Mission

We honor our heritage as the state's flagship and land-grant university by providing accessible and affordable higher education of the highest quality; rigorous scholarship; the communication and application of knowledge; economic and community development; and responsible stewardship of our cultural, historical and natural resources.

In the exercise of our primary mission to promote learning, we seek to provide academic and co-curricular opportunities that will:

- Graduate students who have experienced the frontiers of scholarship and creative activity and who are prepared for the complexities of an interdependent world;
- Cultivate a community of learning energized by collaborative work among students, faculty, staff and external partners;
- Nurture an environment that values and manifests diversity, internationalization, free expression, academic freedom, personal integrity and mutual respect; and
- Promote opportunities for personal health and growth, physical health, athletic competition and leadership development for all members of the university community.

As Wyoming's only public university, we are committed to scholarship, outreach and service that extend our human talent and technological capacity to serve the people in our communities, our state, the nation and the world.

ity by providing accessible and affordable higher education of the highest quality; rigorous scholarship; the communication and application of knowledge; economic and community development; and responsible stewardship of our cultural, historical and natural resources. In the exercise of our primary mission to promote learning, we seek to provide academic and co-curricular opportunities that will:

- Graduate students who have experienced the frontiers of scholarship and creative activity and who are prepared for the complexities of an interdependent world;
- Cultivate a community of learning energized by collaborative work among students, faculty, staff and external partners;
- Nurture an environment that values and manifests diversity, internationalization, free expression, academic freedom, personal integrity and mutual respect; and
- Promote opportunities for personal health and growth, physical health, athletic competition and leadership development for all members of the university community. As Wyoming's only public university, we are committed to scholarship, outreach and service that extend

our human talent and technological capacity to serve the people in our communities, our state, the nation and the world.

University of Wyoming Non-Discrimination Statement

The University is committed to equal opportunity for all persons in all facets of the University's operations and is an Equal Opportunity/ Affirmative Action Employer. The University will provide all applications for admissions, employment and all University employees with equal opportunity without regard to race, gender, religion, color, national origin, disability, age, protected veteran status, sexual orientation, gender identity, genetic information, creed, ancestry, political belief, or any other applicable protected category or participation in any protected activity. The University ensures non-discriminatory practices in all matters relating to its education programs and activities and extends the same non-discriminatory practices to recruiting, hiring, training, compensation, benefits, promotions, demotions, transfers, and all other terms and conditions of employment.

The University is also committed to complying with all of the rules, regulations, and relevant orders of the Secretary of Labor and the Office of Federal Contract Compliance Programs (OFCCP), issued pursuant to Executive Order 11246, the Vietnam Era Veterans' Readjustment Assistance Act, and Section 503 of the Rehabilitation Act of 1973, and has an audit and reporting system to facilitate compliance.

It is the continuing, active, individual responsibility of each principal Administrative Officer, Dean, Department and Division Head or Supervisor to assure that the University's Equal Employment Opportunity policy is followed when making decisions related to recruiting, hiring, training or promoting qualified persons.

For more information please see UW Regulation 1-3 (Equal Education and Equal Employment Opportunity Statement and Policy/Diversity Program).

University Communication Statement

The University of Wyoming assigned email account shall be one of the official means of communication with all students, faculty, and staff. All community members are responsible for all information sent to them via their University assigned email account. Members who choose to manually forward mail from their University email accounts are responsible for ensuring that all information, including attachments, is transmitted in its entirety to the preferred account.

All faculty, staff, and students are required to maintain an @uwyo.edu computer account. This account provides both an online identification key and a University official email address. The University sends much of its correspondence solely through email. This includes, but is not limited to, policy announcements, student account billing notifications, emergency notices, meeting and event notifications, course syllabi and requirements, and correspondence between faculty, staff, and students. Such correspondence is mailed only to the University official email address.

Faculty, staff, and students are expected to check their email on a frequent and consistent basis in order to stay current with University-related communications.

Faculty, staff, and students have the responsibility to recognize that certain communications may be time-critical.

Undergraduate Admission

UW welcomes all students to apply and will consider each student based on their individual academic achievement. Admission and programs of the University of Wyoming are offered to all eligible people without regard to race, gender, religion, color, national origin, disability, age, protected veteran status, sexual orientation, gender identity, genetic information, creed, ancestry, political belief, or any other applicable protected category. The Director of Admissions, through the Provost, is responsible for the admission of students. Admission of graduate students must also be recommended by the department of an applicable graduate program.

I. Definitions

Diploma: A formal document certifying the successful completion of a prescribed program of studies.

First Time Student: A student who has no prior postsecondary experience attending any institution for the first time at the undergraduate level. There are two exceptions: (1) students who attended any institution for the first time the summer prior to entering the University of Wyoming in the fall term and (2) students who enter UW with advanced standing (college credits earned before graduation from high school).

High School Student: A student enrolled in secondary school or pursuing a high school diploma or recognized equivalent. Includes students who have not received but are pursuing a high school diploma or recognized equivalent and taking college coursework concurrently.

High School Success Curriculum: Coursework during high school that includes successful completion of the following:

- A. Four (4) years of English;
- B. Four (4) years of math (including algebra I, II, and geometry);
- C. Four (4) years of science (including at least one year of physical science);
- D. Three (3) years of social science;
- E. Four (4) years of additional coursework including at least two (2) years of related courses taken in sequence (including fine and performing arts, career-vocational education, or foreign language).

Nationally Standardized Tests: ACT Assessment (ACT) or SAT Assessment (SAT) test results. Test results must be sent to the Admissions Office. SAT Assessment scores will be based off the Evidence-Based Reading and Writing + Math sections.

Returning Student: A student who previously attended UW but has not been enrolled for three consecutive semesters, including a summer term.

Transfer Student: A student entering the University of Wyoming for the first time but known to have previously attended a postsecondary institution at the same level (e.g., undergraduate, graduate). The student may transfer with or without credit.

II. Undergraduate Admission Requirements

All applicants for admission under twenty-one (21) years of age or transfer students who have fewer than twelve (12) transferable semester credit hours after high school, must provide an official copy of their ACT or SAT test results. Test results must be sent to the Admissions Office.

A. First Time Students

Admission into a degree seeking program shall be based on individual academic achievement. The University seeks to admit qualified undergraduate students who are new first time students or students that are concurrently enrolled in post-secondary education classes.

To be considered for admission, prospective students must submit an application, a one-time nonrefundable application fee, official high school transcripts (or high school equivalency exam), and an official ACT or SAT test score (if the applicant is under 21) to the University's Office of Admissions.

B. Assured Admission

Assured undergraduate admission shall be granted to high school graduates who meet the following requirements:

1. A cumulative, unweighted high school GPA of 3.000 (on a 4.000 scale)

2. A minimum composite ACT score of 21 or SAT score of 1060; and
3. Completion of the High School Success Curriculum while attending high school.

*UW is test optional for admission purposes for incoming students through fall 2025, spring 2026, and summer 2026.
PLEASE NOTE: check where test scores are required for scholarship consideration.

C. Admission with Support

Undergraduate admission with support shall be granted to high school graduates who meet the following requirements:

1. A cumulative, unweighted high school GPA of 2.500-4.000 and a minimum ACT score of 17 or SAT score of 900, or 2.250-2.490 and a minimum composite ACT score of 20 or SAT score of 1020; and
2. Completion of the High School Success Curriculum with no more than two deficiencies. Both deficiencies cannot occur in the same curriculum category.

Students admitted with support are required to participate in the University's academic transition programs administered by the Learning Resource Network (LeaRN).

*UW is test optional for admission purposes for incoming students through fall 2025, spring 2026, and summer 2026.

D. Admission with Alternative Educational Credentials

Undergraduate applicants with General Education Development (GED) credentials or other approved alternative educational credentials (i.e., High School Equivalency Test (HiSet)) should contact the University's Office of Admissions for specific application requirements. Students under 21 years of age with GED or the approved credentials must also have a minimum ACT score of 17 or SAT score of 900.

E. Transfer Students

Transfer students with twelve (12) or more transferable hours after high school must submit an application, a one-time nonrefundable application fee, and official transcripts from each previously-attended higher education institution. Transfer students must have at least a 2.000 cumulative GPA for undergraduate admission.

Transfer students with eleven (11) or less transferable hours after high school must also submit, official high school transcripts (or approved alternative education credentials), official ACT or SAT test score (if the applicant is under 21) and official transcripts from each previously-attended higher education institution. Admissions to transfer students with eleven (11) or less transferable hours must have at least a 2.000 cumulative GPA as well as meet the assured admissions requirements for first time students.

Official transcripts must be sent directly from the institution(s) to the University's Office of Admissions. Failure to disclose all previously attended institutions will be seen as a deliberate attempt to withhold academic history and may be reason for denied admissions and/or dismissal.

F. Home Schooled Students

Home schooled students shall be considered for admissions under the same requirements as First Time students.

G. Returning Students

Students returning to the University of Wyoming after not registering for classes for three or more consecutive semesters, including a summer term will need to submit a new application, provide official transcripts from all institution(s) attended since leaving the University of Wyoming, and be in good academic standing. Failure to disclose information about all institution(s) attended will be seen as a deliberate attempt to withhold academic history and may be reason for denied admissions and/or dismissal. Returning students must have a minimum 2.000 cumulative GPA from all undergraduate institutions.

Students suspended from the University of Wyoming must complete the reinstatement process. Academic reinstatement to the University of Wyoming does not constitute admissions to the institution. Students seeking reinstatement are required to meet admissions eligibility and criteria.

H. Holistic Alternative Admission

The University has the discretion to admit students who do not qualify under the above-described criteria.

III. International Students

Admission of international students is governed by the Admission Policy for International Students. This Policy is supplementary to the general admission policies described in this Regulation and provides for general admission standards for all international student applicants, including procedures for review and consultation with the various academic colleges and departments.

The Admission Policy for International Students shall be maintained and revised as determined by the Provost. Revisions are subject to the approval of both the Provost and the Vice Provost for Enrollment Management, and shall become effective from the date of their approval.

The Admission Policy for International Students shall be published and distributed by the Office of Admissions and will be available through the Admission Office's website.

IV. High School Guests

High school students requesting admission as high school guests must submit transcripts demonstrating a cumulative high school GPA of 3.000 on a 4.000 scale (official high school transcripts must be sent directly from the high school to the Office of Admission); a written recommendation from a high school counselor or principal; and official ACT or SAT test scores, if any.

V. Non-Degree Students

The non-degree admission status is a special status that is not available to international students or students who have a suspension status at UW or another college or university.

Applicants seeking admission as non-degree undergraduate students must submit an application and a one-time nonrefundable application fee to the Office of Admissions. Under this admission status, undergraduate students may take a maximum of eight (8) credit hours per semester and cannot apply more than twelve (12) total credits taken as a non-degree student toward an undergraduate degree.

VI. Second Bachelor's Degree Students

Students who have received a bachelor's degree from the University of Wyoming and are seeking a second bachelor's degree, but have not taken coursework since graduation, must submit a new application.

Students who have received a bachelor's degree from another institution, or who graduated from the University of Wyoming and have taken courses at another institution since leaving the University, must submit an application, a one-time nonrefundable application fee, and official transcripts from each previously-attended higher education institution. Official transcripts must be sent directly from the institution to the University's Office of Admissions.

Graduate Admission

I. Graduate Applicants

Prospective students are encouraged to consult with their respective academic department regarding the admission process before making a formal UW application.

Applicants must submit the UW graduate application and the nonrefundable application fee. One set of official transcripts must be sent directly to the UW Admissions Office from each previous collegiate institution.

Domestic applicants must have completed a bachelor's degree or equivalent from a regionally accredited institution. All applicants should have at least a 3.000 cumulative GPA (scale of 4.000).

Some graduate programs may require standardized examination scores for admission.

Applicants whose department requires the Graduate Record Examination (GRE) must request official scores be sent to the Admissions Office directly from the Educational Testing Service (ETS). Our institution code with ETS is 4855.

Some departments may require scores from the Graduate Management Admission Test (GMAT), rather than the GRE.

Letters of recommendation may also be required by some departments. Please see the academic department or program entries elsewhere in the Catalog for details about admission requirements.

Graduate applicants should contact the respective academic departments for questions concerning application status, degree program requirements, deadlines, and supplemental application materials they may require.

A. Admission Status Categories

Advanced-degree applicants may be admitted to the University of Wyoming in one of the following categories:

1. Admitted Graduate Student signifies the applicant has been accepted by the university and by a major department to work toward an advanced degree.
2. Conditional admission of a Graduate Student signifies the applicant did not meet the formal admission requirements but has sufficient potential that the university and the major department are convinced that the student will be successful as an advanced-degree candidate. Conditions are usually placed on such students in the form of performance criteria for the first one or two semesters. If the conditions of admission are not met within first two semesters, the student may be denied admission to the university graduate program and the degree program. At minimum, conditionally admitted graduate students must maintain a 3.000 GPA through their first semester. Failure to do so will result in revocation of admission. More restrictive conditions may be defined by the department.

Students admitted with graduate standing may elect to take any undergraduate or graduate courses for which they are prepared, subject to restrictions as outlined in the *University Catalog*. However, tuition will be assessed at the graduate

level for all courses taken with graduate status. Admission to graduate study does not automatically make a student a candidate for an advanced degree.

Note: Students working toward a second bachelor's degree are not considered graduate students and are subject to all undergraduate regulations.

B. Alternative Track Graduate Admissions (ATA)

Alternative Track graduate admissions are only available to individuals who have had at least two years* of relevant post-baccalaureate professional experience and whose undergraduate cumulative GPA is less than 3.000. Applicants who do not meet these basic criteria must be considered via regular graduate admissions. Applicants who do not meet the basic institutional, college and/or program regular admissions criteria may be considered for conditional admission.

Admission via the Alternative Track is full graduate admission. If a student is admitted via ATA, they are admitted fully and are not subject to any of the restrictions that would come with conditional admission. No conditional admissions will be allowed under Alternative Track admissions; all conditional admissions must go through the regular track admissions process.

*Programs may specify a longer period of post-baccalaureate professional experience. Please consult with the program in which you are interested.

Alternative Track Application Materials

The following must be submitted by the applicant to be considered for Alternative Track admission:

- Official transcripts of collegiate work completed, including any post-baccalaureate coursework. U.S. Military training transcripts that show neither grades nor degrees awarded may be submitted but are not required as part of the transcript requirement.
- A minimum of two letters of recommendation from:
 - a current or former college/university instructor of the applicant; and/or
 - a current or previous professional supervisor of the applicant.
 - Additional letters may be required by programs at their discretion.
- A statement of purpose that contains the applicant's:
 - Professional/career goals.
 - Educational goals.
 - Statement of how the graduate program will help the applicant attain their educational and professional goals.
 - Explanation for why the applicant would choose the University of Wyoming for graduate study.
- A full resume that contains:
 - Record of all post-secondary academic work, including the names of the institutions, dates of attendance, and degrees earned.
 - Record of all professional employment including dates for each (including any military service, AmeriCorp, PeaceCorp, Fulbright, etc. work experience).
 - Any special skills or competencies (including any certifications or licenses).
 - List of publications, prizes, awards, or other recognitions.
 - List of service/volunteer activities.

Please contact the program in which you are interested to see if Alternative Track Admissions is an option.

II. International Graduate Applicants

All graduate international students must submit the following in addition to the UW graduate application, official transcripts, and application materials required by the academic department.

1. Provide proof of English proficiency if student's native language is not English. The University of Wyoming's institutional minimum acceptable TOEFL score is 540 (76 iBT) and the minimum acceptable IELTS score is 6.5. TOEFL and IELTS scores must be sent directly from the testing agency to be considered official. Please note that some programs/departments require higher TOEFL/IELTS scores than what is required by the Admissions Office.
2. Provide proof of financial support. The Confidential Financial Statement for graduate international applicants can be found on the Admissions Office page, <http://www.uwyo.edu/admissions/international/requirements-graduate.html>. Students who are awarded a full graduate assistantship may not need to provide this documentation.
3. Provide a copy of student's passport. This passport copy can be submitted via a scanned e-mail to admissions@uwyo.edu.

More information on the international admission requirements for graduate students can be found on the Admissions Office website, <http://www.uwyo.edu/admissions/international/requirements-graduate.html>.

III. Graduate Non-Degree Student

1. Must complete and submit a Non-Degree Student application including a non-refundable application fee.
2. Transcripts are required for proof of undergraduate degree for non-degree status, and must be submitted to the Admissions Office.
3. Non-degree students may enroll in a maximum of 8 credit hours per semester (maximum of two courses). Only 12 credit hours taken in this status may be used towards a UW degree. This 12-credit hour rule may be decreased if prior courses were reserved for graduate credit as either an undergraduate or as non-degree student.
4. Admission with non-degree status is not available to international students or students on suspension.
5. Students admitted with non-degree status are assessed tuition and fees at the same tuition rate as degree-seeking students.
6. Students admitted with non-degree status do not qualify to receive financial aid.
7. Non-degree graduate students who decide to pursue a degree must apply to and be accepted by their respective graduate program and the Admissions Office.

IV. Western Interstate Commission for Higher Education (WICHE) Western Regional Graduate Program (WRGP)

The Western Interstate Commission for Higher Education (WICHE) was created in 1953 by the governors and legislators of the western states. The primary commitment is to provide access to educational programs through interstate cooperation. Wyoming provides opportunities for qualified residents in the following programs:

Western Regional Graduate Program (WRGP) provides opportunities for qualified Wyoming residents to attend distinctive or health-related graduate programs in participating WICHE states and territories. Those accepted pay resident or significantly reduced tuition at the school they attend. Graduate students from WICHE states or territories interested in the Haub School of Environment and Natural Resources, Doctorate of Nurse Practice and Graduate Social Work may be eligible for reduced tuition via the WRGP program.

Information about WICHE WRGP program may be obtained from the WICHE Certifying Office; Dept. 3432, 1000 E. University Ave, Laramie, WY 82071; (307)766-3499 or certoff@uwyo.edu or from WICHE, 3035 Center Green Drive, Suite 200; Boulder, CO 80301-2204, (303) 541-0214.

College of Law Admission

(307) 766-5419

E-mail: lawadmis@uwyo.edu

Web site: www.uwyo.edu/law/

1. Admission to the professional curriculum of law is granted by the College of Law Admissions Committee. The College of Law reserves the right to restrict the number of entering students to a class size consistent with its facilities and its educational objectives. Additional information and requirements are provided on the College of Law website.
2. Complete the electronic University of Wyoming College of Law Application for Admission through LSAC between September 1 and April 30. Applications received by December 15 will be considered for early admission.
3. Submit the application fee online through the College of Law website or by sending a check or money order to the College of Law.
4. Applicants must have a bachelor's degree from an accredited college or university (subject to some limited exceptions).
5. Take the Law School Admission Test (LSAT) administered by the Law School Admission Council (LSAC) no later than the April administration. Beginning in 2019, the LSAT will be given ten times each year at numerous locations within and outside of the United States. Information about the test, dates, test locations and application form may be obtained from LSAC, Box 2000, Newtown, PA 18940-0998, (215) 968-1001, or on the Web at www.lsac.org.
6. Register with LSAC's Credential Assembly Service (CAS) between September and January. Registration with CAS can be completed through the LSAC website (www.lsac.org). An official transcript from each college attended must be sent directly to CAS. It is advisable to register with CAS at the same time one registers for the LSAT. CAS prepares a report and forwards a copy to each law school to which application has been made. Applicants do not send transcripts directly to the College of Law until they are admitted. For more information about CAS, go to www.lsac.org.
7. International students must supply current TOEFL scores. Minimum scores required for admission are 600 on the written exam or 100 on the internet-based exam. International students must take the LSAT exam and register with the Law School Admissions Council (www.lsac.org). If a transcript analysis will not be provided by the LSAC for any foreign educational institutions attended, official transcripts must be provided with an English translation.

School of Pharmacy Admission

Admission to the preprofessional pharmacy program is through the university admission process described previously.

Admission to the professional curriculum leading to the entry-level professional Doctor of Pharmacy (Pharm.D.) degree is granted by the Dean of the School of Pharmacy upon the advice of the School of Pharmacy Admissions Committee. The application process requires that students apply to the School of Pharmacy using PharmCAS, for more information about PharmCAS log on to www.Pharmacas.org. Admission to the professional program is limited and competitive. The Pharmacy Early Assurance program grants provisional admission to the professional program to qualified freshman who meet program requirements. All preprofessional students participate in the pharmacy application process. For further information, contact the School of Pharmacy, Dept. 3375, 1000 E. University Ave., Laramie, WY 82071; (307) 766-6132.

Professional Health Access Programs

Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program (PSEP)

The Western Interstate Commission for Higher Education (WICHE) was created in 1953 by the governors and legislators of the western states. The primary commitment is to provide access to educational programs through interstate cooperation. Wyoming provides opportunities for qualified residents in the following programs:

Professional Student Exchange Program (PSEP) offers certified Wyoming residents access to professional education in the fields of dentistry, medicine, occupational therapy, optometry, osteopathic medicine, physical therapy, physician assistant, podiatry, and veterinary medicine. To be eligible for certification, the applicant or a spouse must be a legal resident of the State of Wyoming for one year immediately prior to enrolling in professional school. Applications for certification are available by June 1 at www.uwyo.edu/certwy and are due no later than October 15 of the year preceding the anticipated start date of professional school. Applicants who are accepted to a professional program and who receive state support pay reduced tuition. In all fields except veterinary medicine, students receiving state support must either pay back the money expended on their behalf, or practice in their fields in the state of Wyoming for three years. State support is dependent on continued appropriations from the Wyoming State Legislature. The University of Wyoming School of Pharmacy welcomes applicants from residents of Alaska, Nevada and the CMNI through the PSEP program. Students accepted through PSEP may be eligible for tuition support from their home state or territory.

Information about WICHE PSEP program may be obtained from the WICHE Certifying Office; Dept. 3432, 1000 E. University Ave, Laramie, WY 82071; (307)766-3499 or certoff@uwyo.edu or from WICHE, 3035 Center Green Drive, Suite 200; Boulder, CO 80301-2204, (303) 541-0214.

WWAMI Medical Education Program

WWAMI is a contract program between the State of Wyoming and the University of Washington School of Medicine for medical education. Admission is twofold.

1. Applicants must be certified residents of Wyoming. To be eligible for certification, the applicant or parent or guardian must be a legal resident of the State of Wyoming for five continuous years immediately prior to enrolling in the WWAMI program. The application for certification is available by June 1 at www.uwyo.edu/certwy and is due no later than October 15 of the year prior to the anticipated start date of medical school. Participants pay reduced tuition and must either pay back the money expended on their behalf plus interest or practice medicine in Wyoming for three years.
2. Applicants apply to the University of Washington School of Medicine through the usual procedures and are subject to criteria established by the University of Washington.

Information may be obtained from the WWAMI Certifying Office, Dept. 3432, 1000 E. University Ave., Laramie, WY 82071; (307) 766-3878 or certoff@uwyo.edu.

WYDENT Dental Education Program

WYDENT is a contract program between the State of Wyoming and the University of Nebraska College of Dentistry and Creighton University School of Dentistry for dental education. Admission is twofold.

1. Applicants must be certified residents of Wyoming. To be eligible for certification, the applicant or parent or guardian must be a legal resident of the State of Wyoming for five continuous years immediately prior to enrolling in dental school. The application for certification is available by June 1 at www.uwyo.edu/certwy

and is due no later than October 15 of the year prior to the anticipated start date of dental school. Participants pay reduced tuition and must either pay back the money expended on their behalf or practice dentistry in Wyoming for three years.

2. Applicants must apply to the dental schools through the usual procedures and are subject to admission criteria established by the dental schools.

Information is available from the WYDENT Certifying Office; Dept. 3432, 1000 East University Ave; Laramie WY 82071; (307) 766-3878 or certoff@uwyo.edu.

Other Information

Western Interstate Commission for Higher Education (WICHE) Western Undergraduate Exchange (WUE)

The Western Interstate Commission for Higher Education (WICHE) was created in 1953 by the governors and legislators of the western states. The primary commitment is to provide access to educational programs through interstate cooperation. Wyoming provides opportunities for qualified residents in the following programs:

Western Undergraduate Exchange (WUE) allows residents of participating states and territories to attend a participating institution at reduced cost of 150% of the institution's resident tuition. Not all programs in the participating states offer WUE opportunities. The University of Wyoming invites competitive graduating high school senior from all WUE states and territories to apply for the WUE tuition discount. All undergraduate UW majors are eligible for WUE support. Information is available from the UW Admissions Office.

Wyoming Senior Citizen Policy

Wyoming senior citizens, age 65 and over, who have been admitted to UW may enroll in university courses on a space available basis at no cost upon presentation of evidence of age and Wyoming residence prior to the beginning of the term in which classes will be taken.

Scheduled Distance Education classes which meet minimum enrollment requirements are included in the courses available to senior citizens.

Board of Trustee Retirement Benefits

Beginning Spring 2002, official board retirees may attend University of Wyoming classes on a space available basis at no cost. To qualify for this benefit, you must be an official board retiree, 25 years of university service or age 60 with 15 years of immediately preceding university service. The spouse of an eligible retiree may receive a fifty (50) percent tuition discount and a surviving spouse may receive the employee's full tuition discount provided space is available. The spouses must contact Student Financial Services at sfs@uwyo.edu or (307) 766-6233 in order for this benefit to be applied.

Readmission

Readmission is the process for former University of Wyoming students to again be admitted to the university. Former UW students who have attended another college since their last UW enrollment must have one official transcript from each college sent directly to the UW Admissions Office. Undergraduate students who are returning to UW after an absence of one year or longer should complete an application for admission at least 30 days prior to registration, thereby allowing sufficient time to avoid delays in registration.

Academic Reinstatement: Former students who are on academic suspension at UW must petition for reinstatement through the dean of their college. A petition for reinstatement must be submitted no later than 15 days before the beginning of the semester or summer term in which the student wishes to register. A petition received after this deadline may not be processed until after the regular registration period.

Academic Renewal: An undergraduate student who returns to UW and has not completed a college course at UW, during the previous five years, will have the option of continuing his or her earlier UW cumulative GPA or commencing a new cumulative GPA under the Academic Renewal policy. Interested students must submit the Academic Renewal Application Form (which can be obtained in the Office of the Registrar) to the registrar no later than ten class days before the last day of classes of the semester in which the student returns to UW.

The entire UW transcript will remain intact. A note indicating the policy will precede the new part of the UW transcript if the student opts for academic renewal. At the discretion of the academic department in which the student is enrolled, credit hours for which the student earned the grade of C or better may be applied toward the completion of the degree requirements. The list of any departmentally approved courses must be indicated on the Academic Renewal Application Form when initially submitted to the registrar. No further changes may be requested.

A student's GPA and completed courses that were applied to a baccalaureate degree are not eligible for academic renewal.

Readmission for Military Service Members

Policy

The University of Wyoming acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies in order to perform military service. UW encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. 668.18 and the Department of Defense (DOD) Voluntary Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Student Responsibility

The student must provide oral or written notice of a uniformed service obligation to the Veterans Service Center as far in advance as possible, unless precluded by military necessity. Such notice does not need to indicate when the student will return to the university.

Tuition and Fees

A returning student must be charged the same tuition and fees in effect during the last academic year the student attended, unless veteran's education benefits or other service member education benefits will pay the amount in excess. For subsequent academic years, the returning student may not be charged tuition and fees in excess of what other students in the program are charged.

Readmission Requirements

A returning student will be permitted to reenroll in the next semester scheduled in the same academic program, unless the student requests a later date of reenrollment or agrees to a different program. A returning student will be readmitted into the same academic program the student was enrolled in prior to the military service or the student requests admission to a different program.

If the university determines that a returning student is not prepared to resume the program or is unable to complete the program, the university must make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student. If such efforts are unsuccessful or place an undue hardship on the university, the university is not required to readmit the student.

In accordance with federal regulations, returning student who receive a dishonorable or bad conduct discharge from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission under this policy. However, service members who receive dishonorable or bad conduct discharge may remain eligible for readmission even though they will not be entitled to the benefits outlined in this policy.

Residency Student Classification

The following Trustee regulations govern the classification of students at the University of Wyoming as resident or non-resident for tuition purposes, and shall be administered by the Associate Vice President for Enrollment Management and Registrar. (Trustee Regulation, Chapter VIII, Section 3.) See the University Regulations online for the most up-to-date version.

Student Classification for Tuition Assessment

Residing in Wyoming primarily as a student will not support a claim for resident status for tuition purposes. Qualifying for residency for tuition purposes at the University of Wyoming differs from what is normally required to be a "resident" of the State of Wyoming. A person may be considered a "resident" of Wyoming and still be a Non-Resident for tuition purposes at the University of Wyoming.

The governing regulation for residency classification for tuition and fee purposes, as approved by the University of Wyoming Board of Trustees, is UW Regulation 2-200. See the University Regulations online for the most up-to-date version.

Process

The University of Wyoming will determine the initial classification of resident or nonresident status for tuition purposes. Students classified as nonresidents who feel they meet residency requirements may apply to change their status through a form approved by the Office of the Registrar.

If a student classified as an out-of-state resident for tuition purposes wishes to petition their residency status at the University of Wyoming, they will need to conclusively demonstrate they have established a permanent home in Wyoming. Students must submit the Petition for Residency for Tuition Purposes, along with all specified relevant, appropriate, and verifiable documentation to the Office of the Registrar. The deadline for submission is no later than 5 p.m. of the first day of classes for the semester the student wishes to petition, based off of the University's academic calendar. The student bears the burden of providing documentation to show a permanent home has been established in Wyoming based on the required criteria of UW Regulation 8-1(III)(B)(8). See the University Regulations online for the most up-to-date version.

The Registrar or designee will evaluate the student's petition and documentation to determine whether the student has established a permanent home in Wyoming based on the requirements set forth in UW Regulation 8-1(III)(B)(8) or met any other residency criteria in UW Regulation 8-1. See the University Regulations online for the most up-to-date version. If a student subsequently meets the criteria of being a resident for tuition purposes, the student's residency

status will be reclassified by the Office of the Registrar and the resident tuition rate will become effective the semester the student submitted the petition. Under no circumstances will any tuition or fee adjustments be retroactively applied to previous semesters.

If a student's petition is denied, the student will be notified in writing of the denial.

Appealing the Registrar's Decision

If a student has a petition denied by the Registrar, the student may appeal the decision by submitting the Denied Residency Petition Appeal form to the Office of the Registrar within ten (10) calendar days of the original decision by the Registrar or designee.

The Residency Classification Committee will receive the student's Denied Residency Petition Appeal form, the written decision of the Registrar, and the student's previously-submitted petition and documentation which were submitted to the Registrar prior to the submission deadline for that semester. The Residency Classification Committee will determine if an error was made by the Registrar and will make a decision to affirm or reverse the classification decision of the Registrar. The decision of the Residency Classification Committee is final and there is no further level of appeal for that semester.

Measles, Mumps, Rubella (MMR)

Immunization Requirement

The University of Wyoming has implemented a policy to protect the University community against measles (rubeola), mumps, and rubella. All new on-campus students must provide proof of immunity to measles, mumps, and rubella prior to registration. Two doses of MMR vaccine (or equivalent) are required. The MMR immunization dates are to be entered into the Student Health Service Patient Portal (on the Student Health Service's webpage, <http://www.uwyo.edu/shser/>). Incoming students will use their UW user names and passwords to enter the Patient Portal, and click on Immunizations. Once the immunization dates are entered, students will upload a verified immunization record into the Patient Portal.

The only contraindication to the MMR immunization is a previous severe allergic reaction to the vaccine or vaccine component (neomycin, gelatin). Relative (temporary) contraindications include: pregnancy; persons with immunosuppressive illnesses or treatment; moderate or severe acute illness; and recent receipt of blood products. If you are uncertain as to whether you should receive the immunization, please talk with your health care clinician.

Exemptions may be granted to the requirement in two instances: a medical exemption for a contraindication noted above, and a religious exemption. A medical exemption requires completion of the Medical Exemption Form with a notation of the reason for the exemption and a medical clinician signature. To request a religious exemption, a notarized form must be completed and submitted. Exemption forms can be found on the Student Health Service website (www.uwyo.edu/shser/), and the original form must be submitted. If an outbreak of one of these illnesses occurs on campus, students granted an exemption may be excluded from campus for the duration of the outbreak.

For students unable to verify MMR vaccinations, the vaccine is available at the Student Health Service for a nominal charge. It will be administered prior to registration for any eligible student, without an appointment, during office hours. Do not wait until registration to comply with the MMR immunization requirement, as this will delay the process.

In addition to the MMR requirement, international students are required to undergo tuberculosis screening prior to registration. Based on screening, a tuberculosis (Mantoux) skin test or (IGRA) blood test may be performed, and, if positive, a chest x-ray obtained with consultation with a Student Health Service physician. The student is responsible for the costs incurred for these tests.

Campus Safety

The University of Wyoming Police Department (UWPD) provides comprehensive law enforcement and security services to all components of the University including the academic campus, and other properties owned or controlled by the University. The University Police Officers are commissioned under Wyoming State Statute and have the full range of police authorities granted any peace officer including power to arrest, on property owned by or under the control of the University of Wyoming, including adjacent public streets and sidewalks. University Security Officers work closely with our police officers in constantly patrolling University properties and assisting employees and visitors in accessing University facilities. The UWPD operates 24 hours a day, 365 days a year, and is located at 1426 East Flint, Laramie, Wyoming 82071.

Campus safety is the responsibility of all members of the university community. Faculty/staff, students, and guests are encouraged to report crimes and other concerning behavior or observations promptly. The Dean of Students Office, Student Conduct, The STOP Violence Program, and the Office of Diversity and Employment Practices are available to provide further information.

A full description of campus safety, crime statistics, and educational programs designed to increase safety on campus is available in the 2014 Annual Security and Fire Safety Report of the University of Wyoming. To access the report, go to www.uwyo.edu/uwpd/_files/2015uwsecurityreport.pdf.

Degree Programs

College of Agriculture, Life Science and Natural Resources

151 Agriculture Building

Barbara Rasco, Dean

Phone: (307)766-4135 Fax: (307)766-4030

Web site: www.uwyo.edu/uwag

The College of Agriculture and Natural Resources offers a wide variety of course work in agriculture, natural resources, molecular biology, and family and consumer sciences. The curriculum provides a sound background in basic sciences and the choice of a number of fields in which to specialize. Students are trained in principles which apply throughout the world, with special emphasis on agriculture and natural resources found in the Rocky Mountain region.

Laboratory work and other experiential learning opportunities are stressed in all programs. Students receive excellent training from case studies and practical experience provided at research and extension centers. Other facilities include modern laboratories and classrooms, an abattoir, meat processing rooms, livestock and crop farms and greenhouses.

In addition to the academic departments, the college includes the Agricultural Experiment Station and the UW Extension. Materials and techniques resulting from this effective triple combination benefit students in the never-ending search for problem-solving information. The close relationship between teachers, researchers, and extension educators creates a learning atmosphere that encourages the development of the finest students.

Programs of Study

Undergraduate Degrees

Bachelor of Science

Agricultural business
Agricultural communications
Animal and veterinary science
Microbiology
Molecular biology

Plant Production and Protection
Rangeland ecology and watershed management

Bachelor of Science in Family and Consumer Sciences

Graduate Degrees

Master of Arts

Molecular biology

Master of Science

Agricultural and applied economics
Agricultural economics/water resources
Animal and veterinary sciences
Entomology
Entomology/water resources
Family and consumer sciences
Food science and human nutrition
Molecular biology
Plant sciences
Rangeland ecology and watershed management
Rangeland ecology and watershed management/water resources
Reproductive biology
Soil science
Soil science/water resources

Doctor of Philosophy

Animal and veterinary science

Biomedical Sciences
Entomology
Molecular and cellular life sciences
Molecular biology
Plant sciences
Rangeland ecology and watershed management
Reproductive biology
Soil science

The following certificates and/or degrees in the College of Agriculture and Natural Resources are available through Distance Education:

Certificate: Early Childhood Program Director

Online bachelor's degrees: Family and Consumer Sciences (Professional Child Development Option)

For more information, contact the College of Agriculture and Natural Resources Office of Academic and Student Programs. Phone: (307)-766-4135

The College of Agriculture and Natural Resources also offers a graduate certificate in reclamation and restoration ecology. For more information, contact the Department of Ecosystem Science and Management.

Basic Education Core

All undergraduates in the College of Agriculture and Natural Resources curriculums are required to follow the basic education core as noted below.

Core Components (USP 2015).....Hrs.

First-Year Seminar (FYS).....	3
Quantitative Reasoning (Q)	3
Communication 1 (COM1).....	3
Communication 2 (COM2).....	3
Communication 3 (COM3).....	3
Human Culture (H)	6
Physical & Natural World (PN).....	6
U.S. and Wyoming Constitutions (V).....	3
Subtotal (min. core requirements)	30
Hours for major, support areas and electives as determined by division...	90-98
Total Hours	120-128

Core Components (USP 2003)

Core Components (USP 2003) Hrs.

Intellectual Community (I)	1-3
Writing 1 (WA)	3
Oral Communication (O).....	3
Quantitative Reasoning 1 (QA)*.....	3
Quantitative Reasoning 2 (QB).....	3
Science (S, SB, SP, SE).....	4-8
Cultural Context (C, CH, CS, CA).....	9

U.S. and Wyoming Constitutions (V).....3

Physical Activity and Health (P).....1

Subtotal (min. core requirements) 30-36 Hours for major, support areas and electives as determined by division....79-91

Total Hours 120-128

*Core Components are mutually exclusive of each other; hence, two core components may not be fulfilled by the same course. Except for the QA, core courses may have topics from the embeddable components list included in their curriculum, where appropriate.

Courses taken for S/U

A maximum of 20 elective hours with a grade of S (satisfactory) may be included as part of the total credit requirements for graduation; but no S/U hours may be used to satisfy university, major requirements or required electives, unless the course is offered for S/U grading only.

Minors in Agriculture and Natural Resources

Minors provide a formalized recognition of concentrated study in a specific subject area. A minor offers recognition for academic achievement outside of the students' major course curriculum and gives students a focus of work in the chosen minor area. A minors program can enable students to enhance and expand career opportunities. A minor will also improve the possibility of admission to graduate programs in any chosen major, minor, or related field of study.

Minors Available in the College of Agriculture and Natural Resources Include:

Agricultural business

Animal and veterinary science

Apparel design

Agroecology

Agronomy

Equine

Farm and ranch management

Forest resources

General agricultural economics

Horticulture

Human development and family sciences

Human nutrition

Insect biology

Interior design

International agricultural economics

Molecular biology

Natural resource economics
 Plant Protection
 Rangeland ecology and watershed management
 Reclamation and restoration ecology
 Soil science

Agricultural Communications Major

A wide variety of courses in agriculture, communications, and journalism provides students with basic preparation for positions as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio and television stations, and commercial businesses. Communication skills are also distinct assets in agricultural sales, research, service and teaching. Students enrolled in agricultural courses acquire up-to-date and knowledgeable backgrounds of the subject matter. Courses in communication and journalism develop proficiencies demanded by employers of communication professionals.

Minimum Requirements for Agricultural Communications Majors (B.S.)

Hrs.

University Studies Program requirements..... 30

Communications/journalism core..... 24

COJO 1000, 1040, 2010, 2100 and minimum of 12 hours of communication/journalism elective. (Minimum grade of C required)

Agriculture core requirements..... 42

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 24 hours must be upper division (Ag 3000-4000) elective courses and include AGRI 4975.

Supporting course requirement4

STAT 2050 or 2070

Additional hours for major and electives 20

Total Hrs: 120

Students wishing to pursue an agricultural communications degree are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work. Agricultural communications majors may also complete an internship in their field. A variety of opportunities are available and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Bachelor of Applied Science

160 Agriculture Building

Awarded by the College of Agriculture and Natural Resources

Phone: (307)766-4034 Fax: (307)766-4030; Web site: www.uwyo.edu/basa/

Organizations need leaders at all levels who can effectively understand the environment and society in which they operate; analyze situations and solve problems; supervise and manage, interact and communicate appropriately within and outside the organization; anticipate changes; and plan for the future. The Bachelor of Applied Science degree (B.A.S.) is designed for individuals with a completed Associate of Applied Science, Associate of Science, Associate of Business or an Associate of Arts degree at a Wyoming Community College (or an equivalent degree at another accredited institution) and who need or desire the additional breadth in skills, knowledge and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

The fundamental philosophy of the B.A.S. degree is that the student must complete the general education (University Studies Program - USP) requirements expected of all UW bachelor's degrees and must engage in upperdivision coursework sufficient to provide focus and depth of learning. Following this philosophy, the B.A.S. has four basic components. These components are university studies, career specialty, professional concentration, and electives. The fundamental elements of the baccalaureate degree are provided by the general education core (USP) and the upper division professional concentration. At the end of the program, students are expected to meet the following Student Learning Outcomes:

1. to develop proficiency in accessing, evaluating and utilizing information, ideas, and data;
2. to develop proficiency in communicating information and ideas effectively and responsibly;
3. to gain an appreciation for leadership development as a tool for individual, organization and community problem solving;
4. to demonstrate an understanding of organizational design, behavior, ethical practices, and effective managerial and supervisory practices;
5. to gain an understanding of social, cultural, economic and environmental contexts essential for effective leadership and the management of change.

The University Studies Program (USP 2015) consists of a minimum of 27 credit hours as adopted by the UW faculty, and the Articulation Agreement between UW and the Wyoming Community Colleges. Students with an Associate of Applied Science degree from a Wyoming community college will normally matriculate with 15-20 hours of credit that count toward this component. The remainder may be required as part of a UW student's coursework, including the Professional Concentration or Electives coursework.

The Career Specialty Component is fulfilled with the Associate of Applied Science, the Associate of Science, or Associate of Arts degrees. This component will consist of a minimum of 40 credit hours in the major.

The Professional Concentration Component is the advanced component of the program and the courses are selected by the student and the advisor. All students are required to take a range of courses from the prescribed set of areas of concentration within this component in order to provide them with the breadth and depth of learning necessary for a baccalaureate degree. This component will consist of 36-40 upper division or articulated equivalent credit hours. Note: Within the Professional Concentration, students have a choice between two Organizational Leadership areas. Option A focuses on Community Leadership; Option B focuses on Business Leadership.

The Elective Component will consist of the number of credit hours needed (after completing the other three components) to complete the degree components. A minimum of 120 hours is required for the B.A.S.

All University of Wyoming Students must earn a total of 42 upper division hours (at least 30 hours taken from UW), to earn their degree. Students in the B.A.S. program must earn a "C" in all courses on the B.A.S. checklist. Failure to do so will require repeating the course. Per university regulations, students may only attempt a course three times; an "F" or "W" count as attempts.

Application Process

All students must apply to the Bachelor of Applied Science program, including those who would like to change their major to the B.A.S. in Organizational Leadership. Students cannot just fill out a change of major form and have Admissions change their status. These are the steps for application:

1. Apply to the University of Wyoming through Admissions, declaring the Bachelor of Applied Science in Organizational Leadership.
2. Have official transcripts from all institutions attended sent to Admissions.
3. Email BAS@uwyo.edu when you have received your acceptance to UW. Include your W# in the message. We can then track your files to evaluate them for the BAS program.
4. Students will receive a letter telling the application decision. If a student is denied admission to the BAS, an explanation for the denial will be provided. If accepted, the student will be given information for how to work with the program advisor, Rosalind Grenfell (rgrenfel@uwyo.edu), to enroll in classes.

Major

Agricultural Business, Agribusiness Management Option, B.S.

Prepare for careers across agribusiness and business sectors. Agricultural economics is supplemented with business and agricultural science courses to prepare you for a wide range of careers in the agricultural supply chain.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW1

- First-Year Seminar Credits: 3 (FYS)
- Science Credits: 6 ³ (PN)
- Human Culture Credits: 6 ⁴ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Supporting Agriculture Credits: 9 (AG College hours other than Agricultural Economics)
- Statistics Credits: 4
- Computers Credits: 3 ⁶
- Electives Credits: 25

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing: 9 Hours

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA
USP 2015 Code U5C1

- Communication II (COM2)

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

OR

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

Quantitative (Q): 7 Hours

(Required for Major)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

Agricultural Economics: 24 Hours

⁵24 credit hours in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

OR

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or equivalent.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

OR

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

- 3 hours of AGECElectives

Supporting Economics: 6 Hours

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Business: 15 Hours

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

- 9 hours of 3000-4000 level business courses

Total Hours: 120

² Recommend or equivalent COM1 course.

³ Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

⁴ H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended.

⁶ COSC 1200 recommended, or IMGT 2400.

Agricultural Business, B.S.

The Department of Agricultural and Applied Economics offers three options within the agricultural business bachelor of science degree program. They are agribusiness management, farm and ranch management, and livestock business management. All three options focus on the development of critical thinking, research, and communication skills for students interested in

1. agricultural operations,
2. small rural businesses
3. community economics,
4. financial institutions,
5. agricultural and natural resources development, and
6. other pursuits where applied economic tools will be useful.

The agricultural business curriculum is designed to enable our students to:

1. communicate effectively economic, agricultural, business decision-making and natural resource concepts,
2. fit into a business, agency, or academic environment and use economic concepts to quantify and analyze relevant issues, and
3. be familiar with issues related to agriculture, natural resources, and rural communities.

Options

A brief description of minimum course requirements for each of the four options in agricultural business is given below. In addition, professional advisers will work with students to tailor a curriculum to individual interests and goals.

- Agricultural Business, Agribusiness Management Option, B.S.
- Agricultural Business, Farm and Ranch Management Option, B.S.
- Agricultural Business, Livestock Business Management Option, B.S.

Environment and Natural Resources

Students interested in natural resource or environmental issues or careers may complete any of the four options within agricultural business offered by the department with an environment and natural resource emphasis. Inquiries about environment and natural resource concentrations in agricultural business should be directed to the Department of Agricultural and Applied Economics.

Agricultural Business, Farm and Ranch Management Option, B.S.

Combine courses in farm and ranch management, finance and marketing with crop, range, veterinary and animal sciences to prepare for a career managing farms, ranches, or feedlots.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

- First-Year Seminar Credits: 3 (FYS)
- Human Culture Credits: 6 ⁴ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Statistics Credits: 4
- Computers Credits: 3 ⁶
- Electives Credits: 29

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing: 9 Hours

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA
USP 2015 Code U5C1

- Communication II (COM2)

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

OR

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

Quantitative (Q): 7 Hours

(Required for Major)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

Science (PN):

³Credits earned in USP approved science courses offered within the College of Agriculture and Natural Resources shall also serve as Supporting Agriculture credits.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- One additional PN course Credits: 3

Agricultural Economics: 28 Hours

⁵24 credits in Ag Econ beyond those earned to satisfy University Studies requirements. 18 of these 24 credit hours must be at the 3000-4000 level.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)
USP 2003-2014 Code U3WB
Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)
Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

- 12 hours AGEC electives

Supporting Agriculture: 12 Hours

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- 8 AG College hours other than Agricultural Economics

Supporting Economics: 6 Hours

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Business: 3 Hours

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the

recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

Total Hours: 120

² Recommend or equivalent COM1 course.

⁴ H requirement cannot be fulfilled with AGECE or ECON courses; USP-approved H language courses are recommended.

⁶ COSC 1200 recommended, or IMGT 2400.

Agricultural Business, Livestock Business Management Option, B.S.

Build skills to work in any sector of the livestock and meat industry, from input suppliers to meat processing, by combining courses in farm and ranch management, finance and marketing, with animal, range and food science, biology, and data analysis.

Minimum Course Requirements

¹A minimum of 42 credits must be at the 3000 and 4000 level for graduation. At least 30 of the 42 credits must be earned from UW.

- First-Year Seminar Credits: 3 ² (FYS)
- Human Culture Credits: 6 ³ (H)
- U.S. & Wyoming Constitutions Credits: 3 (V)
- Electives Credits: 3-4

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Writing - Communication: 9 Hours

²Must earn a "C" or better.

- COM1 ²
- COM2 ²

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGEC 2020, or AGEC 4500, or AGEC 4060, or FIN 2100.

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

OR

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGECEC 1020 and MATH 1400.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGECEC 1020 or ECON 1020 and MATH 1400.

OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or equivalent.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

OR

AGEC4280 - International Food and Farm Cultures

Credits: 3

Study-tour course in western France of lectures, fieldtrips, and other cultural activities are integrated into a curriculum to study sustainable food cultures and farming systems. Students live with host families and learn about current policies, belief systems and cultural practices that guide food production, consumption and marketing in Europe.

USP 2003-2014 Code U3G

Prerequisite: completion of WA/COM1 and I/FYS.

OR

ECON4720 - International Trade

Credits: 3

The gains from specialization and trade are studied, as are explanations of trade patterns among countries, policies affecting trade such as tariffs, quotas, tax breaks, subsidies, cartels and price stabilization plans. Topics on labor migration and multinational corporations are covered.

When Offered (Normally offered fall semester)

Prerequisite: ECON 3020 and Junior class standing.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

Additional Quantitative Skills: 10 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

OR

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

OR

- AGRI 1010 ⁶

AGEC4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 4230

Dual Listed AGEC 5230

When Offered (Normally offered spring semester)

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

OR

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

OR

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

OR

- IMGT2400 - Introduction to Information Management Credits: 3

OR

MATH2355 - Mathematical Applications for Business

Credits: 4

Primarily for students in the College of Business. Includes the mathematics of finance; systems of linear equations and matrices; linear programming; sets, counting, and probability. Students will learn to use Excel spreadsheets to solve business application problems in a computer lab that meets one day per week.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

OR

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

OR

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

Biology of Livestock: 17 Hours

- LIFE 2020

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3

Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3

Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

Additional Biology of Livestock

For Animal Science minor: 19 Hours

⁷Must earn a "C" or better in all courses required in the minor to earn the minor.

ANSC2010 - Domestic Animal Metabolism

Credits: 3

Integrates cellular and whole-animal metabolism through introduction to metabolic regulation. Introduces students to the nomenclature, structures and functions of cellular metabolites and vitamins. Knowledge of chemical structure will be applied to cellular reactions in various tissues of domestic animals. Ruminants and non-ruminants will be contrasted.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

OR

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

OR

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

OR

ANSC4240 - Advanced Swine Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in swine production management schemes. Consists of two hours of lecture and two hours of lab, with at least one-half of labs meeting at Animal Science Livestock Center.

Former Course Number [3330]

Prerequisite: ANSC 3100, ANSC 4120, or ANSC 4540.

For Non-minor: 20 Hours

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC4050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 5050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking

rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

OR

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

Supporting Economics: 3 Hours

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Total: 120 Hours

²Must earn a "C" or better.

⁵AGEC 4840 may not be double-counted towards both Agricultural Economics and Quantitative Skills.

⁶Suggest COSC 1200 for most, or IMGT 2400 (for advanced users).

⁷Must earn a "C" or better in all courses required in the minor to earn the minor.

Agricultural Communications, B.S.

Courses in agriculture, communications, and journalism prepare students for careers as broadcasters, editors or writers for farm and home organizations, state and federal agencies, magazines, newspapers, radio, television, and commercial businesses.

Minimum Requirements

University Studies Program Requirements: 30 Hours

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Communications/Journalism Core: 36 Hours

COMM1000 - Intro to Mass Media

Credits: 3
An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

AND

3 hours COJO/COMM Elective - ANY LEVEL

AND

12 hours COJO Electives - UPPER DIVISION

Agriculture Core Requirements: 36 Hours

At least 18 hours must be lower division (Ag 1000-2000) elective courses, and at least 12 hours must be upper division (Ag 3000-4000) elective courses and include

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences

between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FDSC1410 - Scientific Study of Food

Credits: 3

Scientific Study of Food is an introductory course in the science of food, which includes selection, preparation, to meet physical, psychological, and social needs. This course fulfills the Physical and Natural World USP.

When Offered (Normally offered fall semester)

USP 2003-2014 Code PN

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

OR

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3

Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

OR

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment

OR

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

AND

12 hours of UPPER DIVISION Electives from AECL, AGECL, AGRI, ANSC, ENTO, FCSC, FDSC, MICR, MOLB, PATB, PLNT, REWM, SOIL

AGRI4975 - Agricultural Communications Senior Project

Credits: 1

A baccalaureate degree capstone experience incorporating self assessments of student learning, reflective writings, and an analysis, synthesis and evaluation of the agricultural communications curriculum. Students develop and present a personalized, comprehensive, professional portfolio.

Prerequisite: agricultural communication major with senior standing and WB.

Supporting Course Requirement: 4 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces

statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Additional Hours for Major and Electives: 14 Hours

8 hours of General Electives ANY DIVISION

6 hours of General Electives UPPER DIVISION

Total Hours: 120

Additional Requirements

Agricultural communication majors will also complete an internship in their field. A variety of opportunities are available, and students can work with their advisor to determine an appropriate internship for their area of emphasis.

Students wishing to pursue an area of emphasis in the agricultural communications option are encouraged to also select a minor. The college currently offers a variety of minors, and any of these can help to better prepare students for employment or graduate work.

Animal and Veterinary Science, B.S.

The Depts of Animal Science and Veterinary Sciences jointly offer the B.S. degree in Animal and Veterinary Science. Courses in animal science, food science, and pathobiology form eight degree options tailored to the student's interests/career goals.

Options

- Animal and Veterinary Science, Production Option, B.S.
- Animal and Veterinary Science, Range Livestock Option, B.S.
- Animal and Veterinary Science, Business Option, B.S.
- Animal and Veterinary Science, Communication Option, B.S.
- Animal and Veterinary Science, Animal Biology Option, B.S.
- Animal and Veterinary Science, Meat Science and Food Technology Option, B.S.
- Animal and Veterinary Science, Pre-Veterinary Medicine Option, B.S.
- Animal and Veterinary Science, Equine Science Option, B.S.

Additional Information

Agriculture, in its broadest definition, is the nation's largest industry. Livestock production is Wyoming's largest agricultural enterprise. Animal agriculture and its associated industries offer many opportunities for the interested student. Whether a student is interested in production livestock, allied fields such as meat science, business or animal health, or wants to apply to a college of veterinary medicine or graduate school, the degree tracks offered will form the

basis for a challenging career in animal agriculture/biology. The various options provide maximum flexibility to meet the changing needs of students and their employers. For students interested in pursuing advanced research, M.S. and Ph.D. degrees are offered.

A grade of C or better must be earned in the following courses when the courses are required in the individual option for completion of the degree: ANSC 3010, ANSC 3100, ANSC 4120, ANSC 4540, ANSC 4630; FDSC 3060, PATB 4110, PATB 4111, LIFE 1010, LIFE 2022.

Students are encouraged to participate in activities related to their degree option. The university has competitive livestock, horse, wool, and meat judging teams that travel to and participate in at least one major exposition a year. Laboratories and field trips, as practical teaching aids in many classes, are scheduled throughout the year. Internships are available to gain practical experience. Student organizations such as the Block and Bridle Club, Food Science Club, Pre-vet Club, Wyoming Collegiate Cattlemens Association, Microbiology Club, Range Club, and the Ranch Horse Team provide additional educational and recreational opportunities.

Design, Merchandising, and Textiles: Apparel Design and Product Development Career Track

The Apparel Design and Product Development career track in Design, Merchandising and Textiles allows students to develop the technical and creative skills necessary for the development of apparel and textile products from concept to finished product.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required.*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 2270

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and

application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B.C. through the 20th century. Dual listed with FCSC 5176.

Cross Listed FCSC 5176

When Offered (offered alternate spring semesters, odd years)

Prerequisite: FCSC 2165

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4185 - Product Development and Technology

Credits: 3

This course introduces students to various technologies used to bring products to market. 3-D body scanning, computer apparel pattern digitizing, grading, marker making and repeats for digitally-printed, knit and woven fabrics will be discussed. Students will complete product technical packages based on product specifications.

Prerequisite: FCSC 3185, FCSC 4171, and FCSC 4172.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

Design, Merchandising, and Textiles: Interior Design Career Track

The Interior Design career track in Design, Merchandising, and Textiles prepares students to creatively, effectively, and sustainably solve design problems for professional practice in residential and commercial interior design.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/finishing of textile materials.

Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC3188 - Interior Design Studio II

Credits: 3

Building upon skills developed in ID Studio 1, students will gain advanced knowledge of lighting, building codes and systems, specifications, materials, and space planning through more complex residential design problems. Design thinking and human centered design are emphasized. Explores design development and communication through CAD based and hand rendering techniques.

Prerequisite: FCSC 2188.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2180 , FCSC 2188 , or concurrent enrollment in 2188

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

FCSC4288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 5288.

Prerequisite: FCSC 3180 or FCSC 4188.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2410 - Fundamentals of Building Performance

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

OR

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior,

design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

Design, Merchandising, and Textiles: Merchandising Career Track

The Merchandising career track in Design, Merchandising and Textiles offers knowledge and application of business principles within the fashion and interior industries; including retailing, sourcing, and marketing for apparel and interior products.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

**Meets FCSC Core Elective in Human Nutrition and Food. Grade C or above required.*

***Meets FCSC Core Elective in Human Development and Family Sciences. Grade C or above required.*

****Grade C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and

innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC4160 - Merchandising Strategies and Technology

Credits: 3

Students will be exposed to advanced merchandising strategies for retail buying and planning. Technologies used for gathering pertinent retail data, such as foot traffic and inventory management software, will be introduced. Course will expand on concepts introduced in prerequisite coursework.

Prerequisite: FCSC 3160.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B.C. through the 20th century. Dual listed with FCSC 5176.

Cross Listed FCSC 5176

When Offered (offered alternate spring semesters, odd years)

Prerequisite: FCSC 2165

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

OR

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior,

design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

All Design, Merchandising, and Textiles majors are required to complete a three-credit-hour internship, international study tour, or study abroad program.

A minor in Entrepreneurship or Professional and Technical Selling through the College of Business is recommended for students in this career track.

Dietetics

The nationally accredited Didactic Program in Nutrition and Dietetics provides the required coursework to pursue an approved post-graduation supervised practice experience (dietetic internship) to become a Registered Dietitian Nutritionist (RDN).

Program Introduction

The UW Didactic Program in Nutrition and Dietetics (DPND) is nationally accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. Entrance into the DPND is made only through an application process. Each prospective DPND student will initially enter the Human Nutrition and Food concentration. It is recommended that students apply to the DPND in the spring semester of their sophomore year. The academic requirements and supervised practice experience must be completed before the student is eligible for the Registration Examination for Dietitians administered by the Commission on Dietetic Registration (CDR), the credentialing agency for the Academy.

University Studies Requirements

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an

opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Before Admission to Program

Students must complete the following courses with a minimum 3.0 grade point average (gpa) prior to DPND application.

**Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3
This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3
Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2
This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3
An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

After Admission to Program

In addition to USP and upper division requirements, students must complete the following courses after admission to the DPND while maintaining an overall grade point average of 3.000. Failure to maintain a grade point average of 3.000 could result in program probation and/or suspension.

**Grade of C or above required*

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

FCSC4210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 5210.

Prerequisite: ZOO 3115, MOLB 3610, and FCSC 4145 or concurrent enrollment.

FCSC4220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 5220.

Prerequisite: MOLB 4100.

FCSC4230 - Therapeutic Nutrition Counseling

Credits: 2

Course is designed to help students develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client.

Dual Listed FCSC 5230

A&S College Core 2015 Dietetics students only.

Prerequisite: FCSC 4220 or concurrent enrollment.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical

theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics

and international management.

Prerequisite: COM1, sophomore class standing.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

HDFS Career Track for Family and Consumer Sciences Teacher Certification

A career track leading to certification/licensure to teach family and consumer sciences (FCS) in secondary schools.

Program Information

This program is made possible through a partnership agreement with UW Family and Consumer Sciences, Colorado State University (CSU) Family and Consumer Sciences program and the CSU Center for Educator Preparation. While meeting the requirements for the Human Development and Family Sciences concentration, students will use electives from other FCS concentrations to prepare them to teach family and consumer sciences in middle or secondary schools. By participating in this partnership, students earn dual bachelor's degrees - one from UW and one from CSU. Students must earn a minimum of 154 credit hours between the two programs (minimum of 120 at UW and a minimum of 34 at CSU) in order to be awarded a degree from each institution. Additional semesters will be necessary to fulfill the requirements of both degrees.

Students must meet all entry requirements at UW and CSU. The CSU licensure program requires students to earn a C or above in all content courses and teacher licensing courses, and a passing score on the appropriate licensing exam. Therefore, a grade of C or above must be earned in all UW courses and an overall 2.750 GPA be maintained for transfer to CSU to fulfill their program requirements. Upon completion of the UW portion, students will then take the remaining courses needed to meet Wyoming and Colorado certification/ licensure requirements at CSU in Ft. Collins, Colorado. In their last semester, if they so choose, Wyoming students may complete their student teaching requirements in a Wyoming FCS school classroom with supervision by a licensed FCS teacher educator. In addition to earning dual degrees, students meet the requirements to apply for certification/licensure in Wyoming and in Colorado. Both licenses are reciprocal in many other states.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

Required Courses

*** *Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

OR

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

OR

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

OR

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to

develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

OR

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

LIFE1002 - Discovering Science

Credits: 3

Integrates Biology, Chemistry, Physics, and Earth Science and is intended for non-science majors. Fundamental concepts from each discipline are discussed through lectures and in-class activities, and students learn how to understand science and its importance in larger societal issues. There is no laboratory component of this course. Meets the S requirement in USP 2003 and the PN requirement in USP 2015.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Former Course Number [BIOL 1002]

OR

LIFE1003 - Current Issues in Biology

Credits: 4

Emphasizes central themes of biology - cell biology, genetics, evolution, ecology - and scientific methodology by focusing on current issues in biology. Fundamental concepts are addressed through classroom and laboratory activities and discussions. This course is intended for non-science majors. Students cannot receive duplicate credit for LIFE 1010 or LIFE 1020.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1003]

OR

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences.

Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Additional Concurrent and CSU Coursework

After completion of UW coursework, three additional semesters are required for completion of this teacher certification option. The first semester will require concurrent enrollment at UW and CSU. Required UW course FCSC 4117 (online - 3 credit hours) will be taken while enrolled at CSU to preserve WEU eligibility. Four additional credit hours must be transferred to UW from the second and third semesters' coursework at CSU to meet UW's 120 credit hour graduation requirement.

First Semester

Concurrent Fall Semester UW/CSU

- EDUC 331 - Educational Technology Credits: 2
- EDUC 340 - Literacy and the Learner - Phase I - RL Credits: 3 (Not included in WUE tuition)
- EDUC 350 - Instruction I: Individualization/Mgt - Phase II - TL Credits: 3
- EDUC 386 - Practicum - Instruction I - Phase II - TL 1
- EDCT 451 - Methods, FCS Education Credits: 4

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Second Semester

Spring Semester at CSU

- EDUC 450 - Instruction II: Standards/ Assessment - Phase III - T Credits: 4
- EDUC 486 - Practicum - Instruction II - Phase III - TL 1
- FACS 479 - Colloquium - FCS Credits: 2

Complete one of the following and transfer it to UW:

- A course from Art/Humanities (Choose one: E140 - The Study of Literature, PHIL100 - The Appreciation of Philosophy, or TH141 - Introduction to Theater) Credits: 3
OR
- HES 145 Health and Wellness Credits: 3

Final Semester

Fall Semester at CSU

- EDCT 485 - Student Teaching - Phase IV - TL Credits: 11
- ECDT 492 Seminar - Professional Relations - Phase IV - TL Credits: 1 (Transfer to UW)

Total UW Degree Minimum: 120 Hours

Total CSU Degree Minimum: 34 Hours

Total for Both Degrees: 154 Hours

Additional Requirements

Upon declaring this career track, students must satisfactorily complete a mandatory security screen (background check). Advising will provide careful attention to the uniqueness of individual student situations and academic choices.

Human Development and Family Sciences

Prepares students to work in a variety of critical fields that serve individuals and families across the lifespan, including: children, youth, senior and family support programs, community and governmental agencies, and higher education.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

** Grade of C or above required.*

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural

communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4132 - Internship in Human Development and Family Sciences

Credits: 4-6

Max Credit 6

Students will acquire skills and gain familiarity in direct services, policy development, or program planning in a human services agency/organization. Opportunities to apply theories and knowledge gained in classroom settings to professional practice will be provided. Offered spring or summer semesters.

When Offered (Offered spring and summer semesters only)

Prerequisite: FCSC 4125

OR

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working

with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

OR

FCSC4131 - Administration Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

OR

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

FCSC Core Elective in Human Nutrition and Food

Complete one of the following with a grade of C or above:

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Additional Requirements

Upon declaring this major, students must satisfactorily complete a mandatory security screen (background check).

Human Nutrition and Food

The Human Nutrition and Food concentration prepares students for careers in human nutrition and the food industry, and serves as a degree plan for pre-health (including the Didactic Program in Nutrition and Dietetics) or graduate school.

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

** Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language.

May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

Human Nutrition and Food Elective

Complete one of the following with a grade of C or above:

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC Core Elective in Design, Merchandising and Textiles

Complete one of the following with a grade of C or above:

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC Core Elective in Human Development and Family Sciences

Complete one of the following with a grade of C or above:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicultural development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Microbiology, B.S.

This interdepartmental program is comprised of core and elective courses in the basic sciences, general microbiology, genomics/proteomics, medical, and environmental microbiology. Students may also participate in faculty-mentored research projects.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Information

The curriculum is designed to prepare graduates for the future by combining a firm foundation in the basic sciences with a central core of microbiology classes, followed by the opportunity for students to specialize in areas of microbiology suiting their individual interests via the selection of electives.

Prior to graduation, microbiology majors must complete the basic requirements and all microbiology core course requirements as listed below. Finally, to assure breadth of exposure in microbiology, students must complete 6 semester hours of microbiology electives. The microbiology curriculum is organized to provide students with the maximum flexibility in meeting their university studies program requirements.

Students pursuing the B.S. degree in microbiology who wish to pursue a dual major in both microbiology and molecular biology must satisfy the basic science/math and core/elective requirements in microbiology as well as those specified for the B.S. degree in molecular biology PLUS an additional 9 credits of electives in microbiology and/or molecular biology at the 4000/5000 level.

Basic Course Requirements for Microbiology Majors

- Total credit hours: 121 hours
- 3000-level or above credits (university requirements): 42 hours
- Completion of University Studies 2015 Program Requirements: 30-36 hours

Basic Sciences and Quantitative Reasoning

MATH1450 - Algebra and Trigonometry

Credits: 5
Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and

their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

OR

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AND

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: PHYS 1110.

Microbiology Core Course Requirements

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

PATB2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed MICR 2220

When Offered (Offered spring semester)

Prerequisite: MICR 2210

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

PATB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed MOLB 4400

Dual Listed PATB 5400

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

OR

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710
Dual Listed PATB 5710
When Offered (Normally offered fall semester)
Prerequisite: MOLB 2240

MICR4321 - Microbiology Capstone

Credits: 4

Using a problem-based student learning model, students conceptualize, propose, perform and present a microbiology research study to address a real community problem. Students maintain a lab notebook, write an NSF-style research proposal, formulate hypotheses, engage in hands-on laboratory hypothesis testing and design and present a scientific poster.

USP 2015 Code U5C3

Prerequisite: MICR majors with junior or senior standing.

Take 2 credits total of any combination of the following 1-credit seminar courses:

PATB4150 - Seminar

Credits: 1

Max Credit (Max. 4)

Preparation and oral presentation of papers on veterinary sciences topics.

Prerequisite: 8 hours of biology and consent of instructor.

OR

MOLB4050 - Student Seminar: Topics in ____

Credits: 1

Max Credit 4

Exposes students to current topics in molecular biosciences and examines primary journal literature with oral presentations and class discussions.

Prerequisite: MOLB 3000 or MOLB 3610 or CHEM 4400

OR

MOLB4051 - Departmental Seminar

Credits: 1

Max Credit 15

Attend a series of weekly seminars on a diverse set of research topics presented by visiting faculty or research scientists and will participate in a discussion following the seminar.

Dual Listed MOLB 5051.
Former Course Number [4050]

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.
OR

MOLB4052 - Summer Seminar

Credits: 1
Max Credit 5

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material presented is taken from the research program of the speaker.

Dual Listed MOLB 5052.
Former Course Number [4050]

- MICR Elective Credits: 6

Microbiology Electives

In addition to completing the required microbiology courses listed above, students must complete 6 hours of microbiology electives from any of the following lists.

Medical Microbiology

PATB3400 - Host Defenses Against Infect.

Credits: 3
Max Credit 3

Topics will include the history of immunology in the context of infectious diseases, different infectious pathogens and their interactions with higher order life forms, and introduction to the immune system relevant to protection against invasive microorganisms.

Prerequisite: MOLB/MICR 2021 and PATB/MICR 2220

PATB4001 - Epidemiology (Diseases in Population)

Credits: 3
Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed MICR 4001
Dual Listed PATB 5001
Prerequisite: STAT 2050 or STAT 2070

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

PATB4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed MICR 4130

Dual Listed PATB 5130

When Offered (Normally offered spring semester)

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

PATB4140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action and their effects on various organisms including man and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 5140

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: 9 hours of biological science (e.g., physiology), 4 hours chemistry, 3 hours biochemistry.

PATB4170 - Diseases of Wildlife

Credits: 3

Introduction to wildlife diseases of the Rocky Mountain region and North America. Emphasis on infectious, parasitic, traumatic, toxic, and other disease agents with coverage of mechanisms of disease, epidemiology, and disease impacts on wildlife populations and species. Significant discussion of zoonotic diseases and diseases at the wildlife/domestic animal interface.

Dual Listed PATB 5170

When Offered (Offered spring semester of even numbered years)

A&S College Core 2015 12 hours of biological or zoological sciences.

Former Course Number [4120]

MICR4200 - Diagnostic Bacteriology

Credits: 1

Practical training with emphasis on diagnostic procedures used in a clinical microbiology laboratory. Students identify bacterial pathogens of animals and humans. Taught in a clinical setting utilizing selected clinical material. Techniques employed in the processing and identification of clinically significant bacteria are used and discussed. Safe laboratory practices for working with biohazards are presented.

Cross Listed PATB 4200.

Prerequisite: junior standing and a MICR course which included a laboratory.

PATB4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/ discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed MICR 4220

Dual Listed PATB 5220

Prerequisite: PATB 2220/MICR 2220 and statistics (or epidemiology).

PATB4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 4240

Dual Listed PATB 5240

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070

MICR4360 - Medical Entomology and Parasitology

Credits: 4

Emphasis on medically important arthropods, protozoa, and worms; clinical effects of infection epidemiology avoidance/control and identification/diagnosis.

Prerequisite: 8 hours of biological science

PATB4500 - Veterinary Parasitology

Credits: 4

Biology, importance, diagnosis and control of helminth and protozoan parasites of wild and domestic animals. Arthropod vectors and/or intermediate hosts of helminth & protozoan parasites are included. Diagnostic procedures and identification familiarity with agents are emphasized in lab.

When Offered (Offered fall semester of even-numbered years)

Prerequisite: 8 hours of biological science.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

Molecular and Cell Biology

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021, and MOLB 3610 or MOLB 3000

Environmental and Applied Microbiology

MICR3021 - Eukaryotic Microbes

Credits: 3

Max Credit 3

This course will address the biology and ecology of lower eukaryotic life-forms. Topics include: marine phyto- and zooplankton, terrestrial and fresh water aquatic micro-algae, protists, the evolution of multicellularity, and a phylogenetic survey of microscopic multi-cellular life.

Cross Listed PATB 3021

Prerequisite: MOLB/MICR-2021, General Microbiology

MICR4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540 and SOIL 4540.

Dual Listed MOLB 5540 and SOIL 5540 and ECOL 5540.

Prerequisite: MOLB 2021 or MICR 2021.

OR

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MICR4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed SOIL 4140.

Dual Listed MICR 5140.

Prerequisite: SOIL 2010.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

FDSC4090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Cross Listed MICR 4090.

Dual Listed FDSC 5090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021 or MICR 2021.

FDSC4100 - Laboratory Techniques in Food Microbiology

Credits: 1

Lab techniques used in food microbiology.

Cross Listed MICR 4100.

Dual Listed FDSC 5100.

When Offered (Normally offered spring semester)

Former Course Number [610]

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

Molecular Biology, B.S.

The Molecular Biology B.S. degree program builds on basic sciences with courses focusing on molecular, cellular, genetic and microbiological principles. Research opportunities prepare students for postgraduate studies in research and health sciences.

Molecular Biology, B.S. Additional Information

The Molecular Biology B.S. degree program includes molecular biology, biochemistry, microbiology, genetics, and cell biology courses. Research opportunities also develop skillsets for graduate school, biotechnology employment and professional health programs.

To obtain a B.S. degree in molecular biology, a student, with the aid of a molecular biology adviser, designs a program of study that includes courses from the Molecular Biology General Science Core and Elective Requirements listed below. Additional course lists are provided as an aid in developing an individualized program of study in key Emphasis Areas such as Cell Biology and Molecular Genetics, Microbiology, and Preprofessional Health Sciences. Courses listed under the Emphasis Areas are optional, and the student and adviser will design a unique curriculum suited to the student's personal interests. Flexibility in course selection also permits students to fulfill various requirements for postgraduate and professional schools. In order to fulfill course prerequisites in a timely manner, a recommended sequence of courses is available from the student's molecular biology adviser. Completion of a B.S. in Molecular Biology provides a student with the tools needed to open the door to exciting futures in science, medicine and agriculture.

We expect that our graduating students will have a strong foundation in basic science, biochemistry and molecular biology that will enable them to:

1. understand the basis of multiple molecular mechanisms central to gene expression;
2. utilize molecular and microbiological laboratory techniques in future jobs or programs and trouble-shoot experimental challenges;
3. apply for graduate programs in molecular biology, microbiology or other life sciences;
4. begin employment as a laboratory research assistant in academia or the medical or agricultural biotechnology industries;
5. utilize a background in biochemistry and cell and molecular biology to promote success in the basic science curriculum in medical or other health professional schools;
6. integrate a background in biochemistry and cell and molecular biology into career development in professions such as law, genetic counseling, or public health policy;
7. employ evidence-based scientific reasoning skills in evaluating the use of molecular genetics in the prevention, diagnosis and treatment of medical disorders.

Requirements for Molecular Biology Majors

General Requirements

- Total credits (college requirement): 120
- 3000-level or above credits (university requirement): 42
- Fulfillment of University Studies Program (consult adviser)
- Fulfillment of molecular biology general science, core and elective requirements listed below

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

MOLB 1101

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

MOLB 4053

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

MOLB Requirements

General Science Requirement

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and

organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot

receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Total: 36 Credits

*The alternative math courses MATH 1450 or MATH 1400 and MATH 1405 may be substituted with adviser approval.

MOLB Core Requirement

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3320 - Molecular Biological Methods

Credits: 4

Integrated discussion and hands-on experience with modern bioinformatic and wet lab-based molecular, genetic and biochemical methods. Completion of the course should provide students with enhanced theoretical understanding and practical knowledge of many crucial modern computational and molecular biological techniques.

When Offered Spring

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4053 - Communications in Molecular Biology

Credits: 3

Students will explore current topics in molecular biosciences and their applications in biotechnology and medicine. The course will develop student's abilities to read and discuss scientific literatures and present the topics in different oral/written for public, research proposals and research-based business plans.

When Offered Spring

USP 2015 Code U5C3

Prerequisite: MOLB 4600 and LIFE 3050 or MOLB 3000

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

OR

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4051 - Departmental Seminar

Credits: 1

Max Credit 15

Attend a series of weekly seminars on a diverse set of research topics presented by visiting faculty or research scientists and will participate in a discussion following the seminar.

Dual Listed MOLB 5051.

Former Course Number [4050]

Prerequisite: MOLB 3000 or MOLB 3610 or MOLB 4600.

OR

MOLB4052 - Summer Seminar

Credits: 1

Max Credit 5

Consists of one week of lectures, presented by a renowned scientist from either academics or industry. The material presented is taken from the research program of the speaker.

Dual Listed MOLB 5052.

Former Course Number [4050]

Total: 28-29 Credits

MOLB Elective Requirement (6 credits)

Courses from the following list that were not used to fulfill the MOLB Core Requirement may be applied to the MOLB Elective Requirement; a maximum of 3 credits of MOLB 4010 may be counted toward the MOLB Elective Requirement.

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3
Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3
Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021 , and MOLB 3610 or MOLB 3000

Total: 6 Credits

Molecular Biology Emphasis Areas

After discussing individual interests with a molecular biology adviser, a student should enroll in additional courses that will enhance preparation for a chosen career objective. Listed below are recommended courses that are not required but will further develop a student's skills and understanding in three Emphasis Areas.

Cell Biology and Molecular Genetics

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4450 - Cell and Developmental Genetics

Credits: 3

Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021, and MOLB 3610 or MOLB 3000

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g., sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

Microbiology

MICR2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed PATB 2220.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed PATB 4130.

Dual Listed MICR 5130.

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

MICR4220 - Molecular Mechanisms of Bacterial Pathogenesis

Credits: 3

Intended as a survey of the molecular mechanisms that have evolved in pathogenic bacterial species which result in disease. The broad-scoped objective is to assist students in gaining an understanding of principles and concepts as they apply to common themes of bacterial virulence acting on higher order host organisms. In-class review/discussion of scholarly manuscripts, historical to present day, is paramount in allowing students to gain a better appreciation and comprehension of biological principles and concepts through knowledge of experimental approaches.

Cross Listed PATB 4220

Dual Listed MICR 5220.

Prerequisite: PATB 2220 or MICR 2220, and statistics (or epidemiology).

MICR4360 - Medical Entomology and Parasitology

Credits: 4

Emphasis on medically important arthropods, protozoa, and worms; clinical effects of infection epidemiology avoidance/control and identification/diagnosis.

Prerequisite: 8 hours of biological science

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4440 - Microbial Genetics

Credits: 3

Max Credit 3

Discusses molecular approaches to understand the fundamental basis of genetics and gene function. Additionally, the course builds on a molecular biology foundation of how cellular processes work and are experimentally investigated with a focus on bacteria.

Cross Listed MOLB 5440

When Offered (Offered spring semester)

Prerequisite: MOLB/MICR 2021 or MOLB/MICR 2240, and LIFE 3050, and MOLB 3610 or CHEM 4400 or MOLB 3000

MOLB4460 - Microbial Physiology and Metabolism

Credits: 3

Studies life processes of microbes as mediated by their structures acting in consort, in response to changing environments.

Cross Listed MICR 4460.

Dual Listed MOLB 5460.

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021 or MOLB 2240, and minimum grade of C in MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

MOLB4680 - Signaling in Host-microbe Interaction

Credits: 3

Interactions of bacterial and fungal pathogens with animal and plant hosts will be discussed, including current research exploring molecular signaling mechanisms affecting innate immune receptors, the communication between organelles in host cells, and the tight communication between hosts and pathogens in relationships such as symbiosis.

Dual Listed MOLB 5680

When Offered Spring

Prerequisite: MOLB 2021 or MICR 2021, and MOLB 3610 or MOLB 3000

MICR4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed PATB 4710.

Prerequisite: MICR 2220 or PATB 2220 or MOLB 2240 or MICR 2240.

Preprofessional Health Sciences

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3
Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB4100 - Clinical Biochemistry

Credits: 4
Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring
Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4400 - Immunology

Credits: 4
Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4450 - Cell and Developmental Genetics

Credits: 3
Integrates the genetic control of cell regulation and animal development in both vertebrate and invertebrate model systems such as *Drosophila*, *C. elegans* and the mouse. Includes studies of eukaryotic signal transduction, gene control, and current transgenic technologies.

Dual Listed MOLB 5450

When Offered Spring

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and LIFE 3050

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

MICR2220 - Pathogenic Microbiology

Credits: 3

This course serves as an introduction to bacterial pathogenesis and disease using taxonomy and categorical approaches. Material presented in the course includes maintenance, transmission, molecular mechanisms of virulence factors, pathogen-host interactions, disease process, and treatment and prevention of disease of pathogenic bacteria and fungus.

Cross Listed PATB 2220.

Prerequisite: MOLB 2021 or MICR 2021.

MICR4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed PATB 4710.

Prerequisite: MICR 2220 or PATB 2220 or MOLB 2240 or MICR 2240.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

PSYC2340 - Abnormal Psychology

Credits: 3

Provides a general overview of abnormal behavior, emphasizing types, etiology and treatment methods.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: A grade of C or better in PSYC 1000.

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

Plant Production and Protection, B.S.

The Plant Production and Protection degree prepares students for careers in agriculture, natural resources, environmental and life sciences, and advanced graduate studies in the plant sciences.

Program Information

The Department of Plant Sciences offers a Bachelor of Science degree in Plant Production and Protection, with four optional concentrations and four minors. Optional concentrations for Plant Production and Protection majors are:

- Agronomy
- Horticulture
- Integrated Pest Management
- Agroecology and Evolution

Minors available for students pursuing other majors at UW are: Agronomy, Agroecology, Horticulture, and Plant Protection. These minors allow students within many bachelors programs to obtain an added emphasis in areas that enjoy strong employment opportunities.

A B.S. degree in Plant Production and Protection prepares students for careers in agriculture, natural resources, environmental and life sciences and for advanced graduate studies in specific subdisciplines within these areas. It is a broad, interdisciplinary, undergraduate curriculum that combines and integrates courses in the crop, horticulture, disease, weeds, soil, and insect sciences and is supported by a science-based curriculum and general education. Flexibility is built into the curriculum to readily accommodate students seeking to pursue an emphasis or obtain a minor in a specific discipline. To that end the breadth of the curriculum is balanced with greater depth in biology, chemistry, crop science, entomology, environmental studies, natural resource management, soil science, plant pathology, weed science, horticulture, turf management, pre-veterinary medicine, rangeland ecology and watershed management, animal science, microbiology, and molecular biology. A liberal number of electives permits design of a program that best meets individual career and educational objectives. The Plant Production and Protection program is well suited for students who possess a strong interest in, and an aptitude for, science, agriculture, the environment, life sciences, or natural resources.

The core curriculum is comprised of freshman- through senior-level courses that illustrate dynamic and complex interactions of plants, soils, and plant pests (diseases, insects, weeds) with the environment. Academic training is enhanced with experiential learning through research apprenticeships, internships, field studies, and a special Plant Sciences Capstone course. Special emphasis is given to development of critical thinking and communication skills, problem solving, and application of science. It is an interdisciplinary and highly practical degree program designed to prepare students for "real world" situations.

Plant Production and Protection B.S. degree recipients are prepared for careers with private and public institutions and agencies in such areas as: agricultural consulting, production or sales, research, product development, education, extension education, international programs, and scientific and technological support. These careers include but are not limited to: soil scientist, conservationist, entomologist, consultant, plant scientist, integrated pest management specialist, ecologist, research associate or technician, agronomist, biotechnician, and agroecologist. Degree recipients are also prepared for graduate education in biological and environmental sciences.

The combined Plant Sciences, B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. Please see additional information under the Plant Sciences Graduate Study section or online at <http://www.uwyo.edu/plantsciences/>.

Course Requirements

Core Requirements (required of ALL degree recipients): 50 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Choose one from ANSC 1010, ENTO 1000, or ENTO 1001 (ENTO 1001 preferred if available):

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

Choose one from STAT 2050 or LIFE 2100:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Choose one from PLNT 3000, SOIL 4140, or SOIL 4160:

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

PLNT4990 - Plant Sciences Capstone

Credits: 3

Capstone course for final integration of courses required for the Plant Production and Protection degree. Provides overall synthesis of plant sciences academic subjects following completion of a prescribed senior experience course, PLNT 4920 or PLNT 4930.

When Offered (Offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code UC3

Practical Experience (must take 6 credit hours from the following): 6 Hours

PLNT4820 - Plant Sciences Seminar

Credits: 1
Max Credit 1

Discussion in production, physiology, breeding and weed science. Undergraduates in PLNT 4820 will attend graduate seminar PLNT 5820 and participate in discussions of the current topics.

Dual Listed PLNT 5820

Prerequisite: Senior standing, PLNT 1000.

PLNT4920 - Research Apprenticeship

Credits: 1-2
Max Credit (Max. 4)

Laboratory and/or field research apprenticeship. Emphasizes individual student-faculty interactions on current topics in plant sciences.

Former Course Number [CROP 4600]

Prerequisite: Junior standing and PLNT 1000, STAT 2050.

PLNT4930 - Internship in Plant Sciences

Credits: 1-3
Max Credit (Max. 6)

Provides students with realistic views of crop science, entomology or soil science through practical, as well as work-related, experiences. Provides positive educational experience to supplement formal academic course work.

Former Course Number [CROP/ENTO/SOIL 4903]

Prerequisite: Sophomore standing or higher; 2.50 GPA

PLNT4960 - Plant Sciences Field Studies

Credits: 2

Various facets of the agroecosystem are covered by visits to agricultural research stations, agri-businesses, private farms, national monuments, historical sites and Federal Parks. Students are exposed to ongoing sustainable research projects and innovative sustainable farming operations where a variety of cropping systems are utilized. Students are usually exposed to archaeological remains of ancient American Indian farming systems. An 8-day trip.

When Offered (Offered as needed)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 1000

PLNT4900 - Undergraduate Teaching Practicum

Credits: 1-2
Max Credit (Max. 4)

Supervised participation of undergraduates in the teaching of laboratory sections offered by the Department of Plant Sciences. Provides opportunity for students to gain teaching experience in agroecology, horticulture, or life science.

Prerequisite: PLNT 1000 and junior or senior standing

AGRI4520 - Field Practicum: Extension Work

Credits: 1-4
Max Credit (Max. 8)

Provides practical experiences to those wanting to pursue a career with Cooperative Extension Service. Interns are matched with county-based personnel for hands-on learning experiences across the state. Develop working knowledge of CES's mission to provide the citizens of Wyoming with education and applied research.

Dual Listed AGRI 5520.

Prerequisite: must pass volunteer screening process.

Plant Sciences Electives: 15 Hours

(Select 15 credit hours from PLNT courses, at least 12 of which are upper division)

Supporting Electives: 9 Hours

Select 9 hours of upper division courses from those with the following course prefixes:

- AGEC (Agricultural Economics)
- ANSC (Animal Science)
- BIOL (Biology)
- BOT (Botany)
- ENR (Environment and Natural Resources)
- ENTO (Entomology)
- FDSC (Food Science)
- GIST (Geospatial Information Science and Technology)
- LIFE (Life Sciences)
- MICR (Microbiology)
- MOLB (Molecular Biology)
- REWM (Rangeland Ecology and Watershed Management)
- SOIL (Soil Science)

Additional University Studies: 15 Hours

- First-Year Seminar (FY): 3

- U.S. and Wyoming Constitutions (V): 3
- Communications 1 (C1): 3
- Communications 2 (C2): 3
- Human Culture (H): 3

Free Electives: 25 Hours

Total Required: 120 Hours

Optional Concentrations

Although not required, students may choose to specialize in any of the four optional concentrations below as part of their B.S. in Plant Production and Protection. In order for the concentration to be official, students must "opt in" and add the desired concentration to their degree evaluation.

Agronomy Concentration: 24 Hours

The Agronomy concentration focuses on the intricacies of agronomic crop production along with pest management, genetics, soil science, and other related topics. This is a broad area of study that can be tailored to the student's particular interests. Careers in production, consulting, and pest management abound in the public and private sectors of agriculture. Students learn the ultimate goal of promoting more efficient and sustainable agronomic crop production practices. Skills learned include written and oral communication; sciences such as ecology, chemistry, and genetics; and practical applications such as computer technologies, geographic information systems, soil and water analyses, plant health diagnostics, and general best management practices.

Required: 16 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4700 - Forage Crop Science

Credits: 3

The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 5700

Former Course Number [CROP 2200, 3200; PLNT 3200]

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment

OR

PLNT4220 - Crop Yield Physiology

Credits: 3

Physiological processes underlying crop growth and development. The effect of crop management practices on physiology and yield will also be discussed.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 1000, CHEM 1000

At least 8 additional credit hours from the following: 8 Hours

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics

include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130

Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or ECON 1020 and MATH 1400.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGECE 1020 and MATH 1400.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

Horticulture Concentration: 21 Hours

Students in the Horticulture concentration learn about the various horticultural commodities and growing operations. Choose from classes including greenhouse crop production, plant propagation, seed technology, organic food production, plant breeding, and allied subjects such as irrigation technology and pest management including plant pathology and weed science. Students may be surprised at the number of career opportunities available in horticulture! These include vegetable and small fruit production, greenhouse management, controlled environment crop production, landscape plants and management, new variety breeding and production, and urban tree care, among many others.

Required: 15 Hours

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

OR

PLNT4200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 5200

Prerequisite: PLNT 2025 and a USP Q course

At least 6 additional credit hours from the following: 6 Hours

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

Integrated Pest Management Concentration: 25 Hours

IPM as it is commonly known, melds all aspects of plant pest management under one umbrella. It uses the sciences of plant pathology, entomology, and weed science under the broader plant diagnostics field. The IPM concentration emphasizes understanding pest biology and ecology of the ecosystem as the foundation for making pest management decisions that minimize negative impacts on health and the environment. Students in the IPM concentration will find careers in private consulting, field diagnostics, research and demonstration, and product sales, as well as public sector work in invasive species management.

Required: 16 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

Choose at least one of the following:

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

REWM4300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 5300.

When Offered (Normally offered spring semester)

Former Course Number [3320]

Prerequisite: REWM 2500 or LIFE 2023.

At least 9 additional credit hours from the following: 9 Hours

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems,

current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130

Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

Agroecology & Evolution Concentration: 21 Hours

Students in this concentration are trained in the ways plants and associated organisms evolve in response to human-impacted environments, and how agroecosystems may change as a result of plant management. Courses include genetics, plant breeding, agroecology, and crop production along with ecology, soil sciences, and others. This concentration provides excellent preparation for graduate school in plant sciences, and also prepares students for careers in conservation, sustainable agriculture, and crop production.

Required: 13 Hours

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

At least 8 additional credit hours from the following: 8 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-

environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

Plant Production and Protection/Environment and Natural Resources Program, B.S.

Students interested in the environment and natural resources may choose to pursue the B.S. in Plant Production and Protection/ENR. This degree is offered in conjunction with the Haub School of Environment and Natural Resources.

Additional Information

See the ENR Information and Advising Guide for details.

Professional Child Development

Professional Child Development prepares students for teaching and administrative positions in early childhood development and care.

Program Information

Entry into Professional Child Development must be approved by the department and advisor. Applicants must also satisfactorily complete a mandatory security screen (background check).

University Studies Program Requirements

The University Studies Program 2015

Student must complete the following USP requirements that are not incorporated into the requirements for this concentration:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses Before Entry

EDEC1020 - Introduction to Early Childhood Education

Credits: 3
Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

PSYC1000 - General Psychology

Credits: 3
Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3
Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

ENGL1010 - College Composition and Rhetoric

Credits: 3
A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

Required Courses After Entry

**Meets FCSC Core Elective in Human Nutrition and Food. Grade of C or above required.*

***Meets FCSC Core Elective in Design, Merchandising and Textiles. Grade of C or above required.*

**** Grade of C or above required.*

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

OR

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs

Credits: 2

Designed to enrich students' understanding of practices which support children's health development. Issues to be explored include record keeping related to child care health and safety, use of health consultants, accident and injury prevention, immunizations, nutrition and food safety in child care settings.

When Offered (Offered alternate summers.)

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

OR

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

OR

FCSC4131 - Administration Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

EDEC3000 - Observing Young Children

Credits: 3

The general goal of the course is to introduce students to observation and recording techniques appropriate for assessing the growth and development of young children in the school setting. A secondary goal is to understand how observation and recording techniques can facilitate curriculum planning and parent-teacher conferences.

Prerequisite: EDEC 1020 and FCSC 2121.

EDEC3220 - Curriculum and Learning Environments in Early Childhood Education

Credits: 3

Early childhood curriculum and instructional practices will be reviewed, developed, and integrated with a focus on the role of learning environments, materials and play in supporting the teaching and learning process. Students have the opportunity to design meaningful learning experiences through practicum.

Former Course Number [EDCI 3220]

Prerequisite: EDEC 1020 and FCSC 2121 (or both PSYC 2300 and FCSC 2122).

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

OR

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

PSYC4310 - Developmental Psychopathology

Credits: 3

Provides basic understanding of developmental psychopathology. Examines characteristics, etiology, assessment and treatment of psychological disorders in children including autism, mental retardation, anxiety, depression, attention, learning, and conduct problems.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or FCSC 2121 or EDST 2450.

Degree Minimum: 120 Hours

Electives may be needed to meet the university requirement of 42 upper division credit hours and the degree minimum of 120 overall credit hours.

Electives should be selected in consultation with advisor and faculty mentor.

Rangeland Ecology and Watershed Management, B.S.

Rangeland Ecology and Watershed Management provides you with knowledge, skills, and abilities to understand and manage wildlands. You will explore rangeland ecology, watershed management, soil science, and a diversity of landscapes.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Course Requirements

- First-Year Seminar Credits: 3
- US and WY Government Credits: 3
- Electives Credits: 28-29

REWM Courses: 37 Hours

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Prerequisite: LIFE 2022 or LIFE 2023.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

Resource Management: 14-15 Hours

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGECE 1020 or equivalent.

Choose One From

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

- BOT 4111 *
- BOT 3150 *

Physical and Natural World: 8 Hours

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

Biological Sciences: 7 Hours

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Communication Skills: 6 Hours

Quantitative Reasoning: 7 Hours

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Human Culture: 6 Hours

- Human Culture

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Total Hours: 120

*Course must be completed with a C or better.

Minor

Agricultural Business Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are

poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

- 6 additional hours in upper-level agricultural economics courses;
- 6 hours in supporting agriculture courses.

Agroecology Minor

The Agroecology minor is ideal for students interested in how plant production systems interact with the surrounding ecosystem. This minor complements many majors related to land management and ecology.

Minimum Requirements: 20 Hours

Required: 11 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

Choose two from PLNT 3030, LIFE 2023, or SOIL 2010:

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

9 additional credit hours from the following: 9 Hours

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

Agronomy Minor

The Agronomy minor trains students for careers in crop production and management, consulting, sales, and other areas of modern agriculture. Courses include crop & soil management, weed, insect, and disease management, among others.

Minimum Requirements: 19 Hours

Required: 11 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

8 additional credit hours from the following: 8 Hours

PLNT2200 - Field Crop Production

Credits: 3

Provides students with a fundamental understanding of production cropping systems. Students will gain basic knowledge of major food crops, tillage systems, crop rotations, fertilization, irrigation, crop development, pest management, and other topics related to field crops.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 1000 or concurrent enrollment

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4220 - Crop Yield Physiology

Credits: 3

Physiological processes underlying crop growth and development. The effect of crop management practices on physiology and yield will also be discussed.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 1000, CHEM 1000

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

PLNT4700 - Forage Crop Science

Credits: 3

The course focuses on major aspects of forage crop production and biology. Cultural practices, adaptation, sustainable agriculture and alternative use, seed production, harvest, livestock utilization and storage of forages. This course will have in-depth emphasis on characteristics of important grasses and legumes and utilization of forages for livestock production.

Dual Listed PLNT 5700

Former Course Number [CROP 2200, 3200; PLNT 3200]

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

Animal and Veterinary Science, Animal and Veterinary Science Minor

This minor provides a foundational background in animal and veterinary science for students interested in livestock and equine production, but with a primary degree program outside of ANVS.

Courses Required:

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3

Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

At Least One of the Following:

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

Animal and Veterinary Science, Equine Science Minor

This minor provides a foundational background in equine science and its application to equine production and management for students interested in the horse industry, but with a primary degree program outside of Equine Science.

Core Courses

12 total credit hours

ANSC1030 - Equine Management

Credits: 3

An overview of the horse industry and proper way to manage horses.

When Offered (Normally offered spring semester)

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3250 - Equine Behavior and Welfare

Credits: 3

To familiarize students with an equine interest about behavior, learning, and welfare issues associated with management and training of equine.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 4111.

Dual Listed ANSC 5111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

OR

PATB4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed ANSC 4111

Dual Listed PATB 5111

Prerequisite: ANSC 1030

Electives

Must choose 3 courses minimum (minimum of 8 credits) - 8 to 10 total credit hours

*Maximum of 3 credits allowed in ANSC 3560

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC3555 - Equine Evaluation and Selection

Credits: 3

Objectively evaluate equine for performance and breeding purposes according to breed standards and or discipline. Emphasis will be placed on learning how conformation relates to overall function and longevity of equine. Competitive

horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills.

Prerequisite: ANSC 1010 and ANSC 1030.

ANSC3560 - Advanced Equine Evaluation and Selection

Credits: 1-2
Max Credit (Max. 3)

Objectively evaluate equine for halter and performance according to breed standards and or discipline. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills. Students will compete as members of the Collegiate Horse Judging Team and represent University of Wyoming at national horse judging competitions.

Prerequisite: ANSC 3555.

ANSC4132 - Equine Reproduction

Credits: 2
Introduces methods of manipulating reproduction within equine management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, parturition, embryo transfer, and control and prevention of equine reproductive diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120 and ANSC 1030

ANSC4250 - Advanced Equine Production and Management

Credits: 3
A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

Apparel Design Minor

A minor in Apparel Design enables students to gain competency in areas expected of apparel designers; combining technical and creative skills with industry knowledge for the design and creation of fashionable and functional clothing.

Required Courses

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

Plus one of the following

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 2270

Plus one of the following

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

Plus one of the following

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

Minor Total: 24 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Applied Economics Minor

Graduate standing.

Committee selection for the student's major thesis or dissertation committee should include at least one faculty member from AGECE.

Courses Required

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020, AGECE 2020 and MATH 1400.

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

- 6 additional credits of approved courses.

Farm and Ranch Management Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

- 9 additional hours in upper-level agricultural economics courses;
- 6 hours in supporting agriculture courses.

Forest Resources Minor

In Forest Resources, you will develop a working knowledge of the processes that influence forest ecology, sustainability, and provision of the key products derived from forests.

Minimum Requirements: 20 Hours

RNEW2100 - Forest Management

Credits: 3

Principles of forest management. Topics include the laws affecting forest management, methods of harvesting wood from forests, fire and insect management, the effects of disturbances on stream flow and nutrient cycling, and the challenges of developing management plans for forests.

Cross Listed ENR 2100.

Prerequisite: LIFE 1101 or LIFE 1010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

RNEW4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed BOT 4775.

Prerequisite: LIFE 3400.

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

Choose One From

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

- GEOG 4420

Choose One From

REWM4103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of public and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Students prepare public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 5103.

When Offered (Normally offered spring semester)

Former Course Number [3103]

Prerequisite: C or better in REWM 2000 and CS course.

Choose One From

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

RNEW3000 - Tropical Ecology

Credits: 3

Examines the characteristics of tropical ecosystems, how they evolved, their value to humans, their present status, and current issues relating to biodiversity, deforestation, extinction, and conservation.

Prerequisite: LIFE 1101 or LIFE 1010.

GEOG4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG/GEOL 4470/5470

Former Course Number [G&R 4470]

Prerequisite: Some basic knowledge of Earth processes GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

General Agricultural Economics Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

- 15 additional hours in agricultural economics courses with 12 hours at the upper-level;
- 6 hours in supporting agriculture courses.

Horticulture Minor

Students in the Horticulture minor learn landscaping, plant materials, propagation, organic food production, and crop production in greenhouses and controlled environments. Students who want to get their hands dirty are welcome.

Minimum Requirements: 20 Hours

Required: 8 Hours

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

Choose one from PLNT 1000 or LIFE 1010:

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

12 additional credit hours from the following: 12 Hours

PLNT3000 - Irrigated Agriculture

Credits: 3

Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed SOIL 3000.

Prerequisite: MATH 1400, SOIL 2010.

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

PLNT3300 - Horticultural Plant Propagation

Credits: 3

Emphasis on sexual and asexual propagation of various plants including herbaceous and woody crops. Seed propagation discussions include anatomy, physiology, dormancy, and enhancing seed viability and germination. Asexual propagation discussions center on anatomy and physiology of cuttings, adventitious root formation, budding, grafting, and tissue culture.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: PLNT 2025

PLNT4050 - Plant Biotechnology

Credits: 3

Introduces students to the science and applications of plant cell, tissue and organ culture, and regeneration. Topics include in vitro techniques used for developing new genotypes. Successful completion will enhance knowledge and understanding of plant tissue culture techniques and their applications in crop improvement.

Dual Listed PLNT 5050

Prerequisite: LIFE 2023 or equivalent

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4180 - Greenhouse Crop Production

Credits: 4

Production methods for a wide range of herbaceous plants including bedding plants, perennials, vegetables, flowering potted plants, and foliage plants. Emphasis is placed on current production techniques in controlled environments and in the field.

Dual Listed PLNT 5180

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: PLNT 3300

PLNT4200 - Greenhouse Design and Management

Credits: 3

Emphasis on greenhouse structural and functional design concepts of economy, efficiency and energy conservation. Primary emphasis is on the limitations and advantages of greenhouses in the Rocky Mountain region, including alternative energy concepts. The management and operational concerns associated with private, commercial, educational and public greenhouses will be included.

Dual Listed PLNT 5200

Prerequisite: PLNT 2025 and a USP Q course

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

PLNT4520 - Plant Breeding

Credits: 3

Principles and methods for genetic improvement of all kinds of plants including agronomic, horticultural, forest and range species. Emphasizes fundamental concepts of quantitative genetics and integration of classical plant breeding with emergent biotechnology.

Former Course Number [CROP 4520]

Prerequisite: MATH 1000 or statistics course; LIFE 4000

Human Development and Family Sciences Minor

Provides students with a foundation in the basic principles and knowledge of human development and family sciences across the lifespan that can enrich and complement their primary area of study.

Required Courses

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3

Use of social science theory and research to understand psycho-socio-cultural influences in the development of personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

Plus 12 credit hours from the following:

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicultural development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

Minor Total: 22 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Human Nutrition Minor

A minor in Human Nutrition and Food enhances degrees in kinesiology and health, food science, nursing, and related fields. Students learn how food choices influence health. *Does not prepare students to provide nutrition therapy or counseling.*

Required Courses

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

Plus one of the following

** Course can be used to fulfill only one category.*

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

Plus three of the following

** Course can be used to fulfill only one category.*

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

Minor Total: 23-25 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Insect Biology Minor

In Insect Biology, you will learn in-depth information about insects including their basic biology, ecology, and evolution.

Minimum Requirements: 13 Hours

Choose One From

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

OR

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Choose From

Then choose from the list below to meet the minimum 13 credit hour requirement.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

ENTO4686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO4687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders, diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 5687.

Prerequisite: ENTO 4684 required; ENTO 4670, ENTO 4682 recommended.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

Insect Biology/Entomology Graduate Study Minor

This minor is designed to complement a related graduate degree with an understanding of insect biology and entomology. Understanding the biology, ecology and classification of insects is crucial to understanding the widespread effects they have on agriculture, human health, and ecosystems.

Interior Design Minor

A minor in Interior Design enables students with career interests in this field to gain experience in the competency areas expected of interior designers.

Required Courses

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2180 , FCSC 2188 , or concurrent enrollment in 2188

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

Plus one of the following

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

Plus one of the following

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ARE3600 - Architectural Design Studio III

Credits: 3

Junior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). This course builds upon skills learned in ARE 2600, with a new emphasis on the complexities that accompany mid-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 2410 and ARE 2600.

Plus one of the following

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Minor Total: 21 credit hours

All courses required for this minor must be completed with a letter grade of C or above.

Additional Requirements

The Interior Design minor is sponsored jointly by the Departments of Family and Consumer Sciences and Civil and Architectural Engineering. Students who hope to use this minor to prepare for professional certification examination following graduation should consult the sponsoring departments to receive an advisor for the minor.

International Agricultural Minor

Courses Required

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed INST 3860.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3G

USP 2015 Code U5H

Former Course Number [4860]

Prerequisite: AGEC 1010/ECON 1010 or AGEC 1020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

- 6 additional hours in upper-level agricultural economics courses;
- 3 hours in foreign culture or language;
- 6 hours in supporting agriculture courses.

Molecular Biology Minor

A Molecular Biology minor includes courses in basic sciences, molecular biology, biochemistry, microbiology, genetics and upper level electives and research opportunities, preparing students for postgraduate studies in research and health sciences.

Molecular Biology Minor Additional Information

Students wishing to minor in molecular biology should discuss their plans with an adviser. Formal declaration of molecular biology as a minor requires 1) submission of a form approved by the Department of Molecular Biology and the College of Agriculture and Natural Resources Dean's Office, 2) appointment of an adviser for the Department of Molecular Biology.

To receive a minor in molecular biology, a student must complete courses listed in the following areas:

General Science Requirement

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

OR

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

AND

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is

designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MOLB Core and Elective Requirement

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3320 - Molecular Biological Methods

Credits: 4

Integrated discussion and hands-on experience with modern bioinformatic and wet lab-based molecular, genetic and biochemical methods. Completion of the course should provide students with enhanced theoretical understanding and practical knowledge of many crucial modern computational and molecular biological techniques.

When Offered Spring

Prerequisite: Minimum grade of C in MOLB 2021 or MICR 2021

OR 3 credits of

MOLB4010 - Laboratory Research in Molecular Biology

Credits: 1-3

Max Credit 12

Undergraduate student will conduct a laboratory or computational research project under the guidance of a Molecular Biology Department faculty member, who will serve as the student's research adviser.

Prerequisite: LIFE 1010 or concurrent enrollment, and consent of instructor.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

- **MOLB elective requirement:** 6 credits of 4000-level MOLB courses, excluding MOLB 4010, MOLB 4050, MOLB 4051, MOLB 4052, MOLB 4850

Natural Resource Economics Minor

Courses Required

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.
Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)
Prerequisite: AGEC 1020 or equivalent.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

Choose 9 Additional Hours From:

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP 2015 Code U5H

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and

liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4520 - Public Economics

Credits: 3

Studies the role of government within a market economy. The focus is on how governments fund and provide non-market goods demanded by society, e. g. , health care, military, education. Examines public goods, taxation, environmental challenges, affects on economic growth and stability, benefit-cost analysis, and state/local finance.

Prerequisite: ECON 3010, ECON 3020.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

Plant Protection Minor

A combination of weed science, plant pathology, and entomology, the Plant Protection minor provides training for many careers in invasive species management, plant diagnostics, horticulture, and agronomy, among others.

Minimum Requirements: 19 Hours

Required: 19 Hours

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

PLNT3220 - Plant Pathology

Credits: 3

Study of plant diseases, their causes, nature and control, as well as pathogen biology. Study of diseases caused by fungi, bacteria, viruses, nematodes, mycoplasma-like organisms, higher plants and abiotic factors on field and vegetable crops, as well as on landscape plants. Gives students insight into the impact plant diseases have on humans.

Former Course Number [PLPA 3220]

Prerequisite: PLNT 1000 or LIFE 1010

Choose one from ENTO 1000 or ENTO 1001 (ENTO 1001 preferred if available):

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Choose one from PLNT 4070 or PLNT 4400:

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, RNEW 5400, PLNT 5400

Prerequisite: LIFE 3400

Choose one from the following:

PLNT4000 - Plant Disease Control

Credits: 3

Advanced study of plant diseases. Important diseases of field, forage and horticultural crops will be studied. Includes history and current distribution and uses of crops. Emphasis will be placed on pathogen biology and development of integrated disease management. Current and classic research papers on plant disease control will be discussed.

Dual Listed PLNT 5000

When Offered (Normally offered fall semester of even-numbered years)

Former Course Number [PLPA 4000]

Prerequisite: PLNT 3220

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

PLNT4470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 5470

Former Course Number [CROP 4470]

Prerequisite: 8 hours of plant biology

Rangeland Ecology and Watershed Management Minor

Rangeland Ecology and Watershed Management provides you with an introduction to knowledge, skills and abilities to understand and manage wildlands. You will explore rangeland ecology, watershed management, soil science and a diversity of landscapes.

Required Courses

The required courses for the minor are:

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

- REWM 2500 Credits: 2

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

- 6 hrs. selected from other REWM upper-division (3000 or 4000 level) courses.

Additional Requirements

The number of hours required is 22.

Reclamation and Restoration Ecology Minor

This program covers the use of basic and applied ecological concepts to rehabilitate and restore processes and functions to disturbed ecosystems.

Required Courses: 14 Hours

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

REWM4990 - Undergraduate Teaching Practicum

Credits: 1

Max Credit (Max. 2)

Teaching experience in classroom or laboratory assisting faculty instructor.

When Offered (Offered based on sufficient demand and resources)

Planning and Policy: 3 Hours

(choose one)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

- GEOG 4750

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.
USP 2003-2014 Code U3WC
Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.
Prerequisite: POLS 1000.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)
USP 2003-2014 Code U3WC
USP 2015 Code U5C3
Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

Below-Ground Processes: 3-4 Hours

(choose one)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

Above-Ground Processes: 2-4 Hours

(choose one)

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

- BOT 4111

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

- ENTO 4685

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

- ZOO 4550

Total: 22-25

Soil Science Minor

This program is designed to enhance soil expertise for students majoring in agricultural, natural resources, and environmental sciences degree programs.

Course Requirements: 15 Credit Hours

Course requirements (15 credit hours) for a Soil Science minor are:

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

- plus 11 credits of upper-division soil science courses for a total of 15 credits.

Additional Requirements

Undergraduate students minoring in Soil Science will enhance their job prospects with federal land management or conservation agencies (e.g., Forest Service, Bureau of Land Management, Natural Resources Conservation Society), state and federal regulatory agencies (e.g., Wyoming Department of Environmental Quality), mining and oil companies, environmental consulting companies, or scientific research organizations.

Graduate

Agricultural Economics, M.S.

Degree Requirements

The following courses constitute the M.S. in Agricultural Economics core requirements and are required of all Plan A candidates (22 hours).

Economic Theory

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

Quantitative Methods

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

Research

AGEC5650 - Communicating Research

Credits: 3

Focuses on the broad methods, and written and oral communication of research in applied economics. Topics include formulating a research question, organizing a manuscript, editing for clarity and conciseness, building effective figures and tables, finding and citing literature, developing and delivering effective presentations, and upholding research ethics.

Prerequisite: graduate standing.

AGEC5880 - Advanced Seminar

Credits: 1-2

Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGEC and/or ECON.

Plan A (Thesis):

Minimum of 30 credit hours including AGEC M.S. core requirements, thesis hours and electives.

No more than three hours of AGEC coursework numbered below 5000-level count toward the 30 hour requirement.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student, and the department head determine the final program of study and thesis research topic.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Plan B (Non-thesis):

Minimum of 32 hours of coursework;

Non-thesis business analysis paper accepted by the student's graduate committee.

Minimum of 13 credit hours of agricultural economics coursework numbered at the 5000-level are required, including:

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5880 - Advanced Seminar

Credits: 1-2

Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGEC and/or ECON.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

OR

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

In Addition:

Students are required to complete 3 credit hours from each of the following three areas:

Management:

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

OR

- AGEC 5460

OR

- MGT 4410
- MGT 4420
- MGT 4440

MGT4470 - Negotiations and Conflict Resolution

Credits: 3

Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

OR

- MGT 4520

Marketing:

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

OR

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

OR

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4430 - Marketing Management

Credits: 3

Analysis of policy-making and operating decisions of the marketing manager and the tools available to aid in solving

marketing problems.

Prerequisite: MKT 2100, MGT 2100, STAT 2050 or equivalent.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

OR

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 2100 and junior class standing.

Finance:

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

OR

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

- FIN 4520

- FIN 4610

FIN4810 - Real Estate Investment

Credits: 3

Covers advance real estate investment topics such as investments risk and valuation sensitivity analysis, futures and real options, liquid real estate investments, analysis of development projects, and commercial mortgage backed securities. While the theory the topics will be presented, the course focus is on the application of the material.

Prerequisite: FIN 2100 and advanced business standing
OR

ECON4740 - International Economics and Policy

Credits: 3

The focus is on foreign exchange markets, balance of payments analysis and effects of international trade and capital flows on the domestic economy. Policies to correct payment deficits, gold, international liquidity and international financial institutions are studied.

Prerequisite: ECON 3010 and ECON 3020; QA.

Remaining Credit Hours

Remaining credit hours will be filled with electives.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic.

Presentation of the business analysis paper at a formal public seminar.

An internship experience is strongly encouraged as part of the agricultural business option (AGEC 5990).

Agricultural Economics/Environment and Natural Resources, M.S.

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 15 credit hours in environment and natural resources, as approved by the student's committee and the ENR academic adviser.

Achieve a cumulative 3.000 GPA in the AGEC M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the area of environment and natural resources.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Agricultural Economics/Water Resources, M.S.

The objective of this program is to provide students with specialized study in water,resources and to signify this specialization by the designation of the water resources interdisciplinary major on the transcript.

Coursework and Thesis

Students must complete the 24 credit hour agricultural and applied economics including M.S. core requirements plus 4 thesis hours and 9 credit hours in water resources approved courses.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The candidate's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and thesis research topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the graduate committee.

Oral Exam Requirement

In addition to coursework and a Plan A Thesis, students must pass a final oral examination. The student's committee may also require a written examination.

Interdisciplinary Component

nine hours (see Water Resources degree requirements)

Plan A (Thesis)

Students must complete the 20 credit hour agricultural and applied economics M.S. core requirements plus 4 thesis hours and 10 credit hours in water resources approved courses.

Please refer to Water Resources Degree program in this *Catalog* for updated degree requirements.

Achieve a cumulative 3.000 GPA in the AGECE M.S. core requirements.

The student's graduate committee, nominated by the major professor, the student and the department head determine the final program of study and business analysis topic, which must be in the water resources area.

Presentation of research results at a formal public seminar.

Completion of an oral examination covering the student's thesis research administered by the student's graduate committee.

Animal and Veterinary Science, M.S.

Both Plan A (Thesis) and Plan B (Non-thesis) options are available.

Plan A (Thesis)

The student, major professor, and graduate committee determine the program of study and research project, which meets the needs of the individual student. The candidate's graduate committee should be established and functioning by the time the student has completed 12 semester hours of formal coursework. The master of science program should be approved and filed by the end of the student's second semester of graduate study in animal science. This committee shall also determine if the student is making satisfactory progress to be advanced to a candidate for a master's degree or continued in a doctoral program by the end of the student's third semester following matriculation.

The student can specialize in breeding, food science and human nutrition, nutrition, physiology, meat science, reproduction or wool for coursework and thesis/dissertation project. In addition, supporting coursework is available in agricultural economics, biochemistry, microbiology, range management, genetics, statistics, and other areas of interest to the individual. In certain cases it is possible to develop a joint research project between animal science and another department.

Students may use the research facilities and herds of beef cattle, sheep, and swine at the university livestock center near the university or at one of the university research and extension centers in the state. Research laboratories are located on campus and include a modern meat processing facility.

The Thesis program is a 30 hour program, 26 hours of coursework and 4 hours of thesis research.

Plan B (Non-thesis)

The Non-thesis program requires a coursework-intensive, non-thesis master of science program for those students whose career paths may not require a thesis research program.

The program requires 32 hours of coursework in addition to an acceptable non-thesis research paper as defined by the student's graduate committee.

Options

Program Specific Degree Requirements

A minimum of 30 credit hours including 4 thesis hours must be earned in 4000-5999 level courses.

The program of study is arranged with the student's graduate committee.

Animal and Veterinary Science, Ph.D.

A 72 hour program.

Students must meet the university minimum requirements.

Ecosystem Science and Management/Applied Economics, Ph.D.

The course requirements for this program are highly flexible to accommodate a wide variety of student backgrounds and interests. Students can major in any PhD program within ESM including Rangeland Ecology and Watershed Management, Soil Science, and Entomology.

Additional Requirements

A minimum of 72 credit hours of coursework. The credit hour requirement can include:

Up to 48 credit hours transferred from approved graduate courses earned while pursuing an M.S. degree (no more than 4 credit hours of thesis);

A minimum of 12 credit hours of approved ESM (REWM, SOIL, ENTO) courses;

A minimum of 18 credit hours of approved AGECE or ECON courses, with at least 12 credit hours at the 5000-level.

At least 42 of the 72 credit hour requirement must be earned in formal coursework.

No more than 12 credit hours of 4000-level courses can count towards the 72 credit hour requirement.

Entomology, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research. Entomology graduate students study a variety of scientific issues related to insects across the globe.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

Plan B (Non-thesis)

Requires 30 hours of graduate credit to include 9 hours of required courses, 11 hours of required electives, and 10 hours of other electives.

Plan B project - follows format of Plan A thesis.

A Plan B master of science will be a terminal degree program in the Department of Ecosystem Science and Management. Students completing this option will not qualify for a subsequent Ph.D. program in Department of Ecosystem Science and Management at the University of Wyoming.

Additional Requirements

This program requires 30 credit hours (at least 12 from Entomology) approved by the student's graduate advisory committee and an approved research plan.

Entomology, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding entomology. Entomology graduate students study a variety of scientific issues related to insects across the globe.

Additional Requirements

This program requires 72 credit hours (at least 12 from Entomology) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework complete) and an oral final examination.

Entomology/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between entomology and water resources and to provide students with an entomology degree program that emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of ENTO 5960 to qualify for a master of science degree in entomology/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

- A. ENTO 5678 Aquatic Entomology (3)
- B. Interdisciplinary component 9 hours (see Water Resources degree requirements)

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in entomology/water resources. In addition to coursework and a Plan A thesis, students must pass a final written and oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in entomology/water resources degree requirements and that research efforts are in the water area.

Family and Consumer Sciences - Master of Science

The master's program in family and consumer sciences offers three specialized and very different areas of emphasis for a variety of pathways and careers.

General Requirements

All emphasis areas listed below require a minimum of 30 credit hours of coursework at the 4000/5000 level. Only nine credit hours of 4000-level courses are allowed in this master's program. The student may be required to complete more than the minimum credit hours to satisfy prerequisites or because the student's committee determines additional coursework is required for the student to reach their professional objective.

The student is responsible for meeting all deadlines, submitting all required forms, and for fulfilling all requirements for the degree.

Design, Merchandising and Textiles

This program offers the study of textiles, merchandising of textile and apparel products, various aspects of apparel design and product development including creative and functional design options, and various aspects of interior design.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

14 credit hours of Family and Consumer Sciences courses

6 credit hours of supporting courses from arts, humanities, natural or social sciences

6 credit hours of supporting research courses

4 credit hours of FCSC 5960 Thesis Research

Human Development and Family Sciences

This program is designed for professionals who are currently working in human services fields and would like to further their education. This is an entirely online degree program that allows students to progress at their own pace.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

FCSC 5122 Developmental Contexts Across the Lifespan

FCSC 5123 Positive Youth Development

FCSC 5135 Program Evaluation

EDRE 5530 Introduction to Research or EDRE 5550 Action Research

14 credit hours of supporting courses

4 credit hours of FCSC 5960 Thesis Research

Human Nutrition and Food

This program increases the understanding of food and nutritional science and how to apply that knowledge to disease prevention and enhancement of human potential.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

18 credit hours of courses from food and nutritional sciences, biological, natural and social sciences

6 credit hours of supporting research courses

2 credit hours of graduate research seminars

4 credit hours of FCSC 5960 Thesis Research

Application and Admission Requirements

Admission to this graduate program and selection for department-funded assistantships is highly competitive. Faculty review the applications for their program area. Priority consideration is given to applicants who meet or exceed admission requirements and possess research interests that parallel those of the faculty. We do not offer conditional admission.

The application must include the following:

- A bachelor's degree based on a four year curriculum from an accredited institution with a grade point average of 3.0 or higher (on a 4.0 scale). Transcripts from all institutions attended must be submitted.
- Graduate Record Exam (GRE) score. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing). Official scores must be submitted.
- Letters of recommendation -- Applicants must submit names and contact information for at least 3 people who will provide letters of recommendation and evaluation of the applicant's preparedness and/or qualifications for the desired graduate degree program.
- A statement of purpose (letter of intent) that includes applicant's preparation for the desired degree, research interests, future goals related to the program of interest, and if they wish to be considered for a graduate assistantship.
- A current professional resume or curriculum vitae.
- For international students, a minimum TOEFL score of 540 (76 iBT), IELTS score of 6.5, or Duolingo score of 105 average of the Conversation and Production sections. Official scores must be submitted.
- International students must also provide evidence of adequate financial resources.

To ensure full review for fall semester admission, applications must be received no later than March 1. Notification of application decisions will be made by May 1. Applications received at other times of year will be reviewed only if space in the desired program area is available.

Final approval of program entry for an international graduate student receiving an assistantship is contingent upon demonstrated English language oral proficiency.

Financial Support

Financial support is never guaranteed.

Graduate assistantships are awarded after applicants are selected for program entry.

Graduate assistantships require teaching and/or research. Students awarded an assistantship involving any type of teaching responsibility including labs, lectures, paper grading and interpretation to students are required to successfully complete the mandatory Graduate Teaching and Learning Symposium prior to assuming their duties. The department will define teaching responsibilities prior to the student attending the teaching symposium.

A full-time assistantship provides a stipend, health insurance, and a tuition/fee reduction.

- The stipend is payable in installments over an academic year (September through May).
- Health insurance will be paid for the calendar year. **Student medical insurance is mandatory for international students.**
- The tuition/fee reduction will cover up to 9 graduate credit hours of tuition per semester and most mandatory fees. Some incidental fees are the responsibility of the student. Anyone receiving a full-time graduate assistantship must be registered as a full-time student in 9 credit hours per semester.
- If a student is awarded less than a full-time assistantship, the stipend, and tuition and fee reduction will be adjusted to the percentage rate of the assistantship.
- Graduate students who receive a full assistantship are required to work an average of 20 hours per week for the stipend.

Renewal of a graduate assistantship is contingent on acceptable progress towards degree completion and maintenance of a grade point average of 3.0 or above.

Financial support is not given for more than two academic years.

Food Science and Human Nutrition Interdisciplinary Master of Science

An interdisciplinary program where students gain expertise in theory as well as combined research in the areas of human nutrition and metabolism, food product development, community nutrition, food microbiology, meat science and food chemistry.

General Information

You can earn your master's degree in food science and human nutrition through the Department of Animal Science or Family and Consumer Sciences.

Applicants indicate the research experience they prefer and faculty member they are interested in working with. In this highly competitive graduate degree program, students gain direct experience with data collection, analysis, writing and publication through laboratory and classroom learning experiences. Program faculty are actively conducting research in the areas of eating behaviors, indigenous/traditional diets, micronutrient needs and deficiencies, food product development, sensory characteristics of food products, health and physical performance of active individuals, nutrition and disease, brain-reward pathway in animals, microbial diagnostics, rumen microbiome, nitrogen/protein metabolism, lipid analysis and alternative feed/forages.

General Requirements

A minimum of 30 credit hours of coursework at the 4000/5000 level is required. Only nine credit hours of 4000-level courses are allowed in this master's program. The student may be required to complete more than the minimum credit hours to satisfy prerequisites or because the student's committee determines additional coursework is required for the student to reach their professional objective.

Student may choose Plan A - Thesis or Plan B - Non-Thesis Project.

An oral defense of thesis or project is required.

Student must complete the following (approved by graduate committee):

18 credit hours of courses from food and nutritional sciences, biological, natural and social sciences

6 credit hours of supporting research courses

2 credit hours of graduate research seminars

4 credit hours of FCSC 5960 Thesis Research

The student is responsible for meeting all deadlines, submitting all required forms, and for fulfilling all requirements for the degree.

Recommended Prerequisites

The following are recommended for students applying to the program:

- One semester of organic chemistry
- Human or animal nutrition, anatomy and physiology
- Introductory statistics

Application and Admission Requirements

Admission to this graduate program and selection for department-funded assistantships is highly competitive. Faculty review the applications for their program area. Priority consideration is given to applicants who meet or exceed admission requirements and possess research interests that parallel those of the faculty. We do not offer conditional admission.

The application must include the following:

- A bachelor's degree from an accredited institution with a grade point average of 3.0 or higher (on a 4.0 scale). Transcripts from all institutions attended must be submitted.
- Graduate Record Exam (GRE) score. In the past, successful applicants have typically had scores at or above the 50th percentile on two of the three subtests (verbal, quantitative, and analytical writing). Official scores must be submitted.
- Letters of recommendation -- Applicants must submit names and contact information for at least 3 people who will provide letters of recommendation and evaluation of the applicant's preparedness and/or qualifications for the desired graduate degree program.

- A statement of purpose (letter of intent) that includes applicant's preparation for the desired degree, research interests, future goals related to the program of interest, and if they wish to be considered for a graduate assistantship.
- A current professional resume or curriculum vitae.
- For international students, a minimum TOEFL score of 540 (76 iBT), IELTS score of 6.5, or Duolingo score of 105 average of the Conversation and Production sections. Official scores must be submitted.
- International students must also provide evidence of adequate financial resources.

To ensure full review for fall semester admission, applications must be received no later than March 1. Notification of application decisions will be made by May 1. Applications received at other times of year will be reviewed only if space in the desired program area is available.

Final approval of program entry for an international graduate student receiving an assistantship is contingent upon demonstrated English language oral proficiency.

Financial Support

Financial support is never guaranteed.

Graduate assistantships are awarded after applicants are selected for program entry.

Graduate assistantships require teaching and/or research. Students awarded an assistantship involving any type of teaching responsibility including labs, lectures, paper grading and interpretation to students are required to successfully complete the mandatory Graduate Teaching and Learning Symposium prior to assuming their duties. The department will define teaching responsibilities prior to the student attending the teaching symposium.

A full-time assistantship provides a stipend, health insurance, and a tuition/fee reduction.

- The stipend is payable in installments over an academic year (September through May).
- Health insurance will be paid for the calendar year. **Student medical insurance is mandatory for international students.**
- The tuition/fee reduction will cover up to 9 graduate credit hours of tuition per semester and most mandatory fees. Some incidental fees are the responsibility of the student. Anyone receiving a full-time graduate assistantship must be registered as a full-time student in 9 credit hours per semester.
- If a student is awarded less than a full-time assistantship, the stipend, and tuition and fee reduction will be adjusted to the percentage rate of the assistantship.
- Graduate students who receive a full assistantship are required to work an average of 20 hours per week for the stipend.

Renewal of a graduate assistantship is contingent on acceptable progress towards degree completion and maintenance of a grade point average of 3.0 or above.

Financial support is not given for more than two academic years.

Hydrology, Ph.D.

Join a cutting-edge PhD program to gain expertise in technical, philosophical, and methodological aspects of hydrology related to above- and below-ground systems. We foster research and learning on critical water-related science and social topics.

Additional Information

Hydrologic Sciences (WRESE), Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/wrese>
E-mail: wrese@uwyo.edu

Program Director: Andrew D. Parsekian, Ph.D.

Degree Offered

Ph.D. in Hydrologic Sciences

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D. level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

The WRESE Program grants a PhD in Hydrological Sciences.

Program Specific Admission Requirements

Ph.D. in Hydrologic Sciences

The WRESE Program only admits students seeking a doctoral degree.

Those interested in graduate study in this program, are encouraged to contact the WRESE program (wrese@uwyo.edu) for more information and guidance regarding applying. In order to apply, please submit an application to the program via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>). Prospective students applying to the WRESE program must satisfy the minimum criteria for admission of their advisor's home department (i.e., number of reference letters required; minimum GRE scores, if requested; other supporting documents, if requested; etc.). Similarly, applicants should adhere to the submission deadline indicated by their advisor's home department.

Minimum criteria for admission to the WRESE Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under certain circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the WRESE program.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

The written exam will consist of a series of questions as decided upon by the committee and should take no more than two weeks to complete.

Each committee member shall grade their portion of the exam as pass/fail. The student shall be viewed as passing the written exam if no more than one person grades their portion of the exam as failing.

The oral examination will be held no sooner than two weeks after the written exams, and only after the student has passed their written examinations. The oral exam should be no less than 90 minutes long and no longer than 3 hours.

Following the exam, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Dissertation

The student will prepare a dissertation and make the document available to the committee at least two weeks in advance of an oral defense of the document. The oral defense must be at least 15 weeks after the student has been advanced to candidacy. Students shall present a public defense to the university community that is expected to be approximately 45 minutes long, with a public question-and-answer period after the presentation. If the committee determines that the student has presented a suitable oral presentation of his/her research findings, a closed session meeting will be held in which the student defends their research to the committee. At the conclusion of the defense,

each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Other information:

Students in the WRESE Program may participate from any college, with the expectation that their program of study and dissertation will focus on quantitative issues of hydrology and water resources. The Program welcomes academic diversity, and students in WRESE have entered into the Program from a wide range of academic backgrounds and have hailed from numerous home departments, including Ecosystem Science and Management, Civil and Architectural Engineering, Botany, Zoology and Physiology, and Geology and Geophysics.

Water Resources/Environmental Science and Engineering is an Interdisciplinary program that fulfills an important need by organizing a rigorous Ph.D.- level curriculum, with sufficient numbers of relevant courses to serve the needs of Ph.D. students affiliated with the program faculty.

Molecular Biology, M.A.

The Molecular Biology M.A. program includes advanced courses in molecular sciences with a focus on a research project, preparing students for a Ph.D. program, biotechnology research or other professional postgraduate program.

Molecular Biology, M.A. Additional Information

An applicant for the M.A. degree in Molecular Biology is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant needs to contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can apply to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

The pursuit of an M.A. degree in Molecular Biology is suitable for students interested in obtaining a master's degree that does not necessarily include laboratory work. Students who intend to pursue education in medical, dental, veterinary or law schools may choose to pursue an M.A. in Molecular Biology before continuing their education. An appropriate research project is selected in consultation with the M.A. degree candidate and their graduate adviser. Student performance is monitored by a thesis committee that will evaluate a student's written thesis, public seminar, and oral thesis defense. A student pursuing an M.A. degree should not have expectations of financial support. Students pursuing the M.A. degree in Molecular Biology usually complete their program in two academic semesters plus two summer semesters.

Requirements for M.A. degree in Molecular Biology

An M.A. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit. Specific requirements for the M.A. Program in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.

- 4 credits of the seminar presentation course MOLB 5050 (2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program)
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee

Molecular Biology, M.S.

The M.S. in Molecular Biology program provides training with advanced courses in molecular sciences and conducting a research project, with the goal of providing a foundation for pursuing a Ph.D. program, employment or other postgrad program.

Molecular Biology, M.S. Additional Information

The M.S. is a research-intensive degree. An applicant is generally expected to have an equivalent of a B.S. degree in a field related to Molecular Biology. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters. An M.S. candidate will conduct a research project as well as present at the departmental seminars and at scientific meetings. Student performance is monitored by a thesis committee that evaluates a student's research proposal, seminar presentations, written thesis, final public seminar, and final oral defense of the thesis. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Graduate assistantships for M.S. degree students are at the discretion of their graduate adviser. Students pursuing the M.S. degree in Molecular Biology usually complete their program in two to three years.

Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

Requirements for M.S. degree in Molecular Biology

An M.S. degree student, in consultation with their graduate committee, must design a Program of Study that includes a minimum of 30 hours of graduate credit, including 26 credits of formal coursework and 4 credits of thesis research MOLB 5960 . Specific requirements for the M.S. degree in Molecular Biology are listed below.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600 , MOLB 5600 , or transfer credits for an equivalent biochemistry course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other credits as determined by the student in consultation with their graduate committee
- MOLB 5960 Thesis Research (4 credits)

Molecular Biology, Ph.D.

The Ph.D. program in Molecular Biology provides training for students interested in pursuing advanced courses and conducting an extensive laboratory research project in molecular and cellular biology or microbiological research areas.

Molecular Biology, Ph.D. Additional Information

The Ph.D. in Molecular Biology is a research-intensive degree. Prior to admission to the program, an applicant must contact the Molecular Biology department professor directly to determine if they may be interested in serving as the student's potential adviser. Once a future graduate adviser agrees to accept a student into their lab, an applicant can start an application to the Molecular Biology Graduate program. Admissions to the program are allowed in the Fall, Spring and Summer semesters.

An application to the Ph.D. program should include a curriculum vitae (CV), a 2-page statement of research interests and career plans, contact information for three references, transcripts from previous institutions, and GRE scores. Those students with an M.S. degree may be excluded from the GRE requirement. Following admission, a student will conduct a guided research project in the laboratory into which they have been accepted. The faculty research adviser is responsible for financial support of the student. A research project is expected to result in publications in peer-reviewed journals as well as presentations at the departmental seminars and scientific meetings.

Throughout the degree program, a graduate student is guided and evaluated by their research adviser and graduate committee. A student must develop a Program of Study approved by the student's graduate committee. Student performance is monitored by a dissertation committee that evaluates a student's seminar presentations, research proposal, preliminary exam, written dissertation, final public seminar, and final oral defense of the dissertation. In consultation with the faculty research adviser, a student may elect to serve as a teaching assistant. Students pursuing the Ph.D. degree in Molecular Biology usually complete their program in approximately five years.

Requirements for Ph.D. degree in Molecular Biology

A Program of Study for the Ph.D. in Molecular Biology must include a minimum of 72 semester hours of credit at the 4000 level or above from UW or equivalent levels from another approved university. This 72-hour requirement may include graduate credits earned while working toward the master's degree in the same area, but at least 42 hours (of the 72) must be earned in formal coursework, including the specific requirements for the program detailed below. Additional credits toward the 72-hour requirement may include additional formal course credits, Dissertation Research credits (MOLB 5980), or MOLB 5960 credits or Internship credits (MOLB 5990). The Program of Study must be on file in the Office of the Registrar before the preliminary examination can be scheduled. Additional information on graduate student regulations and policies, including transfer credit and credit reserved from undergraduate courses, is located here: https://www.uwyo.edu/registrar/graduate_students/resources.html

Specific requirements for the Ph.D. degree in Molecular Biology are listed below. The Program of Study is determined in consultation with the student's graduate committee.

- 3 credits of Advanced Biochemistry MOLB 5600 with a minimum grade of B.
 - This requirement may be fulfilled if a student has already received a minimum grade of B in MOLB 4600, MOLB 5600, or transfer credits for an equivalent course taken at another university (equivalency is determined by the student's graduate committee).
- 6 credits minimum of a 5000-level MOLB course from the following list: MOLB 5400, MOLB 5440, MOLB 5450, MOLB 5460, MOLB 5610, MOLB 5670, MOLB 5680.
- 4 credits of MOLB 5050 Advanced Student Seminar; 2 credits of MOLB 5050 must be taken the first semester a student enrolls in the graduate program
- Students are required to enroll in the departmental seminar course each semester: MOLB 5051 during the academic year; MOLB 5052 in the summer semester
- Other course credits as determined by the student in consultation with their graduate committee

- MOLB 5980 Dissertation Research (number of credits to be determined in consultation with the student's graduate committee)

Plant Sciences, M.S.

The Plant Sciences M.S. program emphasizes sustainable management of agronomic, horticultural, and forage crops, plant breeding, and invasive species management. Students are trained for scientific careers in academia, public and private sectors.

Plan A (Thesis)

Requirements for the master of science degree include 26 hours of coursework beyond the bachelor's degree numbered 4000 or above, 4 hours of thesis research, a research proposal, original research, and oral defense of the thesis.

The M.S. degree is typically completed in two years. The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

Plant Sciences, Ph.D.

A Ph.D. in Plant Sciences is a research-based terminal degree focusing on specific areas of plant production and management. Scientific training in plant production and vegetation management for careers in academia, public and private sectors.

Program Information

The requirements for the doctor of philosophy degree include 60 hours of coursework beyond the bachelor's degree numbered 4000 or above, 12 hours of dissertation research, a research proposal, original research, written and oral preliminary exams to be taken when most or all coursework is completed, and an oral defense of the dissertation.

Dissertations may be in a modified journal article format but must meet university formatting requirements.

The student's coursework is selected to fit the student's individual needs by mutual consultation among the student, his/her major professor, and graduate committee.

The student is expected to participate in the usual activities of scientific research such as attending and presenting at research seminars and professional meetings and publishing his/her research.

Rangeland Ecology and Watershed Management, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research and communicate with the public and potential clients.

Plan A (Thesis)

The master of science degree normally is offered under Plan A which requires at least the university minimum degree requirements and an oral examination.

An oral defense of the thesis is required.

Plan B (Non-thesis)

Plan B is available under special circumstances and requires 30 hours of graduate coursework.

Plan B candidates must also prepare one professional paper (i.e., content and form compatible with publication in a scientific journal) or, if the adviser requests, two professional papers in selected topic areas.

An oral defense of the paper(s) is required.

Additional Requirements

This program requires 30 credit hours (at least 12 from Rangeland Ecology and Watershed Management) approved by the student's graduate advisory committee and an approved research plan.

Rangeland Ecology and Watershed Management, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding rangeland ecology and watershed management.

Additional Requirements

This program requires 72 credit hours (at least 12 from Rangeland Ecology and Watershed Management) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan. Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework is complete) and an oral final examination.

Rangeland Ecology and Watershed Management/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between range and forest management and water resources and to provide students with a degree program in Rangeland Ecology and Watershed Management, which emphasizes the important issues in water resources.

Coursework and Thesis

- Water Resources requirements Credits: 10 *
- Statistics Credits: 3
- REWM 5620 - Range Management Seminar Credits: 1
- Other recommended graduate courses or substitution courses with adviser consent Credits: 12
- Plan A thesis Credit: 4

Minimum Credits: 30

*Water Resources Requirements

- Interdisciplinary component 9 hours (see Water Resources degree requirements)

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Soil Science, M.S.

The M.S. program is geared toward teaching graduate students the tools necessary to conduct robust scientific research.

Plan A (Thesis)

Plan A requires the university minimum degree requirements and an oral final examination.

Plan B (Non-thesis)

Plan B is available and requires 30 hours of graduate coursework.

An oral defense of the paper(s) is required.

Additional Requirements

This program requires 30 credit hours (at least 12 from Soil Science) approved by the student's graduate advisory committee and an approved research plan.

Soil Science, Ph.D.

The Ph.D. program allows graduate students to use the research-oriented tools learned during a master's program to conduct research on a major question surrounding soil science.

Additional Requirements

This program requires 72 credit hours (at least 12 from Soil Science) that include credits earned during a master's degree that are approved by the student's graduate advisory committee and an approved research plan.

Candidates must complete the minimum requirements for the doctor of philosophy degree, plus a preliminary examination (written and oral) covering knowledge related to the discipline (taken after most coursework is complete) and an oral final examination.

Soil Science/Water Resources, M.S.

The purpose of this program is to enhance the cross-disciplinary linkage between soil science and water resources and to provide students a degree program in Soil Science, which emphasizes the important issues in water resources.

Coursework and Thesis

Each student must complete a minimum of 26 credit hours of graduate level coursework and 4 thesis credit hours of SOIL 5960 to qualify for a master of science degree in soil science/water resources. Specific coursework will be determined by the student's graduate committee; however, each student is required to enhance his/her background and expertise in the water resources area through specialized coursework and a seminar as shown below.

Core Courses

Students must take or have taken equivalent courses in the four soils disciplines: physics, pedology, chemistry, and microbiology.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

SOIL5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture, and forestry.

Cross Listed MICR 5140.

Dual Listed SOIL 4140.

Prerequisite: SOIL 2010

Enhancement Courses

Students must take at least one of the following courses:

SOIL5110 - Modeling Water and Chemical Transport in Vasoë Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the

numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

SOIL5160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical and biological aspects of soils which impact fertilizer fate, uptake and plant growth.

Dual Listed SOIL 4160.

Prerequisite: SOIL 2010.

- SOIL 5170 - Analytical Methods for Ecosystems Research

Interdisciplinary Component: 9 Hours

(see Water Resources degree requirements)

Seminar in Water Resources: 1 Hour

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Graduate Seminar in Soil Science: 1 Hour

Plan A Thesis Requirement

Only Plan A thesis students are eligible for the master of science in soil science/water resources. In addition to coursework and a Plan A thesis, students must pass a final oral examination. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee to help ensure adherence to the master of science in soil science/water resources degree requirements and that research efforts are in the water area.

Water Resources, M.A.

The purpose of this program is to provide multidisciplinary training in water resources. Training is to be consistent with the rigor of professional water resources demands.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate-level coursework in the areas of: (1) technical hydrology, (2) natural resources economics and/or law, and (3) water quality. To ensure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Hydrology (3 Hours)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820 - Groundwater and Drainage Engineering Credits: 3

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110 - Modelling Flow Transport in Soil and Groundwater Systems Credits: 4

Law/Natural Resource Economics (3 Hours)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict,

cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

Water Quality (3 Hours)

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

One-Hour Seminar in Water Issues

Each student in the water resources interdisciplinary major program will be required to complete this course once during their graduate program. As part of the requirements for the seminar: (a) students will be required to present a seminar on a current water resource issue in Wyoming and to develop an executive summary of their issue to distribute to class participants. Each student is also required to participate in a discussion group following each seminar which stresses the interdisciplinary nature of the issue; (b) during the course of a student's graduate program, he/she will be required to present one seminar for the seminar series (preferably on some aspect of their thesis research). This presentation does not have to occur during the semester that the student is officially signed up for seminar credit.

REWM5250 - Water Resources Seminar

Credits: 1

Objective is to develop interaction among students from the various water resource disciplines to enhance their perspectives on how water problems are addressed within an interdisciplinary environment.

Prerequisite: graduate status.

Additional Requirements

The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

Water Resources, M.S.

The purpose of the program is to provide multidisciplinary education and to impart a multidisciplinary perspective to candidates. Training is to be consistent with the rigor of professional water resources demands.

Program Specific Degree Requirements

The academic program of study undertaken by the candidate must be designed to enhance the student's background and expertise through formal graduate level coursework in the areas of: (1) technical hydrology, (2) natural resources

economics and/or law, and (3) water quality. To insure a minimum multidisciplinary character, the course program must contain nine hours of coursework with at least 3 hours from each of the aforementioned areas and at least 6 of those credit hours must be from outside the student's sponsoring department, along with a 1 credit hour seminar on water resources organized through the Department of Ecosystem Science and Management. Only Plan A master's degree programs, which require the writing of a thesis in the water resources area, are acceptable for the water resources degree option.

Hydrology (3 Hours)

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

- CE 4820 - Groundwater and Drainage Engineering Credits: 3

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

SOIL5110 - Modeling Water and Chemical Transport in Vaso Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110 - Modelling Flow Transport in Soil and Groundwater Systems Credits: 4

Law/Natural Resource Economics (3 Hours)

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECEC 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGECEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various

statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

Water Quality (3 Hours)

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture

production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

The master's degree offered through these affiliations is awarded as a major with each of the sponsoring department's graduate programs. The water resources interdisciplinary major will be acknowledged on the graduate transcript and thereby certify to potential employers that the candidate has completed an in-depth multidisciplinary course program in the broad area of water resources.

Certificate

Reclamation/Restoration Ecology Graduate Certificate

The Reclamation/Restoration Ecology (RRE) graduate certificate prepares the student to use basic and applied ecological concepts to reclaim and/or restore processes and functions to disturbed ecosystems.

Required Certificate Courses:

Reclamation and Restoration Ecology Courses: 6 Hours

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

Reclamation Problems: 4 Hours

SOIL5565 - Research in Soil Science

Credits: 1-4

Max Credit (Max. 6)

Library, laboratory, and/or greenhouse investigations on select research topics. Graduate students will be required to give a presentation to the soil science group on their final product/ report.

Dual Listed SOIL 4465.

Prerequisite: Basic training in soil science research. SOIL 5565 reserved for graduate students.

OR

REWM5640 - Investigation

Credits: 1-4

Max Credit (Max. 10)

Research on specialized problems in range management. Investigations offered in the following areas of range management, habitat management, business management, range improvements and monitoring, watershed management, extension and international development.

Prerequisite: graduate standing.

Reclamation Process Course: 3 Hours

(choose one)

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment

relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms. Lecture with inclusive hands-on laboratory.

Cross Listed RNEW 5730.

Dual Listed BOT 4730.

Prerequisite: one course in ecology and one in physiology.

BOT5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 5780.

Dual Listed BOT 4780.

Prerequisite: Consent of instructor.

PLNT5070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 4070

Prerequisite: PLNT 1000, LIFE 1010

PLNT5470 - Seed Science and Technology

Credits: 3

Presents aspects of seed biology and processing including development, physiology, ecology, germination, viability, dormancy, production, conditioning, storage, certification and marketing.

Dual Listed PLNT 4470

Prerequisite: 8 hours of plant biology

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

- REWM 5280

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

RNEW5540 - Shrubland Ecology

Credits: 3

Ecology of shrub-dominated lands and shrub species in grasslands. Location, importance and environmental constraints of shrub distributions. Topics include herbivory, woody plant invasions, competitive interactions, monitoring and population dynamics. Emphasizes familiarity with scientific literature.

Prerequisite: RNEW 3000, BOT 4700.

SOIL5110 - Modeling Water and Chemical Transport in Vasoe Zone and Groundwater Systems

Credits: 4

Mathematical models will be formulated and applied to simulate water flow and chemical transport in soil and groundwater systems. Soil spatial variability and heterogeneity will be considered in the modeling processes. Using and comparing models, students will obtain the capability to transfer a physical problem to a mathematical model, to use numerical methods, such as the finite element method, to solve the mathematical problem, and to correctly interpret the numerical outputs. Students will develop and program numerical solutions for select problems and will utilize existing codes for modeling a variety of comprehensive problems.

- MATH 5110

SOIL5130 - Chemistry of the Soil Environment

Credits: 3

Evaluation of the chemical and physical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter, and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability, and pedogenetic processes will be emphasized.

Dual Listed SOIL 4130.

Prerequisite: MATH 1400, CHEM 1030 or CHEM 1060 and SOIL 2010.

SOIL5140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture, and forestry.

Cross Listed MICR 5140.

Dual Listed SOIL 4140.

Prerequisite: SOIL 2010

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

- ZOO 5550

Planning/Policy Courses: 3 Hours

(Choose One)

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

Minimum Total Credits Needed: 16 Hours

Additional Requirements

The graduate certificate will be granted to students who have completed a B.S. in an appropriate science-oriented discipline or are currently enrolled in an M.S. or Ph.D. program.

The graduate certificate will also be available to professionals working in reclamation/restoration oriented fields seeking to upgrade their training in reclamation and restoration ecology. Those interested in the graduate certificate will be required to complete the course work listed below as well as write a synopsis paper with a formal presentation advertised as an open forum seminar.

QuickStart Program

Plant Sciences, B.S./M.S. QuickStart

The Plant Sciences B.S./M.S. QuickStart program enables students to work toward both the B.S. and M.S. degrees simultaneously. Accepted students earn a B.S. in Plant Production and Protection and an M.S. in Plant Sciences.

Program Information

The combined Plant Sciences B.S./M.S. QuickStart program enables highly-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter toward both the B.S. and M.S. degrees. Accepted students would earn a B.S. degree in Plant Production and Protection and the M.S. degree in Plant Sciences. This program allows for early planning of the M.S. portion of the student's education, along with beginning a thesis research project before the completion of the B.S. degree. It offers increased flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit-hour load. As many as 6 credit hours of undergraduate coursework at the 5000 level (or 4000 level for courses in which no 5000-level course is available) may be counted toward both the B.S. and M.S. degree programs. Additionally, students retain the existing right to reserve up to 6 hours of graduate credit that may be taken during their undergraduate degree program. These 6 reserved credits will NOT count toward both the B.S. and M.S. degrees, but only toward the M.S. degree.

Admission to the program

Minimum requirements for admission to the accelerated program are:

1. completion of sophomore year, 60 credit hours,
2. a minimum overall GPA of 3.0,
3. a minimum GPA of 3.0 in PLNT courses,

4. a minimum of three letters of recommendation (at least two must be from faculty at UW),
5. a DPS faculty member willing to serve as M.S. advisor, and
6. a research proposal submitted to, and approved by, the student's M.S. advisor and at least one other Plant Sciences faculty member as a presumptive graduate committee member.

Transfer students must have also completed at least 15 credit hours of coursework at UW to be eligible for admission to this program.

If interested in this program, please visit our website at <http://www.uwyo.edu/plantsciences/> for further information on additional requirements.

College of Arts & Sciences

113 Arts and Sciences Building

Camellia Okpodu, Dean

Phone: (307) 766-4106 FAX: (307) 766-2697

Web site: www.uwyo.edu/as

Aims and Objectives

The College of Arts and Sciences (A&S) is committed to providing a balanced education that matches cultural breadth with disciplinary depth. Students in the College of Arts and Sciences learn to address complex contemporary problems and to place them in their wider social, historical and ethical contexts. To achieve these goals, degree programs require students to develop expertise in a particular field, gain critical understanding of major areas of human knowledge and select from required courses and free electives to prepare for the challenges of the new century.

A successful student in any of the departments and programs in the College of Arts and Sciences will have an excellent foundation for professional success, graduate study, and a passion for lifelong learning.

Through hands-on research and creative projects (either on faculty projects or independently with faculty guidance and mentoring), fieldwork, internships, and study abroad, students integrate and bring coherence to their classroom learning.

Student Responsibilities

To graduate from the College of Arts and Sciences, students must satisfy all university, college, and major requirements for a given degree. These requirements apply whether the work is taken within the college or transferred from anywhere else within or outside the university (please refer to section below "Acceptance of Transfer Credit").

The college holds students responsible for knowing degree and major requirements and for completing the necessary courses. Students are also expected to know the regulations that govern the academic standards needed to continue study at the university. Students should be aware that changing majors and/or colleges may result in delays in meeting degree requirements and that requirements themselves sometimes change (see "Graduation Requirements and Procedures" section of this *Catalog*).

Academic Advising

To help plan a program of study, students are assigned an academic adviser by the department/ program of their major. Students undecided about a major are advised in the UW Advising, Career, and Exploratory Studies office (222 Knight Hall).

Students should consult regularly with their academic adviser not only for course scheduling, but also to discuss educational and career goals. Faculty and professional advisers can connect students to the many college and university resources to assist undergraduate study. Instructors are also willing to discuss concerns students may have regarding specific courses.

Changing/Declaring a Major or Minor

When ready to declare or change a major, minor, or dual/concurrent major in a department or program in the college, the appropriate form is available from the Office of the Registrar (167 Knight Hall) or the Registrar's Web page. Approval is required from the appropriate department heads/program directors. Departments/programs will assign advisors at the time of signing their approval on the form.

Programs of Study

Undergraduate Degrees

A variety of specialized concentrations are offered within many of the following degree programs. Take a look at the department sections in this *Catalog* that follow this section or the departments' Web sites. Additionally, there are several inter-college or interdisciplinary degrees/majors such as Earth System Science and the affiliated major in Environment and Natural Resources that draw courses from several disciplines. See more detailed descriptions in this *Catalog* or the University of Wyoming home page at www.uwyo.edu, click on the A-Z Directory.

Minors in Arts and Sciences

The College of Arts and Sciences offers all university students systematic studies leading to recognized academic minors. Minors are available in all academic programs in the college and in a number of interdisciplinary areas.

A&S minors have two aims: to encourage students to create a focus for their course work outside their major by coordinating their elective studies; and to enhance chances of employment or graduate admission with a formally recognized field of study.

Minors consist of course requirements ranging from 18-24 credit hours of study, typically including significant work at the junior and senior level. A&S departments and programs offering minors and interdisciplinary degrees may have further conditions and restrictions regarding requirements in the minor. To be counted toward a minor, courses must be completed with a grade of C or better.

Students desiring a minor must notify the department in which the minor is offered. Forms for declaring a minor are available in the Office of the Registrar (167 Knight Hall) or on the Registrar's Web page. The department of the minor will assign an adviser.

For a description of the minors in A&S, see department offices or Web sites.

Minors available in the College of Arts and Sciences include:

African American and Diaspora Studies
American Studies
Anthropology

Biology
Botany
Chemistry

Communication and Journalism Department

Communication
Journalism
Marketing Communication
Public Relations

Creative Writing

Criminal Justice

Criminal Justice
Pre-law

English Department

Literary Studies
Professional Writing

Gender and Women's Studies

Gender and Women's Studies
Queer Studies

Geography
Geology
History

International Studies

Asian Studies
European Studies
International Studies

Latina/o Studies

Modern and Classical Languages Department

Chinese
Classical Civilization
French
German
Japanese
Latin
Spanish

Music
Native American and Indigenous Studies
Paleoenvironmental Studies (*interdisciplinary*)

Philosophy

Environmental Values
Ethics
Philosophy

Physics/Astronomy Department

Astronomy
Physics

Political Science

American Politics
International Relations and Comparative Government
Political Theory
Public Law

Psychology Department

Aging Studies
Psychology

Religious Studies
Remote Sensing
Sociology

Theatre and Dance Department

Dance
Theatre

Visual and Literary Arts Department

Art History
Ceramics

Digital Media

Drawing
Metalsmithing
Museum Studies

Painting
Photography
Printmaking
Sculpture

Zoology and Physiology Department

Human and Animal Physiology
Neuroscience

Wildlife and Fisheries Biology and Management

Zoology

College Degree Requirements- The 2015 A&S Core

Bachelor of Arts or Science Programs

Beginning fall 2015, new university and college general education curricula, the 2015 University Studies Program (USP) and the 2015 A&S Core, were implemented. Refer to the USP section of this *Catalog* for details regarding University Studies requirements.

Students who matriculate for the first time at UW or a Wyoming community college in fall 2015 or after are required to follow both the new USP and A&S Core. Students transferring from a Wyoming community college with an associate's degree and the Wyoming Core completed between May 2013 and fall 2015, may continue to complete the 2003 USP and 2003 A&S Core requirements (if there has been no interruption in their enrollment for a year or more). Students who matriculated at UW or a Wyoming community college prior to fall 2015 and choose the 2015 USP must also complete the 2015 A&S Core requirements. For additional information please refer to the sections in this *Catalog* that describe the university graduation requirements, the 2015 University Studies Program, and the policies for reenrolling at UW after an absence of a year or more.

I. College credit hour requirements

- A. **Minimum total semester hours 120**
- B. **Upper-division credit requirements (42).** Thirty of the 42 hours must be earned from UW. Courses must be taken for a letter grade unless offered for S/U only. This is an all-university requirement for all degree programs and may come from the courses that fulfill the USP, the A&S Core, the major, the minor, and electives.
- C. **Major field of study (30-60).** Credit hours in excess of 60 in the major subject may not be used to satisfy the requirement of 120 hours for graduation. Credits in AS internship, independent study or special topics courses (AS 2400, AS 2490, AS 4400, AS 4500, AS 4510, AS 4900, and AS 4975) may not be used to fulfill these outside the major requirements. At least 30 hours of C grade or better must be earned in the major subject (the major may require more). Courses in the major must be taken for a letter grade unless offered for S/U only.
- D. **A&S Core requirements (6).** Courses must be taken for a letter grade unless offered for S/U only.

All other university and college regulations apply. See "Graduation Requirements and Procedures" section of this *Catalog* for more information. Graduate level "Enrichment" courses do not count toward the requirements for a bachelor's degree.

II. 2015 A&S Core Curriculum

Graduates of the College of Arts and Sciences are expected to be liberally educated, to have the knowledge and skills to deal with the unexpected, and to see opportunities from multiple perspectives. To develop these abilities, the college faculty implemented the A&S Core.

The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

1. **U.S. Diversity (ASD).** This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.
2. **Global Awareness (ASG).** Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples of the world, including international systems of commerce, art, science, technology, politics, communication, belief, and justice, among other.

College Degree Requirements Prior to Fall 2015 for Continuing and Reenrolling Students

A&S Core requirements for a student continuing a degree program in effect at the time of matriculation at UW are found in the relevant previous *Catalog*. Contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwyo.edu.

Students who re-enter the university after an absence of a year or more should refer to other sections of this Catalog for university policies and procedures. Unless approved otherwise, reenrolling students, after a year's absence, are required to follow the University Studies and A&S Core requirements in effect the semester of their re-enrollment. However, all majors in A&S who have yet to complete the A&S Core, regardless of their initial enrollment, must refer to the current list of approved courses.

Checksheets and lists of courses that satisfy A&S college core requirements are available on the Web at www.uwyo.edu/as or in the A&S Advising Center, Ross 6, 766-4013, asadvising@uwyo.edu.

Departments and programs in the College of Arts and Sciences may require reenrolling students to complete requirements in the major that meet the current expectations of the discipline.

Transfer Students and Acceptance of Transfer Credit

The College of Arts and Sciences and its departments reserve the right to grant transfer credit toward the bachelor's degree only for those courses where a grade of C or better was earned. Students transferring credits from a university or college outside Wyoming with questions about how courses taken elsewhere fulfill the A&S Core may contact the A&S Advising Center, Ross 6, 766-4013, asadvice@uwyo.edu.

Courses Taken for S/U Credit

Students may include up to 20 semester credit hours in free electives with a grade of S as part of the total hours required by the College of Arts and Sciences for graduation. However, no S/U hours may be used to satisfy university and college core general education requirements or major requirements, including the required 42 upper-division credit hours unless the course is offered for S/U grading only.

Students registering in courses for S/U grades are subject to all general regulations.

Concurrent Majors

Students may pursue two or more majors simultaneously. With careful planning, A&S students may be able to use all or most of the free elective hours for requirements in the other majors. Refer also to the section, "Graduation Requirements and Procedures" in this *Catalog*.

The A&S Core must be met only once by students whose primary major is in the College of Arts and Sciences. Students whose degree programs are in other UW colleges are welcome to earn a concurrent major in A&S. These students do not have to meet the A&S Core requirements. The student earns one degree with one diploma.

Students pursuing a concurrent major must contact both departments involved for assignments to advisers.

Dual Degrees

Students may simultaneously pursue degrees in the same or more than one UW college. In addition to requirements described in the section "Graduation Requirements and Procedures" in this *Catalog*, students in another UW college who wish to earn a degree from A&S must also complete the A&S Core. A&S students working on dual degrees in the A&S College need to meet the A&S Core just once. A diploma is awarded for each degree.

Each additional degree requires 30 more credit hours added to the 120 credits to the primary degree. Of these 30 credits, 12 have to be at the 3XXX-4XXX levels.

Second Bachelor's Degrees

For students seeking a second bachelor's degree in the College of Arts and Sciences whose **first degree is from another university**, the minimum requirements include:

- 30 semester hours earned from the University of Wyoming, 12 of which must be upper division (3XXX-4XXX level) or graduate level (credit by examination does not count as UW hours).
- Completion of the U.S. and Wyoming Constitutions requirement (V courses in the University Studies Program course list in this *Catalog*).
- If the first degree is from an institution where English is not the predominant language, the COM1 and COM2 requirements of the University Studies Program must be completed successfully.
- Students must also meet the 2015 A&S Core requirements.

For students whose **first degree is from UW**:

- The additional required 30 hours (12 of these at the 3XXX-4XXX) are added to the degree requiring the least number of hours. For example, for a first degree A&S requires 120 hours. So the total credits a UW student would have to complete for the second bachelor's degree is a minimum of 150 credits. Since the University requires a total of 42 upper division hours for a degree, for the second degree from A&S, a UW student would need to earn a total of 54 hours at the 3XXX-4XXX level. For more information, please see the Second Bachelor's Degree entry in the section, "Graduation Requirements and Procedures" in this *Catalog*.
- Students whose **first degree is from another UW college** must meet the 2015 A&S Core requirements.
- In situations in which a student is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student's department can ask the Office of the Registrar to load selected courses into the student's record.

Concurrent Major in Environment and Natural Resources

A student majoring in any A&S department/program may earn a double major by completing the courses required for the Environment and Natural Resource (ENR) program in addition to the requirements in their A&S major and the College A&S Core. The School of ENR Web site, <http://www.uwyo.edu/enr> has detailed information, or contact the School at (307) 766-5080.

Preprofessional Studies

The College of Arts and Sciences prepares students to enter professional schools through preprofessional programs of study described below.

Prelaw Study. Students usually need a bachelor's degree prior to beginning the study of law. There is no prescribed course of undergraduate study and no restrictions as to the field in which the degree is earned. However, to prepare for this competitive profession, prelaw students are advised to select courses that help to develop those talents and skills essential to the study and practice of law. Logical and critical thinking, conflict evaluation/resolution and effective verbal/nonverbal communication skills are essential. Additionally, students should understand the political, economic, social and cultural institutions and values that characterize human society. Rigorous courses in any discipline increase abilities in these areas. Regardless of the prelaw major, courses in the broad liberal arts--the sciences, social sciences, fine arts and humanities--increase understanding of the public's diverse interests and backgrounds.

Prelaw students do not have to declare a major at the time of first enrollment if they wish to explore options. Students who are undeclared in the College of Arts & Sciences are assigned advisers in the Advising, Career, and Exploratory Studies office until they decide upon a degree program. Please note that a prelaw minor is available.

In addition to an adviser in the major, prelaw students may contact the designated UW prelaw adviser for assistance in developing a program of study, for career counseling and for guidance in applying to law schools. Contact the A&S Advising Center, Ross 6, 766-4013, asadvise@uwyo.edu for information.

Detailed information about applying to law schools, the Law School Admissions Test (LSAT) and preparation materials, and links to other web sites are at www.LSAC.org.

Library Preprofessional Study. Librarians are information professionals who research, organize, and classify materials so the public can access information. Not only do they work with printed materials, but all the technological advances in digital media such as electronic databases and eBooks. Some librarians focus on teaching the public, scholars, and students how to access and use these materials, while others concentrate on collecting and maintaining these diverse resources. Librarianship offers many career opportunities to people of different academic backgrounds, interests, and talents. Most public, academic, and special libraries require a Master's degree in library science (MLS).

The degree programs and minors in the College of Arts and Sciences offer the variety of academic preparation expected by accredited library schools in the country. Most of the graduate schools in library science require a bachelor's degree, a good undergraduate record, and a reading knowledge of a foreign language for admission. The best undergraduate preparation includes a wide range of courses in the sciences, social sciences, and humanities along with a strong concentration in one subject area. The choice of a major will be determined by the student's academic interest and professional objective. The general education that the University Studies and the A&S Core require provide the well-rounded background graduate schools expect of their MLS candidates.

Additional information about library schools, their requirements, and programs as well as career opportunities may be obtained from the reference desk at Coe Library and the Center for Advising and Career Services. The U.S. Bureau of Labor Statistics "Occupational Outlook Handbook" at www.bls.gov/ooh/ has detailed descriptions of the varied work of librarians, working conditions, employment outlook, and sources for additional information.

Pre-Health Study. Students in several A&S majors may be working toward the following careers: athletic training, chiropractic, dentistry, medicine, occupational therapy, optometry, physical therapy, physician assistant, or public health. These professional schools are favorably impressed by a broad educational background, including a substantial number of non-science and science courses; therefore, students are well advised to look beyond the minimum requirements.

Students may select any major in which they are interested to discuss preparation for such careers. In addition to completing all university, college and departmental requirements, students must include in their curriculum the basic professional school requirements, including courses in biology, chemistry, math, and physics. Professional schools have other specific requirements and students should learn about any additional recommendations from those professional schools in which they are interested. We strongly suggest contacting the Pre-Health Advising office [College of Health Sciences, 110 Health Sciences, (307) 766-3878, or hsadvise@uwyo.edu] website: www.uwyo.edu/preprof/.

Common majors in the College of A & S for these preprofessional programs include Chemistry, Biology, Botany, Psychology, and Physiology. However, there are pre-health students in programs as diverse as theatre and dance and anthropology. Students need not declare a major immediately upon first enrollment. Advisers in individual departments can discuss options or if students wish to remain undeclared, they are advised in either the UW Advising, Career, and Exploratory Studies office or the Health Sciences Advising office.

The pre-health advisers in the College of Health Sciences have current information regarding professional school admission requirements, entrance examinations, programs in Western Interstate Commission on Higher Education (WICHE), the Wyoming Medical Contract Program WWAMI (affiliated with the University of Washington School of Medicine) and financial assistance for professional education. The website, <http://www.uwyo.edu/preprof/> includes additional information.

Internships

Many departments in the College of Arts and Sciences offer internships for academic credit, and some provide monetary compensation. Academic internships provide practical, hands-on experience in a professional job setting as a complement to classroom instruction. An internship can provide students with both insight and preparation for future jobs. All internships require a strong background in writing, organizational ability and analytic skills. Junior or senior standing is recommended.

Major

African American and Diaspora Studies, B.A.

African American and Diaspora Studies (AADS) offers undergraduates an opportunity to engage in an interdisciplinary examination of the history, culture, and life of African Americans and the African diaspora from ancient times to the present day.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an

opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

COM1 - Communication 1

Credits: 3
College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

A&S College Core

The College of Arts and Sciences requires:

- D - Diversity (3 credits)
- G - Global (3 credits)

Major Requirements

The B.A. in African American and Diaspora Studies consists of 35 credit hours:

Core Courses

15 credit hours of core course requirements:

AAST1000 - Introduction to African American Studies

Credits: 3

Surveys African presence in America. Selected teachings are designed to give the student a concise understanding of the heritage of African people in America.

USP 2003-2014 Code U3D
A&S College Core 2015 ASD

AAST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics,

students will be primed to tackle more advanced courses on Africa.

Cross Listed INST 2240.
USP 2003-2014 Code U3WB
USP 2015 Code U5C2

AAST2360 - African American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

USP 2003-2014 Code U3CS, U3G
Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST4975 - Independent Research

Credits: 1-3
Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.

Lower Division Course

3 or 6 credit hours of a lower division (1000- or 2000- level) AAST course, excluding core courses. Chose one OR two of the following:

AAST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional

discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities. Enrollment preference will be given to We The People FIG students.

Cross Listed NAIS 1030 /AMST 1030 / WMST 1030/LTST 1030.

USP 2003-2014 Code A3D, U3I

A&S College Core 2015 ASD

or

AAST1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

or

AAST2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed ENGL 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

or

AAST2360 - African American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5C2

A&S College Core 2015 ASD

or

AAST2370 - Blues and African American Lit

Credits: 3

Max Credit 3

This course examines scholarship on blues music (the first form of African American popular music) as well as literature that employs blues themes. Specific attention is given to the discourse of authenticity

Cross Listed ENGL 2370

or

AAST2450 - Traditional African Religion

Credits: 3

Surveys traditional religions of Africa, both ancient and contemporary.

Cross Listed RELI 2450.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

or

AAST2990 - Topics:

Credits: 1-3 or 3

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in African American & Diaspora Studies not covered by program courses.

USP 2003-2014 Code U3D

Upper Division Courses

6 or 9 credit hours of upper division (3000- or 4000-level) AAST courses. Choose two OR three of the following:

AAST3000 - African American Studies in Music

Credits: 3

Surveys African American music from its origins in Africa to current, popular jazz, rock, soul and rap forms.

USP 2015 Code U5H

or

AAST3010 - The African American Aesthetic

Credits: 3

Examines interrelationship of the creative process with cultural and philosophical motifs, as well as the spiritual and the artistic amongst African people on the continent and Diaspora.

Prerequisite: AAST 1000 or any AAST 2000-level course.

or

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on

civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

USP 2003-2014 Code U3CS, U3G

Prerequisite: AAST 1000 or any AAST 2000-level course.

or

AAST3260 - African Spirits in the New World

Credits: 3

Begins with Yoruba roots in Africa travels with the African Diaspora focusing on spirit possession in Haitian Vodou, Cuban Santeria, Jamaican Revival Zion, Jamaican Rastafarianism, Brazilian Candomblé, and "Black Church" in the United States using ethnography and postcolonial theory of religious studies.

Cross Listed RELI 3260.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: AAST 1000 or any AAST 2000 level course or RELI 1000.

or

AAST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed HIST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/ HIST 2360.

or

AAST3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed INST 3933 /PHIL 3933.

USP 2015 Code U5H

A&S College Core 2015 ASG

Restricted Restricted to junior or senior class standing.

Prerequisite: A prior course in AAST, INST or PHIL.

or

AAST4000 - Black Freedom Movement, AAST 1955- Present

Credits: 3

Presents the struggle of African Americans for self-definition, self-development, and self-determination from the inception of the modern civil rights movements to the contemporary period.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 USD

Prerequisite: 3 hours of AAST courses.

or

AAST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed HIST 4020.

USP 2003-2014 Code U3D, U3CH

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

or

AAST4050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 4050.

Dual Listed AAST 5050.

Prerequisite: junior standing and instructor consultation.

or

AAST4100 - African American Religious Culture

Credits: 3

Mid-level writing-intensive seminar. Comparative study of African American religious celebration, primarily in the context of Afro-Christianity, but touching on Islam, Candomble, "Voodoo," Santeria, and Rastafarianism.

Cross Listed RELI 4100.

USP 2003-2014 Code WC, D
USP 2015 Code COM3
A&S College Core 2015 ASD

Prerequisite: WB and one of the following: AAST 1000 or any AAST 2000-level course or RELI 1000.
or

AAST4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 4160.

Dual Listed AAST 5160.

USP 2003-2014 Code U3D, U3CH

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 9 credit hours in AAST or COJO.
or

AAST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 4233 and GWST 4233; dual-listed with AAST 5233.

USP 2003-2014 Code U3WC
USP 2015 Code U5WC, U5C3
A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.
or

AAST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Former Course Number [AAST 4200]

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

or

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

or

AAST4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed Cross list with ENGL 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

or

AAST4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 4455.

Dual Listed AAST 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

or

AAST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed LTST 4675 /GWST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of

or

AAST4970 - Internship in AAST

Credits: 1-12

Designed for students to utilize the knowledge and skills obtained in their program of study to be applied at an organization or institution. Students will provide a job description, sign an internship contract, keep daily work journals, provide work samples, submit a paper, and include a final evaluation by their Internship supervisor.

Prerequisite: 9 hours in AAST courses.

or

AAST4975 - Independent Research

Credits: 1-3

Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.

or

AAST4990 - Topics:

Credits: 3

In-depth study of a topic not offered as regular course.

Prerequisite: COM1.

Foreign Language

8 credit hours of a single foreign language. The courses below list some, but not all, possible options:

ARBC1010 - First Year Arabic I

Credits: 4

Introduces beginning language learners to the Arabic writing system and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) at word, phrase and sentence levels.

USP 2015 Code U5H

and

ARBC1020 - First Year Arabic II

Credits: 4

Introduces beginning language learners to the fundamentals of Modern Standard Arabic and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) and practicing them in a variety of academic contexts.

USP 2015 Code U5H

Prerequisite: ARBC 1010 or LANG 1010.

or

FREN1010 - First Year French I

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

and

FREN1020 - First Year French II

Credits: 4

Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: FREN 1010 or two years of high school French.

or

GERM1010 - First Year German I

Credits: 4

Explores fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

and

GERM1020 - First Year German II

Credits: 4

Examines fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: GERM 1010 or two years of high school German.

or

JAPN1010 - First Year Japanese I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered fall semester)

USP 2015 Code U5H

and

JAPN1020 - First Year Japanese II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered spring semester)

USP 2015 Code U5H

Prerequisite: JAPN 1010 or equivalent.

or

LATN1010 - First Year Latin I

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered fall semester)

USP 2015 Code U5H

and

LATN1020 - First Year Latin II

Credits: 4

Studies fundamentals of grammar, composition and reading.

When Offered (Offered spring semester)

USP 2015 Code U5H

Prerequisite: LATN 1010 or equivalent.

or

SPAN1010 - First Year Spanish I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H
and

SPAN1020 - First Year Spanish II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: SPAN 1010 or two years of high school Spanish.

Additional Requirements

Grade Requirements

AAST classes applied to AAST degrees must be passed with a grade of C or better.

Additional Information

In order to provide a broader range of relevant and enriching courses, in any given year the program in AAST offers topics courses and courses cross-listed with other majors and departments.

American Studies, B.A.

Explore cultural experiences past and present through interdisciplinary study of American lives, communities, and ideas. Writing, critical thinking, and internship opportunities prepare you for careers in education, law, business, community non-profits, public institutions, or graduate study. Flexible 2nd major for any field and for transfer students.

Additional Information

Undergraduate Major

The American Studies B.A. frames and develops each student's individual interests, and allows students to include courses from any program and department that sustain a student's engagement with their particular emphasis. Individual programs of study are as varied as our students.

We value each student as a person, and understand that an education is much more than a list of courses. Our advising is central in supporting each student's path and success through the major and beyond the degree.

Examples of concentrations that draw on courses outside American Studies - interests which we then integrate in our independent studies, internships, and the senior seminar - include sports studies, popular music history, comparative

ethnic studies, marketing, military history, sustainability, disability advocacy, museum studies, philosophy of science, environmental studies, public health and social justice, and the U.S. in international perspectives. Each student develops a concentration of study with their American Studies advisor with ample room to combine courses and interests into a coherent undergraduate education.

The American Studies B.A. can be an attractive second major for students in any UW degree program where cultural context enriches and expands work in their professional or scholarly field. The flexible nature of our B.A. allows us to work effectively with students changing majors at any point in their undergraduate experience as well as transfer students.

Program Learning Outcomes

Students graduating with a B.A. in American Studies integrate study from several fields with their study in American Studies courses, in individual programs of study. The American Studies B.A. prepares students to enter graduate and professional programs, enter education certification programs, and work in community organizations and other public professional settings. Coursework in American Studies prepares students to:

- Interpret American experiences and creative expressions by applying appropriate approaches to words, narratives, images, material objects, communities, built environments, cross-cultural comparison, continuities and discontinuities with the past in a range of American cultural settings.
- Understand the processes of diversity experience including their own, through study of identity formation, performance of identity, stereotyping, contact, memory, and national identity.
- Demonstrate critical analysis, interpretation, or insight, through effective communication primarily in writing but also in speaking (when appropriate, performance or display may embody these as well), as demonstrated in analytically coherent interpretive writing, authoritative, informed oral presentation, and well-documented, visually effective performance or display (where appropriate).
- Apply American Studies methods field-based courses and/or internships, through use of Studies approaches and competencies in non-classroom settings, as demonstrated in field course or internship evaluations and students' final reports.

Internship

The internship experience is essential for students specializing in public sector American studies. The American Studies program has an active program of scholarship-supported internships that can place students in work environments in Wyoming, other parts of the U.S., or in selected foreign countries.

Language

Because American Studies is both an international field with scholars all over the world, and the U.S. has transnational significance, **we strongly encourage students to take 2 years of language study** to achieve meaningful access to skills as readers, scholars, and travelers, and consider participating in an international exchange. Some languages currently in demand by American Studies students include Spanish, Arabic, and Japanese.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.
ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Arts and Sciences Core

College of Arts and Sciences Core

D - Diversity Credits: 3

G - Global Credits: 3

Curriculum

Through the following curriculum, students develop individual programs of study, with their advisers, to understand and engage American cultures.

Students pursuing Program Honors should also write an undergraduate thesis. Contact the Program Director for more details.

Foundation (12 credit hours)

- AMST2010 - Introduction to American Studies (3 credit hours)
- One course at the 1000- or 2000-level in an interdisciplinary field, including American History, or from departments and programs such as AADS, ENR, INST, GWST, LTST, NAIS, RELI, or appropriate courses transferred from other institutions, to be named in the program of study in consultation with an American Studies advisor. (3 credit hours)
- Two courses at any level outside AMST, from programs in The School of Culture, Gender, and Social Justice or appropriate substitutes in consultation with an American Studies advisor. (6 credit hours)

Concentration (27 credit hours)

Core (9 credit hours)

Each student must take three AMST courses at the 3000-4000 level, excluding the senior seminar. These seminars are designed to maintain an interdisciplinary view of American culture and to foster an American Studies community. (9 credit hours)

Theme (18 credit hours)

An American Studies theme is devised, in consultation with the student's adviser. Typical themes include: American diversity, environment and society, material culture and everyday life, visual culture and media, American cultural history, American institutions and public culture, the United States in international perspective. The theme must include a minimum of 6 credit hours and a maximum of 9 credit hours in a single discipline. Up to 3 credits can be granted for courses at the 1000-2000 level. (18 credit hours)

Capstone (6 Credits)

As part of the 6 credit hours of senior capstone requirements, each student must complete 3 credit hours of Senior Seminar. The additional 3 credit hours can be through either Independent Study or Internship.

AMST4985 - Senior Seminar

Credits: 3

With AMST 4010 or AMST 4970, completes the capstone coursework in AMST. Identifies a broad intellectual tradition in American Studies as foundation for student's research interests; builds a specific scholarly context appropriate to student's research; culminates in a substantial piece of written research appropriate in an identified subfield of American Studies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: senior standing in American studies or consent of program director.

AND

AMST4010 - Independent Study

Credits: 1-3

Max Credit 6

For upper division students in any major who can benefit from independent study in American Studies with minimal supervision.

Dual Listed AMST 5010.

Prerequisite: 3 hours in American Studies and approval of instructor.

OR

AMST4970 - Internship

Credits: 1-3

Max Credit (Max. 6)

Gives undergraduate students practical experience by working on a project at a public institution, agency or educational/cultural organization. Offered for S/U only.

Prerequisite: junior standing, completion of AMST 2010 and 12 hours in major and consent of instructor.

Anthropology, B.A.

Anthropology students will be able to demonstrate knowledge about the four subfields of anthropology. They will have participated in research and will be able to analyze and synthesize in relation to anthropological issues or theories.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Specific Requirements for a B.A.

In addition to university and college requirements listed in this *Catalog*, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975.

ANTH1100 - Introduction to Biological Anthropology

Credits: 4
Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

ANTH1300 - Introduction to Archaeology

Credits: 3

Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5PN
A&S College Core 2015 ASG

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L
USP 2015 Code U5C2

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB
USP 2015 Code U5C3

Prerequisite: ANTH 1200.

OR

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

Additional Requirements

In addition to university and college requirements listed in this Catalog, anthropology majors must complete two semesters of foreign language. ANTH 1100 and ANTH 1300 cannot be used to fulfill the USP PN requirement. Specific requirements for a B.A. in anthropology are ANTH 1100, 1200, 1300, and 2000. Students must complete ANTH 3300 or 3310. Students must complete ANTH 3300 or ANTH 3310. ANTH 3300 and ANTH 3310 require an additional 1 hour of ANTH 4975. Also required are an additional 21 credits of upper division anthropology for a total of 25 upper division (3000+) credits within the major, including at least one course from three different subfields (cultural anthropology, linguistic anthropology, biological anthropology, and archaeology). Courses that can be used to fulfill upper division cultural anthropology are ANTH 4023, 4300, 4310, 4320, 4325, 4330, 4340, 4350, 4380, 4020 (with instructor's consent). Courses that can be used to fulfill upper division linguistic anthropology are ANTH 4024, 4740, 4765, 4775, 4785, 4795, 4020 (with instructor's consent). Courses that can be used to fulfill upper division biological anthropology are ANTH 4022, 4210, 4215, 4220, 4230, 4255, 4260, 4020 (with instructor's consent). Courses that can be used to fulfill upper division archaeology are ANTH 4021, 4110, 4115, 4120, 4125, 4130, 4145, 4150, 4160, 4170, 4175, 4020 (with instructor's consent), or six credits of archaeological field school (ANTH 4140 or 5180). It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

Upper Division Cultural Anthropology

Courses that can be used to fulfill upper division cultural anthropology are

ANTH4023 - Seminar in Cultural Anthropology

Credits: 3

Considers current topics of interest within cultural anthropology.

Prerequisite: ANTH 1200.

ANTH4300 - Anthropology of Religion

Credits: 3

Provides a comparative anthropological study of religious systems, emphasizing analysis of symbolism, myth and ritual.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

Dual Listed ANTH 5320.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4325 - Symbolic Anthropology

Credits: 3

Teaches several anthropological approaches to symbolic and cultural analysis, while reading ethnographic examples of how symbolic analysis can be used to understand different cultures. Coursework assumes a basic knowledge of social science concepts.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4330 - Social Organization

Credits: 3

Provides theories of social organization, interrelations of social institutions, and current anthropological methods of interpretation.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, global politics of AIDS and other pandemics.

Dual Listed ANTH 5350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4380 - Visual Anthropology

Credits: 3

Offers anthropological interpretation of visual representations and media, including analysis of the development of ethnographic films and their contemporary use. Visual representations of many cultures as well as mainstream United States examples are analyzed.

Prerequisite: ANTH 1200.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Linguistic Anthropology

Courses that can be used to fulfill upper division linguistic anthropology are

ANTH4024 - Seminar in Linguistic Anthropology

Credits: 3

Considers current topics of interest within linguistic anthropology.

Prerequisite: ANTH 2000.

ANTH4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 5740.

Prerequisite: ANTH 2000 or consent of instructor.

ANTH4765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 5765.

Prerequisite: ANTH 2000 or consent of the instructor.

- ANTH 4775

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Biological Anthropology

Courses that can be used to fulfill upper division biological anthropology are

ANTH4022 - Seminar in Biological Anthropology

Credits: 3

Considers current topics of interest within biological anthropology.

Prerequisite: ANTH 1100.

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 5215.

When Offered (Normally offered every third semester)

Former Course Number [4200]

Prerequisite: ANTH 1100.

ANTH4220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 5220.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1100.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

ANTH4255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 5255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH4260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 5260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

Upper Division Archaeology

Courses that can be used to fulfill upper division archaeology are

ANTH4021 - Seminar in Archaeology

Credits: 3

Considers current topics of archaeological interest.

Prerequisite: ANTH 1300.

ANTH4110 - Zooarchaeology I

Credits: 3

Introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological relationships and problem-oriented taphonomic research.

Dual Listed ANTH 5110.

Prerequisite: ANTH 1300.

ANTH4115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

Dual Listed ANTH 5115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH4120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historic times.

Dual Listed ANTH 5120.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4125 - Northwestern Plains Prehistory

Credits: 3

Northwestern Plains archaeology from the Paleoindian period to historic contact. A review of important sites and artifact types, ongoing UW research projects, regional and other expressions of ideology, Native American ethnohistory and contemporary perspectives, and historic preservation issues.

Dual Listed ANTH 5125.

When Offered (Normally offered every third semester)

Former Course Number [4100]

Prerequisite: ANTH 1300.

ANTH4130 - Old World Archaeology

Credits: 3

Surveys major archaeological sequences of the Old World.

Dual Listed ANTH 5130.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 5145.

Prerequisite: ANTH 1300.

ANTH4150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max. 9)

Covers the prehistory of a specified region or time period within that region. Emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 5150.

Prerequisite: ANTH 1300.

ANTH4160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) hands-on-experience with GIS applications in archaeology through demonstrations, lectures, and structured inquiries.

Dual Listed ANTH 5160.

Prerequisite: ANTH 1200, or ANTH 1300.

ANTH4170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphical processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 5170.

Prerequisite: ANTH 1300.

ANTH4175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 5175.

Prerequisite: ANTH 1300.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

OR

- Six credits of archaeological field school (ANTH 4140 or ANTH 5180).

Recommended

It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. It is also recommended but not required that students complete a course in statistics (STAT 2050 or STAT 2070) and a third semester of foreign language. Courses required by the department for the major and minor must be completed with a grade of C- or better.

A&S College Core

The BA in Anthropology requires the A&S Core:

- D - Diversity (3 credits)
- G - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Art Education, B.A.

The BA in Art Education is a professional level degree preparing students to be reflective, innovative and engaged K-12 art educators. The curriculum includes extensive Studio Art competencies and studies in Art History and Professional Education.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Art Education** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA
required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.
required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramics class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel)

including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

Upper Division Art History: 6 hours

6 credits of upper division art history beyond ART 2010 and ART 2020

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Art Education Program Requirements

Minimum Course Requirements for B.A. in Art Education

Minimum course requirements for Art Education Majors follow the curriculum plan for the B.A. in Studio Art Degree:

- University and College requirements,
- Foundations Core,
- Art History Core,
- Studio Core
- Upper Division Studio Electives.

The exception that there is no Foreign Language requirement. Students are required to apply for a Wyoming Substitute Teaching Certificate in the fall of their first semester in the program. Additional requirements are:

Professional Education Courses: 10 Hours

EDST 2480: Diversity and the Politics of Schooling Credits: 4

required

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

required

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the

history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.
required

Art Education Courses: 27 Hours

ART3430 - Methods I

Credits: 3

Students investigate ways to translate art making practices and media into K-12 arts curricula and develop effective approaches to teaching these to the K-12 learner. Students create and teach lesson plans based on what they learn through their explorations; they also create their own artwork inspired by their studio investigations.

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.
required

ART3490 - Philosophy, Theory and Issues

Credits: 3

Students explore the foundational elements involved in the history and philosophies of Art Education and the key issues that shape contemporary approaches to teaching in the field. These investigations are undertaken to support students' developing teaching philosophies and inform the connections between their teaching and creative practices.

USP 2003-2014 Code U3CH

USP 2015 Code U5C2

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.
required

ART3550 - Art Education Practicum

Credits: 1-3

Max Credit (Max. 3)

Practicums are integral to an art education student's development as a teacher. They offer opportunities for immersion and hands-on teaching experiences in art classrooms guided by experienced teachers in the field and the UW faculty. Students develop skills and teaching strategies that complement classroom learning and strengthen their teaching practices.

Prerequisite: ART 3430 and ART 3490.
required

ART4440 - Methods II

Credits: 3

Students incorporate their understanding of the stages of artistic development with essential components of curriculum design to create lesson plans that engage the K-12 student in student-directed, holistic learning in the visual arts. Another component of the course is professional practice that includes classroom management and preparing professional portfolios.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

required

ART4460 - Curriculum Design

Credits: 3

Students develop a thorough knowledge of all the components of curriculum design in Art Education and will create a unit of instruction that includes a focus on enduring understandings, clarity of learning objective, assessment for the visual arts, instructional strategies, differentiation, and alignment with standards.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

required

ART4810 - Residency for Elementary

Credits: 6

This is an eight-week residency for teaching art full time at the elementary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4820 , students are certified in Wyoming to teach K-12 Art. Satisfactory/Unsatisfactory only.

Prerequisite: ART 4440 and ART 4460

required

ART4820 - Residency for Secondary

Credits: 6

This is an eight-week residency for teaching art full time at the secondary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4810, students are certified in Wyoming to teach K-12 Art.

Prerequisite: ART 4440 and ART 4460.

required

Studio or Art History Elective, any level: 3 Hours

**3 units of course in Studio Art or Art History at any level*

Additional Requirements

B.A. IN ART EDUCATION DEGREE

The BA in Art Education degree supports students' development as reflective, innovative and engaged K-12 art educators. The curriculum encompasses extensive Studio Art competencies as well as studies in Art History and Professional Education. Art Education courses cover a variety of teaching practices and methods of curriculum development that include interdisciplinary, multicultural approaches to teaching and emphasize relevance to the lives of K-12 students and the realities of our contemporary world. In-class learning is augmented with firsthand teaching experiences in local and regional schools, the University of Wyoming Art Museum, and includes teaching people of all ages in community-based arts settings. Upon graduation from our program, students earn Wyoming licensure for teaching K-12 Art.

Degree Requirements

Requirements of the degree include:

- 120 hours, including 91 hours within the major
- C or better in all courses taken to satisfy Major requirements
- Background check for all incoming art education degree students required prior to enrollment
- Application for art education degree is due prior to enrollment in Art Education courses
- 2.75 UW Total Institution GPA must be maintained throughout the Art Education Program of study
- 2.75 GPA within the major must be maintained throughout the Art Education Program of study
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses
- Score of 158 or above on the on the Praxis II Test: Art Content and Analysis by the end of the Residency semester
- As a Professional Degree, the BA in Art Education does not include the A&S Outside Major credit requirement.

Application

Students must fulfill the requirements listed in the *Application for the Art Education Program Checklist*:

- Satisfactory Completion of ART 2000 Portfolio Review
- C or above in all Education Courses
- C or above in all Art Content Courses
- Junior Standing (60+ credits)
- 2.75 or above overall UW total institutional GPA
- 2.75 or above in Major courses
- Completed background check

Probation, Removal, and Re-Application

- An Institutional and/or Major GPA below 2.75 mandates a probationary semester in the program (continuing with art ed courses) to raise GPA back up to 2.75 to continue
- If Institutional and Major GPA are not both above 2.75 by the end of the probationary semester, the student will be removed from the program
- Students may re-apply after removal from program if their GPA is again at or above 2.75

Art History, B.A.

The Art History B.A. offers students a broad understanding of world art, historiography, and professional practices related to the field. Closely linked to the Museum Studies minor, this degree prepares students for graduate work or the work force.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Art History** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Program Requirements

Requirements of the degree include:

- 120 hours, including 57 hours within the major
- All Art courses must be passed with a letter grade of C or better
- 2.50 GPA within major required
- 2.50 or above overall UW total institutional GPA
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses

Art History Core: 12 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

required

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.

USP 2003-2014 Code U3CH

required

Upper Division Electives: 30 Hours

*30 units - with the following stipulations:

15 hours 3000 or 4000 level Art History Courses

6 hours of ART 4790 Art Seminar

6 hours of upper division art history taken in other departments with cross listed courses

Courses in other disciplines as applicable

Honors Courses as applicable (Honors Program)

Potential other courses on a case by case basis in consultation with art history advisor

3 credits Internship or Art History travel course in consultation with art history advisor

Cross listed and applicable courses

*6 hours of upper division art history may be taken in other departments with cross listed courses (that may have prerequisites other than Art History).

ART4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

Interdisciplinary approach to study of women's issues in art. Uses literary/cultural texts to reinforce/contradict and/or expand/enlarge the art historical basis. Topics include domestic goddess, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 4830/GWST 4830.

When Offered (Normally offered every sixth semester)

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

OR

GWST4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ART 4830/ENGL 4830.

Dual Listed GWST 5830.

When Offered (Offered every other year)

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

ART4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the 20th century.

Cross Listed GWST 4780.

When Offered (Normally offered fall semester)

Prerequisite: ART 2010 or ART 2020 or 3 hours of WMST courses; and WB.

OR

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

AMST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 4250.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST4640 - Art and Ecology

Credits: 3

Focuses on the intersection of contemporary art with ecological concerns. Readings present philosophical, historical and cultural aspects of the art/ecology relationship; students reflect and question their own beliefs. Examples of art/artists are reviewed as well as how ecological artwork is developed. Students propose solutions and/ or create art in, out of, or about the environment; local sites are encouraged.

Prerequisite: 6 hours of ART and/or AMST or consent of the instructor.

OR

- ART 4640 - Art and Ecology Credits: 3
- Special Topics in American Studies including travel courses (as appropriate)
- Special topics in Classical and Modern Languages-including travel courses (as appropriate)
- HIST 4070 - History of the Book
- HIST 4075 - History of the Book
- HIST 4076 - History of the Book

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

Art Seminar

*6 hours of ART 4790 Art Seminar (fulfills USP COM 3 requirement)

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

USP 2015 Code U5C3

Prerequisite: 6 hours in art history.
required

Upper Division Art History: 15 hours

*15 hours 3000 or 4000 level Art History Courses

Internship or Travel

*3 credits Internship or Art History travel course in consultation with art history advisor

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

Foreign Language: 15 Hours

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

LANG2030 - Third Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010, LANG 1020.

LANG2040 - Fourth Semester in: (TOPIC)

Credits: 3

Max Credit (Max. 12)

Encompasses formal grammar introduction and review; periodic composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5C2

Prerequisite: Satisfactory completion of corresponding study in LANG 2030.

Additional Requirements and Description

The B.A. in Art History major offers students with a course of study that will provide depth and breadth in the history of art. Students will develop a broad understanding of world art, study the art of western and other global cultures in-depth, and explore the historiography and professional practices related to the field. Closely linked to the Museum Studies minor curriculum, the B.A. in Art History has a strong vocational application. This degree provides preparation for entry into graduate school or for students who want to enter the work force after their undergraduate education. Students will have the experience and training to enter into the cultural sector (arts or archival management, non-profit work in the arts and humanities, etc.).

Astronomy and Astrophysics, B.S.

The Bachelor of Science in Astronomy & Astrophysics program prepares students for graduate school, or a career in astronomy/astrophysics or a related field.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Astronomy and Astrophysics** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Requirements

Students in the Bachelor of Science in Astronomy major program are required to complete the following courses:

ASTR1050 - Survey of Astronomy

Credits: 4

Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR2320 - General Astronomy II

Credits: 4

Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR4610 - Introduction to Astrophysics

Credits: 3

Includes astrophysical sources of radiation, radiation transport, nonequilibrium processes, stellar atmospheres, stellar interiors and the interstellar medium.

Prerequisite: ASTR 2310, PHYS 2310 and concurrent registration in PHYS 4210 and PHYS 4410.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS3000 - Methods of Physics

Credits: 4

Provides introduction to mathematical methods and modern scientific computational tools used in physics/ astronomy. Topics include introduction to Python or linux operating system and use LabView software to run laboratory apparatus. Course examples will draw upon material in PHYS 1210/PHYS 1220 to help build fluency in the first year physics material.

Prerequisite: PHYS 1220.

PHYS3640 - Modern Electronics and Experimental Techniques

Credits: 4

Introduced to analog and digital circuits/devices and computer interfacing with laboratory equipment and experiments. Includes computer programming, the analysis of experimental data, and report writing. Apply the skills developed in this class to interface with and control representative instrumentation used in experimental physics laboratories.

Prerequisite: PHYS 2320.

PHYS3650 - Advanced Lab in Modern Physics and Electronics

Credits: 4

Presents fundamentals of modern optics, modern and quantum physics, E&M/electronics, and thermodynamics in a project oriented interactive undergraduate laboratory with a focus on professional grade lab report writing that qualifies as WB USP. Students learn professional data handling, error theory, and data analysis.

USP 2015 Code U5C3

Prerequisite: WA and PHYS 2310 or PHYS 2320.

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 4210.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4420 - Electricity and Magnetism II

Credits: 3

Follows PHYS 4410 and continues intermediate discussion of electricity and magnetism. Covers magnetostatics, magnetoquasistatics, alternating currents, electromagnetic waves, transmission lines and antennae.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 4410.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

PHYS4840 - Mathematical and Computational Physics II

Credits: 4

Second semester of a two-semester course. Provides a comprehensive overview of computational physics and provides numerous numerical techniques applied to physics problems. Topics include: numerical computations and visualizations, numerical solutions of ordinary differential equations, linear systems, curve fitting, discrete Fourier transforms, partial differential equations, integration, and Monte Carlo simulations of general stochastic systems. A weekly lab session will be held.

Prerequisite: MATH 2210, PHYS 2320 and PHYS 3000.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Additional Description

- See the "Prerequisite and MPE Cut Score Reference Chart" on the Math Placement website for the most up-to-date math placement equivalencies: <http://www.uwyo.edu/mathstats/math-placement/>.
- For declared physics/astronomy majors, the prerequisite of Math 2200 is waived and concurrent enrollment is approved.
- For declared physics/astronomy majors, the prerequisite of Math 2205 is waived and concurrent enrollment is approved.
- Students are strongly encouraged to enroll in Human Culture requirement courses that correspond to the College of Arts & Sciences Core required US Diversity (ASD) and Global Awareness (G) electives or else they will have to take separate ASD and ASG courses. A list of ASD & ASG courses that transfer is available.

If intending to apply to graduate school, plan to take the physics GRE by fall semester of the senior year

Additional Requirements

Course sequencing may need to be altered if ACT, SAT or Math Placement scores require a student to take pre-college courses before taking required math or English courses. • Not all courses are offered every semester and some electives may have prerequisites. Students should review course descriptions in the University Catalog and consult with their academic advisor to plan accordingly.

Students must have a minimum cumulative GPA of 2.0 to graduate. • Students must complete 42 hours of upper division (3000-level or above) coursework, 30 of which must be from the University of Wyoming. • Courses must be taken for a letter grade unless offered only for S/U. • University Studies Program (USP) Human Culture (H) and Physical & Natural World (PN) courses must be taken outside of the major subject, but can be cross-listed with the major

The Bachelor of Science degree in astronomy and astrophysics is administered by the Department of Physics and Astronomy faculty. Please see the Physics and Astronomy listing in this *Catalog* for more information.

Biology, B.S.

The Bachelor of Science degree in Biology is designed to provide a thorough foundation in biology as well as other supporting areas of physical and life sciences and mathematics while providing flexibility and student choice.

Additional Information

The Biology major is designed for students interested in obtaining a broad education in biological sciences. It enables students to combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the major. On completion of the core requirements for the major, specific courses selected to complete the major may vary according to students' interests and are worked out by consultations between student and adviser. The requirements for a bachelor of science degree in biology are as follows:

*Course must be completed with a grade of C or better.

The degree program is administered by the Department of Botany.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3

A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

Biology Major -Lower Division Courses

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines,

identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

A&S College Core 2015 Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

A&S College Core 2015 This course is not an acceptable prerequisite for CHEM 2440.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: PHYS 1110.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Foundational Biology - Two of the Following:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.
OR MOLB 2021 (General Microbiology, crosslisted with MICR 2021)

Data Science course- select ONE of the following:

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language,

including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

Biology Major Upper Division Courses

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Scientific Communication BOT 4100/4101 recommended; any COM3 will apply here.

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences. Preference given to seniors.

Cross Listed ZOO 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Biology, Ecology and Evolution Concentration, B.S.

The Department of Botany offers the Ecology and Evolution Concentration for Biology majors. This concentration will prepare students for a career or further graduate study. Students will receive the academic training to become park naturalists, environmental consultants, restoration ecologists, natural resource managers, conservation scientists, environmental educators, and research technicians in academic or government agencies. In addition to core concepts and theories, this concentration will teach students important skills that are required in the workforce, including organism identification, quantitative reasoning, data analysis, and scientific communication. Students also will have opportunities to participate in faculty research projects, which will train them for graduate research, careers in scientific discovery, or any endeavor where critical thinking and problem solving are essential components of the vocation.

To fulfill the requirements of the concentration, students will select five courses that meet a minimum of 15 credit hours in addition to what is required for the Biology Major. These will be selected from a variety of upper-division (3000-4000) courses that satisfy their individual interests (listed below).

Students must select

1. one course in organismal biology (A),
2. one course in ecology (B),
3. one course in evolution (C),
4. any one additional course from these three categories,
5. and one fourth-year capstone course (D).

Students who concentrate in Ecology and Evolution should plan to take LIFE3500 - Evolutionary Biology in their third year to be able to take an additional evolution course before graduating. All courses listed below will count toward this concentration. However, there are many other excellent courses offered across campus that are relevant to this concentration. Students can obtain approval to take other courses that are not included on the list below to satisfy the requirements of the concentration.

List of Potential Courses

A. Organismal Biology

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

B. Ecology

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Dual Listed ZOO 5650.

Prerequisite: LIFE 2022.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

OR

GEOL4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 4280.

Dual Listed GEOL 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

C. Evolution

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution of development)
- BOT4790 - Special Topics in Ecology Credits: 3 (Evolution seminar)

BOT5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

OR

ZOO5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/BOT 5060.

Prerequisite: graduate student in good standing.

D. Senior Capstone Course

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

Botany, B.S.

The Bachelor of Science degree in Botany is designed to provide a thorough foundation in botany as well as other supporting areas of physical and life sciences and mathematics.

Additional Information

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Lower Division Courses

Students take introductory courses in biology, chemistry, physics, and mathematics. These courses provide the foundation for more advanced work in upper division biology courses and contribute to a more comprehensive understanding of biological processes.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

or

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

Upper Division Courses

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT3600 - Plant Diversity and Systematics

Credits: 4

A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

A&S College Core 2015 Preference given to seniors

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences. Preference given to seniors.

Cross Listed ZOO 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

Upper Division BOT elective credits- **FOUR** credit hours from the following:

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed ATSC/ESS 4001/GEOL 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

BOT4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is

given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

BOT4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Provides undergraduate students with academic credit for approved work experiences in the fields of botany and

biology. Must be arranged in consultation with a botany faculty member and the work supervisor.

Prerequisite: junior or senior standing,

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT5000 - Graduate Seminar

Credits: 1-3

Max Credit (Max. 6)

Selected topics on current research in the botanical sciences.

Prerequisite: 15 hours of botany or biology.

BOT5060 - Fundamental Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

BOT5150 - Research in Remote Sensing

Credits: 1-6

Max Credit (Max. 6)

Independent research into problems on the remote sensing of vegetation using satellite technology.

Prerequisite: graduate standing and consent of instructor.

BOT5200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 4200.

BOT5480 - Spatial Information Sciences Seminar

Credits: 1

There are many earth science technologies, remote sensing, GIS and GPS. Synergism among these technologies increase the range of solutions for research and management. This course is a forum for presentation of these solutions or questions requiring solutions.

Cross Listed GEOL 5480.

Prerequisite: a course in remote sensing, GIS, GPS, and graduate standing.

BOT5600 - Ecological Modeling

Credits: 3

Course will immerse students in the most important and fundamental statistical modeling techniques for data analysis. Each class will include theoretical content delivered through a brief lecture and the immediate application of the theory through activities using R software.

Prerequisite: STAT 2050, STAT 3050, or an equivalent course.

Chemistry, B.A.

The Bachelor of Arts program (B.A.) is designed to provide a solid foundation in chemistry for those pursuing careers that would benefit from chemical expertise.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Chemistry** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Plan 1

(32 hours of chemistry)

Course Requirements

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

- **Additional USP requirements** Credits: 21
- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 45

Basic Chemistry: 26 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

OR

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

Additional Upper-Level Chemistry: 6 Hours

(Including one of the following)

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for

premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Minimum Total: 120 Hours

Additional Requirements

The Plan 1 B.S. degree requires at least 38 hours.

The Plan 2 B.S. requires 46 hours of chemistry courses.

Since the chemistry required in the first two years of all programs is the same, students interested in pursuing a chemistry major can elect any program initially. Discussions with a departmental adviser will allow students to choose the most appropriate major for their career objectives. In general, students planning graduate work in chemistry should elect one of the B.S. programs.

The B.A. program has a more liberal content with additional electives. It would support careers in business, law and advanced study in areas needing a strong chemistry background such as toxicology or forensic science.

A B.A. is suitable for students in the College of Education who wish to obtain an A&S degree, and may also be appropriate for some premedical tracks.

The Plan 2 (CACCS) program is designed to meet standards set by the American Chemical Society (ACS). A student who completes the Plan 2 B.S. program will be certified by the Department of Chemistry to the ACS as having met the specific ACS requirements for undergraduate professional training in chemistry.

Students must obtain a grade of C- or higher in each of the chemistry, physics or math courses specifically required for their degree.

The department offers both, B.A. and B.S. degree programs. The B.A. degree includes a minimum of 32 hours of chemistry.

The Bachelor of Arts program (B.A.) is designed to provide a solid foundation in chemistry for those pursuing careers that would benefit from chemical expertise.

Chemistry, B.S.

The Bachelor of Science program (B.S.) provides an intensive study of chemistry appropriate for those pursuing careers in the chemical sciences.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Chemistry** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Plan 1

(38 hours of chemistry)

Course Requirements

CHEM4930 - Undergraduate Research

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

- Additional upper-level chemistry Credits: 3

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

- **Additional USP requirements** Credits: 21
- **Additional A&S core requirements** Credits: 6
- **Electives** Credits: 34

Basic Chemistry: 36 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4000 - Career Skills

Credits: 3

Max Credit 3

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

When Offered (Normally offered fall semester)

Prerequisite: At least 6 credit hours of Chemistry (CHEM) classes.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Minimum Total: 120 Hours

Plan 2 (CACS)

(46 hours of chemistry)

Course Requirements

CHEM4930 - Undergraduate Research

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

- Additional upper-division chemistry Credits: 2-3

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

- **Additional USP requirements** Credits: 21
- **Additional A & S core requirements** Credits: 6
- **Electives** Credits: 4-6

Basic Chemistry: 43-44 Hours

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)
Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

OR

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

OR

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

CHEM4000 - Career Skills

Credits: 3

Max Credit 3

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

When Offered (Normally offered fall semester)

Prerequisite: At least 6 credit hours of Chemistry (CHEM) classes.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

PHYS: 8 Hours

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Computer Science: 3 Hours

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

CHEM4515 - Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. This includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software and mathematical analysis of physical chemistry problems.

Dual Listed CHEM 5515.

Prerequisite: MATH 2200 and MATH 2205, CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

Program Supporting Courses: 18 Hours

A group of courses selected to further the career objectives of the individual student. These are chosen after consultation with the departmental adviser and must subsequently be approved by the departmental Undergraduate Studies Committee. A grade of C- or higher is required for all program supporting courses.

Minimum Total: 120 Hours

Additional Requirements

The BS in chemistry requires a minimum of 39 hours of chemistry.

1 See the "Prerequisite and MPE Cut Score Reference Chart" on the Math Placement website for the most up-to-date math placement equivalencies: <http://www.uwyo.edu/mathstats/math-placement/>.

2 Students with specific additional interests (e.g. pre-med or another pre-professional program) may wish to move their V/H/C2 courses to alternate semesters so as to take other necessary required courses (e.g. LIFE 1010, MOLB 3000, etc.).

3 Students taking CHEM 4010 or MICR 4321 as their C3 are not required to take CHEM 4000.

Communication, B.A.

Communication is a liberal arts degree relevant to a variety of careers in community relations, public relations, politics, administration, law, sales management and many other fields.

University Studies Program

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Departmental Core Courses

In addition to the university studies requirements listed in this Catalog, all students majoring in communication and journalism must take the following required courses:

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

LANG1010 - First Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Required Courses

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

- Electives Credits: 15 (At least 12 elective hours must be at the 3000-level or higher of COJO courses.) The other three hours may be lower or upper division in COJO/COMM.

College of Arts and Science Requirements

- A&S U.S. Diversity (ASD) Credits: 3
- A&S Global Awareness (ASG) Credits: 3

Additional Program Requirements

- Physical and Natural World Credits: 6-8 (PN)
- **OR**
- Quantitative Reasoning Credits: 6-8 (Q)

Communication, B.S.

Communication is a liberal arts degree relevant to a variety of careers in community relations, public relations, politics, administration, law, sales management and many other fields.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Departmental Core Courses

In addition to the university studies requirements listed in this Catalog, all students majoring in communication and journalism must take the following required courses:

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COJO3070 - Communication Research

Credits: 3

Focuses on problems in communication and mass communication research. Specifically studies and applies language of science, basic concepts of communication, mass communication research, types and limitations of empirical research, as well as measurement procedures and analysis.

Prerequisite: COMM 1000 or COMM 1040 and STAT 2050 or STAT 2070.

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

Required Courses

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

- Electives Credits: 15 (At least 12 elective hours must be at the 3000-level or higher of COJO courses.) The other three hours may be lower or upper division in COJO/COMM.

Additional Program Requirements

- Physical and Natural World Credits: 6-8 (PN)
OR
- Quantitative Reasoning Credits: 6-8 (Q)

Criminal Justice, B.A.

The B.A. in Criminal Justice is a social science that major examines the causes and impacts of crime in society. Graduates go on to careers in fields such as law enforcement, homeland security, probation and parole, and victim services.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.
One PN Course must be a lab science to meet major requirements

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.
POLS 1000 Required for major requirements

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

Arts & Sciences College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Foundation Courses

Students must complete all foundation courses with a grade of C or better.

CRMJ1001 - Introduction to Criminal Justice

Credits: 3
Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3
Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3
Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.
Prerequisite: SOC 1000.

CRMJ2685 - Research Methods

Credits: 3
Max Credit 3

Introduces students to fundamental issues associated with the application of scientific methods to criminal justice problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to criminal justice issues.

Cross Listed SOC 2685

Former Course Number [3680]**Restricted** Criminal Justice or Sociology majors and minors

Prerequisite: CRMJ 1001 OR SOC 1000

CRMJ3110 - Criminal Courts and Processes

Credits: 3
Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3350 - Correctional Theory and Practice

Credits: 3
Examines the various components of the correctional complex from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3490 - Issues in Policing

Credits: 3
Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

CRMJ4200 - Ethics in Administration of Justice

Credits: 3
Introduces basic ethical theories, emphasizing how ethical theory can be applied to contemporary problems in law enforcement, corrections and adjudication. Students will be called upon to apply these various ethical frameworks to

typical moral dilemmas in criminal justice.

Former Course Number [3200]

Prerequisite: CRMJ 3110, CRMJ 3350, and CRMJ 3490.

Criminal Justice Core

Students must complete any 4 courses with a grade of C or better.

CRMJ3250 - Juvenile Delinquency

Credits: 3

Considers the nature of delinquency, including an analysis of treatment methods and the juvenile justice system.

Cross Listed SOC 3250.

Prerequisite: CRMJ 2400/SOC 2400.

CRMJ3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed SOC 3400.

Prerequisite: SOC 1000.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4150 - Community-Based Corrections

Credits: 3

Designed to provide students with an in-depth look at the community corrections complex. It will examine the history and growth of community corrections, the probation system, methods of post-incarceration supervision, intermediate sanctions, and correctional programming and treatment in the community.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3350.

CRMJ4151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 5151.

Former Course Number [3150]

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4260 - Gangs

Credits: 3

Considers the nature and the characteristics of gangs and gang members. The theoretical and empirical evidence regarding the phenomenon of gangs is evaluated. Particular emphasis is placed on the social and policy implications of this social problem.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims

and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

CRMJ4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed INST 4705, POLS 4705, and SOC 4705.

Former Course Number [4700]

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

Supporting Courses

Students must complete one three credit hour course from the list below; or 1 additional course from Criminal Justice Core. Must be completed with a grade of C or better.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

CRMJ4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed SOC 4350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

CRMJ4370 - Criminal Psychopathology

Credits: 3

Provides an overview of current theories and empirical evidence concerning the relationship between psychological disorder and criminal behavior. Examines various clinical syndromes and their role in biological, social and psychological genesis of crime, as well as the concept of criminal responsibility.

Cross Listed PSYC 4370.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed POLS 4600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4750 - Criminal Justice Internship

Credits: 1-12

Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

Restricted Junior Standing.

Prerequisite: Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

CRMJ4760 - Child Maltreatment

Credits: 3

Examines the phenomenon of child abuse and neglect. Includes an overview of attitudes towards and legal definitions of child maltreatment. Explores parental factors, contextual influences and developmental consequences of maltreatment. Relies heavily on current research in child abuse and neglect. Emphasizes policy implications.

Cross Listed PSYC 4760.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides undergraduates with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 5965.

Prerequisite: upper division standing and consent of instructor required in advance.

CRMJ4975 - Readings

Credits: 1-3

Max Credit (Max. 6)

Special programs of readings in criminal justice related subjects will be outlined to meet needs of individual students.

Prerequisite: consent of instructor.

CRMJ4990 - Topics:

Credits: 1-3
Max Credit (Max. 6)

Intended to accommodate various special subjects not offered as regular courses.

Prerequisite: as listed for housing department's topics course.

Foreign Language

Students are required to complete two semesters of the same foreign language with a grade of C or better. Two semesters of American Sign Language (SPPA 2110 & SPPA 2120) will fulfill this requirement.

Statistics

Students are required to complete STAT 2050 or STAT 2070 or SOC 2070 with a grade of C or better.

In Addition

Upper division course work that was completed more than ten years prior to graduation will not meet major requirements.

Criminal Justice, Prelaw Concentration, B.A.

The Pre-Law Concentration consists of diverse courses selected from departments across the university to help prepare students for the challenges of law school and the practice of law.

Verbal Comprehension and Expression: 3 Hours Minimum

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

Written Comprehension and Expression: 6 Hours Minimum

Students must complete any two (2) courses with a USP designation of WC or COM3.

Critical Understanding of Human Institutions and Values: 3 Hours Minimum

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

PHIL3120 - Ancient Greek Philosophy

Credits: 3

Surveying some of ancient Greek philosophy. Begins with the works of the earliest extant philosophical thinkers, the pre-Socratics. Remainder of focus on Plato and Aristotle.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3340 - Philosophy in Literature

Credits: 3
Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL
USP 2015 Code U5H
Former Course Number [2340]

Prerequisite: one course in philosophy or one course in literature or consent of instructor.
OR

ENGL3340 - Philosophy in Literature

Credits: 3
Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.
Prerequisite: one course in philosophy or one course in literature or consent of instructor.

PHIL3350 - History of Moral Philosophy

Credits: 3
A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H
Prerequisite: 3 hours of philosophy.

PHIL3500 - History of Science

Credits: 3
Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

POLS4051 - Environmental Politics

Credits: 3
Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and

regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

OR

AMST4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

OR

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

OR

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

Creative and Analytical Thinking: 3 Hours Minimum

CW2050 - Introduction to Fiction

Credits: 3

Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

OR

CW2060 - Introduction to Nonfiction

Credits: 3

Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

OR

CW2080 - Introduction to Poetry

Credits: 3

Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3420 - Symbolic Logic

Credits: 3

Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

OR

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.
Former Course Number [4700]

Prerequisite: QA.

World Cultures and International Institutions: 3 Hours Minimum

INBU1040 - Introduction to International Business

Credits: 3

A broad survey of the field of international business which introduces basic concepts of international business activity and theory and reviews major foreign environmental forces--financial, economic and socioeconomic, physical, sociocultural, political, legal, labor, competitive and distributive.

Cross Listed INST 1040.
A&S College Core 2015 ASG
Former Course Number [BUSN 2000]
OR

INST1040 - Introduction to International Business

Credits: 3

A broad study of the field of international business activity and theory and review major foreign environmental forces

Cross Listed INBU 1040.
Former Course Number [INST 2000]

Prerequisite: ECON 1010.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG

INST2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed POLS 2310.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG

OR

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.
USP 2015 Code U5H
Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.
Prerequisite: ANTH 1200.

OR

INST3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. ,

poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed ANTH 3420.

Prerequisite: ANTH 1200.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

INST4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed POLS 4340.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

INST4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed SOC 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 2100.

OR

SOC4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed INST 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 3000.

Electives: 9 Hours Max (3 Courses)

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

OR

COJO 1030 - Interpersonal Communication Credits: 3

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1040

OR

COJO 1040 - Intro to Communication Theory Credits: 3

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

PHIL3440 - Philosophy of Mind

Credits: 3

Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

OR

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

INST4350 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Identical to ANTH 4340.

Prerequisite: ANTH 1200.

CNSL4520 - Fundamentals of Counseling (B)

Credits: 3

Students learn some of the skills of counseling and develop an understanding of elementary principles of counseling theory, as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 5520.

When Offered (Offered on campus and online all semesters)

Prerequisite: junior standing; 6 hours of education or psychology and graduate standing to receive graduate credit.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

Additional Information

The Department of Criminal Justice offers a Pre-Law Concentration for Criminal Justice majors that consists of courses selected from several departments across the university. These courses were chosen to help prepare students for the challenges of law school and the practice of law. Students electing the Pre-Law Concentration are urged to seek advising early.

The Pre-Law Concentration requires 27 credit hours - 18 of which must be 3000-level or above. All coursework must be completed with a grade of C or better to be counted toward the concentration.

English, B.A.

Choose from two tracks in English: Literary Studies track or English Studies track. The former focuses on the study of literature and culture, while the latter balances literary study with courses in rhetoric and composition and professional writing.

USP Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

ENGL 2025

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

ENGL 4999

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Gateway to the English Major - 3 Hours

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the

options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

Historical Period - 12 or 15 hours

English Studies Track: 12 hours

Literary Studies Track: 15 hours

English Studies Track students take one of the following six courses.

Literary Studies Track students take two of the following six courses.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

Take three of the following five courses:

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

Expanding the Canon - 6 Hours

A full list of courses that fulfill the Expanding the Canon requirements will be published each semester. Generally speaking, these courses will cover topics related to racial diversity, global literatures, gender, sexuality, or disability studies. ENGL 2340/2350/2360 can be taken either as an Expanding the Canon course OR as an Historical Period course. The Expanding the Canon options are always changing, but will always include the following:

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2345 - American Indians in Hollywood Film

Credits: 3

Examines the ways Hollywood film has constructed various forms of racial identity for American Indians.

Cross Listed NAIS 2345.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many

cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues addressed through global performance.

A&S College Core 2015 ASG

Prerequisite: COM1.

ENGL3610 - Non-Western Women Writers

Credits: 3

Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.

USP 2003-2014 Code U3Ch

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.

Dual Listed ENGL 5830.

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: ART 2020, GWST 1080/ENGL 1080.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: LTST 1100 and WA/COM1.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

A&S College Core 2015 ASG

Prerequisite: six hours of 2000 level literature courses.

- Please note that only ENGL 4640: Postcolonial Literature & Theory counts towards the Expanding the Canon Requirement **unless otherwise specified in a given semester.**

Methods - 3 Hours

Choose the methods course that corresponds with your track.

Literary Studies Track:

ENGL3000 - Literary Theory

Credits: 3

An introduction to critical theory as a methodology within literary studies. The course covers major schools of theory and major figures within those schools. Students will read, discuss, and write about literary texts and cultural artefacts by placing them in dialogue with important works of both theory and literary criticism.

Prerequisite: ENGL 2025 and junior standing.

OR

English Studies Track:

ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing

Credits: 3

Introduces common methods, concepts, and theories emphasized in these interrelated intellectual traditions. It asks students to examine how research traditions have developed alongside each other over time, and prepares students to design a multimodal research project.

Prerequisite: ENGL 2025 and junior standing.

Foundations of Language - 3 Hours

This requirement is for the English Studies Track only.

ENGL4780 - History of the English Language

Credits: 3

Considers major sources of change in the English language historically, as well as some of the internal and external catalysts for the process. Identical to ANTH 4780.

Prerequisite: ENGL 4750.

OR

ENGL4785 - Linguistics, Language Teaching and Social Context

Credits: 3

Introduces prospective teachers of English as second language to the basic components of language and to the social aspects of human language use. Explores a variety of concepts about language: how it is used and perceived, how languages change, how diverse cultures respond to such changes.

Cross Listed LANG 4785.

Prerequisite: WB/COM2.

OR

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480.

OR

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

Electives - 6 hours

Literary Studies: Students can select from any of our courses for credit in this category. One of the two electives must be in either Rhetoric & Composition or Creative Writing.

English Studies: Two courses from the list of Rhetoric/Composition/Professional Writing classes offered by English. See the examples below:

- ENGL 2005 - Writing in Technology and the Sciences (3 Credits)
- ENGL 2035 - Writing for Public Forums (3 Credits)
- ENGL 2125 - Writing Tutor Pedagogy/Practicum (3 Credits)
- ENGL 3020 - Culture, Communication, Work (3 Credits)
- ENGL 4010 - Technical Writing in the Professions (3 Credits)
- ENGL 4020 - Editing for Publication (3 Credits)
- ENGL 4025 - Writing for the Web (3 Credits)

- ENGL 4030 - Writing for Magazines (3 Credits)
- ENGL 4040 - Rhetoric, Media, and Culture (3 Credits)
- ENGL 4061 - Rhetorical Theory and Criticism (3 Credits)
- ENGL 4075 - Writing for Non-Profits (3 Credits)

Capstone - 3 Hours

Advanced standing in English is required for all majors prior to taking the senior seminar. To be eligible for advanced standing in English, the student must have completed 24 hours of English coursework above COM1, including the required 2000-level Historical Period courses. Each course must have been passed with a grade C or better. Approved transfer courses from other institutions will satisfy the prerequisites for advanced standing. ENGL 4999 should be taken in the next to last semester before graduation.

ENGL4999 - Senior Seminar

Credits: 3

This course is the capstone course in the English major. Subject matter varies by section. In all sections students will exercise skills acquired in the major (close-reading, historical analysis, application of theory) to explore significant texts and to reflect on the nature of English study today.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and either ENGL 3000 or ENGL 3010; Senior standing.

Additional Requirements

All English Education students are required to take the English Studies track. Students should consult with an advisor to declare a track in Literary Studies or English Studies before their junior year.

The English major requires 36 hours of work within the major and an additional 12 hours of a single foreign language. 21 of the hours within the major must be taken at the upper division. Only those courses in which a grade of C or better has been earned may count toward the 36 hours required for the B.A. and the foreign language requirement. No 1000-level courses count toward the B.A.

Prerequisites

Most 2000-level courses require the completion of the COM1 requirement. Normally, 3000-level courses have the COM1, ENGL 2025, and one 2000-level "broad historical sweep" course (one of ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, ENGL 2360) as prerequisites, and 4000-level courses have 6 hours of 2000-level English courses as prerequisites. Students without certain prerequisites should consult the English department for permission to enroll.

Environmental Geology and Geohydrology, B.S.

The Environmental Geology and Geohydrology (EGGH) degree is intended for students interested in becoming professionals in environmental fields and will prepare students for graduate school in environmental disciplines and for entry-level jobs.

Required Courses

One of the Following:

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

- GEOL 1200 - Historical Geology Credits: 4

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

And Each of the Following:

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4777 - Geochemistry of Natural Waters

Credits: 3

Studies physical chemistry applied to natural waters, and chemistry of rock weathering, sources and controls on major, minor and trace elements, plus problems related to introduced pollutants.

Cross Listed GEOL 5777.

Prerequisite: CHEM 1030 OR consent of instructor.

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

Required Allied Math and Science Courses

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

One of the Following:

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and

functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Additional Electives

Additional 18 credit hours of Electives, in consultation with advisor

- GEOL 2005 - Intro to Geophysics Credits: 4
OR

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises

are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4888 - Glaciology

Credits: 3

Dynamics of frozen water. Covers behavior of ice masses, in the form of glaciers or ice-sheets, and geomorphic aspects of glacial erosion and deposition. Includes forcing and feedbacks between cryosphere and global climate.

When Offered (Offered every second year spring semester)

Prerequisite: MATH 2205, PHYS 1210 (PHYS 1310).

Note:

Students are encouraged, in consultation with their adviser, to design a major that best fits their interests and goals. With this in mind, there are many courses outside the Department of Geology and Geophysics that may be substituted for courses in the Electives (B) list above provided that such substitutions are made with the consent of an adviser. A list of such courses may be obtained from the Department. Students who seek the Geology BS may not also seek EGGH as a double major, and vice versa.

French, B.A.

The main goal of French courses will be to emphasize "the development of communication skills in French through the four language skills: listening, speaking, reading, and writing". Each course introduces students to French and Francophone cultures.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Prerequisites - 12 Credits

FREN1010 - First Year French I

Credits: 4
Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

FREN1020 - First Year French II

Credits: 4
Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: FREN 1010 or two years of high school French.

FREN2030 - Second Year French I

Credits: 4
Emphasizes the development of communication skills (listening, speaking, reading and writing) so as to help students function effectively in real-life contexts. Provides a systematic review of grammatical structures necessary for successfully communicating in French.

USP 2015 Code U5H

Prerequisite: FREN 1020 or three years of high school French.

A language major requires 30 hours of credit in a single language above 2030

Required Courses

FREN2040 - Second Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2015 Code U5H

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2130 - Contemporary French Culture

Credits: 3

Designed as an introduction to contemporary French culture. It gives students an in-depth insight into contemporary French life. It also deals with issues affecting the French-speaking world in general: Quebec, Africa, New Caledonia, Switzerland, Monaco, etc.

USP 2015 Code U5H

Prerequisite: FREN 1020 or equivalent.

OR

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP 2003-2014 Code U3CH, U3G

Prerequisite: FREN 2030.

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

FREN4100 - A Survey of French Literature I

Credits: 3

A study of French Literature and civilization from the Middle Ages through the 18th century.

Prerequisite: FREN 2140 or equivalent.

FREN4110 - A Survey of French Literature II

Credits: 3

A study of French Literature and civilization from the 19th century to the present.

Prerequisite: FREN 2140 or equivalent.

- Plus 6 hours of electives in French at the 4000-level (See Electives list in Minor Requirements)

Minor Program Requirements - 18 Credit Hours

Required Minor Classes

FREN2040 - Second Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2015 Code U5H

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP 2003-2014 Code U3CH, U3G

Prerequisite: FREN 2030.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

- Electives - 9 hours of French Courses at the 3000 course level or 4000 course level (Choose from Elective list below)

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

FREN3990 - Independent Study

Credits: 1-4

Books or periodicals of special interest to the student, selected in consultation with a member of the staff; independent reading and reports.

Prerequisite: FREN 2030.

FREN4080 - Studies in the French Language

Credits: 3

Max Credit (Max. 9)

The topics explored under this general heading include: translation, history of the French language, French of the media and conversation.

Dual Listed FREN 5080.

Prerequisite: FREN 3060.

FREN4100 - A Survey of French Literature I

Credits: 3

A study of French Literature and civilization from the Middle Ages through the 18th century.

Prerequisite: FREN 2140 or equivalent.

FREN4110 - A Survey of French Literature II

Credits: 3

A study of French Literature and civilization from the 19th century to the present.

Prerequisite: FREN 2140 or equivalent.

FREN4120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: epic, courtly poetry, Arthurian romance, theatre and the poetry of Villon.

Dual Listed FREN 5120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 5140.

USP 2003-2014 Code U3WC

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4200 - Introduction to Research

Credits: 3

Senior seminar on a topic varying from year to year.

USP 2015 Code U5C3

Prerequisite: COM2 (FREN 3050), Survey I and II courses (FREN 4100 and FREN 4110).

FREN4250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism focuses on novels of Flaubert and Zola, while the symbolist school of poetry is represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 5250.

Former Course Number [4150]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into four parts: pre-World War I, between the wars, post-World War II and the New Wave. These periods are represented by authors including Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 5260.

Former Course Number [4160]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature), to be selected according to interest and currency).

Dual Listed FREN 5350.

Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN4990 - Advanced Independent Study

Credits: 1-3

Special projects designed to meet the needs of individual students, designed in consultation with instructor.

Prerequisite: FREN 3050 and consent of instructor.

Gender and Women's Studies, B.A.

Provides foundational knowledge in historical and contemporary issues related to sex, gender, and sexuality. Upon completion, students will be able to apply intersectional feminist and gender theories to interdisciplinary research and practice.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

COM1 - Communication 1

Credits: 3
College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

A&S College Core

The College of Arts and Sciences requires:

- D - Diversity (3 credits)
- G - Global (3 credits)

Requirements

The GWST major requires 30 credit hours of GWST courses, including 9 credits of core courses and 21 credits of elective courses.

Please note, curriculum requirements reflect updates effective Fall 2022, so any courses completed under the previous requirements will still count. Details are listed below.

Introductory Core: 3 Credits

Complete ONE course from the following:

GWST1080 - Intro Gender & Women's Studies

Credits: 3

This course serves as an introduction to the field of Gender and Women's Studies. Students will examine a range of GWST topics, gain knowledge of gender, feminist, and intersectional theories, and learn to apply course concepts and frameworks to analyses of socio-political and representational issues, primarily in U.S. contexts.

Cross Listed ENGL 1080.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 3

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP 2003-2014 Code U3C, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Note: If taken prior to Fall 2022, GWST 1900, Women & Leadership can satisfy this requirement.

Interdisciplinary Theory Core: 6 Credits

Complete TWO courses from the following:

Core course required for all majors:

- GWST 3XXX: Gender, Race, Sex & Soc System

(Will be offered Spring 2023)

- Note: If taken prior to Fall 2022, these courses may satisfy this requirement: GWST 3710, Gender & Humanities; GWST 2500, Gender & Society

Choose ONE of the following:

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 12 hours of women's studies.

GWST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 4430.

Dual Listed GWST 5430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

Electives: 21 Credits

Complete SEVEN courses or 21 credit hours from among the following:

GWST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed LTST 1030/AAS 1030/AMST 1030/NAIS 1030.

USP 2003-2014 Code U3D, U3I

A&S College Core 2015 ASD

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

GWST2060 - Topics in Women's Studies

Credits: 1-4

Popular and current topics in women's studies.

GWST2070 - Gender and Religion

Credits: 3

Aims to help students understand how religion constructs and reinforces gender roles in religion and society. Looks at traditional gender roles in Christianity and the transformation they have undergone in the past century or so.

Cross Listed RELI 2070.

GWST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed HIST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

GWST2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and subjectivity, and the politics of health, sexuality, and care.

Cross Listed WIND 2700.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/AMST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

GWST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/ Chicana studies.

Cross Listed LTST 3200.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100.

GWST3300 - Psychology of Gender

Credits: 3

In this course, we will examine a variety of psychological theories and research on the experiences and behaviors of men and women. We will study attitudes about gender, theories of gender development, and research about similarities and differences between men and women.

Cross Listed PSYC 3300.

Prerequisite: A grade of C or better in PSYC 1000.

GWST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both oppression and liberation.

Cross Listed AMST 3400.

USP 2003-2014 Code U3CH, U3D

Prerequisite: WA.

GWST3710 - Gender and Humanities

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/ART 3710.

When Offered (Offered once a year)

USP 2003-2014 Code U3CH

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

GWST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST/ LTST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

GWST4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGEC 4200.

Dual Listed GWST 5200.

A&S College Core 2015 ASD

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST4300 - The Politics of Sexuality

Credits: 3

Addresses issue of how sexuality has become gendered with different meanings for both males and females as to reproductive behavior, especially how women's bodies are defined in sexual terms.

When Offered (Offered every other year)

Prerequisite: GWST 1080, 3500 or GWST 3710.

GWST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed Cross-listed with AAST 4233 and COJO 4233;

Dual Listed dual-listed with GWST 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and RELI 4335.

Dual Listed GWST 5335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

GWST4360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed NAIS 4360/SOC 4360.

Prerequisite: 6 hours of 2000-level NAIS classes.

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

GWST4500 - Special Topics in Women's Studies

Credits: 1-4

Presents current research issues by visiting and regular faculty.

Prerequisite: GWST 1080, 3500, GWST 3710 or consent of instructor.

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims

and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

GWST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/LTST 4650/INST 4650.

Dual Listed GWST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/LTST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST4440 - Queer Life Through Memoir

Credits: 3

This reading intensive class explores queer life in the late 20th and early 21st centuries in the United States of America. Through close reading and analysis of the texts and discussions, issues of sexuality, race, class, violence and place are explored.

Cross Listed GWST 5440

Prerequisite: GWST 2000 , GWST 4430 , or GWST 5430 or graduate standing, or permission of instructor

GWST4960 - Women's Bodies, Women's Minds

Credits: 3

Explores women's physiologic and psychologic development and the influences of patriarchal society upon the interpretation of what constitutes normalcy across the female life cycle. Historical, cultural and contemporary attitudes of the health care system and women's perspectives on menstruation, childbearing, breastfeeding and menopause will be analyzed.

When Offered (Offered every other year)

USP 2003-2014 Code U3CS

Prerequisite: upper division status.

GWST4965 - Senior Honors Project

Credits: 3

The student consults with the director/faculty supervisor to identify a topic and (a) produces a 30-40 page research paper or (b) a shorter 15-20 page paper plus a creative or service learning component, showing originality, firm knowledge of the discipline(s), and solid research skills, with a thesis defense as culmination.

Former Course Number [4980]

Prerequisite: GWST 4700, or concurrent enrollment with instructor consent, and a 3.500 GPA.

GWST4970 - Internship

Credits: 3

Max Credit (Max. 12)

Students gain practical experience in the application of principles learned in women's studies courses. Students will work with the director of women's studies internships to select a site; will intern approximately ten hours per week in the host organization; and will complete written assignments which reflect the student's work.

Former Course Number [4000]

Prerequisite: 12 semester hours of WMST coursework,

GWST4975 - Independent Studies

Credits: 1-4

Max Credit (Max. 9)

Offers the advanced student the opportunity to pursue a topic of interest with the assistance and direction of an

instructor in women's studies.

Former Course Number [4970]

Prerequisite: 6 hours in women's studies or consent of instructor.

Grading & Honors

Grading Requirements

All GWST core courses and at least 15 credit hours of GWST electives must be completed with a "C" or better.

To be eligible for internships, students must have a minimum GPA of 3.300.

Honors in Gender & Women's Studies

Honors in Gender and Women's Studies recognizes academically ambitious students who have excelled in their undergraduate careers, and who are ready for graduate school and/or employment in the public or private spheres. Requirements include an overall minimum GPA of 3.500 and the completion of GWST 4965, Senior Honors Project.

Honors in GWST also requires the completion of 3 semesters of foreign language or sign language, or a concentration in quantitative analysis and research methods, including statistics.

Students in UW Honors Program, McNair Scholars Program, or other departments that require completion of an independent research project may dovetail their honors work in GWST with those programs.

Additional Information

Students in GWST are encouraged to work with a faculty advisor to develop an individualized plan of study. Contact the program director, Dr. Michelle Jarman (mjarman@uwo.edu), for more information.

Geology and Earth Science, B.A.

The B.A. in Geology and Earth Science provides students with a broad educational experience in preparation for careers in earth science-related fields.

Required Courses

Each of the following:

- GEOL 1000-level intro lab course(s) Credits: 4-8

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the

evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

Six Courses from the Following

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

- GEOL 2005 - Intro to Geophysics Credits: 4

OR

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2050 - Principles of Paleontology

Credits: 4

Max Credit 4

Examines principles, biological and geological, that underlie general study of ancient life on Earth. Includes interactions of evolutionary, taphonomic, and paleogeographic concepts within various approaches to paleobiology and systematic paleontology. Optional field trip.

When Offered (Normally offered spring semester)

Prerequisite: 1000-level GEOL or LIFE 1000 or LIFE 1010

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust.

Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. It covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetism methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources, and environmental issues.

Dual Listed GEOL 5835.

Former Course Number [GEOL 4970]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210 and MATH 2200.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

OR

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

Additional Electives

Additional 12 hours of electives with adviser consultation, at least 6 hours of which must be taken outside of the Department of Geology and Geophysics.

Geology, B.S.

The B.S. in Geology program provides a quality educational experience for students intending to enter careers in geology. Graduates will have gained the scientific and technical skills necessary for graduate programs and professional opportunities in geosciences.

Required Courses

Note: This program represents a minimum proficiency. Students are strongly advised to elect additional courses in geology.

One of the Following:

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

- GEOL 1200 - Historical Geology Credits: 4

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

And Each of the Following:

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

- GEOL 2005 - Introduction to Geophysics Credits: 4
- OR**

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)
Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

Additional Geology Courses

Additional 18 credit hours in Geology courses at 2000-level and above:

Allied Math and Sciences Credits: 20 Hours

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

OR

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

OPTION A: Fundamental Math

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP 2003-2014 Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

AND

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

OPTION B: Advanced Math

MATH 2200 - Calculus I. Credits: 4

AND

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

OR

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

OR

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students.

Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied.

Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

- Eng Physics Credits: 4

German, B.A.

As a German Major, you will develop your speaking, listening, and communication skills as a German speaker. You will gain a better understanding of perspectives and experiences of German speaking cultures.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses - 9 credits

A language major requires 30 hours of credit in a single language above 2030.

GERM2040 - Second Year German II

Credits: 3
Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5H

Prerequisite: GERM 2030 or three years of high school German.

GERM3050 - Third Year German I

Credits: 3
Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: GERM 2040.

GERM3060 - Introduction to German Literature

Credits: 3
Introduces literature of Germany. Analyzes major literary types and elements of criticism. Emphasizes compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Prerequisite: GERM 3050.

Electives - 21 credits

All electives must be above GERM 2030. At least three courses should be at the 4000-level.

GERM3006 - 20th Century German Culture and Civilization

Credits: 3
Major political, ideological and cultural developments in Germany between 1871 and the present. An interdisciplinary approach (history, art history, film and literature) allows students to explore and assess a nation's culture and civilization as well as far-reaching events (WWI, WWII and the Holocaust) from various perspectives.

USP 2003-2014 Code U3CH, U3WC

Prerequisite: junior standing.

GERM3150 - German History and Culture

Credits: 3

Taught in English, this class engages students both theoretically and practically with German history and culture throughout the ages from the Middle Ages to today. Reading content is complemented with outings to culturally and historically significant sites in Germany as part of a summer study abroad program.

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WA or equivalent.

GERM3990 - Independent Study

Credits: 1-4

Focuses on books or periodicals of special interest to the student selected in consultation with a staff member; independent reading and reports.

Prerequisite: GERM 2030.

GERM4070 - Fourth Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Dual Listed GERM 5070.

When Offered (Offered every other year)

Prerequisite: GERM 3060.

GERM4080 - German-English and English- German Translation

Credits: 3

Encompasses written translation exercises based on contemporary and relevant texts in both English and German. Addresses specific translation problems arising in both English and German, when translating into the other language.

When Offered (Offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: GERM 3050 and/or GERM 3060.

GERM4100 - A Survey of German Literature I

Credits: 3

Studies German literature and civilization from the Middle Ages to the 17th century.

Dual Listed GERM 5100.

Prerequisite: GERM 2140 or equivalent.

GERM4110 - A Survey of German Literature II

Credits: 3

Studies German literature and civilization from the 18th century to the end of the 20th century.

Dual Listed GERM 5110.

Prerequisite: GERM 2140 or equivalent.

GERM4145 - Weimar Classicism

Credits: 3

Introduces student to Weimar Classicism, one of the crucial periods in German literature and culture. Explores the foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works during this period. Primary language for instruction for this course is German.

Dual Listed GERM 5145.

Prerequisite: GERM 2140 or equivalent.

GERM4180 - German Poetry

Credits: 3

Surveys poetry from the Middle Ages to the present. Emphasizes poetry after 1600. Treats formal elements and genre categories.

Dual Listed GERM 5180.

Prerequisite: GERM 2140.

GERM4200 - Introduction to Research

Credits: 3

Max Credit 9

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2015 Code U5C3

Prerequisite: 12 hours of 4000-5000-level courses.

GERM4240 - German Literature of the Romantic Period

Credits: 3

Introduces the philosophical bases of German Romanticism and analyzes representative works of prose and poetry.

Dual Listed GERM 5240.

Prerequisite: GERM 2140 or equivalent.

GERM4255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of significant German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 5255.

Prerequisite: GERM 2140 or equivalent.

GERM4275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural production by artists identified with immigrant communities or communities of color. Topics examined include intersections of gender, race, nation, culture, and class; experiences of different minorities; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Course is taught in German.

Dual Listed GERM 5275.

Prerequisite: GERM 2140 or equivalent.

GERM4285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary Germany.

Dual Listed GERM 5285.

Prerequisite: WB.

GERM4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects designed to meet needs of individual students, designed in consultation with instructor.

Prerequisite: GERM 2140 and consent of instructor.

History, B.A.

A History B.A. provides the skills needed to succeed in any job, public history, archive and museum work, law, education, business and more. Skills mastered include critical thinking, multi-perspective analysis, and written and oral communication.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Arts and Sciences Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

History Requirements

The History major requires a minimum of 36 credit hours in History courses or approved substitutions and an additional 12 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages. All courses used to satisfy major requirements - including the language

requirement - must be completed with a grade of C or better. To complete the Bachelor of Arts (B.A.) degree in History, all University Studies Program (USP) and college requirements must also be satisfied.

Language

Students must complete three semesters of a single foreign language or the equivalent as determined by the Department of Languages - Modern and Classical. This requirement may be satisfied by American Sign Language.

Two Required Courses: 6 Hours

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

AND

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

Elective: Any Level: 3 Hours

One additional History course at any level.

Lower-Division Electives: 12 Hours

Lower-Division courses are 1000 and 2000 level courses.

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art; and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP 2015 Code U5FY

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

USP 2003-2014 Code U3VT

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

USP 2003-2014 Code U3VT

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and

interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.

USP 2003-2014 Code [(none)<>H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3
Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

USP 2015 Code U5H

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed RELI 2252.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed INST 2280.

USP 2015 Code U5C2

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

HIST2315 - History of Non-Western Religions

Credits: 3

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed RELI 2315.
USP 2003-2014 Code U3CH, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

USP 2003-2014 Code U3CH, U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

HIST2360 - African-American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed AAST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

HIST2370 - Chicano History: Origins to 1900

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2370/GEOG 2370.
USP 2003-2014 Code U3CS, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2380 - Latin American History 1500 to 2000

Credits: 3

Provides introduction to Latin American history, from colonial contacts to the present. Explores important themes and connections across the colonial and modern periods, such as race, national identity, foreign involvement, indigenous peoples' role in nation-states, religion, social movements, economic systems, and globalization.

USP 2003-2014 Code U3G

USP 2015 Code U5H

HIST2385 - Chicano History : 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2385.

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

HIST2390 - US West Between the World Wars

Credits: 3

Examines two pivotal decades (1918-1942) in the US West that encompasses prosperity, Depression, and reform, through the use of historical documents, art, film, literature, and music.

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

A&S College Core 2015 ASG

HIST2470 - Civilization of India

Credits: 3-4
Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

HIST2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed ECON 2500.

HIST2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed ANTH 2600.
USP 2015 Code U5H

HIST2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed ART 2700/AMST 2700/ANTH 2700.
USP 2003-2014 Code U3CH

HIST2705 - Museology II

Credits: 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater

appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes. Cross listed between Anthropology, History, American Studies, and Art.

Cross Listed AMST 2705 / ANTH 2705 / ART 2705

Upper-Division Electives: 15 Hours

Upper-Division courses are 3000 and 4000 level courses.

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research.

Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/POLS 3050.

Prerequisite: WB or COM2.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/PHIL 3160.

Prerequisite: WB or COM2.

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000 or RELI 2225/HIST 2225.

HIST3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500 - 1500 CE, concentrating on the Latin West. It examines the growth of Christian institutions and practices, the Church's role as sole governing entity, along with conflicts with secular governments as they developed in later centuries.

Cross Listed RELI 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

HIST3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: RELI 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

HIST3275 - World Christianities

Credits: 3

Examines the development of Christianity primarily in Africa, Asia and South America.

Cross Listed RELI 3275

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WB and CH

HIST3300 - Secret History of Science

Credits: 3

Explores developments in science from prehistory to the present. It focuses on the lesser-known men and women who contributed to science, as well as on seemingly superstitious beliefs that were nonetheless important to advances in knowledge.

Restricted Restricted to junior standing or higher.

Prerequisite: 6 hours in HIST or 6 hours of PN coursework, or a combination of both.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

HIST3500 - Colonial America

Credits: 3

This course covers the history of European colonization from roughly 1492 to 1763. Our geographic focus will be on the (future) United States, but will also learn how transatlantic forces influenced its people.

Prerequisite: 12 hours of HIST courses or permission of instructor.

HIST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia, and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed AAST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/HIST 2360.

HIST3880 - Comparative History

Credits: 3

Explores comparative history from a variety of topics, such as colonialism, memory, nationalisms, frontiers, or cultural history. This course will introduce students to at least one of these themes from at least two regions, time periods, or groups of people to understand patterns and change in human societies through time.

Prerequisite: 6 hours of HIST.

HIST3900 - Historical Archaeology

Credits: 3

This course introduces students to the field of historical archaeology, the archaeological and archival study of literate societies. Students will be introduced to the history of the discipline, a survey of contemporary historical archaeological practice.

Cross Listed ANTH 3900

Former Course Number [none < > none]

Prerequisite: ANTH 1300

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000

Dual Listed HIST 5000

USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 9 hours of HIST or NAIS.

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP 2003-2014 Code U3CH, U3D

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

HIST4060 - Independent Study

Credits: 1-3

Max Credit 6

Credit not to exceed 6 hours maximum, to be arranged in either European or American history. Primarily for juniors and seniors who can profit from independent work with minimal supervision.

Prerequisite: 12 semester hours in history; written permission of instructor required.

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

HIST4100 - Early Medieval Europe

Credits: 3

Studies development of European civilization from decline of Rome to 12th century.

Dual Listed HIST 5100.

Prerequisite: 9 hours of HIST.

HIST4110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 5110.

Prerequisite: 9 hours of HIST.

HIST4112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000 Europe began its rise to world prominence and cities contributed to that rise. Examines development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 5112.

Prerequisite: 9 hours of HIST.

HIST4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what some would call heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 5113.

Prerequisite: 9 hours of HIST or RELI.

HIST4120 - Europe During the Renaissance

Credits: 3

Intensely studies European history in 14th and 15th centuries.

Prerequisite: 9 hours of HIST.

HIST4130 - Europe During the Reformation

Credits: 3

Intensely studies European history in the 16th century.

Prerequisite: 9 hours of HIST.

HIST4140 - Europe During the Age of the Baroque

Credits: 3

Intensely studies European history in 17th century.

Prerequisite: 9 hours of HIST.

HIST4150 - Europe During the Age of the Enlightenment

Credits: 3

Intensely studies European history in 18th century.

Prerequisite: 9 hours of HIST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed RELI 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

HIST4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed RELI 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend

globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 5305.

USP 2003-2014 Code U3G

Prerequisite: 9 hours of HIST, INST, or POLS.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 4380.

Dual Listed HIST 5380.

Prerequisite: 9 hours of HIST or INST.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

HIST4405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African and Asian people from pre-contact through the mid-19th century.

Dual Listed HIST 5405.

USP 2003-2014 Code U3D

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 5406

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST.

HIST4410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 5410.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 5415.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 5425.

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4450 - The Civil War and Reconstruction

Credits: 3

Studies crisis of the Union, 1861-1877. Examines experiences of both the North and South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 5450.

Prerequisite: 9 hours of HIST.

HIST4460 - Post-Civil War America: The Gilded Age

Credits: 3

Intensively covers economic, cultural and political developments which marked the U.S. in post-Civil War era, such as rise of industry, emergence of distinctive national culture and party struggles shaping America's Gilded Age.

Dual Listed HIST 5460.

Prerequisite: 9 hours of HIST.

HIST4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed NAIS 4462.

Dual Listed HIST 5462.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or NAIS.

HIST4463 - American Indian History 1783 to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied moving west.

Cross Listed NAIS 4463.

Dual Listed HIST 5463.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 4464.

Dual Listed HIST 5464.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed NAIS 4466.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

HIST4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed NAIS 4468.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U. S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between depression of the 1890s and that of the 1930s.

Dual Listed HIST 5470.

Prerequisite: 9 hours of HIST.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

HIST4480 - Growth of Modern America, 1929 to 1960

Credits: 3

Studies political and diplomatic developments in the U.S. in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasizes economic crisis, growth of government, reform traditions, anti-communism and civil rights.

Dual Listed HIST 5480.

Prerequisite: 9 hours of HIST.

HIST4485 - U.S. Latino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U.S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives' responses are stressed.

Cross Listed LTST 4485/INST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Cross Listed LTST 4492.

Dual Listed HIST 5492.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST or INST.

HIST4494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 5494.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or INST.

HIST4495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 5495.

Former Course Number [4720]

Prerequisite: 9 hours of HIST or INST.

HIST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U.S., incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed LTST 4496.

Dual Listed HIST 5496.

Former Course Number [4800]

Prerequisite: 9 hours of HIST or INST.

HIST4505 - The Old South, 1820 to 1861

Credits: 3

Studies history of the South from emergence of southern identity to the Civil War. Emphasizes southern society and culture.

Dual Listed HIST 5505.
Former Course Number [4500]

Prerequisite: 9 hours of HIST.

HIST4510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 5510.
Former Course Number [4950]

Prerequisite: 9 hours of HIST.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.
Former Course Number [4710]

Prerequisite: 9 hours of HIST.

HIST4530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 5530.
Former Course Number [4630]

Prerequisite: 9 hours of HIST.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

HIST4540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 5540.

Former Course Number [4640]

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

HIST4560 - American Social History in the 20th Century

Credits: 3

Explores history of social mobility and conflict in 20th century. Emphasizes impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting and architecture.

Dual Listed HIST 5560.

Prerequisite: 9 hours of HIST.

HIST4582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed INST 4582.

Dual Listed HIST 5582.

Prerequisite: 9 hours of HIST or INST.

HIST4610 - Seminar Topics in the History of Wyoming I

Credits: 3

An intensive research and writing course dealing with topics in the period before statehood in 1890.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4620 - Seminar Topics in the History of Wyoming II

Credits: 3

Allows students to do intensive research and writing dealing with topics in Wyoming history from 1890 to present.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4965 - Senior Thesis

Credits: 3

Working closely with a faculty advisor, a history major will develop a research proposal that, after approval by the History department faculty, will lead to in-depth research and writing, producing a minimum 50-page thesis that demonstrates an excellent grasp of historical methods and a high degree of writing skill.

Prerequisite: 12 hours of HIST; senior class standing; HIST major.

HIST4990 - Topics in _____

Credits: 1-6

Max Credit (Max. 12)

Affords students opportunity to study in-depth various topics in history not offered in regular courses or independent study.

Former Course Number [4080]

Prerequisite: 9 hours of HIST.

History, Public History Concentration, B.A.

Want work in a museum, historical site, park, archive, historical consulting firm, establishing and operating archives and records management systems for private businesses, state agencies, or universities, and more? Then public history is for you.

Public History Concentration

Combined with the History B.A. requirements (below,) students can declare a Public History Concentration. The History B.A. requires a minimum of 36 credit hours in History courses, and 18 of those can qualify to meet the Public History Concentration requirements. The Public History Concentration requires a minimum of 18 hours of History coursework that may be tailored for individual student career goals.

Specific course requirements for the Public History Concentration are as follows:

Required Courses for Public History Concentration

HIST2050 - Introduction to Public History

HIST2700 - Introduction to Museology

HIST3020 - Historical Methods

HIST4400 - Internship

Elective courses for Public History Concentration

2 of the following courses:

HIST4055 - Archival Research Methods

HIST4077 - Book History: Topics

HIST4315 - History, Politics and Memory of the Holocaust in Europe

HIST4320 - Memory and National Identity in Twentieth Century Europe

HIST4400 - Internship (Students are allowed 2 Internship courses if approved by an advisor)

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

ENGL 1010

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Arts and Sciences Core

D- - Diversity

Credits: 3

A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

History BA Requirements

The History major requires a minimum of 36 credit hours in History courses or approved substitutions and an additional 12 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages. All courses used to satisfy major requirements - including the language requirement - must be completed with a grade of C or better. To complete the Bachelor of Arts (B.A.) degree in History, all University Studies Program (USP) and college requirements must also be satisfied.

Language

Students must complete three semesters of a single foreign language or the equivalent as determined by the Department of Languages - Modern and Classical. This requirement may be satisfied by American Sign Language.

Two Required Courses: 6 Hours

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research.

Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

AND

HIST4030 - Senior Capstone Seminar

Credits: 3
Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

Elective: Any Level: 3 Hours

One additional History course at any level.

Lower-Division Electives: 12 Hours

Lower-Division courses are 1000 and 2000 level courses.

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art; and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP 2015 Code U5FY

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

USP 2003-2014 Code U3VT

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

USP 2003-2014 Code U3VT

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.

USP 2003-2014 Code [(none)< >H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3

Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

USP 2015 Code U5H

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed RELI 2252.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed INST 2280.

USP 2015 Code U5C2

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

HIST2315 - History of Non-Western Religions

Credits: 3

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed RELI 2315.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

HIST2360 - African-American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed AAST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

HIST2370 - Chicano History: Origins to 1900

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2370/GEOG 2370.
USP 2003-2014 Code U3CS, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2380 - Latin American History 1500 to 2000

Credits: 3

Provides introduction to Latin American history, from colonial contacts to the present. Explores important themes and connections across the colonial and modern periods, such as race, national identity, foreign involvement, indigenous peoples' role in nation-states, religion, social movements, economic systems, and globalization.

USP 2003-2014 Code U3G
USP 2015 Code U5H

HIST2385 - Chicano History : 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2385.
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD

HIST2390 - US West Between the World Wars

Credits: 3

Examines two pivotal decades (1918-1942) in the US West that encompasses prosperity, Depression, and reform, through the use of historical documents, art, film, literature, and music.

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

A&S College Core 2015 ASG

HIST2470 - Civilization of India

Credits: 3-4
Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

HIST2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed ECON 2500.

HIST2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in

long-distance trade.

Cross Listed ANTH 2600.
USP 2015 Code U5H

HIST2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed ART 2700/AMST 2700/ANTH 2700.
USP 2003-2014 Code U3CH

HIST2705 - Museology II

Credits: 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes. Cross listed between Anthropology, History, American Studies, and Art.

Cross Listed AMST 2705 / ANTH 2705 / ART 2705

Upper-Division Electives: 15 Hours

Upper-Division courses are 3000 and 4000 level courses.

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 6 hours of HIST or NAIS.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/POLS 3050.

Prerequisite: WB or COM2.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/PHIL 3160.

Prerequisite: WB or COM2.

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP 2003-2014 Code U3G
A&S College Core 2015 ASG
Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000 or RELI 2225/HIST 2225.

HIST3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500 - 1500 CE, concentrating on the Latin West. It examines the growth of Christian institutions and practices, the Church's role as sole governing entity, along with conflicts with secular governments as they developed in later centuries.

Cross Listed RELI 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

HIST3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: RELI 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

HIST3275 - World Christianities

Credits: 3

Examines the development of Christianity primarily in Africa, Asia and South America.

Cross Listed RELI 3275

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WB and CH

HIST3300 - Secret History of Science

Credits: 3

Explores developments in science from prehistory to the present. It focuses on the lesser-known men and women who

contributed to science, as well as on seemingly superstitious beliefs that were nonetheless important to advances in knowledge.

Restricted Restricted to junior standing or higher.

Prerequisite: 6 hours in HIST or 6 hours of PN coursework, or a combination of both.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

HIST3500 - Colonial America

Credits: 3

This course covers the history of European colonization from roughly 1492 to 1763. Our geographic focus will be on the (future) United States, but will also learn how transatlantic forces influenced its people.

Prerequisite: 12 hours of HIST courses or permission of instructor.

HIST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia, and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed AAST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/HIST 2360.

HIST3880 - Comparative History

Credits: 3

Explores comparative history from a variety of topics, such as colonialism, memory, nationalisms, frontiers, or cultural history. This course will introduce students to at least one of these themes from at least two regions, time periods, or groups of people to understand patterns and change in human societies through time.

Prerequisite: 6 hours of HIST.

HIST3900 - Historical Archaeology

Credits: 3

This course introduces students to the field of historical archaeology, the archaeological and archival study of literate societies. Students will be introduced to the history of the discipline, a survey of contemporary historical archaeological practice.

Cross Listed ANTH 3900

Former Course Number [none < > none]

Prerequisite: ANTH 1300

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000

Dual Listed HIST 5000

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP 2003-2014 Code U3CH, U3D

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

HIST4060 - Independent Study

Credits: 1-3

Max Credit 6

Credit not to exceed 6 hours maximum, to be arranged in either European or American history. Primarily for juniors and seniors who can profit from independent work with minimal supervision.

Prerequisite: 12 semester hours in history; written permission of instructor required.

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

HIST4100 - Early Medieval Europe

Credits: 3

Studies development of European civilization from decline of Rome to 12th century.

Dual Listed HIST 5100.

Prerequisite: 9 hours of HIST.

HIST4110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 5110.

Prerequisite: 9 hours of HIST.

HIST4112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000 Europe began its rise to world prominence and cities contributed to that rise. Examines development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 5112.

Prerequisite: 9 hours of HIST.

HIST4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what some would call heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 5113.

Prerequisite: 9 hours of HIST or RELI.

HIST4120 - Europe During the Renaissance

Credits: 3

Intensely studies European history in 14th and 15th centuries.

Prerequisite: 9 hours of HIST.

HIST4130 - Europe During the Reformation

Credits: 3

Intensely studies European history in the 16th century.

Prerequisite: 9 hours of HIST.

HIST4140 - Europe During the Age of the Baroque

Credits: 3

Intensely studies European history in 17th century.

Prerequisite: 9 hours of HIST.

HIST4150 - Europe During the Age of the Enlightenment

Credits: 3

Intensely studies European history in 18th century.

Prerequisite: 9 hours of HIST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed RELI 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

HIST4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed RELI 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 5305.

USP 2003-2014 Code U3G

Prerequisite: 9 hours of HIST, INST, or POLS.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 4380.

Dual Listed HIST 5380.

Prerequisite: 9 hours of HIST or INST.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

HIST4405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African and Asian people from pre-contact through the mid-19th century.

Dual Listed HIST 5405.

USP 2003-2014 Code U3D

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 5406

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST.

HIST4410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 5410.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 5415.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 5425.

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4450 - The Civil War and Reconstruction

Credits: 3

Studies crisis of the Union, 1861-1877. Examines experiences of both the North and South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 5450.

Prerequisite: 9 hours of HIST.

HIST4460 - Post-Civil War America: The Gilded Age

Credits: 3

Intensively covers economic, cultural and political developments which marked the U.S. in post-Civil War era, such as rise of industry, emergence of distinctive national culture and party struggles shaping America's Gilded Age.

Dual Listed HIST 5460.

Prerequisite: 9 hours of HIST.

HIST4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed NAIS 4462.

Dual Listed HIST 5462.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or NAIS.

HIST4463 - American Indian History 1783 to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied moving west.

Cross Listed NAIS 4463.

Dual Listed HIST 5463.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 4464.

Dual Listed HIST 5464.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed NAIS 4466.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

HIST4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed NAIS 4468.

USP 2003-2014 Code U3D

Prerequisite: 9 hours of HIST or NAIS.

HIST4470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U. S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between depression of the 1890s and that of the 1930s.

Dual Listed HIST 5470.

Prerequisite: 9 hours of HIST.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

HIST4480 - Growth of Modern America, 1929 to 1960

Credits: 3

Studies political and diplomatic developments in the U.S. in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasizes economic crisis, growth of government, reform traditions, anti-communism and civil rights.

Dual Listed HIST 5480.

Prerequisite: 9 hours of HIST.

HIST4485 - U.S. Latino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U.S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives' responses are stressed.

Cross Listed LTST 4485/INST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Cross Listed LTST 4492.

Dual Listed HIST 5492.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST or INST.

HIST4494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 5494.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or INST.

HIST4495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 5495.

Former Course Number [4720]

Prerequisite: 9 hours of HIST or INST.

HIST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U.S., incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed LTST 4496.

Dual Listed HIST 5496.

Former Course Number [4800]

Prerequisite: 9 hours of HIST or INST.

HIST4505 - The Old South, 1820 to 1861

Credits: 3

Studies history of the South from emergence of southern identity to the Civil War. Emphasizes southern society and culture.

Dual Listed HIST 5505.

Former Course Number [4500]

Prerequisite: 9 hours of HIST.

HIST4510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 5510.

Former Course Number [4950]

Prerequisite: 9 hours of HIST.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

HIST4530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 5530.

Former Course Number [4630]

Prerequisite: 9 hours of HIST.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

HIST4540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 5540.

Former Course Number [4640]

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

HIST4560 - American Social History in the 20th Century

Credits: 3

Explores history of social mobility and conflict in 20th century. Emphasizes impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting and architecture.

Dual Listed HIST 5560.

Prerequisite: 9 hours of HIST.

HIST4582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed INST 4582.

Dual Listed HIST 5582.

Prerequisite: 9 hours of HIST or INST.

HIST4610 - Seminar Topics in the History of Wyoming I

Credits: 3

An intensive research and writing course dealing with topics in the period before statehood in 1890.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4620 - Seminar Topics in the History of Wyoming II

Credits: 3

Allows students to do intensive research and writing dealing with topics in Wyoming history from 1890 to present.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4965 - Senior Thesis

Credits: 3

Working closely with a faculty advisor, a history major will develop a research proposal that, after approval by the History department faculty, will lead to in-depth research and writing, producing a minimum 50-page thesis that demonstrates an excellent grasp of historical methods and a high degree of writing skill.

Prerequisite: 12 hours of HIST; senior class standing; HIST major.

HIST4990 - Topics in _____

Credits: 1-6

Max Credit (Max. 12)

Affords students opportunity to study in-depth various topics in history not offered in regular courses or independent study.

Former Course Number [4080]

Prerequisite: 9 hours of HIST.

International Studies, B.A.

Students graduating with a degree in international studies will be able to recognize and appreciate the historical, political, social, cultural, and economic dimensions of international processes and issues, integrating these into an interdisciplinary perspective. uwyo.edu/sppais.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Requirements

All required courses for the major must be passed with a grade of C or better. There are numerous special topics courses offered during the academic year and these courses can fulfill the international studies requirements with approval from your adviser. Students are encouraged to satisfy the USP Q (quantitative reasoning) requirement by taking STAT2070 - Introductory Statistics for the Social Sciences or STAT2050 - Introduction to Statistics.

Core Courses

Students take 9 hours of core coursework. INST2350 - Introduction to Global Studies and INST2310 - Introduction to International Relations provide the theoretical framework for the global and regional tracks. INST4950 - Capstone in International Studies (Capstone) provides the culminating experience for students completing the B.A. degree in international studies and fulfills the COM3 writing requirement for the University Studies Program.

Area of Focus

Students will complete a minimum of 18 hours of coursework in two specific areas of focus, choosing a global and regional track. Students must complete a minimum of 9 hours in each track.

Global and regional tracks have suggested Gateway courses. Most Gateway courses fulfill University Studies requirements. All INST students are required to take the Regional Gateway course in their chosen region. All INST students are required to take the Regional Gateway course in their chosen region. These courses fulfill the COM2 requirement for the University Studies Program and count towards the 9 hours required for the Regional Track.

INST2230 - Introduction to Asian Studies

Credits: 3

Asia, the world's largest continent, is home to virtually half of humanity and a broad spectrum of peoples, languages, religions, and cultures. This course introduces the cultural, political, economic, and environmental landscapes of this diverse region.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

INST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed AAST 2240.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

INST2250 - Introduction to Latin American Studies

Credits: 3

An introduction to the culture, history and politics of Latin America, from the US/Mexico border to the Antarctic ice fields of Patagonia. We will consider historical events and encounters from pre-Conquest times to contemporary crises. Our toolkit includes geography, anthropology, history, political economy, literature and cultural studies.

USP 2015 Code U5C2

OR

INST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed HIST 2280.

USP 2015 Code U5C2

OR

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 o r POLS 1250 o r permission of the instructor.

Global Tracks

9 hours of coursework from a single track. This list is not comprehensive; students are strongly encouraged to review the International Studies Newsletter each semester to see what additional qualifying courses are currently being offered.

- Global Track, Sustainable Development and the Environment
- Global Track, Economic Systems
- Global Track, Culture and Social Issues
- Global Track, Governance and Conflict Resolution

Regional Tracks

9 hours of coursework from a single track. This list is not comprehensive; students are strongly encouraged to review the International Studies Newsletter each semester to see what additional qualifying courses are currently being offered.

- Regional Tracks, Africa and the Middle East
- Regional Tracks, Asia
- Regional Tracks, Europe and the Former Soviet Union
- Regional Tracks, Latin America

Foreign Language

Students must complete a four semester sequence in a single foreign language or show an equivalent level of proficiency. Language courses must be conversational language courses. American Sign Language is not considered a foreign language.

Electives

Students must take 9 hours of elective courses from the international studies curriculum, 6 of which must be upper division. The following Gateway courses can count for the elective requirement:

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

INST1060 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed Cross listed with: GEOG 1000.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

OR

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

INST1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed POLS 1200.

USP 2003-2014 Code U3CS, U3G

OR

POLS1200 - Non-Western Political Cultures

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Jazz Performance, B.M.: 120 Credits

Music Core: 56 Credits

- Students must complete at least one ensemble per semester enrolled, total 8.

MUSC0200 - Music Convocation

Credits: 0
Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

Students must complete 8 semesters of Convocation, 1 each semester they are in residence.

MUSC1290 - Class Piano I

Credits: 1
Encompasses group instruction for the beginner at the keyboard. First semester of four-semester sequence. Enrollment limited to music or music education majors whose principal performance area is not piano.

When Offered (Offered fall semester)

MUSC1295 - Class Piano II

Credits: 1
Continues skills begun in MUSC 1290 including all major scales, beginning minor scales, prescribed chord progressions, harmonization, transposition, sight reading and repertoire.

When Offered (Offered spring semester)

Prerequisite: MUSC 1290 or successful completion of final exam requirements for MUSC 1290.

MUSC1030 - Written Theory I

Credits: 3
First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC4070 - Conducting

Credits: 3

Examines basic techniques of baton, score reading, familiarization with standard works, practical experience in directing choral and instrumental groups. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030, MUSC 2035, MUSC 2040, and MUSC 2045.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

- One hour of Applied Lessons on the students major instrument must be taken every semester starting at the 2000 level.
 MUSC 2*** Applied Lessons II: 4 Credits
 MUSC 3*** Applied Lessons III: 4 Credits
 MUSC 4*** Applied Lessons IV: 4 Credits
 MUSC 5*** Applied Lessons V: 4 Credits

Instrumental Emphasis: 2 Credits

MUSC4615 - Instrumental Pedagogy

Credits: 2

Surveys teaching materials in solo and chamber literature, techniques, practices, and methods for applicable instrument.

Prerequisite: 8 credit hours of individual study in a specific instrument.

Jazz Core Requirements: 11 Credits

MUSC3025 - Fundamentals of Jazz Improvisation

Credits: 2

Continuation of Jazz Aural Theory IV, MUSC 1045. More advanced topics will be covered and more challenging repertoire will be explored. A strong emphasis will be placed on common practice techniques in mainstream jazz.

Prerequisite: MUSC 2045.

MUSC4020 - Advanced Jazz Improvisation

Credits: 2

Continuation of Fundamentals of Jazz and Improvisation , MUSC 3025. Students will learn the harmonic and melodic language of bebop and hard bop through performance and composition of tunes in these idioms.

Prerequisite: MUSC 3025.

MUSC4025 - Jazz Composition and Arranging

Credits: 2

Continuation of Advanced Jazz Improvisation , MUSC 4020. Students explore developments in jazz improvisation and composition since 1960. Advanced theoretical concepts are covered in lectures and workshop sessions.

Prerequisite: MUSC 4020.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz

materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP 2015 Code U5H

Prerequisite: consent of instructor.

MUSC4380 - Jazz Techniques

Credits: 2

Max Credit (Max. 2)

Surveys jazz structure, styles, techniques and materials with respect to public school music programs. Intended for music education major.

When Offered (Offered spring semester)

Prerequisite: MUSC 2035.

Upper Division Music Electives: 9 Credits

MUSC3015 - Introduction to the Music of the World's Peoples

Credits: 3

Students develop three primary interconnected literacies for the study and understanding of musics of other cultures: analytical music listening, understanding the concept of music culture, and interpretation of musical events. Student writing is a primary tool for developing these literacies. Texts from the Oxford University Press Global Music Series to study musics of Africa, Indonesia, India, and Eastern Europe are used.

Cross Listed ANTH 3015.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [2015]

Prerequisite: MUSC 1000 or permission of instructor and WA.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D
A&S College Core 2015 ASD
Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

MUSC4650 - Keyboard Literature

Credits: 3

An overview of solo ensemble keyboard literature from the 1600s to the present, focusing on major composers and common compositional forms. Includes listening assignments and examinations as well as individual research papers and class presentations.

Restricted BM MMM MME PC; MUSC 5655 Graduate Standing

Prerequisite: MUSC 4655, MUSC 2050, MUSC 2055

MUSC4651 - String Solo Literature

Credits: 3

Provide a survey of the masterpieces of string solo literature (violin, viola, cello and bass literature) in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: 8 hours of lessons in string instruments.

MUSC4750 - Marching Band Techniques

Credits: 1

Applies specific various drill design techniques including corps style, military, show band and computer applications.

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

MUSC4790 - Choral Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to choral group rehearsals concerning such problems as intonation, good vocal production, phrasing, diction, dynamics, balance, etc. Overviews appropriate choral literature.

Prerequisite: MUSC 4070 and passed piano proficiency requirement.

MUSC4990 - Topics in:

Credits: 1-12

Max Credit (Max. 12)

Encompasses various topics in music. Specific subjects vary from year to year as course is often taught by distinguished visiting artists and lecturers or music faculty. Presents topics of special interest to music majors, graduate students and music educators. Please check class schedule for course titles each semester.

Prerequisite: consent of instructor.

MUSC5035 - Advanced Theory

Credits: 3

To further understanding of chromatic harmonies, analysis of advanced formal aspects, Pitch-class set Analysis, and 12-tone Analysis. To ultimately have a synergistic view of each work, combing historical and theoretical elements in viewing the work as a whole.

Dual Listed MUSC 4035

Prerequisite: MUSC 2030 and MUSC 2035, music majors only; (MUSC 5035): graduate standing.

A&S Core

A&S Diversity - 3 Credits

A&S Global - 3 Credits

General Electives: 6 Credits

Journalism, B.A.

The journalism major is designed to prepare students for careers as reporters, editors and writers with newspapers, news services, magazines, public information, public relations, advertising, and many other fields.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

- Departmental Core Courses Credits: 30

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

- Elective Credits: 15 (At least 9 hours must be from the list of journalism courses.) Three hours need to be upper division in COJO. The other three hours can be upper or lower division in COJO/COMM.

Departmental Core Courses

In addition to the university studies requirements listed in this catalog, all students majoring in communication and journalism must take the following required courses:

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COJO3070 - Communication Research

Credits: 3

Focuses on problems in communication and mass communication research. Specifically studies and applies language of science, basic concepts of communication, mass communication research, types and limitations of empirical research, as well as measurement procedures and analysis.

Prerequisite: COMM 1000 or COMM 1040 and STAT 2050 or STAT 2070.

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010.

College of Arts and Sciences Requirements

- A&S U.S. Diversity (ASD) Credits: 3
- A&S Global Awareness (ASG) Credits: 3

Additional Program Requirements

- Human Culture Credits: 6 (H)

Music Education, B.M.

The **BM in Music Education** is a professional degree intended to prepare students for careers as K-12 music educators. Acceptance to the program is by audition only.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Music Education: B.M.

Music Core: 43 Credits

- Students must complete at least one ensemble per semester enrolled, total 7.

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC2045 - Aural Theory IV

Credits: 1

Second semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 2035.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC2390 - Piano Literacy Exam

Credits: 0

The Piano Literacy test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2390 a maximum of two times. Consult the Music Department Handbook for specific requirements.

Restricted MUSIC, BA and BM Instrumental Performance only

- Students who are Brass, Woodwind, and Percussion Emphasis may fulfill this requirement by passing Class Piano 1 and 2 with a B or higher.
OR

MUSC2395 - Piano Proficiency

Credits: 0

Piano proficiency test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2395 a maximum of 2 times. Consult the Music Department Handbook for specific requirements.

- Required for all Vocal and String emphasis students. Class Piano 1-4 is recommended to prepare for this exam.

MUSC4070 - Conducting

Credits: 3

Examines basic techniques of baton, score reading, familiarization with standard works, practical experience in directing choral and instrumental groups. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030, MUSC 2035, MUSC 2040, and MUSC 2045.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

MUSC4155 - Senior Music Education Recital

Credits: 0

Music Education students perform a recital which may be a part of a Convocation or a separate performance. Consult your studio teacher for individual studio requirements.

Prerequisite: senior standing and studio teacher consent.

- Applied lessons are required each semester of residency:
MUSC 2*** Applied Lessons II: 2 Credits
MUSC 3*** Applied Lessons III: 2 Credits
MUSC 4*** Applied Lessons IV: 2 Credits
MUSC 5*** Applied Lessons V: 2Credits

Music Education Core: 13 Credits

Prerequisite: MUSC 1040 & 1045

MUSC1025 - Introduction to Music Education

Credits: 2

Introduces music teacher education. Includes overview of vocal and instrumental music education and teaching processes in grade levels K-12. Requires on-site visits and observations of music programs.

When Offered (Offered spring semester)

Former Course Number [1020]

Prerequisite: music majors only.

MUSC1312 - Public School Tech: Brass

Credits: 2

This course is designed to teach the fundamentals of brass pedagogy and performance for music education majors. The course consists of two components applied study on brass instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1322 - Public School Tech: Percussion

Credits: 2

This course is designed to teach the fundamentals of percussion pedagogy and performance for music education majors. The course consists of two components applied study on percussion instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1332 - Public School Tech: Strings

Credits: 2

This course is designed to teach the fundamentals of string pedagogy and performance for music education majors. The course consists of two components applied study on string instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1340 - Public School Methods: Voice I

Credits: 1

Max Credit (Max. 2)

Encompasses group instruction in vocal methods for music education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1352 - Public School Tech: Woodwinds

Credits: 2

This course is designed to teach the fundamentals of woodwind pedagogy and performance for music education majors. The course consists of two components applied study on woodwind instruments and study/discussion of current pedagogy and methods.

Restricted Restricted to Music Education majors.

Prerequisite: MUSC 1040, MUSC 1045.

MUSC1360 - Public School Methods: Guitar

Credits: 1

Max Credit (Max. 2)

Prerequisite: MUSC 1040, MUSC 1045.

MUSC3265 - Music Education Proficiency Review

Credits: 0

This course is required for entrance into upper-division Music Education coursework. The review will assess competency in oral and written communication skills, preliminary teacher performance, sight singing, and error detection. Completion is in the sophomore year or in the first semester for transfer students.

Prerequisite: sophomore standing.

MUSC4620 - Practicum in Music Education

Credits: 1

Provides opportunity to gain experience in music classroom in area public schools. Includes work on meeting educational standards of Wyoming necessary to begin student teaching and continued work on developing a teaching portfolio.

Prerequisite: MUSC 1050 and junior status.

Emphasis: Choose One, 4-5 credits

String Emphasis: 4 credits

- String majors must take lessons on a secondary string instrument. 2 credits

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

Vocal Emphasis: 4 credits

MUSC2320 - Diction for Singers I

Credits: 2

Studies phonetic sounds of English and Italian.

When Offered (Offered fall semester)

MUSC4620 - Practicum in Music Education

Credits: 1

Provides opportunity to gain experience in music classroom in area public schools. Includes work on meeting educational standards of Wyoming necessary to begin student teaching and continued work on developing a teaching portfolio.

Prerequisite: MUSC 1050 and junior status.

Brass, Woodwind, and Percussion Emphasis: 5 credits

MUSC4380 - Jazz Techniques

Credits: 2

Max Credit (Max. 2)

Surveys jazz structure, styles, techniques and materials with respect to public school music programs. Intended for music education major.

When Offered (Offered spring semester)

Prerequisite: MUSC 2035.

MUSC4750 - Marching Band Techniques

Credits: 1

Applies specific various drill design techniques including corps style, military, show band and computer applications.

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

Professional Education Requirements: 33 Credits

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

MUSC4455 - Elem General Music Methods

Credits: 3

This course is designed to prepare students for a career in K-6 music teaching while emphasizing the need for music teachers to recognize diverse student needs, including those unique qualities brought into the classroom by marginalized populations.

A&S College Core 2015 ASD

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent enrollment in MUSC 4705.

MUSC4460 - Choral Music Methods

Credits: 3

This course is designed to help pre-professional music educators gain tools for teaching secondary choral music. Topics to be explored include choral literature, methodology involving strengthening musicianship, rehearsal techniques, and issues pertaining to the development of a choral ensemble program.

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent Enrollment in MUSC 4715 for choral emphasis students.

MUSC4465 - Instrumental Music Methods

Credits: 3

Based on a comprehensive instrumental music education model, this course acquaints students with curriculum development, instructional planning, and materials and techniques designed for teaching musical concepts and skills in instrumental ensemble and class lesson settings.

USP 2015 Code U5C3

Restricted Restricted to Music Education majors.

Prerequisite: Completion of MUSC 2040, MUSC 2045 and MUSC 2055. Concurrent enrollment in MUSC 4715 for instrumental emphasis students.

MUSC4705 - Elementary Music Ed Practicum

Credits: 1

Practicum experience is integral to development as a music teacher. As part of the Music Teaching Methods Sequence, pre-service music teachers will be immersed into authentic elementary and secondary music settings.

Restricted Restricted to Music Education majors.

Prerequisite: Concurrent enrollment with MUSC 4455 for instrumental emphasis students.

MUSC4715 - Secondary Music Ed Practicum

Credits: 1

Practicum experience is integral to development as a music teacher. As part of the Music Teaching Methods Sequence, pre-service music teachers will be immersed into authentic elementary and secondary music settings.

Restricted Restricted to Music Education majors.

Prerequisite: Concurrent enrollment with MUSC 4460 or MUSC 4465.

MUSC4700 - Elementary Student Teaching in Music

Credits: 8

The final professional academic semester of the teacher education program. A full-time residency with an elementary mentor teacher.

Prerequisite: 2.750 cumulative GPA, 3.000 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

MUSC4710 - Secondary Student Teaching in Music

Credits: 8

The final professional academic semester of the teacher education program. A full-time residency with a secondary mentor teacher.

Prerequisite: 2.750 cumulative GPA, 3.000 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

A&S Core

A&S Diversity - 3 Credits

A&S Global - 3 Credits

Music Performance, B.M.

The **BM in Performance** is a professional degree intended to prepare students for graduate school as well as a career in performing music. Acceptance to the program is by audition only.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S Core

A&S Diversity - 3 Credits

A&S Global - 3 Credits

B.M. Performance, Vocal Emphasis: 120 Total Hours

Music Core: 54 Credits

- Ensembles: 1 per semester, minimum 8

MUSC0200 - Music Convocation

Credits: 0
Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC2045 - Aural Theory IV

Credits: 1

Second semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 2035.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC2395 - Piano Proficiency

Credits: 0

Piano proficiency test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2395 a maximum of 2 times. Consult the Music Department Handbook for specific requirements.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons

without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

- Applied lessons are required each semester of residency:
MUSC 2*** Applied Lessons II: 4 Credits
MUSC 3*** Applied Lessons III: 4 Credits
MUSC 4*** Applied Lessons IV: 4 Credits
MUSC 5*** Applied Lessons V: 4 Credits

MUSC4070 - Conducting

Credits: 3

Examines basic techniques of baton, score reading, familiarization with standard works, practical experience in directing choral and instrumental groups. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030, MUSC 2035, MUSC 2040, and MUSC 2045.

MUSC3500 - Junior Recital

Credits: 0

Students will perform a 30 minute (minimum) recital of appropriate repertoire. Consult your studio teacher for individual studio requirements.

Prerequisite: 4 semesters of private instruction, consent of instructor.

MUSC4590 - Senior Recital

Credits: 2

Max Credit (Max. 4)

Prerequisite: at least 14 semester hours in one performance field and senior standing.

Vocal Emphasis: 6 Credits

MUSC2320 - Diction for Singers I

Credits: 2

Studies phonetic sounds of English and Italian.

When Offered (Offered fall semester)

MUSC2325 - Diction for Singers II

Credits: 2

Studies phonetic sounds of French and German. (Usually offered spring semester)

MUSC4635 - Vocal Pedagogy

Credits: 2

This specialized course addresses anatomy and physiology of the vocal instrument and the scientific principles surrounding it, studio teaching techniques, student learning styles, repertoire assignment, and all aspects of establishing a private voice studio. The last quarter of the class includes an in-class, supervised teaching unit. Students enrolled in the graduate level (5635) will undertake an extensive research paper/project and additional teaching.

Dual Listed MUSC 5635.

When Offered (Offered alternate spring semesters)

Former Course Number [4610]

Prerequisite: 8 credits of voice or permission of instructor.

Upper Division Music Electives: 16 Credits

MUSC3015 - Introduction to the Music of the World's Peoples

Credits: 3

Students develop three primary interconnected literacies for the study and understanding of musics of other cultures: analytical music listening, understanding the concept of music culture, and interpretation of musical events. Student writing is a primary tool for developing these literacies. Texts from the Oxford University Press Global Music Series to study musics of Africa, Indonesia, India, and Eastern Europe are used.

Cross Listed ANTH 3015.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [2015]

Prerequisite: MUSC 1000 or permission of instructor and WA.

MUSC3025 - Fundamentals of Jazz Improvisation

Credits: 2

Continuation of Jazz Aural Theory IV, MUSC 1045. More advanced topics will be covered and more challenging repertoire will be explored. A strong emphasis will be placed on common practice techniques in mainstream jazz.

Prerequisite: MUSC 2045.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of

marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4020 - Advanced Jazz Improvisation

Credits: 2

Continuation of Fundamentals of Jazz and Improvisation , MUSC 3025. Students will learn the harmonic and melodic language of bebop and hard bop through performance and composition of tunes in these idioms.

Prerequisite: MUSC 3025.

MUSC4025 - Jazz Composition and Arranging

Credits: 2

Continuation of Advanced Jazz Improvisation , MUSC 4020. Students explore developments in jazz improvisation and composition since 1960. Advanced theoretical concepts are covered in lectures and workshop sessions.

Prerequisite: MUSC 4020.

MUSC4040 - Composition

Credits: 2

Max Credit (Max. 12)

Prerequisite: MUSC 4010.

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4380 - Jazz Techniques

Credits: 2

Max Credit (Max. 2)

Surveys jazz structure, styles, techniques and materials with respect to public school music programs. Intended for music education major.

When Offered (Offered spring semester)

Prerequisite: MUSC 2035.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

MUSC4650 - Keyboard Literature

Credits: 3

An overview of solo ensemble keyboard literature from the 1600s to the present, focusing on major composers and common compositional forms. Includes listening assignments and examinations as well as individual research papers and class presentations.

Restricted BM MMM MME PC; MUSC 5655 Graduate Standing

Prerequisite: MUSC 4655, MUSC 2050 , MUSC 2055

MUSC4651 - String Solo Literature

Credits: 3

Provide a survey of the masterpieces of string solo literature (violin,viola, cello and bass literature) in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: 8 hours of lessons in string instruments.

MUSC4750 - Marching Band Techniques

Credits: 1

Applies specific various drill design techniques including corps style, military, show band and computer applications.

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

MUSC4790 - Choral Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to choral group rehearsals concerning such problems as intonation, good vocal production, phrasing, diction, dynamics, balance, etc. Overviews appropriate choral literature.

Prerequisite: MUSC 4070 and passed piano proficiency requirement.

MUSC4360 - Fundamentals of Audio for Music Production

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

B.M. Performance, Keyboard Emphasis: 120 Hours Total

Music Core: 56 Hours

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

- Students must be enrolled in Convocation every semester they are enrolled, maximum of 8.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC2045 - Aural Theory IV

Credits: 1

Second semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 2035.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC2395 - Piano Proficiency

Credits: 0

Piano proficiency test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2395 a maximum of 2 times. Consult the Music Department Handbook for specific requirements.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. MUSC3025 - Fundamentals of Jazz Improvisation

Credits: 2

Continuation of Jazz Aural Theory IV, MUSC 1045. More advanced topics will be covered and more challenging repertoire will be explored. A strong emphasis will be placed on common practice techniques in mainstream jazz.

Prerequisite: MUSC 2045.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4020 - Advanced Jazz Improvisation

Credits: 2

Continuation of Fundamentals of Jazz and Improvisation , MUSC 3025. Students will learn the harmonic and melodic language of bebop and hard bop through performance and composition of tunes in these idioms.

Prerequisite: MUSC 3025.

MUSC4025 - Jazz Composition and Arranging

Credits: 2

Continuation of Advanced Jazz Improvisation , MUSC 4020. Students explore developments in jazz improvisation and composition since 1960. Advanced theoretical concepts are covered in lectures and workshop sessions.

Prerequisite: MUSC 4020.

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP 2015 Code U5H

Prerequisite: consent of instructor.

MUSC4380 - Jazz Techniques

Credits: 2

Max Credit (Max. 2)

Surveys jazz structure, styles, techniques and materials with respect to public school music programs. Intended for music education major.

When Offered (Offered spring semester)

Prerequisite: MUSC 2035.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

MUSC4650 - Keyboard Literature

Credits: 3

An overview of solo ensemble keyboard literature from the 1600s to the present, focusing on major composers and common compositional forms. Includes listening assignments and examinations as well as individual research papers and class presentations.

Restricted BM MMM MME PC; MUSC 5655 Graduate Standing

Prerequisite: MUSC 4655, MUSC 2050, MUSC 2055

MUSC4750 - Marching Band Techniques

Credits: 1

Applies specific various drill design techniques including corps style, military, show band and computer applications.

MUSC4780 - Instrumental Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to instrumental group rehearsals concerning such problems as intonation, phrasing, dynamics, balance, etc. Overviews appropriate selection procedures for band and orchestral literature.

Prerequisite: MUSC 4070 and MUSC 2395.

MUSC4790 - Choral Conducting and Repertory

Credits: 2

Applies specific basic conducting techniques to choral group rehearsals concerning such problems as intonation, good vocal production, phrasing, diction, dynamics, balance, etc. Overviews appropriate choral literature.

Prerequisite: MUSC 4070 and passed piano proficiency requirement.

MUSC4360 - Fundamentals of Audio for Music Production

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

B.M. Performance, Winds & Percussion Emphasis: 120 Total Hours

Music Core: 58 Credits

- Ensembles: 1 per semester, minimum 8

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

Students must be enrolled in Convocation every semester they are enrolled, maximum of 8.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC2040 - Written Theory IV

Credits: 3

Fourth semester of a two-year series. Explores the instruments of the band and orchestra, and the capabilities of writing for voices and piano. Arranging for various instrumental combinations and vocal ensembles.

Prerequisite: MUSC 2030.

MUSC2045 - Aural Theory IV

Credits: 1

Second semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 2035.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

- Applied lessons are required each semester of residency:
MUSC 2*** Applied Lessons II: 4 Credits
MUSC 3*** Applied Lessons III: 4 Credits
MUSC 4*** Applied Lessons IV: 4 Credits
MUSC 5*** Applied Lessons V: 4 Credits

MUSC1290 - Class Piano I

Credits: 1

Encompasses group instruction for the beginner at the keyboard. First semester of four-semester sequence. Enrollment limited to music or music education majors whose principal performance area is not piano.

When Offered (Offered fall semester)

AND

MUSC1295 - Class Piano II

Credits: 1

Continues skills begun in MUSC 1290 including all major scales, beginning minor scales, prescribed chord progressions, harmonization, transposition, sight reading and repertoire.

When Offered (Offered spring semester)

Prerequisite: MUSC 1290 or successful completion of final exam requirements for MUSC 1290.

OR

MUSC2390 - Piano Literacy Exam

Credits: 0

The Piano Literacy test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2390 a maximum of two times. Consult the Music Department Handbook for specific requirements.

Restricted MUSIC, BA and BM Instrumental Performance only

MUSC4040 - Composition

Credits: 2

Max Credit (Max. 12)

Prerequisite: MUSC 4010.

MUSC4070 - Conducting

Credits: 3

Examines basic techniques of baton, score reading, familiarization with standard works, practical experience in directing choral and instrumental groups. For graduate credit, students must present extra paper or project determined by instructor.

Prerequisite: MUSC 2030, MUSC 2035, MUSC 2040, and MUSC 2045.

MUSC3500 - Junior Recital

Credits: 0

Students will perform a 30 minute (minimum) recital of appropriate repertoire. Consult your studio teacher for individual studio requirements.

Prerequisite: 4 semesters of private instruction, consent of instructor.

MUSC4590 - Senior Recital

Credits: 2

Max Credit (Max. 4)

Prerequisite: at least 14 semester hours in one performance field and senior standing.

Instrumental Emphasis: 2 Credits

MUSC4615 - Instrumental Pedagogy

Credits: 2

Surveys teaching materials in solo and chamber literature, techniques, practices, and methods for applicable instrument.

Prerequisite: 8 credit hours of individual study in a specific instrument.

Upper Division Music Electives: 18 Credits

MUSC3015 - Introduction to the Music of the World's Peoples

Credits: 3

Students develop three primary interconnected literacies for the study and understanding of musics of other cultures: analytical music listening, understanding the concept of music culture, and interpretation of musical events. Student writing is a primary tool for developing these literacies. Texts from the Oxford University Press Global Music Series to study musics of Africa, Indonesia, India, and Eastern Europe are used.

Cross Listed ANTH 3015.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [2015]

Prerequisite: MUSC 1000 or permission of instructor and WA.

MUSC3025 - Fundamentals of Jazz Improvisation

Credits: 2

Continuation of Jazz Aural Theory IV, MUSC 1045. More advanced topics will be covered and more challenging repertoire will be explored. A strong emphasis will be placed on common practice techniques in mainstream jazz.

Prerequisite: MUSC 2045.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4020 - Advanced Jazz Improvisation

Credits: 2

Continuation of Fundamentals of Jazz and Improvisation , MUSC 3025. Students will learn the harmonic and melodic language of bebop and hard bop through performance and composition of tunes in these idioms.

Prerequisite: MUSC 3025.

MUSC4025 - Jazz Composition and Arranging

Credits: 2

Continuation of Advanced Jazz Improvisation , MUSC 4020. Students explore developments in jazz improvisation and composition since 1960. Advanced theoretical concepts are covered in lectures and workshop sessions.

Applies specific basic conducting techniques to choral group rehearsals concerning such problems as intonation, good vocal production, phrasing, diction, dynamics, balance, etc. Overviews appropriate choral literature.

Prerequisite: MUSC 4070 and passed piano proficiency requirement.

MUSC4360 - Fundamentals of Audio for Music Production

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

Music, B.A.

The **BA in Music** is a broad liberal arts degree with a 58-credit core music curriculum. Majors have the freedom to explore the potential for future careers in the music and arts industry such as arts management, entrepreneurship, and audio technology.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Music Core: 40 Credits

- Students must complete at least one ensemble per semester enrolled, total 8.

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.

- All music majors must enroll in and successfully complete Convocation each semester they are enrolled, maximum of 8.

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC2030 - Written Theory III

Credits: 3

First semester of a one-year series. Studies chromatic harmony, contrapuntal techniques and twentieth-century practices.

Prerequisite: MUSC 1030 and MUSC 1040.

MUSC2035 - Aural Theory III

Credits: 1

First semester of a one-year series. Continues MUSC 1035 and MUSC 1045.

Prerequisite: MUSC 1035 and MUSC 1045.

MUSC1003 - Historical Perspectives in Music I

Credits: 3

The first semester of a three semester sequence covering the study of composers and music repertoire from antiquity to 1600.

USP 2003-2014 Code U3I, U3L

Prerequisite: Music majors and minors, or by permission of the instructor.

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

MUSC2390 - Piano Literacy Exam

Credits: 0

The Piano Literacy test is offered at the end of each fall and spring semester. Students may enroll in MUSC 2390 a maximum of two times. Consult the Music Department Handbook for specific requirements.

Restricted MUSIC, BA and BM Instrumental Performance only

- The Piano Literacy Exam must be completed by the end of Sophomore year. It may be substituted by passing Class Piano 1 and 2 with a B or higher.

MUSC3255 - Sophomore Qualifying Performance Jury

Credits: 0

An extended performance jury at the end of the sophomore year. Music majors may not continue to 4000-level lessons without successful completion of the sophomore jury. Transfer students with junior standing must take the jury at the end of their first semester in residence. Contact your studio teacher for the individual Sophomore Jury requirements. Students may register for this course up to 2 times.

Prerequisite: 4 semesters of private instruction, consent of instructor.

- Students must be enrolled in instrument specific lessons every semester they are enrolled. They must complete the following:
 - MUSC 2*** Applied Lessons II, 2 credits
 - MUSC 3*** Applied Lessons III, 2 Credits
 - MUSC 4*** Applied Lessons IV, 2 Credits
 - MUSC 5*** Applied Lessons V, 2 Credits

Upper Division Electives: 18 Credits

MUSC3015 - Introduction to the Music of the World's Peoples

USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS & Crosslisted Courses

Choose seven (7), for a total of 21 credit hours, courses from the following:

NAIS1010 - Beginning Indigenous Language

Credits: 4

Fundamentals of grammar, conversation, composition, and reading.

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional

discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.
USP 2003-2014 Code U3I, U3L
A&S College Core 2015 ASD

NAIS2010 - Intermediate Indigenous Language

Credits: 4
Second level fundamentals of grammar, conversation, composition, and reading.

Prerequisite: NAIS 1010.

NAIS2060 - Topics

Credits: 1-4
Max Credit (Max. 6)

Popular and current topics in American Indian studies.

NAIS2340 - Native American Culture and Literature

Credits: 3
Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed ENGL 2340.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD
Prerequisite: WA course.

NAIS2345 - American Indians in Hollywood Film

Credits: 3
Examines the ways Hollywood films have constructed various forms of racial identity for American Indians.

Cross Listed ENGL 2345.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD
Prerequisite: WA.

NAIS3000 - Plains Culture and History

Credits: 3
An ethnohistorical study of those Native peoples inhabiting the Plains region of the U. S. from prehistory to the present.

Cross Listed HIST 3000.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 6 hours of HIST or NAIS.

NAIS3010 - Proficient Indigenous Language

Credits: 4
Emphasizes the development of listening, speaking, reading, and writing so as to help students function effectively in the tribal cultural context of which the language is a part.

Prerequisite: NAIS 2010.

NAIS3100 - Tribal Literatures of the Great Plains

Credits: 3
Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed ENGL 3100.
USP 2003-2014 Code U3D, U3WC
A&S College Core 2015 ASD
Prerequisite: 6 hours of NAIS or ENGL.

NAIS3200 - Indigenous Peoples and the Environment

Credits: 3
Understand the historical, political, and socio-economic forces that have shaped the relationships of Indigenous peoples to their environments, and be able to discern the similarities and dissimilarities of Indigenous issues across international borders. The course may include a study abroad component.

Prerequisite: 6 hours NAIS credit.

NAIS3300 - Federal Indian Law

Credits: 3
Survey of law that applies to individual Indians and tribal governments. In particular, explores the legal relationships among, and relative jurisdictions of federal, tribal, and state governments. Specific topics include civil and criminal jurisdiction, taxation, family law, hunting and fishing, and gaming regulations.

Prerequisite: NAIS 1001 or NAIS 1350.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3
Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples

and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

NAIS4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed HIST 4000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

NAIS4010 - Advanced Indigenous Language

Credits: 4

Stresses the usage of language through composition, conversation, oral presentation, and grammar review.

Prerequisite: NAIS 3010.

NAIS4020 - Internship

Credits: 1-12

Max Credit (Max. 12)

Requires active participation and service to an Indigenous community or organization in US or elsewhere. A written agreement among the student, the NAIS director or NAIS faculty mentor, and an on-site supervisor is required. NAIS Majors must take at least four credit hours.

Prerequisite: 9 hours of NAIS courses.

NAIS4100 - Tribal Government

Credits: 3

Examines traditional systems of tribal governance; the establishment of contemporary tribal governments; stakeholders and their goals; factors influencing tribal government operations, including the federal trust relationship, plenary power, tribal federal and tribal-state relations; powers of tribal governments; and the future of tribal governments.

Prerequisite: 6 hours of NAIS courses, including NAIS 1001, and/or NAIS 1350.

NAIS4110 - Educational Foundations in American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political, and societal factors before, during, and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed EDCI 4110.

Dual Listed NAIS 5110.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

NAIS4200 - Indigenous Communities Abroad: International Travel

Credits: 4

Devoted to study/ travel related to Indigenous peoples abroad. The specific topic will be determined each time the class is offered. Two weeks of international travel will follow sixteen hours of on-campus instruction.

Prerequisite: 6 credits in NAIS.

NAIS4340 - Natural Resource Management on Western Reservations

Credits: 3

Examines natural resource management techniques on western reservations. Focus is on the management and planning of water, grazing, extractive industries, and forestry. Fieldwork on the Wind River Indian Reservation is included.

Cross Listed GEOG 4340.

Prerequisite: 6 hours of 2000-level NAIS courses.

NAIS4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed ENGL 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

NAIS4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed HIST 4466.

Dual Listed NAIS 5466.

Prerequisite: 9 hours of HIST, NAIS, or ANTH.

NAIS4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed ANTH 4740.

Prerequisite: ANTH 2000 or consent of instructor.

NAIS4975 - Independent Study

Credits: 1-4

Max Credit (Max. 8)

Directed, independent study in American Indian issues with American Indian Studies affiliated faculty. Students must initiate a project with an appropriate faculty member and have it approved by the program director.

Prerequisite: consent of instructor and 6 hours of NAIS.

NAIS4990 - Special Topics

Credits: 1-4

Max Credit (Max. 9)

Current research topics presented by regular and visiting faculty.

Prerequisite: 3 hours of NAIS courses.

Additional Requirements

Grade Requirements

NAIS classes applied to NAIS degrees must be passed with a grade of C or better. This policy applies to NAIS classes completed fall semester 2012 and beyond.

Additional Information

Cross-Listing & NAIS Courses

In order to provide a broader range of relevant and enriching courses, in any given year, the program in Native American and Indigenous Studies offers topics courses (NAIS 2060 or NAIS 4990) that are frequently cross-listed

with other majors and departments. Any such courses may be counted towards a student's 21 hours of required courses beyond the foundational courses.

If a student chooses to take more than one topics course in the same semester, it may require an override within the registration system. If you seek to enroll in a topics course and have trouble doing so, please contact scgsj@uwyo.edu.

Declaring a NAIS Major/Minor

Please complete and submit the "Change of Advisor, Major, Minor, Option/Concentration, College, and or Graduate Status" form available on the Office of the Registrar's website.

Philosophy, B.A.

Philosophy provides the critical thinking, logical reasoning, and innovative problem-solving skills necessary to be competitive in law, business, academia, tech, arts, and government. It also explores what it is to live a meaningful life outside a career.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements

- A major in Philosophy requires a minimum of 33 hours (11 courses) of philosophy.

- At least 6 hours (2 courses) must be at the 4000-level.
- At least an additional 18 hours (6 courses) must be at or above the 3000-level.
- The remaining 9 hours (3 courses) may be at any level.
- The department recommends that students begin with a 1000-level Intro course or a FYS followed by one or two other courses at the 1000 or 2000-level but it is not required that a student follow this recommendation.
- Only those courses in which a grad of C or better has been earned may count toward the 33-hour requirement.

1000 -2000-level courses

Nine hours (3 courses) may be at any level.

PHIL1000 - Introduction to Philosophy

Credits: 3

Introduces critical thinking through a study of elementary logic, scientific method and philosophical problems of ethics, religion, epistemology and metaphysics.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

PHIL1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

PHIL2100 - The Greek Mind

Credits: 3

Part one of the history of philosophy sequence. The first great age of philosophy was in ancient Greece. Students read from ancient Greek poets, historians and medical writers, as well as philosophers. The course attempts to understand the Greek mind: what Greeks thought of persons, society and the universe.

USP 2003-2014 Code U3CH

PHIL2300 - Ethics in Practice

Credits: 1-3

Alerts preprofessional students and other interested individuals to various ethical issues they will encounter and relevant professional work on those issues. Emphasis of the course concentrates one time on biomedical ethics, another on technology and engineering ethics, another on ethics in the professions.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

PHIL2310 - Philosophy of Religion

Credits: 3

Systematically examines philosophical questions, arguments and theories arising from study of religion. Topics may include: reason and religion; the existence and nature of God.

USP 2003-2014 Code U3CH

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

PHIL2345 - Natural Resource Ethics

Credits: 3

Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR 2345/RNEW 2345.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP 2003-2014 Code U3CH

Former Course Number [1100]

3000-level courses

At least 18 hours (6 courses) must be at or above the 3000-level.

PHIL3000 - Special Topics

Credits: 3

Max Credit (Max. 9)

Provides undergraduates with the opportunity for in-depth discussion of seminal works in the history of philosophy or a problem in contemporary philosophy not offered in regular courses or independent study. Open to interested undergraduates from all majors.

Prerequisite: 3 hours of philosophy.

PHIL3100 - History of Modern Philosophy: The Rationalists

Credits: 3

The second great age of philosophy absorbed the influence of the new science during the 17th and 18th centuries. People to be studied include: Descartes, Spinoza and Leibniz.

Prerequisite: 3 hours of philosophy.

PHIL3110 - History of Modern Philosophy: The Empiricists

Credits: 3

People to be studied include: Locke, Berkeley, Hume and Kant. These philosophers are included in the second great age of philosophy.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3120 - Ancient Greek Philosophy

Credits: 3

Surveying some of ancient Greek philosophy. Begins with the works of the earliest extant philosophical thinkers, the pre-Socratics. Remainder of focus on Plato and Aristotle.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/HIST 3160.

Prerequisite: WB or COM2.

PHIL3220 - Existentialism and Phenomenology

Credits: 3

Examines fundamental perspectives of existentialist thought, beginning with its roots in Kierkegaard and Nietzsche. Looks at a large variety of existentialist perspectives presented by Sartre, Heidegger, Buber, Jaspers and Camus. Considers the relation of Husserl's phenomenological method to existentialism.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3340 - Philosophy in Literature

Credits: 3
Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL
USP 2015 Code U5H
Former Course Number [2340]

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

PHIL3350 - History of Moral Philosophy

Credits: 3
A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H
Prerequisite: 3 hours of philosophy.

PHIL3420 - Symbolic Logic

Credits: 3
Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3440 - Philosophy of Mind

Credits: 3
Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

USP 2015 Code U5H
Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3500 - History of Science

Credits: 3
Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3560 - Introduction to Metaphysics

Credits: 3

A systematic introduction to metaphysics, the branch of philosophy concerned with providing a comprehensive account of the most general features of reality as a whole. Of central importance is the study of ontology, which seeks to address the question of what general sorts of things exist: particulars, universals, propositions, numbers, minds.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with African diaspora.

Cross Listed AAST 3933/INST 3933.

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 6 hours of philosophy.

4000-level-courses

At least 6 hours (2 courses) must be at the 4000-level.

PHIL4000 - Philosophical Issues

Credits: 1-3

Dual Listed PHIL 5000.

Prerequisite: consent of instructor.

PHIL4020 - Plato

Credits: 3

Detailed examination of selected dialogues of Plato.

Dual Listed PHIL 5020.

Prerequisite: PHIL 3120.

PHIL4030 - Aristotle

Credits: 3

Detailed examination of selected works of Aristotle.

Dual Listed PHIL 5030.

Prerequisite: PHIL 3120.

PHIL4040 - Kant

Credits: 3

An examination of one or more aspects of the work of Immanuel Kant, conducted either from the perspective of the history of philosophy.

Prerequisite: 6 hours of philosophy.

PHIL4110 - Figures in Contemporary Philosophy

Credits: 3-6

Max Credit (Max. 6)

An advanced study of the work of one, or several related, contemporary philosophers.

Prerequisite: 12 hours of philosophy including PHIL 3100 or PHIL 3110.

PHIL4120 - Philosophy and the 20th Century

Credits: 3

Part three of the history of philosophy sequence. Covers the third great age of philosophy. Studies the main ways in which philosophy has been done since 1900. Topics normally include logic and philosophy, Wittgenstein, logical positivism and current trends.

Dual Listed PHIL 5120.

Former Course Number [4100]

Prerequisite: 6 hours of philosophy.

PHIL4130 - Figures in Modern and 19th Century Philosophy

Credits: 3

A detailed examination of one or more of the figures in modern or 19th century philosophy.

Dual Listed PHIL 5130.

Prerequisite: 6 hours of philosophy.

PHIL4140 - Topics in Philosophy of Science

Credits: 3

Max Credit (Max. 6)

Encompasses selected topics in philosophy of science.

Dual Listed PHIL 5140.

Prerequisite: 6 hours of philosophy.

PHIL4190 - Philosophy of Language

Credits: 3-6

Max Credit (Max. 6)

An advanced study of the work of one, or several related, contemporary philosophers.

Dual Listed PHIL 5190.

Prerequisite: 6 hours of philosophy.

PHIL4300 - Topics in Ethics

Credits: 3-6

Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 5300.

Prerequisite: 6 hours of philosophy.

PHIL4340 - Issues in Environmental Ethics

Credits: 3

Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.

Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

PHIL4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 4420/MATH 4420.

Dual Listed PHIL 5420.

Prerequisite: PHIL 3420 or equivalent.

PHIL4440 - Topics in Philosophy of the Mind

Credits: 3-6

Max Credit (Max. 6)

An advanced study of problems in the philosophy of mind such as the concept of human action; intention, choice, reasons and causes in the explanation of human action, mental states and brain states, and artificial intelligence.

Dual Listed PHIL 5440.

Prerequisite: 6 hours of philosophy.

PHIL4510 - Theory of Knowledge

Credits: 3

Studies such problems as knowledge and belief, skepticism, perception and knowledge, memory, truth.

Dual Listed PHIL 5510.

Prerequisite: 6 hours of philosophy.

PHIL4560 - Metaphysics

Credits: 3

Examines approaches to metaphysics. Discusses problems such as causality, individuation.

Dual Listed PHIL 5560.

Prerequisite: 6 hours of philosophy.

PHIL4975 - Independent Study

Credits: 1

Max Credit 6

Primarily for juniors and seniors who can benefit from independent study of topics in philosophy not covered in course offerings. Guidance provided by faculty member in the appropriate field.

Restricted undergraduate standing

Prerequisite: 9 hours of philosophy and consent of instructor

Physics, B.A.

The Bachelor of Arts (BA) in Physics degree program provides a pathway for more students to major in physics, as a second major to physical chemistry, mathematics, and engineering, for example.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Physics** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Require Courses

Students in the Bachelor of Arts in physics major program are required to complete the following courses:

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS3000 - Methods of Physics

Credits: 4

Provides introduction to mathematical methods and modern scientific computational tools used in physics/ astronomy. Topics include introduction to Python or linux operating system and use LabView software to run laboratory apparatus. Course examples will draw upon material in PHYS 1210/PHYS 1220 to help build fluency in the first year physics material.

Prerequisite: PHYS 1220.

PHYS3650 - Advanced Lab in Modern Physics and Electronics

Credits: 4

Presents fundamentals of modern optics, modern and quantum physics, E&M/electronics, and thermodynamics in a project oriented interactive undergraduate laboratory with a focus on professional grade lab report writing that qualifies as WB USP. Students learn professional data handling, error theory, and data analysis.

USP 2015 Code U5C3

Prerequisite: WA and PHYS 2310 or PHYS 2320.

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: P HYS 4 210.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Electives

- Students are required to take at least 3 hours of electives from any PHYS 4000 or 5000 level course.

Additional Requirements

Course sequencing may need to be altered if ACT, SAT or Math Placement scores require a student to take pre-college courses before taking required math or English courses. Not all courses are offered every semester and some electives may have prerequisites. Students should review course descriptions and consult with their academic advisor to plan accordingly.

A major requires 42 hours of upper division (3000 level or above) coursework, 30 of which must be from the University of Wyoming.

Students must have a minimum cumulative GPA of 2.0 to graduate. Courses must be taken for a letter grade unless offered only for S/U.

University Studies Program (USP) Human Culture (H) and Physical & Natural World (PN) courses must be taken outside of the major subject, but can be cross-listed with the major.

For declared physics majors, the prerequisite of MATH 2200 is waived and concurrent enrollment is approved.

For declared physics majors, the prerequisite of MATH 2205 is waived and concurrent enrollment is approved.

If intending to apply to graduate school, students should take the physics GRE by fall semester of the senior year.

Students with specific additional interests (e.g. pre-med or another pre-professional program) may wish to move their V/H/C2 courses to alternate semesters so as to take the necessary required courses (e.g. LIFE 1010, MOLB 3000 etc.)

Physics, B.S.

The Bachelor of Science in Physics program is intended for students who will pursue a career or a graduate degree in physics or related fields.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BS in Physics** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)
- At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).
- No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation.

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Requirement for Major in Physics

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I Credits 4

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II Credits: 4

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS3000 - Methods of Physics

Credits: 4

Provides introduction to mathematical methods and modern scientific computational tools used in physics/ astronomy. Topics include introduction to Python or linux operating system and use LabView software to run laboratory apparatus. Course examples will draw upon material in PHYS 1210/PHYS 1220 to help build fluency in the first year physics material.

Prerequisite: PHYS 1220.

PHYS3640 - Modern Electronics and Experimental Techniques

Credits: 4

Introduced to analog and digital circuits/devices and computer interfacing with laboratory equipment and experiments. Includes computer programming, the analysis of experimental data, and report writing. Apply the skills developed in this class to interface with and control representative instrumentation used in experimental physics laboratories.

Prerequisite: PHYS 2320.

PHYS3650 - Advanced Lab in Modern Physics and Electronics

Credits: 4

Presents fundamentals of modern optics, modern and quantum physics, E&M/electronics, and thermodynamics in a project oriented interactive undergraduate laboratory with a focus on professional grade lab report writing that qualifies as WB USP. Students learn professional data handling, error theory, and data analysis.

USP 2015 Code U5C3

Prerequisite: WA and PHYS 2310 or PHYS 2320.

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: P HYS 4 210.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

PHYS4420 - Electricity and Magnetism II

Credits: 3

Follows PHYS 4410 and continues intermediate discussion of electricity and magnetism. Covers magnetostatics, magnetoquasistatics, alternating currents, electromagnetic waves, transmission lines and antennae.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 4410.

PHYS4830 - Mathematical and Computational Physics I

Credits: 3

First semester of a two-semester sequence. Provides a comprehensive overview of mathematical physics and numerous analytical mathematical techniques applied to physics problems. Topics include: numerical computations and visualizations, differential and integral vector analysis, linear algebra, infinite series, complex variables, partial differential equations, ordinary differential equations, integral transforms and equations, and calculus of variations.

Prerequisite: PHYS 2310 or PHYS 2320 and MATH 2210, MATH 2250, MATH 2310.

PHYS4840 - Mathematical and Computational Physics II

Credits: 4

Second semester of a two-semester course. Provides a comprehensive overview of computational physics and provides numerous numerical techniques applied to physics problems. Topics include: numerical computations and visualizations, numerical solutions of ordinary differential equations, linear systems, curve fitting, discrete Fourier transforms, partial differential equations, integration, and Monte Carlo simulations of general stochastic systems. A weekly lab session will be held.

Prerequisite: MATH 2210, PHYS 2320 and PHYS 3000.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Electives

Students are required to take at least 3 hours of electives from any PHYS 4000 or 5000 level course.

Additional Requirements

Course sequencing may need to be altered if ACT, SAT or Math Placement scores require a student to take pre-college courses before taking required math or English courses. Not all courses are offered every semester and some electives may have prerequisites. Students should review course descriptions and consult with their academic advisor to plan accordingly.

A major requires 42 hours of upper division (3000 level or above) coursework, 30 of which must be from the University of Wyoming.

Students must have a minimum cumulative GPA of 2.0 to graduate. Courses must be taken for a letter grade unless offered only for S/U.

University Studies Program (USP) Human Culture (H) and Physical & Natural World (PN) courses must be taken outside of the major subject, but can be cross-listed with the major.

For declared physics majors, the prerequisite of MATH 2200 is waived and concurrent enrollment is approved.

For declared physics majors, the prerequisite of MATH 2205 is waived and concurrent enrollment is approved.

If intending to apply to graduate school, students should take the physics GRE by fall semester of the senior year.

Students with specific additional interests (e.g. pre-med or another pre-professional program) may wish to move their V/H/C2 courses to alternate semesters so as to take the necessary required courses (e.g. LIFE 1010, MOLB 3000 etc.)

Physiology, B.S.

Physiology is the science of how the body functions in health and disease. A degree in physiology provides excellent preparation for careers or graduate study in the health professions and biomedical research or related disciplines.

Additional Information

Physiology is the study of how animals work: how they breathe, feed, interact with their environment, and carry out many other activities and functions. Physiology is the knowledge that the health sciences are built on and so is especially important for students who may be thinking of becoming medical practitioners, veterinarians or health care professionals.

All courses in the major must be completed with a grade of "C" or better.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

A&S College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Foundation Courses:

(MATH 1450 may substituted for MATH 1400 and MATH 1405)

MATH1400 - College Algebra

Credits: 3
Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces

associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics

and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Two Additional CHEM Courses:

*MOLB 3610 may be used as a CHEM elective, but cannot also count as a PHSO Core Elective.

*CHEM 3550 may be used as a CHEM elective, but cannot also count as a PHSO Core Elective

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

Physiology Core Required Courses

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data.

Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Physiology Core Electives

A minimum of 10 of the 18 Physiology Core Elective credits must be exclusive to the PHSO major.

At the end of this program students will have a thorough knowledge of physiology, will be well prepared to enter health sciences or graduate education, and will have a range of skills attractive to employers.

Choose a Total of 18 Credits From:

**cannot count towards PHSO electives if used as a CHEM requirement in the Foundational Courses

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4260 - Mammalian Endocrinology

Credits: 3

Introduces principles of endocrinology, role of endocrine systems in regulating metabolism, growth, reproduction and lactation in mammals.

Dual Listed ANSC 5260.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010, ZOO 3115, or equivalent.

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular, circulatory, and

respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

KIN3038 - Exercise Psychology

Credits: 3

Studies psychological theories for understanding and predicting health-oriented exercise behavior, including psychological intentions for increasing exercise participation and adherence. Emphasizes psychological and psychobiological responses to exercise.

Prerequisite: grade of C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; 2.750 GPA.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

KIN4042 - Advanced Biomechanics

Credits: 3

Provides understanding of biomechanical theories and the application of biomechanical measurements to human movement in sports, training, and rehabilitation. Emphasis on using equipment to collect biomechanical data to answer research and clinical questions. Lecture and data collection topics include electromyography, force, balance, kinematics, and kinetics.

Prerequisite: C or better in KIN 3042, minimum 2.750 GPA.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MICR4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed PATB 4001.

Dual Listed MICR 5001.

Prerequisite: STAT 2050.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

NEUR4295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (*Xenopus* tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and *Drosophila*).

Cross Listed ZOO 4295.

Dual Listed NEUR 5295.

Prerequisite: ZOO 4280.

NEUR5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed ZOO 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

NEUR5295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (*Xenopus* tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and *Drosophila*).

Cross Listed ZOO 5295.

Dual Listed NEUR 4295.

NEUR5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms will be covered in addition to the basic neurophysiology of nerve cells.

Cross Listed ZOO 5685.

Prerequisite: one course in physiology, chemistry, physics.

NEUR5887 - Molecular Neuropharmacology

Credits: 3

Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

PATB4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed MICR 4001

Dual Listed PATB 5001

Prerequisite: STAT 2050 or STAT 2070

PATB4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed MICR 4130

Dual Listed PATB 5130

When Offered (Normally offered spring semester)

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

PATB4140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action and their effects on various organisms including man

and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 5140

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: 9 hours of biological science (e.g., physiology), 4 hours chemistry, 3 hours biochemistry.

PATB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed MOLB 4400

Dual Listed PATB 5400

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PSYC3250 - Health Psychology

Credits: 3

Provides overview of growing partnership between psychology and health care, including history of psychology in

health care; theoretical foundations of health and illness; intervention and research techniques; stress and high risk behaviors (e. g. , substance abuse, eating behaviors, AIDS); psychology's contribution to improving outcomes and quality of life in chronic and life-threatening behaviors.

Cross Listed NURS 3250.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4040 - Cognitive Neuroscience

Credits: 4

Examines the underlying neural bases of higher cognitive functions in humans, including attentions, language, motor control, navigation, emotions, and memory, as well as neuroanatomy fundamentals and neuroscience methods such as fMRI and ERP. Lecture and lab components.

Prerequisite: A grade of C or better in PSYC 2080 or PSYC 3120 or ZOO 4280.

PSYC4080 - Physiological Psychology

Credits: 4

Examines physiological mechanisms of behavior, strongly emphasizing neural and hormonal processes. Includes fundamentals of neuroanatomy and evolution of the nervous system, basic neurophysiology, sensory and motor processes, as well as the physiology of emotion, motivation, learning and memory. Lecture three hours per week. Laboratory two hours per week.

USP 2003-2014 Code U3SB

Prerequisite: A grade of C or better in 6 hours of psychology and LIFE 1000, LIFE 1003, or LIFE 1010 or an introductory zoology course.

PSYC4250 - Psychological Aspects of Chronic Illness

Credits: 3

Investigates the impact of chronic physical illnesses on diagnosed children and adults, their families, and society. Emphasizes effects of illnesses on psychological adaptation and quality of life. Should be of particular interest to helping professionals and health care workers.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 3250.

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

SOC4160 - Sociology of Aging

Credits: 3

The process of aging from the individual to the societal level is the focus of the course. Consequences of this process such as the increase in the number of elderly, retirement and health are examined from the major social institutions, the relationships between these institutions and American society as a whole.

Dual Listed SOC 5160.

Former Course Number [4150]

Prerequisite: 6 hours of sociology (including SOC 1000) and at least junior standing.

ZOO3010 - Vertebrate Anatomy, Embryology, and Histology

Credits: 4

Provides a comprehensive overview of vertebrate anatomy. The structural organization, embryological derivation, and histological organization of the major organ systems will be emphasized. The evolution and functional organization of anatomical structure will also be emphasized. Includes laboratory sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: LIFE 2022 or equivalent, and a semester of chemistry.

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

- ZOO 4670

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed NEUR 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

ZOO5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms are covered in addition to the basic neurophysiology of nerve cells. The laboratory complements the lecture sequence.

Cross Listed NEUR 5685.

Prerequisite: one course in physiology, chemistry, physics.

SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing

Credits: 4

Introduces the student to the anatomy of the normal speech and hearing systems as well as the physiologic underpinnings of the speech (respiration, phonation, articulation), swallowing, and hearing (external, middle, and inner ear) systems. Theories of speech production and speech perception are presented.

Former Course Number [3400]

Prerequisite: KIN 2040 or consent of instructor.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

Political Science B.A.

Political Science is the study of how societies govern themselves and interact with one another. The Political Science major offers the subfields: American politics, comparative government, international relations, political philosophy, public law, and public administration.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Political Science B.A.

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Or

POLS1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed INST 1250.

A&S College Core 2015 ASG

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

Or

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

Additional Requirements:

A major in political science requires 33 department hours.

A maximum of 6 hours of internship credit may be applied toward the 33 hours required for the political science major. Only those political science courses in which a grade of C or better has been earned may be used to satisfy departmental requirements.

Most university studies courses and lower division political science courses should be completed prior to the junior year. Additional information about the political science major may be obtained from the School of Politics, Public Affairs, and International Studies: www.uwyo.edu/sppais.

Students are also required to take

- at least one seminar in political science (and its prerequisites)
- 8 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages
- STAT2070 - Introductory Statistics for the Social Sciences Credits: 4
- OR
- STAT2050 - Fundamentals of Statistics Credits: 4
- minimum of 9 hours of upper division credit in political science.

Political Science, B.A./M.A.

The Political Science 5 Year B.A./M.A. Program offers highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor's degree (whether B.A. or B.S.) and thereby earn a graduate degree more efficiently. Political science majors with a cumulative major GPA of 3.5 or higher may be invited to apply at the outset of the second semester of the junior year.

Interested students will submit an application and 2 letters of recommendation, at least one from a political science faculty to be reviewed, along with unofficial, current UW transcripts, by the M.A. Director and Committee. Upon provisional acceptance into the program in the junior year, students will be required to take the GRE. GRE scores will be considered for full and final acceptance to the M.A. program, which will be made once the student has completed the bachelor's degree.

Provisional acceptance to the 5 Year B.A./M.A. program in Political Science will allow students to apply up to six credit hours of 5000-level courses toward both the B.A./B.S. and M.A. degree programs. To earn graduatelevel credit, students must achieve at least a 3.000 in the course. By successfully completing up to six credit hours of graduate coursework during their senior year, these students will have demonstrated their ability to do graduatelevel coursework

as undergraduates, easing their transition into the Master's Program in Political Science. Interested students may reserve up to six additional credits for graduate study that do not apply to the undergraduate degree by securing appropriate approvals as explained in the Registrar's "Request to Reserve Coursework for Graduate Credit" prior to taking the coursework.

Students will be granted the BA/BS upon completion of the credit hours required for the undergraduate degree in political science. Students must complete the BA/BS before formally entering the MA program. To remain in good standing in the program, students must maintain a cumulative and departmental GPA of 3.200 and earn at least a 3.000 in all 5000-level courses. Failure to meet the GPA requirements places a student on probation for one semester. If the GPA requirement is not met after that semester, the student will be suspended from the program. Students in the program are encouraged to take the Plan B option. Please see the Graduate Study section to find the degree requirements of the M.A. in Political Science.

Political Science, B.S.

Political Science studies how states govern themselves and interact. Subfields include: American politics, comparative government, international relations, political philosophy, public law, and public administration with an emphasis on statistical analysis and quantitative methods.

Introductory Courses

Students are required to complete the following four introductory courses:

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

OR

POLS1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to

different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed INST 1250.
A&S College Core 2015 ASG

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)
OR

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB
USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

Other Requirements

In addition to the university and college requirements listed elsewhere in this bulletin, a major in political science requires 33 department hours.

A maximum of 6 hours of internship credit may be applied toward the 33 hours required for the political science major. Only those political science courses in which a grade of C or better has been earned may be used to satisfy departmental requirements.

Most university studies courses and lower division political science courses should be completed prior to the junior year. Additional information about the political science major may be obtained from the School of Politics, Public Affairs, and International Studies: www.uwyo.edu/sppais.

Students are also required to take

- at least one seminar in political science (and its prerequisites)

- 8 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

- minimum of 9 hours of upper division credit in political science.

Psychology, B.S.

Learn empirical approaches to understanding human behavior from biological, clinical, cognitive, developmental, neuroscientific, and social psychological perspectives. Develop skills in critical thinking, communication, and scientific research.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D - Diversity 3 credits
G - Global 3 Credits

Students Must Complete the Following Courses:

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

PSYC2000 - Research Psychological Methods

Credits: 4

Introduces some of the methods of investigating psychological questions. Exposure to various research strategies ranging from observational to experimental, using representative laboratory exercises, lectures, readings, films and demonstrations. Requires written and oral reports. May be used to satisfy department's written and oral communication requirement for majors. Laboratory two hours per week.

USP 2003-2014 Code U3WB

Prerequisite: A grade of C or better in PSYC 1000, WA or COM1, STAT 2050 or STAT 2070.

Four of Five Cores:

Biological Core

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

PSYC2080 - Biological Psychology

Credits: 3

Introduces biological bases of behavior. Includes ethology and comparative behavior, psychobiological development, physiological and sensory mechanisms of behavior, and evolution and behavioral genetics. Presents basic structural and functional properties of the nervous system.

When Offered (Normally offered fall semester)

Prerequisite: A grade of C or better in PSYC 1000 and general biology.

Social Psychology Core

PSYC2380 - Social Psychology

Credits: 3

Examines how peoples' thoughts, feelings, and behaviors are influenced by the presence of others. Course will cover a broad range of theories and research in social psychology.

When Offered (Normally offered fall semester)

Former Course Number [4755]

Prerequisite: A grade of C or better in PSYC 1000.

Clinical Core

PSYC2340 - Abnormal Psychology

Credits: 3

Provides a general overview of abnormal behavior, emphasizing types, etiology and treatment methods.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: A grade of C or better in PSYC 1000.

Cognitive Core

PSYC3120 - Cognitive Psychology

Credits: 3

Deals with higher mental processes that are primarily unique to human beings from theoretical and research orientations. Emphasizes interrelationships between various cognitive processes and continuity of those processes with perceptual and non-cognitive activities. Discusses how information is processed and remembered.

When Offered (Normally offered spring semester)

Former Course Number [4120]

Prerequisite: A grade of C or better in 6 hours of psychology including PSYC 1000.

Developmental Core

PSYC2300 - Developmental Psychology

Credits: 3

Introduces psychological development, including age-related changes in thinking, emotion, and behavior. Major theories, methodologies, and empirical discoveries are surveyed in an exploration of developments beginning with conception, with emphasis on social, affective, and cognitive developments in childhood and infancy and their implications for policy and practice.

When Offered (Normally offered spring semester)

Prerequisite: A grade of C or better in PSYC 1000.

One of the Following

Additionally **one** of the following restricted enrollment (seminar or writing intensive) courses is required:

PSYC4150 - Cognitive Development

Credits: 3

Examines cognitive development from infancy through adolescence. Explores, through lecture, discussion and projects, major theories and current empirical research on cognitive development, as well as implications for social and educational policies concerning children.

Prerequisite: A grade of C or better in 9 hours of psychology, including child psychology course.

PSYC4250 - Psychological Aspects of Chronic Illness

Credits: 3

Investigates the impact of chronic physical illnesses on diagnosed children and adults, their families, and society. Emphasizes effects of illnesses on psychological adaptation and quality of life. Should be of particular interest to helping professionals and health care workers.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 3250.

PSYC4320 - Intellectual Disability

Credits: 3

Acquaints students with all aspects of intellectual disability including assessment, diagnosis and classification, etiology, and associated health and mental health difficulties. Prevention, educational and psychological intervention, family adaptation, and community involvement are also addressed.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 4300 or FCSC 2121 or EDST 2450.

PSYC4350 - Psychology of Adulthood

Credits: 3

Examines theories and research on psychological development from early adulthood to the end of life, with special emphasis on positive development, successful aging, and methodological issues in the study of adult development.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4380 - Death and Dying

Credits: 3

Designed to provide a comprehensive overview of the field of thanatology. Death is considered from both an individual and sociocultural perspective. Aims to provide solid ground in research, methods, and theory of end-of-life issues and to encourage contemplation of personal and professional applications of death studies.

Prerequisite: A grade of C or better in PSYC 1000 and junior/ senior standing.

PSYC4390 - Personality Science

Credits: 3

Examines the contemporary science in personality psychology, with a focus on the genetic, biological, social, cognitive, and affective variables which interact to influence individual differences and personality coherence.

Former Course Number [3390]

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 2340 or PSYC 2380.

PSYC4400 - Principles of Psychological Testing

Credits: 3

Encompasses basic concepts, principles and procedures of psychological testing, with a lecture, discussion, laboratory project approach. Emphasizes nature and uses of test reliability, validity, norms and transformations, selecting and evaluating tests, test interpretation models and professional ethics in test use. Lecture three hours per week.

Prerequisite: A grade of C or better in 6 hours of psychology and STAT 2050 or STAT 2070.

PSYC4740 - Advanced Social Psychology

Credits: 3

Concentrates on critical assessment of interpersonal behavior. Students are expected to become familiar with data gathering, analysis and reporting procedures commonly used in contemporary social psychology.

USP 2003-2014 Code U3WC

Prerequisite: A grade of C or better in PSYC 2000 and PSYC 2380.

PSYC4860 - Seminar

Credits: 1-6

Course consists of extended and in-depth discussions of particular topics in psychology. Topics vary semester to semester. Class format may include lecture, group discussion, and group activities. Reading assignments will draw heavily from scientific literature and may include journal articles, textbooks, or book chapter.

Prerequisite: 9 hours in psychology.

PSYC4040 - Cognitive Neuroscience

Credits: 4

Examines the underlying neural bases of higher cognitive functions in humans, including attentions, language, motor control, navigation, emotions, and memory, as well as neuroanatomy fundamentals and neuroscience methods such as fMRI and ERP. Lecture and lab components.

Prerequisite: A grade of C or better in PSYC 2080 or PSYC 3120 or ZOO 4280.

A total of 18 hours at the 3000 level or higher are required

Also Required

Also required are

- 6 hours of anthropology, communication/journalism, criminal justice, economics, political science, or sociology;

LIFE1003 - Current Issues in Biology

Credits: 4

Emphasizes central themes of biology - cell biology, genetics, evolution, ecology - and scientific methodology by focusing on current issues in biology. Fundamental concepts are addressed through classroom and laboratory activities and discussions. This course is intended for non-science majors. Students cannot receive duplicate credit for LIFE 1010 or LIFE 1020.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1003]

OR

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STEM Course

One approved 3-4 credit hour STEM course:

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

- ZOO 2040

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

- ZOO 2041

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal

specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

MICR4001 - Epidemiology (Diseases in Population)

Credits: 3

Basic epidemiologic concepts and approaches to population problems in medicine, with examples from veterinary and human health. Covers a wide spectrum of topics and introduces practical applications of epidemiology.

Cross Listed PATB 4001.

Dual Listed MICR 5001.

Prerequisite: STAT 2050.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

STAT2000 - Statistics and the World

Credits: 3

Discusses statistical reasoning and methods as related to today's society. Emphasizes ideas rather than specific techniques. Focuses on real examples of the use (and misuse) of statistics. Includes sampling, experimentation, descriptive statistics, elementary probability and statistical inference.

USP 2003-2014 Code U3QB,U3Q

Prerequisite: grade of C or better in MATH 0921 or level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600 or concurrent enrollment in MATH 1080.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: STAT 2050 or equivalent

STAT4155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage sampling. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 5155.

Former Course Number [4150]

Prerequisite: choice of STAT 2010, STAT 2050, STAT 2070 or equivalent.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

Additional Requirements

A major requires a minimum of 33 semester hours and may not exceed 60 hours in psychology. Of these, 18 hours must be at the 3000 level or above. These upper-division courses must also be taken from at least two different members of the psychology department faculty listed in this *Catalog*.

Students who have an established UW GPA and who wish to change their major to Psychology, or to add Psychology as a major, will be required to have a UW GPA of at least 2.500.

For graduation, students must receive a C or better grade in all courses taken to satisfy department requirements.

Psychology courses taken 15 or more years ago will not be used to satisfy degree requirements.

Religious Studies, B.A.

Religious Studies builds skills for your future in a globalized world. You will learn to ask life's big questions, analyze how communities across time and place have addressed these questions, and communicate persuasively in your own speech and writing.

General Requirements

A major in Religious Studies requires 33 hours (11 courses) plus a second major or minor in another discipline.

For students completing their degree under the 2015 University Studies Program:

Two Required Courses: 6 Hours

RELI1000 - Introduction to Religion

Credits: 3

Introduces world religions and shared characteristics. Draws on various academic approaches to religion study, emphasizing similarities and differences among wide variety of religions.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

RELI4000 - Theories of Religion

Credits: 3

Investigates different theories proposed to explain religion and methods used to investigate them. Pays primary attention to influential thinkers and theorists of the past century.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: RELI 1000, and 12 additional hours in Religious Studies, at least 6 of which must be at the 3000-level or above, junior standing.

Concurrent Concentration I: 9 Hours

Students should acquire a focused concentration by taking three courses (1) on a single religion, or (2) on the religions of a particular region or culture. Courses may be from a limited time period or spread across history. Students may choose from established concentrations or create their own concentration in consultation with their adviser. [Six hours must be above 3000-level.]

Concurrent Concentration II: 9 Hours

Students should take three courses in a religion, region, or culture differing significantly from that of the first concentration. [Six hours must be above 3000-level.]

Electives

Three courses in Religious Studies (see note 2 below) chosen in accordance with the student's interests. [Six hours must be above 3000-level.]

Language

Students should take three semesters of a single foreign language or demonstrate equivalent proficiency. See note 3 below.

Honors

If a student wishes to pursue an Honors designation in Religious Studies, two additional requirements must be fulfilled.

- A. A three-hour Thesis Seminar or Internship, during which a research paper is written, or other suitable research project is carried out.
- B. Demonstration of competency in a foreign language equivalent to a fourth-semester college-level course.

Notes:

1. If students majoring in Religious Studies can use its courses to satisfy requirements in a second major or minor, this is permitted.
2. Courses for the major should be drawn from those with a RELI prefix, or from a list of approved courses taught by other departments or programs. See the list of approved courses on the Religious Studies website. In each of the concentrations, only one course may be from outside RELI offerings. Two such courses may be used as electives. Occasionally, courses on religion are taught by outside departments as one-time opportunities. Students may propose these for inclusion in the major to the Religious Studies Program Director.
3. The language requirement may be satisfied with American Sign Language (ASL) or, with the approval of the department, coursework in another form of non- English communication (e.g. computer science, statistics, music composition).
4. All courses must be passed with a grade of C or better.

Sociology, B.A.

Sociology is the study of the development, interaction, and behavior of organized human groups. Sociology provides powerful insights into the social processes that shape our lives, the problems we face, and the possibilities we can envision.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Arts & Sciences College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3
A&S Core: Global Awareness Course

Foundation Courses

Students must complete all Foundation Courses with a grade of C or better.

SOC1000 - Sociological Principles

Credits: 3
Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

SOC2070 - Introductory Statistics for the Social Sciences

Credits: 4
Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, STAT 2070, STAT 4220, STAT 5520.

Cross Listed STAT 2070.

USP 2003-2014 Code U3QB
USP 2015 Code U5Q
Former Course Number [2000]

Prerequisite: MATH 1000, MATH 1400 or equivalent.
OR

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB
USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

SOC2685 - Research Methods

Credits: 3

Max Credit 3

Introduces students to fundamental issues associated with the application of scientific methods to social science problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to social science issues.

Cross Listed CRMJ 2685

Restricted Criminal Justice or Sociology majors and minors

Prerequisite: CRMJ 1001 OR SOC 1000

SOC4715 - Sociological Theory

Credits: 3

Examines the emergence and development of sociological theory in the writings of thinkers such as Marx, Durkheim, and Weber. Explores continuities and discontinuities between the classical period of sociological theory and contemporary schools such as functionalism, conflict theory, neo-Marxian theories, symbolic interactionism, phenomenology, and rational choice/exchange theory.

Dual Listed SOC 5715.

Former Course Number [3700, 3900]

Prerequisite: 9 credit hours of sociology, including SOC 1000.

Core Courses:

Students must complete four courses from the following list with a grade of C or better.

SOC2350 - Race and Ethnic Relations

Credits: 3

Examines social relations among majority and minority groups by devoting particular attention to race and ethnic relations in the U. S. Encompasses sociological approach to this topic, which emphasizes power structures, economic relationships and cultural traditions historically and today. Devotes attention to social psychological issues, such as prejudice, and social structural issues, such as class inequality.

USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: SOC 1000.

SOC3110 - Self and Society

Credits: 3

Considers social behavior at the micro level, emphasizing the influence of society on the individual's thoughts, emotions and behaviors. Topics such as the development of the self over the life course, the self in social interaction, and the role of attitudes and emotions in social interaction are discussed.

Former Course Number [2110]

Prerequisite: SOC 1000 or PSYC 1000.

SOC3140 - Sociology of the Family

Credits: 3

Two major themes of the course are change experienced by the family institution and the centrality of the family in America today. Subjects that are covered include: A brief history of the family in the U. S. , kinship, family structure, mate-selection, marriage, divorce and socialization.

Former Course Number [4100, 4140]

Prerequisite: SOC 1000.

SOC3200 - Sociology of Religion

Credits: 3

Introduces various ways sociologists interpret religion. Explores the nature of relationships between religion and society.

Prerequisite: SOC 1000.

SOC3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed CRMJ 3400.

Former Course Number [4200]

Prerequisite: SOC 1000.

SOC3500 - Sociology of Gender

Credits: 3

Explores gender through a cultural and structural approach. The cultural approach emphasizes the variability in social expectations for men and women across time and place; the structural approach analyzes the effect of social institutions such as family, government, education, and the economy of gender.

A&S College Core 2015 ASD

Prerequisite: SOC 1000.

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

SOC3605 - Sociology of Education

Credits: 3

An introductory overview of the principal areas of inquiry in the field. Students learn relevant theories and concepts, principal methodological approaches as well as important current issues in education. Comparative analysis may focus on historical comparisons, national/ global comparisons, U. S. regional, and/or variant educational systems at the local level.

Prerequisite: SOC 1000.

SOC3640 - Social Inequality

Credits: 3

Focuses on the structure and consequences of unequal access to political, economic and social benefits in U. S. society and the world. This course critically examines institutional arrangements that perpetuate and are supported by inequality and stratification, as well as patterns of social mobility.

A&S College Core 2015 ASD
Former Course Number [4000, 4050]

Prerequisite: SOC 1000.

SOC3880 - Political Sociology

Credits: 3

Study of political theory, political organization, political mobilization, the state, nation-building, national identity, post-nationalism, the relationship between the state and markets, historic formation of the nation-state, and the changing role of the state in a global context.

Prerequisite: SOC 1000.

SOC3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed INST 3910.
A&S College Core 2015 ASG
Former Course Number 4110

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.
Prerequisite: SOC 1000.

Elective Courses

Students must complete 9 additional hours of sociology courses with a grade of C or better. Electives may be used either to develop additional expertise in an area of interest or to broaden the student's sociological training.

Spanish B.A.: Language-Linguistics Track

Requirements

SPAN2040 - Second Year Spanish II

Credits: 4

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2015 Code U5H

Prerequisite: SPAN 2030 or three years of high school Spanish.

SPAN3030 - Spanish for Heritage Speakers

Credits: 3

Stresses academic use of the Spanish language by native or near-native speakers, through composition, cultural readings, oral presentations, and digital interactions. This class will prepare native and near-native speakers for Spanish upper division classes. It will review spelling rules, grammatical terminology, dialectal and register differences, and academic vocabulary.

USP 2015 Code U5C2

Prerequisite: SPAN 2040 and consent of instructor.

OR

SPAN3050 - Third Year Spanish I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: SPAN 2040.

SPAN3060 - Third Year Spanish II

Credits: 3

Intensively reviews grammar and composition-skill development. Also emphasizes specialized lexicons, written and oral translation, as well as conversational fluency.

A&S College Core 2015 ASD

Prerequisite: SPAN 3050.

SPAN3140 - Introduction to Literature

Credits: 3

This course introduces literary analysis by focusing on different genres from the Hispanic tradition. The course if

focused on developing interpretation strategies and it introduces key elements of literary criticism. Students are required to produce complex ideas about the texts, give oral presentations, and write essays on the texts read.

USP 2003-2014 Code U3CH,U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2140 or SPAN 3030 or SPAN 3050.

SPAN3300 - Introduction to Hispanic Linguistics

Credits: 3

Max Credit (Max. 9)

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semiotics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.).

Former Course Number [4310]

Prerequisite: SPAN 3030 or SPAN 3050 or equivalent proficiency

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

OR

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectical variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

- additional 12 hours of electives above SPAN 2030.

Highly Recommended Electives

SPAN3040 - Spanish Conversation

Credits: 3

Emphasizes speaking and listening comprehension through structured and monitored individual, pair, small group and class work, while providing socio-cultural competence, vocabulary acquisition and grammar review. Provides enhanced language skills in a manner that otherwise could only be attained through an extended stay in a Hispanic country.

Prerequisite: SPAN 2040; limited to Spanish majors/minors with no previous experience abroad.

SPAN3070 - Intensive Spanish Abroad

Credits: 3

Max Credit (Max. 9)

Spanish language and cultural study in Spanish-speaking countries led by UW faculty.

Prerequisite: SPAN 2030 or consent of instructor.

SPAN3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed LTST 3080.

USP 2015 Code U5H

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

SPAN4070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 5070.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish

grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectal variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

It is Possible to Take

It is possible to take one class from the following:

SPPA3160 - Speech and Language Development

Credits: 4

Deals with the development of speech sound production, phonology, semantics, syntax, morphology, discourse, and pragmatics for typically-developing children from infancy to adolescence. Includes prelinguistic and paralinguistic communication, the cognitive correlates of communication, and written language. Considers the effects of sociocultural context and multiple language acquisition. Application component provides weekly experience in language sample analysis.

Former Course Number [4160]

Prerequisite: SPPA 2210 or instructor permission.

- ANTH 4775 - Language and Gender

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

Total: 31 Hours

Spanish, B.A.

As a Spanish Major, you will develop your speaking, listening, and communication skills as a Spanish speaker. You will gain a better understanding of perspectives and experiences of Spanish speaking cultures.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Tracks

The undergraduate degree in Spanish has two tracks for students to select: Culture, Literature, and Cinema Track or Language-Linguistics Track.

There are multiple entry points into the major depending on previous Spanish language experience. Students should consult a Modern and Classical Languages advisor about the appropriate placement and credit-by-exam options.

A language major usually requires 30-31 semester hours of work in a single language beyond 2030. To include a language option in the humanities/fine arts interdisciplinary program, students must complete at least 12 hours above the 2030 level.

Spanish offers two major tracks:

Spanish B.A. : Culture, Literature, and Cinema Track

Spanish B.A. : Language-Linguistics Track

Prerequisites for both Spanish Tracks

SPAN1010 - First Year Spanish I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

SPAN1020 - First Year Spanish II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: SPAN 1010 or two years of high school Spanish.

SPAN2030 - Second Year Spanish I

Credits: 4

Encompasses reading, grammar review, compositions and conversation.

USP 2015 Code U5H

Prerequisite: SPAN 1020 or three years of high school Spanish.

Language and Linguistics Track

Requirements

SPAN2040 - Second Year Spanish II

Credits: 4

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2015 Code U5H

Prerequisite: SPAN 2030 or three years of high school Spanish.

SPAN3030 - Spanish for Heritage Speakers

Credits: 3

Stresses academic use of the Spanish language by native or near-native speakers, through composition, cultural readings, oral presentations, and digital interactions. This class will prepare native and near-native speakers for Spanish upper division classes. It will review spelling rules, grammatical terminology, dialectal and register differences, and academic vocabulary.

USP 2015 Code U5C2

Prerequisite: SPAN 2040 and consent of instructor.

OR

SPAN3050 - Third Year Spanish I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: SPAN 2040.

SPAN3060 - Third Year Spanish II

Credits: 3

Intensively reviews grammar and composition-skill development. Also emphasizes specialized lexicons, written and oral translation, as well as conversational fluency.

A&S College Core 2015 ASD

Prerequisite: SPAN 3050.

SPAN3140 - Introduction to Literature

Credits: 3

This course introduces literary analysis by focusing on different genres from the Hispanic tradition. The course is focused on developing interpretation strategies and it introduces key elements of literary criticism. Students are required to produce complex ideas about the texts, give oral presentations, and write essays on the texts read.

USP 2003-2014 Code U3CH,U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2140 or SPAN 3030 or SPAN 3050.

SPAN3300 - Introduction to Hispanic Linguistics

Credits: 3

Max Credit (Max. 9)

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semiotics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.).

Former Course Number [4310]

Prerequisite: SPAN 3030 or SPAN 3050 or equivalent proficiency

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

OR

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectal variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

- **PLUS** 12 hours of electives from the following:

SPAN3040 - Spanish Conversation

Credits: 3

Emphasizes speaking and listening comprehension through structured and monitored individual, pair, small group and class work, while providing socio-cultural competence, vocabulary acquisition and grammar review. Provides enhanced language skills in a manner that otherwise could only be attained through an extended stay in a Hispanic country.

Prerequisite: SPAN 2040; limited to Spanish majors/minors with no previous experience abroad.

SPAN3070 - Intensive Spanish Abroad

Credits: 3

Max Credit (Max. 9)

Spanish language and cultural study in Spanish-speaking countries led by UW faculty.

Prerequisite: SPAN 2030 or consent of instructor.

SPAN3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed LTST 3080.

USP 2015 Code U5H

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

SPAN4070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 5070.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

It is possible to take one class from the following:

SPPA3160 - Speech and Language Development

Credits: 4

Deals with the development of speech sound production, phonology, semantics, syntax, morphology, discourse, and pragmatics for typically-developing children from infancy to adolescence. Includes prelinguistic and paralinguistic communication, the cognitive correlates of communication, and written language. Considers the effects of sociocultural context and multiple language acquisition. Application component provides weekly experience in language sample analysis.

Former Course Number [4160]

Prerequisite: SPPA 2210 or instructor permission.

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

Culture, Literature, and Cinema Track

Requirements

SPAN2040 - Second Year Spanish II

Credits: 4

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2015 Code U5H

Prerequisite: SPAN 2030 or three years of high school Spanish.

SPAN2140 - Introduction to Reading

Credits: 3

This course introduces a varied selection of readings and other cultural media in an immersive, intensive language class. Through the study of short stories, media articles, films, etc. , students learn cultural aspects of the Spanish-speaking world and are able to practice and improve their communicative abilities.

USP 2003-2014 Code U3CH,U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2030 or equivalent.

SPAN3030 - Spanish for Heritage Speakers

Credits: 3

Stresses academic use of the Spanish language by native or near-native speakers, through composition, cultural readings, oral presentations, and digital interactions. This class will prepare native and near-native speakers for Spanish upper division classes. It will review spelling rules, grammatical terminology, dialectal and register differences, and academic vocabulary.

USP 2015 Code U5C2

Prerequisite: SPAN 2040 and consent of instructor.

OR

SPAN3050 - Third Year Spanish I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: SPAN 2040.

SPAN3100 - Survey of Spanish Literature

Credits: 3

Studies Spanish literature from the Middle Ages to the end of the 17th century.

Prerequisite: SPAN 2140 or equivalent. SPAN 3140 strongly recommended.

OR

SPAN3110 - Survey of Contemporary Spanish Literature

Credits: 3

Studies Spanish literature from the 18th to the 21st century. SPAN 3110 is a continuation of SPAN 3100, which studies Spanish literature from the Middle Ages to the end of the 17th century. In order to take 3110, students do not need to take SPAN 3100. SPAN 3140 strongly recommended.

Prerequisite: SPAN 2140 or equivalent.

OR

SPAN3120 - Survey of Spanish American Literature

Credits: 3

Surveys Spanish American literature from colonial period to the present.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2140 or equivalent.

SPAN3140 - Introduction to Literature

Credits: 3

This course introduces literary analysis by focusing on different genres from the Hispanic tradition. The course is focused on developing interpretation strategies and it introduces key elements of literary criticism. Students are required to produce complex ideas about the texts, give oral presentations, and write essays on the texts read.

USP 2003-2014 Code U3CH,U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2140 or SPAN 3030 or SPAN 3050.

SPAN3300 - Introduction to Hispanic Linguistics

Credits: 3

Max Credit (Max. 9)

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semantics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.).

Former Course Number [4310]

Prerequisite: SPAN 3030 or SPAN 3050 or equivalent proficiency

- **PLUS** 12 hours of electives from the following:

SPAN3040 - Spanish Conversation

Credits: 3

Emphasizes speaking and listening comprehension through structured and monitored individual, pair, small group and class work, while providing socio-cultural competence, vocabulary acquisition and grammar review. Provides enhanced language skills in a manner that otherwise could only be attained through an extended stay in a Hispanic country.

Prerequisite: SPAN 2040; limited to Spanish majors/minors with no previous experience abroad.

SPAN3200 - Spanish Culture and Civilization

Credits: 3

Studies the evolution of Spanish culture through its main artistic, sociological and intellectual expressions.

Prerequisite: SPAN 2040, SPAN 2140.

SPAN3220 - Spanish-American Cultures in Context

Credits: 3

Introduction to the Spanish-speaking cultures of Latin America and the United States through a historical overview and a focus on contemporary politics and culture.

Prerequisite: SPAN 2040 or SPAN 2140 or consent of instructor.

SPAN3070 - Intensive Spanish Abroad

Credits: 3

Max Credit (Max. 9)

Spanish language and cultural study in Spanish-speaking countries led by UW faculty.

Prerequisite: SPAN 2030 or consent of instructor.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

Studio Art, B.A.

The B.A. in Studio Art degree prepares students for further studies or careers in the studio arts and arts-related fields including art therapy, illustration, arts administration, design, and art education.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BA in Studio Art** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Minimum Course Requirements for Art Majors

In addition to the university and college requirements listed above and in this Catalog, all students majoring in art must complete the following:

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Studio Core (Minimum): 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramic class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Upper Division Studio Electives: 12 Hours

12 credits of any upper division studio art classes

Foreign Language: 8 Hours

8 Hours of any Foreign Language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010.

Art History Electives: 6 Hours

6 credits beyond ART 2010 and ART 2020, with at least 3 units at upper division level

Additional Requirements

B.A. IN STUDIO ART DEGREE

The B.A. in Studio Art degree is available to students who are preparing for further studies or careers in the arts and arts-related fields, such as art education, graphic design, art therapy, illustration, botanical illustration and forensic illustration. Students work with their academic advisers to select courses from the USP and elective offerings to complement art studies in their areas of interest. Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. In addition to the university requirement that degree candidates hold a minimum cumulative grade point average of 2.000, degree candidates for the B.A. in Studio Art degree in the Department of Visual and Literary Arts also must have a minimum 2.500 overall cumulative grade point average and a 2.500 grade point average within all major courses at the time of graduation.

Transfer Residency. A minimum of 26 hours of upper-division course work in the major is required to establish residency in the department for all transfer students. This applies to students in the B.F.A., B.A., and Art Education degree programs who transfer in 12 or more hours of art courses for the major. Students in all art programs must meet the university requirement of at least 42 hours of course work at the upper-division level (3000 and above).

Based on their goals and career plans, students in consultation with a faculty adviser select the appropriate degree plan. Students major in studio art with areas of study in one or more of the following:

- Drawing
- Painting
- Photography
- Printmaking
- Ceramics
- Sculpture
- Metalsmithing
- Visual Communication Design

Studio Art, B.F.A.

The B.F.A. in Studio Art is a professional level degree open to outstanding students through an application process who are preparing for art studies, careers and professional activity in the studio arts beyond the undergraduate level.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BFA in Studio Art** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand

tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.
required

Studio Core: 12 Hours

12 credits chosen from the below. At least one core course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input

images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramic class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural

objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History Core: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

Upper Division Studio Electives: 21 Hours

21 credits of any upper division studio art classes

Art and Art History Electives: 3 Hours

3 credits of any art or art history course at any level

BFA Core: 12 Hours

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

USP 2015 Code U5C3

Prerequisite: ART 2000 , and junior standing.

required

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.

required

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: ART 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.

required, offered only fall semester

ART4840 - BFA Capstone II

Credits: 3

Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the artwork is completed.

Restricted BFA in Studio Art

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.

required, offered only spring semester

Upper Division Art History Electives: 9 Hours

9 credits of any upper division art history classes

8 hours in any Foreign Language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4

Max Credit (Max. 12)

Prerequisite: LANG 1010.

Additional Requirements

B.F.A. IN STUDIO ART DEGREE

The B.F.A. in Studio Art is a professional level degree open to outstanding students through an application process who are preparing for art studies, careers and professional activity in the studio arts beyond the undergraduate level. The B.F.A. in Studio Art degree requires a minimum of 120 hours of credits with up to seventy-eight (78) semester hours focused in studio and art history course work. All B.F.A. in Studio Art students are required to participate in the B.F.A. exhibition upon graduation. As a Professional Degree, the B.F.A. in Studio Art does not include the A&S Outside Major credit requirement.

Application

Formal application is made to the program for acceptance into the B.F.A. in Studio Art degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Studio Art degree. Applicants must have achieved the following at the time of application to the B.F.A. in Studio Art:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Studio Art candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Studio Art program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Studio Art after one semester in Art and Art History Program.

Theatre and Dance, Acting Performance Concentration, B.F.A.

The BFA in Acting Performance permits a total of 70-71 credits in the major. It is designed primarily for those desiring to pursue additional pre-professional training in musical theatre and or for those preparing to enter MFA graduate programs.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

These are the required courses for a B.F.A. with Acting Concentration: *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

THEA1040 - Production Crew I

Credits: 0.5
Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1200 - Introduction to Design

Credits: 3
Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA1300 - Musical Theatre Workshop: Voice and Acting

Credits: 2
Max Credit (Max. 8)

Musical Theatre Workshop: Voice & Acting will focus on developing and strengthening the speaking and singing voice for stage, wherein students will construct performances through integration of breath and voice work.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3
First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3
Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2100 - Acting II

Credits: 3

Max Credit 3

Acting II builds on previous experience in acting with continued emphasis on analyzing, rehearsing and performing scenes, creating a believable stage image. Scene work, including scoring, will be examined with focus on contemporary realism. In addition, the course will focus on professional development and career readiness.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1100 OR equivalent

THEA2160 - Stage Makeup

Credits: 2

Introduction to theatrical makeup with the stage performer in mind. Focus on principles, materials, and techniques; concentrating on problems of designing and executing specific makeup designs and applications for a wide range of ages, types, and styles.

THEA2170 - Speech for the Actor

Credits: 3

Studies speech techniques, including the International Phonetic Alphabet and Standard American Speech for the Stage. Builds upon the Fitzmaurice Voicework technique as well as other voice methodologies.

Prerequisite: THEA 1100 and THEA 1700.

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2720 - Movement for Actors I

Credits: 2

This course explores physical awareness, movement integration and non-verbal story telling as essential skills for the actor in all performance efforts.

Prerequisite: THEA 1100.

THEA2790 - Stage Management

Credits: 3

Study of the essential elements of supervising theatrical productions. Stresses the art of organizing auditions, casts, crews, rehearsals, and performances while developing a unique professional relationship with directors, designers and actors. Students will work on a live production.

Prerequisite: THEA 1100, THEA 1200, THEA 2220.

THEA3710 - Acting III

Credits: 3

Building on concepts explored in Acting II, this course seeks to further develop the student's ability to interpret, create and sustain a well-developed, believable character. Acting III develops the actor's voice and body for characterization and character interaction through performances of scenes as well as the study of character and scene.

Restricted Theatre majors or permission of instructor

Prerequisite: THEA 2100

THEA3740 - Acting Styles

Credits: 3

Focuses on textual analysis of plays from different periods and styles of dramatic literature. Emphasizes vocal and physical interpretation of character as represented in non-realistic styles of drama.

Prerequisite: THEA 1100 and THEA 3710.

THEA3750 - Acting for the Camera

Credits: 3

Addresses performance skills required in acting for the camera. Covers various techniques, styles, and skills necessary to be successful in the professional world of film and television as an actor. Students perform scenes for 3-camera and single camera set-ups, and become familiar with rudimentary technical skills as crewmembers for shoots. Lecture and test material cover career opportunities, union affiliations, and current trends in the film and television industry.

Prerequisite: THEA 1100 and THEA 3710. THEA 3805. Stage Lighting II.

THEA3910 - 20th Century Theatre Diversity

Credits: 3

Studies plays and production techniques, within the context of historical and sociological events, as developed in the

20th Century that has led to the cultural diversity seen in modern theatre.

A&S College Core 2015 ASD
Former Course Number [591]

Prerequisite: junior standing.

THEA3950 - Dialects for the Actor

Credits: 3

Introduces the actor to five major dialects for the stage. Examines sensibility, vowel and consonant changes, pitch placement and charting.

Prerequisite: THEA 1100, THEA 1700, and THEA 2170.

THEA4710 - Acting IV

Credits: 3

Max Credit 3

Involves intensive work at an advanced level dealing with individual actor's problems through the medium of scene study.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 3710

THEA4720 - Auditioning and Professional Issues

Credits: 3

Introduces actors to process of finding, preparing and executing successful audition material, including monologues, songs and dance combinations. Exposes actors to business aspects of the theatre world, including resumes, photos, contracts, unions, internships, apprenticeships, Equity Membership Candidacy programs, URTA's and professional actor training graduate programs. Culminates preparation for final semester auditions for the company/school of choice.

Prerequisite: THEA 1100, THEA 3710 and THEA 3740.

THEA4730 - Movement for Actors II

Credits: 2

This course explores physical awareness, movement integration and non-verbal story telling as essential skills for the actor in all performance efforts.

Prerequisite: THEA 1100 and THEA 2720 .

THEA4820 - Directing I

Credits: 3

Tools course. Focuses on basic pictorial and blocking skills of the director. Includes in-class exercises that cover structural and character analysis of play scripts, blocking annotation and prompt scripts, developing ground plans, creating compositions with emphasis, focus and balance, and employing movement as a dynamic tool. Requires two outside directing projects with verbal evaluations of all project work.

Prerequisite: THEA 2010, THEA 2020, THEA 3710, and THEA 3810 or instructor permission.

THEA4930 - Theatre History I

Credits: 3

First semester of a one-year series. Surveys theatrical and dramatic practices from origins of Western European theatre to the theatre of the avant-garde. Specifically focuses on the climate of ideas and theoreticians, theatrical practitioners and audiences. Offered fall semester.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at 3000-level.

THEA4940 - Theatre History II

Credits: 3

Second semester of a one-year series. Continues THEA 4930.

Prerequisite: THEA 4930.

- Foreign Language Credits: 8
A&S Global Credits: 3
A&S Diversity Credits: 3

Three Hours From the Following:

THEA1410 - Beginning Ballet I

Credits: 1

Introduces principles and practices of classical ballet technique.

USP 2015 Code U5H

Prerequisite: THEA 1410 or instructor permission.

THEA1430 - Beginning Modern I

Credits: 1

Introduces principles and techniques of modern dance.

USP 2015 Code U5H

THEA1450 - Beginning Tap Dance I

Credits: 1

Explores basic tap techniques and related principles of tap dance composition.

THEA1480 - Beginning Jazz Dance I

Credits: 1

Explores basic jazz dance techniques and related principles of jazz dance composition.

USP 2003-2014 Code H

Theatre and Dance, B.A.

The University Studies Program 2015

Tracks:

- Theatre and Dance, Theatre Track, B.A.
- Theatre and Dance, Dance Track, B.A.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Theatre and Dance, Dance Performance Concentration, B.F.A.

The BFA in Dance Performance is a professionally oriented degree for students interested in a career of performing or choreographing and permits a total of 71-74 credits in the major. Admission to the BFA is by application only.

Required Courses

These are the required courses for a B.F.A. with Dance Performance Concentration. *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

THEA1021 - Academic and Professional Issues in Dance

Credits: 1

Introduces freshman to the discipline of dance and academic study at the University of Wyoming. Key intellectual and literacy concepts will be introduced, including, but not limited to: critical thinking and analysis, knowledge of the discipline, career options, diversity of the discipline, university and region.

USP 2003-2014 Code U3I,U3L

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1200 - Introduction to Design

Credits: 3

Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA1405 - Introduction to Pilates Training

Credits: 1

Max Credit (Max. 2)

An introduction to Pilates based training, including mat work and exercises on the Reformer.

Prerequisite: consent of instructor.

THEA1450 - Beginning Tap Dance I

Credits: 1

Explores basic tap techniques and related principles of tap dance composition.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2050 - Theatre Practice

Credits: 1-2

Encompasses individually supervised practical training in performance and production.

Prerequisite: consent of instructor.

THEA2160 - Stage Makeup

Credits: 2

Introduction to theatrical makeup with the stage performer in mind. Focus on principles, materials, and techniques;

concentrating on problems of designing and executing specific makeup designs and applications for a wide range of ages, types, and styles.

OR

THEA2800 - Stage Lighting I

Credits: 3

Examines the elemental aspects of stage lighting including equipment, facilities, color, and fundamental electricity. Requires studio work on departmental productions. Intended for majors in the program.

Former Course Number [3800]

Prerequisite: THEA 2150 and THEA 2220.

OR

THEA3820 - Stage Costuming I

Credits: 3

A study of basic drawing and rendering skills, and a selective study of historical silhouettes. Objectives include the ability to trust instinct, application of the basic elements of design, applying historical reference and research to a specific character, developing a concept and finally the application of these principles to a final project.

Former Course Number [4840]

Prerequisite: THEA 1100.

THEA2100 - Acting II

Credits: 3

Max Credit 3

Acting II builds on previous experience in acting with continued emphasis on analyzing, rehearsing and performing scenes, creating a believable stage image. Scene work, including scoring, will be examined with focus on contemporary realism. In addition, the course will focus on professional development and career readiness.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1100 OR equivalent

THEA2200 - Backgrounds of Dance

Credits: 3

Surveys ethnic and theatrical dance forms from primal society to 20th century. Examines the place of the arts as a reflection of the culture.

USP 2003-2014 Code U3CA,U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

THEA2410 - Intermediate Ballet I

Credits: 1.5
Max Credit (Max. 3)

A first year, first semester ballet technique class for dance majors and minors. This course focuses on expanding the dancer's understanding and knowledge of technique, vocabulary, and principles of classical ballet.

USP 2015 Code U5H
Prerequisite: Admission by permission only.

THEA2420 - Intermediate Ballet II

Credits: 1.5
Max Credit (Max. 3)

A first year, second semester ballet technique class for dance majors and minors. This course focuses on expanding the dancer's understanding and knowledge of technique, vocabulary and principles of classical ballet.

USP 2015 Code U5H
Prerequisite: Admission by permission only.

THEA2430 - Intermediate Modern I

Credits: 1.5
Max Credit (Max. 3)

A first year, first semester, modern dance technique class for dance majors and minors. Knowledge of basic vocabulary and principles will be augmented with an understanding of historical techniques and their application to contemporary dance. Class meets three times per week.

USP 2015 Code U5H
Prerequisite: Limited to dance majors and minors; admission by permission only.

THEA2440 - Intermediate Modern II

Credits: 1.5
Max Credit (Max. 3)

A first year, second semester modern dance technique class for dance majors and minors. Mastering vocabulary and principles will be augmented with a deeper understanding of historical techniques and their application to contemporary dance.

USP 2015 Code U5H

Prerequisite: THEA 2430. Limited to dance majors and minors; admission by permission only.

THEA2450 - Intermediate Tap I

Credits: 1

Continued studies in techniques and principles of tap dance and tap dance composition.

Prerequisite: THEA 1450.

THEA2480 - Intermediate Jazz I

Credits: 1

Continued studies in techniques and principles of jazz dance and jazz dance composition.

USP 2015 Code U5H

Prerequisite: THEA 1480. Instructor permission required.

THEA3021 - Foundations of Dance Pedagogy

Credits: 1

Introduces students to basic theories and practices of dance pedagogy. Lecture and discussion will be balanced with peer teaching and coaching, observation of lessons and integration within a dance classroom situation with some teaching responsibilities and development of a portfolio with lessons and resources for teaching.

Prerequisite: sophomore standing in the department of Theatre and Dance; successful completion of THEA 3420 or THEA 3440.

THEA3100 - Kinesiology for Dance

Credits: 3

Encompasses seminar in current kinesiology research for dancers. Includes practicum based projects, lectures and supplementary materials.

Prerequisite: ZOO 2040.

THEA3410 - Adv/Intermediate Ballet I

Credits: 1.5

Max Credit (Max. 3)

A second year, first semester ballet technique class for dance majors and minors. Emphasis is placed on improving technical skills and learning more advanced steps. Includes research into one discipline of ballet.

Prerequisite: successful completion of THEA 2440 and admission by permission only. Limited to dance majors and minors.

THEA3420 - Adv/Intermediate Ballet II

Credits: 1.5
Max Credit (Max. 3).

Second semester, second year ballet technique class for dance majors and minors. Emphasizes broadening the dancer's movement vocabulary while refining acquired technical skills. Dancers begin work in study of Baroque dance terms.

Prerequisite: successful completion of THEA 3410 or equivalent required. Limited to dance majors and minors; admission by permission only.

THEA3430 - Adv/Intermediate Modern I

Credits: 1.5
Max Credit (Max. 3)

A second year, first semester, intermediate level modern dance technique class for dance majors and minors. Continued training in classical modern dance and continued historical survey of modern dance will be augmented by rhythmic analysis and compositional forms.

Prerequisite: successful completion of THEA 2440 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA3440 - Adv/Intermediate Modern II

Credits: 1

A second year, second semester, modern dance technique class with continuing studies of sequential modern dance technique at the intermediate level, introduction of Laban effort/shape theory, compositional forms, improvisation and additional rhythmic analysis.

Prerequisite: THEA 3430 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA3480 - Adv/Intermediate Jazz I

Credits: 1
Max Credit (Max. 2)

An intermediate jazz technique class. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation and incorporate them into class compositions.

Prerequisite: THEA 2480.

THEA3490 - Advanced Jazz I

Credits: 1
Max Credit (Max. 2)

An advanced class in jazz technique and performance. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation as well as incorporate them into class compositions.

Prerequisite: THEA 3480.

THEA4001 - Historical Dance

Credits: 2

Max Credit (Max. 2)

Historical dance forms in the "Noble Style" dating from the 15th through 18th Centuries. Class work covers the relationship of musical forms to the specific step vocabulary and dances of each period, deportment, period costume as it relates to movement, social environment, period style with an emphasis on reconstruction of 17th and 18th Century dances from Feuillet notation.

Prerequisite: THEA 3440.

- *Plus 8 credits total in any combination of THEA 4010 and THEA 4030*

THEA4010 - Advanced Ballet

Credits: 1-3

Max Credit (Max. 8)

A continuing course in the principles and techniques of classical ballet. Emphasis is placed on continuing to broaden the dancer's movement vocabulary while refining acquired technical skills.

Prerequisite: THEA 3420. Limited to dance majors and minors; admission by permission only.

THEA4030 - Advanced Modern Dance

Credits: 1-3

Max Credit (Max. 8)

This class will develop a professional dancer capable of working within diverse modern dance styles and techniques through the interweaving of classical and contemporary movement modalities along with an experiential anatomy approach.

Prerequisite: THEA 3440. Limited to dance majors and minors; admission by permission only.

THEA4200 - 20th Century Dance

Credits: 3

Intensely studies dance in 20th Century, emphasizing contemporary movement in modern, ballet, jazz and musical theatre dance. Examines social, political and aesthetic trends influencing dance theory and performance.

USP 2003-2014 Code U3CA,U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2200.

THEA4250 - Beginning Dance Composition

Credits: 2

Presents and criticizes movement studies based on various approaches to composition. Explores experimentation in choreography.

Prerequisite: THEA 2420, THEA 2440.

THEA4260 - Intermediate Dance Composition

Credits: 2-3

Prerequisite: THEA 4250 and consent of instructor.

THEA4700 - Auditioning and Careers in Dance

Credits: 1

Designed for dance majors as a culminating course in preparation for final semester auditions and applications for companies and graduate schools. Through this course, students will set career goals, create an audition portfolio, and gain exposure to the many challenges and opportunities in dance.

Prerequisite: senior standing, THEA 1021, and one semester of THEA 4010 or THEA 4030.

- THEA4880 - Advanced Theatre Practice Credits: 1

THEA4880 - Advanced Theatre Practice

Credits: 1-2

Prerequisite: 12 hours in theatre and consent of instructor.

THEA4950 - Senior Thesis

Credits: 3

Encompasses senior research project under faculty member guidance and supervision.

Prerequisite: senior standing.

OR

THEA4960 - Senior Project

Credits: 1-3

Max Credit (Max. 3)

Exercise in the practical application of production, centered on a UW production, either main stage or studio. It may deal with design in scenery, costumes, properties, sound, makeup, playwriting, technical direction, directing, dance pedagogy, or choreography. The project is intended to be a "real" exercise in theatrical production.

THEA4975 - Theatre/Dance Internship

Credits: 1-12

Max Credit (Max. 12)

The intent of this course is designed to provide professional experiences to students outside of the academic curriculum of Theatre and Dance Department. It is designed to advance the students potential career opportunities and help advance their knowledge in the field.

Restricted Restricted to sophomores, juniors, and seniors.

Prerequisite: Must have completed 6 hours in the department of Theatre and Dance.

- LIFE 1000 Credits: 4

OR

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

OR

ANTH1100 - Introduction to Biological Anthropology

Credits: 4

Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

- Foreign Language Credits: 8
 - First Aid/CPR Credits: 0
- A&S Global Credits: 3
A&S Diversity Credits: 3

Theatre and Dance, Dance Science Concentration, B.F.A.

The BFA in Dance Science permits 78 credits in the major and is a professionally oriented degree for students interested in a career in research or science. The degree provides summation and synthesis of dance training. Admission by application only.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. This class will develop a professional dancer capable of working within diverse modern dance styles and techniques through the interweaving of classical and contemporary movement modalities along with an experiential anatomy approach.

Prerequisite: THEA 3440. Limited to dance majors and minors; admission by permission only.

THEA4200 - 20th Century Dance

Credits: 3
Intensely studies dance in 20th Century, emphasizing contemporary movement in modern, ballet, jazz and musical theatre dance. Examines social, political and aesthetic trends influencing dance theory and performance.

USP 2003-2014 Code U3CA,U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2200.

THEA4250 - Beginning Dance Composition

Credits: 2

Presents and criticizes movement studies based on various approaches to composition. Explores experimentation in choreography.

Prerequisite: THEA 2420, THEA 2440.

THEA4260 - Intermediate Dance Composition

Credits: 2-3

Prerequisite: THEA 4250 and consent of instructor.

THEA4880 - Advanced Theatre Practice

Credits: 1-2

Prerequisite: 12 hours in theatre and consent of instructor.

THEA4990 - Research in Theatre

Credits: 1-3

Prerequisite: 6 hours in area of research and consent of instructor.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

KIN3050 - Prevention and Care of Athletic Injuries

Credits: 2

Encompasses theory and practical work in the field of athletic training. Strongly emphasizes prevention and care of athletic injuries, including wrapping and taping techniques.

Former Course Number [PEPR 3050]

Prerequisite: junior standing; C or better in KIN 2040; minimum 2.750 GPA.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

KIN4020 - Motor Behavior

Credits: 3

Provides undergraduate majors in kinesiology and health the foundation of motor learning and control theories to be applied to decisions related to the enhancement of human performance.

Prerequisite: C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; and 2.750 GPA.

OR

KIN3034 - Lifespan Motor Development

Credits: 3

Studies lifespan motor development. Emphasizes developmental periods of infancy through adolescence. Gives attention to observation and analysis of motor behavior and movement performance of individuals across lifespan.

Former Course Number [PEPR 3034]

Prerequisite: grade of C or better in PSYC 1000; junior standing; 2.750 GPA.

KIN3037 - Sport Psychology

Credits: 3

Studies psychological theories and techniques applied to sport to enhance the performance and personal growth of athletes and coaches. Emphasizes the influence of personality, anxiety, motivation, social factors, and psychological skills training.

Former Course Number [PEPR 3037]

Prerequisite: Admitted to the last two years of one of the programs in DK&H.

OR

KIN3038 - Exercise Psychology

Credits: 3

Studies psychological theories for understanding and predicting health-oriented exercise behavior, including psychological intentions for increasing exercise participation and adherence. Emphasizes psychological and psychobiological responses to exercise.

Prerequisite: grade of C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; 2.750 GPA.

- Foreign Language Credits: 8
A&S Global Credits: 3
A&S Diversity Credits: 3

Additional Upper-division Required Course Work

(minimum 6 hours from the following courses):

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular circulatory, and respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

KIN3040 - Teaching Human Anatomy

Credits: 3

Students develop communication and teaching skills while expanding their knowledge in anatomy. Under faculty instruction, each student develops lecture and laboratory lessons for all human anatomy systems. Under direct faculty supervision, each student demonstrates their teaching skills through preparation of videotape segments and actual laboratory teaching experience in the lower-division human anatomy course.

Former Course Number [PEPR 3040]

Prerequisite: 2.750 GPA and grade of B or better in KIN 2040 and consent of instructor.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

PSYC3120 - Cognitive Psychology

Credits: 3

Deals with higher mental processes that are primarily unique to human beings from theoretical and research orientations. Emphasizes interrelationships between various cognitive processes and continuity of those processes with perceptual and non-cognitive activities. Discusses how information is processed and remembered.

When Offered (Normally offered spring semester)

Former Course Number [4120]

Prerequisite: A grade of C or better in 6 hours of psychology including PSYC 1000.

PSYC3250 - Health Psychology

Credits: 3

Provides overview of growing partnership between psychology and health care, including history of psychology in health care; theoretical foundations of health and illness; intervention and research techniques; stress and high risk behaviors (e. g. , substance abuse, eating behaviors, AIDS); psychology's contribution to improving outcomes and quality of life in chronic and life-threatening behaviors.

Cross Listed NURS 3250.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4070 - Motivation

Credits: 3

Covers classic and contemporary theories and research concerning motivation and the pursuit of goals. Discusses the study of motivation from a variety of perspectives, including biological, environmental, and psychological. Considers the role of emotion in motivational processes.

Prerequisite: C or better in 6 hours in psychology.

Theatre and Dance, Design Tech Management Concentration, B.F.A.

The BFA Design Tech Management permits 69-70 credits in the major and is a professionally oriented degree for students interested in pre-professional theatre design, technology and management or graduate study.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

These are the required courses for a B.F.A. with Design Tech Management Concentration. *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the areas(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1050 - Beginning Drawing and Painting

Credits: 3

An introductory drawing and painting technique course for students to achieve a working knowledge of a variety of mediums that cross the disciplines of scenic, costume, and lighting design. Form, perspective, texture and basic color theories will be explored.

THEA1200 - Introduction to Design

Credits: 3

Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3

First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3

Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2100 - Acting II

Credits: 3

Max Credit 3

Acting II builds on previous experience in acting with continued emphasis on analyzing, rehearsing and performing scenes, creating a believable stage image. Scene work, including scoring, will be examined with focus on contemporary realism. In addition, the course will focus on professional development and career readiness.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1100 OR equivalent

THEA2150 - Drafting for Design

Credits: 3

Introduces Design and Technical students to the basics of hand drafting and numerous drafting techniques and conventions. After completing this course, students will be well prepared for scenic and lighting design courses.

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2250 - Computer Aided Design I

Credits: 3

Building on skills and techniques learned in THEA 2150 Drafting for Design, the course introduces and provides students with training on commonly used software, that may include CAD, 3D-modeling, and photo editing software. Skills acquired will be built upon in later courses.

Prerequisite: THEA 2150 or by permission of instructor.

THEA2790 - Stage Management

Credits: 3

Study of the essential elements of supervising theatrical productions. Stresses the art of organizing auditions, casts, crews, rehearsals, and performances while developing a unique professional relationship with directors, designers and actors. Students will work on a live production.

Prerequisite: THEA 1100, THEA 1200, THEA 2220.

THEA2800 - Stage Lighting I

Credits: 3

Examines the elemental aspects of stage lighting including equipment, facilities, color, and fundamental electricity. Requires studio work on departmental productions. Intended for majors in the program.

Former Course Number [3800]

Prerequisite: THEA 2150 and THEA 2220.

THEA2990 - Period Style for Theatre I

Credits: 3

First semester of a one-year survey. Studies antiquity to the Renaissance with an overview of the architecture, décor, clothing, arts and culture as related in their use and understanding of Western drama. The social, economic, and political histories of each period will be discussed as well. THEA 2990 and THEA 2995 should be taken in sequence.

THEA2995 - Period Style for Theatre II

Credits: 3

Second semester of a one-year survey. Studies Renaissance to Contemporary with an overview of the architecture, decor, clothing, arts and culture as related in their use and understanding of Western drama. The social, economic, and political histories of each period will be discussed as well. THEA 2990 and 2995 should be taken in sequence.

Prerequisite: THEA 2990 or permission of instructor.

THEA3710 - Acting III

Credits: 3

Building on concepts explored in Acting II, this course seeks to further develop the student's ability to interpret, create

and sustain a well-developed, believable character. Acting III develops the actor's voice and body for characterization and character interaction through performances of scenes as well as the study of character and scene.

Restricted Theatre majors or permission of instructor

Prerequisite: THEA 2100

THEA3805 - Stage Lighting 2

Credits: 3

Max Credit 3

Analyze proposed productions in terms of period, style, theatre limitations and instrument inventories. Determine appropriate design solutions in written descriptive analyses that result in 2-D drawings of the design. Produce all supporting paperwork including drafting a plan view, section view, instrument schedules, magic sheets and proposed cue lists. Instructor permission required.

Prerequisite: THEA 2800

THEA3810 - Scene Design I

Credits: 3

An in-depth study of idea development from script analysis through design conception using different types of theaters and source material. The design process will cover research, drawing, drafting, model making, and rendering.

Prerequisite: THEA 2150 and THEA 2220 or by permission of instructor.

THEA3820 - Stage Costuming I

Credits: 3

A study of basic drawing and rendering skills, and a selective study of historical silhouettes. Objectives include the ability to trust instinct, application of the basic elements of design, applying historical reference and research to a specific character, developing a concept and finally the application of these principles to a final project.

Former Course Number [4840]

Prerequisite: THEA 1100.

THEA3850 - Design and Technology Seminar

Credits: 2

Introduces designer/technician to process of preparing successful interview material, including a professionally developed portfolio. Exposes designer/technician to business aspects of the theatre world, including resumes, letters of inquiry and application, contracts, unions and professional organizations, internships, apprenticeships, URTAs and professional design/technical training programs. Culminates in junior End-of-the-Year Evaluations.

Prerequisite: junior standing in the BFA Program with Design/Technical emphasis.

THEA3910 - 20th Century Theatre Diversity

Credits: 3

Studies plays and production techniques, within the context of historical and sociological events, as developed in the 20th Century that has led to the cultural diversity seen in modern theatre.

A&S College Core 2015 ASD

Former Course Number [591]

Prerequisite: junior standing.

THEA4810 - Scene Design II

Credits: 3

Building on previous coursework, this course will focus on further development of the individual creative and design processes, honing research and presentation skills, and refinement of artistry and craftsmanship. Strong emphasis will be on the presentation of ideas and the advancement of the portfolio.

Prerequisite: THEA 2250 and THEA 3810.

THEA4820 - Directing I

Credits: 3

Tools course. Focuses on basic pictorial and blocking skills of the director. Includes in-class exercises that cover structural and character analysis of play scripts, blocking annotation and prompt scripts, developing ground plans, creating compositions with emphasis, focus and balance, and employing movement as a dynamic tool. Requires two outside directing projects with verbal evaluations of all project work.

Prerequisite: THEA 2010, THEA 2020, THEA 3710, and THEA 3810 or instructor permission.

THEA4850 - Stage Costuming II

Credits: 3

Explores costume design, emphasizing various rendering techniques. Emphasis is placed on the portfolio.

Prerequisite: THEA 3820.

THEA4930 - Theatre History I

Credits: 3

First semester of a one-year series. Surveys theatrical and dramatic practices from origins of Western European theatre to the theatre of the avant-garde. Specifically focuses on the climate of ideas and theoreticians, theatrical practitioners and audiences. Offered fall semester.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at 3000-level.

THEA4940 - Theatre History II

Credits: 3

Second semester of a one-year series. Continues THEA 4930.

Prerequisite: THEA 4930.

Foreign Language Credits: 8

A&S Global Credits: 3

A&S Diversity Credits: 3

Recommended Electives:

THEA2145 - Costume Construction

Credits: 3

Teaches the basic skills and terminology that are used in costume construction. Teaches hand and machine sewing focusing on techniques used to stitch historical and modern costumes as well as basic knowledge of fabric.

THEA2160 - Stage Makeup

Credits: 2

Introduction to theatrical makeup with the stage performer in mind. Focus on principles, materials, and techniques; concentrating on problems of designing and executing specific makeup designs and applications for a wide range of ages, types, and styles.

THEA2810 - Scenic Painting for the Theatre

Credits: 3

Introduces the art of scenic painting by the hands-on use and instruction of a variety of scenic paints, application on select construction materials, the use of unique tools and techniques commonly used to paint scenery for the stage. Safe use and proper handling of such material are addressed.

Prerequisite: THEA 2220.

THEA2900 - Sound Design for Theatre and Dance

Credits: 3

Examines the basic aspects of sound design for the theatre, dance, entertainment and film worlds. Topics covered include recording, sampling, live mixing, playback, and non-linear editing through several software packages.

Prerequisite: THEA 2220.

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Theatre and Dance, Musical Theatre Performance Concentration, B.F.A.

The BFA in Musical Theatre Performance permits a total of 60-70 credits in the major. It is designed primarily for those desiring to pursue additional pre-professional training in theatre and or for those preparing to enter MFA graduate programs.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

The following are the required courses for a Bachelor of Fine Arts in Performance (Musical Theatre):

THEA1040 - Production Crew I

Credits: 0.5
Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the areas(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1200 - Introduction to Design

Credits: 3
Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA1300 - Musical Theatre Workshop: Voice and Acting

Credits: 2
Max Credit (Max. 8)

Musical Theatre Workshop: Voice & Acting will focus on developing and strengthening the speaking and singing voice for stage, wherein students will construct performances through integration of breath and voice work.

THEA1360 - Fundamentals of Music for Theatre Majors

Credits: 3
Basics of music theory to include music notation, rhythm, pitch, scales, key signatures, triads, and basic ear training and keyboard skills, specific to the needs of Musical Theatre. Assumes little or no music theory background.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3
First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3

Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2100 - Acting II

Credits: 3

Max Credit 3

Acting II builds on previous experience in acting with continued emphasis on analyzing, rehearsing and performing scenes, creating a believable stage image. Scene work, including scoring, will be examined with focus on contemporary realism. In addition, the course will focus on professional development and career readiness.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1100 OR equivalent

THEA2160 - Stage Makeup

Credits: 2

Introduction to theatrical makeup with the stage performer in mind. Focus on principles, materials, and techniques; concentrating on problems of designing and executing specific makeup designs and applications for a wide range of ages, types, and styles.

THEA2170 - Speech for the Actor

Credits: 3

Studies speech techniques, including the International Phonetic Alphabet and Standard American Speech for the Stage. Builds upon the FitzmauriceVoicework technique as well as other voice methodologies.

Prerequisite: THEA 1100 and THEA 1700.

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set

construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2300 - MT Workshop: Scene Study

Credits: 1
Max Credit 1

Study and analysis of written aspects of Musical Theatre (Book, Lyrics, Music) with an emphasis on translating analysis into tangible aspects of musical theatre performance. Study and practice outside of class, as well as rehearsals with assigned scene partner(s) is required.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1300

THEA2340 - Musical Theatre Voice Lesson

Credits: 1
Max Credit (Max. 8)

Solo instruction in singing techniques and performance styles associated with Musical Theatre. Includes demonstration, brief lecture, discussion, and active participation through singing, analyzing, movement, and performance.

THEA2720 - Movement for Actors I

Credits: 2
This course explores physical awareness, movement integration and non-verbal story telling as essential skills for the actor in all performance efforts.

Prerequisite: THEA 1100.

THEA2790 - Stage Management

Credits: 3
Study of the essential elements of supervising theatrical productions. Stresses the art of organizing auditions, casts, crews, rehearsals, and performances while developing a unique professional relationship with directors, designers and actors. Students will work on a live production.

Prerequisite: THEA 1100, THEA 1200, THEA 2220.

THEA3300 - MT Workshop: Production

Credits: 1-2
Max Credit 2

Focusing on solos, duets and/or large and small ensemble pieces, instruction will include music preparation,

choreography, blocking, acting, character study and performance. Additional scene study, rehearsals outside of class times, mock auditions, and study of materials will be required. The course will be repeated twice for credit.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1300

THEA3710 - Acting III

Credits: 3

Building on concepts explored in Acting II, this course seeks to further develop the student's ability to interpret, create and sustain a well-developed, believable character. Acting III develops the actor's voice and body for characterization and character interaction through performances of scenes as well as the study of character and scene.

Restricted Theatre majors or permission of instructor

Prerequisite: THEA 2100

THEA3740 - Acting Styles

Credits: 3

Focuses on textual analysis of plays from different periods and styles of dramatic literature. Emphasizes vocal and physical interpretation of character as represented in non-realistic styles of drama.

Prerequisite: THEA 1100 and THEA 3710.

THEA3910 - 20th Century Theatre Diversity

Credits: 3

Studies plays and production techniques, within the context of historical and sociological events, as developed in the 20th Century that has led to the cultural diversity seen in modern theatre.

A&S College Core 2015 ASD

Former Course Number [591]

Prerequisite: junior standing.

THEA3950 - Dialects for the Actor

Credits: 3

Introduces the actor to five major dialects for the stage. Examines sensibility, vowel and consonant changes, pitch placement and charting.

Prerequisite: THEA 1100, THEA 1700, and THEA 2170.

THEA4330 - History of American Musical Theatre

Credits: 3

History of the American Musical from its inception to today. Emphasis on developments and literature.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at the 3000-level.

THEA4710 - Acting IV

Credits: 3

Max Credit 3

Involves intensive work at an advanced level dealing with individual actor's problems through the medium of scene study.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 3710

THEA4720 - Auditioning and Professional Issues

Credits: 3

Introduces actors to process of finding, preparing and executing successful audition material, including monologues, songs and dance combinations. Exposes actors to business aspects of the theatre world, including resumes, photos, contracts, unions, internships, apprenticeships, Equity Membership Candidacy programs, URTA's and professional actor training graduate programs. Culminates preparation for final semester auditions for the company/school of choice.

Prerequisite: THEA 1100, THEA 3710 and THEA 3740.

THEA4730 - Movement for Actors II

Credits: 2

This course explores physical awareness, movement integration and non-verbal story telling as essential skills for the actor in all performance efforts.

Prerequisite: THEA 1100 and THEA 2720 .

THEA4820 - Directing I

Credits: 3

Tools course. Focuses on basic pictorial and blocking skills of the director. Includes in-class exercises that cover structural and character analysis of play scripts, blocking annotation and prompt scripts, developing ground plans, creating compositions with emphasis, focus and balance, and employing movement as a dynamic tool. Requires two outside directing projects with verbal evaluations of all project work.

Prerequisite: THEA 2010, THEA 2020, THEA 3710, and THEA 3810 or instructor permission.

THEA4930 - Theatre History I

Credits: 3

First semester of a one-year series. Surveys theatrical and dramatic practices from origins of Western European theatre to the theatre of the avant-garde. Specifically focuses on the climate of ideas and theoreticians, theatrical practitioners and audiences. Offered fall semester.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at 3000-level.

- Foreign Language Credits: 8
- Plus two additional dance courses in an area of choice.
A&S Global Credits: 3
A&S Diversity Credits: 3

Plus 3 Hours From the Following:

THEA1410 - Beginning Ballet I

Credits: 1

Introduces principles and practices of classical ballet technique.

USP 2015 Code U5H

Prerequisite: THEA 1410 or instructor permission.

THEA1430 - Beginning Modern I

Credits: 1

Introduces principles and techniques of modern dance.

USP 2015 Code U5H

THEA1450 - Beginning Tap Dance I

Credits: 1

Explores basic tap techniques and related principles of tap dance composition.

THEA1480 - Beginning Jazz Dance I

Credits: 1

Explores basic jazz dance techniques and related principles of jazz dance composition.

USP 2003-2014 Code H

Theatre and Dance, Theatre/English Concentration, B.F.A.

The BFA in English Theatre permits 60-70 credits in the major field. It is designed primarily for students who seek additional professional education and certification, or for those who wish to enter MFA graduate programs.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Courses

These are the required courses for a B.F.A. with Theatre/English Concentration. *Certain substitutions may have to be made and all scheduling of classes should be discussed with an adviser.*

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1200 - Introduction to Design

Credits: 3

Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3

First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3

Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2100 - Acting II

Credits: 3

Max Credit 3

Acting II builds on previous experience in acting with continued emphasis on analyzing, rehearsing and performing scenes, creating a believable stage image. Scene work, including scoring, will be examined with focus on contemporary realism. In addition, the course will focus on professional development and career readiness.

Restricted Theatre & Dance majors, instructor permission

Prerequisite: THEA 1100 OR equivalent

THEA2150 - Drafting for Design

Credits: 3

Introduces Design and Technical students to the basics of hand drafting and numerous drafting techniques and conventions. After completing this course, students will be well prepared for scenic and lighting design courses.

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2800 - Stage Lighting I

Credits: 3

Examines the elemental aspects of stage lighting including equipment, facilities, color, and fundamental electricity. Requires studio work on departmental productions. Intended for majors in the program.

Former Course Number [3800]

Prerequisite: THEA 2150 and THEA 2220.

THEA3710 - Acting III

Credits: 3

Building on concepts explored in Acting II, this course seeks to further develop the student's ability to interpret, create and sustain a well-developed, believable character. Acting III develops the actor's voice and body for characterization and character interaction through performances of scenes as well as the study of character and scene.

Restricted Theatre majors or permission of instructor

Prerequisite: THEA 2100

THEA3740 - Acting Styles

Credits: 3

Focuses on textual analysis of plays from different periods and styles of dramatic literature. Emphasizes vocal and physical interpretation of character as represented in non-realistic styles of drama.

Prerequisite: THEA 1100 and THEA 3710.

THEA3810 - Scene Design I

Credits: 3

An in-depth study of idea development from script analysis through design conception using different types of theaters and source material. The design process will cover research, drawing, drafting, model making, and rendering.

Prerequisite: THEA 2150 and THEA 2220 or by permission of instructor.

THEA3820 - Stage Costuming I

Credits: 3

A study of basic drawing and rendering skills, and a selective study of historical silhouettes. Objectives include the ability to trust instinct, application of the basic elements of design, applying historical reference and research to a specific character, developing a concept and finally the application of these principles to a final project.

Former Course Number [4840]

Prerequisite: THEA 1100.

THEA3910 - 20th Century Theatre Diversity

Credits: 3

Studies plays and production techniques, within the context of historical and sociological events, as developed in the 20th Century that has led to the cultural diversity seen in modern theatre.

A&S College Core 2015 ASD

Former Course Number [591]

Prerequisite: junior standing.

THEA4820 - Directing I

Credits: 3

Tools course. Focuses on basic pictorial and blocking skills of the director. Includes in-class exercises that cover structural and character analysis of play scripts, blocking annotation and prompt scripts, developing ground plans, creating compositions with emphasis, focus and balance, and employing movement as a dynamic tool. Requires two outside directing projects with verbal evaluations of all project work.

Prerequisite: THEA 2010, THEA 2020, THEA 3710, and THEA 3810 or instructor permission.

THEA4830 - Directing II

Credits: 3

Focuses on creative process of developing directorial concepts, establishing the world and style of the play, working with the actor, and functioning as a designer. Includes exercises that analyze different directorial approaches, as well as the audition and casting process. Culminates one-act mounted production performed before invited audience.

Prerequisite: THEA 4820 and written permission of instructor.

THEA4930 - Theatre History I

Credits: 3

First semester of a one-year series. Surveys theatrical and dramatic practices from origins of Western European theatre to the theatre of the avant-garde. Specifically focuses on the climate of ideas and theoreticians, theatrical practitioners and audiences. Offered fall semester.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2010, THEA 2020, 6 hours in theatre at 3000-level.

THEA4940 - Theatre History II

Credits: 3

Second semester of a one-year series. Continues THEA 4930.

Prerequisite: THEA 4930.

- ENGL 2000 Credits 6
 - ENGL 4000 Credits: 9
 - ENGL 4110 Credits: 3
- OR**
- ENGL 4120 Credits: 3
 - Foreign Language Credits: 8
A&S Global Credits: 3
A&S Diversity Credits: 3

Visual Communication Design, B.F.A.

The B.F.A. in Visual Communication Design is a professional level degree open to outstanding students through an application process who are preparing for design studies, careers and professional activity in design beyond the undergraduate level.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

The **BFA in Visual Communication Design** requires the **A&S Core**:

- **D** - Diversity (3 credits)
- **G** - Global (3 credits)

See below for more information:

- <http://www.uwyo.edu/as/current-students/index.html>

Foundation Core: 15 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA
required

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

required

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories

based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

required

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

required

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

required

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

required

Studio Core: 12 Hours

12 credits chosen from the below. At least one course must be from 2D and one from 3D.

2D Studio

Note: only one Photography class can count in the Studio Core

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

3D Studio

Note: only one Ceramics class can count in the Studio Core

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

OR

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

Art History and Design Theory Core: 9 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

required

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

required

Upper Division Art History - 20th and 21st Century: 6 Hours

* six hours in ART 4740 and ART 4770

ART4740 - 20th Century European Art

Credits: 3

Studies 20th-century European art from 1900 to 1945. Covers the 2-D and 3-D art of Expressionism, Cubism, the Bauhaus, Dada and Surrealism, and other important movements in the first half of the 20th century.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010 and ART 2020.

required

ART4770 - Contemporary Arts Seminar

Credits: 3

Studies the major movements in the visual arts from 1945 to the present. Investigate major theories, stylistic movements, and key artists since WWII with a special focus on the increasing globalization of art during this era.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2010 and ART 2020.

required

VCD Core: 12 Hours

ART2110 - Type I: Thinking with Type

Credits: 3

Max Credit 3

Examines history and structure of type as a form of communication and art. Students will reference type as visual expression, data visualization, messaging, and representative of power, political, and socio-economic movements. Explorations in type as a concept and critical expression will explore the fields of graphic design and computer visualization.

Prerequisite: ART 1115

required

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

required

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful concepting, strategic wire frame development and

creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.

required

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

OR

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

Upper Division VCD: 15 Hours

ART3112 - Type: Type, Images, and Narrative

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)

Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.

required

ART3120 - VCD III: Visual Making

Credits: 3

Studies advanced graphic design preparation, idea generation, conceptualization, and critical thinking. Sustainable design problems include print and package design and an exploration of historical impact of design for reproduction through analog and digital means. Contemporary socio-cultural issues will be emphasized along with design as an agent for positive change.

When Offered (Offered fall semester)

Prerequisite: ART 2000 and ART 2112.
required

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.

required

ART4120 - VCD VI: Senior Design Studio

Credits: 3

Specialized research for the advanced design student who will develop a mature voice and sense of design. Individual projects are determined by student interest with the instructor in order to best prepare students for industry careers and graduate school. Students are encouraged to explore new to them, and emerging approaches.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000, ART 2112, ART 2122.
required

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

OR

ART4425 - Graphics Internship

Credits: 3

This course allows graphic design students to better understand real-world design practices, learn about industry standards, and discuss career opportunities and preparedness. Students will be expected to secure internships and meet with an intern advisor regularly, to gain a strong understanding of the graphic design industry.

Prerequisite: ART 2000, ART 2112, and ART 2122.

BFA Core: 12 Hours

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

USP 2015 Code U5C3

Prerequisite: ART 2000 , and junior standing.
required

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.
required

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: ART 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.
required, offered only fall semester

ART4840 - BFA Capstone II

Credits: 3
Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the artwork is completed.

Restricted BFA in Studio Art

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.
required, offered only spring semester

Upper Division Studio Electives: 9 Hours

9 credits of any upper division studio art classes

Foreign Language: 8 Hours

* 8 credits in any foreign language:

LANG1010 - First Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010.

Additional Requirements

B.F.A. in Visual Communication Design

Designers explore a variety of visual communication design topics dealing with diverse messages and audiences. Students interested in pursuing a career in design, including visual communication design, graphic design, motion graphics, animation, digital media, etc. may apply into the B.F.A. in Visual Communication Design. Students planning

to graduate in four years with a B.F.A. in Visual Communication Design should complete their Foundation Core in their Freshman year and take the appropriate Studio Core classes in their sophomore year. As a Professional Degree, the B.F.A. in Visual Communication Design does not include the A&S Outside Major credit requirement.

Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. To obtain a B.F.A. in Visual Communication Design degree in the Department of Visual and Literary Arts students must have a minimum 3.00 overall UW-total institutional GPA, and a 3.25 GPA in all major courses at the time of graduation.

The Visual Communication Design degree provides students with a human-centered approach to making and thinking as designers. Students learn through digital and hand's-on-making design challenges to develop critical narrative skills and refine their ability to think conceptually. Individual projects and research prepare each student to think flexibly in an international community that is continually being influenced by new ideas, tools, and technologies. The Visual Arts Building, design computer classroom, and design and fabrication studio facilities offer undergraduate students ample research, design, and production space and access to cutting-edge technology, and open-source and industry standard software and tools for design exploration.

Application

Formal application is made to the program for acceptance into the B.F.A. in Visual Communication Design degree program. Application must be submitted at least three semesters prior to the applicant's anticipated graduation. Favorable faculty review of the application materials are required before a student is declared a candidate for the B.F.A. in Visual Communication Design degree. Applicants must have achieved the following at the time of application to the B.F.A. in Visual Communication Design:

- C or better in all major classes
- 3.25 GPA or above within major classes
- 3.00 or above overall UW total institutional GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in Studio Art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. in Visual Communication Design candidate. Students should apply at least three semesters before graduation. Application does not automatically guarantee acceptance into the B.F.A. in Visual Communication Design program.

Final Year

During their final year and in conjunction with the spring B.F.A. exhibition, students enroll in two sequential capstone courses: BFA Capstone I (fall) and II (spring). The courses outline the deadline and requirements for the B.F.A. exhibition as well as coordinating mentoring of B.F.A. candidates. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree. Students transferring to the Department of Visual and Literary Arts who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. in Visual Communication Design after one semester in the Art and Art History Program.

Wildlife and Fisheries Biology and Management, B.S.

Provides a solid foundation in the theory and techniques involved in the management, conservation, and captive propagation of wildlife and fish populations. Includes both classroom and field experiences in a Rocky Mountain setting.

Additional Information

Wildlife and Fisheries Biology and Management is a professional degree designed to prepare students for state, federal, and other positions in resource management and conservation biology. The degree provides students with knowledge of the natural world, understanding of processes governing dynamics of wildlife and fish populations, as well as an appreciation of human-mediated effects on wildlife and fish populations. A student graduating with this degree will be familiar with the theory of resource management as well as with methods used to determine population status, habitat quality, and conservation. In Wyoming the abundance of wild animals and pristine habitats provide a unique natural laboratory for studying the responses of wildlife and fish populations to changing climates and habitats.

A student graduating with a degree in WFBM will have comprehensive knowledge of wildlife and fisheries biology and management, will have earned a degree that is compatible with the requirements for professional certification with the American Fisheries Society or the Wildlife Society, and will have a range of knowledge and skills that are valuable to potential employers.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

Foundation Courses

(MATH 1450 may substitute for MATH 1400 and MATH 1405)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences.

Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and

vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

Data Science course

Choose ONE course from the following:

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

Core Required Courses

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4970 - Internship in Wildlife Management

Credits: 1

Max Credit (Max. 1)

Provides practical field experience in resource management for undergraduate credit.

Prerequisite: consent of instructor.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Options

Complete Terrestrial OR Aquatic Option

Aquatic Option

A minimum of 10 of the AQUATIC OPTION requirements listed below (ZOO 4330 and ZOO 4440 and ZOO 4430 and Restricted Electives) must be exclusive to the WFBM major.

REQUIRED COURSES

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

Restricted Electives

15 Credits of Electives from the following list:

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

- BOT 0000:5999
- ENR 0000:5999
- REWM 0000:5999

Terrestrial Option

A minimum of 10 of the TERRESTRIAL OPTION requirements listed below (BOT 4700 and ZOO 4300 and Restricted Electives) must be exclusive to the WFBM major.

REQUIRED COURSES

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

Restricted Electives

14 Credits of Electives from the following list:

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

- BOT 0000:5999
- ENR 0000:5999
- REWM 0000:5999

Zoology, B.S.

Zoology majors explore form, function, behavior, ecology, evolution and conservation of animals and hone analytical, writing, and research skills for diverse careers from graduate school to state and federal agencies, consulting, and nonprofits.

Additional Information

Zoology is the study of animals: their structure, physiology, development and evolution. One of the enduring fascinations of zoology is that we can learn so much about ourselves and our environment by studying what our fellow creatures do.

At the end of this program students will have a comprehensive knowledge of zoology, will be well prepared for graduate education, and will be equipped to enter any of the many employment opportunities that are available.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

A&S College Core

D- - Diversity

Credits: 3
A&S Course: Diversity in the United States

G- - Global Awareness

Credits: 3

A&S Core: Global Awareness Course

Foundation Courses

(MATH 1450 may substitute for MATH 1400 and MATH 1405)

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences.

Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences.

Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

OR

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

OR

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

OR

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

OR

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

OR

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

OR

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

OR

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

OR

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Advanced Zoology Course

* if more than one of the required courses is completed, additional courses can count towards the Zoology Approved Core Electives below.

One of:

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

Zoology Approved Core Electives

A minimum of 10 of 18 Zoology Approved Core Electives must be exclusive to the ZOOL major.

Choose a total of 18 credits from:

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

- GEOG 3150

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

PATB4170 - Diseases of Wildlife

Credits: 3

Introduction to wildlife diseases of the Rocky Mountain region and North America. Emphasis on infectious, parasitic, traumatic, toxic, and other disease agents with coverage of mechanisms of disease, epidemiology, and disease impacts on wildlife populations and species. Significant discussion of zoonotic diseases and diseases at the wildlife/domestic animal interface.

Dual Listed PATB 5170

When Offered (Offered spring semester of even numbered years)

A&S College Core 2015 12 hours of biological or zoological sciences.

Former Course Number [4120]

- PATB 4310
- PATB 4360

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

Minor

African American and Diaspora Studies Minor

Thematic tracks in the major or minor are optional:

- History
- Culture & Aesthetics
- Politics & Law
- Rhetoric & English
- Religion & Philosophy
- Media Studies

Minor Requirements

The minor in African American and Diaspora Studies consists of 21 credit hours:

- 9 credit hours of core course requirements
- 9 credit hours of electives (excludes core courses)
- 3 credit hours of senior thesis seminar (AAST 4975, Capstone)

Aging Studies Minor

Background Check

Students seeking the minor in Aging Studies will be required to obtain a background check. Please contact us for specific information.

Program Plan

Complete the Program Plan of Study with both your major academic advisor and your minor advisor.

A minor in aging studies requires 18 credit hours. These must include the following:

Core Courses

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment.

Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

HLSC4985 - Health Sciences Internship

Credits: 1-6
Max Credit (Max. 6)

Gives students an opportunity to gain practical experience in a health care field of their choice. The intense relationship with a mentor allows the student to become socialized into a health care field, gain practice skills, and relate to other health care professionals in an interdisciplinary way.

When Offered (Offered fall, spring and summer)

Prerequisite: completion of all other degree requirements.

Elective Courses - 9 Credits

- 6 credits must be outside student major

Academic Standards

At least 12 credit hours in a minor must be from courses that are not being counted toward the student's major. No grade below a C is acceptable for courses applied to the minor.

American Politics Minor

The American Politics minor delves into the mechanics of politics in the United States by studying historical and current implications.

Requirements

A minor in American Politics requires

POLS1000 - American and Wyoming Government

Credits: 3
Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

POLS4850 - Seminar in American Politics and Institutions

Credits: 3
Max Credit (Max. 6)

Includes reading and research on selected U. S. government and politics problems.

Dual Listed POLS 5850.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 9 hours of political science including POLS 1000 and consent of instructor.

OR

POLS4840 - Seminar in Public Law

Credits: 3
Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

- 12 hours from an approved list of courses, with a minimum of 9 hours at the 3000-level or above.

Approved American Politics Minor Courses

POLS2000 - Current Issues in American Government

Credits: 3

Examines current political topics in the U. S. Focuses on key public policy problems, policy-making process and the final policy choice. Students must keep abreast of political events on daily basis and apply basic concepts in American government to current affairs.

USP 2003-2014 Code U3CS

Prerequisite: POLS 1000.

POLS2070 - Politics of State and Local Government

Credits: 3

Studies politics, organizations, structures and processes of American state and local governments.

Prerequisite: POLS 1000.

POLS2410 - Introduction to Public Administration

Credits: 3

Deals with executive branches of governments in the U. S. : national, state and local. Considers organizational, political and policy-making aspects of each. Discusses administration in other forms of government, such as interstate compacts

and regional agreements.

Prerequisite: POLS 1000.

POLS2430 - Parties, Interest Groups and Elections

Credits: 3

Studies nature and functions of political organizations in American democracy. Discusses origins and evolution of American parties, causes of interest group development, political socialization, political participation and voting behavior, as well as activities of interest groups within American society and political system. Emphasizes current trends regarding role of parties versus interest groups.

USP 2003-2014 Code U3CS

Prerequisite: POLS 1000.

POLS2450 - Politics and Media

Credits: 3

Examines the media's coverage of current events, governmental institutions and electoral campaigns. Discusses effect of media on individuals' opinions and behavior.

Prerequisite: POLS 1000.

POLS2490 - Topics In:

Credits: 1-3

Max Credit (Max. 6)

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

POLS3520 - Voting and Participation in America

Credits: 3

Examines the ways citizens participate in government, including campaigning, donating money, and voting. Topics include mobilization by parties and campaigns, social and demographic differences in participation, explanations of voting behavior, civic responsibility, and the role of participation in a democracy.

Prerequisite: POLS 1000.

POLS3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed COJO 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

POLS4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed INST 4330.

Dual Listed POLS 5330.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4420 - Seminar in Public Administration

Credits: 3

Max Credit (Max. 6)

Includes reading and research in selected public administration topics.

Dual Listed POLS 5420.

Prerequisite: POLS 1000 and consent of instructor.

POLS4430 - United States Presidency

Credits: 3

Analyzes office of president, its roles, development, relationships with other governmental agencies and problems in the contemporary world.

Dual Listed POLS 5430.

Prerequisite: POLS 1000.

POLS4435 - Presidential Elections

Credits: 3

Examines the process of electing the U. S. president. Topics include the roles of presidential primaries, caucuses, and conventions; campaign strategies; media coverage; citizen participation; the electoral college; and reforms.

Dual Listed POLS 5435.

Prerequisite: POLS 1000.

POLS4520 - Public Opinion

Credits: 3

Deals with natures of a public in democracy and means of forming and manipulating public opinion. Emphasizes role of public opinion as essential ingredient of the policy-making process in popular government.

Dual Listed POLS 5520.

Prerequisite: POLS 1000.

POLS4530 - U.S. Congress

Credits: 3

Analyzes aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Dual Listed POLS 5530.

Prerequisite: POLS 1000.

POLS4550 - Internship in Government

Credits: 1-6

Integrates practical political experience with academic knowledge. Students are expected to participate in specifically assigned duties and observe broader activities of the sponsoring organization; then, reflect upon this participation and observation in the form of written assignments. Internship credit can be earned for work in political campaigns, Wyoming Legislature or government services.

Prerequisite: 9 hours of political science.

POLS4560 - Washington Semester Program

Credits: 15

Provides students with paid internships in Washington, D. C. , in either congressional offices or federal agencies. Selection into the program is very competitive and is made the semester prior to service.

Prerequisite: POLS 1000 and 6 additional hours of political science courses.

POLS4710 - Topics in

Credits: 1-3

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000 and 3 additional hours of political science.

POLS4720 - Workshop in Practical Politics

Credits: 1-3

Familiarizes or strengthens participants in techniques of political effectiveness. Includes political organization, campaigning and persuasion. Guest speakers include public officials and experts in the field of practical politics.

Prerequisite: 9 hours of political science.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

POLS4850 - Seminar in American Politics and Institutions

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected U. S. government and politics problems.

Dual Listed POLS 5850.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 9 hours of political science including POLS 1000 and consent of instructor.

American Studies Minor

Students may minor in American Studies through a program of 24 credit hours of study, with credit hours evenly distributed between lower and upper division courses, which include at least 3 courses in American Studies (with the AMST course prefix), at any level (except AMST 1101), in consultation with and depending on approval by a faculty advisor in American Studies. Coursework for the minor may be matched with a student's major requirements in related disciplines and fields.

Anthropology Minor

Students will gain introductory training in at least two of the subfields of Anthropology combined with three or four upper division courses.

Introductory Courses

The minor for non-anthropology majors requires two of the introductory courses:

ANTH1100 - Introduction to Biological Anthropology

Credits: 4

Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ANTH1300 - Introduction to Archaeology

Credits: 3

Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5PN

A&S College Core 2015 ASG

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L

USP 2015 Code U5C2

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

Electives

- 11-12 hours of electives from 2000, 3000, or 4000-level anthropology courses with no more than 3 hours at the 2000-level.

Art History Minor

The Art History Minor introduces students to the discipline of Art History in a 21 credit hour sequence.

Art History Sequence: 6 Hours

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Lower Division Requirement: 3 Hours

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.
USP 2003-2014 Code U3CH

OR

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

Other Traditions: 3 Hours

Including but not limited to Art & Architecture of Medieval Islam, Japanese Art History, Meso-American Art History

ART3720 - Art and Architecture of Medieval Islam

Credits: 3

Studies the art and architecture produced by Islamic societies from the time of the Prophet Mohammed to the time of the Crusades (7th-14th centuries CE), and the geographic scope surrounds the Mediterranean Sea, including the Near Middle East, northern Africa, and Spain.

Former Course Number [2720]

Prerequisite: USP WA and WB courses.

Art History Electives at the 3000/4000-level: 9 Hours

Art History Electives at the 3000/4000-level (including additional Other Traditions) Credits: 9

Total Credits: 21 Hours

Asian Studies Minor

The Asian Studies Minor offers students the opportunity to engage in an interdisciplinary program of study of an Asian region or a single country. The program emphasizes a social science approach to the study of Asian history, politics, society, and culture with options to include foreign language and study abroad components towards completion of the Minor. For the purposes of this minor, Asia is defined first and foremost as a geographic entity to include Western,

Northern, Central, South and East Asian areas. Thus, for example, countries such as modern Turkey and areas such as the 'Middle East' can rightly be included in 'Asia' alongside areas more traditionally understood as part of Asia such as China and India.

Course Requirements (18 Credits)

If your primary major is in the College of Arts and Sciences, at least twelve (12) credit hours must be exclusive to the minor and not counted towards fulfilling major requirements. To count towards the minor, all courses must be completed with a grade of 'C' or better.

Gateway Course (3 Credit Hours)

All Asian Studies Minor students must complete one of two required Gateway courses depending on their primary area of interest within Asia.

INST2230 - Introduction to Asian Studies

Credits: 3

Asia, the world's largest continent, is home to virtually half of humanity and a broad spectrum of peoples, languages, religions, and cultures. This course introduces the cultural, political, economic, and environmental landscapes of this diverse region.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

OR

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post-World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

Asian Studies Area Courses (15 Credit Hours)

Asian Studies Minor students must complete a minimum of fifteen (15) additional credit hours from the following list of approved Asian Studies Area Courses. A minimum of nine (9) of these credit hours must be taken at the upper-division (3000+) level. In addition to the approved courses on this list, topics courses, Honors courses, or other special course offerings may count towards fulfilling Asian Studies Area Course requirements based on the approval of the student's designated minor advisor. Students are strongly encouraged to review the International Studies Newsletter each semester to see what Asian Studies Area courses are currently being offered.

Approved Asian Studies Area Courses

- ART 2720 - Introduction to the Art and Culture of Islam

ART4650 - International Study of Art

Credits: 3

Students will respond creatively to the historical, cultural and aesthetic experience in the country of travel and will use journaling, drawing, and collection of visual material to continue a more in-depth response upon return. Course sections will vary regarding structure/context. All sections will include studio and/or art historical curriculum.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: ART 4635.

CHIN1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

CHIN2041 - Contemporary and Traditional Chinese Culture

Credits: 3

Designed to provide those with a serious interest in China and Chinese language with a cultural context for learning Chinese language. Incorporates economic and social material to give students a clear view of Chinese culture with an emphasis on Chinese language instruction.

Prerequisite: CHIN 2030.

CHIN3160 - See Movies, Touch China

Credits: 3

This course combines exploration of classical and contemporary Chinese cultures through prominent Chinese films. The audio-video materials selected will be discussed in their historical context. Students will explore the transformations China has undergone, and will seek to understand the Chinese mindset.

USP 2003-2014 Code [(none)< >H]

Prerequisite: COM1.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

OR

RELI2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

Cross Listed HIST 2320.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

A&S College Core 2015 ASG

HIST2470 - Civilization of India

Credits: 3-4

Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

- HIST 3210 - The Islamic World in the Premodern Era

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

GWST4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and RELI 4335.

Dual Listed GWST 5335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

- HIST 4520 - Modern Far East: China, Japan and India

INST2230 - Introduction to Asian Studies

Credits: 3

Asia, the world's largest continent, is home to virtually half of humanity and a broad spectrum of peoples, languages, religions, and cultures. This course introduces the cultural, political, economic, and environmental landscapes of this diverse region.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

INST3100 - Chinese Society

Credits: 3

Reviews origins and consequences of Chinese revolution in comparative and cultural perspectives. Discusses influence of historical traditions and social structure on individual lives and behavioral patterns.

Cross Listed SOC 3100.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000.

OR

SOC3100 - Chinese Society

Credits: 3

Reviews origins and consequences of Chinese revolution in comparative and cultural perspectives. Discusses influence of historical traditions and social structure on individual lives and behavioral patterns.

Cross Listed INST 3100.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000.

INST3400 - Politics and Society of Turkey

Credits: 3

Examines the history of Turkey with an emphasis on its relationship with the Western world. Major topics include the Ottoman Empire; Ataturk and the founding of the Republic of Turkey; Turkey's role in the Cold War, Kurdish and other minority populations; the changing Turkish political landscape, the evolution of Islamist politics; and recent relations with the United States and European Union.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: INST 1200/POLS 1200 or POLS 1250 and INST 2310/POLS 2310 or permission of instructor.

INST4200 - China and Globalization

Credits: 3

The economic reforms in China have been political, cultural, and above all, global processes. Understanding these processes of economic reform tells us much about the role of government, culture, and globalization in the transition from socialism to capitalism, as well as about China's future role in the world.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/INST 1250 or HIST 2041 or SOC 3100.

INST4250 - East Asia Society and Economy

Credits: 3

Designed to explore key issues to the historical development of Asian countries from both comparative and international political economy perspectives. Distinctive political, social, and economic characteristics of these nations will be analyzed.

Dual Listed INST 5250.

USP 2003-2014 Code U3G

INST4560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed GEOG 4560.

Dual Listed Dual listed with INST 5560.

USP 2015 Code U5H

Prerequisite: 9 hours of international studies or geography.

INST4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the 'lens' of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed MKT 4590.

Dual Listed INST 5590.

Prerequisite: advanced business standing.

OR

LANG2150 - Manga: History and Culture

Credits: 3

Manga is one of the most important art forms to emerge from Japan. Its importance as a medium of visual culture and storytelling cannot be denied. Through reading and examination of texts, students will understand the relevance of comics in Japanese society.

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Prerequisite: COM1.

LANG3105 - Major Themes in Chinese and Japanese Literature

Credits: 3

Explores mindsets of two rich and ancient civilizations, China and Japan. Considers distinctive characters of each civilization, while illuminating basic elements that we share with these peoples.

Prerequisite: ENGL 1010.

LANG3140 - Anime: History and Culture

Credits: 3

An introduction to the history, development, and cultural significance of Japanese animation. Through the examination of a variety of anime genres, students will gain insight into contemporary Japan as well as important historical periods. We will read analyses of particular anime, emphasizing the unique characteristics of the art and the mystery of its popularity in the US.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Prerequisite: completion of WA.

LANG4800 - Advanced Instruction In: (TOPIC)

Credits: 1-3

Max Credit (Max. 12)

Advanced study and projects designed to meet special needs and interests of students, to be selected in consultation with a suitable member of the faculty.

Prerequisite: consent of instructor.

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post-World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS4230 - Governments and Politics of Asia

Credits: 3

Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 5230.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

RELI2040 - Religions of the Middle East: Judaism, Christianity and Islam

Credits: 3

Analyzes origins and early years of three major religions that arose in the Middle East: Judaism, Christianity and Islam. Looks at historical development, political and cultural context, and structure of each religion.

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

RELI2050 - Religions of Asia

Credits: 3

Introduces students to the religions of Asia. Primary focus on Hinduism and Buddhism, but also addresses several smaller religions. Emphasis on beliefs, sacred texts and tales, practices, ethics and worship, as well as historical development and contemporary issues.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

RELI2315 - History of Non-Western Religions

Credits: 3

Max Credit 9

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed HIST 2315.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

RELI3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed PHIL 3320.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

OR

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

RELI3340 - Mysticism, Yoga, and Enlightenment in the East

Credits: 3

Explores Hindu and Buddhist concepts of enlightenment and the means for reaching them through mysticism and yoga. Study the texts and beliefs and their translation into practice.

Prerequisite: WB and CH.

- RELI 3344 - Gods, Avatars, Heroes, and Mystics
- SOC 3050 - Japanese Society

Optional Asian Study Abroad Component

Asian Studies Minor students are also strongly encouraged to participate in a relevant study abroad program in the region of Asia to supplement their coursework at UW. Accordingly, up to six (6) hours of relevant study abroad credit may be counted towards fulfillment of the Asian Studies Area Course requirement on the approval of the student's designated minor advisor. Optional Asian Foreign Language Component Asian Studies Minor students are also strongly encouraged to learn an Asian foreign language as part of their progression towards completion of the Minor. Accordingly, up to eight (8) lower-division (1000-2000) credit hours of an Asian foreign language may be counted towards fulfillment of the Asian Studies Area Course requirement. 'Asian' languages at UW include Japanese, Chinese and Arabic. However, Asian Studies Minor, students need not necessarily be limited to the three languages currently taught at UW. On the approval of the student's designated minor advisor these optional language credit hours may be fulfilled by other Asian language instruction at UW, other relevant in-country summer intensive programs, or language-focused study abroad programs.

Astronomy Minor

Complete

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR2320 - General Astronomy II

Credits: 4

Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

Additional Requirements

Students minoring in Astronomy gain exposure to the principles of astronomy, physics, and mathematics. They learn to think critically and evaluate, interpret, and solve problems related to astronomical, as well as other technical and general scientific topics

Biology, Minor

Students may combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the minor.

Biology minor - additional information

Students who are majoring in Biology may not declare a Minor in Biology. Elective credit hours used towards the BIOL minor must be in courses not being counted towards a student's major. A grade of "C" or better is required in all courses. At least 25% of credit hours for the BIOL minor must be earned in upper division courses.

Credit in other courses with different prefixes in the biological sciences area may be applied to the minor in Biology at the discretion of a student's minor advisor.

Required Courses:

(12 credit hours)

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Select Two of the Following:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

(or MOLB 2021 crosslisted)

Elective Courses:

(9-12 credit hours)

Select one different course from each of three of the following subject areas. One of the three courses must have a laboratory component.

Molecular/Genetics/Cell Biology:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

- ZOO 4425

Morphology/Physiology:

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes.

Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

Evolution:

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

Ecology:

- LIFE 3400

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

MOLB4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MICR 4540 or SOIL 4540.

Dual Listed MOLB 5540 or SOIL 5540 or ECOL 5540.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

Botany, Minor

The Botany minor provides foundational coursework in botany as well as other supporting areas of physical and life sciences and mathematics

Required Courses Credits: 11-12 Hours

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

OR

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

OR

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

Elective Courses Credits: 7 Hours (Minimum)

(minimum 7 credit hours).

Choose from the following:

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

- BOT 3150
- BOT 4111
- BOT 4130
- BOT 4330

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

Total Credits for Botany Minor: 18 Hours

Ceramics Minor

The Ceramics Minor introduces students to the discipline of Ceramics in a 24 credit hour sequence.

Required Courses: 9 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

OR

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

Studio Elective Courses in Ceramics: 12 Hours

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

ART3410 - Ceramics III/I

Credits: 3

Studies development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning class. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420 and consent of instructor based on portfolio review.

ART3420 - Ceramics III/II

Credits: 3

A second semester continuation of the development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning classes. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420, and consent of instructor based on portfolio review.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Chinese Minor

A Minor in Chinese consists of a minimum of 18 credit hours, including successful completion of 10 credit hours of Chinese language and culture courses at and above CHIN2040 on campus and 9 credit hours of an intensive summer study in China.

Prerequisites

Completion of:

CHIN1010 - First Year Chinese I

Credits: 4

Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP 2015 Code U5H

CHIN1020 - First Year Chinese II

Credits: 4

Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP 2015 Code U5H

Prerequisite: CHIN 1010 or equivalent.

CHIN2030 - Second Year Chinese I

Credits: 4

Grammar, composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 1020 or equivalent.

Requirements

CHIN2040 - Second Year Chinese II

Credits: 4

Further studies in grammar composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 2030 or CHIN equivalent.

CHIN3055 - Business Chinese

Credits: 3

Comprehensive course on business language skills. For students with proficiency in Mandarin at the Intermediate Mid

level or higher. Focus is on language functions for the workplace. Productive skills, both spoken and written, will include the composition of extended frequently-used business documents

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: CHIN 3050 or equivalent.

CHIN3160 - See Movies, Touch China

Credits: 3

This course combines exploration of classical and contemporary Chinese cultures through prominent Chinese films. The audio-video materials selected will be discussed in their historical context. Students will explore the transformations China has undergone, and will seek to understand the Chinese mindset.

USP 2003-2014 Code [(none)< >H]

Prerequisite: COM1.

Or

CHIN4070 - Business Chinese II

Credits: 3

Apply previously acquired skills in complex Chinese language and business topics to the thorough analysis of case studies in Chinese business scenarios. Students will be able to read, discuss, and reach conclusions based on case studies of international companies in China and Chinese companies in international markets.

Prerequisite: CHIN 3055.

Study Abroad

Summer Study in China is required for completion of 9 credit hours of coursework:

CHIN2041 - Contemporary and Traditional Chinese Culture

Credits: 3

Designed to provide those with a serious interest in China and Chinese language with a cultural context for learning Chinese language. Incorporates economic and social material to give students a clear view of Chinese culture with an emphasis on Chinese language instruction.

Prerequisite: CHIN 2030.

CHIN3050 - Intermediate Composition and Conversation

Credits: 3

Develop abilities to read and write complex Chinese texts with an intermediate level of understanding, including texts in both conversational and narrative styles. Reading and writing skills will build considerably on the skills learned in two years of university study in Chinese language.

Prerequisite: CHIN 2040 or equivalent.

CHIN3065 - Intermediate Composition and Conversation II

Credits: 3

Students will not only understand and construct complex speech and writing but will gain the ability to do so effectively to persuade, discuss and communicate accurately with native Chinese speakers. Students will be able to relate topics such as personal experience, daily routine, reports, opinions and judgment in well-written Chinese paragraphs.

Prerequisite: CHIN 3050 or equivalent.

Total: 19 Hours

Note: Study abroad is required for completion of 12 credit hours of coursework for this minor.

Classical Civilizations Minor

As a Classical Civilizations Minor, you will develop an interdisciplinary understanding of Classical Greek and Roman material, intellectual, and cultural traditions that have helped shape western systems and values.

Requirements

CLAS2020 - Classical Greek Civilization

Credits: 3

Examines some of the most important developments of ancient Greek culture. Includes development of government in the city-states, with particular attention to Athenian democracy; tragedies of Aeschylus, Sophocles and Euripides; comedies of Aristophanes; crisis of values of the Peloponnesian War; and philosophy of Plato.

USP 2003-2014 Code U3C, U3WB

USP 2015 Code U5H

Prerequisite: WA or COM1.

OR

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

CLAS2040 - Classical Roman Civilization

Credits: 3

Examines some of the most interesting political, legal, artistic, literary, and engineering developments of the Republic and Principate (510 BC-AD 212) These include representational government, citizens' rights, sanctioned violence,

Rome's infrastructure, and major literary works of oratory, comedy, history, epic, and philosophy.

USP 2003-2014 Code U3CH, U3WB

Prerequisite: WA or COM1.

OR

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

Electives

12 hours chosen from Classics 3000-level or above; PHIL 3120, PHIL 4020, or PHIL 4030:

CLAS3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed HIST 3050/POLS 3050.

Prerequisite: WB or COM2.

CLAS3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed HIST 3160/PHIL 3160.

Prerequisite: WB or COM2.

CLAS4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed ENGL 4230/THEA 4230.

Prerequisite: WB or COM2.

CLAS4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed ENGL 4270.

Prerequisite: WB or COM2.

CLAS4975 - Independent Study

Credits: 1-4

Max Credit (max. 12)

Specialized study in aspects of Greek or Roman civilization of interest to the student, with topic and plan of work to be worked out by the student and the instructor together.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of instructor.

CLAS4990 - Topics in Classical Civilization

Credits: 1-4

Max Credit (max. 12)

Study in depth of special areas in ancient civilization that are not covered in regularly offered courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of the instructor.

PHIL3120 - Ancient Greek Philosophy

Credits: 3

Surveying some of ancient Greek philosophy. Begins with the works of the earliest extant philosophical thinkers, the pre-Socratics. Remainder of focus on Plato and Aristotle.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL4020 - Plato

Credits: 3

Detailed examination of selected dialogues of Plato.

Dual Listed PHIL 5020.

Prerequisite: PHIL 3120.

PHIL4030 - Aristotle

Credits: 3

Detailed examination of selected works of Aristotle.

Dual Listed PHIL 5030.

Prerequisite: PHIL 3120.

Other courses about ancient Mediterranean cultures that are not taught under Classics may be submitted for approval to the Classics section head.

Up to 6 hours of Latin at the 3000-level or above may be counted as electives:

LATN3110 - Vergil, The Aeneid I

Credits: 3

Reading portions of the Aeneid and consideration of its literary interpretation.

Former Course Number [2110]

Prerequisite: LATN 2030 or equivalent.

LATN3120 - Vergil, The Aeneid II

Credits: 3

Reading further portions of the Aeneid and consideration of its literary interpretation.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [2120]

Prerequisite: LATN 3110.

LATN3140 - Caesar

Credits: 2

Acquaints students with war-memoir genre of Latin literature.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3150 - Livy

Credits: 3

Reading portions of Livy's historical works, and consideration of the history he covers and how the Romans viewed their past.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3160 - Ovid

Credits: 2

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3990 - Independent Study

Credits: 1-4

Books or texts of special interest to the student, selected in conjunction with the instructor; independent reading and reports.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4110 - Horace

Credits: 3

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4115 - Latin Philosophers

Credits: 3

An introduction to Latin philosophical traditions. Readings will be selected either from one author, such as Lucretius (ca. 99-55 BCE) or Seneca the Younger (ca. 4 BCE-65 CE), or from different authors about a given theme.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

Total: 18 Hours

Communication Minor

Required: 12 Hours

COMM1040 - Intro to Communication Theory

Credits: 3

Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2015 Code U5H

Former Course Number COJO 1040

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

Electives: 6 Hours

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3520 - Communication Technology and Society

Credits: 3

Studies role of communication technology in functioning of society. Examines history of effects on personal growth, self-concept, world view, creative thinking, personal relationships and social processes.

Prerequisite: COMM 1000 or COMM 1040.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO3900 - Family Communication

Credits: 3

This course will assist students in a study of the concept of family from a communication perspective. The goals of the course include:

Prerequisite: COMM 1040.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4030 - Advanced Interpersonal Communication

Credits: 3

Studies research and theory in interpersonal relationships; formation and maintenance of friendships; marriages; and group relationships.

Prerequisite: COMM 1040 and 6 hours in the department.

COJO4050 - Communication and Conflict

Credits: 3

Studies research and theory concerning communication in conflict development and management. Examines forms of conflict, including occurrences in interpersonal, group, organizational and cultural contexts.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

USP 2015 Code U5C3

Prerequisite: COMM 1040 and junior standing.

COJO4140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the area of nonverbal communication. Students are required to complete an independent study of some aspect of nonverbal communication relevant to interests.

Dual Listed COJO 5140.

Prerequisite: junior standing.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

COJO4620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 5620.

Prerequisite: COMM 1000 or COJO 1400.

COJO4640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 5640.

Prerequisite: COMM 1000 or COMM 1040.

COJO4210 - Special Topics in Communication

Credits: 1-3

Intensive study of such special problems and topics in human communication processes as gender relations, power dynamics, family and political communication. Content varies.

Dual Listed COJO 5210.

Prerequisite: COMM 1040 and 9 hours in the department.

Total: 18 Hours

Creative Writing Minor

The Creative Writing Minor teaches the fundamentals of creating original work while providing opportunities for the exploration of blended genres and interdisciplinary work. A minor in Creative Writing complements majors from a wide array of departments and colleges.

Creative Writing Minor

Minor in Creative Writing. The creative writing minor consists of six courses (18 hours) in creative writing and literature. Four of these courses will be in creative writing (12 hours) and must adhere to the following sequence: CW 1040 Intro to Creative Writing, two Lower Division Creative Writing courses (at the 2000-level), and an Upper Division course (4050). In addition, two courses will be in literature (6 hours). All courses must be completed with grades of C or better.

This minor is intended to be used with any major and must be designed in conjunction with a creative writing advisor. Each course must be passed with a grade of C or better.

Criminal Justice Minor

A minor in criminal justice requires 18 semester hours in criminal justice. All courses must be completed with a grade of C or better.

Required Courses

CRMJ1001 - Introduction to Criminal Justice

Credits: 3

Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3

Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.

Prerequisite: SOC 1000.

OR

SOC2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed CRMJ 2400.

Former Course Number [3300]

Prerequisite: SOC 1000.

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3350 - Correctional Theory and Practice

Credits: 3

Examines the various components of the correctional complex from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3490 - Issues in Policing

Credits: 3

Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

Dance Minor

Required Courses

THEA1021 - Academic and Professional Issues in Dance

Credits: 1

Introduces freshman to the discipline of dance and academic study at the University of Wyoming. Key intellectual and literacy concepts will be introduced, including, but not limited to: critical thinking and analysis, knowledge of the discipline, career options, diversity of the discipline, university and region.

USP 2003-2014 Code U3I,U3L

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the areas(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA2200 - Backgrounds of Dance

Credits: 3

Surveys ethnic and theatrical dance forms from primal society to 20th century. Examines the place of the arts as a reflection of the culture.

USP 2003-2014 Code U3CA,U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

THEA4250 - Beginning Dance Composition

Credits: 2

Presents and criticizes movement studies based on various approaches to composition. Explores experimentation in choreography.

Prerequisite: THEA 2420, THEA 2440.

Ballet Technique: 5-6 Credit Hours

Four (4) Consecutive Classes in Ballet Technique.* Choose From:

THEA1410 - Beginning Ballet I

Credits: 1

Introduces principles and practices of classical ballet technique.

USP 2015 Code U5H

Prerequisite: THEA 1410 or instructor permission.

THEA1420 - Beginning Ballet II

Credits: 1

Continues studies in classical ballet technique. Instructor permission required.

USP 2015 Code U5H

Prerequisite: THEA 1410.

THEA2410 - Intermediate Ballet I

Credits: 1.5

Max Credit (Max. 3)

A first year, first semester ballet technique class for dance majors and minors. This course focuses on expanding the dancer's understanding and knowledge of technique, vocabulary, and principles of classical ballet.

USP 2015 Code U5H

Prerequisite: Admission by permission only.

THEA2430 - Intermediate Modern I

Credits: 1.5

Max Credit (Max. 3)

A first year, first semester, modern dance technique class for dance majors and minors. Knowledge of basic vocabulary and principles will be augmented with an understanding of historical techniques and their application to contemporary dance. Class meets three times per week.

USP 2015 Code U5H

Prerequisite: Limited to dance majors and minors; admission by permission only.

THEA3410 - Adv/Intermediate Ballet I

Credits: 1.5

Max Credit (Max. 3)

A second year, first semester ballet technique class for dance majors and minors. Emphasis is placed on improving technical skills and learning more advanced steps. Includes research into one discipline of ballet.

Prerequisite: successful completion of THEA 2440 and admission by permission only. Limited to dance majors and minors.

THEA3420 - Adv/Intermediate Ballet II

Credits: 1.5
Max Credit (Max. 3).

Second semester, second year ballet technique class for dance majors and minors. Emphasizes broadening the dancer's movement vocabulary while refining acquired technical skills. Dancers begin work in study of Baroque dance terms.

Prerequisite: successful completion of THEA 3410 or equivalent required. Limited to dance majors and minors; admission by permission only.

THEA4010 - Advanced Ballet

Credits: 1-3
Max Credit (Max. 8)

A continuing course in the principles and techniques of classical ballet. Emphasis is placed on continuing to broaden the dancer's movement vocabulary while refining acquired technical skills.

Prerequisite: THEA 3420. Limited to dance majors and minors; admission by permission only.

Modern Technique: 5-6 Credit Hours

Four (4) Consecutive Classes in Modern Technique.* Choose from:

THEA1430 - Beginning Modern I

Credits: 1
Introduces principles and techniques of modern dance.

USP 2015 Code U5H

THEA1440 - Beginning Modern II

Credits: 1
Continues studies in modern dance techniques.

USP 2015 Code U5H

Prerequisite: Prerequisite THEA 1430 or instructor permission.

THEA2430 - Intermediate Modern I

Credits: 1.5
Max Credit (Max. 3)

A first year, first semester, modern dance technique class for dance majors and minors. Knowledge of basic vocabulary and principles will be augmented with an understanding of historical techniques and their application to contemporary

dance. Class meets three times per week.

USP 2015 Code U5H

Prerequisite: Limited to dance majors and minors; admission by permission only.

THEA2440 - Intermediate Modern II

Credits: 1.5

Max Credit (Max. 3)

A first year, second semester modern dance technique class for dance majors and minors. Mastering vocabulary and principles will be augmented with a deeper understanding of historical techniques and their application to contemporary dance.

USP 2015 Code U5H

Prerequisite: THEA 2430. Limited to dance majors and minors; admission by permission only.

THEA3430 - Adv/Intermediate Modern I

Credits: 1.5

Max Credit (Max. 3)

A second year, first semester, intermediate level modern dance technique class for dance majors and minors. Continued training in classical modern dance and continued historical survey of modern dance will be augmented by rhythmic analysis and compositional forms.

Prerequisite: successful completion of THEA 2440 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA3440 - Adv/Intermediate Modern II

Credits: 1

A second year, second semester, modern dance technique class with continuing studies of sequential modern dance technique at the intermediate level, introduction of Laban effort/shape theory, compositional forms, improvisation and additional rhythmic analysis.

Prerequisite: THEA 3430 or its equivalent. Limited to dance majors and minors; admission by permission only.

THEA4030 - Advanced Modern Dance

Credits: 1-3

Max Credit (Max. 8)

This class will develop a professional dancer capable of working within diverse modern dance styles and techniques through the interweaving of classical and contemporary movement modalities along with an experiential anatomy approach.

Prerequisite: THEA 3440. Limited to dance majors and minors; admission by permission only.

Jazz or a Mix of Jazz and Tap Class: 2 Credit Hours

Two (2) Consecutive Classes in Jazz or a Mix of Jazz and Tap Classes.* Choose from: 2

THEA1450 - Beginning Tap Dance I

Credits: 1

Explores basic tap techniques and related principles of tap dance composition.

THEA1480 - Beginning Jazz Dance I

Credits: 1

Explores basic jazz dance techniques and related principles of jazz dance composition.

USP 2003-2014 Code H

THEA2450 - Intermediate Tap I

Credits: 1

Continued studies in techniques and principles of tap dance and tap dance composition.

Prerequisite: THEA 1450.

THEA2480 - Intermediate Jazz I

Credits: 1

Continued studies in techniques and principles of jazz dance and jazz dance composition.

USP 2015 Code U5H

Prerequisite: THEA 1480. Instructor permission required.

THEA3480 - Adv/Intermediate Jazz I

Credits: 1

Max Credit (Max. 2)

An intermediate jazz technique class. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation and incorporate them into class compositions.

Prerequisite: THEA 2480.

THEA3490 - Advanced Jazz I

Credits: 1
Max Credit (Max. 2)

An advanced class in jazz technique and performance. Students will learn varying styles of jazz dance, ranging from historical to contemporary, and will perform these for evaluation as well as incorporate them into class compositions.

Prerequisite: THEA 3480.

Elective at 3000-4000 level: 2-3 Credit Hours

Suggested:

THEA4010 - Advanced Ballet

Credits: 1-3
Max Credit (Max. 8)

A continuing course in the principles and techniques of classical ballet. Emphasis is placed on continuing to broaden the dancer's movement vocabulary while refining acquired technical skills.

Prerequisite: THEA 3420. Limited to dance majors and minors; admission by permission only.

THEA4030 - Advanced Modern Dance

Credits: 1-3
Max Credit (Max. 8)

This class will develop a professional dancer capable of working within diverse modern dance styles and techniques through the interweaving of classical and contemporary movement modalities along with an experiential anatomy approach.

Prerequisite: THEA 3440. Limited to dance majors and minors; admission by permission only.

THEA4001 - Historical Dance

Credits: 2
Max Credit (Max. 2)

Historical dance forms in the "Noble Style" dating from the 15th through 18th Centuries. Class work covers the relationship of musical forms to the specific step vocabulary and dances of each period, deportment, period costume as it relates to movement, social environment, period style with an emphasis on reconstruction of 17th and 18th Century dances from Feuillet notation.

Prerequisite: THEA 3440.
OR

THEA4200 - 20th Century Dance

Credits: 3

Intensely studies dance in 20th Century, emphasizing contemporary movement in modern, ballet, jazz and musical theatre dance. Examines social, political and aesthetic trends influencing dance theory and performance.

USP 2003-2014 Code U3CA,U3WC

USP 2015 Code U5C3

Prerequisite: THEA 2200.

Minor Total 17.5-22.5

Digital Media Minor

The Digital Media Minor introduces students to the discipline of Digital Media in a 25 credit hour sequence.

Required Courses: 22 Hours

ART 2110: Type 1: Thinking with Type - 3 credits

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice

with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful concepting, strategic wire frame development and creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.

ART3112 - Type: Type, Images, and Narrative

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)

Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.

OR

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 25 Hours

Drawing Minor

The Drawing Minor introduces students to the discipline of Drawing in a 21 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART3052 - Life Drawing I

Credits: 3

An advanced drawing course working from a life model with an emphasis on composition, monochromatic media, drawing techniques and the skeletal and muscular construction as related to action and proportion in the human figure. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000 and ART 2005.

Studio Elective Courses in Drawing: 6 Hours

*6 credits chosen from the following...

ART3005 - Drawing III

Credits: 3

An advanced drawing course applying the fundamentals of drawing to creative individual problems in figure, still life, and/or landscape composition. Structured yet open assignments, lectures and critiques develop formal, conceptual, expressive, and technical understanding. Course may be repeated for a maximum of 6 credit hours.

When Offered (Offered spring semester).

Prerequisite: ART 2000 and ART 2005.

ART4005 - Drawing IV

Credits: 3

An advanced drawing course exploring conceptual, expressive, personal and technical limits of process and media. Individually proposed projects lead to a coherent body of work. Open discussion and structured critiques develop personal and technical understanding. Repeatable for a maximum of 9 credit hours.

Prerequisite: ART 2000 and ART 3005.

ART4052 - Life Drawing II

Credits: 3

An advanced drawing course building upon figure construction fundamentals with heavy emphasis on composition, personal expression, wet and dry media, and color with pastels. Lectures, drawing sessions and critiques develop formal, conceptual, expressive and technical understanding. May be repeated for a maximum 9 credit hours.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3052

ART3250 - Watercolor Painting I

Credits: 3

Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety

of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

ART4250 - Watercolor Painting II

Credits: 3

Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

A&S College Core 2015 ASG

Prerequisite: ART 2000 and ART 3260.

ART4975 - Independent Study and Research

Credits: 1-3

Research options in all creative areas. Students work independently and provide demonstrated ability and background knowledge to carry out self-directed research or creative activity in the research area. Arrangements regarding curricular obligations and meeting times are made with the instructor in advance.

Prerequisite: ART 2000 and 12 hours of art in research area and prior consent of instructor.

Art History Survey Elective: 3 Hours

Choose one from

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 21 Hours

Environmental Values Minor

The minor in Environmental Values explores the vital link among the natural sciences, humanities, and the social sciences in grappling with environmental challenges.

Course Requirements

The minor in Environmental Values may be added to any bachelor's program at UW.

The minor requires a total of 18 credit hours, including at least one course within each of four areas of concentration. At least 12 of these credits must be outside the primary major, and nine of these credits must be at or above the 3000-level. A three-hour, core course (either Phil 2330 Environmental Ethics or Phil 2345 Natural Resource Ethics) is required of all students.

Core Course

A three-hour, core course is required of all students.

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

PHIL2345 - Natural Resource Ethics

Credits: 3

Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR 2345/RNEW 2345.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

Areas of Concentration:

(note: the courses listed below are provided as examples of the type of courses that meet the various areas of concentration. Other courses may be approved on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor.)

Aesthetics

Expressing ourselves through the performing, visual and literary arts:

GEOG4500 - The American Landscape

Credits: 3

This course trains students to interpret patterns and processes of contemporary landscapes of the Americas (North, Central, and South America) by viewing those landscapes historically. We investigate the relationship between landscape, politics, and economy, or, more generally, the relationship between landscape as a geographical form and cultural politics in the hemisphere. Students are introduced to research techniques and methodologies in historical geography.

Cross Listed Cross listed with GEOG 5500, INST 4500, INST 5500

Former Course Number [G&R 4500]

Prerequisite: 6 credits of international studies or social science coursework

THEA2400 - Vertical Dance I

Credits: 1

An introduction to vertical dance including safety issues, beginning rigging and performance.

Prerequisite: consent of instructors.

THEA3400 - Vertical Dance II

Credits: 1

A continuing course in vertical dance emphasizing the math and physics of the rigging; safety and design, choreography and research in the field.

Prerequisite: completion of THEA 2400 and consent of instructors.

Culture

Viewing human meaning and purpose in historical and contemporary terms:

NAIS3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the Plains region of the U. S. from prehistory to the present.

Cross Listed HIST 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL4480 - Regional Literature of the US: The West

Credits: 3

Encompasses major themes and writers in western American literature.

Prerequisite: 6 hours of 2000-level literature courses.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

Ethics

Considering right and wrong via critical and systematic thinking and doing:

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy.

Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

PHIL2345 - Natural Resource Ethics

Credits: 3

Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR 2345/RNEW 2345.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL4340 - Issues in Environmental Ethics

Credits: 3

Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.

Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

Policy

Exploring laws, regulations, and public discourse in American society:

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECE 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

NAIS4340 - Natural Resource Management on Western Reservations

Credits: 3

Examines natural resource management techniques on western reservations. Focus is on the management and planning of water, grazing, extractive industries, and forestry. Fieldwork on the Wind River Indian Reservation is included.

Cross Listed GEOG 4340.

Prerequisite: 6 hours of 2000-level NAIS courses.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

Ethics Minor

A minor in Ethics enhances and compliments any major, such as education, health sciences, law, business, engineering, computer science, political science, or communication.

Course Requirements

A minor in Ethics requires a minimum of 18 hours. One course from each of the three areas plus a capstone course.

A Student Takes One Course in Each of These Areas:

1. Ethical Theory

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

2. Applications

(determined on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor)

3. Scientific, Historical and Social Analysis

(determined on a course by course basis in consultation with the Philosophy Department Undergraduate Advisor)

Capstone Course

The capstone course is an independent study normally taken during a student's senior year. The course integrates the student's different areas of study in the ethics minor into a project or thesis. Any professor in any college can sponsor this independent study. Capstone topics must be approved by the ethics minor advisor. (determined in consultation with the Philosophy Department Undergraduate Advisor)

Electives

The other two courses are approved electives, (2 courses from Areas 1, 2 or 3 -- each from a different area).

European Studies Minor

The European Studies Minor offers students the opportunity to engage in an interdisciplinary program of study of a European region or a single country. The program emphasizes a social science approach to the study of modern European history, politics, society, and culture with options to include foreign language and study abroad components towards completion of the Minor. For the purposes of this minor, Europe is defined first and foremost as a geographic entity running from the Atlantic to the Urals and from Scandinavia to the Mediterranean and the Caucasus Mountains. Courses that transcend these boundaries should include the study of Europe in a prominent way to count toward the minor.

All required courses for the major must be passed with a grade of C or better. A course cannot simultaneously fulfill more than one major requirement.

Course Requirements (18 Hours)

If your primary major is in the College of Arts and Sciences, at least twelve (12) credit hours must be exclusive to the minor and not counted towards fulfilling major requirements. To count towards the minor, all courses must be completed with a grade of 'C' or better.

Gateway Course (3 Credit Hours)

All European Studies Minor students must complete one of two required Gateway courses, either:

INST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed HIST 2280.

USP 2015 Code U5C2

OR

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

European Studies Area Courses (15 Credit Hours)

European Studies Minor students must complete a minimum of fifteen (15) additional credit hours from the following list of approved European Studies Area Courses. A minimum of nine (9) of these credit hours must be taken at the upper-division (3000+) level. In addition to the approved courses on this list, topics courses, Honors courses, or other special course offerings may count towards fulfilling Area Course requirements based on the approval of the student's designated minor advisor. Students are strongly encouraged to review the International Studies Newsletter each semester to see what European Studies Area courses are currently being offered.

Approved European Studies Area Courses

- A&S 2200 - British Life and Culture

FREN2130 - Contemporary French Culture

Credits: 3

Designed as an introduction to contemporary French culture. It gives students an in-depth insight into contemporary French life. It also deals with issues affecting the French-speaking world in general: Quebec, Africa, New Caledonia, Switzerland, Monaco, etc.

USP 2015 Code U5H

Prerequisite: FREN 1020 or equivalent.

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

- FREN 4085 - Studies in French Culture

GERM3006 - 20th Century German Culture and Civilization

Credits: 3

Major political, ideological and cultural developments in Germany between 1871 and the present. An interdisciplinary approach (history, art history, film and literature) allows students to explore and assess a nation's culture and civilization as well as far-reaching events (WWI, WWII and the Holocaust) from various perspectives.

USP 2003-2014 Code U3CH, U3WC

Prerequisite: junior standing.

GERM3150 - German History and Culture

Credits: 3

Taught in English, this class engages students both theoretically and practically with German history and culture throughout the ages from the Middle Ages to today. Reading content is complemented with outings to culturally and historically significant sites in Germany as part of a summer study abroad program.

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WA or equivalent.

- GERM 4265 - Divided Nation: Politics and Culture in Germany 1945 - 1990

GERM4285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary Germany.

Dual Listed GERM 5285.

Prerequisite: WB.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

- HIST 4190 - Europe: 1930 - Present
- HIST 4195 - European Economic History

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

- HIST 4280 - France Since 1814

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

INST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed HIST 2280.

USP 2015 Code U5C2

INST4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed POLS 4330.

When Offered (Normally offered once a year)

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

POLS4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed INST 4330.

Dual Listed POLS 5330.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

- SOC 4330 - The World System

INST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed HIST 4380.

Dual Listed INST 5380.

Prerequisite: 9 hours of HIST or INST.

INST4881 - International Social Welfare and Social Development

Credits: 3

Examines the basic framework of social welfare analysis and social development programming in the international arena, employing a multinational comparative analysis approach to explore the wide array of responses to social need across the globe. Students employ multinational comparative analyses to an area of social concern.

Cross Listed SOWK 4881.

Dual Listed INST 5881.

Prerequisite: POLS 1000; ECON 1010 recommended.

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

POLS3220 - Government and Politics of Russia and FSU

Credits: 3

Examines the political, economic and identity transitions of Russia and other states of the former Soviet Union during the post-communist era. Explores how current challenges relate to past Soviet practices.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS4215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed INST 4215.

Dual Listed POLS 5215.

Former Course Number [4220]

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

- RELI 4150 - Christianity, Jews and Muslims in Iberia

SPAN3220 - Spanish-American Cultures in Context

Credits: 3

Introduction to the Spanish-speaking cultures of Latin America and the United States through a historical overview and a focus on contemporary politics and culture.

Prerequisite: SPAN 2040 or SPAN 2140 or consent of instructor.

Optional European Study Abroad Component

European Studies Minor students are also strongly encouraged to participate in a relevant study abroad program in the region of Europe to supplement their coursework at UW. Accordingly, up to six (6) hours of relevant study abroad credit may be counted towards fulfillment of the European Studies Area Course requirement on the approval of the student's designated minor advisor.

Optional European Foreign Language Component

European Studies Minor students are also strongly encouraged to learn an European foreign language (other than English) as part of their progression towards completion of the Minor. Accordingly, up to eight (8) lower division (1000-2000) credit hours of an European foreign language may be counted towards fulfillment of the European Studies Area Course requirement. 'European' languages at UW include French, German, and Spanish. However, European Studies Minor students need not necessarily be limited to the three languages currently taught at UW. On the approval of the student's designated minor advisor these optional language credit hours may be fulfilled by other European language instruction at UW, other relevant in-country summer intensive programs, or language-focused study abroad programs.

French Minor

As a French Minor, you will develop your speaking, listening, and communication skills as a French speaker. You will gain a better understanding of perspectives and experiences of French speaking cultures.

Requirements

FREN2040 - Second Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2015 Code U5H

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP 2003-2014 Code U3CH, U3G

Prerequisite: FREN 2030.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

Electives

- 9 hours chosen from French at the 3000 or 4000 level.
- Minors are encouraged to take one to two 4000 level courses with a traditional course load consisting of one 3000 level course and two 4000 level courses
- Elective courses include:

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

FREN3990 - Independent Study

Credits: 1-4

Books or periodicals of special interest to the student, selected in consultation with a member of the staff; independent reading and reports.

Prerequisite: FREN 2030.

FREN4080 - Studies in the French Language

Credits: 3

Max Credit (Max. 9)

The topics explored under this general heading include: translation, history of the French language, French of the media and conversation.

Dual Listed FREN 5080.

Prerequisite: FREN 3060.

FREN4100 - A Survey of French Literature I

Credits: 3

A study of French Literature and civilization from the Middle Ages through the 18th century.

Prerequisite: FREN 2140 or equivalent.

FREN4110 - A Survey of French Literature II

Credits: 3

A study of French Literature and civilization from the 19th century to the present.

Prerequisite: FREN 2140 or equivalent.

FREN4120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: epic, courtly poetry, Arthurian romance, theatre and the poetry of Villon.

Dual Listed FREN 5120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 5140.

USP 2003-2014 Code U3WC

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4200 - Introduction to Research

Credits: 3

Senior seminar on a topic varying from year to year.

USP 2015 Code U5C3

Prerequisite: COM2 (FREN 3050), Survey I and II courses (FREN 4100 and FREN 4110).

FREN4250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism focuses on novels of Flaubert and Zola, while the symbolist school of poetry is represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 5250.
Former Course Number [4150]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into four parts: pre-World War I, between the wars, post-World War II and the New Wave. These periods are represented by authors including Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 5260.
Former Course Number [4160]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature), to be selected according to interest and currency).

Dual Listed FREN 5350.
Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN4990 - Advanced Independent Study

Credits: 1-3

Special projects designed to meet the needs of individual students, designed in consultation with instructor.

Prerequisite: FREN 3050 and consent of instructor.

Total: 18 Hours

Gender and Women's Studies Graduate Minor

Provides advanced, interdisciplinary, intersectional training in feminist and gender theory and praxis. This minor offers crucial knowledge and skills to students pursuing a wide range of graduate degrees and professional paths.

Requirements

A total of 12 credit hours are required to complete the Graduate Minor in GWST. This includes the following:

GWST5710 - Feminist Theoretical Perspectives

Credits: 3

Intensive introduction to the epistemology and application of a wide range of trans-historical, trans-cultural, and trans-national feminist theories. Students will be asked to apply self-selected feminist theories to their own thesis work and graduate fields, as well as to current examples of sex, gender, gender performance, and gendered coding in American media.

Prerequisite: graduate standing.

- An additional 9 credit hours of GWST electives, including 6 credits at the 5000-level.
- When practical, students should include a GWST faculty member on their thesis, dissertation or Plan B committees. Students in professional programs without a culminating research project can meet this requirement through alternative means.

Additional Information

Contact the program director, Dr. Michelle Jarman (mjarman@uwyo.edu), to discuss individual plans of study.

Gender and Women's Studies Minor

Provides foundational knowledge in historical and contemporary issues related to sex, gender, and sexuality. Upon completion, students will be able to apply intersectional feminist and gender theories to interdisciplinary research and practice.

Requirements

Students must complete 18 hours of GWST course work. Nine of the required hours must be 3000-level or above. At least 15 credit hours must be completed with a grade of "C" or better.

Core Course: 3 Credits

Complete at least ONE of the following core courses.

Note: some of these courses have prerequisites, so taking a lower and upper level course from this list is recommended, but not required:

GWST1080 - Intro Gender & Women's Studies

Credits: 3

This course serves as an introduction to the field of Gender and Women's Studies. Students will examine a range of GWST topics, gain knowledge of gender, feminist, and intersectional theories, and learn to apply course concepts and frameworks to analyses of socio-political and representational issues, primarily in U.S. contexts.

Cross Listed ENGL 1080.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 3

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP 2003-2014 Code U3C, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

- GWST 3XXX Gender, Race, Sex & Soc Systems

Note: will be offered Spring 2023

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 12 hours of women's studies.

Note: If taken prior to Fall 2022, these courses may also satisfy this requirement: GWST 3710, Gender & Humanities; GWST 2500, Gender & Society; GWST 1900, Women & Leadership.

Electives: 15 credit hours

The additional 15 credit hours can be selected from the complete slate of GWST electives, including those listed above.

Note: a minimum of 12 credit hours in the minor must be exclusive of hours earned in the student's major.

Additional Information

Students in the GWST minor and major are encouraged to work with a faculty advisor to develop an individualized plan of study. Contact the program director, Dr. Michelle Jarman (mjarman@uwyo.edu), for more information.

Geology Minor

A minor in geology is intended for those students majoring in other programs who are interested in complementing their degree with a broader understanding of geology and the earth sciences.

Required Courses

Students are required to take 18 hours of coursework in the Department of Geology and Geophysics including one GEOL 1000-level course (3-4); one GEOL 2000-level course (3-4); **and fulfill the remaining credit hours (10-12) with GEOL 2000-level or higher courses in consultation with their adviser.** A grade of C or better is required in each of these courses.

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

OR another 1000-level GEOL course

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

OR another 2000-level GEOL course

AND fulfill remaining credits with 2000-level or higher GEOL courses in consultation with their adviser.

German Minor

As a German Minor, you will develop your speaking, listening, and communication skills as a German speaker. You will gain a better understanding of perspectives and experiences of German speaking cultures.

Requirements

GERM2040 - Second Year German II

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5H

Prerequisite: GERM 2030 or three years of high school German.

GERM3050 - Third Year German I

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: GERM 2040.

GERM3060 - Introduction to German Literature

Credits: 3

Introduces literature of Germany. Analyzes major literary types and elements of criticism. Emphasizes compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Prerequisite: GERM 3050.

Electives

- 9 hours chosen from German at the 3000 or 4000 level.

GERM3006 - 20th Century German Culture and Civilization

Credits: 3

Major political, ideological and cultural developments in Germany between 1871 and the present. An interdisciplinary approach (history, art history, film and literature) allows students to explore and assess a nation's culture and civilization as well as far-reaching events (WWI, WWII and the Holocaust) from various perspectives.

USP 2003-2014 Code U3CH, U3WC

Prerequisite: junior standing.

GERM3050 - Third Year German I

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: GERM 2040.

GERM3150 - German History and Culture

Credits: 3

Taught in English, this class engages students both theoretically and practically with German history and culture throughout the ages from the Middle Ages to today. Reading content is complemented with outings to culturally and

historically significant sites in Germany as part of a summer study abroad program.

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WA or equivalent.

GERM3990 - Independent Study

Credits: 1-4

Focuses on books or periodicals of special interest to the student selected in consultation with a staff member; independent reading and reports.

Prerequisite: GERM 2030.

GERM4070 - Fourth Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Dual Listed GERM 5070.

When Offered (Offered every other year)

Prerequisite: GERM 3060.

GERM4080 - German-English and English- German Translation

Credits: 3

Encompasses written translation exercises based on contemporary and relevant texts in both English and German. Addresses specific translation problems arising in both English and German, when translating into the other language.

When Offered (Offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: GERM 3050 and/or GERM 3060.

GERM4100 - A Survey of German Literature I

Credits: 3

Studies German literature and civilization from the Middle Ages to the 17th century.

Dual Listed GERM 5100.

Prerequisite: GERM 2140 or equivalent.

GERM4145 - Weimar Classicism

Credits: 3

Introduces student to Weimar Classicism, one of the crucial periods in German literature and culture. Explores the

foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works during this period. Primary language for instruction for this course is German.

Dual Listed GERM 5145.

Prerequisite: GERM 2140 or equivalent.

GERM4180 - German Poetry

Credits: 3

Surveys poetry from the Middle Ages to the present. Emphasizes poetry after 1600. Treats formal elements and genre categories.

Dual Listed GERM 5180.

Prerequisite: GERM 2140.

GERM4200 - Introduction to Research

Credits: 3

Max Credit 9

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2015 Code U5C3

Prerequisite: 12 hours of 4000-5000-level courses.

GERM4240 - German Literature of the Romantic Period

Credits: 3

Introduces the philosophical bases of German Romanticism and analyzes representative works of prose and poetry.

Dual Listed GERM 5240.

Prerequisite: GERM 2140 or equivalent.

GERM4255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of significant German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 5255.

Prerequisite: GERM 2140 or equivalent.

GERM4275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural production by artists identified with immigrant communities or communities of color. Topics examined include intersections of gender, race, nation, culture, and class; experiences of different minorities; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Course is taught in German.

Dual Listed GERM 5275.

Prerequisite: GERM 2140 or equivalent.

GERM4285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary Germany.

Dual Listed GERM 5285.

Prerequisite: WB.

GERM4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects designed to meet needs of individual students, designed in consultation with instructor.

Prerequisite: GERM 2140 and consent of instructor.

Total: 18 Hours

History Minor

Only 18 credit hours of classes to learn professional skills vital to any career. Critical thinking, effective written and oral communication, and multi-perspective analysis highlight History's benefits in whatever profession you pursue.

Requirements

The history minor requires at least 18 credit hours of History courses, 9 hours of which must be Upper-Division (3000 and 4000 level) courses. These courses must be taken for letter grades with a minimum earned grade of C. For assistance in tailoring the minor content, contact the Department of History.

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art; and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP 2015 Code U5FY

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

USP 2003-2014 Code U3VT

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester
USP 2003-2014 Code U3V
USP 2015 Code U5V

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

USP 2003-2014 Code U3VT

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V
USP 2015 Code U5V

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.

USP 2003-2014 Code [(none)< >H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3

Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

USP 2015 Code U5H

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3

Traces American religious history from the Civil War through WWII. Focuses on how race/ethnicity, class, gender, and national origin affected religion, and explores how Americans used religion in oppressing and liberating people; marking and erasing difference; and exporting values abroad as well as reforming society at home.

Cross Listed RELI 2252.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed INST 2280.
USP 2015 Code U5C2

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

HIST2315 - History of Non-Western Religions

Credits: 3

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed RELI 2315.
USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H
A&S College Core 2015 ASG

HIST2320 - History of Islam

Credits: 3

Focuses on the origins of Islam and its early formation, its growth and spread across the world, and its intellectual, spiritual and historical character. Time will also be spent on the formation of Islam in the modern world and how that impacts the views and actions of its members.

USP 2003-2014 Code U3CH, U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

HIST2360 - African-American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed AAST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5C2
A&S College Core 2015 ASD

HIST2370 - Chicano History: Origins to 1900

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2370/GEOG 2370.
USP 2003-2014 Code U3CS, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

HIST2380 - Latin American History 1500 to 2000

Credits: 3

Provides introduction to Latin American history, from colonial contacts to the present. Explores important themes and connections across the colonial and modern periods, such as race, national identity, foreign involvement, indigenous peoples' role in nation-states, religion, social movements, economic systems, and globalization.

USP 2003-2014 Code U3G
USP 2015 Code U5H

HIST2385 - Chicano History : 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed LTST 2385.

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

HIST2390 - US West Between the World Wars

Credits: 3

Examines two pivotal decades (1918-1942) in the US West that encompasses prosperity, Depression, and reform, through the use of historical documents, art, film, literature, and music.

HIST2460 - Traditional Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period to the 1800s. Topics include roles of China and Korea, the samurai warrior tradition, family structure, Buddhism and Shinto. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2461.

HIST2461 - Modern Japan

Credits: 3

Surveys Japan's social, intellectual, political, cultural, economic, technological and ethnohistory from the 1800s through the present. Topics include Japan's industrialization, Asian colonialism, post-WWII, and Japan as economic superpower. Provides background for other Asia-related courses and is part of a year-long series; see HIST 2460.

A&S College Core 2015 ASG

HIST2470 - Civilization of India

Credits: 3-4
Max Credit 4

Surveys Indian civilization from earliest times, including cultural aspects.

HIST2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed ECON 2500.

HIST2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed ANTH 2600.

USP 2015 Code U5H

HIST2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed ART 2700/AMST 2700/ANTH 2700.

USP 2003-2014 Code U3CH

HIST2705 - Museology II

Credits: 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes. Cross listed between Anthropology, History, American Studies, and Art.

Cross Listed AMST 2705 / ANTH 2705 / ART 2705

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research.

Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/POLS 3050.

Prerequisite: WB or COM2.

HIST3110 - Modern Germany

Credits: 3

A cultural, social, and political history of German-Speaking Europe from 1789 to the present.

Prerequisite: 6 hours of HIST or INST.

HIST3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed CLAS 3160/PHIL 3160.

Prerequisite: WB or COM2.

HIST3220 - History of the Modern Middle East

Credits: 3

Surveys the Middle East from 1700 to the present. Emphasizes the demise of the Ottoman Empire, the rise of domination by European colonial powers, transformations in political, social, religious and cultural life, the rise of nationalist movements, the influence of oil, the growth of Islamist political groups and the Israeli-Palestinian conflict.

Cross Listed RELI 3220.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: 6 hours of HIST, RELI, or INST.

HIST3230 - Early Christianity

Credits: 3

Considers the development of the Christian religion from a small Jewish sect to its place as the official religion of the Roman Empire and beyond. It examines the development of creeds, doctrines and institutions, placing them within their historical context.

Prerequisite: RELI 1000 or RELI 2225/HIST 2225.

HIST3235 - Medieval Christianity

Credits: 3

Traces the development of 'Christendom' in Europe between about 500 - 1500 CE, concentrating on the Latin West. It examines the growth of Christian institutions and practices, the Church's role as sole governing entity, along with conflicts with secular governments as they developed in later centuries.

Cross Listed RELI 3235.

Prerequisite: RELI 2225/HIST 2225, HIST 1110, or RELI 1000.

HIST3240 - Reformation and Enlightenment Christianity

Credits: 3

The years between about 1500 and 1800 saw the permanent dismantling of Christianity in the West as a unified force, as Protestantism brought new ways of viewing the relationship between God and humanity. Once the fragmentation began, it accelerated rapidly as Enlightenment thinking challenged Christianity in new and complex ways.

Cross Listed Cross listed with: RELI 3240.

Prerequisite: RELI 1000, RELI 2225/HIST 2225.

HIST3275 - World Christianities

Credits: 3

Examines the development of Christianity primarily in Africa, Asia and South America.

Cross Listed RELI 3275

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WB and CH

HIST3300 - Secret History of Science

Credits: 3

Explores developments in science from prehistory to the present. It focuses on the lesser-known men and women who contributed to science, as well as on seemingly superstitious beliefs that were nonetheless important to advances in knowledge.

Restricted Restricted to junior standing or higher.

Prerequisite: 6 hours in HIST or 6 hours of PN coursework, or a combination of both.

HIST3400 - Mongol Empire

Credits: 3

Examines the history of the Mongol Empire from a world history perspective. Major themes: structure of a nomadic empire, how that empire interacted with the various settled states it conquered and ramifications of the Mongol conquest on trade, technology, and social and intellectual developments across Eurasia, between the years 1200 to 1450 CE.

Prerequisite: 6 hours of HIST.

HIST3500 - Colonial America

Credits: 3

This course covers the history of European colonization from roughly 1492 to 1763. Our geographic focus will be on the (future) United States, but will also learn how transatlantic forces influenced its people.

Prerequisite: 12 hours of HIST courses or permission of instructor.

HIST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations

between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia, and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed AAST 3670.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/HIST 2360.

HIST3880 - Comparative History

Credits: 3

Explores comparative history from a variety of topics, such as colonialism, memory, nationalisms, frontiers, or cultural history. This course will introduce students to at least one of these themes from at least two regions, time periods, or groups of people to understand patterns and change in human societies through time.

Prerequisite: 6 hours of HIST.

HIST3900 - Historical Archaeology

Credits: 3

This course introduces students to the field of historical archaeology, the archaeological and archival study of literate societies. Students will be introduced to the history of the discipline, a survey of contemporary historical archaeological practice.

Cross Listed ANTH 3900

Former Course Number [none < > none]

Prerequisite: ANTH 1300

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000

Dual Listed HIST 5000

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West

from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP 2003-2014 Code U3CH, U3D

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

HIST4060 - Independent Study

Credits: 1-3

Max Credit 6

Credit not to exceed 6 hours maximum, to be arranged in either European or American history. Primarily for juniors and seniors who can profit from independent work with minimal supervision.

Prerequisite: 12 semester hours in history; written permission of instructor required.

HIST4077 - Book History: Topics

Credits: 3

Max Credit (Max. 6)

An in-depth, hands-on study of books within their historical contexts. The topic will vary each time and focus on a particular theme, time period, place, or culture. Taught at the Rare Books Library, American Heritage Center, using

original books or facsimiles. May be repeated once for credit.

Dual Listed HIST 5077.

Prerequisite: 9 hours of HIST.

HIST4100 - Early Medieval Europe

Credits: 3

Studies development of European civilization from decline of Rome to 12th century.

Dual Listed HIST 5100.

Prerequisite: 9 hours of HIST.

HIST4110 - The High Middle Ages

Credits: 3

Studies history of European civilization between the 12th and 15th centuries.

Dual Listed HIST 5110.

Prerequisite: 9 hours of HIST.

HIST4112 - History of the Medieval City

Credits: 3

After the fall of the Western Roman Empire, cities virtually disappeared from Western Europe. Around 1000 Europe began its rise to world prominence and cities contributed to that rise. Examines development of cities in medieval Europe and explores life within those cities.

Dual Listed HIST 5112.

Prerequisite: 9 hours of HIST.

HIST4113 - Medieval Religious Dissent

Credits: 3

Religious dissent in the Middle Ages included what some would call heresy, but also encompasses such marginal groups as Jews and witches. Examines development of orthodoxy and persecution of religious diversity between eleventh and 16th centuries within the historical context of the times.

Cross Listed RELI 4113.

Dual Listed HIST 5113.

Prerequisite: 9 hours of HIST or RELI.

HIST4120 - Europe During the Renaissance

Credits: 3

Intensely studies European history in 14th and 15th centuries.

Prerequisite: 9 hours of HIST.

HIST4130 - Europe During the Reformation

Credits: 3

Intensely studies European history in the 16th century.

Prerequisite: 9 hours of HIST.

HIST4140 - Europe During the Age of the Baroque

Credits: 3

Intensely studies European history in 17th century.

Prerequisite: 9 hours of HIST.

HIST4150 - Europe During the Age of the Enlightenment

Credits: 3

Intensely studies European history in 18th century.

Prerequisite: 9 hours of HIST.

HIST4170 - Europe in the Nineteenth Century

Credits: 3

An intensive study of European history from the beginning of the nineteenth century through to the origins of the First World War in 1914.

Dual Listed HIST 5170.

Prerequisite: HIST 1120.

HIST4174 - Judaism from Ezra to Jesus

Credits: 3

This course focuses on the religious and historical development of Judaism during the centuries between the end of the Old Testament and the New Testament, studying the arrival of Greek and then Roman culture and the changes Judaism underwent during that time that endure today.

Cross Listed RELI 4174.

Prerequisite: WB or COM2, and RELI 1000 or RELI 2110.

HIST4175 - Judaism at the Dawn of Christianity

Credits: 3

Judaism is the only Mediterranean religion that was practiced in the ancient world as well as in Late Antiquity and beyond. This course helps students analyze how Judaism was able to change and adapt at key moments to provide its adherents with an active, living religion that addressed their needs.

Cross Listed RELI 4175.

Prerequisite: RELI 1000 or RELI 2110, and junior standing.

HIST4180 - Europe in the 20th Century

Credits: 3

An intensive study of European history from 1914 through 2000.

Dual Listed HIST 5180.

Prerequisite: 9 hours of HIST.

HIST4270 - France: Old Regime and Revolution

Credits: 3

The social, political and cultural history of early modern France (1598-1789), from the rise of the Absolutist state under Louis XIV to the outbreak of the Revolution. Explores the cultural and intellectual shifts from court culture at Versailles, to the Enlightenment, to the rise of revolutionary ideologies.

Dual Listed HIST 5270.

Prerequisite: 9 hours of HIST.

HIST4290 - History of the Soviet Union

Credits: 3

Depicts Russia under Communism, including particularly the development of totalitarian dictatorship in its political, economic, social and cultural manifestations.

Dual Listed HIST 5290.

Prerequisite: 9 hours of HIST.

HIST4305 - Global History

Credits: 3

Thematically focused examinations of interactions or parallel phenomena in multiple world regions. Courses may be comparative (comparing two empires, or multiple revolutions), or may examine the growth of a particular trend globally (e.g. abolition of slavery), or the interaction of many states (e.g. the Cold War).

Dual Listed HIST 5305.

USP 2003-2014 Code U3G

Prerequisite: 9 hours of HIST, INST, or POLS.

HIST4310 - World War II in Europe

Credits: 3

Covers the origins, course and consequences of one of this century's defining global developments. World War II in Europe was a transnational development which shaped the world as it is known today.

Dual Listed HIST 5310.

Prerequisite: 9 hours of HIST.

HIST4315 - History, Politics and Memory of the Holocaust in Europe

Credits: 3

Offers students the opportunity to learn about the history of the Holocaust through travel to various sites in Central Europe where the events themselves occurred, such as Berlin, Warsaw, Krakow and Auschwitz-Birkenau.

Cross Listed INST 4315.

Dual Listed HIST 5315.

Prerequisite: 9 hours of HIST or INST.

HIST4320 - Memory and National Identity in Twentieth Century Europe

Credits: 3

Europe in the twentieth century saw a century of unprecedented violence. Examines the public representation of such historical trauma through the concept of "collective memory" and focuses in particular on how memory has become a contested part of defining identity in modern-day Europe.

Dual Listed HIST 5320.

Prerequisite: 9 hours of HIST.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4380 - International History of Human Rights

Credits: 3

Examine the modern history of human rights in the global system, with particular emphasis on developments since the Second World War. Topics include the philosophy of human rights ideas; the histories of rights and rights violations in various regions; and the resulting international responses.

Cross Listed INST 4380.

Dual Listed HIST 5380.

Prerequisite: 9 hours of HIST or INST.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

HIST4405 - American Encounters to 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African and Asian people from pre-contact through the mid-19th century.

Dual Listed HIST 5405.

USP 2003-2014 Code U3D

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4406 - American Encounters from 1850

Credits: 3

The history of America as a history of continuous encounters. Examines the history of the American people by focusing on a series of critical encounters between Native American, European, African, and Asian people from the mid-19th century to the present.

Dual Listed HIST 5406

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST.

HIST4410 - America in an Early Modern World

Credits: 3

Explores the American colonial experience as part of a worldwide process of colonial encounters with indigenous peoples between 1400 and 1800. Compares the experiences of early modern colonization in North and South America, Asia, and the Pacific and examines the nature of the colonial societies created by these cross-cultural relationships.

Dual Listed HIST 5410.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4415 - Entangled Worlds, Entangled Lives: Indigenous People and Colonizers Before 1850

Credits: 3

The experiences of indigenous people and colonizers in Africa, Eurasia, the Americas, and the Pacific as they forged new colonial societies in the first global age (1400-1850). Emphasis throughout the course will be on the often-overlooked role of indigenous people in creating colonial societies.

Dual Listed HIST 5415.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

Prerequisite: 9 hours of HIST.

HIST4425 - Britain's Global Empires: 1558 to the Present

Credits: 3

Britain's four distinctive empires from Elizabeth I through the present. Emphasis throughout the course will be on the creation and operation of these distinctive but related empires with a special focus on the impact empires had on both colonized people and the people of Britain.

Dual Listed HIST 5425.

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST.

HIST4450 - The Civil War and Reconstruction

Credits: 3

Studies crisis of the Union, 1861-1877. Examines experiences of both the North and South during the Civil War and restoration of the Union after the war.

Dual Listed HIST 5450.

Prerequisite: 9 hours of HIST.

HIST4460 - Post-Civil War America: The Gilded Age

Credits: 3

Intensively covers economic, cultural and political developments which marked the U.S. in post-Civil War era, such as rise of industry, emergence of distinctive national culture and party struggles shaping America's Gilded Age.

Dual Listed HIST 5460.

Prerequisite: 9 hours of HIST.

HIST4462 - American Indian History to 1783

Credits: 3

Surveys the history of American Indians from the period before contact to the end of the American Revolution. Examines the various contacts between American Indians and Europeans and considers what the American Revolution meant to the continent's Native peoples.

Cross Listed NAIS 4462.

Dual Listed HIST 5462.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or NAIS.

HIST4463 - American Indian History 1783 to 1890

Credits: 3

Surveys the history of American Indians during the era of westward expansion. Examines the impact of American westward movement and also the manifold changes that accompanied moving west.

Cross Listed NAIS 4463.

Dual Listed HIST 5463.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: 9 hours of HIST or NAIS.

HIST4464 - American Indians in the Twentieth Century

Credits: 3

Surveys the history of American Indians during the twentieth century. Examines the development of new cultural, social and political forms that help create an American Indian identity.

Cross Listed NAIS 4464.
Dual Listed HIST 5464.
USP 2003-2014 Code U3D
Prerequisite: 9 hours of HIST or NAIS.

HIST4466 - American Indian Ethnohistory

Credits: 3

Surveys ethnohistorical methods and concepts and provides students concrete opportunities to use these methodologies in writing exercises. American Indian ethnohistory explores Native American experiences within their own cultural contexts.

Cross Listed NAIS 4466.
USP 2003-2014 Code U3D
Prerequisite: 9 hours of HIST, NAIS, or ANTH.

HIST4468 - American Indians in the North American West

Credits: 3

One of the defining features of the North American West is the presence of American Indians. Through the discussion of varied readings and primary document research, the history of American Indians in the West is examined, with particular emphasis on the Great Plains and California.

Cross Listed NAIS 4468.
USP 2003-2014 Code U3D
Prerequisite: 9 hours of HIST or NAIS.

HIST4470 - The Birth of Modern America, 1890 to 1929

Credits: 3

Studies political and diplomatic developments in the U. S. in the wake of industrialization and massive immigration. Some attention to cultural and social themes. Emphasizes shifting nature of reform between depression of the 1890s and that of the 1930s.

Dual Listed HIST 5470.
Prerequisite: 9 hours of HIST.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.
Former Course Number [4670]

Prerequisite: 9 hours of HIST.

HIST4480 - Growth of Modern America, 1929 to 1960

Credits: 3

Studies political and diplomatic developments in the U.S. in Depression, World War II and early Cold War periods. Some attention to cultural and social themes. Emphasizes economic crisis, growth of government, reform traditions, anti-communism and civil rights.

Dual Listed HIST 5480.

Prerequisite: 9 hours of HIST.

HIST4485 - U.S. Latino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U.S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives' responses are stressed.

Cross Listed LTST 4485/INST 4485.

Prerequisite: 9 hours of LTST, HIST, and/or INST related coursework.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4492 - Revolutions in Latin America

Credits: 3

Explores the meaning and impact of revolution in Latin America's modern history, focusing on political ideology, cultural expression, foreign relations, human rights, and globalization. Offers in-depth analysis of revolutions from the early nineteenth century to the present.

Cross Listed LTST 4492.

Dual Listed HIST 5492.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Prerequisite: 9 hours of HIST or INST.

HIST4494 - The U.S. in Latin America

Credits: 3

This course explores Latin America's experiences with the United States during the twentieth century. The class addresses U.S.-Latin American relations from a variety of angles, covering topics from military intervention and

government policies, to informal imperialism and cultural exchanges through film and literature.

Dual Listed HIST 5494.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or INST.

HIST4495 - Borderlands in Latin America

Credits: 3

Examines borderlands and frontiers in Latin American history, focusing on the U.S.-Mexico border region, the Southern Cone, and the Caribbean. Key issues include cultural contact zones, colonialism, military expansion and conflict, and nation-building.

Dual Listed HIST 5495.

Former Course Number [4720]

Prerequisite: 9 hours of HIST or INST.

HIST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U.S., incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed LTST 4496.

Dual Listed HIST 5496.

Former Course Number [4800]

Prerequisite: 9 hours of HIST or INST.

HIST4505 - The Old South, 1820 to 1861

Credits: 3

Studies history of the South from emergence of southern identity to the Civil War. Emphasizes southern society and culture.

Dual Listed HIST 5505.

Former Course Number [4500]

Prerequisite: 9 hours of HIST.

HIST4510 - Modern East Asia

Credits: 3

Focuses on the emergence of the modern East Asian states China, Japan, Korea, and Vietnam as individual states and members of this important region historically and in contemporary era, understanding the emergence of those states as responses to internal forces and external pressures such as imperialism, nationalism, Communism and Capitalism.

Dual Listed HIST 5510.

Former Course Number [4950]

Prerequisite: 9 hours of HIST.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

HIST4530 - 19th Century American West

Credits: 3

A study of the westward movement with emphasis on the trans-Mississippi West.

Dual Listed HIST 5530.

Former Course Number [4630]

Prerequisite: 9 hours of HIST.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

HIST4540 - 20th Century American West

Credits: 3

A study of the modern American West, with consideration of social, economic and political continuity and change.

Dual Listed HIST 5540.

Former Course Number [4640]

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

HIST4560 - American Social History in the 20th Century

Credits: 3

Explores history of social mobility and conflict in 20th century. Emphasizes impact of industrialization, rapid urbanization, massive immigration, ethnic minorities, race, religion, women and the family, painting and architecture.

Dual Listed HIST 5560.

Prerequisite: 9 hours of HIST.

HIST4582 - 20th Century U.S. Foreign Relations

Credits: 3

Studies Twentieth Century United States foreign relations with a focus on the Cold War period. Examines economic sources of policy decisions, elites and mass public opinion, as well as cultural, religious, ethnic, racial, and gender issues.

Cross Listed INST 4582.

Dual Listed HIST 5582.

Prerequisite: 9 hours of HIST or INST.

HIST4610 - Seminar Topics in the History of Wyoming I

Credits: 3

An intensive research and writing course dealing with topics in the period before statehood in 1890.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4620 - Seminar Topics in the History of Wyoming II

Credits: 3

Allows students to do intensive research and writing dealing with topics in Wyoming history from 1890 to present.

Prerequisite: 9 hours of HIST, including HIST 1251.

HIST4965 - Senior Thesis

Credits: 3

Working closely with a faculty advisor, a history major will develop a research proposal that, after approval by the History department faculty, will lead to in-depth research and writing, producing a minimum 50-page thesis that demonstrates an excellent grasp of historical methods and a high degree of writing skill.

Prerequisite: 12 hours of HIST; senior class standing; HIST major.

HIST4990 - Topics in _____

Credits: 1-6

Max Credit (Max. 12)

Affords students opportunity to study in-depth various topics in history not offered in regular courses or independent study.

Former Course Number [4080]

Prerequisite: 9 hours of HIST.

Human and Animal Physiology Minor

Physiology is the science of how the body functions in health and disease. A minor in physiology provides additional background for students in a variety of majors.

Human and Animal Physiology minor - requirements

Requirements for the minor in human and animal physiology (AHPY) include a minimum of 18 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Courses

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

At Least One of These Three:

* if more than one of the three required courses is completed, additional courses can count towards Physiology Core elective courses requirement below.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

Elective Courses

Physiology Core Electives. At least three courses from:

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4260 - Mammalian Endocrinology

Credits: 3

Introduces principles of endocrinology, role of endocrine systems in regulating metabolism, growth, reproduction and lactation in mammals.

Dual Listed ANSC 5260.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010, ZOO 3115, or equivalent.

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular, circulatory, and

respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

KIN3038 - Exercise Psychology

Credits: 3

Studies psychological theories for understanding and predicting health-oriented exercise behavior, including psychological intentions for increasing exercise participation and adherence. Emphasizes psychological and psychobiological responses to exercise.

Prerequisite: grade of C or better in PSYC 1000; concurrent enrollment in or completion of KIN 3021; 2.750 GPA.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

KIN4042 - Advanced Biomechanics

Credits: 3

Provides understanding of biomechanical theories and the application of biomechanical measurements to human movement in sports, training, and rehabilitation. Emphasis on using equipment to collect biomechanical data to answer research and clinical questions. Lecture and data collection topics include electromyography, force, balance, kinematics, and kinetics.

Prerequisite: C or better in KIN 3042, minimum 2.750 GPA.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4670 - Advanced Molecular Cell Biology

Credits: 3

Key concepts in eukaryotic cell biology will be presented with a focus on cellular processes that form the basis for human diseases. Cellular organization, dynamics, and signaling will be emphasized. Students will also explore principles of research design by critical reading and discussion of scientific literature.

Dual Listed MOLB 5670

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600

NEUR4295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed ZOO 4295.

Dual Listed NEUR 5295.

Prerequisite: ZOO 4280.

NEUR5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed ZOO 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

NEUR5295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed ZOO 5295.

Dual Listed NEUR 4295.

NEUR5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms will be covered in addition to the basic neurophysiology of nerve cells.

Cross Listed ZOO 5685.

Prerequisite: one course in physiology, chemistry, physics.

NEUR5887 - Molecular Neuropharmacology

Credits: 3

Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

PATB4130 - Mammalian Pathobiology

Credits: 3

Anatomical basis of disease in mammals. Emphasis on concepts of pathogenesis of disease, and the gross, microscopic and clinicopathological changes associated with lesions: cell injury and death; cellular degeneration; disturbances of growth and circulation; neoplasia; inflammation; and recognition of gross and microscopic tissue changes. Background in immunology will be beneficial.

Cross Listed MICR 4130

Dual Listed PATB 5130

When Offered (Normally offered spring semester)

USP 2015 Code U5C3

Prerequisite: C or better in LIFE 2022.

PATB4140 - Principles of Toxicology

Credits: 3

Toxicology is the study of poisons, their mechanisms of action and their effects on various organisms including man and domestic animals. Designed to provide students in the life and environmental sciences with an understanding of the principles of toxicology as they apply to animal and human health, food safety and environmental studies.

Dual Listed PATB 5140

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: 9 hours of biological science (e.g., physiology), 4 hours chemistry, 3 hours biochemistry.

PATB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed MOLB 4400

Dual Listed PATB 5400

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021/MICR 2021 or MOLB 2240/MICR 2240 or PATB 2220, and a minimum grade of C- in MOLB 3000 or MOLB 3610.

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

PSYC3250 - Health Psychology

Credits: 3

Provides overview of growing partnership between psychology and health care, including history of psychology in health care; theoretical foundations of health and illness; intervention and research techniques; stress and high risk behaviors (e. g. , substance abuse, eating behaviors, AIDS); psychology's contribution to improving outcomes and quality of life in chronic and life-threatening behaviors.

Cross Listed NURS 3250.

Prerequisite: A grade of C or better in PSYC 1000.

PSYC4040 - Cognitive Neuroscience

Credits: 4

Examines the underlying neural bases of higher cognitive functions in humans, including attentions, language, motor control, navigation, emotions, and memory, as well as neuroanatomy fundamentals and neuroscience methods such as fMRI and ERP. Lecture and lab components.

Prerequisite: A grade of C or better in PSYC 2080 or PSYC 3120 or ZOO 4280.

PSYC4080 - Physiological Psychology

Credits: 4

Examines physiological mechanisms of behavior, strongly emphasizing neural and hormonal processes. Includes fundamentals of neuroanatomy and evolution of the nervous system, basic neurophysiology, sensory and motor processes, as well as the physiology of emotion, motivation, learning and memory. Lecture three hours per week. Laboratory two hours per week.

USP 2003-2014 Code U3SB

Prerequisite: A grade of C or better in 6 hours of psychology and LIFE 1000, LIFE 1003, or LIFE 1010 or an introductory zoology course.

PSYC4250 - Psychological Aspects of Chronic Illness

Credits: 3

Investigates the impact of chronic physical illnesses on diagnosed children and adults, their families, and society. Emphasizes effects of illnesses on psychological adaptation and quality of life. Should be of particular interest to helping professionals and health care workers.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 3250.

SOC3550 - Medical Sociology

Credits: 3

Considers sociological contributions to diagnosis and treatment of illness. Studies social organization of health professions and agencies.

Prerequisite: SOC 1000.

SOC4160 - Sociology of Aging

Credits: 3

The process of aging from the individual to the societal level is the focus of the course. Consequences of this process such as the increase in the number of elderly, retirement and health are examined from the major social institutions, the relationships between these institutions and American society as a whole.

Dual Listed SOC 5160.

Former Course Number [4150]

Prerequisite: 6 hours of sociology (including SOC 1000) and at least junior standing.

ZOO3010 - Vertebrate Anatomy, Embryology, and Histology

Credits: 4

Provides a comprehensive overview of vertebrate anatomy. The structural organization, embryological derivation, and histological organization of the major organ systems will be emphasized. The evolution and functional organization of anatomical structure will also be emphasized. Includes laboratory sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: LIFE 2022 or equivalent, and a semester of chemistry.

OR

ZOO4110 - HIV/AIDS: The Disease and the Dilemma

Credits: 3

Explores the basic biology of the HIV virus, and its effects upon the human body, the magnitude of the global HIV/AIDS pandemic, treatment and prevention of AIDS, and the social, political, economic, and legal issues of HIV/AIDS.

Prerequisite: LIFE 1003 or LIFE 1010.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

- ZOO 4670

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed NEUR 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

ZOO5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms are covered in addition to the basic neurophysiology of nerve cells. The laboratory complements the lecture sequence.

Cross Listed NEUR 5685.

Prerequisite: one course in physiology, chemistry, physics.

SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing

Credits: 4

Introduces the student to the anatomy of the normal speech and hearing systems as well as the physiologic underpinnings of the speech (respiration, phonation, articulation), swallowing, and hearing (external, middle, and inner ear) systems. Theories of speech production and speech perception are presented.

Former Course Number [3400]

Prerequisite: KIN 2040 or consent of instructor.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

Interdisciplinary Pre-Law Minor

The minor requires 18 hours to be completed from among the following courses. Of these 18 hours, 12 must be upper division (3000 or 4000 level). In addition, 12 of the 18 hours must be outside the student's primary major, and none of these courses may be credited toward both the minor and the USP requirement. Complete one course from each of the following categories. All coursework must be completed with a grade of C or better to be counted toward the minor.

Language Comprehension & Expression: 3 Hours

COMM1030 - Interpersonal Communication

Credits: 3

Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H

Former Course Number COJO 1030

OR

COJO 1030 - Interpersonal Communication Credits: 3

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

USP 2015 Code U5C3

Prerequisite: COMM 1040 and junior standing.

OR

ENGL4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 4061.

Dual Listed ENGL 5061.

USP 2015 Code U5C3

Prerequisite: COMM 1040 and COJO 3040 or ENGL 2035.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGECE 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

Written Comprehension & Expression: 3 Hours

Any course with a USP designation of C3 may be counted in this area. However, no C3 course may be counted twice toward fulfilling this category and the USP C3 requirement or another category within the prelaw minor.

Critical Understanding of Human Institutions & Values: 3 Hours

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL3350 - History of Moral Philosophy

Credits: 3

A historical and philosophical overview of ethical theory ranging from ancient Greek ethics to the present.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3500 - History of Science

Credits: 3

Historic and philosophic survey of the development of science from the ancient Greeks to the 20th century.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

OR

AMST4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

OR

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

POLS4090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 5090.

Prerequisite: 9 hours of political science or philosophy, including POLS 1000.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

OR

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.
USP 2003-2014 Code U3D
USP 2015 Code U5C3
A&S College Core 2015 ASD
Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

PHIL4300 - Topics in Ethics

Credits: 3-6
Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 5300.
Prerequisite: 6 hours of philosophy.

PHIL4340 - Issues in Environmental Ethics

Credits: 3
Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.
Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

Creative & Analytical Thinking: 3 Hours

CW2050 - Introduction to Fiction

Credits: 3
Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

CW2060 - Introduction to Nonfiction

Credits: 3
Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

CW2080 - Introduction to Poetry

Credits: 3

Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP 2003-2014 Code U3CH

Former Course Number [1100]

PHIL3140 - Philosophy of Science

Credits: 3

Systematically examines philosophical problems about the nature of science, its methods of explanation, and the status of its laws.

Prerequisite: 3 hours of philosophy or 3 hours of science or consent of instructor.

PHIL3220 - Existentialism and Phenomenology

Credits: 3

Examines fundamental perspectives of existentialist thought, beginning with its roots in Kierkegaard and Nietzsche. Looks at a large variety of existentialist perspectives presented by Sartre, Heidegger, Buber, Jaspers and Camus. Considers the relation of Husserl's phenomenological method to existentialism.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy.

PHIL3420 - Symbolic Logic

Credits: 3

Studies both propositional and quantificational logic, concentrating on methods of proof. Takes up such topics as identity, singular terms, intuitive set theory, and translating English sentences into symbolic notation.

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3440 - Philosophy of Mind

Credits: 3

Considers topics in philosophy of mind, including the mind-body problem, emotions, attitudes, perception and psychological explanation.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

PHIL3510 - Introduction to Epistemology

Credits: 3

Systematic introduction to epistemology, the philosophical study of knowledge and justified belief. Aims to answer questions such as: What are the necessary and sufficient conditions of knowledge? What are its sources? What is its structure, and what are its limits? How we are to understand the concept of justification?

Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

OR

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

PHIL4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC 4420/MATH 4420.

Dual Listed PHIL 5420.

Prerequisite: PHIL 3420 or equivalent.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

OR

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

World Cultures & International Institutions: 3 Hours

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

ANTH2200 - World Culture

Credits: 3

Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)

USP 2003-2014 Code U3G, U3CS

A&S College Core 2015 ASG

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3320 - Eastern Thought

Credits: 3

Surveys some of the major concepts in Zen, Hinduism, Buddhism, Taoism and Confucianism.

Cross Listed RELI 3320.

USP 2015 Code U5H

Prerequisite: 3 hours of philosophy, or consent of instructor.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.

Prerequisite: ANTH 1200.

OR

INST3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed ANTH 3420.

Prerequisite: ANTH 1200.

INST3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed SOC 3910.

When Offered (Offered once a year).

A&S College Core 2015 ASG

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

OR

SOC3910 - Global Sociology

Credits: 3

Global Sociology explores how humans shape and are shaped by globalization processes. Globalization creates inherent risks, such as increased inequality and violence, but also opportunities for greater democracy and a stronger global civil society. This course examines social, cultural, institutional, and economic factors and their effects on societies around the world.

Cross Listed INST 3910.

A&S College Core 2015 ASG

Former Course Number 4110

Prerequisite: SOC 1000 or ANTH 1200 or INST 2350.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

INST4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed POLS 4340.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

OR

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

Law: 3 Hours

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

CRMJ2210 - Criminal Law

Credits: 3

Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the

constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

NAIS3300 - Federal Indian Law

Credits: 3

Survey of law that applies to individual Indians and tribal governments. In particular, explores the legal relationships among, and relative jurisdictions of federal, tribal, and state governments. Specific topics include civil and criminal jurisdiction, taxation, family law, hunting and fishing, and gaming regulations.

Prerequisite: NAIS 1001 or NAIS 1350.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

OR

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 2010 and junior class standing.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

OR

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECE 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

OR

PSYC4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed CRMJ 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

International Relations and Comparative Politics Minor

Requirements

A minor in International Relations and Comparative Politics requires

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

OR

POLS1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed INST 1250.

A&S College Core 2015 ASG

POLS4870 - Seminar in International Relations

Credits: 3

Max Credit (Max. 6)

Encompasses reading and research in international law and politics.

Dual Listed POLS 5870.

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

OR

POLS4890 - Seminar in Comparative Government and Politics

Credits: 3

Max Credit (Max. 6)

Researches selected topics in comparative government and politics.

Dual Listed POLS 5890.

USP 2003-2014 Code U3G, U3WC

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

- 9 hours from an approved list of courses, with a minimum of 6 hours at the 3000-level or above.

Approved International Relations and Comparative Politics Minor Courses

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

POLS2290 - Governments and Politics of Latin America

Credits: 3

Studies chief cultural and historical factors influencing Latin American political process. Surveys major institutions and political patterns of the region.

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

POLS2490 - Topics In:

Credits: 1-3

Max Credit (Max. 6)

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000.

POLS3200 - Comparative Political Cultures

Credits: 3

Histories and experiences of various societies have shaped their values, norms, beliefs, expectations, and attitudes. This class explores how the beliefs, values, and lifestyles of various societies shape peoples' views of their place in the politics of the state and of the state's place in their daily lives.

Cross Listed POLS 3200.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/ INST 1250 or permission of instructor.

POLS3220 - Government and Politics of Russia and FSU

Credits: 3

Examines the political, economic and identity transitions of Russia and other states of the former Soviet Union during the post-communist era. Explores how current challenges relate to past Soviet practices.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post-World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3300 - Model United Nations

Credits: 1-3

Max Credit (Max. 6)

Focuses on the United Nations (UN) system and multilateral diplomacy to prepare students to participate in a Model UN simulation. Students learn to evaluate the UN system, learn strategies to address international problems, and develop skills to effectively represent a country in a role-playing exercise.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS4013 - Political Geography

Credits: 3

Geographic space is subdivided into political units to aid human interaction and to facilitate political processes. Examines the spatial organization of political space and its effects upon political processes at varying geographic scales ranging from the local to international.

Cross Listed GEOG 4013.

Dual Listed POLS 5013.

Prerequisite: Completion of USP H requirement.

POLS4215 - European Union

Credits: 3

Examines the European Union's history, institutional structures, and policy areas and explores the positive and negative effects of European integration.

Cross Listed INST 4215.

Dual Listed POLS 5215.

Former Course Number [4220]

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4230 - Governments and Politics of Asia

Credits: 3

Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 5230.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed INST 4255.

Dual Listed POLS 5255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

POLS4260 - Democratization and Regime Change

Credits: 3

Examines the theoretical/empirical research on causes of democratic transition and consolidation, including new waves of democratization and prospects for democratization in other contexts. Focus is given to a variety of theoretical/methodological perspectives such as the structural, strategic, social/cultural, institutional, and economic approaches.

Cross Listed INST 4260.

Dual Listed POLS 5260.

Prerequisite: 9 hours of political science or international studies, including POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS4290 - Inter-American Relations

Credits: 3

Surveys inter-American system and idea of hemispheric unity. Analyzes major issues confronting inter-American community.

Cross Listed INST 4290.

Dual Listed POLS 5290.

Prerequisite: 9 hours of political science, including POLS 1200/ INST 1200, or POLS 1250/INST 1250, or POLS 2310/ INST 2310, or permission of instructor.

POLS4330 - American Foreign Relations

Credits: 3

Analyzes American foreign policy decision-making process and selected contemporary foreign policy problems. Stresses political and institutional factors, along with analysis of policy options.

Cross Listed INST 4330.

Dual Listed POLS 5330.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4350 - Sustainable Development and Global Policy

Credits: 3

Considers in-depth meaning of "sustainable development" and trade-offs necessary to achieve it. Considers this issue from global perspective through application of theories in economics, political science, international relations, technology studies and ethics.

Dual Listed POLS 5350.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed INST 4360.

Dual Listed POLS 5360.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4375 - Transitional Justice

Credits: 3

Mechanisms provide accountability for gross human rights violations and acts of mass atrocity within nations. Case studies are used to examine types of transitional justice interventions; tensions between demands of justice at local, national, and international levels; and transitional justice's role in post-conflict peace-building and reconciliation.

Cross Listed INST 4375.

Dual Listed POLS 5375.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 4445.

Dual Listed POLS 5445.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

POLS4475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 4475.

Dual Listed POLS 5475.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

POLS4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed CRMJ 4600.

Dual Listed POLS 5600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS4710 - Topics in

Credits: 1-3

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000 and 3 additional hours of political science.

POLS4870 - Seminar in International Relations

Credits: 3

Max Credit (Max. 6)

Encompasses reading and research in international law and politics.

Dual Listed POLS 5870.

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4890 - Seminar in Comparative Government and Politics

Credits: 3

Max Credit (Max. 6)

Researches selected topics in comparative government and politics.

Dual Listed POLS 5890.

USP 2003-2014 Code U3G, U3WC

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

International Studies Graduate Minor

Students graduating with a minor in international studies will be able to recognize and appreciate the historical, political, social, cultural, and economic dimensions of international processes and issues, integrating these into an interdisciplinary perspective.

Additional Requirements

A graduate minor in international studies provides students in graduate programs other than international studies with the opportunity to acquire a basic graduate-level familiarity with international relations, global processes and cultural diversity around the world. Students acquire a foundation in intergovernmental relations and research methodology. Beyond this, students work closely with a graduate director to fashion a program of study appropriate for their interests and post-graduate plans. The minor complements several other graduate degree programs.

Prerequisites for Admission

Declaration of an international studies minor is contingent on admission to a master's or doctoral degree program. Application is in the form of a letter of interest to the director of the program, including the background, anticipated course of study, and reason for seeking the minor. An interview with the director is also required. All prerequisites for entering the graduate program in international studies as a major apply to the minor with the exception of proficiency in a second language. Students must be prepared for coursework in international studies at the graduate level and be willing to take prerequisite courses if necessary.

Course and Committee Requirements

Graduate students minoring in international studies must satisfy the requirements of their graduate major and take twelve credits of guided graduate coursework in international studies. With the approval of the department of the graduate major, these twelve hours may also count toward the major. Students are required to take at least one advanced theory course (INST 5200) and one advanced research methods course. All courses will be determined in consultation with the program director.

International Studies Minor

Students graduating with a minor in international studies will be able to recognize and appreciate the historical, political, social, cultural, and economic dimensions of international processes and issues, integrating these into an interdisciplinary perspective.

Additional Information

A minor in international studies requires 12 hours of a single foreign language and 15 hours of international studies curriculum, with a minimum of 9 hours at the 3000-level or above.

Japanese Minor

As a Japanese Minor, you will develop your speaking, listening, and communication skills as a Japanese speaker. You will gain a better understanding of perspectives and experiences of Japanese speaking cultures.

Prerequisites

JAPN1010 - First Year Japanese I

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the language.

When Offered (Offered fall semester)

USP 2015 Code U5H

JAPN1020 - First Year Japanese II

Credits: 4

Studies fundamentals of grammar, composition, conversation and reading. Introduces Japanese culture through the

language.

When Offered (Offered spring semester)

USP 2015 Code U5H

Prerequisite: JAPN 1010 or equivalent.

JAPN2030 - Second Year Japanese I

Credits: 4

Encompasses reading, speaking and writing in original Japanese syllabaries, including elementary kanji characters for daily practical application.

When Offered (Offered fall semester)

Prerequisite: JAPN 1020 or equivalent.

Minor Program Requirements

A Japanese minor requires 18 credit hours of coursework which include JPN 2040 and above, and all courses required for a minor in Japanese are offered as online courses. These courses include:

JAPN3050 - Third Year Japanese I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 2040 or equivalent.

JAPN3060 - Third Year Japanese II

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: JAPN 2040 and JAPN 3050 or equivalent.

JAPN2070 - Conversational Japanese Abroad

Credits: 4

Japanese language and cultural study in Japan led by UW faculty.

Prerequisite: JAPN 1020.

LANG2150 - Manga: History and Culture

Credits: 3

Manga is one of the most important art forms to emerge from Japan. Its importance as a medium of visual culture and storytelling cannot be denied. Through reading and examination of texts, students will understand the relevance of comics in Japanese society.

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Prerequisite: COM1.

LANG3140 - Anime: History and Culture

Credits: 3

An introduction to the history, development, and cultural significance of Japanese animation. Through the examination of a variety of anime genres, students will gain insight into contemporary Japan as well as important historical periods. We will read analyses of particular anime, emphasizing the unique characteristics of the art and the mystery of its popularity in the US.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Prerequisite: completion of WA.

LANG4800 - Advanced Instruction In: (TOPIC)

Credits: 1-3

Max Credit (Max. 12)

Advanced study and projects designed to meet special needs and interests of students, to be selected in consultation with a suitable member of the faculty.

Prerequisite: consent of instructor.

LANG3105 - Major Themes in Chinese and Japanese Literature

Credits: 3

Explores mindsets of two rich and ancient civilizations, China and Japan. Considers distinctive characters of each civilization, while illuminating basic elements that we share with these peoples.

Prerequisite: ENGL 1010.

HP3151 - Modes of Understanding

Credits: 3

Max Credit (Max. 6)

Introduces study of nature and grounds of knowledge, its limits and validity. Examines epistemological basis of selected areas of academic thought. Topics vary from year to year. Required of UW Honors Program students.

Former Course Number [3150]

Prerequisite: COM1, COM2

History and Culture classes (LANG 2150, 3140, 3105, and 4800) rotate every two years, as one History and Culture class is offered a semester. Modern Japanese Society (HP/LANG 3151) is offered twice a year, with one of these classes being a study abroad opportunity.

Journalism Minor

Required Courses: 9 Hours

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

Elective Courses: 9 Hours

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3000 - History of American Journalism

Credits: 3

Presents history and development of American journalism from colonial times to present, emphasizing 20th century.

Prerequisite: COMM 1000.

COJO3100 - Public Affairs Reporting

Credits: 3

Practices in public affairs reporting, emphasizing local and state political organization as foundation for such reporting. Specialized reporting fields. News analysis.

Prerequisite: COMM 2100.

COJO3200 - Graphics of Communication

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP 2003-2014 Code U3CA

Prerequisite: COMM 1000.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of

writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4230 - Special Topics in Mass Media

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed AAST 4233 and GWST 4233.

Dual Listed COJO 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO4400 - Photojournalism

Credits: 3

Studies and intensively practices reporting news and features photographically, plus essentials of advertising photography. Includes advanced camera and darkroom techniques and photo editing. Two one-hour lectures and one two-hour laboratory weekly.

Prerequisite: COMM 2400.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will

also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed ENR 4700.

Dual Listed COJO 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

Total: 18 Hours

Latin Minor

As a Latin Minor, you will develop the communication skills necessary to read an original text of Classical Latin in prose or verse as well as the cultural knowledge essential to understand and analyze it.

Requirements

LATN3110 - Vergil, The Aeneid I

Credits: 3

Reading portions of the Aeneid and consideration of its literary interpretation.

Former Course Number [2110]

Prerequisite: LATN 2030 or equivalent.

LATN3140 - Caesar

Credits: 2

Acquaints students with war-memoir genre of Latin literature.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4120 - Catullus and the Elegiac Poets

Credits: 3

Discusses Latin lyric poetry of late Republic and early Empire, excluding works of Horace and Ovid, and elegiac tradition in Latin.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4130 - Cicero

Credits: 3

Introduction to the prose of the statesman Marcus Tullius Cicero (106-43 BCE). Readings will be selected from his political speeches, correspondences, or treatises on philosophical, rhetorical, and religious topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

Electives

7 hours chosen from Latin at the 3000-level or above.

LATN3120 - Vergil, The Aeneid II

Credits: 3

Reading further portions of the Aeneid and consideration of its literary interpretation.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [2120]

Prerequisite: LATN 3110.

LATN3150 - Livy

Credits: 3

Reading portions of Livy's historical works, and consideration of the history he covers and how the Romans viewed their past.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3160 - Ovid

Credits: 2

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN3990 - Independent Study

Credits: 1-4

Books or texts of special interest to the student, selected in conjunction with the instructor; independent reading and reports.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4110 - Horace

Credits: 3

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

LATN4115 - Latin Philosophers

Credits: 3

An introduction to Latin philosophical traditions. Readings will be selected either from one author, such as Lucretius (ca. 99-55 BCE) or Seneca the Younger (ca. 4 BCE-65 CE), or from different authors about a given theme.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: LATN 2030 or equivalent.

Total: 18 Hours

Latina/o Studies Minor

Latina/o Studies offers an undergraduate minor. The minor in Latina/o Studies requires 18 credit hours. One of those courses (3 hours) must include the required foundation courses, and the remaining courses (15 hours) can be selected from the other areas of studies listed below.

Minor Requirements

3 Hours of Foundation Course

LTST1300 - Introduction to Latina/o Studies

Credits: 3

The U. S. Latina/o immigrant experience is a particular focus of this course, including its role in the incorporation of Latinos into U. S. society. Through readings, presentations, class discussion, videos, and other activities, students examine historical and contemporary issues affecting Latinos including but not limited to immigration, language, identity, national origin, education, politics, employment, and economic mobility.

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 1300]

3 Hours of History or Social Science

LTST2370 - Chicano History : Origins to 1900

Credits: 3

General survey that traces the geographic distribution and historical processes that have shaped the life experiences, socio-economic development and cultural contributions of peoples of Mexican descent in the United States from their indigenous and Hispanic origins to the end of the 19th century. Cross list with GEOG 2370/HIST 2370.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 2370]

LTST2385 - Chicano History: 1900 to Present

Credits: 3

General survey of the history of the Mexican American Chicano people in the United States. Examines the origins and development of Mexican Americans, Chicanos through the major historical processes which have shaped their experience. Major themes include multicultural, multiethnic context, origins; changing identity, comparative relations to other social, ethnic groups, culture, social structure, politics, economy, immigration, and the influence of United States-Mexico relations.

Cross Listed HIST 2385.

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 2385]

LTST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST 3800/GWST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Former Course Number [CHST 3800]

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

3 Hours of Culture, Arts, and Humanities

LTST2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanismo. Studies literature of the Hispanic Southwest, Mexican American folklore and the Chicano and post-Chicano movement.

Cross Listed ENGL 2360.

USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD
Former Course Number [CHST 2360]

Prerequisite: WA.

LTST3560 - Chicano Community Organizations

Credits: 3

Introduction to the origins, development and contemporary status of community organizations and service agencies in the Mexican American community in general and in the Wyoming and Rocky Mountain regions.

Former Course Number [CHST 3560]

Prerequisite: LTST 1100.

LTST4100 - U.S. Latina/o Theater

Credits: 3

Designed to provide an overview of United States Latina/o Theater. Through a variety of delivery methods, students are instructed on the various categories that directly impact U. S. Latina/o Theater such as political theatre, gay/lesbian theatre, border issues, race, class, gender, and sexuality.

Cross Listed WMST 4100.

Dual Listed LTST 5100.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [CHST 4100]

Prerequisite: 6 hours of LTST or WMST.

LTST4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed ENGL 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 4470]

Prerequisite: LTST 1100 and WA.

3 Hours of Gender, Race, Class, and Sexuality

LTST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed GWST 1030/NAIS 1030/AAST 1030/AMST 1030.

USP 2003-2014 Code U3D, U3I

A&S College Core 2015 ASD

Former Course Number [CHST 1030]

LTST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/Chicana studies.

Cross Listed GWST 3200.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Former Course Number [CHST 3200]

Prerequisite: LTST 1100 or junior standing.

LTST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/INST 4650/GWST 4650.

Dual Listed LTST 5650.

Former Course Number [CHST 4650]

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

LTST4675 - U.S. Women of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/GWST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Former Course Number [CHST 4675]

Prerequisite: junior standing and/ or a combination of 3-6 hours of any level of LTST, WMST, or AAST coursework.

6 Hours of Electives

(or any courses listed above not yet taken)

LTST2060 - Special Topics in:

Credits: 3

Former Course Number [CHST 2060]

LTST3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed SPAN 3080.

USP 2015 Code U5H

Former Course Number [CHST 3080]

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

LTST4485 - USLatino Diaspora

Credits: 3

Combines classroom activities and a week-long stay abroad in examining the historical creation and contemporary spread of the Latino Diaspora from the Caribbean to the Yucatan and beyond. U. S. Latina/o history, multiculturalism, pan-Latino identity, assimilation, migration trends and natives responses are stressed.

Cross Listed HIST 4485/INST 4485.

Former Course Number [CHST 4485]

Prerequisite: 9 hours of LTST, HIST, and/ or INST related coursework.

LTST4496 - History of Mexico

Credits: 3

Intensive course in Mexican development. Emphasizes the 20th century, especially the Mexican Revolution of 1910, showing how this nation transformed itself into a modern nation-state. Includes diplomatic relations with the U. S. , incorporation of Indians, church-state relations, uses of land and other natural resources, role of the military and growth of Mexican nationalism.

Cross Listed HIST 4496.

When Offered (Normally offered fall semester)

Former Course Number [CHST 4496]

Prerequisite: 9 hours of HIST or INST.

LTST4975 - Independent Studies

Credits: 1-3

Max Credit (Max 6)

Independent study in Chicano studies research.

Former Course Number [CHST 4975]

Prerequisite: junior standing.

LTST4990 - Topics in Chicano Studies

Credits: 1-3

Max Credit (Max 6)

A special topics course through which regular and visiting faculty can explore regarding specialized or new research topics regarding Chicano studies.

Former Course Number [CHST 4990]

Prerequisite: junior standing.

Literary Studies Minor

Focuses on the study of literature, media, and culture. Courses address texts from various historical periods and regions and the work of a diverse range of voices.

Requirements

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

Historical Period Classes: 6 Hours

Take any 2 of the following historical period courses:

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

Upper Division Literature Courses: 9 Hours

Take 3 additional upper-division literature courses. Electives cannot be used for both the Historical Period requirement and this requirement. Please consult with department for options beyond this list.

ENGL3100 - Tribal Literatures of the Great Plains

Credits: 3

Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed NAIS 3100.

USP 2003-2014 Code U3D, U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of NAIS or ENGL.

ENGL3150 - World Literature

Credits: 3

Max Credit (Max. 6)

Encompasses reading and analysis of major works representative of significant periods or literary forms in the history of literature.

USP 2003-2014 Code U3CH, U3G

Prerequisite: WA and WB/COM1 and COM2.

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues addressed through global performance.

A&S College Core 2015 ASG

Prerequisite: COM1.

ENGL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3
Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3610 - Non-Western Women Writers

Credits: 3
Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL3710 - Gender: Humanities Focus

Credits: 3
Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.
USP 2003-2014 Code U3Ch
USP 2015 Code U5C2
Prerequisite: GWST 1080 or ENGL 1010.

ENGL4080 - Film Genre Studies (TOPIC)

Credits: 3
Max Credit (Max. 6)

Offers structural, film historical, and political analyses of selected major film genres.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4070 - Film Directors:

Credits: 3
Max Credit (Max. 6)

Offers an intensive examination of representative films by selected film makers.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4090 - Film and Religion

Credits: 3

Movies use religion to convey messages; they debate religious issues and use religion to debate non-religious issues. This course analyzes how film makers use religion and religious themes to transform religions into advocates for social issues and to shape religion's role in society. Popular films drawn from many genres.

Prerequisite: 6 hours of 2000-level or higher literature courses or religion courses.

ENGL4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed CLAS 4230/THEA 4230.

When Offered (Offered in spring in alternate years)

Prerequisite: WB or COM2.

ENGL4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed CLAS 4270.

Prerequisite: WB or COM2.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: LTST 1100 and WA/COM1.

ENGL4480 - Regional Literature of the US: The West

Credits: 3

Encompasses major themes and writers in western American literature.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4600 - Studies in (TOPIC)

Credits: 1-6

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in American, English, or other literatures.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

A&S College Core 2015 ASG

Prerequisite: six hours of 2000 level literature courses.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.

Dual Listed ENGL 5830.

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: ART 2020, GWST 1080/ENGL 1080.

Marketing Communication Minor

The marketing communication minor is designed for College of Business and communication and journalism majors. Other majors are not recommended for this minor. For questions regarding this, please contact the minor supervisor.

Required for all Minors

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and

quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

Emphasis

COJO Emphasis

(to be taken by non-COJO majors):

Choose Three Courses from the Following: 9 Hours

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3200 - Graphics of Communication

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP 2003-2014 Code U3CA

Prerequisite: COMM 1000.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

Prerequisite: COJO 3310.

Marketing Emphasis

(to be taken by non-College of Business majors):

Choose Three Courses from the Following: 9 Hours

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 2100, advanced business standing.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 2100 and junior class standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

MKT4910 - Topics in Marketing

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Total: 21 Hours

Metalsmithing Minor

The Metalsmithing Minor introduces students to the discipline of Metalsmithing in a 24 credit hour sequence.

Required Courses: 15 Hours

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART3350 - Metalsmithing II

Credits: 3

Introduces intermediate approaches to fabricating small scale, non-ferrous metals through hammer-raised forming, lost-wax casting, enameling and hardware fabrication. Historical and innovative contemporary applications are fostered

through sculptural objects and jewelry-based pieces. Individual studio projects, critical discussion and presentations address aesthetic, conceptual, and technical aspects of metalsmithing.

Prerequisite: ART 2000 and ART 2350.

Studio Elective Courses in Metalsmithing: 6 Hours

ART4355 - Metalsmithing III

Credits: 3

Introduces advanced fabrication and surface techniques which build on skills developed in Metalsmithing I and II. Students propose a body of work for the semester based on individual aesthetic, conceptual and technical interests. Professional practices including resume writing, documenting, presenting and exhibiting artwork are addressed at this advanced level.

Prerequisite: ART 2000 and ART 3350.
required

ART4360 - Metalsmithing: Special Topics

Credits: 3

Focuses on a specific technique in the field of Metalsmithing for an in-depth exploration into topics such as lost-wax casting, chasing and repoussé, enameling, etc. Individual projects and critical discussion will address the special topic aesthetically, technically and conceptually.

Prerequisite: ART 2000 and ART 2350.
required

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Museum Studies Minor

The Museum Studies Minor introduces students to the discipline of Museum Studies.

Museum Studies Core: 12 Hours

- ART 2705 - Intro to Museology II Credits: 3 crosslisted as ANTH/AMST/HIST 2705

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.

USP 2003-2014 Code U3CH

Choose One of the Following

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Internship - 3 credits

3 credits in Internship

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

ANTH4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Allows students to gain hands-on experience, bridging the gap between anthropology as an academic discipline and anthropology as practiced in museums, public archaeology agencies, non-governmental organizations, and private consulting companies. Involves a required academic component in addition to work experience. Internship credit cannot fulfill requirements of the major.

Prerequisite: anthropology major of junior/senior standing and consent of internship director and/or department head.

HIST4400 - Internship

Credits: 1-12

Max Credit (Max. 12)

The internship allows students to gain hands-on experience that will help to bridge the gap between history as an academic discipline and history as practiced in museums, public history agencies and historic sites. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will be done in consultation with the department's internship director.

Prerequisite: 9 hours of HIST.

OR

- Corresponding number in student's major department

Methods Core: 6 Hours

To be chosen from the following:

AMST2400 - Introduction to Historic Preservation

Credits: 3

Online course introduces students to historic preservation theory and philosophy, the history of the preservation movement and contemporary historic preservation as practiced in the public, nonprofit and private realms. Assignments include reading, research, online discussion and lectures (podcasts, videos or PowerPoint presentations), as well as directed field work.

AMST4300 - American Culture and the Public Sector

Credits: 3

Surveys American culture studies in the public sector. Topics include history and theory of public sector humanities and social sciences; types of public sector jobs and institutions where public humanists work; and public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 5300.

When Offered (Offered once a year)

Prerequisite: 12 credits in humanities or social science courses having to do with American culture.

AMST4900 - Field Studies in American Culture

Credits: 1-4

Max Credit (Max. 4)

Field Studies in American Culture: Gives students hands-on field-based training and experience in researching, documenting, and presenting aspects of American culture. Topics may include historic preservation, folklife, oral history or related fields.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 credits in American Studies or related field. May also be taken for graduate credit.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: ANTH 1200.

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

ANTH4190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies and regulations; compliance, heritage, and avocational archaeology, cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 5190

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

USP 2015 Code U5C3

Prerequisite: 6 hours in art history.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)

Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research.

Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

HIST4030 - Senior Capstone Seminar

Credits: 3

Max Credit (Max. 6)

For undergraduate departmental majors; presented in a small group, non-lecture setting. Under close instructor supervision, students write reviews and essays, present critiques and oral reports and lead discussion on materials read by class.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: advanced standing as a History major and HIST 3020.

- HIST 4050

HIST4055 - Archival Research Methods

Credits: 3

Students will master advanced research strategies with interdisciplinary applications. Focuses on primary research and the development of advanced skills in information literacy, critical analysis of sources, verification of evidence, techniques for researching underdocumented populations, and interpretation of historical evidence. Advanced writing and oral presentation skills are emphasized.

Dual Listed HIST 5055.

Prerequisite: 9 hours of HIST, including HIST 2050 or HIST 2700.

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and

services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

Elective Courses: 3 Hours

Students will choose course from the elective list in conjunction with their advisor, based on their area(s) of interest. Additional courses listed in the museum studies and methods cores can be chosen as electives. For a list of electives, go to www.uwyo.edu/museumstudies.

Cultural Experience / International Fieldwork

Choose one of the following:

- Study Abroad/International Field School - students may enroll or participate in an approved study abroad course or program (credit hours vary),
OR
- Foreign or Indigenous Language - students may enroll in 12 hours
OR
- A foreign language. 8 of the 12 hours must be in the same language. American Sign Language does qualify.

Music Minor: 18 Credits

A **Minor in Music** consists of 18 credit hours intended to broaden a student's musical skills as well as foster musical talents while they are pursuing a separate major. Acceptance to the minor is by audition only.

Required Courses

- **Ensembles:** Minimum 2 semesters required
- **Applied Lessons:** Complete at least 2 hours of Applied Lessons (2 semesters, minimum 30 minutes each)

MUSC0200 - Music Convocation

Credits: 0

Weekly recital hour for student, faculty and guest performances.

Prerequisite: intended for, and required of music majors.
2 Semesters Required

MUSC1030 - Written Theory I

Credits: 3

First semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: music majors/minors only.

MUSC1035 - Aural Theory I

Credits: 1

First semester of a one-year series. Studies ear training and sight singing.

MUSC1040 - Written Theory II

Credits: 3

Second semester of a one-year series. Studies fundamentals of music and written harmony.

Prerequisite: MUSC 1030 and music majors/minors only.

MUSC1045 - Aural Theory II

Credits: 1

Second semester of a one-year series. Studies ear training and sight singing.

Prerequisite: MUSC 1035.

Choose one of the following:

MUSC2050 - Historical Perspectives in Music II

Credits: 3

Continuation of materials and topics covered in Historical Perspectives in Music I. Study of composers and repertoire from 1600-ca. to 1800.

USP 2003-2014 Code U3CA

Prerequisite: MUSC 1003, or by permission of instructor.

OR

MUSC2055 - Historical Perspectives III

Credits: 3

Max Credit (Max. 6)

Second semester of one-year series. Studies history and literature of music from the Classical Era to present.

Prerequisite: ability to read music.

Choose at least 3 credits from the following. Final credit hours for the minor must equal 18.

MUSC3015 - Introduction to the Music of the World's Peoples

Credits: 3

Students develop three primary interconnected literacies for the study and understanding of musics of other cultures: analytical music listening, understanding the concept of music culture, and interpretation of musical events. Student writing is a primary tool for developing these literacies. Texts from the Oxford University Press Global Music Series to study musics of Africa, Indonesia, India, and Eastern Europe are used.

Cross Listed ANTH 3015.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [2015]

Prerequisite: MUSC 1000 or permission of instructor and WA.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP 2015 Code U5H

Prerequisite: consent of instructor.

MUSC4360 - Fundamentals of Audio for Music Production

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

Native American and Indigenous Studies Graduate Minor

A graduate minor in Native American and Indigenous Studies is comprised of 12 hours with at least 6 hours at the 5000 level. It is expected that each graduate minor student and his/her graduate committee, at least one member of whom will be from NAIS, will determine the specific courses to be taken. It is recommended that one of the four classes selected be a 3 credit NAIS 5000 Independent Study. This class will provide a research experience in the discipline of Native American and Indigenous studies that may support a master's thesis or doctoral dissertation. The research expectation in NAIS can be satisfied by the 3 credit hour Independent Study and/or by the thesis or doctoral dissertation.

Students graduating with a graduate minor degree in Native American and Indigenous studies will be able to: 1) Make apparent in masters'-level research the interdisciplinary connections between Native American and Indigenous studies and the primary field of graduate study; 2) Integrate American Indian studies research methods with the research methods used in the primary field of graduate study; and 3) Demonstrate in writing the ability to understand a variety of subjects from a tribal perspective.

Native American and Indigenous Studies Minor

Students graduating with an undergraduate minor degree in NAIS will be able to: 1) Explain the concept of tribal sovereignty and how tribal sovereignty is both restricted and acknowledged by the federal trust relationship and by relationships with states; 2) Understand the development of modern tribal governments and their functions and importance in contemporary society; 3) Understand and appreciate the roles of history, culture, and politics in the development of tribal world views, world views that relate to modern life and contemporary issues of concern for

Native American and Indigenous peoples; 4) Identify historical, cultural, and political diversity and significance in Native oral traditions and written literatures; 5) Recognize stereotypes about Native American and Indigenous peoples and explain why these stereotypes were created and why they are sustained in modern society; and 6) Understand from the perspective of American Indian peoples, historical experiences and contemporary issues in North America.

Minor Requirements

The minor in Native American and Indigenous Studies requires 18 credit hours. Twelve credit hours must come from the following courses, three credit hours must be in either NAIS 1001 or NAIS 1350.

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS2210 - North American Indians

Credits: 3

Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed ANTH 2210.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed ENGL 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA course.

- Plus six hours of NAIS elective courses

Neuroscience Minor

Neuroscience explores the nervous system structure and function. Electrical signaling of neurons provides the basis of our thoughts, perceptions, learning, movement, emotion, sleep-wakefulness, and behavior.

Additional Information

Minimum credit hours: 17. Courses counted towards one minor may NOT count towards a different minor. A grade of "C" or better is required in all coursework in the Neurosciences minor.

Required Courses

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4280 - Introduction to Neuroscience

Credits: 3

Examines the basic electrical properties of neurons and from there identifies determinants of brain development, how neuronal "circuits" are formed and how these neuronal systems enable the processing of sensory information, coordinated movement, adaptation to the environment, and other complex functions (e. g. , sleep, sex).

Dual Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

Elective Courses:

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

(ZOO 4735 sections must have a neurosciences aspect, consult your advisor for help selecting appropriate sections).

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed NEUR 4295.

Dual Listed ZOO 5295.

Prerequisite: ZOO 4280.

ZOO5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms are covered in addition to the basic neurophysiology of nerve cells. The laboratory complements the lecture sequence.

Cross Listed NEUR 5685.

Prerequisite: one course in physiology, chemistry, physics.

ZOO5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed NEUR 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

NEUR5887 - Molecular Neuropharmacology

Credits: 3

Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

PSYC4040 - Cognitive Neuroscience

Credits: 4

Examines the underlying neural bases of higher cognitive functions in humans, including attentions, language, motor control, navigation, emotions, and memory, as well as neuroanatomy fundamentals and neuroscience methods such as fMRI and ERP. Lecture and lab components.

Prerequisite: A grade of C or better in PSYC 2080 or PSYC 3120 or ZOO 4280.

Painting Minor

The Painting Minor introduces students to the discipline of Painting in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

Studio Elective Courses in Painting: 9 Hours

Choose from 3000/4000-level painting courses including but not limited to:

ART3210 - Painting II

Credits: 3

Max Credit (Max. 6)

Investigates various painting techniques to create individual work. Emphasizes contemporary and classical treatment of formal, aesthetic and conceptual creative expression.

Prerequisite: ART 2000 and ART 2210.

ART4210 - Painting III

Credits: 3

Prerequisite: ART 2000 and ART 3210.

ART4220 - Painting Topics

Credits: 6

This is an advanced painting course that will cover specific painting approaches for an entire semester. Examples of topics can include Abstraction and color field, figuration, narrative painting, experimental painting media and surfaces, etc. This course will enable students to experience a more comprehensive and targeted set of painting problems for the semester. Topics will vary based on the instructor.

Prerequisite: ART 2000, ART 2210, ART 3210.

ART3250 - Watercolor Painting I

Credits: 3

Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART4250 - Watercolor Painting II

Credits: 3

Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4655 - Outdoor Studio

Credits: 3

The emphasis in this course will be on the expressive nature of outdoor creative work. Students will need to be responsive to the natural environment through a variety of media, including watercolor, oil sticks, drawing, sculpture, photography, video, etc. This course involves travel and day trips to a variety of sites throughout the county and state.

Prerequisite: ART 2000.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is

designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

OR

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

A&S College Core 2015 ASG

Prerequisite: ART 2000 and ART 3260.

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Philosophy Minor

Philosophy provides the critical thinking, logical reasoning, and innovative problem-solving skills necessary to be competitive in law, business, academia, tech, arts, and government. It also explores what it is to live a meaningful life outside a career.

Course Requirements

A minor in Philosophy requires a minimum of 18 hours (6 courses) of philosophy.

- Of the 18 hours, 12 hours must be at 3000-level or above.
- Of the 18 hours, the remaining 6 hours (2 courses) may be at any level.

Only courses in which a grade of C or better has been earned count toward the 18-hour requirement.

Photography Minor

The Photography Minor introduces students to the discipline of Photography in a 24 credit hour sequence.

Required Courses: 15 Hours

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

OR

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field

that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

Studio Elective Courses in Photography: 6 Hours

- Choose from 3000/4000-level photography courses

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Physics Minor

A minor in physics appeals to students who have an interest in physics but intend to pursue a degree in some other field.

Complete

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

At Least Two of the Following:

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 4210.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

Additional Requirements

The physics minor provides students with the fundamental concepts of physics beyond the introductory level. Through rigorous hands-on experience, students deepen their understanding of foundational concepts and develop their quantitative skills.

Political Theory Minor

A minor in Political Theory offers an opportunity for interdisciplinary study.

Requirements

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

POLS4810 - Seminar in Political Philosophy

Credits: 3

Max Credit (Max. 6)

Seminar in Political Philosophy; Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 5810.

USP 2015 Code U5C3

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

- 9 hours from an approved list of courses in political science and other disciplines, with a minimum of 6 hours at the 3000-level or above.

Approved Political Theory Minor Courses

POLS2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

POLS2490 - Topics In:

Credits: 1-3

Max Credit (Max. 6)

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000.

POLS3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed CLAS 3050/HIST 3050.

Prerequisite: WB or COM2.

POLS3610 - Classics in Environmental Thought

Credits: 3

Surveys classic texts in environmental thought from the nineteenth century through the present.

Prerequisite: POLS 1000.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS4090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 5090.

Prerequisite: 9 hours of political science or philosophy, including POLS 1000.

POLS4160 - Legal Philosophy

Credits: 3

This course examines the philosophies that undergird the law, considering both ancient and modern legal thought. Throughout the course, both historical and contemporary examples will be used to illustrate the salient differences between philosophical approaches, to better articulate our understanding of the law.

Dual Listed POLS 5160.
Prerequisite: POLS 1000.

POLS4640 - Political Philosophy: Ancient and Medieval

Credits: 3
Surveys political philosophy from Classical Greek period to Machiavelli.

Dual Listed POLS 5640.
Prerequisite: POLS 2460, or POLS 3600, or consent of the instructor.

POLS4650 - Political Philosophy: Modern

Credits: 3
Surveys political philosophy from Machiavelli through the 19th century.

Dual Listed POLS 5650.
Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS4660 - Political Philosophy: Contemporary

Credits: 3
Examines central developments in political philosophy that guide action in today's world.

Dual Listed POLS 5660.
Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

POLS4710 - Topics in

Credits: 1-3
Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000 and 3 additional hours of political science.

POLS2200 - Politics of Europe and the European Union

Credits: 3
Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2
Prerequisite: POLS 1200 o r POLS 1250 o r permission of the instructor.

- SOC 3900 - Social Theory

Printmaking Minor

The Printmaking Minor introduces students to the discipline of Printmaking in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

OR

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

- An upper division drawing course beyond ART 1005

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

Studio Elective Courses in Printmaking: 9 Hours

- Choose from 3000/4000-level printmaking courses Credits: 9

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Professional Writing Minor

Focuses on the modes of written, oral, and digital communication that working professionals use in their fields. Courses address topics like grant-writing, writing for the web, and publication editing.

Requirements

Foundations Course: 3 Hours

ENGL2035 - Writing for Public Forums

Credits: 3

Introduction to professional writing that focuses on analyzing and producing texts designed to influence public opinion. Genres may include letters, editorials, web pages, pamphlets, e-mail, speeches, and position papers. Focuses on skills in collaboration and use of technology necessary for ethical, effective participation in public discourse.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: WA/COM1.

OR

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

Program Electives: 6 Hours

Take any 2 of the following courses:

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4020 - Editing for Publication

Credits: 3

Theory and practice of editing in the contexts of book, magazine, newspaper, and web-based publications. Standard editing practices for using grammar, proofreading marks, and computer editing tools.

Prerequisite: WA/COM1, WB/COM2 (ENGL 2035 and ENGL 3000 recommended).

ENGL4025 - Writing for the Web

Covers a variety of issues relevant for composing in the 21st century. As students learn to design and generate effective writing for a particular audience in a digital environment, they will also develop skills with advanced web and print research, basic HTML programming language, and standard web design software. Prerequisites: WB or COM2 and junior standing.

When Offered U3L, U3WC

USP 2003-2014 Code U5C3

Restricted Cannot be enrolled in one of the following Classes:

Freshman (FR)

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENGL4970 - Writing Internship

Credits: 3

Students work 6-8 hours per week as "writing interns" for a private business or public agency, performing specific writing/editing tasks for that client. Students are supported and enabled through a series of classroom sessions and individual meetings with the course instructor. Formal progress reports and a comprehensive final report are required.

Prerequisite: successful completion of ENGL 4010, ENGL 4020, or 4050.

Other Electives: 6 Hours

Courses from any discipline that relates to professional writing; consult with a Professional Writing Minor advisor.

Professional Writing Minor Capstone: 3 Hours

ENGL4000 - 21st Century Issues in Professional Writing

The capstone course in the professional writing minor and also satisfies the COM 3 USP requirement. This spring, we will spend some time constructing a theoretical framework geared toward understanding key issues in the study and practice of professional and technical communication. We'll start with some foundational material, looking at the role of rhetoric, design, and audience in increasingly digital professional writing spaces and then move to more focused study of ethics, visual rhetoric, and the impact of technology on professional communication, among other things. More traditionally academic (journal review) and professional (e.g., usability test and documentation) projects will range widely and include both individual and collaborative work done in different media for different audiences, some academic, some professional. Students will develop a final portfolio project at the end of the term.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Psychology Minor

Learn empirical approaches to understanding human behavior from biological, clinical, cognitive, developmental, neuroscientific, and social psychological perspectives. Develop skills in critical thinking, communication, and scientific research.

A minor in psychology requires 18 semester hours in psychology. These must include PSYC 1000 or equivalent and 9 hours at the 3000- level or above. A grade of C or better is required in all minor courses.

Students seeking a minor must have 12 hours exclusive to the minor and not used in the major.

Psychology, Minor in Aging Studies

Academic Standards:

At least 12 credit hours in a minor must be from courses that are not being counted toward the student's major. No grade below a C is acceptable for courses applied to the minor.

Background Check:

Students seeking the minor in Aging Studies will be required to obtain a background check. Please contact us for specific information.

Core Courses

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3

Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

PSYC3400 - Community Resources for Older Adults

Credits: 3

The purpose of this course is to raise student awareness of the needs of older adults in the community and to evaluate the continuum of long-term care resources available, service gaps, program models, and funding mechanisms. Community-based learning is required.

Prerequisite: FCSC 2110 or PSYC 1000

PSYC4970 - Aging Minor Internship

Credits: 1-6

This course provides students in the Aging Studies Minor the opportunity to experience applied aspects of aging studies in a community setting. Prior to registration the student must work with the minor advisor and instructor to identify the internship setting and complete all required paperwork.

Prerequisite: Completion of all other degree requirements

Electives

(9 credits hours - 6 credits must be outside student major)

An interdisciplinary program, current approved courses are offered through the College of Agriculture, College of Arts and Sciences, and College of Health Sciences.

Public Law Minor

A minor in Public Law offers an opportunity for interdisciplinary study.

Requirements

POLS4100 - Constitutional Law: Institutional Powers

Credits: 3

Encompasses case-study analysis of judicial decisions and policies affecting constitutional interrelationships among the three branches of federal government, federal-state relations, as well as powers of the states and federal government in the area of social and economic regulatory laws.

Dual Listed POLS 5100.

Prerequisite: POLS 1000.

POLS4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed CRMJ 4110.

Dual Listed POLS 5110.

Prerequisite: POLS 1000, POLS 3100 recommended.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

- 9 hours from an approved list of courses in political science and other disciplines, with a minimum of 3 hours at the 3000-level or above.

Approved Public Law Minor Courses

POLS2490 - Topics In:

Credits: 1-3

Max Credit (Max. 6)

Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

POLS4090 - Anglo-American Jurisprudence

Credits: 3

Considers topics, such as functions of law in a democratic society; historical origins and growth of the common law as contrasted to the civil (code) law systems; and principal theories of nature and functions of law which have influenced development of English and American legal institutions.

Dual Listed POLS 5090.

Prerequisite: 9 hours of political science or philosophy, including POLS 1000.

POLS4160 - Legal Philosophy

Credits: 3

This course examines the philosophies that undergird the law, considering both ancient and modern legal thought. Throughout the course, both historical and contemporary examples will be used to illustrate the salient differences between philosophical approaches, to better articulate our understanding of the law.

Dual Listed POLS 5160.
Prerequisite: POLS 1000.

POLS4710 - Topics in

Credits: 1-3
Accommodates various specialized subjects not offered as regular courses.

Prerequisite: POLS 1000 and 3 additional hours of political science.

AGEC3400 - Agricultural Law

Credits: 3
Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)
USP 2003-2014 Code U3WB
Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

COJO4500 - Mass Communication Law

Credits: 3
Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

CRMJ2210 - Criminal Law

Credits: 3
Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ3110 - Criminal Courts and Processes

Credits: 3
Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed SOC 4350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

OR

SOC4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed CRMJ 4350.

Dual Listed SOC 5350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

OR

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

OR

PSYC4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed CRMJ 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

HIST4515 - American Legal History

Credits: 3

An intensive course in the history of American law, the judicial system, the legal profession and legal administration from colonial times to the present.

Dual Listed HIST 5515.

Former Course Number [4710]

Prerequisite: 9 hours of HIST.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

Public Relations Minor

Public relations is a minor that can help you in numerous fields. It is foundational for learning how to promote your organization and build relationships with many different publics to the benefit of all involved.

Required: 12 Hours

COMM1000 - Intro to Mass Media

Credits: 3

An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number COJO 1000

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

Prerequisite: COJO 3310.

Three of the Following: 9 Hours

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of

writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4230 - Special Topics in Mass Media

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

Total: 21 Hours

Queer Studies Graduate Minor

Immerses students in advanced theoretical, historical and contemporary issues related to sexuality. Upon completion, students will be able to analyze systemic exclusion/inclusion, conduct independent interdisciplinary analysis through a queer studies lens, and apply queer theory to practice.

Requirements

A graduate minor in Queer Studies requires the completion of 12 credit hours, including AMST 5430 - Queer Theory/ GWST 5430 - Queer Theory , a minimum of 6 hours at the 5000+ level, and a capstone experience or independent study. For committee-based degree programs with queer studies content, it is expected that the student will include one committee member from Queer Studies faculty.

Faculty Advisory

An interdisciplinary, independent Queer Studies committee advises the program on curriculum, scheduling and coordination. A faculty advisor is assigned to the student on declaration of the minor.

The faculty advisory committee for the minor includes:

- Rachel Watson, Director Queer Studies, Chemistry
- Ulrich Adelt, American Studies, African American & Diaspora Studies
- Ruth Olga Bjorkenwall, Politics, Public Affairs & International Studies
- Christine Boggs, Ellbogen Center for Teaching & Learning
- Catherine R. Connolly, Gender & Women's Studies
- Danielle Renee Cover, Law
- Michelle Jarman, Disability Studies, Gender & Women's Studies
- Barbara Ellen Logan, History
- Jamie Snyder, Criminal Justice & Sociology
- Lilia Soto, American Studies, Latino/a Studies
- Jennifer Tabler, Criminal Justice & Sociology

Please contact the program director, Rachel Watson (RWatson@uwo.edu), for more information.

Queer Studies Minor

Immerses students in theoretical, historical and contemporary issues related to sexuality. Upon completion, students will be able to analyze systemic exclusion/inclusion, conduct independent interdisciplinary analysis through a queer studies lens, and apply queer theory to practice.

Requirements

The Queer Studies minor requires the completion of 18 credit hours, including GWST 2000 - Introduction to LGBTQ/NS Studies and nine or more credits at the 3000-level or above. Each semester, students, in consultation with a queer studies advisor, will choose elective courses. A capstone project or internship is required but can be variable and determined in consultation with an advisor.

Faculty Advisory

An interdisciplinary, independent Queer Studies committee advises the program on curriculum, scheduling and coordination. A faculty advisor is assigned to the student on declaration of the minor.

The faculty advisory committee for the minor includes:

- Rachel Watson, Director Queer Studies, Chemistry
- Ulrich Adelt, American Studies, African American & Diaspora Studies
- Ruth Olga Bjorkenwall, Politics, Public Affairs & International Studies
- Christine Boggs, Ellbogen Center for Teaching & Learning
- Catherine R. Connolly, Gender & Women's Studies
- Danielle Renee Cover, Law
- Michelle Jarman, Disability Studies, Gender & Women's Studies
- Barbara Ellen Logan, History
- Jamie Snyder, Criminal Justice & Sociology
- Lilia Soto, American Studies, Latino/a Studies
- Jennifer Tabler, Criminal Justice & Sociology

Please contact the program director, Rachel Watson (RWatson@uwyo.edu), for more information.

Religious Studies Minor

The Minor in Religious Studies requires eighteen hours of relevant courses, all with a grade of "C" or higher. These should consist of courses as set out below:

Relevant Courses: 18 Hours

RELI1000 - Introduction to Religion

Credits: 3

Introduces world religions and shared characteristics. Draws on various academic approaches to religion study, emphasizing similarities and differences among wide variety of religions.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

RELI4000 - Theories of Religion

Credits: 3

Investigates different theories proposed to explain religion and methods used to investigate them. Pays primary attention to influential thinkers and theorists of the past century.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: RELI 1000, and 12 additional hours in Religious Studies, at least 6 of which must be at the 3000-level or above, junior standing.

- Twelve hours of courses focusing on issues in the study of religions, nine of which should be at the 3000 level or higher. Occasionally, courses on religion are taught by outside departments as one-time opportunities. Students may propose these for inclusion in the major to the Religious Studies Program Director

Sculpture Minor

The Sculpture Minor introduces students to the discipline of Sculpture in a 24 credit hour sequence.

Required Courses: 12 Hours

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color, emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

Studio Elective Courses in Sculpture: 9 Hours

Choose from the following:

ART3310 - Sculptural Practices: Cast Form I

Credits: 3

Max Credit (Max. 6)

This intermediate sculptural practices course explores a wide variety of mold-making and processes including cold-casting (paper/fabric/resin casting) and both non-ferrous (bronze and aluminum) and ferrous metal (cast iron) casting techniques. Assigned projects will allow students to engage in the production of finished cast sculpture. Extensive sketchbook, artist research, and critique participation is required.

When Offered (Offered fall semester)

Prerequisite: ART 2310 and 2000.

ART3320 - Sculptural Practices: Mixed Media I

Credits: 3

Max Credit (Max. 6)

This intermediate course explores mixed media processes in sculptural practices including soft sculpture fabrication with fabric and fiber, found object manipulation, and digital processes involving 3D printing and laser cutting. Assigned projects will engage students in the production of artwork related to the topic. Extensive sketchbook, artist research, and critique participation is expected.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2310 and ART 2000.

ART3330 - Sculptural Practices: Assembled Form I

Credits: 3

Max Credit (Max. 6)

Investigates constructed and assembled form as an essential means of sculptural expression. Emphasizes wood construction, assembled metals and mixed media. Utilizes general carpentry techniques, a variety of welding methods (oxyacetylene, arc, M. I. G. and T. I. G.) and other means of assembling materials. Includes investigation of concepts in assemblage and exposure to classic and contemporary forms of assembled sculpture.

When Offered (Offered spring semester)

Prerequisite: ART 2310 and ART 2000.

ART3345 - Sculptural Practices: Special Topics

Credits: 3

Max Credit (Max. 9)

This course addresses specific areas of contemporary sculptural practices such as: Installation, Video/Sound manipulation, kinetic sculpture, and figure modeling. Assigned projects will engage the students in production of artwork related to the topic. Extensive sketchbook work, artist research, and critique participation is expected.

Prerequisite: ART 2310 and ART 2000.

Art History Survey Elective: 3 Hours

Choose one from:

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient, medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

OR

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Total Credits: 24 Hours

Sociology Minor

Sociology is the study of the development, interaction, and behavior of organized human groups. Sociology provides powerful insights into the social processes that shape our lives, the problems we face, and the possibilities we can envision.

Requirements

The sociology minor requires a total of 18 sociology credits including SOC 1000. At least 9 of these 18 hours must be upper-division sociology credits.

Only grades of C or better can be counted toward the minor. Also, students seeking a minor must have 12 credit hours exclusive to the minor and not counted toward their major.

Spanish Minor

As a Spanish Minor, you will develop your speaking, listening, reading, writing, and presentational skills in Spanish. You will gain a better understanding of perspectives and experiences of Spanish speaking cultures.

Electives

- 18 hours of electives in Spanish at the 2000-level or above (excluding SPAN 2030).
- Elective courses include:

SPAN3040 - Spanish Conversation

Credits: 3

Emphasizes speaking and listening comprehension through structured and monitored individual, pair, small group and class work, while providing socio-cultural competence, vocabulary acquisition and grammar review. Provides enhanced language skills in a manner that otherwise could only be attained through an extended stay in a Hispanic country.

Prerequisite: SPAN 2040; limited to Spanish majors/minors with no previous experience abroad.

SPAN3070 - Intensive Spanish Abroad

Credits: 3

Max Credit (Max. 9)

Spanish language and cultural study in Spanish-speaking countries led by UW faculty.

Prerequisite: SPAN 2030 or consent of instructor.

SPAN3080 - Spanish Language in the USA

Credits: 3

This course studies the Spanish language in its social context as a language of the United States, through concepts such as: social and individual bilingualism, Spanglish, dialects, language contact, borrowings, code switching, language policy, or language ideology.

Cross Listed LTST 3080.

USP 2015 Code U5H

Prerequisite: SPAN 3050 or SPAN 3060 or instructor's consent.

SPAN3200 - Spanish Culture and Civilization

Credits: 3

Studies the evolution of Spanish culture through its main artistic, sociological and intellectual expressions.

Prerequisite: SPAN 2040, SPAN 2140.

SPAN3220 - Spanish-American Cultures in Context

Credits: 3

Introduction to the Spanish-speaking cultures of Latin America and the United States through a historical overview and a focus on contemporary politics and culture.

Prerequisite: SPAN 2040 or SPAN 2140 or consent of instructor.

SPAN4070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 5070.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectical variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

Total: 18 Hours

Theatre Minor

Required Courses

*THEA 2150 is a prerequisite for THEA 3810

THEA1040 - Production Crew I

Credits: 0.5

Participation in one Departmental production during semester enrolled. Contribute to the preparation and/ or actual production of one stage play in the areas(s) of lighting, costume construction, set construction, scenic painting, stage properties, or arts management. Required for all Theatre & Dance freshmen.

Prerequisite: consent of instructor.

THEA1100 - Acting I

Credits: 3

Acting I introduces students to the study of the actor's process with an emphasis on analyzing, rehearsing and performing scenes in front of an audience. The student will be introduced to exercises which promote creative expression. Scene work and scoring will focus on contemporary realism.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Restricted Theater majors or permission of instructor

THEA1200 - Introduction to Design

Credits: 3

Introduces and explores visual aesthetic principles as they relate to various aspects of stage design. Studio projects in scene, lighting, and costume design supplement lectures. Prerequisite for other design courses.

THEA2010 - Theatrical Backgrounds Drama I

Credits: 3

First semester of a two-course series. Introduces dramatic literature through the ages.

THEA2020 - Theatrical Backgrounds Drama II

Credits: 3

Second semester of a one-year course. Continues THEA 2010.

Prerequisite: THEA 2010.

THEA2040 - Production Crew II

Credits: 0.5

Continues the "hands-on" production crew experience provided by Production Crew I. Contribute to a Theatre Department production in the area(s) of lighting, costume construction, set construction, scenic painting, stage properties, stage management, or arts management. Required for all Theatre & Dance majors.

Prerequisite: THEA 1040.

THEA2220 - Stagecraft

Credits: 3

Introduces students to basic stage production practices and techniques, including safe rigging practices, set construction, scenic painting, stage properties, and stage lighting. Students are encouraged to participate in "hands-on" demonstrations during classes.

THEA2800 - Stage Lighting I

Credits: 3

Examines the elemental aspects of stage lighting including equipment, facilities, color, and fundamental electricity. Requires studio work on departmental productions. Intended for majors in the program.

Former Course Number [3800]

Prerequisite: THEA 2150 and THEA 2220.

OR

THEA3810 - Scene Design I

Credits: 3

An in-depth study of idea development from script analysis through design conception using different types of theaters and source material. The design process will cover research, drawing, drafting, model making, and rendering.

Prerequisite: THEA 2150 and THEA 2220 or by permission of instructor.

OR

THEA3820 - Stage Costuming I

Credits: 3

A study of basic drawing and rendering skills, and a selective study of historical silhouettes. Objectives include the ability to trust instinct, application of the basic elements of design, applying historical reference and research to a specific character, developing a concept and finally the application of these principles to a final project.

Former Course Number [4840]

Prerequisite: THEA 1100.

- Plus 3 hours of electives in Theatre and Dance (must be 4000 level or above)

Wildlife Fisheries Biology Management Minor

Course include theory and techniques involved in the management, conservation, and captive propagation of wildlife and fish populations. Includes both classroom and field experiences in a Rocky Mountain setting.

Wildlife Fisheries Biology Management minor - requirements

Requirements for the minor in wildlife fisheries biology management (WFBM) include a minimum of 18 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Courses

9 or 11 credit hours required from the following:

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

One (1) Course From:

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

OR

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

Elective Courses

Select three (3) of the following courses, one of which must have a laboratory component:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

Zoology Minor

Explore form, function, behavior, ecology, evolution and conservation of animals and hone analytical, writing, and research skills.

Zoology Minor - requirements

Requirements for the minor in zoology (ZOOL) include a minimum of 17 credit hours. Courses counted towards one minor may not be counted towards another. A grade of C or better is required in all courses.

Required Course

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Elective Courses

Select four (4) of the following courses, one of which must have a laboratory component:

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

Graduate

American Studies, M.A.

The American Studies M.A. is an interdisciplinary cultural studies professional development degree. M.A. graduates work in public settings, including historic preservation organizations, historic sites, museums, collections, and other non-profit organizations.

Information

Graduate Study

The American Studies M.A. is an interdisciplinary professional development degree in a committed learning community that builds on students' research interests, accomplishments, experiences, and career goals working with American cultural contexts past and present. After the M.A., our alums seek further professional specialization in law, education, writing, library and information science, and other fields; pursue Ph.D.'s in academic careers in American

Studies and other scholarly areas including ethnic studies, cultural geography, literature, religious studies, anthropology, history, ethnomusicology, among others; and work professionally in public settings, including historic preservation organizations, historic sites, museums, collections, and other non-profit, community or governmental organizations.

The M.A. is a 2-year program for students enrolled full-time, culminating in a major research project, either a "Plan A" thesis, or a "Plan B" non-thesis portfolio of work. We work frequently with part-time M.A. students to accommodate other demands on students' time. We encourage the development of emergent, innovative formats and project types as valuable contributions to contemporary American studies practice, relevant to a student's professional development plans.

Because American Studies is an international field with scholars all over the world, and the U.S. has significant impacts transnationally, M.A. Students from outside the U.S. are a regular part of our M.A. cohort, and we encourage our M.A. students to consider semester exchanges abroad. The Program also supports American Studies M.A. student and faculty participation in the annual biennial international conferences.

All M.A. students complete at least 15 credit hours in American Studies courses: 2 required theory and methods courses in the Program (AMST 5500 and AMST 5510), and 3 graduate seminars in American Studies. The remainder of coursework - 12 credits for those completing a thesis, or 15 credits for those completing non-thesis portfolios - can be drawn from graduate-level coursework in any area of study. Most of our M.A. students complete 1-3 credit internships as part of their coursework, in public or organizational sites in Laramie, elsewhere in Wyoming or the U.S., and occasionally abroad as well. M.A. students' paths through their programs of study are as varied as our students.

Program Learning Outcomes

Students graduating with an M.A. in American Studies integrate their educational backgrounds, research and professional interests, and coursework at the M.A. level inside and outside American Studies, in individual programs of study, to professionally engage American cultural production and communities in preparation for professional work or advanced graduate study. Students earning the M.A. in American Studies, either completing a thesis or pursuing the non-thesis Plan B project, are prepared to:

- Interpret a variety of objects significant to the study of American cultures, including words, narratives, images, material objects, communities, built environments, identities, cross-cultural and/or international perspectives, continuities and discontinuities with the past in a range of cultural settings.
- Demonstrate professional competence in writing and speaking in error-free expository prose, authoritative oral presentation, insightful use of relevant source material reflecting critical reading skill, prose style commensurate with professional responsibility, and prose content commensurate with professional responsibility.
- Produce professional research for a well-defined community (scholarly, public, or an appropriate combination), by identifying and using primary sources, building approaches from a relevant matrix of secondary sources, and understanding scholarly traditions within the field of American Studies that supports, expands, and connects research to professional goals.
- Make effective plans for advanced graduate study or professional employment by developing competencies listed above, including the opportunity to complete appropriate internship or field course work in an area of the student's professional plans.

Program Specific Admission Requirements

Those interested in graduate study are encouraged to contact the American Studies Program (307-766-3898 or amst@uwyo.edu) for more information.

Applicants to the M.A. program do not have to have prior majors in American Studies. The American Studies program does not require the GRE in applications to our M.A. program.

The application deadline for fall enrollment is March 1. A minimum of a 3.0 undergraduate cumulative GPA is required for admission. In addition to an application, please submit the following via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>):

1. Statement of Purpose
2. A significant writing sample (usually a seminar paper or, for those coming from technical fields, a major report) that demonstrates potential for graduate study
3. Three letters of recommendation that assess the student's academic and research abilities
3. Transcripts from all undergraduate institutions and graduate programs

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Financial Aid

The American Studies M.A. is generously supported by endowment funds that allow us to award significant financial aid to M.A. students enrolled full time, through teaching, research, or community organization assistantship placements, as well as scholarship support as appropriate for students' own M.A. research.

Program Specific Degree Requirements

Graduate student must successfully complete 30 hours (for Plan B non-thesis) or 31 hours (for Plan A thesis) of graduate credit including the following:

Required Courses

(3 credit hours) AMST 5500 with a grade of B or better

(3 credit hours) AMST 5510 with a grade of B or better

(9 credit hours) graduate (5000) level AMST courses

Additional Requirements

Plan A thesis:

(12 credit hours) of graduate (5000) level courses in any field

(4 credit hours) of AMST5960 - Thesis Research

Completion of a Master's Thesis

OR

Plan B non-thesis:

(15 credit hours) of graduate (5000) level courses in any field

Completion of a non-thesis project

Completion of exam

Anthropology, M.A.

M.A. students receive training in the four subfields of anthropology, complete original research, and develop skills which foster professionalism as related to their chosen field.

Plan A (Thesis)

Any M.A. student receiving a grade of C or less in two core classes will be expelled from the program.

If not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Core-Course Sequence

Completion, with a grade of "B" or better of a four core-course sequence. This sequence will consist of

ANTH5010 - 20th Century Anthropology Theory

Credits: 3

Examines major thinkers and schools of thought in anthropology of the 20th century. Emphasis is on cultural theory within the context of the four-field approach.

Prerequisite: graduate standing in anthropology.

ANTH5015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of most significant topics. Addresses questions, such as: How do archaeologists go about identifying and solving problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 4015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH5020 - Biological Anthropology

Credits: 3

Offers a graduate level overview of biological anthropology. Beginning with the history of relevant areas of human biology, provides extensive discussion of such areas as paleoanthropology, primatology, and human variation. Also includes detailed theoretical examinations of topics within hominid evolution, the concept of race and sociobiology.

Prerequisite: first year anthropology graduate student standing.

ANTH5030 - Linguistic Anthropology

Credits: 3

Demonstrates interrelationships between language, human biology, and culture. In particular, the relevance of the study of language to biological anthropology, archaeology, and cultural anthropology is emphasized. Examines classic approaches in anthropological linguistics and recent controversies such as the origin of language in human evolution.

First semester (Fall):

Students will submit form to the graduate advisor and department head identifying their thesis advisor BEFORE the graduate assistant allocation meeting (mid-late November).

Second semester (Spring):

Students will work with their advisor to select their committee, which must be formed and on-file in the department office by the end of the semester. During the core classes' final exam periods, students give a presentation to departmental faculty which outlines the general ideas for their proposed thesis.

Second semester research presentations are assessed by all department faculty in attendance at the presentation and evaluations will be given to the student's advisors. It is expected that students will work closely with their advisors to rectify any problems before they complete their thesis prospectus in the third semester.

Third semester (Fall):

Working closely with their advisor and committee, students complete a detailed prospectus and gain approval from thesis committee for MA thesis topic.

Fourth semester (Spring):

Thesis is completed and is approved by thesis committee.

Plan B (Non-Thesis)

All requirements for a Plan A except thesis, if not completed prior to admission; two semesters of a single foreign language and one statistics course must be completed.

Anthropology, Ph.D.

Provides students with training so to achieve academic or non-academic career goals. Students have a dissertation experience that results in professional publication. They will also have practical experience that will promote movement into careers.

Program Requirements

Student maintains a portfolio which documents teaching, internship, and research experience.

Students are encouraged to present papers at professional conferences and submit articles for publication throughout their tenure as a student. After admission to candidacy, the student is expected to research, write, and defend a dissertation based on original research (up to 48 credit hours). Students may either submit a single dissertation or a series of integrated publishable articles (30-40 pages each). The student's committee must approve this choice and decide on the number, length and content of the articles at the same time, usually at the committee hearing prior to the preliminary exams. For the final submission of the dissertation, the student must also complete an introduction and conclusion to contextualize and synthesize the integrated articles.

A Minimum of Six Content Courses: 18 Hours

A minimum of six content courses (18 hours) chosen by the student in conjunction with the student's committee. These courses are normally completed in the first two years of the Ph.D. program. In addition to anthropology courses, the other 4000/5000-level courses outside of the department may be required by the committee or chosen by the student in consultation with their committee.

First or Second Year:

Two additional courses in their first or second year

ANTH5880 - Professionalism

Credits: 3

Provides an opportunity for the integration of graduate training and career choice. Examines issues of professionalism in the discipline ranging from ethical conduct to the research process and publication.

Prerequisite: admission to the doctoral program in anthropology.

ANTH5890 - Teaching Anthropology

Credits: 3

Anthropology is increasingly relevant to many audiences. Provides practical insight and examination of controversial anthropological concepts

Prerequisite: admission to the doctoral program in anthropology.

Teaching Experience

Teaching experience, including standalone courses, after completion of the first semester of ANTH5890 - Teaching Anthropology, as well as teaching assistance to UW faculty members.

Internship Experience Credits: 6-24 Hours

Participation in an approved internship experience (6-24 credit hours). Students pursue internships in state and federal agencies, museums, contract archaeology organizations, and other organizations that offer potential career experience.

Dissertation Proposal

Committee meeting and successful completion of a dissertation proposal.

Preliminary Exams

Preliminary exams take place after the completion of 18 hours of content courses. ANTH 5880, and Teaching and Learning in Anthropology (ANTH 5890, or other as designated), normally before the end of the second year. If a student does not receive a passing grade on the preliminary exam, it can be repeated once. Failure to pass the preliminary examination the second time results in termination from the anthropology program.

Highly Recommended

International experience is highly recommended but not required, e.g. pre-dissertation summer fieldwork.

Botany, M.S.

Requirements for this degree are 26 semester hours of courses approved by the student's committee plus four hours of BOT5960 - Thesis Research.

Botany, Ph.D.

In addition to the minimum requirements set forth in this Catalog, the Department of Botany may require that a student demonstrate skills in two peripheral areas. This decision is made for individual cases by the major professor and graduate committee. These could include foreign languages, statistics, or computer science. In some cases, additional skills may be required.

Chemistry, M.S.

The MS degree introduces students to critical thinking necessary to work independently in industrial settings & prepares you for a professional career. Provides classroom training, presentation & teaching skills along with professional development

Plan A (Thesis)

In addition to fulfilling the minimum university requirements, a student must take the Career Skills course (CHEM 5000) plus one 3 hour course in each of three of the four areas (inorganic, analytical, organic, and physical), excluding special topics and research courses. These courses must be graduate courses, 5000 and above.

One departmental seminar is required to be presented on the thesis research.

Take 9 Credits

A student may also take 9 credits of any combination of

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: consent of instructor.

Additional Requirements

The M.S. committee consists of the student's major professor and two other members. The M.S. Committee is responsible for advising the candidate concerning course work and research. The M.S. Committee is also responsible for the final examination of the candidate. In addition to a thesis, the M.S. candidate is also required to present a departmental seminar on the thesis topic.

A student must take the Career Skills course (CHEM 5000) plus one three-hour course in each of three of the four areas (inorganic, analytical, organic, and physical), excluding

special topics and research courses. These courses must be graduate courses, 5000 and above. A student may also take nine credits of any combination of CHEM 5190, 5290, 5390, 5590, or 5790. One departmental seminar is required on the thesis research.

A student in a M.S. program who is in good standing with a grade point average equal to a B or greater may petition to transfer into the Ph.D. program upon approval of his/her M.S. committee and recommendation of the Graduate Committee.

Chemistry, Ph.D.

Our Ph.D. program is a research degree in advanced chemistry that prepares our students for careers in academia or as leaders in industry. A Master's degree is not required; students may enter directly into the Ph.D. program.

Students May Also Take

A student may also take 12 credits of any combination of

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: consent of instructor.

Area Selected as a Major

In the area selected as a major, the student will take the following as a minimum:

Analytical

CHEM5250 - Advanced Chemical Instrumentation

Credits: 3

Introduces chemistry students to the basic elements of electronics. Specific topics include networks, passive and active filters, digital electronics, logic gates, counters, flip-flops, and converters. Second half of course introduces students to experimental design, pattern recognition, factorial analysis, and multivariate statistical methods.

Prerequisite: CHEM 4230 or its equivalent.

- plus 9 hours of graduate level analytical courses

Inorganic

- 12 hours of graduate level inorganic courses

Organic

CHEM5320 - Spectroscopic Methods of Structure Determination

Credits: 3

Provides theoretical and practical treatment of spectroscopic methods for application in research. Topics include ultraviolet, infrared, and nuclear magnetic resonance spectroscopy and mass spectrometry.

Prerequisite: CHEM 2440, CHEM 4507.

CHEM5330 - Advanced Organic Chemistry

Credits: 3

Treatment of organic chemistry from the viewpoints of structure and mechanism with emphasis on structural theory of bonding, stereochemistry and the general classes of organic reactions.

Prerequisite: CHEM 2440 and CHEM 4507.

CHEM5340 - Synthetic Methods in Organic Chemistry

Credits: 3

Surveys and applies the important synthetic methods of organic chemistry with particular attention to recent developments.

Prerequisite: CHEM 5330.

- CHEM 5350

Physical

- any three graduate level physical chemistry courses

Additional Requirements

In addition to fulfilling the minimum university requirements, a student must take the Career Skills course (CHEM 5000) plus one 3 hour graduate course (5000 and above) in each of the four areas (inorganic, analytical, organic, and physical), excluding special topics, tool courses CHEM 5130, CHEM 5320, CHEM 5760, and research courses.

A student may also take 12 credits of any combination of CHEM 5190, 5290, 5390, 5590, or 5790.

Students must obtain satisfactory performance on a series of written major field cumulative examinations, including special topics.

Students must obtain satisfactory performance on a preliminary examination, part written and part oral.

Students must present a seminar based on the dissertation research. Students must also obtain one additional credit of 5000 by presenting a divisional or departmental seminar or an oral presentation at a regional or national research meeting. In addition, students must make one presentation at the annual University of Wyoming Graduate School Symposium.

Communication, M.A.

Administered by the Director of Graduate Studies, the programs are structured to facilitate completion of requirements for the M.A. degree in two years. Deficiency makeups may be required.

Research Thesis: 31 Hours

31 hour program.

Students must complete an accepted research thesis approved by the student's thesis committee.

Students must complete a minimum of 27 credit hours and 4 hours of thesis credit. A minimum of 24 hours must be within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 3 hours of 4000-level coursework.

Students Must Complete

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

COJO5080 - Qualitative Research Methods

Credits: 3

Students study principles and issues associated with qualitative methods used in communication and media research. The class explores methods that use interpersonal communication and observation as tools for data collection and explores methods that analyze media content from a critical and qualitative perspective.

Prerequisite: graduate standing.

COJO5800 - Foundations of Communication and Journalism

Credits: 3

Examines current issues and trends in the various areas of communication and journalism that are represented within the department. Students analyze the historical roots of these issues and trends as a way of understanding the present context and future evolution of communication and journalism scholarship.

Prerequisite: first year of graduate study and acceptance into the COJO graduate program.

One of the Following Theory Courses:

COJO5061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 5061.

Dual Listed COJO 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

COJO5310 - Seminar in Mass Communications

Credits: 3

The study of contemporary, historical, critical and behavioral theories of mass communication processes. Attention primarily on the social functions performed by mediated messages.

Prerequisite: graduate standing.

COJO5540 - Seminar in Communication Theory

Credits: 3

An intensive examination of various metatheoretical assumptions and theoretical models used in the study of communicative dynamics.

Prerequisite: graduate standing.

Professional Project: 33 Hours

33 hour program.

Students must complete an accepted professional project (e.g., documentary film, public relations and marketing plan, website) approved by the student's graduate committee. Students who chose the project option will be required to take 30 credit hours plus 3 hours of Graduate Project credits (for a total of 33 credit hours). A minimum of 27 hours must be taken within the department, with a maximum of 6 hours of independent study, 3 hours of internship credit hours, and 6 hours of 4000-level coursework.

Students Must Complete

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

COJO5080 - Qualitative Research Methods

Credits: 3

Students study principles and issues associated with qualitative methods used in communication and media research. The class explores methods that use interpersonal communication and observation as tools for data collection and explores methods that analyze media content from a critical and qualitative perspective.

Prerequisite: graduate standing.

COJO5800 - Foundations of Communication and Journalism

Credits: 3

Examines current issues and trends in the various areas of communication and journalism that are represented within the department. Students analyze the historical roots of these issues and trends as a way of understanding the present context and future evolution of communication and journalism scholarship.

Prerequisite: first year of graduate study and acceptance into the COJO graduate program.

One of the Following Theory Courses:

Credits: 3

The study of contemporary, historical, critical and behavioral theories of mass communication processes. Attention primarily on the social functions performed by mediated messages.

Prerequisite: graduate standing.

COJO5540 - Seminar in Communication Theory

Credits: 3

An intensive examination of various metatheoretical assumptions and theoretical models used in the study of communicative dynamics.

Prerequisite: graduate standing.

Creative Writing, M.F.A.

This fully-funded MFA program is dedicated entirely to prose. We teach a wide range of courses in fiction, nonfiction, and hybrid forms. We offer award-winning faculty and prepare graduates to release books with prominent commercial and small-press publishers.

Additional Information

M.F.A. students follow the guidelines for a Plan A thesis. Only those courses in which a grade of B or better has been earned may be applied to the graduate program of study. All courses must be taken for a grade unless offered for S/U only. No graduate credit is allowed for grades S and U.

The cumulative GPA must be at least 3.000 to receive a degree. Courses below 4000-level will not count toward the degree nor will they be figured in the GPA, although they will appear on the transcript.

A minimum of four Workshops (CW 5560) and/or Creative Writing Seminars (CW 5540) must be taken. These may be in any combination to reach the four-course total, typically for a total of 12-16 credit hours. We require a cross-genre component in that mix of courses.

Requirements

- Elective courses (typically taken for a total of 18 credit hours)

ENGL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4
Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

- Other electives: free to be taken in any UW program or department across campus
- Thesis Hours (5960): 4 credit hours

Total Credits: 36 Hours (Minimum)

Total credit hours must be a minimum of 36.

Criminal Justice Concentration within the M.P.A.

The Master of Public Administration Program with Criminal Justice Concentration is a professional degree designed for current and future leaders in the criminal justice field.

Plan B (Non-Thesis)

A criminal justice concentration within the master of public administration program is offered by the Criminal Justice program. Students wishing to enroll in the M.P.A. with criminal justice concentration must first be admitted into the M.P.A. program. See M.P.A. program admissions requirements for specific details.

The M.P.A. with criminal justice concentration curriculum consists of 39 credits including: 24 hours of core credit; criminal justice (4) courses; and one additional approved elective course. Students may complete the degree within two years full-time or approximately three-four years part-time. Courses are offered through distance education, which allows students to complete their degree in their community while working full-time.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/ electronic class discussion.

Students must maintain a graduate GPA of 3.000.

MPA Required Core Courses

POLS5000 - Survey of Public Administration

Credits: 3

Designed to introduce the beginning graduate student to the study and practice of public administration at all levels of government. Attention is also directed to specific functions and processes such as intergovernmental relations, budgeting, personnel, and regulation.

Prerequisite: graduate status and consent of instructor.

POLS5400 - Public Personnel Management

Credits: 3

Designed to integrate information about the political environment of personnel administration with problem solving exercises in such specific areas as job analysis, affirmative action, and flextime. A number of topics including the evolution of the civil service, the rights and responsibilities of governmental employees, the functions of public personnel management, and collective bargaining processes are also covered.

Prerequisite: POLS 5000.

POLS5410 - Administrative Behavior and Theory of Organization

Credits: 3

An advanced course in the theory of organization and the workings of public agencies.

Prerequisite: POLS 5000.

POLS5440 - Principles and Processes of Government Budgeting

Credits: 3

Analyzes the principles, processes and politics of the budgetary process in the U. S. It examines the various theories of budgetary decision-making, the politics of budgeting and budgetary reforms.

Prerequisite: POLS 5000 and graduate standing.

POLS5480 - Ethics In Government

Credits: 3

The student is introduced to the ethical nature and dilemmas of public administration in American constitutional

government. Such topics are addressed as source of ethical obligation, role of loyalty, application of moral philosophy, constitutional theory and ethical obligation, relation of theory and practice, and methods of ethical reflection.

Prerequisite: POLS 5000.

POLS5510 - Public Policy and Program Management

Credits: 3

An overview of governmental policy making processes in the U. S and the uses of applied policy analysis.

Prerequisite: POLS 5000.

POLS5684 - Empirical Analysis for Public Administration

Credits: 3

Designed for students in public administration to train them to make decisions based on empirical evidence in policy and management. Course draws concepts from system analysis, management science, operations research, and social science methodology to provide an understanding of various policy analysis and program management techniques across many applications.

Prerequisite: POLS 5000.

POLS5690 - Capstone in Public Management

Credits: 3

Integrates theories and concepts introduced in core and option-core courses, and emphasizes students' application of them to various administrative settings.

Prerequisite: completion of all other core and option core requirements in the MPA Program.

Criminal Justice Concentration Courses

Required Criminal Justice Concentration Courses

CRMJ5000 - Survey of Criminal Justice

Credits: 3

Provides an overview of criminal justice theory by providing critical evaluation and discussion of research in the criminal justice field. It will emphasize seminal works and review current research concerning the structure, function, operation, interaction of the criminal justice system's primary components, and future trends.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5100 - Public Policy and Crime

Credits: 3

This course is designed to take a multidimensional look at public policy issues related to the prevention and control of crime in the United States. Issues covered include the development, implementation, and evaluation of crime control policy.

Prerequisite: Admission to the MPA Program or consent of instructor.

Elective Criminal Justice Concentration Courses

*Students with little or no administration and/or criminal justice professional experience must enroll in CRMJ 5500 as one of their electives.

(students must select two of the following courses)

CRMJ5151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 4151.

Prerequisite: graduate standing or consent of instructor.

CRMJ5280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 4280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: graduate standing.

CRMJ5500 - Internship in Criminal Justice

Credits: 3

Educationally-oriented assignments for work in selected criminal justice agencies, with tutorial types of supervision.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis

will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 4860.

Prerequisite: graduate standing or consent of the instructor.

Approved Elective Credit

One additional approved MPA elective course is required. For additional options, contact the MPA director.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3

Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

STAT5220 - Advanced Design

Credits: 3

Advanced study of experimental designs, observational designs, and mixed models. Topics include fixed and random effects, factorial, split-plot and repeated measures designs, and hierarchical models. Linear model methodology and Data Science concepts will also be emphasized.

Prerequisite: MATH 5265/STAT 4265/STAT 5265, and at least one of STAT 4015/STAT 5015, STAT 4025/STAT 5025, or STAT 5210.

POLS5420 - Seminar In Public Administration

Credits: 3

Max Credit (Max. 6)

A reading and research course in selected topics in public administration.

Dual Listed POLS 4420.

Prerequisite: POLS 1000 and consent of instructor.

POLS5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 5445.

Dual Listed POLS 4445.

Prerequisite: 9 hours of international studies or social science coursework

POLS5450 - Administrative Regulation

Credits: 3

Significant points of contact between government and business are stressed. Government activities designed to regulate and aid such economic interests as business, labor, agriculture, and consumers are dealt with at length.

Prerequisite: POLS 5000.

POLS5460 - Public Administration and Law

Credits: 3

Focuses on various facets of the relationship between American public administration and law. Emphasis is placed on the emerging body of administrative law as a context for jurisprudential reasoning in administrative decision making.

Prerequisite: POLS 5000.

POLS5465 - Survey of the Nonprofit Sector

Credits: 3

This foundational course is designed to give students of diverse backgrounds a common framework for understanding the nonprofit sector in the United States and globally. Students in this course will identify and interpret key theories, issues, and challenges in the nonprofit world and will consider the implications for practice.

Dual Listed POLS 4465.

Prerequisite: graduate standing.

POLS5500 - Internship in Public Administration

Credits: 1-6

Max Credit (Max. 6)

Educationally-oriented assignments for work in selected public agencies, with tutorial types of supervision.

Prerequisite: consent of instructor.

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

POLS5530 - USCongress

Credits: 3

Analyze aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Dual Listed POLS 4430

Prerequisite: POLS 1000.

POLS5540 - Public Policy Perspectives

Credits: 3

Acquaints students with the underlying structure and dynamics of public policy formulation, implementation, and evaluation at the state, local, and federal levels. Drawing on a number of analytic approaches, the course seeks to understand this complex political phenomenon in the context of the institutions that drive it.

Prerequisite: graduate standing.

POLS5600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Dual Listed POLS 4600.

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS5685 - Program Evaluation and Policy Analysis

Credits: 3

Explores techniques for analyzing and evaluating public policy choices and impacts.

Dual Listed POLS 4685.

Prerequisite: STAT 5070 or equivalent and an introductory research methods course in social science or related discipline.

POLS5710 - Topics In Political Science

Credits: 1-3

Max Credit (Max. 9)

Intended to accommodate various specialized subjects not offered as regular courses.

Prerequisite: graduate standing.

POLS5810 - Seminar in Political Philosophy

Credits: 3

Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 4810.

USP 2015 Code U5C3

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

English, M.A.

Advanced graduate study in English Studies. Students can select from one of three tracks: literary studies; rhetoric, composition, and writing studies; or public humanities.

Required Courses

The following courses are required for all concentrations:

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4

Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5530 - Modern Critical Theory and Practice

Credits: 1-4

Max Credit (Max. 4)

Major trends in modern poetics and practical criticism.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENGL5964 - Thesis Writing Workshop

Designed for students who have reached an advanced stage in the writing of the thesis. Provides targeted, personalized support from peers during the research and writing process and runs concurrently with ENGL 5965.

Prerequisite: ENGL 5960 and enrollment in a graduate degree program

ENGL5965 - Thesis Research II

Credits: 1-3
Max Credit (Max. 3)

Designed for students who have reached an advanced stage in the writing of the thesis. Also to inform students of professional genres and practices as well as academic and non-academic careers following the MA degree.

USP 2015 Code U5H

Prerequisite: ENGL 5960 and enrollment in a graduate degree program.

Electives

Additional coursework can be taken from the following courses.

ENGL5000 - Studies In:

Credits: 1-8
Max Credit (Max. 8)

Provides an opportunity for specialized seminar approaches to subjects in literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5020 - Public-Facing English Studies

Credits: 1-4
Max Credit (Max. 8)

Introduction to the history and theory of public intellectualism and English studies. Students develop theoretical and practical knowledge and explore alternative applications for academic research for publics beyond the classroom.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5050 - Writing in Public Genres

Credits: 1-4
Max Credit (Max. 8)

Intensive introduction to public-facing writing in English subject areas, including articles, book reviews, think pieces, TED talks, podcasts, and other genres of commentary associated with public intellectual work in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5055 - Narrative and Storytelling

Credits: 1-4
Max Credit 8

Exploration of the structure and use of narrative, stories, and/or storytelling from a variety of theoretical and disciplinary perspectives. Considers how narrative materials function as foundational to meaning making and to community building.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5061 - Rhetorical Theory and Criticism

Credits: 1-4
Max Credit (Max. 8)

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 5061.

Dual Listed ENGL 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5062 - Ancient Rhetorics

Credits: 1-4
Max Credit 8

Investigates contemporary problems in composition and rhetorical studies, as they are played out through ancient texts on composing and rhetoric. Course will focus on how ancient texts are enlisted in current debates/concerns over pedagogy, ethics, change, subjectivity, agency, and the social.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5063 - Feminist Rhetorics

Credits: 1-4
Max Credit 8

Analysis of influential women speakers and writers over time. Course focuses on how feminists construct arguments, frame objects of analysis, energize social justice movements, and theorize sex/gender/sexuality in relation to race, class, democracy, and suffrage. Course may include special focus on Wyoming women and suffrage.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5070 - Qualitative Methods in English

Credits: 1-4
Max Credit (Max. 8)

Advanced introduction to qualitative research methods in English and Rhetoric. Students will survey different types of qualitative methods and will learn to evaluate qualitative projects. Includes an emphasis on working with human participants and on ethics.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5071 - Qualitative Analysis

Credits: 1-4
Max Credit (Max 8)

Examination and application of different ways of making knowledge in English studies. Develops understanding of links among theory, methodology, and methods, and engages students in data analysis and evaluation of interpretive moves. "Texts" can encompass a range of artifacts, from print to video games to nonverbal behaviors.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5072 - Topics in Technical Writing

Credits: 1-4
Max Credit 8

Seminar course on one or more topics in technical communication research, theory, or industry practice. Topics may include user experience methods, women in technical communication, activity theory, ethics and technology, information design, narrative practices, workplace cultures, and technical communication and social justice.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5073 - Topics in Rhet-Comp & Tech-Com

Credits: 1-4
Max Credit 8

Seminar on key theories and foundational research in technical and professional communication. Introduces students to pedagogical approaches, topics, and tools suitable for teaching and administering undergraduate technical and professional communication courses and programs.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5074 - Studies in Civic Discourse

Credits: 1-4
Max Credit 8

Seminar focusing on communication in the public sphere. Considers definition of public(s), both terrestrial and online, and the forming of publics and counter-publics. Focuses on rhetorical needs of audiences and may include primary research or partnering with local organizations.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5075 - Non-Profit Writing and Grants

Credits: 1-4
Max Credit (Max. 8)

Non-profit writing from a rhetorical perspective. Students analyze different kinds of non-profit communication, including fundraising, mission development, social media. Participate in grant proposal development or other organizational communication activity.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5220 - Studies in Medieval Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar course in selected genres, figures, and themes in Medieval English literature.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5230 - Studies in English Renaissance Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of the sixteenth and early seventeenth centuries.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5250 - Studies in Shakespeare

Credits: 1-4
Max Credit (Max. 8)

To provide advanced students with the opportunity to study problems of text, sources, staging, theatrical history, and/or critical theory with reference to the works of William Shakespeare.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5270 - Studies in 18c English Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of restoration and eighteenth century English literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5280 - Studies in 19c English Literature

Credits: 1-4
Max Credit (Max. 4)

A seminar in selected genres, figures, and themes of the romantic and Victorian periods.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5290 - Studies in 20c English Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in significant writers of poetry, drama, fiction, and biography from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5310 - Early American Literature

Credits: 4
Seminar designed to acquaint graduate students with selected texts from the colonial period to 1800, relevant secondary works, and scholarly methods.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5320 - Studies in 19c American Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar designed to acquaint graduate students with selected principal works of American literature, relevant secondary works, and scholarly method.

Prerequisite: graduate status of 12 hours or 4000-level work.

ENGL5330 - Studies in 20c American Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected significant writers of poetry, drama, and prose from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5340 - Intellectual Currents in Modern American Literature

Credits: 1-4
Max Credit (Max. 4)

Devoted to the study of writers such as Marx and Freud and more recent American writers.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5350 - Global Literatures in English

Credits: 1-4
Max Credit (Max. 8)

Examines significant texts, authors, cultural and historical contexts, and literary and theoretical movements in postcolonial or global literatures. May involve comparative study or may be focused on a single country context.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5355 - Global Englishes

Credits: 1-4
Max Credit 8

Advanced investigation of the spread of English as the lingua franca for business, technology, research, education, and popular culture around the world. Does the spread create cross-cultural communication or intensify global economic inequality? This course explores global Englishes in their historical and present contexts, engaging the fields of linguistics, sociolinguistics, postcolonial studies, and English language teaching.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5360 - Literatures of Diversity

Credits: 1-4
Max Credit (Max. 8)

A study of literature and culture of selected minority or marginalized communities.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5455 - Slavery and Freedom

Credits: 1-4
Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 5455.

Dual Listed ENGL 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5520 - History of Literacy Criticism: Enlightenment and 19th Century

Credits: 4
Historical survey of the mainstream of European literary criticism, including the critics of antiquity and the Renaissance.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5600 - Research in Writing Studies

Credits: 1-4
Max Credit 8

Introductory graduate seminar on research methods in writing studies. Course culminates in an individual research project of professional quality. Course studies books and articles that students identify as particularly powerful examples in order to understand what research is and ways to conduct such research efficiently and ethically.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3
An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed GWST 5830.

Dual Listed ENGL 4830.

Prerequisite: ART 2020, GWST 1080, ENGL 1080.

ENGL5835 - Writing Program Administration

Credits: 1-4
Max Credit 8

Seminar introduction to the field of writing program administration. Recognizing that not all universities are research institutions with large numbers of graduate students, this course approaches administration broadly, considering not only the traditional WPA, but other types of WPA work, including research, program building, developing intra-institutional relationships, and more.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5880 - Studies in Modern Fiction

Credits: 4

A study of modern fiction, examining theory and practice, and covering works of English, European, and American origin.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5885 - Studies in Popular Culture

Credits: 1-4
Max Credit 8

An interdisciplinary seminar in which students analyze and apply theories and methodologies from multiple disciplines to the study of selected texts, figures, media, and themes of popular culture.

ENGL5890 - Consumption, Markets, Cultures

Credits: 1-4
Max Credit (Max. 8)

An interdisciplinary investigation of the ways in which cultural venues curate and market stories, history, and texts. Analyzes and applies theories and methodologies from literary and cultural tourism studies, as well as marketing and consumer culture, to museums, performances, tourist sites and theme parks. This class will include hands-on field research.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5975 - Independent Studies

Credits: 1-4
Max Credit (Max. 6)

Independent study and research experience in a given topic, person, or movement in literature at an advanced level.

Prerequisite: permission of chair; graduate standing.

Additional Requirements

The concentration insures coherence in each student's graduate program; breadth is insured by a distribution of courses. Much of each student's program is taken in courses outside the concentration.

Literary Studies. Working from a variety of perspectives, this concentration focuses on the study of literature and of other culturally significant texts and materials, including, for example, film, oral materials, and political documents.

Rhetoric, Composition, and Writing Studies. This concentration emphasizes scholarship on the production of discourse, broadly conceived, and may include a focus on classical, contemporary, or cultural rhetoric; post-secondary writing pedagogy and program administration; community and adult literacy; or other subjects related to the field of writing studies.

Public Humanities. Designed for students who wish to pursue professions that may span beyond traditional academic work, this concentration prepares graduates for careers in civic, nonprofit, and community-based cultural organizations that engage the humanities, contribute to social reform, and promote the public good.

Minimum coursework required: 26 hours. Minimum thesis hours required: 4 hours See program website for course offerings in a given semester. All coursework must be at the 5000-level.

With approval of the graduate advisor, a student may take a maximum of three hours credit outside the department.

A reading list exam and a Plan A thesis with oral defense. Students may write a traditional thesis, or they may assemble a public-facing thesis portfolio. See program website for more details about thesis options. For information on the Plan B, consult with the program director.

Geology, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

Geology, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)
