouraged to participate in activities related to their degree option. The university has competitive livestock, horse, wool, and meat judging teams that travel to and participate in at least one major exposition a year. Laboratories and field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Pre-vet Club, Wyoming Collegiate Cattlemen's Association, Microbiology Club, Range Club, and the Ranch Horse Team provide additional educational and recreational opportunities.

Minor

Animal and Veterinary Science, Animal and Veterinary Science Minor

This minor provides a foundational background in animal and veterinary science for students interested in livestock and equine production, but with a primary degree program outside of ANVS.

Courses Required:

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of

farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3

Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

At Least One of the Following:

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

Animal and Veterinary Science, Equine Science Minor

This minor provides a foundational background in equine science and its application to equine production and management for students interested in the horse industry, but with a primary degree program outside of Equine Science.

Core Courses

12 total credit hours

ANSC1030 - Equine Management

Credits: 3

An overview of the horse industry and proper way to manage horses.

When Offered (Normally offered spring semester)

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3250 - Equine Behavior and Welfare

Credits: 3

To familiarize students with an equine interest about behavior, learning, and welfare issues associated with management and training of equine.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 4111.

Dual Listed ANSC 5111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

OR

PATB4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed ANSC 4111

Dual Listed PATB 5111

Prerequisite: ANSC 1030

Electives

Must choose 3 courses minimum (minimum of 8 credits) - 8 to 10 total credit hours

*Maximum of 3 credits allowed in ANSC 3560

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC3555 - Equine Evaluation and Selection

Credits: 3

Objectively evaluate equine for performance and breeding purposes according to breed standards and or discipline. Emphasis will be placed on learning how conformation relates to overall function and longevity of equine. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills.

Prerequisite: ANSC 1010 and ANSC 1030.

ANSC3560 - Advanced Equine Evaluation and Selection

Credits: 1-2

Max Credit (Max. 3)

Objectively evaluate equine for halter and performance according to breed standards and or discipline. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills. Students will compete as members of the Collegiate Horse Judging Team and represent University of Wyoming at national horse judging competitions.

Prerequisite: ANSC 3555.

ANSC4132 - Equine Reproduction

Credits: 2

Introduces methods of manipulating reproduction within equine management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, parturition, embryo transfer, and control and prevention of equine reproductive diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120 and ANSC 1030

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

Graduate

Animal and Veterinary Science, M.S.

Both Plan A (Thesis) and Plan B (Non-thesis) options are available.

Plan A (Thesis)

The student, major professor, and graduate committee determine the program of study and research project, which meets the needs of the individual student. The candidate's graduate committee should be established and functioning by the time the student has completed 12 semester hours of formal coursework. The master of science program should be approved and filed by the end of the student's second semester of graduate study in animal science. This committee shall also determine if the student is making satisfactory progress to be advanced to a candidate for a master's degree or continued in a doctoral program by the end of the student's third semester following matriculation.

The student can specialize in breeding, food science and human nutrition, nutrition, physiology, meat science, reproduction or wool for coursework and thesis/dissertation project. In addition, supporting coursework is available in agricultural economics, biochemistry, microbiology, range management, genetics, statistics, and other areas of interest to the individual. In certain cases it is possible to develop a joint research project between animal science and another department.

Students may use the research facilities and herds of beef cattle, sheep, and swine at the university livestock center near the university or at one of the university research and extension centers in the state. Research laboratories are located on campus and include a modern meat processing facility.

The Thesis program is a 30 hour program, 26 hours of coursework and 4 hours of thesis research.

Plan B (Non-thesis)

The Non-thesis program requires a coursework-intensive, non-thesis master of science program for those students whose career paths may not require a thesis research program.

The program requires 32 hours of coursework in addition to an acceptable non-thesis research paper as defined by the student's graduate committee.

Options

Program Specific Degree Requirements

A minimum of 30 credit hours including 4 thesis hours must be earned in 4000-5999 level courses.

The program of study is arranged with the student's graduate committee.

Animal and Veterinary Science, Ph.D.

A 72 hour program.

Students must meet the university minimum requirements.

Department Head: Scott N. Miller

Professors:

JEFFREY L. BECK, B.S. Brigham Young University 1993; M.S. 1996; Ph.D. University of Idaho 2003; Professor of Rangeland Ecology and Watershed Management 2018, 2007.

THIJS KELLEENERS, B.S. Wageningen University, The Netherlands 1988; M.S. 1993; Ph.D. 2001. Professor of Soil Science 2018, 2012.

SCOTT N. MILLER, B.S. Brown University 1991; M.S. University of Arizona 1995; Ph.D. 2002; Professor of Rangeland Ecology and Watershed Management 2017, 2002.

VIRGINIA B. PAIGE, B.A. Colorado College 1984; M.S. University of Massachusetts 1992; Ph.D. University of Arizona 2000; Professor Rangeland Ecology and Watershed Management 2019, 2004.

SCOTT R. SHAW, B.S. Michigan State University 1977; M.S. University of Maryland 1981; Ph.D. 1984; Professor of Entomology 1998, 1989.

PETER D. STAHL, B.S. Oklahoma State University 1978; M.S. University of Wyoming 1982; Ph.D. 1989; Professor of Restoration Ecology 2009, 2000; Director, Wyoming Reclamation and Restoration Center.

TIMOTHY R. COLLIER, B.S. University of California-Riverside 1987; Ph.D. University of California-Santa Barbara 1994; Associate Professor of Entomology 2008, 2002.

KRISTINA HUFFORD, B.A. University of California-Berkeley 1993; Ph.D. University of Georgia 2001; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MELANIE MURPHY, B.S. University of Idaho 1998; M.S. 2001; Ph.D. Washington State University 2008; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MENGQIANG ZHU, B.E. North China Electric Power University 2002; M.S. Chinese Academy of Sciences 2005; Ph.D. University of Delaware 2010; Associate Professor of Soil and Environmental Biogeochemistry 2019, 2013.

Associate Professors:

DAVID CHRISTIANSON, B.S. Montana State University 2003; Ph.D. 2008; Assistant Professor of Rangeland Ecology and Watershed Management 2019.

TIMOTHY R. COLLIER, B.S. University of California-Riverside 1987; Ph.D. University of California-Santa Barbara 1994; Associate Professor of Entomology 2008, 2002.

KRISTINA HUFFORD, B.A. University of California-Berkeley 1993; Ph.D. University of Georgia 2001; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

MELANIE MURPHY, B.S. University of Idaho 1998; M.S. 2001; Ph.D. Washington State University 2008; Associate Professor of Rangeland Ecology and Watershed Management 2017, 2010.

J. DEREK SCASTA, B.S. Texas A&M University 2004; M.S. 2008; Ph.D. Oklahoma State University 2014; Assistant Professor of Rangeland Ecology and Watershed Management 2014.

LINDA VAN DIEPEN, B.S. Hogeschool IJsselland, Deventer 1999; M.S. Wageningen University 2002; Ph.D. Michigan Technological University 2008; Assistant Professor of Soil Microbiology 2015.

KAREN L. VAUGHAN, B.S. University of Delaware-Newark 2001; M.S. University of Maryland-College Park 2004; Ph.D. University of Idaho-Moscow 2008; Assistant Professor of Pedology 2015.

MENGQIANG ZHU, B.E. North China Electric Power University 2002; M.S. Chinese Academy of Sciences 2005; Ph.D. University of Delaware 2010; Associate Professor of Soil and Environmental Biogeochemistry 2019, 2013.

Assistant Professors:

FABIAN NIPPGEN, M.S. Albert-Ludwigs University 2007; Ph.D. Montana State University 2014; Assistant Professor of Rangeland Ecology and Watershed Management 2017.

KEVIN WILCOX, B.S. Central Washington University 2008; Ph.D. Colorado State University 2015; Assistant Professor of Rangeland Ecology and Watershed Management 2018.

Academic Professionals:

SCOTT SCHELL, B.S. University of Wyoming 1991; M.S. 1994; Senior Extension Entomologist 2005, Associate Research Scientist 2009.

Adjunct Professors:

Justin Derner, Jack Morgan, Brenda Schladweiler, Gerald Schuman, Nancy Shaw, Ramesh Sivanpillai

Professors Emeriti:

Ann Hild, Alexandre Latchininsky, David Legg, Larry Munn, Richard Olson, Katta Reddy, J. Daniel Rodgers, Quentin Skinner, Michael Smith, Peter Stahl, John A. Tanaka, George Vance, James Waggoner, James Wangberg, Thomas Wesche, Stephen Williams

Degrees Offered

Major

- Rangeland Ecology and Watershed Management, B.S.

Minor

- Forest Resources Minor
- Insect Biology Minor
- Rangeland Ecology and Watershed Management Minor
- Reclamation and Restoration Ecology Minor
- Soil Science Minor

Graduate

- Ecosystem Science and Management/Applied Economics, Ph.D.
- Entomology, M.S.
- Entomology, Ph.D.
- Insect Biology/Entomology Graduate Study Minor
- Rangeland Ecology and Watershed Management, M.S.
- Rangeland Ecology and Watershed Management, Ph.D.
- Soil Science, M.S.
- Soil Science, Ph.D.

Certificate

- Reclamation/Restoration Ecology Graduate Certificate

Undergraduate Study

The Department of Ecosystem Science and Management offers a Bachelor of Science degree in Rangeland Ecology and Watershed Management. This degree can also be obtained as an affiliate degree in conjunction with the School of Environment and Natural Resources. Five minor degree programs are offered through the department: Insect Biology,

Rangeland Ecology and Watershed Management, Soil Science, Forest Resources, and Reclamation and Restoration Ecology. Obtaining a minor to complement a B.S. major degree program provides credentials and knowledge that can expand career opportunities.

The degree programs reflect the department's diverse expertise in natural resource and agriculture sciences. Students completing degrees offered through the department are well prepared for careers in natural resource management and sustainable agriculture (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, biocontrol/ integrated pest management, soil science and various types of environmental consulting) or other science careers.

Student Learning Outcomes

The goal of the Department of Ecosystem Science and Management is to provide students with comprehensive knowledge in several different areas in addition to their specific area of study. These expectations ensure that students may take these learned skills and successfully apply them in their post-graduate endeavors. Assessments in all areas are based on knowledge, skills, and attitude.

These areas include:

Oral communication encompasses all the abilities necessary for effective expression and sharing of information, ideas, and feelings in a format including verbal and nonverbal symbols.

Proficiency in written communication will ensure that students will be able to write for different audiences, from expressive writing to technical writing, using a range of sophistication in language.

Professional behavior involves attaining high standards of behavior and appropriate attitudes, not only through acquiring knowledge and experience but a lifelong commitment to learning and achievement.

Competency in critical thinking and problem-solving will enable students to engage in reasonable, reflective thinking focused on deciding what to believe or do.

Computer and information literacy ensures that students will be viewed as trainable and adaptable in a computerized work environment. Proficiency in this area also enables students to effectively access online information, and skillfully make use of it.

The results in these different areas will aid the department in:

- Planning instructional strategies to address student strengths and weaknesses;
- Evaluating and describing overall student achievement;
- Counseling students for academic and career options; and
- Evaluating the effectiveness of instructional programs.

Graduate Study

The Department of Ecosystem Science and Management is an interdisciplinary department made up of five disciplinary areas: entomology, rangeland ecology, soil sciences, agroecology, and watershed management. The department offers master of science and doctor of philosophy degrees in entomology, rangeland ecology and watershed management, and soil science. A water resources dual major may be obtained in conjunction with each of these master's degrees. For the rangeland ecology and watershed management degrees, thesis and dissertation problems may be developed in aspects of range ecology, wildlife habitat, reclamation of disturbed lands, watershed management, utilization and improvement of rangelands, and many other facets of range and forest ecology management. For the entomology degrees, thesis and dissertation problems may be developed in many areas of basic and applied aspects of insect ecology. For soil degrees, thesis and dissertation problems may be developed in many basic and applied aspects of soil science. The degree

programs reflect the department's diverse expertise in natural resource and agriculture sciences. Students completing degrees offered through the department are well prepared for careers in natural resource management and sustainable agriculture (e.g., range management, watershed management, restoration ecology/reclamation of degraded land, wildlife habitat management, biocontrol/integrated pest management, soil science, and various types of environmental consulting) or other science careers. A graduate certificate in reclamation and restoration ecology may be obtained after completion of a B.S. degree or in conjunction with an M.S. or Ph.D. degree.

Program Specific Admission Requirements

Admission is contingent upon a faculty member being willing to assume responsibility for working with the student as an adviser.

Applicants are encouraged to initiate correspondence with faculty who share similar research interests as part of the process of securing faculty advising commitment.

In special circumstances, and with the faculty adviser's support, a student may be admitted in a provisional status with continued enrollment dependent upon meeting performance requirements specified at the time of admission.

Program Specific Graduate Assistantship Information

Current graduate assistantship availability, subject of study, and remuneration can be determined by checking: www.uwyo.edu/esm. Prospective students are also encouraged to directly correspond about future opportunities for graduate assistantships with faculty that share similar research interests.

Courses of instruction in the department are offered in entomology, rangeland ecology and watershed management, renewable resources, and soil science.

Environment and Natural Resources Affiliate Degrees

The Bachelor of Science degree in Rangeland Ecology and Watershed Management offered through the Ecosystem Science and Management Department may also be obtained as an affiliate degree with the School of Environment and Natural Resources (i.e., the degree titles would be Environment and Natural Resources/Rangeland Ecology and Watershed Management). The additional coursework requirements necessary for obtaining an affiliate degree are described in the School of Environment and Natural Resources section of this publication.

Program Director: Scott N. Miller

M.A. or M.S. in (Program Name)/Water Resources

Academic departments across the university cooperate to provide master of arts or master of science degree programs that contain multidisciplinary training in water resources. The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

The educational underpinnings of this program include the following: The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates. Training is to be consistent with the rigor of professional water resources demands. The interdisciplinary major program is flexible so as to meet the candidates' individual professional objectives.

Primary responsibility for student guidance and graduate program formulation resides with the sponsoring department and sponsoring major professor. Please refer to latest updated information on the website listed above. Upon acceptance to the program, the sponsoring department must assign a member of the Water Resources Curriculum Committee to the candidate's graduate committee. The Water Resources Curriculum Committee's representatives on the candidate's graduate committee shall aid in formulating deficiency requirements, course program design, academic performance criteria, and research objectives throughout the candidate's tenure in the program.

Program Specific Admission Requirements

University application and fee; Application fee is valid for three years; Official documentation indicating bachelor's degree earned (not necessary if UW is the most recent institution attended); Potential candidates are encouraged to apply for admission to this program by contacting the participating department and by specifying at the initiation that they desire admission to the water resources interdisciplinary major. Their credentials will be evaluated by the sponsoring department and the department recommends admission of the individual into the program to the UW Admissions office.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate-level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To ensure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

WARE Degree Programs

Majors

- Agricultural Economics/Water Resources, M.S. (Department of Agricultural and Applied Economics)
- Civil Engineering/Water Resources, M.S. (Department of Civil and Architectural Engineering)
- Entomology/Water Resources, M.S. (Department of Ecosystem Science & Management)
- Geology/Water Resources, M.S. (Department of Geology and Geophysics)
- Geophysics/Water Resources, M.S. (Department of Geology and Geophysics)
- Rangeland Ecology and Watershed Management/Water Resources, M.S. (Department of Ecosystem Science & Management)
- Soil Science/Water Resources, M.S. (Department of Ecosystem Science & Management)
- Water Resources, M.A.
- Water Resources, M.S.

Additional Interdisciplinary Degree Programs

- Ecology, Ph.D. (Program in Ecology, PiE)
- Hydrologic Sciences, Ph.D. (WRESE)

Major

Rangeland Ecology and Watershed Management, B.S.

Rangeland Ecology and Watershed Management provides you with knowledge, skills, and abilities to understand and manage wildlands. You will explore rangeland ecology, watershed management, soil science, and a diversity of landscapes.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Course Requirements

- First-Year Seminar Credits: 3
- US and WY Government Credits: 3
- Electives Credits: 28-29

REWM Courses: 37 Hours

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Prerequisite: LIFE 2022 or LIFE 2023.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

Resource Management: 14-15 Hours

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGECE 1020 or equivalent.

Choose One From

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

- BOT 4111 *
- BOT 3150 *

Physical and Natural World: 8 Hours

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

Biological Sciences: 7 Hours

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Communication Skills: 6 Hours

Quantitative Reasoning: 7 Hours

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Human Culture: 6 Hours

- Human Culture

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Total Hours: 120

*Course must be completed with a C or better.

Minor

Forest Resources Minor

In Forest Resources, you will develop a working knowledge of the processes that influence forest ecology, sustainability, and provision of the key products derived from forests.

Minimum Requirements: 20 Hours

RNEW2100 - Forest Management

Credits: 3

Principles of forest management. Topics include the laws affecting forest management, methods of harvesting wood from forests, fire and insect management, the effects of disturbances on stream flow and nutrient cycling, and the challenges of developing management plans for forests.

Cross Listed ENR 2100.

Prerequisite: LIFE 1101 or LIFE 1010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence

plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

RNEW4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed BOT 4775.

Prerequisite: LIFE 3400.

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

Choose One From

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

- GEOG 4420

Choose One From

REWM4103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of public and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Students prepare public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 5103.

When Offered (Normally offered spring semester)

Former Course Number [3103]

Prerequisite: C or better in REWM 2000 and CS course.

Choose One From

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations.

Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

RNEW3000 - Tropical Ecology

Credits: 3

Examines the characteristics of tropical ecosystems, how they evolved, their value to humans, their present status, and current issues relating to biodiversity, deforestation, extinction, and conservation.

Prerequisite: LIFE 1101 or LIFE 1010.

GEOG4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG/GEOL 4470/5470

Former Course Number [G&R 4470]

Prerequisite: Some basic knowledge of Earth processes GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

Insect Biology Minor

In Insect Biology, you will learn in-depth information about insects including their basic biology, ecology, and evolution.

Minimum Requirements: 13 Hours

Choose One From

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

OR

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Choose From

Then choose from the list below to meet the minimum 13 credit hour requirement.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

ENTO4686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO4687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders, diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 5687.

Prerequisite: ENTO 4684 required; ENTO 4670, ENTO 4682 recommended.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

Insect Biology/Entomology Graduate Study Minor

This minor is designed to complement a related graduate degree with an understanding of insect biology and entomology. Understanding the biology, ecology and classification of insects is crucial to understanding the widespread effects they have on agriculture, human health, and ecosystems.

Rangeland Ecology and Watershed Management Minor

Rangeland Ecology and Watershed Management provides you with an introduction to knowledge, skills and abilities to understand and manage wildlands. You will explore rangeland ecology, watershed management, soil science and a diversity of landscapes.

Required Courses

The required courses for the minor are:

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN
Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

- REWM 2500 Credits: 2

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

- 6 hrs. selected from other REWM upper-division (3000 or 4000 level) courses.

Additional Requirements

The number of hours required is 22.

Reclamation and Restoration Ecology Minor

This program covers the use of basic and applied ecological concepts to rehabilitate and restore processes and functions to disturbed ecosystems.

Required Courses: 14 Hours

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

REWM4990 - Undergraduate Teaching Practicum

Credits: 1

Max Credit (Max. 2)

Teaching experience in classroom or laboratory assisting faculty instructor.

When Offered (Offered based on sufficient demand and resources)

Planning and Policy: 3 Hours

(choose one)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECE 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

- GEOG 4750

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.

Prerequisite: POLS 1000.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

Below-Ground Processes: 3-4 Hours

(choose one)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.
Dual Listed SOIL 5140.
Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.
When Offered (Normally offered fall semester)
Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.
When Offered (Normally offered fall semester of odd-numbered years)
Prerequisite: SOIL 2010.

Above-Ground Processes: 2-4 Hours

(choose one)

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.
When Offered (Normally offered fall semester)
Prerequisite: LIFE 3400.

- BOT 4111

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

- ENTO 4685

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

- ZOO 4550

Total: 22-25

Soil Science Minor

This program is designed to enhance soil expertise for students majoring in agricultural, natural resources, and environmental sciences degree programs.

Course Requirements: 15 Credit Hours

Course requirements (15 credit hours) for a Soil Science minor are:

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- plus 11 credits of upper-division soil science courses for a total of 15 credits.

Additional Requirements

Undergraduate students minoring in Soil Science will enhance their job prospects with federal land management or conservation agencies (e.g., Forest Service, Bureau of Land Management, Natural Resources Conservation Society), state and federal regulatory agencies (e.g., Wyoming Department of Environmental Quality), mining and oil companies, environmental consulting companies, or scientific research organizations.

Graduate

Ecosystem Science and Management/Applied Economics, Ph.D.

The course requirements for this program are highly flexible to accommodate a wide variety of student backgrounds and interests. Students can major in any PhD program within ESM including Rangeland Ecology and Watershed Management, Soil Science, and Entomology.

Additional Requirements

A minimum of 72 credit hours of coursework. The credit hour requirement can include:

Up to 48 credit hours transferred from approved graduate courses earned while pursuing an M.S. degree (no more than 4 credit hours of thesis);

A minimum of 12 credit hours of approved ESM (REWM, SOIL, ENTO) courses;

A minimum of 18 credit hours of approved AGECE or ECON courses, with at least 12 credit hours at the 5000-level.

At least 42 of the 72 credit hour requirement must be earned in formal coursework.

No more than 12 credit hours of 4000-level courses can count towards the 72 credit hour requirement.

Entomology, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research. Entomology graduate students study a variety of scientific issues related to insects across the globe.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

Plan B (Non-thesis)

Requires 30 hours of graduate credit to include 9 hours of required courses, 11 hours of required electives, and 10 hours of other electives.

Plan B project - follows format of Plan A thesis.

A Plan B master of science will be a terminal degree program in the Department of Ecosystem Science and Management. Students completing this option will not qualify for a subsequent Ph.D. program in Department of Ecosystem Science and Management at the University of Wyoming.

Additional Requirements

This program requires 30 credit hours (at least 12 from Entomology) approved by the student's graduate advisory committee and an approved research plan.

Entomology, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding entomology. Entomology graduate students study a variety of scientific issues related to insects across the globe.

Additional Requirements

This program requires 72 credit hours (at least 12 from Entomology) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Entomology/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between entomology and water resources and to provide students with an entomology degree program that emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of ENTO 5960 to qualify for a master of science degree in entomology/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

- A. ENTO 5678 Aquatic Entomology (3)
- B. Interdisciplinary component 9 hours (see Water Resources degree requirements)

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in entomology/water resources. In addition to coursework and a Plan A thesis, students must pass a final written and oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in entomology/water resources degree requirements and that research efforts are in the water area.

Hydrology, Ph.D.

Join a cutting-edge PhD program to gain expertise in technical, philosophical, and methodological aspects of hydrology related to above- and below-ground systems. We foster research and learning on critical water-related science and social topics.

Additional Information

Hydrologic Sciences (WRESE), Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/wrese>
E-mail: wrese@uwyo.edu

Program Director: Andrew D. Parsekian, Ph.D.

Degree Offered

Ph.D. in Hydrologic Sciences

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D. level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

The WRESE Program grants a PhD in Hydrological Sciences.

Program Specific Admission Requirements

Ph.D. in Hydrologic Sciences

The WRESE Program only admits students seeking a doctoral degree.

Those interested in graduate study in this program, are encouraged to contact the WRESE program (wrese@uwyo.edu) for more information and guidance regarding applying. In order to apply, please submit an application to the program via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>). Prospective students applying to the WRESE program must satisfy the minimum criteria for admission of their advisor's home department (i.e., number of reference letters required; minimum GRE scores, if requested; other supporting documents, if requested; etc.). Similarly, applicants should adhere to the submission deadline indicated by their advisor's home department.

Minimum criteria for admission to the WRESE Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under certain circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the WRESE program.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

The written exam will consist of a series of questions as decided upon by the committee and should take no more than two weeks to complete.

Each committee member shall grade their portion of the exam as pass/fail. The student shall be viewed as passing the written exam if no more than one person grades their portion of the exam as failing.

The oral examination will be held no sooner than two weeks after the written exams, and only after the student has passed their written examinations. The oral exam should be no less than 90 minutes long and no longer than 3 hours.

Following the exam, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Dissertation

The student will prepare a dissertation and make the document available to the committee at least two weeks in advance of an oral defense of the document. The oral defense must be at least 15 weeks after the student has been advanced to candidacy. Students shall present a public defense to the university community that is expected to be approximately 45 minutes long, with a public question-and-answer period after the presentation. If the committee determines that the student has presented a suitable oral presentation of his/her research findings, a closed session meeting will be held in which the student defends their research to the committee. At the conclusion of the defense,

each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Other information:

Students in the WRESE Program may participate from any college, with the expectation that their program of study and dissertation will focus on quantitative issues of hydrology and water resources. The Program welcomes academic diversity, and students in WRESE have entered into the Program from a wide range of academic backgrounds and have hailed from numerous home departments, including Ecosystem Science and Management, Civil and Architectural Engineering, Botany, Zoology and Physiology, and Geology and Geophysics.

Water Resources/Environmental Science and Engineering is an Interdisciplinary program that fulfills an important need by organizing a rigorous Ph.D.- level curriculum, with sufficient numbers of relevant courses to serve the needs of Ph.D. students affiliated with the program faculty.

Rangeland Ecology and Watershed Management, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research and communicate with the public and potential clients.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

An oral defense of the thesis is required.

Plan B (Non-thesis)

Plan B is available under special circumstances and requires 30 hours of graduate coursework.

Plan B candidates must also prepare one professional paper (i.e., content and form compatible with publication in a scientific journal) or, if the adviser requests, two professional papers in selected topic areas.

An oral defense of the paper(s) is required.

Additional Requirements

This program requires 30 credit hours (at least 12 from Rangeland Ecology and Watershed Management) approved by the student's graduate advisory committee and an approved research plan.

Rangeland Ecology and Watershed Management, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding rangeland ecology and watershed management.

Additional Requirements

This program requires 72 credit hours (at least 12 from Rangeland Ecology and Watershed Management) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan. Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework is complete) and an oral final examination.

Rangeland Ecology and Watershed Management/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between range and forest management and water resources and to provide students with a degree program in Rangeland Ecology and Watershed Management, which emphasizes the important issues in water resources.

Coursework and Thesis

- Water Resources requirements Credits: 10 *
- Statistics Credits: 3
- REWM 5620 - Range Management Seminar Credits: 1
- Other recommended graduate courses or substitution courses with adviser consent Credits: 12
- Plan A thesis Credit: 4

Minimum Credits: 30

*Water Resources Requirements

- Interdisciplinary component 9 hours (see Water Resources degree requirements)

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Soil Science, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research.

Plan A (Thesis)

Plan A requires the university minimum degree requirements and an oral final examination.

Plan B (Non-thesis)

Plan B is available and requires 30 hours of graduate coursework.

An oral defense of the paper(s) is required.

Additional Requirements

This program requires 30 credit hours (at least 12 from Soil Science) approved by the student's graduate advisory committee and an approved research plan.

Soil Science, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding soil science.

Additional Requirements

This program requires 72 credit hours (at least 12 from Soil Science) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework is complete) and an oral final examination.

Soil Science/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between soil science and water resources and to provide students a degree program in Soil Science, which emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of SOIL 5960 to qualify for a master of science degree in soil science/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

Core Courses

Students must take or have taken equivalent courses in the four soils disciplines: physics, pedology, chemistry, and microbiology.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

SOIL5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture, and forestry.

Cross Listed MICR 5140.

Dual Listed SOIL 4140.

Prerequisite: SOIL 2010

Enhancement Courses

Students must take at least one of the following courses:

SOIL5110 - Modeling Water and Chemical Transport in Vase Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

SOIL5160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical and biological aspects of soils which impact fertilizer fate, uptake and plant growth.

Dual Listed SOIL 4160.

Prerequisite: SOIL 2010.

- SOIL 5170 - Analytical Methods for Ecosystems Research

Interdisciplinary Component: 9 Hours

(see Water Resources degree requirements)

Seminar in Water Resources: 1 Hour

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Graduate Seminar in Soil Science: 1 Hour

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in soil science/water resources. In addition to coursework and a Plan A thesis, students must pass a final oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in soil science/water resources degree requirements and that research efforts are in the water area.

Water Resources, M.A.

The purpose of this program is to provide multidisciplinary training in water resources. Training is to be consistent with the rigor of professional water resources demands.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate-level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To ensure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Hydrology (3 Hours)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and

drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820 - Groundwater and Drainage Engineering Credits: 3

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110 - Modelling Flow Transport in Soil and Groundwater Systems Credits: 4

Law/Natural Resource Economics (3 Hours)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate

conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

Water Quality (3 Hours)

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

One-Hour Seminar in Water Issues

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Additional Requirements

The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

Water Resources, M.S.

The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates. Training is to be consistent with the rigor of professional water resources demands.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To insure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Hydrology (3 Hours)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820 - Groundwater and Drainage Engineering Credits: 3

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and

drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

SOIL5110 - Modeling Water and Chemical Transport in Vaso Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and

groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110 - Modelling Flow Transport in Soil and Groundwater Systems Credits: 4

Law/Natural Resource Economics (3 Hours)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

Water Quality (3 Hours)

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

One-Hour Seminar in Water Issues

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Additional Requirements

The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

Certificate

Reclamation/Restoration Ecology Graduate Certificate

The Reclamation/Restoration Ecology (RRE) graduate certificate prepares the student to use basic and applied ecological concepts to reclaim and/or restore processes and functions to disturbed ecosystems.

Required Certificate Courses:

Reclamation and Restoration Ecology Courses: 6 Hours

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

Reclamation Problems: 4 Hours

SOIL5565 - Research in Soil Science

Credits: 1-4

Max Credit (Max. 6)

Library, laboratory, and/or greenhouse investigations on select research topics. Graduate students will be required to give a presentation to the soil science group on their final product/ report.

Dual Listed SOIL 4465.

Prerequisite: Basic training in soil science research. SOIL 5565 reserved for graduate students.

OR

REWM5640 - Investigation

Credits: 1-4

Max Credit (Max. 10)

Research on specialized problems in range management. Investigations offered in the following areas of range management, habitat management, business management, range improvements and monitoring, watershed management, extension and international development.

Prerequisite: graduate standing.

Reclamation Process Course: 3 Hours

(choose one)

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms. Lecture with inclusive hands-on laboratory.

Cross Listed RNEW 5730.

Dual Listed BOT 4730.

Prerequisite: one course in ecology and one in physiology.

BOT5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 5780.

Dual Listed BOT 4780.

Prerequisite: Consent of instructor.

PLNT5070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 4070

Prerequisite: PLNT 1000, LIFE 1010

PLNT5470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 4470

Prerequisite: 8 hours of plant biology

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

- REWM 5280

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.
Prerequisite: CHEM 1000.

RNEW5540 - Shrubland Ecology

Credits: 3

Ecology of shrub-dominated lands and shrub species in grasslands. Location, importance and environmental constraints of shrub distributions. Topics include herbivory, woody plant invasions, competitive interactions, monitoring and population dynamics. Emphasizes familiarity with scientific literature.

Prerequisite: RNEW 3000, BOT 4700.

SOIL5110 - Modeling Water and Chemical Transport in Vaso Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

SOIL5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture, and forestry.

Cross Listed MICR 5140.

Dual Listed SOIL 4140.

Prerequisite: SOIL 2010

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

- ZOO 5550

Planning/Policy Courses: 3 Hours

(Choose One)

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

Minimum Total Credits Needed: 16 Hours

Additional Requirements

The graduate certificate will be granted to students who have completed a B.S. in an appropriate science-oriented discipline or are currently enrolled in an M.S. or Ph.D. program.

The graduate certificate will also be available to professionals working in reclamation/restoration oriented fields seeking to upgrade their training in reclamation and restoration ecology. Those interested in the graduate certificate will be required to complete the course work listed below as well as write a synopsis paper with a formal presentation advertised as an open forum seminar.

Department of Family and Consumer Sciences

251 Agriculture Building, (307) 766-4145

FAX: (307) 766-5686

Web site: www.uwyo.edu/fcs

Department Head: Christine Wade

Associate Professors:

JENNIFER HARMON, B.S. Illinois State University 2009; M.S. The Ohio State University 2013; Ph.D. 2014; Associate Professor, Design, Merchandising, and Textiles 2021, 2015.

ERIN IRICK, B.S. Kansas State University 2000; M.S. 2006; Ph.D. Oklahoma State University 2013; Associate Professor, Design, Merchandising, and Textiles 2019, 2013.

JILL KEITH, B.S. North Dakota State University 2000; M.S. Capella University 2009; Ph.D. North Dakota State University 2016; Associate Professor, Human Nutrition and Food/Dietetics 2022, 2016.

ALYSSA McELWAIN, B.A. Kansas State University 2006; M.S. Purdue University 2008; Ph.D. Auburn University 2015; Associate Professor, Human Development and Family Sciences 2021, 2015.

BERNARD STEINMAN, B.A. University of Washington 1991; M.S. Mississippi State University 2004; Ph.D. University of Southern California 2010; Associate Professor, Human Development and Family Sciences 2022, 2015.

CHRISTINE WADE, B.S. Willamette University 2001; M.S. University of Wyoming 2005; Ph.D. 2008; Associate Professor, Human Development and Family Sciences 2015, 2008

Assistant Professors:

GRACE SHEARRER, B.S. University of Wyoming 2012; Ph.D. University of Texas at Austin 2016. Assistant Professor, Human Nutrition and Food/Dietetics 2020.

Academic Professionals:

SARAH LEE, B.A. and M.S. University of Wyoming 1981; 1996; Assistant Lecturer, Human Development and Family Sciences 2020.

MEGAN McGUFFEY SKINNER, B.S. University of Wyoming 2010; M.H.S. Boise State University 2014; Assistant Lecturer and Director, Didactic Program in Nutrition and Dietetics 2019.

TREVA SPROUT AHRENHOLTZ, B.S. 1993, 1997 University of Wyoming; M.S. 1995; Associate Lecturer, Design, Merchandising, and Textiles 2013, 2005.

Professor Emeritus:

Donna Brown, Bruce Cameron, Saul Feinman, Michael Liebman, Judith A. Powell, Rhoda Schantz, Virginia Vincenti, Mary Kay Wardlaw, Randolph R. Weigel, Karen Williams

Department Information

Our mission is to enhance the physical, social, and economic well-being of individuals, families, and communities, emphasizing healthy and sustainable living across the lifespan. We fulfill our mission through instructional, research, and outreach/extension efforts that challenge, motivate, and inspire.

Family and Consumer Sciences integrates the fundamental components of human life—food, shelter, clothing, human relationships, and family—with larger societal systems. Through programs in textiles, apparel and design; food and nutrition; and human development and family sciences, our department prepares learners to meet the opportunities and challenges of today's complex world.

All students pursuing the Bachelor of Science degree in Family and Consumer Sciences are required to complete a minimum of 120 credit hours that include a) University Studies requirements (USP); b) departmental core curriculum; and c) courses in one of the following concentrations: dietetics (application only), human nutrition and food, human development and family sciences, professional child development (online only), or one of the three career tracks in design, merchandising and textiles. Minors in apparel design, human development and family sciences, human nutrition, and interior design are also available.

Grade Requirements

Majors are required to pass all courses within the Department of Family and Consumer Sciences with a letter grade of C or above. Students enrolled in family and consumer sciences minors are required to complete each course for the minor with a letter grade of C or above.

Security Screening

All students applying for admission to the Professional Child Development concentration are required to complete a security screening before program entry. Students in the Human Development and Family Sciences concentration must complete their security screening upon declaration of their major. Failure to satisfactorily complete this requirement will result in the student being dropped from or denied entry to the program.

Family and Consumer Sciences Core Requirements

A core curriculum is required of all family and consumer sciences majors. This requirement is based on a common body of knowledge in family and consumer sciences which contains concepts relevant to all concentrations.

(Please click on link to review core requirements for [all](#) undergraduate majors).

Family and Consumer Sciences Core Requirements

Family and Consumer Sciences Student Learning Outcomes

Students graduating from the Department of Family and Consumer Sciences will be proficient in their concentration content as well as be able to effectively communicate (both written and orally), possess intellectual skills (such as critical and creative thinking and problem solving), and demonstrate appropriate levels of professionalism.

Family and Consumer Sciences Concentrations

Undergraduate majors must declare a concentration and follow its specific degree plan. Standards established by several professional organizations require completion of specific courses in addition to the family and consumer sciences core and USP requirements. All students are assigned to a professional advisor and a faculty mentor. Students should work closely with their advisor to be sure all degree requirements are met. All concentrations are listed below.

Family and Consumer Sciences Minors

Required courses in all Family and Consumer Sciences minors must be taken for a letter grade and completed with a grade of C or above. All minors are listed below.

Graduate Study

The Department of Family and Consumer Sciences offers a program of graduate study leading to a Master of Science in Family and Consumer Sciences with an emphasis in human development and family sciences; human nutrition and food; or design, merchandising and textiles. The department also participates in an interdisciplinary degree in Food Science and Human Nutrition.

Major

Design, Merchandising, and Textiles: Apparel Design and Product Development Career Track

The Apparel Design and Product Development career track in Design, Merchandising and Textiles allows students to develop the technical and creative skills necessary for the development of apparel and textile products from concept to finished product.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required.*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of

communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 2270

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B.C. through the 20th century. Dual listed with FCSC 5176.

Cross Listed FCSC 5176

When Offered (offered alternate spring semesters, odd years)

Prerequisite: FCSC 2165

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4185 - Product Development and Technology

Credits: 3

This course introduces students to various technologies used to bring products to market. 3-D body scanning, computer apparel pattern digitizing, grading, marker making and repeats for digitally-printed, knit and woven fabrics will be discussed. Students will complete product technical packages based on product specifications.

Prerequisite: FCSC 3185, FCSC 4171, and FCSC 4172.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international

settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

Design, Merchandising, and Textiles: Interior Design Career Track

The Interior Design career track in Design, Merchandising, and Textiles prepares students to creatively, effectively, and sustainably solve design problems for professional practice in residential and commercial interior design.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning,

scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC3188 - Interior Design Studio II

Credits: 3

Building upon skills developed in ID Studio 1, students will gain advanced knowledge of lighting, building codes and systems, specifications, materials, and space planning through more complex residential design problems. Design thinking and human centered design are emphasized. Explores design development and communication through CAD based and hand rendering techniques.

Prerequisite: FCSC 2188.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2180 , FCSC 2188 , or concurrent enrollment in 2188

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

FCSC4288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 5288.

Prerequisite: FCSC 3180 or FCSC 4188.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2410 - Fundamentals of Building Performance

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

OR

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

Design, Merchandising, and Textiles: Merchandising Career Track

The Merchandising career track in Design, Merchandising and Textiles offers knowledge and application of business principles within the fashion and interior industries; including retailing, sourcing, and marketing for apparel and interior products.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required.*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and

dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC4160 - Merchandising Strategies and Technology

Credits: 3

Students will be exposed to advanced merchandising strategies for retail buying and planning. Technologies used for gathering pertinent retail data, such as foot traffic and inventory management software, will be introduced. Course will expand on concepts introduced in prerequisite coursework.

Prerequisite: FCSC 3160.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B.C. through the 20th century. Dual listed with FCSC 5176.

Cross Listed FCSC 5176

When Offered (offered alternate spring semesters, odd years)

Prerequisite: FCSC 2165

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

A minor in Entrepreneurship or Professional and Technical Selling through the College of Business is recommended for students in this career track.

Dietetics

The nationally accredited Didactic Program in Nutrition and Dietetics provides the required coursework to pursue an approved post-graduation supervised practice experience (dietetic internship) to become a Registered Dietitian Nutritionist (RDN).

Program Introduction

The UW Didactic Program in Nutrition and Dietetics (DPND) is nationally accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. Entrance into the DPND is made only through an application process. Each prospective DPND student will initially enter the Human Nutrition and Food concentration. It is recommended that students apply to the DPND in the spring semester of their sophomore year. The academic requirements and supervised practice experience must be completed before the student is eligible for the Registration Examination for Dietitians administered by the Commission on Dietetic Registration (CDR), the credentialing agency for the Academy.

University Studies Requirements

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Before Admission to Program

Students must complete the following courses with a minimum 3.0 grade point average (gpa) prior to DPND application.

**Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of

behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

After Admission to Program

In addition to USP and upper division requirements, students must complete the following courses after admission to the DPND while maintaining an overall grade point average of 3.000. Failure to maintain a grade point average of 3.000 could result in program probation and/or suspension.

**Grade of C or above required*

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

FCSC4210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 5210.

Prerequisite: ZOO 3115, MOLB 3610, and FCSC 4145 or concurrent enrollment.

FCSC4220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 5220.

Prerequisite: MOLB 4100.

FCSC4230 - Therapeutic Nutrition Counseling

Credits: 2

Course is designed to help students develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client.

Dual Listed FCSC 5230

A&S College Core 2015 Dietetics students only.

Prerequisite: FCSC 4220 or concurrent enrollment.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces

statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

HDFS Career Track for Family and Consumer Sciences Teacher Certification

A career track leading to certification/licensure to teach family and consumer sciences (FCS) in secondary schools.

Program Information

This program is made possible through a partnership agreement with UW Family and Consumer Sciences, Colorado State University (CSU) Family and Consumer Sciences program and the CSU Center for Educator Preparation. While meeting the requirements for the Human Development and Family Sciences concentration, students will use electives from other FCS concentrations to prepare them to teach family and consumer sciences in middle or secondary schools. By participating in this partnership, students earn dual bachelor's degrees - one from UW and one from CSU. Students must earn a minimum of 154 credit hours between the two programs (minimum of 120 at UW and a minimum of 34 at CSU) in order to be awarded a degree from each institution. Additional semesters will be necessary to fulfill the requirements of both degrees.

Students must meet all entry requirements at UW and CSU. The CSU licensure program requires students to earn a C or above in all content courses and teacher licensing courses, and a passing score on the appropriate licensing exam. Therefore, a grade of C or above must be earned in all UW courses and an overall 2.750 GPA be maintained for transfer to CSU to fulfill their program requirements. Upon completion of the UW portion, students will then take the remaining courses needed to meet Wyoming and Colorado certification/ licensure requirements at CSU in Ft. Collins, Colorado. In their last semester, if they so choose, Wyoming students may complete their student teaching requirements in a Wyoming FCS school classroom with supervision by a licensed FCS teacher educator. In addition to earning dual degrees, students meet the requirements to apply for certification/licensure in Wyoming and in Colorado. Both licenses are reciprocal in many other states.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

Required Courses

*** *Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

OR

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

OR

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

OR

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

LIFE1002 - Discovering Science

Credits: 3

Integrates Biology, Chemistry, Physics, and Earth Science and is intended for non-science majors. Fundamental concepts from each discipline are discussed through lectures and in-class activities, and students learn how to understand science and its importance in larger societal issues. There is no laboratory component of this course. Meets the S requirement in USP 2003 and the PN requirement in USP 2015.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Former Course Number [BIOL 1002]

OR

LIFE1003 - Current Issues in Biology

Credits: 4

Emphasizes central themes of biology - cell biology, genetics, evolution, ecology - and scientific methodology by focusing on current issues in biology. Fundamental concepts are addressed through classroom and laboratory activities and discussions. This course is intended for non-science majors. Students cannot receive duplicate credit for LIFE 1010 or LIFE 1020.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1003]

OR

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and

vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences.

Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Additional Concurrent and CSU Coursework

After completion of UW coursework, three additional semesters are required for completion of this teacher certification option. The first semester will require concurrent enrollment at UW and CSU. Required UW course FCSC 4117 (online - 3 credit hours) will be taken while enrolled at CSU to preserve WEU eligibility. Four additional credit hours must be transferred to UW from the second and third semesters' coursework at CSU to meet UW's 120 credit hour graduation requirement.

First Semester

Concurrent Fall Semester UW/CSU

- EDUC 331 - Educational Technology Credits: 2
- EDUC 340 - Literacy and the Learner - Phase I - RL Credits: 3 (Not included in WUE tuition)
- EDUC 350 - Instruction I: Individualization/Mgt - Phase II - TL Credits: 3
- EDUC 386 - Practicum - Instruction I - Phase II - TL 1
- EDCT 451 - Methods, FCS Education Credits: 4

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Second Semester

Spring Semester at CSU

- EDUC 450 - Instruction II: Standards/ Assessment - Phase III - T Credits: 4
- EDUC 486 - Practicum - Instruction II - Phase III - TL 1
- FACS 479 - Colloquium - FCS Credits: 2

Complete one of the following and transfer it to UW:

- A course from Art/Humanities (Choose one: E140 - The Study of Literature, PHIL100 - The Appreciation of Philosophy, or TH141 - Introduction to Theater) Credits: 3
OR
- HES 145 Health and Wellness Credits: 3

Final Semester

Fall Semester at CSU

- EDCT 485 - Student Teaching - Phase IV - TL Credits: 11
- ECDDT 492 Seminar - Professional Relations - Phase IV - TL Credits: 1 (Transfer to UW)

Total UW Degree Minimum: 120 Hours

Total CSU Degree Minimum: 34 Hours

Total for Both Degrees: 154 Hours

Additional Requirements

Upon declaring this career track, students must satisfactorily complete a mandatory security screen (background check). Advising will provide careful attention to the uniqueness of individual student situations and academic choices.

Human Development and Family Sciences

Prepares students to work in a variety of critical fields that serve individuals and families across the lifespan, including: children, youth, senior and family support programs, community and governmental agencies, and higher education.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

** Grade of C or above required.*

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicultural development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4132 - Internship in Human Development and Family Sciences

Credits: 4-6

Max Credit 6

Students will acquire skills and gain familiarity in direct services, policy development, or program planning in a human services agency/organization. Opportunities to apply theories and knowledge gained in classroom settings to professional practice will be provided. Offered spring or summer semesters.

When Offered (Offered spring and summer semesters only)

Prerequisite: FCSC 4125

OR

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

OR

FCSC4131 - Administration Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and

research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

OR

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

FCSC Core Elective in Human Nutrition and Food

Complete one of the following with a grade of C or above:

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and

as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

Upon declaring this major, students must satisfactorily complete a mandatory security screen (background check).

Human Nutrition and Food

The Human Nutrition and Food concentration prepares students for careers in human nutrition and the food industry, and serves as a degree plan for pre-health (including the Didactic Program in Nutrition and Dietetics) or graduate school.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

** Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy

relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

Human Nutrition and Food Elective

Complete one of the following with a grade of C or above:

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Professional Child Development

Professional Child Development prepares students for teaching and administrative positions in early childhood development and care.

Program Information

Entry into Professional Child Development must be approved by the department and advisor. Applicants must also satisfactorily complete a mandatory security screen (background check).

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses Before Entry

EDEC1020 - Introduction to Early Childhood Education

Credits: 3
Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

PSYC1000 - General Psychology

Credits: 3
Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3
Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

ENGL1010 - College Composition and Rhetoric

Credits: 3
A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

Required Courses After Entry

**Meets FCSC Core Elective in Human Nutrition and Food. Grade of C or above required.*

***Meets FCSC Core Elective in Design, Merchandising and Textiles. Grade of C or above required.*

**** Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

OR

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs

Credits: 2

Designed to enrich students' understanding of practices which support children's health development. Issues to be explored include record keeping related to child care health and safety, use of health consultants, accident and injury prevention, immunizations, nutrition and food safety in child care settings.

When Offered (Offered alternate summers.)

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

OR

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

OR

FCSC4131 - Administration Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

EDEC3000 - Observing Young Children

Credits: 3

The general goal of the course is to introduce students to observation and recording techniques appropriate for assessing the growth and development of young children in the school setting. A secondary goal is to understand how observation and recording techniques can facilitate curriculum planning and parent-teacher conferences.

Prerequisite: EDEC 1020 and FCSC 2121.

EDEC3220 - Curriculum and Learning Environments in Early Childhood Education

Credits: 3

Early childhood curriculum and instructional practices will be reviewed, developed, and integrated with a focus on the role of learning environments, materials and play in supporting the teaching and learning process. Students have the opportunity to design meaningful learning experiences through practicum.

Former Course Number [EDCI 3220]

Prerequisite: EDEC 1020 and FCSC 2121 (or both PSYC 2300 and FCSC 2122).

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

OR

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

PSYC4310 - Developmental Psychopathology

Credits: 3

Provides basic understanding of developmental psychopathology. Examines characteristics, etiology, assessment and treatment of psychological disorders in children including autism, mental retardation, anxiety, depression, attention, learning, and conduct problems.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or FCSC 2121 or EDST 2450.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Minor

Apparel Design Minor

A minor in Apparel Design enables students to gain competency in areas expected of apparel designers; combining technical and creative skills with industry knowledge for the design and creation of fashionable and functional clothing.

Required Courses

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

Plus one of the following

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 2270

Plus one of the following

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

Plus one of the following

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

Minor Total: 24 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Human Development and Family Sciences Minor

Provides students with a foundation in the basic principles and knowledge of human development and family sciences across the lifespan that can enrich and complement their primary area of study.

Required Courses

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

Plus 12 credit hours from the following:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging

adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicultural development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of

normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

Minor Total: 22 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Human Nutrition Minor

A minor in Human Nutrition and Food enhances degrees in kinesiology and health, food science, nursing, and related fields. Students learn how food choices influence health. *Does not prepare students to provide nutrition therapy or counseling.*

Required Courses

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

Plus one of the following

** Course can be used to fulfill only one category.*

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

Plus three of the following

** Course can be used to fulfill only one category.*

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology,

psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

Minor Total: 23-25 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Interior Design Minor

A minor in Interior Design enables students with career interests in this field to gain experience in the competency areas expected of interior designers.

Required Courses

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2180 , FCSC 2188 , or concurrent enrollment in 2188

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

Plus one of the following

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

Plus one of the following

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ARE3600 - Architectural Design Studio III

Credits: 3

Junior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). This course builds upon skills learned in ARE 2600, with a new emphasis on the complexities that accompany mid-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 2410 and ARE 2600.

Plus one of the following

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Minor Total: 21 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Additional Requirements

The Interior Design minor is sponsored jointly by the Departments of Family and Consumer Sciences and Civil and Architectural Engineering. Students who hope to use this minor to prepare for professional certification examination following graduation should consult the sponsoring departments to receive an advisor for the minor.

Graduate

Family and Consumer Sciences - Master of Science

The master's program in family and consumer sciences offers three specialized and very different areas of emphasis for a variety of pathways and careers.

General Requirements

All emphasis areas listed below require a minimum of 30 credit hours of coursework at the 4000/5000 level. Only nine credit hours of 4000-level courses are allowed in this master's program. The student may be required to complete more than the minimum credit hours to satisfy prerequisites or because the student's committee determines additional coursework is required for the student to reach their professional objective.

The student is responsible for meeting all deadlines, submitting all required forms, and for fulfilling all requirements for the degree.

Design, Merchandising and Textiles

This program offers the study of textiles, merchandising of textile and apparel products, various aspects of apparel design and product development including creative and functional design options, and various aspects of interior design.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

14 credit hours of Family and Consumer Sciences courses

6 credit hours of supporting courses from arts, humanities, natural or social sciences

6 credit hours of supporting research courses

4 credit hours of FCSC 5960 Thesis Research

Human Development and Family Sciences

This program is designed for professionals who are currently working in human services fields and would like to further their education. This is an entirely online degree program that allows students to progress at their own pace.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

FCSC 5122 Developmental Contexts Across the Lifespan

FCSC 5123 Positive Youth Development

FCSC 5135 Program Evaluation

EDRE 5530 Introduction to Research or EDRE 5550 Action Research

14 credit hours of supporting courses

4 credit hours of FCSC 5960 Thesis Research

Human Nutrition and Food

This program increases the understanding of food and nutritional science and how to apply that knowledge to disease prevention and enhancement of human potential.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

18 credit hours of courses from food and nutritional sciences, biological, natural and social sciences

6 credit hours of supporting research courses

2 credit hours of graduate research seminars

4 credit hours of FCSC 5960 Thesis Research

Application and Admission Requirements

Admission to this graduate program and selection for department-funded assistantships is highly competitive. Faculty review the applications for their program area. Priority consideration is given to applicants who meet or exceed admission requirements and possess research interests that parallel those of the faculty. We do not offer conditional admission.

The application must include the following:

- A bachelor's degree based on a four year curriculum from an accredited institution with a grade point average of 3.0 or higher (on a 4.0 scale). Transcripts from all institutions attended must be submitted.
- Graduate Record Exam (GRE) score. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing). Official scores must be submitted.
- Letters of recommendation -- Applicants must submit names and contact information for at least 3 people who will provide letters of recommendation and evaluation of the applicant's preparedness and/or qualifications for the desired graduate degree program.
- A statement of purpose (letter of intent) that includes applicant's preparation for the desired degree, research interests, future goals related to the program of interest, and if they wish to be considered for a graduate assistantship.
- A current professional resume or curriculum vitae.
- For international students, a minimum TOEFL score of 540 (76 iBT), IELTS score of 6.5, or Duolingo score of 105 average of the Conversation and Production sections. Official scores must be submitted.
- International students must also provide evidence of adequate financial resources.

To ensure full review for fall semester admission, applications must be received no later than March 1. Notification of application decisions will be made by May 1. Applications received at other times of year will be reviewed only if space in the desired program area is available.

Final approval of program entry for an international graduate student receiving an assistantship is contingent upon demonstrated English language oral proficiency.

Financial Support

Financial support is never guaranteed.

Graduate assistantships are awarded after applicants are selected for program entry.

Graduate assistantships require teaching and/or research. Students awarded an assistantship involving any type of teaching responsibility including labs, lectures, paper grading and interpretation to students are required to successfully complete the mandatory Graduate Teaching and Learning Symposium prior to assuming their duties. The department will define teaching responsibilities prior to the student attending the teaching symposium.

A full-time assistantship provides a stipend, health insurance, and a tuition/fee reduction.

- The stipend is payable in installments over an academic year (September through May).
- Health insurance will be paid for the calendar year. **Student medical insurance is mandatory for international students.**
- The tuition/fee reduction will cover up to 9 graduate credit hours of tuition per semester and most mandatory fees. Some incidental fees are the responsibility of the student. Anyone receiving a full-time graduate assistantship must be registered as a full-time student in 9 credit hours per semester.
- If a student is awarded less than a full-time assistantship, the stipend, and tuition and fee reduction will be adjusted to the percentage rate of the assistantship.
- Graduate students who receive a full assistantship are required to work an average of 20 hours per week for the stipend.

Renewal of a graduate assistantship is contingent on acceptable progress towards degree completion and maintenance of a grade point average of 3.0 or above.

Financial support is not given for more than two academic years.

Food Science and Human Nutrition Interdisciplinary Master of Science

An interdisciplinary program where students gain expertise in theory as well as combined research in the areas of human nutrition and metabolism, food product development, community nutrition, food microbiology, meat science and food chemistry.

General Information

You can earn your master's degree in food science and human nutrition through the Department of Animal Science or Family and Consumer Sciences.

Applicants indicate the research experience they prefer and faculty member they are interested in working with. In this highly competitive graduate degree program, students gain direct experience with data collection, analysis, writing and publication through laboratory and classroom learning experiences. Program faculty are actively conducting research in the areas of eating behaviors, indigenous/traditional diets, micronutrient needs and deficiencies, food product development, sensory characteristics of food products, health and physical performance of active individuals, nutrition and disease, brain-reward pathway in animals, microbial diagnostics, rumen microbiome, nitrogen/protein metabolism, lipid analysis and alternative feed/forages.

General Requirements

A minimum of 30 credit hours of coursework at the 4000/5000 level is required. Only nine credit hours of 4000-level courses are allowed in this master's program. The student may be required to complete more than the minimum credit hours to satisfy prerequisites or because the

student's committee determines additional coursework is required for the student to reach their professional objective.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

18 credit hours of courses from food and nutritional sciences, biological, natural and social sciences

6 credit hours of supporting research courses

2 credit hours of graduate research seminars

4 credit hours of FCSC 5960 Thesis Research

The student is responsible for meeting all deadlines, submitting all required forms, and for fulfilling all requirements for the degree.

Recommended Prerequisites

The following are recommended for students applying to the program:

- One semester of organic chemistry
- Human or animal nutrition, anatomy and physiology
- Introductory statistics

Application and Admission Requirements

Admission to this graduate program and selection for department-funded assistantships is highly competitive. Faculty review the applications for their program area. Priority consideration is given to applicants who meet or exceed admission requirements and possess research interests that parallel those of the faculty. We do not offer conditional admission.

The application must include the following:

- A bachelor's degree from an accredited institution with a grade point average of 3.0 or higher (on a 4.0 scale). Transcripts from all institutions attended must be submitted.
- Graduate Record Exam (GRE) score. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing). Official scores must be submitted.
- Letters of recommendation -- Applicants must submit names and contact information for at least 3 people who will provide letters of recommendation and evaluation of the applicant's preparedness and/or qualifications for the desired graduate degree program.
- A statement of purpose (letter of intent) that includes applicant's preparation for the desired degree, research interests, future goals related to the program of interest, and if they wish to be considered for a graduate assistantship.

- A current professional resume or curriculum vitae.
- For international students, a minimum TOEFL score of 540 (76 iBT), IELTS score of 6.5, or Duolingo score of 105 average of the Conversation and Production sections. Official scores must be submitted.
- International students must also provide evidence of adequate financial resources.

To ensure full review for fall semester admission, applications must be received no later than March 1. Notification of application decisions will be made by May 1. Applications received at other times of year will be reviewed only if space in the desired program area is available.

Final approval of program entry for an international graduate student receiving an assistantship is contingent upon demonstrated English language oral proficiency.

Financial Support

Financial support is never guaranteed.

Graduate assistantships are awarded after applicants are selected for program entry.

Graduate assistantships require teaching and/or research. Students awarded an assistantship involving any type of teaching responsibility including labs, lectures, paper grading and interpretation to students are required to successfully complete the mandatory Graduate Teaching and Learning Symposium prior to assuming their duties. The department will define teaching responsibilities prior to the student attending the teaching symposium.

A full-time assistantship provides a stipend, health insurance, and a tuition/fee reduction.

- The stipend is payable in installments over an academic year (September through May).
- Health insurance will be paid for the calendar year. **Student medical insurance is mandatory for international students.**
- The tuition/fee reduction will cover up to 9 graduate credit hours of tuition per semester and most mandatory fees. Some incidental fees are the responsibility of the student. Anyone receiving a full-time graduate assistantship must be registered as a full-time student in 9 credit hours per semester.
- If a student is awarded less than a full-time assistantship, the stipend, and tuition and fee reduction will be adjusted to the percentage rate of the assistantship.
- Graduate students who receive a full assistantship are required to work an average of 20 hours per week for the stipend.

Renewal of a graduate assistantship is contingent on acceptable progress towards degree completion and maintenance of a grade point average of 3.0 or above.

Financial support is not given for more than two academic years.

Department of Molecular Biology

Department of Molecular Biology

203 Animal Science/Molecular Biology Bldg.

(307) 766-3300

Web site: www.uwyo.edu/MolecBio/

Department Chair: Jesse "Jay" Gatlin

Modern biology is based on a fundamental understanding of molecular processes essential in living organisms. Recent advances in molecular biology have led to an explosion of knowledge about gene expression and the role gene products play in cell function. Undergraduate programs in molecular biology offer learning opportunities at the forefront of modern biology.

The molecular biology degree programs are designed to prepare students for the future by combining a foundation in basic sciences and humanities with a broad selection of courses in molecular biology, biochemistry, genetics and microbiology. Advanced undergraduates attend an outside speaker's program that includes some of the world's best-known scientists. Modern, well-equipped teaching and research laboratories contribute significantly to the educational experience of a student. All junior- and senior-level undergraduates are encouraged to participate in research projects with individual faculty members. Involvement in an active research program provides the student with an additional dimension of learning beyond what is assimilated in courses. A student learns to plan experiments, solve technical problems and experience scientific advances first hand. An undergraduate research project also promotes close interaction between the undergraduate and graduate students, postdoctoral researchers, staff and faculty.

Many molecular biology majors continue their education beyond the bachelor's level by going to graduate school or to medical, dental or veterinary school. Some students choose to use their education to gain employment in biotechnology, clinical or basic research laboratories. Other career choices include teaching, medical technology, law and business. In addition, the Department of Molecular Biology offers the Ph.D., M.S. and M.A. degrees for students who wish to do graduate work in molecular biology, in preparation for careers in academia, the biotechnology and biopharmaceutical industry, medicine, or other professions.

Professors

DAVID FAY, B.S. Tufts University 1988; Ph.D. Yale University 1995; Professor of Molecular Biology 2010, 2001.

JESSE "JAY" C. GATLIN, B.S. University of Colorado-Boulder 1995; Ph.D. University of Colorado-Aurora 2005; Professor of Molecular Biology 2021, 2010.

MARK GOMELSKY, B.S. Moscow Institute of Chemical Technology 1986; M.S. 1988; Ph.D. Institute of Genetics and Selection of Industrial Microorganisms 1991; Professor of Molecular Biology 2011, 1999.

DONALD L. JARVIS, B.S. Idaho State University 1978; M.S. 1980; Ph.D. Baylor College of Medicine 1986; Professor of Molecular Biology 2000, 1998.

DANIEL L. LEVY, B.S. California Institute of Technology 2000; Ph.D. University of California San Francisco 2006; Professor of Molecular Biology 2021, 2011.

DANIEL WALL, B.A. Sonoma State University 1988; Ph.D. University of Utah 1994; Professor of Molecular Biology 2018, 2007.

CYNTHIA WEINIG, B.A. Brown University 1991; Ph.D. Indiana University 1999; Professor of Botany and Molecular Biology 2013, 2007.

Associate Professors

GRANT BOWMAN, B.S. University of Rochester 1997; Ph.D. University of Chicago 2004; Associate Professor of Molecular Biology 2019, 2012.

JASON GIGLEY, B.S. University of New Hampshire 1994; Ph.D. Dartmouth Medical School 2007; Associate Professor of Molecular Biology 2019, 2012.

PAMELA J. LANGER, B.S. Indiana University-Bloomington 1973; Ph.D. Massachusetts Institute of Technology 1980; Associate Professor of Molecular Biology 1994, 1987.

Assistant Professors

THOMAS BOOTHBY, B.S. Tulane University 2008; Ph.D. University of Maryland 2013; Assistant Professor of Molecular Biology, 2019.

EUNSOOK PARK, M.S. Seoul National University 2001; Ph.D. University of Tennessee, Knoxville 2010; Assistant Professor of Molecular Biology 2019.

TODD SCHOBORG, B.S. Murray State University 2008; Ph.D. University of Tennessee 2013; Assistant Professor of Molecular Biology, 2019.

Associate Lecturer

BRIDGET DECKER, B.S. Colorado State University 1998; Ph.D. Dartmouth College 2006; Associate Lecturer Molecular Biology, 2021, 2015.

Assistant Lecturer

KASSANDRA WILLINGHAM, B.S. University of Wyoming 2010, B.S. University of Wyoming-Casper 2017; M.S. Colorado State University 2016; Assistant Lecturer Molecular Biology 2020.

Instructional Teaching Laboratory Coordinator

HOLLY STEINKRAUS, B.A. Ripon College 1987; Ph.D. University of Wyoming 1993; Instructional Teaching Laboratory Coordinator, 2015.

Adjunct Professor

ANNE W. SYLVESTER, B.S. University of Washington 1980; M.S. 1982; Ph.D. 1987; Professor of Molecular Biology 2010, 2006.

Professors Emeritus

Dale Isaak, Randy Lewis, Nancy Petersen, Don Roth, Mark M. Stayton, Peter E. Thorsness, Jordanka Zlatanova

Major

Molecular Biology, B.S.

The Molecular Biology B.S. degree program builds on basic sciences with courses focusing on molecular, cellular, genetic and microbiological principles. Research opportunities prepare students for postgraduate studies in research and health sciences.

Molecular Biology, B.S. Additional Information

The Molecular Biology B.S. degree program includes molecular biology, biochemistry, microbiology, genetics, and cell biology courses. Research opportunities also develop skillsets for graduate school, biotechnology employment and professional health programs.

To obtain a B.S. degree in molecular biology, a student, with the aid of a molecular biology adviser, designs a program of study that includes courses from the Molecular Biology General Science Core and Elective Requirements listed below. Additional course lists are provided as an aid in developing an individualized program of study in key Emphasis Areas such as Cell Biology and Molecular Genetics, Microbiology, and Preprofessional Health Sciences. Courses listed under the Emphasis Areas are optional, and the student and adviser will design a unique curriculum suited to the student's personal interests. Flexibility in course selection also permits students to fulfill various requirements for postgraduate and professional schools. In order to fulfill course prerequisites in a timely manner, a recommended sequence of courses is available from the student's molecular biology adviser. Completion of a B.S. in Molecular Biology provides a student with the tools needed to open the door to exciting futures in science, medicine and agriculture.

We expect that our graduating students will have a strong foundation in basic science, biochemistry and molecular biology that will enable them to:

1. understand the basis of multiple molecular mechanisms central to gene expression;
2. utilize molecular and microbiological laboratory techniques in future jobs or programs and trouble-shoot experimental challenges;
3. apply for graduate programs in molecular biology, microbiology or other life sciences;
4. begin employment as a laboratory research assistant in academia or the medical or agricultural biotechnology industries;
5. utilize a background in biochemistry and cell and molecular biology to promote success in the basic science curriculum in medical or other health professional schools;
6. integrate a background in biochemistry and cell and molecular biology into career development in professions such as law, genetic counseling, or public health policy;
7. employ evidence-based scientific reasoning skills in evaluating the use of molecular genetics in the prevention, diagnosis and treatment of medical disorders.

Requirements for Molecular Biology Majors

General Requirements

- Total credits (college requirement): 120
- 3000-level or above credits (university requirement): 42
- Fulfillment of University Studies Program (consult adviser)
- Fulfillment of molecular biology general science, core and elective requirements listed below

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an

opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

MOLB 1101

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

MOLB 4053

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

MOLB Requirements

General Science Requirement

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Total: 36 Credits

*The alternative math courses MATH 1450 or MATH 1400 and MATH 1405 may be substituted with adviser approval.

MOLB Core Requirement

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3320 - Molecular Biological Methods

Credits: 4

Integrated discussion and hands-on experience with modern bioinformatic and wet lab-based molecular, genetic and biochemical methods. Completion of the course should provide students with enhanced theoretical understanding and practical knowledge of many crucial modern computational and molecular biological techniques.

When Offered Spring

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4053 - Communications in Molecular Biology

Credits: 3

Students will explore current topics in molecular biosciences and their applications in biotechnology and medicine. The course will develop student's abilities to read and discuss scientific literatures and present the topics in different oral/written for public, research proposals and research-based business plans.

When Offered Spring

USP 2015 Code U5C3

Prerequisite: MOLB 4600 and LIFE 3050 or MOLB 3000

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

OR

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4051 - Departmental Seminar

Credits: 1

Max Credit 15

Attend a series of weekly seminars on a diverse set of research topics presented by visiting faculty or research scientists and will participate in a discussion following the seminar.

Dual Listed MOLB 5051.

Former Course Number [4050]

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

OR

MOLB4052 - Summer Seminar

Credits: 1

Max Credit 5

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material presented is taken from the research program of the speaker.

Dual Listed MOLB 5052.

Former Course Number [4050]

Total: 28-29 Credits

MOLB Elective Requirement (6 credits)

Courses from the following list that were not used to fulfill the MOLB Core Requirement may be applied to the MOLB Elective Requirement; a maximum of 3 credits of MOLB 4010 may be counted toward the MOLB Elective Requirement.

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3
Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4100 - Clinical Biochemistry

Credits: 4
Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring
Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4260 - Quantitative Microscopy

Credits: 1
Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.
When Offered Fall
Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4400 - Immunology

Credits: 4
Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on

molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 , and MOLB 3610 or MOLB 3000

Total: 6 Credits

Molecular Biology Emphasis Areas

After discussing individual interests with a molecular biology adviser, a student should enroll in additional courses that will enhance preparation for a chosen career objective. Listed below are recommended courses that are not required but will further develop a student's skills and understanding in three Emphasis Areas.

Cell Biology and Molecular Genetics

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software.

Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 , and MOLB 3610 or MOLB 3000

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

Microbiology

MICR2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed PATB 2220.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed PATB 4130.

Dual Listed MICR 5130.

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

MICR4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed PATB 4220

Dual Listed MICR 5220.

Prerequisite: PATB 2220 or MICR 2220, and statistics (or epidemiology).

MICR4360 - Medical Entomology and Parasitology

Credits: 4

Emphasis on medically important arthropods, protozoa, and worms; clinical effects of infection epidemiology avoidance/control and identification/diagnosis.

Prerequisite: 8 hours of biological science

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3
Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021, and MOLB 3610 or MOLB 3000

MICR4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed PATB 4710.

Prerequisite: MICR 2220 or PATB 2220 or MOLB 2240 or MICR 2240.

Preprofessional Health Sciences

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

MICR2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed PATB 2220.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed PATB 4710.

Prerequisite: MICR 2220 or PATB 2220 or MOLB 2240 or MICR 2240.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

PSYC2340 - Abnormal Psychology

Credits: 3

Provides a general overview of abnormal behavior, emphasizing types, etiology and treatment methods.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: A grade of C or better in PSYC 1000.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

Minor

Molecular Biology Minor

A Molecular Biology minor includes courses in basic sciences, molecular biology, biochemistry, microbiology, genetics and upper level electives and research opportunities, preparing students for postgraduate studies in research and health sciences.

Molecular Biology Minor Additional Information

Students wishing to minor in molecular biology should discuss their plans with an adviser. Formal declaration of molecular biology as a minor requires 1) submission of a form approved by the Department of Molecular Biology and the College of Agriculture and Natural Resources Dean's Office, 2) appointment of an adviser for the Department of Molecular Biology.

To receive a minor in molecular biology, a student must complete courses listed in the following areas:

General Science Requirement

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

OR

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring,

theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AND

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MOLB Core and Elective Requirement

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3320 - Molecular Biological Methods

Credits: 4

Integrated discussion and hands-on experience with modern bioinformatic and wet lab-based molecular, genetic and biochemical methods. Completion of the course should provide students with enhanced theoretical understanding and practical knowledge of many crucial modern computational and molecular biological techniques.

When Offered Spring

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021

OR 3 credits of

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

- **MOLB elective requirement:** 6 credits of 4000-level MOLB courses, excluding MOLB 4010, MOLB 4050, MOLB 4051, MOLB 4052, MOLB 4850

Graduate

Molecular Biology, M.A.

The Molecular Biology M.A. program includes advanced courses in molecular sciences with a focus on a research project, preparing students for a Ph.D. program, biotechnology research or other professional postgraduate program.

Molecular Biology, M.A. Additional Information

An applicant for the M.A. degree in Molecular Biology is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant needs to contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can apply to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

The pursuit of an M.A. degree in Molecular Biology is suitable for students interested in obtaining a master's degree that does not necessarily include laboratory work. Students who intend to pursue education in medical, dental, veterinary or law schools may choose to pursue an M.A. in Molecular Biology before continuing their education. An appropriate research project is selected in consultation with the M.A. degree candidate and their graduate adviser. Student performance is monitored by a thesis committee that will evaluate a student's written thesis, public seminar, and oral thesis defense. A student pursuing an M.A. degree should not have expectations of financial support. Students pursuing the M.A. degree in Molecular Biology usually complete their program in two academic semesters plus two summer semesters.

Requirements for M.A. degree in Molecular Biology

An M.A. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit. Specific requirements for the M.A. Program in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).

- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of the seminar presentation course MOLB 5050 (2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program)
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee

Molecular Biology, M.S.

The M.S. in Molecular Biology program provides training with advanced courses in molecular sciences and conducting a research project, with the goal of providing a foundation for pursuing a Ph.D. program, employment or other postgrad program.

Molecular Biology, M.S. Additional Information

The M.S. is a research-intensive degree. An applicant is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters. An M.S. candidate will conduct a research project as well as present at the departmental seminars and at scientific meetings. Student performance is monitored by a thesis committee that evaluates a student's research proposal, seminar presentations, written thesis, final public seminar, and final oral defense of the thesis. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Graduate assistantships for M.S. degree students are at the discretion of their graduate adviser. Students pursuing the M.S. degree in Molecular Biology usually complete their program in two to three years.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

Requirements for M.S. degree in Molecular Biology

An M.S. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit, including 26 credits of formal coursework and 4 credits of thesis research MOLB 5960 . Specific requirements for the M.S. degree in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600 , MOLB 5600 , or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee
- MOLB 5960 Thesis Research (4 credits)

Molecular Biology, Ph.D.

The Ph.D. program in Molecular Biology provides training for students interested in pursuing advanced courses and conducting an extensive laboratory research project in molecular and cellular biology or microbiological research areas.

Molecular Biology, Ph.D. Additional Information

The Ph.D. in Molecular Biology is a research-intensive degree. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

An application to the Ph.D. program should include a curriculum vitae (CV), a 2-page statement of research interests and career plans, contact information for three references, transcripts from previous institutions, and GRE scores. Those students with an M.S. degree may be excluded from the GRE requirement. Following admission, a student will conduct a guided research project in the laboratory into which they have been accepted. The faculty research adviser is responsible for financial support of the student. A research project is expected to result in publications in peer-reviewed journals as well as presentations at the departmental seminars and scientific meetings.

Throughout the degree program, a graduate student is guided and evaluated by their research adviser and graduate committee. A student must develop a Program of Study approved by the student's graduate committee. Student performance is monitored by a dissertation committee that evaluates a student's seminar presentations, research proposal, preliminary exam, written dissertation, final public seminar, and final oral defense of the dissertation. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Students pursuing the Ph.D. degree in Molecular Biology usually complete their program in approximately five years.

Requirements for Ph.D. degree in Molecular Biology

A Program of Study for the Ph.D. in Molecular Biology must include a minimum of 72 semester hours of credit at the 4000 level or above from UW or equivalent levels from another approved university. This 72-hour requirement may include graduate credits earned while working toward the master's degree in the same area, but at least 42 hours (of the 72) must be earned in formal coursework, including the specific requirements for the program detailed below. Additional credits toward the 72-hour requirement may include additional formal course credits, Dissertation Research credits (MOLB 5980), or MOLB 5960 credits or Internship credits (MOLB 5990). The Program of Study must be on file in the Office of the Registrar before the preliminary examination can be scheduled. Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

Specific requirements for the Ph.D. degree in Molecular Biology are listed below. The Program of Study is determined in consultation with the student's graduate committee.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program

- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other course credits as determined by the student in consultation with their graduate committee
- MOLB 5980 Dissertation Research (number of credits to be determined in consultation with the student's graduate committee)

Department of Plant Sciences

Room 50 Agriculture Building

PHONE: (307) 766-3103

Website: www.uwyo.edu/plantsciences

Department Head: Andrew Kniss

Professors:

JIM HEITHOLT, B.S. Western Illinois University 1978; M.S. University of Missouri 1980; Ph.D. University of Kentucky 1984; Professor of Crop Physiology 2014.

ANOWAR ISLAM, B.S. Bangladesh Agricultural University 1990; M.S. Institute of Postgraduate Studies in Agriculture, Bangladesh 1996; Ph.D. University of Sydney, Australia 2003; Professor of Forage Agronomy 2019, 2008.

ANDREW R. KNISS, B.S. University of Wyoming 2001; M.S. University of Nebraska-Lincoln 2003; Ph.D. University of Wyoming 2006; Professor of Weed Ecology and Management in Cropping Systems 2018, 2007.

URSZULA NORTON, B.S. Warsaw Agricultural University 1988; M.S. 1990; M.S. Iowa State University 1995; Ph.D. University of Montana 2000; Professor of Agroecology and Soil Science 2022, 2009.

Associate Professors:

RANDA JABBOUR, B.S. Rochester Institute of Technology 2003; Ph.D. Pennsylvania State University 2009; Associate Professor of Agroecology 2019, 2013.

BRIAN A. MEALOR, B.S. North Georgia College and State University 1999; M.S. University of Wyoming 2003; Ph.D. 2006; Director, Sheridan Research and Extension Center; Associate Professor of Rangeland Restoration and Weed Science 2015, 2009.

WILLIAM STUMP, B.S. Purdue University 1981; M.S. Colorado State University 1984; B.F.A. 1991; Ph.D. 1997; Associate Professor of Plant Pathology 2020, 2014.

Assistant Professors:

KELSEY BROCK, B.S. University of Alberta 2010; M.S. 2014; Ph.D. University of Hawai'i - Mānoa 2021; Assistant Professor, Extension Weed Specialist (Invasive Plants) 2022.

DONNA HARRIS, B.S. University of Georgia 1998; M.S. 2001; Ph.D. 2014; Assistant Professor of Plant Breeding and Genetics 2020.

Academic Professionals:

CHRIS HILGERT, B.S. Oregon State University 2001; M.S. 2003; Extension Horticulture Specialist, Master Gardener Coordinator 2011.

JENNA MEEKS, B.S. Colorado State University 2010; M.S. University of Wyoming 2016; Assistant Research Scientist 2021.

ELIZABETH MOORE, B.S. West Texas A&M University 2001; M.S. 2004; Assistant Lecturer of Horticulture and Plant Production 2021.

KAREN PANTER, B.S. Colorado State University 1979; M.S. University of Nebraska 1981; Ph.D. Colorado State University 1985; Extension Horticulture Specialist 1998; Senior Extension Educator 2012.

Emeritus/Retired Faculty:

Rollin H. Abernethy, James Cook, Ron Delaney, Mark Ferrell, Alan Gray, Robin W. Goose, Bernie Kolp, James M. Krall, Stephen D. Miller, Thomas D. Whitson, David Wilson

Plant Production and Protection Major (B.S.)

The Department of Plant Sciences offers a Bachelor of Science degree in Plant Production and Protection (Plant Production and Protection, B.S.), with four optional concentrations and four minors. Optional concentrations for Plant Production and Protection majors are:

- Agronomy
- Horticulture
- Integrated Pest Management
- Agroecology and Evolution

Minors available for students pursuing other majors at UW are: Agronomy, Agroecology, Horticulture, and Plant Protection. These minors allow students within many bachelors programs to obtain an added emphasis in areas that enjoy strong employment opportunities.

A B.S. degree in Plant Production and Protection prepares students for careers in agriculture, natural resources, environmental and life sciences and for advanced graduate studies in specific subdisciplines within these areas. It is a broad, interdisciplinary, undergraduate curriculum that combines and integrates courses in the crop, horticulture, disease, weeds, soil, and insect sciences and is supported by a science-based curriculum and general education. Flexibility is built into the curriculum to readily accommodate students seeking to pursue an emphasis or obtain a minor in a specific discipline. To that end the breadth of the curriculum is balanced with greater depth in biology, chemistry, crop science, entomology, environmental studies, natural resource management, soil science, plant pathology, weed science, horticulture, turf management, pre-veterinary medicine, rangeland ecology and watershed management, animal science, microbiology, and molecular biology. A liberal number of electives permits design of a program that best meets individual career and educational objectives. The Plant Production and Protection program is well suited for students who possess a strong interest in, and an aptitude for, science, agriculture, the environment, life sciences, or natural resources.

The core curriculum is comprised of freshman- through senior-level courses that illustrate dynamic and complex interactions of plants, soils, and plant pests (diseases, insects, weeds) with the environment. Academic training is enhanced with experiential learning through research apprenticeships, internships, field studies, and a special Plant Sciences Capstone course. Special emphasis is given to development of critical thinking and communication skills, problem solving, and application of science. It is an interdisciplinary and highly practical degree program designed to prepare students for "real world" situations.

Plant Production and Protection B.S. degree recipients are prepared for careers with private and public institutions and agencies in such areas as: agricultural consulting, production or sales, research, product development, education, extension education, international programs, and scientific and technological support. These careers include but are not limited to: soil scientist, conservationist, entomologist, consultant, plant scientist, integrated pest management specialist, ecologist, research associate or technician, agronomist, biotechnician, and agroecologist. Degree recipients are also prepared for graduate education in biological and environmental sciences.

The combined Plant Sciences, B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. Please see additional information under the QuickStart Program section below or online at <https://www.uwyo.edu/plantsciences/graduate-studies/quickstart-program.html>.

Agronomy Minor (Agronomy Minor)

Minimum Requirements: 19 Hours

Agroecology Minor (Agroecology Minor)

Minimum Requirements: 20 Hours

Horticulture Minor (Horticulture Minor)

Minimum Requirements: 20 Hours

Plant Protection Minor (Plant Protection Minor)

Minimum Requirements: 19 Hours

Plant Production and Protection/Environment and Natural Resources Program, B.S.

(ENR and Plant Sciences)

Students interested in the environment and natural resources may choose to pursue the B.S. in Plant Production and Protection/ENR. This degree is offered in conjunction with the Haub School of Environment and Natural Resources. See the ENR Information and Advising Guide for details.

Graduate Study (M.S. and Ph.D.)

The Department of Plant Sciences offers curricula leading to the master of science and doctor of philosophy degrees in Plant Sciences. Courses within the department are offered in crop science, horticulture, plant pathology, weed science, and agronomy. Interdisciplinary coursework and research projects are common for Plant Sciences graduate students.

Program Specific Admission Requirements

In addition to university minimum requirements, a majority of the department faculty and department head must approve the admission. To be considered for admission, candidates must establish a faculty member willing to serve as advisor.

In order to apply, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>): a statement of purpose that describes your professional objectives and scientific interests, a current Curriculum Vitae, current academic transcripts, proof of English proficiency (if English is not your primary language) - TOEFL, IELTS, or Duolingo tests are currently accepted, and three letters of recommendation (to be submitted directly by references through the online application). Our regular deadline for fall semester admission is February 15, although we will accept applications any time during the year (including for spring semester admission as well).

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information, or visit UW's Graduate Education website at <http://www.uwyo.edu/uwgrad/>.

Program Specific Graduate Assistantship Information

M.S. assistantships include a stipend, plus tuition and fee waiver, and health insurance. Ph.D. assistantships include a stipend, plus tuition and fee waiver, and health insurance. These assistantships are for the 9-month academic year, but summer support is typically available.

Program Specific Degree Requirements

Master of Science in Plant Sciences

Plan A (thesis)

Requirements for the master of science degree include 26 hours of coursework beyond the bachelor's degree numbered 4000 or above, 4 hours of thesis research, a research proposal, original research, and oral defense of the thesis.

The M.S. degree is typically completed in two years. The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

Doctoral Program

The requirements for the doctor of philosophy degree include 60 hours of coursework beyond the bachelor's degree numbered 4000 or above, 12 hours of dissertation research, a research proposal, original research, written and oral preliminary exams to be taken when most or all coursework is completed, and an oral defense of the dissertation.

Dissertations may be in a modified journal article format but must meet university formatting requirements.

The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

The student is expected to participate in the usual activities of scientific research such as attending and presenting at research seminars and professional meetings and publishing his/her research.

QuickStart Program (Plant Sciences B.S/M.S.)

The combined Plant Sciences, B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. This program allows for early planning of the M.S. portion of the student's education, along with beginning a thesis research project before the completion of the B.S. degree. It offers increased flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit hour load. Up to six credit hours may be counted toward both the B.S. and M.S. degree programs.

Major

Plant Production and Protection, B.S.

The Plant Production and Protection degree prepares students for careers in agriculture, natural resources, environmental and life sciences, and advanced graduate studies in the plant sciences.

Program Information

The Department of Plant Sciences offers a Bachelor of Science degree in Plant Production and Protection, with four optional concentrations and four minors. Optional concentrations for Plant Production and Protection majors are:

- Agronomy
- Horticulture
- Integrated Pest Management
- Agroecology and Evolution

Minors available for students pursuing other majors at UW are: Agronomy, Agroecology, Horticulture, and Plant Protection. These minors allow students within many bachelors programs to obtain an added emphasis in areas that enjoy strong employment opportunities.

A B.S. degree in Plant Production and Protection prepares students for careers in agriculture, natural resources, environmental and life sciences and for advanced graduate studies in specific subdisciplines within these areas. It is a broad, interdisciplinary, undergraduate curriculum that combines and integrates courses in the crop, horticulture, disease, weeds, soil, and insect sciences and is supported by a science-based curriculum and general education. Flexibility is built into the curriculum to readily accommodate students seeking to pursue an emphasis or obtain a minor in a specific discipline. To that end the breadth of the curriculum is balanced with greater depth in biology, chemistry, crop science, entomology, environmental studies, natural resource management, soil science, plant pathology, weed science, horticulture, turf management, pre-veterinary medicine, rangeland ecology and watershed management, animal science, microbiology, and molecular biology. A liberal number of electives permits design of a program that best meets individual career and educational objectives. The Plant Production and Protection program is well suited for students who possess a strong interest in, and an aptitude for, science, agriculture, the environment, life sciences, or natural resources.

The core curriculum is comprised of freshman- through senior-level courses that illustrate dynamic and complex interactions of plants, soils, and plant pests (diseases, insects, weeds) with the environment. Academic training is enhanced with experiential learning through research apprenticeships, internships, field studies, and a special Plant Sciences Capstone course. Special emphasis is given to development of critical thinking and communication skills, problem solving, and application of science. It is an interdisciplinary and highly practical degree program designed to prepare students for "real world" situations.

Plant Production and Protection B.S. degree recipients are prepared for careers with private and public institutions and agencies in such areas as: agricultural consulting, production or sales, research, product development, education, extension education, international programs, and scientific and technological support. These careers include but are not

limited to: soil scientist, conservationist, entomologist, consultant, plant scientist, integrated pest management specialist, ecologist, research associate or technician, agronomist, biotechnician, and agroecologist. Degree recipients are also prepared for graduate education in biological and environmental sciences.

The combined Plant Sciences, B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. Please see additional information under the Plant Sciences Graduate Study section or online at <http://www.uwo.edu/plantsciences/>.

Course Requirements

Core Requirements (required of ALL degree recipients): 50 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Choose one from ANSC 1010, ENTO 1000, or ENTO 1001 (ENTO 1001 preferred if available):

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

Choose one from STAT 2050 or LIFE 2100:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Choose one from PLNT 3000, SOIL 4140, or SOIL 4160:

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer

modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

PLNT4990 - Plant Sciences Capstone

Credits: 3

Capstone course for final integration of courses required for the Plant Production and Protection degree. Provides overall synthesis of plant sciences academic subjects following completion of a prescribed senior experience course, PLNT 4920 or PLNT 4930.

When Offered (Offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code UC3

Practical Experience (must take 6 credit hours from the following): 6 Hours

PLNT4820 - Plant Sciences Seminar

Credits: 1

Max Credit 1

Discussion in production, physiology, breeding and weed science. Undergraduates in PLNT 4820 will attend graduate seminar PLNT 5820 and participate in discussions of the current topics.

Dual Listed PLNT 5820

Prerequisite: Senior standing, PLNT 1000.

PLNT4920 - Research Apprenticeship

Credits: 1-2

Max Credit (Max. 4)

Laboratory and/or field research apprenticeship. Emphasizes individual student-faculty interactions on current topics in plant sciences.

Former Course Number [CROP 4600]

Prerequisite: Junior standing and PLNT 1000, STAT 2050.

PLNT4930 - Internship in Plant Sciences

Credits: 1-3

Max Credit (Max. 6)

Provides students with realistic views of crop science, entomology or soil science through practical, as well as work-related, experiences. Provides positive educational experience to supplement formal academic course work.

Former Course Number [CROP/ENTO/SOIL 4903]

Prerequisite: Sophomore standing or higher; 2.50 GPA

PLNT4960 - Plant Sciences Field Studies

Credits: 2

Various facets of the agroecosystem are covered by visits to agricultural research stations, agri-businesses, private farms, national monuments, historical sites and Federal Parks. Students are exposed to ongoing sustainable research projects and innovative sustainable farming operations where a variety of cropping systems are utilized. Students are usually exposed to archaeological remains of ancient American Indian farming systems. An 8-day trip.

When Offered (Offered as needed)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 1000

PLNT4900 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Supervised participation of undergraduates in the teaching of laboratory sections offered by the Department of Plant

Sciences. Provides opportunity for students to gain teaching experience in agroecology, horticulture, or life science.

Prerequisite: PLNT 1000 and junior or senior standing

AGRI4520 - Field Practicum: Extension Work

Credits: 1-4

Max Credit (Max. 8)

Provides practical experiences to those wanting to pursue a career with Cooperative Extension Service. Interns are matched with county-based personnel for hands-on learning experiences across the state. Develop working knowledge of CES's mission to provide the citizens of Wyoming with education and applied research.

Dual Listed AGRI 5520.

Prerequisite: must pass volunteer screening process.

Plant Sciences Electives: 15 Hours

(Select 15 credit hours from PLNT courses, at least 12 of which are upper division)

Supporting Electives: 9 Hours

Select 9 hours of upper division courses from those with the following course prefixes:

- AGEC (Agricultural Economics)
- ANSC (Animal Science)
- BIOL (Biology)
- BOT (Botany)
- ENR (Environment and Natural Resources)
- ENTO (Entomology)
- FDSC (Food Science)
- GIST (Geospatial Information Science and Technology)
- LIFE (Life Sciences)
- MICR (Microbiology)
- MOLB (Molecular Biology)
- REWM (Rangeland Ecology and Watershed Management)
- SOIL (Soil Science)

Additional University Studies: 15 Hours

- First-Year Seminar (FY): 3
- U.S. and Wyoming Constitutions (V): 3
- Communications 1 (C1): 3
- Communications 2 (C2): 3
- Human Culture (H): 3

Free Electives: 25 Hours

Total Required: 120 Hours

Optional Concentrations

Although not required, students may choose to specialize in any of the four optional concentrations below as part of their B.S. in Plant Production and Protection. In order for the concentration to be official, students must "opt in" and add the desired concentration to their degree evaluation.

Agronomy Concentration: 24 Hours

The Agronomy concentration focuses on the intricacies of agronomic crop production along with pest management, genetics, soil science, and other related topics. This is a broad area of study that can be tailored to the student's particular interests. Careers in production, consulting, and pest management abound in the public and private sectors of agriculture. Students learn the ultimate goal of promoting more efficient and sustainable agronomic crop production practices. Skills learned include written and oral communication; sciences such as ecology, chemistry, and genetics; and practical applications such as computer technologies, geographic information systems, soil and water analyses, plant health diagnostics, and general best management practices.

Required: 16 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4700 - Forage Crop Science

Credits: 3

The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 5700

Former Course Number [CROP 2200, 3200; PLNT 3200]

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment

OR

PLNT4220 - Crop Yield Physiology

Credits: 3

Physiological processes underlying crop growth and development. The effect of crop management practices on physiology and yield will also be discussed.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 1000, CHEM 1000

At least 8 additional credit hours from the following: 8 Hours

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130

Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGECEC 1020 or ECON 1020 and MATH 1400.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGECEC 1020 and MATH 1400.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil

water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

Horticulture Concentration: 21 Hours

Students in the Horticulture concentration learn about the various horticultural commodities and growing operations. Choose from classes including greenhouse crop production, plant propagation, seed technology, organic food production, plant breeding, and allied subjects such as irrigation technology and pest management including plant pathology and weed science. Students may be surprised at the number of career opportunities available in horticulture! These include vegetable and small fruit production, greenhouse management, controlled environment crop production, landscape plants and management, new variety breeding and production, and urban tree care, among many others.

Required: 15 Hours

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

OR

PLNT4200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 5200

Prerequisite: PLNT 2025 and a USP Q course

At least 6 additional credit hours from the following: 6 Hours

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

Integrated Pest Management Concentration: 25 Hours

IPM as it is commonly known, melds all aspects of plant pest management under one umbrella. It uses the sciences of plant pathology, entomology, and weed science under the broader plant diagnostics field. The IPM concentration emphasizes understanding pest biology and ecology of the ecosystem as the foundation for making pest management decisions that minimize negative impacts on health and the environment. Students in the IPM concentration will find careers in private consulting, field diagnostics, research and demonstration, and product sales, as well as public sector work in invasive species management.

Required: 16 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

Choose at least one of the following:

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a

Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

REWM4300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 5300.

When Offered (Normally offered spring semester)

Former Course Number [3320]

Prerequisite: REWM 2500 or LIFE 2023.

At least 9 additional credit hours from the following: 9 Hours

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130

Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

Agroecology & Evolution Concentration: 21 Hours

Students in this concentration are trained in the ways plants and associated organisms evolve in response to human-impacted environments, and how agroecosystems may change as a result of plant management. Courses include genetics, plant breeding, agroecology, and crop production along with ecology, soil sciences, and others. This concentration provides excellent preparation for graduate school in plant sciences, and also prepares students for careers in conservation, sustainable agriculture, and crop production.

Required: 13 Hours

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

At least 8 additional credit hours from the following: 8 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

Plant Production and Protection/Environment and Natural Resources Program, B.S.

Students interested in the environment and natural resources may choose to pursue the B.S. in Plant Production and Protection/ENR. This degree is offered in conjunction with the Haub School of Environment and Natural Resources.

Additional Information

See the ENR Information and Advising Guide for details.

Minor

Agroecology Minor

The Agroecology minor is ideal for students interested in how plant production systems interact with the surrounding ecosystem. This minor complements many majors related to land management and ecology.

Minimum Requirements: 20 Hours

Required: 11 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

Choose two from PLNT 3030, LIFE 2023, or SOIL 2010:

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

9 additional credit hours from the following: 9 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design.

Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

Agronomy Minor

The Agronomy minor trains students for careers in crop production and management, consulting, sales, and other areas of modern agriculture. Courses include crop & soil management, weed, insect, and disease management, among others.

Minimum Requirements: 19 Hours

Required: 11 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them.

Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

8 additional credit hours from the following: 8 Hours

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4220 - Crop Yield Physiology

Credits: 3

Physiological processes underlying crop growth and development. The effect of crop management practices on physiology and yield will also be discussed.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 1000, CHEM 1000

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

PLNT4700 - Forage Crop Science

Credits: 3

The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 5700

Former Course Number [CROP 2200, 3200; PLNT 3200]

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

Horticulture Minor

Students in the Horticulture minor learn landscaping, plant materials, propagation, organic food production, and crop production in greenhouses and controlled environments. Students who want to get their hands dirty are welcome.

Minimum Requirements: 20 Hours

Required: 8 Hours

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

Choose one from PLNT 1000 or LIFE 1010:

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

12 additional credit hours from the following: 12 Hours

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and

understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

PLNT4200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 5200

Prerequisite: PLNT 2025 and a USP Q course

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

Plant Protection Minor

A combination of weed science, plant pathology, and entomology, the Plant Protection minor provides training for many careers in invasive species management, plant diagnostics, horticulture, and agronomy, among others.

Minimum Requirements: 19 Hours

Required: 19 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

Choose one from ENTO 1000 or ENTO 1001 (ENTO 1001 preferred if available):

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Choose one from PLNT 4070 or PLNT 4400:

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

Choose one from the following:

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

Graduate

Plant Sciences, M.S.

The Plant Sciences M.S. program emphasizes sustainable management of agronomic, horticultural, and forage crops, plant breeding, and invasive species management. Students are trained for scientific careers in academia, public and private sectors.

Plan A (Thesis)

Requirements for the master of science degree include 26 hours of coursework beyond the bachelor's degree numbered 4000 or above, 4 hours of thesis research, a research proposal, original research, and oral defense of the thesis.

The M.S. degree is typically completed in two years. The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

Plant Sciences, Ph.D.

A Ph.D. in Plant Sciences is a research-based terminal degree focusing on specific areas of plant production and management. Scientific training in plant production and vegetation management for careers in academia, public and private sectors.

Program Information

The requirements for the doctor of philosophy degree include 60 hours of coursework beyond the bachelor's degree numbered 4000 or above, 12 hours of dissertation research, a research proposal, original research, written and oral preliminary exams to be taken when most or all coursework is completed, and an oral defense of the dissertation.

Dissertations may be in a modified journal article format but must meet university formatting requirements.

The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

The student is expected to participate in the usual activities of scientific research such as attending and presenting at research seminars and professional meetings and publishing his/her research.

QuickStart Program

Plant Sciences, B.S./M.S. QuickStart

The Plant Sciences B.S./M.S. QuickStart program enables students to work toward both the B.S. and M.S. degrees simultaneously. Accepted students earn a B.S. in Plant Production and Protection and an M.S. in Plant Sciences.

Program Information

The combined Plant Sciences B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. This program allows for early planning of the M.S. portion of the student's education, along with beginning a thesis research project before the completion of the B.S. degree. It offers increased flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit-hour load. As many as 6 credit hours of undergraduate coursework at the 5000 level (or 4000 level for courses in which no 5000-level course is available) may be counted toward both the B.S. and M.S. degree programs. Additionally, students retain the existing right to reserve up to 6 hours of graduate credit that may be taken during their undergraduate degree program. These 6 reserved credits will NOT count toward both the B.S. and M.S. degrees, but only toward the M.S. degree.

Admission to the program

Minimum requirements for admission to the accelerated program are:

1. completion of sophomore year, 60 credit hours,
2. a minimum overall GPA of 3.0,
3. a minimum GPA of 3.0 in PLNT courses,
4. a minimum of three letters of recommendation (at least two must be from faculty at UW),
5. a DPS faculty member willing to serve as M.S. advisor, and
6. a research proposal submitted to, and approved by, the student's M.S. advisor and at least one other Plant Sciences faculty member as a presumptive graduate committee member.

Transfer students must have also completed at least 15 credit hours of coursework at UW to be eligible for admission to this program.

If interested in this program, please visit our website at <http://www.uwyo.edu/plantsciences/> for further information on additional requirements.

Department of Veterinary Sciences

Wyoming State Veterinary Laboratory
(307) 766-9925

Web site: www.uwyo.edu/vetsci
email: vetscience@uwyo.edu
Department Head: Jonathan Fox

Professors:

HOLLY ERNEST, B.Sc. Cornell University 1980; M.S. Ohio State University 1982; D.V.M. 1986; Ph.D. University of California, Davis 2001; Professor of Veterinary Sciences, Wyoming Excellence Chair in Disease Ecology 2014.

JONATHAN H. FOX, B.Sc., B.VSc. University of Liverpool, UK 1993; Ph.D. Virginia Tech 2002; Associate Professor of Veterinary Sciences 2008; Professor of Veterinary Sciences 2016.

WILLIAM W. LAEGREID, B.S. Washington State University 1980; M.S. Washington State University 1984; D.V.M. Washington State University 1985; Ph.D. Washington State University 1988; Professor, Director of the Wyoming State Veterinary Laboratory 2012.

Associate Professors:

GERARD P. ANDREWS, B.S. Pennsylvania State University 1980; M.S. University of New Hampshire 1983; Ph.D. Uniformed Services University of Health Sciences 1993; Associate Professor of Veterinary Sciences 2011, 2004.

TODD E. CORNISH, B.S. University of California–Davis 1990; D.V.M. 1994; Ph.D. University of Georgia 1999; Associate Professor of Veterinary Sciences 2005, 1999.

MYRNA M. MILLER, B.S. Colorado State University 1980; D.V.M. 1984; Ph.D. Cornell University 2005; Associate Professor of Veterinary Sciences 2016, 2010.

KERRY SONDGERTH, B.A. University of New Hampshire 1997; D.V.M. Colorado State University 2006; Ph.D. Washington State University 2013; Assistant Professor of Veterinary Sciences 2014. Associate Professor of Veterinary Sciences 2020.

BRETT T. WEBB, B.S. University of Southern Colorado 2002; D.V.M. Colorado State University 2007; Ph.D. Colorado State University 2012; Associate Professor of Veterinary Sciences 2022.

Assistant Professors:

BERIT BANGOURA, D.V.M. Leipzig University 2003; Ph.D. 2008; Ph.D. 2015; Diplomate EVPC 2014; Assistant Professor of Veterinary Sciences 2017.

JENNIFER L. MALMBERG, B.S. Doane University 2004; M.A. Chadron State University 2013; Ph.D. Colorado State University 2018; Assistant Professor of Veterinary Sciences 2019.

ELIZABETH CASE, B.S. Oklahoma State University 2002; Ph.D. University of California–Irvine 2010; Assistant Professor of Veterinary Sciences 2020.

Clinical Assistant Professor:

JACQUELINE P. KURZ, B.S. Cornell University 2006; B.V.M.&S. Royal (Dick) School of Veterinary Studies, University of Edinburgh, UK 2010; Ph.D. Utah State University 2018; Clinical Assistant Professor of Veterinary Sciences 2020.

Adjunct Professor:

GEOFFREY J. LETCHWORTH, B.S. Trinity College 1965; D.V.M. New York State College of Veterinary Medicine 1972; Ph.D. Cornell University 1980; Adjunct Professor of Veterinary Sciences 2001.

SAMANTHA ALLEN, BSc and MSc University of Guelph 2007 and 2010; DVM Ontario Veterinary College 2014; PhD University of Guelph 2021; Adjunct Professor of Veterinary Sciences 2021.

Professors Emeritus

E. Lee Belden, Francis D. Galey, Bill Jolley, Merl Raisbeck, Lynn Woodard

The Department of Veterinary Sciences and the Department of Animal Science have combined their efforts to offer B.S., M.S., and Ph.D. degrees in animal and veterinary science (see listing under this title). Several options within the major are available including preveterinary medicine and animal biology. Undergraduate course offerings of the Department of Veterinary Sciences are listed under the title of pathobiology. They were designed to familiarize students with the principles of animal disease and the basic biological and biomedical sciences.

The department operates the Wyoming State Veterinary Laboratory, an animal disease diagnostic laboratory (wyovet.uwyo.edu). This laboratory provides valuable hands-on experience for students interested in laboratory animal care, laboratory procedures, and research. Excellent faculty mentors are available for students interested in preveterinary medicine, microbiology, and animal biology.

Animal and Veterinary Sciences

The Department of Animal Science and the Department of Veterinary Sciences have combined their efforts to offer several degree options leading to the bachelor of science degree in animal and veterinary science. Courses in animal science, food science, and pathobiology are the core offerings in the various options. Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine, the degree tracks offered will form the basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered.

Several degree options allow for specialization and graduate or professional school preparation. A brief description of each option and the educational opportunities they provide is given with the course requirements. A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, 3100, 4120, 4540, 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, 2022.

Students are encouraged to participate in activities related to their degree option. The university has livestock, horse and meats judging teams. Each team travels and participates in at least one major exposition a year. Each year, the Academic Quadrathlon competition is held, combining practical and classroom skills for students. Field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Microbiology Club, Range Club, the Pre-vet Club, Wyoming Collegiate Cattlemens Association, and the Ranch Horse Team provide additional educational and recreational opportunities.

Graduate Study

The Department of Veterinary Sciences offers advanced study leading to the master of science and doctor of philosophy in animal and veterinary science. Areas of emphasis include: pathology, molecular diagnostics, bacteriology, virology, parasitology, epidemiology, immunology, and toxicology of wild and domestic animals.

Program Specific Admission Requirements

Open to students with a bachelor of science degree who meet the requirements set forth in this Catalog.

Recommended prerequisites include: chemistry, biochemistry, animal anatomy and physiology, biology, microbiology, and introductory statistics.

Preferred Requirements

Competitive applicants for either degree program will have a GPA 3.250 or higher and high GRE scores (153 verbal, 149 quantitative, 302 total using best composite scores).

Microbiology Program: Interdepartmental major

Microbiology Program

5004 Agriculture Building, (307) 766-3139

FAX: (307) 766-3875

E-mail: gandrews@uwyo.edu

Program Director: Dr. Gerard Andrews

Microbiology is the study of life forms too small to be observed without the aid of magnification; major groups of microbes include the bacteria, fungi (yeasts and molds), protozoa, and algae, as well as the viruses. In addition, related disciplines such as immunology and molecular biology are included because of their historical origins within microbiology.

As such, the science of microbiology is divided into numerous subspecialty areas that reflect not only the individual groups of microbes (e.g., bacteriology, virology, mycology, etc.), but also their significance in applied areas (e.g., medical microbiology/infectious diseases, microbial ecology, food microbiology, industrial microbiology, biotechnology, etc.) or in areas of basic science (e.g., molecular genetics). Throughout its history, microbiology has played a key role in the development of our understanding of basic biochemical and genetic processes, control of infectious diseases, production of increased and improved food supplies, and the production of numerous commercial products. With the development of molecular techniques to construct genetically engineered microbes, microbiologists will continue to make expanding contributions in these and other areas.

Because microbiology is a diverse science, individuals trained as microbiologists find exciting career opportunities in many areas of the basic and applied sciences. Typically, microbiologists are employed in five major sectors: private industry; clinical laboratories; government agencies; universities; and various other settings such as water treatment, food production/inspection facilities, and other public health-related areas. Recent manpower assessment studies at both the national and regional levels have provided evidence for a continuing and expanding need for microbiologists such that successful undergraduate students completing this program may look forward to exciting careers. In addition, undergraduates trained in the microbiological sciences are well prepared for competitive application to graduate school programs and professional programs in human or veterinary medicine, optometry or dentistry.

The bachelor of science degree program in microbiology is organized as an interdepartmental major involving the collaborative teaching, advising, and research expertise of more than 20 microbiology faculty from the Colleges of Agriculture and Natural Resources, Arts and Sciences, and Health Sciences. The program is administered by a Program Director and the Interdepartmental Microbiology Steering Committee, representing each of the participating colleges. Students obtain their degree in the College of Agriculture and Natural Resources. Additional information about the

microbiology program may be obtained at the following website address and by contacting the Program Director or one of the members of the Interdepartmental Microbiology Steering Committee listed below.

Major

Microbiology, B.S.

This interdepartmental program is comprised of core and elective courses in the basic sciences, general microbiology, genomics/proteomics, medical, and environmental microbiology. Students may also participate in faculty-mentored research projects.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Information

The curriculum is designed to prepare graduates for the future by combining a firm foundation in the basic sciences with a central core of microbiology classes, followed by the opportunity for students to specialize in areas of microbiology suiting their individual interests via the selection of electives.

Prior to graduation, microbiology majors must complete the basic requirements and all microbiology core course requirements as listed below. Finally, to assure breadth of exposure in microbiology, students must complete 6 semester hours of microbiology electives. The microbiology curriculum is organized to provide students with the maximum flexibility in meeting their university studies program requirements.

Students pursuing the B.S. degree in microbiology who wish to pursue a dual major in both microbiology and molecular biology must satisfy the basic science/math and core/elective requirements in microbiology as well as those specified for the B.S. degree in molecular biology PLUS an additional 9 credits of electives in microbiology and/or molecular biology at the 4000/5000 level.

Basic Course Requirements for Microbiology Majors

- Total credit hours: 121 hours
- 3000-level or above credits (university requirements): 42 hours
- Completion of University Studies 2015 Program Requirements: 30-36 hours

Basic Sciences and Quantitative Reasoning

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

OR

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AND

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

Microbiology Core Course Requirements

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

PATB2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed MICR 2220

When Offered (Offered spring semester)

Prerequisite: MICR 2210

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

PATB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed MOLB 4400

Dual Listed PATB 5400

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

OR

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

MICR4321 - Microbiology Capstone

Credits: 4

Using a problem-based student learning model, students conceptualize, propose, perform and present a microbiology research study to address a real community problem. Students maintain a lab notebook, write an NSF-style research proposal, formulate hypotheses, engage in hands-on laboratory hypothesis testing and design and present a scientific poster.

USP 2015 Code U5C3

Prerequisite: MICR majors with junior or senior standing.

Take 2 credits total of any combination of the following 1-credit seminar courses:

PATB4150 - Seminar

Credits: 1

Max Credit (Max. 4)

Preparation and oral presentation of papers on veterinary sciences topics.

Prerequisite: 8 hours of biology and consent of instructor.

OR

MOLB4050 - Student Seminar: Topics in ____

Credits: 1

Max Credit 4

Exposes students to current topics in molecular biosciences and examines primary journal literature with oral presentations and class discussions.

Prerequisite: MOLB 3000 or MOLB 3610 or CHEM 4400

OR

MOLB4051 - Departmental Seminar

Credits: 1

Max Credit 15

Attend a series of weekly seminars on a diverse set of research topics presented by visiting faculty or research scientists and will participate in a discussion following the seminar.

Dual Listed MOLB 5051.

Former Course Number [4050]

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

OR

MOLB4052 - Summer Seminar

Credits: 1

Max Credit 5

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material

presented is taken from the research program of the speaker.

Dual Listed MOLB 5052.

Former Course Number [4050]

- MICR Elective Credits: 6

Microbiology Electives

In addition to completing the required microbiology courses listed above, students must complete 6 hours of microbiology electives from any of the following lists.

Medical Microbiology

PATB3400 - Host Defenses Against Infect.

Credits: 3

Max Credit 3

Topics will include the history of immunology in the context of infectious diseases, different infectious pathogens and their interactions with higher order life forms, and introduction to the immune system relevant to protection against invasive microorganisms.

Prerequisite: MOLB/MICR 2021 and PATB/MICR 2220

PATB4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed MICR 4001

Dual Listed PATB 5001

Prerequisite: STAT 2050 or STAT 2070

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

PATB4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed MICR 4130

Dual Listed PATB 5130

When Offered (Normally offered spring semester)

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

PATB4140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action and their effects on various organisms including man and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 5140

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: 9 hours of biological science (e.g., physiology), 4 hours chemistry, 3 hours biochemistry.

PATB4170 - Diseases of Wildlife

Credits: 3

Introduction to wildlife diseases of the Rocky Mountain region and North America. Emphasis on infectious, parasitic, traumatic, toxic, and other disease agents with coverage of mechanisms of disease, epidemiology, and disease impacts on wildlife populations and species. Significant discussion of zoonotic diseases and diseases at the wildlife/domestic animal interface.

Dual Listed PATB 5170

When Offered (Offered spring semester of even numbered years)

A&S College Core 2015 12 hours of biological or zoological sciences.

Former Course Number [4120]

MICR4200 - Diagnostic Bacteriology

Credits: 1

Practical training with emphasis on diagnostic procedures used in a clinical microbiology laboratory. Students identify bacterial pathogens of animals and humans. Taught in a clinical setting utilizing selected clinical material. Techniques employed in the processing and identification of clinically significant bacteria are used and discussed. Safe laboratory practices for working with biohazards are presented.

Cross Listed PATB 4200.

Prerequisite: junior standing and a MICR course which included a laboratory.

PATB4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principals and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/ discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principals and concepts through knowledge of experimental approaches.

Cross Listed MICR 4220

Dual Listed PATB 5220

Prerequisite: PATB 2220/MICR 2220 and statistics (or epidemiology).

PATB4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 4240

Dual Listed PATB 5240

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070

MICR4360 - Medical Entomology and Parasitology

Credits: 4

Emphasis on medically important arthropods, protozoa, and worms; clinical effects of infection epidemiology avoidance/control and identification/diagnosis.

Prerequisite: 8 hours of biological science

PATB4500 - Veterinary Parasitology

Credits: 4

Biology, importance, diagnosis and control of helminth and protozoan parasites of wild and domestic animals. Arthropod vectors and/or intermediate hosts of helminth & protozoan parasites are included. Diagnostic procedures and identification familiarity with agents are emphasized in lab.

When Offered (Offered fall semester of even-numbered years)

Prerequisite: 8 hours of biological science.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

Molecular and Cell Biology

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 , and MOLB 3610 or MOLB 3000

Environmental and Applied Microbiology

MICR3021 - Eukaryotic Microbes

Credits: 3

Max Credit 3

This course will address the biology and ecology of lower eukaryotic life-forms. Topics include: marine phyto- and zooplankton, terrestrial and fresh water aquatic micro-algae, protists, the evolution of multicellularity, and a phylogenetic survey of microscopic multi-cellular life.

Cross Listed PATB 3021

Prerequisite: MOLB/MICR-2021, General Microbiology

MICR4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540 and SOIL 4540.

Dual Listed MOLB 5540 and SOIL 5540 and ECOL 5540.

Prerequisite: MOLB 2021 or MICR 2021.

OR

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MICR4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed SOIL 4140.

Dual Listed MICR 5140.

Prerequisite: SOIL 2010.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

FDSC4090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Cross Listed MICR 4090.

Dual Listed FDSC 5090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021 or MICR 2021.

FDSC4100 - Laboratory Techniques in Food Microbiology

Credits: 1

Lab techniques used in food microbiology.

Cross Listed MICR 4100.

Dual Listed FDSC 5100.

When Offered (Normally offered spring semester)

Former Course Number [610]

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

College of Arts and Sciences

College of Arts & Sciences

113 Arts and Sciences Building

Camellia Okpodu, Dean

Phone: (307) 766-4106 FAX: (307) 766-2697

Web site: www.uwyo.edu/as

Aims and Objectives

The College of Arts and Sciences (A&S) is committed to providing a balanced education that matches cultural breadth with disciplinary depth. Students in the College of Arts and Sciences learn to address complex contemporary problems and to place them in their wider social, historical and ethical contexts. To achieve these goals, degree programs require students to develop expertise in a particular field, gain critical understanding of major areas of human knowledge and select from required courses and free electives to prepare for the challenges of the new century.

A successful student in any of the departments and programs in the College of Arts and Sciences will have an excellent foundation for professional success, graduate study, and a passion for lifelong learning.

Through hands-on research and creative projects (either on faculty projects or independently with faculty guidance and mentoring), fieldwork, internships, and study abroad, students integrate and bring coherence to their classroom learning.

Student Responsibilities

To graduate from the College of Arts and Sciences, students must satisfy all university, college, and major requirements for a given degree. These requirements apply whether the work is taken within the college or transferred from anywhere else within or outside the university (please refer to section below "Acceptance of Transfer Credit").

The college holds students responsible for knowing degree and major requirements and for completing the necessary courses. Students are also expected to know the regulations that govern the academic standards needed to continue study at the university. Students should be aware that changing majors and/or colleges may result in delays in meeting degree requirements and that requirements themselves sometimes change (see "Graduation Requirements and Procedures" section of this *Catalog*).

Academic Advising

To help plan a program of study, students are assigned an academic adviser by the department/ program of their major. Students undecided about a major are advised in the UW Advising, Career, and Exploratory Studies office (222 Knight Hall).

Students should consult regularly with their academic adviser not only for course scheduling, but also to discuss educational and career goals. Faculty and professional advisers can connect students to the many college and university resources to assist undergraduate study. Instructors are also willing to discuss concerns students may have regarding specific courses.

Changing/Declaring a Major or Minor

When ready to declare or change a major, minor, or dual/concurrent major in a department or program in the college, the appropriate form is available from the Office of the Registrar (167 Knight Hall) or the Registrar's Web page. Approval is required from the appropriate department heads/program directors. Departments/programs will assign advisors at the time of signing their approval on the form.

Programs of Study

Undergraduate Degrees

A variety of specialized concentrations are offered within many of the following degree programs. Take a look at the department sections in this *Catalog* that follow this section or the departments' Web sites. Additionally, there are several inter-college or interdisciplinary degrees/majors such as Earth System Science and the affiliated major in Environment and Natural Resources that draw courses from several disciplines. See more detailed descriptions in this *Catalog* or the University of Wyoming home page at www.uwyo.edu, click on the A-Z Directory.

Minors in Arts and Sciences

The College of Arts and Sciences offers all university students systematic studies leading to recognized academic minors. Minors are available in all academic programs in the college and in a number of interdisciplinary areas.

A&S minors have two aims: to encourage students to create a focus for their course work outside their major by coordinating their elective studies; and to enhance chances of employment or graduate admission with a formally recognized field of study.

Minors consist of course requirements ranging from 18-24 credit hours of study, typically including significant work at the junior and senior level. A&S departments and programs offering minors and interdisciplinary degrees may have further conditions and restrictions regarding requirements in the minor. To be counted toward a minor, courses must be completed with a grade of C or better.

Students desiring a minor must notify the department in which the minor is offered. Forms for declaring a minor are available in the Office of the Registrar (167 Knight Hall) or on the Registrar's Web page. The department of the minor will assign an adviser.

For a description of the minors in A&S, see department offices or Web sites.

Minors available in the College of Arts and Sciences include:

African American and Diaspora Studies
American Studies
Anthropology

Biology
Botany
Chemistry

College Degree Requirements- The 2015 A&S Core

Bachelor of Arts or Science Programs

Beginning fall 2015, new university and college general education curricula, the 2015 University Studies Program (USP) and the 2015 A&S Core, were implemented. Refer to the USP section of this *Catalog* for details regarding University Studies requirements.

Students who matriculate for the first time at UW or a Wyoming community college in fall 2015 or after are required to follow both the new USP and A&S Core. Students transferring from a Wyoming community college with an associate's degree and the Wyoming Core completed between May 2013 and fall 2015, may continue to complete the 2003 USP and 2003 A&S Core requirements (if there has been no interruption in their enrollment for a year or more). Students who matriculated at UW or a Wyoming community college prior to fall 2015 and choose the 2015 USP must also complete the 2015 A&S Core requirements. For additional information please refer to the sections in this *Catalog* that describe the university graduation requirements, the 2015 University Studies Program, and the policies for reenrolling at UW after an absence of a year or more.

I. College credit hour requirements

- A. **Minimum total semester hours 120**
- B. **Upper-division credit requirements (42).** Thirty of the 42 hours must be earned from UW. Courses must be taken for a letter grade unless offered for S/U only. This is an all-university requirement for all degree

programs and may come from the courses that fulfill the USP, the A&S Core, the major, the minor, and electives.

- C. **Major field of study (30-60).** Credit hours in excess of 60 in the major subject may not be used to satisfy the requirement of 120 hours for graduation. Credits in AS internship, independent study or special topics courses (AS 2400, AS 2490, AS 4400, AS 4500, AS 4510, AS 4900, and AS 4975) may not be used to fulfill these outside the major requirements. At least 30 hours of C grade or better must be earned in the major subject (the major may require more). Courses in the major must be taken for a letter grade unless offered for S/U only.

- D. **A&S Core requirements (6).** Courses must be taken for a letter grade unless offered for S/U only.

All other university and college regulations apply. See "Graduation Requirements and Procedures" section of this *Catalog* for more information. Graduate level "Enrichment" courses do not count toward the requirements for a bachelor's degree.

II. 2015 A&S Core Curriculum

Graduates of the College of Arts and Sciences are expected to be liberally educated, to have the knowledge and skills to deal with the unexpected, and to see opportunities from multiple perspectives. To develop these abilities, the college faculty implemented the A&S Core.

The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

1. **U.S. Diversity (ASD).** This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.
2. **Global Awareness (ASG).** Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples of the world, including international systems of commerce, art, science, technology, politics, communication, belief, and justice, among other.

College Degree Requirements Prior to Fall 2015 for Continuing and Reenrolling Students

A&S Core requirements for a student continuing a degree program in effect at the time of matriculation at UW are found in the relevant previous *Catalog*. Contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwo.edu.

Students who re-enter the university after an absence of a year or more should refer to other sections of this *Catalog* for university policies and procedures. Unless approved otherwise, reenrolling students, after a year's absence, are required to follow the University Studies and A&S Core requirements in effect the semester of their re-enrollment. However, all majors in A&S who have yet to complete the A&S Core, regardless of their initial enrollment, must refer to the current list of approved courses.

Checksheets and lists of courses that satisfy A&S college core requirements are available on the Web at www.uwo.edu/as or in the A&S Advising Center, Ross 6, 766-4013, asadvicing@uwo.edu.

Departments and programs in the College of Arts and Sciences may require reenrolling students to complete requirements in the major that meet the current expectations of the discipline.

Transfer Students and Acceptance of Transfer Credit

The College of Arts and Sciences and its departments reserve the right to grant transfer credit toward the bachelor's degree only for those courses where a grade of C or better was earned. Students transferring credits from a university or college outside Wyoming with questions about how courses taken elsewhere fulfill the A&S Core may contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwyo.edu.

Courses Taken for S/U Credit

Students may include up to 20 semester credit hours in free electives with a grade of S as part of the total hours required by the College of Arts and Sciences for graduation. However, no S/U hours may be used to satisfy university and college core general education requirements or major requirements, including the required 42 upper-division credit hours unless the course is offered for S/U grading only.

Students registering in courses for S/U grades are subject to all general regulations.

Concurrent Majors

Students may pursue two or more majors simultaneously. With careful planning, A&S students may be able to use all or most of the free elective hours for requirements in the other majors. Refer also to the section, "Graduation Requirements and Procedures" in this *Catalog*.

The A&S Core must be met only once by students whose primary major is in the College of Arts and Sciences. Students whose degree programs are in other UW colleges are welcome to earn a concurrent major in A&S. These students do not have to meet the A&S Core requirements. The student earns one degree with one diploma.

Students pursuing a concurrent major must contact both departments involved for assignments to advisers.

Dual Degrees

Students may simultaneously pursue degrees in the same or more than one UW college. In addition to requirements described in the section "Graduation Requirements and Procedures" in this *Catalog*, students in another UW college who wish to earn a degree from A&S must also complete the A&S Core. A&S students working on dual degrees in the A&S College need to meet the A&S Core just once. A diploma is awarded for each degree.

Each additional degree requires 30 more credit hours added to the 120 credits to the primary degree. Of these 30 credits, 12 have to be at the 3XXX-4XXX levels.

Second Bachelor's Degrees

For students seeking a second bachelor's degree in the College of Arts and Sciences whose **first degree is from another university**, the minimum requirements include:

- 30 semester hours earned from the University of Wyoming, 12 of which must be upper division (3XXX-4XXX level) or graduate level (credit by examination does not count as UW hours).
- Completion of the U.S. and Wyoming Constitutions requirement (V courses in the University Studies Program course list in this *Catalog*).

- If the first degree is from an institution where English is not the predominant language, the COM1 and COM2 requirements of the University Studies Program must be completed successfully.
- Students must also meet the 2015 A&S Core requirements.

For students whose **first degree is from UW**:

- The additional required 30 hours (12 of these at the 3XXX-4XXX) are added to the degree requiring the least number of hours. For example, for a first degree A&S requires 120 hours. So the total credits a UW student would have to complete for the second bachelor's degree is a minimum of 150 credits. Since the University requires a total of 42 upper division hours for a degree, for the second degree from A&S, a UW student would need to earn a total of 54 hours at the 3XXX-4XXX level. For more information, please see the Second Bachelor's Degree entry in the section, "Graduation Requirements and Procedures" in this *Catalog*.
- Students whose **first degree is from another UW college** must meet the 2015 A&S Core requirements.
- In situations in which a student is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student's department can ask the Office of the Registrar to load selected courses into the student's record.

Concurrent Major in Environment and Natural Resources

A student majoring in any A&S department/program may earn a double major by completing the courses required for the Environment and Natural Resource (ENR) program in addition to the requirements in their A&S major and the College A&S Core. The School of ENR Web site, <http://www.uwyo.edu/enr> has detailed information, or contact the School at (307) 766-5080.

Preprofessional Studies

The College of Arts and Sciences prepares students to enter professional schools through preprofessional programs of study described below.

Prelaw Study. Students usually need a bachelor's degree prior to beginning the study of law. There is no prescribed course of undergraduate study and no restrictions as to the field in which the degree is earned. However, to prepare for this competitive profession, prelaw students are advised to select courses that help to develop those talents and skills essential to the study and practice of law. Logical and critical thinking, conflict evaluation/resolution and effective verbal/nonverbal communication skills are essential. Additionally, students should understand the political, economic, social and cultural institutions and values that characterize human society. Rigorous courses in any discipline increase abilities in these areas. Regardless of the prelaw major, courses in the broad liberal arts--the sciences, social sciences, fine arts and humanities--increase understanding of the public's diverse interests and backgrounds.

Prelaw students do not have to declare a major at the time of first enrollment if they wish to explore options. Students who are undeclared in the College of Arts & Sciences are assigned advisers in the Advising, Career, and Exploratory Studies office until they decide upon a degree program. Please note that a prelaw minor is available.

In addition to an adviser in the major, prelaw students may contact the designated UW prelaw adviser for assistance in developing a program of study, for career counseling and for guidance in applying to law schools. Contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwyo.edu for information.

Detailed information about applying to law schools, the Law School Admissions Test (LSAT) and preparation materials, and links to other web sites are at www.LSAC.org.

Library Preprofessional Study. Librarians are information professionals who research, organize, and classify materials so the public can access information. Not only do they work with printed materials, but all the technological

advances in digital media such as electronic databases and eBooks. Some librarians focus on teaching the public, scholars, and students how to access and use these materials, while others concentrate on collecting and maintaining these diverse resources. Librarianship offers many career opportunities to people of different academic backgrounds, interests, and talents. Most public, academic, and special libraries require a Master's degree in library science (MLS).

The degree programs and minors in the College of Arts and Sciences offer the variety of academic preparation expected by accredited library schools in the country. Most of the graduate schools in library science require a bachelor's degree, a good undergraduate record, and a reading knowledge of a foreign language for admission. The best undergraduate preparation includes a wide range of courses in the sciences, social sciences, and humanities along with a strong concentration in one subject area. The choice of a major will be determined by the student's academic interest and professional objective. The general education that the University Studies and the A&S Core require provide the well-rounded background graduate schools expect of their MLS candidates.

Additional information about library schools, their requirements, and programs as well as career opportunities may be obtained from the reference desk at Coe Library and the Center for Advising and Career Services. The U.S. Bureau of Labor Statistics "Occupational Outlook Handbook" at www.bls.gov/ooh/ has detailed descriptions of the varied work of librarians, working conditions, employment outlook, and sources for additional information.

Pre-Health Study. Students in several A&S majors may be working toward the following careers: athletic training, chiropractic, dentistry, medicine, occupational therapy, optometry, physical therapy, physician assistant, or public health. These professional schools are favorably impressed by a broad educational background, including a substantial number of non-science and science courses; therefore, students are well advised to look beyond the minimum requirements.

Students may select any major in which they are interested to discuss preparation for such careers. In addition to completing all university, college and departmental requirements, students must include in their curriculum the basic professional school requirements, including courses in biology, chemistry, math, and physics. Professional schools have other specific requirements and students should learn about any additional recommendations from those professional schools in which they are interested. We strongly suggest contacting the Pre-Health Advising office [College of Health Sciences, 110 Health Sciences, (307) 766-3878, or hsadvise@uwyo.edu] website: www.uwyo.edu/preprof/.

Common majors in the College of A & S for these preprofessional programs include Chemistry, Biology, Botany, Psychology, and Physiology. However, there are pre-health students in programs as diverse as theatre and dance and anthropology. Students need not declare a major immediately upon first enrollment. Advisers in individual departments can discuss options or if students wish to remain undeclared, they are advised in either the UW Advising, Career, and Exploratory Studies office or the Health Sciences Advising office.

The pre-health advisers in the College of Health Sciences have current information regarding professional school admission requirements, entrance examinations, programs in Western Interstate Commission on Higher Education (WICHE), the Wyoming Medical Contract Program WWAMI (affiliated with the University of Washington School of Medicine) and financial assistance for professional education. The website, <http://www.uwyo.edu/preprof/> includes additional information.

Internships

Many departments in the College of Arts and Sciences offer internships for academic credit, and some provide monetary compensation. Academic internships provide practical, hands-on experience in a professional job setting as a complement to classroom instruction. An internship can provide students with both insight and preparation for future jobs. All internships require a strong background in writing, organizational ability and analytic skills. Junior or senior standing is recommended.

The School of Culture, Gender, and Social Justice

African American and Diaspora Studies

108 Ross Hall, (307) 766-2481

Director: Dr. Ulrich Adelt

Web site: www.uwyo.edu/aads

Professors:

JACQUELYN BRIDGEMAN, B.A. Stanford University 1996; J.D. University of Chicago 1999; Professor of Law 2008, 2002.

ERIC D. JOHNSON, B.A. University of Alabama 2003; MA, University of Iowa 2009; Ph.D 2021.

CHAD D. ROBINSON, B.S. Northwestern University 1992; MA, City University of New York 2006; M.S. Mercy College 2008.

The African American and Diaspora Studies Program, through an interdisciplinary course of study, examines the experiences of African Americans in the United States, in the context of Africa and its Diaspora in Europe and the Americas.

Undergraduate Studies

The population of Black America has nearly doubled in Wyoming since the year 2000. As the population becomes more diverse it is important to provide students with a background in multicultural relations so that they are prepared for the global workforce. We intend to provide students with the necessary knowledge to prepare them to participate in an increasingly interconnected world. Therefore, African American and Diaspora Studies offers a bachelor of arts (B.A.) and an undergraduate minor in African American and Diaspora Studies.

Students may access a copy of the undergraduate major and minor check sheets at www.uwyo.edu/aads/major-minor/index.html.

At present, no program for graduate degrees in African American and Diaspora Studies is offered; however, some courses may be counted at the graduate level.

Trisha Martinez, School of Culture, Gender and Social Justice

American Studies Program

American Studies explores American cultural experience past and present, through a wide range of approaches to American lives, places, arts, knowledges, communities, institutions, histories, and ideas. American Studies is an integrative field that comes from and adds to the context of our cultural lives in the U.S. and the U.S. in the world. American Studies frames present concerns with engagement with the past; expects us to engage people's experiences in the context of a diversity of experiences; and invites us to understand our own commitments and interests as valuable contributors to American cultural understanding. American Studies as a field depends on and adds to insights of scholars, artists, and scientists from virtually any field of expertise.

The American Studies program offers undergraduate B.A. and graduate M.A. degrees in American Studies, as well as courses of general interest to students in any degree.

Our program places special emphasis on studying American cultures through field experiences and internships: students apply academic knowledge and develop professional skills in community and non-profit organizations, historic preservation efforts and organizations, historic sites, museums and collections, among many possibilities. Every internship is developed in close consultation between the students and our Internship Coordinator, and frequently stems from a student's general idea about where or with whom they'd like to work, in Laramie or Wyoming, in other parts of the U.S., or sometimes abroad. Our program also highlights international perspectives, as well as the transnational context of American impacts and experiences, in course work and exchanges available to American Studies students.

American Studies puts people and their plans together building career goals in K-12 education, law, or business, work in community organizations and public institutions, or further graduate-level study.

Native American and Indigenous Studies

**Main Office: 117 Native American Education, Research and Culture Center,
(307) 766-6520**

JESSICA F. NELSON, B.A. University of Michigan 2006; M.A. University of Arizona 2011; Ph.D. 2018; Assistant Professor of Native American and Indigenous Studies 2019.

Assistant Lecturer:

ROBYN LOPEZ, A.A. Central Wyoming College 2004; B.A. University of Wyoming 2007; M.A. University of Hawai'i at Mānoa; Assistant Lecturer of Native American and Indigenous Studies 2019.

Adjunct Faculty:

(See Catalog section following name for academic credentials.)

Pamela Innes, Anthropology
Jeffrey Means, History

Affiliated Faculty:

The Native American and Indigenous Studies offers an academic major at the undergraduate level and a minor at both the undergraduate and graduate level. This interdepartmental course of study examines Native North American cultural and social life, as well as Indigenous cultural and social life globally, including economic, political, and educational systems. Historical and contemporary perspectives of American Indian and global Indigenous experiences are included in this program.

Students may choose a NAIS studies minor to complement a major field of study. Related disciplines include American studies, anthropology, art, ethnic studies, geography, history, law, music, philosophy, political science, and sociology. A minor in Native American and Indigenous Studies provides excellent preparation for teachers, researchers, social workers, healthcare providers, resource managers, economic developers, and legal practitioners.

Gender and Women's Studies

The Gender and Women's Studies Program offers an interdisciplinary course of study that examines the relevance of sex, gender and sexuality in history, societies, and cultures. Students may earn a major, minor, or graduate minor in Gender and Women's Studies, or a minor or graduate minor in Queer Studies.

Program Learning Objectives

Students graduating with a degree in Gender and Women's Studies will have skills to apply in a variety of settings indicated by their ability to:

- Engage in intersectional, interdisciplinary feminist analysis.
- Analyze socio-historical and contemporary power dynamics underpinning group relations, social institutions, and systems of representation.
- Situate their analyses within various place-based contexts, including the rural, local, community, transnational, and global.
- Understand and articulate the history, strategies, and goals of interconnected movements for social justice.
- Demonstrate mastery of critical thinking skills necessary to succeed in diverse, 21st century work forces and communities.

NOTE: Gender & Women's Studies recently changed all course prefixes to GWST (from WMST). All former WMST courses will count toward Gender & Women's Studies degree programs.

Latina/o Studies

The Latina/o Studies program, through an interdisciplinary and comparative approach examines the history, cultures, language and contemporary experiences of Mexicans, Mexican-Americans and other Latinos/ as in Wyoming, and the United States.

Learning Outcomes

Latina/o Studies courses emphasize perspectives that are historical and contemporary, theoretical and practical, as well as critical and aesthetic. These perspectives help to develop an understanding of oppression and resistance, at the individual, institutional, and ideological levels.

Upon completion of the University of Wyoming Latina/o Studies minor curriculum, students will have an awareness and appreciation for the Latina/o experience. Particularly as the Latina/o experience is expressed in the following concepts and principles of organic insight, relational awareness, historical perspective, power for social change, intersectionality, and aesthetics.

1. *Organic Insight* - The development of a contextual framework for understanding one's own and others' experiences in relation to the Latina/o experience.
2. *Relational Awareness* - The development of a theoretical framework for understanding how institutional social structures impact individuals, families, and communities, and in turn, how individuals, families, and communities impact social structures through resistance, social agency, and change.
3. *Historical Perspective* - The development of a critical historical viewpoint for understanding how struggles around social, economic, and political forces have shaped the traditional and contemporary Latina/o Diaspora.
4. *Power for Social Change* - The development of a critical consciousness, which is necessary for a social praxis that combats oppressive racist ideologies and social structures that perpetuate individual and institutional inequalities.
5. *Intersectionality* - Gaining an awareness of the intersection of race, ethnicity, class, gender, and sexual orientation as it plays out organically, relationally, historically, and politically.
6. *Latina/o Aesthetics* - The development of an appreciation and awareness of the aesthetics evident in Latina/o art, music, theatre, literature, and other artistic expressive forms and styles.

Latina/o Studies Minor

Latina/o Studies offers an undergraduate minor. The minor in Latina/o Studies requires 18 credit hours. Two of those courses (6 hours) must include the required foundation courses, and the remaining courses (12 hours) can be selected from the other areas of studies listed below.

Major

African American and Diaspora Studies, B.A.

African American and Diaspora Studies (AADS) offers undergraduates an opportunity to engage in an interdisciplinary examination of the history, culture, and life of African Americans and the African diaspora from ancient times to the present day.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on

developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

COM1 - Communication 1

Credits: 3
College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

A&S College Core

The College of Arts and Sciences requires:

- D - Diversity (3 credits)
- G - Global (3 credits)

Major Requirements

The B.A. in African American and Diaspora Studies consists of 35 credit hours:

Core Courses

15 credit hours of core course requirements:

AAST1000 - Introduction to African American Studies

Credits: 3

Surveys African presence in America. Selected teachings are designed to give the student a concise understanding of the heritage of African people in America.

USP 2003-2014 Code U3D
A&S College Core 2015 ASD

AAST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed INST 2240.
USP 2003-2014 Code U3WB
USP 2015 Code U5C2

AAST2360 - African American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

USP 2003-2014 Code U3CS, U3G
Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST4975 - Independent Research

Credits: 1-3
Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.

Lower Division Course

3 or 6 credit hours of a lower division (1000- or 2000- level) AAST course, excluding core courses. Chose one OR two of the following:

AAST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities. Enrollment preference will be given to We The People FIG students.

Cross Listed NAIS 1030 /AMST 1030 / WMST 1030/LTST 1030.
USP 2003-2014 Code A3D, U3I
A&S College Core 2015 ASD
or

AAST1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY
or

AAST2350 - Introduction to African American Literature

Credits: 3
Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed ENGL 2350.
USP 2003-2014 Code U3D, U3WB
A&S College Core 2015 ASD
Prerequisite: WA/COM1.
or

AAST2360 - African American History

Credits: 3
Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD
or

AAST2370 - Blues and African American Lit

Credits: 3
Max Credit 3

This course examines scholarship on blues music (the first form of African American popular music) as well as literature that employs blues themes. Specific attention is given to the discourse of authenticity

Cross Listed ENGL 2370
or

AAST2450 - Traditional African Religion

Credits: 3

Surveys traditional religions of Africa, both ancient and contemporary.

Cross Listed RELI 2450.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

or

AAST2990 - Topics:

Credits: 1-3 or 3

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in African American & Diaspora Studies not covered by program courses.

USP 2003-2014 Code U3D

Upper Division Courses

6 or 9 credit hours of upper division (3000- or 4000-level) AAST courses. Choose two OR three of the following:

AAST3000 - African American Studies in Music

Credits: 3

Surveys African American music from its origins in Africa to current, popular jazz, rock, soul and rap forms.

USP 2015 Code U5H

or

AAST3010 - The African American Aesthetic

Credits: 3

Examines interrelationship of the creative process with cultural and philosophical motifs, as well as the spiritual and the artistic amongst African people on the continent and Diaspora.

Prerequisite: AAST 1000 or any AAST 2000-level course.

or

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

USP 2003-2014 Code U3CS, U3G

Prerequisite: AAST 1000 or any AAST 2000-level course.

or

AAST3260 - African Spirits in the New World

Credits: 3

Begins with Yoruba roots in Africa travels with the African Diaspora focusing on spirit possession in Haitian Vodou, Cuban Santeria, Jamaican Revival Zion, Jamaican Rastafarianism, Brazilian Candomblé, and "Black Church" in the United States using ethnography and postcolonial theory of religious studies.

Cross Listed RELI 3260.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: AAST 1000 or any AAST 2000 level course or RELI 1000.

or

AAST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed HIST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/ HIST 2360.

or

AAST3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed INST 3933 /PHIL 3933.

USP 2015 Code U5H

A&S College Core 2015 ASG

Restricted Restricted to junior or senior class standing.

Prerequisite: A prior course in AAST, INST or PHIL.

or

AAST4000 - Black Freedom Movement, AAST 1955- Present

Credits: 3

Presents the struggle of African Americans for self-definition, self-development, and self-determination from the inception of the modern civil rights movements to the contemporary period.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 USD

Prerequisite: 3 hours of AAST courses.

or

AAST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed HIST 4020.

USP 2003-2014 Code U3D, U3CH

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

or

AAST4050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 4050.

Dual Listed AAST 5050.

Prerequisite: junior standing and instructor consultation.

or

AAST4100 - African American Religious Culture

Credits: 3

Mid-level writing-intensive seminar. Comparative study of African American religious celebration, primarily in the context of Afro-Christianity, but touching on Islam, Candomble, "Voodoo," Santeria, and Rastafarianism.

Cross Listed RELI 4100.

USP 2003-2014 Code WC, D

USP 2015 Code COM3

A&S College Core 2015 ASD

Prerequisite: WB and one of the following: AAST 1000 or any AAST 2000-level course or RELI 1000.

or

AAST4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 4160.

Dual Listed AAST 5160.

USP 2003-2014 Code U3D, U3CH

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 9 credit hours in AAST or COJO.

or

AAST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 4233 and GWST 4233; dual-listed with AAST 5233.

USP 2003-2014 Code U3WC

USP 2015 Code U5WC, U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

or

AAST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Former Course Number [AAST 4200]

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

or

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

or

AAST4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed Cross list with ENGL 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

or

AAST4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 4455.

Dual Listed AAST 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

or

AAST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed LTST 4675 /GWST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of
or

AAST4970 - Internship in AAST

Credits: 1-12

Designed for students to utilize the knowledge and skills obtained in their program of study to be applied at an organization or institution. Students will provide a job description, sign an internship contract, keep daily work journals, provide work samples, submit a paper, and include a final evaluation by their Internship supervisor.

Prerequisite: 9 hours in AAST courses.
or

AAST4975 - Independent Research

Credits: 1-3

Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.
or

AAST4990 - Topics:

Credits: 3

In-depth study of a topic not offered as regular course.

Prerequisite: COM1.

Foreign Language

8 credit hours of a single foreign language. The courses below list some, but not all, possible options:

ARBC1010 - First Year Arabic I

Credits: 4

Introduces beginning language learners to the Arabic writing system and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) at word, phrase and sentence levels.

USP 2015 Code U5H

and

ARBC1020 - First Year Arabic II

Credits: 4

Introduces beginning language learners to the fundamentals of Modern Standard Arabic and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) and practicing them in a variety of academic contexts.

USP 2015 Code U5H

Prerequisite: ARBC 1010 or LANG 1010.

or

FREN1010 - First Year French I

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

and

FREN1020 - First Year French II

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: FREN 1010 or two years of high school French.

or

GERM1010 - First Year German I

Credits: 4

Explores fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

and

GERM1020 - First Year German II

Credits: 4

Examines fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: GERM 1010 or two years of high school German.
or

JAPN1010 - First Year Japanese I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered fall semester)

USP 2015 Code U5H
and

JAPN1020 - First Year Japanese II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered spring semester)

USP 2015 Code U5H

Prerequisite: JAPN 1010 or equivalent.
or

LATN1010 - First Year Latin I

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered fall semester)

USP 2015 Code U5H
and

LATN1020 - First Year Latin II

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered spring semester)

USP 2015 Code U5H

Prerequisite: LATN 1010 or equivalent.
or

SPAN1010 - First Year Spanish I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

and

SPAN1020 - First Year Spanish II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: SPAN 1010 or two years of high school Spanish.

Additional Requirements

Grade Requirements

AAST classes applied to AAST degrees must be passed with a grade of C or better.

Additional Information

In order to provide a broader range of relevant and enriching courses, in any given year the program in AAST offers topics courses and courses cross-listed with other majors and departments.

American Studies, B.A.

Explore cultural experiences past and present through interdisciplinary study of American lives, communities, and ideas. Writing, critical thinking, and internship opportunities prepare you for careers in education, law, business, community non-profits, public institutions, or graduate study. Flexible 2nd major for any field and for transfer students.

Additional Information

Undergraduate Major

The American Studies B.A. frames and develops each student's individual interests, and allows students to include courses from any program and department that sustain a student's engagement with their particular emphasis. Individual programs of study are as varied as our students.

We value each student as a person, and understand that an education is much more than a list of courses. Our advising is central in supporting each student's path and success through the major and beyond the degree.

Examples of concentrations that draw on courses outside American Studies - interests which we then integrate in our independent studies, internships, and the senior seminar - include sports studies, popular music history, comparative ethnic studies, marketing, military history, sustainability, disability advocacy, museum studies, philosophy of science, environmental studies, public health and social justice, and the U.S. in international perspectives. Each student

develops a concentration of study with their American Studies advisor with ample room to combine courses and interests into a coherent undergraduate education.

The American Studies B.A. can be an attractive second major for students in any UW degree program where cultural context enriches and expands work in their professional or scholarly field. The flexible nature of our B.A. allows us to work effectively with students changing majors at any point in their undergraduate experience as well as transfer students.

Program Learning Outcomes

Students graduating with a B.A. in American Studies integrate study from several fields with their study in American Studies courses, in individual programs of study. The American Studies B.A. prepares students to enter graduate and professional programs, enter education certification programs, and work in community organizations and other public professional settings. Coursework in American Studies prepares students to:

- Interpret American experiences and creative expressions by applying appropriate approaches to words, narratives, images, material objects, communities, built environments, cross-cultural comparison, continuities and discontinuities with the past in a range of American cultural settings.
- Understand the processes of diversity experience including their own, through study of identity formation, performance of identity, stereotyping, contact, memory, and national identity.
- Demonstrate critical analysis, interpretation, or insight, through effective communication primarily in writing but also in speaking (when appropriate, performance or display may embody these as well), as demonstrated in analytically coherent interpretive writing, authoritative, informed oral presentation, and well-documented, visually effective performance or display (where appropriate).
- Apply American Studies methods field-based courses and/or internships, through use of Studies approaches and competencies in non-classroom settings, as demonstrated in field course or internship evaluations and students' final reports.

Internship

The internship experience is essential for students specializing in public sector American studies. The American Studies program has an active program of scholarship-supported internships that can place students in work environments in Wyoming, other parts of the U.S., or in selected foreign countries.

Language

Because American Studies is both an international field with scholars all over the world, and the U.S. has transnational significance, **we strongly encourage students to take 2 years of language study** to achieve meaningful access to skills as readers, scholars, and travelers, and consider participating in an international exchange. Some languages currently in demand by American Studies students include Spanish, Arabic, and Japanese.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an

opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Arts and Sciences Core

College of Arts and Sciences Core

D - Diversity Credits: 3

G - Global Credits: 3

Curriculum

Through the following curriculum, students develop individual programs of study, with their advisers, to understand and engage American cultures.

Students pursuing Program Honors should also write an undergraduate thesis. Contact the Program Director for more details.

Foundation (12 credit hours)

- AMST2010 - Introduction to American Studies (3 credit hours)
- One course at the 1000- or 2000-level in an interdisciplinary field, including American History, or from departments and programs such as AADS, ENR, INST, GWST, LTST, NAIS, RELI, or appropriate courses transferred from other institutions, to be named in the program of study in consultation with an American Studies advisor. (3 credit hours)
- Two courses at any level outside AMST, from programs in The School of Culture, Gender, and Social Justice or appropriate substitutes in consultation with an American Studies advisor. (6 credit hours)

Concentration (27 credit hours)

Core (9 credit hours)

Each student must take three AMST courses at the 3000-4000 level, excluding the senior seminar. These seminars are designed to maintain an interdisciplinary view of American culture and to foster an American Studies community. (9 credit hours)

Theme (18 credit hours)

An American Studies theme is devised, in consultation with the student's adviser. Typical themes include: American diversity, environment and society, material culture and everyday life, visual culture and media, American cultural history, American institutions and public culture, the United States in international perspective. The theme must include a minimum of 6 credit hours and a maximum of 9 credit hours in a single discipline. Up to 3 credits can be granted for courses at the 1000-2000 level. (18 credit hours)

Capstone (6 Credits)

As part of the 6 credit hours of senior capstone requirements, each student must complete 3 credit hours of Senior Seminar. The additional 3 credit hours can be through either Independent Study or Internship.

AMST4985 - Senior Seminar

Credits: 3

With AMST 4010 or AMST 4970, completes the capstone coursework in AMST. Identifies a broad intellectual tradition in American Studies as foundation for student's research interests; builds a specific scholarly context appropriate to student's research; culminates in a substantial piece of written research appropriate in an identified subfield of American Studies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: senior standing in American studies or consent of program director.

AND

AMST4010 - Independent Study

Credits: 1-3

Max Credit 6

For upper division students in any major who can benefit from independent study in American Studies with minimal supervision.

Dual Listed AMST 5010.

Prerequisite: 3 hours in American Studies and approval of instructor.

OR

AMST4970 - Internship

Credits: 1-3

Max Credit (Max. 6)

Gives undergraduate students practical experience by working on a project at a public institution, agency or educational/cultural organization. Offered for S/U only.

Prerequisite: junior standing, completion of AMST 2010 and 12 hours in major and consent of instructor.

Gender and Women's Studies, B.A.

Provides foundational knowledge in historical and contemporary issues related to sex, gender, and sexuality. Upon completion, students will be able to apply intersectional feminist and gender theories to interdisciplinary research and practice.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

A&S College Core

The College of Arts and Sciences requires:

- D - Diversity (3 credits)
- G - Global (3 credits)

Requirements

The GWST major requires 30 credit hours of GWST courses, including 9 credits of core courses and 21 credits of elective courses.

Please note, curriculum requirements reflect updates effective Fall 2022, so any courses completed under the previous requirements will still count. Details are listed below.

Introductory Core: 3 Credits

Complete ONE course from the following:

GWST1080 - Intro Gender & Women's Studies

Credits: 3

This course serves as an introduction to the field of Gender and Women's Studies. Students will examine a range of GWST topics, gain knowledge of gender, feminist, and intersectional theories, and learn to apply course concepts and frameworks to analyses of socio-political and representational issues, primarily in U.S. contexts.

Cross Listed ENGL 1080.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 3

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP 2003-2014 Code U3C, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Note: If taken prior to Fall 2022, GWST 1900, Women & Leadership can satisfy this requirement.

Interdisciplinary Theory Core: 6 Credits

Complete TWO courses from the following:

Core course required for all majors:

- GWST 3XXX: Gender, Race, Sex & Soc System
(Will be offered Spring 2023)
- Note: If taken prior to Fall 2022, these courses may satisfy this requirement: GWST 3710, Gender & Humanities; GWST 2500, Gender & Society

Choose ONE of the following:

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 12 hours of women's studies.

GWST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 4430.

Dual Listed GWST 5430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

Electives: 21 Credits

Complete SEVEN courses or 21 credit hours from among the following:

GWST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed LTST 1030/AAST 1030/AMST 1030/NAIS 1030.

USP 2003-2014 Code U3D, U3I

A&S College Core 2015 ASD

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

GWST2060 - Topics in Women's Studies

Credits: 1-4

Popular and current topics in women's studies.

GWST2070 - Gender and Religion

Credits: 3

Aims to help students understand how religion constructs and reinforces gender roles in religion and society. Looks at traditional gender roles in Christianity and the transformation they have undergone in the past century or so.

Cross Listed RELI 2070.

GWST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed HIST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

GWST2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and subjectivity, and the politics of health, sexuality, and care.

Cross Listed WIND 2700.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/AMST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

GWST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/ Chicana studies.

Cross Listed LTST 3200.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100.

GWST3300 - Psychology of Gender

Credits: 3

In this course, we will examine a variety of psychological theories and research on the experiences and behaviors of men and women. We will study attitudes about gender, theories of gender development, and research about similarities and differences between men and women.

Cross Listed PSYC 3300.

Prerequisite: A grade of C or better in PSYC 1000.

GWST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both oppression and liberation.

Cross Listed AMST 3400.

USP 2003-2014 Code U3CH, U3D

Prerequisite: WA.

GWST3710 - Gender and Humanities

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/ART 3710.

When Offered (Offered once a year)

USP 2003-2014 Code U3CH

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

GWST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST/ LTST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

GWST4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGECE 4200.

Dual Listed GWST 5200.

A&S College Core 2015 ASD

Prerequisite: AGECE 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST4300 - The Politics of Sexuality

Credits: 3

Addresses issue of how sexuality has become gendered with different meanings for both males and females as to reproductive behavior, especially how women's bodies are defined in sexual terms.

When Offered (Offered every other year)

Prerequisite: GWST 1080, 3500 or GWST 3710.

GWST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed Cross-listed with AAST 4233 and COJO 4233;

Dual Listed dual-listed with GWST 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout

the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and RELI 4335.

Dual Listed GWST 5335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

GWST4360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed NAIS 4360/SOC 4360.

Prerequisite: 6 hours of 2000-level NAIS classes.

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

GWST4500 - Special Topics in Women's Studies

Credits: 1-4

Presents current research issues by visiting and regular faculty.

Prerequisite: GWST 1080, 3500, GWST 3710 or consent of instructor.

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

GWST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/LTST 4650/INST 4650.

Dual Listed GWST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/LTST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST4440 - Queer Life Through Memoir

Credits: 3

This reading intensive class explores queer life in the late 20th and early 21st centuries in the United States of America. Through close reading and analysis of the texts and discussions, issues of sexuality, race, class, violence and place are explored.

Cross Listed GWST 5440

Prerequisite: GWST 2000 , GWST 4430 , or GWST 5430 or graduate standing, or permission of instructor

GWST4960 - Women's Bodies, Women's Minds

Credits: 3

Explores women's physiologic and psychologic development and the influences of patriarchal society upon the interpretation of what constitutes normalcy across the female life cycle. Historical, cultural and contemporary attitudes

of the health care system and women's perspectives on menstruation, childbearing, breastfeeding and menopause will be analyzed.

When Offered (Offered every other year)

USP 2003-2014 Code U3CS

Prerequisite: upper division status.

GWST4965 - Senior Honors Project

Credits: 3

The student consults with the director/faculty supervisor to identify a topic and (a) produces a 30-40 page research paper or (b) a shorter 15-20 page paper plus a creative or service learning component, showing originality, firm knowledge of the discipline(s), and solid research skills, with a thesis defense as culmination.

Former Course Number [4980]

Prerequisite: GWST 4700, or concurrent enrollment with instructor consent, and a 3.500 GPA.

GWST4970 - Internship

Credits: 3

Max Credit (Max. 12)

Students gain practical experience in the application of principles learned in women's studies courses. Students will work with the director of women's studies internships to select a site; will intern approximately ten hours per week in the host organization; and will complete written assignments which reflect the student's work.

Former Course Number [4000]

Prerequisite: 12 semester hours of WMST coursework,

GWST4975 - Independent Studies

Credits: 1-4

Max Credit (Max. 9)

Offers the advanced student the opportunity to pursue a topic of interest with the assistance and direction of an instructor in women's studies.

Former Course Number [4970]

Prerequisite: 6 hours in women's studies or consent of instructor.

Grading & Honors

Grading Requirements

All GWST core courses and at least 15 credit hours of GWST electives must be completed with a "C" or better.

To be eligible for internships, students must have a minimum GPA of 3.300.

Honors in Gender & Women's Studies

Honors in Gender and Women's Studies recognizes academically ambitious students who have excelled in their undergraduate careers, and who are ready for graduate school and/or employment in the public or private spheres. Requirements include an overall minimum GPA of 3.500 and the completion of GWST 4965, Senior Honors Project.

Honors in GWST also requires the completion of 3 semesters of foreign language or sign language, or a concentration in quantitative analysis and research methods, including statistics.

Students in UW Honors Program, McNair Scholars Program, or other departments that require completion of an independent research project may dovetail their honors work in GWST with those programs.

Additional Information

Students in GWST are encouraged to work with a faculty advisor to develop an individualized plan of study. Contact the program director, Dr. Michelle Jarman (mjarman@uwyo.edu), for more information.

Native American and Indigenous Studies, B.A.

The curriculum for the 30-hour Bachelor of Arts degree in Native American and Indigenous Studies will encourage students to understand and appreciate the roles of history, culture, and politics in the development of tribal world views.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

COM1 - Communication 1

Credits: 3
College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

A&S College Core

The College of Arts and Sciences requires:

- D - Diversity (3 credits)
- G - Global (3 credits)

Major Requirements

Foundation Courses

Foundation Classes 9 Hours Required. Choose from the following:

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS2210 - North American Indians

Credits: 3

Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed ANTH 2210.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS & Crosslisted Courses

Choose seven (7), for a total of 21 credit hours, courses from the following:

NAIS1010 - Beginning Indigenous Language

Credits: 4

Fundamentals of grammar, conversation, composition, and reading.

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP 2003-2014 Code U3I, U3L

A&S College Core 2015 ASD

NAIS2010 - Intermediate Indigenous Language

Credits: 4

Second level fundamentals of grammar, conversation, composition, and reading.

Prerequisite: NAIS 1010.

NAIS2060 - Topics

Credits: 1-4

Max Credit (Max. 6)

Popular and current topics in American Indian studies.

NAIS2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed ENGL 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA course.

NAIS2345 - American Indians in Hollywood Film

Credits: 3

Examines the ways Hollywood films have constructed various forms of racial identity for American Indians.

Cross Listed ENGL 2345.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA.

NAIS3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the Plains region of the U. S. from prehistory to the present.

Cross Listed HIST 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

NAIS3010 - Proficient Indigenous Language

Credits: 4

Emphasizes the development of listening, speaking, reading, and writing so as to help students function effectively in the tribal cultural context of which the language is a part.

Prerequisite: NAIS 2010.

NAIS3100 - Tribal Literatures of the Great Plains

Credits: 3

Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed ENGL 3100.

USP 2003-2014 Code U3D, U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of NAIS or ENGL.

NAIS3200 - Indigenous Peoples and the Environment

Credits: 3

Understand the historical, political, and socio-economic forces that have shaped the relationships of Indigenous peoples to their environments, and be able to discern the similarities and dissimilarities of Indigenous issues across international borders. The course may include a study abroad component.

Prerequisite: 6 hours NAIS credit.

NAIS3300 - Federal Indian Law

Credits: 3

Survey of law that applies to individual Indians and tribal governments. In particular, explores the legal relationships among, and relative jurisdictions of federal, tribal, and state governments. Specific topics include civil and criminal jurisdiction, taxation, family law, hunting and fishing, and gaming regulations.

Prerequisite: NAIS 1001 or NAIS 1350.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

NAIS4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed HIST 4000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

NAIS4010 - Advanced Indigenous Language

Credits: 4

Stresses the usage of language through composition, conversation, oral presentation, and grammar review.

Prerequisite: NAIS 3010.

NAIS4020 - Internship

Credits: 1-12

Max Credit (Max. 12)

Requires active participation and service to an Indigenous community or organization in US or elsewhere. A written agreement among the student, the NAIS director or NAIS faculty mentor, and an on-site supervisor is required. NAIS Majors must take at least four credit hours.

Prerequisite: 9 hours of NAIS courses.

NAIS4100 - Tribal Government

Credits: 3

Examines traditional systems of tribal governance; the establishment of contemporary tribal governments; stakeholders and their goals; factors influencing tribal government operations, including the federal trust relationship, plenary power, tribal federal and tribal-state relations; powers of tribal governments; and the future of tribal governments.

Prerequisite: 6 hours of NAIS courses, including NAIS 1001, and/or NAIS 1350.

NAIS4110 - Educational Foundations in American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political, and societal factors before, during, and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed EDCI 4110.

Dual Listed NAIS 5110.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

NAIS4200 - Indigenous Communities Abroad: International Travel

Credits: 4

Devoted to study/ travel related to Indigenous peoples abroad. The specific topic will be determined each time the class is offered. Two weeks of international travel will follow sixteen hours of on-campus instruction.

Prerequisite: 6 credits in NAIS.

NAIS4340 - Natural Resource Management on Western Reservations

Credits: 3

Examines natural resource management techniques on western reservations. Focus is on the management and planning of water, grazing, extractive industries, and forestry. Fieldwork on the Wind River Indian Reservation is included.

Cross Listed GEOG 4340.

Prerequisite: 6 hours of 2000-level NAIS courses.

NAIS4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed ENGL 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

NAIS4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed HIST 4466.

Dual Listed NAIS 5466.

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

NAIS4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed ANTH 4740.

Prerequisite: ANTH 2000 or consent of instructor.

NAIS4975 - Independent Study

Credits: 1-4

Max Credit (Max. 8)

Directed, independent study in American Indian issues with American Indian Studies affiliated faculty. Students must initiate a project with an appropriate faculty member and have it approved by the program director.

Prerequisite: consent of instructor and 6 hours of NAIS.

NAIS4990 - Special Topics

Credits: 1-4
Max Credit (Max. 9)

Current research topics presented by regular and visiting faculty.

Prerequisite: 3 hours of NAIS courses.

Additional Requirements

Grade Requirements

NAIS classes applied to NAIS degrees must be passed with a grade of C or better. This policy applies to NAIS classes completed fall semester 2012 and beyond.

Additional Information

Cross-Listing & NAIS Courses

In order to provide a broader range of relevant and enriching courses, in any given year, the program in Native American and Indigenous Studies offers topics courses (NAIS 2060 or NAIS 4990) that are frequently cross-listed with other majors and departments. Any such courses may be counted towards a student's 21 hours of required courses beyond the foundational courses.

If a student chooses to take more than one topics course in the same semester, it may require an override within the registration system. If you seek to enroll in a topics course and have trouble doing so, please contact scgsj@uwyo.edu.

Declaring a NAIS Major/Minor

Please complete and submit the "Change of Advisor, Major, Minor, Option/Concentration, College, and or Graduate Status" form available on the Office of the Registrar's website.

Minor

African American and Diaspora Studies Minor

Thematic tracks in the major or minor are optional:

- History
- Culture & Aesthetics
- Politics & Law
- Rhetoric & English
- Religion & Philosophy
- Media Studies

Minor Requirements

The minor in African American and Diaspora Studies consists of 21 credit hours:

- 9 credit hours of core course requirements
- 9 credit hours of electives (excludes core courses)
- 3 credit hours of senior thesis seminar (AAST 4975, Capstone)

American Studies Minor

Students may minor in American Studies through a program of 24 credit hours of study, with credit hours evenly distributed between lower and upper division courses, which include at least 3 courses in American Studies (with the AMST course prefix), at any level (except AMST 1101), in consultation with and depending on approval by a faculty advisor in American Studies. Coursework for the minor may be matched with a student's major requirements in related disciplines and fields.

Gender and Women's Studies Graduate Minor

Provides advanced, interdisciplinary, intersectional training in feminist and gender theory and praxis. This minor offers crucial knowledge and skills to students pursuing a wide range of graduate degrees and professional paths.

Requirements

A total of 12 credit hours are required to complete the Graduate Minor in GWST. This includes the following:

GWST5710 - Feminist Theoretical Perspectives

Credits: 3

Intensive introduction to the epistemology and application of a wide range of trans-historical, trans-cultural, and trans-national feminist theories. Students will be asked to apply self-selected feminist theories to their own thesis work and graduate fields, as well as to current examples of sex, gender, gender performance, and gendered coding in American media.

Prerequisite: graduate standing.

- An additional 9 credit hours of GWST electives, including 6 credits at the 5000-level.
- When practical, students should include a GWST faculty member on their thesis, dissertation or Plan B committees. Students in professional programs without a culminating research project can meet this requirement through alternative means.

Additional Information

Contact the program director, Dr. Michelle Jarman (mjarman@uwo.edu), to discuss individual plans of study.

Gender and Women's Studies Minor

Provides foundational knowledge in historical and contemporary issues related to sex, gender, and sexuality. Upon completion, students will be able to apply intersectional feminist and gender theories to interdisciplinary research and practice.

Requirements

Students must complete 18 hours of GWST course work. Nine of the required hours must be 3000-level or above. At least 15 credit hours must be completed with a grade of "C" or better.

Core Course: 3 Credits

Complete at least ONE of the following core courses.

Note: some of these courses have prerequisites, so taking a lower and upper level course from this list is recommended, but not required:

GWST1080 - Intro Gender & Women's Studies

Credits: 3

This course serves as an introduction to the field of Gender and Women's Studies. Students will examine a range of GWST topics, gain knowledge of gender, feminist, and intersectional theories, and learn to apply course concepts and frameworks to analyses of socio-political and representational issues, primarily in U.S. contexts.

Cross Listed ENGL 1080.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 3

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP 2003-2014 Code U3C, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

- GWST 3XXX Gender, Race, Sex & Soc Systems

Note: will be offered Spring 2023

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 12 hours of women's studies.

Note: If taken prior to Fall 2022, these courses may also satisfy this requirement: GWST 3710, Gender & Humanities; GWST 2500, Gender & Society; GWST 1900, Women & Leadership.

Electives: 15 credit hours

The additional 15 credit hours can be selected from the complete slate of GWST electives, including those listed above.

Note: a minimum of 12 credit hours in the minor must be exclusive of hours earned in the student's major.

Additional Information

Students in the GWST minor and major are encouraged to work with a faculty advisor to develop an individualized plan of study. Contact the program director, Dr. Michelle Jarman (mjarman@uwyo.edu), for more information.

Latina/o Studies Minor

Latina/o Studies offers an undergraduate minor. The minor in Latina/o Studies requires 18 credit hours. One of those courses (3 hours) must include the required foundation courses, and the remaining courses (15 hours) can be selected from the other areas of studies listed below.

Minor Requirements

3 Hours of Foundation Course

LTST1300 - Introduction to Latina/o Studies

Credits: 3

The U. S. Latina/o immigrant experience is a particular focus of this course, including its role in the incorporation of Latinos into U. S. society. Through readings, presentations, class discussion, videos, and other activities, students examine historical and contemporary issues affecting Latinos including but not limited to immigration, language, identity, national origin, education, politics, employment, and economic mobility.

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 1300]

3 Hours of History or Social Science

LTST2370 - Chicano History : Origins to 1900

Credits: 3

General survey that traces the geographic distribution and historical processes that have shaped the life experiences, socio-economic development and cultural contributions of peoples of Mexican descent in the United States from their indigenous and Hispanic origins to the end of the 19th century. Cross list with GEOG 2370/HIST 2370.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 2370]

LTST2385 - Chicano History: 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed HIST 2385.

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 2385]

LTST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST 3800/GWST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Former Course Number [CHST 3800]

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

3 Hours of Culture, Arts, and Humanities

LTST2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanismo. Studies literature of the Hispanic Southwest, Mexican American folklore and the Chicano and post-Chicano movement.

Cross Listed ENGL 2360.

USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD
Former Course Number [CHST 2360]

Prerequisite: WA.

LTST3560 - Chicano Community Organizations

Credits: 3

Introduction to the origins, development and contemporary status of community organizations and service agencies in the Mexican American community in general and in the Wyoming and Rocky Mountain regions.

Former Course Number [CHST 3560]

Prerequisite: LTST 1100.

LTST4100 - U.S. Latina/o Theater

Credits: 3

Designed to provide an overview of United States Latina/o Theater. Through a variety of delivery methods, students are instructed on the various categories that directly impact U. S. Latina/o Theater such as political theatre, gay/lesbian theatre, border issues, race, class, gender, and sexuality.

Cross Listed WMST 4100.

Dual Listed LTST 5100.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [CHST 4100]

Prerequisite: 6 hours of LTST or WMST.

LTST4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed ENGL 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 4470]

Prerequisite: LTST 1100 and WA.

3 Hours of Gender, Race, Class, and Sexuality

LTST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed GWST 1030/NAIS 1030/AAST 1030/AMST 1030.

USP 2003-2014 Code U3D, U3I

A&S College Core 2015 ASD

Former Course Number [CHST 1030]

LTST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/Chicana studies.

Cross Listed GWST 3200.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 3200]

Prerequisite: LTST 1100 or junior standing.

LTST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/INST 4650/GWST 4650.

Dual Listed LTST 5650.

Former Course Number [CHST 4650]

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

LTST4675 - U.S. Women of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/GWST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Former Course Number [CHST 4675]

Prerequisite: junior standing and/ or a combination of 3-6 hours of any level of LTST, WMST, or AAST coursework.

6 Hours of Electives

(or any courses listed above not yet taken)

LTST2060 - Special Topics in:

Credits: 3

Former Course Number [CHST 2060]

LTST3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed SPAN 3080.

USP 2015 Code U5H

Former Course Number [CHST 3080]

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

LTST4485 - USLatino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U. S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives responses are stressed.

Cross Listed HIST 4485/INST 4485.

Former Course Number [CHST 4485]

Prerequisite: 9 hours of LTST, HIST, and/ or INST related coursework.

LTST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century, especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U. S. , incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed HIST 4496.

When Offered (Normally offered fall semester)

Former Course Number [CHST 4496]

Prerequisite: 9 hours of HIST or INST.

LTST4975 - Independent Studies

Credits: 1-3

Max Credit (Max 6)

Independent study in Chicano studies research.

Former Course Number [CHST 4975]

Prerequisite: junior standing.

LTST4990 - Topics in Chicano Studies

Credits: 1-3

Max Credit (Max 6)

A special topics course through which regular and visiting faculty can explore regarding specialized or new research topics regarding Chicano studies.

Former Course Number [CHST 4990]

Prerequisite: junior standing.

Native American and Indigenous Studies Graduate Minor

A graduate minor in Native American and Indigenous Studies is comprised of 12 hours with at least 6 hours at the 5000 level. It is expected that each graduate minor student and his/her graduate committee, at least one member of whom will be from NAIS, will determine the specific courses to be taken. It is recommended that one of the four classes selected be a 3 credit NAIS 5000 Independent Study. This class will provide a research experience in the discipline of Native American and Indigenous studies that may support a master's thesis or doctoral dissertation. The research

expectation in NAIS can be satisfied by the 3 credit hour Independent Study and/or by the thesis or doctoral dissertation.

Students graduating with a graduate minor degree in Native American and Indigenous studies will be able to: 1) Make apparent in masters'-level research the interdisciplinary connections between Native American and Indigenous studies and the primary field of graduate study; 2) Integrate American Indian studies research methods with the research methods used in the primary field of graduate study; and 3) Demonstrate in writing the ability to understand a variety of subjects from a tribal perspective.

Native American and Indigenous Studies Minor

Students graduating with an undergraduate minor degree in NAIS will be able to: 1) Explain the concept of tribal sovereignty and how tribal sovereignty is both restricted and acknowledged by the federal trust relationship and by relationships with states; 2) Understand the development of modern tribal governments and their functions and importance in contemporary society; 3) Understand and appreciate the roles of history, culture, and politics in the development of tribal world views, world views that relate to modern life and contemporary issues of concern for Native American and Indigenous peoples; 4) Identify historical, cultural, and political diversity and significance in Native oral traditions and written literatures; 5) Recognize stereotypes about Native American and Indigenous peoples and explain why these stereotypes were created and why they are sustained in modern society; and 6) Understand from the perspective of American Indian peoples, historical experiences and contemporary issues in North America.

Minor Requirements

The minor in Native American and Indigenous Studies requires 18 credit hours. Twelve credit hours must come from the following courses, three credit hours must be in either NAIS 1001 or NAIS 1350.

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS2210 - North American Indians

Credits: 3

Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed ANTH 2210.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed ENGL 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA course.

- Plus six hours of NAIS elective courses

Queer Studies Graduate Minor

Immerses students in advanced theoretical, historical and contemporary issues related to sexuality. Upon completion, students will be able to analyze systemic exclusion/inclusion, conduct independent interdisciplinary analysis through a queer studies lens, and apply queer theory to practice.

Requirements

A graduate minor in Queer Studies requires the completion of 12 credit hours, including AMST 5430 - Queer Theory/ GWST 5430 - Queer Theory , a minimum of 6 hours at the 5000+ level, and a capstone experience or independent study. For committee-based degree programs with queer studies content, it is expected that the student will include one committee member from Queer Studies faculty.

Faculty Advisory

An interdisciplinary, independent Queer Studies committee advises the program on curriculum, scheduling and coordination. A faculty advisor is assigned to the student on declaration of the minor.

The faculty advisory committee for the minor includes:

- Rachel Watson, Director Queer Studies, Chemistry
- Ulrich Adelt, American Studies, African American & Diaspora Studies
- Ruth Olga Bjorkenwall, Politics, Public Affairs & International Studies
- Christine Boggs, Ellbogen Center for Teaching & Learning
- Catherine R. Connolly, Gender & Women's Studies
- Danielle Renee Cover, Law
- Michelle Jarman, Disability Studies, Gender & Women's Studies
- Barbara Ellen Logan, History
- Jamie Snyder, Criminal Justice & Sociology
- Lilia Soto, American Studies, Latino/a Studies
- Jennifer Tabler, Criminal Justice & Sociology

Please contact the program director, Rachel Watson (RWatson@uwyo.edu), for more information.

Queer Studies Minor

Immerses students in theoretical, historical and contemporary issues related to sexuality. Upon completion, students will be able to analyze systemic exclusion/inclusion, conduct independent interdisciplinary analysis through a queer studies lens, and apply queer theory to practice.

Requirements

The Queer Studies minor requires the completion of 18 credit hours, including GWST 2000 - Introduction to LGBTQ/NS Studies and nine or more credits at the 3000-level or above. Each semester, students, in consultation with a queer studies advisor, will choose elective courses. A capstone project or internship is required but can be variable and determined in consultation with an advisor.

Faculty Advisory

An interdisciplinary, independent Queer Studies committee advises the program on curriculum, scheduling and coordination. A faculty advisor is assigned to the student on declaration of the minor.

The faculty advisory committee for the minor includes:

- Rachel Watson, Director Queer Studies, Chemistry
- Ulrich Adelt, American Studies, African American & Diaspora Studies
- Ruth Olga Bjorkenwall, Politics, Public Affairs & International Studies
- Christine Boggs, Ellbogen Center for Teaching & Learning
- Catherine R. Connolly, Gender & Women's Studies
- Danielle Renee Cover, Law
- Michelle Jarman, Disability Studies, Gender & Women's Studies
- Barbara Ellen Logan, History
- Jamie Snyder, Criminal Justice & Sociology
- Lilia Soto, American Studies, Latino/a Studies
- Jennifer Tabler, Criminal Justice & Sociology

Please contact the program director, Rachel Watson (RWatson@uwyo.edu), for more information.

Graduate

American Studies, M.A.

The American Studies M.A. is an interdisciplinary cultural studies professional development degree. M.A. graduates work in public settings, including historic preservation organizations, historic sites, museums, collections, and other non-profit organizations.

Information

Graduate Study

The American Studies M.A. is an interdisciplinary professional development degree in a committed learning community that builds on students' research interests, accomplishments, experiences, and career goals working with American cultural contexts past and present. After the M.A., our alums seek further professional specialization in law, education, writing, library and information science, and other fields; pursue Ph.D.'s in academic careers in American Studies and other scholarly areas including ethnic studies, cultural geography, literature, religious studies, anthropology, history, ethnomusicology, among others; and work professionally in public settings, including historic preservation organizations, historic sites, museums, collections, and other non-profit, community or governmental organizations.

The M.A. is a 2-year program for students enrolled full-time, culminating in a major research project, either a "Plan A" thesis, or a "Plan B" non-thesis portfolio of work. We work frequently with part-time M.A. students to accommodate other demands on students' time. We encourage the development of emergent, innovative formats and project types as valuable contributions to contemporary American studies practice, relevant to a student's professional development plans.

Because American Studies is an international field with scholars all over the world, and the U.S. has significant impacts transnationally, M.A. Students from outside the U.S. are a regular part of our M.A. cohort, and we encourage our M.A. students to consider semester exchanges abroad. The Program also supports American Studies M.A. student and faculty participation in the annual biennial international conferences.

All M.A. students complete at least 15 credit hours in American Studies courses: 2 required theory and methods courses in the Program (AMST 5500 and AMST 5510), and 3 graduate seminars in American Studies. The remainder of coursework - 12 credits for those completing a thesis, or 15 credits for those completing non-thesis portfolios - can be drawn from graduate-level coursework in any area of study. Most of our M.A. students complete 1-3 credit internships as part of their coursework, in public or organizational sites in Laramie, elsewhere in Wyoming or the U.S., and occasionally abroad as well. M.A. students' paths through their programs of study are as varied as our students.

Program Learning Outcomes

Students graduating with an M.A. in American Studies integrate their educational backgrounds, research and professional interests, and coursework at the M.A. level inside and outside American Studies, in individual programs of study, to professionally engage American cultural production and communities in preparation for professional work or advanced graduate study. Students earning the M.A. in American Studies, either completing a thesis or pursuing the non-thesis Plan B project, are prepared to:

- Interpret a variety of objects significant to the study of American cultures, including words, narratives, images, material objects, communities, built environments, identities, cross-cultural and/or international perspectives, continuities and discontinuities with the past in a range of cultural settings.
- Demonstrate professional competence in writing and speaking in error-free expository prose, authoritative oral presentation, insightful use of relevant source material reflecting critical reading skill, prose style commensurate with professional responsibility, and prose content commensurate with professional responsibility.
- Produce professional research for a well-defined community (scholarly, public, or an appropriate combination), by identifying and using primary sources, building approaches from a relevant matrix of secondary sources, and understanding scholarly traditions within the field of American Studies that supports, expands, and connects research to professional goals.
- Make effective plans for advanced graduate study or professional employment by developing competencies listed above, including the opportunity to complete appropriate internship or field course work in an area of the student's professional plans.

Program Specific Admission Requirements

Those interested in graduate study are encouraged to contact the American Studies Program (307-766-3898 or amst@uwoyo.edu) for more information.

Applicants to the M.A. program do not have to have prior majors in American Studies. The American Studies program does not require the GRE in applications to our M.A. program.

The application deadline for fall enrollment is March 1. A minimum of a 3.0 undergraduate cumulative GPA is required for admission. In addition to an application, please submit the following via the University of Wyoming's online application system (<http://www.uwoyo.edu/admissions/apply.html>):

1. Statement of Purpose
2. A significant writing sample (usually a seminar paper or, for those coming from technical fields, a major report) that demonstrates potential for graduate study
3. Three letters of recommendation that assess the student's academic and research abilities
3. Transcripts from all undergraduate institutions and graduate programs

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwoyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Financial Aid

The American Studies M.A. is generously supported by endowment funds that allow us to award significant financial aid to M.A. students enrolled full time, through teaching, research, or community organization assistantship placements, as well as scholarship support as appropriate for students' own M.A. research.

Program Specific Degree Requirements

Graduate student must successfully complete 30 hours (for Plan B non-thesis) or 31 hours (for Plan A thesis) of graduate credit including the following:

Required Courses

(3 credit hours) AMST 5500 with a grade of B or better

(3 credit hours) AMST 5510 with a grade of B or better

(9 credit hours) graduate (5000) level AMST courses

Additional Requirements

Plan A thesis:

(12 credit hours) of graduate (5000) level courses in any field

(4 credit hours) of AMST5960 - Thesis Research

Completion of a Master's Thesis

OR

Plan B non-thesis:

(15 credit hours) of graduate (5000) level courses in any field

Completion of a non-thesis project

Completion of exam

Certificate

American Studies Certificate

The certificate program allows students to choose from undergraduate and graduate courses in American Studies, literature, geography, music, art, history, philosophy, sociology, folklore, anthropology, Native American and Indigenous studies, political science, environmental studies, and media studies.

The program encompasses two semesters of full time work: a total of at least 24 semester hours, or approximately 8 courses. Of these, 6 credit hours (2 courses) must be selected from the following list:

Requirements

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to

reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

- Any AMST course at the 4000- or 5000-level Credits: 3
- An additional 18 hours (6 courses) are chosen in consultation with an American Studies faculty adviser. The final 3 credit hours, completed during the summer months, are devoted to an internship (AMST 4970) or field experience in American culture (AMST 4900).

Teachers of American Indian Children (TIAC) (Teaching) Endorsement/UW Certification

Through Distance Education, a Teachers of American Indian Children (TAIC) Endorsement / Graduate Certificate can be earned. This non-degree graduate program certifies that those who complete its five specialized courses possess the attitudes, knowledge, and competence necessary to effectively teach American Indian Children. Upon completion, students receive official recognition of their achievement on their transcripts and an official certificate. Visit the Distance Education Degrees and Programs Website www.uwyo.edu/distance/ for more information. All courses are cross-listed with NAIS and EDCI.

An interdepartmental Native American and Indigenous Studies Advisory Committee guides the program's development. The director advises students selecting the NAIS studies major or minor.

Complete information about the Native American and Indigenous Studies undergraduate major, undergraduate minor, and graduate minor is available in the NAIS Program office and on the program Website.

BRIANA DOERING, B.A. Barnard College, Columbia University, 2012; M.A. University of Michigan 2016; Ph.D. 2020, Assistant Professor of Anthropology 2020.

ALEXANDRA KELLY, B.A. University of Chicago 2004; M.A. 2005; Ph.D. Stanford University 2014; Assistant Professor of History and Anthropology 2014.

JESSICA NELSON, B.A. University of Michigan 2006; M.A. University of Arizona 2011; Ph.D. 2018; Assistant Professor of School of Culture, Gender, and Social Justice 2019.

Adjunct Faculty:

Adams, Arksey, Budowle, Clauter, Grund, Janković, Karavanić, Kitchell, Lynch, Malloy, Miller, Nicholson, Olujić, Page, Pelton, Peterson, Pierce, Raguž, Rockwell, Todd, Walker, Watson, Wilkinson

Academic Professional Research Scientist:

Rick Weathermon

Professors Emeriti:

George W. Gill, Mary Lou Larson, Lin A. Poyer, Charles A. Reher, Audrey C. Shalinsky

The department of Anthropology promotes the understanding of humankind from an integrated, holistic approach which examines past, present and future trends in cultural, biological and linguistic diversity and uniformity. Though the department serves undergraduate and graduate majors who will become professional anthropologists or will pursue other related careers, it also provides information to a large number of non-majors and to the larger community regarding cross-cultural issues. Furthermore, because of its commitment to the four field approach including biological anthropology, archaeology, cultural anthropology and linguistic anthropology, the department fosters among its students an awareness of the interrelatedness of scientific concepts, methods and theories, and the humanistic foundation of scientific inquiry. The Department of Anthropology prepares its students both to understand the cultural resources of Wyoming and to participate as informed citizens in an increasingly complex global community.

Undergraduate Major

The Anthropology B.A. program has the following learning outcomes:

1. students demonstrate knowledge about the four fields of anthropology and their interrelationship,
2. students participate in a research experience and understand its process, and
3. students demonstrate ability to analyze and synthesize in relation to anthropological issues or theories.

In addition to university and college requirements listed in this Catalog, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. Specific requirements for a B.A. in anthropology are ANTH 1100, 1200, 1300, and 2000. Students must complete ANTH 3300 or ANTH 3310. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975. Also required are an additional 21 credits of upper division anthropology for a total of 25 upper division (3000+) credits within the major, including at least one course from three different subfields (cultural anthropology, linguistic anthropology, biological anthropology, and archaeology). Courses that can be used to fulfill upper division cultural anthropology are ANTH 4023, 4300, 4310, 4320, 4325, 4330, 4340, 4350, 4380, 4020 (with instructor's consent). Courses that can be used to fulfill upper division linguistic anthropology are ANTH 4024, 4740, 4765, 4775, 4785, 4795, 4020 (with instructor's consent). Courses that can be used to fulfill upper division biological anthropology are ANTH 4022, 4210, 4215, 4220, 4230, 4255, 4260, 4020 (with instructor's consent). Courses that can be used to fulfill upper division archaeology are ANTH 3900, 4021, 4110, 4115, 4120, 4125, 4130, 4145, 4150, 4160, 4170, 4175, 4020 (with instructor's consent), or six credits of archaeological field school (ANTH 4140 or 5180). It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

At the completion of the Bachelor of Arts degree in Anthropology, students will be able to demonstrate knowledge about the four subfields of anthropology and their interrelationships; they will have participated in a research experience and understand its process; and, they will demonstrate ability to analyze and synthesize in relation to anthropological issues or theories.

Undergraduate Minors

The Anthropology undergraduate minor has the following learning outcomes:

1. students learn sufficient subfield information to complement a variety of disciplines,
2. students learn basic methods of the discipline, and
3. students learn basic theories/ types of subfield explanation.

The minor for non-anthropology majors requires two of the introductory courses: ANTH 1100, 1200, 1300, 2000, and 11- 12 hours of electives from 2000, 3000, or 4000-level anthropology courses with no more than 3 hours at the 2000-level. See the anthropology web site for more details.

Teacher Education

Anthropology courses may be used to complete part of the requirements for teacher certification in social studies.

Graduate Study

The department offers programs of study leading to Master of Arts and Doctor of Philosophy degrees in Anthropology. Check Anthropology department web pages for any updates.

Program Specific Admission Requirements

Master's Program

The Anthropology M.A. program has the following learning outcomes:

1. students will be able to explain the content of the "four fields" of anthropology and their interrelationship in written and oral formats,
2. students will have experience in original research, and
3. students will develop skills which foster professionalism as related to their chosen field.

Deadline for application is February 15 for the following fall. See graduate admission requirements. Submit letter of intent, resume, transcripts, and an optional writing sample as digital documents to the UW online application system. A minimum of three letters of recommendation are required; a standardized recommendation form is provided through the application system.

In the letter of intent, students should describe their research interests, career goals, and how Wyoming's program will help them achieve these goals.

The Department of Anthropology requires that at least two of the recommendation letters be from academic supervisors or instructors.

Students must present evidence of a satisfactory background in anthropology, which should include coursework in all four subfields of Anthropology (socio/cultural, bio/physical, archaeology, and linguistics). Deficiencies in anthropology may require remediation. Students must have two semesters of a single foreign language or equivalent, and one semester of statistics. In those instances in which the undergraduate background of the student is deficient, the department reserves the right to prescribe course work that would correct such deficiencies.

The M.A. program is designed to be completed in two full years of graduate study. Appropriate allowance will be made for parttime students.

Students who graduate with a Master of Arts degree will be able to explain the content of the four fields of Anthropology and their interrelationship in written and oral formats; they will have an experience in original research; and, they will develop skills which foster professionalism in their chosen fields.

Doctoral Program

The Anthropology Ph.D. program has the following learning outcomes:

1. students will have professional and specialized training so they can move into careers in academic or non-academic tracks,
2. students will have a dissertation research experience that results in professional publication(s), thereby contributing to the expansion of knowledge, and

3. students will have practical experience that will promote their movement into professional careers in a reasonable amount of time.

Deadline for application is December 1 for the following fall. *See graduate admission requirements.*

Submit letter of intent, resume, transcripts, and an optional writing sample as digital documents to the UW online application system. A minimum of three letters of recommendation are required; a standardized recommendation form is provided through the application system.

In the letter of intent, students should identify whom they would like as their faculty adviser and describe their research interests, career goals, and how Wyoming's program will help them achieve these goals.

Students with a master's degree may apply directly to the Ph.D. program.

Students with a bachelor's degree may apply to the Ph.D. program. If admitted, students are expected to complete the master's degree requirements following the Plan A or Plan B option before formal admission to the Ph.D. program. At the thesis defense or hearing for the Plan B paper, the student will receive a no pass, pass-terminate at the master's degree, or a pass-admit to the Ph.D. program.

Students admitted to the department's M.A. program are not guaranteed admission to the Ph.D. program.

For admission to the Ph.D. program with the Bachelor's degree, students must have course work in the four subfields of anthropology, two semesters of a single foreign language, and statistical competency at either the B.A. or M.A. level. If these are not satisfied, the student's faculty adviser in coordination with the student's graduate committee assigns remedial work as appropriate.

Students who graduate with a Ph.D. in Anthropology will have specialized and professional training so they can move into academic or non-academic tracks; they will have a dissertation experience that results in professional publications; and they will have professional experiences that facilitate their move into careers in a reasonable amount of time.

Program Specific Graduate Assistantships

Doctoral students generally receive two years of assistantships. First semester, first year M.A. students are generally not awarded assistantships; however, the department occasionally does make exceptions. M.A. students are eligible to apply for assistantships beginning in the second semester.

Assistantships are awarded through a departmental application process. An application form, cover letter, and resume are required. Information and deadlines may be obtained in the department office.

Failure to complete steps in the M.A. program by established deadline (e.g., advisor selection, proposal presentation, etc.) means the student is not eligible for an assistantship. Failure of the Ph.D. preliminary exam means the student is not eligible for an assistantship.

Program Specific Degree Requirements

Master's Program Plan A (thesis)

See university minimum requirements.

Completion, with a grade of "B" or better of a four core-course sequence. This sequence will consist of ANTH 5010, 20th Century Anthropological Theory; ANTH 5015, Archaeological Theory and Method; ANTH 5020, Biological Anthropology; and ANTH 5030, Linguistic Anthropology.

First semester (fall): Students will submit form to the graduate advisor and department head identifying their thesis advisor BEFORE the graduate assistant allocation meeting (mid-late November).

Second semester (spring): Students will work with their advisor to select their committee, which must be formed and on-file in the department office by the end of the semester. During the core classes' final exam periods, students give a presentation to departmental faculty which outlines the general ideas for their proposed thesis.

Third semester (fall): Working closely with their advisor and committee, students complete a detailed prospectus and gain approval from thesis committee for MA thesis topic.

Fourth semester (spring): Thesis is completed and is approved by thesis committee.

Any M.A. student receiving a grade of C or less in two core classes will be expelled from the program.

Second semester research presentations are assessed by all department faculty in attendance at the presentation and evaluations will be given to the student's advisors. It is expected that students will work closely with their advisors to rectify any problems before they complete their thesis prospectus in the third semester.

If not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Plan B (non-thesis)

See university minimum requirements.

All requirements for a Plan A except thesis, if not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Doctoral Program

See university minimum requirements.

After completion of an M.A. program in anthropology.

A minimum of six content courses (18 hours) chosen by the student in conjunction with the student's committee. These courses are normally completed in the first two years of the Ph.D. program. In addition to anthropology courses, the other 4000/5000-level courses outside of the department may be required by the committee or chosen by the student in consultation with their committee. If not completed prior to admission, two semesters of a single foreign language must be completed.

Two additional courses in their first or second year: ANTH 5880, Professionalism in Anthropology and the two-semester sequence of ANTH 5890, Teaching Anthropology (3 hours total).

Teaching experience, including standalone courses, after completion of the first semester of Teaching and Learning (ANTH 5890), as well as teaching assistance to UW faculty members.

Participation in an approved internship experience (6-24 credit hours). Students pursue internships in state and federal agencies, museums, contract archaeology organizations, and other organizations that offer potential career experience.

Committee meeting and successful completion of a dissertation proposal.

Preliminary exams take place after the completion of 18 hours of content courses. ANTH 5880, and Teaching and Learning in Anthropology (ANTH 5890, or other as designated), normally before the end of the second year. If a student does not receive a passing grade on the preliminary exam, it can be repeated once. Failure to pass the preliminary examination the second time results in termination from the anthropology program.

International experience is highly recommended but not required, e.g. pre-dissertation summer fieldwork.

Student maintains a portfolio which documents teaching, internship, and research experience.

Students are encouraged to present papers at professional conferences and submit articles for publication throughout their tenure as a student. After admission to candidacy, the student is expected to research, write, and defend a dissertation based on original research (up to 48 credit hours). Students may either submit a single dissertation or a series of integrated publishable articles (30-40 pages each). The student's committee must approve this choice and decide on the number, length and content of the articles at the same time, usually at the committee hearing prior to the preliminary exams. For the final submission of the dissertation, the student must also complete an introduction and conclusion to contextualize and synthesize the integrated articles.

Major

Anthropology, B.A.

Anthropology students will be able to demonstrate knowledge about the four subfields of anthropology. They will have participated in research and will be able to analyze and synthesize in relation to anthropological issues or theories.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Specific Requirements for a B.A.

In addition to university and college requirements listed in this *Catalog*, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975.

ANTH1100 - Introduction to Biological Anthropology

Credits: 4

Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ANTH1300 - Introduction to Archaeology

Credits: 3

Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5PN

A&S College Core 2015 ASG

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L

USP 2015 Code U5C2

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: ANTH 1200.

OR

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

Additional Requirements

In addition to university and college requirements listed in this Catalog, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. Specific requirements for a B.A. in anthropology are ANTH 1100, 1200, 1300, and 2000. Students must complete ANTH 3300 or 3310. Students must complete ANTH 3300 or ANTH 3310. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975. Also required are an additional 21 credits of upper division anthropology for a total of 25 upper division (3000+) credits within the major, including at least one course from three different subfields (cultural anthropology, linguistic anthropology, biological anthropology, and archaeology). Courses that can be used to fulfill upper division cultural anthropology are ANTH 4023, 4300, 4310, 4320, 4325, 4330, 4340, 4350, 4380, 4020 (with instructor's consent). Courses that can be used to fulfill upper division linguistic anthropology are ANTH 4024, 4740, 4765, 4775, 4785, 4795, 4020 (with instructor's consent). Courses that can be used to fulfill upper division biological anthropology are ANTH 4022, 4210, 4215, 4220, 4230, 4255, 4260, 4020 (with instructor's consent). Courses that can be used to fulfill upper division archaeology are ANTH 4021, 4110, 4115, 4120, 4125, 4130, 4145, 4150, 4160, 4170, 4175, 4020 (with instructor's consent), or six credits of archaeological field school (ANTH 4140 or 5180). It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

Upper Division Cultural Anthropology

Courses that can be used to fulfill upper division cultural anthropology are

ANTH4023 - Seminar in Cultural Anthropology

Credits: 3

Considers current topics of interest within cultural anthropology.

Prerequisite: ANTH 1200.

ANTH4300 - Anthropology of Religion

Credits: 3

Provides a comparative anthropological study of religious systems, emphasizing analysis of symbolism, myth and ritual.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

Dual Listed ANTH 5320.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4325 - Symbolic Anthropology

Credits: 3

Teaches several anthropological approaches to symbolic and cultural analysis, while reading ethnographic examples of how symbolic analysis can be used to understand different cultures. Coursework assumes a basic knowledge of social science concepts.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4330 - Social Organization

Credits: 3

Provides theories of social organization, interrelations of social institutions, and current anthropological methods of interpretation.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, global politics of AIDS and other pandemics.

Dual Listed ANTH 5350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4380 - Visual Anthropology

Credits: 3

Offers anthropological interpretation of visual representations and media, including analysis of the development of ethnographic films and their contemporary use. Visual representations of many cultures as well as mainstream United States examples are analyzed.

Prerequisite: ANTH 1200.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Linguistic Anthropology

Courses that can be used to fulfill upper division linguistic anthropology are

ANTH4024 - Seminar in Linguistic Anthropology

Credits: 3

Considers current topics of interest within linguistic anthropology.

Prerequisite: ANTH 2000.

ANTH4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 5740.

Prerequisite: ANTH 2000 or consent of instructor.

ANTH4765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 5765.

Prerequisite: ANTH 2000 or consent of the instructor.

- ANTH 4775

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Biological Anthropology

Courses that can be used to fulfill upper division biological anthropology are

ANTH4022 - Seminar in Biological Anthropology

Credits: 3

Considers current topics of interest within biological anthropology.

Prerequisite: ANTH 1100.

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 5215.

When Offered (Normally offered every third semester)

Former Course Number [4200]

Prerequisite: ANTH 1100.

ANTH4220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 5220.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1100.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

ANTH4255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 5255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH4260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 5260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Archaeology

Courses that can be used to fulfill upper division archaeology are

ANTH4021 - Seminar in Archaeology

Credits: 3

Considers current topics of archaeological interest.

Prerequisite: ANTH 1300.

ANTH4110 - Zooarchaeology I

Credits: 3

Introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological relationships and problem-oriented taphonomic research.

Dual Listed ANTH 5110.

Prerequisite: ANTH 1300.

ANTH4115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

Dual Listed ANTH 5115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH4120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historic times.

Dual Listed ANTH 5120.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4125 - Northwestern Plains Prehistory

Credits: 3

Northwestern Plains archaeology from the Paleoindian period to historic contact. A review of important sites and artifact types, ongoing UW research projects, regional and other expressions of ideology, Native American ethnohistory and contemporary perspectives, and historic preservation issues.

Dual Listed ANTH 5125.

When Offered (Normally offered every third semester)

Former Course Number [4100]

Prerequisite: ANTH 1300.

ANTH4130 - Old World Archaeology

Credits: 3

Surveys major archaeological sequences of the Old World.

Dual Listed ANTH 5130.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 5145.

Prerequisite: ANTH 1300.

ANTH4150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max. 9)

Covers the prehistory of a specified region or time period within that region. Emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 5150.

Prerequisite: ANTH 1300.

ANTH4160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) hands-on-experience with GIS applications in archaeology through demonstrations, lectures, and structured inquiries.

Dual Listed ANTH 5160.

Prerequisite: ANTH 1200, or ANTH 1300.

ANTH4170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphical processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 5170.

Prerequisite: ANTH 1300.

ANTH4175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 5175.

Prerequisite: ANTH 1300.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

OR

- Six credits of archaeological field school (ANTH 4140 or ANTH 5180).

Recommended

It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or STAT 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

A&S College Core

The BA in Anthropology requires the A&S Core:

- D - Diversity (3 credits)
- G - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Minor

Anthropology Minor

Students will gain introductory training in at least two of the subfields of Anthropology combined with three or four upper division courses.

Introductory Courses

The minor for non-anthropology majors requires two of the introductory courses:

ANTH1100 - Introduction to Biological Anthropology

Credits: 4

Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ANTH1300 - Introduction to Archaeology

Credits: 3

Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5PN

A&S College Core 2015 ASG

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L

USP 2015 Code U5C2

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

Electives

- 11-12 hours of electives from 2000, 3000, or 4000-level anthropology courses with no more than 3 hours at the 2000-level.

Graduate

Anthropology, M.A.

M.A. students receive training in the four subfields of anthropology, complete original research, and develop skills which foster professionalism as related to their chosen field.

Plan A (Thesis)

Any M.A. student receiving a grade of C or less in two core classes will be expelled from the program.

If not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Core-Course Sequence

Completion, with a grade of "B" or better of a four core-course sequence. This sequence will consist of

ANTH5010 - 20th Century Anthropology Theory

Credits: 3

Examines major thinkers and schools of thought in anthropology of the 20th century. Emphasis is on cultural theory within the context of the four-field approach.

Prerequisite: graduate standing in anthropology.

ANTH5015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of most significant topics. Addresses questions, such as: How do archaeologists go about identifying and solving problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 4015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH5020 - Biological Anthropology

Credits: 3

Offers a graduate level overview of biological anthropology. Beginning with the history of relevant areas of human biology, provides extensive discussion of such areas as paleoanthropology, primatology, and human variation. Also includes detailed theoretical examinations of topics within hominid evolution, the concept of race and sociobiology.

Prerequisite: first year anthropology graduate student standing.

ANTH5030 - Linguistic Anthropology

Credits: 3

Demonstrates interrelationships between language, human biology, and culture. In particular, the relevance of the study of language to biological anthropology, archaeology, and cultural anthropology is emphasized. Examines classic approaches in anthropological linguistics and recent controversies such as the origin of language in human evolution.

First semester (Fall):

Students will submit form to the graduate advisor and department head identifying their thesis advisor **BEFORE** the graduate assistant allocation meeting (mid-late November).

Second semester (Spring):

Students will work with their advisor to select their committee, which must be formed and on-file in the department office by the end of the semester. During the core classes' final exam periods, students give a presentation to departmental faculty which outlines the general ideas for their proposed thesis.

Second semester research presentations are assessed by all department faculty in attendance at the presentation and evaluations will be given to the student's advisors. It is expected that students will work closely with their advisors to rectify any problems before they complete their thesis prospectus in the third semester.

Third semester (Fall):

Working closely with their advisor and committee, students complete a detailed prospectus and gain approval from thesis committee for MA thesis topic.

Fourth semester (Spring):

Thesis is completed and is approved by thesis committee.

Plan B (Non-Thesis)

All requirements for a Plan A except thesis, if not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Anthropology, Ph.D.

Provides students with training so to achieve academic or non-academic career goals. Students have a dissertation experience that results in professional publication. They will also have practical experience that will promote movement into careers.

Program Requirements

Student maintains a portfolio which documents teaching, internship, and research experience.

Students are encouraged to present papers at professional conferences and submit articles for publication throughout their tenure as a student. After admission to candidacy, the student is expected to research, write, and defend a dissertation based on original research (up to 48 credit hours). Students may either submit a single dissertation or a series of integrated publishable articles (30-40 pages each). The student's committee must approve this choice and decide on the number, length and content of the articles at the same time, usually at the committee hearing prior to the preliminary exams. For the final submission of the dissertation, the student must also complete an introduction and conclusion to contextualize and synthesize the integrated articles.

A Minimum of Six Content Courses: 18 Hours

A minimum of six content courses (18 hours) chosen by the student in conjunction with the student's committee. These courses are normally completed in the first two years of the Ph.D. program. In addition to anthropology courses, the other 4000/5000-level courses outside of the department may be required by the committee or chosen by the student in consultation with their committee.

First or Second Year:

Two additional courses in their first or second year

ANTH5880 - Professionalism

Credits: 3

Provides an opportunity for the integration of graduate training and career choice. Examines issues of professionalism in the discipline ranging from ethical conduct to the research process and publication.

Prerequisite: admission to the doctoral program in anthropology.

ANTH5890 - Teaching Anthropology

Credits: 3

Anthropology is increasingly relevant to many audiences. Provides practical insight and examination of controversial anthropological concepts

Prerequisite: admission to the doctoral program in anthropology.

Teaching Experience

Teaching experience, including standalone courses, after completion of the first semester of ANTH5890 - Teaching Anthropology, as well as teaching assistance to UW faculty members.

Internship Experience Credits: 6-24 Hours

Participation in an approved internship experience (6-24 credit hours). Students pursue internships in state and federal agencies, museums, contract archaeology organizations, and other organizations that offer potential career experience.

Dissertation Proposal

Committee meeting and successful completion of a dissertation proposal.

Preliminary Exams

Preliminary exams take place after the completion of 18 hours of content courses. ANTH 5880, and Teaching and Learning in Anthropology (ANTH 5890, or other as designated), normally before the end of the second year. If a student does not receive a passing grade on the preliminary exam, it can be repeated once. Failure to pass the preliminary examination the second time results in termination from the anthropology program.

Highly Recommended

International experience is highly recommended but not required, e.g. pre-dissertation summer fieldwork.

Program Director: Doug Russell

Professors:

ASHLEY HOPE CARLISLE, B.F.A. University of Southern Mississippi 1997; M.F.A. University of Georgia 2002; Professor of Art 2019, 2003.

LEAH HARDY, B.F.A. Kansas University 1987; M.F.A. Indiana University 1990; Professor of Art 2014, 2002.

RICKI KLAGES, B.F.A. University of Arizona 1984; M.A. University of New Mexico 1991; M.F.A. 1993; Professor of Art 2012, 1996.

MARK RITCHIE, B.F.A. University of Kansas 1986; M.F.A. Indiana University 1990; Professor of Art 2007, 1995.

DOUG RUSSELL, B.F.A. Columbia College 1990; M.A. University of Iowa 1995; M.F.A. 1996; Professor of Art 2019, 2005.

Associate Professors:

DIANA BAUMBACH, B.F.A. Washington University in St. Louis 2003; M.F.A. Southern Illinois University 2007; Associate Professor of Art 2015, 2009.

PETER FINE, B.A. California State University, Chico 1993; M.F.A. University of Arizona 2004; Associate Professor of Art 2017, 2013.

BRANDON GELLIS, B.A. University of California at Santa Cruz 2002; M.F.A. University of Denver 2015; Associate Professor of Art 2021, 2015.

RACHEL SAILOR, B.A. Oregon State University 1992; M.A. University of Oregon 1994; Ph.D. University of Iowa 2007; Associate Professor of Art 2015, 2011.

SHELBY SHADWELL, B.F.A. Washington University in St. Louis 2003; M.F.A. Southern Illinois University 2007; Associate Professor of Art 2015, 2010.

Assistant Professor:

KATHLEEN FRYE, B.F.A. University of Colorado at Denver 1987; M.F.A. Colorado State University 1995; M.A. City College, New York; Assistant Professor of Art 2018.

Associate Academic Professional Lecturer:

BAILEY RUSSEL, B.A. Princeton University 2001; M.A. New York University 2004.

Senior Academic Professional Research Scientist:

DAVID L. JONES Jr., B.F.A. University of Georgia 2000; M.F.A. University of Tennessee 2004.

Assistant Academic Professional Lecturer:

RANI ROBISON, B.A. University of Utah 1999; M.F.A. University of Oregon 2008.

Professors Emeriti:

Deaderick, Edwards, Evans, Flach, Forrest, Reif, Russin (Distinguished Professor of Art), Schaefer, Haydon

Art and Art History

The Art and Art History Program within the Department of Visual and Literary Arts supports the creative, aesthetic and cultural development of students within the university community and serves the cultural and educational needs of the state. The department is dedicated to preparing its graduates to assume leadership positions in their professional lives while maintaining an inner commitment to the aesthetic standards of their chosen discipline.

The program fosters a unique combination of innovation, tradition, aestheticism and practicality, by providing a professional visual arts education built on a strong University Studies Program (USP) foundation.

Department Policy

A class within the Art and Art History Program within the Department of Visual and Literary Arts may require additional meeting times, so that students may fully participate in the Visiting Artist Program and the UWAM lecture series.

As a matter of policy, the Department of Visual and Literary Arts reserves the right to retain any works created by students it deems worthy for the purposes of exhibition until the end of the academic year.

The Department of Visual and Literary Arts studios are the primary instructional classrooms. As a matter of policy, access to the studios and use of the equipment is reserved for students who are formally registered for scheduled courses and are following a prescribed curriculum.

Scholarships

The department has several scholarships for qualified students at all stages in the program. See the Department of Visual and Literary Arts website for a full list of scholarships.

Academic and Career Advisement

Faculty advisers work closely with department students to guide and direct their progress through their declared degree program and course of study. Through the visiting Artist Program, the UW Art Museum and internship placements, the department provides numerous opportunities and role models for a professional life in the visual arts. Through consultation and discussion with faculty advisers, art students consider their interests and abilities in relation to the many and varied careers in the arts and art related fields. Many graduates go directly into industry, on to pursue graduate studies or take the next step in their career plan. On a competitive basis upon graduation, majors may participate in the Post Undergraduate Assistantship Program where they may prepare a portfolio for graduate school and/or gain additional experience in the studio and the classroom setting.

Undergraduate Majors

The University of Wyoming Department of Visual and Literary Arts offers five degrees within the Art and Art History Program:

- Bachelor of Arts in Art History
- Bachelor of Arts in Studio Art
- Bachelor of Arts in Art Education
- Bachelor of Fine Arts in Studio Art
- Bachelor of Fine Arts in Visual Communication Design

Transfer Residency

A minimum of 26 hours of upper-division course work in the major is required to establish residency in the department for all transfer students. This applies to students in all five of the B.F.A., B.A., and Art Education degree programs who transfer in 12 or more hours of art courses for the major. Students in all art programs must meet the university requirement of at least 42 hours of course work at the upper-division level (3000- and above).

Studio Art and Art Education Majors - General Requirements

ART 1005, 1110, 1120 and 1130 are considered an important preparation and prerequisite for drawing, painting, printmaking, ceramics, sculpture and graphic design courses and are required freshman courses for the major. Studio Art and Art Education Majors must complete the Foundation Core Hours before electing upper division courses in any studio area. ART 2010, 2020, and 2305 are required sophomore courses.

Once sophomore Art Studio and Art Education majors complete course prerequisites, they select a minimum of four courses from the studio core hours. Most of the university and college requirements should be completed as early as possible before the senior year. The department will enforce published prerequisites for courses.

Studio Art, Visual Communication Design, and Art Education majors must submit a portfolio for evaluation before proceeding to intermediate and advanced studios beyond the required studio core. Any student whose portfolio is assessed as deficient must address the deficiencies before receiving permission to advance in the major.

Please note: Studio Art and Art Education students who do not pass the portfolio review will be able to resubmit the following semester. However, if students fail more than once, they will be unable to progress in the Department of Visual and Literary Arts and may be asked to transfer to another department or UW college or complete an art minor. Portfolio evaluation will occur once in each of the fall, spring, and summer semesters.

Undergraduate Minors

Minors are offered in the following areas:

- Art History
- Ceramics
- Digital Media
- Drawing
- Metalsmithing
- Museum Studies
- Painting
- Photography
- Printmaking
- Sculpture

Further information may be found on the department's website.

Please note: B.A. in Studio Art, B.F.A. in Studio Art, B.F.A. in Visual Communication Design and B.A. in Art Education degree students cannot have a minor in a specific studio discipline. B.A. in Art History students may have a minor in studio disciplines, and B.A. in Studio Art, B.F.A. in Studio Art, B.F.A. in Visual Communication Design, and B.A. in Art Education degree students may have a minor in Art History and/or Museum Studies.

Creative Writing Program

201 Hoyt Hall, (307) 766-6453

FAX: (307) 766-3189

Web site: www.uwyo.edu/creativewriting/

Program Director: Val Pexton

Professors:

ALYSON HAGY, B.A. Williams College 1982; M.F.A. University of Michigan 1985; Professor of Creative Writing 2008, 1996.

HARVEY HIX, B.A. Belmont College 1982; M.A. University of Texas, Austin 1985; Ph.D. 1987; Professor of Philosophy and Creative Writing 2015.

FRIEDA E. KNOBLOCH, B.A. Cornell University 1985; Ph.D. University of Minnesota 1994; Professor of American Studies and Creative Writing 2014, 1997.

JEFFREY A. LOCKWOOD, B.S. New Mexico Institute of Mining and Technology 1982; Ph.D. Louisiana State University 1985; Professor of Philosophy and Creative Writing 2006.

Associate Professors:

KATE NORTHROP, B.A. University of Pennsylvania 1991; M.F.A. University of Iowa 1995; Associate Professor of Creative Writing 2008.

Senior Lecturers:

APRIL HEANEY, B.A. University of Wyoming 1998; M.A. 2000. Senior Lecturer in English and Creative Writing 2015, 2005.

VAL PEXTON, B.A. Humboldt State University 1986; B.A. University of Wyoming 1998; M.A. 2001; M.F.A. 2008; Senior Lecturer in English and Creative Writing 2018, 2009.

PAUL BERGSTRAESSER, B.A. Oberlin College 1989; M.A. Northern Michigan University 2000; Ph.D. University of Illinois, Chicago 2007; Senior Lecturer in English and Creative Writing 2018, 2007.

Creative Writing

We are writers. Our principles follow from what claims us as writers as we guide our students in the creation of their own work. We offer a commitment to art and to the development of community through art. We offer an immersion in making, a chance to discover, to create serious work without pretense, to collaborate, to shake off assumptions and anxieties.

To be first and foremost concerned with making does not mean we take refuge from the world. It means we begin by supporting the deepest, most intelligent engagement with what matters to us as writers. A critical distance from the literary and academic marketplaces allows us to engage with them in a more thoughtful manner once we have found our authentic calling-that which we are truly compelled to explore. Our values will never map perfectly onto the concerns of institutions, and that is good. We strive to create the finest conditions for the making of art when we remain

in an eccentric orbit of our own, one that overlaps with the other orbits, yet remains, as much as possible, guided by our own principles which include:

Making: we require the serious, committed, ongoing process of writing and revision.

Range: we cultivate a diversity of taste, form, genre, experience, and background, as well as an open understanding of what might constitute professional accomplishment.

Flexibility: we invite our writers to pursue their own creative and intellectual goals, to tailor the program in individual ways.

Curiosity: we urge creative and intellectual roaming: cross-genre work, interdisciplinary study, the movement across what are usually understood as boundaries; we encourage students to imagine possibilities beyond what is already imagined for them by the program and the university.

Community: we foster an environment that sustains listening, investment in the work of others, collaboration, rigorous expectation, generosity and, at the same time, respect for solitude.

Integrity: we challenge students to engage in deep investigation, to find their intent as a writer and to commit to it fully.

Graduate Study

The Creative Writing Master of Fine Arts offers two areas of concentration: fiction and creative non-fiction.

Program Specific Admission Requirements

In addition to the minimum requirements set forth in this Catalog, the Creative Writing M.F.A. Program requires that students demonstrate by means of an official transcript that they have a solid undergraduate record. The M.F.A. program welcomes degrees in any discipline from four-year colleges or universities. Candidates submit three letters of recommendation, a writing sample consisting of no more than 25 pages of prose, a 500-word statement of purpose and a vita. Students should consult the M.F.A. web site or contact the department for specific admission information and deadlines.

Program Specific Graduate Assistantships

We are a fully-funded program, meaning that we accept only as many students as we can support with graduate assistantships. Full assistantships carry an annual stipend and tuition waiver, and require the teaching of one section per semester, or equivalent work assignment. M.F.A. students are expected to teach freshman English.

Each fall, the English department conducts a week-long orientation for new teaching assistants and a subsequent series of colloquia. Each graduate assistant is assigned to an experienced teacher in the English department as a mentor, to be available throughout the semester for consultation on teaching and grading techniques.

Major

Art Education, B.A.

The BA in Art Education is a professional level degree preparing students to be reflective, innovative and engaged K-12 art educators. The curriculum includes extensive Studio Art competencies and studies in Art History and Professional Education.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Art Education** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and

critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular unites, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramics class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary

with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

Upper Division Art History: 6 hours

6 credits of upper division art history beyond ART 2010 and ART 2020

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Art Education Program Requirements

Minimum Course Requirements for B.A. in Art Education

Minimum course requirements for Art Education Majors follow the curriculum plan for the B.A. in Studio Art Degree:

- University and College requirements,
- Foundations Core,
- Art History Core,
- Studio Core
- Upper Division Studio Electives.

The exception that there is no Foreign Language requirement. Students are required to apply for a Wyoming Substitute Teaching Certificate in the fall of their first semester in the program. Additional requirements are:

Professional Education Courses: 10 Hours

EDST 2480: Diversity and the Politics of Schooling Credits: 4

required

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.
required

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.
required

Art Education Courses: 27 Hours

ART3430 - Methods I

Credits: 3

Students investigate ways to translate art making practices and media into K-12 arts curricula and develop effective approaches to teaching these to the K-12 learner. Students create and teach lesson plans based on what they learn through their explorations; they also create their own artwork inspired by their studio investigations.

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.
required

ART3490 - Philosophy, Theory and Issues

Credits: 3

Students explore the foundational elements involved in the history and philosophies of Art Education and the key issues that shape contemporary approaches to teaching in the field. These investigations are undertaken to support students' developing teaching philosophies and inform the connections between their teaching and creative practices.

USP 2003-2014 Code U3CH
USP 2015 Code U5C2

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.
required

ART3550 - Art Education Practicum

Credits: 1-3

Max Credit (Max. 3)

Practicums are integral to an art education student's development as a teacher. They offer opportunities for immersion and hands-on teaching experiences in art classrooms guided by experienced teachers in the field and the UW faculty. Students develop skills and teaching strategies that complement classroom learning and strengthen their teaching practices.

Prerequisite: ART 3430 and ART 3490.
required

ART4440 - Methods II

Credits: 3

Students incorporate their understanding of the stages of artistic development with essential components of curriculum design to create lesson plans that engage the K-12 student in student-directed, holistic learning in the visual arts. Another component of the course is professional practice that includes classroom management and preparing professional portfolios.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.
required

ART4460 - Curriculum Design

Credits: 3

Students develop a thorough knowledge of all the components of curriculum design in Art Education and will create a unit of instruction that includes a focus on enduring understandings, clarity of learning objective, assessment for the visual arts, instructional strategies, differentiation, and alignment with standards.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.
required

ART4810 - Residency for Elementary

Credits: 6

This is an eight-week residency for teaching art full time at the elementary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4820, students are certified in Wyoming to teach K-12 Art. Satisfactory/Unsatisfactory only.

Prerequisite: ART 4440 and ART 4460
required

ART4820 - Residency for Secondary

Credits: 6

This is an eight-week residency for teaching art full time at the secondary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4810, students are certified in Wyoming to teach K-12 Art.

Prerequisite: ART 4440 and ART 4460.
required

Studio or Art History Elective, any level: 3 Hours

**3 units of course in Studio Art or Art History at any level*

Additional Requirements

B.A. IN ART EDUCATION DEGREE

The BA in Art Education degree supports students' development as reflective, innovative and engaged K-12 art educators. The curriculum encompasses extensive Studio Art competencies as well as studies in Art History and Professional Education. Art Education courses cover a variety of teaching practices and methods of curriculum development that include interdisciplinary, multicultural approaches to teaching and emphasize relevance to the lives of K-12 students and the realities of our contemporary world. In-class learning is augmented with firsthand teaching experiences in local and regional schools, the University of Wyoming Art Museum, and includes teaching people of all ages in community-based arts settings. Upon graduation from our program, students earn Wyoming licensure for teaching K-12 Art.

Degree Requirements

Requirements of the degree include:

- 120 hours, including 91 hours within the major
- C or better in all courses taken to satisfy Major requirements
- Background check for all incoming art education degree students required prior to enrollment
- Application for art education degree is due prior to enrollment in Art Education courses
- 2.75 UW Total Institution GPA must be maintained throughout the Art Education Program of study
- 2.75 GPA within the major must be maintained throughout the Art Education Program of study
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses
- Score of 158 or above on the on the Praxis II Test: Art Content and Analysis by the end of the Residency semester
- As a Professional Degree, the BA in Art Education does not include the A&S Outside Major credit requirement.

Application

Students must fulfill the requirements listed in the *Application for the Art Education Program Checklist*:

- Satisfactory Completion of ART 2000 Portfolio Review
- C or above in all Education Courses
- C or above in all Art Content Courses
- Junior Standing (60+ credits)
- 2.75 or above overall UW total institutional GPA
- 2.75 or above in Major courses
- Completed background check

Probation, Removal, and Re-Application

- An Institutional and/or Major GPA below 2.75 mandates a probationary semester in the program (continuing with art ed courses) to raise GPA back up to 2.75 to continue
- If Institutional and Major GPA are not both above 2.75 by the end of the probationary semester, the student will be removed from the program
- Students may re-apply after removal from program if their GPA is again at or above 2.75

Art History, B.A.

The Art History B.A. offers students a broad understanding of world art, historiography, and professional practices related to the field. Closely linked to the Museum Studies minor, this degree prepares students for graduate work or the work force.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Art History** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Program Requirements

Requirements of the degree include:

- 120 hours, including 57 hours within the major
- All Art courses must be passed with a letter grade of C or better
- 2.50 GPA within major required
- 2.50 or above overall UW total institutional GPA
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses

Art History Core: 12 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social

forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

required

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.

USP 2003-2014 Code U3CH

required

Upper Division Electives: 30 Hours

*30 units - with the following stipulations:

15 hours 3000 or 4000 level Art History Courses

6 hours of ART 4790 Art Seminar

6 hours of upper division art history taken in other departments with cross listed courses

Courses in other disciplines as applicable

Honors Courses as applicable (Honors Program)

Potential other courses on a case by case basis in consultation with art history advisor

3 credits Internship or Art History travel course in consultation with art history advisor

Cross listed and applicable courses

*6 hours of upper division art history may be taken in other departments with cross listed courses (that may have prerequisites other than Art History).

ART4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

Interdisciplinary approach to study of women's issues in art. Uses literary/cultural texts to reinforce/contradict and/or expand/enlarge the art historical basis. Topics include domestic goddess, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 4830/GWST 4830.

When Offered (Normally offered every sixth semester)

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

OR

GWST4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ART 4830/ENGL 4830.

Dual Listed GWST 5830.

When Offered (Offered every other year)

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

ART4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the 20th century.

Cross Listed GWST 4780.

When Offered (Normally offered fall semester)

Prerequisite: ART 2010 or ART 2020 or 3 hours of WMST courses; and WB.

OR

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

AMST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 4250.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST4640 - Art and Ecology

Credits: 3

Focuses on the intersection of contemporary art with ecological concerns. Readings present philosophical, historical and cultural aspects of the art/ecology relationship; students reflect and question their own beliefs. Examples of art/artists are reviewed as well as how ecological artwork is developed. Students propose solutions and/ or create art in, out of, or about the environment; local sites are encouraged.

Prerequisite: 6 hours of ART and/or AMST or consent of the instructor.

OR

- ART 4640 - Art and Ecology Credits: 3
- Special Topics in American Studies including travel courses (as appropriate)
- Special topics in Classical and Modern Languages-including travel courses (as appropriate)
- HIST 4070 - History of the Book
- HIST 4075 - History of the Book
- HIST 4076 - History of the Book

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

Art Seminar

*6 hours of ART 4790 Art Seminar (fulfills USP COM 3 requirement)

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

USP 2015 Code U5C3

Prerequisite: 6 hours in art history.

required

Upper Division Art History: 15 hours

*15 hours 3000 or 4000 level Art History Courses

Internship or Travel

*3 credits Internship or Art History travel course in consultation with art history advisor

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

Foreign Language: 15 Hours

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

LANG2030 - Third Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010, LANG 1020.

LANG2040 - Fourth Semester in: (TOPIC)

Credits: 3
Max Credit (Max. 12)

Encompasses formal grammar introduction and review; periodic composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5C2

Prerequisite: Satisfactory completion of corresponding study in LANG 2030.

Additional Requirements and Description

The B.A. in Art History major offers students with a course of study that will provide depth and breadth in the history of art. Students will develop a broad understanding of world art, study the art of western and other global cultures in-depth, and explore the historiography and professional practices related to the field. Closely linked to the Museum Studies minor curriculum, the B.A. in Art History has a strong vocational application. This degree provides preparation for entry into graduate school or for students who want to enter the work force after their undergraduate education. Students will have the experience and training to enter into the cultural sector (arts or archival management, non-profit work in the arts and humanities, etc.).

Studio Art, B.A.

The B.A. in Studio Art degree prepares students for further studies or careers in the studio arts and arts-related fields including art therapy, illustration, arts administration, design, and art education.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Studio Art** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Minimum Course Requirements for Art Majors

In addition to the university and college requirements listed above and in this Catalog, all students majoring in art must complete the following:

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice

with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular unites, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Studio Core (Minimum): 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)
Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.
OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramic class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist

research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Foreign Language: 8 Hours

8 Hours of any Foreign Language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

Art History Electives: 6 Hours

6 credits beyond ART 2010 and ART 2020, with at least 3 units at upper division level

Additional Requirements

B.A. IN STUDIO ART DEGREE

The B.A. in Studio Art degree is available to students who are preparing for further studies or careers in the arts and arts-related fields, such as art education, graphic design, art therapy, illustration, botanical illustration and forensic illustration. Students work with their academic advisers to select courses from the USP and elective offerings to complement art studies in their areas of interest. Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. In addition to the university requirement that degree candidates hold a minimum cumulative grade point average of 2.000, degree candidates for the B.A. in Studio Art degree in the Department of Visual and Literary Arts also must have a minimum 2.500 overall cumulative grade point average and a 2.500 grade point average within all major courses at the time of graduation.

Transfer Residency. A minimum of 26 hours of upper-division course work in the major is required to establish residency in the department for all transfer students. This applies to students in the B.F.A., B.A., and Art Education degree programs who transfer in 12 or more hours of art courses for the major. Students in all art programs must meet the university requirement of at least 42 hours of course work at the upper-division level (3000 and above).

Based on their goals and career plans, students in consultation with a faculty adviser select the appropriate degree plan. Students major in studio art with areas of study in one or more of the following:

- Drawing
- Painting
- Photography
- Printmaking
- Ceramics
- Sculpture
- Metalsmithing
- Visual Communication Design

Studio Art, B.F.A.

The B.F.A. in Studio Art is a professional level degree open to outstanding students through an application process who are preparing for art studies, careers and professional activity in the studio arts beyond the undergraduate level.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BFA in Studio Art** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA
required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramic class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

Upper Division Studio Electives: 21 Hours

21 credits of any upper division studio art classes

Art and Art History Electives: 3 Hours

3 credits of any art or art history course at any level

BFA Core: 12 Hours

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

USP 2015 Code U5C3

Prerequisite: ART 2000 , and junior standing.
required

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.
required

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: ART 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.
required, offered only fall semester

ART4840 - BFA Capstone II

Credits: 3

Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the

artwork is completed.

Restricted BFA in Studio Art

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.

required, offered only spring semester

Upper Division Art History Electives: 9 Hours

9 credits of any upper division art history classes

Foreign Language: 8 Hours

8 hours in any Foreign Language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

Additional Requirements

B.F.A. IN STUDIO ART DEGREE

The B.F.A. in Studio Art is a professional level degree open to outstanding students through an application process who are preparing for art studies, careers and professional activity in the studio arts beyond the undergraduate level. The B.F.A. in Studio Art degree requires a minimum of 120 hours of credits with up to seventy-eight (78) semester hours focused in studio and art history course work. All B.F.A. in Studio Art students are required to participate in the B.F.A. exhibition upon graduation. As a Professional Degree, the B.F.A. in Studio Art does not include the A&S Outside Major credit requirement.

Application

Formal application is made to the program for acceptance into the B.F.A. in Studio Art degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Studio Art degree. Applicants must have achieved the following at the time of application to the B.F.A. in Studio Art:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Studio Art candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Studio Art program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Studio Art after one semester in Art and Art History Program.

Visual Communication Design, B.F.A.

The B.F.A. in Visual Communication Design is a professional level degree open to outstanding students through an application process who are preparing for design studies, careers and professional activity in design beyond the undergraduate level.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BFA in Visual Communication Design** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles

learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular unites, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

required

Studio Core: 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramics class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History and Design Theory Core: 9 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient,

medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

required

Upper Division Art History - 20th and 21st Century: 6 Hours

* six hours in ART 4740 and ART 4770

ART4740 - 20th Century European Art

Credits: 3

Studies 20th-century European art from 1900 to 1945. Covers the 2-D and 3-D art of Expressionism, Cubism, the Bauhaus, Dada and Surrealism, and other important movements in the first half of the 20th century.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010 and ART 2020.

required

ART4770 - Contemporary Arts Seminar

Credits: 3

Studies the major movements in the visual arts from 1945 to the present. Investigate major theories, stylistic movements, and key artists since WWII with a special focus on the increasing globalization of art during this era.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2010 and ART 2020.

required

VCD Core: 12 Hours

ART2110 - Type I: Thinking with Type

Credits: 3

Max Credit 3

Examines history and structure of type as a form of communication and art. Students will reference type as visual expression, data visualization, messaging, and representative of power, political, and socio-economic movements. Explorations in type as a concept and critical expression will explore the fields of graphic design and computer visualization.

Prerequisite: ART 1115

required

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

required

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful concepting, strategic wire frame development and creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.
required

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.
OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

Upper Division VCD: 15 Hours

ART3112 - Type: Type, Images, and Narrative

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)
Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.
required

ART3120 - VCD III: Visual Making

Credits: 3

Studies advanced graphic design preparation, idea generation, conceptualization, and critical thinking. Sustainable design problems include print and package design and an exploration of historical impact of design for reproduction

through analog and digital means. Contemporary socio-cultural issues will be emphasized along with design as an agent for positive change.

When Offered (Offered fall semester)

Prerequisite: ART 2000 and ART 2112.
required

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.
required

ART4120 - VCD VI: Senior Design Studio

Credits: 3

Specialized research for the advanced design student who will develop a mature voice and sense of design. Individual projects are determined by student interest with the instructor in order to best prepare students for industry careers and graduate school. Students are encouraged to explore new to them, and emerging approaches.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000, ART 2112, ART 2122.
required

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.
OR

ART4425 - Graphics Internship

Credits: 3

This course allows graphic design students to better understand real-world design practices, learn about industry standards, and discuss career opportunities and preparedness. Students will be expected to secure internships and meet with an intern advisor regularly, to gain a strong understanding of the graphic design industry.

Prerequisite: ART 2000, ART 2112, and ART 2122.

BFA Core: 12 Hours

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

USP 2015 Code U5C3

Prerequisite: ART 2000 , and junior standing.
required

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.
required

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: ART 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.
required, offered only fall semester

ART4840 - BFA Capstone II

Credits: 3

Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the artwork is completed.

Restricted BFA in Studio Art

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.

required, offered only spring semester

Upper Division Studio Electives: 9 Hours

9 credits of any upper division studio art classes

Foreign Language: 8 Hours

* 8 credits in any foreign language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

Additional Requirements

B.F.A. in Visual Communication Design

Designers explore a variety of visual communication design topics dealing with diverse messages and audiences. Students interested in pursuing a career in design, including visual communication design, graphic design, motion graphics, animation, digital media, etc. may apply into the B.F.A. in Visual Communication Design. Students planning to graduate in four years with a B.F.A. in Visual Communication Design should complete their Foundation Core in their Freshman year and take the appropriate Studio Core classes in their sophomore year. As a Professional Degree, the B.F.A. in Visual Communication Design does not include the A&S Outside Major credit requirement.

Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. To obtain a B.F.A. in Visual Communication Design degree in the Department of Visual and Literary Arts students must have a minimum 3.00 overall UW-total institutional GPA, and a 3.25 GPA in all major courses at the time of graduation.

The Visual Communication Design degree provides students with a human-centered approach to making and thinking as designers. Students learn through digital and hand's-on-making design challenges to develop critical narrative skills and refine their ability to think conceptually. Individual projects and research prepare each student to think flexibly in an international community that is continually being influenced by new ideas, tools, and technologies. The Visual Arts Building, design computer classroom, and design and fabrication studio facilities offer undergraduate students ample research, design, and production space and access to cutting-edge technology, and open-source and industry standard software and tools for design exploration.

Application

Formal application is made to the program for acceptance into the B.F.A. in Visual Communication Design degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Visual Communication Design degree. Applicants must have achieved the following at the time of application to the B.F.A. in Visual Communication Design:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Visual Communication Design candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Visual Communication Design program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Visual Communication Design after one semester in the Art and Art History Program.

Minor

Art History Minor

The Art History Minor introduces students to the discipline of Art History in a 21 credit hour sequence.

Art History Sequence: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient,

medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Lower Division Requirement: 3 Hours

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.

USP 2003-2014 Code U3CH

OR

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

Other Traditions: 3 Hours

Including but not limited to Art & Architecture of Medieval Islam, Japanese Art History, Meso-American Art History

ART3720 - Art and Architecture of Medieval Islam

Credits: 3

Studies the art and architecture produced by Islamic societies from the time of the Prophet Mohammed to the time of the Crusades (7th-14th centuries CE), and the geographic scope surrounds the Mediterranean Sea, including the Near Middle East, northern Africa, and Spain.

Former Course Number [2720]

Prerequisite: USP WA and WB courses.

Art History Electives at the 3000/4000-level: 9 Hours

Art History Electives at the 3000/4000-level (including additional Other Traditions) Credits: 9

Total Credits: 21 Hours

Ceramics Minor

The Ceramics Minor introduces students to the discipline of Ceramics in a 24 credit hour sequence.

Required Courses: 9 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

OR

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

Studio Elective Courses in Ceramics: 12 Hours

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

ART3410 - Ceramics III/I

Credits: 3

Studies development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning class. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420 and consent of instructor based on portfolio review.

ART3420 - Ceramics III/II

Credits: 3

A second semester continuation of the development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning classes. Glaze

exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420, and consent of instructor based on portfolio review.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Creative Writing Minor

The Creative Writing Minor teaches the fundamentals of creating original work while providing opportunities for the exploration of blended genres and interdisciplinary work. A minor in Creative Writing complements majors from a wide array of departments and colleges.

Creative Writing Minor

Minor in Creative Writing. The creative writing minor consists of six courses (18 hours) in creative writing and literature. Four of these courses will be in creative writing (12 hours) and must adhere to the following sequence: CW 1040 Intro to Creative Writing, two Lower Division Creative Writing courses (at the 2000-level), and an Upper

Division course (4050). In addition, two courses will be in literature (6 hours). All courses must be completed with grades of C or better.

This minor is intended to be used with any major and must be designed in conjunction with a creative writing advisor. Each course must be passed with a grade of C or better.

Digital Media Minor

The Digital Media Minor introduces students to the discipline of Digital Media in a 25 credit hour sequence.

Required Courses: 22 Hours

ART 2110: Type 1: Thinking with Type - 3 credits

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful concepting, strategic wire frame development and creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.

ART3112 - Type: Type, Images, and Narrative

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)

Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.

OR

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 25 Hours

Drawing Minor

The Drawing Minor introduces students to the discipline of Drawing in a 21 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART3052 - Life Drawing I

Credits: 3

An advanced drawing course working from a life model with an emphasis on composition, monochromatic media, drawing techniques and the skeletal and muscular construction as related to action and proportion in the human figure. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000 and ART 2005.

Studio Elective Courses in Drawing: 6 Hours

*6 credits chosen from the following...

ART3005 - Drawing III

Credits: 3

An advanced drawing course applying the fundamentals of drawing to creative individual problems in figure, still life, and/or landscape composition. Structured yet open assignments, lectures and critiques develop formal, conceptual, expressive, and technical understanding. Course may be repeated for a maximum of 6 credit hours.

When Offered (Offered spring semester).

Prerequisite: ART 2000 and ART 2005.

ART4005 - Drawing IV

Credits: 3

An advanced drawing course exploring conceptual, expressive, personal and technical limits of process and media. Individually proposed projects lead to a coherent body of work. Open discussion and structured critiques develop personal and technical understanding. Repeatable for a maximum of 9 credit hours.

Prerequisite: ART 2000 and ART 3005.

ART4052 - Life Drawing II

Credits: 3

An advanced drawing course building upon figure construction fundamentals with heavy emphasis on composition, personal expression, wet and dry media, and color with pastels. Lectures, drawing sessions and critiques develop formal, conceptual, expressive and technical understanding. May be repeated for a maximum 9 credit hours.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3052

ART3250 - Watercolor Painting I

Credits: 3

Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

ART4250 - Watercolor Painting II

Credits: 3

Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

A&S College Core 2015 ASG

Prerequisite: ART 2000 and ART 3260.

ART4975 - Independent Study and Research

Credits: 1-3

Research options in all creative areas. Students work independently and provide demonstrated ability and background knowledge to carry out self-directed research or creative activity in the research area. Arrangements regarding curricular obligations and meeting times are made with the instructor in advance.

Prerequisite: ART 2000 and 12 hours of art in research area and prior consent of instructor.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance,

Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 21 Hours

Metalsmithing Minor

The Metalsmithing Minor introduces students to the discipline of Metalsmithing in a 24 credit hour sequence.

Required Courses: 15 Hours

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART3350 - Metalsmithing II

Credits: 3

Introduces intermediate approaches to fabricating small scale, non-ferrous metals through hammer-raised forming, lost-wax casting, enameling and hardware fabrication. Historical and innovative contemporary applications are fostered through sculptural objects and jewelry-based pieces. Individual studio projects, critical discussion and presentations address aesthetic, conceptual, and technical aspects of metalsmithing.

Prerequisite: ART 2000 and ART 2350.

Studio Elective Courses in Metalsmithing: 6 Hours

ART4355 - Metalsmithing III

Credits: 3

Introduces advanced fabrication and surface techniques which build on skills developed in Metalsmithing I and II. Students propose a body of work for the semester based on individual aesthetic, conceptual and technical interests. Professional practices including resume writing, documenting, presenting and exhibiting artwork are addressed at this advanced level.

Prerequisite: ART 2000 and ART 3350.

required

ART4360 - Metalsmithing: Special Topics

Credits: 3

Focuses on a specific technique in the field of Metalsmithing for an in-depth exploration into topics such as lost-wax casting, chasing and repoussé, enameling, etc. Individual projects and critical discussion will address the special topic aesthetically, technically and conceptually.

Prerequisite: ART 2000 and ART 2350.

required

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Museum Studies Minor

The Museum Studies Minor introduces students to the discipline of Museum Studies.

Museum Studies Core: 12 Hours

- ART 2705 - Intro to Museology II Credits: 3 crosslisted as ANTH/AMST/HIST 2705

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.
USP 2003-2014 Code U3CH

Choose One of the Following

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Internship - 3 credits

3 credits in Internship

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world.

Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

ANTH4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Allows students to gain hands-on experience, bridging the gap between anthropology as an academic discipline and anthropology as practiced in museums, public archaeology agencies, non-governmental organizations, and private consulting companies. Involves a required academic component in addition to work experience. Internship credit cannot fulfill requirements of the major.

Prerequisite: anthropology major of junior/senior standing and consent of internship director and/or department head.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

OR

- Corresponding number in student's major department

Methods Core: 6 Hours

To be chosen from the following:

AMST2400 - Introduction to Historic Preservation

Credits: 3

Online course introduces students to historic preservation theory and philosophy, the history of the preservation movement and contemporary historic preservation as practiced in the public, nonprofit and private realms. Assignments include reading, research, online discussion and lectures (podcasts, videos or PowerPoint presentations), as well as directed field work.

AMST4300 - American Culture and the Public Sector

Credits: 3

Surveys American culture studies in the public sector. Topics include history and theory of public sector humanities

and social sciences; types of public sector jobs and institutions where public humanists work; and public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 5300.

When Offered (Offered once a year)

Prerequisite: 12 credits in humanities or social science courses having to do with American culture.

AMST4900 - Field Studies in American Culture

Credits: 1-4

Max Credit (Max. 4)

Field Studies in American Culture: Gives students hands-on field-based training and experience in researching, documenting, and presenting aspects of American culture. Topics may include historic preservation, folklife, oral history or related fields.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 credits in American Studies or related field. May also be taken for graduate credit.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: ANTH 1200.

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

ANTH4190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies and regulations; compliance, heritage, and avocational archaeology, cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 5190

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

USP 2015 Code U5C3

Prerequisite: 6 hours in art history.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)
Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

- HIST 4050

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

Elective Courses: 3 Hours

Students will choose course from the elective list in conjunction with their advisor, based on their area(s) of interest. Additional courses listed in the museum studies and methods cores can be chosen as electives. For a list of electives, go to www.uwyo.edu/museumstudies.

Cultural Experience / International Fieldwork

Choose one of the following:

- Study Abroad/International Field School - students may enroll or participate in an approved study abroad course or program (credit hours vary),
OR

- Foreign or Indigenous Language - students may enroll in 12 hours
OR
- A foreign language. 8 of the 12 hours must be in the same language. American Sign Language does qualify.

Painting Minor

The Painting Minor introduces students to the discipline of Painting in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

Studio Elective Courses in Painting: 9 Hours

Choose from 3000/4000-level painting courses including but not limited to:

ART3210 - Painting II

Credits: 3
Max Credit (Max. 6)

Investigates various painting techniques to create individual work. Emphasizes contemporary and classical treatment of formal, aesthetic and conceptual creative expression.

Prerequisite: ART 2000 and ART 2210.

ART4210 - Painting III

Credits: 3
Prerequisite: ART 2000 and ART 3210.

ART4220 - Painting Topics

Credits: 6
This is an advanced painting course that will cover specific painting approaches for an entire semester. Examples of topics can include Abstraction and color field, figuration, narrative painting, experimental painting media and surfaces, etc. This course will enable students to experience a more comprehensive and targeted set of painting problems for the semester. Topics will vary based on the instructor.

Prerequisite: ART 2000, ART 2210, ART 3210.

ART3250 - Watercolor Painting I

Credits: 3
Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART4250 - Watercolor Painting II

Credits: 3
Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4655 - Outdoor Studio

Credits: 3
The emphasis in this course will be on the expressive nature of outdoor creative work. Students will need to be responsive to the natural environment through a variety of media, including watercolor, oil sticks, drawing, sculpture, photography, video, etc. This course involves travel and day trips to a variety of sites throughout the county and state.

Prerequisite: ART 2000.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

OR

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

A&S College Core 2015 ASG

Prerequisite: ART 2000 and ART 3260.

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Photography Minor

The Photography Minor introduces students to the discipline of Photography in a 24 credit hour sequence.

Required Courses: 15 Hours

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

OR

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

Studio Elective Courses in Photography: 6 Hours

- Choose from 3000/4000-level photography courses

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Printmaking Minor

The Printmaking Minor introduces students to the discipline of Printmaking in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

- An upper division drawing course beyond ART 1005

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

Studio Elective Courses in Printmaking: 9 Hours

- Choose from 3000/4000-level printmaking courses Credits: 9

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Sculpture Minor

The Sculpture Minor introduces students to the discipline of Sculpture in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

Studio Elective Courses in Sculpture: 9 Hours

Choose from the following:

ART3310 - Sculptural Practices: Cast Form I

Credits: 3

Max Credit (Max. 6)

This intermediate sculptural practices course explores a wide variety of mold-making and processes including cold-casting (paper/fabric/resin casting) and both non-ferrous (bronze and aluminum) and ferrous metal (cast iron) casting techniques. Assigned projects will allow students to engage in the production of finished cast sculpture. Extensive sketchbook, artist research, and critique participation is required.

When Offered (Offered fall semester)

Prerequisite: ART 2310 and 2000.

ART3320 - Sculptural Practices: Mixed Media I

Credits: 3

Max Credit (Max. 6)

This intermediate course explores mixed media processes in sculptural practices including soft sculpture fabrication with fabric and fiber, found object manipulation, and digital processes involving 3D printing and laser cutting. Assigned projects will engage students in the production of artwork related to the topic. Extensive sketchbook, artist research, and critique participation is expected.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2310 and ART 2000.

ART3330 - Sculptural Practices: Assembled Form I

Credits: 3

Max Credit (Max. 6)

Investigates constructed and assembled form as an essential means of sculptural expression. Emphasizes wood construction, assembled metals and mixed media. Utilizes general carpentry techniques, a variety of welding methods (oxyacetylene, arc, M. I. G. and T. I. G.) and other means of assembling materials. Includes investigation of concepts in assemblage and exposure to classic and contemporary forms of assembled sculpture.

When Offered (Offered spring semester)

Prerequisite: ART 2310 and ART 2000.

ART3345 - Sculptural Practices: Special Topics

Credits: 3

Max Credit (Max. 9)

This course addresses specific areas of contemporary sculptural practices such as: Installation, Video/Sound manipulation, kinetic sculpture, and figure modeling. Assigned projects will engage the students in production of artwork related to the topic. Extensive sketchbook work, artist research, and critique participation is expected.

Prerequisite: ART 2310 and ART 2000.

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2015 Code U5H

Total Credits: 24 Hours

Graduate

Creative Writing, M.F.A.

This fully-funded MFA program is dedicated entirely to prose. We teach a wide range of courses in fiction, nonfiction, and hybrid forms. We offer award-winning faculty and prepare graduates to release books with prominent commercial and small-press publishers.

Additional Information

M.F.A. students follow the guidelines for a Plan A thesis. Only those courses in which a grade of B or better has been earned may be applied to the graduate program of study. All courses must be taken for a grade unless offered for S/U only. No graduate credit is allowed for grades S and U.

The cumulative GPA must be at least 3.000 to receive a degree. Courses below 4000-level will not count toward the degree nor will they be figured in the GPA, although they will appear on the transcript.

A minimum of four Workshops (CW 5560) and/or Creative Writing Seminars (CW 5540) must be taken. These may be in any combination to reach the four-course total, typically for a total of 12-16 credit hours. We require a cross-genre component in that mix of courses.

Requirements

- Elective courses (typically taken for a total of 18 credit hours)

ENGL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4
Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

- Other electives: free to be taken in any UW program or department across campus
- Thesis Hours (5960): 4 credit hours

Total Credits: 36 Hours (Minimum)

Total credit hours must be a minimum of 36.

Department of Botany

Botany

114 Aven Nelson Building, (307) 766-2380

FAX: (307) 766-2851

STEVEN L. MILLER, B.S. University of Wyoming 1979; M.S. Virginia Polytechnic Institute and State University 1982; Ph.D. 1985; Professor of Botany 2002, 1990.

CAMELLIA OKPODU, B.S. North Carolina State University 1987; Ph.D. North Carolina State University 1994; Professor of Botany 2021.

DAVID TANK, B.S. (Hons.) Michigan State University 1998; M.S. Michigan State University 2000; Ph.D. University of Washington 2006; Professor of Botany 2021.

NAOMI WARD, B.Sc. (Hons.) University of Queensland 1993; Ph.D. University of Warwick 1997; Professor of Molecular Biology and Botany 2019, 2007.

CYNTHIA WEINIG, B.A. (Hons.) Brown University 1991; Ph.D. Indiana University 1999; Professor of Botany and Molecular Biology 2013, 2007.

DAVID WILLIAMS, B.A. The University of Texas, Austin 1985; M.S. Texas A&M University 1988; Ph.D. Washington State University 1992; Professor of Botany 2009, 2003.

Associate Professors:

ELLEN D. CURRANO, B.Sc. (Hons.) University of Chicago 2003; Ph.D. Pennsylvania State University 2008; Associate Professor of Botany 2017, 2014.

DANIEL LAUGHLIN, B.S. Calvin College 1999; M.S. Pennsylvania State University 2002; Ph.D. Northern Arizona University 2009; Associate Professor of Botany 2017.

Assistant Professors:

LAUREN SHOEMAKER, B.A. (Hons.) Colorado College 2011; Ph.D. University of Colorado Boulder 2017; Assistant Professor of Botany 2019.

CATHERINE E. WAGNER, B.A. (Hons.) Whitman College 2004; Ph.D. Cornell University 2011; Assistant Professor of Botany 2015.

CHRISTOPHER WEISS-LEHMAN, B.A. Earlham College 2010; Ph.D. University of Colorado Boulder 2017; Assistant Professor of Botany 2019.

Senior Lecturer:

MARK E. LYFORD, B.A. St. Olaf College 1993; M.S. University of Wyoming 1995; Ph.D. 2001; Senior Lecturer in Botany 2014, 2005;

Associate Lecturer:

CHRISTOPHER NORTH, B.S. Virginia Polytechnic Institute and State University 2002; M.S. Eastern Illinois University 2005; Ph.D. University of Wyoming 2017; Associate Lecturer in Botany 2020, 2014.

Assistant Lecturers:

JAMIE CRAIT, B.Sc. Oregon State University 1999; M.S. University of Wyoming 2005; Ph.D. 2013; Assistant Lecturer in Botany 2018.

Senior Research Scientist:

BURRELL E. NELSON, B.A. Andrews University 1971; M.A. University of Wyoming 1974; Senior Research Scientist.

Research Scientist:

BEN LEGLER, B.S. University of Washington 2001; M.S. University of Wyoming 2010; Research Scientist 2021.

Professors Emeriti:

Dennis H. Knight, Stephen T. Jackson, William A. Reiners

Associate Professors Emeriti:

Daniel B. Tinker

Botany

Botany is the study of plants and their relationship to human affairs. The science is fundamental to food, fiber and pharmaceutical production; to the management of landscapes for beauty, recreation, forest products and forage; and to the protection of landscapes against pollution and other abuses. The botanist is concerned with the diversity and classification of plants and fungi, their structure at both the macroscopic and microscopic levels, and their physiology, ecology and genetics and evolutionary relationships.

Courses in botany have been developed to meet the needs of the following groups of students: those who desire a general knowledge of the subject for its cultural value; those specializing in areas which require a background in plant biology; and those selecting botany or biology as a major.

Undergraduate Degrees:

Students can choose from two undergraduate degree majors: the Botany B.S. and Biology B.S. programs. The Biology B.S. program includes an optional Concentration in Ecology and Evolution. The Biology B.S. degree program also maintains a concurrent major offered through the College of Education whereby students fulfil all the major requirements for Biology on top of their requirements for the B.S. degree in Secondary Science Education with a major in Biological Sciences Education.

Undergraduate minors:

Minors in Biology and Botany are offered.

Graduate Study:

The Department of Botany offers graduate programs leading to the master of science and the doctor of philosophy degrees in botany and the master of science degree in botany/water resources.

Program Specific Admission Requirements (Graduate Study)

A minimum GPA of 3.000 on previous coursework is required.

Program Specific Degree Requirements (Graduate Study)

Regardless of field of specialization, all candidates will be held responsible for basic information in the following areas: genetics, physiology, morphology, and evolutionary and environmental botany. A knowledge of chemistry (including organic and elementary biochemistry), physics, calculus, and statistics may be required.

A minimum GPA of 3.000 must be maintained. Any course in which a C (or below) or U is obtained cannot be counted toward the degree requirement.

Participation in seminars will be required of all candidates during their residence at the University of Wyoming.

Major

Biology, B.S.

The Bachelor of Science degree in Biology is designed to provide a thorough foundation in biology as well as other supporting areas of physical and life sciences and mathematics while providing flexibility and student choice.

Additional Information

The Biology major is designed for students interested in obtaining a broad education in biological sciences. It enables students to combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the major. On completion of the core requirements for the major, specific courses selected to complete the major may vary according to students' interests and are worked out by consultations between student and adviser. The requirements for a bachelor of science degree in biology are as follows:

*Course must be completed with a grade of C or better.

The degree program is administered by the Department of Botany.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on

developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3

A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

Biology Major -Lower Division Courses

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

A&S College Core 2015 Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

A&S College Core 2015 This course is not an acceptable prerequisite for CHEM 2440.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Foundational Biology - Two of the Following:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR MOLB 2021 (General Microbiology, crosslisted with MICR 2021)

Data Science course- select ONE of the following:

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

Biology Major Upper Division Courses

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Scientific Communication BOT 4100/4101 recommended; any COM3 will apply here.

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences. Preference given to seniors.

Cross Listed ZOO 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Biology, Ecology and Evolution Concentration, B.S.

The Department of Botany offers the Ecology and Evolution Concentration for Biology majors. This concentration will prepare students for a career or further graduate study. Students will receive the academic training to become park naturalists, environmental consultants, restoration ecologists, natural resource managers, conservation scientists, environmental educators, and research technicians in academic or government agencies. In addition to core concepts and theories, this concentration will teach students important skills that are required in the workforce, including organism identification, quantitative reasoning, data analysis, and scientific communication. Students also will have opportunities to participate in faculty research projects, which will train them for graduate research, careers in scientific discovery, or any endeavor where critical thinking and problem solving are essential components of the vocation.

To fulfill the requirements of the concentration, students will select five courses that meet a minimum of 15 credit hours in addition to what is required for the Biology Major. These will be selected from a variety of upper-division (3000-4000) courses that satisfy their individual interests (listed below).

Students must select

1. one course in organismal biology (A),
2. one course in ecology (B),
3. one course in evolution (C),
4. any one additional course from these three categories,
5. and one fourth-year capstone course (D).

Students who concentrate in Ecology and Evolution should plan to take LIFE3500 - Evolutionary Biology in their third year to be able to take an additional evolution course before graduating. All courses listed below will count toward this concentration. However, there are many other excellent courses offered across campus that are relevant to this concentration. Students can obtain approval to take other courses that are not included on the list below to satisfy the requirements of the concentration.

List of Potential Courses

A. Organismal Biology

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

B. Ecology

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Dual Listed ZOO 5650.

Prerequisite: LIFE 2022.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

OR

GEOL4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 4280.

Dual Listed GEOL 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

C. Evolution

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution of development)
- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution seminar)

BOT5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

OR

ZOO5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/BOT 5060.

Prerequisite: graduate student in good standing.

D. Senior Capstone Course

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

Botany, B.S.

The Bachelor of Science degree in Botany is designed to provide a thorough foundation in botany as well as other supporting areas of physical and life sciences and mathematics.

Additional Information

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Lower Division Courses

Students take introductory courses in biology, chemistry, physics, and mathematics. These courses provide the foundation for more advanced work in upper division biology courses and contribute to a more comprehensive understanding of biological processes.

MATH1400 - College Algebra

Credits: 3
Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3
Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.
Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.
OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021
When Offered Fall and Spring
Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit

earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

or

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

Upper Division Courses

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a

Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

A&S College Core 2015 Preference given to seniors

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences. Preference given to seniors.

Cross Listed ZOO 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Upper Division BOT elective credits- **FOUR** credit hours from the following:

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other

plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed ATSC/ESS 4001/GEOL 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

BOT4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

BOT4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Provides undergraduate students with academic credit for approved work experiences in the fields of botany and biology. Must be arranged in consultation with a botany faculty member and the work supervisor.

Prerequisite: junior or senior standing,

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT5000 - Graduate Seminar

Credits: 1-3

Max Credit (Max. 6)

Selected topics on current research in the botanical sciences.

Prerequisite: 15 hours of botany or biology.

BOT5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

BOT5150 - Research in Remote Sensing

Credits: 1-6

Max Credit (Max. 6)

Independent research into problems on the remote sensing of vegetation using satellite technology.

Prerequisite: graduate standing and consent of instructor.

BOT5200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 4200.

BOT5480 - Spatial Information Sciences Seminar

Credits: 1

There are many earth science technologies, remote sensing, GIS and GPS. Synergism among these technologies increase the range of solutions for research and management. This course is a forum for presentation of these solutions or questions requiring solutions.

Cross Listed GEOL 5480.

Prerequisite: a course in remote sensing, GIS, GPS, and graduate standing.

BOT5600 - Ecological Modeling

Credits: 3

Course will immerse students in the most important and fundamental statistical modeling techniques for data analysis. Each class will include theoretical content delivered through a brief lecture and the immediate application of the theory through activities using R software.

Prerequisite: STAT 2050, STAT 3050, or an equivalent course.

Minor

Biology, Minor

Students may combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the minor.

Biology minor - additional information

Students who are majoring in Biology may not declare a Minor in Biology. Elective credit hours used towards the BIOL minor must be in courses not being counted towards a student's major. A grade of "C" or better is required in all courses. At least 25% of credit hours for the BIOL minor must be earned in upper division courses.

Credit in other courses with different prefixes in the biological sciences area may be applied to the minor in Biology at the discretion of a student's minor advisor.

Required Courses:

(12 credit hours)

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Select Two of the Following:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

(or MOLB 2021 crosslisted)

Elective Courses:

(9-12 credit hours)

Select one different course from each of three of the following subject areas. One of the three courses must have a laboratory component.

Molecular/Genetics/Cell Biology:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

- ZOO 4425

Morphology/Physiology:

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

Evolution:

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)
Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

Ecology:

- LIFE 3400

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

Botany, Minor

The Botany minor provides foundational coursework in botany as well as other supporting areas of physical and life sciences and mathematics

Required Courses Credits: 11-12 Hours

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

OR

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

OR

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

Elective Courses Credits: 7 Hours (Minimum)

(minimum 7 credit hours).

Choose from the following:

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

- BOT 3150
- BOT 4111
- BOT 4130
- BOT 4330

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

Total Credits for Botany Minor: 18 Hours

Graduate

Botany, M.S.

Requirements for this degree are 26 semester hours of courses approved by the student's committee plus four hours of BOT5960 - Thesis Research.

Botany, Ph.D.

In addition to the minimum requirements set forth in this Catalog, the Department of Botany may require that a student demonstrate skills in two peripheral areas. This decision is made for individual cases by the major professor and graduate committee. These could include foreign languages, statistics, or computer science. In some cases, additional skills may be required.

Department of Chemistry

204 Physical Sciences Building,

(307) 766-4363

FAX: (307) 766-2807

Web site: www.uwyo.edu/chemistry

Department Head: Debashis Dutta

Professors:

DAVID T. ANDERSON, B.S. George Washington University 1987; Ph.D. Dartmouth College 1993; Professor of Chemistry 2012, 2000.

FRANCO BASILE, B.S. University of Wisconsin-Eau Claire 1986; Ph.D. Purdue University 1992; Professor of Chemistry 2018, 2003.

DEBASHIS DUTTA, B. Tech Indian Institute of Technology 1998; Ph.D. University of Notre Dame 2003; Professor of Chemistry 2017, 2006.

JOHN O. HOBERG, B.A. Jamestown College 1984; Ph.D. Montana State University 1990; Professor of Chemistry 2020, 2004.

TERESA LEHMANN DELLA VOLPE, B.S. Universidad Central de Venezuela 1987; Ph.D. University of Minnesota 1997; Professor of Chemistry 2021, 2008.

BRUCE A. PARKINSON, B.S. Iowa State University 1972; Ph.D. California Institute of Technology 1977; Professor of Chemistry 2008.

JING ZHOU, B.S. Xiamen University 1997; Ph.D. University of South Carolina 2004; Professor of Chemistry 2021, 2007.

Associate Professors:

ELLIOTT HULLEY, B.S. Ursinus College 2005; Ph.D. Cornell University 2011; Associate Professor of Chemistry 2020, 2014.

BRIAN M. LEONARD, B.S. University of Nebraska at Kearney 2003; Ph.D. Texas A&M 2008; Associate Professor of Chemistry 2016, 2010.

Assistant Professors:

CALEB M. HILL, B.S. Jacksonville State University 2009; Ph.D. University of Alabama 2014; Assistant Professor of Chemistry 2016.

LAURA RITA DE SOUSA OLIVEIRA, B.S. New Mexico Institute of Mining and Technology 2010; Ph.D. University of California, Riverside 2017; Assistant Professor of Chemistry 2020.

MICHAEL T. TAYLOR, B.S. Salisbury University 2006; Ph.D. University of Delaware 2013; Assistant Professor of Chemistry 2017.

Research Faculty:

NAVAMONEY ARULSAMY, B.Sc. Madurai-Kamaraj University, India 1982; M.Sc. 1986; Ph.D. University of Hyderabad, India 1991; Senior Research Scientist 2013, 2005.

ALEXANDER GORONCY, B.S. University of Bremen; Ph.D. University of South Carolina; Research Scientist 2015.

Adjunct Professors:

YURI DAHNOVSKY, Ph.D. Institute of Chemical Physics, Moscow 1983; Adjunct Professor of Chemistry 2001.

MAOHONG FAN, Ph.D. Osaka University 2003; Professor in SER and CEAS; Adjunct Professor in Chemistry 2009.

Senior Lecturer:

CARLA DEE BECKETT, B.S. University of Wyoming 1991; M.S. 2007; Senior Lecturer of Chemistry 2012, 2011.

RACHEL WATSON, Senior Lecturer in Chemistry

Assistant Lecturers:

KUI CHEN, B.Sc. Xiamen University 1997; Ph.D. University of South Carolina 2004; Assistant Lecturer of Chemistry 2019.

GINKA S. KUBELKA, M.S. University of Wuerzburg, Germany 2010; Ph.D. University of Wyoming 2015. Assistant Lecturer of Chemistry 2016.

Professors Emeritus:

Vernon Archer, Keith T. Carron, Robert Corcoran, Clyde Edmiston, Anthony Guzzo, Suzanne Harris, Robert Hurtubise, David Jaeger, E.G. Meyer, Dean M. Roddick, Edward Clennan.

Senior Lecturer Emeritus:

Patricia A. Goodson

Chemistry is one of the fundamental physical sciences dealing with the structure and properties of matter, along with changes that matter undergoes. Chemistry's scope encompasses all substances, living and non-living. Its study and practice include (1) the theoretical and experimental aspects of chemical bonding and structure using computational, spectroscopic, and diffraction techniques; (2) the laboratory synthesis from simple starting materials of desirable compounds in the inorganic, organic and biological classes; and (3) the total analysis of complex mixtures using modern spectroscopic and electrochemical methods. Since we live in a material world, applications of chemical knowledge influence most areas of human endeavor: scientific, economic, political and social. Many of the advances in the areas of new materials, medicines, biotechnology, food production, new energy sources and semiconductor technology associated with the "computer revolution" are based on chemistry and chemical principles. Some understanding of these chemical principles should be part of every educated person's knowledge.

Because of the broad scope of this discipline, the Department of Chemistry offers a variety of courses and programs. These programs meet the needs of students planning professional careers in chemistry and those wishing to major in chemistry for other objectives. In particular, chemistry is a traditional pre-professional major for students interested in medicine and dentistry. Specific courses are offered to serve other major areas and as part of University Studies and A&S core requirements.

Students who have taken an AP examination and have received a score of 4 or 5 may receive credit for CHEM 1020 and CHEM 1030.

Undergraduate Minor

A minor is offered in the Department of Chemistry. Further information may be found at the web site www.uwyo.edu/chemistry.

Graduate Study

The Department of Chemistry offers programs leading to the degrees of master of science and doctor of philosophy chemistry. The master's degree is offered mainly under Plan A with Plan B reserved for special circumstances.

The department also participates in the preparation of students for the degrees of master of science in natural science and master of science in teaching (M.S.T.), which are designed to improve the competence of those engaged in science teaching.

Program Specific Admission Requirements

In addition to the minimum requirements set forth in this *Catalog*, the Department of Chemistry requires that a student have taken the following undergraduate courses: one year of general chemistry; one semester/quarter of quantitative analysis; one year of organic chemistry plus laboratory; one year of physical chemistry plus laboratory; one year of

physics; and mathematics through multivariable calculus. As appropriate, one or more of these course requirements may be waived at the discretion of the department.

Major

Chemistry, B.A.

The Bachelor of Arts program (B.A.) is designed to provide a solid foundation in chemistry for those pursuing careers that would benefit from chemical expertise.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Chemistry** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Plan 1

(32 hours of chemistry)

Course Requirements

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

- **Additional USP requirements** Credits: 21
- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 45

Basic Chemistry: 26 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical

theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

OR

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

Additional Upper-Level Chemistry: 6 Hours

(Including one of the following)

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Minimum Total: 120 Hours

Additional Requirements

The Plan 1 B.S. degree requires at least 38 hours.

The Plan 2 B.S. requires 46 hours of chemistry courses.

Since the chemistry required in the first two years of all programs is the same, students interested in pursuing a chemistry major can elect any program initially. Discussions with a departmental adviser will allow students to choose the most appropriate major for their career objectives. In general, students planning graduate work in chemistry should elect one of the B.S. programs.

The B.A. program has a more liberal content with additional electives. It would support careers in business, law and advanced study in areas needing a strong chemistry background such as toxicology or forensic science.

A B.A. is suitable for students in the College of Education who wish to obtain an A&S degree, and may also be appropriate for some premedical tracks.

The Plan 2 (CACCS) program is designed to meet standards set by the American Chemical Society (ACS). A student who completes the Plan 2 B.S. program will be certified by the Department of Chemistry to the ACS as having met the specific ACS requirements for undergraduate professional training in chemistry.

Students must obtain a grade of C- or higher in each of the chemistry, physics or math courses specifically required for their degree.

The department offers both, B.A. and B.S. degree programs. The B.A. degree includes a minimum of 32 hours of chemistry.

The Bachelor of Arts program (B.A.) is designed to provide a solid foundation in chemistry for those pursuing careers that would benefit from chemical expertise.

Chemistry, B.S.

The Bachelor of Science program (B.S.) provides an intensive study of chemistry appropriate for those pursuing careers in the chemical sciences.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Chemistry** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Plan 1

(38 hours of chemistry)

Course Requirements

CHEM4930 - Undergraduate Research

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

- Additional upper-level chemistry Credits: 3

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

- **Additional USP requirements** Credits: 21
- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 34

Basic Chemistry: 36 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4000 - Career Skills

Credits: 3

Max Credit 3

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

When Offered (Normally offered fall semester)

Prerequisite: At least 6 credit hours of Chemistry (CHEM) classes.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Minimum Total: 120 Hours

Plan 2 (CACS)

(46 hours of chemistry)

Course Requirements

CHEM4930 - Undergraduate Research

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

- Additional upper-division chemistry Credits: 2-3

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

- **Additional USP requirements** Credits: 21
- **Additional A & S core requirements** Credits: 6
- **Electives** Credits: 4-6

Basic Chemistry: 43-44 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

OR

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

CHEM4000 - Career Skills

Credits: 3

Max Credit 3

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

When Offered (Normally offered fall semester)

Prerequisite: At least 6 credit hours of Chemistry (CHEM) classes.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)
Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Computer Science: 3 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

CHEM4515 - Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. This includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software and mathematical analysis of physical chemistry problems.

Dual Listed CHEM 5515.

Prerequisite: MATH 2200 and MATH 2205, CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

Program Supporting Courses: 18 Hours

A group of courses selected to further the career objectives of the individual student. These are chosen after consultation with the departmental adviser and must subsequently be approved by the departmental Undergraduate Studies Committee. A grade of C- or higher is required for all program supporting courses.

Minimum Total: 120 Hours

Additional Requirements

The BS in chemistry requires a minimum of 39 hours of chemistry.

1 See the "Prerequisite and MPE Cut Score Reference Chart" on the Math Placement website for the most up-to-date math placement equivalencies: <http://www.uwyo.edu/mathstats/math-placement/>.

2 Students with specific additional interests (e.g. pre-med or another pre-professional program) may wish to move their V/H/C2 courses to alternate semesters so as to take other necessary required courses (e.g. LIFE 1010, MOLB 3000, etc.).

3 Students taking CHEM 4010 or MICR 4321 as their C3 are not required to take CHEM 4000.

Graduate

Chemistry, M.S.

The MS degree introduces students to critical thinking necessary to work independently in industrial settings & prepares you for a professional career. Provides classroom training, presentation & teaching skills along with professional development

Plan A (Thesis)

In addition to fulfilling the minimum university requirements, a student must take the Career Skills course (CHEM 5000) plus one 3 hour course in each of three of the four areas (inorganic, analytical, organic, and physical), excluding special topics and research courses. These courses must be graduate courses, 5000 and above.

One departmental seminar is required to be presented on the thesis research.

Take 9 Credits

A student may also take 9 credits of any combination of

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: consent of instructor.

Additional Requirements

The M.S. committee consists of the student's major professor and two other members. The M.S. Committee is responsible for advising the candidate concerning course work and research. The M.S. Committee is also responsible for the final examination of the candidate. In addition to a thesis, the M.S. candidate is also required to present a departmental seminar on the thesis topic.

A student must take the Career Skills course (CHEM 5000) plus one three-hour course in each of three of the four areas (inorganic, analytical, organic, and physical), excluding special topics and research courses. These courses must be graduate courses, 5000 and above. A student may also take nine credits of any combination of CHEM 5190, 5290, 5390, 5590, or 5790. One departmental seminar is required on the thesis research.

A student in a M.S. program who is in good standing with a grade point average equal to a B or greater may petition to transfer into the Ph.D. program upon approval of his/her M.S. committee and recommendation of the Graduate Committee.

Chemistry, Ph.D.

Our Ph.D. program is a research degree in advanced chemistry that prepares our students for careers in academia or as leaders in industry. A Master's degree is not required; students may enter directly into the Ph.D. program.

Students May Also Take

A student may also take 12 credits of any combination of

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: consent of instructor.

Area Selected as a Major

In the area selected as a major, the student will take the following as a minimum:

Analytical

CHEM5250 - Advanced Chemical Instrumentation

Credits: 3

Introduces chemistry students to the basic elements of electronics. Specific topics include networks, passive and active filters, digital electronics, logic gates, counters, flip-flops, and converters. Second half of course introduces students to experimental design, pattern recognition, factorial analysis, and multivariate statistical methods.

Prerequisite: CHEM 4230 or its equivalent.

- plus 9 hours of graduate level analytical courses

Inorganic

- 12 hours of graduate level inorganic courses

Organic

CHEM5320 - Spectroscopic Methods of Structure Determination

Credits: 3

Provides theoretical and practical treatment of spectroscopic methods for application in research. Topics include ultraviolet, infrared, and nuclear magnetic resonance spectroscopy and mass spectrometry.

Prerequisite: CHEM 2440, CHEM 4507.

CHEM5330 - Advanced Organic Chemistry

Credits: 3

Treatment of organic chemistry from the viewpoints of structure and mechanism with emphasis on structural theory of bonding, stereochemistry and the general classes of organic reactions.

Prerequisite: CHEM 2440 and CHEM 4507.

CHEM5340 - Synthetic Methods in Organic Chemistry

Credits: 3

Surveys and applies the important synthetic methods of organic chemistry with particular attention to recent developments.

Prerequisite: CHEM 5330.

- CHEM 5350

Physical

- any three graduate level physical chemistry courses

Additional Requirements

In addition to fulfilling the minimum university requirements, a student must take the Career Skills course (CHEM 5000) plus one 3 hour graduate course (5000 and above) in each of the four areas (inorganic, analytical, organic, and physical), excluding special topics, tool courses CHEM 5130, CHEM 5320, CHEM 5760, and research courses.

A student may also take 12 credits of any combination of CHEM 5190, 5290, 5390, 5590, or 5790.

Students must obtain satisfactory performance on a series of written major field cumulative examinations, including special topics.

Students must obtain satisfactory performance on a preliminary examination, part written and part oral.

Students must present a seminar based on the dissertation research. Students must also obtain one additional credit of 5000 by presenting a divisional or departmental seminar or an oral presentation at a regional or national research meeting. In addition, students must make one presentation at the annual University of Wyoming Graduate School Symposium.

Department of Communication and Journalism

223 Ross Hall, (307) 766-3122

FAX: (307) 766-5293

Web site: www.uwyo.edu/COJO

Department Chair: Cindy Price Schultz

Professor:

CHIA FANG (SANDY) HSU, B.A. Chinese Culture University 1995; M.A. Washington State University 1997; Ph.D. Washington State University 2002; Associate Professor of Communication and Journalism 2009, 2003.

Associate Professors:

KRISTEN D. LANDREVILLE, B.S. University of Florida 2004; M.A. 2006; Ph.D. Ohio State University 2010; Associate Professor of Communication and Journalism 2017, 2010.

LI LI, B.A. Hebei Normal University 2001; M.A. China University of Mining and Technology 2004; M.A. Ohio University 2009; Ph.D. 2012; Associate Professor of Communication and Journalism 2019, 2012.

CINDY J. PRICE SCHULTZ, B.A. University of Sioux Falls 1989; M.S. South Dakota State University 1992; Ph.D. Southern Illinois University 2000; Associate Professor of Communication and Journalism 2005, 1999.

Assistant Professor:

KATHRYN (KAATIE) COOPER, B.S. Trinity University 2008; M.A. Ohio State University 2013; Ph.D. 2018; Assistant Professor of Communication and Journalism 2019.

Instructor:

SHANE EPPING, B.A. University of Chicago; M.A. Washington University, St.Louis; M.A. University of Missouri

Senior Lecturers:

BEAU BINGHAM, B.S. Idaho State University 2000; M.A. New Mexico State University 2002; Senior Lecturer of Communication and Journalism 2007, 2003.

JUSTIN STEWART, B.A. University of Wyoming 2003; M.A. 2005; Senior Lecturer of Communication and Journalism 2017, 2005.

Assistant Lecturers:

MATTHEW LIU, B.A. University of Mary Washington 2009; M.A. Wake Forest University 2014; Assistant Lecturer of Communication and Journalism 2019.

MITZI STEWART, B.A. University of Wyoming 2007; M.A. 2015; Assistant Lecturer of Communication and Journalism 2019.

Emeriti:

Michael R. Brown, B. Wayne Callaway, William C. Donaghy, George A. Gladney, John W. Ravage, Kenneth L. Smith

The Department of Communication and Journalism provides a broad range of professional and research courses, offering a sound interdisciplinary academic program for students who plan careers in communication or media. Courses are comprised of writing, speaking and analyzing messages; forms of interpersonal communication; media effects and audiences' interpretations of media messages and images. Degrees are granted in communication and journalism with academic specialties in each of the degree areas. Students are given academic preparation in communication skills (media writing and public speaking), coupled with opportunities for professional experience in their majors. The department also offers minors in public relations, communication, journalism, and marketing communication.

Facilities and Research Activities

The department encourages majors to work actively in professional opportunities. The department offers unique experience for students with the student newspaper, *The Branding Iron*.

Oral Communication Center, Ross Hall 442. A resource for the entire university community. The lab is open for anyone required to present material orally. Lab instructors offer assistance at any stage in the process—from topic selection, purpose statements and gathering materials—to organizing, outlining and rehearsal. They can help alleviate speech anxiety that may prevent or inhibit some individuals from achieving their overall academic or career goals. Clients can have their presentations recorded for critical input and evaluation as well as for portfolio or interview applications.

Debate. The department conducts a nationally recognized program of Cross Examination Debate Association (CEDA) and has a British Parliament team. Teams and individuals representing the university attend national intercollegiate tournaments each year. Participation in the forensics program is open to all University of Wyoming students on a credit (COJO 2099) or non-credit basis.

Laboratories. The department has computer laboratories that support the professional, academic and research programs. These include a computer lab and digital production equipment.

Research. The department encourages undergraduate and graduate research. Faculty and students participate in research projects in social, cultural and political aspects related to media, interpersonal and organizational processes.

Internships. Journalism majors are required to complete internships in their field. Communication majors are encouraged to complete internships in their field. In addition to working with the *Branding Iron*, students can complete internships with newspapers; advertising and public relations agencies; non-profit organizations; businesses, professional and university sports organizations; governmental agencies; and many others. *Note:* a maximum of 6 hours in COJO 3480 and COJO 4990 count as fulfillment of the requirements for a major. Up to 12 hours will count toward graduation as upper-division hours.

Student Organizations

Professional Organizations. The department has a chapter of Lambda Pi Eta, communication honorary.

Student Activity. Within the department, student representatives participate on faculty committees where they assist in forming policies of the department.

The Branding Iron. The daily campus newspaper is independently managed by students at UW. It provides professional experiences for reporting, editorial, photojournalism, publication design and advertising.

The Owen Wister Review. The literary and arts magazine is independently managed and produced by university students, it features poetry, short stories, essays, photography and artwork.

Frontiers Magazine. The magazine is independently managed by UW students. Containing general interest content, the publication offers students opportunities to improve their professional skills in feature writing, in-depth reporting, photography, layout, design, advertising and marketing. Like the *Branding Iron* and *Owen Wister Review*, *Frontiers* is published under the auspices of UW Student Publications.

Scholarships and Awards

The department has several scholarships available to qualified students. Most are managed by Student Financial Aid.

Undergraduate Programs

The department offers courses leading to baccalaureate degrees in communication and journalism, as well as being an instrumental part of the Agricultural Communications degree. If a student wishes to double major in any of these degrees, only six credits will double count for each major.

Students majoring in the department must earn a grade of C or better in departmental required courses. Students may not take a course for S/U credit to satisfy requirements of the major.

Minors

The department offers minors in communication, journalism, marketing communication, and public relations. All minors must have a 2.00 minimum in minor classes. If a student is a communication, journalism or Agricultural Communications major, only six credits can double count for the major and the minor.

Graduate Study

The Department of Communication and Journalism offers graduate work leading to the master of arts degree in communication (either thesis or non-thesis) with emphasis on human communication or media communication.

The program offers coursework and study in rhetorical, critical/cultural, and social scientific perspectives and methodologies. The program is designed to be flexible such that students can examine questions that relate to their specific interests in human communication and/or mediated communication. Areas of interest include but are not limited to 1) communication processes in media (e.g., journalism, social media, advertising, public relations) about various issues such as politics, race and ethnicity, science, health, law and ethics, and international relations; 2) communication processes in human relationships (e.g., in interpersonal, small group, and organizational settings) about various issues such as culture, diversity, education, technology, science, and politics; and 3) communication as an agent of stability and change in diverse social systems.

Program Specific Admission Requirements

A cumulative minimum grade point average of 3.000 (A=4.000) on previous coursework is required for full admission.

The GRE is not required for admission to the graduate program. However, anyone who wants to be considered for a graduate assistantship in the department must take the GRE.

For international graduate students, the minimum acceptable TOEFL score is 540 (76 iBT). The minimum acceptable IELTS score is 6.5. International students must also provide proof of financial support (see UW Admissions for more details).

All graduate student applications, both domestic and international, must provide a writing sample of their work, whether that is a research paper, media publication, or another example of scholarly work. Please contact the director of graduate studies with any questions about the writing sample.

Major

Communication, B.A.

Communication is a liberal arts degree relevant to a variety of careers in community relations, public relations, politics, administration, law, sales management and many other fields.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Departmental Core Courses

In addition to the university studies requirements listed in this Catalog, all students majoring in communication and journalism must take the following required courses:

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Required Courses

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

- Electives Credits: 15 (At least 12 elective hours must be at the 3000-level or higher of COJO courses.) The other three hours may be lower or upper division in COJO/COMM.

College of Arts and Science Requirements

- A&S U.S. Diveristy (ASD) Credits: 3
- A&S Global Awareness (ASG) Credits: 3

Additional Program Requirements

- Physical and Natural World Credits: 6-8 (PN)
- **OR**
- Quantitative Reasoning Credits: 6-8 (Q)

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

- Elective Credits: 15 (At least 9 hours must be from the list of journalism courses.) Three hours need to be upper division in COJO. The other three hours can be upper or lower division in COJO/COMM.

Departmental Core Courses

In addition to the university studies requirements listed in this catalog, all students majoring in communication and journalism must take the following required courses:

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

Electives: 6 Hours

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3520 - Communication Technology and Society

Credits: 3

Studies role of communication technology in functioning of society. Examines history of effects on personal growth, self-concept, world view, creative thinking, personal relationships and social processes.

Prerequisite: COMM 1000 or COMM 1040.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO3900 - Family Communication

Credits: 3

This course will assist students in a study of the concept of family from a communication perspective. The goals of the course include:

Prerequisite: COMM 1040.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4030 - Advanced Interpersonal Communication

Credits: 3

Studies research and theory in interpersonal relationships; formation and maintenance of friendships; marriages; and group relationships.

Prerequisite: COMM 1040 and 6 hours in the department.

COJO4050 - Communication and Conflict

Credits: 3

Studies research and theory concerning communication in conflict development and management. Examines forms of conflict, including occurrences in interpersonal, group, organizational and cultural contexts.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

USP 2015 Code U5C3

Prerequisite: COMM 1040 and junior standing.

COJO4140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the area of nonverbal communication. Students are required to complete an independent study of some aspect of nonverbal communication relevant to interests.

Dual Listed COJO 5140.

Prerequisite: junior standing.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

COJO4620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 5620.

Prerequisite: COMM 1000 or COJO 1400.

COJO4640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 5640.

Prerequisite: COMM 1000 or COMM 1040.

COJO4210 - Special Topics in Communication

Credits: 1-3

Intensive study of such special problems and topics in human communication processes as gender relations, power dynamics, family and political communication. Content varies.

Dual Listed COJO 5210.

Prerequisite: COMM 1040 and 9 hours in the department.

Total: 18 Hours

Journalism Minor

Required Courses: 9 Hours

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

Elective Courses: 9 Hours

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3000 - History of American Journalism

Credits: 3

Presents history and development of American journalism from colonial times to present, emphasizing 20th century.

Prerequisite: COMM 1000.

COJO3100 - Public Affairs Reporting

Credits: 3

Practices in public affairs reporting, emphasizing local and state political organization as foundation for such reporting. Specialized reporting fields. News analysis.

Prerequisite: COMM 2100.

COJO3200 - Graphics of Communication

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP 2003-2014 Code U3CA

Prerequisite: COMM 1000.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4230 - Special Topics in Mass Media

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed AAST 4233 and GWST 4233.

Dual Listed COJO 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO4400 - Photojournalism

Credits: 3

Studies and intensively practices reporting news and features photographically, plus essentials of advertising photography. Includes advanced camera and darkroom techniques and photo editing. Two one-hour lectures and one two-hour laboratory weekly.

Prerequisite: COMM 2400.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed ENR 4700.

Dual Listed COJO 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

Total: 18 Hours

Marketing Communication Minor

The marketing communication minor is designed for College of Business and communication and journalism majors. Other majors are not recommended for this minor. For questions regarding this, please contact the minor supervisor.

Required for all Minors

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and

quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

Emphasis

COJO Emphasis

(to be taken by non-COJO majors):

Choose Three Courses from the Following: 9 Hours

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3200 - Graphics of Communication

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP 2003-2014 Code U3CA

Prerequisite: COMM 1000.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

Prerequisite: COJO 3310.

Marketing Emphasis

(to be taken by non-College of Business majors):

Choose Three Courses from the Following: 9 Hours

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 2100, advanced business standing.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 2100 and junior class standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

MKT4910 - Topics in Marketing

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Total: 21 Hours

Public Relations Minor

Public relations is a minor that can help you in numerous fields. It is foundational for learning how to promote your organization and build relationships with many different publics to the benefit of all involved.

Required: 12 Hours

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

Prerequisite: COJO 3310.

Three of the Following: 9 Hours

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4230 - Special Topics in Mass Media

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

Total: 21 Hours

Graduate

Communication, M.A.

Administered by the Director of Graduate Studies, the programs are structured to facilitate completion of requirements for the M.A. degree in two years. Deficiency makeups may be required.

Research Thesis: 31 Hours

31 hour program.

Students must complete an accepted research thesis approved by the student's thesis committee.

Students must complete a minimum of 27 credit hours and 4 hours of thesis credit. A minimum of 24 hours must be within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 3 hours of 4000-level coursework.

Students Must Complete

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

COJO5080 - Qualitative Research Methods

Credits: 3

Students study principles and issues associated with qualitative methods used in communication and media research. The class explores methods that use interpersonal communication and observation as tools for data collection and explores methods that analyze media content from a critical and qualitative perspective.

Prerequisite: graduate standing.

COJO5800 - Foundations of Communication and Journalism

Credits: 3

Examines current issues and trends in the various areas of communication and journalism that are represented within the department. Students analyze the historical roots of these issues and trends as a way of understanding the present context and future evolution of communication and journalism scholarship.

Prerequisite: first year of graduate study and acceptance into the COJO graduate program.

One of the Following Theory Courses:

COJO5061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 5061.

Dual Listed COJO 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

COJO5310 - Seminar in Mass Communications

Credits: 3

The study of contemporary, historical, critical and behavioral theories of mass communication processes. Attention primarily on the social functions performed by mediated messages.

Prerequisite: graduate standing.

COJO5540 - Seminar in Communication Theory

Credits: 3

An intensive examination of various metatheoretical assumptions and theoretical models used in the study of communicative dynamics.

Prerequisite: graduate standing.

Professional Project: 33 Hours

33 hour program.

Students must complete an accepted professional project (e.g., documentary film, public relations and marketing plan, website) approved by the student's graduate committee. Students who chose the project option will be required to take 30 credit hours plus 3 hours of Graduate Project credits (for a total of 33 credit hours). A minimum of 27 hours must be taken within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 6 hours of 4000-level coursework.

Students Must Complete

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Department Head: Eric Wodahl

Mission Statement

The Department of Criminal Justice & Sociology is committed to providing its students with a comprehensive liberal arts education and advancing research of value to Wyoming and our respective fields. We strive to provide a high-quality education to students that will inspire them to become critical thinkers, effective communicators, and lifelong consumers of knowledge. Students will be exposed to diverse perspectives, research, and learning opportunities to prepare them for a variety of professions in the public, private, non-profit, research, service, and academic settings.

Faculty

Professors:

ADRIENNE FRENG, B.A. Black Hills State University 1995; M.A. University of Nebraska 1997; Ph.D. 2001; Professor of Criminal Justice 2007, 2001.

ERIC J. WODAHL, A.A. Eastern Wyoming College 1992; B.A. Chadron State College 1994; M.P.A. University of Wyoming 2003; Ph.D. University of Nebraska at Omaha 2007; Professor of Criminal Justice 2021, 2007.

Associate Professors:

LAUREN McLANE, B.S. Radford University 2002; J.D. Seattle University School of Law 2008; Associate Professor of Law 2021, 2018.

JAMIE SNYDER, B.S. Northern Kentucky University 2005; M.S. University of Cincinnati 2007; Ph.D. 2011; Associate Professor of Criminal Justice 2021, 2018.

JENNIFER TABLER, B.A. University of California Los Angeles 2010; M.S. University of Utah 2013; Ph.D. 2016; Associate Professor of Sociology 2022, 2018.

Assistant Professors:

DANIEL AUERBACH, B.S. St. Lawrence University 2008; M.S. North Carolina State University 2012; Ph.D. University of Utah 2020; Assistant Professor of Sociology 2020.

KATELYN GOLLADAY, B.B.A. Pacific Lutheran University 2012; M.S. Arizona State University 2014; Ph.D. 2018; Assistant Professor of Criminal Justice 2018.

CLAIR WHITE, B.A. Colorado State University 2009; Ph.D. Arizona State University 2015; Assistant Professor of Criminal Justice 2018.

Lecturers:

DANIEL FETSCO, B.A. University of Wyoming 1995; J.D. University of Denver 1998; M.A. Arizona State University 2013; Assistant Lecturer of Criminal Justice 2017.

KAITLYN ROOT, B.A. Western Washington University 2012; M.A. University of Akron 2017; Ph.D. 2020; Assistant Professional Lecturer 2020.

Adjunct Professor:

(See Catalog section following name for academic credentials.)

Robert A. Schuhmann, political science

Professors Emeriti:

David Ashley, Audie Blevins, Gary Hampe, Malcolm Holmes, Quee-Young Kim, Richard Machalek

Degree Programs

Criminal Justice Program

Criminal Justice is a social science that major examines the causes and impacts of crime in society. Graduates go on to careers in fields such as law enforcement, homeland security, probation and parole, and victim services. The Criminal Justice Program offers both undergraduate and graduate degrees, concentrations, and minors (see below for details). Criminal Justice students will be involved in a critical examination of the sources of criminal behavior and the social and political institutions and processes designed to control criminal behavior. We expect that our graduating students will have achieved the following learning outcomes:

1. Accurate knowledge relating to crime in modern society to include the elements of major crime, the extent of crime, and its distribution in society
2. A broad historical and contemporary understanding of the institutions that make up our criminal justice system, the interconnectedness of these institutions, and the related issues of diversity and discrimination
3. An understanding of the major legal principles that serve as the foundation for criminal law and the processing of individuals through the justice system, as well as the difficult situations and ethical dilemmas they will face in the criminal justice field

4. An understanding of and ability to apply basic concepts and theoretical perspectives in criminology and criminal justice
5. Possess the ability to access, comprehend, and critically examine research and policy relevant to the field of criminal justice and criminology, including understanding basic research methodology.

Sociology Program

Sociology is the scientific study of group life and the investigation of the social causes and consequences of human behavior. This discipline occupies a central position in the social sciences and covers the full scope of social behaviors from intimate interactions between individuals to relationships among entire societies. Most importantly, sociology invites students to analyze those features of social existence that we are most likely to take for granted. As such, sociological training imparts critical and analytical skills of great value in virtually all aspects of modern life.

Much of the applied knowledge employed in diverse fields such as communications, social work, business management, family life, health care, urban planning, government, education, religion and the administration of justice derives from basic sociological research. Consequently, sociological training provides an excellent background for occupations connected with these fields. In addition, an undergraduate degree in sociology prepares many students for advanced study in law, education, business, public administration, social work, pastoral work, health care and other professions.

The department provides a comprehensive sociology education both for students who elect to terminate their formal education with the B.A. and for those who plan to pursue advanced degrees in sociology or a related social science. Fundamentally, however, the department aspires to prepare students for informed participation in an increasingly complex world.

Sociology majors with a 3.200 overall GPA, a 3.500 GPA in sociology courses and one 5000-level sociology course graduate with honors in sociology. The department also nominates students for membership in Alpha Kappa Delta, the international honorary society for sociology. Selection is based on academic excellence.

Major

Criminal Justice, B.A.

The B.A. in Criminal Justice is a social science that major examines the causes and impacts of crime in society. Graduates go on to careers in fields such as law enforcement, homeland security, probation and parole, and victim services.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

One PN Course must be a lab science to meet major requirements

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.
POLS 1000 Required for major requirements

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

Arts & Sciences College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Foundation Courses

Students must complete all foundation courses with a grade of C or better.

CRMJ1001 - Introduction to Criminal Justice

Credits: 3
Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3
Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.

Prerequisite: SOC 1000.

CRMJ2685 - Research Methods

Credits: 3

Max Credit 3

Introduces students to fundamental issues associated with the application of scientific methods to criminal justice problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to criminal justice issues.

Cross Listed SOC 2685

Former Course Number [3680]**Restricted** Criminal Justice or Sociology majors and minors

Prerequisite: CRMJ 1001 OR SOC 1000

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3350 - Correctional Theory and Practice

Credits: 3

Examines the various components of the correctional complex from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3490 - Issues in Policing

Credits: 3

Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

CRMJ4200 - Ethics in Administration of Justice

Credits: 3

Introduces basic ethical theories, emphasizing how ethical theory can be applied to contemporary problems in law enforcement, corrections and adjudication. Students will be called upon to apply these various ethical frameworks to typical moral dilemmas in criminal justice.

Former Course Number [3200]

Prerequisite: CRMJ 3110, CRMJ 3350, and CRMJ 3490.

Criminal Justice Core

Students must complete any 4 courses with a grade of C or better.

CRMJ3250 - Juvenile Delinquency

Credits: 3

Considers the nature of delinquency, including an analysis of treatment methods and the juvenile justice system.

Cross Listed SOC 3250.

Prerequisite: CRMJ 2400/SOC 2400.

CRMJ3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed SOC 3400.

Prerequisite: SOC 1000.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4150 - Community-Based Corrections

Credits: 3

Designed to provide students with an in-depth look at the community corrections complex. It will examine the history and growth of community corrections, the probation system, methods of post-incarceration supervision, intermediate sanctions, and correctional programming and treatment in the community.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3350.

CRMJ4151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 5151.

Former Course Number [3150]

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4260 - Gangs

Credits: 3

Considers the nature and the characteristics of gangs and gang members. The theoretical and empirical evidence regarding the phenomenon of gangs is evaluated. Particular emphasis is placed on the social and policy implications of this social problem.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

CRMJ4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed INST 4705, POLS 4705, and SOC 4705.

Former Course Number [4700]

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

Supporting Courses

Students must complete one three credit hour course from the list below; or 1 additional course from Criminal Justice Core. Must be completed with a grade of C or better.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

CRMJ4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed SOC 4350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

CRMJ4370 - Criminal Psychopathology

Credits: 3

Provides an overview of current theories and empirical evidence concerning the relationship between psychological disorder and criminal behavior. Examines various clinical syndromes and their role in biological, social and psychological genesis of crime, as well as the concept of criminal responsibility.

Cross Listed PSYC 4370.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed POLS 4600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4750 - Criminal Justice Internship

Credits: 1-12

Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

Restricted Junior Standing.

Prerequisite: Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

CRMJ4760 - Child Maltreatment

Credits: 3

Examines the phenomenon of child abuse and neglect. Includes an overview of attitudes towards and legal definitions of child maltreatment. Explores parental factors, contextual influences and developmental consequences of maltreatment. Relies heavily on current research in child abuse and neglect. Emphasizes policy implications.

Cross Listed PSYC 4760.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides undergraduates with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 5965.

Prerequisite: upper division standing and consent of instructor required in advance.

CRMJ4975 - Readings

Credits: 1-3

Max Credit (Max. 6)

Special programs of readings in criminal justice related subjects will be outlined to meet needs of individual students.

Prerequisite: consent of instructor.

CRMJ4990 - Topics:

Credits: 1-3

Max Credit (Max. 6)

Intended to accommodate various special subjects not offered as regular courses.

Prerequisite: as listed for housing department's topics course.

Foreign Language

Students are required to complete two semesters of the same foreign language with a grade of C or better. Two semesters of American Sign Language (SPPA 2110 & SPPA 2120) will fulfill this requirement.

Statistics

Students are required to complete STAT 2050 or STAT 2070 or SOC 2070 with a grade of C or better.

In Addition

Upper division course work that was completed more than ten years prior to graduation will not meet major requirements.

Criminal Justice, Prelaw Concentration, B.A.

The Pre-Law Concentration consists of diverse courses selected from departments across the university to help prepare students for the challenges of law school and the practice of law.

Verbal Comprehension and Expression: 3 Hours Minimum

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGECE 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

Written Comprehension and Expression: 6 Hours Minimum

Students must complete any two (2) courses with a USP designation of WC or COM3.

Critical Understanding of Human Institutions and Values: 3 Hours Minimum

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

PHIL3120 - Ancient Greek Philosophy

Credits: 3

Surveying some of ancient Greek philosophy. Begins with the works of the earliest extant philosophical thinkers, the pre-Socratics. Remainder of focus on Plato and Aristotle.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL

USP 2015 Code U5H

Former Course Number [2340]

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

OR

ENGL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3500 - History of Science

Credits: 3

Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

OR

AMST4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze

political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

OR

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

OR

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of

American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

Creative and Analytical Thinking: 3 Hours Minimum

CW2050 - Introduction to Fiction

Credits: 3

Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

OR

CW2060 - Introduction to Nonfiction

Credits: 3

Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

OR

CW2080 - Introduction to Poetry

Credits: 3

Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3420 - Symbolic Logic

Credits: 3

Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGECE 5550.

Prerequisite: QA/Q.

OR

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGECE 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

World Cultures and International Institutions: 3 Hours Minimum

INBU1040 - Introduction to International Business

Credits: 3

A broad survey of the field of international business which introduces basic concepts of international business activity and theory and reviews major foreign environmental forces--financial, economic and socioeconomic, physical, sociocultural, political, legal, labor, competitive and distributive.

Cross Listed INST 1040.

A&S College Core 2015 ASG

Former Course Number [BUSN 2000]

OR

INST1040 - Introduction to International Business

Credits: 3

A broad study of the field of international business activity and theory and review major foreign environmental forces

Cross Listed INBU 1040.

Former Course Number [INST 2000]

Prerequisite: ECON 1010.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H
A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG

INST2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed POLS 2310.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG

OR

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.
USP 2015 Code U5H
Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.

Prerequisite: ANTH 1200.

OR

INST3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed ANTH 3420.

Prerequisite: ANTH 1200.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

INST4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed POLS 4340.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed SOC 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 2100.

OR

SOC4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed INST 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 3000.

Electives: 9 Hours Max (3 Courses)

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

OR

COJO 1030 - Interpersonal Communication Credits: 3

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

OR

COJO 1040 - Intro to Communication Theory Credits: 3

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

PHIL3440 - Philosophy of Mind

Credits: 3

Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

OR

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

INST4350 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology. Identical to ANTH 4340.

Prerequisite: ANTH 1200.

CNSL4520 - Fundamentals of Counseling (B)

Credits: 3

Students learn some of the skills of counseling and develop an understanding of elementary principles of counseling theory, as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 5520.

When Offered (Offered on campus and online all semesters)

Prerequisite: junior standing: 6 hours of education or psychology and graduate standing to receive graduate credit.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

Additional Information

The Department of Criminal Justice offers a Pre-Law Concentration for Criminal Justice majors that consists of courses selected from several departments across the university. These courses were chosen to help prepare students for the challenges of law school and the practice of law. Students electing the Pre-Law Concentration are urged to seek advising early.

The Pre-Law Concentration requires 27 credit hours - 18 of which must be 3000-level or above. All coursework must be completed with a grade of C or better to be counted toward the concentration.

Sociology, B.A.

Sociology is the study of the development, interaction, and behavior of organized human groups. Sociology provides powerful insights into the social processes that shape our lives, the problems we face, and the possibilities we can envision.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Arts & Sciences College Core

D- - Diversity

Credits: 3

A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

Foundation Courses

Students must complete all Foundation Courses with a grade of C or better.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, STAT 2070, STAT 4220, STAT 5520.

Cross Listed STAT 2070.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Former Course Number [2000]

Prerequisite: MATH 1000, MATH 1400 or equivalent.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences.

Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

SOC2685 - Research Methods

Credits: 3

Max Credit 3

Introduces students to fundamental issues associated with the application of scientific methods to social science problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to social science issues.

Cross Listed CRMJ 2685

Restricted Criminal Justice or Sociology majors and minors

Prerequisite: CRMJ 1001 OR SOC 1000

SOC4715 - Sociological Theory

Credits: 3

Examines the emergence and development of sociological theory in the writings of thinkers such as Marx, Durkheim, and Weber. Explores continuities and discontinuities between the classical period of sociological theory and contemporary schools such as functionalism, conflict theory, neo-Marxian theories, symbolic interactionism, phenomenology, and rational choice/exchange theory.

Dual Listed SOC 5715.

Former Course Number [3700, 3900]

Prerequisite: 9 credit hours of sociology, including SOC 1000.

Core Courses:

Students must complete four courses from the following list with a grade of C or better.

SOC2350 - Race and Ethnic Relations

Credits: 3

Examines social relations among majority and minority groups by devoting particular attention to race and ethnic relations in the U. S. Encompasses sociological approach to this topic, which emphasizes power structures, economic relationships and cultural traditions historically and today. Devotes attention to social psychological issues, such as prejudice, and social structural issues, such as class inequality.

USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: SOC 1000.

SOC3110 - Self and Society

Credits: 3

Considers social behavior at the micro level, emphasizing the influence of society on the individual's thoughts, emotions and behaviors. Topics such as the development of the self over the life course, the self in social interaction, and the role of attitudes and emotions in social interaction are discussed.

Former Course Number [2110]

Prerequisite: SOC 1000 or PSYC 1000.

SOC3140 - Sociology of the Family

Credits: 3

Two major themes of the course are change experienced by the family institution and the centrality of the family in America today. Subjects that are covered include: A brief history of the family in the U. S. , kinship, family structure, mate-selection, marriage, divorce and socialization.

Former Course Number [4100, 4140]

Prerequisite: SOC 1000.

SOC3200 - Sociology of Religion

Credits: 3

Introduces various ways sociologists interpret religion. Explores the nature of relationships between religion and society.

Prerequisite: SOC 1000.

SOC3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed CRMJ 3400.

Former Course Number [4200]

Prerequisite: SOC 1000.

SOC3500 - Sociology of Gender

Credits: 3

Explores gender through a cultural and structural approach. The cultural approach emphasizes the variability in social expectations for men and women across time and place; the structural approach analyzes the effect of social institutions such as family, government, education, and the economy of gender.

A&S College Core 2015 ASD

Prerequisite: SOC 1000.

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

SOC3605 - Sociology of Education

Credits: 3

An introductory overview of the principal areas of inquiry in the field. Students learn relevant theories and concepts, principal methodological approaches as well as important current issues in education. Comparative analysis may focus on historical comparisons, national/ global comparisons, U. S. regional, and/or variant educational systems at the local level.

Prerequisite: SOC 1000.

SOC3640 - Social Inequality

Credits: 3

Focuses on the structure and consequences of unequal access to political, economic and social benefits in U. S. society and the world. This course critically examines institutional arrangements that perpetuate and are supported by inequality and stratification, as well as patterns of social mobility.

A&S College Core 2015 ASD

Former Course Number [4000, 4050]

Prerequisite: SOC 1000.

SOC3880 - Political Sociology

Credits: 3

Study of political theory, political organization, political mobilization, the state, nation-building, national identity, post-nationalism, the relationship between the state and markets, historic formation of the nation-state, and the changing role of the state in a global context.

Prerequisite: SOC 1000.

SOC3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed INST 3910.

A&S College Core 2015 ASG

Former Course Number 4110

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

Elective Courses

Students must complete 9 additional hours of sociology courses with a grade of C or better. Electives may be used either to develop additional expertise in an area of interest or to broaden the student's sociological training.

Minor

Criminal Justice Minor

A minor in criminal justice requires 18 semester hours in criminal justice. All courses must be completed with a grade of C or better.

Required Courses

CRMJ1001 - Introduction to Criminal Justice

Credits: 3

Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3

Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.

Prerequisite: SOC 1000.

OR

SOC2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed CRMJ 2400.

Former Course Number [3300]

Prerequisite: SOC 1000.

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3350 - Correctional Theory and Practice

Credits: 3

Examines the various components of the correctional complex from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3490 - Issues in Policing

Credits: 3

Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

Interdisciplinary Pre-Law Minor

The minor requires 18 hours to be completed from among the following courses. Of these 18 hours, 12 must be upper division (3000 or 4000 level). In addition, 12 of the 18 hours must be outside the student's primary major, and none of these courses may be credited toward both the minor and the USP requirement. Complete one course from each of the following categories. All coursework must be completed with a grade of C or better to counted toward the minor.

Language Comprehension & Expression: 3 Hours

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

OR

COJO 1030 - Interpersonal Communication Credits: 3

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

USP 2015 Code U5C3

Prerequisite: COMM 1040 and junior standing.

OR

ENGL4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 4061.

Dual Listed ENGL 5061.

USP 2015 Code U5C3

Prerequisite: COMM 1040 and COJO 3040 or ENGL 2035.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

Written Comprehension & Expression: 3 Hours

Any course with a USP designation of C3 may be counted in this area. However, no C3 course may be counted twice toward fulfilling this category and the USP C3 requirement or another category within the prelaw minor.

Critical Understanding of Human Institutions & Values: 3 Hours

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3500 - History of Science

Credits: 3

Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

OR

AMST4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

OR

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

POLS4090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 5090.

Prerequisite: 9 hours of political science or philosophy, including POLS 1000.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

OR

COJO4260 - Rhetoric and Social Justice

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

PHIL4300 - Topics in Ethics

Credits: 3-6
Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 5300.

Prerequisite: 6 hours of philosophy.

PHIL4340 - Issues in Environmental Ethics

Credits: 3
Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.

Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

Creative & Analytical Thinking: 3 Hours

CW2050 - Introduction to Fiction

Credits: 3
Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

CW2060 - Introduction to Nonfiction

Credits: 3
Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

CW2080 - Introduction to Poetry

Credits: 3
Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP 2003-2014 Code U3CH

Former Course Number [1100]

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3220 - Existentialism and Phenomenology

Credits: 3

Examines fundamental perspectives of existentialist thought, beginning with its roots in Kierkegaard and Nietzsche. Looks at a large variety of existentialist perspectives presented by Sartre, Heidegger, Buber, Jaspers and Camus. Considers the relation of Husserl's phenomenological method to existentialism.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3420 - Symbolic Logic

Credits: 3

Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3440 - Philosophy of Mind

Credits: 3

Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

OR

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

PHIL4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 4420/MATH 4420.

Dual Listed PHIL 5420.

Prerequisite: PHIL 3420 or equivalent.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical

techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

OR

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

World Cultures & International Institutions: 3 Hours

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

ANTH2200 - World Culture

Credits: 3

Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)

USP 2003-2014 Code U3G, U3CS

A&S College Core 2015 ASG

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and

theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.

Prerequisite: ANTH 1200.

OR

INST3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed ANTH 3420.

Prerequisite: ANTH 1200.

INST3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed SOC 3910.

When Offered (Offered once a year).

A&S College Core 2015 ASG

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

OR

SOC3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed INST 3910.

A&S College Core 2015 ASG

Former Course Number 4110

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

INST4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed POLS 4340.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

Law: 3 Hours

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

CRMJ2210 - Criminal Law

Credits: 3

Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

NAIS3300 - Federal Indian Law

Credits: 3

Survey of law that applies to individual Indians and tribal governments. In particular, explores the legal relationships among, and relative jurisdictions of federal, tribal, and state governments. Specific topics include civil and criminal jurisdiction, taxation, family law, hunting and fishing, and gaming regulations.

Prerequisite: NAIS 1001 or NAIS 1350.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

OR

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 2010 and junior class standing.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

OR

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

OR

PSYC4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed CRMJ 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

Sociology Minor

Sociology is the study of the development, interaction, and behavior of organized human groups. Sociology provides powerful insights into the social processes that shape our lives, the problems we face, and the possibilities we can envision.

Requirements

The sociology minor requires a total of 18 sociology credits including SOC 1000. At least 9 of these 18 hours must be upper-division sociology credits.

Only grades of C or better can be counted toward the minor. Also, students seeking a minor must have 12 credit hours exclusive to the minor and not counted toward their major.

Graduate

Criminal Justice Concentration within the M.P.A.

The Master of Public Administration Program with Criminal Justice Concentration is a professional degree designed for current and future leaders in the criminal justice field.

Plan B (Non-Thesis)

A criminal justice concentration within the master of public administration program is offered by the Criminal Justice program. Students wishing to enroll in the M.P.A. with criminal justice concentration must first be admitted into the M.P.A program. See M.P.A. program admissions requirements for specific details.

The M.P.A. with criminal justice concentration curriculum consists of 39 credits including: 24 hours of core credit; criminal justice (4) courses; and one additional approved elective course. Students may complete the degree within two years full-time or approximately three-four years part-time. Courses are offered through distance education, which allows students to complete their degree in their community while working full-time.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/ electronic class discussion.

Students must maintain a graduate GPA of 3.000.

MPA Required Core Courses

POLS5000 - Survey of Public Administration

Credits: 3

Designed to introduce the beginning graduate student to the study and practice of public administration at all levels of government. Attention is also directed to specific functions and processes such as intergovernmental relations, budgeting, personnel, and regulation.

Prerequisite: graduate status and consent of instructor.

POLS5400 - Public Personnel Management

Credits: 3

Designed to integrate information about the political environment of personnel administration with problem solving exercises in such specific areas as job analysis, affirmative action, and flextime. A number of topics including the evolution of the civil service, the rights and responsibilities of governmental employees, the functions of public personnel management, and collective bargaining processes are also covered.

Prerequisite: POLS 5000.

POLS5410 - Administrative Behavior and Theory of Organization

Credits: 3

An advanced course in the theory of organization and the workings of public agencies.

Prerequisite: POLS 5000.

POLS5440 - Principles and Processes of Government Budgeting

Credits: 3

Analyzes the principles, processes and politics of the budgetary process in the U. S. It examines the various theories of budgetary decision-making, the politics of budgeting and budgetary reforms.

Prerequisite: POLS 5000 and graduate standing.

POLS5480 - Ethics In Government

Credits: 3

The student is introduced to the ethical nature and dilemmas of public administration in American constitutional government. Such topics are addressed as source of ethical obligation, role of loyalty, application of moral philosophy, constitutional theory and ethical obligation, relation of theory and practice, and methods of ethical reflection.

Prerequisite: POLS 5000.

POLS5510 - Public Policy and Program Management

Credits: 3

An overview of governmental policy making processes in the U. S and the uses of applied policy analysis.

Prerequisite: POLS 5000.

POLS5684 - Empirical Analysis for Public Administration

Credits: 3

Designed for students in public administration to train them to make decisions based on empirical evidence in policy and management. Course draws concepts from system analysis, management science, operations research, and social science methodology to provide an understanding of various policy analysis and program management techniques across many applications.

Prerequisite: POLS 5000.

POLS5690 - Capstone in Public Management

Credits: 3

Integrates theories and concepts introduced in core and option-core courses, and emphasizes students' application of them to various administrative settings.

Prerequisite: completion of all other core and option core requirements in the MPA Program.

Criminal Justice Concentration Courses

Required Criminal Justice Concentration Courses

CRMJ5000 - Survey of Criminal Justice

Credits: 3

Provides an overview of criminal justice theory by providing critical evaluation and discussion of research in the criminal justice field. It will emphasize seminal works and review current research concerning the structure, function, operation, interaction of the criminal justice system's primary components, and future trends.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5100 - Public Policy and Crime

Credits: 3

This course is designed to take a multidimensional look at public policy issues related to the prevention and control of crime in the United States. Issues covered include the development, implementation, and evaluation of crime control policy.

Prerequisite: Admission to the MPA Program or consent of instructor.

Elective Criminal Justice Concentration Courses

*Students with little or no administration and/or criminal justice professional experience must enroll in CRMJ 5500 as one of their electives.

(students must select two of the following courses)

CRMJ5151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 4151.

Prerequisite: graduate standing or consent of instructor.

CRMJ5280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 4280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: graduate standing.

CRMJ5500 - Internship in Criminal Justice

Credits: 3

Educationally-oriented assignments for work in selected criminal justice agencies, with tutorial types of supervision.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 4860.

Prerequisite: graduate standing or consent of the instructor.

Approved Elective Credit

One additional approved MPA elective course is required. For additional options, contact the MPA director.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3

Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

STAT5220 - Advanced Design

Credits: 3

Advanced study of experimental designs, observational designs, and mixed models. Topics include fixed and random effects, factorial, split-plot and repeated measures designs, and hierarchical models. Linear model methodology and Data Science concepts will also be emphasized.

Prerequisite: MATH 5265/STAT 4265/STAT 5265, and at least one of STAT 4015/STAT 5015, STAT 4025/STAT 5025, or STAT 5210.

POLS5420 - Seminar In Public Administration

Credits: 3
Max Credit (Max. 6)

A reading and research course in selected topics in public administration.

Dual Listed POLS 4420.

Prerequisite: POLS 1000 and consent of instructor.

POLS5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 5445.

Dual Listed POLS 4445.

Prerequisite: 9 hours of international studies or social science coursework

POLS5450 - Administrative Regulation

Credits: 3

Significant points of contact between government and business are stressed. Government activities designed to regulate and aid such economic interests as business, labor, agriculture, and consumers are dealt with at length.

Prerequisite: POLS 5000.

POLS5460 - Public Administration and Law

Credits: 3

Focuses on various facets of the relationship between American public administration and law. Emphasis is placed on the emerging body of administrative law as a context for jurisprudential reasoning in administrative decision making.

Prerequisite: POLS 5000.

POLS5465 - Survey of the Nonprofit Sector

Credits: 3

This foundational course is designed to give students of diverse backgrounds a common framework for understanding the nonprofit sector in the United States and globally. Students in this course will identify and interpret key theories, issues, and challenges in the nonprofit world and will consider the implications for practice.

Dual Listed POLS 4465.

Prerequisite: graduate standing.

POLS5500 - Internship in Public Administration

Credits: 1-6
Max Credit (Max. 6)

Educationally-oriented assignments for work in selected public agencies, with tutorial types of supervision.

Prerequisite: consent of instructor.

EDRE5530 - Introduction To Research

Credits: 3
Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

POLS5530 - USCongress

Credits: 3
Analyze aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Dual Listed POLS 4430
Prerequisite: POLS 1000.

POLS5540 - Public Policy Perspectives

Credits: 3
Acquaints students with the underlying structure and dynamics of public policy formulation, implementation, and evaluation at the state, local, and federal levels. Drawing on a number of analytic approaches, the course seeks to understand this complex political phenomenon in the context of the institutions that drive it.

Prerequisite: graduate standing.

POLS5600 - Political Violence

Credits: 3
Examines causes and consequences of violence both among individuals and among nations.

Dual Listed POLS 4600.
Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS5685 - Program Evaluation and Policy Analysis

Credits: 3

Explores techniques for analyzing and evaluating public policy choices and impacts.

Dual Listed POLS 4685.

Prerequisite: STAT 5070 or equivalent and an introductory research methods course in social science or related discipline.

POLS5710 - Topics In Political Science

Credits: 1-3

Max Credit (Max. 9)

Intended to accommodate various specialized subjects not offered as regular courses.

Prerequisite: graduate standing.

POLS5810 - Seminar in Political Philosophy

Credits: 3

Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 4810.

USP 2015 Code U5C3

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

Department of English

126 Hoyt Hall, (307) 766-6452

FAX: (307) 766-3189

Web site: www.uwyo.edu/english

Department Chair: Kelly Kinney

Professors:

SUSAN ARONSTEIN, B.A. Seattle Pacific University 1980; M.Sc. Edinburgh University 1984; Ph.D. Stanford University 1987; Professor of English 2006, 1987.

KENT G. DRUMMOND, B.A. Stanford University 1980; M.B.A. Northwestern University 1982; Ph.D. University of Texas, Austin 1990; Associate Professor of English 2019, 1990.

SUSAN C. FRYE, B.S. Smith College 1974; M.A. University of New Mexico 1981; Ph.D. Stanford University 1986; Professor of English 2001, 1986.

CAROLINE McCracken-Flesher, M.A. University of Edinburgh 1980; M.A. Brown University 1986; Ph.D. 1989; Professor of English 2004, 1989.

Associate Professors:

CAROLYN ANDERSON, B.A. Auckland University 1981; M.A. 1984; Ph.D. Stanford University 1992; Associate Professor of English 2001, 1993.

MICHAEL EDSON, B.A. Virginia Tech University 2003; M.A. University of Delaware 2005; Ph.D. 2011; Associate Professor of English 2020, 2014.

SCOTT HENKEL, B.A. Western Michigan University 1997; M.A. Ohio University 2000; Ph.D. Michigan State University 2007; Associate Professor of English 2018, 2015.

KELLY KINNEY, B.A. Purdue University 1992; M.A. University of Nebraska-Omaha 1996; Ph.D. Ohio University 2005; Associate Professor of English 2015.

MICHAEL KNEVEL, B.A. Creighton University 1995; M.A. 1997; Ph.D. Texas Tech University 2002; Associate Professor of English 2009, 2002.

CLIFFORD J. MARKS, A.B. University of Michigan 1983; M.A. State University of New York, Buffalo 1988; Ph.D. 1992; Associate Professor of English 2000, 1993.

JULIA OBERT, B.A. University of Western Ontario 2004; M.A. University of British Columbia 2006; Ph.D. University of California, Irvine 2011; Associate Professor of English 2016, 2011.

PETER PAROLIN, B.A. University of British Columbia 1988; M.A. University of Pennsylvania 1991; Ph.D. 1997; Associate Professor of English 2003, 1997.

JASON THOMPSON, B.A. Pacific Lutheran University 1996; MFA University of Arizona 2000; Ph.D. 2008; Associate Professor of English 2015, 2008.

ARIELLE ZIBRAK, B.A. University of Rochester 2003; M.A. Boston University 2007; Ph.D. 2013; Assistant Professor of English 2020, 2014.

NANCY SMALL, B.A. Texas A&M University 1992; M.A. 1994; Ph.D. Texas Tech University 2014; Assistant Professor of English and Director of Writing Programs 2017.

Assistant Professors:

JAMES CREEL, B.A. University of Wyoming 2007; M.A. 2011; Ph.D. Texas Christian University 2018; Assistant Lecturer Professor of English 2021.

Senior Lecturers:

PAUL BERGSTRAESSER, B.A. Oberlin College 1989; M.A. Northern Michigan University 2000; Ph.D. University of Illinois, Chicago 2007; Senior Lecturer in English and Creative Writing 2018, 2007.

RICK FISHER, B.A. University of Wyoming 2002; M.A. 2006; Ph.D. 2018; Senior Lecturer in English 2020, 2015, 2011.

APRIL HEANEY, B.A. University of Wyoming 1998; M.A. 2000. Senior Lecturer in English and Creative Writing 2015, 2005.

VAL PEXTON, B.A. Humboldt State University 1986; B.A. University of Wyoming 1998; M.A. 2001; M.F.A. 2008; Senior Lecturer in English and Creative Writing 2018, 2009.

JOYCE STEWART, B.A. Felician College 1994; M.A. Creighton University 1998; Senior Lecturer in English 2018, 2008.

Assistant Lecturers:

ASHLEY M. BURCHETT, B.A. The College at Southeastern 2016; M.A. North Carolina State University 2018; Assistant Lecturer in English 2019.

Study in the English department today emphasizes composition, literature, and rhetoric, creative and expository writing, and the nature and workings of language. Students in the department's programs can learn to read with pleasure and understanding, to write with grace, clarity and force, and to think with greater depth and breadth. With these accomplishments, students are prepared for lives and work in which their power to understand, read, write and communicate will serve themselves and others, some specifically in careers in writing or teaching, some in professions of law, medicine, administration or almost any other field.

Composition, Literature, and Rhetoric are traditions that reach back through the centuries, but these intellectual traditions are continually growing and changing. New theories of language help us reshape understandings of ancient traditions and enhance our lives as critical readers and writers and creative human beings.

Assessment of English Undergraduate Learning

Through an active and ongoing assessment of our program, we have identified the following outcomes that are expected of each student graduating with a Bachelor of Arts in English. We will continue to assess our curriculum to ensure these outcomes are being met:

UW students graduating with a Bachelor of Arts in English will have demonstrated an ability to:

1. Read, interpret, and write about a diverse range of texts in English, for example literature, film, digital media, and popular culture;
2. Understand those texts analytically and critically;
3. Understand those texts on the basis of careful close reading;
4. Understand those texts through past and current literary and rhetorical theory;
5. Understand that those texts are culturally constructed in time, place, and tradition;
6. Understand how those texts inform culture;
7. Participate in the critical and cultural discourses of English;
8. Participate clearly and appropriately through multiple spoken and written forms.

English Honors Program

Requires a 3.500 GPA and a senior honors paper and defense. See the English department web site for information.

Teacher Certification

Students seeking the B.A. in English may also be certified for public school teaching by completing additional requirements set forth by the College of Education, via a concurrent major in English and English Education.

Graduate Study

The M.A. graduate program in English offers three concentrations leading to the master of arts degree: Literary Studies, Composition and Rhetoric, and Public Humanities.

Program Specific Admission Requirements

In addition to the minimum requirements set forth in this *Catalog*, the Department of English requires that students demonstrate by means of an official transcript that they have a solid undergraduate record with course work in English. That said, the department welcomes degrees in English or other disciplines from four-year colleges or universities.

Depending on their undergraduate preparation, some successful applicants may be required to take additional or specific courses toward the English master's degree.

Candidates must submit GRE general test scores, a writing sample, a 500-word statement of purpose, a CV/resume, and three letters of recommendation.

English offers both a campus-based M.A. degree and a low-residency/online M.A. degree. Students should consult the M.A. web site or contact the department for specific admission information and deadlines for both M.A. programs.

Program Specific Graduate Assistantships

Teaching assistantships are available to qualified applicants in the campus-based M.A. degree. Full assistantships carry an annual stipend and a remission of full-time tuition and fees, and require the teaching of one course per term.

Each fall the department conducts a week-long orientation for new teaching assistants and a subsequent series of colloquia for all graduate assistants. Each assistant is assigned an experienced teacher in the department as a mentor, to be available throughout the semester for consultation on teaching and grading techniques.

Major

English, B.A.

Choose from two tracks in English: Literary Studies track or English Studies track. The former focuses on the study of literature and culture, while the latter balances literary study with courses in rhetoric and composition and professional writing.

USP Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

ENGL 2025

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

ENGL 4999

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Gateway to the English Major - 3 Hours

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

Historical Period - 12 or 15 hours

English Studies Track: 12 hours

Literary Studies Track: 15 hours

English Studies Track students take one of the following six courses.

Literary Studies Track students take two of the following six courses.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of

literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

Take three of the following five courses:

ENGL3200 - Topics in: Medieval Literature

Credits: 3
Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3
Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3
Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3
Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3
Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

Expanding the Canon - 6 Hours

A full list of courses that fulfill the Expanding the Canon requirements will be published each semester. Generally speaking, these courses will cover topics related to racial diversity, global literatures, gender, sexuality, or disability studies. ENGL 2340/2350/2360 can be taken either as an Expanding the Canon course OR as an Historical Period course. The Expanding the Canon options are always changing, but will always include the following:

ENGL2340 - Native American Culture and Literature

Credits: 3
Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD
Prerequisite: WA/COM1.

ENGL2345 - American Indians in Hollywood Film

Credits: 3
Examines the ways Hollywood film has constructed various forms of racial identity for American Indians.

Cross Listed NAIS 2345.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD
Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3
Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.
USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues addressed through global performance.

A&S College Core 2015 ASG

Prerequisite: COM1.

ENGL3610 - Non-Western Women Writers

Credits: 3

Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.

USP 2003-2014 Code U3Ch

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.

Dual Listed ENGL 5830.

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: ART 2020, GWST 1080/ENGL 1080.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: LTST 1100 and WA/COM1.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

A&S College Core 2015 ASG

Prerequisite: six hours of 2000 level literature courses.

- Please note that only ENGL 4640: Postcolonial Literature & Theory counts towards the Expanding the Canon Requirement **unless otherwise specified in a given semester.**

Methods - 3 Hours

Choose the methods course that corresponds with your track.

Literary Studies Track:

ENGL3000 - Literary Theory

Credits: 3

An introduction to critical theory as a methodology within literary studies. The course covers major schools of theory and major figures within those schools. Students will read, discuss, and write about literary texts and cultural artefacts by placing them in dialogue with important works of both theory and literary criticism.

Prerequisite: ENGL 2025 and junior standing.

OR

English Studies Track:

ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing

Credits: 3

Introduces common methods, concepts, and theories emphasized in these interrelated intellectual traditions. It asks

students to examine how research traditions have developed alongside each other over time, and prepares students to design a multimodal research project.

Prerequisite: ENGL 2025 and junior standing.

Foundations of Language - 3 Hours

This requirement is for the English Studies Track only.

ENGL4780 - History of the English Language

Credits: 3

Considers major sources of change in the English language historically, as well as some of the internal and external catalysts for the process. Identical to ANTH 4780.

Prerequisite: ENGL 4750.

OR

ENGL4785 - Linguistics, Language Teaching and Social Context

Credits: 3

Introduces prospective teachers of English as second language to the basic components of language and to the social aspects of human language use. Explores a variety of concepts about language: how it is used and perceived, how languages change, how diverse cultures respond to such changes.

Cross Listed LANG 4785.

Prerequisite: WB/COM2.

OR

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480.

OR

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations;

(d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

Electives - 6 hours

Literary Studies: Students can select from any of our courses for credit in this category. One of the two electives must be in either Rhetoric & Composition or Creative Writing.

English Studies: Two courses from the list of Rhetoric/Composition/Professional Writing classes offered by English. See the examples below:

- ENGL 2005 - Writing in Technology and the Sciences (3 Credits)
- ENGL 2035 - Writing for Public Forums (3 Credits)
- ENGL 2125 - Writing Tutor Pedagogy/Practicum (3 Credits)
- ENGL 3020 - Culture, Communication, Work (3 Credits)
- ENGL 4010 - Technical Writing in the Professions (3 Credits)
- ENGL 4020 - Editing for Publication (3 Credits)
- ENGL 4025 - Writing for the Web (3 Credits)
- ENGL 4030 - Writing for Magazines (3 Credits)
- ENGL 4040 - Rhetoric, Media, and Culture (3 Credits)
- ENGL 4061 - Rhetorical Theory and Criticism (3 Credits)
- ENGL 4075 - Writing for Non-Profits (3 Credits)

Capstone - 3 Hours

Advanced standing in English is required for all majors prior to taking the senior seminar. To be eligible for advanced standing in English, the student must have completed 24 hours of English coursework above COM1, including the required 2000-level Historical Period courses. Each course must have been passed with a grade C or better. Approved transfer courses from other institutions will satisfy the prerequisites for advanced standing. ENGL 4999 should be taken in the next to last semester before graduation.

ENGL4999 - Senior Seminar

Credits: 3

This course is the capstone course in the English major. Subject matter varies by section. In all sections students will exercise skills acquired in the major (close-reading, historical analysis, application of theory) to explore significant texts and to reflect on the nature of English study today.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and either ENGL 3000 or ENGL 3010; Senior standing.

Additional Requirements

All English Education students are required to take the English Studies track. Students should consult with an advisor to declare a track in Literary Studies or English Studies before their junior year.

The English major requires 36 hours of work within the major and an additional 12 hours of a single foreign language. 21 of the hours within the major must be taken at the upper division. Only those courses in which a grade of C or better has been earned may count toward the 36 hours required for the B.A. and the foreign language requirement. No 1000-level courses count toward the B.A.

Prerequisites

Most 2000-level courses require the completion of the COM1 requirement. Normally, 3000-level courses have the COM1, ENGL 2025, and one 2000-level "broad historical sweep" course (one of ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, ENGL 2360) as prerequisites, and 4000-level courses have 6 hours of 2000-level English courses as prerequisites. Students without certain prerequisites should consult the English department for permission to enroll.

Minor

Literary Studies Minor

Focuses on the study of literature, media, and culture. Courses address texts from various historical periods and regions and the work of a diverse range of voices.

Requirements

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

Historical Period Classes: 6 Hours

Take any 2 of the following historical period courses:

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3
Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

Upper Division Literature Courses: 9 Hours

Take 3 additional upper-division literature courses. Electives cannot be used for both the Historical Period requirement and this requirement. Please consult with department for options beyond this list.

ENGL3100 - Tribal Literatures of the Great Plains

Credits: 3
Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed NAIS 3100.
USP 2003-2014 Code U3D, U3WC
A&S College Core 2015 ASD
Prerequisite: 6 hours of NAIS or ENGL.

ENGL3150 - World Literature

Credits: 3
Max Credit (Max. 6)

Encompasses reading and analysis of major works representative of significant periods or literary forms in the history of literature.

USP 2003-2014 Code U3CH, U3G
Prerequisite: WA and WB/COM1 and COM2.

ENGL3200 - Topics in: Medieval Literature

Credits: 3
Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues addressed through global performance.

A&S College Core 2015 ASG

Prerequisite: COM1.

ENGL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3
Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3
Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3610 - Non-Western Women Writers

Credits: 3
Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL3710 - Gender: Humanities Focus

Credits: 3
Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.
USP 2003-2014 Code U3Ch

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

ENGL4080 - Film Genre Studies (TOPIC)

Credits: 3

Max Credit (Max. 6)

Offers structural, film historical, and political analyses of selected major film genres.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4070 - Film Directors:

Credits: 3

Max Credit (Max. 6)

Offers an intensive examination of representative films by selected film makers.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4090 - Film and Religion

Credits: 3

Movies use religion to convey messages; they debate religious issues and use religion to debate non-religious issues. This course analyzes how film makers use religion and religious themes to transform religions into advocates for social issues and to shape religion's role in society. Popular films drawn from many genres.

Prerequisite: 6 hours of 2000-level or higher literature courses or religion courses.

ENGL4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed CLAS 4230/THEA 4230.

When Offered (Offered in spring in alternate years)

Prerequisite: WB or COM2.

ENGL4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed CLAS 4270.

Prerequisite: WB or COM2.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H
A&S College Core 2015 ASD
Prerequisite: LTST 1100 and WA/COM1.

ENGL4480 - Regional Literature of the US: The West

Credits: 3
Encompasses major themes and writers in western American literature.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4600 - Studies in (TOPIC)

Credits: 1-6
Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in American, English, or other literatures.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3
Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

A&S College Core 2015 ASG
Prerequisite: six hours of 2000 level literature courses.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3
An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.
Dual Listed ENGL 5830.
USP 2003-2014 Code U3CA
A&S College Core 2015 ASG
Prerequisite: ART 2020, GWST 1080/ENGL 1080.

Professional Writing Minor

Focuses on the modes of written, oral, and digital communication that working professionals use in their fields. Courses address topics like grant-writing, writing for the web, and publication editing.

Requirements

Foundations Course: 3 Hours

ENGL2035 - Writing for Public Forums

Credits: 3

Introduction to professional writing that focuses on analyzing and producing texts designed to influence public opinion. Genres may include letters, editorials, web pages, pamphlets, e-mail, speeches, and position papers. Focuses on skills in collaboration and use of technology necessary for ethical, effective participation in public discourse.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: WA/COM1.

OR

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

Program Electives: 6 Hours

Take any 2 of the following courses:

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4020 - Editing for Publication

Credits: 3

Theory and practice of editing in the contexts of book, magazine, newspaper, and web-based publications. Standard editing practices for using grammar, proofreading marks, and computer editing tools.

Prerequisite: WA/COM1, WB/COM2 (ENGL 2035 and ENGL 3000 recommended).

ENGL4025 - Writing for the Web

Covers a variety of issues relevant for composing in the 21st century. As students learn to design and generate effective writing for a particular audience in a digital environment, they will also develop skills with advanced web and print research, basic HTML programming language, and standard web design software. Prerequisites: WB or COM2 and junior standing.

When Offered U3L, U3WC

USP 2003-2014 Code U5C3

Restricted Cannot be enrolled in one of the following Classes:
Freshman (FR)

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENGL4970 - Writing Internship

Credits: 3

Students work 6-8 hours per week as "writing interns" for a private business or public agency, performing specific writing/editing tasks for that client. Students are supported and enabled through a series of classroom sessions and individual meetings with the course instructor. Formal progress reports and a comprehensive final report are required.

Prerequisite: successful completion of ENGL 4010, ENGL 4020, or 4050.

Other Electives: 6 Hours

Courses from any discipline that relates to professional writing; consult with a Professional Writing Minor advisor.

Professional Writing Minor Capstone: 3 Hours

ENGL4000 - 21st Century Issues in Professional Writing

The capstone course in the professional writing minor and also satisfies the COM 3 USP requirement. This spring, we will spend some time constructing a theoretical framework geared toward understanding key issues in the study and practice of professional and technical communication. We'll start with some foundational material, looking at the role of rhetoric, design, and audience in increasingly digital professional writing spaces and then move to more focused study of ethics, visual rhetoric, and the impact of technology on professional communication, among other things. More traditionally academic (journal review) and professional (e.g., usability test and documentation) projects will range widely and include both individual and collaborative work done in different media for different audiences, some academic, some professional. Students will develop a final portfolio project at the end of the term.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Graduate

English, M.A.

Advanced graduate study in English Studies. Students can select from one of three tracks: literary studies; rhetoric, composition, and writing studies; or public humanities.

Required Courses

The following courses are required for all concentrations:

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4

Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5530 - Modern Critical Theory and Practice

Credits: 1-4
Max Credit (Max. 4)

Major trends in modern poetics and practical criticism.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENGL5964 - Thesis Writing Workshop

Designed for students who have reached an advanced stage in the writing of the thesis. Provides targeted, personalized support from peers during the research and writing process and runs concurrently with ENGL 5965.

Prerequisite: ENGL 5960 and enrollment in a graduate degree program

ENGL5965 - Thesis Research II

Credits: 1-3
Max Credit (Max. 3)

Designed for students who have reached an advanced stage in the writing of the thesis. Also to inform students of professional genres and practices as well as academic and non-academic careers following the MA degree.

USP 2015 Code U5H

Prerequisite: ENGL 5960 and enrollment in a graduate degree program.

Electives

Additional coursework can be taken from the following courses.

ENGL5000 - Studies In:

Credits: 1-8
Max Credit (Max. 8)

Provides an opportunity for specialized seminar approaches to subjects in literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5020 - Public-Facing English Studies

Credits: 1-4
Max Credit (Max. 8)

Introduction to the history and theory of public intellectualism and English studies. Students develop theoretical and practical knowledge and explore alternative applications for academic research for publics beyond the classroom.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5050 - Writing in Public Genres

Credits: 1-4
Max Credit (Max. 8)

Intensive introduction to public-facing writing in English subject areas, including articles, book reviews, think pieces, TED talks, podcasts, and other genres of commentary associated with public intellectual work in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5055 - Narrative and Storytelling

Credits: 1-4
Max Credit 8

Exploration of the structure and use of narrative, stories, and/or storytelling from a variety of theoretical and disciplinary perspectives. Considers how narrative materials function as foundational to meaning making and to community building.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5061 - Rhetorical Theory and Criticism

Credits: 1-4
Max Credit (Max. 8)

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 5061.

Dual Listed ENGL 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5062 - Ancient Rhetorics

Credits: 1-4
Max Credit 8

Investigates contemporary problems in composition and rhetorical studies, as they are played out through ancient texts on composing and rhetoric. Course will focus on how ancient texts are enlisted in current debates/concerns over pedagogy, ethics, change, subjectivity, agency, and the social.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5063 - Feminist Rhetorics

Credits: 1-4
Max Credit 8

Analysis of influential women speakers and writers over time. Course focuses on how feminists construct arguments, frame objects of analysis, energize social justice movements, and theorize sex/gender/sexuality in relation to race, class, democracy, and suffrage. Course may include special focus on Wyoming women and suffrage.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5070 - Qualitative Methods in English

Credits: 1-4
Max Credit (Max. 8)

Advanced introduction to qualitative research methods in English and Rhetoric. Students will survey different types of qualitative methods and will learn to evaluate qualitative projects. Includes an emphasis on working with human participants and on ethics.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5071 - Qualitative Analysis

Credits: 1-4
Max Credit (Max 8)

Examination and application of different ways of making knowledge in English studies. Develops understanding of links among theory, methodology, and methods, and engages students in data analysis and evaluation of interpretive moves. "Texts" can encompass a range of artifacts, from print to video games to nonverbal behaviors.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5072 - Topics in Technical Writing

Credits: 1-4
Max Credit 8

Seminar course on one or more topics in technical communication research, theory, or industry practice. Topics may include user experience methods, women in technical communication, activity theory, ethics and technology, information design, narrative practices, workplace cultures, and technical communication and social justice.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5073 - Topics in Rhet-Comp & Tech-Com

Credits: 1-4
Max Credit 8

Seminar on key theories and foundational research in technical and professional communication. Introduces students to pedagogical approaches, topics, and tools suitable for teaching and administering undergraduate technical and professional communication courses and programs.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5074 - Studies in Civic Discourse

Credits: 1-4
Max Credit 8

Seminar focusing on communication in the public sphere. Considers definition of public(s), both terrestrial and online, and the forming of publics and counter-publics. Focuses on rhetorical needs of audiences and may include primary research or partnering with local organizations.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5075 - Non-Profit Writing and Grants

Credits: 1-4
Max Credit (Max. 8)

Non-profit writing from a rhetorical perspective. Students analyze different kinds of non-profit communication, including fundraising, mission development, social media. Participate in grant proposal development or other organizational communication activity.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5220 - Studies in Medieval Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar course in selected genres, figures, and themes in Medieval English literature.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5230 - Studies in English Renaissance Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of the sixteenth and early seventeenth centuries.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5250 - Studies in Shakespeare

Credits: 1-4
Max Credit (Max. 8)

To provide advanced students with the opportunity to study problems of text, sources, staging, theatrical history, and/or critical theory with reference to the works of William Shakespeare.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5270 - Studies in 18c English Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of restoration and eighteenth century English literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5280 - Studies in 19c English Literature

Credits: 1-4
Max Credit (Max. 4)

A seminar in selected genres, figures, and themes of the romantic and Victorian periods.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5290 - Studies in 20c English Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in significant writers of poetry, drama, fiction, and biography from the end of the nineteenth century to the

present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5310 - Early American Literature

Credits: 4

Seminar designed to acquaint graduate students with selected texts from the colonial period to 1800, relevant secondary works, and scholarly methods.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5320 - Studies in 19c American Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar designed to acquaint graduate students with selected principal works of American literature, relevant secondary works, and scholarly method.

Prerequisite: graduate status of 12 hours or 4000-level work.

ENGL5330 - Studies in 20c American Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar in selected significant writers of poetry, drama, and prose from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5340 - Intellectual Currents in Modern American Literature

Credits: 1-4

Max Credit (Max. 4)

Devoted to the study of writers such as Marx and Freud and more recent American writers.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5350 - Global Literatures in English

Credits: 1-4

Max Credit (Max. 8)

Examines significant texts, authors, cultural and historical contexts, and literary and theoretical movements in postcolonial or global literatures. May involve comparative study or may be focused on a single country context.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5355 - Global Englishes

Credits: 1-4
Max Credit 8

Advanced investigation of the spread of English as the lingua franca for business, technology, research, education, and popular culture around the world. Does the spread create cross-cultural communication or intensify global economic inequality? This course explores global Englishes in their historical and present contexts, engaging the fields of linguistics, sociolinguistics, postcolonial studies, and English language teaching.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5360 - Literatures of Diversity

Credits: 1-4
Max Credit (Max. 8)

A study of literature and culture of selected minority or marginalized communities.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5455 - Slavery and Freedom

Credits: 1-4
Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 5455.

Dual Listed ENGL 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5520 - History of Literacy Criticism: Enlightenment and 19th Century

Credits: 4
Historical survey of the mainstream of European literary criticism, including the critics of antiquity and the Renaissance.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5600 - Research in Writing Studies

Credits: 1-4
Max Credit 8

Introductory graduate seminar on research methods in writing studies. Course culminates in an individual research project of professional quality. Course studies books and articles that students identify as particularly powerful examples in order to understand what research is and ways to conduct such research efficiently and ethically.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3
An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed GWST 5830.

Dual Listed ENGL 4830.

Prerequisite: ART 2020, GWST 1080, ENGL 1080.

ENGL5835 - Writing Program Administration

Credits: 1-4
Max Credit 8

Seminar introduction to the field of writing program administration. Recognizing that not all universities are research institutions with large numbers of graduate students, this course approaches administration broadly, considering not only the traditional WPA, but other types of WPA work, including research, program building, developing intra-institutional relationships, and more.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5880 - Studies in Modern Fiction

Credits: 4
A study of modern fiction, examining theory and practice, and covering works of English, European, and American origin.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5885 - Studies in Popular Culture

Credits: 1-4
Max Credit 8

An interdisciplinary seminar in which students analyze and apply theories and methodologies from multiple disciplines to the study of selected texts, figures, media, and themes of popular culture.

ENGL5890 - Consumption, Markets, Cultures

Credits: 1-4
Max Credit (Max. 8)

An interdisciplinary investigation of the ways in which cultural venues curate and market stories, history, and texts. Analyzes and applies theories and methodologies from literary and cultural tourism studies, as well as marketing and consumer culture, to museums, performances, tourist sites and theme parks. This class will include hands-on field research.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5975 - Independent Studies

Credits: 1-4
Max Credit (Max. 6)

Independent study and research experience in a given topic, person, or movement in literature at an advanced level.

Prerequisite: permission of chair; graduate standing.

Additional Requirements

The concentration insures coherence in each student's graduate program; breadth is insured by a distribution of courses. Much of each student's program is taken in courses outside the concentration.

Literary Studies. Working from a variety of perspectives, this concentration focuses on the study of literature and of other culturally significant texts and materials, including, for example, film, oral materials, and political documents.

Rhetoric, Composition, and Writing Studies. This concentration emphasizes scholarship on the production of discourse, broadly conceived, and may include a focus on classical, contemporary, or cultural rhetoric; post-secondary writing pedagogy and program administration; community and adult literacy; or other subjects related to the field of writing studies.

Public Humanities. Designed for students who wish to pursue professions that may span beyond traditional academic work, this concentration prepares graduates for careers in civic, nonprofit, and community-based cultural organizations that engage the humanities, contribute to social reform, and promote the public good.

Minimum coursework required: 26 hours. Minimum thesis hours required: 4 hours See program website for course offerings in a given semester. All coursework must be at the 5000-level.

With approval of the graduate advisor, a student may take a maximum of three hours credit outside the department.

A reading list exam and a Plan A thesis with oral defense. Students may write a traditional thesis, or they may assemble a public-facing thesis portfolio. See program website for more details about thesis options. For information on the Plan B, consult with the program director.

Department of Geology and Geophysics

Geography Program

122 Geology Building, (307) 766-3386

Web site: www.uwyo.edu/geography

Program Director: Mark T. Clementz

Professor Emeritus:

John L. Allen, William L. Baker, Ronald E. Beiswenger, Thomas Buchanan, Deborah D. Paulson, Gerald Webster

Faculty and Staff Affiliates:

Professors

R. MCGREGGOR CAWLEY, B.A. Kearney State College 1971; M.A. Colorado State University 1974; Ph.D. 1981; Professor of Political Science 1997, 1987.

THOMAS A. MINCKLEY, B.S. Northern Arizona University 1987; University of Arizona 1996; M.A. University of Oregon 1999; Ph.D. 2003; Professor of Geography 2019, 2012.

JACQUELINE J. SHINKER, B.S. University of Arizona 1996; M.A. University of Oregon 1999; Ph.D. 2003; Professor of Geography 2019, 2005.

BRYAN N. SHUMAN, B.A. Colorado College 1994; M.S. Brown University 1997; Ph.D. 2001; Professor of Geology 2015, 2007.

Associate Professors

YI-LING CHEN, B.S. National Taiwan University 1989; M.S. 1992; Ph.D. Rutgers University 2000; Associate Professor of International Studies and Geography 2015, 2010.

BRANDON McELROY, B.S. University of Michigan 2000; M.S. 2003; Ph.D. University of Texas 2009; Associate Professor of Geology 2019, 2011.

Assistant Professors

NICHOLAS CRANE, B.A. The Ohio State University 2006; M.A. 2008; Ph.D. 2014; Associate Professor of Geography and International Studies 2021, 2016.

ZOE PEARSON, B.A. University of California Los Angeles 2005; M.A. Ohio State University 2010; Ph.D. 2016; Associate Professor of Geography and International Studies 2021, 2016.

The Geography Program is comprised of faculty from across the University of Wyoming campus with interests and expertise in geography and resource management. The program is transdisciplinary with a focus upon the following:

1. The origin and nature of the physical and cultural environment, how the physical environment and its natural resources form, and how the environment and natural resources affect the quality of life.
2. The ways in which people and institutions affect natural resources and the environment.
3. The ways in which human institutions (e.g. political, economic, social) interact to produce diverse human landscapes.

Learning

The Geography Program has identified four fundamental goals of geography to emphasize in its undergraduate curriculum. These four goals are at the intersection of topically important areas in the discipline of geography. We continue to evaluate student learning in our program to insure our curriculum addresses these fundamental goals as effectively as possible.

Goal 1 - Human-Environment Interaction

Students will be able to identify and explain how humans modify the environment and affect Earth's biophysical systems through their human activities.

Goal 2 - Biophysical Systems

Students will be able to identify and explain an array of patterns, processes, and interactions in Earth's biophysical systems occurring at different spatial scales.

Goal 3 - Human-Cultural Systems

Students will be able to identify and explain an array of patterns, processes, and interactions across Earth's human landscapes at different spatial scales.

Goal 4 - Geographic Thought, Methods and Analysis

Students will understand basic geographic concepts and ideas, and will be capable of using them to inform their work. Students will also demonstrate the ability to select and use appropriate tools and techniques for addressing geographic problems and conducting geographic analysis. They will also be able to use multiple methods to examine, represent, and visualize Earth and its geographic characteristics.

Undergraduate Major

In addition to course work required by the university and the college, majors must complete 40 hours of program requirements, all of which must be completed with a grade of C or above, of which at least 15 credits will be 3000-4000 level courses within the selected competencies. All Geography degree students will complete a topical language requirement. Students completing a B.S. degree will need to complete two semesters of a computational or science language (computer programming language, mathematical language or science courses are acceptable) and one additional mathematical, statistical, or science class above the USP Q or PN requirement. Required courses (11 credit hours) include GEOG 1000 or 1020, 1010 or GEOL 1070, and GIST 1100 or GIST 2150. In addition, students are required to complete at least two courses each in Societal and Scientific Competencies and one additional Spatial Competency course. Beyond these requirements students are able to select from any Societal, Scientific, Spatial or Transdisciplinary course listed to complete a total of 40 hours for the B.S. Degree. Courses used to meet program requirements should be discussed with a faculty advisor.

* USP Human Culture: A single language must be taken for two semesters to fulfill the eight hour foreign language requirement for the program. Students taking American Sign Language to fulfill the language requirement of

the major will have to take other courses to fulfill the USP H requirements.¹Can substitute computer programming but it does not fulfill the USP H requirement; consult with an academic advisor.

Undergraduate Minor

The program offers a minor in geography. Credit requirements range from 18-20 hours of required and elective courses, all of which must be completed with a grade of C or above. Information on the minor program is available on the Geography Program website.

Environment and Natural Resources

The program offers a concentration in the university's interdisciplinary program, Environment and Natural Resources. A description of the concentration requirements is available online at the ENR website.

Geology and Geophysics

122 Geology Building, (307) 766-3386

Department Head: Mark T. Clementz

Professors:

MICHAEL J. CHEADLE, B.A. Oxford University 1981; M.S. Cornell University 1984; Ph.D. Cambridge University 1989; Professor of Geology and Geophysics 2021, 2001.

MARK T. CLEMENTZ, B.S. University of Missouri, Columbia 1996; Ph.D. University of California, Santa Cruz 2002; Professor of Geology 2017, 2005.

DARIO GRANA, B.S. University of Pavia 2003; M.S. 2005; M.S. University of Milano Bicocca 2006; M.S. Stanford University 2013; Ph.D. 2013; Associate Professor of Geology and Geophysics and the School of Energy Resources 2018, 2013.

NEIL F. HUMPHREY, B.S. University of British Columbia 1978; M.S. University of Washington 1983; Ph.D. 1987; Professor of Geology 2002, 1990.

BARBARA E. JOHN, B.A. University of California-Berkeley 1978; Ph.D. University of California-Santa Barbara 1987; Professor of Geology 2002, 1992.

JOHN KASZUBA, B.S. Beloit College 1982; M.S. Virginia Polytechnic Institute & State University 1986; Ph.D. Colorado School of Mines 1997; Professor of Geology and the School of Energy Resources 2019, 2008.

SUBHASHIS MALLICK, B.S. Indian Institute of Technology 1976; M.S. 1978; Ph.D. University of Hawaii 1987; Professor of Geology and Geophysics and the School of Energy Resources 2008.

BRANDON McELROY, B.S. University of Michigan 2000; M.S. 2003; Ph.D. University of Texas 2009; Associate Professor of Geology 2018, 2011.

THOMAS A. MINCKLEY, B.S. Northern Ari-zona University 1987; University of Arizona 1996; M.A. University of Oregon 1999; Ph.D. 2003; Professor of Geography 2019, 2012.

JAMES D. MYERS, B.S. University of Rhode Island 1973; M.A. The Johns Hopkins University 1977; Ph.D. 1979; Professor of Geology 1993, 1981.

CLIFFORD S. RIEBE, B.S.E. University of Michigan 1992; Ph.D. University of California-Berkeley 2000; Professor of Geology 2020, 2008.

JACQUELINE J. SHINKER, B.S. University of Arizona 1996; M.A. University of Oregon 1999; Ph.D. 2003; Professor of Geography 2019, 2005.

BRYAN N SHUMAN, B.A. Colorado College 1994; M.S. Brown University 1997; Ph.D. 2001; Professor of Geology 2015, 2007.

KENNETH W. W. SIMS, B.A. Colorado College 1986; M.S. University of New Mexico 1989; Ph.D. University of California - Berkeley 1995; Professor of Geology 2014, 2009.

YE ZHANG, B.S. Nanjing University (PR China) 1998; M.S. University of Minnesota 2004; Ph.D. Indiana University 2005; Professor of Geology 2018, 2007.

Associate Professors:

PO CHEN, B.S. Beijing University 2000; Ph.D. University of Southern California 2005; Associate Professor of Geology and Geophysics and the School of Energy Resources 2014, 2008.

ELLEN D. CURRANO, B.S. University of Chicago 2003; Ph.D. Pennsylvania State University 2008; Associate Professor of Geology and Geophysics 2017, 2014.

KENNETH G. DUEKER, B.A. Whitman College 1984; Ph.D. University of Oregon 1994; Associate Professor of Geophysics 2006, 2000.

ANDREW PARSEKIAN, B.S. Dickinson College 2005; Ph.D. Rutgers University 2011; Associate Professor of Geology and Geophysics 2020, 2013.

Assistant Professors:

JAMIE MCFARLIN, B.A. Lawrence University, 2009; M.S. Northwestern University, 2016; Ph.D. Northwestern University, 2019; Assistant Professor of Geology and Geophysics 2022.

Research Scientists:

BRADLEY CARR, B.S. University of Wisconsin-Madison 1987; Ph.D. University of Wyoming 1995; Associate Research Scientist Senior 2017, 2013.

KEVIN R. CHAMBERLAIN, B.A. Colgate University 1979; Ph.D. Washington University 1990; Research Professor 2004, 1990.

JANET C. DEWEY, B.S. Mississippi State University 1990; M.S. Auburn University 1993; Associate Research Scientist 2017, 2011.

LAURA VIETTI, B.S. University of Wyoming 2006; Ph.D. University of Minnesota 2014; Assistant Research Scientist 2015.

Adjunct Professors:

Sarah Aciego, Vladimir Alvarado, Erin Campbell, Barbara Carrapa, Carrick Eggleston, Eric Erslev, Peter H. Hennings, W. Steven Holbrook, Ranie Lynds, Simone Runyon, Jay Chapman

Professors Emeriti:

James I. Drever, William E. Frerichs, B. Ronald Frost, Carol D. Frost, Robert R. Howell, Jason A. Lillegraven, Ronald W. Marrs, Randi Martinsen, James E. McClurg, Scott B. Smithson, Arthur W. Snoke, Ronald C. Surdam, Susan M. Swapp

Geology is the study of the origin, history and structure of the earth. Our undergraduate offerings encompass virtually every aspect of the science, with emphasis on current theory, methods, and applications. The philosophy of the department is to provide sound training in both theory and field observation, and to couple this background with a thorough education in modern laboratory, quantitative, and field techniques required for an understanding of geologic processes.

The setting of the university in the Rocky Mountains is ideal because some of North America's most outstanding geologic features are within a short drive of campus. The semiarid climate in Wyoming has resulted in excellent exposures of diverse rock types ranging in age from Precambrian to Recent. Deformation of the rocks in the region has been extensive, affording the student a field laboratory that exhibits a wide diversity of styles of faulting and folding. Mineral deposits, petroleum resources, and coal abound in the region.

Undergraduate Majors

The Bachelor of Science in geology is designed for those students who intend to become professional geologists and/or those who plan to attend graduate school in geosciences. The program includes courses normally expected of graduate school applicants, including a summer field camp and courses in related sciences and mathematics. This degree program prepares students for the examination for the professional geologist license.

The Bachelor of Arts in geology and Earth sciences is specifically designed for undergraduates who wish to study Earth sciences as a foundation for careers in a variety of areas, such as environmental law, natural resource business, land use planning, Earth science education, science journalism, and many governmental positions. The B.A. program includes a broad spectrum of courses, and focuses both on information about the Earth and on how society makes decisions that affect the Earth system.

The Bachelor of Science in Environmental Geology and Geohydrology is designed for those students who intend to become professionals in environmental fields such as consulting, site assessment, hazard assessment, and remediation. The degree will prepare students for graduate school in environmental disciplines and for entry-level jobs.

Majors in any of the degree programs above may also choose to declare an affiliated degree with the School of Environment and Natural Resources by completing degree requirements for both degrees. Students should consult the section on the School of Environment and Natural Resources.

The Department of Geology and Geophysics also participates in the Earth System Science interdisciplinary program by offering a concentration in geology for the B.S. degree in ESS. Students interested in this major should consult the section on Earth System Science for curriculum requirements.

Geology Program Objectives: Bachelor of Science

The primary mission of our B.S. geology program is to provide a quality educational experience that prepares men and women to enter careers in geology and related fields. We expect that our graduates should:

- Have the basic knowledge and skills demanded for entry-level competence in typical careers in earth science.
- Be able to apply basic scientific and technical knowledge to specific tasks and problems.

- Cultivate the specific scientific and technical skills that will allow them effectively to serve their employers and to enhance their own career development.
- Develop increased capacity in the skills of independent learning, critical thinking, problem definition, and problem solving.
- Develop enhanced numerical skills and computer literacy as part of an undergraduate program designed to deliver a current and relevant knowledge of their discipline.
- Communicate effectively and professionally through oral, written, and graphical means and to participate effectively in their workplace and in individual and team-related activities.
- Have the broad general education needed to appreciate the role of Earth Sciences in the societal context and appreciate the importance of ethics in the practice of the profession.

Geology Program Goals: Bachelor of Science

The department of Geology and Geophysics has the following specific goals for its B.S. program:

- Students in the B.S. program will receive a quality preparatory education in the discipline that is current, relevant, practical, and personal.
- B.S. students who graduate with appropriate grades will be able to compete successfully for positions at graduate schools nationwide.
- B.S. students who graduate with appropriate grades will be well prepared for entry-level positions as professionals within their and other related disciplines.

Geology Program Objectives: Bachelor of Arts

The primary mission of our B.A. geology program is to provide a broad educational experience that prepares men and women for careers in earth science-related fields. We expect that our graduate should:

- Have the basic knowledge and skills demanded for entry-level competence in typical careers in earth science-related fields.
- Be able to apply their knowledge to specific situations or problems.
- Cultivate the skills and ethics that will allow them effectively to serve their employers and to enhance their own career development.
- Develop increased capacity for independent learning, critical thinking, and problem-solving.
- Develop basic numerical skills and computer literacy as part of an undergraduate program designed to deliver a current and relevant knowledge of their discipline.
- Communicate effectively and professionally through oral, written, and graphical means and to participate effectively in the work environment, both in individual and team-related activities.
- Have the broad general education needed to appreciate the role of Earth Sciences in the societal context and appreciate the importance of ethics in the practice of the profession.

Geology Program Goals: Bachelor of Arts

The department of Geology and Geophysics has the following specific goals for its B.A. program:

- Students in the B.A. program will receive a broad preparatory education in earth science and related fields that is current, relevant, practical, and personal.
- B.A. students who graduate with appropriate grades will be able to compete successfully for positions at graduate schools nationwide.
- B.A. students who graduate with appropriate grades will be well prepared for entry-level positions in the geosciences and other related disciplines.

Required Academic Performance

In order to graduate with a Bachelor of Science or Bachelor of Arts degree in geology, the student must earn a letter grade of C (S where appropriate) or better in each course listed herein as part of the required course programs. This grade requirement applies to course work taken outside the department, as well as to transfer courses credited in lieu of resident requirements.

Undergraduate Minor

A minor in geology requires 18 hours of coursework in the Department of Geology and Geophysics. Students are required to take one GEOL 1000-level course; one GEOL 2000-level course; and fulfill remaining hours with GEOL 2000-level or higher courses in consultation with their adviser. A grade of C or better is required in each of these courses.

Graduate Study

The department offers instruction and research programs leading to master of science and doctor of philosophy degrees in both geology and geophysics and to the master of science in geology/water resources.

Program Specific Admission Requirements

All applicants must complete an online departmental application form with statement of intent. Forms are available from the Department of Geology and Geophysics Web site at www.uwyo.edu/geolgeophys.

Application deadline is January 15 of each year.

All applicants should have completed undergraduate coursework including mathematics through calculus, one year of chemistry, basic training in geology, and for most areas, one year of calculus-based physics.

Applicants to the geophysics graduate program should have an undergraduate degree in geophysics, geology, mathematics, physics, or engineering.

Applicants to the Ph.D. program, without a M.S. degree, must have attained an exceptional undergraduate record.

Formal approval of application by the departmental admissions committee.

Formal acceptance by an adviser.

Formal notice of admission by the university.

Program Specific Graduate Assistantships

All applicants to the geology and geophysics graduate program are considered for assistantships. Applicants are NOT required to complete the graduate assistant application form.

Program Specific Degree Requirements

Master of Science in Geology

Plan A (thesis) (26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL 5020 Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geology must complete two semesters of GEOL 5200 Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

Master of Science in Geophysics

Plan A (thesis) (26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL 5020 Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geophysics must complete two semesters of GEOL 5210 Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

M.S. candidates in geophysics must complete 6 hours of mathematics and three hours of physics or engineering courses at the graduate level.

M.S. candidates must take at least 12 hours of 4000- and 5000-level courses in geophysics. Recommended graduate level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

Doctor of Philosophy in Geology (42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

Completion of GEOL 5020 Fundamentals of Research is required during the first semester of residence.

All graduate students in Geology must complete two semesters of GEOL 5200 Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this Catalog. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Doctor of Philosophy in Geophysics (42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

All graduate students in geophysics must complete two semesters of GEOL 5210 Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

Completion of GEOL 5020 Fundamentals of Research is required during the first semester of residence.

Ph.D. candidates in geophysics must complete at least 6 additional hours of graduate level coursework: 3 in mathematics and 3 in physics or engineering. Recommended graduate-level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering, they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Ph.D. candidates are required to take at least 12 hours of 5000-level geophysics courses exclusive of GEOL 5854. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this Catalog. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Master of Science in Geology/Water Resources and Master of Science in Geophysics/Water Resources

Please refer to the Water Resources section of the *Catalog* for degree requirements.

Major

Environmental Geology and Geohydrology, B.S.

The Environmental Geology and Geohydrology (EGGH) degree is intended for students interested in becoming professionals in environmental fields and will prepare students for graduate school in environmental disciplines and for entry-level jobs.

Required Courses

One of the Following:

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

- GEOL 1200 - Historical Geology Credits: 4

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

And Each of the Following:

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4777 - Geochemistry of Natural Waters

Credits: 3

Studies physical chemistry applied to natural waters, and chemistry of rock weathering, sources and controls on major, minor and trace elements, plus problems related to introduced pollutants.

Cross Listed GEOL 5777.

Prerequisite: CHEM 1030 OR consent of instructor.

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

Required Allied Math and Science Courses

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

One of the Following:

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Additional Electives

Additional 18 credit hours of Electives, in consultation with advisor

- GEOL 2005 - Intro to Geophysics Credits: 4
- OR**

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat

flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4888 - Glaciology

Credits: 3

Dynamics of frozen water. Covers behavior of ice masses, in the form of glaciers or ice-sheets, and geomorphic aspects of glacial erosion and deposition. Includes forcing and feedbacks between cryosphere and global climate.

When Offered (Offered every second year spring semester)

Prerequisite: MATH 2205, PHYS 1210 (PHYS 1310).

Note:

Students are encouraged, in consultation with their adviser, to design a major that best fits their interests and goals. With this in mind, there are many courses outside the Department of Geology and Geophysics that may be substituted for courses in the Electives (B) list above provided that such substitutions are made with the consent of an adviser. A list of such courses may be obtained from the Department. Students who seek the Geology BS may not also seek EGGH as a double major, and vice versa.

Geology and Earth Science, B.A.

The B.A. in Geology and Earth Science provides students with a broad educational experience in preparation for careers in earth science-related fields.

Required Courses

Each of the following:

- GEOL 1000-level intro lab course(s) Credits: 4-8

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and

constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

Six Courses from the Following

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical

motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

- GEOL 2005 - Intro to Geophysics Credits: 4

OR

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2050 - Principles of Paleontology

Credits: 4

Max Credit 4

Examines principles, biological and geological, that underlie general study of ancient life on Earth. Includes interactions of evolutionary, taphonomic, and paleogeographic concepts within various approaches to paleobiology and systematic paleontology. Optional field trip.

When Offered (Normally offered spring semester)

Prerequisite: 1000-level GEOL or LIFE 1000 or LIFE 1010

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resource are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. It covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetism methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources, and environmental issues.

Dual Listed GEOL 5835.

Former Course Number [GEOL 4970]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210 and MATH 2200.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

OR

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

Additional Electives

Additional 12 hours of electives with adviser consultation, at least 6 hours of which must be taken outside of the Department of Geology and Geophysics.

Geology, B.S.

The B.S. in Geology program provides a quality educational experience for students intending to enter careers in geology. Graduates will have gained the scientific and technical skills necessary for graduate programs and professional opportunities in geosciences.

Required Courses

Note: This program represents a minimum proficiency. Students are strongly advised to elect additional courses in geology.

One of the Following:

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

- GEOL 1200 - Historical Geology Credits: 4

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

And Each of the Following:

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

- GEOL 2005 - Introduction to Geophysics Credits: 4
- OR**

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)

Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

Additional Geology Courses

Additional 18 credit hours in Geology courses at 2000-level and above:

Allied Math and Sciences Credits: 20 Hours

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

OR

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OPTION A: Fundamental Math

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP 2003-2014 Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

AND

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

OPTION B: Advanced Math

MATH 2200 - Calculus I. Credits: 4

AND

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

OR

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

OR

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

- Eng Physics Credits: 4

Minor

Geology Minor

A minor in geology is intended for those students majoring in other programs who are interested in complementing their degree with a broader understanding of geology and the earth sciences.

Required Courses

Students are required to take 18 hours of coursework in the Department of Geology and Geophysics including one GEOL 1000-level course (3-4); one GEOL 2000-level course (3-4); **and fulfill the remaining credit hours (10-12) with GEOL 2000-level or higher courses in consultation with their adviser.** A grade of C or better is required in each of these courses.

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

OR another 1000-level GEOL course

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

OR another 2000-level GEOL course

AND fulfill remaining credits with 2000-level or higher GEOL courses in consultation with their adviser.

Graduate

Geology, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

Geology, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

All graduate students in Geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geology/Water Resources, M.S.

The purpose of this program is to formalize and broaden strong department offerings at the master of science level in ground water geology, natural waters geochemistry, mathematical hydrology, and fluvial geomorphology.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotopic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

OR

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

Technical/Water Quality Course

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

OR

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

Geophysics, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

M.S. candidates in geophysics must complete 6 hours of mathematics and three hours of physics or engineering courses at the graduate level.

M.S. candidates must take at least 12 hours of 4000- and 5000-level courses in geophysics. Recommended graduate level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

Geophysics, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

Ph.D. candidates in geophysics must complete at least 6 additional hours of graduate level coursework: 3 in mathematics and 3 in physics or engineering. Recommended graduate-level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering, they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Ph.D. candidates are required to take at least 12 hours of 5000-level geophysics courses exclusive of GEOL 5854. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geophysics/Water Resources, M.S.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

OR

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotopic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

Technical/Water Quality Course

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

OR

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

History Program

History is a foundational discipline that blends the methodologies and perspective of the humanities and social sciences in order to engage with the history of human culture on a global scale. UW's History degree program emphasizes interdisciplinary teaching and research and provides course work, research experiences, and internships on both American and international topics. The History program offers a Bachelor of Arts degree major, minor, Public History Concentration, and a Master of Arts degree.

The study of History at the University of Wyoming provides students with the tools to comprehend the present in order to prepare for the future. Challenging courses are designed to facilitate critical thinking and the development of analytical skills. Each of our courses features the discussion of complex issues, the development of writing and reading skills, and is generally oriented toward promoting individual enrichment. The professional skills that the History program instills transcend our field and allow students to work toward a variety of career choices such as business, law, government service, public history, archives and museum work, education, management, writing, and graduate studies. The ability to develop perspective, render informed judgments, and function as productive citizens of the global community stand as hallmarks of our program.

Learning Outcomes

It is the goal of the History department that our graduates have the following skills and knowledge:

- Students shall be able to demonstrate thinking skills by analyzing, synthesizing, and evaluating historical information from multiple sources.
- Students will develop the ability to distinguish between fact and fiction while understanding that there is no one historical truth.
- Students will produce well-researched written work that engages with both primary sources and the secondary literature.
- Students will develop an informed familiarity with multiple cultures.
- Students will employ a full range of techniques and methods used to gain historical knowledge.
- Students will develop an ability to convey verbally their historical knowledge.
- Students will demonstrate their understanding of cause and effect along with their knowledge of the general chronology of human experience.

Major

History, B.A.

A History B.A. provides the skills needed to succeed in any job, public history, archive and museum work, law, education, business and more. Skills mastered include critical thinking, multi-perspective analysis, and written and oral communication.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Arts and Sciences Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

History Requirements

The History major requires a minimum of 36 credit hours in History courses or approved substitutions and an additional 12 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages. All courses used to satisfy major requirements - including the language requirement - must be completed with a grade of C or better. To complete the Bachelor of Arts (B.A.) degree in History, all University Studies Program (USP) and college requirements must also be satisfied.

Language

Students must complete three semesters of a single foreign language or the equivalent as determined by the Department of Languages - Modern and Classical. This requirement may be satisfied by American Sign Language.

Two Required Courses: 6 Hours

HIST3020 - Historical Methods

Credits: 3
An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB
Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.
AND

HIST4030 - Senior Capstone Seminar

Credits: 3
Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

Elective: Any Level: 3 Hours

One additional History course at any level.

Lower-Division Electives: 12 Hours

Lower-Division courses are 1000 and 2000 level courses.

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art; and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP 2015 Code U5FY

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

USP 2003-2014 Code U3VT

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

USP 2003-2014 Code U3VT

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V
USP 2015 Code U5V

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.
USP 2003-2014 Code [(none)< >H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3

Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

USP 2015 Code U5H

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed RELI 2252.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed INST 2280.

USP 2015 Code U5C2

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

HIST2315 - History of Non-Western Religions

Credits: 3

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed RELI 2315.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

HIST2360 - African-American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed AAST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

HIST2370 - Chicano History: Origins to 1900

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2370/GEOG 2370.
USP 2003-2014 Code U3CS, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2380 - Latin American History 1500 to 2000

Credits: 3

Provides introduction to Latin American history, from colonial contacts to the present. Explores important themes and connections across the colonial and modern periods, such as race, national identity, foreign involvement, indigenous peoples' role in nation-states, religion, social movements, economic systems, and globalization.

USP 2003-2014 Code U3G
USP 2015 Code U5H

HIST2385 - Chicano History : 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2385.
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD

HIST2390 - US West Between the World Wars

Credits: 3

Examines two pivotal decades (1918-1942) in the US West that encompasses prosperity, Depression, and reform, through the use of historical documents, art, film, literature, and music.

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

A&S College Core 2015 ASG

HIST2470 - Civilization of India

Credits: 3-4
Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

HIST2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed ECON 2500.

HIST2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in

long-distance trade.

Cross Listed ANTH 2600.
USP 2015 Code U5H

HIST2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed ART 2700/AMST 2700/ANTH 2700.
USP 2003-2014 Code U3CH

HIST2705 - Museology II

Credits: 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes. Cross listed between Anthropology, History, American Studies, and Art.

Cross Listed AMST 2705 / ANTH 2705 / ART 2705

Upper-Division Electives: 15 Hours

Upper-Division courses are 3000 and 4000 level courses.

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 6 hours of HIST or NAIS.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/POLS 3050.

Prerequisite: WB or COM2.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/PHIL 3160.

Prerequisite: WB or COM2.

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP 2003-2014 Code U3G
A&S College Core 2015 ASG
Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000 or RELI 2225/HIST 2225.

HIST3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500 - 1500 CE, concentrating on the Latin West. It examines the growth of Christian institutions and practices, the Church's role as sole governing entity, along with conflicts with secular governments as they developed in later centuries.

Cross Listed RELI 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

HIST3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: RELI 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

HIST3275 - World Christianities

Credits: 3

Examines the development of Christianity primarily in Africa, Asia and South America.

Cross Listed RELI 3275

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WB and CH

HIST3300 - Secret History of Science

Credits: 3

Explores developments in science from prehistory to the present. It focuses on the lesser-known men and women who

contributed to science, as well as on seemingly superstitious beliefs that were nonetheless important to advances in knowledge.

Restricted Restricted to junior standing or higher.

Prerequisite: 6 hours in HIST or 6 hours of PN coursework, or a combination of both.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

HIST3500 - Colonial America

Credits: 3

This course covers the history of European colonization from roughly 1492 to 1763. Our geographic focus will be on the (future) United States, but will also learn how transatlantic forces influenced its people.

Prerequisite: 12 hours of HIST courses or permission of instructor.

HIST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia, and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed AAST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/HIST 2360.

HIST3880 - Comparative History

Credits: 3

Explores comparative history from a variety of topics, such as colonialism, memory, nationalisms, frontiers, or cultural history. This course will introduce students to at least one of these themes from at least two regions, time periods, or groups of people to understand patterns and change in human societies through time.

Prerequisite: 6 hours of HIST.

HIST3900 - Historical Archaeology

Credits: 3

This course introduces students to the field of historical archaeology, the archaeological and archival study of literate societies. Students will be introduced to the history of the discipline, a survey of contemporary historical archaeological practice.

Cross Listed ANTH 3900

Former Course Number [none < > none]

Prerequisite: ANTH 1300

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000

Dual Listed HIST 5000

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP 2003-2014 Code U3CH, U3D

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

HIST4060 - Independent Study

Credits: 1-3

Max Credit 6

Credit not to exceed 6 hours maximum, to be arranged in either European or American history. Primarily for juniors and seniors who can profit from independent work with minimal supervision.

Prerequisite: 12 semester hours in history; written permission of instructor required.

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

HIST4100 - Early Medieval Europe

Credits: 3

Studies development of European civilization from decline of Rome to 12th century.

Dual Listed HIST 5100.

Prerequisite: 9 hours of HIST.

HIST4110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 5110.

Prerequisite: 9 hours of HIST.

HIST4112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000 Europe began its rise to world prominence and cities contributed to that rise. Examines development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 5112.

Prerequisite: 9 hours of HIST.

HIST4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what some would call heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 5113.

Prerequisite: 9 hours of HIST or RELI.

HIST4120 - Europe During the Renaissance

Credits: 3

Intensely studies European history in 14th and 15th centuries.

Prerequisite: 9 hours of HIST.

HIST4130 - Europe During the Reformation

Credits: 3

Intensely studies European history in the 16th century.

Prerequisite: 9 hours of HIST.

HIST4140 - Europe During the Age of the Baroque

Credits: 3

Intensely studies European history in 17th century.

Prerequisite: 9 hours of HIST.

HIST4150 - Europe During the Age of the Enlightenment

Credits: 3

Intensely studies European history in 18th century.

Prerequisite: 9 hours of HIST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed RELI 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

HIST4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed RELI 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 5305.

USP 2003-2014 Code U3G

Prerequisite: 9 hours of HIST, INST, or POLS.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 4380.

Dual Listed HIST 5380.

Prerequisite: 9 hours of HIST or INST.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

HIST4405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African and Asian people from pre-contact through the mid-19th century.

Dual Listed HIST 5405.

USP 2003-2014 Code U3D

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 5406

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST.

HIST4410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 5410.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 5415.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 5425.

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4450 - The Civil War and Reconstruction

Credits: 3

Studies crisis of the Union, 1861-1877. Examines experiences of both the North and South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 5450.

Prerequisite: 9 hours of HIST.

HIST4460 - Post-Civil War America: The Gilded Age

Credits: 3

Intensively covers economic, cultural and political developments which marked the U.S. in post-Civil War era, such as rise of industry, emergence of distinctive national culture and party struggles shaping America's Gilded Age.

Dual Listed HIST 5460.

Prerequisite: 9 hours of HIST.

HIST4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed NAIS 4462.

Dual Listed HIST 5462.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or NAIS.

HIST4463 - American Indian History 1783 to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied moving west.

Cross Listed NAIS 4463.

Dual Listed HIST 5463.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 4464.

Dual Listed HIST 5464.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed NAIS 4466.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

HIST4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed NAIS 4468.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U. S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between depression of the 1890s and that of the 1930s.

Dual Listed HIST 5470.

Prerequisite: 9 hours of HIST.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

HIST4480 - Growth of Modern America, 1929 to 1960

Credits: 3

Studies political and diplomatic developments in the U.S. in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasizes economic crisis, growth of government, reform traditions, anti-communism and civil rights.

Dual Listed HIST 5480.

Prerequisite: 9 hours of HIST.

HIST4485 - U.S. Latino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U.S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives' responses are stressed.

Cross Listed LTST 4485/INST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Cross Listed LTST 4492.

Dual Listed HIST 5492.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST or INST.

HIST4494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 5494.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or INST.

HIST4495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 5495.

Former Course Number [4720]

Prerequisite: 9 hours of HIST or INST.

HIST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U.S., incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed LTST 4496.

Dual Listed HIST 5496.

Former Course Number [4800]

Prerequisite: 9 hours of HIST or INST.

HIST4505 - The Old South, 1820 to 1861

Credits: 3

Studies history of the South from emergence of southern identity to the Civil War. Emphasizes southern society and culture.

Dual Listed HIST 5505.

Former Course Number [4500]

Prerequisite: 9 hours of HIST.

HIST4510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 5510.

Former Course Number [4950]

Prerequisite: 9 hours of HIST.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

HIST4530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 5530.

Former Course Number [4630]

Prerequisite: 9 hours of HIST.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

HIST4540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 5540.

Former Course Number [4640]

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

HIST4560 - American Social History in the 20th Century

Credits: 3

Explores history of social mobility and conflict in 20th century. Emphasizes impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting and architecture.

Dual Listed HIST 5560.

Prerequisite: 9 hours of HIST.

HIST4582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed INST 4582.

Dual Listed HIST 5582.

Prerequisite: 9 hours of HIST or INST.

HIST4610 - Seminar Topics in the History of Wyoming I

Credits: 3

An intensive research and writing course dealing with topics in the period before statehood in 1890.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4620 - Seminar Topics in the History of Wyoming II

Credits: 3

Allows students to do intensive research and writing dealing with topics in Wyoming history from 1890 to present.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4965 - Senior Thesis

Credits: 3

Working closely with a faculty advisor, a history major will develop a research proposal that, after approval by the History department faculty, will lead to in-depth research and writing, producing a minimum 50-page thesis that demonstrates an excellent grasp of historical methods and a high degree of writing skill.

Prerequisite: 12 hours of HIST; senior class standing; HIST major.

HIST4990 - Topics in _____

Credits: 1-6

Max Credit (Max. 12)

Affords students opportunity to study in-depth various topics in history not offered in regular courses or independent study.

Former Course Number [4080]

Prerequisite: 9 hours of HIST.

History, Public History Concentration, B.A.

Want work in a museum, historical site, park, archive, historical consulting firm, establishing and operating archives and records management systems for private businesses, state agencies, or universities, and more? Then public history is for you.

Public History Concentration

Combined with the History B.A. requirements (below,) students can declare a Public History Concentration. The History B.A. requires a minimum of 36 credit hours in History courses, and 18 of those can qualify to meet the Public History Concentration requirements. The Public History Concentration requires a minimum of 18 hours of History coursework that may be tailored for individual student career goals.
