Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

All graduate students in Geology must complete two semesters of GEOL 5200. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geology/Water Resources, M.S.

The purpose of this program is to formalize and broaden strong department offerings at the master of science level in ground water geology, natural waters geochemistry, mathematical hydrology, and fluvial geomorphology.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotopic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

OR

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

Technical/Water Quality Course

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

OR

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

Geophysics, M.S.

Plan A (Thesis)

(26 hours of coursework and 4 hours of thesis)

Preliminary and initial advising shall take place upon acceptance to the graduate program to identify background deficiencies and develop a list of required deficiency coursework to be taken. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

GEOL5020 - Fundamentals of Research is required of ALL graduate students during the first semester of residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

All M.S. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure of this exam may result in dismissal from the graduate program.

The candidate's committee shall evaluate the thesis and conduct the final examination. The final exam is an oral presentation of the thesis, oral defense of thesis, and oral responses to questions relating to ancillary topics. Failure of this exam can result in dismissal. Retaking of the exam is subject to the discretion of the candidate's graduate committee.

M.S. candidates in geophysics must complete 6 hours of mathematics and three hours of physics or engineering courses at the graduate level.

M.S. candidates must take at least 12 hours of 4000- and 5000-level courses in geophysics. Recommended graduate level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

Geophysics, Ph.D.

(42 hours of coursework and 30 hours of dissertation research)

Preliminary and initial advising will identify background deficiencies and develop a list of required deficiency coursework. Deficiency coursework must be completed with a grade of B or better early in the student's graduate residence.

All graduate students in geophysics must complete two semesters of GEOL 5210. Distinguished Lecture Series in the first two semesters of residence plus Rocky Mountain Field Trip.

Completion of GEOL5020 - Fundamentals of Research is required during the first semester of residence.

Ph.D. candidates in geophysics must complete at least 6 additional hours of graduate level coursework: 3 in mathematics and 3 in physics or engineering. Recommended graduate-level mathematics courses include differential equations, numerical analysis, and real and complex variables; in physics and engineering, they include classical mechanics, continuum mechanics, elasticity, electricity and magnetism. Ph.D. candidates are required to take at least 12 hours of 5000-level geophysics courses exclusive of GEOL 5854. Substitutions for graduate-level geophysics courses may be made with the permission of the candidate's adviser. Remaining graduate-level course requirements may be made up from courses in physics, engineering, mathematics, and geology.

All Ph.D. students in the Department of Geology and Geophysics will be required to complete a qualifying exam by the end of the second term in residence. Specific department examination requirements are available from the department office. Failure to complete the exam by the end of the second semester in residence without an approved extension will result in suspension of the student's financial support, irrespective of the source of funding. Ph.D. students who fail the exam will be asked to withdraw from the graduate program or to enroll in the M.S. program.

The preliminary examination is administered following completion of 30 hours of 4000-level or higher coursework, not including independent study or research credits. Failure of this exam may, at the discretion of the thesis committee, lead to a re-examination during the following semester in residence, remedial work, or expulsion from the program.

The Ph.D. dissertation and its defense are described in the regulations section of this *Catalog*. Specific department examination requirements are available from the department office. The candidate's committee is responsible for monitoring progress of the research, refereeing the written work, and administering the final examination.

Geophysics/Water Resources, M.S.

Admission Requirements

In addition to the department admission requirements, the undergraduate degree program earned by the incoming candidate must meet the minimum undergraduate requirements for the UW geology curriculum in mathematics, physics, and chemistry. The transcript should also demonstrate a strong background in physical geology.

Plan A Thesis Requirement

Only students with a Plan A thesis option are eligible. Students must follow the same program requirements as stated under Geology and Geophysics department section. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Interdisciplinary Component

9 hours (see Water Resources degree requirements)

Coursework and Thesis

Each student must complete a minimum of 26 hours of graduate level coursework and a Plan A thesis. In addition, the following specific core courses are required for the master of science in geology/water resources and geophysics/water resources degrees.

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

One of the Following:

- GEOL 4830 - Introduction Quantitative Methods in Geology Credits: 3
OR

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

OR

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotropic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

Technical/Water Quality Course

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

OR

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

History, M.A.

Wyoming's M.A. in history will open both professional and academic pathways. A student may pursue this degree as the final step in their educational journey or go on to pursue a doctoral degree and, eventually, a teaching or research position.

Program Specific Admission Requirements

General Regulations

The M.A. in History requires 18 hours of undergraduate history courses as minimum preparation for admission. The rules under which the student enters remain those governing the program for the duration of the student's continued enrollment. In accordance with university graduate regulations, students are responsible for meeting all deadlines and for fulfilling all requirements for the degree.

Application and Admissions

To be eligible for financial support in the form of a Graduate Assistantship, the Department of History must receive all materials by March 1. All other application materials must be received by the Department of History no later than May 1. The application process is now completely online. In addition to the application, applicants must upload the following documents via the UW Admissions website (www.uwyo.edu/admissions):

1. Three letters of recommendation that assess the student's academic and research abilities.
2. Transcripts from all undergraduate institutions and graduate programs.
3. A writing sample of 10-20 pages, typically either a portion of a senior thesis or an upper-level seminar paper.
4. A statement of purpose of 250-500 words, explaining the applicant's preparation, interests, and plans. Please indicate if you would like to be considered for a graduate assistantship.

Program Specific Graduate Assistantships

When applicants submit their materials to the program in History, they should indicate their wish to be considered for a Graduate Assistantship. Anyone receiving financial support must be registered as a full-time (9 hours per semester) student and must be making acceptable progress towards degree completion. Renewal of Graduate Assistantships is contingent on such progress. Support is not given for more than two academic years.

Requirements

Program Specific Degree Requirements for the History Master's Program are as follows:

Required Courses

Candidates for the Master of Arts degree are expected to complete the program in 2 years. Graduate Students are required to complete a minimum of 31 credit hours of graduate (5000) level courses. Students must complete 27 hours of coursework, of which at least 24 hours must be in History. Students will work with their advisor to plan the course of study that will include:

(3 credit hours) HIST5880 - History Theory

(12 credit hours) 5000-level, non-dual-listed courses in HIST (excluding HIST 5880)

(12 credit hours) Additional graduate-level course work, of which at least 9 credit hours must be in HIST courses.

(4 credit hours) HIST5960 - Thesis Research

Foreign Language

Students must demonstrate a reading knowledge of a foreign language appropriate to their research. In special cases, other relevant historical tools may substitute for the language requirement upon approval of the thesis adviser and the Graduate Coordinator. Generally, either of the following options may meet the language requirement:

- Passing a language exam administered by the Department of History. This must be completed by the end of the first year with the appropriate faculty.
- Completing the equivalent of the fourth semester of a language as offered at the University of Wyoming. All courses must be passed with a grade of C or better (may be taken pass/fail).

Thesis

- Graduate students will identify two "fields" of study, in consultation with their main advisor: one time/place field (such as Modern U.S. History), and one thematic field (such as Environmental History), both of which correspond to the student's thesis research.
- In the spring semester of the first year the student will publicly defend his/her thesis proposal, which must include a written research prospectus and bibliography.
- At the end of the second year the student will successfully defend the thesis before an approved Graduate Committee.

International Studies, M.A.

MA students will be able to pursue international, interdisciplinary research in order learn about global problems from a variety of historical, political, social, cultural, and economic perspectives.

Plan A (Thesis)

Students are encouraged to construct, with the adviser's approval, a program that focuses their own intellectual interests and career plans. To promote that end, students should be prepared to file a plan of study with the graduate adviser during the second semester of coursework.

No later than the second semester in residence, each student shall select a graduate committee to oversee his or her academic work. The committee will be chaired by the student's major professor and must have at least one member from outside of The School of Politics, Public Affairs, and International Studies. Students also will prepare a thesis proposal and give a presentation of their preliminary project before the International Studies faculty and complete a thesis prospectus defense with their graduate committee by the end of their second semester.

Students must pass an oral examination at the completion of their program. Normally, examination will center on the thesis, but may also encompass coursework of the candidate.

Required Coursework

Advanced Theory Course

INST5200 - Graduate Proseminar in International Studies

Credits: 3-6
Max Credit (Max. 6)

Introduces students to different interdisciplinary approaches - perspectives, theories, and paradigms - within International Studies in order to explain the economic, historical, social, cultural, and political dimensions of international processes and issues. Students explore emerging trends in the global system and the most pressing challenges facing states, societies, and peoples.

Prerequisite: graduate student status.

Research Methods Course

INST5400 - International Social Science Research Methods

Credits: 3

Introduces students to a wide variety of interdisciplinary social science methodologies that have proven especially conducive to international research.

Prerequisite: graduate standing.

Additional Information

Students take the Plan A (thesis). Students must have a minimum of 26 hours of graded non-thesis coursework and 4 hours of thesis.

Program Specific Admission Requirements

Admission is open to all students holding a bachelor's degree in any major. Foreign students, who are non-native English speakers, must pass the Oral Proficiency Interview (OPI).

Program Specific Degree Requirements

Master's Program

Students must meet three requirements:

1. Each student must take INST 5400.
2. Each student must take INST 5200.
3. Each student must demonstrate proficiency in a foreign language, accomplished in the course of the program or from previous experience or coursework. Foreign language hours do not count toward the M.A. degree.

The program also offers a joint International Studies/Environment and Natural Resources degree. See www.uwyo.edu/sppais for specific degree requirements.

Music Education, M.M.

Each of the degree programs consists of 30 semester hours of work composed of the following elements:

Plan A or Plan B

To earn a Master of Music Education, students must complete the following requirements:

Basic Music Core (11 Hours)

No more than 12 credits can be counted from 4000-level courses toward any graduate program of study.

MUSC5310 - Music Research Methods

Credits: 2

Prepares students to be knowledgeable consumers of music and interdisciplinary information. Topics include the musicology research process, information ethics, and critical analyses and integration of information sources into writing. Information literacy principles and research techniques equip students for both graduate-level music research and the post-graduate, professional world.

Prerequisite: graduate standing in music.

- Choose a total of at least THREE courses from the following (minimum 9 credits from the following two categories):
- **Upper-Division Music History** (3-6 Credits):

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP 2015 Code U5H

Prerequisite: consent of instructor.

MUSC4651 - String Solo Literature

Credits: 3

Provide a survey of the masterpieces of string solo literature (violin, viola, cello and bass literature) in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: 8 hours of lessons in string instruments.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the 1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

MUSC5320 - Advanced Seminar

Credits: 2-6

Max Credit (Max. 6)

Such topics as The Music of J. S. Bach, The Chamber Music of Mozart, and Contemporary Music will be pursued and will terminate in oral reports and a research paper.

Prerequisite: MUSC 5310.

- **Upper-Division Theory** (3-6 hours):

MUSC5035 - Advanced Theory

Credits: 3

To further understanding of chromatic harmonies, analysis of advanced formal aspects, Pitch-class set Analysis, and 12-tone Analysis. To ultimately have a synergistic view of each work, combining historical and theoretical elements in viewing the work as a whole.

Dual Listed MUSC 4035

Prerequisite: MUSC 2030 and MUSC 2035, music majors only; (MUSC 5035): graduate standing.

MUSC5340 - Advanced Composition

Credits: 1-4
Max Credit (Max. 6)

A project course to be conducted by individual appointment with the instructor. The result should be the production of a major work suitable for performance by one of the campus organizations. Evaluation is made by a faculty committee on completion and performance of the composition.

Prerequisite: 4 hours of MUSC 4040.

MUSC5350 - Advanced Analysis

Credits: 3
Consideration of the analytical techniques of Harder, Piston, and Schillinger for traditional music, of Hanson and Hindemith for modern tonal music, and of Schoenberg and Reti for serial music.

Prerequisite: graduate standing in music.

Major Area Courses (12-15 Hours)

EDRE5530 - Introduction To Research

Credits: 3
Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

MUSC5760 - Music Education Seminar

Credits: 2
A study and discussion of trends, objectives, and curricula of the various phases of music education.

MUSC5720 - Musical Supervision: Choral

Credits: 2
Examination of the administrative responsibilities of the music teacher, the music department chairman, and the district music supervisor in the public schools, as well as the responsibilities of a music festival chairman and officers of the state music educators association.

Prerequisite: graduate standing in music.

- Music education electives Credits: 5-8

Thesis Requirement (0-4 Hours)

Plan A

Four hours (the thesis must be on a music education topic)

MUSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Plan B

The thesis requirement may be fulfilled under the Plan B paper/lecture-recital as appropriate to the specific degree program. A proposal for a thesis or Plan B paper must be submitted to and approved by the student's graduate committee chair.

- Plan B paper, plus extra courses Credits: 0

Electives (4 to 7 Hours)

Require successful completion of the written comprehensive exams, which cover theory, history, and the major area.

Music Performance, M.M.

Each of the degree programs consists of 30 semester hours of work composed of the following elements

Plan B

To earn a Master of Music in Performance, students must complete the following requirements:

Basic Music Core (11 Hours Minimum)

No more than 12 credits can be counted from 4000-level courses toward any graduate program of study.

MUSC5310 - Music Research Methods

Credits: 2

Prepares students to be knowledgeable consumers of music and interdisciplinary information. Topics include the musicology research process, information ethics, and critical analyses and integration of information sources into writing. Information literacy principles and research techniques equip students for both graduate-level music research and the post-graduate, professional world.

Prerequisite: graduate standing in music.

- Choose a total of at least THREE courses from the following (minimum 9 credits from the following two categories):
- **Upper-Division Music History** (3-6 Credits):

MUSC4315 - America's Ethnic Music

Credits: 3

Surveys music of ethnic groups in America.

USP 2003-2014 Code U3CA, U3D

A&S College Core 2015 ASD

Former Course Number [3000]

Prerequisite: MUSC 1000.

MUSC4330 - Undergraduate Seminar

Credits: 3

An in-depth study in Musicology or Music History topic. Class time will be centered on exploring unique topics in music repertoire through lectures, guided listening, and discussion.

USP 2015 Code U5C3

Prerequisite: MUSC 2050 and MUSC 2055.

MUSC4350 - History and Literature of Jazz

Credits: 3

Surveys details of American jazz music from the turn of the 20th century to present. Acquaints students with basic jazz materials, techniques and styles, as well as work of selected jazz masters. For graduate credit, students must present extra paper or project determined by instructor.

USP 2015 Code U5H

Prerequisite: consent of instructor.

MUSC4651 - String Solo Literature

Credits: 3

Provide a survey of the masterpieces of string solo literature (violin,viola, cello and bass literature) in a historical and musical context. Includes listening assignments and examinations as well as class presentations.

Prerequisite: 8 hours of lessons in string instruments.

MUSC4490 - History of Rock and Roll

Credits: 3

This course will examine music styles prior to rock and roll and then delve into the various styles of the music from the

1950s to the late 20th century. In order to understand rock and roll music the course will analyze other styles of popular music in the United States.

USP 2015 Code U5H

MUSC5320 - Advanced Seminar

Credits: 2-6
Max Credit (Max. 6)

Such topics as The Music of J. S. Bach, The Chamber Music of Mozart, and Contemporary Music will be pursued and will terminate in oral reports and a research paper.

Prerequisite: MUSC 5310.

- **Upper-Division Theory** (3-6 hours):

MUSC5035 - Advanced Theory

Credits: 3
To further understanding of chromatic harmonies, analysis of advanced formal aspects, Pitch-class set Analysis, and 12-tone Analysis. To ultimately have a synergistic view of each work, combing historical and theoretical elements in viewing the work as a whole.

Dual Listed MUSC 4035

Prerequisite: MUSC 2030 and MUSC 2035, music majors only; (MUSC 5035): graduate standing.

MUSC5340 - Advanced Composition

Credits: 1-4
Max Credit (Max. 6)

A project course to be conducted by individual appointment with the instructor. The result should be the production of a major work suitable for performance by one of the campus organizations. Evaluation is made by a faculty committee on completion and performance of the composition.

Prerequisite: 4 hours of MUSC 4040.

MUSC5350 - Advanced Analysis

Credits: 3
Consideration of the analytical techniques of Harder, Piston, and Schillinger for traditional music, of Hanson and Hindemith for modern tonal music, and of Schoenberg and Reti for serial music.

Prerequisite: graduate standing in music.

Major Area Courses (16 Hours Minimum)

- MUSC 5480 - MUSC 5670 Private Lessons in major instrument or voice Credits: 8 minimum
- MUSC 5700 - MUSC 5890 Ensembles Credits: 2

MUSC5680 - Graduate Recital

Credits: 2

A recital, vocal or instrumental and consisting of selections of advanced difficulty in matters of technique and interpretation, is presented under the direction of a staff member. Quality and content of recital must be approved by a faculty committee one month before the recital date, and the faculty committee will determine the final grade.

Prerequisite: graduate standing in music and consent of instructor.

MUSC5390 - Performance Practice and Interpretation

Credits: 2

A study of the inherited traditions of correct interpretation and performance as related to the various style periods in music.

Prerequisite: graduate standing in music.

MUSC5320 - Advanced Seminar

Credits: 2-6

Max Credit (Max. 6)

Such topics as The Music of J. S. Bach, The Chamber Music of Mozart, and Contemporary Music will be pursued and will terminate in oral reports and a research paper.

Prerequisite: MUSC 5310.

- MUSC 4*** - Pedagogy (instrument specific) Credits: 2

Requirement In Lieu of Thesis

Plan B paper, or 1-hour lecture-recital

Foreign Language Requirement

(voice majors only). Singers must demonstrate acceptable proficiency in singing in Italian, German, French, and English.

Electives (0 to 3 hours)

Require successful completion of the written comprehensive exams, which cover theory, history, and the major area.

Philosophy, M.A.

Program Specific Degree Requirements

Plan A (Thesis)

31 hours of graduate credit

27 hours of graduate coursework

4 hours of thesis research

Proof of proficiency in formal logic (through first-order predicate logic with identity) by either passing the department's course (3420) or some other course judged to be its equivalent with a grade B or better or by completing a test with a grade B or better at the end of the second semester.

First year paper at the beginning of the third semester.

Defense of a thesis prospectus by the end of the third semester.

In any cases of deficiency, the department may require remedial work before admission to M.A. candidacy.

Physics, M.S.

Thesis planning, development, and production guided by the committee chair and graduate committee.

The University of Wyoming Master of Science in Physics program prepares students for a wide range of exciting physics-related careers

Requirements

Plan A (Thesis)

- 26 hours of graduate coursework, 20 of which must be in PHYS/ASTR at the 5000-level
- 4 hours of PHYS 5960

Plan B (Non-Thesis)

- 30 hours of graduate coursework, 24 of which must be in PHYS/ASTR at the 5000-level

Physics, M.S.T.

The Master of Science in Teaching is designed for graduate students preparing to teach in secondary schools or in community colleges. It includes a small, carefully designed component in psychology and education as well as a supervised teaching experience. This program will require a thesis project based on experience in the classroom.

Thesis planning, development, and production guided by the committee chair and graduate committee.

Requirements

Plan A (Thesis)

- 18 hours from PHYS/ASTR at the 5000-level
- 12 hours from PSYC or the College of Education at the 4000- or 5000-level

Additional Requirements

The Master of Science in Physics with emphasis in Teaching is designed for graduate students preparing to teach in private secondary schools or in community colleges. It includes a small, carefully designed component in psychology and education, and includes experience as a teaching assistant. Students interested in this program should contact the current advisor, Prof. Tim Slater.

Physics, Ph.D.

During the first two years, students normally take physics and astronomy courses while working with faculty members on one or more research projects. Course work consists of several required courses plus a number of elective courses. Students participate in weekly research seminars and journal clubs to learn about a broad range of current research. By the third year, Ph.D. students begin research work in the area of their dissertation.

Ph.D. candidates demonstrate their competency in basic undergraduate physics and in required graduate courses through a written examination. After passing the written exam, students will take an oral preliminary exam based on a research project they have completed during the first two years. At the completion of the Ph.D. dissertation, a candidate makes a public presentation of his or her work and the committee conducts a final examination to award the degree.

Requirements

- 42 hours of graduate coursework
- 30 hours of PHYS 5980 or PHYS 5860. Dissertation planning, development, and production guided by the committee chair and graduate committee.

Tracks:

- Physics, Physics Track, Ph.D.
- Physics, Astronomy Track, Ph.D.

Additional Requirements

The Physics PhD program educates students to become scholars and researchers in physics. Our graduates are trained to teach and to carry out original research that is theoretical, experimental, computational, or a blend of these approaches.

Political Science, M.A.

Political Science studies how states govern themselves and interact. Subfields include: American politics, comparative government, international relations, political philosophy, public law, and public administration.

Plan A (Thesis)

Graduate Credit

At least 30 hours of graduate credit, to include:

- At least 6 additional hours of coursework in political science.
- A maximum of 9 hours of coursework in disciplines other than political science.
- A minimum of 4 hours thesis research.
- A master's thesis demonstrating independent research, written under the supervision of the major professor.
- An oral examination conducted by the graduate committee covering all coursework and the thesis.
- No more than 6 hours of grades lower than 3.000 may be counted toward the minimum number of hours required for the degree.
- Students must maintain a graduate GPA of 3.000.

INST5200 - Graduate Proseminar in International Studies

Credits: 3-6

Max Credit (Max. 6)

Introduces students to different interdisciplinary approaches - perspectives, theories, and paradigms - within International Studies in order to explain the economic, historical, social, cultural, and political dimensions of international processes and issues. Students explore emerging trends in the global system and the most pressing challenges facing states, societies, and peoples.

Prerequisite: graduate student status.

And

INST5400 - International Social Science Research Methods

Credits: 3

Introduces students to a wide variety of interdisciplinary social science methodologies that have proven especially conducive to international research.

Prerequisite: graduate standing.

Plan B (Non-Thesis)

Graduate Credit

At least 30 hours of graduate credit, to include:

- At least 6 additional hours of coursework in political science.

- A maximum of 12 hours of coursework in disciplines other than political science.
- Plan B paper that reflects the quality but not scope of a master's thesis, written under the supervision of the major professor.
- An oral examination conducted by the graduate committee covering all coursework and the Plan B paper.
- No more than 6 hours of grades lower than 3.000 may be counted toward the minimum number of hours required for the degree.
- Students must maintain a graduate GPA of 3.000.

INST5200 - Graduate Proseminar in International Studies

Credits: 3-6

Max Credit (Max. 6)

Introduces students to different interdisciplinary approaches - perspectives, theories, and paradigms - within International Studies in order to explain the economic, historical, social, cultural, and political dimensions of international processes and issues. Students explore emerging trends in the global system and the most pressing challenges facing states, societies, and peoples.

Psychology, Ph.D.

Doctoral Programs

- Clinical Psychology
- Social Psychology, Cognition/Cognitive Development, or Psychology and Law

Public Administration (MPA)

The Master's in Public Administration degree offered at the University of Wyoming is considered an ethics based program where complicated issues of administrative decision making are the hallmarks of professional life.

Admissions

Admission is competitive and is open to all students holding a bachelor's degree in any major. Applicants must have a minimum 3.00 GPA, 2 letters of recommendation, a letter of intent, and a short analytic writing sample. Foreign students, who are non-native English speakers, must also pass the Oral Proficiency Interview (OPI).

Only one class, POLS 5000, may be taken prior to full admission into the program with permission of the MPA director.

Plan B (non-thesis)

Thirty-nine hours of graduate credit, to include:

- 24 hours of core credit,
- 15 hours of approved elective credit.

Significant administrative experience is required of all M.P.A. graduates. If the M.P.A. student has little or no administrative experience an internship is required and will be included as 3 hours of the required elective credits.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/electronic class discussion.

Students must maintain a graduate GPA of 3.000.

Current Core Courses

Thirty-nine hours of graduate credit, to include:

POLS5000 - Survey of Public Administration

Credits: 3

Designed to introduce the beginning graduate student to the study and practice of public administration at all levels of government. Attention is also directed to specific functions and processes such as intergovernmental relations, budgeting, personnel, and regulation.

Prerequisite: graduate status and consent of instructor.

POLS5400 - Public Personnel Management

Credits: 3

Designed to integrate information about the political environment of personnel administration with problem solving exercises in such specific areas as job analysis, affirmative action, and flextime. A number of topics including the evolution of the civil service, the rights and responsibilities of governmental employees, the functions of public personnel management, and collective bargaining processes are also covered.

Prerequisite: POLS 5000.

POLS5410 - Administrative Behavior and Theory of Organization

Credits: 3

An advanced course in the theory of organization and the workings of public agencies.

Prerequisite: POLS 5000.

POLS5440 - Principles and Processes of Government Budgeting

Credits: 3

Analyzes the principles, processes and politics of the budgetary process in the U. S. It examines the various theories of budgetary decision-making, the politics of budgeting and budgetary reforms.

Prerequisite: POLS 5000 and graduate standing.

POLS5480 - Ethics In Government

Credits: 3

The student is introduced to the ethical nature and dilemmas of public administration in American constitutional government. Such topics are addressed as source of ethical obligation, role of loyalty, application of moral philosophy, constitutional theory and ethical obligation, relation of theory and practice, and methods of ethical reflection.

Prerequisite: POLS 5000.

POLS5510 - Public Policy and Program Management

Credits: 3

An overview of governmental policy making processes in the U. S and the uses of applied policy analysis.

Prerequisite: POLS 5000.

POLS5684 - Empirical Analysis for Public Administration

Credits: 3

Designed for students in public administration to train them to make decisions based on empirical evidence in policy and management. Course draws concepts from system analysis, management science, operations research, and social science methodology to provide an understanding of various policy analysis and program management techniques across many applications.

Prerequisite: POLS 5000.

POLS5690 - Capstone in Public Management

Credits: 3

Integrates theories and concepts introduced in core and option-core courses, and emphasizes students' application of them to various administrative settings.

Prerequisite: completion of all other core and option core requirements in the MPA Program.

Approved Elective Credit

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

POLS5420 - Seminar In Public Administration

Credits: 3

Max Credit (Max. 6)

A reading and research course in selected topics in public administration.

Dual Listed POLS 4420.

Prerequisite: POLS 1000 and consent of instructor.

POLS5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 5445.

Dual Listed POLS 4445.

Prerequisite: 9 hours of international studies or social science coursework

POLS5450 - Administrative Regulation

Credits: 3

Significant points of contact between government and business are stressed. Government activities designed to regulate and aid such economic interests as business, labor, agriculture, and consumers are dealt with at length.

Prerequisite: POLS 5000.

POLS5460 - Public Administration and Law

Credits: 3

Focuses on various facets of the relationship between American public administration and law. Emphasis is placed on the emerging body of administrative law as a context for jurisprudential reasoning in administrative decision making.

Prerequisite: POLS 5000.

POLS5465 - Survey of the Nonprofit Sector

Credits: 3

This foundational course is designed to give students of diverse backgrounds a common framework for understanding the nonprofit sector in the United States and globally. Students in this course will identify and interpret key theories, issues, and challenges in the nonprofit world and will consider the implications for practice.

Dual Listed POLS 4465.

Prerequisite: graduate standing.

POLS5500 - Internship in Public Administration

Credits: 1-6

Max Credit (Max. 6)

Educationally-oriented assignments for work in selected public agencies, with tutorial types of supervision.

Prerequisite: consent of instructor.

POLS5530 - USCongress

Credits: 3

Analyze aspects of the U. S. Congress, including election of congressmen, legislative process, congressional-presidential relations, and the influence of political parties, interest groups, and constituents on the legislative process.

Dual Listed POLS 4430

Prerequisite: POLS 1000.

POLS5540 - Public Policy Perspectives

Credits: 3

Acquaints students with the underlying structure and dynamics of public policy formulation, implementation, and evaluation at the state, local, and federal levels. Drawing on a number of analytic approaches, the course seeks to understand this complex political phenomenon in the context of the institutions that drive it.

Prerequisite: graduate standing.

POLS5600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Dual Listed POLS 4600.

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

POLS5685 - Program Evaluation and Policy Analysis

Credits: 3

Explores techniques for analyzing and evaluating public policy choices and impacts.

Dual Listed POLS 4685.

Prerequisite: STAT 5070 or equivalent and an introductory research methods course in social science or related discipline.

POLS5710 - Topics In Political Science

Credits: 1-3

Max Credit (Max. 9)

Intended to accommodate various specialized subjects not offered as regular courses.

Prerequisite: graduate standing.

POLS5810 - Seminar in Political Philosophy

Credits: 3

Encompasses reading and research on selected problems in political philosophy.

Dual Listed POLS 4810.

USP 2015 Code U5C3

Prerequisite: POLS 2460, or POLS 3600, or consent of instructor.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

CRMJ5000 - Survey of Criminal Justice

Credits: 3

Provides an overview of criminal justice theory by providing critical evaluation and discussion of research in the criminal justice field. It will emphasize seminal works and review current research concerning the structure, function, operation, interaction of the criminal justice system's primary components, and future trends.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5100 - Public Policy and Crime

Credits: 3

This course is designed to take a multidimensional look at public policy issues related to the prevention and control of crime in the United States. Issues covered include the development, implementation, and evaluation of crime control policy.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 4280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: graduate standing.

CRMJ5500 - Internship in Criminal Justice

Credits: 3

Educationally-oriented assignments for work in selected criminal justice agencies, with tutorial types of supervision.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 4860.

Prerequisite: graduate standing or consent of the instructor.

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3

Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

STAT5220 - Advanced Design

Credits: 3

Advanced study of experimental designs, observational designs, and mixed models. Topics include fixed and random effects, factorial, split-plot and repeated measures designs, and hierarchical models. Linear model methodology and Data Science concepts will also be emphasized.

Prerequisite: MATH 5265/STAT 4265/STAT 5265, and at least one of STAT 4015/STAT 5015, STAT 4025/STAT 5025, or STAT 5210.

Public Administration (MPA/JD)

The Master's in Public Administration degree offered at the University of Wyoming is considered an ethics based program where complicated issues of administrative decision making are the hallmarks of professional life.

Admissions

Admission is competitive and is open to all students holding a bachelor's degree in any major. Applicants must have a minimum 3.00 GPA, 2 letters of recommendation, a letter of intent, and a short analytic writing sample. Foreign students, who are non-native English speakers, must also pass the Oral Proficiency Interview (OPI).

Only one class, POLS 5000, may be taken prior to full admission into the program with permission of the MPA director.

Plan B (non-thesis)

Thirty-nine hours of graduate credit, to include:

- 24 hours of core credit,
- 15 hours of approved elective credit.

Significant administrative experience is required of all M.P.A. graduates. If the M.P.A. student has little or no administrative experience an internship is required and will be included as 3 hours of the required elective credits.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course documents libraries, working on course projects, and for conducting interactive/electronic class discussion.

Students must maintain a graduate GPA of 3.000.

Current Core Courses

POLS5000 - Survey of Public Administration

Credits: 3

Designed to introduce the beginning graduate student to the study and practice of public administration at all levels of government. Attention is also directed to specific functions and processes such as intergovernmental relations, budgeting, personnel, and regulation.

Prerequisite: graduate status and consent of instructor.

POLS5400 - Public Personnel Management

Credits: 3

Designed to integrate information about the political environment of personnel administration with problem solving exercises in such specific areas as job analysis, affirmative action, and flextime. A number of topics including the evolution of the civil service, the rights and responsibilities of governmental employees, the functions of public personnel management, and collective bargaining processes are also covered.

Prerequisite: POLS 5000.

POLS5410 - Administrative Behavior and Theory of Organization

Credits: 3

An advanced course in the theory of organization and the workings of public agencies.

Prerequisite: POLS 5000.

POLS5440 - Principles and Processes of Government Budgeting

Credits: 3

Analyzes the principles, processes and politics of the budgetary process in the U. S. It examines the various theories of budgetary decision-making, the politics of budgeting and budgetary reforms.

Prerequisite: POLS 5000 and graduate standing.

POLS5480 - Ethics In Government

Credits: 3

The student is introduced to the ethical nature and dilemmas of public administration in American constitutional government. Such topics are addressed as source of ethical obligation, role of loyalty, application of moral philosophy, constitutional theory and ethical obligation, relation of theory and practice, and methods of ethical reflection.

Prerequisite: POLS 5000.

POLS5510 - Public Policy and Program Management

Credits: 3

An overview of governmental policy making processes in the U. S and the uses of applied policy analysis.

Prerequisite: POLS 5000.

POLS5684 - Empirical Analysis for Public Administration

Credits: 3

Designed for students in public administration to train them to make decisions based on empirical evidence in policy and management. Course draws concepts from system analysis, management science, operations research, and social science methodology to provide an understanding of various policy analysis and program management techniques across many applications.

Prerequisite: POLS 5000.

POLS5690 - Capstone in Public Management

Credits: 3

Integrates theories and concepts introduced in core and option-core courses, and emphasizes students' application of them to various administrative settings.

Prerequisite: completion of all other core and option core requirements in the MPA Program.

Academic Regulations

- A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.
- Significant administrative experience is required of all M.P.A. graduates. If the M.P.A. student has little or no administrative experience an internship is required and will be included as 3 hours of the required elective credits.
- Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Program memos, conducting research on the Web, retrieving articles from course.
- Students must maintain a graduate GPA of 3.000.

Juris Doctor

The Juris Doctor requirements are found here: [Juris Doctor](#)

Spanish, M.A.

As a Spanish Masters Student, you will develop your speaking, listening, reading, writing, and presentational skills in Spanish. You will gain a better understanding of perspectives and experiences of Spanish speaking cultures.

Required Courses

Program Specific Degree Requirements

A total of 27 graduate-level course hours are required.

Plus 4 thesis hours.

SPAN4200 - Introduction to Research

Credits: 3

Max Credit (Max. 9)

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3

hours recommended for majors.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SPAN 3030 or SPAN 3050 and 3 hours of 4000 or 5000-level courses.

SPAN5900 - Practicum in College Teaching

Credits: 3

Max Credit 3

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

- One 5000 level course in SPAN Linguistics Credits: 3
- One 5000 level course in SPAN Literature Credits: 3
- Spanish elective credits at the graduate level Credits: 15

One 5000 level course (3 credits) can be taken outside the department with the approval of the thesis advisor or the graduate advisor

Graduate-level courses include:

SPAN5070 - Spanish Variation and Change

Credits: 3

Provides a general overview of issues in language change in the contemporary Spanish-speaking world. General topics include language vs. dialect, social factors affecting language variation/acquisition/maintenance, mechanisms of change, language contact effects, language attitudes, policy and planning, style and register and mixing of languages and bilingualism, among other, as they are seen in the Spanish language.

Dual Listed SPAN 4070.

Prerequisite: graduate standing.

SPAN5080 - Spanish Advanced Grammar

Credits: 3

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 4080.

Prerequisite: graduate standing.

SPAN5090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectal variations. Will

touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 4090.

Prerequisite: graduate standing.

SPAN5100 - Hispanic Thought

Credits: 3

intensive study of a topic, author, or philosophical movement. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature at 4000-5000 level.

SPAN5110 - Peninsular Spanish Literature

Credits: 1-3

Max Credit (Max. 9)

An intensive study of a topic or an author. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature at 4000-5000 level.

SPAN5120 - Spanish American Literature

Credits: 1-3

Max Credit (Max. 9)

An intensive study of a topic or an author. Designed for upper level and graduate students.

Prerequisite: 12 hours of Spanish literature.

SPAN5130 - Masterpieces of Spanish Renaissance Literature

Credits: 3

A study of the Spanish Renaissance, taking into consideration social, political, economic, religious philosophical, and aesthetic aspects of the culture as a context for and as reflected in the literature.

Dual Listed SPAN 4130.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5140 - Masterpieces of Spanish Baroque Literature

Credits: 3

Studies of the Spanish Baroque, taking into consideration social, political, economic, religious, philosophical, and aesthetic aspects of the culture as a context for and as reflected in the literature. Also covers the relationship between the Spanish Renaissance and the Baroque.

Dual Listed SPAN 4140.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5150 - Spanish Romanticism

Credits: 3

A comprehensive study of the romantic movement in Spain. Close reading and commentary of texts by representative authors including Espronceda, Rivas, Zorilla, Becquer and de Castro.

Dual Listed SPAN 4150.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5160 - Graduate Readings

Credits: 1-5

Max Credit (Max. 6)

Prerequisite: graduate standing.

SPAN5170 - Special Problems

Credits: 1-2

Max Credit (Max. 6)

Prerequisite: graduate standing.

SPAN5180 - Advanced Cultural Studies in Hispanic Lit/Media

Credits: 3

Advanced analysis of Hispanic cultural phenomena. Focus on the Spanish-speaking cultures of Spain or the Spanish-speaking Americas or both. The Texts consulted vary according to instructor and may include the visual arts, such as film, paintings, and performance, academic theory, websites, and other fiction and non-fiction readings.

Dual Listed SPAN 4180.

Prerequisite: SPAN 2140 or equivalent and one 4000-level course.

SPAN5190 - 20th and 21st Century Spanish- American Texts

Credits: 3

Provides students the opportunity to study representative literary texts that reflect the tendencies and trends in 20th and 21st Century Spanish-language works of the Americas.

Dual Listed SPAN 4190.

Prerequisite: 6 hours of SPAN at the 4000-level.

SPAN5260 - The Realist Novel in Spain

Credits: 3

Studies of the major novelists of nineteenth century Spain from 1850 until the Generation of '98.

Dual Listed SPAN 4260.

Prerequisite: SPAN 3030 or SPAN 3050, and SPAN 3140.

SPAN5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Total: 31 Hours

Zoology and Physiology, M.S.

Advanced-degree students in Zoo/Phys experience collaborative, interdisciplinary approaches to basic and applied questions. Work spans molecules to ecosystems, with training in fields including physiology, ecology, evolution, fisheries, and wildlife.

Plan A (Thesis)

Includes 26 hours of coursework and 4 hours of thesis research.

Applicants should have at least 20 semester hours of undergraduate work in zoology, physiology, or other areas of the biosciences and have completed introductory courses in mathematics, chemistry, and in at least one other natural or physical science. Early in the second semester the student must file a program of study with the university and have a graduate committee appointed. Plan A candidates shall orally defend the thesis before the graduate committee.

All M.S. candidates will be required to complete credit in two graduate seminars. A student may enroll in more than one of these required seminars during one semester or academic year.

After two semesters in the department, a Plan A master's candidate may request permission from the department's graduate advisory board to proceed directly to the Ph.D. degree; however, such a bypass is granted only by the department head after considering recommendations from the graduate advisory board.

Zoology and physiology may be used as a field by a candidate working for the interdisciplinary master of science in natural science in the College of Arts and Sciences and the College of Education.

Plan B (Non-Thesis)

Includes 30 hours of coursework.

The program for the Plan B is established by the student and a faculty adviser and must be approved by the department head during the student's second semester or summer session.

The graduate committee will require the candidate to take a written examination. An oral examination may also be required. The final examination is comprehensive, covering all areas of zoology, but emphasizing one major area.

Zoology and Physiology, Ph.D.

Advanced-degree students in Zoo/Phys experience collaborative, interdisciplinary approaches to basic and applied questions. Work spans molecules to ecosystems, with training in fields including physiology, ecology, evolution, fisheries, and wildlife.

Additional Information

This is a 72 hour program.

A Ph.D. applicant must have 20 hours of undergraduate work in zoology, physiology, or other areas of biology and also have completed substantial undergraduate work in other sciences. Under exceptional circumstances, a student with an undergraduate major in a scientific discipline other than biology may be admitted. After the Ph.D. student has completed two semesters of graduate work, s/he must be approved for continued work toward the doctorate by the graduate advisory board. This board can reconsider a candidate thereafter if it so desires.

A graduate committee shall be appointed for the individual student no later than the third semester. After consultation with the student, this committee will prescribe special requirements (courses, minors, research tools, etc.) that must be fulfilled. At this time, the graduate committee shall consult with the candidate on the proposed research and shall identify the subject matter areas to be included in the preliminary examination. The preliminary examination will consist of a written research proposal, its oral defense, and a written and oral preliminary examination. When training outside zoology and physiology is specified by the committee, certification of satisfactory completion of the requirement will be made by the appropriate department.

In addition to the general university requirements for the Ph.D. degree, the department requires the following:

The coursework program should include work in a discipline outside the department, generally in the sense of a minor, to be identified in consultation with the graduate committee.

The preliminary examination consisting of written and oral portions should be taken no later than midterm of the fourth semester in residence. The graduate committee will certify satisfactory performance for the preliminary examination.

The dissertation must be received by each member of the graduate committee three weeks before the final dissertation seminar. As oral defense of the dissertation, the candidate will deliver a formal 50 minute seminar on original research from the dissertation. The seminar will be followed by an examination by the graduate committee.

Some time during their degree program, all Ph.D. candidates will be required to complete credit in three graduate seminars. A student may enroll in more than one of these required seminars during one semester or academic year.

All candidates for the Ph.D. degree shall be required to teach for one semester during their program.

The dissertation may be written in a format suitable for publication in a journal and the usual extensive literature review, description of study sites, technical details, raw data, supporting figures, charts, and photographs should be included in a well-organized appendix. (See also format requirements by the university.)

Certificate

American Studies Certificate

The certificate program allows students to choose from undergraduate and graduate courses in American Studies, literature, geography, music, art, history, philosophy, sociology, folklore, anthropology, Native American and Indigenous studies, political science, environmental studies, and media studies.

The program encompasses two semesters of full time work: a total of at least 24 semester hours, or approximately 8 courses. Of these, 6 credit hours (2 courses) must be selected from the following list:

Requirements

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

- Any AMST course at the 4000- or 5000-level Credits: 3
- An additional 18 hours (6 courses) are chosen in consultation with an American Studies faculty adviser. The final 3 credit hours, completed during the summer months, are devoted to an internship (AMST 4970) or field experience in American culture (AMST 4900).

Audio Technology Certificate: 12 Credits

The Audio Technology Certificate provides a basic understanding of audio principles and practical hands-on experience that allows one to enter the commercial music work force with a marketable skill set. Students will learn how to record and manipulate recorded sounds as well as provide live sound reinforcement for live concerts or events. A certificate may be pursued on its own or in conjunction with any university degree program.

Required Courses

MUSC4360 - Fundamentals of Audio for Music Production

Credits: 3

Topics include fundamentals of digital audio, live sound reinforcement, and audio recording. Students will acquire a foundation and learn how to successfully communicate with technicians.

MUSC4365 - Recording Art and Technology

Credits: 3

Topics include history of music production, multi-track recording, digital audio workstations, digital editing, session management and production, mixing, mastering, and distribution.

MUSC4370 - Live Sound Reinforcement

Credits: 1

Max Credit 3

Topics include history of live sound reinforcement, analog audio, digital consoles, system checks, troubleshooting, and client relations. Students will build upon MUSC 4360 with focus on live sound reinforcement.

MUSC4990 - Topics in:

Credits: 1-12

Max Credit (Max. 12)

Encompasses various topics in music. Specific subjects vary from year to year as course is often taught by distinguished visiting artists and lecturers or music faculty. Presents topics of special interest to music majors, graduate students and music educators. Please check class schedule for course titles each semester.

Prerequisite: consent of instructor.

Audio Technology Practicum/Internship

Teachers of American Indian Children (TAIC) (Teaching) Endorsement/UW Certification

Through Distance Education, a Teachers of American Indian Children (TAIC) Endorsement / Graduate Certificate can be earned. This non-degree graduate program certifies that those who complete its five specialized courses possess the attitudes, knowledge, and competence necessary to effectively teach American Indian Children. Upon completion, students receive official recognition of their achievement on their transcripts and an official certificate. Visit the Distance Education Degrees and Programs Website www.uwyo.edu/distance/ for more information. All courses are cross-listed with NAIS and EDCL.

An interdepartmental Native American and Indigenous Studies Advisory Committee guides the program's development. The director advises students selecting the NAIS studies major or minor.

Complete information about the Native American and Indigenous Studies undergraduate major, undergraduate minor, and graduate minor is available in the NAIS Program office and on the program Website.

Endorsement/Certificate

Art Entrepreneurship Certificate: 12 Credits

This certificate provides a basic understanding of marketing principles specific to the arts with practical hands-on experience that allows one to enter the workforce with a marketable skill set in the areas of art promotion and management.

Required Core Courses (All Emphases)

MUSC4001 - Music Entrepreneurship Seminar

Credits: 2

Further crystalizes successful business enterprise development introduced in ENTR 2700. Student will hone entrepreneurial skills in idea creation, business incubation, development, research, and commercialization.

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

- Choose one of the following:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

OR

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

- **The internships below are variable, 1-2 credits, depending on department. Please see individual advisors for exact hours.**

Music Emphasis

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4005 - Internship in Music Business

Credits: 1

Offers an evaluated and professional work experience in public or private organizations on assignments relating to student's career goals, allowing students to explore the relationship between theory and practice in their major.

Visual Arts Emphasis

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.

ART4400 - Internship

Credits: 1-3

Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

Theater and Dance: Dance Emphasis

THEA4700 - Auditioning and Careers in Dance

Credits: 1

Designed for dance majors as a culminating course in preparation for final semester auditions and applications for companies and graduate schools. Through this course, students will set career goals, create an audition portfolio, and gain exposure to the many challenges and opportunities in dance.

Prerequisite: senior standing, THEA 1021, and one semester of THEA 4010 or THEA 4030.

THEA4975 - Theatre/Dance Internship

Credits: 1-12

Max Credit (Max. 12)

The intent of this course is designed to provide professional experiences to students outside of the academic curriculum of Theatre and Dance Department. It is designed to advance the students potential career opportunities and help advance their knowledge in the field.

Restricted Restricted to sophomores, juniors, and seniors.

Prerequisite: Must have completed 6 hours in the department of Theatre and Dance.

Theater and Dance: Design/Tech Management Emphasis

THEA3850 - Design and Technology Seminar

Credits: 2

Introduces designer/technician to process of preparing successful interview material, including a professionally developed portfolio. Exposes designer/technician to business aspects of the theatre world, including resumes, letters of inquiry and application, contracts, unions and professional organizations, internships, apprenticeships, URTAs and professional design/technical training programs. Culminates in junior End-of-the-Year Evaluations.

Prerequisite: junior standing in the BFA Program with Design/Technical emphasis.

THEA4975 - Theatre/Dance Internship

Credits: 1-12

Max Credit (Max. 12)

The intent of this course is designed to provide professional experiences to students outside of the academic curriculum of Theatre and Dance Department. It is designed to advance the students potential career opportunities and help advance their knowledge in the field.

Restricted Restricted to sophomores, juniors, and seniors.

Prerequisite: Must have completed 6 hours in the department of Theatre and Dance.

Theater and Dance: Performance Emphasis

THEA4720 - Auditioning and Professional Issues

Credits: 3

Introduces actors to process of finding, preparing and executing successful audition material, including monologues, songs and dance combinations. Exposes actors to business aspects of the theatre world, including resumes, photos, contracts, unions, internships, apprenticeships, Equity Membership Candidacy programs, URTA's and professional actor training graduate programs. Culminates preparation for final semester auditions for the company/school of choice.

Prerequisite: THEA 1100, THEA 3710 and THEA 3740.

THEA4975 - Theatre/Dance Internship

Credits: 1-12

Max Credit (Max. 12)

The intent of this course is designed to provide professional experiences to students outside of the academic curriculum of Theatre and Dance Department. It is designed to advance the students potential career opportunities and help advance their knowledge in the field.

Restricted Restricted to sophomores, juniors, and seniors.

Prerequisite: Must have completed 6 hours in the department of Theatre and Dance.

Other Programs

Life Sciences

Life Sciences Program

107 Aven Nelson Building, 766-4158 Web site: www.uwyo.edu/lifescience

Program Director: Jonathan Prather

The Life Sciences Program consists of all LIFE prefix courses. These courses support a wide range of life science majors and several non-life science majors across campus. The number of LIFE courses taken by students in each major is determined by the departments that offer the majors. The curriculum intends to provide science majors with both breadth and depth in the basic life sciences, and nonscience majors with exposure to key concepts in biology and an understanding of the connections between science and society. The program courses also expose students to the fields of cell and molecular biology, genetics, ecology, and evolution, and they familiarize students with the diversity of life on the planet. Courses within the curriculum address four fundamental goals at a level appropriate for each course: 1. Acquisition, Application and Synthesis of Knowledge 2. Communication Skills 3. Critical Thinking and Problem Solving 4. Research Skills The Life Sciences courses listed below were previously offered under the BIOL prefix. All courses listed below are now offered through the LIFE prefix.

College of Business

310 Business Building

Website: <http://business.uwyo.edu>

Phone: (307)766-4194 **FAX:** (307)766-4028

Peter M. and Paula Green Johnson Student Success Center (307) 766-8249

The College of Business prepares students for careers by providing quality education in business disciplines, creating and disseminating knowledge, and assisting in Wyoming's economic development. The College of Business expects the highest level of integrity from our administration, faculty, staff, students, and alumni.

The College of Business grew from roots established in 1899 when the UW School of Commerce was founded. While the programs offered have changed over the years, the college remains firmly committed to academic excellence and positive student experiences.

The college has three academic departments: accounting and finance; economics; and management and marketing. The college also houses the College of Business Peter M. and Paula Green Johnson Student Success Center which is instrumental in maintaining the college's link with the business world.

These units are committed to preparing all College of Business students to enter our rapidly-changing world. Successful graduates are fully prepared to compete in their chosen professions or in graduate school. More importantly, they are well-educated individuals prepared to live fulfilling lives, and to meet the challenges presented by the complex ethical, moral and cultural contexts of our times.

College of Business Learning Outcomes

The College of Business expects that its graduates:

1. Will be competent in their field of study
2. Will be effective problem solvers
3. Will be ethical
4. Will be professional
5. Will be effective communicators

AACSB Accreditation

The business degree programs offered by the College of Business are accredited by AACSB-International. AACSB standards ensure that College of Business students are provided comprehensive, high-quality, well-rounded degree programs. The "Common Body of Knowledge" and the "Advanced Business Standing" (ABS) as described on the following pages have been developed to meet the AACSB accreditation standards.

A minimum of 50% of COB courses required for the major must be taken from the degree-awarding institution.

Programs of Study

Undergraduate Degrees

BSB - Bachelors of Science in Business

BSE - Bachelors of Science in Economics

The Majors are as follows:

- Accounting, B.S. (BSB-ACCT)
- Business Economics, B.S. (BSB - CBEC)
- Entrepreneurship, B.S. (BSB - ENTR)
- Finance, B.S. (BSB - FIN)
- Management, B.S. (BSB - MGT)
- Marketing, B.S. (BSB - MKT)
- Professional Sales, B.S. (BSB - SELL)
- Economics, B.S. (BSE - ECON)

The Minors are as follows:

- Banking and Financial Services Minor
- Blockchain Minor

- Data Analytics Minor
- Economics Minor
- Entrepreneurship Minor (for nonbusiness students only)
- Hospitality Business Management Minor
- Leadership Minor
- Professional and Technical Selling Minor
- Real Estate Minor

Graduate Degrees

Master of Science

Accounting, M.S.

Economics, M.S.

Finance, M.S.

Business Administration, M.B.A.

Business Administration, Online, M.B.A.

Doctor of Philosophy

Economics, Ph.D.

Marketing, Ph.D.

Certificate Programs

Certified Financial Planning Certificate (Graduate)

Energy Business Certificate (Graduate)

Student Services

Academic Advising

All College of Business undergraduate students are advised by professional academic advisers in the College of Business Peter M. and Paula Green Johnson Student Success Center. Advising can be reached by e-mail (success@uwoyo.edu) or by phone (307-766-8249).

Career Services

The Career Services unit connects students and employers in ways that lead to meaningful experiences and job opportunities. Business students are encouraged to explore career options and grow their career readiness by completing the Pokes Professionalism Badge and engaging in multiple internships. Students also have the option to apply for local, national, and international internships starting their first year and may be able to receive credit for their work. Networking with employers is highly encouraged and offered through a series of fairs, events, and in-class projects. One-on-one assistance and workshops are also available to students for things such as: internship or job searching; resume creation, review, or targeting; and career coaching or counseling. Individual appointments may be scheduled by email (success@uwoyo.edu) or by phone, (307) 766-8249.

Student Responsibilities

College of Business students are responsible for knowing and meeting requirements for graduation. In addition to degree requirements, all College of Business students must complete the advanced business standing requirements prior to enrollment in most upper-division (3000/4000-level) College of Business courses (see Advanced Business Standing (ABS) Prerequisites section).

All students must have already completed any prerequisites listed (in addition to ABS for COB students), including having the appropriate class standing. Students not meeting the prerequisites are identified and administratively dropped from those courses each semester.

Requirements for the Bachelor of Science Degree

Candidates for the Bachelor of Science degree in the College of Business must meet university, college, and departmental requirements. Degree candidates for the B.S. degree in the College of Business also must have a minimum 2.500 cumulative University of Wyoming (UW) grade point average and a 2.500 grade point average in College of Business courses at the time of graduation. In addition, economics majors also must hold a minimum 2.500 grade point average for all economics courses. College of Business degree candidates must earn a minimum of 120 semester hours depending on major including:

I. University Studies Requirements:

All first year students who enter the University of Wyoming (UW) and students who enter a Wyoming Community College (CC) are required to meet the USP 2015 requirements for graduation. Wyoming CC students transferring to UW with an Associate of Arts or Associate of Science degree will have course work evaluated per the General Education Articulation Agreement between the University of Wyoming and Wyoming Community Colleges. Non-resident transfer students and Wyoming CC transfer students without an associate's degree will have course work evaluated on a course-by-course basis, based on all approved USP courses. Academic advisers will help students select the appropriate courses to satisfy university studies requirements. Some College of Business requirements also meet university studies requirements.

A. Basic skills (USP 2015) Hrs.

1. First-year seminar (FYS) Choose from list of approved courses, Credits: 3
2. Writing
 - a. USP Communication 1 course, Credits: 3
 - b. USP Communication 2 course- Mid-level communication or 2000-4000-level communication intensive course- Choose from list of approved courses, Credits: 3
 - c. USP Communication 3 course- Upper-level communication or 3000-4000-level communication intensive course, Credits: 3
3. Physical and Natural World (PN) (Two courses required-choose from list of approved courses), Credits: 6
4. Human Culture (H) (Two courses required-choose from list of approved courses), Credits: 6
5. U.S. and Wyoming Constitutions (V), Credits: 3
6. Quantitative Reasoning (Q), Credits: 3

II. Electives

The number of hours of elective credit and upper-division (3000-/4000-level) credit varies by department. Economics majors will take 48-51 hours of free electives. A maximum of 6 credit hours each at the freshman/sophomore and junior/senior-level military science courses may be applied to degrees in the College of Business.

A. Non-Business electives Hrs

1. Non-Business electives. May include MATH 1400, Credits: 3-9

B. Free electives Hrs.

1. Free electives from any college. May require upper-division (3000/4000-level) courses, with the total number of credits needed dependent on major.

Students **may not** take courses for S/U (satisfactory/unsatisfactory) credit to satisfy university studies or college requirements, course requirements in the major, or courses outside the college required by the major department curriculum.

III. Advanced Business Standing: (excludes Economics majors)

College of Business majors must satisfy the following advanced business prerequisites prior to enrolling in most upper-division (3000- /4000- level) College of Business courses:

1. Achieve junior standing by completing a minimum of 60 earned semester hours;
2. Complete 10 specific courses with a grade of C (not C-) or better in each. These ten courses are: ECON 1010 and 1020, USP Communication 1 and 2 courses, ACCT 2010 and 2020, IMGT 2400, MATH 2200 and 2205 or MATH 2350 and 2355 and STAT 2050 or 2070.
3. Achieve a cumulative UW institution grade point average or transfer grade point average of at least 2.500. Note: Transfer grades are not counted in the UW GPA (see UW Catalog http://www.uwyo.edu/registrar/university_catalog/grade.html for additional information). Transfer students who have not attended the University of Wyoming, and therefore do not have an established UW institutional/cumulative GPA, and who have completed the required ten (10) courses with a C or better, have 60 earned credit hours, and have a 2.500 cumulative TRANSFER GPA will be awarded ABS.

IV. Common Body of Knowledge: (excludes Economics majors)

College of Business majors take a common set of courses that expose them to the basic concepts, processes and technical skills necessary to complete a well-rounded high quality business education. The common body of knowledge includes ACCT 2010, ACCT 2020, DSCI 2100, ECON 1010, ECON 1020, FIN 2100, IMGT 2400, MGT 2010, MGT 2100, MKT 2100, and MGT 4800. Grades of C (not C-) or above required.

V. Minimum requirements:

Achieve a cumulative College of Business and UW institution grade point average of at least 2.500. Complete 50% of the business credit hours from UW. Earn grades of C or above in common body of knowledge and major specific core courses. Earn a passing score on the Senior Exit Exam required for all College of Business majors.

Requirements for Non-College of Business Majors

Students in non-College of Business majors who wish to enroll in College of Business upper-division courses need not meet the advanced business standing prerequisites. However, they are required to meet individual course prerequisites listed in the University Catalog, including class standing.

Acceptance of Transfer Credit

The College of Business complies with UW policies regarding transfer credit discussed in the front section of this bulletin. The college has special course transfer arrangements with Wyoming community colleges that allow some courses taken at community colleges at the lower-division (freshman-sophomore) level to transfer for upper-division (junior) credit. Wyoming community college transfer students should contact the GJSSC for details.

Students transferring from other AACSB accredited colleges and universities will have their courses reviewed for transfer on a course-by-course basis.

The College of Business does not accept transfer credits for COB courses with equivalents at UW when the grade earned was less than a C.

Where appropriate, College of Business course equivalency will be granted for transfer courses at the 3000 and 4000 level if such coursework was completed at an AACSB or EQUIS institution only. Any coursework completed at an institution that does not meet that qualification will not be considered for upper division equivalency.

The UW College of Business is AACSB accredited and therefore follows AACSB's current guidelines* to maintain accreditation.

The primary goal of this transfer policy is to ensure coursework accepted from other institutions is comparable to coursework required by our college's degree programs and ensure that the majority of learning is completed at the institution awarding the degree while simultaneously allowing measured flexibility in acceptance of transfer credits as allowed by AACSB accreditation in support of student progress and degree completion.** For example, at the time of this policy's creation, the number of business credit hours for the College of Business's undergraduate majors is fifty-four (54) credit hours (this includes the business common body of knowledge courses). Therefore, to align with AACSB standards, a minimum of twenty-seven (27) credit hours of business coursework in the major must be earned in residence at the University of Wyoming.

In addition to the transfer policies defined in the University of Wyoming catalog, the College of Business has established the following policies in support of AACSB Standards governing the transfer of credit for equivalent business courses. Courses will be considered for transfer according to the additional criteria below. Students may transfer up to a total of twenty-seven (27) hours of business credits, either solely lower division courses or a mix of lower division and upper division courses, as follows:

- Students may transfer up to twenty-seven (27) lower division (1000/2000 level) business credits to the Common Body of Knowledge.
 - Lower division courses from regionally accredited institutions will be evaluated for equivalency and approved by the UW Office of the Registrar on an annual basis.
- Students may transfer up to nine (9) upper division (3000/4000 level) business credits according to the following guidelines:
 - Transferring upper division business credits to be included in the twenty-seven (27) credits reduces the number of lower division credits a student is able to transfer.
 - Courses from AACSB/EQUIS accredited institutions will be evaluated for equivalency and approved by the College of Business.
 - Courses from regionally accredited, non-AACSB/EQUIS institutions will be accepted as upper division elective credit in accordance with the transfer policies defined in the University of Wyoming catalog.
 - The College of Business has collaborative provisions (detailed in separate articulation agreements) that allow students from Wyoming's community colleges to transfer up to nine (9) credit hours of

2000 level coursework to satisfy up to nine (9) credit hours of 3000 level coursework that has been evaluated by the College of Business. These courses will be evaluated annually for equivalency***.

* A requirement of the accreditation process (as reflected in Standard 6 of the 2020 Business Standards) is for accredited colleges to have clear policies regarding transfer coursework.

** As noted by AACSB: "transfer credit related to business disciplines is normally limited to no more than half of the program requirements" (2020 AACSB Standards, p. 13).

*** Per college-specific articulation agreements, students may be able to transfer coursework satisfying completion of the following courses: ACCT 3070, ACCT 3230, ACCT 3240 or ACCT 3430.

Accounting, Management, and Marketing Online Programs

The College of Business offers the opportunity to pursue online degree programs in the areas of accounting, management, and/ or marketing accredited by AACSB and delivered through distance education. These online delivery programs are designed to help students maximize their flexibility in the business world.

The online accounting, management, and marketing degrees are offered almost in their entirety through the University of Wyoming, with the exception that students must have taken MATH 2350/2200 and MATH 2355/2205 through another institution as they are not offered online consistently through UW. The University of Wyoming College of Business works closely with our Wyoming community college partners to assist students in taking and transferring these math courses and other courses that align with our curriculum. Students are able to take a variety of transferable 1000 and 2000 level courses from Wyoming Community Colleges, in consultation with academic advisors, and then complete their upper division coursework from the University of Wyoming.

Students will be required to apply to UW and meet UW admissions criteria prior to enrolling in any College of Business program. Students must also attain a 2.500 GPA for graduation for both College of Business and UW courses, complete and submit an anticipated graduation date form, and must pass the Senior Exit Exam (BUSN 4990) to graduate.

To ensure you the availability of required courses in this program, enrollment into courses is managed and approved by the College of Business Peter M. and Paula Green Johnson Student Success Center.

College of Business Minors

Minors are available to on-campus students through the College of Business in the areas of banking and financial services, blockchain, data analytics, economics, entrepreneurship (not available to College of Business majors), hospitality business management, leadership, professional and technical selling, and real estate. Minors requirements may often be met by simply focusing the elective credits available in a student's major.

The minors program consists of course requirements of 15 hours of study. A minimum grade of C must be earned in each course. Certification of a successful minor program completion occurs as part of the DegreeWorks progress report, and the Office of the Registrar notes the completion of the minor on student transcripts. Minors must be approved by the Peter M. and Paula Green Johnson Student Success Center.

Students must have a minimum 2.500 cumulative UW GPA. Students must maintain a cumulative 2.500 GPA in the required College of Business courses for the minor to be awarded. Non-College of Business students must meet the individual course prerequisites listed in the catalog, although they need not meet the advanced business standing requirements. A minimum of 50% of COB courses must be taken from the degree-awarding institution.

Cooperative Undergraduate Programs

The Concentration in Environment and Natural Resources

College of Business majors may earn a cross major in Environment and Natural Resources (ENR) in cooperation with the UW School of Environment and Natural Resources. The appropriate use of natural resources and awareness of environmental consequences of decisions have become major issues for business. Exposure to ideas, skills and sensibilities in these areas is critical to future business people. Students majoring in economics may elect an environment and natural resources concentration in which an economics approach to problem solving is stressed. For more information call the ENR office at (307) 766-5089.

Graduate Study

The College of Business is comprised of three academic departments: accounting and finance, economics, and management and marketing. The faculty of these departments cooperate in the presentation of graduate work leading to the following degrees:

Master of Business Administration

Master of Science in Accounting

Master of Science in Economics

Master of Science in Finance

Doctor of Philosophy in Economics

Doctor of Philosophy in Marketing

The College of Business faculty is firmly committed to the excellence of its graduate programs. The graduate programs in the College of Business are accredited by AACSB International. The three academic departments coordinate course offerings to support all of the graduate degree programs; the M.B.A. program in particular is a college-wide effort.

Cooperative Graduate Programs

The Concentration in Environment and Natural Resources

College of Business graduate students may earn an interdisciplinary minor in environment and natural resources (ENR) in cooperation with the UW School of Environment and Natural Resources. The appropriate use of natural resources and awareness of environmental consequences of decisions have become major issues for all areas of business and economics. The School of Environment and Natural Resources is designed to move beyond the strictly disciplinary design and management of their long-term solutions. The school seeks to attract outstanding graduate students from a variety of disciplines, who are eager to pursue careers that engage other professionals, policymakers, and the public in finding innovative ways to resolve complex environmental and natural resource issues. To pursue a minor in ENR, students must first be admitted to another master's or doctoral degree program offered at the University of Wyoming. For more information call the ENR office at (307) 766-5080.

Major

Accounting, B.S.

The Accounting major prepares students for a career within the profession by providing them with the skills to create, interpret and analyze economic and financial information while focusing on assurance, financial and tax services.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Requirements - Total Credits: 120

Common Body of Knowledge - Credits: 33

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and

managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 30

Accounting Core: 21 Credits

ACCT3070 - Tax I

Credits: 3

This class covers a broad range of the tax concepts applicable to the taxation of individual taxpayers. Special emphasis will be placed on the role of taxation of the individual and the related decision-making process.

Prerequisite: ACCT 2010 and ACCT 2020, Advance Business Standing.

ACCT3230 - Intermediate Accounting I

Credits: 3

First of two courses studying financial reporting. Topics include recording and reporting events in the expenditure and revenue cycles.

Former Course Number [2230]

Prerequisite: ACCT 2010 , ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3240 - Cost Accounting I

Credits: 3

Organizational uses of information to plan, make decisions, and evaluate performance. Specific topics include job order and process costing, cost estimation and CVP analysis, budgeting and variance analysis.

Former Course Number [2240]

Prerequisite: ACCT 2010, ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3430 - Intermediate Accounting II

Credits: 4

Second of two courses studying financial reporting. Topics include debt, equity, revenue recognition, and special issues in expense and liability recognition.

Prerequisite: ACCT 3230 with grade of C or better; advanced business standing, or special permission of Department Head.

ACCT3610 - Accounting Information Systems

Credits: 3

Provides an understanding of accounting information systems and internal controls. Emphasis on the use of current accounting technology, accounting software and internal control systems.

Former Course Number [2040, 3010]

Prerequisite: ACCT 3230 with a grade of C or better; advanced business standing.

- ACCT 3900 - Accounting Professional Skills

ACCT4060 - Auditing I

Credits: 3

A study of the scope, activities, and responsibilities of professional auditors. Topics include assurance services by public accountants and the methods and techniques used to provide these services, with a focus on the audits of financial statements and internal controls performed by external auditors.

Prerequisite: ACCT 3230 with a grade of C or better; ACCT 3610 with a grade of C or better (or concurrent enrollment)

Accounting Elective: 3 Credits

Choose 1 of the Following:

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010 ,ACCT 2020 , FIN 2100 (or equivalent), sophomore class standing.

ACCT4960 - Volunteer Income Tax Assistance

Credits: 1-3
Max Credit 3

The Volunteer Income Tax Assistance (VITA) program is an IRS-sanctioned program designed to help low-income individuals and families file their federal and state taxes through trained volunteers. This course trains students to assist taxpayers in filing tax returns through the VITA program.

Prerequisite: ACCT 3070 (or concurrent).

Advanced Business Electives: 6 Credits

Any business courses at a 3000+ level that have not been used to meet any other primary major requirements.

Free Electives from Any College: 18 Credits

Courses from any college at any level that have not been used to meet any other primary major requirements.

A complete curriculum sheet is available from the College of Business Peter M. and Paula Green Johnson Student Success Center in the College of Business Building.

Please Note:

All accounting courses for the major require a minimum grade of C. In addition to university and college requirements cited previously, requirements for accounting majors are listed above.

Students who anticipate preparing themselves for the CPA examination following completion of their degree should be aware of the Wyoming statute governing eligibility to sit for the exam. Please see the state board's web site for information: cpaboard.state.wy.us. The current combined curricula (B.S. and M.S.) enable students to satisfy the educational requirements to sit for the CPA exam in Wyoming and other jurisdictions.

Business Economics, B.S.

Economics is the science of decision making and how to create value through trade. An business economics degree will provide you the tools to work on challenging policy issues and employ data analytics to address those issues.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Requirements - Total Credits: 120

Common Body of Knowledge - Credits: 33

College of Business Common Body of Knowledge Courses

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to

make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 21

Economics Core: 9 Credits

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON4240 - Evolution of Economic Ideas

Credits: 3

Focuses on the most influential economists who have shaped the evolution of economic thinking throughout history. Emphasis is on tracing the evolution of economic thought into the modern intellectual foundation of economics. Traces changing economic thought from mercantilism through modern paradigms.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Restricted Restricted to Seniors in Economics, Business Economics, or a concurrent major with Economics.

Prerequisite: Senior standing and ECON 3010 and ECON 3020, or permission of instructor.

Economics Electives: 6 Credits

Any Economics Courses at a 4000+ level that have not been used to meet any other primary major requirements.

Advanced Business Electives: 6 Credits

Any business courses at a 3000+ level that have not been used to meet any other primary major requirements.

Free Electives from Any College: 27 Credits

- Courses from any college at any level - Credits: 21
- Courses from any college at a 3000+ level - Credits: 6

Additional Requirements

All Business Economics majors must comply with requirements of the advanced business standing prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously.

A complete curriculum sheet is available from the Academic Advising unit of the GJSSC in the College of Business Building.

Business Economics majors must hold a 2.500 cumulative grade point average in all economics courses at graduation, as well as a minimum 2.500 cumulative UW grade point average and a minimum 2.500 grade point average in all College of Business courses.

With approval of the department chair or director of undergraduate studies, students may substitute work in certain areas of accounting, agricultural economics, business administration, history, political science, finance, mathematics, statistics or law for 6 hours of 4000-level economics courses.

Students who intend to continue on to graduate work are urged to give special attention to courses in economics theory, statistics and mathematics. Those planning a career in econometrics or mathematical economics should consult the department head as to mathematics and statistics requirements in these fields of study.

Restricted Restricted to Seniors in Economics, Business Economics, or a concurrent major with Economics.

Prerequisite: Senior standing and ECON 3010 and ECON 3020, or permission of instructor.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics,

legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Economics Electives: 12 Credits

Any Economics courses at a 4000+ level that have not been used to meet any other primary major requirements.

Optional Quantitative Concentration: 21 Credits

ECON4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGEC 4230.

Dual Listed ECON 5230.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

ECON4530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 5530.

Prerequisite: ECON 3020, and one of STAT 2010, STAT 2050, STAT 2070, or STAT 2110.

Students must take one of the following courses:

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: STAT 2050 or equivalent

Students will need Free Electives from any college at a 3000 + level - Credits: 15

Free Electives from Any College: 33 Credits

Courses from any college at any level - Credits: 33

Additional Requirements

The Economics major in the College of Business must complete 30 semester hours in economics courses.

All Economics majors must comply with course specific prerequisites for enrollment in upper-division courses and must complete all university studies courses as listed above previously. Students must earn a minimum grade of C (not C-) in all Economics courses.

This program is designed to meet the requirements of AACSB International (the Association to Advance Collegiate Schools of Business), the University of Wyoming, and the College of Business.

Minimum requirements include:

Minimum of 42 semester hours of 3000+ level courses. 30 of the 42 hours must be earned from UW.

2.50 grade point average in all College of Business courses, Economics courses, and all institution (UW) courses.

50% of the business credit hours must be from the University of Wyoming.

Grade of C (C- not acceptable) or above required for University Studies Program: FY, CI, C2, and C3.

Grade of C (C- not acceptable) or above required for common body of knowledge and major specific core courses.

A maximum of 6 hours at the 1/2000 level and 3/4000 level military science may be applied to degrees in the College of Business.

A complete curriculum sheet is available from the College of Business Peter M. & Paula Green Johnson Student Success Center.

With approval of the department chair, students may substitute work in certain areas of accounting, agricultural economics, business administration, history, political science, finance, mathematics, statistics or law for 6 hours of the 4000-level economics electives.

This program allows considerable flexibility for the student to specialize in interdisciplinary study. For example, the student can be advised on selecting upper level division courses for pre-law study, political economy, environmental and natural resources, women's studies, and international studies.

Students who intend to continue in graduate work should give special attention to courses in economic theory, statistics and mathematics. Those planning a career in mathematical economics or econometrics should consult the department head regarding the mathematics and statistics requirements in these fields of study.

Entrepreneurship, B.S.

For students who wish to start their own businesses, provides exposure to the development and testing of business concepts, and formulating and implementing business plans that will assist in the establishment and growth of these new ventures.

Requirements - Total Credits: 120

University Studies Program

The University Studies Program 2015

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Common Body of Knowledge - Credits: 33

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 21

Entrepreneurship Core: 12 Credits

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

ENTR4700 - Business Model Creation and Launch

Credits: 3

Students build on previous learning to develop a complete business model including sales and marketing strategies, operations, financial forecasts, and partners. Deliverables include a pitch to start-up investors as part of a real-world entrepreneurship experience (for example, an entrepreneurship competition). Students learn primarily through hands-on application of concepts.

Prerequisite: ENTR 3700.

ENTR4750 - Theories of Entrepreneurship

Credits: 3

A broad examination of historical, literary, and business perspectives on entrepreneurship. Students explore the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of opportunities. Emphasis is on the evolution of entrepreneurship theories over time, and current trends related to the application of these theories.

Prerequisite: ENTR 3700.

Entrepreneurship Elective: 3 Credits

Choose 1 from the following:

ENTR4910 - Topics in Entrepreneurship

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Prerequisite: Junior class standing, consent of instructor

ENTR4900 - Independent Study in Entrepreneurship

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study on an individual basis, any aspect of Entrepreneurship not included in other structure Entrepreneurship courses

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

Advanced Business Electives: 6 Credits

Any business course at a 3000 - 4000 level that has not been used to meet any other primary major requirements.

Free Electives from Any College - Credits: 27

21 (or 24*) of the 27 required hours must be 3000 - 4000 level which have not been used to meet any other requirement.

- Courses from any college at any level - Credits: 6 (or 3*)
- Courses from any college at 3000 - 4000 level - Credits: 21 (or 24*)

** If MGT 2030 is selected as the Entrepreneurship Elective*

Additional Requirements

The Entrepreneurship major is designed to assist students who wish to start their own businesses by providing them with exposure to the development and testing of business concepts. Analyzing the potential success of their concepts using a variety of tools and techniques, being flexible in developing new businesses and innovative ideas, and formulating and implementing business plans that will assist in the establishment and growth of these new ventures. The major provides students with exposure to issues involving family firms such as governance, succession and interpersonal relationships in both new ventures and established firms and prepares students to 1) start new businesses, 2) innovate in their own family firms and/or 3) be entrepreneurial in an existing business.

Finance, B.S.

The Finance major provides the principal concepts for students to understand financial management of business concerns and, if students desire, to specialize in bank management, corporation finances and investment management.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Requirements - Total Credits: 120

Common Body of Knowledge - Credits: 33

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective.

Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 21

Finance Core: 12 Credits

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010 ,ACCT 2020 , FIN 2100 (or equivalent), sophomore class standing.

FIN4400 - Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 5400.

Prerequisite: FIN 2100, FIN 3310, IMGT 2400, advanced business standing.

FIN3310 - Investment Management

Credits: 3

Fundamental principles of investments and practical implications of financial theory. Students acquire a framework for understanding returns on financial assets, risk and return, fundamentals of portfolio theory, efficient market hypothesis, and asset pricing models. Other topics include financial statement analysis, behavioral finance, and introduction to options and futures.

Former Course Number [4310]

Prerequisite: FIN 2100 and advanced business standing.

FIN4250 - Advanced Corporate Finance

Credits: 3

Give students a better appreciation of the techniques and theories of corporate finance and investments that may have been introduced in introductory finance courses.

USP 2015 Code U5C3

Prerequisite: FIN 2100.

Finance Electives: 3 Credits

Choose 1 of the Following:

FIN3520 - Financial Markets

Credits: 3

Portfolio and capital market theory and the analysis of risk are introduced. Integrates theory into practical aspects of financial markets.

Former Course Number [4520]

Prerequisite: FIN 2100, STAT 2010 or STAT 2050/STAT 2070, and advanced business standing.

FIN4340 - Portfolio Management I

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4350 - Portfolio Management II

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4360 - Options and Futures

Credits: 3

Provides an introduction to financial futures such as currency futures and interest rate futures. Explores the markets on which they are traded. Also analyzes pricing of options and other derivative securities. Includes the leverage and risk aspects of options.

Prerequisite: FIN 2100, FIN 3310.

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

FIN4530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 5530.

Prerequisite: FIN 2100, advanced business standing.

FIN4540 - Banking Policy

Credits: 3

Intended to be taken either with or after FIN 4510, Bank Management, and will cover similar topics but in greater depth and breadth. Integrated application of these topics will take place in a selection of case studies, some of which will be analyzed in teams.

Prerequisite: FIN 4510 or concurrent enrollment in FIN 4510.

FIN4710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 5710.

Prerequisite: FIN 2100

Advanced Business Electives: 6 Credits

Any business courses at a 3000+ level that have not been used to meet any other primary major requirements.

Free Electives from Any College: 27 Credits

- Courses from any college at any level - Credits: 21
- Courses from any college at a 3000+ level - Credits: 6

Management, B.S.

Studies the activities and operations that bring together human, financial, material, and information resources to achieve goals in organizations. Students can customize their degree within one of two tracks: Human Resources or General Management.

Requirements - Total Credits: 120

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 21

Management Core - Credits: 15

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

- Choose any 3 Approved Elective Courses within the same track area Credits: 9

Human Resources Track

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT4220 - Talent Acquisition

Credits: 3

In Human Resource Management one core function is recruiting and selecting the best talent to drive organizational success. Students will learn how to analyze jobs and develop recruitment plans to find qualified individuals, how to conduct professional and valid interviews, and how to successfully onboard employees into the organization.

Prerequisite: MGT 3410

MGT4240 - Performance and Compensation

Credits: 3

In Human Resource Management the management of employee performance and compensation are key functions that drive organizational success. This course helps students become familiar with total compensation systems, including intrinsic and extrinsic rewards, base and variable pay, and benefits, and their relationship with employee performance and satisfaction.

Prerequisite: MGT 3410

MGT4260 - Training and Development

Credits: 3

In Human Resource Management training employees in the latest technical and managerial skills and helping them gain developmental experiences helps drive organizational success. Students will learn how to recognize training and developmental needs, how to develop employee training systems, and how to implement these training systems. Additionally, students will learn about career and leader development.

Prerequisite: MGT 3410

MGT4470 - Negotiations and Conflict Resolution

Credits: 3
Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

MGT4900 - Independent Study in Management

Credits: 1-4
Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Management not included in other structured management courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT4910 - Topics in Management

Credits: 3
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

General Management Track

MGT2030 - Principle-Based Ethics

Credits: 3
Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3

Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

MGT4900 - Independent Study in Management

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Management not included in other structured management courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT4910 - Topics in Management

Credits: 3
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

DSCI4240 - Computer Applications in Decision Sciences

Credits: 3
A study of decision science topics such as mathematical programming, Monte Carlo simulation, forecasting, project management and decision theory. The applications of computer techniques is emphasized.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, and junior class standing.

DSCI4260 - Project Management

Credits: 3
Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ENTR2700 - Entrepreneurial Mindset

Credits: 3
This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3
This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Advanced Business Electives: 6 Credits

Any business courses at a 3000 - 4000 level that have not been used to meet any other primary major requirements.

Free Electives from Any College: 27 Credits

18 (or 21 or 24*) of the 27 required hours must be 3000 - 4000 level which have not been used to meet any other requirement.

- Courses from any college at any level - Credits: 9 (or 6 or 3*)
- Courses from any college at 3000 - 4000 level - Credits: 18 (or 21 or 24*)

** 21 hours if MGT 2030 or ENTR 2700 are selected as one of the courses within either track; 24 hours if both courses are selected.*

Additional Requirements

The Management major focuses on using resources to achieve goals in organizations. It studies the activities and operations that bring together human, financial, material, and information resources. Management majors should graduate with an understanding of the business world and a set of tools to manage successfully parts or all of an organization's operations. The Management degree allows students the ability to customize their degree within one of two tracks:

1) Human Resources Track - An experiential-learning focused program designed to prepare students to develop and manage the human capital of an organization. Students will be prepared to develop and implement policies and practices for recruitment, socialization, training, development, compensation, performance management, career planning, and employee relations. As more organizations move away from viewing employees as a commodity, toward an understanding that employees are a resource that can be developed into a distinct competitive advantage to ensure organizational success, sustainability, and reputation in the human resource function in the workplace will become increasingly important. This track will help employees understand the core functions of the area of human resource management are to a) recognize the potential of individuals for and within an organization and b) structure a positive,

supportive, constructive work environment that will enable employees to work at their optimal capacity and achieve organizational goals.

2) General Management Track - A multi-faceted program designed to prepare students to manage multiple business functions across a variety of organizational types. A particular emphasis is to help develop interpersonal and problem-solving skills so they are capable of resolving a broad spectrum of problems for large or small organizations, or consult with organizations about these issues. This track is designed to provide students with a large degree of flexibility when considering different career paths, because students will be prepared to systematically think through the processes that organizations use to create and maintain sustainable competitive advantage. The track prepares students to work in for-profit businesses, non-profit organizations, entrepreneurial ventures, or in government organizations.

The Management major, including both tracks, is available to students as an online degree completion program.

All management majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously.

All management courses for the major require a minimum grade of C (not C-).

Marketing, B.S.

Marketing is a societal process and a set of organizational functions for creating, communicating, and delivering value to customers, and for managing relationships in ways to benefit local and global stakeholders.

Requirements - Total Credits: 120

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Common Body of Knowledge - Credits: 33

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Major Specific Courses - Credits: 21

Marketing Core - Credits: 9

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4450 - Advanced Marketing Management

Credits: 3

This course is designed to integrate prior marketing classes. Primary focus is on utilizing marketing concepts and tools in a strategic marketing decision-making context.

USP 2015 Code U5C3

Prerequisite: MKT 2100 , MKT 4520, junior class standing.

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

Marketing Electives - Credits: 6

Choose 2 of the following:

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 2100, advanced business standing.

MKT4250 - Digital Marketing

Credits: 3

This is an investigation of the digital marketing discipline with an emphasis on e-commerce models, online advertising, digital consumer behavior, privacy considerations, website structure, search engine optimization and social media marketing.

Prerequisite: MKT 2100

MKT4440 - Services Marketing

Credits: 3

This course is designed for students who may be interested in working in service industries and will address the distinct needs and problems of service firms in the area of marketing.

Prerequisite: HOSP 2000 or MKT 2100 .

MKT4540 - International Marketing

Credits: 3

Approaches the topic of international marketing from a managerial perspective. Exposure to world environmental characteristics and interdependencies, as well as objectives, strategies and tactics of marketing goods and services to various countries and cultures.

Cross Listed INST 4540.

Prerequisite: MKT 2100 and junior class standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

MKT4900 - Independent Study in Marketing

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Marketing not included in other structured marketing courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MKT4910 - Topics in Marketing

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to

develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Advanced Business Electives: 6 Credits

Any business courses at a 3000 - 4000 level that have not been used to meet any other primary major requirements.

Free Electives from Any College - Credits: 27

- Courses from any college at any level - Credits: 9
- Courses from any college at a 3000 - 4000 level - Credits: 18

Additional Requirements

Marketing is a societal process and a set of organizational functions for creating, communicating, and delivering value to customers, and for managing relationships in ways to benefit local and global stakeholders. Marketing majors are employed in a wide variety of industries and governmental agencies where understanding and managing customer relationships are critical. Students find jobs in market research, advertising, public relations, professional selling, non-profit marketing, product management, retailing, digital marketing, and brand management.

The Marketing major is available to students as an online degree completion program.

Professional Sales, B.S.

Prepares students to manage business clients of for-profit and nonprofit organizations. Rigorous classroom experiences and industry opportunities equip students with essential knowledge and skills required to begin professional careers in sales.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

SELL4310 - Advanced Selling

Credits: 3

This course provides students in-depth study of advanced sales concepts including relationship management, problem solving, negotiation, and proposal writing. It also explores the use of data-based decision making and the use of selling technologies. Students will learn how to use data to sell to both resellers and manufacturers.

Prerequisite: SELL 3310 and junior class standing.

SELL4320 - Sales Force Strategies

Credits: 3

This class will examine the linkages among management of the sales function, personal selling activities, and the marketing area. Students will gain an understanding of the role of the sales force in achieving of the firm's marketing, customer relationship, and revenue objectives.

Prerequisite: SELL 3310 and junior class standing.

SELL4330 - Sales Seminar

Credits: 3

This course provides students in-depth study of advanced, and cutting edge sales and sales management concepts presenting by top talent in industry. While topic can vary, this seminar teams students with industry experts to explore state-of-the-art thinking in technical sales, sales management, sales training, compensation, and team selling.

Prerequisite: SELL 3310 and junior class standing.

Professional Sales Electives - Credits: 3

Choose 1 from the following list:

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

DSCI4280 - Supply Chain Management

Credits: 3

Explores the links between overall business strategy and supply chain strategy, with a focus on strategic design and effective operation of supply chains to improve the organizations' productivity and competitiveness. Examines impact of technologies transforming global supply chains such as blockchain, machine learning, analytics, robotics, and other advancements.

Prerequisite: DSCI 2100, junior class standing, advanced business standing.

FIN4250 - Advanced Corporate Finance

Credits: 3

Give students a better appreciation of the techniques and theories of corporate finance and investments that may have been introduced in introductory finance courses.

USP 2015 Code U5C3

Prerequisite: FIN 2100.

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

BUSN4600 - Advanced Internship in Business

Credits: 3
Max Credit 6

Provides students with practical business knowledge, policy, procedure, and decision making. Students work as interns in operating organizations.

Prerequisite: MKT 2100, MGT 2100, FIN 2100, advanced business standing, approved internship application through the Peter M. & Paula Green Johnson Student Success Center.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3
Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

SELL4900 - Independent Study in Professional Selling

Credits: 1-4
Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Professional Selling not included in other structured Professional Selling courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

SELL4910 - Topics in Professional Selling

Credits: 3
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

Advanced Business Electives - Credits: 6

Any business courses at a 3000 - 4000 level that have not been used to meet any other primary major requirements.

Free Electives from Any College - Credits: 27

- Courses from any college at any level - Credits: 9
- Courses from any college at a 3000 - 4000 level - Credits: 18

Additional Requirements

The Professional Sales major prepares students to manage business clients of for-profit and nonprofit organizations. Specifically, this major provides business students with coursework and opportunities to equip themselves with essential knowledge and skills required to begin professional careers in sales. Careers in sales offer independence, ample financial reward, personal growth and opportunities for rapid advancement within organizations. Students that pursue a degree in professional sales will be challenged with industry engagement opportunities such as internships, and sales competitions. Students experience rigorous classroom experiences designed to develop the knowledge and practical skills needed to succeed during the first years of their sales careers including: oral and written communication skills, selling techniques and networking, the use of sales technology and customer information, and sales pipeline management.

All professional sales majors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously.

All professional selling courses for the major require a minimum grade of C.

Minor

Banking and Financial Services Minor

The Banking and Financial Services minor introduces the student to the field and provides them with a greater understanding of how the banking system functions to provide service and value to the economy.

Finance Requirement

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

FIN4540 - Banking Policy

Credits: 3

Intended to be taken either with or after FIN 4510, Bank Management, and will cover similar topics but in greater depth and breadth. Integrated application of these topics will take place in a selection of case studies, some of which will be analyzed in teams.

Prerequisite: FIN 4510 or concurrent enrollment in FIN 4510.

FIN4530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 5530.

Prerequisite: FIN 2100, advanced business standing.

Advanced Business Electives

- Any Business Course (3000-level or higher) Credits: 3
- Any Business Course (3000-level or higher) Credits: 3

Minor Total Credits: 15

Blockchain Minor

This minor lays the foundation for gaining a competitive advantage in the blockchain ecosystem by providing an understanding of the implications and business opportunities associated with blockchain and digital assets and how they affect global industries.

Blockchain Core - Credits: 9

BKCH3021 - Fundamentals of Blockchain

Credits: 3

The purpose of this course is to provide a fundamental understanding of blockchain technologies and their implications. Topics will focus on understanding how blockchain may change the way we think about money, disrupt traditional financial institutions and eliminate costly intermediaries.

Prerequisite: Requires Junior Class Standing.

BKCH4021 - Business Applications of Blockchain

Credits: 3

This course provides advanced concepts underpinning the applications of global blockchain technologies for business and their use cases. Students will learn about the underlying technologies to be well-prepared to develop blockchain applications in the business world.

Prerequisite: BKCH 3021.

BKCH4121 - Case Studies in Block Chain

Credits: 3

This experiential learning focused course is targeted toward understanding the creation and development of blockchain ventures. Besides course lecture materials, students will study and support new blockchain ventures in a real-world setting.

Prerequisite: BKCH 3021.

Blockchain Electives - Credits: 6

Choose two from the following:

FIN4910 - Topics in Finance

Credits: 1-6

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ES4920 - Entrepreneurship for Engineers

Credits: 3

Traditional engineering education does not prepare graduates for work in entrepreneurial ventures. The goal of this course is to have students demonstrate skills in developing business ideas, performing preliminary market research, estimating cash flow, and launching a business.

Prerequisite: 9 hours within an engineering discipline and junior standing.

COSC4010 - Special Topics in Computer Science

Credits: 1-3

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of advanced topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: COSC 3020 concurrently and consent of instructor.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

Total for Minor: 15 Credits

Data Analytics Minor

The Data Analytics minor is designed to provide the student with the skills necessary to gather, process and interpret the large amounts of data available in today's fast paced business environment.

Required Core

DSCI4240 - Computer Applications in Decision Sciences

Credits: 3

A study of decision science topics such as mathematical programming, Monte Carlo simulation, forecasting, project management and decision theory. The applications of computer techniques is emphasized.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, and junior class standing.

IMGT4500 - Business Analytics

Credits: 3

This class prepares students to understand, manage, and visualize data. Students will learn how to apply the appropriate analytic tools, and communicate the findings and their relevance. Topics covered include data wrangling, descriptive analytics, predictive analytics, and prescriptive analytics.

Prerequisite: IMGT 1400, STAT 2050 or equivalent

ECON4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGECE 4230.

Dual Listed ECON 5230.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

OR

ECON4530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 5530.

Prerequisite: ECON 3020, and one of STAT 2010, STAT 2050, STAT 2070, or STAT 2110.

Advanced Business Electives

- Any Business Course (3000-level or higher) Credits: 3
- Any Business Course (3000-level or higher) Credits: 3

Minor Total Credits: 15

Economics Minor

Economics is the science of decision making and how to create value through trade. An economics degree will provide you the tools to work on challenging policy issues and employ data analytics to address those issues.

Economics Requirement

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

Advanced Economics Electives

- Any ECON Course Credits: 3 (excl. ECON 3010, ECON 3020)
- Any ECON Course (4000-level) Credits: 6

Minor Total Credits: 15

Entrepreneurship Minor

A minor in entrepreneurship features business courses likely to be important to the creator of a new venture and/or someone seeking to bring innovation and creativity to an existing enterprise. **For non-College of Business majors only.**

Entrepreneurship Minor Requirements - Credits: 9

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

ENTR4700 - Business Model Creation and Launch

Credits: 3

Students build on previous learning to develop a complete business model including sales and marketing strategies, operations, financial forecasts, and partners. Deliverables include a pitch to start-up investors as part of a real-world entrepreneurship experience (for example, an entrepreneurship competition). Students learn primarily through hands-on application of concepts.

Prerequisite: ENTR 3700.

- *Combination of courses from the Approved Electives for the Entrepreneurship Minor list totaling 6 credit hours.*

Approved Electives for the Entrepreneurship Minor - Credits: 6

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010 ,ACCT 2020 , FIN 2100 (or equivalent), sophomore class standing.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

OR

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGEC 2020, or AGEC 4500, or AGEC 4060, or FIN 2100.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

DSCI4230 - Purchasing and Supply Management

Credits: 3

Examines how to manage supply function. Topics include organization, planning procedures, category management, supplier selection, quality, inventory decisions, ethical and profession standards, costing, and price determination.

Prerequisite: DSCI 2100, junior class standing, advanced business standing.

ENTR3020 - Comparison of Entrepreneurial Ecosystems

Credits: 3

The goal of this course is to expose students to different entrepreneurial ecosystems and let them think about how the environment, legal, technical, cultural, and economic, could impact their entrepreneurial endeavors. The class will accomplish this by visiting a developed country and a developing country to learn about the ecosystems and talk with entrepreneurs to see how the forces impacted their startups.

Cross Listed ES 3020.

ENTR4750 - Theories of Entrepreneurship

Credits: 3

A broad examination of historical, literary, and business perspectives on entrepreneurship. Students explore the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of opportunities. Emphasis is on the evolution of entrepreneurship theories over time, and current trends related to the application of these theories.

Prerequisite: ENTR 3700.

ES4920 - Entrepreneurship for Engineers

Credits: 3

Traditional engineering education does not prepare graduates for work in entrepreneurial ventures. The goal of this course is to have students demonstrate skills in developing business ideas, performing preliminary market research, estimating cash flow, and launching a business.

Prerequisite: 9 hours within an engineering discipline and junior standing.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 2010 and junior class standing.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3
Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

MUSC4000 - Careers in Music

Credits: 2

Expands the student's understanding of the range of careers in the professional music world. Covers the concepts of marketing, performance, teaching, recording, technology, venue management, and fundraising.

Prerequisite: MUSC 1000 or MUSC 1003.

MUSC4001 - Music Entrepreneurship Seminar

Credits: 2

Further crystalizes successful business enterprise development introduced in ENTR 2700. Student will hone entrepreneurial skills in idea creation, business incubation, development, research, and commercialization.

MUSC4005 - Internship in Music Business

Credits: 1

Offers an evaluated and professional work experience in public or private organizations on assignments relating to student's career goals, allowing students to explore the relationship between theory and practice in their major.

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

SELL4310 - Advanced Selling

Credits: 3

This course provides students in-depth study of advanced sales concepts including relationship management, problem solving, negotiation, and proposal writing. It also explores the use of data-based decision making and the use of selling technologies. Students will learn how to use data to sell to both resellers and manufacturers.

Prerequisite: SELL 3310 and junior class standing.

Additional Requirements

A minor in entrepreneurship features business courses likely to be important to the creator of a new venture and/or someone seeking to bring innovation and creativity to an existing enterprise. The minor includes exposure to various elements of the entrepreneurial process, including creativity, ideation, innovation, value proposition, and business model creation.

15 credit hours (9 credits of required courses, 6 credits from the Approved Elective for the Entrepreneurship Minor courses list)

(For non-College of Business majors only)

Hospitality Business Management Minor

The Hospitality Business Minor provides students an understanding of the operations of multiple domains of the hospitality industry including food and beverage, tourism and lodging, and entrepreneurship and consumer relations.

Minor Total Credits: 15

Required Courses - Credits: 9

HOSP2000 - Foundations of Customer Service & Hospitality

Credits: 3

This course examines critical elements of excellent customer service in the hospitality industry.

HOSP3000 - Managing Profitability in Hospitality

Credits: 3

This course examines the complexities of profitability in the hospitality industry, driven by issues of pricing and cost management. Areas explored can include restaurants, hotels, and other hospitality ventures.

Prerequisite: ACCT 2010

HOSP4800 - Hospitality Operations Management

Credits: 3

This course provides a broad-reaching, applications-based understanding of hospitality operations and management. It provides a managerial perspective on the operations of each component of hospitality management and operations, including the financial aspect.

Prerequisite: HOSP 2000

- Any Approved Elective Courses within one core area (see approved elective courses cores) Credits: 6

Approved Elective Courses - Credits 6

(choose any courses totaling 6 credits from one of three focal cores: Food & Beverage, Tourism & Lodging, or Management & Marketing)

Food & Beverage Core

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

- FCSC 4900 - Food Safety Credits: 3
The following HOSP courses are offered through Casper College via distance education
- HOSP 2320 - Food & Beverage Management Credits:3
- HOSP 2330 - Food & Beverage Services Credits:3
- HOSP 2535 - Planning and Control for Food & Beverage Operations Credits: 3

- HOSP 2540 - Bar & Beverage Management Credits: 3
The following FSHM courses are acceptable transferrable electives only offered in-person at Sheridan College in Sheridan, WY.
- FSHM 2540 - Bar & Beverage Management Credits: 2
- FSHM 2600 - Dining Room Management Credits: 2
- FSHM 2700 - Food & Beverage Services Credits: 3
The following HRM courses are acceptable transferrable electives only offered in-person at Central Wyoming College in Jackson, WY.
- HRM 1505 - Sanitation, Health, & Safety in the Hospitality Industry Credits: 3
- HRM 1510 - Dining Room Management & Food Delivery Systems Credits: 3
- HRM 1515 - Planning and Control for Food & Beverage Operations Credits: 3
- HRM 2500 - Quality Food Purchasing Credits: 3
- HRM 2525 - Wine Production, Service, & Appreciation Credits: 3
- HRM 2530 - Beverage Management Credits: 3

Tourism & Lodging Core

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

HOSP4910 - Topics in Hospitality

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

The following HOSP courses are offered through Casper College via distance education

- HOSP 1540 - Hotel Operations Management Credits: 3

- HOSP 2525 - Recreation & Tourism Planning & Development Credits: 3
- HOSP 2530 - Tourism Management Credits: 3
The following FSHM course is an acceptable transferrable elective only offered in-person at Sheridan College in Sheridan, WY.
- FSHM 2610 - Banquet Management Credits: 2
The following HRM course is an acceptable transferrable elective only offered in-person at Central Wyoming College in Jackson, WY.
- HRM 1501 - Lodging Management/Front Office Procedures Credits: 3

Management & Marketing Core

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 2100, advanced business standing.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4440 - Services Marketing

Credits: 3

This course is designed for students who may be interested in working in service industries and will address the distinct needs and problems of service firms in the area of marketing.

Prerequisite: HOSP 2000 or MKT 2100 .

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

The following HOSP course is offered through Casper College via distance education

- HOSP 1560 - Convention Sales & Management Credits: 3

The following FSHM course is an acceptable transferrable elective only offered in-person at Sheridan College in Sheridan, WY.

- FSHM 2520 - Security & Loss Prevention Management Credits: 3

Additional Requirements

The Hospitality Business Minor provides students an understanding of the operations of multiple domains of the hospitality industry including food and beverage, tourism and lodging, and entrepreneurship and consumer relations. Knowledge in these areas is critical for anyone desiring to work in the hospitality industry or for a business that services the hospitality industry.

Leadership Minor

A unique experience that prepares students to be principle-based leaders in every facet of their lives. Students develop leadership competencies and their own personal leadership style, and are prepared to make decisions in principle-based ways.

Minor Total Credits: 15

Required Courses - Credits: 9

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

LEAD4110 - Leadership in Practice

Credits: 3

The culminating leadership experience of the university's leadership program. Students draw upon their prior learning to lead an experiential project, benefiting a UW stakeholder. Students continue to learn about effective leadership through the lens of practitioner-oriented literature and apply their learning in advanced casework. The instructor acts as a leadership coach who helps students refine their leadership competencies and enhance leadership potential.

Prerequisite: LEAD 3610 , MGT 2030

Leadership Electives - Credits: 6

Complete a minimum of 6 credits with courses from the below list

ACES3000 - Peer Advising

Credits: 3

This course is designed to help you develop the skills, understanding, competencies, and dispositions needed to be an effective peer advisor at UW. Course content will cover student development theory, interpersonal skills, Ethics of working with college students, UW policies/procedures, UW academic requirements, and advising approaches.

When Offered (Offered Spring Semester Only)

Prerequisite: Sophomore standing and completion of USP15-C2

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

AGRI4700 - Elements of Leadership

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for

continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 5700.

Prerequisite: Restricted enrollment. Prior approval required.

AIR2010 - Team and Leadership Fundamentals I

Credits: 1-0.5

Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

Prerequisite: AIR 1010 and AIR 1020 or consent of instructor.

AIR2020 - Team and Leadership Fundamentals II

Credits: 1-0.5

Continues AIR 2010.

Prerequisite: AIR 1010, AIR 1020, and AIR 2010 or consent of instructor.

AIR3010 - Leading People/Effective Communication I

Credits: 3

Teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

USP 2015 Code U5C2

Former Course Number [4010]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, and AIR 2020 or consent of instructor.

AIR3020 - Leading People/Effective Communication II

Credits: 3

Continues AIR 3010.

USP 2003-2014 Code U3CS

Former Course Number [4020]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020, AIR 3010 or consent of instructor.

ARMY2010 - Leadership Skills and Management

Credits: 2

Studies principles and theories of leadership and team dynamics. Develops student leadership potential through the study of the values and attributes of effective leaders. Students gain self-confidence through the application of principles and techniques of leadership in a military environment.

Former Course Number [2030]

Prerequisite: ARMY 1010, ARMY 1020 or consent of instructor.

ARMY2020 - Leadership Skills and Small Unit Management

Credits: 2

Studies principles in small-unit management, tactics, operations and leadership. Develops students' self-confidence in their leadership ability through progressive application of knowledge, decision making, communication and control.

Former Course Number [2040]

Prerequisite: ARMY 2010 or consent of instructor.

ARMY2060 - Competent and Confident Leadership

Credits: 2

Interdisciplinary course whose aim is to encourage assessment of our obligations, commitments, and roles in society by inquiring into the nature of leadership and the responsibilities of both leaders and followers. Examines leadership traits that transcend the military aspect of leadership.

ARMY3010 - Leadership and Tactics I

Credits: 3

Studies leadership techniques and tactical operations at the small-unit level. Instruction covers the decision-making process, troop leading procedures, land navigation and operation orders. In-depth analysis of team/squad tactical procedures and techniques. Numerous student oral presentations and practical exercises.

USP 2003-2014 Code U30

Prerequisite: ARMY 2010, ARMY 2020, basic camp or consent of department head.

ARMY3020 - Leadership and Tactics II

Credits: 3

Studies platoon-level tactics and leadership techniques. Instruction covers the solving of complex tactical problems. Illustrates techniques for properly managing personnel, resources and time to accomplish organizational goals. Introduces Army staff functions and prepares students for successful completion of ARMY 3030.

Prerequisite: ARMY 3010.

ARMY4010 - Dynamics of the Military Organization I

Credits: 2

Studies and analyzes organization, resources and functions of military staff. Reviews formal staff problem-solving procedures, including student effective writing and briefing presentations. Introduces ethics and the military profession.

Former Course Number [4030]

Prerequisite: ARMY 3010, ARMY 3020 or consent of department head.

ARMY4020 - Dynamics of the Military Organization II

Credits: 2

Introduces military law; planning and management of personal affairs; Army transportation, logistics and personnel management systems. Studies officer/NCO relations. Includes student writing and briefing presentations on assigned topics.

Former Course Number [4040]

Prerequisite: ARMY 4010 or consent of department head.

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

CNSL3010 - Student Leadership Strategies

Credits: 2

Develops skills and competencies requisite to effective leadership. Provides student leaders with skills they will profit from, both while enrolled at the university and later in their chosen careers.

When Offered (Normally offered each spring semester)

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

OR

ORTM2800 - Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. There is a significant focus on self-awareness, judgment, and decision-making. The specific skills and theories students learn in the class provide a foundation for other leadership endeavors.

Cross Listed ENR 2800

Prerequisite: COM 1

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

HP4152 - Honors Seminar

Credits: 3

Max Credit (Max. 6)

Asks students to confront a complex social issue, examine it from several perspectives and take a stance on some aspect of the issue. Topics vary from year to year. Required of UW Honors students.

Former Course Number [4150]

Prerequisite: COM1, COM2

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

NURS4830 - Leadership in Healthcare Today

Credits: 2

Focuses on the role of nurse leader and manager through integration of leadership, management, and organizational concepts, models, and theories. Emphasis in on leadership, followership, management, advocacy, professional development and activism, and managing resources.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4835 - Leading Nursing Practice

Credits: 2

Focuses on nurse leaders making a difference using evidence-based nursing practice. Learners utilize and synthesize basic concepts of professional nursing practice. This course creates the opportunity for learners to lead nursing practice in a variety of settings.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

UWYO3000 - Student Leadership in Supplemental Instruction

Credits: 2

Focuses on theoretical perspectives of group tutoring and peer leadership, best practices in supplemental instruction, and student reflection. Will strengthen leadership knowledge and skills and introduce effective methods for group facilitation and SI curriculum.

Prerequisite: closed to general enrollment.

(UWYO 3000 is a closed enrollment course. Students may only enroll if invited by LeaRN Program Director)

UWYO3010 - Student-Athlete Leadership Skills

Credits: 1

Designed for students to gain and apply leadership skills among other topics such as healthy relationships, nutrition, budgeting, and preparing for internships. This course builds on UWYO 1050 Student-Athlete Academic Success, and prepares the student for UWYO 3050 Student-Athlete Career Preparation.

Prerequisite: COM1.

Additional Requirements

The Leadership Minor is a unique interdisciplinary curricular, co-curricular, and extra-curricular experience that prepares students to be principle-based leaders in every facet of their lives. Through the Leadership Minor, students develop leadership competencies and their own personal leadership style, and are prepared to make decisions in principle-based ways.

All courses for the minor require a minimum grade of C (not C-).

Professional and Technical Selling Minor

Provides students with technical and/or liberal arts backgrounds with opportunities to pair these backgrounds with essential knowledge and skills required for careers in sales. Combines rigorous classroom experiences with industry opportunities.

Minor Total Credits: 15

Professional and Technical Selling Requirement - Credits: 3

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Professional and Technical Selling Approved Elective Courses - Credits: 6

Choose 2 courses from the list below

SELL4310 - Advanced Selling

Credits: 3

This course provides students in-depth study of advanced sales concepts including relationship management, problem solving, negotiation, and proposal writing. It also explores the use of data-based decision making and the use of selling technologies. Students will learn how to use data to sell to both resellers and manufacturers.

Prerequisite: SELL 3310 and junior class standing.

SELL4320 - Sales Force Strategies

Credits: 3

This class will examine the linkages among management of the sales function, personal selling activities, and the marketing area. Students will gain an understanding of the role of the sales force in achieving of the firm's marketing, customer relationship, and revenue objectives.

Prerequisite: SELL 3310 and junior class standing.

SELL4330 - Sales Seminar

Credits: 3

This course provides students in-depth study of advanced, and cutting edge sales and sales management concepts presenting by top talent in industry. While topic can vary, this seminar teams students with industry experts to explore state-of-the-art thinking in technical sales, sales management, sales training, compensation, and team selling.

Prerequisite: SELL 3310 and junior class standing.

Advanced Business Electives - Credits: 6

- Any business courses at the 3000 - 4000 level - Credits: 6

Additional Requirements

The professional and technical selling minor prepares students to manage business clients. This minor provides students with technical and/or liberal arts backgrounds with opportunities to pair these backgrounds with essential knowledge and skills required for careers in sales. Careers in sales offer independence, ample financial reward, personal growth, and opportunities for rapid advancement within organizations. Students experience rigorous classroom experiences designed to develop important knowledge and practical selling skills including: oral and written communication skills, selling techniques and networking, and the use of sales technology and customer information.

All professional and technical selling minors must comply with requirements of the advanced business prerequisites for enrollment in upper-division courses and must complete the common body of knowledge courses as listed previously. All professional selling courses for the minor require a minimum grade of C.

15 credit hours (3 credits required course, 6 credits from the Approved Elective Courses for the Professional and Technical Selling Minor course list, 6 credits of Advanced Business Electives)

Real Estate Minor

The Real Estate minor enables students to gain broad understanding of this important market and as a result compete for jobs in many real estate related careers such as real estate management, investment, development, brokerage, appraisal and more.

Real Estate Requirement

FIN3100 - Real Estate Development

Credits: 3

This course presents the basic principles involved in real estate development. Topics include: land acquisition and appraisal, site improvements, market feasibility analysis, development financing, real estate government approval and regulations, real estate engineering and construction issues, real estate marketing and property operations and performances.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ACCT 2010.

FIN4800 - Real Estate Finance

Credits: 3

Exposes students to the fundamentals of real estate finance such as mortgage financing, commercial leases, pro-forma analysis, financial modeling, tax implications, leveraged real estate and valuation of income producing properties. While the theory of each topic will be presented, the focus is on the applications of the material.

Prerequisite: FIN 2100 and advanced business standing.

FIN4810 - Real Estate Investment

Credits: 3

Covers advance real estate investment topics such as investments risk and valuation sensitivity analysis, futures and real options, liquid real estate investments, analysis of development projects, and commercial mortgage backed securities. While the theory the topics will be presented, the course focus is on the application of the material.

Prerequisite: FIN 2100 and advanced business standing

Real Estate Electives

Complete a minimum of 6 credits with courses from the below list:

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010 ,ACCT 2020 , FIN 2100 (or equivalent), sophomore class standing.

FIN3310 - Investment Management

Credits: 3

Fundamental principles of investments and practical implications of financial theory. Students acquire a framework for understanding returns on financial assets, risk and return, fundamentals of portfolio theory, efficient market hypothesis, and asset pricing models. Other topics include financial statement analysis, behavioral finance, and introduction to options and futures.

Former Course Number [4310]

Prerequisite: FIN 2100 and advanced business standing.

FIN3520 - Financial Markets

Credits: 3

Portfolio and capital market theory and the analysis of risk are introduced. Integrates theory into practical aspects of financial markets.

Former Course Number [4520]

Prerequisite: FIN 2100, STAT 2010 or STAT 2050/STAT 2070, and advanced business standing.

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

FIN4540 - Banking Policy

Credits: 3

Intended to be taken either with or after FIN 4510, Bank Management, and will cover similar topics but in greater depth and breadth. Integrated application of these topics will take place in a selection of case studies, some of which will be analyzed in teams.

Prerequisite: FIN 4510 or concurrent enrollment in FIN 4510.

FIN4710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 5710.

Prerequisite: FIN 2100

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

BUSN4600 - Advanced Internship in Business

Credits: 3

Max Credit 6

Provides students with practical business knowledge, policy, procedure, and decision making. Students work as interns in operating organizations.

Prerequisite: MKT 2100, MGT 2100, FIN 2100, advanced business standing, approved internship application through the Peter M. & Paula Green Johnson Student Success Center.

Additional options for electives may be available. Consult your advisor for more options.

ERS4100 - Property I

Credits: 3

Property I addresses the nature of property ownership and the rights associated with property as well as the acquisition and transfer of ownership rights in property and the sharing of ownership rights over time, including estates, future interest, and concurrent estates.

ERS4105 - Property II

Credits: 3

Property II covers rights inherent to the ownership of property and public limitations on those rights.

Prerequisite: ERS 4100.

ERS4110 - Law of Contracts

Credits: 3

The Law of Contracts addresses the formation of a contract and the meaning of agreements and the justification of non-performance and breach.

Prerequisite: MGT 1040 and WB/C

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4130 - Oil and Gas Law

Credits: 3

Focuses on the basic legal rules and principles governing the ownership and development of oil and gas, derived from a combination of property, contract, administrative, tort, and constitutional law.

ERS4135 - Advanced Energy Law

Credits: 3

Covers oil, gas and other energy development and financing arrangements including assignments, leases, farmouts, joint operating agreements, purchase and sale agreements, service agreements and marketing agreements. Covers oil, gas and other energy development regulation, including, oil and gas conservation commission and state and federal environmental regulation. Introduces other forms of energy development, including, but not limited to, renewables, nuclear, CCUS, hydrogen, and the various agreement and regulatory nuances of such energy development. Covers ethical issues that may arise in energy development.

USP 2015 Code U5C3

Prerequisite: ERS 4130.

ERS2010 - Introduction to Land Management

Credits: 3

Max Credit 3

Provides an introduction to land management in the various energy industries. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry. In addition, provides an overview of ethical issues that arise and professional conduct expected in the industry.

Minor Total Credits: 15

Graduate

Accounting, M.S.

Students who wish to become professional accountants will find the online MS in Accounting degree to be one that enables them to develop both the personal and professional skills needed to enjoy a productive career.

Additional Requirements

The objectives of the master of science in accounting are:

- To provide students with an advanced understanding of the field of accounting,
- To provide students with specific advanced knowledge in selected sub-topics within accounting,
- To provide students with professional skills that will enable them to enjoy productive and rewarding careers in accounting and accounting-related areas.

The program consists of a minimum of 30 semester credit hours of graduate coursework. Students must complete coursework in accounting and elective business and/or non-business courses as approved by program leadership. Eighty percent of the student's total coursework must consist of 5000-level courses; the remaining 20 percent may be 4000-level accounting or non-accounting courses (approximately six total credit hours). Non-accounting courses should be selected in consultation with the student's graduate adviser. Non-accounting courses at the 4000-level may be taken during the senior year of undergraduate study and applied to the master's program, but they must be reserved for graduate credit and approved by the graduate program director prior to the first day of such classes. Courses reserved for graduate credit may also not be counted towards the undergraduate degree requirements. Approved reservation of courses for graduate credit does not guarantee admission to the graduate program.

Core Accounting Courses

Students must take these 4 core accounting courses (minimum 12 credit hours):

ACCT5030 - Advanced Financial Accounting

Credits: 3

Advanced topics in financial reporting for students planning careers as professional accountants. Topics may include: business combinations, consolidated financial reporting, segment and interim reporting, SEC reporting, multinational accounting and reporting, and other emerging topics.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5040 - Seminar in Managerial Accounting

Credits: 3

Organizational development of financial and nonfinancial budgets, interaction between performance measurement systems and human behavior, and advanced topics in uses of information for decision making.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5060 - Auditing II

Credits: 3

An in-depth study of the financial statement audit and the professional responsibilities of public accountants. The role of professional judgment and skepticism is emphasized in case studies and research involving current auditing issues, including financial statement fraud.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5070 - Tax II

Credits: 3

Choice of entity and special tax subjects. Emphasis will be placed on the importance of ethical considerations, competent tax research, and thoughtful tax planning.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

Required Accounting Elective

Students must take one of the following courses:

ACCT5065 - Fraud Examination

Credits: 3

The study of fraud against organizations and individuals. Includes consideration of how and why fraud is committed, the basics of fraud investigation, and fraud prevention. Coverage may also include an in-depth study of specific fraud cases based on the above elements.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5066 - Seminar on Management Fraud

Credits: 3

An in-depth study and analysis of the causes, methods, and consequences of financial statements fraud committed by top management in the organization. The course covers psychological and criminological theories of management fraud, as well as detailed analysis of high-profile management frauds. Seminar format.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

Note(s):

NOTE: ACCT 4060, ACCT 4900, ACCT 5000, and ACCT 5940 are not applicable to M.S. accounting students' programs of study.

The student must complete the required coursework with a minimum GPA of 3.000 on a 4.000 scale.

Any student falling below a cumulative GPA of 3.000 is automatically placed on probation for the following semester and must raise their GPA to 3.000 to avoid suspension. If a 3.000 GPA is not attained in the subsequent semester, the student will be suspended from the MS Accounting program and the University of Wyoming.

Students must maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student may be immediately dismissed from the program.

Business Administration, M.B.A.

The UW MBA program offers a 1-Year Early Career MBA tailored to those looking to gain the needed experience and business insights required in today's competitive marketplace.

Additional Requirements

- Thirty-six (36) credit hours of graduate coursework, including participation in all MBA Program activities (orientation, Jackson Leadership Summit, MBA Executive Speaker Series, Professional Development, Experiential Leadership Program, etc.). Please note that students enrolled in any dual degree MBA program are required to complete all MBA participation activities and the core coursework.
- This is a cohort based program and while the course sequence is highly structured, there may be the opportunity to extend the duration of the one-year program. Course sequence is subject to change at the discretion of the MBA Director.
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student may be immediately dismissed from the program.

Course of Study

MBA Core Requirements (27 Credit Hours)

Required of all MBA students including all dual degree students.

MBAM5101 - MBA Foundations

Credits: 1

The purpose of this course is to prepare students for the academic rigors of the MBA program.

Restricted Enrollment in MBAM or MBAF degree program.

Prerequisite: Admission to full-time MBA program.

MBAM5104 - Organization Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamentals principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBAM program.

MBAM5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions.

Prerequisite: Admission to the MBAM program.

MBAM5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating

customer value for a sustained competitive advantage.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5102 - Operations Management

Credits: 3

Production and operations management. Topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, and scheduling.

Prerequisite: Admission to the MBAM program.

MBAM5330 - Global Business Environment

Credits: 3

Max Credit 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted Admission to the MBA, MBAE, or MBAF program.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director.

MBAM5107 - Decision Making I

Credits: 1

This course develops a systematic process for making decisions in complex business situations, by integrating six dimensions of business risk: competitive, financial, organizational, legal, social, and ethical. The process combines analytical and ethical reasoning methods that compensate for the flawed decision making common in business organizations.

Prerequisite: Admission to the MBAM program.

MBAM5209 - Decision Making II

Credits: 1

An experiential learning course that builds on MBAM 5107. Students apply systematic business decision making process to real-world business situations. Student teams work directly with owners and managers of Wyoming companies to address their strategic, competitive, operational, financial, and/or administrative challenges in real time.

Prerequisite: MBAM 5107.

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

MBA Elective Requirements

- MBA-MBA students, including dual degree students, must take an additional 9 credit hours of 4000 or 5000 level College of Business courses. Dual degree students (JD/PharmD/MS) may take 3 credit hours outside the College of Business following dual degree agreement guidelines. Please contact your advisor for additional information.

**Note: A maximum of 12 credit hours may be taken at the 4000 level for graduate credit.*

Business Administration, Online, M.B.A.

The Online MBA Program is specifically designed for business professionals interested in a fully AACSB accredited, 100% online program that fits their busy schedules and enhances their understanding of decision-making in the workplace.

Additional Requirements

- 30 credit hours of graduate credit as outlined in the Course of Study.
- Concentration Available: Energy (EMN)
- Optional Certificate Add-Ons: CFP (certified financial planning) or Energy Business. Adding on a certificate may increase required number of credit hours. Please contact us for additional information.
- This is a cohort based program that can be flexible in sequence depending on student needs. Course sequence is subject to change at the discretion of the MBA Director.
- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, student will be immediately dismissed from the program.

Prerequisite Courses

Prerequisite coursework may be requested based on experience and undergraduate coursework at the discretion of the MBA Program Director as part of the application process. Please contact the MBA & Professional Graduate Program Office for additional information.

Academic Requirements

Students must maintain a cumulative GPA of 3.000 in the MBA Program to remain in "good standing". If a student's GPA falls below 3.000, he or she is automatically placed on academic probation; the student must raise their cumulative GPA to 3.000 the following semester to avoid dismissal from the program. Other requirements involving program dismissal include:

- A student who earns a grade lower than a "C" in any course may be immediately dismissed from the program.

Course of Study

MBA Core Requirements (21 Credit Hours)

Required of all MBAX students.

MBAX5104 - Organizational Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval.

MBAX5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operation, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analysis including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval.

MBAX5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamental principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval

MBAX5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions. #304.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval

MBAX5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval.

MBAX5330 - The Global Business Environment

Credits: 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval.

MBAX5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations. #304.

Restricted MBA-MBAX

Prerequisite: Admission to the MBAX program or department approval.

MBA Elective/Concentration Requirements

- MBA-MBAX students must take an additional 9 credit hours of 5000 level College of Business courses.
- Energy Concentration students will complete the additional 9 credit hours of coursework as follows:
 - ACCT 5503 Fundamentals of Accounting in the Energy Industry. 3.
 - MGT 5504 Energy Industry Value Chain. 3.
 - FIN 5502 Energy Finance: Project Evaluation. 3.

Economics, M.S.

Economics is the science of decision making and how to create value through trade. An economics degree will provide you with the tools to work on challenging policy issues and employ data analytics to address those issues.

Requirements - Total Credits: 30

Required Economics Courses - Credits: 15

ECON5010 - Advanced Macroeconomic Analysis

Credits: 3

An advanced application of economic theory to complex macroeconomics problems facing the economy of the state and nation, such as inflation, unemployment, and fiscal and monetary policies.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGECE 5230.

Dual Listed ECON 4230.

Prerequisite: admission to the Master's Program in Economics.

ECON5300 - Game Theory

Credits: 3

Discusses a variety of important concepts from game theory - the study of how individuals interact strategically. The course focuses on the development of students' ability to think strategically. To that end the course covers basic concepts in game theory.

Restricted Course is restricted to MS ECON

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5390 - Math Microeconomics

Credits: 3

This course provides a broad set of practical tools that allow an analysis of important economic problems. The mathematical tools analyze human behavior and predict the response of economic systems to changes in circumstances and alternative policies, for applications such as investment project evaluation, capacity expansion, production decisions, or demand for various goods.

Dual Listed ECON 4390.

Prerequisite: ECON 3010, ECON 3020, MATH 2205 or MATH 2355.

ECON5530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 4530.

Prerequisite: admission to the Master's program in Economics.

Graduate Elective Courses

Plan A - 12 hours of Graduate electives required plus 4 credits of Thesis Research credit

Plan B - 15 hours of Graduate electives.

A maximum of 6 hours can be taken at the 4000 level.

Additional Requirements

Program Specific Degree Requirements

A minimum of 18 hours in economics is required; at least 15 of these must be at the 5000 level. A basic core sequence of ECON 5010 (macro), ECON 5390 (math micro), ECON 5530 (computational), ECON 5230 (econometrics), and ECON 5300 (game theory) is required, which completes 15 hours of 5000-level courses, which is required.

The student must complete 26 hours of coursework and 4 hours of ECON5960 - Thesis Research for the Plan A option. The student must complete 30 hours of coursework and a project for the Plan B option.

Students may take 4000-level courses for graduate credit up to 6 hours.

A maximum of 6 semester hours of graduate coursework not used toward any other degree from another institution may be applied to the M.S. economics program subject to regulations regarding transfer of credit listed in this bulletin and with the approval of the director of graduate studies.

At the beginning of the third semester, the student selects a major professor who directs the Plan A thesis or Plan B project. A graduate committee, nominated by the major professor, the student, and the department chair, conducts an oral examination of the student on the project or thesis and area he/she has studied in the program. A favorable report by the committee and approval by the Office of the Registrar complete the degree requirements.

The majority of students complete the M.S. degree within two years.

QuickStart Master of Science in Economics

UW undergraduates can complete the M.S. degree in just one year after completing their B.S. degree if they apply to the QuickStart M.S. program in their junior year. To be eligible, students must have (and maintain) a cumulative GPA of 3.200 or better as well as an Economics GPA of 3.200 or better. They are also required to take the GRE by the fall of their senior year and score above 300 combined on the verbal and quantitative sections combined. The GRE requirement can be waived with letters of recommendation from two UW faculty members. Admission to the QuickStart program allows students to double-count 6 credits of courses taken as an undergraduate towards both the B.S. and M.S. degrees, and reserve an additional 6 credits of courses taken as an undergraduate towards the M.S. degree alone. This then leaves only 18 credits to be taken after completion of the B.S. degree, which is feasible in just one year.

Economics, Ph.D.

Economics is the science of decision making and how to create value through trade. An economics degree will provide you with the tools to work on challenging policy issues and employ data analytics to address those issues.

Requirements - Total Credit Hours: 72

Required Economics Courses - Credits: 30

ECON5010 - Advanced Macroeconomic Analysis

Credits: 3

An advanced application of economic theory to complex macroeconomics problems facing the economy of the state and nation, such as inflation, unemployment, and fiscal and monetary policies.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5020 - Advanced Microeconomic Analysis

Credits: 3

A rigorous course in the analysis of demand and the theory of consumer behavior, supply and the theory of the firm, market equilibrium and stability, and income distribution.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5120 - Advanced Analysis II-Microeconomics

Credits: 3

Part of a sequence with ECON 5020. It is advanced microeconomic analysis covering general equilibrium and welfare economics, and advanced topics in consumption and production theory.

Prerequisite: ECON 5010, ECON 5020.

ECON5130 - Dynamic Optimization

Credits: 3

Covers methods for obtaining the optimal choice for economic variables that change over time, including calculus of variations and optimal control. These methods are applied to various dynamic economic problems, including optimal resource extraction, optimal capital allocation, and optimal growth.

Prerequisite: ECON 5020, ECON 5370.

ECON5310 - Research Methods

Credits: 3

A variety of topics of importance to the advanced student who is preparing to write his or her dissertation are discussed.

Restricted Economics Graduate Students

Prerequisite: Admission to the graduate program in Economics

ECON5330 - Advanced Mathematical Economics

Credits: 3

Study of the principal mathematic techniques used in economic theory and modeling. Taught jointly with ECON 5020.

Prerequisite: graduate standing.

ECON5350 - Advanced Econometrics Theory I

Credits: 3

Review topics in probability theory and mathematical statistics. Also provides an introduction to the classical linear regression model, estimation, hypothesis testing, and prediction.

Prerequisite: Calculus and Basic Statistics.

ECON5360 - Advanced Econometrics Theory II

Credits: 3

Continue the analysis in ECON 5350 and cover topics such as panel data, limited-dependent variables, simultaneous systems, nonlinear models, Bayesian analysis, and time series methods.

Prerequisite: ECON 5350.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

Graduate Elective Courses - Credits: 12

Dissertation Research - Credits: 30

Additional Requirements

The doctor of philosophy degree in the field of economics at the University of Wyoming requires a minimum of 42 hours of coursework. All coursework must be at the graduate (5000) level.

The program is designed to give the student a strong foundation in economic theory and the basic quantitative tools necessary for professional research. If students receive a grade lower than a A during their first year, they must take a comprehensive exam in that field (microeconomics and/or econometrics) during the summer to continue to the second year of the PhD program. The program's qualifying exam takes the form of a research paper written during the second summer and defended to, and approved by, a faculty committee by early in the third year, with revisions and resubmission required by December. Students who pass the qualifying paper requirement receive an MS degree and move on in the PhD program, while students who fail this requirement receive the MS degree and fail out of the PhD program.

During the third year, or no later than the first few weeks of the fourth year, a graduate committee nominated by the student's major professor and the director of graduate studies conducts an oral examination of the student. The purpose of the oral examination is to determine whether the student has formulated a workable dissertation project and has the necessary skills to complete it.

Following successful completion of the dissertation, and completion of a departmental requirement of 30 hours of dissertation research, the student presents an oral defense to the graduate committee. The doctor of philosophy degree is granted on recommendation of the committee and approval by the Office of the Registrar, providing all other requirements have been satisfactorily fulfilled.

Finance, M.S.

The MS in Finance program is a rigorous, yet practical program built on the foundations of principles and practices in modern finance, with an optional CFP (Certified Financial Planner) track.

Additional Requirements

The program consists of a minimum of 30 semester hours of graduate coursework. Students must complete coursework in finance and elective business and/or non-business areas as approved by program leadership. Eighty percent of the student's total coursework must consist of 5000-level courses; the remaining 20 percent may be 4000-level finance or non-finance courses (approximately six hours). Non-finance courses should be selected in consultation with the student's graduate advisor. Non-finance courses at the 4000-level may be taken during the senior year of undergraduate study and applied to the master's program, but they must be reserved for graduate credit and approved by the graduate program director prior to the first day of such classes. Courses reserved for graduate credit may also not be counted towards the undergraduate degree requirements. Approved reservation of courses for graduate credit does not guarantee admission to the graduate program.

The student must complete the required coursework with a minimum GPA of 3.000 on a 4.000 scale.

Any student falling below a cumulative GPA of 3.000 is automatically placed on probation for the following semester and must raise their GPA to 3.000 to avoid suspension. If the 3.000 GPA is not attained in the subsequent semester, the student will be suspended from the MS in Finance program and the University of Wyoming.

Student must maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, student may be immediately dismissed from the program

General Finance Track

FIN5310 - Advanced Investment Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5250 - Cases in Corporate Finance

Credits: 3

Max Credit 3

The goal of this course is to enhance students' understanding of major corporate decisions, and to explore the role such decisions play in value creation within a corporation. Some issues covered in the course will include analyzing companies' historical performance, forecasting future performance, estimating hurdle rates, and analyzing resource allocation choices.

Restricted MS Finance and/or CFP Certificate

Prerequisite: Admission to MS Finance and/or CFP Certificate Program, or department approval

FIN5400 - Advanced Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 4400.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

- 21 credit hours of 4000 or 5000 level College of Business electives.
- Maximum of 6 credit hours can be taken at the 4000 level.

CFP Track

FIN5070 - Tax Planning for Financial Planners

Credits: 3

Focuses on principles, current law, and practice of income taxation and its impact on financial planning for individuals, couples, and families in their role as investors, employees, and business owners.

Dual Listed FIN 4070.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5250 - Cases in Corporate Finance

Credits: 3

Max Credit 3

The goal of this course is to enhance students' understanding of major corporate decisions, and to explore the role such decisions play in value creation within a corporation. Some issues covered in the course will include analyzing companies' historical performance, forecasting future performance, estimating hurdle rates, and analyzing resource allocation choices.

Restricted MS Finance and/or CFP Certificate

Prerequisite: Admission to MS Finance and/or CFP Certificate Program, or department approval

FIN5310 - Advanced Investment Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5400 - Advanced Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 4400.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5720 - Insurance and Retirement Planning

Credits: 3

This class is designed to help graduate students understand various topics in retirement and insurance planning for individuals and families.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5750 - Fundamentals of Financial Planning

Credits: 3

This is a survey course for financial planning and wealth management. The topics include insurance planning, tax planning, investment planning, retirement planning, estate planning, and professional conduct. The course will focus on acquiring a framework for understanding the major components of financial planning and developing a coordinated financial plan.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5780 - Estate Planning

Credits: 3

This course will cover general reliability modeling and evaluation; probability and stochastic processes; system modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis, decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5800 - CFP Capstone

Credits: 3

This course will be organized around the four major areas of financial planning, as outlined by the College of Financial Planning curriculum. These four key areas are as follow: retirement planning; income tax planning; investment planning; and estate tax planning.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to the MS program or permission of the Department Head.

- 6 credit hours of 4000 or 5000 level College of Business electives.
- Maximum of 6 credit hours can be taken at the 4000 level.

Marketing, Ph.D.

The program of study draws from extant marketing theory, combined with studies in basic and other applied sciences to create a base of knowledge, which is supplemented with courses in the gathering and analysis of qualitative and quantitative data.

Additional Requirements

The Department of Management and Marketing offers a program leading to a Doctor of Philosophy in Marketing. The program of study draws from extant marketing theory, primarily in consumer behavior, combined with studies in the basic sciences (e.g., anthropology, psychology, sociology) and other applied sciences (e.g., environmental sciences) to create a base of knowledge acceptable for marketing scholarship in higher education, and a depth of knowledge conducive to a stream of publishable research in a specific topic area. Theoretical development is supplemented with course work in the gathering and analysis of qualitative and quantitative data, which prepares the student for rigorous exploration of marketing phenomena. Students are required to complete 72 semester hours and a scholarly dissertation that contributes to the knowledge foundations in marketing and contributes to the basic sciences that informed the inquiry. Semester hours will include core marketing classes, outside elective courses in statistics, basic social sciences, and/or interdisciplinary studies in environmental and natural resources, and dissertation work. First and second year research projects are also required, aimed at the student having published articles in respected marketing and social science journals before program completion. Comprehensive exam is completed at the end of the second semester. All

doctoral students are expected to teach while enrolled in the program. The program is designed to give students a strong research background and intensive teaching experience.

We begin accepting applications in October for the following fall semester. All completed applications must be submitted by February 1st. Admission requirements include:

- A Bachelor's Degree and work toward or completion of a master's degree from an accredited institution, preferably in business or a core social science discipline
- Completed application (i.e., all required materials submitted) on the UW Graduate Programs Applications system
- \$50 application fee paid to University Admissions
- Copies of all undergraduate and graduate program transcripts scanned and uploaded to the UW system, and official transcripts from each post-secondary institution attended submitted to the UW admissions office
- A valid GRE or GMAT score. A scanned copy of the unofficial results must be uploaded to the UW system, and official scores must be requested from the testing organization and sent to UW
- Three strong letters of recommendation, with one or more being from an academic. The letters must be uploaded by the recommenders to the UW system in MS Word or .pdf format.
- A personal statement summarizing your interest in pursuing doctoral studies and speaking to questions or issues you wish to research. This document must be uploaded to the UW system as an MS Word or .pdf document
- For international students, Test of Foreign Language (TOEFL) scores are required. A scanned copy of the unofficial results must be uploaded to the UW system, and official scores must be submitted to UW from the testing organization. A minimum TOEFL score of 76 (online) or 540 (paper) is required for admission

Certificate

Certified Financial Planning Certificate (Graduate)

The certificate is composed of 18-credits of masters-level graduate coursework with the primary goal of providing students with the education, training, and skills necessary to be able to sit for the Certified Financial Planner (CFP) examination.

Additional Requirements

The curriculum is aligned with the CFP® Board's Principal Knowledge Topics and covers principles and practices of essential areas of financial planning, including:

- Wealth Management
- Investment Management
- Tax Planning
- Estate Planning
- Insurance and Retirement Planning

CFP Certificate Requirements

FIN5070 - Tax Planning for Financial Planners

Credits: 3

Focuses on principles, current law, and practice of income taxation and its impact on financial planning for individuals,

couples, and families in their role as investors, employees, and business owners.

Dual Listed FIN 4070.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5310 - Advanced Investment Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5720 - Insurance and Retirement Planning

Credits: 3

This class is designed to help graduate students understand various topics in retirement and insurance planning for individuals and families.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5750 - Fundamentals of Financial Planning

Credits: 3

This is a survey course for financial planning and wealth management. The topics include insurance planning, tax planning, investment planning, retirement planning, estate planning, and professional conduct. The course will focus on acquiring a framework for understanding the major components of financial planning and developing a coordinated financial plan.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5780 - Estate Planning

Credits: 3

This course will cover general reliability modeling and evaluation; probability and stochastic processes; system

modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis, decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5800 - CFP Capstone

Credits: 3

This course will be organized around the four major areas of financial planning, as outlined by the College of Financial Planning curriculum. These four key areas are as follow: retirement planning; income tax planning; investment planning; and estate tax planning.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to the MS program or permission of the Department Head.

- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student may be immediately dismissed from the program.

Energy Business Certificate (Graduate)

The online Energy Business Certificate is designed for professionals working in the energy industry who are interested in gaining knowledge related to real-world application within the highly competitive industry.

Additional Requirements

The Certificate in Energy Business is composed of 9-credits of masters-level graduate coursework in the College of Business, with the primary goal of achieving mastery and professional skills common to functional business roles within the energy industry. Specifically:

- Develop a working understanding of the concepts and practices of Supply Chain Management to make strategic support decisions within the energy industry.
- Acquire the foundation necessary to work in the energy industry as a financial statement analyst, manager, auditor, or accountant.
- Utilize core capital budgeting, techno-economic cashflow modeling and other finance concepts to evaluate energy industry project investments.
- Demonstrate effective problem solving, written, and oral communication skills in the context of the energy industry.

Certificate Requirements

FIN5502 - Energy Finance: Project Evaluation

Credits: 3

This course introduces students to the key methods used to evaluate investments in energy industry projects from the perspective of the developer as well as the lender and other stakeholders. Topics include project finance modeling, techno-economic considerations, business structures, regulatory and legal issues, risk analysis, and deal terms.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director.

ACCT5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduces students to basic financial accounting and reporting issues related to energy producing activities. Specifically, the course will investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. The course will also cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MGT5504 - Energy Industry Value Chain

Credits: 3

Examines the overall energy industry with detailed exploration of the major energy subsectors and supply chains. Students will develop knowledge of the energy industry value chain including coverage of market dynamics, prevalent strategies, finance, operations, externalities and network effects, environmental and ethical considerations, and associated policy issues.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director

- Maintain good academic standing at the program and university level and receive no letter grade of D or F. If a letter grade of D or F is received, the student may be immediately dismissed from the program.

College of Education

6 Education

Scott Thomas, John P. "Jack" Ellbogen Dean

Andrea C. Burrows: Associate Dean for Undergraduate Programs

Jenna M. Shim: Associate Dean for Graduate Programs

(307)766-6668 FAX: (307)766-3145 Building Phone:

Web site: www.uwyo.edu/education

The College of Education prepares teachers, counselors, administrators and other service personnel for positions in public education in Wyoming, throughout the nation, and the world. The teacher education program incorporates content area courses from the various colleges on campus with experiences in educational methodology. Programs are designed to provide students with a maximum amount of experience in the classroom.

Graduates of the College of Education are prepared to deal with youth growing up in a rapidly changing world. Programs are experiential, collaborative, outcomes based, and technologically supported. Emphasis is placed on professional ethics, a commitment to lifelong learning, and respect for all individuals in our culturally diverse society.

Organization of the College

The College of Education includes undergraduate teacher education and graduate studies in education. Schools offering undergraduate and graduate programs in the college include:

- **School of Teacher Education**

- **School of Counseling, Leadership, Advocacy, and Design**

Undergraduate and graduate education are supported by several units. The Teacher Preparation and Advising Office, McWhinnie Hall room 100, coordinates activities dealing with academic advising, field experiences, and teacher licensure.

The Wellspring Counseling Clinic provides counseling services to students, staff, faculty of the university, as well as the community at-large.

The College of Education, College of Arts and Sciences, Wyoming community colleges, many Wyoming districts, the Wyoming Professional Teaching Standards Board, and the Wyoming Department of Education are part of the Wyoming School-University Partnership, which grounds collaborative efforts across the state related to K-12 preservice and inservice education.

The Laboratory School, an Albany County School District entity, serves the college, the university, the school district, and the state as an educational center for research, development, instructional advancement, and inservice education. The school enrolls students in pre-school through eighth grade.

Computer laboratories in the college feature a wide range of capabilities including Internet access. The laboratory equipment is frequently updated to serve the needs of students, faculty and staff.

The Learning Resource Center is a branch of the university library system. Educational materials are available to serve the needs of K-12 students, university students, university faculty and public school faculty in Wyoming

Faculty in the College of Education

School of Counseling, Leadership, Advocacy, and Design

School Director: Peter Moran

Associate Professors:

KARA L. CARNES-HOLT, B.A. East Texas Baptist University 2000; M.S. Ed. Baylor University 2003; Ph.D. University of North Texas 2010; Associate Professor of Counselor Education 2016, 2010.

COURTNEY McKIM, B.S. Boise State University 2006; Ph.D. University of Nebraska 2011; Associate Professor of Educational Research 2020, 2011.

MICHAEL M. MORGAN, B.S. Brigham Young University 1993; M.S. Auburn University 1995; Ph.D. Purdue University 2003; Associate Professor of Counselor Education 2011, 2003.

LINDSEY NICHOLS, B.S. University of Connecticut 2002; M.A. University of Connecticut 2003; M.Ed. University of North Carolina at Chapel Hill 2006; Ph.D. Pennsylvania State University 2012; Associate Professor 2019.

W. REED SCULL, B.S. St. Louis University 1983; M.A. University of Nevada-Reno 1989; Ed.D. University of Arizona 1994; Associate Professor 2019.

Assistant Professors:

WILLIAM CAIN, B.A. University of Texas 1994; Ph.D. Michigan State University 2018; Assistant Professor 2018.

JONTHAN CARRIER, B.S. East Tennessee State University 1999; M.S.E. Portland State University 2002; Ph.D. University of the Cumberlands 2017; Assistant Professor of Higher Education Administration, 2020.

RICHARD CARTER, B.S. Western Carolina University 2010; M.S.E. 2012; Ph.D. University of Kansas 2016; Assistant Professor of Special Education 2017.

AMANDA DeDIEGO, B.S. University of North Georgia 2009; M.S. 2012; Ph.D. University of Tennessee 2016; Assistant Professor of Counselor Education 2016.

BARBARA HICKMAN, B.A. University of Minnesota 1985; B.S. University of Minnesota 1986; M.A. Saint Mary's College 1997; Ed.D. Northern Arizona University 2017; Assistant Professor 2019.

JIHYUN LEE, B.A. Daegu University 2006; M.Ed. Korea National University 2012; M.S. University of Wisconsin-Madison 2014; Ph.D. University of Texas-Austin 2018; Assistant Professor 2019.

ROBERT MADDOX, B.S. Missouri State University 2005; M.A. Southeast Missouri State University 2009; Ed.S. Southeast Missouri State University 2011; Ph.D. University of Wyoming 2015; Assistant Professor 2019.

LAY-NAH BLUE MORRIS-HOWE, B.S. University of Wyoming 2004; M.S. 2007; Ph.D. 2011; Assistant Professor of Counselor Education 2015.

MARK PERKINS, B.A. Ft. Lewis College 2001; M.A. University of Colorado-Denver 2009; Ph.D. Colorado State University 2014; Assistant Professor of Educational Research, 2020.

MIA WILLIAMS, B.S. Northern Arizona University 1995; M.Ed., 1999 Ph.D 2008 Arizona State University Assistant Professor 2020.

Associate Professional Lecturer:

TIFFANY HUNT, B.S. University of Wyoming 2001; M.S. University of Northern Colorado 2006, Ph.D. 2017; Assistant Professional Lecturer of Special Education 2014.

Professors Emeritus

Martin Agran, Mary Alice Bruce, John Cochenour, Ace Cossairt, Kay Cowie, Michael Day, Deborah McGriff, Alan Moore, Kay Persichitte, Suzanne Young.

School of Teacher Education

School Director: Alan Buss

Professors:

STEVEN M. BIALOSTOK, B.A. University of the Pacific 1975; M.S.W. California State University - Sacramento 1986; Ph.D. University of Arizona 1999; Professor of Elementary and Early Childhood Education 2015, 2000.

CYNTHIA BROCK, B.S. Oregon State University 1981; MEd Washington State University 1985; Ph.D. Michigan State University 1997; Wyoming Excellence in Education Literacy Chair 2015.

ANDREA C. BURROWS, B.S. University of Central Florida 1992; M.S. Florida State University 1994; Ed.D. University of Cincinnati 2011; Professor of Secondary Education 2017, 2011. Associate Dean of Undergraduate Programs 2020.

ALAN R. BUSS, B.A. Brigham Young University 1989; M.A. 1993; Ph.D. University of Wyoming 1998; Professor of Elementary and Early Childhood Education 2019, 1997.

SCOTT A. CHAMBERLIN, B.A. Purdue University 1989 and 1993; M.Ed. University of Utah 1998; Ph.D. Purdue University 2002; Professor of Elementary and Early Childhood Education 2015, 2003.

LEIGH HALL, B.S. University of South Florida 1996; M.Ed. Peabody College of Vanderbilt University 1997; Ph.D. Michigan State University 2005; Professor of Secondary Education 2017. Wyoming Excellence in Education Literacy Chair, 2017.

RICHARD KITCHEN, B.A. University of Colorado-Denver 1984; M.A. University of Montana 1990; Ph.D. University of Wisconsin- Madison 1996; Professor of Secondary Education 2017. Wyoming Excellence in Education Mathematics Education Chair 2017.

PETER WILLIAM MORAN, B.A. University of Wyoming 1987; M.A. Kansas State University 1993; Ph.D. 2000; Professor of Elementary and Early Childhood Education 2017, 2001.

LYDIAH NGANGA, B.S. University of Wyoming 1998; M.S. 2000; Ph.D. 2005; Professor of Elementary and Early Childhood Education 2020, 2005.

LESLIE S. RUSH, B.S. Texas A&M-Commerce 1984; M.Ed. 1996; Ph.D. University of Georgia, 2002; Professor of Secondary Education 2014, 2002.

JENNA M. SHIM, B.A. California State University - Los Angeles 1994; M.M. Manhattan School of Music - New York 1996; M.S. State University of New York - Albany 2006; Ph.D. 2009; Professor of Educational Studies 2016, 2010.

TIMOTHY F. SLATER, B.S. Kansas State University 1989; B.S. Ed. 1989; M.S. Clemson University 1991; Ph.D. University of South Carolina 1993; Professor of Secondary Education 2008. Wyoming Excellence in Education Science Education Chair 2008.

ALLEN TRENT, B.A. Eastern Kentucky University 1986; M.S. University of Dayton 1992; Ph.D. The Ohio State University 2000; Professor of Elementary and Early Childhood Education 2012.

Associate Professors:

TAO HAN, B.A. Sungshin Women's University, Korea 1984; M.A. University of Arizona 1993; M.A. University of Nevada-Reno 2002; Ph.D. 2006; Associate Professor of Elementary and Early Childhood Education 2016, 2010.

ANA HOUSEAL, B.A. University of Iowa 1985; M.A. University of Northern Iowa 1998; Ph.D. University of Illinois 2010; Associate Professor of Elementary and Early Childhood Education 2017, 2011.

LINDA HUTCHISON, B.A. Humboldt State University 1978; M.A. Stanford University 1986; Ph.D. University of Washington 1992; Associate Professor of Secondary Education 2000, 1993.

TRICIA JOHNSON, B.S. Lehigh University 1991; M.Ed. 1993; Ed.S. George Washington University 1997; Ed.D. Columbia University 2004; Associate Professor of Elementary and Early Childhood Education 2012.

PATRICK MANYAK, B.A. Pepperdine University 1988; M.S. 1990; Ph.D. University of Southern California-Los Angeles 2001; Associate Professor of Elementary and Early Childhood Education 2007, 2001.

AMY ROBERTS, B.S. Indiana University 1986; M.A. Portland State University 1991; Ph.D. Indiana University 1996; Associate Professor of Elementary and Early Childhood Education 2004, 1998.

KATHERINE MUIR WELSH, B.A. University of California-Berkeley 1986; Single Subject Teaching Credential (Life Sciences) University of California-Santa Barbara 1990; Ph.D. University of California-Los Angeles 2002; Associate Professor of Elementary and Early Childhood Education 2008, 2002.

Assistant Professors:

ALI BICER, B.S. Celal Bayar University 2006; M.S. Texas A&M University 2012; Ph.D. 2016; Assistant Professor of Elementary and Early Childhood Education 2019.

TODD REYNOLDS, B.A. University of Northern Colorado 1998; M.A. 2004; Ed.S. 2008; Ph.D. University of Wyoming 2015; Assistant Professor of Secondary Education 2019.

ALISON MERCIER, B.S. North Carolina State University 2000; M.S. University of North Carolina 2020; Assistant Professor of Secondary Education 2020.

Senior Lecturers:

NIKKI BALDWIN, B.A. University of Wyoming 1994; M.A. 2005; Senior Lecturer of Elementary and Early Childhood Education 2020, 2009.

KIMBERLY GUSTAFSON, B.A. University of Wyoming 1998; M.A. 2003; Ed.D. 2010; Senior Lecturer of Elementary and Early Childhood Education 2019, 2007.

AMY SPIKER, B.A. University of Wyoming 1989; M.A. 2004; Senior Lecturer of Elementary and Early Childhood Education 2016, 2007.

Associate Lecturers:

JASON KATZMANN, B.S. Texas Women's University 1994; M.A. Colorado College 2000; Ph.D. University of Northern Colorado 2007; Assistant Professor of Educational Studies 2016, 2007.

ROD THOMPSON, B.A. University of Nebraska at Kearney 1991; M.A. University of Northern Iowa 1998; Associate Lecturer of Educational Studies 2019.

Assistant Lecturers:

LINDSEY FREEMAN, B.S. University of Wyoming 2011; M.A. 2018; Assistant Lecturer of Educational Studies 2019.

JENNIFER GERINGER, B.A. University of Texas - San Antonio 1991; M.S. University of Wyoming 1997; Ph.D. 2001; Assistant Lecturer of Elementary and Early Childhood Education 2015.

JANET LEAR, B.S. University of Wisconsin-Madison 1990; M.A. University of California, Berkeley 1998; Ph.D. University of Denver 2017; Assistant Lecturer of Educational Studies 2019.

ROCHELLE MCCOY, B.A. Western Governors University 2006; M.A. 2012; Assistant Lecturer of Elementary and Early Childhood Education 2019.

JOSEPH SCHROER, B.A. University of Cincinnati 2002; B.S. 2005; M.A. 2001; Ph.D. 2007; Assistant Lecturer of Educational Studies 2019.

Professors Emeritus:

Michelle Buchanan, Barbara A. Chatton, Margaret Cooney, Lydia Dambekalns, Judith Z. Ellsworth, Patricia McClurg, R. Timothy Rush

Accreditation

The College of Education, a member of the American Association of Colleges of Teacher Education, is currently accredited by the National Council for the Accreditation of Educator Preparation (CAEP) and is moving toward the Association for Advancing Quality in Educator Preparation (AAQEP) in 2023-2024. The Wyoming Professional Teaching Standards Board (PTSB) and the North Central Association of Colleges and Schools approve the college as an accredited teacher-preparing institution. The Counseling programs are fully accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Academic Advising

Students are assigned an academic adviser who will assist in planning a program combining University Studies requirements, core content requirements, and professional education courses. Students are expected to consult with their adviser regularly. The Teacher Preparation and Advising Office coordinates advising and provides students and faculty with assistance in areas related to academic advising.

Further information on each program is available in:

Teacher Preparation and Advising Office
McWhinnie Hall room 100
Dept. 3374, 1000 E. University Ave.
Laramie, WY 82071

(307) 766-2230 edquest@uwyo.edu

Major

Elementary Education, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification).

University Studies Program Requirements

Several Professional Education and Core Content courses fulfill University Studies Program requirements. Please visit with a College of Education advisor to determine what courses fulfill these requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

The Elementary Education program prepares students to teach in grades K-6. A minimum of 120 credit hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations-24 Hours

All Professional Education requirements must be completed with a grade of C or higher.

EDEC1020 - Introduction to Early Childhood Education

Credits: 3

Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

OR

EDEL1200 - Introduction to Elementary Education

Credits: 3

This course is designed to introduce first-year elementary education majors to educational issues relevant to teaching, learning, curriculum, assessment, school politics, and special needs of students in elementary settings.

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

EDEC2000 - Engaging Families in Early Childhood Settings

Credits: 3

Focus on the philosophical, psychological, and sociocultural aspects of working with families and children in early childhood educational, home, and community settings.

OR

EDEX2000 - Collaboration and Professional Relationships

Credits: 3

This course is designed to help students explore a range of collaboration and consultation strategies in the field of Special Education to enable them to successfully collaborate with a range of professionals, students, and families in a school setting. Course content will prepare prospective special education teachers with conflict resolution skills, the ability to effectively facilitate meetings, and increase their inter and intra-personal skills.

OR

EDEL2100 - Engaging Family and Community in Schools

Credits: 3

This course examines the relationship between children, families, communities, and teachers. The focus is on strengthening adult-child and parent-teacher relationships in home, school, and community settings. The development of teacher strategies for supportive relationships with socially, culturally, and linguistically diverse families is included.

USP 2015 Code U5H

Prerequisite: EDEC 1020

Completion of EDST 2450 is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

A minimum of 2.75 UW cumulative GPA is required for registration in EDST 3100.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3200 - Foundations of ESL Learning

Credits: 3

This course introduces students to basic principles of second language acquisition and factors that influence the processes. Understanding the processes of language acquisition, will better equip students to plan instructional strategies that facilitate English language learners' language.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

Assessment-2 Hours

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Practicum-4 Hours

An approved background check must be on file with the Teacher Preparation and Advising Office for registration and completion of these courses.

If EDEC 1020 is completed, EDST 1200 Practicum 1 is not required.

EDST1200 - Practicum I

Credits: 1

The course is designed to build educator identity, develop skills in observing the physical environment of educational settings, understand the responsibilities and ethics of educational professionals, and engage in and reflect on service learning activities. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Prerequisite: Background check on file in the Teacher Preparation and Advising Office.

EDST2200 - Practicum 2

Credits: 1

Students will display an educator identity; develop skills in creating student-centered and culturally relevant/sustaining learning environments; apply ethical principles in service-learning activities; and collaborate in planning, implementing and reflecting on activities for learners. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Restricted Education major

Prerequisite: EDST 1200 or equivalent and Sophomore standing. Background check must be on file in the Teacher Preparation and Advising Office prior to start of practicum experiences.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Methods-19 Hours

EDEL3724 - Elementary Science Education

Credits: 3

Includes content and pedagogy in teaching science in the elementary school. Addresses the following topics to encourage the development of scientific literacy: 1) Current national and state science standards; 2) science education pedagogical models; 3) curriculum; and 4) theory translated into instructional planning and practice.

Restricted Elementary Education Majors; ELSP Majors

Prerequisite: Students must have completed at least one of the three required science content courses with a grade of C or better.

EDEL4109 - Elementary Humanities Education

Credits: 5

Content and pedagogy to develop the reflective practitioner of teaching humanities in the elementary school. The following themes are addressed: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4109]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EDST 2550; concurrent enrollment in EDEL 4309 and EDEL 4409.

EDEL4309 - Elementary Literacy Education

Credits: 2-5
Max Credit (Max. 6)

Encompasses content and pedagogy to develop the reflective practitioner for teaching literacy in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC
Former Course Number [EDUC 4309]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; Grade C or better in EDST 3100, successful completion of specific content courses required in major; grade C or better in EDST 2550. Concurrent enrollment in EDEL 4109 and EDEL 4409.

EDEL4409 - Elementary Math/ Science Education

Credits: 5
Max Credit (Max. 6)

Includes content and pedagogy in teaching math/science in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC
Former Course Number [EDUC 4409]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EST 2550; concurrent enrollment in EDEL 4109 and EDEL 4309.

EDEC4209 - Early Literacy Methods

Credits: 3
This course focuses on the pedagogical content knowledge and instructional and assessment practices that will prepare students to implement research-based reading and writing instruction for children from ages 3-8. Key topics include reading aloud to young children; phonological awareness, phonics, and word recognition; reading fluency and comprehension; vocabulary; and writing.

Restricted Early Childhood or Elementary Education Majors

Prerequisite: EDEL 2140 and EDST 3100 or concurrent enrollment.

Residency in Teaching-15 Hours

All methods courses must be completed prior to enrollment in EDEL 4500.

EDEL4500 - Residency in Teaching

Credits: 1-16

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDSE 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses.

Elementary Core Content-minimum 29 Hours

Minimum 2.5 GPA required in major content. All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109, EDEL 4309 and EDEL 4409.

Literacy

EDEL2140 - Teaching Literacy in the Elementary School

Credits: 3

Provides an acquaintance with basic assumptions underlying curriculum and processes in literacy and to give opportunity for selecting and using instructional materials.

Prerequisite: ENGL 1010, sophomore standing, admitted into Elementary Education program.

EDEL2280 - Literature for Children

Credits: 3

A survey course, the purpose of which is to prepare prospective elementary teachers and library-media specialists to provide knowledgeable service in the use of print and non-print materials for children. Includes study of evaluative criteria, wide reading, viewing and listening as well as discussion of literature for children.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

Former Course Number [LIBS 2280]

Prerequisite: successful completion of ENGL 1010, sophomore standing, education major.

EDEL3720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Focuses on the causes of student difficulties with reading and writing and assessment and instruction for students with such difficulties.

Prerequisite: EDEL 2140.

Mathematics

MATH1100 - Number and Operations for Elementary School Teachers

Credits: 3

For prospective elementary school teachers; purpose is to prepare students to be competent in teaching the major concepts and skills related to the real number system and four arithmetic operations. Includes asking and answering critical questions about subsets of the real number system, including natural, integer, and rational numbers.

USP 2003-2014 Code U3QA

Prerequisite: grade of C or better in MATH 0921 or Level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600.

MATH1105 - Data, Probability, and Algebra for Elementary School Teachers

Credits: 3

Continuation of MATH 1100 for prospective elementary teachers; emphasis is on asking and answering critical questions about our world through algebra, probability, and data analysis to prepare students to be competent in teaching these major concepts. Explorations focus on representing, analyzing, and generalizing patterns and the chances of future events.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1100.

Can be substituted with:

(MATH 1400 or MATH 1405 or MATH 1450) **AND** (STAT 2070 or STAT 2050), **OR** MATH 2200 or MATH 2350.

MATH2120 - Geometry and Measurement for Elementary School Teachers

Credits: 3

Continuation of MATH 1105 for prospective elementary teachers; emphasis is on asking and answering critical questions about spatial reasoning as evident in the real world. Includes investigations of two- and three-dimensional shapes and their properties, measurements, constructions, and transformations to prepare students to be competent in teaching these concepts.

Prerequisite: grade of C or better in MATH 1105.

Science

Can be substituted with other approved PN sciences.

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

OR

ASTR1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society. Cross listed with GEOL 1070. Prerequisites: MATH 1100 or equivalent; enrollment reserved for elementary and elementary/special education majors, or consent of instructor.

Cross Listed GEOL 1070.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1100

LIFE1020 - Life Science

Credits: 4

An integrated lab and lecture emphasizing fundamental principles of biology including cell structure and function, genetics, ecology, evolution and organismal biology. Considers applications of these principles to societal issues such as the conservation of biodiversity, overpopulation and global environmental changes, biotechnology, and human wellness and disease. If you take LIFE 1020, you cannot get duplicate credit for LIFE 1000, 1003, or 1010.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1020]

Prerequisite: elementary education majors only; concurrent enrollment in EDEL 1430.

PHYS1090 - The Fundamentals of the Physical Universe

Credits: 4

Applies fundamental principles of chemistry and physics to real life situations. Primarily for elementary education majors.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

Social Sciences

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

OR

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

- Additional Social Studies course (The course completed to meet the USP U.S. & WY Constitution (V) requirement can not be applied to this content requirement)

Health

HLED2006 - Health for Elementary Educators

Credits: 1

Acquaints students to the Wyoming Health Standards and Benchmarks, techniques/instruments for assessing they Wyoming Health Standards and Benchmarks, sample health curriculum models/approaches for elementary school K-6, lesson plans in health education for elementary learners, and health integration in language arts curricula.

Prerequisite: Declared major in KHP, PHET, or Elementary Education.

Art

EDEL2170 - Art in the Elementary School

Credits: 3

Provides a foundation for understanding art in order to facilitate the teaching of art and the integration of art education into the elementary school curriculum. Involves both applied reading and studio production. Attention is given to development of artistic skills and meaningful art experiences based on DBAE principles.

USP 2003-2014 Code [CA<>(none)]

Former Course Number [EDCI 3170]

Elementary Education Electives

Students need a minimum of 9 credits of electives to complete their degree program. Students are strongly encouraged to apply elective hours toward a minor or endorsement, such as those in Early Childhood Education, English as a Second Language, American Sign Language and Computer Science.

Elementary Education/Special Education, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification), with dual credentials in elementary education and special education.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

The Elementary/Special Education program prepares students to seek licensure as a K-6 elementary teacher and K-12 special education endorsement. A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

A minimum of 2.75 UW cumulative GPA is required for registration in EDST 3100.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDEX4355 - Assessment & St. W/Dis

Credits: 3

This course is designed to explore the use of various types of assessments and assessment tools to evaluate students for special education eligibility and to design individualized programming. Students will learn how to interpret assessment data to identify areas of strength and needs and to make data-based instructional decisions.

Restricted Elementary and Special Education Dual Majors only.

EDEL3724 - Elementary Science Education

Credits: 3

Includes content and pedagogy in teaching science in the elementary school. Addresses the following topics to encourage the development of scientific literacy: 1) Current national and state science standards; 2) science education pedagogical models; 3) curriculum; and 4) theory translated into instructional planning and practice.

Restricted Elementary Education Majors; ELSP Majors

Prerequisite: Students must have completed at least one of the three required science content courses with a grade of C or better.

EDEC4209 - Early Literacy Methods

Credits: 3

This course focuses on the pedagogical content knowledge and instructional and assessment practices that will prepare students to implement research-based reading and writing instruction for children from ages 3-8. Key topics include reading aloud to young children; phonological awareness, phonics, and word recognition; reading fluency and comprehension; vocabulary; and writing.

Restricted Early Childhood or Elementary Education Majors

Prerequisite: EDEL 2140 and EDST 3100 or concurrent enrollment.

Completion of EDST 3100 and EDST 3101 is a prerequisite for enrollment in the following courses:

EDEL4109 - Elementary Humanities Education

Credits: 5

Content and pedagogy to develop the reflective practitioner of teaching humanities in the elementary school. The following themes are addressed: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4109]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EDST 2550; concurrent enrollment in EDEL 4309 and EDEL 4409.

EDEL4309 - Elementary Literacy Education

Credits: 2-5

Max Credit (Max. 6)

Encompasses content and pedagogy to develop the reflective practitioner for teaching literacy in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4309]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; Grade C or better in EDST 3100, successful completion of specific content courses required in major; grade C or better in EDST 2550. Concurrent enrollment in EDEL 4109 and EDEL 4409.

EDEL4409 - Elementary Math/ Science Education

Credits: 5

Max Credit (Max. 6)

Includes content and pedagogy in teaching math/science in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4409]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EST 2550; concurrent enrollment in EDEL 4109 and EDEL 4309.

Practicum

An approved background check must be on file with the Teacher Preparation and Advising Office for registration and completion of these courses.

EDST1200 - Practicum I

Credits: 1

The course is designed to build educator identity, develop skills in observing the physical environment of educational settings, understand the responsibilities and ethics of educational professionals, and engage in and reflect on service learning activities. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Prerequisite: Background check on file in the Teacher Preparation and Advising Office.

EDST2200 - Practicum 2

Credits: 1

Students will display an educator identity; develop skills in creating student-centered and culturally relevant/sustaining learning environments; apply ethical principles in service-learning activities; and collaborate in planning, implementing and reflecting on activities for learners. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Restricted Education major

Prerequisite: EDST 1200 or equivalent and Sophomore standing. Background check must be on file in the Teacher Preparation and Advising Office prior to start of practicum experiences.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Elementary Education Content

Minimum 2.75 GPA required in major content. All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109 , EDEL 4309 , and EDEL 4409.

Literacy

EDEL2140 - Teaching Literacy in the Elementary School

Credits: 3

Provides an acquaintance with basic assumptions underlying curriculum and processes in literacy and to give opportunity for selecting and using instructional materials.

Prerequisite: ENGL 1010, sophomore standing, admitted into Elementary Education program.

EDEL2280 - Literature for Children

Credits: 3

A survey course, the purpose of which is to prepare prospective elementary teachers and library-media specialists to provide knowledgeable service in the use of print and non-print materials for children. Includes study of evaluative criteria, wide reading, viewing and listening as well as discussion of literature for children.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

Former Course Number [LIBS 2280]

Prerequisite: successful completion of ENGL 1010, sophomore standing, education major.

EDEL3720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Focuses on the causes of student difficulties with reading and writing and assessment and instruction for students with such difficulties.

Prerequisite: EDEL 2140.

Science

LIFE1020 - Life Science

Credits: 4

An integrated lab and lecture emphasizing fundamental principles of biology including cell structure and function, genetics, ecology, evolution and organismal biology. Considers applications of these principles to societal issues such as the conservation of biodiversity, overpopulation and global environmental changes, biotechnology, and human wellness and disease. If you take LIFE 1020, you cannot get duplicate credit for LIFE 1000, 1003, or 1010.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1020]

Prerequisite: elementary education majors only; concurrent enrollment in EDEL 1430.

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

OR

ASTR1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society. Cross listed with GEOL 1070. Prerequisites: MATH 1100 or equivalent; enrollment reserved for elementary and elementary/special education majors, or consent of instructor.

Cross Listed GEOL 1070.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1100

PHYS1090 - The Fundamentals of the Physical Universe

Credits: 4

Applies fundamental principles of chemistry and physics to real life situations. Primarily for elementary education majors.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

Mathematics

MATH1100 - Number and Operations for Elementary School Teachers

Credits: 3

For prospective elementary school teachers; purpose is to prepare students to be competent in teaching the major concepts and skills related to the real number system and four arithmetic operations. Includes asking and answering critical questions about subsets of the real number system, including natural, integer, and rational numbers.

USP 2003-2014 Code U3QA

Prerequisite: grade of C or better in MATH 0921 or Level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600.

MATH1105 - Data, Probability, and Algebra for Elementary School Teachers

Credits: 3

Continuation of MATH 1100 for prospective elementary teachers; emphasis is on asking and answering critical questions about our world through algebra, probability, and data analysis to prepare students to be competent in teaching these major concepts. Explorations focus on representing, analyzing, and generalizing patterns and the chances of future events.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1100.

Can be substituted with:

(MATH 1400 or MATH 1405 or MATH 1450) **AND** (STAT 2070 or STAT 2050), **OR** MATH 2200 or MATH 2350.

MATH2120 - Geometry and Measurement for Elementary School Teachers

Credits: 3

Continuation of MATH 1105 for prospective elementary teachers; emphasis is on asking and answering critical questions about spatial reasoning as evident in the real world. Includes investigations of two- and three-dimensional shapes and their properties, measurements, constructions, and transformations to prepare students to be competent in teaching these concepts.

Prerequisite: grade of C or better in MATH 1105.

Social Studies/Cultural Awareness

Take **ONE** of the following:

AAST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities. Enrollment preference will be given to We The People FIG students.

Cross Listed NAIS 1030 /AMST 1030 / WMST 1030/LTST 1030.

USP 2003-2014 Code A3D, U3I

A&S College Core 2015 ASD

EDST3200 - Foundations of ESL Learning

Credits: 3

This course introduces students to basic principles of second language acquisition and factors that influence the processes. Understanding the processes of language acquisition, will better equip students to plan instructional strategies that facilitate English language learners' language.

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

WIND2100 - Introduction to Disability Studies

Credits: 3

Provides students with an overview of the disability studies field. Students gain introductory knowledge about the disability studies perspective by examining the work of scholars from many academic backgrounds, which will facilitate students' understanding of the interdisciplinary nature of disability studies.

USP 2003-2014 Code U3CH,U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Art

EDEL2170 - Art in the Elementary School

Credits: 3

Provides a foundation for understanding art in order to facilitate the teaching of art and the integration of art education into the elementary school curriculum. Involves both applied reading and studio production. Attention is given to development of artistic skills and meaningful art experiences based on DBAE principles.

USP 2003-2014 Code [CA<>(none)]
Former Course Number [EDCI 3170]

Health

HLED2006 - Health for Elementary Educators

Credits: 1

Acquaints students to the Wyoming Health Standards and Benchmarks, techniques/instruments for assessing the Wyoming Health Standards and Benchmarks, sample health curriculum models/approaches for elementary school K-6, lesson plans in health education for elementary learners, and health integration in language arts curricula.

Prerequisite: Declared major in KHP, PHET, or Elementary Education.

Special Education Content: 36 (Minimum) Credit Hours

All major content courses must be completed with a grade of C or higher prior to enrollment in EDEL 4109, EDEL 4309, and EDEL 4409.

EDEX2000 - Collaboration and Professional Relationships

Credits: 3

This course is designed to help students explore a range of collaboration and consultation strategies in the field of Special Education to enable them to successfully collaborate with a range of professionals, students, and families in a school setting. Course content will prepare prospective special education teachers with conflict resolution skills, the ability to effectively facilitate meetings, and increase their inter and intra-personal skills.

EDEX3071 - Understand st. w/High Inc Dis

Credits: 3

This course is designed to explore the causes, characteristics, and eligibility of high incidence disabilities in K-12 setting. Additionally, it examines the theoretical, research, and practical aspects of high incidence disabilities as they relate to the student, teacher, classroom, parents, paraprofessionals, and other school personnel and community agencies.

Restricted Elementary and Special Education Dual Majors

Prerequisite: 2.75 UW GPA minimum

EDEX3072 - Teaching st. w/High Inc Dis

Credits: 3

This course is designed to explore evidence-based practices, high leverage practices, research-based strategies and transition planning utilized to best serve students with high incidence disabilities in a variety of K-12 settings. Additionally, it explores inclusive strategies and the roles of stakeholders in supporting students with high incidence disabilities in the general education classroom.

Restricted Elementary and Special Education Dual Majors

Prerequisite: 2.75 UW GPA minimum Successful completion of EDEX 3071 (C or better)

EDEX3080 - Understand st. w/Low Inc Dis

Credits: 3

This course is designed to explore the causes, characteristics, and eligibility of low incidence disabilities in K-12 setting. Additionally, it examines the theoretical, research, and practical aspects of low incidence disabilities as they relate to the student, teacher, classroom, parents, paraprofessionals, and other school personnel and community agencies. Finally, this course explores assistive technology utilized to effectively support students with disabilities to access the whole school environment.

Restricted Elementary and Special Education Dual Majors

Prerequisite: 2.75 UW GPA minimum

EDEX3081 - Teaching St. w/Low Inc. Dis.

Credits: 3

This course is designed to explore evidence-based practices, high leverage practices, research-based strategies and transition planning utilized to best serve students with low incidence disabilities in a variety of K-12 settings. Additionally, it explores assistive technology, inclusive strategies and the roles of stakeholders in supporting students with low incidence disabilities in the general education classroom.

EDEX3110 - Behavioral Supports & Interv.

Credits: 3

Relates the theoretical, research, and practical strategies of behavior change models to students, teachers, parents, and paraprofessionals, in order to understand and remediate student behavior presenting challenges. This will include understandings of systematic Behavior Management plans, Functional Behavior Assessments, Behavior Intervention Plans, and school wide behavioral supports and interventions.

Restricted Elem. & Special Education Dual Major only

Prerequisite: 2.75 UW GPA and successful completion of EDEX 2484. Student must have earned a C or higher in this course.

EDEX4120 - Data Analysis/IEP Development

Credits: 3

This course is designed to convey the necessity of the Individualized Education Program (IEP), in regard to providing quality, compliant, and effective services to individuals with disabilities. Course participants will analyze assessment data to understand the academic and behavioral aspects of individual students with disabilities and to develop a comprehensive IEP to meet their unique needs. In addition, students will learn how to develop IEP's in collaboration with service providers, families, and other stakeholders.

Restricted Elem. & Special Education Dual Major only

Prerequisite: 2.75 UW GPA and successful completion of EDEX 2484. Student must have earned a C or higher in this course.

EDEX4720 - Law and Students with Disabilities

Credits: 3

Provides prospective special education teachers with an overview of important case and statutory law in special education. Supports prospective special education teachers in analyzing disability laws and the ways in which these impact practice.

WIND4020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed SOWK 4020.

Dual Listed WIND 5020.

USP 2003-2014 Code U3CS

USP 2015 Code U5C3

Prerequisite: WIND 2100 or WB or COM2.

Residency in Teaching

All methods courses must be completed prior to enrollment in Residency in Teaching.

EDEL4500 - Residency in Teaching

Credits: 1-16

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDSE 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses.

- EDEX 4500 Residency in Student Teaching Special Education, Credits: 8

Secondary Agricultural Education with Concurrent Major in Agricultural Business, B.S.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Agricultural Business. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)
USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COMI with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Agriculture Education.

USP 2003-2014 Code U3WC

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4278.

(3 credits required)

EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Agriculture Education.

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3278/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3
The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Agricultural Education Core Requirements

These are the specific courses provided for all concurrent Agricultural Education majors through the College of Education.

EDAG3150 - Community Programs in Agricultural Education

Credits: 3

This course is designed to determine the resources and trends of local communities with respect to agricultural production and agribusiness. Emphasis will be placed on agricultural education program policies, FFA chapter advisement, planning and managing the instructional program, and the identification and completion of records and reports required of a teacher of agricultural education in Wyoming.

Prerequisite: Agricultural Education major.

EDAG4170 - Principles of Agricultural Mechanics and Technology

Credits: 3

Content will emphasize those skills commonly taught in Wyoming agricultural education in the secondary school system with an emphasis on advanced gas and plasma welding theory, small gas engines, and advanced electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4170, EDVE 4170]

Prerequisite: EDAG 4070 or approval of instructor.

EDAG4180 - Techniques of Agricultural Mechanics and Technology

Credits: 3

Techniques of agricultural mechanics and instruction. Content will emphasize those skills commonly taught in the Wyoming school system agricultural mechanics program with emphasis on woodworking, welding theory, agricultural plumbing, and electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4180, EDVE 4180]

Prerequisite: Junior standing or consent of instructor.

Agriculture and Science Core Requirements

These are specific courses for all concurrent Agricultural Education majors taken outside of the College of Education.

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB
USP 2015 Code U5PN
Former Course Number [CROP/BOT 2000]

Choose one:

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H
OR

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Choose one:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

Choose one:

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Agricultural Business Core Requirements

These are the specific courses taken by Agricultural Education students enrolled in the Agricultural Business concurrent major.

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGECE 1020 and MATH 1400.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or ECON 1020 and MATH 1400.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

MATH2350 - Business Calculus

Credits: 4

Primarily for students in the College of Business. Includes an introduction to limits; the definition of a derivative; derivatives and their applications; antiderivatives; definite integrals and their applications. The applications emphasize concepts of interest to business majors.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

- Electives. Credits: 6 (Upper division AGEC, AGEC 3400: Ag Law recommended)

Endorsement in Secondary Biology Education option

Students can seek an endorsement in Secondary Biology Education. The required courses are:

Choose one:

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model

systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

Choose one:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

OR

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

EDSE4279 - Subject Matter Specific Methods II: Biological Science Methods for Agricultural Education Majors

Credits: 3

Provide meaningful learning in preparation for a professional career in a secondary school setting, teaching life science courses in addition to agriculture classes. Students will be engaged as active participants in discussions and hands-on science activities. The course is designed to offer experiences to enhance pedagogical content knowledge as well as skills to successfully make science education accessible for all students. Special attention will be given to creating a learning environment that fosters the development of inquiry skills and safety both in the classroom and field settings.

Prerequisite: Grade of C or better in EDST 3100, 2.750 minimum GPA in major content courses, grade C or better in specific content courses required in the Secondary Biology Endorsement.

For Ag. Communications and Ag. Business Concurrent Majors only: an additional upper division Biology-related course as approved by advisor.

- Upper-division biology related elective Credits: 3

Secondary Agricultural Education with Concurrent Major in Agricultural Communications, B.S.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an

opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Agricultural Communications. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Agriculture Education.

USP 2003-2014 Code U3WC

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4278.

(3 credits required)

EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Agriculture Education.

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3278/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Agricultural Education Core Requirements

These are the specific courses provided for all concurrent Agricultural Education majors through the College of Education.

EDAG3150 - Community Programs in Agricultural Education

Credits: 3

This course is designed to determine the resources and trends of local communities with respect to agricultural production and agribusiness. Emphasis will be placed on agricultural education program policies, FFA chapter advisement, planning and managing the instructional program, and the identification and completion of records and reports required of a teacher of agricultural education in Wyoming.

Prerequisite: Agricultural Education major.

EDAG4170 - Principles of Agricultural Mechanics and Technology

Credits: 3

Content will emphasize those skills commonly taught in Wyoming agricultural education in the secondary school system with an emphasis on advanced gas and plasma welding theory, small gas engines, and advanced electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4170, EDVE 4170]

Prerequisite: EDAG 4070 or approval of instructor.

EDAG4180 - Techniques of Agricultural Mechanics and Technology

Credits: 3

Techniques of agricultural mechanics and instruction. Content will emphasize those skills commonly taught in the Wyoming school system agricultural mechanics program with emphasis on woodworking, welding theory, agricultural plumbing, and electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4180, EDVE 4180]

Prerequisite: Junior standing or consent of instructor.

Agriculture and Science Core Requirements

These are specific courses for all concurrent Agricultural Education majors taken outside of the College of Education.

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and

genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and

functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

Choose one;

AGEC 1010 Principles of Macroeconomics Credits: 3 OR ECON 1010 Principles of Macroeconomics Credits: 3

OR

AGEC 1020 Principles of Microeconomics Credits: 3 OR ECON 1020 Principles of Microeconomics Credits: 3

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Choose one:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

Choose one:

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Agricultural Communications Core Requirements

These are the specific courses taken by Agricultural Education students enrolled in the Agricultural Business concurrent major.

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O
USP 2015 Code U5C2
Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB
Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

AGRI4975 - Agricultural Communications Senior Project

Credits: 1

A baccalaureate degree capstone experience incorporating self assessments of student learning, reflective writings, and an analysis, synthesis and evaluation of the agricultural communications curriculum. Students develop and present a personalized, comprehensive, professional portfolio.

Prerequisite: agricultural communication major with senior standing and WB.

- Upper Division COJO Electives. Credits: 9
- Upper Division Major Electives. Credits: 6

Endorsement in Secondary Biology Education option

Students can seek an endorsement in Secondary Biology Education. The required courses are:

Choose one:

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

Choose one:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

OR

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

EDSE4279 - Subject Matter Specific Methods II: Biological Science Methods for Agricultural Education Majors

Credits: 3

Provide meaningful learning in preparation for a professional career in a secondary school setting, teaching life science courses in addition to agriculture classes. Students will be engaged as active participants in discussions and hands-on science activities. The course is designed to offer experiences to enhance pedagogical content knowledge as well as skills to successfully make science education accessible for all students. Special attention will be given to creating a learning environment that fosters the development of inquiry skills and safety both in the classroom and field settings.

Prerequisite: Grade of C or better in EDST 3100, 2.750 minimum GPA in major content courses, grade C or better in specific content courses required in the Secondary Biology Endorsement.

May be substituted with EDSE 3275 Subject Matter Specific Methods I: Secondary Science Education
Credits: 3.

For Ag. Communications and Ag. Business only: an additional upper-division biology-related course as approved by advisor.

- Upper-division biology-related elective Credits: 3

Secondary Agricultural Education with Concurrent Major in Animal and Veterinary Science, B.S.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Animal and Veterinary Science. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)
USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COMI with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST3550 - Educational Assessment

Credits: 2

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs. Addresses the basic ideas of classroom test design.

Prerequisite: Prerequisites: Grade of C or better in a Q course, and EDST 2480, 2.75 Cumulative UW Institutional GPA.

Methods (Offered Fall Semester Only)

EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Agriculture Education.

USP 2003-2014 Code U3WC

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4278.

(3 credits required)

EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Agriculture Education.

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3278/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Agricultural Education Core Requirements

These are the specific courses provided for all concurrent Agricultural Education majors through the College of Education.

EDAG3150 - Community Programs in Agricultural Education

Credits: 3

This course is designed to determine the resources and trends of local communities with respect to agricultural production and agribusiness. Emphasis will be placed on agricultural education program policies, FFA chapter advisement, planning and managing the instructional program, and the identification and completion of records and reports required of a teacher of agricultural education in Wyoming.

Prerequisite: Agricultural Education major.

EDAG4170 - Principles of Agricultural Mechanics and Technology

Credits: 3

Content will emphasize those skills commonly taught in Wyoming agricultural education in the secondary school system with an emphasis on advanced gas and plasma welding theory, small gas engines, and advanced electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4170, EDVE 4170]

Prerequisite: EDAG 4070 or approval of instructor.

EDAG4180 - Techniques of Agricultural Mechanics and Technology

Credits: 3

Techniques of agricultural mechanics and instruction. Content will emphasize those skills commonly taught in the Wyoming school system agricultural mechanics program with emphasis on woodworking, welding theory, agricultural plumbing, and electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4180, EDVE 4180]

Prerequisite: Junior standing or consent of instructor.

Agriculture and Science Core Requirements

These are specific courses for all concurrent Agricultural Education majors taken outside of the College of Education.

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

PLNT2025 - Horticultural Science

Credits: 3

Propagation, growth, development and utilization of horticultural plants. Students gain an understanding of plant classification, anatomy, interactions with the environment, production and utilization.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Prerequisite: PLNT 1000 or LIFE 1010

PLNT2026 - Horticultural Sciences Laboratory

Credits: 1

Offers hands-on experience in many areas of horticulture. Students learn basic horticultural plant structures and functions, propagation methods, growing media and fertilizers, landscaping, pruning, etc.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SB

Prerequisite: PLNT 1000 or LIFE 1010.

Choose one:

AGEC 1010 Principles of Macroeconomics Credits: 3 OR ECON 1010 Principles of Macroeconomics
Credits: 3

OR

AGEC 1020 Principles of Microeconomics Credits: 3 OR ECON 1020 Principles of Microeconomics
Credits: 3

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Choose one:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

Choose one:

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Animal and Veterinary Science Core Requirements

These are the specific courses taken by Agricultural Education students enrolled in the Agricultural Business concurrent major.

ANSC2010 - Domestic Animal Metabolism

Credits: 3

Integrates cellular and whole-animal metabolism through introduction to metabolic regulation. Introduces students to the nomenclature, structures and functions of cellular metabolites and vitamins. Knowledge of chemical structure will be applied to cellular reactions in various tissues of domestic animals. Ruminants and non-ruminants will be contrasted.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of

farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

Production Requirement

Choose one of the following:

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

Choose 5 of the 6 Courses: (minimum of 15 hours)

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3

Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3

Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

PATB4110 - Diseases of Food Animals

Credits: 3

Acquaints students with diseases of cattle, sheep, swine and poultry. The focus is on principles of disease prevention and control.

Dual Listed PATB 5110

When Offered (Offered fall semester)

Prerequisite: LIFE 2022

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

Endorsement in Secondary Biology Education option

Students can seek an endorsement in Secondary Biology Education. The required courses are:

Choose one:

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

Choose one:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

OR

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

EDSE4279 - Subject Matter Specific Methods II: Biological Science Methods for Agricultural Education Majors

Credits: 3

Provide meaningful learning in preparation for a professional career in a secondary school setting, teaching life science courses in addition to agriculture classes. Students will be engaged as active participants in discussions and hands-on science activities. The course is designed to offer experiences to enhance pedagogical content knowledge as well as skills to successfully make science education accessible for all students. Special attention will be given to creating a learning environment that fosters the development of inquiry skills and safety both in the classroom and field settings.

Prerequisite: Grade of C or better in EDST 3100, 2.750 minimum GPA in major content courses, grade C or better in specific content courses required in the Secondary Biology Endorsement.

May be substituted with EDSE 3275 Subject Matter Specific Methods I: Secondary Science Education

Credits: 3.

Secondary Agricultural Education, B.S.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Agricultural Education and a concurrent major in Agricultural Communications. It prepares students to teach Agriculture in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3278 - Subject Matter Specific Methods I: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Agriculture Education.

USP 2003-2014 Code U3WC

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4278.

EDSE4278 - Subject Matter Specific Methods II: Secondary Agriculture Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Agriculture Education.

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3278/EDCI 5250.

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Concurrent Majors

Secondary Agricultural Education with Concurrent Major in Agricultural Business, B.S.

Secondary Agricultural Education with Concurrent Major in Agricultural Communications, B.S.

Secondary Agricultural Education with Concurrent Major in Animal and Veterinary Science, B.S.

Secondary Career & Technical Education, B.A.S.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

This program consists of a minimum of 120 total hours. Minimum of 2.500 content GPA required.

This is a B.A.S. degree completion which requires students to transfer in specific CTE coursework to UW and then complete the professional education requirements.

The major will be advised through both the College of Education main campus and UW Casper.

Students are suggested to take STAT 2050 or STAT 2070 to complete the USP:Q and PHYS 1050, PHYS 1100, or PHYS 1210 to complete part of the USP:PN.

Online Access: The CTE program is a distance delivered program with the exception of a few intensive weekends (these weekends could be held on the UW-Casper campus or could be virtual depending on need).

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to

develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

EDST3200 - Foundations of ESL Learning

Credits: 3

This course introduces students to basic principles of second language acquisition and factors that influence the processes. Understanding the processes of language acquisition, will better equip students to plan instructional strategies that facilitate English language learners' language.

Assessment

EDST2550 - Educational Assessment

Credits: 3
Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

EDSE3020 - Facilities and Advisory Management

Credits: 2-4
Max Credit (Max. 4)

Students engage in identifying RFP applications and applies for grants that are geared toward the Career Technical classroom as well as the process of assembling and managing an advisory committee, a required component of all CTE programs. Prepares Career Technical Teachers for the non-teaching requirements associated within CTE programs

Prerequisite: Junior standing in Career Technical Education and completion of Com 1 level writing course.

Methods (Offered Fall Semester Only)

EDSE3277 - Tech Ed Methods I: Intro

Credits: 3-6
Max Credit (Max. 6)

Subject Matter Specific Methods I: Secondary Career and Technical Education. 3 Cr Introduction of content and pedagogy in Career Technical Education.

Prerequisite: grade of C or better in EDST 3100; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4277.

EDSE4277 - Subject Matter Specific Methods II: Secondary Technology Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Industrial Technology Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3277/EDCI 5250.

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Major Content

Students must complete a minimum of 120 credits to graduate (Professional Education Requirements and Major Content transfer credit). The Major Content transfer credit must be from a block transfer agreement requiring students to complete at least one PTSB approved content area that students transfer into the B.A.S. program at UW. This coursework may be completed either prior to matriculating into the B.A.S. program or taken concurrently with the UW coursework.

Secondary English Education with Concurrent Major in English, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in English Education and a concurrent major in English. It prepares students to teach English in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COMI with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3270 - Subject Matter Specific Methods I: Secondary English Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in English Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4270.

(3 credits required)

EDSE4270 - Subject Matter Specific Methods II: Secondary English Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in English Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3270/EDCI 5250.

(4 credits required)

Residency

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

English Core

36 Total Hours. At least 21 of the 36 hours must be upper-division (3000-level or higher)

Gateway to the English Major

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

Note: this course requirement is waived if student transfers in an A.A. or A.S.

Historical Period Classes

Take **ONE** of the following:

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

Take **THREE** of the following:

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

Expanding the Canon-6 Hours

6 credits total examining diversity-related issues, 2000-level or above

• 2340/2350/2360 can be taken either as an Expanding the Canon course OR as an Historical Period course. A full list of courses that fulfill the Expanding the Canon requirements will be published each semester; generally speaking, these courses will cover topics related to racial diversity, global literatures, gender, sexuality, or disability studies.

Examples: 3330, 3710, 4450, 4455, 4460, 4470, 4640: Postcolonial Literature, 4830.

Rhetoric, Composition Pedagogy, and Professional Writing

ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing

Credits: 3

Introduces common methods, concepts, and theories emphasized in these interrelated intellectual traditions. It asks students to examine how research traditions have developed alongside each other over time, and prepares students to design a multimodal research project.

Prerequisite: ENGL 2025 and junior standing.

6 Hours from the Following Rhetoric, Composition, and Professional Writing Courses Offered by English:
Take **TWO** of the Following:

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

ENGL2035 - Writing for Public Forums

Credits: 3

Introduction to professional writing that focuses on analyzing and producing texts designed to influence public opinion. Genres may include letters, editorials, web pages, pamphlets, e-mail, speeches, and position papers. Focuses on skills in collaboration and use of technology necessary for ethical, effective participation in public discourse.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: WA/COM1.

ENGL2125 - Writing Tutor Pedagogy/Practicum

Credits: 3

Prepares students for professional employment as writing tutors in a writing center environment. Students will gain a detailed understanding of the history of writing centers, the development of writing center studies and theory, and the innovative trends in contemporary writing center practices and organization.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: ENGL 1010 or COM1/transfer equivalent with a grade of B or higher; 3.000 GPA or higher.

ENGL3020 - Culture, Communication, Work

Credits: 3

Examines individual identity and group cultures, and how they influence communication in the workplace. Helps students develop strategies for working across cultural differences and for effective negotiation and conflict resolution skills.

USP 2003-2014 Code [(none)<>COM3]

Prerequisite: Completion of COM2.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4020 - Editing for Publication

Credits: 3

Theory and practice of editing in the contexts of book, magazine, newspaper, and web-based publications. Standard editing practices for using grammar, proofreading marks, and computer editing tools.

Prerequisite: WA/COM1, WB/COM2 (ENGL 2035 and ENGL 3000 recommended).

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 4061.

Dual Listed ENGL 5061.

USP 2015 Code U5C3

Prerequisite: COMM 1040 and COJO 3040 or ENGL 2035.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

Foundations of Language

3 Hours in the History of the English Language or Social Linguistics

Take **ONE** of the Following:

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480.

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3

Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L

USP 2015 Code U5C2

Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

ENGL4780 - History of the English Language

Credits: 3

Considers major sources of change in the English language historically, as well as some of the internal and external catalysts for the process. Identical to ANTH 4780.

Prerequisite: ENGL 4750.

Young Adult Literature-3 Hours

EDCI4120 - Literature for Young Adults

Credits: 3

Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. The course involves the reading and critique of literature.

Dual Listed EDCI 5120.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [LIBS 4120]

Prerequisite: senior level or graduate standing.

World Language

12 hours of the same world language, including ASL

Capstone: Senior Seminar

ENGL4999 - Senior Seminar

Credits: 3

This course is the capstone course in the English major. Subject matter varies by section. In all sections students will exercise skills acquired in the major (close-reading, historical analysis, application of theory) to explore significant texts and to reflect on the nature of English study today.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and either ENGL 3000 or ENGL 3010; Senior standing.

Electives

9-10 Hours of Electives

Secondary Mathematics Education with Concurrent Major in Mathematics, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Mathematics Education and a concurrent major in Mathematics. It prepares students to teach Mathematics in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3271 - Subject Matter Specific Methods I: Secondary Mathematics Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Mathematics Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4271.

(3 credits required)

EDSE4271 - Subject Matter Specific Methods II: Secondary Mathematics Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Mathematics Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3271/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Major Content

It is necessary to complete a minimum of 50 hours in math coursework. Work must include 27 credit hours of upper-division mathematics. The grade in each course of this 50-hour requirement must be C or better. A minimum GPA of 2.500 in major content courses is required.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

MATH2800 - Mathematics Major Seminar

Credits: 2

An introduction to modern mathematical reasoning and discourse, emphasizing the distinctive ways in which logic and language are used and the motivations behind them. Develops methods of precise definition and rigorous proof. Several topics are explored, illustrating mathematics as a living, dynamic subject with its own culture and conventions.

MATH3500 - Algebra I: Introduction to Rings and Proofs

Credits: 3

Begins with common features of integers, rational numbers, and polynomials, leading to study of rings in general. Topics include divisibility, factorization, and modular arithmetic for integers and polynomials, and homomorphisms and ideals for rings. Proof techniques include direct proof, proof by contrapostive, mathematical induction, and proof by contradiction.

Prerequisite: MATH 2800 and grade C or better in MATH 2250 or concurrent registration in MATH 2250.

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

MATH3205 - Analysis I: Elementary Real Analysis

Credits: 3

An introduction to rigorous analysis in one real variable. Includes a rigorous reconsideration of the elements of calculus: the real number system, numerical sequences and series, limits, continuity, differentiability, and Riemann integrability for functions of one variable. Proof and mathematical writing are emphasized.

Prerequisite: Grade of C or better in MATH 2205 and MATH 2800.

MATH4000 - History of Mathematics

Credits: 3

Explores the roots of mathematics and the people who made significant contributions to it. Mathematical subjects typically include algebra, calculus and number theory; both chronological and topical approaches are employed.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2205.

MATH4600 - Foundations of Geometry

Credits: 3

Broadens the student's understanding of the many faces of geometry and provides a context for the specific case of Euclidean geometry. Various approaches will be presented, including axiomatic, synthetic, coordinate, and transformational methods.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 3205 or MATH 3500.

Major Related Statistics Courses

Take **ONE** of the Following (STAT 2050 and STAT 2070 are recommended):

STAT2000 - Statistics and the World

Credits: 3

Discusses statistical reasoning and methods as related to today's society. Emphasizes ideas rather than specific techniques. Focuses on real examples of the use (and misuse) of statistics. Includes sampling, experimentation, descriptive statistics, elementary probability and statistical inference.

USP 2003-2014 Code U3QB,U3Q

Prerequisite: grade of C or better in MATH 0921 or level 2 on the Math Placement Exam or Math ACT of 21 or Math SAT of 600 or concurrent enrollment in MATH 1080.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220,

5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

Depth & Sequence Courses

Take **ONE** of the Following Selected Pairs:

Pair 1

MATH4200 - Analysis 2: Advanced Analysis

Credits: 3

A second course in analysis. Includes metric space topology, sequences and series of functions, and analysis in \mathbb{R}^n .

When Offered (Offered fall semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 2210, MATH 2250 and MATH 3205.

AND

MATH4205 - Analysis 3: Undergraduate Topics in Analysis

Credits: 3

Special topics in analysis. Content varies. May be repeated for credit.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 4200.

OR

Pair 2

MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed COSC 4340.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

AND

MATH4440 - Introduction to Partial Differential Equations I

Credits: 3

Survey of analytic methods for solving partial differential equations. Topics include: method of characteristics for solving first-order linear and quasi-linear equations; classification of second-order equations and canonical forms; background to separation of variables with applications; transform methods and Green functions; elliptic equations; heat and wave equations in one dimension.

Prerequisite: grade of C or better in MATH 2210 and MATH 2310.

OR

Pair 3

MATH4510 - Algebra II: Introduction to Group Theory

Credits: 3

An introduction to the fundamental properties of groups including: binary operations, groups, permutation groups, subgroups, homomorphisms, and quotient groups.

When Offered (Offered spring semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 3500.

AND

MATH4520 - Algebra III: Topics in Abstract Algebra

Credits: 3

Further examples and structure of rings and fields. Finite fields and number fields. Special topics.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 4510.

Breadth Electives

Take **TWO** of the following courses:

MATH3310 - Appl Diff Equations II

Credits: 3

Continues MATH 2310. Includes partial differential equations, Fourier series, boundary value problems, series solutions of ordinary differential equations, linear algebra, linear systems of equations and numerical methods.

Prerequisite: Prerequisites: grade of C or better in MATH 2210 and 2310.

MATH3700 - Combinatorics

Credits: 3

Provides an introduction to combinatorics and combinatorial algorithms, with applications to areas such as computer science and probability. Topics include general counting methods, recurrence relations, generating functions, inclusion-exclusion, partial orders, and graph theory.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2250.

MATH4150 - Secondary School on Campus

Credits: 1-4

Provides prospective teachers opportunity to study mathematics as it relates to the secondary school. Topics may vary from semester to semester. Emphasizes current trends and concerns of secondary school mathematics education.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2205 and concurrent with EDSE 4271.

MATH4230 - Introduction to Complex Analysis

Credits: 3

Develops the theory of functions of one complex variable. Topics include the algebra and geometry of complex numbers, functions of one complex variable, elementary functions, limits, continuity and differentiation. Differentiability leads to the Cauchy theorem, integral theorems, power series, residue theory and applications to integration theory and boundary value problems.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2210.

MATH4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed STAT 4255.

Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

MATH4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributionsIntroduces theory of estimation and hypothesis testing

Cross Listed STAT 4265.

Former Course Number [4260, 4010]

Prerequisite: MATH 4255.

MATH4300 - Introduction to Mathematical Modeling

Credits: 3

A model of a real world problem captures the essential features of the problem, while scaling it down to a manageable size. In this course, symbolic tools and mathematical techniques are used to construct, analyze and interpret various mathematical models which arise from problems in the physical, biological and social sciences.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250 or MATH 2310.

MATH4440 - Introduction to Partial Differential Equations I

Credits: 3

Survey of analytic methods for solving partial differential equations. Topics include: method of characteristics for solving first-order linear and quasi-linear equations; classification of second-order equations and canonical forms; background to separation of variables with applications; transform methods and Green functions; elliptic equations; heat and wave equations in one dimension.

Prerequisite: grade of C or better in MATH 2210 and MATH 2310.

MATH4500 - Matrix Theory

Credits: 3

Continuation from MATH 2250 of the study of matrices, an important tool in statistics, physics, engineering and applied mathematics in general. Concentrates on the structure of matrices, including diagonalizability; symmetric, hermitian and unitary matrices; and canonical forms such as Jordan form.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250.

OR

any 3000 or 4000 mathematics or statistics course allowed as an elective in the mathematics program.

Secondary Modern Languages Education with Concurrent Major in French, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Modern Language Education and a concurrent major in French (Formerly titled: Foreign Language). It prepares students to teach French in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2040 with a minimum grade of C or higher is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3276 - Subject Matter Specific Methods I: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Modern Language Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4276.
(3 credits required)

EDSE4276 - Subject Matter Specific Methods II: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Modern Language Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3276/EDCI 5250.
(4 credits required)

Residency (Offered Spring Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.
(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3
The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Concurrent Major Courses

At least 21 hours must be upper-division (3000-level or higher)

French Core

FREN2040 - Second Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2015 Code U5H

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP 2003-2014 Code U3CH, U3G

Prerequisite: FREN 2030.

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

Take ONE of the following:

FREN2130 - Contemporary French Culture

Credits: 3

Designed as an introduction to contemporary French culture. It gives students an in-depth insight into contemporary French life. It also deals with issues affecting the French-speaking world in general: Quebec, Africa, New Caledonia, Switzerland, Monaco, etc.

USP 2015 Code U5H

Prerequisite: FREN 1020 or equivalent.

OR

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

Major Related Courses

EDCI4350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Focus is on the classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 5350.

EDCI4450 - Issues In Multicultural Education

Credits: 3

Provides the future teacher and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group.

Dual Listed EDCI 5450.

Former Course Number [4250]

Prerequisite: students must have at least 12 credit hours in education classes.

Take ONE of the following:

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

OR

THEA1100 - Acting I

Credits: 3

Acting I introduces students to the study of the actor's process with an emphasis on analyzing, rehearsing and performing scenes in front of an audience. The student will be introduced to exercises which promote creative expression. Scene work and scoring will focus on contemporary realism.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

Restricted Theater majors or permission of instructor

Take ONE of the following:

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480.

OR

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

Foundations of Language

12 credits of FREN or courses related to the history, art or political science of the francophone world (consult your advisor). For those completing the ESL endorsement, six of these hours can be earned with EDCI 5430 and EDCI 5440 or with a study abroad in a French-speaking country. Study abroad is strongly recommended.

Electives

15 Credits of FREN Upper Division Electives at 3000+ Level

Language Proficiency Requirement

Completion of the OPI and WPT via the American Council on the Teaching of Foreign Languages (ACTFL) with a score of Advanced Low or better prior to enrollment in EDSE 4276.

Secondary Modern Languages Education with Concurrent Major in German, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Modern Language Education and a concurrent major in German (Formerly titled: Foreign Language). It prepares students to teach German in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3276 - Subject Matter Specific Methods I: Secondary Modern Language Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Modern Language Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4276.

(3 credits required)

EDSE4276 - Subject Matter Specific Methods II: Secondary Modern Language Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Modern Language Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3276/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Concurrent Major Courses

At least 24 hours must be upper-division (3000-level or higher)

German Core

GERM2040 - Second Year German II

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5H

Prerequisite: GERM 2030 or three years of high school German.

GERM3050 - Third Year German I

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: GERM 2040.

GERM3060 - Introduction to German Literature

Credits: 3

Introduces literature of Germany. Analyzes major literary types and elements of criticism. Emphasizes compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Prerequisite: GERM 3050.

Major Related Courses

EDCI4350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Focus is on the classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 5350.

EDCI4450 - Issues In Multicultural Education

Credits: 3

Provides the future teacher and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group.

Dual Listed EDCI 5450.

Former Course Number [4250]

Prerequisite: students must have at least 12 credit hours in education classes.

Take ONE of the following:

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Concurrent Major Courses

At least 27 hours must be upper-division (3000-level or higher)

Spanish Core

SPAN2040 - Second Year Spanish II

Credits: 4

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2015 Code U5H

Prerequisite: SPAN 2030 or three years of high school Spanish.

SPAN3060 - Third Year Spanish II

Credits: 3

Intensively reviews grammar and composition-skill development. Also emphasizes specialized lexicons, written and oral translation, as well as conversational fluency.

A&S College Core 2015 ASD

Prerequisite: SPAN 3050.

SPAN3140 - Introduction to Literature

Credits: 3

This course introduces literary analysis by focusing on different genres from the Hispanic tradition. The course is focused on developing interpretation strategies and it introduces key elements of literary criticism. Students are required to produce complex ideas about the texts, give oral presentations, and write essays on the texts read.

USP 2003-2014 Code U3CH,U3G

A&S College Core 2015 ASG

Prerequisite: SPAN 2140 or SPAN 3030 or SPAN 3050.

SPAN3300 - Introduction to Hispanic Linguistics

Credits: 3

Max Credit (Max. 9)

Overview of basic concepts and approaches to linguistics with examples from and emphasis on Spanish description. Basic concepts in semiotics, formal and non-formal linguistics, core areas in linguistics (phonetics & phonology, morphosyntax, semantics & pragmatics), as well as an overview of subfields of linguistics (psycholinguistics, sociolinguistics, computational linguistics, etc.).

Former Course Number [4310]

Prerequisite: SPAN 3030 or SPAN 3050 or equivalent proficiency

Take ONE of the following:

SPAN3030 - Spanish for Heritage Speakers

Credits: 3

Stresses academic use of the Spanish language by native or near-native speakers, through composition, cultural readings, oral presentations, and digital interactions. This class will prepare native and near-native speakers for Spanish upper division classes. It will review spelling rules, grammatical terminology, dialectal and register differences, and academic vocabulary.

USP 2015 Code U5C2

Prerequisite: SPAN 2040 and consent of instructor.

OR

SPAN3050 - Third Year Spanish I

Credits: 3

Stresses usage of the language through composition, conversation, oral presentation and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: SPAN 2040.

Take ONE of the following:

SPAN4080 - Spanish Advanced Grammar

Credits: 3

Max Credit (Max. 9)

Intensive practice of Spanish grammar through syntactic analysis to raise language awareness. Study of Spanish grammar in connection with information theory and semantic roles, with a focus on complex sentences and different phenomena such as preposition requirements, word order, emphatic structures, etc.

Dual Listed SPAN 5080.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

OR

SPAN4090 - Spanish Phonetics and Phonology

Credits: 3

Provides a description of Spanish sound system and general survey of the language's major dialectical variations. Will touch upon acoustic phonetics and focus on articulatory phonetics. Practice of phonological processes that affect the pronunciation of the language. It includes an explanation of main sources for a foreign accent in Spanish.

Dual Listed SPAN 5090.

Prerequisite: SPAN 3300 or LANG 4750 or consent of instructor.

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

Foundations of Language

12 credits of SPAN or courses related to the history, art or political science of the Hispanophone world (consult your advisor). For those completing the ESL endorsement, six of these hours can be earned with EDCI 5430 and EDCI 5440 or with a study abroad in a Spanish-speaking country. Study abroad is strongly recommended.

Electives

- 12 Credits of SPAN Electives above 2030

Language Proficiency Requirement

Completion of the OPI and WPT via the American Council on the Teaching of Foreign Languages (ACTFL) with a score of Advanced Low or better prior to enrollment in EDSE 4276.

Secondary Modern Languages Education, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Secondary education programs are offered in French, German, and Spanish (Formerly titled: Foreign Language). A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options.

Modern Language Secondary Education programs require that all candidates score at the *Advanced Low* level or higher on the American Council of Teachers and Foreign Language Oral Proficiency Interview (OPI) and the Writing Proficiency Test (WPT) in their target language in order to be admitted to the Methods II course.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

All Professional Education requirements must be completed with a grade of C or higher.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3276 - Subject Matter Specific Methods I: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Modern Language Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4276.

EDSE4276 - Subject Matter Specific Methods II: Secondary Modern Language Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Modern Language Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3276/EDCI 5250.

Residency (Offered Spring Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Concurrent Majors:

Secondary Modern Languages Education with Concurrent Major in French, B.A.

Secondary Modern Languages Education with Concurrent Major in German, B.A.

Secondary Modern Languages Education with Concurrent Major in Spanish, B.A.

Secondary Science - Biological Science Education with Concurrent Major in Biology (BSSE), B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Biology Education and a concurrent major in Biology. It prepares students to teach Biology in grades 6-12.

A concurrent major ensures that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3
Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3
Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484,

EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Major Content

Required Biology Courses

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Plus Choose Two:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

Required Additional Coursework

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

OR

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course

emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

OR

- LIFE2100 - Intro Research and Analysis Credits: 4
Note: LIFE 2100 can only be applied for one of the above (4) credit options.
Earth/Space Science (3-4 credits)

Elective Courses

9 hours - minimum. (with 6 hours of 3000-level or above and at least one course with an environmental focus); courses must come from ANVS, BOT, ENTO, KIN, LIFE, MICR, MOLB, PLNT, RNEW, or ZOO.

Secondary Science - Chemistry Education with Concurrent Major in Chemistry (CHSE), B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Chemistry Education and a concurrent major in Chemistry. It prepares students to teach Chemistry in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.
(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.
(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses,

successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Chemistry Requirements

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

OR

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and

organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

OR

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

OR

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

OR

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for

only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

ADDITIONAL REQUIRED COURSEWORK:

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

OR

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Upper Division Elective Courses

6-Hours - minimum (6 hours of 3000-level or above)

Courses must come from:

- CHEM, LIFE, or MOLB

*Note-CHEM 4230 is highly recommended

Secondary Science - Earth Science Education with Concurrent Major in Environmental Systems Science (ESSE), B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Earth Science Education and a concurrent major in Environmental Systems Science. It prepares students to teach Earth Science in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.
(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.
(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.
(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the

assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Environmental Systems Science Foundations

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

or (3) credit approved equivalent

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

OR

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

OR

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy

relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

OR

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ESS2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed GEOL 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

OR

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

ESS4950 - Exploring the Earth System

Credits: 3

Conduct critical and interdisciplinary assessments on complex topics addressing physical, biological, and human components of the Earth System. Through multiple written, oral, and digital communication products, students will

work independently and collaboratively to critically review existing literature, define knowledge gaps, analyze evidence, and synthesize results for multiple audiences.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ESS 1000 and either ESS 3480 or ENR 3450.

ESS4970 - Internship in Earth System Science

Credits: 1-6

Max Credit (Max. 6)

Offers students an individualized opportunity to connect their academic training, professional experiences, and future goals. Students must first consult with their Haub School advisor and have completed and appropriate internship, professional and/ or applied experience that provides exposure to complex environmental systems, scientific practices, and relevant interactions in the professional world.

Prerequisite: ESS 1000.

Spheres

Other options might be available in some categories

1. Anthrosphere - Choose 1 Course

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

2. Atmosphere - Choose 1 Course

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

ATSC2200 - Severe and Unusual Weather

Credits: 3

A nontechnical course on severe and unusual weather events that occur around the globe. The focus of the course is on a wide range of weather events that have profound impacts on societies, economics, and cultures, and the material is presented in a qualitative manner such that is highly accessible by students coming from all backgrounds.

USP 2003-2014 Code U5PN

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

3. Biosphere - Choose 1 Course

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).
Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

OR complete all three of the following

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

4. Lithosphere Environmental Change - Choose 1 Course

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological,

geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

5. Lithosphere Hydrology & Surface Processes - Choose 1 Course

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

Skills & Tools

Data Analysis - Choose 1 course

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP 2003-2014 Code [I< >(none)]

Prerequisite: One USP designated science course with lab.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

GIS/Remote Sensing - Choose 1 course

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing

forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

Additional Math/Science Courses

*Note: The general B.S. in ESS will allow for students to complete STAT 2050 (or 2070) **or** MATH 2200 and either PHYS 1050 **or** PHYS 1110. However, the ESSE program will require MATH 2200 + PHYS 1110 to meet additional teaching endorsement requirements in other sciences.

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

Note: MATH1405 is a prerequisite to MATH2200

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

Electives

A variable amount of elective courses is required to meet the minimum requirement. Work with your academic advisor to select appropriate elective courses. 13+ credit hours of electives are required to meet the UW minimum program requirement. Student enrolled in the ESSE concurrent major program are highly encouraged to take STAT 2050 or STAT 2070 as an elective course. This concurrent major program meets the 18+ credit hours that ESS requires for a minor.

Secondary Science - Earth Science Education with Concurrent Major in Geology (GSSE), B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfill University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Earth Science Education and a concurrent major in Geology. It prepares students to teach Earth Science in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

*A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.
A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.*

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.
(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.
(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.
(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the

assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Required Geology Courses

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

OR

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

OR

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)

Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

(Spring only course, MUST have 26 GEOL hrs completed before enrolling)

Required Additional Courses

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

ASTR1050 - Survey of Astronomy

Credits: 4

Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

Elective Courses:

Choose 6 courses from the following recommended list to obtain the minimum required hours.

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL2050 - Principles of Paleontology

Credits: 4

Max Credit 4

Examines principles, biological and geological, that underlie general study of ancient life on Earth. Includes interactions of evolutionary, taphonomic, and paleogeographic concepts within various approaches to paleobiology and systematic paleontology. Optional field trip.

When Offered (Normally offered spring semester)

Prerequisite: 1000-level GEOL or LIFE 1000 or LIFE 1010

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. It covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetics methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources, and environmental issues.

Dual Listed GEOL 5835.
Former Course Number [GEOL 4970]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210 and MATH 2200.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

Secondary Science - Physics Education with Concurrent Major in Physics (PHSE), B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on

developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Physics Education and a concurrent major in Physics. It prepares students to teach Physics in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Semester Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

(4 credits required)

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Major Content

Physics Core

Introductory Courses

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

OR

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

OR

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Choose 1 Course

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body

radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR2320 - General Astronomy II

Credits: 4

Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS3640 - Modern Electronics and Experimental Techniques

Credits: 4

Introduced to analog and digital circuits/devices and computer interfacing with laboratory equipment and experiments. Includes computer programming, the analysis of experimental data, and report writing. Apply the skills developed in this class to interface with and control representative instrumentation used in experimental physics laboratories.

Prerequisite: PHYS 2320.

Choose 1 Option

Option A

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

Option B

ASTR1050 - Survey of Astronomy

Credits: 4

Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

AND

ASTR2320 - General Astronomy II

Credits: 4

Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

Option C

ASTR1000 - Descriptive Astronomy

Credits: 3

Covers essential features of the solar system, stellar astronomy and time measurement.

USP 2003-2014 Code U5PN, U3SE

USP 2015 Code U5PN

A&S College Core 2015 Students who have taken ASTR 2310 may not earn credit in ASTR 1000, and not more than 4 credit hours may be earned by taking both ASTR 1000 and ASTR 1050.

AND

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

Electives

- PHYS Elective, 2000-level or higher, Minimum 2 Credits
- PHYS Elective, 3000-level or higher, Minimum 3 Credits

4000 Level Courses

PHYS4210 - Classical Mechanics I

Credits: 3

First semester of a two-course sequence. Presents classical mechanics at intermediate level. Begins with elementary Newtonian mechanics and builds step by step into analytic mechanics. Includes simple harmonic motion of particles in one, two or three dimensions, gravitation; introduction to rigid-body motion; and introduction to Lagrangian and Hamiltonian Mechanics.

When Offered (Normally offered spring semester)

Prerequisite: PHYS 2310 or equivalent, MATH 2210 or equivalent.

PHYS4310 - Quantum Mechanics

Credits: 3

Studies fundamental concepts of quantum theory.

When Offered (Normally offered fall semester)

Prerequisite: P HYS 4 210.

OR

ASTR4610 - Introduction to Astrophysics

Credits: 3

Includes astrophysical sources of radiation, radiation transport, nonequilibrium processes, stellar atmospheres, stellar interiors and the interstellar medium.

Prerequisite: ASTR 2310, PHYS 2310 and concurrent registration in PHYS 4210 and PHYS 4410.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

Required Additional Science Courses

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ASTR1050 - Survey of Astronomy

Credits: 4

Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

OR

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

OR

PHYS3000 - Methods of Physics

Credits: 4

Provides introduction to mathematical methods and modern scientific computational tools used in physics/ astronomy. Topics include introduction to Python or linux operating system and use LabView software to run laboratory apparatus. Course examples will draw upon material in PHYS 1210/PHYS 1220 to help build fluency in the first year physics material.

Prerequisite: PHYS 1220.

Required Mathematics Courses

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and

applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Secondary Science Education, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Concurrent majors in Science Education are offered in Biology, Chemistry, Environmental System Science, Geology, and Physics.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. A grade of C or better must be earned in each course included in the major content. A minimum GPA of 2.75 in major content courses is required.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3
Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.
(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.
(4 credits required)

Residency (Offered Spring Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Concurrent Majors

- Secondary Science - Biological Science Education with Concurrent Major in Biology (BSSE), B.A.
- Secondary Science - Chemistry Education with Concurrent Major in Chemistry (CHSE), B.A.
- Secondary Science - Earth Science Education with Concurrent Major in Environmental Systems Science (ESSE), B.A.
- Secondary Science - Earth Science Education with Concurrent Major in Geology (GSSE), B.A.
- Secondary Science - Physics Education with Concurrent Major in Physics (PHSE), B.A.

Secondary Social Studies Education with Concurrent Major in History, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Social Studies Education and a concurrent major in History. It prepares students to teach Social Studies in grades 6-12.

A concurrent major will ensure that graduates are "highly qualified" teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

All Professional Education requirements must be completed with a grade of C or higher.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3273 - Subject Matter Specific Methods I: Secondary Social Studies Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Secondary Social Studies Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4273.

EDSE4273 - Subject Matter Specific Methods II: Secondary Social Studies Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Social Studies Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3273/EDCI 5250.

Residency

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

History Core Requirements - 36 Credit Hours Minimum

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

OR

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

OR

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

- HIST 2000 level and above elective Credits: 3

HIST3020 - Historical Methods

Credits: 3

An introduction to the concepts, methods, and techniques used by historians. The main emphasis will be on methods of historical research and analysis, demonstrated through writing. Students will write a number of short papers building skills in various areas of research, analysis, and argumentation, and one longer paper reflecting individual research. Total pages for the semester: 30-45.

USP 2003-2014 Code U3L, U3WB

Former Course Number [4020]

Prerequisite: junior standing, 12 hours of HIST, and COM1.

- Native American content course (NAIS/HIST) Credits: 3
- 3000 or 4000-level HIST electives Credits: 12

Required Additional Content - 27 Credit Hours Minimum

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

OR

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

- ECON elective Credits: 3
- PSYC elective Credits: 3
- SOC or ANTH elective Credits: 3
- Single foreign language Credits: 8

Secondary Social Studies Education with Concurrent Major in Political Science, B.A.

This degree program leads to initial teaching licensure (leading to teaching certification) with secondary concurrent majors.

University Studies Program Requirements

Several Professional Education and Core Content courses fulfil University Studies Program requirements.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Professional Education Requirements

Graduates of this program earn a Bachelor's Degree in Social Studies Education and a concurrent major in Political Science. It prepares students to teach Social Studies in grades 6-12.

A concurrent major will ensure that graduates are highly qualified teachers and will expand career possibilities.

A minimum of 120 hours are required to obtain a UW baccalaureate degree, though, each program's hours will vary depending on major and additional options. All major courses must be passed with a grade of C or better. A minimum GPA of 2.75 in major content courses is required. A minimum of 42 credits must be upper-division.

An initial background check must be completed prior to starting any field or practicum experience. Student fees cover the cost of this initial background check so work with your College of Education advisor for details.

Foundations

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

ITEC2360 - Teaching with Technology

Credits: 3

Introduction to effective utilization of computers and other instructional technologies for instruction; software/hardware selection; integrated, professional and instructional applications as applied to all areas and levels of P-12 education.

USP 2003-2014 Code U3L

Prerequisite: minimum 2.500 cumulative UW GPA.

Completion of EDST 2450 with a minimum grade of C or better is a prerequisite for the following courses:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

A minimum 2.75 UW cumulative GPA is required for registration in EDST 3100 and EDST 3101.

A copy of your valid Wyoming Substitute Teaching Permit must be on file with the Teacher Preparation and Advising Office no later than the first day of class.

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

Assessment

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

Methods (Offered Fall Only)

EDSE3273 - Subject Matter Specific Methods I: Secondary Social Studies Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Secondary Social Studies Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4273.

EDSE4273 - Subject Matter Specific Methods II: Secondary Social Studies Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Social Studies Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3273/EDCI 5250.

Residency

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

Political Science Core Requirements - 33 Credit Hours Minimum

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

OR

POLS1250 - Introduction to Comparative Government

Credits: 3

How do foreign states deal with the numerous challenges to their stability? Do institutions affect a state's approach to solving different problems? How do these different approaches affect policy? This course introduces students to different styles of governance and compare countries from around the world with reference to their political ideology.

Cross Listed INST 1250.

A&S College Core 2015 ASG

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

POLS2460 - Introduction to Political Philosophy

Credits: 3

Surveys history of Western political thought including study of concepts and approaches to political philosophy.

When Offered (Offered once a year)

OR

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

- POLS 48XX Credits: 3
- POLS electives Credits: 18
 - At least 9 hours of the 18 total must be 3000 or 4000-level
 - At least 6 hours of the 18 total must be related to the U.S. Constitution
 - Highly recommend POLS 4100 and 4110

Required Additional Content - 36 Credit Hours Minimum

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester
USP 2003-2014 Code U3V
USP 2015 Code U5V

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester
USP 2003-2014 Code U3V
USP 2015 Code U5V

Residency (Offered Spring Semester Only)

EDSE4500 - Residency in Teaching

Credits: 1-16
Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.
(12 credits required)

EDSE4550 - Residency Applications and Synthesis

Credits: 3
The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And
A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)
Corequisite: EDSE 4500

Major Content

Concurrent majors in social studies education are offered in History (120 minimum credits total), and Political Science (120 minimum credits total).

Majors must maintain a G.P.A. of 2.500 in major content courses and earn a grade of C or better in all content classes.

Concurrent Majors

- Secondary Social Studies Education with Concurrent Major in History, B.A.
- Secondary Social Studies Education with Concurrent Major in Political Science, B.A.

Minor

Early Childhood Education Options

The College of Education provides a few different options in early childhood at the University of Wyoming.

Early Childhood Education minor:

Students in related bachelor's degree programs take an additional 22 credits (7 or 8 courses) of specified coursework to complete and earn the minor. This minor does not need to include an option from the following lists, but it can. If a student chooses an internship as the elective course, then that student is eligible for option A or B below. (The College of Education teaches 15-18 of the required 22 credits)

EDEC1020 - Introduction to Early Childhood Education

Credits: 3

Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

OR

PSYC2300 - Developmental Psychology

Credits: 3

Introduces psychological development, including age-related changes in thinking, emotion, and behavior. Major theories, methodologies, and empirical discoveries are surveyed in an exploration of developments beginning with conception, with emphasis on social, affective, and cognitive developments in childhood and infancy and their implications for policy and practice.

When Offered (Normally offered spring semester)

Prerequisite: A grade of C or better in PSYC 1000.

AND

FCSC2122 - Child Development Lab

Credits: 1

Laboratory observation course designed for students with a background in child development theory. Students learn child observation techniques, how to write laboratory reports, and how to apply them to evaluating a child's development in all domains.

Prerequisite: PSYC 2300.

EDEC2000 - Engaging Families in Early Childhood Settings

Credits: 3

Focus on the philosophical, psychological, and sociocultural aspects of working with families and children in early childhood educational, home, and community settings.

EDEC3000 - Observing Young Children

Credits: 3

The general goal of the course is to introduce students to observation and recording techniques appropriate for assessing the growth and development of young children in the school setting. A secondary goal is to understand how observation and recording techniques can facilitate curriculum planning and parent-teacher conferences.

Prerequisite: EDEC 1020 and FCSC 2121.

EDEC3220 - Curriculum and Learning Environments in Early Childhood Education

Credits: 3

Early childhood curriculum and instructional practices will be reviewed, developed, and integrated with a focus on the role of learning environments, materials and play in supporting the teaching and learning process. Students have the opportunity to design meaningful learning experiences through practicum.

Former Course Number [EDCI 3220]

Prerequisite: EDEC 1020 and FCSC 2121 (or both PSYC 2300 and FCSC 2122).

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

One approved elective (3 credits or more) from the list below:

*Note some course options taken at community colleges can meet this requirement (example EDEC 1100, 1105 or 1300).

*If students enrolled in the minor are also planning on getting their B-5 licensure or B-8 endorsement, the internship courses applicable to each option should be selected.

EDEC2275 - Literature for Young Children

Credits: 3

Introduce major genres and conventions. Will develop critical skills for reading and writing about children's literature and culture; interpretive skills to enrich the understanding of literature for readers

USP 2003-2014 Code U3CH

Prerequisite: ENGL 1010 and sophomore standing.

EDEL2280 - Literature for Children

Credits: 3

A survey course, the purpose of which is to prepare prospective elementary teachers and library-media specialists to provide knowledgeable service in the use of print and non-print materials for children. Includes study of evaluative criteria, wide reading, viewing and listening as well as discussion of literature for children.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

Former Course Number [LIBS 2280]

Prerequisite: successful completion of ENGL 1010, sophomore standing, education major.

FCSC2131 - Family Relations

Credits: 3

Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3129 - Social Development in Young Children

Credits: 3

Designed to provide professional child development and early childhood education majors with an opportunity to learn more about how to encourage healthy social development in young children. In addition, topics of self-esteem, emotional regulation, and secure attachment will be discussed in depth with regards to how they affect overall development.

Prerequisite: FCSC 2121 or PSYC 2300.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

EDCI4140 - Storytelling

Credits: 3

An investigation of storytelling as an art and as an aid to instruction. Emphasis is on literature for preschool and elementary age children.

Dual Listed EDCI 5140.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [LIBS 4140]

Prerequisite: junior standing or EDCI 4120 is recommended.

EDEC4350 - Health Management Issues in Early Education

Credits: 3

Provides the student the opportunity to examine the implications of a child's health status on his/her personal, educational, social and cognitive development. Provides personnel working closely with the young child with disabilities and his/her family an understanding of the issues related to health concerns and a framework for intervention planning. Special emphasis is placed on concerns specific to the child in a day care, preschool or other school setting.

Prerequisite: junior standing and consent of the instructor.

EDEC5220 - Children with Disabilities

Credits: 3

Purpose is to introduce students to the effects of a disability on the development of the young child. Recent research in the area of early childhood special education will be examined. Educational implications will be emphasized.

Prerequisite: Bachelor's degree in education.

SPPA2110 - American Sign Language I

Credits: 4

Basic comprehension and expression of American Sign Language (ASL), the language used by the Deaf community in the United States. ASL vocabulary, grammar, and pragmatics are taught through lecture, conversation, and storytelling. The direct experience method (using ASL with no voice) is utilized to enhance the learning process.

USP 2015 Code U5H

Former Course Number [4100]

AND

SPPA2120 - American Sign Language II

Credits: 4

Second level of ASL comprehension and expression. ASL vocabulary, grammar, and pragmatics, along with increased fluency, are taught through lecture, conversation, and storytelling. Translation from English to ASL is addressed.

USP 2015 Code U5H

Former Course Number [4120]

Prerequisite: SPPA 2110.

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

Minor Option 1: Early Childhood Education B-5 licensure:

Students in the Human Development and Family Sciences (HDFS) degree (and other related degree options) take additional credits/courses (6 credits from either EDEC 4580/EDEC 5580 or FCSC 4130 internship *this internship could be included within the minor program making it +3 total credits) to earn licensure through several pathways (see below).

**Additional to the stand alone minor but must be enrolled in minor. (Can lead to PTSB initial licensure)*

- i. HDFS students minor in early childhood leads (includes 6 credits of internship - offered by FCS) to B-5 licensure
- ii. Professional Child Development (online degree) - no minor because all minor courses are required for major (includes 6 credits of internship offered - by FCS) to B-5 licensure
- iii. Other related majors complete the minor and internship EDEC 4580 for B-5 licensure

Minor Option 2: Early Childhood Education B-8 endorsement:

Students in the Elementary Education degree program take an additional 7 courses to earn this add on endorsement. *Additional to the stand alone minor but must be enrolled in minor.

- i. Elem Ed students who student teach in a K-3 setting and complete all minor coursework and the internship EDEC 4580 (6 credits) are eligible to earn the endorsement; 7 courses

Non-degree seeking student Early Childhood Education options:

There are two options for non-degree seeking students who already hold a bachelor's degree. These are noted on the ECE Minor ACALOG page, but these students are not undergraduates and not enrolled in the minor.

- **B-8 endorsement** for any non-degree seeking student who already holds an elementary K-6 license can take the required 19 credits of coursework and a 6-credit internship EDEC 4580 to qualify for a B-8 endorsement.
- **B-5 initial teacher license** option for non degree seeking students holding a bachelor's degree in a related area (Human Development, Psychology, Communication Disorders, etc) and complete an internship EDEC 4580 in a B-5 setting. *(Can lead to PTSB initial licensure)*

Early Childhood Special Education B-5 endorsement:

Post-bac graduate certificate students who already have an Elementary Education, Family Consumer Sciences/Child Development, or other related degree options take an additional 8 courses (26 credits) to earn this add on endorsement. *(Can lead to PTSB certification)*

This is a pre-k program and does not prepare candidates to work in kindergarten or primary grade classrooms.

For more information, visit the web page (www.uwyo.edu/ste/early-childhood-education/early-childhood-special-education.html)

EDEC5220 - Children with Disabilities

Credits: 3

Purpose is to introduce students to the effects of a disability on the development of the young child. Recent research in the area of early childhood special education will be examined. Educational implications will be emphasized.

Prerequisite: Bachelor's degree in education.

EDEC5230 - Curriculum and Materials for Young Children with Disabilities

Credits: 3

Involves the study and development of curriculum strategies appropriate for the child with disabilities from birth through age five.

Prerequisite: graduate standing.

EDEC5240 - Evaluation of Young Children with Disabilities

Credits: 3

Prepares students to select, administer, and interpret evaluation tools appropriate for planning with young children with disability.

Prerequisite: graduate standing.

EDEC5250 - Legal Issues in Early Childhood Special Education

Credits: 2

Introduces students to the legal issues surrounding the education of young children with disabilities. The intent and implications of P. L. 99457 will be explored and examined to better assist the specialist in serving children with disabilities and their families.

Prerequisite: EDEC 5220.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

EDEC4350 - Health Management Issues in Early Education

Credits: 3

Provides the student the opportunity to examine the implications of a child's health status on his/her personal, educational, social and cognitive development. Provides personnel working closely with the young child with disabilities and his/her family an understanding of the issues related to health concerns and a framework for intervention planning. Special emphasis is placed on concerns specific to the child in a day care, preschool or other school setting.

Prerequisite: junior standing and consent of the instructor.

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

EDEC5580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 4580.

Prerequisite: permission of the instructor is required.

Additional Information:

EDEC 1020 must be completed with C or higher before students are able to declare the ECE minor.

Graduate

Counseling, M.S.

The MS degree in Counseling program offers concentrations in school counseling and mental health counseling prepares you to become certified as a school counselor or with the training needed to become a provisionally licensed mental health counselor.

Options

- Counseling, M.S., Concentration in Mental Health Counseling
- Counseling, M.S., Concentration in School Counseling

Curriculum Requirements

The master of science degree in counseling is a 61 credit hours program. Full-time students can complete their chosen specialty in a 2-year period if they begin courses during the summer of their initial year and complete between 6-9 credit hours each summer and 9-12 credit hours each spring and fall.

Required Courses (49 Credit Hours)

- CNSL 5060 Counseling Ethics and Professional Issues (3 credit hours)
- CNSL 5110 Group Procedures (3 credit hours)
- 5140 Counseling and Addictions(3 credit hours)
- 5170 Career Across the Lifespan(3 credit hours)
- 5175 Human Growth and Development (3 credit hours)
- 5180 Assessment in Counseling (3 credit hours)
- 5200 Couples and Family Theory and Application (3 credit hours)
- 5210 Group Experience (1 credit hours)
- 5310 Pre-Practicum in Counseling (3 credit hours)
- 5320 Practicum in Counseling - 100 clock hours, 40 direct client hours (3 credit hours)
- 5330 Counseling Children and Adolescents (3 credit hours)
- 5340 Play Therapy (3 credit hours)
- 5350 Multicultural Counseling (3 credit hours)
- 5630 Advanced Issues in Counselor Preparation (3 credit hours)
- 5640 Diagnosis, Psychopathology and Psychopharmacology (3 credit hours)
- 5650 Counseling Theories (3 credit hours)
- EDRE 5530 Introduction to Research (3 credit hours)

Specialization Area Courses (12 Credit Hours)

School Counseling

- CNSL 5120 School Counseling Strategies and Techniques (3 credit hours)
- CNSL 5125 School Counseling II (3 credit hours)
- CNSL 5580 Supervised Internship (600 clock hours, 240 direct clienthours) (6 credit hours)

Community Mental Health Counseling

- CNSL 5130 Mental Health Counseling (3 credit hours)
- CNSL 5150 Mental Health Counseling II (3 credit hours)

Additional Information:

The UW counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and is offered on campus in Laramie, or as an intensive weekend program for working professionals at UW Casper.

The UW Mental Health Counseling Program

Through small classes and clinical experiences, UW's mental health program prepares you to serve in settings that include community agencies, integrated delivery systems, hospitals, addictions treatment centers and private practice.

The UW School Counseling Program

The school counseling program equips you with the knowledge and skills to become a school leader who works with students, teachers, administrators, parents and other community members to promote culturally relevant P-12 student growth. The school counseling program allows you to earn this degree with no previous P-12 experience.

About Counseling

In UW's highly regarded counseling program, you will acquire the theoretical foundation and practical experience necessary to work with a wide-range of clients, from P-12 students to adults, families and couples.

As a counseling graduate student, you will become part of a cohort community with whom you'll study, learn and grow. You will also work with an award-winning team of faculty, who will guide you toward developing your

counseling identity as you progress through your practicum and supervised internship. By the time you graduate, you will be well-prepared to step into a counseling position in any organization.

Counseling, M.S., Concentration in Mental Health Counseling

The MS degree in Counseling program offers concentrations in school counseling and mental health counseling prepares you to become certified as a school counselor or with the training needed to become a provisionally licensed mental health counselor.

Program Requirements

Core Courses

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3

Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

CNSL5110 - Group Procedures

Credits: 3

Designed as an introduction to group work used in various organizational settings. Basic group techniques and procedures are covered using lecture/ discussion methods, video, observation, and participation in practicing group leadership skills. Participation in a group experience during the course is required.

Prerequisite: CNSL 4520/CNSL 5520, six semester hours of education and/or psychology, consent of instructor, and graduate standing.

CNSL5140 - Counseling & Addictions

Credits: 3

Focuses on students acquiring specialized knowledge of assessment and multi-disciplinary treatment of chemical and other addictions.

Prerequisite: six hours in administration of justice, psychology, sociology, or social work at the 4000 or 5000 level.

CNSL5170 - Counseling and Career Across the Lifespan

Credits: 3

Offers an overview of human lifespan functioning with a primary focus on psychosocial development and counseling and career development across the lifespan. Additionally, this course presents the opportunity to examine the role of career and its influences on personal development.

CNSL5175 - Human Growth and Development

Credits: 3

Provides an understanding of the nature and needs of individuals at all developmental levels, across the entire lifespan, and in diverse multicultural contexts through addressing theories of individual and family development, transitions across the life span, theories of learning, personality development, and neurobiological behavior.

Prerequisite: Instructor permission and bachelors degree.

CNSL5180 - Assessment in CNSL

Credits: 3

Emphasis is on counselor development for facilitating client self-understanding through the application of various assessment procedures and knowledge about educational information systems and tools.

Prerequisite: graduate standing, 15 hours in education and/or behavioral sciences.

CNSL5200 - Couple and Family Theory

Credits: 3

Provides students with a foundation in conceptualizing and working with couple and family systems. Areas to be addressed include the history of couple and family counseling, ethical issues, professional orientation and an introduction to major systems theories. Participants are expected to explore their own family of origin.

Prerequisite: admission to program.

CNSL5210 - Group Experience

Credits: 1

Designed to provide a structured growth group experience through both in-class experience and reading. It is designed for students involved in human relationship fields. In-class groups are led by advanced group counseling students under the supervision of the faculty instructor.

Prerequisite: graduate standing and consent of instructor.

CNSL5310 - Pre-Practicum

Credits: 3

The first semester of a one-year sequence focused on learning, developing and practicing the fundamental process of counseling. Students do role-playing and have supervised experience with clients in a laboratory setting. Individual supervision is provided. Individual, live and observation of supervision is extensive.

Prerequisite: graduate standing, program approval.

CNSL5320 - Practicum

Credits: 3

Second course in a two semester sequence which includes class work, supervised counseling with clients in laboratory, extensive individual, group, live and observational supervision.

Prerequisite: graduate standing, CNSL 5310, program approval.

CNSL5330 - Counseling Children and Adolescents

Credits: 3

Students increase knowledge and skills in the processes of counseling children and adolescents.

Prerequisite: six hours in education and/or behavioral sciences.

CNSL5340 - Play Therapy

Credits: 3

Provides students with an overview of the field of play therapy. The historical roots of play therapy and the importance of play in child development will be explored. Various play therapy theories and techniques for assessment and intervention and professional issues will be surveyed.

Prerequisite: graduate standing or consent of instructor.

CNSL5350 - Multicultural Counseling

Credits: 3

Increases counselor competency and skills with diverse clients.

Prerequisite: admission to the UW counseling program.

CNSL5630 - Trauma-Informed Counseling

Credits: 3

This capstone course helps prepare students to understand and work with clients around trauma issues in mental health and school settings. Previous learning will be reviewed and synthesized with knowledge about trauma-informed care across the lifespan, including psychological first aid. Research-based best practices, counselor wellness, and effective service delivery are emphasized.

Prerequisite: graduate standing.

CNSL5640 - Diagnosis, Psychopathology, and Psychopharmacology

Credits: 3

Introduction to the etiology, prevention, and treatment of mental and emotional disorders. Includes a focus on the skills of biopsychosocial case conceptualization and treatment planning, and multi-axial differential diagnosis using the current edition of the Diagnostic and Statistical Manual. Also addresses basic classifications, indications and contraindications of common pharmacological interventions.

Prerequisite: program consent.

CNSL5650 - Counseling Theories

Credits: 2-3
Max Credit (Max. 3)

Designed to increase understanding of major counseling theories, with an emphasis on the integration of theoretical and philosophical assumptions with personal viewpoints.

Prerequisite: previous or concurrent enrollment in CNSL 4520/CNSL 5520 or equivalent, admission to counseling program, consent of instructor.

EDRE5530 - Introduction To Research

Credits: 3
Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

Core Subtotal: 49 Credits

Mental Health Counseling

CNSL5130 - Mental Health Counseling

Credits: 3
Encompasses specific counseling and professional development issues encountered by licensed counselors working in mental health agencies or private practice. Understanding the nature of the clientele and the issues, strategies for resolving client difficulties, collaborative practice, ethics, advocacy, knowledge and skills related to diversity and social justice are considered.

Prerequisite: enrollment in Counselor Education program, successful completion or enrollment in CNSL 5060, CNSL 5650 and CNSL 5310.

CNSL5150 - Mental Health Counseling II

Credits: 3
Explores the leadership role of the professional counselor within a variety of mental health settings. Areas of application include program development, best practices, management, evaluation, consultation, social justice and supporting client advocacy.

Prerequisite: graduate standing, program admission and CNSL 5130.

CNSL5580 - Supervised Internship

Credits: 1-6
Max Credit (Max. 16)

Provides a capstone clinical experience, preparing graduates to enter the practice of counseling PK-12 schools, mental health settings, and student affairs services in higher education. Students engage in professional counseling activities at approved placement sites.

Prerequisite: graduate standing, CNSL 5310, CNSL 5320 and consent of the designated field setting authority.

Subtotal: 12 Credits

Minimum Total: 61 Hours

Additional Information:

The UW Master of Science degree in Counseling program offers concentrations in school counseling and mental health counseling that will prepare you to help people across the lifespan. Ours is a broad-based program that prepares you to become certified as a school counselor or provides you with the training needed to become a provisionally licensed mental health counselor. The UW counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and is offered on campus in Laramie, or as an intensive weekend program for working professionals at UW Casper.

Counselor Education and Supervision, Ph.D.

The UW Ph.D. program in counselor education and supervision is targeted to students who already hold a master's degree from a CACREP-accredited institution or equivalent and are seeking to become counselor educators and advanced practitioners.

Learning Outcome Areas Advanced Foundations

Ph.D. students with a 48-hour CACREP equivalent Master's degree are required to complete 12 semester hours of courses beyond their Master's preparation (in consultation with their adviser and committee). Ph.D. students with a 60-hour CACREP equivalent Master's program can petition up to 12 hours of their Master's coursework to fulfill this requirement.

Counseling and Supervision

CNSL5340 - Play Therapy

Credits: 3

Provides students with an overview of the field of play therapy. The historical roots of play therapy and the importance of play in child development will be explored. Various play therapy theories and techniques for assessment and intervention and professional issues will be surveyed.

Prerequisite: graduate standing or consent of instructor.

CNSL5860 - Doctoral Practicum in Counselor Education

Credits: 1-8
Max Credit (Max. 8)

Enrollment is limited to five graduate students per instructor. In this practicum, advanced graduate students are given an intensive supervised experience in counseling students over an extended period of time. The actual counseling experience is supplemented by input and evaluation seminars for all enrollees and by supervisory conferences designed to improve sensitivity and skill in counseling.

Prerequisite: admission to the doctorate program in counseling, mastery of basic interviewing and counseling skills, and consent of instructor.

CNSL5865 - Supervision Theory

Credits: 3
Provides students with the theoretical, knowledge and research base of clinical supervision as it relates to the counseling profession.

Prerequisite: CNSL 5860.

CNSL5875 - Doctoral Practicum in Supervision

Credits: 1-6
Max Credit (Max. 6)

Designed to provide the prospective counseling educator or supervisor with an understanding of the learning process in counseling and the supervisory behaviors requisite for improving the competencies and professional growth of counselors. Specialized knowledge, skills, and attitudes related to the act of supervising are supplemented by various methods and techniques such as videotape, films, film-tape synchronization, simulation material, role-playing, group dynamics, communication games, interpersonal recall, interaction and content analysis, and micro-counseling.

Prerequisite: CNSL 5860, graduate standing, and consent of instructor.

Teaching, Leadership and Advocacy

CNSL5871 - Doctoral Seminar I: Professional Identity and Ethics

Credits: 3
The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar I focuses on counselor education identity development and professional ethics for future counselor educators.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5872 - Doctoral Seminar II: Diversity and Social Change

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar II focuses on the role of diversity and social change in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5873 - Doctoral Seminar III: Research, Assessment & Scholarship

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar III focuses on the role of research, assessment and scholarship in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD student.

CNSL5874 - Doctoral Seminar IV: Leadership, Consultation and Advocacy

Credits: 3

The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar IV focuses on the role of leadership, consultation and advocacy in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

PRST5070 - Introduction to College Teaching

Credits: 3

This course is designed to provide students with an understanding of instructional theory and experiences in applying teaching and assessment methods relevant to the role of an educator in higher education. Linking theories, perspectives, and principles of effective teaching and learning to practice in higher education is a priority of the course. Practicing and experiencing "hands-on" activities will be prime formats of the class.

Prerequisite: graduate standing.

- CNSL 5990 - Internship Credits: 6

Research and Scholarship

12 credits chosen from the following (or equivalent) in consultation with major adviser and graduate committee.

EDRE5600 - Introduction to Quantitative Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics

(measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Correlational Research

Credits: 3

Max Credit 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5600

EDRE5630 - Educational Research IV: Multivariate Research

Credits: 3

An advanced educational research, statistics, and measurement course. Design and analysis of results from studies with several dependent and independent variables. Includes multivariate statistics such as MANOVA, discriminant analysis, canonical correlation, multidimensional scaling, structural equation modeling, logit regression. Measurement topics include generalizability theory, item response theory, equating, and standard setting.

Prerequisite: At least one of the following: EDRE 5610 or EDRE 5620

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3

In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5640

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3

In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini study.

Prerequisite: EDRE 5630

- EDRE 5650 - Adv. Qual Research Credits: 3

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

Dissertation

PRST5890 - Directed Professional Study

Credits: 1-9

Similar to PRST 5880. Provides additional opportunity for students to pursue advanced graduate work through independent research. Projects are done under the direction of a graduate faculty member.

Prerequisite: graduate standing.

Total: 72 Credits

Additional Information:

Doctoral students are required to have completed a minimum of a 48-hour Master's degree from a program of study equivalent to a CACREP accredited Masters program in Counselor Education. These requirements are based upon the 2015 CACREP Standards.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related

postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Curriculum and Instruction, Ph.D., Concentration in Curriculum Studies

Offered online with a residency component, the UW curriculum and instruction program allows you to choose from among four concentrations to satisfy many of your requirements at a distance or face-to-face residency experiences.

Required Courses

REQUIRED COURSES (80 CREDIT HOURS)

Program Knowledge Base

Students must take 6 credit hours of the required courses listed below.

- PRST 5610 Intro to Doctoral Studies (3 credit hours)
- EDCI 5810 Writing for Professional Publication (3 credit hours)

Students must then select an additional 6 credit hours of elective courses. Course selection is subject doctoral committee approval.

- EDCI 5600 Diversity in Education (3 credit hours)
- EDCI 5800 Curriculum Development (3 credit hours)
- EDAD 5720 - Educational Leader as Change Agent (3 credit hours)
- EDAD 5650 - Educational Leader as Communicator (3 credit hours)
- EDCI 5665 History & Philosophy of Education (3 credit hours)
- EDCI 5730 Learning & Cognition (3 credit hours)
- PRST 5900 Practicum in College Teaching (3 credit hours)
- Other graduate-level courses determined in consultation with committee

Advanced Research Courses

Students must take 6 credit hours of the required courses listed below.

- EDRE 5600 - Ed Research 1: Descriptive (3 credit hours)
- EDRE 5640 - Intro to Qualitative Research (3 credit hours)

Students must then select an additional 6 credit hours of elective research courses. Course selection is subject doctoral committee approval.

- EDRE 5121 - Ethics in Research and Professional Practice (3 credit hours)
- EDRE 5530 - Introduction to Research (3 credit hours)

- EDRE 5550 - Action Research (3 credit hours)
- EDRE 5610 - Ed Research 2: Group Comparison (3 credit hours)
- EDRE 5620 - Ed Research 3: Correlational (3 credit hours)
- EDRE 5630 - Ed Research 4: Multivariate (3 credit hours)
- EDRE 5650 - Advanced Qualitative Research Methods (3 credit hours)
- EDRE 5870 - Mixed Methods or other Seminar (3 credit hours)
- Other graduate-level research course determined in consultation with committee

Practicum/Internship

Two credit hours. Must be determined with doctoral committee.

- EDCI 5580 - Internship (2 credit hours)

Curriculum and Instruction Specialization

Students must select a minimum of 15 credit hours around one area at the 4000 level or better; courses below are menu options, not requirements Course selection is subject doctoral committee approval.

- ITEC 5030 Introduction to Online Teaching (3 credit hours)

Foundations of Education

- ADED 5050 Learning Theories for Education (3 credit hours)
- ADED 5510 Adult Ed Movement in the US (3 credit hours)
- ADED 5680 Issues in Higher Education (3 credit hours)
- ADED 5710 International and Comparative Education (3 credit hours)
- EDCI 5665 History & Philosophy of Education (3 credit hours)
- EDCI 5050 MSGI Issues in Education (3 credit hours)
- ADED 5260 Educational Issues in Race, Class & Gender (3 credit hours)
- FCSC 5114 Human Lifespan Development (3 credit hours)
- FCSC 5117 Understanding Community Leadership (3 credit hours)
- FCSC 5122 Developmental Contexts Across the Lifespan (3 credit hours)
- EDCI 5070 International Issues in Education (3 credit hours)
- Other graduate-level coursework determined in consultation with committee (3 credit hours)

Early Childhood/Elementary Education

- EDCI 5140 Storytelling (3 credit hours)

- EDCI 5160 Recent Trends in Children's Literature (3 credit hours)
- EDEC 5210 Special Topics in Early Childhood Education (3 credit hours)
- EDCI 5050 MSGI Issues in Education (3 credit hours)
- ADED 5260 Educational Issues in Race, Class & Gender (3 credit hours)
- EDEC 5240 Eval Young Children W/Disabilities (3 credit hours)
- EDEC 5220 Children with Disabilities B-5 (3 credit hours)
- EDEC 5230 Curriculum for Young Children with Disabilities (3 credit hours)
- EDEC 5250 Legal Issues in Early Childhood Special Education Health Management (3 credit hours)
- EDEC 4350 Issues in Early Childhood Special Education (3 credit hours)
- FCSC 4124 Families of Young Children with Special Needs (3 credit hours)
- FCSC 5120 Infancy and Toddlerhood (3 credit hours)
- FCSC 5129 Seminar in Child Development (3 credit hours)
- FCSC 5132 Seminar in Family Studies (3 credit hours)
- FCSC 5112 Family Decision and Resource Management (3 credit hours)
- FCSC 5138 Family Stress/Coping (3 credit hours)

American Indian Education

- EDCI 5110 Educational Foundations of American Indian Education (3 credit hours)
- EDCI 5121 History and Philosophy of American Indian Education (3 credit hours)
- EDCI 5130 Cultural Foundations of American Indian Education (3 credit hours)
- EDCI 5141 Instructional Methods in American Indian Education (3 credit hours)
- Other graduate-level coursework determined in consultation with committee (3 credit hours)

English as a Second Language

- EDCI 5350 Introduction to Second Language Acquisition (3 credit hours)
- EDCI 5430 ESL Theory and Methods I (3 credit hours)
- EDCI 5440 ESL Theory and Methods II (3 credit hours)
- EDCI 5760 Social Literacies (3 credit hours)
- Other graduate-level coursework determined in consultation with committee (3 credit hours)

Secondary Content Area

- 15 hours of content-area graduate-level coursework determined in consultation with committee

Dissertation in Practice

Students must take all 12 credit hours listed below.

- EDCI 5980 - Dissertation Research (6 credit hours)
- EDRE 5660 Dissertation Prospectus Writing (6 credit hours)

OTHER REQUIREMENTS

After coursework is completed, you must satisfy the below requirements before completing your program and gaining your doctoral credential.

- **Preliminary Exam** - After completing your coursework you will need to take a preliminary exam.
- **Program Outcomes** - You must submit written demonstration to show you have met the learning outcomes determined by your program, department, or committee.
- **Dissertation** - After your preliminary exam, you will present and defend your doctoral dissertation.
- **Residency** - You must satisfy all requirements of your residency.

Additional Information:

Application Process:

Applications for the Doctor of Philosophy in Curriculum and Instruction, Curriculum Studies concentration are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.

Applications for the PhD in Curriculum Studies are only reviewed two times per year: immediately after September 1 and immediately after February 1. If you require an earlier decision, please apply for the deadline a year prior to ensure your application can be reviewed in time for planning international study.

Minimal Admissions Criteria for PhD Program

Applicants must meet the following criteria to be considered for admission; however, meeting minimal admissions criteria does not automatically ensure admission to the program.

- Master's degree from an accredited institute of higher education.
- It is highly recommended these courses are taken prior to admission, but can be taken within the first semesters of admission to the PhD Program. EDRE 5530 Intro to Research, EDCI 5000 Principles of Curriculum, EDCI 5450 Issues in Multicultural Education, and EDCI 5790 Advanced Instructional Strategies, or equivalent coursework.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample, an indicator of the applicant's proficiency in writing. For a full description of the letter of intent and scoring categories, see guideline below.
- Three (3) years of P-12 teaching experience or its equivalent.
- Copy of GRE scores, current within the last five years.

- Three letters of recommendation, completed by an individual familiar with the applicant's academic performance, a current or recent supervisor, and/or a selected colleague and/or community member.
- Transcript evaluation for undergraduate/graduate degree completion, reflecting a minimum 3.0 GPA on a 4.0 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- A TOEFL score of 525 (paper-based), 197 (computer-based) or above is required for international students. Students may occasionally be admitted provisionally with lower test scores.
- Submission of all required supplemental materials:

Required Supplemental Materials

- Three Letters of Recommendation
- Sample of academic writing
- Transcripts reflecting most recent degree (3.0 GPA on a 4.0 scale required) from an accredited institution plus transcripts from all other schools attended. Unofficial transcripts can be submitted through the online application. Official ones will be required if admitted.
- Copy of GRE scores
- Letter of Intent describing career goals and reasons for pursuing a graduate degree at the University of Wyoming
- Resume
- Demonstration of teaching experience
- A TOEFL score of 525 (paper-based), 197 (computer exam) or above is required for international students. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please note that meeting minimal admissions criteria does NOT automatically ensure admission to a program.

Guidelines for Letter of Intent

A letter of intent must be submitted with other required admissions materials. The letter of intent serves as a writing sample, an indicator of the applicant's proficiency in writing. The admissions committee will be examining both the quality of the written sample and the depth of its content. In the letter of intent please address the following questions:

- **Teaching Experiences:** Provide a detailed description of your teaching experiences including how many years you have taught as well as what grades and/or subjects you have taught. Describe crucial aspects of your teaching experience and how you have developed as a teacher as a result of these experiences. Finally explain how your teaching background will influence your graduate studies.
- **Personal Strengths:** Explain what you will bring to our program and your classes that may demonstrate your ability to be a successful graduate student and ability to contribute to the learning environment.
- **Academic Goals:** Describe in detail why you wish to pursue a Doctor of Education in Curriculum and Instruction, including why you want to do so at this time and how you are planning to use the degree in the future. Include a description of specific areas of study you are interested in and include your goals for graduate study and why these goals are important?

- Potential Advisor(s): If you have communicated with a professor(s) in your area of interest and/or she or he has indicated willingness to work with you on your doctorate degree program, please include her or his name in your letter.

The letter should be typed (double-spaced) on 8.5 by 11 inch paper. Letters of intent will be scored by a rubric that evaluates two areas:

- Ideas/Content Development; and,
- Organization/Structure/Mechanics/Format.

Each category is ranked as Outstanding, Proficient, Marginal, or Deficient. An overall score of Proficient is required for acceptance to the Doctor of Philosophy degree program.

Guidelines for Academic Resume

Include the following in your resume:

- Personal Information: Name and Contact Information (Address, Phone numbers, email)
- Education: Institution, City, State, Dates Attended, Major, and Degree
- Work Experience: Dates, Job Title, Employer, City, State
- Professional experiences such as: Publications, Presentations and Grants; Continuing Education Activities, Awards/Honors Received; Community and Volunteer Activities; Professional Memberships; other pertinent information

General Requirements for Curriculum & Instruction PhD in Curriculum Studies

Minimum of 81 total credits required. Students may transfer up to 30 credits from a master's degree program completed at an accredited institution.

Residency Information

PhD Program Requirements | College of Education

If you feel that you have met any degree requirements through a previously obtained master's degree or coursework at another institution, contact your advisor to determine the correct procedure. Note that the Introduction to Doctoral Studies course requirement may not be waived.

Minimum of 79 total credits required in the following areas:

Core courses (minimum of 9 credits)

All PhD option areas require PRST 5610 (Intro to Doctoral Studies). In addition, doctoral students, with direction from their committees, will choose a minimum of two additional courses from the remaining five core courses:

- PRST 5900 (Practicum in College Teaching)
- EDCI 5600 (Diversity)
- EDCI 5810 (Writing for Publication)
- EDCI 5730 (Learning and Cognition)

- EDAD 5720 (Leader as Change Agent)
- EDRE 5660 (Dissertation/Thesis Prospectus Writing)

Cognate courses and advanced courses (minimum of 18 credits)

Advanced research courses (minimum of 12 credits)

Dissertation Hours

All PhD Students are required to have a minimum of 12 dissertation credit hours.

Other Requirements

- Preliminary exam (after coursework is completed): Guidelines determined by program, department, or committee
- Program Outcomes: Written demonstration is required to show PhD outcomes are met (determined by program, department, or committee)
- Dissertation (after preliminary exam): Guidelines determined by program, department, or committee
- Residency (check with program area for specific requirements)

Notes: These requirements for a PhD in Education are minimum requirements only. Refer to specific program options for additional requirements, including admissions criteria. Options approved prior to May 2009 may have different requirements.

Curriculum and Instruction, Ph.D., Concentration in Literacy Education

Offered online with a residency component, the UW curriculum and instruction program allows you to choose from among four concentrations to satisfy many of your requirements at a distance or with face-to-face experiences.

Required Courses

REQUIRED COURSES (79 CREDIT HOURS)

Program Knowledge Base

Students must complete 9 hours of core courses. You must take the required course listed below and then select an additional 6 credit hours of courses in consultation with your doctoral advisor and committee.

- PRST 5610 - Introduction to Doctoral Study (3 credit hours) *Required*

Electives chosen in consultation with committee:

- EDCI 5600 - Diversity in Education (3 credit hours)
- EDRE 5660 - Proposal Writing (3 credit hours)
- EDAD 5720 - Educational Leader as Change Agent (3 credit hours)

- EDCI 5810 - Writing for Professional Publication (3 credit hours)
- CNSL 5900 - Practicum in College Teaching (3 credit hours)

Advanced Research Courses

Students must take a minimum of 12 hours of research methods in quantitative, qualitative, or other methodologies. Student must take the required courses listed below and then select an additional 3 credit hours of courses in collaboration with their doctoral advisor and committee.

- EDRE 5530 - Introduction to Research (3 credit hours) *Pre-requisite if not taken as part of the master's work. Does not meet doctoral level requirements.*
- EDRE 5600 - Ed Research 1: Descriptive (3 credit hours) *Required*
- EDRE 5640 - Intro to Qualitative Research (3 credit hours) *Required*

Electives chosen in consultation with committee:

- EDRE 5610 - Ed Research 2: Group Comp. (3 credit hours)
- EDRE 5620 - Ed Research 3 - Correlational (3 credit hours)
- EDRE 5630 - Ed Research 4: Multivariate (3 credit hours)
- EDRE 5550 - Action Research (3 credit hours)
- EDRE 5645 - Phenomenology, Case Study, Grounded Theory (3 credit hours)
- EDRE 5655 - Ethnography & Narrative Inquiry (3 credit hours)
- EDRE 5870 - Introduction to Discourse Analysis (3 credit hours)
- EDRE 5670 - Mixed Methods Research (3 credit hours)

Literacy Education Concentration

A student must enroll in all 21 credit hours listed below. If additional courses are needed, they can be selected from graduate-level courses within the literacy program or from other relevant academic departments at the UW. Course selection decisions will be made collaboratively by the doctoral student, their advisor and committee.

- LTED 5480 - Issues in English as a Second Language and Bilingual Education
- LTED 5800 - Theoretical Perspectives on Literary Processes and Practices
- LTED 5810 - Theoretical Perspectives on Writing
- LTED 5830 - Review, Critique, and Synthesis of Literacy Research
- LTED 5850 - Foundational Scholars in Social Science Research
- LTED 5860 - History of Literacies
- LTED 5880 - Public Digital Scholarship

Dissertation Hours

Students must enroll in a minimum of 12 hours of dissertation research credit during the period they plan, implement, and defend their dissertation.

- EDCI 5980 Dissertation Research (6 credit hours) *Required*
- EDRE 5660 Dissertation Prospectus Writing (6 credit hours)

OTHER REQUIREMENTS

After coursework is completed, you must satisfy the below requirements before completing your program and gaining your doctoral credential.

- **Preliminary Exam** - After completing your coursework you will need to take a preliminary exam.
- **Program Outcomes** - You must submit written demonstration to show you have met the learning outcomes determined by your program, department, or committee.
- **Dissertation** - After your preliminary exam, you will present and defend your doctoral dissertation.
- **Residency** - You must satisfy all requirements of your residency.

Additional Information:

Graduate students will take advanced coursework in Literacy Education, collaborate with faculty on grants and research projects, and have the opportunity to teach and supervise students in undergraduate literacy education courses. In addition to acquiring a breadth of knowledge in foundational areas in literacy education, students will have an opportunity to focus on specific areas in literacy education, such as Emergent Literacy, Family Literacy, Early Childhood Literacy, Elementary Grade Literacy, Adolescent Literacy, Disciplinary Literacy, Children's and Young Adult Literature, English Education, Literacy Teacher Education, New Literacies, Evaluation and Instruction of Students with Reading Difficulties, Literacy Education for English Learners, and Literacy Education for Culturally Diverse Students.

Application Process

For students to be considered for admission to the PhD in Literacy Education program, they must:

- **Submit all application materials. Please note: Preference will be given to applicants who apply on or before February 1 each year for the following year.**

Deadlines

- Applications for program are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.
- Complete an online application to the Literacy Education PhD Program. Submit supporting materials with the online application (see below).
- Have a minimum cumulative GPA of 3.00 in prior undergraduate or graduate work
- Interview with Literacy Education Program faculty, either in person or via telephone
- Master's degree is preferred

Supporting materials include:

- A current resume or vita;
- A detailed letter that expresses why the applicant wishes to pursue a PhD in Literacy Education, including the applicant's career goals; the applicant's prior experiences in literacy or literacy education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to literacy; potential areas of focus in a literacy doctoral program; potential research interests; and any other information the applicant considers to be relevant to her or his admission;
- Three Letters of Recommendation from those who can speak to the applicant's intellect, scholarly abilities, teaching ability, or other qualifications for doctoral study. These letters typically would be former professors, supervisors, or administrators;
- An official report of the Graduate Record Examination (GRE) that was taken within the preceding 5 years;
- An Application for a Graduate Assistantship should the student wish to seek one;
- An academic writing sample is not required, but is preferred.
- TOEFL or IELTS test is required for international students. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Coursework:

A minimum of 54 hours beyond the master's degree are required as follows:

- **Research:** A minimum of 12 hours of research methods in quantitative, qualitative, or other methodologies are required. The courses will be selected collaboratively by the doctoral student and her or his PhD advisor and committee such that the research methodology training is thorough, rigorous, and compatible with the student's dissertation research plans and anticipated career research focus.
- **Core:** Students must complete 9 hours of core courses. Students must enroll in PRST 5610, "Introduction to Doctoral Study," and two of the following courses selected collaboratively by the doctoral student and her or his PhD advisor and committee:
 - PRST 5900 Practicum in College Teaching
 - EDCI 5600 Diversity in Education
 - EDCI 5810 Writing for Professional Publication
 - EDCI 5730 Learning Theories: Research & Praxis
 - EDCI 5665 History & Philosophy of Education
- **Literacy Education:** A minimum of 21 hours of doctoral literacy coursework is required, which includes the following seven courses (i.e., LTED 5800, 5880, 5860, 5830, 5850, 5480, and 5810). Additional courses may be selected from existing and new advanced, graduate-level courses within the Literacy Program Area; from courses in other departments in the College of Education; and from other relevant academic departments at the University (e.g., Anthropology, Communication Disorders; English, Family and Consumer Sciences; African American, Chicano, American Indian, or Women's Studies; Psychology, Sociology). Course selection decisions will be made collaboratively by the doctoral student in consultation with the

student's PhD advisor and committee based on the doctoral student's prior graduate work and post-doctorate career goals.

- **Dissertation Research:** Students must enroll for a minimum of 12 hours of dissertation research credit during the period they plan, implement, and defend their dissertation.
- **Preliminary Examination:** The Preliminary Examination (also called the Comprehensive Examination) for the PhD in Literacy Education is governed by policies specified in Chapter 1 of the UW Student Handbook/Thesis & Dissertation Format Guide. Program-specific procedures for the preliminary examination for the PhD in Literacy Education are as follows

Research Apprenticeship:

Doctoral students are required to participate in a research apprenticeship in which they work closely with a faculty member in order to gain experience and skills in conducting research. The apprenticeship may involve an ongoing faculty project or may be a project initiated by the student and faculty member. Examples of acceptable apprenticeships include:

- writing an IRB or grant proposal
- collecting and analyzing data (e.g., a qualitative analysis, a statistical analysis)
- writing a research report for publication independently or collaboratively with a faculty member
- presenting theoretical or empirical work at a professional conference independently or collaboratively with a faculty member
- a project that enhances the student's ability to conduct rigorous educational research.

The Research Apprenticeship must be approved in advance by the doctoral committee, and at the committee's discretion, students may enroll for independent study graduate credit as part of the Research Apprenticeship experience

Curriculum and Instruction, Ph.D., Concentration in Mathematics Education

Mathematics Education is a new specialization in the UW Curriculum and Instruction doctoral program which includes the creation of innovative emphases and approaches for solidly prepared scholar-leaders for the field of Mathematics Education.

Required Courses

- **Program Knowledge Base**
Select 15 credit hours from the below list. Students should consult their advisor before choosing to take either EMAT 5150 or EMAT 5160.
 - EMAT 5150
 - EMAT 5160
- EDCI5600 - Diversity in Education Credits: 3
- EDCI5730 - Learning and Cognition Credits: 3

- EDAD5720 - Educational Leader as Change Agent Credits: 3
- EDAD5650 - Educational Leader as Communicator Credits: 3
- EDRE5660 - Dissertation/Thesis Prospectus Writing Credits: 3
-
- **Mathematics Education Specialization**
Students must take all 18 credit hours listed below.
- EMAT5100 - Theory and Research for Mathematical Learning Credits: 3
- EMAT5200 - Advanced Study of Mathematics Curriculum, Assessment, and Evaluation Credits: 3
- EMAT5300 - Theory and Practice for Mathematics Teaching and Teacher Education Credits: 3
- EMAT5400 - Analysis and Critique of Research in Mathematics Education Credits: 3
- EMAT5600 - Quantitative Reasoning & Modeling in Mathematics and Science Education Credits: 3
- EMAT5700 - Principles and Methods for Integrated Teaching & Learning Mathematics & Science Credits: 3
- EMAT Culture, Power and Identity in Mathematics Education, Credits: 3
-

Advanced Research Courses

Select 9 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject to doctoral committee approval.

- EDRE5600 - Introduction to Quantitative Research Credits: 3
- EDRE5610 - Educational Research: Group Comparison Research Credits: 3
- EDRE5620 - Educational Research: Correlational Research Credits: 3
- EDRE5630 - Educational Research IV: Multivariate Research Credits: 3
- EDRE5550 - Action Research Credits: 3
- EDRE5640 - Introduction to Qualitative Research Credits: 3
- EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research Credits: 3
- EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research Credits: 3
- EDRE5670 - Mixed Methods Research Credits: 3

- **Practicum/Internship**

Two credit hours. Must be determined with doctoral committee.

- EDCI5580 - Internship1 Credits: 8

- **Dissertation in Practice**

Students must take a minimum of 6 credit hours.

- EMAT5980 - Dissertation Research Credits: 1-12

Additional Information:

Deadlines

Applications for program are due **September 1** for spring semester admission and **February 1** for summer or fall semester admission.

Application Materials

All supporting materials should be submitted through the online application system.

Required materials for consideration into the Curriculum & Instruction PhD program in Mathematics Education include:

- Writing sample (an article, master's thesis, or well done project/course paper)
- An application letter, which discusses yourself, your experience, and your potential research interests
- A resume or curriculum vita
- Three letters of reference
- Transcripts from all universities attended. Unofficial transcripts can be loaded to the online application system, but if admitted to the University, official transcripts will need to be sent prior to beginning the program
- Copy of GRE scores
- International students must submit scores for a language proficiency exam, such as TOEFL or IELTS. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- Master's degree in mathematics, mathematics education, or a related area is required
- A minimum of three years of teaching experience is required

Program Requirements

Overall, the doctoral program will require at least 81 semester hours completed within a coherent program of study developed and approved by the candidate's Major Professor and Doctoral Committee (which may include transferring up to 30 approved graduate semester hours from work completed toward a master's degree).

The overall structure includes:

Course Type	Hours Required
College-wide core	9 hours
Mathematics	9 hours
Mathematics Education	18 hours
Electives	21 hours
Research & dissertation	24 hours
Total	81 hours

To satisfy Mathematics Education hours (18), the following EMAT courses (four required and two joint electives with Science Education) are offered:

Theory and Research for Mathematical Learning and Development
Theory and Practice for Mathematics Teaching and Teacher Education
Advanced Study of Mathematics Curriculum, Assessment and Evaluation
Analysis and Critique of Research in Mathematics Education
Quantitative Reasoning and Modeling in Mathematics and Science Education
Principles and Methods for Integrated Teaching and Learning of Mathematics and Science

These advanced Mathematics Education courses along with graduate study in Mathematics and Statistics, and Quantitative and Qualitative Research Methodologies, collectively build knowledge of theoretical and empirical perspectives to lead to a solid competence for engaging in both scholarly and practical work in the field at all levels. One program goal is to stimulate and guide each student to develop their dissertation research as a first step within a well-defined research program that can encompass the initial years of their post-doctoral scholarship.

Annual Review of Progress/Program Timeline

The following provides a framework to specify general expectations and be suggestive of the scope and sequence of the program, while realizing that all specific courses will be selected in consultation with the Major Professor and approved by the Doctoral Committee to satisfy the individual goals and needs of the student. An overall GPA of 3.0 must be maintained.

Year 1 (minimum 18 hours)

- Complete two mathematics education courses, receiving at least a B in each.
- Complete at least one college-wide core course (e.g., EDCI 5870 Introduction to Doctoral Studies)
- Complete at least one appropriate graduate mathematics course
- Complete two research methodology courses
- Completion of electives as recommended
- Identify and establish the choice of Major Professor; in consultation develop a program of study; establish the Doctoral Committee
- At year-end, submit preliminary proposal of research interests and ideas, and an annual self-evaluation; begin development of Reading List

Year 2 (minimum 18 hours)

- Complete two mathematics education courses, receiving at least a B in each.
- Complete at least one college-wide core course
- Complete at least one appropriate graduate mathematics course
- Complete two research methodology courses
- Completion of electives as recommended
- In Fall, conduct initial Doctoral Committee meeting; discuss and approve program of study; preliminary discussion of research interests
- Maintain and extend the Reading List; by mid-Spring, share it with the Doctoral Committee for review and feedback

- At year-end, submit an updated proposal of potential dissertation research, and an annual self-evaluation
- Submit a proposal to write and present a scholarly paper to a recognized mathematics education research conference (typically in collaboration with other graduate students and/or one or more faculty members)
- Conduct Doctoral Committee meeting to finalize Reading List and to frame and plan for completion of the written comprehensive exams before the end of Fall term

Year 3 (minimum 18 hours)

- Complete all additional courses on the approved Program of Study
- Enroll in at least 6 hours of dissertation research to conceptualize and develop the dissertation research proposal (which may include a pilot or preliminary study)
- Complete oral exams, and the defense and approval of the dissertation research proposal; obtain IRB approvals as needed
- Begin dissertation research project: complete detailed plans, collect data, engage analyses, begin writing as appropriate
- Submit a scholarly manuscript to a recognized mathematics education research journal (typically in collaboration with other graduate students and/or one or more faculty members)
- Submit an annual status report and self-evaluation

Year 4/Year 5 (as needed)

- Enroll in at least 6 hours of dissertation research each semester
- Continue toward completion of the dissertation research
- Finish writing, and defend the dissertation research; present your research at a Mathematics Education colloquium
- As feasible, begin developing one or more scholarly manuscripts based upon the dissertation
- Conduct search and interviews for seeking a post-doctoral position

In the culture of our program, we seek to function as faculty and students in a dynamic community of active scholars. As such, we acknowledge that many significant developmental experiences for doctoral students must and will take place outside formal course venues. Therefore, all students and faculty are expected to be vitally involved in ongoing research, development, and outreach projects and activities in which continuous interaction and collaboration occurs, within Mathematics Education and other disciplines.

Curriculum and Instruction, Ph.D., Concentration in Science Education

The Curriculum and Instruction PhD Program in Science Education prepares students for productive careers in apprenticeship model to produce scholarly work in science education.

Course Requirements

REQUIRED COURSES (81 CREDIT HOURS)

Program Knowledge Base

Select 9 credit hours from the below list.

- PRST 5610 - Intro to Doc Studies (3 credit hours)
- PRST 5070 - Intro to College Teaching (3 credit hours)
- EDCI 5600 - Diversity in Education (3 credit hours)
- EDRE 5660 - Proposal Writing (3 credit hours)
- EDCI 5730 - Learning and Cognition (3 credit hours)
- EDCI 5810 - Writing for Professional Publications (3 credit hours)

Advanced Research Courses

Select 18 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject doctoral committee approval.

- ESCI 5200 - Contemporary Science Education Research (3 credit hours)
- EDRE 5530 - Intro to Research (3 credit hours)
- EDRE 5610 - Ed Research 2: Group Comparison (3 credit hours)
- EDRE 5620 - Ed Research 3: Correlational (3 credit hours)
- EDRE 5630 - Ed Research 4: Multivariate (3 credit hours)
- EDRE 5640 - Intro to Qualitative Research (3 credit hours)
- EDRE 5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research (3 credit hours)
-

Research in Science Education

Students must take all 6 credit hours listed below.

- ESCI 5300 Research in Science Ed I (3 credit hours)
- ESCI 5350 Research in Science Ed II (3 credit hours)

Mathematics Education Specialization

Select 9 credit hours from the below list. Course selection is subject doctoral committee approval.

- ESCI 5250 - Cognition and Learning in Science and Math Education
- ESCI 5600 - History and Philosophy of Science and Mathematics Education
- ESCI 5610 - Informal Science Learning Environments
- ESCI 5630 - Science Teacher Education & K12 Professional Development
- EDCI 5870 - Special Topics in Science Education
- Relevant EMAT courses

Electives

Students should work with their advisor to select 21 credit hours to complete the elective requirement. Note that some or all of the elective courses are courses completed as part of the master's degree.)

Dissertation

Students must take a minimum of 6 credit hours.

- ESCI 5100 - Science Education Research Colloquium (1-6 credit hours)

Additional Information:

The Curriculum and Instruction PhD Program in Science Education prepares students for productive careers in scholarly inquiry at research & outreach centers and universities. In an apprenticeship model, students study with a cadre of professionally active faculty to produce scholarly work, take advanced coursework in science education,

collaborate with faculty on grants and research projects, and have opportunities to teach undergraduate courses in education and science.

Program Specific Requirements

- As part of the online application, provide a letter of intent. In this letter, describe why you wish to pursue a PhD in Science Education, including your career goals; your prior experiences in science or science education (e.g., relevant teaching or other educational experiences); previous university degrees, programs, certificates, or emphases related to science; potential areas of focus in a science doctoral program; potential research interests; and any other information you consider to be relevant to your admission.

Additional Requirements and Important Information

- GRE scores are required. The admissions committee will consider the Verbal Reasoning and Quantitative Reasoning scores in its determination. Effective July 1, 2016 applicants must have GRE scores of 153 Verbal and 144 Quantitative Reasoning or higher to be considered for admission. Minimum scores do not guarantee admission. Other criteria, as well as faculty capacity, will be considered in the admission process.
- Applicants need to contact a member of the Science Education PhD Program faculty, either in person or via telephone, to discuss career and research goals. This assists us in assigning a graduate advisor upon admission.
- Following the application review, the program faculty will make a recommendation regarding admission for Graduate Study at UW. Applicants will be notified of the decision by email. Applications will be considered at any time, but students who apply by January 15 will receive full consideration for graduate assistantships for the following academic year.
- Applicants are evaluated on alignment of research interests with those of existing faculty, clarity of application letter and goals, prior teaching or work experience, letters of recommendation, transcripts (including GPA) and previous research experience with an accompanying sample of professional writing if available, according to the Science Education PhD Admissions Rubric.
- International students must have TOEFL scores of 540 (paper based test), 76 (internet based test), 197 (computer based test) or IELTS scores of 6.5 higher. Minimum scores do not guarantee admission. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Program Details

The Curriculum & Instruction PhD. Option in *Science Education* prepares students for productive careers in scholarly inquiry at research & outreach centers and universities. In an apprenticeship model, students study with a cadre of professionally active faculty to produce scholarly work, take advanced coursework in science education, collaborate with faculty on grants and research projects, and have opportunities to teach undergraduate courses in education and science.

Coursework

The Science Education PhD option requires a minimum of 81 semester credits of coursework and dissertation hours. As many as 30 credit hours from a Masters degree program may be applied to the PhD program, subject to committee approval.

Courses must be taken in the following areas:

- Doctoral Studies (3 courses)
- Science Education Core (3 courses)
- Research in Science Education (2 courses)
- Research methods/Graduate Science Content (6 courses)
- Science Education Research Colloquium (1-6 credits)
- Dissertation (minimum of 6 credits)

Residency

The standard residency requirement is a minimum of one (1) semester. The purpose and intent of a residency requirement is to provide close, collaborative teaching, research, and writing opportunities with faculty members. Summer terms will count toward this requirement. If personal circumstances will not accommodate a semester on campus in Laramie, contact the Program Coordinator for possible options.

Additional Expectations

In order to be successful, students need to demonstrate throughout the program an understanding of research methodologies, data analysis, and academic writing.

Although not necessarily available for graduate credit, the following activities are expected to be completed, as approved, monitored, and assessed by a students' committee, prior to defense.

- Completed, supervised teaching internship during graduate program (e.g., GTA)
- A total of 18 graduate hours in science
- Submission of a scholarly manuscript, judged publishable by the committee
- Presentation at a professional conference on scholarly work

This program will allow students to focus on one of three areas of science education: Earth and Space, Energy, and Environment

Education, Ed.D., Concentration in Curriculum and Instruction

Pursue your PhD in Education with a concentration in Curriculum and Instruction in a program that is offered entirely online! Continue in your current role as you gain expertise to take your career to the next level.

Required Courses

Required Courses (80 credit hours)

The Doctor of Education in Education with a concentration in Curriculum and Instruction program is 80 credit hours and all courses are delivered entirely online. You must have three years of classroom teaching experience, a master's degree to apply to the program. Applicants must also complete EDRE 5530 - Introduction to Research or an equivalent course prior to entering the program.

Program Knowledge Base

Students must take all 15 credit hours listed below.

- EDCI 5600 - Diversity in Education (3 credit hours)
- EDCI 5730 - Learning and Cognition (3 credit hours)
- EDAD 5720 - Educational Leader as Change Agent (3 credit hours)
- EDAD 5650 - Educational Leader as Communicator (3 credit hours)
- EDRE 5660 - Proposal Writing (3 credit hours)

Advanced Research Courses

Select 9 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject doctoral committee approval.

- EDRE 5600 - Ed Research 1: Descriptive (3 credit hours)
- EDRE 5610 - Ed Research 2: Group Comparison (3 credit hours)
- EDRE 5620 - Ed Research 3: Correlational (3 credit hours)
- EDRE 5630 - Ed Research 4: Multivariate (3 credit hours)
- EDRE 5550 - Action Research (3 credit hours)
- EDRE 5640 - Intro to Qualitative Research (3 credit hours)
- EDRE 5650 - Advanced Qualitative Research Methods (3 credit hours)

Practicum/Internship

Two credit hours. Must be determined with doctoral committee.

- EDCI 5580 - Internship (2 credit hours)

Curriculum and Instruction Specialization

Students must take the required courses listed below and select an additional 12 credit hours of elective courses in the Curriculum and Instruction area. Course selection is subject doctoral committee approval.

- EDCI 5790 - Learning Theories & Instructional Principles (3 credit hours) *Required*
- EDCI 5800 - Curriculum Development (3 credit hours) *Required*

Final Project: Dissertation in Practice or Other Project Option

Students must take all 6 credit hours listed below.

- EDCI 5980 - Dissertation Research (6 credit hours)

Final (Applied) Project Options

Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12

education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Additional Information:

Admission Requirements

Applications for the Doctor of Education (EdD) program with a concentration in Curriculum and Instruction are reviewed for admission in fall and spring semesters. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following supplemental material:

- Letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Recent GRE scores.
- Three letters of recommendation, completed by an individual familiar with the applicant's academic performance, a current or recent supervisor, and/or a selected colleague and/or community member.
- Academic Resume/Curriculum Vitae
- Transcripts
- TOEFL/IELTS scores (for international, non-native English speaking applicants). Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's bachelor's degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Graduate Assistantships

Applicants interested in a Graduate Assistantship must submit a graduate assistantship application at the time of admission application process or consult student's advisor or school director thereafter.

Education, Ed.D., Concentration in Educational Leadership

Offered entirely online, UW's educational leadership Ed.D. program will prepare you for top-level leadership positions in K-12 educational settings as assistant superintendents and superintendents.

Requirements

Core Educational Leadership Courses

HIED5630 - Advanced Organizational Leadership

Credits: 3

Examines central issues in advanced organizational leadership to prepare practitioners for leadership roles in educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and an organizational case study.

Prerequisite: Admission to the program.

EDAD5600 - Educational Leader as Manager of Human Resources

Credits: 3

Focuses on linking theory related to organizations (including Bureaucracy Theory), decision-making and organizational effectiveness with effective practices in management of organizational personnel.

Prerequisite: graduate standing.

EDAD5650 - Educational Leader as Communicator

Credits: 3

Focuses on inter- and intra-personal communication skills; group facilitation; organization and community public relations; parent and community involvement; negotiation; and conflict management.

Prerequisite: graduate standing.

EDAD5700 - Educational Leader For Instruction

Credits: 3

Focuses on the study of curriculum development and implementation, instructional practice, assessment and staff development.

Prerequisite: graduate standing.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDAD5750 - Educational Leader for the Board and Community

Credits: 3

Concentrates on the administrator as the leader of an organization's board and community.

Prerequisite: graduate standing.

EDAD5800 - Educational Leader as Resource Manager

Credits: 3

Focuses upon the successful management and operation of the organizations fiscal resources, facilities, and support services. Includes work in the areas of transportation, food service, funding and budget, compensation, facilities, legal issues, calendar, special education, and policy influence.

Prerequisite: graduate standing.

EDAD5815 - Advanced School Law

Credits: 3

Designed to provide advanced information concerning K-12 school law as it relates to public education. Students will acquire a deeper understanding of legal issues that routinely arise in the K-12 school setting.

Prerequisite: Admission into the UW Educational Leadership EdD/ PhD Doctoral Program.

EDAD5850 - Educational Leader as Direction Setter

Credits: 3

Investigates how the educational leader can effectively create a futuristic vision and mission for the organization after assessing the existing culture and climate, and organizational readiness for change.

Prerequisite: graduate standing.

Internship

EDAD5580 - Supervised Internship in Educational Administration

Credits: 1-8

Max Credit (Max. 12)

Expand student knowledge by providing an intensive clinical experience in educational administration along with other activities that involve practical experiences with peers and with practising K-12 administrators.

Prerequisite: Admission into the UW Educational Leadership Principal Certificate, Master's or EdD Doctoral program.

Educational Research Courses

(at least 1 quantitative and 1 qualitative)

EDRE5600 - Introduction to Quantitative Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Correlational Research

Credits: 3

Max Credit 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5600

EDRE5640 - Introduction to Qualitative Research

Credits: 3

This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3

In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5640

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3

In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini study.

Prerequisite: EDRE 5630

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

EDRE5870 - Seminar

Credits: 1-8

Max Credit (Max. 8)

Additional Requirements:

EDRE5660 - Dissertation/Thesis Prospectus Writing

Credits: 3

Prepare graduate students to plan, develop, and write research proposals suitable for a dissertation/thesis. In consultation with the committee chair, students will focus on their own problem for research, conduct a literature review, choose appropriate methods for investigating the problem, and write a research proposal.

Prerequisite: at least two of the following: EDRE 5600, EDRE 5610, EDRE 5620, EDRE 5630, EDRE 5640, EDRE 5645, EDRE 5655, EDRE 5670, or EDRE 5870.

- EDAD 5980 - Dissertation Research Credits: 6

Additional Information:

Admission Requirements

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related

postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Final Project Options

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Education, Ed.D., Concentration in Higher Education Administration

All Higher Education Administration students can work as administrators and professional staff to supervise, design, deliver, and coordinate high quality formal and informal education programs to adults across the lifespan.

Required Courses

REQUIRED COURSES (75 CREDIT HOURS)

- EDAD 5720 Leader as Change Agent (3 credit hours)
- EDAD 5850 Leader as Direction Setter (3 credit hours)
- HIED 5260 Educational Issues in Race, Class, & Gender (3 credit hours)
- HIED 5600 Higher Education Finance (3 credit hours)
- HIED 5630 Advanced Organizational Leadership (3 credit hours)
- HIED 5640 Leadership Development (3 credit hours)
- HIED 5650 Law of Higher Education (3 credit hours)
- HIED 5670 Community College Issues & Leadership (3 credit hours)
- HIED 5680 Issues in Higher Education (3 credit hours)
- EDRE 56XX First Research Course (3 credit hours)
- EDRE 56XX Second Research Course (3 credit hours)
- EDRE 56XX Third Research Course (3 credit hours)
- EDRE 5660 Dissertation Prospectus (3 credit hours)
- PRST 5980 Dissertation Research (6 credit hours)

Additional Information:

The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The Ed.D. is delivered through distance delivery system and requires a minimum of 77 semester hours beyond the bachelor's degree, of which 41 hours must be taken in the student's chosen field, and 6 hours of dissertation. Candidates may, with the approval of the faculty, transfer up to 30 semester hours from previous graduate level coursework. A bachelor's degree and a master's degree are required of all students to be admitted to the Ed.D. program.

Required on-campus orientation during first fall semester.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Education, Ed.D., Concentration in Learning, Design, and Technology

The Ed.D. in Learning, Design and Technology will provide students with advanced research methods to study and identify educational opportunities in various settings while developing and evaluating new ways to address those opportunities.

Course Requirements

The EdD program is 75 credits. The theory, research, and resulting instructional principles are addressed in courses in the following areas: (a) instructional design, visual literacy, and change (b) media development and production; and (c) instructional management, implementation, and technology integration. Graduate students in the program can take all of their coursework online. The EdD uses a Dissertation in Practice format for dissertation research. UW is a member of the Carnegie Project on the Education Doctorate.

Required Courses (75 credits*)

Foundational Knowledge Base

Students may transfer up to 30 credits toward the total program from a related master's degree. Transfer credits need to be accepted by the program faculty. If a student lacks credits in this area, they may take courses available through the Learning, Design, and Technology MS Program.

Program Knowledge Base

Students must successfully complete all 27 credit hours listed below.

- HIED 5630 Advanced Organizational Leadership (3 credit hours)
- ITEC 5660 (LDTE 5660): Interactive Learning Systems (3 credit hours)
- ITEC 5870 (LDTE 5700): Issues, Practice, and Research in LDT (3 credit hours)
- LDTE 5710: Transformational Learning (3 credit hours)
- ITEC 5870 (LDTE 5720): Critical Perspectives and Applications of Technology Integration (3 credit hours)
- ITEC 5870 (LDTE 5730): Game Design and Development (3 credit hours)
- ITEC 5870 (LDTE 5740): Global and Cultural Perspectives in LDT (3 credit hours)
- ITEC 5870 (LDTE 5750): Technology Innovations: Past, Present, and Future (3 credit hours)
- ITEC 5760 (LDTE 5760): Instructional Design Applications (3 credit hours)
- ITEC 5070 (LDTE 5070): Trends (3 credit hours) [can be substituted for a relevant course]

** new LDTE prefix is in the process of phasing into the program beginning Fall 2022; ITEC is still active and counts in the program of study until transition is complete.*

- **Research Methods**

- Students must successfully complete 12 credit hours in educational research.
- Required: Research Courses
 - EDRE 5600 Ed Research 1: Descriptive Research (3 credit hours)
 - EDRE 5640 Intro to Qualitative Research (3 credit hours)
 - EDRE 5660 Dissertation/Thesis Prospectus Writing (3 credit hours)

Select at least one additional research course:

Quantitative:

- EDRE 5610 Ed Research: Group Comparison (3 credit hours)
- EDRE 5620 Ed Research: Intro to Qualitative Research (3 credit hours)

Qualitative:

- EDRE 5645 Ed Research: Phenomenology, Case study, and Grounded Theory in Qualitative Research (3 credit hours)
- EDRE 5620 Ethnography and Narrative Inquiry in Qualitative Research (3 credit hours)

Dissertation or Approved Project

Students must successfully complete the exam and dissertation process. **A minimum of 6 credit hours of dissertation research** are required for the program of study.

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

The Ed.D. program requires a minimum of 81 credit hours beyond the bachelor's degree. Candidates may, with the approval of the committee, transfer up to 30 credit hours from previous graduate-level coursework in a closely related field. The program is delivered online with the exception of some the spring residencies.

- Program knowledge base: 48 credits
- Research: 9 credits
- Professional Writing: 6 credits
- Electives: 12 credits
- Dissertation: 6 credits

Additional Information:

Unlike the Ph.D. in Learning, Design and Technology, the Ed.D. program emphasizes applied research, culminating in the completion of a problem-based dissertation or project. Rather than leading to an academic career, the Ed.D. is designed for educators who want to contribute to the educational technology field at the highest levels of practice.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Required on campus orientation during first fall semester.

The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The program moves beyond the foundations of distance education, instructional design, and technology integration to focus on advanced application and research. Students apply design, development, and evaluation principles to explore authentic challenges and develop real solutions in diverse settings (e.g., K-12 education, corporate and government centers, and higher education institutions). Through these experiences, students learn how to use advanced research methods to explore workplace problems, design and deliver solutions, and implement and evaluate change. Emphasis is placed on in-depth mentoring and collaboration, advanced research, development of real-world applications, and training solutions offered through distance delivery platforms.

Education, Ed.D., Concentration in Mathematics Education

Graduates with a PhD in Education with a concentration in Mathematics Education at the UW are equipped with cutting-edge applied research skills, mathematics pedagogy expertise, and a commitment to issues of equity, inclusion and social justice.

Required Courses

Program Knowledge Base

Select 15 credit hours from the below list. Students should consult their advisor before choosing to take either EMAT 5150 or EMAT 5160.

- EMAT 5150
- EMAT 5160

EDCI5600 - Diversity in Education

Credits: 3

Provides practicing teachers and graduate level students with an understanding of the macrolevel influences on diversity in education. Includes an examination of competing models of diversity in education as well as reviews critical scholarly work in the field (including alternative methodological frameworks for engaging in this research). Includes competencies for developing advocacy-oriented skills and dispositions.

Prerequisite: graduate level students only.

EDCI5730 - Learning and Cognition

Credits: 3

The purpose of this course is to explore and critically analyze various learning theories from 1900 to present, including, but not limited to, behaviorism, constructivism, information processing, situated cognition, meaning learning, and cognitivism. Focus is on applying learning theories to impact K-12 student outcomes.

Prerequisite: graduate standing or permission of instructor.

EDAD5720 - Educational Leader as Change Agent

Credits: 3

Focuses on the study of change theory, change processes, change dynamics, decision-making models, and implementation of change in the organization setting.

Prerequisite: graduate standing.

EDAD5650 - Educational Leader as Communicator

Credits: 3

Focuses on inter- and intra-personal communication skills; group facilitation; organization and community public relations; parent and community involvement; negotiation; and conflict management.

Prerequisite: graduate standing.

EDRE5660 - Dissertation/Thesis Prospectus Writing

Credits: 3

Prepare graduate students to plan, develop, and write research proposals suitable for a dissertation/thesis. In consultation with the committee chair, students will focus on their own problem for research, conduct a literature review, choose appropriate methods for investigating the problem, and write a research proposal.

Prerequisite: at least two of the following: EDRE 5600, EDRE 5610, EDRE 5620, EDRE 5630, EDRE 5640, EDRE 5645, EDRE 5655, EDRE 5670, or EDRE 5870.

Mathematics Education Specialization

Students must take all 18 credit hours listed below.

EMAT5100 - Theory and Research for Mathematical Learning

Credits: 3
Max Credit (Max. 6)

Advanced study of theory and research related to learning of mathematics, with attention to significant human mental development factors. Critically examines the scholarly basis for mathematical learning, including reviews of epistemological foundations, research-based factors, core issues, and advocacies for educational practices.

Prerequisite: enrollment in Mathematics Education Ph. D. specialization or permission of the instructor.

EMAT5200 - Advanced Study of Mathematics Curriculum, Assessment, and Evaluation

Credits: 3
Max Credit (Max. 6)

Advanced study of theory, research and practices related to curriculum, assessment and evaluation in mathematics education. Critically examines the historical and contemporary influences on these, including mathematical, philosophical, psychological, pedagogical, social and political forces and factors.

Prerequisite: enrollment in Mathematics Education Ph. D. program or permission of the instructor.

EMAT5300 - Theory and Practice for Mathematics Teaching and Teacher Education

Credits: 3

Advanced study of theory and research of mathematics teaching teacher education. Examines the scholarly basis for current rationales and practices, including a critical review of evidential effectiveness, core issues, and advocacies for reform. A major emphasis will include analysis and critique of significant theoretical and research literature.

Prerequisite: enrollment in Mathematics Education Ph. D. program or permission of the instructor.

EMAT5400 - Analysis and Critique of Research in Mathematics Education

Credits: 3

Both theoretical and empirical research and scholarship in the field of mathematics education are critically analyzed. Students develop a deep understanding of pivotal historical and contemporary literature that helped shape the field of mathematics education and begin a formative development of their research interests.

Prerequisite: at least two from EMAT 5100, EMAT 5200, or EMAT 5300.

EMAT5600 - Quantitative Reasoning & Modeling in Mathematics and Science Education

Credits: 3

Advanced study of theories, issues, research and practices for teaching and learning mathematics and science focused on quantitative reasoning and mathematical modeling (QRaMM). Analysis of fundamental constructs relevant to QRaMM in education. Activities engage the scholarship of critical analysis, and interdisciplinary applications aimed at

student knowledge and expertise in QRaMM.

Prerequisite: Graduate student status.

EMAT5700 - Principles and Methods for Integrated Teaching & Learning Mathematics & Science

Credits: 3

Advanced study of theory, research, and practice for teaching and learning mathematics and science using integrated approaches in curriculum, pedagogy, learning, and assessment. The course will be production oriented, with activities and developments aimed at stimulating and supporting manuscripts to be published in STEM-appropriate venues.

Prerequisite: Graduate student status.

- EMAT Culture, Power and Identity in Mathematics Education, Credits: 3

Advanced Research Courses

Select 9 credit hours from the below list. Coursework in both qualitative and quantitative research is required and courses can be taken outside the College of Education. Course selection is subject doctoral committee approval.

EDRE5600 - Introduction to Quantitative Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Correlational Research

Credits: 3

Max Credit 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5600

EDRE5630 - Educational Research IV: Multivariate Research

Credits: 3

An advanced educational research, statistics, and measurement course. Design and analysis of results from studies with several dependent and independent variables. Includes multivariate statistics such as MANOVA, discriminant analysis, canonical correlation, multidimensional scaling, structural equation modeling, logit regression. Measurement topics include generalizability theory, item response theory, equating, and standard setting.

Prerequisite: At least one of the following: EDRE 5610 or EDRE 5620

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

EDRE5640 - Introduction to Qualitative Research

Credits: 3

This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3

In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5640

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3

In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini study.

Prerequisite: EDRE 5630

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

Practicum/Internship

Two credit hours. Must be determined with doctoral committee.

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

Dissertation in Practice

Students must take a minimum of 6 credit hours.

EMAT5980 - Dissertation Research

Credits: 1-12

Max Credit (Max 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Additional Information:

Offered entirely online, you can pursue the Ed.D. in mathematics education while you continue in your current position. Learn and bond with the same group of students during the course or your Ed.D. studies- our program is cohort-based.

Admission Requirements

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Final Project Options

All Doctor of Education students will use research methods to explore practical leadership problems. Applied projects are problem-based and may be collaborative. Projects may involve evaluating curriculum, designing and implementing professional development or training, developing applications to be used in local settings (e.g., early childhood-12 education, corporate and government centers), as well as other projects designed to advance knowledge in a specific field or setting.

The following requirements apply to all projects:

- Research-based (literature review)
- Scholarly, academic writing using APA style
- Primary or secondary data
- Authored by individual or small groups of students
- Uploaded to **ProQuest** for dissertations of practice or other projects in a dissertation format, and uploaded to the **Mountain Scholar Digital Collections** for projects in a non-dissertation format

Suggested project formats and brief descriptions are:

Dissertation of Practice

- A dissertation of practice is original practice-based empirical research with data collection expected from primary sources.

Local Case Study

- A case study is a descriptive, exploratory, or explanatory analysis of a person, group, or event. Thomas (2011, p. 354) offered the following definition of case study: "Case studies are analysis of persons, events, decisions, periods, projects, policies, institutions, or others systems that are studied holistically by one of more methods."

Faculty Directed Individual or Team-based Inquiry

- This type of inquiry involves individual or a small group of students working together on a single project under the guidance of a faculty member. Data can be obtained from primary or secondary sources.

Documentary on an Educational Issue

- A documentary is an in-depth and extensive study with an analysis presented in video form accompanied by a written summary of the purpose and outcome.

Submitted Manuscript

- A full-length research manuscript must be submitted to a refereed mid- or top-tier national or international scholarly journal.

Program Evaluation

- A program evaluation report typically uses both qualitative and quantitative research methods to examine and collect data on a current program that is in place in a school or another organization.

Additional project formats may be proposed and approved by the student's committee as long as they meet the requirements listed above.

Final Project Processes

As in the traditional dissertation process, all students are expected to meet with their committees to gain project approval (at the pre-prospectus and/or prospectus stage). The Report of Final Examination will indicate whether or not the final project is acceptable to the committee. *The deadline for submitting projects to Mountain Scholar Digital Collections or dissertations of practice or other projects in a dissertation format to ProQuest is the same as the Report of Final Examination, the last day of classes for the semester during which a student intends to graduate.* All projects will be evaluated by committee members and also by the student.

Please note: After submitting the required steps for the Mountain Scholar Digital Collections you will receive a confirmation email. Please forward this email to your chair, Clayleen Rivord in the College of Education Dean's Office, and Robert Ratterree in the Office of the Registrar.

Education, M.A., Concentration in Curriculum and Instruction

The UW Master of Arts in Educ. with a concentration in C&I will help you become the teacher who advocates for students, mentors younger colleagues & thinks outside conventional wisdom to leverage best practices into innovative programs and practices

Requirements

- Minimum of 32 hours of graduate credit
- Many courses delivered using distance technologies
- Core Courses: 16 hours of program area core graduate credits
- Concentration: 15+ hours in either a certificate or endorsement program, academic content area, or general curriculum and instruction area of interest (with direction and consent of faculty adviser)

Capstone Consisting of One of the Following:

Plan A (Thesis)

EDCI5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Plan B (Non-Thesis)

EDCI5090 - Plan B Research

Credits: 1-3
Max Credit (Max. 9)

Under the guidance of a committee chair, the enrolled graduate student will complete a scholarly Plan B project. Plan B projects emerge from practice, typically involving a problem of interest within a student's school, classroom, or work site. Admission in the Curriculum and Instruction graduate program required.

Prerequisite: graduate standing.

National Board Certificate

EDCI5890 - Directed Professional Study

Credits: 1-6
Max Credit (Max. 9)

Provides additional opportunity for the student to pursue advanced graduate work through independent research. Projects are done under the direction of a graduate faculty member offered in the areas of business education and distributive education.

Prerequisite: consent of the instructor, the department head, and graduate standing.

EDCI5515 - National Board Certification Seminar

Credits: 1-3
Max Credit (Max. 12)

Provides information and support for teachers in the National Board Certification process. Content includes: reviewing, understanding, and applying best practice research; development of differentiated instruction; integration of formative assessment and reflective practice; understanding problem solving across the curriculum; and focuses on writing strategies for National Board Certification success.

Prerequisite: graduate student standing.

C&I Program Core:

EDCI5500 - Classroom Assessment

Credits: 3
Provides reading, discussion, and research examining a variety of classroom-based assessments with a focus on the alignment of teaching, learning, and classroom assessment at the P-12 level.

Prerequisite: graduate status.

EDCI5000 - Principles of Curriculum

Credits: 3

Provides an overview of general understandings fundamental to the study of all aspects of curriculum to include pre-school, kindergarten thru high school. Consideration is given to the various factors, institutions and societal issues that impinge on and affect the decision making processes of curriculum developers.

Prerequisite: graduate standing in education.

EDCI5450 - Issues in Multicultural Education

Credits: 3

Provides future and inservice teachers and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group. Additional assignments are required of students completing this course for graduate credit.

Dual Listed EDCI 4450.

Prerequisite: 12 credit hours of education classes.

EDCI5790 - Learning Theories and Instructional Principles

Credits: 3

This course focuses on making connections between theoretical perspectives on teaching and learning, empirical work, and the actual practice of teaching. As a result, learners should expect to examine multiple learning theories, read research based on those theories, explore pedagogy that grows out of these theories, and integrate theory into practice in their own classrooms.

Prerequisite: graduate standing.

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

OR

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

EDCI5400 - Midpoint Portfolio Reflection

Credits: 1

Allows students to reflect, self-assess, and receive guidance related to their progress in the C&I Master's Program. Requirements include: self assessment of progress toward the C&I program outcomes, completion of a series of research abstracts, formation of the students' graduate committees and approval of programs of study.

Prerequisite: admission to the Curriculum and Instruction Master's Program and completion of at least 12 hours of EDCI coursework.

Areas of Concentration

- Certificates or Endorsements
 - Early Childhood Special Education (see www.uwyo.edu/ste/earlychildhood-education/earlychildhood-special-education.html)
 - English as a Second Language (see www.uwyo.edu/ste/curriculum-instruction/english-second-language/)
 - Literacy (see www.uwyo.edu/ste/elementary-education/endorsements/certificateof-literacy.html)
- Content Studies - Math, History, Art, Music, Science, Teachers of American Indian Children
- Curriculum and Instruction Studies - focus on special education, educational leadership, diversity studies, counseling, instructional technology, etc.

Additional Information:

About Curriculum and Instruction

The UW Master of Arts in Education with the curriculum and instruction concentration is for educators with a minimum of one year teaching experience who are looking to gain a variety of pedagogical knowledge and research experience. The degree will give you the knowledge and research expertise to take your passion into a career of continuous exploration and improvement.

Offering a highly customizable program, UW's MA in curriculum and instruction allows you to pursue additional expertise in your content area, add endorsements such as literacy, ESL, early childhood special education or develop specialties in content or curriculum. You can even use your degree as a pathway to National Board Certification, which also meets your capstone project requirement.

The program is offered fully online making it possible for you to advance your career while also maintaining your current teaching schedule.

Program Specific Admission Requirements

Applications for the Master of Arts degree in Education with an Area of Concentration in Curriculum and Instruction are reviewed for admission two times each year. To be considered for admission, applications must be completed and submitted by September 1st for spring semester admission, and February 1st for summer/fall admission. Incomplete applications will not be considered. International students are encouraged to apply a semester earlier to allow sufficient time for paperwork. All applications will be completed through the UW Admissions website: <http://www.uwyo.edu/admissions/apply.html>.

Applicants are required to submit the following materials:

- letter of intent;
- academic resume, including information about teaching experience;
- contact information for three references;
- TOEFL or IELTS scores (for international, non-native English speaking applicants); Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.
- college transcripts.

In order to be considered for admission, applicants must meet the following minimum requirements:

- Score of 3 or 4 on a letter of intent. This letter serves as a writing sample, and takes the place of GRE scores in the admission process;
- One year of P-12 teaching experience or its equivalent. This requirement may be waived for applicants who have been admitted to the Teaching Elementary School or the Teaching Secondary Content Graduate Certificate program. Such applicants will be considered for admission on a conditional basis, pending successful completion of the Teaching Elementary School or Teaching Secondary Content Graduate Certificate program;
- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent bachelor's degree from an accredited institution;
- International, non-native English speaking applicants must have a TOEFL score of 525 (paper-based), 197 (computer exam) or above or an IELTS score of at least 6.5. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

MA Program Requirements

Curriculum & Instruction

The Master of Arts degree in Education is offered in two options:

- Plan A, which requires writing a thesis
- Plan B, which requires a written paper based on a scholarly project

A minimum of 32 semester hours beyond the Bachelor's degree is required. All course work and degree requirements must be approved by the student's graduate committee.

The Master of Arts degree in Education consists of a set of core courses and one of three emphases: Certificates/Endorsements, Content Studies, or Curriculum Studies. All students are required to complete the core courses and one of the three emphases. Specific courses are outlined below.

View the M.A. Degree Program Overview and Application Instructions packet for forms and details.

Core Courses: (17-20 credit hours) students are required to take core courses:

- Assessment (3 credit hours): EDCI 5500 - Classroom Assessment
- Curriculum (3): EDCI 5000 - Principles of Curriculum
- Diversity (3): EDCI 5450 - Issues in Multicultural Education
- Instruction (3): EDCI 5790 - Advanced Instructional Strategies (Learning Theories & Instructional Principles as of Fall 2017)
- Research (3): EDRE 5530 - Intro to Research or EDRE 5550 - Action Research
- Midpoint Review (1): EDCI 5400 - Portfolio Reflection (1) (EDCI 5400 represents a midpoint evaluation and must be taken no later than 2 semesters [may include a summer semester] before graduation).
- Capstone Experience (1-4): Plan A thesis (4) OR Plan B project (2) OR National Board Certification (1-3). Students, as guided by an academic advisor, may pursue a Plan A thesis or a Plan B non-thesis. Generally, one can think of the Plan A thesis as a research project that emerges when a student finds that a problem of interest has not been addressed in the research literature. A Plan B non-thesis is a research project that emerges from practice, typically involving a problem of interest within a student's school, classroom, or work site.

Emphases (15-18 credit hours with approval from Committee)

Certificates/Endorsements

- Early Childhood/ECSE (25-26 hours required-18 may be applied to elective credit)
- English as a Second Language (15 credit hours)
- Literacy (18-21 credit hours)

Content Studies (15 to 18 hours)

This specialization is intended for those practicing teachers who are pursuing the "highly qualified" status. Coursework will primarily be taken in students' content areas (e.g., History, English, etc. 4000 and 5000 level courses).

Curriculum Studies (15 to 18 hours)

This specialization is intended for those who are interested in focusing on issues of curriculum and instruction.

- Potential coursework:
 - National Board Certification (See below for more information)
 - EDCI 5800 - Curriculum Development
 - Research Methods
 - Educational Leadership
 - Counseling
 - Instructional Technology
 - Special Education
 - Literacy
 - English as a Second Language (ESL)
 - Diversity
 - Teachers of American Indian Children
 - Graduate level content courses

Capstone Experience

- EDCI 5960 Thesis/Plan A (4 credit hours)
- EDCI 5090 Plan B Research/Plan B project (2 credit hours) (EDCI 5890 Directed Professional Study prior to Summer 2017)
- EDCI 5890 Directed Professional Study/National Board Certification (1 credit hour)

TOTAL: 32 minimum semester hours

Areas of Emphasis

Certificates/Endorsements Emphasis

The Certificates/Endorsements emphasis allows practicing teachers to take coursework toward eligibility for certificates/endorsement in Literacy, Early Childhood Education, English as a Second Language, or Teachers of American Indian Children through the state of Wyoming's Professional Teaching Standards Board. These endorsements are only available to teachers who hold valid teaching certification in the state of Wyoming.

Content Studies Emphasis

The Content Studies emphasis is designed to allow practicing teachers to pursue further education in a particular content area - such as history, English, math, etc. -- through 4000 and 5000-level courses in those content areas. This coursework may be helpful particularly in the case of practicing teachers who are pursuing "highly qualified" status in a content area. Please note that this option is based on availability of graduate courses in other departments that the student may be interested. There is no guarantee of outreach course availability.

Curriculum Studies Emphasis

The Curriculum Studies emphasis is designed for practicing educators who are interested in gaining knowledge and expertise related to curriculum and instruction.

National Board Certification

FREQUENTLY ASKED QUESTIONS

Will there be classes offered to help me proceed through the National Board Certification process?

Yes, a series of seminars and workshops are offered through the Wyoming National Board Certification Initiative each semester. Information about these seminars and workshops is posted and updated on the Wyoming NBC website: <http://www.wnbc.org/>. Graduate level Curriculum and Instruction credit is available for these seminars (courses listed as EDCI 5515). These courses are designed to support teachers as they grow as professionals and simultaneously proceed through the Board Certification process and the UW Master's program.

Where will the classes be offered?

The classes are offered around the state of Wyoming to allow participation across the state. Dates and locations for upcoming seminars and workshops can be found on the Wyoming NBC website: <http://www.wnbc.org/>. Participants enroll in the courses through UW Outreach Credit Programs (toll free phone number: 1-800-448-7801). Up to 9 total credit hours of the seminars can be taken by enrolled graduate students. Up to 9 total seminar/workshop credit hours may be applied as electives in the Curriculum and Instruction Master's program.

Who will teach these classes?

The seminars are taught by Barbara Maguire, a Nationally Board Certified teacher and expert in the NBC process.

How many times can I take the NBC class?

Graduate students/National Board Candidates can enroll in the seminars as many times as necessary/desired. For those seeking graduate degrees, up to 9 credits can be applied to the Curriculum and Instruction Master's degree program as elective hours dependent upon the student's committee approval.

What about tuition?

Students will pay regular graduate tuition for the seminar classes. The current UW fee schedule can be found at the following website: http://www.uwyo.edu/sfa/cost_of_attendance/

Will I need to complete a Thesis or Plan B paper to finish my C&I degree? No, the NBC Portfolios will be accepted in Lieu of a Plan B Paper for teachers pursuing NBC Certification and a UW Master's degree simultaneously. This acceptance is dependent upon committee approval (not acceptance by the National Board). An agreement to utilize this procedure and maintain portfolio confidentiality has been reached between UW and the NBPTS (National Board for Professional Teaching Standards). The NBC portfolio must be submitted and defended (in a meeting with the student's graduate committee) prior to initial submission to the NBPTS. The committee's portfolio copies will be destroyed after the defense.

Note: The Rubric for Assessment of the presentation is provided below.

If I am already a National Board Certified teacher, can I apply my NBC work retroactively to a graduate degree?

No, the program is designed for those working on National Board Certification and a C&I Master's degree simultaneously.

How do I apply for a UW Curriculum and Instruction Graduate Program?

The graduate application and other information can be found here.

What if I have Additional Questions?

If you have additional questions, please contact the UW Department of Curriculum and Instruction (curriculum@uwyo.edu; 307-766-6371).

Assessment Checklist for National Board Certification (NBC)

Portfolio & Presentation

Committee members will evaluate the following areas and will determine if the student/NBC candidate accomplished each of these aims/activities at a level sufficient to warrant the substitution of the NBC portfolio and presentation for the Plan B requirement. S/U (Satisfactory/Unsatisfactory) will be assigned for each area, and an overall evaluation of "S" must be achieved for portfolio to serve in lieu of the Plan B paper.

_____ **Overall evaluation of the portfolio and presentation as suitable substitutes for Plan B**

paper/project and defense

Presentation of NBC Portfolio to Master's Committee:

_____ Student provides a brief overview of National Board Certification process and portfolio

_____ Student describes process of working on the portfolio (including connections to C&I courses

taken, time commitment, assessments and data analysis, and reflections)

_____ Student presents at least one explicit connection between the portfolio documentation and his/her C&I Master's Degree coursework (e.g. assessment strategy learned in literacy specific course was used to evaluate student work included in NBC portfolio), and explains ways processes informed each other

_____ Student describes challenges, pleasures, difficulties associated with the NBC process

_____ Student summarizes learning derived from portfolio process and completion

- How to get started

Education, M.A., Concentration in Educational Leadership

The MA in Educational Leadership is an all online program to become a K-12 principal with a Wyoming principal certification.

Core Courses

The master's is a 33 credit program which includes the four core classes, 3 credits each:

EDAD5010 - Leadership for Curriculum Development

Credits: 3

Focuses on leadership skills that support curriculum and curriculum development in student learning and achievement. Key topics include: K-12 curriculum alignment; incorporating standards and community values; curriculum development, implementation, and evaluation; equity and access for diverse learning needs; and effective communication about curriculum.

Prerequisite: Admission to program or consent of instructor.

EDAD5020 - Leadership for School Organization

Credits: 3

Focuses on organizational leadership. Topics include: history of organizational leadership, leadership styles, change process, strategic planning, federal, state, and local governance as well as politics, power and policy, and school operations, to include budget, facilities, scheduling, recruitment, selection and induction.

Prerequisite: Admission to program or consent of instructor.

EDAD5030 - Leadership for School and Community Relations

Credits: 3

Focuses on the leadership role of the principal in building relations with students, staff, family, and community. Topics include school culture and climate, community and family involvement, public relations and communications, student discipline, and crisis management.

Prerequisite: admission to program or consent of instructor.

EDAD5040 - Leadership for Instruction

Credits: 3

Focuses on the principal as instructional leader. Topics include: developing a school vision of learning; employing effective instructional strategies, supervision and evaluation of teacher performance; integration of supervision, evaluation, and student achievement with professional development and professional learning communities, and instructional trends and issues within diverse learning communities.

Prerequisite: Admission to program or consent of instructor.

Other Courses

EDRE5580 - Supervised Internship

Credits: 1-8

Max Credit (Max. 12)

EDEX5720 - Special Education Law

Credits: 3

Provides prospective special education teachers and support personnel with overview of important case and statutory law in special education.

Prerequisite: Admission to program or consent of instructor.

EDAD5050 - Leadership for Democratic Schools

Credits: 3

Designed to increase awareness of future school leaders of the principles of equity and excellence in education focused on democratic practices. Topics include democratic educational practices, ethical leadership, renewal of public schools, and educational leadership in urban, suburban, and rural communities, and in ethnically and socio-economically diverse settings.

Prerequisite: graduate standing.

EDAD5150 - Assessment, Accountability, and Student Learning

Credits: 3

Focuses on the knowledge and skills necessary to lead schools in the alignment of standards, assessment, and

instruction. Topics include analysis and interpretation of assessment results and educational data, recent history and current context of educational accountability in Wyoming, role of assessment and accountability in improving student learning.

Prerequisite: graduate standing.

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

EDAD5080 - Introduction to School Law

Credits: 3

This course provides legal foundations of U. S. public schools and examines general principles of statutory and case law and applies judicial decisions to educational environments. Additionally, the course focuses on legal responsibilities, constraints, and opportunities for school leaders.

Prerequisite: admission into UW Educational Administration, K-12.

Additional Information:

As an educator, you're already making a difference. But what if you could influence what happens on the building-level? Could you be the person who helps teachers feel more empowered? Who knows how to bridge differences, build consensus and develop a school atmosphere where faculty, staff and families support one another in their common mission to nurture citizenship, critical thinking and a thirst for knowledge? Emphasizing courses in leadership issues specific to education such as instructional leadership, curriculum development and community relations, UW's online educational leadership program will also ground you in practice through an in-depth supervised internship in elementary, middle and high schools.

Application Deadlines

February 1 - If applying for following fall, or spring semester.

September 1 - If applying for following spring, or fall semester.

Admission Requirements

Domestic Students^{SEP}

GPA: 3.0^{SEP}

GRE: no requirement

International Students^{SEP}

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

^{SEP}GRE: 147 min in each subtest and 4.0 minimum on analytical writing

Additional Requirements

Must have a minimum of 3 years teaching experience

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

- Access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)
- Agree to admissions terms and submit your application

Step 2: Submit official copies of transcripts to UW Admissions.

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A letter of intent describing why you want to be an educational leader
- A current resume
- Copy of current teaching certificate
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)
- A completed principal program application. Contact the School of Counseling, Leadership, Advocacy and Design for Application; Tiffany LeGal.
- A superintendent approval form signed by the superintendent of the district where you plan to perform your internship (scan and upload) Contact the School of Counseling, Leadership, Advocacy and Design for Application; Tiffany LeGal.
- Current recommendation letters addressing leadership skills from three different referees (the portal will send a request to each of them after you enter their email addresses):
 - two from referees who are familiar with your leadership skills
 - current principal

Education, M.A., Concentration in Higher Education Administration

The MA in Higher Educ Admin will give you a strong foundation in the history and "business" area's in America's higher learning system while gaining expertise in learning theory and adult education.

Program Specific Degree Requirements Master's Program

The M.A. program is a professional degree program that does not require a Plan A (thesis) or Plan B.

Required Courses

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

HIED5000 - Community College Leadership

Credits: 3

This course will introduce students to the challenges associated with instructional leadership at the community college. The course will identify and distinguish the macro (organizational) level of change but also the micro (individual) level of change in community college settings.

Prerequisite: Admission into MA program.

HIED5020 - Higher Education Systems

Credits: 3

The purpose of this course is to provide students with an overview of higher education as an industry, as a cultural institution, and social stability while also promoting social mobility. Special focus is given to the stratification and diversity of American higher education.

Prerequisite: Admission into MA program.

HIED5030 - Continuing and Professional Education

Credits: 3

This course will introduce graduate students to the main issues, trends, and problems that have defined the field of continuing and professional education. The course will also provide students with the foundational knowledge and skills needed to administer continuing and professional education programs.

Prerequisite: Admission into MA program.

HIED5040 - Higher Education Staffing

Credits: 3

This course provides students with a theoretical and practical overview of the research and best practices associated with the development of instructional staff at higher education institutions. Special attention is given to the use of mentoring higher education instructional staff.

Prerequisite: Admission into MA program.

HIED5050 - Workforce Training

Credits: 3

In this course, students study the process of preparing objectives, retaining instructional staff, defining content, selecting learning activities, and evaluating student learning in workforce education programs delivered by higher education institutions.

Prerequisite: Admission into MA program.

HIED5060 - Program Budgets and Instructions

Credits: 3

The purpose of this course is to familiarize managers with the core tasks needed for effective financial planning. Students are also introduced to the budgeting process in various public higher education institutions.

Prerequisite: Admission into MA program.

HIED5240 - Teaching Adults

Credits: 3

Developed upon the premise that individuals teach as they would expect to be taught. Focuses on methods for teaching adults in formal as well as informal settings. The learning styles literature is reviewed and implications for instructional settings are analyzed. Participants also critique their teaching performance through videotaped sessions.

Prerequisite: graduate standing.

HIED5610 - Planning and Evaluation of Instructional Systems

Credits: 3

Participants investigate the concepts, issues, methods, and attitudes involved in the planning and evaluation of instructional systems. Topics covered include planning processes, theory and technique, promotion, evaluation, setting objectives, and trend analysis.

Prerequisite: graduate standing.

HIED5660 - Community College

Credits: 3

Concerns the philosophy, organization, program, and administration of the community college.

Prerequisite: graduate standing and consent of instructor.

HIED5090 - Masters Capstone

Credits: 3

Provides exposure to situations students will likely encounter professionally. It establishes a forum where students apply and refine theories, principles, and skills learned during their programs. Students examine and critique current scholarship and document general degree specific competencies.

Cross Listed ITEC 5090.

Prerequisite: Check with advisor and complete required sequence of courses for Educational Administration (Adult and Postsecondary Education) or Instructional Technology masters degree programs prior to enrollment.

Additional Information:

Adult learning, rural access to continuing education, workforce training and institutional operations are just some of the issues you'll explore in UW's higher education administration master's program. Plus, the online master's degree program in higher education administration at the University of Wyoming balances theory with practice to give you the knowledge and skills you need to enter the field or advance at your current institution. Most importantly, you will gain an understanding of where you can make a difference as a leader in the vast field of post-secondary education. By the time you complete your program, you will be ready to level up your career and take your place as a skilled administrator in higher education, government or the nonprofit sector.

Application Deadlines:

January 15 - Fall/Summer

May 15- Fall

September 15 - Spring

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal.

1. Click here to access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
2. After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
3. Please complete the contact, academic, residency information, etc.
4. Submit the \$50 application fee
5. Submit ALL required documents to the online document portal (see below for details)

Step 2: Submit official copies of transcripts to UW Admissions.

Include ALL documents listed below in order for your application to be considered

- - **A letter of application.** You should discuss your professional and academic goals as well as share your perceptions about how the MA in Higher Education Administration (MA-HIED) will help in achieving those goals. Any special issues that you think the admissions committee should know about (e.g., undergraduate GPA below 3.0, past graduate HIED courses taken under the "six-credit rule", etc.) should also be highlighted.
 - **A professional resume or curriculum vitae.** No one format is "correct", but the information most important to include is work experience.

- **Three references provided.** Full contact information for three references who might speak to your academic potential and/or potential for a career in higher education, including an active email address, should be offered in a separate document clearly marked as "References". Once the Office of Admissions has this information, they will contact the references via email and request that they complete a questionnaire and upload a letter. It is a good idea to check with Admissions in advance of the admissions deadline regarding any reference letters that may still be outstanding, and follow up with any of those references.

Education, M.A., Concentration in Literacy Education

The M.A. in Educ with a concentration in Literacy Education focuses on research in literacy development, instruction and provide the practical tools needed to apply that knowledge in your classroom, school, or district.

K-6 Focus

TOTAL: 33 minimum semester hours

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6

Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3

Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5320 - Writing Instruction K-5

Credits: 3

Examines contemporary research and practice in elementary writing instruction. Students will read and discuss cutting-edge instructional and assessment methods addressing writing skills and processes related to transcription, spelling, written language conventions, and genre-based writing. In addition, students will analyze their current writing instruction and develop, implement, and evaluate new approaches.

Prerequisite: graduate standing.

EDCI5360 - History of Lit Res & Instruction

This course traces the historical lineages of research and practice in literacy. Students will explore major paradigm shifts and epistemological perspectives related to various domains of knowledge within literacy research and instruction across time. Implications for current in-school and out-of-school practices are examined.

Prerequisite: Graduate Standing

EDCI5365 - Trends in Literacy Research

Credits: 3

Max Credit 3

Examines teachers as consumers of literacy research and the organizations that provide access to literacy research.

Analyzes the current science of reading movement and key recent research initiatives that impact literacy teaching.

Restricted Graduate Standing

EDCI5380 - Literacy Leadership

Credits: 3

Examines the role of educators as literacy leaders (e.g., specialist, coach, administrator, teacher leader) as it relates to students, parents, staff, and other stakeholders. Analyzes current trends as they affect the role of educators who serve as literacy leaders in school contexts.

Restricted Graduate Standing

Prerequisite: Graduate Standing

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

OR

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

EDCI5090 - Plan B Research

Credits: 1-3

Max Credit (Max. 9)

Under the guidance of a committee chair, the enrolled graduate student will complete a scholarly Plan B project. Plan B projects emerge from practice, typically involving a problem of interest within a student's school, classroom, or work site. Admission in the Curriculum and Instruction graduate program required.

Prerequisite: graduate standing.

6-12 Focus

TOTAL: 33 minimum semester hours

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3

Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5370 - Writing Instruction 6-12

Credits: 3

Max Credit 3

Examines contemporary research and practice in writing instruction at the middle and high school level. Students will read about and discuss cutting-edge instructional and assessment methods addressing writing skills and processes related to transcription, spelling, written language conventions, and genre-based writing. In addition, students will analyze their current writing instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Restricted Graduate Standing

Prerequisite: Graduate Standing

EDCI5360 - History of Lit Res & Instruction

This course traces the historical lineages of research and practice in literacy. Students will explore major paradigm shifts and epistemological perspectives related to various domains of knowledge within literacy research and instruction across time. Implications for current in-school and out-of-school practices are examined.

Prerequisite: Graduate Standing

EDCI5365 - Trends in Literacy Research

Credits: 3
Max Credit 3

Examines teachers as consumers of literacy research and the organizations that provide access to literacy research. Analyzes the current science of reading movement and key recent research initiatives that impact literacy teaching.

Restricted Graduate Standing

EDCI5380 - Literacy Leadership

Credits: 3
Examines the role of educators as literacy leaders (e.g., specialist, coach, administrator, teacher leader) as it relates to students, parents, staff, and other stakeholders. Analyzes current trends as they affect the role of educators who serve as literacy leaders in school contexts.

Restricted Graduate Standing

Prerequisite: Graduate Standing

EDRE5530 - Introduction To Research

Credits: 3
Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

OR

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

EDCI5090 - Plan B Research

Credits: 1-3

Max Credit (Max. 9)

Under the guidance of a committee chair, the enrolled graduate student will complete a scholarly Plan B project. Plan B projects emerge from practice, typically involving a problem of interest within a student's school, classroom, or work site. Admission in the Curriculum and Instruction graduate program required.

Prerequisite: graduate standing.

Additional Information:

The UW M.A. in Education is offered fully online with a concentration in Literacy Education will help you become an expert literacy educator who has a deep knowledge of research in literacy development and instruction and the practical tools needed to apply that knowledge in your classroom, school, or district. The program consists of 11 courses, six of which constitute the UW Literacy Certificate program, which leads to the Wyoming state Reading Endorsement. Thus, while earning your master's degree, you will also complete the coursework necessary for the state Reading Endorsement. Throughout the program, you will interact with the UW Literacy Education faculty, a group of recognized literacy researchers who engage in many collaborative projects with Wyoming teachers.

Program Admission Requirements

Deadlines

The Master of Arts degree in Education with a Concentration in Literacy Education program utilizes rolling admissions. Applications are reviewed whenever they are submitted, and, upon acceptance, a student may immediately register for courses for an upcoming semester.

Minimal Admissions Criteria

Meeting minimal admissions criteria does NOT automatically ensure admission to the program.

- Bachelor's degree.
- A minimum 3.0 GPA on a 4.0 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- A TOEFL score of 540 or above or an IELTS score of 6.5 or above is required for international students.
- Submission of all required supplemental materials

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Required Supplemental Materials

Educators wishing to apply for admission to the Master of Arts in Education with Concentration in Literacy Education must complete the Graduate Admissions application and pay the required fee. This application is available online through the admissions website.

In addition, applicants must submit the following supplemental material:

- an academic resume
- college transcripts
- One letter of reference (someone familiar with your academic or practitioner work in education)

International students must also submit passing scores on the Test of English as a Foreign Language (TOEFL).

All application materials can be uploaded to the online application. [Click here](#) for UW Graduate International Admissions information.

Guidelines for Academic Resume

Include the following in your resume:

- Personal Information: Name and Contact Information (Address, Phone numbers, email)
- Education: Institution, City, State, Dates Attended, Major, and Degree
- Work Experience: Dates, Job Title, Employer, City, State
- Professional experiences such as: Publications, Presentations and Grants; Continuing Education Activities, Awards/Honors Received; Community and Volunteer Activities; Professional Memberships; other

Program Requirements

The Master of Arts degree in Education with Concentration in Literacy Education consists of the 11 specific courses listed below.

Education, M.A., Special Education

The online UW Master of Education with a concentration in special education is a generalist program that will prepare you to work with K-12 students across a range of special needs, qualifying you to apply for a teaching endorsement with PTSB.

Required Courses

Required Courses (35 credit hours)

Program Core

Students must take all courses listed below.

- EDEX 5071 Teaching Students with Mild/Moderate Disabilities (3 credit hours)
- EDEX 5080 Teaching Students with Severe to Low Incidence Disabilities (3 credit hours)
- EDEX 5720 Special Education Law (3 credit hours)
- EDEX 5355 Assessment (3 credit hours)
- EDEX 5100 Practicum I (3 credit hours)
- EDEX 5110 Positive Behavior Support and Management (3 credit hours)

- EDEX 5120 Academic Instruction in General Education for Students with Disabilities (3 credit hours)
- EDEX 5200 Practicum II (3 credit hours)
- EDEX 5000 Collaboration/Professional Interdisciplinary Relationships (3 credit hours)
- EDEX 5250 Assistive Technology (2 credit hours)
- EDEX 5260 Transition Planning (2 credit hours)

Research Courses

Students must choose 3 credit hours from courses listed below.

- EDEX 5150 Research Applications in the Classroom 3
- EDRE 5530 Introduction to Research 3
- EDRE 5550 Action Research 3

Other courses

Students must choose one credit hour from the below courses.

- PRST 5920 Continuing Registration on campus (1 credit hour)
- PRST 5940 Continuing Registration off campus (1 credit hour)

Additional Information:

Application Deadlines

June 15 - If applying for the fall semester.

September 15 - If applying for the spring semester.

Admission Requirements

Domestic Students^[1]_{SEP}

GPA: 3.25^[1]_{SEP}

GRE: no requirement

International Students^[1]_{SEP}

TOEFL: 550 minimum written or 80 minimum online, OR IELTS: 6.5 minimum overall score

Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency.

^[1]_{SEP}GRE: 900/291 minimum

Additional Requirements

Current teaching certificate from the United States and must be K-12 (any grade band or subject area)

How to Apply

Step 1: Apply to UW and the School of Counseling, Leadership, Advocacy and Design through the online applicant portal. When filling out your application please refer to the following document: Guidelines and requirements for applications.

- Access the UW graduate applicant portal. Make sure to use the corresponding application admittance semester indicated above.
- After completing the initial information page, you will receive an email from the system including a link and your temporary username and password.
- Please complete the contact, academic, residency information, etc.
- Submit the application fee
- Submit ALL required documents to the online document portal (see below for details)
- Agree to admissions terms and submit your application

Step 2: Submit official copies of transcripts and test scores to UW Admissions.

- Official transcripts from all postsecondary institutions should be requested and sent to UW Admissions at the following address: *University of Wyoming Admissions*^[1]_[SEP]; 1000 E. University Ave.; ^[1]_[SEP]Laramie, WY 82071

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A 3-4 page, double-spaced professional writing sample (contact Tiffany LeGal in Counseling, Leadership, Advocacy and Design for the coring rubric), including:
 - A description of your professional goals
 - An explanation of your commitment to Special Education
 - An explanation of your philosophy of education
 - An explanation of how this Special Education program fits your goal
- A complete and current resume, including:
 - Educational experiences
 - Work experiences
 - Activities/honors
 - Other relevant information
- Program application. (download here)
- Copy of current teaching certificate
- Signed Memo of Understanding (see student handbook)
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)

All classes for the Master of Art in Special Education program are taught using distance delivery methods so you can enjoy the convenience of expanding your education while working full-time in your current position. Upon completion of this program, students will be eligible to apply to the Wyoming Professional Teaching Standards Board for an endorsement in K-12 Special Education.

Education, M.S., Concentration in Learning, Design, and Technology

The PhD in Learning, Design and Technology will provide students with advanced research methods to study and identify education opportunities in various settings while developing and evaluating new ways to address those opportunities.

Required

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

ITEC5000 - Intro to the Field of Instructional Technology

Credits: 3

This course details faculty expectations and students' responsibilities in instructional technology graduate degree programs. It builds a knowledge base about program milestones, library research, APA writing guidelines, academic journals, and professional opportunities. ePortfolios are introduced and initiated to assess student progress over time.

Prerequisite: graduate standing in Instructional Technology.

ITEC5010 - Instructional Technology

Credits: 3

An introductory survey course in instructional technology. Covers psychological principles in communication theory, message design and instructional theory with emphasis on the application of technology toward achieving communications objectives. Includes hands-on experience with current presentation tools and techniques for a variety of instructional deliveries.

Dual Listed ITEC 4010.

Prerequisite: junior standing.

ITEC5020 - Technology and Distance Education

Credits: 3

A survey of the uses of telecommunication systems and other technologies in distance education. Covers instructional strategies, management concerns, and special issues associated with distance learning programs.

Prerequisite: graduate standing and consent of instructor.

ITEC5160 - Introduction to Instructional Design

Credits: 3

An introduction to theory and practice of instructional design. Intensive study of the instructional design process and application of the process to solve an instructional problem.

Prerequisite: graduate standing.

ITEC5350 - Multimedia Development

Credits: 3

An introduction to techniques, software, and applications used in the design, manipulation, and development of multimedia artifacts for instructional purposes. This course includes accelerated, hands-on activities to practice and apply message design principles in multimedia settings.

Prerequisite: graduate standing.

ITEC5320 - Message Design

Credits: 3

Introduces theoretical framework and skills necessary to evaluate and create visual representations of information. Topics of application include visual literacy, learning theories, instructional design, instructional technology, and information presentation.

Prerequisite: graduate standing.

ITEC5510 - Communication in Distance Education

Credits: 3

An introduction to the theory and practice of using communication tools for distance education purposes. Instructional issues related to the design, development, use, and evaluation of communication tools in public school, business, and other distance delivery settings are emphasized.

Prerequisite: graduate standing.

ITEC5550 - Theory of Change

Credits: 3

Explores the literature and research base within the theories, models, and processes of change, the diffusion of innovations, and the human side of educational reform. Learners explore practical applications of theoretical and research findings to behavioral change, diffusion of innovations, and principles and practices of planned change.

Prerequisite: graduate standing.

ITEC5560 - Design and Development of Instructional Systems

Credits: 3

Advanced study in instructional systems theory and design. Study and application of instructional design models used in education and training.

Prerequisite: ITEC 5160, graduate standing, and consent of instructor. Previous course work in educational psychology/learning theory is desirable.

ITEC5090 - Masters Capstone

Credits: 3

Provides exposure to situations students will likely encounter professionally. It establishes a forum where students apply and refine theories, principles, and skills learned during their programs. Students examine and critique current scholarship and document general degree specific competencies.

Cross Listed ADED 5090.

Prerequisite: Check with advisor and complete required sequence of courses for Educational Administration (Adult and Postsecondary Education) or Instructional Technology masters degree programs prior to enrollment.

Additional Information:

As a discipline, learning, design and technology translates teaching and learning theories into effective instruction across all ages and settings.

Offered entirely online, the UW master's degree program in learning, design and technology stresses rural access, distance delivery and diverse learning environments, making it possible for you to conveniently acquire the background and technology skills to become an instructional designer/technologist. Through hands-on learning and field work, you will not only develop instructional design proficiency, you will also create materials that demonstrate your abilities to produce dynamic, effective educational products.

Education, Ph.D., Concentration Learning, Design, and Technology

The PhD program in Learning, Design and Technology will prepare you to develop and analyze learning experiences across a variety of platforms and equip you with college-level teaching skills to inspire coming generations of instructional designers.

Required Courses

PROGRAM OF STUDY (REQUIRED 81 CREDITS)

Foundational Knowledge Base (30 credit hours) Students may transfer up to 30 credit hours toward the total program from a related master's degree. Transfer credits need to be accepted by the program faculty. If a student lacks credits in this area, they may take courses available through the Learning, Design, and Technology MS program.

LDT Doctoral Core (12 credit hours) Students must successfully compete 4 courses in Learning, Design, and Technology.

- ITEC 5870 (LDTE 5700): Issues, Practice, and Research in LDT
- ITEC 5870 (LDTE 5710): Transformational Learning
- ITEC 5870 (LDTE 5730): Game Design and Development, or LDTE 5720: Critical Perspectives and Applications of Technology Integration
- ITEC 5760 (LDTE 5760): Instructional Design Applications
- **new LDTE prefix is in the process of phasing into the program beginning Fall 22; ITEC is still active and counts in the program of study until transition is complete.*

LDT Electives (9 credits) Students select 9 credits of related course work in collaboration with their advisor. Elective courses should support the student's area of interest and can be from programs outside Learning, Design, and Technology.

- Examples of Electives:
 - ITEC 5070 (LDTE 5070): Trends _____ (3 credit hours)
 - LDTE 5750: Technology Innovations: Past, Present, and Future (3 credit hours)
 - ITEC 5870 (LDTE 5870):Seminar (1 to 3 credit hours)
 - ITEC 5880 (LDTE 5880): Special Problems (1 to 3 credit hours)
 - ITEC 5890 (LDTE 5890): Directed Professional Study (1 to 3 credit hours)
 - EDCI 5790: Learning Theories and Instructional Principles (3 credit hours)
 - EDAD 5750: Educational Leader for the Board and Community (3 credit hours)
 - HIED 5240: Teaching Adults (3 credit hours)
 - HIED 5260: Educational Issues Race, Class, and Gender (3 credit hours)
- **new LDTE prefix is in the process of phasing into the program beginning Fall 22; ITEC is still active and counts in the program of study until transition is complete.*

Research Methods (15 credit hours)

Students successfully complete 15 or more credit hours in Educational Research

Required Research Core:

- EDRE 5600 Ed Research 1: Descriptive Research (3 credit hours)
- EDRE 5640 Intro to Qualitative Research (3 credit hours)

Additional Research Courses: Select at least three additional research courses

Quantitative

- EDRE 5610 Ed Research: Group Comparison (3 credit hours)
- EDRE 5620 Ed Research: Correlation (3 credit hours)
- EDRE 5630 Ed Research: Multivariate (3 credit hours)

Qualitative

- EDRE 5645 Phenomenology, Case Study, and Grounded Theory in Qualitative Research (3 credit hours)
- EDRE 5655 Ethnography and Narrative Inquiry in Qualitative Research (3 credit hours)

Mixed Methods

- EDRE 5670 Mixed Methods Research (3 credit hours)

Writing Core (15 credit hours) students must successfully complete 15 or more credit hours in Educational research

- EDCI 5810 Writing for Publication (3 credit hours)
- EDRE 5660 Proposal Writing (3 credit hours)
- PRST 5980 Dissertation Research (variable, 9 credits total)

Additional Information:

In order to be considered for admission, applicants must meet the following minimum requirements:

- Hold a Master's degree from an accredited institute of higher education.
- Score of "Proficient" or higher on a letter of intent describing academic goals, teaching experiences, and reasons for pursuing a doctoral degree at the University of Wyoming. This letter serves as a writing sample.
- Three (3) years of P-12 teaching experience or its equivalent.

- Minimum 3.000 GPA on a 4.000 scale on the applicant's most recent degree from an accredited institution, plus transcripts from all other schools attended.
- GRE minimum score of Verbal:153, Quantitative:144.
- TOEFL score of 540 (paperbased), 76 (internet exam) or IELTS score of 6.5 or above are required for international, non-native English speaking applicants. Until further notice, due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency.

Residency requirement: Four consecutive full-time semesters on campus

The Ph.D. program prepares students for careers in academia. The program consists of: (1) systematic inquiry and research; (2) focused courses and professional experiences in education and related fields; and (3) teaching and other related activities tailored to individual career goals. Students work closely with an advisor and faculty committee to select courses, conduct research, and develop professional experiences.

Effective preparation for the Ph.D. stems from collaborative research and inquiry into topics of mutual interest by students and faculty. The program is structured around a cognitive apprenticeship model. Students spend a major portion of their program working with faculty members on shared research and scholarship.

The Ph.D. program requires a minimum of 81 credit hours beyond the bachelor's degree and includes the following requirements:

- Professional courses: 15 credits
- Program knowledge base: 30 credits
- Research: 15 credits
- Electives: 9 credits
- Dissertation: 12 credits

Candidates may, with the approval of the committee, transfer up to 30 credit hours from previous graduate-level coursework in a closely related field.

Education, Play Therapy Certificate

The University of Wyoming Play Therapy certificate program will ensure you will have the skills required to decode that language and help the youngest and most vulnerable regain their voice.

Required Courses

Play Therapy Graduate Certificate Program Curriculum

This 7-hour graduate level certificate program requires three courses and is designed to be completed in one year.

- * CNSL 5341 Play Therapy and Expressive Arts (3 credit hours) Offered Fall Term
- * CNSL 5342 Theoretical Models of Play Therapy (1 credit hours) Offered J-Term (Winter Break)
- * CNSL 5343 Filial and Family Play Therapy (3 credit hours) Offered Spring Term

Additional Information:

The University of Wyoming Play Therapy certificate program is designed to meet the 150 clock training hours required by the Association for Play Therapy (APT) to become a Registered Play Therapist or a School-Based Registered Play Therapist. Play therapy includes a variety of treatment methods that apply the therapeutic benefits to help children learn to communicate with others, better express feelings, modify behavior, develop problem-solving skills, and learn a variety of ways of relating to others. It can be a powerful tool to help children and families reconnect and heal after a

traumatic experience. The program is designed for completion in one academic year with cohort groups beginning annually in the fall semester.

**APT awards the certification and students must be responsible for meeting their additional requirements in order to gain the credential.*

Education, School Principal Certificate

UW's 24-credit hour online school principal certificate program is designed for licensed teachers who hold a master's degree in education or related area from an accredited college or university.

Additional Information:

If you are ready for school building leadership and passionate about fostering a healthy school environment, you can prepare to become that kind of principal through UW's experiential school principal certificate program while maintaining your current teaching position. Offered online and emphasizing the study of educational leadership with an in-depth principal internship UW's school principal graduate certificate program allows you to acquire the knowledge and experience necessary to earn a Wyoming's Professional Teaching Standards Board endorsement as a K-12 principal.

Application Deadlines:

February 1 - If applying for following fall or spring semester

September 1 - If applying for following spring or fall semester

Apply to: https://universityofwyoming.force.com/ERx_Forms__Portal_Register

Required Documents

Please include ALL documents listed below in order for your application to be considered.

- A letter of intent describing why you want to be an educational leader
- A current resume
- Copy of current teaching certificate
- Unofficial copies of transcripts (official copies should be sent to UW Admissions)
- A completed principal program application
- A superintendent approval form signed by the superintendent of the district where you plan to perform your internship (scan and upload)
- Current recommendation letters addressing leadership skills from three different referees (the portal will send a request to each of them after you enter their email addresses):
 - two from referees who are familiar with your leadership skills
 - current principal

Required Courses (24 credit hours)

- EDAD 5010 Leadership for Curriculum Development (3 credit hours)
- EDAD 5020 Leadership for School Organization (3 credit hours)
- EDAD 5030 Leadership for School and Community Relations (3 credit hours)
- EDAD 5040 Leadership for Instruction (3 credit hours)
- EDAD 5580 Supervised Internship(6 credit hours)
- EDRE 5530 Introduction to Research (3 credit hours)
- EDAD 5080 Introduction to School Law (3 credit hours) Please note: this course is NOT required for students who

were admitted spring 2016 or earlier.

Higher Education

The Higher Education Administration program serves the formal academic leadership development needs of persons aspiring to become managers and leaders in higher education institutions.

Options

- Education, M.A., Concentration in Higher Education Administration
- Education, Ed.D., Concentration in Higher Education Administration
- Education, Higher Education Administration Option, Ph.D.

Additional Information:

This concentration offers the following graduate degrees in education: community college leadership certificate, master of arts (M.A.), doctor of education (Ed.D.), and Philosophy of Education (Ph.D.). The certificate program requires 15 credits beyond a master's degree. The master's program requires 33 credit hours beyond the bachelor's degree and is available online. The Ed.D. is the terminal professional degree in education designed for students who desire to improve their professional practice as educators. The Ed.D. requires a minimum of 75 semester hours beyond the bachelor's degree. A bachelor's and master's degree is required of all students to be admitted to an Ed.D. program. Candidates may, with the approval of the faculty, transfer up to 30 semester hours from previous course work.

Graduate study addresses the challenges faced by institutions and agencies in the design and delivery of post secondary education and the preparation of educators to meet these challenges.

Career Options

Graduates are employed specifically as faculty and administrators in community colleges and universities, adult learning consultants, and continuing professional educators.

Qualitative Research Methods Minor

The Qualitative Research Methods minor will provide graduate students access to a sequence of qualitative methods courses to enhance their understanding of research methods.

Required Courses

EDRE5640 - Introduction to Qualitative Research

Credits: 3

This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3

In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5640

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3

In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini study.

Prerequisite: EDRE 5630

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

EDRE5580 - Supervised Internship

Credits: 1-8

Max Credit (Max. 12)

- Three additional credit hours, which may include special topics qualitative methods seminars in or outside of education (i.e., Field Methods in Anthropology - ANTH 5390; Ethics in Research and Practice - FCSC 5121; Feminist Research Methods - WMST 5210); submit courses for approval to the coordinator of the Educational Research program.

Quantitative Research Methods Minor

The Quantitative Research Methods minor will provide graduate students an opportunity to demonstrate a comprehensive expertise in quantitative research methods with knowledge to teach research methods at the university level.

Required Courses

EDRE5600 - Introduction to Quantitative Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Correlational Research

Credits: 3

Max Credit 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5600

EDRE5630 - Educational Research IV: Multivariate Research

Credits: 3

An advanced educational research, statistics, and measurement course. Design and analysis of results from studies with several dependent and independent variables. Includes multivariate statistics such as MANOVA, discriminant analysis, canonical correlation, multidimensional scaling, structural equation modeling, logit regression. Measurement topics include generalizability theory, item response theory, equating, and standard setting.

Prerequisite: At least one of the following: EDRE 5610 or EDRE 5620

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

EDRE5580 - Supervised Internship

Credits: 1-8
Max Credit (Max. 12)

Certificate

Community College Leadership Certificate

Whether you are already employed or seeking a community college-related career, UW's online community college leadership program offers a background in leadership studies along with courses that address issues in modern community colleges.

Requirements

The Community College Leadership Certificate Program requires 15 credit hours to include the following three required courses:

HIED5660 - Community College

Credits: 3
Concerns the philosophy, organization, program, and administration of the community college.

Prerequisite: graduate standing and consent of instructor.

HIED5600 - Higher Education Finance

Credits: 3
Provides an overview of the economics and finance of higher education in the United States with an emphasis on the analysis of financial policies and current issues at the institutional, state, and national levels.

Prerequisite: Admission to the program.

HIED5650 - Law of Higher Education

Credits: 3
Examine specific legal issues encountered by instructional leaders in higher education settings. Critically examines the basic rights and duties of institutional employees and students. It also explains when and how instructional leaders should refer matters to legal counsel.

Prerequisite: Admission to the program.

Two Elective Courses Are Chosen From the Following:

HIED5260 - Educational Issues Race, Class, and Gender

Credits: 3

Designed to help participants examine the current issues and debates in the literature of race, class, and gender from theoretical and practical perspectives. Related areas of ethnicity, national origin, sexual orientation, language, physical appearance, body size, and other constructs of difference will also be addressed.

Prerequisite: graduate standing.

HIED5630 - Advanced Organizational Leadership

Credits: 3

Examines central issues in advanced organizational leadership to prepare practitioners for leadership roles in educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and an organizational case study.

Prerequisite: Admission to the program.

HIED5640 - Leadership Development

Credits: 3

Examines central issues in the internal dimension of leadership to prepare leaders in postsecondary educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and a biographical case study of a postsecondary educational leader.

Prerequisite: Admission to the program.

HIED5670 - Community College Issues and Leadership

Credits: 3

Examine, analyze, the primary responsibility of instructional leaders at the community college, management of the curriculum. In particular, focus on the remedial/ developmental education programs, general education, the liberal arts transfer curriculum, technical education, and noncredit and contract training programs.

Prerequisite: Admission to the program.

HIED5680 - Issues in Higher Education

Credits: 3

Through examination of historical foundations and current trends, ADED 5680 delves into pressing issues in the academy, including but not limited to topics of tenure, governance, professional colleges, access and equity, curriculum and international needs.

Prerequisite: graduate standing.

Education, Teaching Elementary School (TES)/Teaching Secondary Content (TSC) Graduate Certificates

The College of Education provides two options for individuals with previously earned bachelor's degree to earn a teaching certification: Certificate for Teaching Elementary School (TES) and Certificate for Teaching Secondary Content (TSC).

Standard Course Sequence

Starting June, 2021 the standard sequence is a three-semester long slate of required classes, beginning in the summer, and continuing through the subsequent fall and spring semesters.

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

Summer Courses (BOTH TES & TSC)

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

EDST4000 - Foundations of Education for a Diverse Society

Credits: 3

Designed to acquaint students with philosophical, social, and political influences of North American education; to develop an understanding of the qualities of critical thinking for reflective teaching; to raise awareness of contemporary critical issues in education; to develop an understanding of individual differences, diversity, and multiculturalism. Practicum included.

Prerequisite: earned bachelor's degree from an accredited institution, a cumulative UW institutional GPA of 2.750 or better and EDST 2450.

EDCI5550 - The Art and Science of Teaching

Credits: 3

Students will engage in a variety of experiences related to teacher decision making. Students research a variety of curriculum and instruction topics to discern the range of theories and associated models and develop personal theories and methods they plan to employ in their classrooms.

Prerequisite: successful completion of EDST 4000 and earned Bachelor's degree from an accredited institution.

Practicum

EDCI5551 - Practicum Graduate Certificate

Credits: 1

This 1 credit hour course provides practicum experiences for students enrolled in EDCI 5550.

Prerequisite: Successful completion of, or concurrent enrollment in, EDCI 5550 and earned Bachelor's degree from an accredited institution.

- o The practicum can be taken in the summer in conjunction with EDCI 5550, or in the fall as a stand-alone class.
- o The 30 practicum hours can be met any time between January and December of the calendar year in which the students applies for and is admitted to the graduate certificate program.
- o Students may use up to 24 hours in a classroom substitute teaching (3 full days).
- o Students must spend a minimum of 6 hours of observing a professional teacher in a classroom of the appropriate subject or grade for the student's program (e.g., a student in the English Education program would need to observe a secondary English classroom and teacher for a minimum of 6 hours).
- o Students must complete the practicum hours before the end of the methods classes, and prior to residency. Student teaching residency will not count for the practicum.
- o Students will document the time, and submit proof of practicum hours to the EDCI 5551 faculty when they register for the class.

Fall Courses-ELEMENTARY (TES) (18 Credit Hours)

EDEL4109 - Elementary Humanities Education

Credits: 5

Content and pedagogy to develop the reflective practitioner of teaching humanities in the elementary school. The following themes are addressed: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4109]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EDST 2550; concurrent enrollment in EDEL 4309 and EDEL 4409.

EDEL4309 - Elementary Literacy Education

Credits: 2-5

Max Credit (Max. 6)

Encompasses content and pedagogy to develop the reflective practitioner for teaching literacy in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4309]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; Grade C or better in EDST 3100, successful completion of specific content courses required in major; grade C or better in EDST 2550. Concurrent enrollment in EDEL 4109 and EDEL 4409.

This is taken in conjunction with EDEL 4309; the prefix is changed to meet graduate requirements.

EDEL4409 - Elementary Math/ Science Education

Credits: 5

Max Credit (Max. 6)

Includes content and pedagogy in teaching math/science in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4409]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EST 2550; concurrent enrollment in EDEL 4109 and EDEL 4309.

EDCI5250 - Advanced Topics in Pedagogy

Credits: 3

A graduate level seminar to be taken concurrently with undergraduate methods courses in specific content areas (EDSE 425X-4260, EDEL 4309).

Restricted EDCI 5250 is restricted to students pursuing teacher certification leading to a Master of Arts in Curriculum and Instruction.

Prerequisite: Successful completion of EDCI 5550, EDCI 5870, Seminar in Assessment, earned Bachelor's degree from an accredited institution.

EDST3550 - Educational Assessment

Credits: 2

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding

the assessment of students with special needs. Addresses the basic ideas of classroom test design.

Prerequisite: Prerequisites: Grade of C or better in a Q course, and EDST 2480, 2.75 Cumulative UW Institutional GPA.

EDCI5560 - Seminar in Assessment

Credits: 1

One credit hour course is designed for students in the (post baccalaureate) teaching credential program with master's option. Covers important concepts of assessment such as teachers as graders, self-and peer-assessment techniques, standardized assessment instruments, challenges facing new teachers, using assessment for planning/modifying instruction to improve learning experiences, and differentiated assessment in diverse classrooms.

Prerequisite: successful completion of (grade C or higher) or concurrent registration in EDST 2550 or EDST 3500.

Fall Courses - SECONDARY (TSC) (10 Credits)

- ITEC Module
- EDSE 4000 Level Course 4 Credits
- EDCI 5250 Advanced Topics in Pedagogy Credits: 3
- EDST 3550 Educational Assessment Credits: 2
- EDCI 5560 Seminar in Assessment Credits: 1

Spring Courses - ELEMENTARY (TES) (15 Credits)

These are all for Student Teaching.

EDEL4500 - Residency in Teaching

Credits: 1-16

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDSE 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses.

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

Spring Courses SECONDARY (TSC) (15 Credit Hours)

These are all for Student Teaching.

EDSE4500 - Residency in Teaching

Credits: 1-16

Max Credit (1-16; Max. 24 based on Transfer Student transcript evaluation)

Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDEL 4500.

Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses, successful completion of Phase IIIa specific pedagogy and practicum, complete review of the prospective teacher's record.

EDSE4550 - Residency Applications and Synthesis

Credits: 3

The purpose of this course is for the student to demonstrate professional competency in planning for, implementing, assessing the success of, and reflecting upon a series of cohesive lessons for the secondary classroom through the assignments provided.

Prerequisite: Requires an active Student Teaching placement. And

A grade of "C" or better in EDSE 42XX (secondary content-appropriate methods course)

Corequisite: EDSE 4500

- EDCI 5580 Internship1 Credits: 4 required

Additional Information:

The College of Education provides two options for individuals with previously earned bachelor's degree to earn a teaching certification: Certificate for Teaching Elementary School (TES) and Certificate for Teaching Secondary Content (TSC). The TES Option prepares individuals to qualify for a Wyoming teaching certificate in grades K-6. The TSC Option prepares individuals to qualify for a Wyoming teaching certificate in the middle and high school grades (6-12). Twelve hours of graduate-level coursework in either option can be applied to a subsequent UW master's degree in Curriculum and Instruction.

Overall Course Offerings: It is noted that the graduate certificate program can be a distance program; however, that does not preclude synchronous meetings or some scheduled on-campus intensive weekends (e.g., attending two Saturdays in the fall as part of the methods classes). Courses are not guaranteed to be asynchronous, meaning that students may have to sign in to Zoom at specific times to attend.

Online Instruction Certificate

The UW Online Instruction Certificate is a 4-class online program that will ground you in the theory and best practices of online education while giving you experiences solving problems and designing educational solutions using current technologies.

Requirements

The Online Instruction Certificate Program is a post-baccalaureate, credit bearing program that helps learners from all fields acquire necessary knowledge and skills to effectively develop and teach online courses in K-12, higher education, and business and industry settings. Courses familiarize learners with distance education and design theory to develop online materials that facilitate student access, engagement, communication, and information exchange. Emphasis is placed on tool use and the application of skills towards instructional development and implementation. Students who have been formally admitted to the Master of Science in Education with an emphasis in Instructional Technology may use certification courses to fulfill graduate degree requirements.

Coursework Credits: 12 Hours

The certificate program consists of 12 hours of coursework in four online courses:

ITEC5020 - Technology and Distance Education

Credits: 3

A survey of the uses of telecommunication systems and other technologies in distance education. Covers instructional strategies, management concerns, and special issues associated with distance learning programs.

Prerequisite: graduate standing and consent of instructor.

ITEC5030 - Introduction to Online Teaching

Credits: 3

Includes basic theory, techniques, strategies of teaching and managing the online environment. Covers foundations and domains of online teaching. Emphasizes online learning issues, topics, and practices. Builds a knowledge base in topics such as the selection and integration of distance learning technologies in teaching and providing learner support.

Dual Listed ITEC 4030.

Prerequisite: senior standing or 12 hours of education.

ITEC5160 - Introduction to Instructional Design

Credits: 3

An introduction to theory and practice of instructional design. Intensive study of the instructional design process and application of the process to solve an instructional problem.

Prerequisite: graduate standing.

ITEC5510 - Communication in Distance Education

Credits: 3

An introduction to the theory and practice of using communication tools for distance education purposes. Instructional issues related to the design, development, use, and evaluation of communication tools in public school, business, and other distance delivery settings are emphasized.

Prerequisite: graduate standing.

Principal Certificate

Offered online, UW's school principal graduate certificate program provides the knowledge and experience towards earning a Wyoming's Prof. Teaching Standards Board endorsement as a K-12 principal while maintaining your current teaching position.

Requirements

The endorsement/certificate is 24 credits which includes the four core classes, 3 credits each:

EDAD5010 - Leadership for Curriculum Development

Credits: 3

Focuses on leadership skills that support curriculum and curriculum development in student learning and achievement. Key topics include: K-12 curriculum alignment; incorporating standards and community values; curriculum development, implementation, and evaluation; equity and access for diverse learning needs; and effective communication about curriculum.

Prerequisite: Admission to program or consent of instructor.

EDAD5020 - Leadership for School Organization

Credits: 3

Focuses on organizational leadership. Topics include: history of organizational leadership, leadership styles, change process, strategic planning, federal, state, and local governance as well as politics, power and policy, and school operations, to include budget, facilities, scheduling, recruitment, selection and induction.

Prerequisite: Admission to program or consent of instructor.

EDAD5030 - Leadership for School and Community Relations

Credits: 3

Focuses on the leadership role of the principal in building relations with students, staff, family, and community. Topics include school culture and climate, community and family involvement, public relations and communications, student discipline, and crisis management.

Prerequisite: admission to program or consent of instructor.

EDAD5040 - Leadership for Instruction

Credits: 3

Focuses on the principal as instructional leader. Topics include: developing a school vision of learning; employing effective instructional strategies, supervision and evaluation of teacher performance; integration of supervision, evaluation, and student achievement with professional development and professional learning communities, and instructional trends and issues within diverse learning communities.

Prerequisite: Admission to program or consent of instructor.

EDAD5580 - Supervised Internship in Educational Administration

Credits: 1-8

Max Credit (Max. 12)

Expand student knowledge by providing an intensive clinical experience in educational administration along with other activities that involve practical experiences with peers and with practising K-12 administrators.

Prerequisite: Admission into the UW Educational Leadership Principal Certificate, Master's or EdD Doctoral program.

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

EDAD5080 - Introduction to School Law

Credits: 3

This course provides legal foundations of U. S. public schools and examines general principles of statutory and case law and applies judicial decisions to educational environments. Additionally, the course focuses on legal responsibilities, constraints, and opportunities for school leaders.

Prerequisite: admission into UW Educational Administration, K-12.

Additional Information:

UW's 24-credit hour, online school principal certificate program is designed for licensed teachers who hold a master's degree in education or related area from an accredited college or university. Utilize your coursework towards further degrees in educational leadership.

School District Superintendent

To help equip you for the diverse responsibilities superintendents face, the UW School District Superintendent Certificate program combines a robust curriculum of educational leadership courses with an internship in two districts, so you acquire the executive background and operational skills you'll need to serve in rural or urban school districts.

Required Courses

REQUIRED COURSES (26 CREDIT HOURS)

Students must complete 26 credit hours of the courses listed below. Students who have at least two years prior experience as a superintendent are not required to take EDAD 5580 Internship.

- EDAD 5850 Direction Setter (3 credit hours)
- EDAD 5720 Change Agent (3 credit hours)
- EDAD 5800 Resource Manager (3 credit hours)
- EDAD 5750 Board & Community (3 credit hours)
- EDAD 5650 Communication (3 credit hours)
- EDAD 5700 Instruction (3 credit hours)
- EDAD 5600 Manager and Developer of Human Resources (3 credit hours)
- EDAD 5815 Advanced School Law (3 credit hours)
- EDAD 5580 Internship (2 credit hours)

Additional Information:

As a school district's chief executive officer, you will serve a wide variety of roles from representing your district in public to working with district principals and the school board to foster student success.

To help equip you for the diverse responsibilities superintendents face, the UW School District Superintendent Certificate program combines a robust curriculum of educational leadership courses with an internship in two districts, so you acquire the executive background and operational skills you'll need to serve in rural or urban school districts.

The program also meets the requirements of the Wyoming Professional Teaching Standards Board for the district superintendent endorsement as well as the superintendency standards of the national Educational Leadership Constituents Council.

The Early Childhood Special Education Program (Birth to Five) Leading to Wyoming Certification

Post-baccalaureate students who have earned a BA/BS in Elementary Education, Family and Consumer Sciences/Child Development Option, or a related field in early childhood development are eligible for this program. This is a pre-k program and does not prepare candidates to work in kindergarten or primary grade classrooms.

For more information, visit the web page (www.uwyo.edu/ste/early-childhood-education/early-childhood-special-education.html)

Required Courses:

EDEC5220 - Children with Disabilities

Credits: 3

Purpose is to introduce students to the effects of a disability on the development of the young child. Recent research in the area of early childhood special education will be examined. Educational implications will be emphasized.

Prerequisite: Bachelor's degree in education.

EDEC5230 - Curriculum and Materials for Young Children with Disabilities

Credits: 3

Involves the study and development of curriculum strategies appropriate for the child with disabilities from birth through age five.

Prerequisite: graduate standing.

EDEC5240 - Evaluation of Young Children with Disabilities

Credits: 3

Prepares students to select, administer, and interpret evaluation tools appropriate for planning with young children with disability.

Prerequisite: graduate standing.

EDEX5720 - Special Education Law

Credits: 3

Provides prospective special education teachers and support personnel with overview of important case and statutory law in special education.

Prerequisite: Admission to program or consent of instructor.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

EDEC4350 - Health Management Issues in Early Education

Credits: 3

Provides the student the opportunity to examine the implications of a child's health status on his/her personal, educational, social and cognitive development. Provides personnel working closely with the young child with disabilities and his/her family an understanding of the issues related to health concerns and a framework for intervention planning. Special emphasis is placed on concerns specific to the child in a day care, preschool or other school setting.

Prerequisite: junior standing and consent of the instructor.

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

EDEC5580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 4580.

Prerequisite: permission of the instructor is required.

EDEC 5580 will be taken twice for this program.

1. EDEC 5580 (2 credit) Internship in Early Childhood Special Education Birth-3
2. EDEC 5580 (2 credits) Internship in Early Childhood Special Education 3-5

Endorsement

Early Childhood Endorsement

The College of Education provides 3 early childhood endorsement opportunities to UW students

Additional Information:

There are three early childhood endorsement programs available for students:

- * The B-8 endorsement program for elementary education majors
- * The B-5 endorsement program for Family and Consumer Sciences/Child Development option majors (or majors in other fields related to early childhood);
- * The Early Childhood Special Education Program (Birth to Five) Leading to Wyoming Certification for postbaccalaureate students with a degree in education or a field related to early childhood.

In addition, undergraduate elementary education majors may work toward the early childhood education endorsement as part of their elective requirements. Specific advising in each of the early childhood program options support students in their program development.

Secondary Biology Endorsement

Along with another science certification (such as Earth Science), earn a Biology teaching endorsement.

Requirements: 27 Hours (Minimum)

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Choose One of the Following:

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

- Other BOT/ ZOO at the 3000/4000 level Credits: 3-4

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

Choose One of the Following:

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

- BOT/LIFE/MOLB/MICR/SOIL/ZOO at the 3000/4000 level Credits: 3-4

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

Secondary Chemistry Endorsement

Along with another science certification (such as Earth Science), earn a Chemistry teaching endorsement.

Requirements: 27 Hours (Minimum)

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

Choose One of the Following:

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

GEOL4777 - Geochemistry of Natural Waters

Credits: 3

Studies physical chemistry applied to natural waters, and chemistry of rock weathering, sources and controls on major, minor and trace elements, plus problems related to introduced pollutants.

Cross Listed GEOL 5777.

Prerequisite: CHEM 1030 OR consent of instructor.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

- SOIL Upper Division Elective Credits: 3-4

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

OR

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

OR

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

Secondary Computer Science Endorsement

The College of Education offers courses that lead to an endorsement (grades 6-12) from the Wyoming Professional Teaching Standards Board in computer science. Students can also receive a minor in computer science; see information in the College of Engineering and Applied Science section of this catalog for more information about the computer science minor.

The endorsement consists of 15 Credits (novice/intermediate) or 16 (intermediate/advanced) with an option to take all 20 hours for a computer science minor. It is recommended that students interested in obtaining the computer science minor apply to the program by their freshman year or the beginning of the sophomore year. Students are encouraged to examine course prerequisites.

Required Courses:

(15 Credits for novice/intermediate track)

OR

(16 Credits for intermediate/advanced track)

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on

algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

EDSE4280 - Subject Matter Specific Methods: Computer Science

Credits: 2

Introduction of content and pedagogy in Computer Science Education. Includes pedagogy, pedagogical content knowledge, and contact curriculums for teaching computer science at secondary school levels. A variety of instructional procedures will be employed including group work, modeling, lab work, micro-teaching, and lecture/demonstration.

Prerequisite: COSC 3100 or concurrent enrollment and COSC 3020.

Secondary Earth Science Endorsement

Along with another science certification (such as Biology), earn an Earth Science teaching endorsement.

Requirements Credits: 27 Hours (Minimum)

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal

specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

OR

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

Choose One of the Following:

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

BOT4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed ATSC/ESS 4001/GEOL 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying

concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.

(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6

Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.

(4 credits required)

Secondary Physics Endorsement

Along with another science certification (such as Chemistry), earn a Physics teaching endorsement.

Requirements: 27 Hours (Minimum)

PHYS1310 - College Physics I

Credits: 4

First course of two semester sequence. Provides thorough introduction to physics with calculus. Primarily for majors in physics, astronomy, and other areas in science, mathematics and technology requiring the highest levels of sophistication. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1310 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1210.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1320 - College Physics II

Credits: 4

Follows PHYS 1310 and continues introduction to physics with calculus. Includes electricity, magnetism and thermodynamics. Laboratory sessions illustrate principles studied and meaning of physical measurement. Students receiving credit for PHYS 1320 cannot receive credit for PHYS 1050, PHYS 1120 or PHYS 1220.

USP 2003-2014 Code U3SP

Prerequisite: MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

PHYS4410 - Electricity and Magnetism I

Credits: 3

First semester of a two-course sequence. Presents electricity and magnetism on intermediate level, emphasizing fields. Begins with review of vector algebra and calculus and proceeds to discussion of electrostatics, potential theory and steady currents.

When Offered (Normally offered fall semester)

Prerequisite: PHYS 2310 or equivalent and MATH 2210.

PHYS4510 - Thermodynamics and Statistical Mechanics

Credits: 3

Presents fundamental principles of thermodynamics, emphasizing mathematical development.

Prerequisite: PHYS 4310 or equivalent and MATH 2210.

EDSE3275 - Subject Matter Specific Methods I: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Introduction of content and pedagogy in Science Education.

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; concurrent enrollment in EDSE 4275.
(3 credits required)

EDSE4275 - Subject Matter Specific Methods II: Secondary Science Education

Credits: 3-6
Max Credit (Max. 6)

Advanced content and pedagogy in Science Education.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: grade of C or better in EDST 3100/EDCI 5550; Background check on file; 2.750 overall UW cumulative GPA; 2.500 in content GPA (grade of C or better in specific content courses required in major); concurrent enrollment in EDSE 3275/EDCI 5250.
(4 credits required)

Special Education Director Endorsement

Students who successfully complete a Wyoming Principal's Certificate in Education Leadership and a Master's Degree or endorsement in Education (Special Education) can apply for endorsement as a Director of Special Education through Wyoming Professional Teaching Standards Board. The program is restricted to Wyoming students or students who have a contractual agreement with the University of Wyoming.

Students expecting to obtain this endorsement must complete both the Special Education Master's courses and also the Educational Leadership Certification courses.

Program Details for Director Endorsement

The endorsement program requirements are available by completing both the Special Education Master's program and the Educational Leadership Principal Certificate program. The program is offered through the UW Outreach School using distance education technology such as video conferencing, online, intensive weekends, or combinations of delivery methods. Upon completion of this program students are eligible to apply to the Wyoming Professional Teaching Standards Board for endorsement as a Director of Special Education.

Endorsement/Certificate

English as a Second Language Certificate leading to a Wyoming English as a Second Language Endorsement

The online graduate English as a Second Language certificate is a 15-credit program for preservice or in-service teachers and other fields where ESL skills might prove useful such as speech pathology.

Required Courses:

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

EDCI4350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Focus is on the classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 5350.

OR

EDCI5350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 4350.

Prerequisite: graduate standing.

EDCI5430 - Theory and Methods of ESL I

Credits: 3

Provides an overview of theoretical and practical considerations in the teaching of English as a second/foreign language; acquaints students with different approaches, methods and procedures in TESL/TEFL; examines issues in the profession; requires a teaching/tutoring component.

Prerequisite: EDCI 5350.

EDCI5440 - Theory and Methods of ESL II

Credits: 3

Continues the theoretical and practical considerations in the teaching of ESL. Emphasis on Specifically Designed Academic Instruction in English (SDAIE) and literacy development for intermediate and advanced English language learners. Application of different approaches, methods, and procedures in TESL/TEFL. Development of curriculum. Issues in the profession. Requires teaching/tutoring component.

Prerequisite: EDCI 5430.

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

Additional Information:

The University of Wyoming (UW), College of Education (COE) offers English as a Second Language (ESL)-Endorsement Program (Add-on, K-12) to meet a growing need of English language learners in the nation (generally) and the state of Wyoming (specifically). Eligibility for this endorsement requires an initial teaching certificate in the state of Wyoming. The candidates in the program are undergraduate students who are working toward Wyoming teacher certification and teachers who already possess the state of Wyoming teaching certificate. Upon completion of the ESL endorsement program, the candidates receive the Wyoming Professional Teaching Standards Board (PTSB) endorsement. The candidates in the program are also graduates students in different disciplines, earning graduate ESL graduate certificate but not ESL endorsement. In 2017, the UW- ESL endorsement program received NATIONALLY RECONIZED decision by meeting all the requirements and standards of the TESOL SPA (Teaching English to Speakers of Other Languages Specialized Professional Association). In 2021, the UW-ESL endorsement program received an approval from PTSB.

Literacy Certificate Leading to a Wyoming Reading Endorsement

The online UW Graduate Certificate in Literacy serves Wyoming teachers and recent College of Education graduates who wish to gain a reading endorsement from the Wyoming Professional Teaching Standards Board (PTSB).

Required Courses:

EDCI5580 - Internship1

Credits: 8
Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3
Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3
Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6
Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5760 - Social Linguistics Literacies

Credits: 3
Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working

with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3

Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12)

Credits: 3

Critically examines reading-writing research for the express purpose of recognizing fundamentals of superior studies. Students are encouraged to select and pursue a topic in reading-writing research for intensive examination. Students may pursue areas of emphasis in elementary, secondary, or higher education.

Prerequisite: Graduate standing in education.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3

Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

Endorsement K-6: 18 Hours

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6

Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3

Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

- plus one elective

Endorsement 6-12: 18 Hours

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discuss research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12)

Credits: 3

Critically examines reading-writing research for the express purpose of recognizing fundamentals of superior studies. Students are encouraged to select and pursue a topic in reading-writing research for intensive examination. Students may pursue areas of emphasis in elementary, secondary, or higher education.

Prerequisite: Graduate standing in education.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3

Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

- plus one elective

Endorsement K-12: 21 Hours

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6
Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3
Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12)

Credits: 3
Critically examines reading-writing research for the express purpose of recognizing fundamentals of superior studies. Students are encouraged to select and pursue a topic in reading-writing research for intensive examination. Students may pursue areas of emphasis in elementary, secondary, or higher education.

Prerequisite: Graduate standing in education.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3
Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

Electives

EDCI5120 - Literature For Young Adults

Credits: 3

Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. Involves reading and critiquing literature.

Dual Listed EDCI 4120.

Prerequisite: senior level or graduate standing.

EDCI5160 - Recent Trends in Children's and Young Adult Literature

Credits: 3

Important new developments in the subject matter, settings and style of children's and young adult books are identified and studied. Students in this course are expected to have a strong basic knowledge of children's and young adult literature.

Dual Listed EDCI 4160.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: EDCI 4120.

Additional Information:

This program is designed to serve graduate level K-12 teachers in Wyoming who wish to obtain the Wyoming Reading Endorsement, and those who choose to apply the course work toward a master's or doctoral degree in Curriculum & Instruction. Students enrolled in the literacy program will select one of three options for endorsement, K-6 level, 7-12 level and K-12 level. More information on the PTSB reading endorsement can be found at the following link: <https://wyomingptsb.com/licensure/endorsement-areas/>.

College of Engineering and Physical Sciences

2085 Engineering Building

Cameron Wright, Acting Dean

Phone: (307)766-4253 FAX: (307)766-4444

Web site: ceas.uwyo.edu

Engineering is a profession that truly makes a difference. Engineers constantly discover how to improve lives by creating new solutions to real world problems and needs. From small villages to large cities, engineers are involved in innovative improvements to all aspects of life from health care, to energy production, to protecting and rehabilitating the environment, to developing the newest technological device. The broad background of communication, mathematical, scientific, and problem solving skills provided at the University of Wyoming will prepare engineering graduates to pursue careers in engineering, construction, environmental policy, even medicine or law. The possibilities are endless! The creativity and innovative thinking developed in engineering enables students to lead rewarding lives, work with inspiring people, and give back to their communities. Computer science is a profession that is closely affiliated with engineering. At the University of Wyoming, degrees in computer science are awarded through the College of Engineering and Applied Science. The technology trends in this industry are also advancing at a tremendous rate. This requires that computer science education be at the forefront of new computing technologies, software languages, and networking.

Mission

The University of Wyoming's College of Engineering and Applied Science will provide excellent education, research, and service in chosen fields of engineering and applied science. The College emphasizes connectivity with society, life-long learning, and the essential problem-solving and collaborative skills needed to address the frontier challenges facing Wyoming, the nation and the world.

Design Experiences

In direct support of the goals of the individual departments within the College of Engineering and Applied Science, the design process is consistently developed and integrated throughout the curriculum from the freshman year through the senior year. Within the engineering science program, design elements such as basic analysis skills, communication skills, experimental skills, computational skills, problem solving skills, and design methodology are taught. At the departmental level, these skills are developed further and the concepts of design methodology are reinforced. The design process culminates in a comprehensive design experience within the student's major.

Accreditation

The following undergraduate programs are accredited by the Engineering Accreditation Commission of ABET: architectural engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, energy systems engineering, mechanical engineering, and petroleum engineering.

Various options within different engineering programs are accredited as part of the primary major. That is, the electrical engineering/ bioengineering option is accredited as an electrical engineering degree, and the chemical engineering/petroleum option is accredited as a chemical engineering degree.

The Bachelor of Science in Computer Science is accredited by the Computer Accreditation Commission of ABET.

Programs of Study

Undergraduate Degrees

- Bachelor of Science in Architectural Engineering
- Bachelor of Science in Chemical Engineering
- Bachelor of Science in Civil Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Computer Science
- Bachelor of Science in Computer Science (Computers and Business Option)
- Bachelor of Science in Computer Science (Big Data Option)
- Bachelor of Science in Construction Management
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Electrical Engineering (Francis M. Long bioengineering option)
- Bachelor of Science in Energy Systems Engineering
- Bachelor of Science in Mechanical Engineering
- Bachelor of Science in Petroleum Engineering

Graduate Degrees

Master of Science

Architectural engineering
Atmospheric science
Chemical engineering
Civil engineering
Civil engineering/water resources
Computer science
Computer science professional
Electrical engineering
Environmental engineering
Mechanical engineering
Petroleum engineering

Doctor of Philosophy

Atmospheric science
Chemical engineering
Civil engineering
Computer science
Electrical engineering
Mechanical engineering
Petroleum engineering

Candidates for the various master's degrees in engineering are required to do a full year's work in residence either under Plan A or Plan B.

Students should understand that a strong background in mathematics is necessary to actively pursue an engineering curriculum. Credit toward an engineering degree is not allowed for algebra and trigonometry.

Coursework in all four-year curricula stresses the mastery of subjects fundamental to all fields of engineering. The balance of the program is divided between cultural context and courses applying to the particular field selected. The aim is to provide the student with such groundwork that the general principles acquired may be used successfully in any one of the several specialized fields he or she may follow after graduation.

Depending on the major, a minimum of 120 to 132 semester hours of credit is required for the bachelor's degree from the College of Engineering and Applied Science. All course work must be selected with prior approval. Detailed outlines of curricula are presented later under headings of the various departments of the college. Since most engineering programs are similar during the first year, students may change an engineering major during this time with little or no loss in credit.

Degree candidates must meet the academic requirements of the university and must have a grade point average of 2.000 (C) or above in all engineering courses attempted at this university.

Students may not take a course for S/U credit to satisfy any requirement for a degree from the College of Engineering and Applied Science, unless the course is offered for S/U credit only.

The College of Engineering and Applied Science adheres to prerequisite coursework being completed before moving forward to advanced coursework. If a student is found to be enrolled in a course without meeting the prerequisites, the student will be administratively dropped from the course.

All undergraduate engineering programs within the College of Engineering and Applied Science use the Fundamentals of Engineering Exam as one of their methods of outcomes assessment. As a graduation requirement, students must complete the exam, with a good faith effort, within one year prior to their expected graduation.

Preparation for the profession of engineering requires diligent work in the various curricula. The required credit hours can be completed in a four-year program, but because of the rigorous nature of some of the courses involved, some students may require additional time to complete degree requirements.

All engineering curricula are subject to minor program changes. The published curricula are general guides. Prospective students should consult the individual departments for current information.

International Engineering Minor

Students in the College of Engineering and Applied Science may earn a Minor in International Engineering. The Minor requires:

- a) a study abroad experience;
- b) 9 credits of lower-division coursework; and
- c) 9 credits of upper-division coursework.

More detailed requirements are available at: <http://www.uwyo.edu/ceas/academics/intleng.html>

Graduate Study

The College of Engineering and Applied Science offers coursework and research opportunities leading to the following master's degrees: master of science in atmospheric science, chemical engineering, civil engineering, computer science, electrical engineering, environmental engineering, mechanical engineering, and petroleum engineering. Candidates for the various master's degrees in engineering are required to do a full year's study in residence either under Plan A or Plan B.

Only graduates with satisfactory GPAs in programs accredited by ABET are granted full admission to graduate study. In addition, graduates with satisfactory GPAs in undergraduate disciplines of meteorology, physics, mathematics, or related fields can be granted full admission to graduate studies in atmospheric science. Other engineering graduates can be admitted on a provisional basis.

The College of Engineering and Applied Science offers coursework and research opportunities leading to the following doctoral degrees: doctorate in atmospheric science, chemical engineering, civil engineering, computer science, electrical engineering, mechanical engineering, and petroleum engineering. Interdisciplinary programs of study and research leading to one of the above disciplinary degrees can be developed.

Engineering Science

Program Director: David Mukai, Ph.D.

2076 Engineering Building,

(307) 766-6181

FAX: (307) 766-4444

Engineering Science offerings present the fundamental engineering concepts upon which most engineering analysis and design work is based. Faculty are drawn from all of the academic departments in the college. These core courses represent the majority of engineering offerings at the freshman and sophomore level.

Courses in engineering science have their roots in mathematics and physical science, extending knowledge toward creative application. Thus, students must take their courses in calculus, chemistry, physics, and engineering science in a timely manner. Details are given in the published curriculum for each program. **A grade of C or better must be earned in all courses that are prerequisite to any required engineering science course.**

Major

Architectural Engineering, B.S.

Architectural Engineers create structural and mechanical-electrical-plumbing systems for buildings. The B.S. in Architectural Engineering is accredited by ABET and provides a path to P.E. licensure. Note: This is not an Architecture degree.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Core Courses: 73 Credit Hours

ARE1000 - Exploring CAECM

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globaliztion, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed CE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2410 - Fundamentals of Building Performance

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.
ARE-3110 Professional Practice

ARE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed CE 3200.

Prerequisite: ES 2410.

ARE3210 - Civil Engineering Materials

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Non-destructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed CE 3210.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: COM2 and ES 2410.

ARE3300 - Building Electrical and Plumbing Systems

Credits: 3

Introduction to National Electrical Code. The topics include basic circuits, AC and DC single phase, three phase power, transients, capacitance and inductance, branch circuits. Study of plumbing systems and fixtures including wastewater, water supply, storm water, and venting systems. Study of International Plumbing Code.

Prerequisite: ARE 1600 or CE 1010, and ES 2330 or concurrent enrollment.

ARE3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ME 3400.

Former Course Number [ARE 3800]

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ARE3600 - Architectural Design Studio III

Credits: 3

Junior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). This course builds upon skills learned in ARE 2600, with a new emphasis on the complexities that accompany mid-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 2410 and ARE 2600.

ARE4600 - Architectural Design Studio IV

Credits: 3

Senior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 3600, with a new emphasis on the complexities that accompany high-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 3600.

ART3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ARE 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical

models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Geology Course: 4 Credit Hours

Must take one of the following.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

Physics Course: 4 Credit Hours

Must take one of the following courses:

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

ARE Professional Development Courses: 18 Credit Hours Required

Must take six of the following:

ARE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ESE 3360/ME 3360.

Former Course Number [ARE 3430, ARE 4420]

Prerequisite: MATH 2310, ES 2310 and ES 2330.

ARE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed CE 4200

Prerequisite: ARE 3200/CE 3200.

ARE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

Cross Listed CE 4250.

Prerequisite: ARE 3200/CE 3200.

ARE4260 - Structural Concrete Design

Credits: 3

Design of structural components and systems using reinforced concrete.

Cross Listed CE 4260.

Prerequisite: ARE 3200/CE 3200.

ARE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed CE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [ARE 4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

ARE4295 - Structural Timber Design

Credits: 3

Design of structural components and systems utilizing timber.

Cross Listed CE 4295.

Dual Listed ARE 5295.

Former Course Number [ARE 4290]

Prerequisite: CE 3200 or equivalent.

ARE4330 - Building Electrical Systems

Credits: 3

Analysis and design of electrical systems in buildings using the National Electrical Code. The topics include panel boards, motors, system sizing, electrical distribution in buildings, methodology of reducing the available short circuit current, transformers, capacitors in buildings, and power systems harmonics. Students will perform an electrical building design project.

Prerequisite: ARE 3300.

ARE4390 - Building Safety and Fire Protection

Credits: 3

Fundamentals of building design for fire and life safety. Emphasis is on a systematic design approach. Basic considerations of building codes, fire loading, fire resistance, means of egress design, introduction to protective systems including fire protection systems, and fundamentals of fire and smoke control.

Prerequisite: ARE 3300.

ARE4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ME 4430.

When Offered (Normally offered alternate spring semesters)

Former Course Number [ARE 3420, ARE 4810]

Prerequisite: Completion of the ME Success Curriculum, ARE 3400 and ARE 3360/ME 3360 or concurrent.

ARE4490 - Modeling and Optimization of Energy Systems

Credits: 3

Application of principles of thermodynamics, fluids, and heat and mass transfer in the component and system-level design of energy/thermal systems, including modeling, simulation and optimization techniques. Examples are drawn from building environmental control, energy conversion and thermal industrial processes. Students work on projects for integration of these components in the design of energy/thermal systems. Requires enrollment in associated laboratory session.

Cross Listed ME 4490.

Prerequisite: ARE 3400.

CE3600 - Soil Mechanics I

Credits: 4

A study of soil and the properties which influence its usefulness as an engineering material. Principles governing movement of soil, water and propagation of stresses through soil masses are studied.

Former Course Number [4600]

Prerequisite: ES 2410.

CE4610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 5610.

Prerequisite: CE 3600.

CE4620 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 5660.

Prerequisite: CE 3600.

CE4630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

Dual Listed CE 5630.

Prerequisite: CE 3600.

CE5010 - Advanced Mechanics of Materials

Credits: 3

Elements of elasticity, unified approach to strength of structural members design and failure criteria; basic concepts of fracture mechanics; stress concentration factors; treatment of torsion, bending, axial and shear in structural members including plastic effects; bending of flat plates.

Prerequisite: ME 3010 or CE 3200, MATH 2310.

CE5200 - Advanced Structural Analysis

Credits: 3

Analysis of framed structures with stiffness-based matrix methods including plane trusses, frames, and grid systems and space trusses and frames. Column, beam, beam-column and frame stability. Geometric and material nonlinearities of framed structures. Plastic analysis and moment-curvature relationships. Computer applications are emphasized.

Prerequisite: CE 4200 or equivalent.

CE5220 - Structural Dynamics

Credits: 3

Introduction to general structural dynamics, general dynamic loading, generalized coordinated and nonlinear structural response, linear and nonlinear response spectra, multiple degree of freedom systems, continuous systems, and discretization of continuous systems. Introduction to seismic load specifications.

Prerequisite: CE 4200 or equivalent and MATH 2310.

CE5255 - Advanced Steel Design

Credits: 3

A comprehensive design course for steel building structures. Topics include preliminary design, selection of framing systems, braced and unbraced frames, stability effects and nonlinear behavior. Includes building design project for seismic regions.

Prerequisite: grade of C or better in CE 4250 or ARE 4250.

CE5270 - Highway Bridge Engineering

Credits: 3

A study of the analysis, design and rating of highway bridges, including consideration of dead and vehicular loads, analysis of typical systems, service, fatigue and ultimate strength behavior, rating of existing bridge design, and bridge operations. Composite and non-composite steel and concrete bridges are considered. Includes investigations that require field trips outside the schedule class times. Contemporary issues are routinely discussed.

Prerequisite: CE 4250 and CE 4260.

ME3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ESE 3040

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3170 - Machine Design

Credits: 3

Application of engineering mechanics and materials science to the analysis and design of mechanical components such as bolted connections, springs, gears, bearings and shafts. Design for dynamic loading conditions. Principles of hydrodynamic lubrication. Introduction to computer-aided design. Case studies with appropriate topics.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solarpowered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ESE 4460

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ARE Capstone: 3 Credit Hours

Must take 1 of the following courses

ARE4720 - Structural Systems Design Project

Credits: 3

Final course in the building structural systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's structural systems.

Prerequisite: ARE/CE 3110, ARE 4200, ARE 4250, and ARE 4260 or concurrent enrollment.

ARE4740 - Mechanical Systems Design Project

Credits: 3

Final course in the building mechanical systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's mechanical

systems.

Cross Listed ARE/ME 4740

Prerequisite: ARE/CE 3110 and ARE 3400

ARE Math/Sci/Tech/Prof Courses: 6 credit hours

Must take 6 additional credit hours in Math/Science/Technical/Professional courses.

Total Required Credit Hours: 123 Hours (Minimum)

A Minimum of 42 Credit Hours Must Be Upper Division (3000+) Level.

- **Advanced Standing/Gateway:** Prior to enrolling in upper division ARE/CE courses, students must earn 57 quality points in the following courses: CHEM 1020, PHYS 1210 or PHYS 1220, MATH 2200, MATH 2205, ES 2110, ES 2120, and ES 2410.
- Degree candidates must meet the academic requirements of the university, and must have a minimum GPA of 2.0 in all engineering courses, and all courses required for the major. *Grades of C or better are required for all prerequisite courses.
- Students choose an area of emphasis in either structural or mechanical systems, and select Optional Electives and the Capstone Design for their emphasis area. Care should be taken to ensure prerequisites are completed.
- Students may have a maximum of 6 credits in courses with a grade of D in upper division ARE courses that apply towards their degree.
- Students may not take a course for S/U credit to satisfy any requirement, unless the course is offered for S/U credit only.
- No more than two upper division courses may be transferred and applied to the ARE degree. ARE 4720 and ARE 4740 cannot be transferred to UW.

ARE Outcomes

The Architectural Engineering department regularly evaluates the following student skills. Specifically, every University of Wyoming Architectural Engineering graduate shall have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering, B.S.

Chemical Engineering draws upon fundamentals of chemistry, physics, biology, and math to analyze and design processes. Chemical Engineers work in a variety of fields including the energy, medicine, food, microelectronics, biotechnology, environmental, and manufacturing industries. The B.S. in Chemical Engineering is accredited by ABET and provides a path to P.E. licensure.

Curriculum

For students entering UW Fall 2022 or later.

CHE1005 - Introduction to Chemical Engineering

Credits: 1

Provides an overview of chemical engineering and its role in the current technological importance: energy, biotechnology, production of chemicals, and materials processing. Introduces strategies for solving engineering problems, including ethical considerations and teamwork, discusses process variables, units, mass balance, and data analysis, and incorporates active learning exercises using spreadsheet to solve chemical engineering problems.

Prerequisite: concurrent enrollment in MATH 2200.

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)

Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHE2060 - Chemical Engineering Computing

Credits: 3

Introduces fundamental concepts in linear algebra, numerical methods and applied statistics needed to solve engineering problems. In this context, this course also introduces and reinforces computational tools that will be useful for other CHE classes.

Prerequisite: C or better in CHE 1005 or ES 1060; C or better in CHE 2005; concurrent enrollment in MATH 2310.

CHE2070 - Chemical Thermodynamics

Credits: 3

Discusses first and second laws of thermodynamics applied to chemical processes, production of power from heat, refrigeration, and liquefaction processes, develops thermodynamic relations for calculating thermodynamic properties of fluids, including the use of equations of state, and introduces heat effects, Gibbs-energy change of reaction, and chemical-reaction equilibria.

Prerequisite: C- or better in CHE 2005, PHYS 1210; C or better in MATH 2210.

CHE2080 - Chemical Engineering Fluid Mechanics

Credits: 3

Introduces the fundamental aspects of macroscopic fluid mechanics, including physical properties, fluid statics, mass, energy, and momentum balances, momentum transport, and flow through pumps, pipes, and other chemical engineering equipment for both incompressible and compressible fluids, and of microscopic fluid mechanics, including differential mass and momentum balances.

Prerequisite: C- or better in CHE 2005, PHYS 1210, and C or better in MATH 2210.

CHE3015 - Chemical Thermodynamics II

Credits: 3

Introduces mixture properties, such as chemical potentials, excess properties, partial molar properties, heats of mixing, fugacities, and practical tools for estimating them from solution theories and equations of state. These tools and concepts are applied to phase and chemical equilibria.

When Offered (Normally offered fall semester)

Former Course Number [3010]

Prerequisite: C or better in CHE 2060, and CHE 2070 or ES 2310.

CHE3026 - Heat Transfer

Credits: 3

Introduces the theory and application of energy transport (e. g. conduction, convection, radiation), discusses in depth fundamentals of microscopic energy transport, and applies the knowledge to macroscopic chemical engineering processes and systems.

Prerequisite: C- or better in CHE 2060, and CHE 2080 or ES 2330.

CHE3028 - Mass Transfer

Credits: 3

Introduces mass transfer concepts, including molecular diffusion, convective mass transfer, and mass transfer between phases, and the development of mathematical models of these physical phenomena, applicable to the analysis and

design of chemical processes.

Prerequisite: C- or better in CHE 2005, CHE 2060, and CHE 2080 or ES 2330.

CHE3040 - Unit Operations Laboratory I

Credits: 3

Laboratory experiments examining settling, pump performance, heat transfer, adsorption, gas transfer, and distillation. Introduces topics in statistics including: probability distributions, mean, median, mode, variance and standard deviation, systematic and random error, confidence intervals, and t-tests, F-tests and ANOVA. Emphasizes the preparation of formal laboratory reports including experimental error analysis.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: C- or better in CHE 3026 and CHE 3028 and CHE 4060. (Normally offered fall semester)

CHE4050 - Unit Operations Laboratory II

Credits: 3

Laboratory experiments examining heat transfer and process control. Also requires students to design, conduct and analyze 'open-ended' experiments. Introduces LabView and covers factorial experimental design and linear and non-linear data regression approaches. Emphasizes the preparation of a formal report describing all aspects of the experiments.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

Prerequisite: C- or better in CHE 3040. (Normally offered spring semester)

CHE4060 - Reaction Engineering

Credits: 3

Introduces chemical process kinetics, catalysis and reactor design. Includes homogeneous and heterogeneous reaction kinetics; design of batch, stirred-tank and tubular reactors; and nonisothermal operation.

When Offered (Normally offered spring semester)

Prerequisite: C- or better in CHE 3015 and CHE 3026 and concurrent enrollment in CHE 3028.

CHE4070 - Process Simulation & Economics

Credits: 4

Max Credit 4

Introduces simulation software used to model chemical processing. Techniques used to determine economic feasibility of chemical plants are described.

When Offered (Normally offered fall semester)

Prerequisite: C or better in CHE 3028 and CHE 4060

CHE4080 - Senior Design

Credits: 4
Max Credit 4

Intended for the senior year. Applies all previous courses to the design of safe, economical and environmentally benign processes.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: COM-2, concurrent enrollment in CHE 4070

CHE4090 - Process Dynamics and Control

Credits: 3

Encompasses analysis and design control systems for the chemical process industry including steady-state approximation, types of controllers, simple unsteady-state analysis, use of mathematical models and process dynamics under control.

Prerequisite: C- or better in CHE 3028 and CHE 4060.

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students.

Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

University Studies Program Requirements

The University Studies Program 2015

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Approved Electives

See CEAS Advising Center for a current list of approved technical electives. There are a total of 18 credits required for technical electives.

Transfer Coursework: All Wyoming Community College equivalent courses will be evaluated for acceptance into the CHE program. For upper-division coursework, no more than two CHE 3000+ courses can be transferred and applied to the CHE degree, however, CHE4070 - Process Simulation & Economics and CHE4080 - Senior Design cannot be transferred to UW.

In addition, all CHE transfer courses must be completed with a grade of C- or better.

Program Educational Objectives

Three to six years after graduation, graduates who choose to practice in Chemical Engineering should:

- Successfully practice the profession of Chemical Engineering;
- Demonstrate successful career growth

Chemical Engineering Program Outcomes

During the course of study in Chemical Engineering, the student should demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Civil Engineering, B.S.

Civil Engineers create infrastructure and development projects, including structures, transportation, water & wastewater, earthworks, and urban site plans. The B.S. in Civil Engineering is accredited by ABET and provides a path to P.E. licensure.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Core Courses: 75 Credits

CE1000 - Exploring CAECM

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globaliztion, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed ARE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE1010 - Civil Engineering Tools

Credits: 3

This course is an introduction to computing tools commonly used in civil engineering practice including 3-D Computer Aided Drafting, Spreadsheets and Presentation Software. Tools will be introduced through design work on typical civil engineering design projects.

Prerequisite/Corequisite: of MATH 2200.

CE2070 - Engineering Surveying

Credits: 3

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Traverse field techniques and office calculations. Basic principles of surveying and map making.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE-3110 Professional Practice

CE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in loads on building, stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed ARE 3200.

USP 2003-2014 Code [WB<>(none)]

Prerequisite: ES 2410.

CE3210 - Civil Engineering Materials

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Nondestructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed ARE 3210.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Former Course Number [2210]

Prerequisite: COM2 and ES 2410.

CE3300 - Hydraulic Engineering

Credits: 3

Develops analysis, design and modeling techniques for incompressible pipe flow, steady uniform and gradually varied open channel flow, and hydraulic structures.

Former Course Number [4320]

Prerequisite: ES 2330.

CE3400 - Introduction to Environmental Engineering

Credits: 3

An introduction to the major topics in environmental engineering. Focus areas include water supply, wastewater treatment, air pollution control and solid and hazardous waste management. Quantitative aspects and engineering solutions to problems are emphasized.

Prerequisite: MATH 2205 and CHEM 1020 or equivalent.

CE3500 - Transportation Engineering

Credits: 4

Introduction to the major topics in Transportation Engineering. The topics covered include human, vehicle and roadway characteristics and performance, traffic characteristics and flow theory, roadway capacity and Level of Service (LOS) concepts, intersection and traffic signal design, public transportation, transportation planning, geometric design of highways, traffic safety, highway materials, and pavement design

Former Course Number [4500]

Prerequisite: CE 1010.

CE3600 - Soil Mechanics I

Credits: 4

A study of soil and the properties which influence its usefulness as an engineering material. Principles governing movement of soil, water and propagation of stresses through soil masses are studied.

Former Course Number [4600]

Prerequisite: ES 2410.

CE4010 - Civil Engineering Design

Credits: 3

Students will prepare final civil engineering documents including construction plans, specifications, and engineering estimates for a civil engineering project. Concepts of standard specifications and sustainability measures will also be applied to the design.

Former Course Number [3010]

Prerequisite: STAT 2050.

CE4900 - Comprehensive Design Experience

Credits: 3

Team comprehensive project design experience considering the sub-disciplines of civil engineering.

Prerequisite: ARE/CE 3110 and 3 of CE 3200, CE 3300, CE 3400, CE 3500, CE 3600, and two of CE 4250, CE 4260, CE 4610, CE 4555, CE 4510, CE 4400, CE 4410, or CE 4800, or instructor consent.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Physics Course

Must take one of the following:

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Science Elective: 4 credit hours

Must take one of the following.

ASTR2310 - General Astronomy I

Credits: 4

[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1110 - Physical Geology for Engineers

Credits: 4

Introduction to geologic principles for engineers with emphasis on near surface processes and material properties. The first half will teach planetary basics, mineral/ rock and geologic structure, surface processes, geologic material strength and deformation, and geohazards. The final half covers methods and analysis with the collection of geophysical data on-campus to assess near-surface properties with a full lab report.

USP 2003-2014 Code [(none)<>PN]

Prerequisite: MATH 1400 and MATH 1405 or MPE score of 5 or higher or SAT Math score of 600 or higher or ACT Math score of 27 or higher.

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might

guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

Structural Design Course: 3 credit hours

Must take one of the following.

CE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

Cross Listed ARE 4250.

Prerequisite: ARE 3200/CE 3200.

CE4260 - Structural Concrete Design

Credits: 3

Design of structural components and applications utilizing reinforced concrete.

Cross Listed ARE 4260.

Prerequisite: ARE 3200/CE 3200.

CE Professional Development Courses: 12 credit hours

Must take four of the following.

Selection of Professional Development Courses must demonstrate breadth by covering more than one area among Environmental, Geotechnical, Transportation and Water Resources.

CE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed ARE 4200

Prerequisite: ARE 3200/CE 3200.

CE4265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in RE/CE 4260.

Cross Listed ARE 4265.

Dual Listed CE 5265.

Prerequisite: ARE 4260/CE 4260.

CE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed ARE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

CE4295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed ARE 4295.

Dual Listed CE 5295.

Former Course Number [4290]

Prerequisite: CE 3200 or equivalent.

CE4400 - Design of Water Treatment Facilities

Credits: 3

A theoretical and practical design course for municipal potable water treatment systems. Major emphasis includes health criteria, operational control procedures, primary and secondary drinking water regulations, as well as the latest treatment design standards for production of drinking water.

Prerequisite: CE 3400.

CE4410 - Design of Wastewater Treatment Facilities

Credits: 3

A theoretical and practical design course for treatment of municipal wastewaters. Major areas of emphasis include waste characterization and physical, chemical and biological unit processes.

Prerequisite: CE 3400.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

CE4441 - Solid Waste Engineering

Credits: 3

Municipal solid waste characteristics and quantities, collection, landfills, processing of municipal solid waste, materials separation, combustion and energy recovery, and biochemical processes with an emphasis on materials flow. Integrated solid waste management principles are also discussed.

Former Course Number [4440]

Prerequisite: CE 3400.

CE4510 - Pavement Design for Airports and Highways

Credits: 3

Designing flexible and rigid pavements for highways and airports. Topics include pavement materials and common uses, soil stabilization, quality control of materials, pavement design procedures.

Dual Listed CE 5510.

Former Course Number [5510]

Prerequisite: CE 3500 or CE 3600.

CE4530 - Traffic Engineering: Operations

Credits: 3

Basic characteristics of traffic, such as drivers, vehicles, volumes, speeds, delay, origins and destinations, intersection performance, capacity, termination and accidents; techniques for making traffic engineering investigations; traffic laws and ordinances, regulations, design and application of signal systems; curb parking control; enforcement and traffic administration; and public relations.

Dual Listed CE 5530.

Prerequisite: CE 3500.

CE4555 - Geometric Design of Highways

Credits: 3

Criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity design standards for different highway types; design of sight distance, alignment, grade; cross-section design; access control, frontage roads; intersection design elements, and design of intersections and interchanges.

Dual Listed CE 5555.

A&S College Core 2015 Students may not receive credit for both CE 4555 and CE 5555.

Former Course Number [4520]

Prerequisite: CE 3500.

CE4610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 5610.

Prerequisite: CE 3600.

CE4620 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 5660.

Prerequisite: CE 3600.

CE4630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

Dual Listed CE 5630.

Prerequisite: CE 3600.

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

CE4810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 5810.

Prerequisite: ES 2330.

CE4870 - Water Resource Engineering

Credits: 3

Study in water resource planning and design and problem solving applying engineering principles and procedures. Western United States water problems are emphasized, including user completion, reallocation, consumptive use, water development, conservation, conveyance losses, and return flows.

Dual Listed CE 5870.

Prerequisite: CE 3300.

CE Math/Sci/Tech/Prof Courses: 9 credit hours

Must take 9 additional credit hours in Math/Science/Technical/Professional courses.

Required Credits: 125 Hours (Minimum)

A Minimum of 42 Credit Hours Must Be Upper Division (3000+) Level.

- Advanced Standing/Gateway: Prior to enrolling in upper division ARE/CE courses, students must earn 57 quality points in the following courses: CHEM 1020, PHYS 1210 or PHYS 1220, MATH 2200, MATH 2205, ES 2110, ES 2120, and ES 2410.
- Degree candidates must meet the academic requirements of the university, and must have a minimum GPA of 2.0 in all engineering courses, and all courses required for the major. *Grades of C or better are required for all prerequisite courses.
- Students choose an area of emphasis in either structural or mechanical systems, and select Optional Electives and the Capstone Design for their emphasis area. Care should be taken to ensure prerequisites are completed.
- Students must take either CE 4250 or CE 4260 for the Structural Design requirement. Remaining Professional Development Electives must cover at least two of the following areas: Environmental, Geotechnical, Transportation, Water Resources.
- Students may have a maximum of 6 credits in courses with a grade of D in upper division ARE courses that apply towards their degree.
- Students may not take a course for S/U credit to satisfy any requirement, unless the course is offered for S/U credit only.
- No more than two upper division courses may be transferred and applied to the CE degree. CE 4010 and CE 4900 cannot be transferred to UW.

CE Outcomes

The Civil Engineering department regularly evaluates the following student skills. Specifically, every University of Wyoming Civil Engineering graduate shall have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Civil Engineering/Water Resources

The purpose of this program is to broaden the students' master of science program in the water resource area in civil engineering.

Plan A Thesis Requirement

Only students with a M.S. Plan A thesis option are eligible. The student's graduate committee will include at least one member of the Water Resources Curriculum Committee.

Coursework and Thesis

Each student must complete a minimum of 28 hours of graduate level coursework and a thesis under Plan A (4 credit hours) to qualify for the master of science in civil engineering/ water resources.

The student must obtain at least 18 credit hours of graduate level coursework in engineering, emphasizing a concentration of core courses in a particular area of emphasis in civil engineering. The core course areas of emphasis for this program are hydrologic and hydraulic engineering. The particular set of courses for a given area of emphasis will be designated by the faculty in the water resources area for these areas of emphasis with the approval of the Civil Engineering Graduate Committee.

Interdisciplinary Component

9 hours

Technical Hydrology (3 Hours)

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

- REWM 5280 - Stream Habitat Management Credits: 3

Law/Natural Resource Economics (3 Hours)

(please refer to the general degree requirements for a list of courses)

Water Quality (3 Hours)

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

- MOLB 4410 Water Microbiology Credits: 3
- MOLB 4500 Microbial Ecology Credits: 3

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

Computer Engineering, B.S.

A B.S. in Computer Engineering provides the knowledge needed for careers in computer programming & design. It is a blend of Computer Science and Electrical Engineering and is often used to develop special purpose computers like those in your car.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Math & Science

MATH2200 - Calculus I

Credits: 4
Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed COSC 2300.

Prerequisite: grade of C or better in COSC 1030 and in either MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and

organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

- 3 credits of an approved Math/Science Elective ²

Engineering Science

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

Electrical Engineering

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE2390 - Digital Systems Design

Credits: 4

Binary logic, digital logic gates, reduction of Boolean expressions, combinational logic design. MSI and LSI combinational logic ICs, flip-flops, synchronous and asynchronous sequential systems design, MSI and LSI sequential system ICs, and algorithmic state machines.

Prerequisite: COSC 1010 or COSC 1015 or COSC 1030 or ES 1060, and MATH 2205.

EE3150 - Electromagnetics

Credits: 3

A thorough study of static electric and magnetic fields using vector methods with an introduction to dynamic fields.

Prerequisite: ES 2210, or ES 2215 and ES 2216, MATH 2210, and PHYS 1220 or concurrent enrollment.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution;

difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

EE3311 - Electronics I

Credits: 3

Physical characteristics and models of semiconductor devices with application to electronic circuit design. Diode circuits, single transistor amplifiers, biasing, and load lines. Prerequisites: (PHYS 1220 or PHYS 1320 or EE 3150), and EE 2220 or concurrent enrollment.(Offered fall semester only)

Prerequisite: PHYS 1220 or PHYS 1320 or EE 3150, and EE 2220 or concurrent enrollment

EE3312 - Electronics I Laboratory

Credits: 1

Hands on interactive laboratory investigation of the physical characteristics of semiconductor devices and applications in electronic circuit design. Study of diode and transistor characteristics as well as diode circuits and single transistor amplifier circuit design, construction and testing. Prerequisites: EE3311 must be taken either concurrently or as a prerequisite. (Offered fall semester only)

When Offered (Offered fall semester only)

Prerequisite: EE3311 must be taken either concurrently or as a prerequisite.

EE3331 - Electronics II

Credits: 3

Current sources, differential and multistage amplifiers; circuits with ideal and non-ideal operational amplifiers; low and high band frequency response, feedback, stability, gain and phase margin of amplifiers; output stages, class A and push-pull; monolithic operational amplifier; oscillators; transistors as switches and introduction to digital electronic circuits. Laboratory. Prerequisites: (EE 3310 or EE 3311) and EE 2220. (Offered spring semester only)

When Offered (Offered spring semester only)

Prerequisite: (EE 3312 or EE 3311) and EE 2220

EE3332 - Electronics II Laboratory

Credits: 1

Hands on interactive laboratory investigation of transistor switching circuits, differential amplifiers, current sources, amplifier frequency response, feedback, output stages, and oscillators. Prerequisites: EE 3312 and EE 3331 concurrently (offered spring semester only).

Prerequisite: EE 3312 and EE 3331 concurrently

EE4220 - Probabilistic Signals and Systems

Credits: 3

Fundamentals of probability and statistics for engineers; reliability in engineering systems; random processes, statistical estimation, auto/ cross correlation and power spectral density functions and linear filtering of random signals.

Prerequisite: MATH 2210 and EE 3220. EE 3220 may be taken concurrently.

EE4390 - Microprocessors

Credits: 3

Design of microcomputers, controllers and instruments which use microprocessors. Semiconductor memory design, CPU architecture, bus structure and timing, input-output interfaces and devices, assembly language programming, assemblers, compilers, editors and simulators. Emphasizes design techniques. Laboratory.

When Offered (Normally offered once a year)

Prerequisite: EE 2390.

EE4490 - Hardware Descriptive Language (HDL) Digital Design

Credits: 3

Hardware Description Language design of digital systems. Industrial CAD tools are used to produce a functional description of hardware that is both simulated and then synthesized into hardware. Methods to describe both combinational logic and synchronous devices are given. Devices such as CPLDs and FPGAs are targeted in this design process. Emphasizes design techniques.

Prerequisite: EE 2390.

EE4820 - Senior Design I

Credits: 2

Students choose a senior design project and complete the preliminary design. This stage of senior design includes investigation of alternative solutions that meet the project's requirements, cost analysis, and building the prototype circuit. Periodic oral and written project progress reports are required.

When Offered (Offered fall semester only)

Prerequisite: EE 2220, EE 2390, and EE 3312 or concurrent enrollment, plus 6 hours of 4000 level EE/BE classes, or concurrent enrollment. COM2 must be passed with a C or better grade.

EE4830 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in EE 4820. The final result of the senior design project includes assembly of a PC board hardware that meets the project's requirements and final report describing the design procedure, designed hardware and software, and results of final testing. Periodic oral and written project progress reports are required.

When Offered (Offered spring semester only)

Prerequisite: EE 4820 and selected courses in the area of the design project.

EE4870 - Computer Network Hardware

Credits: 4

Basic LANs, Ethernet LAN architecture, and classical Ethernet CSMA/CD MAC protocol. 10Mbps, 100 Mbps, and gigabit Ethernet architecture. Introduction to switching, queuing theory, architecture, design and performance analysis of switch fabrics. Architecture, design, algorithms and performance analysis of Routing, Cellular Networks. TCP/IP Protocol.

Prerequisite: EE 2390.

OR

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

Computer Science

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

CPEN Electives

12 credits from the following list.

A maximum of two CPEN elective courses can be from the computer science department.

EE 4075 is not allowed as a CPEN Elective.

EE4245 - Digital Signal Processing

Credits: 3

Sampling and oversampling A/D's; FIR and IIR digital filter design, effects of quantization, practical realizations; applications of the discrete and fast Fourier Transform (DFT and FFT); correlation, periodograms, window effects, multi-rate techniques, multi-dimensional signal processing, and other topics in digital signal processing.

Prerequisite: EE 3220.

EE4340 - Semiconductor Materials and Devices

Credits: 3

Physical properties of semiconductor materials and devices, including crystal lattices and energy bands, carrier generation, transport, and recombination. PN, metal-semiconductor, and heterojunction operation. Field Effect Transistors, including Metal Oxide Semiconductor (MOSFET), Junction (JFET), MEtal Semiconductor (MESFET), and High Electron Mobility (HEMT) transistors. Bipolar Junction (BJT) and Heterojunction (HBT) Transistor operation.

Cross Listed PHYS 4340.

Prerequisite: PHYS 1220 or PHYS 1320.

EE4345 - Hardware Digital Signal Processing

Credits: 3

Hands-on introduction to real-time digital signal processing. Programming DSP algorithms using C on modern DSP hardware. Students gain deep understanding of fundamental DSP concepts by implementing selected applications including sampling, reconstruction, FIR and IIR filters, signal generation, and FFT. Hardware concepts include EDMA,

memory maps, interrupts, buffered serial ports.

Prerequisite: EE 3220.

EE4360 - VLSI Design

Credits: 3

Introduction to CMOS processing, MOS fundamentals including devices models; switching and timing; analog subcircuits and amplifiers; inverters and CMOS gates; concept of standard cells and fully custom design; use of SPICE, digital simulation, and chip layout and verification software.

Prerequisite: EE 2390, and EE 3331 or concurrent enrollment.

EE4440 - Communication Theory

Credits: 3

Amplitude and angle modulation and demodulation; digital baseband and carrier communication systems; performance of communication systems; and current topics in communication systems.

When Offered (Normally offered once a year)

Prerequisite: EE 3220 and EE 4220.

EE4590 - Real Time Embedded Systems

Credits: 3

Emphasizes a systems approach to real time embedded systems. Students are expected to apply methodical system design practices to designing and implementing a microprocessor-based real time embedded system. Students employ a robot-based educational platform to learn the intricacies of real time embedded systems, distributed processing, and fuzzy logic. Students learn processor input/output interfacing techniques. Students use state-of-the-art design and troubleshooting tools.

Dual Listed EE 5590.

Prerequisite: EE 4390.

EE4870 - Computer Network Hardware

Credits: 4

Basic LANs, Ethernet LAN architecture, and classical Ethernet CSMA/CD MAC protocol. 10Mbps, 100 Mbps, and gigabit Ethernet architecture. Introduction to switching, queuing theory, architecture, design and performance analysis of switch fabrics. Architecture, design, algorithms and performance analysis of Routing. Cellular Networks. TCP/IP Protocol.

Prerequisite: EE 2390.

EE4990 - Advanced Microprocessors

Credits: 3

Architecture and instruction set of Intel family of microprocessors; Intel System Development Kit and its monitor program; Microsoft Macro Assembler (MASM) and Visual C/C++ Express; modular programming; High level language compilers of object code; Interface design issues of peripheral devices to Personal Computer.

Prerequisite: EE 4390.

EE5390 - Computer Architecture

Credits: 3

Examines the various methodologies used in the design of high-performance computer systems. Topics include CISC and RISC architecture and instruction sets, pipelining, instruction-level parallelism, memory hierarchy (including cache) design and computer networks.

Prerequisite: EE 4390.

EE5410 - Neural and Fuzzy Systems

Credits: 3

Theory of feed forward and recurrent neural networks. Supervised and unsupervised learning theories. Fuzzy logic and systems. Associative memories. Matching and self-organizing networks. Application of neural and fuzzy systems.

Prerequisite: EE 3220.

EE5430 - 3-D Computer Vision

Credits: 3

This course is intended to provide a mathematical framework for describing three dimensional imaging and computer vision. Topics include 3-D coordinate transforms, image formation, camera calibration, reconstruction from two views, SIFT detection, hidden Markov models, Markov random fields, and "bag-of-words" visual description.

Prerequisite: EE 4220, MATH 2250.

EE5460 - Probabilistic Robotics

Credits: 3

Fundamental theory underlying the robust sensing and planning used in self-driving machines is developed. Topics covered are: Bayesian, Kalman, and Particle Filters; simple ground robot motion models; mobile robot localization; simultaneous localization and mapping; partially observable Markov decision processes.

Prerequisite: EE 4220.

EE5620 - Digital Image Processing

Credits: 3

Methodologies and algorithms for processing digital images by computer. Includes gray level transformations,

histogram analysis, spatial domain filtering, 2D Fourier transforms, frequency domain filtering, image restoration, and reconstruction of computer tomography (CT) medical images.

When Offered (Offered fall of even-numbered years)

Former Course Number [4530]

Prerequisite: EE 3220 or equivalent background.

EE5630 - Advanced Image Processing

Credits: 3

Introduces students to advanced aspects of image processing (IP), using specific applications to demonstrate these principles. Concepts such as medical imaging; color IP; wavelets and multiresolution IP; image compression; morphological IP; image segmentation, representation, description and understanding are covered.

Prerequisite: EE 5620.

EE5650 - Object and Pattern Recognition

Credits: 3

Introduces students to both fundamental and advanced aspects of object and pattern recognition, using specific applications to demonstrate these principles. Concepts such as Bayesian, maximum-likelihood, principal components, nonparametric, linear discriminant, multi-layer neural networks, etc., and the trade-offs and appropriateness of classification techniques are covered.

Prerequisite: EE 4220.

EE5670 - Digital Image Formation

Credits: 3

This course introduces fundamental aspects of practical digital image formation, using specific applications to demonstrate these principles. Standard CCD and CMOS cameras (both still and video) and standard camera lens systems are assumed.

Prerequisite: EE 3220 or equivalent background.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

COSC4210 - Web Application Development

Credits: 3

The course covers the basics of developing data driven web applications. Topics include using responsive design for user interfaces, architectural patterns and frameworks, object-relational mapping, language-integrated queries, authentication, authorization, unit testing, using source control for code management, publishing web applications and cloud computing.

Prerequisite: COSC 3011.

COSC4220 - Design and Implementation in Emerging Environments

Credits: 3

Students who have completed the analysis and design course extend their knowledge by implementing an information system in an emerging systems environment. Teams use project management principles to implement the system.

Prerequisite: COSC 4210.

COSC4450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the World Wide Web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 5450.

Prerequisite: COSC 3020 and MATH 2250.

COSC4550 - Introduction to Artificial Intelligence

Credits: 3

A computational study of intelligent behavior. Focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 5550.

Prerequisite: COSC 3020.

COSC4555 - Machine Learning

Credits: 3

Goal is to program machines to learn and improve their performance on their own, based on experience and/or data. First half covers machine learning techniques; second half covers applications.

Dual Listed COSC 5555.

Prerequisite: COSC 3020.

COSC4560 - Modern Robots and Softbots

Credits: 3

Popular agent designs: logic-based, biomimetic, and physicomimetic. Foundational issues on internal robot and softbot knowledge representations. Planning and control, followed by issues of how agents can reason and plan under real-world conditions of environmental uncertainty. Concludes with discussions about papers on modern robot and softbot applications, as well as invited lectures by graduate students and faculty.

Dual Listed COSC 5560.

COSC4730 - Mobile Application Programming

Credits: 3

Introduces development of applications on mobile devices. Presents the principles, techniques, and tools for developing mobile applications. Differences between desktop applications and mobile applications are discussed.

Dual Listed COSC 5730.

Prerequisite: six hours of upper division COSC coursework.

COSC4735 - Advanced Mobile Programming

Credits: 3

Continues the development of applications on mobile devices. The focus is device sensors, such as camera, AR, VR, Bluetooth, embedded and connected devices.

Dual Listed COSC 5735.

Prerequisite: COSC 4730.

COSC4740 - Operating Systems Design

Credits: 4

Studies systems programming languages and computer systems design. Includes interacting processes, main storage management, procedure and data sharing, scheduling, deadlock problems and file management in batch processing and multi-programming systems. Operating system implementation.

Prerequisite: COSC 2150 and COSC 3020.

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

BE5410 - Rehabilitation Engineering

Credits: 3

This course covers the engineering principles of multiple rehabilitation technologies, including rehabilitation robots, exoskeletons, wearable sensors, electrical stimulators, implants, and virtual reality. Students will learn the technical and biological principles of all of these technologies via lectures, projects, and literature reviews.

Prerequisite: graduate standing.

MATH4500 - Matrix Theory

Credits: 3

Continuation from MATH 2250 of the study of matrices, an important tool in statistics, physics, engineering and applied mathematics in general. Concentrates on the structure of matrices, including diagonalizability; symmetric, hermitian and unitary matrices; and canonical forms such as Jordan form.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250.

EE/BE Elective

3 credits of an approved EE/BE Elective.

General Elective

1 credit of a general elective (1000 level or higher)

Total Credits: 128 Hours

¹ PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

² One course from the ECE Math/Science Elective List. ABET requires a minimum of 30 hours of Math/Science courses.

³Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

⁴To meet the COM3 requirement with EE 4820 and EE 4830 the COM2 course must be taken before EE 4820. Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

⁵ Network Congestion Control can also be taken to fulfill the CPEN network course requirement.

Online courses taken outside of the Wyoming system will not be considered for preapproved transfer.

Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation.

A grade of C or better is required for all prerequisite courses.

Students must also achieve a grade of C or better in all required mathematics courses.

Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

EE 1101 is the recommended FYS course for EE and CPEN majors

Computer Engineering Program Educational Objectives

Graduates of the University of Wyoming Computer Engineering Program will:

- Be able to successfully practice the profession of Electrical or Computer Engineering.
- Be prepared and motivated to accept challenging assignments and responsibilities and be productive members of society.
- Demonstrate successful career growth (e.g., professional registration, graduate school, promotion and advancement, patents, publications).

Computer Engineering - Student Learning Outcomes

All Computer Engineering graduates shall demonstrate:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Science, B.S.

Computer scientists learn the theory and practice of computing, which is essential in the modern world. A B.S. in Computer Science prepares you for a career designing, implementing, and securing software-intensive systems.

Computer Science General Information

Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours.

Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements.

All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Mathematics and Science Courses

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COSC2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed MATH 2300.

Prerequisite: COSC 1030, MATH 2200 or MATH 2350.

OR

MATH2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed COSC 2300.

Prerequisite: grade of C or better in COSC 1030 and in either MATH 2200 or MATH 2350.

- Approved Science course - 4 credits
 - Approved Science course - 4 credits
 - Approved Math/Science Elective - 4 credits
- ABET requires a minimum of 30 Math/Science credit hours.

Math elective means any MATH course above Calculus II or STAT courses 3000 and up.

Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, STAT 4220 [Inactive] or any variable credit courses toward this requirement.

Courses meeting the Science requirement must have a lab component and be for science or engineering majors. See Department web pages for a current list of approved courses.

Computer Science Courses

Introductory Programming Course - Choose one of:

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

OR

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

COSC3011 - Introduction to Software Design

Credits: 3

Introduces the principles and practice of software design, including UML and design patterns. Uses case studies to illustrate design in action.

Prerequisite: COSC 2030.

COSC3015 - Functional Programming

Credits: 3

Studies programming in the context of a functional language that emphasizes algorithmic strategies over syntactic detail.

Prerequisite: COSC 2030 and COSC 2300.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

Theory Course - Choose one of:

COSC4100 - Foundations of Computing

Credits: 3

Introduces several theoretical areas which are the basis of computer science. Languages and automata, computability, complexity, analysis of algorithms, logic, and the specification and correctness of programs.

Prerequisite: COSC 3020.

OR

COSC4200 - Computability and Complexity

Credits: 3

Introduction to theoretical study of computability and efficient computation. Finite-state and pushdown automata; turing machines and the Church-Turing thesis; undecidability, computational complexity; NP-completeness.

Prerequisite: COSC 3020.

Operating Systems Course - Choose one of:

COSC4740 - Operating Systems Design

Credits: 4

Studies systems programming languages and computer systems design. Includes interacting processes, main storage management, procedure and data sharing, scheduling, deadlock problems and file management in batch processing and multi-programming systems. Operating system implementation.

Prerequisite: COSC 2150 and COSC 3020.

OR

COSC3750 - Linux Programming for System Applications

Credits: 3

Provide the necessary tools and skills to begin programming effectively on UNIX and Linux operating systems. Topics will include, shells and basic shell scripting, Linux utilities, editors, compilation, I/O and the file system, sockets and interprocess communication, and time permitting, threads.

Prerequisite: COSC 2150 and COSC 2030.

Programming Language Course - Choose one of:

COSC4780 - Principles of Programming Languages

Credits: 3

Introduces the methods of analysis and design of programming languages. Covers syntax, typing schemes and the semantics (denotational and operational) in the context of functional and imperative programming languages. Students build interpreters to explore the implications of the different constructs on computational behavior.

Prerequisite: COSC 3015.

OR

COSC4785 - Compiler Construction

Credits: 3

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation from a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 5785.

Prerequisite: COSC 2150 and COSC 3020.

Systems Course - Choose one of:

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

OR

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with

the problems and issues of database management.

Prerequisite: COSC 2030.

COSC4950 - Senior Design I

Credits: 1

Students choose a senior design project, investigate alternate solutions and submit a preliminary project design. Periodic oral and written project progress reports are required.

Prerequisite: COSC 3011 and COSC 3020.

COSC4955 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in COSC 4950. Successful communication of the details of the solution through written documents and oral presentations will be required.

Prerequisite: COSC 4950.

Electives

- 9 credits of COSC Electives (3000-level or above, not used to complete any other requirement)
- General Electives to reach 120 credits.

A total of 3 credits of COSC 3970 can be used.

Approved EE courses may also be taken as COSC electives. See Department web pages for a current list of approved courses.

General electives include any course at or above the 1000 level, not used to complete any other requirement.

Electives should be selected to meet the 42 hour requirement for Upper Division credits.

Computer Science Program Educational Objectives

The following are the objectives that the Computer Science program is preparing its graduates to achieve:

Success: Graduates will be employed in a computer science-related field or making progress toward an advanced graduate degree.

Growing: Graduates show continued learning and leading in computing-related professions.

Ethics: Graduates exhibit ethical and responsible behavior in all professional and community endeavors.

Computer Science - Student Learning Outcomes

The program of study in Computer Science enables students to achieve, by the time of graduation:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Computer Science, Big Data Concentration, B.S.

The B.S. in Computer Science with a Concentration on Big Data combines a rigorous education in Computer Science with statistics, preparing you for a career in computer science, data analysis, or machine learning.

Computer Science General Information

Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours.

Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements.

All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Mathematics and Science Courses:

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

COSC2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed MATH 2300.

Prerequisite: COSC 1030, MATH 2200 or MATH 2350.

OR

MATH2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed COSC 2300.

Prerequisite: grade of C or better in COSC 1030 and in either MATH 2200 or MATH 2350.

- Approved Science Course - 4 credits
 - Approved Science Course - 4 credits
 - Approved Math/Science Elective - 4 credits
- ABET requires a minimum of 30 Math/Science credits hours.

Math electives means any MATH course above Calculus II or STAT courses 3000 and up.

Exceptions: cannot count MATH 2350, MATH 2355, MATH 4000, STAT 4220 or any variable credit courses toward this requirement.

Courses meeting the Science requirement must have a lab component and be for science or engineering majors. See Department web pages for a current list of approved courses.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

COSC3011 - Introduction to Software Design

Credits: 3

Introduces the principles and practice of software design, including UML and design patterns. Uses case studies to illustrate design in action.

Prerequisite: COSC 2030.

COSC3015 - Functional Programming

Credits: 3

Studies programming in the context of a functional language that emphasizes algorithmic strategies over syntactic detail.

Prerequisite: COSC 2030 and COSC 2300.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

Theory Course - Choose one of:

COSC4100 - Foundations of Computing

Credits: 3

Introduces several theoretical areas which are the basis of computer science. Languages and automata, computability, complexity, analysis of algorithms, logic, and the specification and correctness of programs.

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

OR

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

COSC4950 - Senior Design I

Credits: 1

Students choose a senior design project, investigate alternate solutions and submit a preliminary project design. Periodic oral and written project progress reports are required.

Prerequisite: COSC 3011 and COSC 3020.

COSC4955 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in COSC 4950. Successful communication of the details of the solution through written documents and oral presentations will be required.

Prerequisite: COSC 4950.

Concentration Requirements

Big data is high volume, high velocity, and/or high variety assets that require new forms of processing to enable enhanced decision making, insight discovery and process optimization. The Big Data Concentration directs the students

toward data handling (AI, visualization, data mining, and machine learning) courses and data analysis (statistics) courses.

Students should take the following courses to fulfill the Big Data Concentration.

In addition, students who wish to pursue a Big Data concentration are required to complete a minor in Statistics.

COSC4450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the World Wide Web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 5450.

Prerequisite: COSC 3020 and MATH 2250.

COSC4550 - Introduction to Artificial Intelligence

Credits: 3

A computational study of intelligent behavior. Focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 5550.

Prerequisite: COSC 3020.

COSC4555 - Machine Learning

Credits: 3

Goal is to program machines to learn and improve their performance on their own, based on experience and/or data. First half covers machine learning techniques; second half covers applications.

Dual Listed COSC 5555.

Prerequisite: COSC 3020.

COSC4570 - Data Mining

Credits: 3

Examine methods that have emerged from artificial intelligence and statistics and proven to be of value in recognizing patterns and making predictions with large data sets. Will include both theory and practice while developing several projects.

Prerequisite: COSC 4550.

- Courses for Statistics Minor
 - General Electives to reach 120 credits.
- A total of 3 credits of COSC 3970 can be used.

General Electives include any course at or above the 1000 level, not used to complete any other requirement. Electives should be selected to meet the 42 hour requirement for Upper Division credits.

Computer Science Program Educational Objectives

The following are the objectives that the Computer Science program is preparing its graduates to achieve:

Success: Graduates will be employed in a computer science-related field or making progress toward an advanced graduate degree.

Growing: Graduates show continued learning and leading in computing-related professions.

Ethics: Graduates exhibit ethical and responsible behavior in all professional and community endeavors.

Computer Science - Student Learning Outcomes

The program of study in Computer Science enables students to achieve, by the time of graduation:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Computer Science, Computers and Business Concentration, B.S.

The B.S. in Computer Science with a Concentration on Computers and Business combines a rigorous education in Computer Science with an understanding of business processes, preparing you for a career applying computer science in the business world.

Computer Science General Information

Computer Science majors must satisfactorily meet the requirements of the University Studies Program (USP), and they must complete a minimum of 120 credit hours, at least 42 of which must be upper division hours.

Note that some of the courses required for the Computer Science core or the concentrations will meet some of the USP requirements. Students do not have to take additional courses to meet those requirements.

All courses in Computer Science, Mathematics, and Statistics must be completed with a grade of C or better.

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Mathematics and Science Courses:

MATH2200 - Calculus I

Credits: 4
Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB
USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4
Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2250 - Elementary Linear Algebra

Credits: 3
Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von

Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

COSC3011 - Introduction to Software Design

Credits: 3

Introduces the principles and practice of software design, including UML and design patterns. Uses case studies to illustrate design in action.

Prerequisite: COSC 2030.

COSC3015 - Functional Programming

Credits: 3

Studies programming in the context of a functional language that emphasizes algorithmic strategies over syntactic detail.

Prerequisite: COSC 2030 and COSC 2300.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

Theory Course - Choose one of:

COSC4100 - Foundations of Computing

Credits: 3

Introduces several theoretical areas which are the basis of computer science. Languages and automata, computability, complexity, analysis of algorithms, logic, and the specification and correctness of programs.

Prerequisite: COSC 3020.

OR

COSC4200 - Computability and Complexity

Credits: 3

Introduction to theoretical study of computability and efficient computation. Finite-state and pushdown automata; turing machines and the Church-Turing thesis; undecidability, computational complexity; NP-completeness.

Prerequisite: COSC 3020.

Operating Systems - Choose one of:

COSC4740 - Operating Systems Design

Credits: 4

Studies systems programming languages and computer systems design. Includes interacting processes, main storage management, procedure and data sharing, scheduling, deadlock problems and file management in batch processing and multi-programming systems. Operating system implementation.

Prerequisite: COSC 2150 and COSC 3020.

OR

COSC3750 - Linux Programming for System Applications

Credits: 3

Provide the necessary tools and skills to begin programming effectively on UNIX and Linux operating systems. Topics will include, shells and basic shell scripting, Linux utilities, editors, compilation, I/O and the file system, sockets and interprocess communication, and time permitting, threads.

Prerequisite: COSC 2150 and COSC 2030.

Programming Language Course - Choose one of:

COSC4780 - Principles of Programming Languages

Credits: 3

Introduces the methods of analysis and design of programming languages. Covers syntax, typing schemes and the semantics (denotational and operational) in the context of functional and imperative programming languages. Students build interpreters to explore the implications of the different constructs on computational behavior.

Prerequisite: COSC 3015.

OR

COSC4785 - Compiler Construction

Credits: 3

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation from a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 5785.

Prerequisite: COSC 2150 and COSC 3020.

Systems Course

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

COSC4950 - Senior Design I

Credits: 1

Students choose a senior design project, investigate alternate solutions and submit a preliminary project design. Periodic oral and written project progress reports are required.

Prerequisite: COSC 3011 and COSC 3020.

COSC4955 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in COSC 4950. Successful communication of the details of the solution through written documents and oral presentations will be required.

Prerequisite: COSC 4950.

Concentration Requirements

An understanding of business fundamentals is essential for students planning a career in applied computer science in a business environment.

Students should take COSC 4820 to satisfy the System Course requirement, and should take the following courses as part of the Computer and Business Concentration.

In addition, students who wish to pursue a Computers and Business concentration are required to complete one of the minors offered by the College of Business.

COSC4210 - Web Application Development

Credits: 3

The course covers the basics of developing data driven web applications. Topics include using responsive design for user interfaces, architectural patterns and frameworks, object-relational mapping, language-integrated queries, authentication, authorization, unit testing, using source control for code management, publishing web applications and cloud computing.

Prerequisite: COSC 3011.

COSC4220 - Design and Implementation in Emerging Environments

Credits: 3

Students who have completed the analysis and design course extend their knowledge by implementing an information system in an emerging systems environment. Teams use project management principles to implement the system.

Prerequisite: COSC 4210.

- 3 credits of COSC Electives (3000-level or above, not used to complete any other requirement)
 - Courses for Business Minor
 - General Electives to reach 120 credits
- A total of 3 credits of COSC 3970 can be used.
Approved EE courses may also be taken as COSC electives. See Department web pages for a current list of approved courses.
General electives include any course at or above the 1000 level, not used to complete any other requirement.
Electives should be selected to meet the 42 hour requirement for Upper Division credits.

Computer Science Program Educational Objectives

The following are the objectives that the Computer Science program is preparing its graduates to achieve:

Success: Graduates will be employed in a computer science-related field or making progress toward an advanced graduate degree.

Growing: Graduates show continued learning and leading in computing-related professions.

Ethics: Graduates exhibit ethical and responsible behavior in all professional and community endeavors.

Computer Science - Student Learning Outcomes

The program of study in Computer Science enables students to achieve, by the time of graduation:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Construction Management, B.S.

Construction Managers are responsible for overseeing construction projects, including schedules, budgets, and quality control. The B.S. in Construction Management is a candidate for accreditation by ACCE and provides numerous career paths.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Core Courses: 50 credit hours

CE1000 - Exploring CAECM

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globalizability, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed ARE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE2070 - Engineering Surveying

Credits: 3

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Traverse field techniques and office calculations. Basic principles of surveying and map making.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CM2000 - Introduction to Construction Management

Credits: 3

Introduction to the practice and principles of construction management as it relates to both vertical and horizontal construction projects.

CM2120 - Construction Materials and Methods

Credits: 3

Introduction to building materials and construction practices used in the construction industry to construct both vertical and horizontal construction projects.

Prerequisite: COM1.

CM2300 - Construction Safety

Credits: 3

Introduce students to the various causes of construction accidents and adopted strategies to prevent worksite injuries and illnesses with an emphasis on OSHA standards.

Prerequisite: CM 2000.

CM2400 - MEP Systems

Credits: 3

Introduction to mechanical, electrical and plumbing systems in site infrastructure and vertical construction projects.

Prerequisite: C in PHYS 1110.

CM2600 - Construction Documents

Credits: 3

Introduction to the creation and interpretation of construction documents used in the construction industry to build today's vertical and horizontal construction projects.

Prerequisite: CM 2000.

CM3100 - Construction Scheduling

Credits: 3

Principles of construction scheduling including analytical and quantitative scheduling and management techniques as they apply to both vertical and horizontal construction projects.

Prerequisite: CM 3210

CM3160 - Construction Law & Contracts

Credits: 3

The course covers different contract methods, or arrangements, used by the Construction industry to contract and procure construction work. The course also introduces students to construction law in support of planning and the execution of construction work.

Prerequisite: CM 2600.

CM3180 - Evolving Technologies in CM

Credits: 3

The course introduces students to Leadership in Energy and Environmental Design (LEED), Building Information Modeling (BIM) and evolving technologies in construction.

Prerequisite/Corequisite: Grade of C in CM 2000

CM3200 - Statics & Structural Systems

Credits: 4

The course introduces students to the basic principles of statics and structural analysis and design. It provides students with a concise presentation of structural technology, from the determination of structural loads, sizing and design as it relates to timber, steel and concrete structures.

Prerequisite: PHYS 1110 and MATH 2200 with grades of C or better.

CM3210 - Construction Estimating

Credits: 3

The course introduces students to concepts in estimating including but not limited to labor and equipment calculations,

the use of price databases, direct and indirect cost, bid preparation and computer applications.

Prerequisite: C in CM 2600.

CM3220 - Soils and Concrete

Credits: 3

This course will introduce students with the construction process that includes, site clearing, soil mechanics, testing, concrete foundations, concrete mix design, concrete construction practice, and concrete testing.

Prerequisite: GEOL 1110 with a grade of C or better and concurrent enrollment in CM 3200.

CM4100 - Project Management

Credits: 3

This course guides students through fundamental Project Management concepts and behavioral skills needed to success-fully launch and lead construction projects in the construction sector.

Prerequisite: CM 3100.

CM4140 - Heavy CM Methods

Credits: 3

The course provides student an overall understanding of construction equipment and selected construction methods used on large scale construction projects. With specific reference to selection, economy, and productivity of common construction equipment and construction procedures for site development and industrial, heavy and civil construction.

Prerequisite: CM 2120 and CM 3200.

CM4600 - Building Info. Modeling

Credits: 3

This course focuses on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a projectbased course where students develop skills on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction operations.

Prerequisite: CM 2600.

CM4900 - Capstone Project

Credits: 3

This course requires students to participate in a "real" construction situation involving all aspects of managing a project; from initial planning to completion, including budgets, estimating, scheduling, financing and creating contracts and other construction forms as necessary. Case studies will be utilized to develop critical thinking skills.

Prerequisite: CM 4100.

Business & Professional Courses: 18 credit hours

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Math/Science Courses: 18 credit hours

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE
USP 2015 Code U5PN

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Math/Science Elective Credits: 3

CM Electives: 6 credit hours

Must take 6 additional credit hours in Construction Management elective courses.

General Electives: 12 credit hours

Must take 12 additional credit hours in general elective courses.

Required Credits: 120 Hours (Minimum)

A Minimum of 42 Credit Hours Must Be Upper Division (3000+) Level.

- Degree candidates must meet the academic requirements of the university, and must have a minimum GPA of 2.0 in all courses, and all courses required for the major. *Grades of C or better are required for all prerequisite courses.
- Math 2350 may replace Math 2200 but student must also have Math 1405.
- Math 1405 may be satisfied with Level 5 of the Math placement exam or Math ACT of 27 or SAT Math of 640. Students placing out of Math 1405 will need an additional general elective.
- Students may not take a course for S/U credit to satisfy any requirement, unless the course is offered for S/U credit only.

Electrical Engineering, B.S.

A B.S. in Electrical Engineering provides the knowledge needed for careers in power systems, control systems, electronics, signal processing, tele-communications, computer programming & design.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Math & Science

MATH2200 - Calculus I

Credits: 4
Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

- 3 credits of an approved Math/Science Elective ²

Engineering Science

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

Electrical Engineering

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE2390 - Digital Systems Design

Credits: 4

Binary logic, digital logic gates, reduction of Boolean expressions, combinational logic design. MSI and LSI combinational logic ICs, flip-flops, synchronous and asynchronous sequential systems design, MSI and LSI sequential system ICs, and algorithmic state machines.

Prerequisite: COSC 1010 or COSC 1015 or COSC 1030 or ES 1060, and MATH 2205.

EE3150 - Electromagnetics

Credits: 3

A thorough study of static electric and magnetic fields using vector methods with an introduction to dynamic fields.

Prerequisite: ES 2210, or ES 2215 and ES 2216, MATH 2210, and PHYS 1220 or concurrent enrollment.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution; difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

EE3311 - Electronics I

Credits: 3

Physical characteristics and models of semiconductor devices with application to electronic circuit design. Diode circuits, single transistor amplifiers, biasing, and load lines. Prerequisites: (PHYS 1220 or PHYS 1320 or EE 3150), and EE 2220 or concurrent enrollment.(Offered fall semester only)

Prerequisite: PHYS 1220 or PHYS 1320 or EE 3150, and EE 2220 or concurrent enrollment

EE3312 - Electronics I Laboratory

Credits: 1

Hands on interactive laboratory investigation of the physical characteristics of semiconductor devices and applications in electronic circuit design. Study of diode and transistor characteristics as well as diode circuits and single transistor amplifier circuit design, construction and testing. Prerequisites: EE3311 must be taken either concurrently or as a prerequisite. (Offered fall semester only)

When Offered (Offered fall semester only)

Prerequisite: EE3311 must be taken either concurrently or as a prerequisite.

EE3331 - Electronics II

Credits: 3

Current sources, differential and multistage amplifiers; circuits with ideal and non-ideal operational amplifiers; low and high band frequency response, feedback, stability, gain and phase margin of amplifiers; output stages, class A and push-pull; monolithic operational amplifier; oscillators; transistors as switches and introduction to digital electronic circuits. Laboratory. Prerequisites: (EE 3310 or EE 3311) and EE 2220. (Offered spring semester only)

When Offered (Offered spring semester only)

Prerequisite: (EE 3312 or EE 3311) and EE 2220

EE3332 - Electronics II Laboratory

Credits: 1

Hands on interactive laboratory investigation of transistor switching circuits, differential amplifiers, current sources, amplifier frequency response, feedback, output stages, and oscillators. Prerequisites: EE 3312 and EE 3331

concurrently (offered spring semester only).

Prerequisite: EE 3312 and EE 3331 concurrently

EE3510 - Electric Machines and Power Systems

Credits: 4

Polyphase AC circuits; single phase and polyphase transformers; AC synchronous and induction machines; introduction to power systems and per unit system; transmission line parameters; steady-state operations of transmission lines; power flows; transient stability; synchronphasor system and its applications.

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE4075 - C++ with Numerical Methods for Engineers

Credits: 4

Introduction to the fundamentals of practical engineering programming, using specific applications of numerical methods to demonstrate these principles. The use of an object oriented approach using C++ in an efficient manner is emphasized. Other solution approaches, including C and Matlab will be discussed as appropriate.

A&S College Core 2015 Credit will not be allowed in both EE 4075 and ES 3070.

Prerequisite: MATH 2205 and (COSC 1010, COSC 1015, or ES 1060) and (MATH 2250 or MATH 2310) or consent of instructor.

EE4220 - Probabilistic Signals and Systems

Credits: 3

Fundamentals of probability and statistics for engineers; reliability in engineering systems; random processes, statistical estimation, auto/ cross correlation and power spectral density functions and linear filtering of random signals.

Prerequisite: MATH 2210 and EE 3220. EE 3220 may be taken concurrently.

EE4390 - Microprocessors

Credits: 3

Design of microcomputers, controllers and instruments which use microprocessors. Semiconductor memory design, CPU architecture, bus structure and timing, input-output interfaces and devices, assembly language programming, assemblers, compilers, editors and simulators. Emphasizes design techniques. Laboratory.

When Offered (Normally offered once a year)

Prerequisite: EE 2390.

EE4440 - Communication Theory

Credits: 3

Amplitude and angle modulation and demodulation; digital baseband and carrier communication systems; performance

of communication systems; and current topics in communication systems.

When Offered (Normally offered once a year)

Prerequisite: EE 3220 and EE 4220.

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

EE4820 - Senior Design I

Credits: 2

Students choose a senior design project and complete the preliminary design. This stage of senior design includes investigation of alternative solutions that meet the project's requirements, cost analysis, and building the prototype circuit. Periodic oral and written project progress reports are required.

When Offered (Offered fall semester only)

Prerequisite: EE 2220, EE 2390, and EE 3312 or concurrent enrollment, plus 6 hours of 4000 level EE/BE classes, or concurrent enrollment. COM2 must be passed with a C or better grade.

EE4830 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in EE 4820. The final result of the senior design project includes assembly of a PC board hardware that meets the project's requirements and final report describing the design procedure, designed hardware and software, and results of final testing. Periodic oral and written project progress reports are required.

When Offered (Offered spring semester only)

Prerequisite: EE 4820 and selected courses in the area of the design project.

Advisor Approved Electives

- 15 credits of EE or BE Electives (4000-Level or Above)
- 4 credits Approved Technical Electives.⁵

Total Credits: 128 Hours

¹PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

²One course from the ECE Math/Science Elective List. ABET requires a minimum of 30 hours of Math/ Science Electives.

³Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

⁴To meet the COM3 requirement with EE 4820 and EE 4830, the COM2 course must be taken before EE 4820. Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

⁵Any course from the approved ECE technical elective list. Credit can be earned for professional internships or CO-OPs. Internships for Credit must go through EE 4800

Online courses taken outside of the Wyoming system will not be considered for preapproved Transfer.

Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation.

A grade of C or better is required for all prerequisite courses.

Students must also achieve a grade of C or better in all required mathematics courses.

Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

EE 1101 is the recommended FYS course for Electrical Engineering majors.

Electrical Engineering Program Educational Objectives

Graduates of the University of Wyoming Electrical and Computer Engineering Program will:

- Be able to successfully practice the profession of Electrical or Computer Engineering.
- Be prepared and motivated to accept challenging assignments and responsibilities and be productive members of society.
- Demonstrate successful career growth (e.g., professional registration, graduate school, promotion and advancement, patents, publications).

Electrical Engineering - Student Learning Outcomes

All Electrical (Computer) Engineering graduates shall demonstrate:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Electrical Engineering, F.M. Long Bioengineering, B.S.

The Bioengineering B.S. is a degree in Electrical Engineering in which the electives are carefully taken to understand and design medical equipment. With a few more courses, it can serve as a pre-med or pre-dental program.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Math & Science

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

PHYS1210 - Engineering Physics I

Credits: 4

First course of a two-semester sequence. Provides introduction to physics with calculus for engineering students. Includes classical mechanics, gravitation and mechanical waves. Laboratory sessions illustrate principles studied. Students receiving credit for PHYS 1210 cannot receive credit for PHYS 1050, PHYS 1110, or PHYS 1310.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: a grade of C or higher in MATH 2200 and concurrent enrollment in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

Engineering Science

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

Electrical Engineering

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE2390 - Digital Systems Design

Credits: 4

Binary logic, digital logic gates, reduction of Boolean expressions, combinational logic design. MSI and LSI combinational logic ICs, flip-flops, synchronous and asynchronous sequential systems design, MSI and LSI sequential system ICs, and algorithmic state machines.

Prerequisite: COSC 1010 or COSC 1015 or COSC 1030 or ES 1060, and MATH 2205.

EE3150 - Electromagnetics

Credits: 3

A thorough study of static electric and magnetic fields using vector methods with an introduction to dynamic fields.

Prerequisite: ES 2210, or ES 2215 and ES 2216, MATH 2210, and PHYS 1220 or concurrent enrollment.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution; difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

EE3311 - Electronics I

Credits: 3

Physical characteristics and models of semiconductor devices with application to electronic circuit design. Diode circuits, single transistor amplifiers, biasing, and load lines. Prerequisites: (PHYS 1220 or PHYS 1320 or EE 3150), and EE 2220 or concurrent enrollment.(Offered fall semester only)

Prerequisite: PHYS 1220 or PHYS 1320 or EE 3150, and EE 2220 or concurrent enrollment

EE3312 - Electronics I Laboratory

Credits: 1

Hands on interactive laboratory investigation of the physical characteristics of semiconductor devices and applications in electronic circuit design. Study of diode and transistor characteristics as well as diode circuits and single transistor amplifier circuit design, construction and testing. Prerequisites: EE3311 must be taken either concurrently or as a prerequisite. (Offered fall semester only)

When Offered (Offered fall semester only)

Prerequisite: EE3311 must be taken either concurrently or as a prerequisite.

EE3331 - Electronics II

Credits: 3

Current sources, differential and multistage amplifiers; circuits with ideal and non-ideal operational amplifiers; low and high band frequency response, feedback, stability, gain and phase margin of amplifiers; output stages, class A and push-pull; monolithic operational amplifier; oscillators; transistors as switches and introduction to digital electronic circuits. Laboratory. Prerequisites: (EE 3310 or EE 3311) and EE 2220. (Offered spring semester only)

When Offered (Offered spring semester only)

Prerequisite: (EE 3312 or EE 3311) and EE 2220

EE3332 - Electronics II Laboratory

Credits: 1

Hands on interactive laboratory investigation of transistor switching circuits, differential amplifiers, current sources, amplifier frequency response, feedback, output stages, and oscillators. Prerequisites: EE 3312 and EE 3331 concurrently (offered spring semester only).

Prerequisite: EE 3312 and EE 3331 concurrently

EE3510 - Electric Machines and Power Systems

Credits: 4

Polyphase AC circuits; single phase and polyphase transformers; AC synchronous and induction machines;

introduction to power systems and per unit system; transmission line parameters; steady-state operations of transmission lines; power flows; transient stability; synchrophasor system and its applications.

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE4075 - C++ with Numerical Methods for Engineers

Credits: 4

Introduction to the fundamentals of practical engineering programming, using specific applications of numerical methods to demonstrate these principles. The use of an object oriented approach using C++ in an efficient manner is emphasized. Other solution approaches, including C and Matlab will be discussed as appropriate.

A&S College Core 2015 Credit will not be allowed in both EE 4075 and ES 3070.

Prerequisite: MATH 2205 and (COSC 1010, COSC 1015, or ES 1060) and (MATH 2250 or MATH 2310) or consent of instructor.

EE4220 - Probabilistic Signals and Systems

Credits: 3

Fundamentals of probability and statistics for engineers; reliability in engineering systems; random processes, statistical estimation, auto/ cross correlation and power spectral density functions and linear filtering of random signals.

Prerequisite: MATH 2210 and EE 3220. EE 3220 may be taken concurrently.

EE4390 - Microprocessors

Credits: 3

Design of microcomputers, controllers and instruments which use microprocessors. Semiconductor memory design, CPU architecture, bus structure and timing, input-output interfaces and devices, assembly language programming, assemblers, compilers, editors and simulators. Emphasizes design techniques. Laboratory.

When Offered (Normally offered once a year)

Prerequisite: EE 2390.

EE4820 - Senior Design I

Credits: 2

Students choose a senior design project and complete the preliminary design. This stage of senior design includes investigation of alternative solutions that meet the project's requirements, cost analysis, and building the prototype circuit. Periodic oral and written project progress reports are required.

When Offered (Offered fall semester only)

Prerequisite: EE 2220, EE 2390, and EE 3312 or concurrent enrollment, plus 6 hours of 4000 level EE/BE classes, or concurrent enrollment. COM2 must be passed with a C or better grade.

EE4830 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in EE 4820. The final result of the senior design project includes assembly of a PC board hardware that meets the project's requirements and final report describing the design procedure, designed hardware and software, and results of final testing. Periodic oral and written project progress reports are required.

When Offered (Offered spring semester only)

Prerequisite: EE 4820 and selected courses in the area of the design project.

Bio-Engineering and Electives

BE4810 - Bioinstrumentation

Credits: 3

Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 5810.

Prerequisite: EE 2210 or similar electric circuit course.

BE4820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

Dual Listed BE 5810.

Prerequisite: EE 3220, basic course, or equivalent.

OR

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

- 3 credits of EE or BE Electives (4000-level or above)
- 3 credits Approved Technical Electives.⁴

Total Credits: 128 Hours

¹ PHYS 1210: no credit can be earned in PHYS 1210 if taken after ES 2120. PHYS 1220 should be taken before or concurrently with ES 2210.

² Or any ES, EE, BE course (>2000 level), or COSC 3011 or COSC 3750

³ To meet the COM3 requirement with EE 4820 and EE 4830 the COM2 course must be taken before EE 4820. Also, EE 4820 and EE 4830 must be taken in sequence. COM 2 grade of C or better is required.

⁴ Any course from the approved ECE technical elective list. Credit can be earned for professional internships or CO-OPs. Internships for Credit must go through EE 4800.

Online courses taken outside of the Wyoming system will not be considered for preapproved Transfer.

Students must have a minimum cumulative GPA 2.000 in all Engineering courses for graduation.

A grade of C or better is required for all prerequisite courses.

Students must also achieve a grade of C or better in all mathematics courses.

Students must complete a minimum of 42 hours of upper division coursework, 30 of which must from the University of Wyoming.

EE 1101 is the recommended FYS course for Electrical Engineering majors.

Electrical Engineering -F.M. Long Bioengineering Program Educational Objectives

Graduates of the University of Wyoming Electrical and Computer Engineering Program will:

- Be able to successfully practice the profession of Electrical or Computer Engineering.
- Be prepared and motivated to accept challenging assignments and responsibilities and be productive members of society.
- Demonstrate successful career growth (e.g., professional registration, graduate school, promotion and advancement, patents, publications).

Electrical Engineering, F.M. Long Bioengineering Student Learning Outcomes

All Electrical (Computer) Engineering graduates shall demonstrate:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Energy Systems Engineering, B.S.

Energy Systems Engineers design, develop, and test energy systems and devices with emphasis on renewables, conversion, and more, and in the context of environmental and legal considerations. The UW BS in Energy Systems Engineering is ABET accredited.

Energy Systems Engineering Success Curriculum

All undergraduate students in the B.S. Mechanical Engineering and B.S. Energy Systems Engineering programs must successfully complete the Mechanical Engineering Success Curriculum prior to enrolling in any upper-division (3000-level or above) courses taught by the Mechanical Engineering Department. The Mechanical Engineering Success Curriculum promotes successful completion of upper-division coursework by assuring a student that their foundational knowledge and skills are strong in mathematics and engineering fundamentals. AP/iB courses are excluded from the GPA calculation, but grades transferred from other institutions will be used in evaluating the ME Success Curriculum GPA.

Successful Completion

To successfully complete the Mechanical Engineering Success Curriculum, a student must earn a minimum 3.000 GPA in the following 10 courses:

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

Policy for Transfer Credit Towards Energy Systems Engineering (ESE) Core Coursework

In general, transfer of coursework toward an Energy Systems Engineering degree will follow University of Wyoming policy. A course must be shown to be equivalent to its University of Wyoming course (latitude may be given for Energy Systems Engineering electives without a direct University of Wyoming equivalent). However, three courses are considered to be the core of the Energy Systems Engineering program, and therefore credit cannot be transferred from another institution. These courses are ESE 3020, ESE 3040, and ESE 3360. Exceptions may be made for courses from approved study abroad programs or in extreme circumstances. Please note that failing a prerequisite course resulting in a delay of graduation does not constitute an extreme circumstance. Any transfer of ESE courses requires explicit written approval from the Department.

Energy Systems Engineering Curriculum

Atmospheric Science

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

Chemistry

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Engineering Science

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

Environment and Natural Resources

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

Math

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Energy System Engineering

ESE3005 - Engineering Experimentation

Credits: 3

A combined lecture/laboratory course introducing students to experimental methods in the context of dynamics. Written technical communication, intermediate structured programming, experimental design, fundamental statistics, and uncertainty methods (numerical and analytical) are emphasized. Collaborative writing and teamwork is introduced.

Cross Listed ME 3005.

Former Course Number [2010; 2020]

Prerequisite: Completion of the ME Success Curriculum, ES 1060; ES 2120.

ESE3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ME 3020.

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ESE3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ME 3040.

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ESE3060 - Numerical Methods for Engineers

Credits: 3

Numerical solutions of problems commonly encountered in mechanical engineering including differentiation, integration, differential equations, system of linear and nonlinear equations, and optimization. The structured programming approach will be emphasized and applications from solid mechanics, thermal fluid sciences, materials science, and dynamic systems will be covered.

Cross Listed ME 3060.

Prerequisite: Completion of the ME Success Curriculum, ES 1060 and corequisite of MATH 2310.

ESE3160 - Thermal/Fluid Science Lab

Credits: 3

A laboratory course to introduce students to experimental methods for temperature measure and pressure/flow characteristics of fluids. Continuation of experience with communication (written, oral, and digital), intermediate programming, experimental design, data analysis, and teamwork skills is emphasized.

Cross Listed ME 3160.

Former Course Number [2140; 2160]

Prerequisite: Completion of the ME Success Curriculum, ES 2330; ME 3005/ESE 3005.

ESE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ME 3360/ARE 3360.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310 and ES 2330.

ESE4060 - Energy Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience on an energy-related project. Multidisciplinary teams prepare a project proposal or Statement of Qualifications, generate a morphological study of their project, develop mathematical models of their design, and prepare project plans and specifications. Project management and methods are also presented.

USP 2015 Code U5C3

Prerequisite: Completion of the ME Success Curriculum, ESE 3040 and ESE 3360.

ESE4070 - Energy Systems Design II

Credits: 3

Continuation of a two-course design sequence. The design teams refine their designs, fabricate the project, test the project for compliance with the design specifications, write a comprehensive engineering design report including socioeconomic factors, and prepare and deliver a presentation of the project in a public forum.

USP 2003-2014 Code U3WC

Prerequisite: Completion of the ME Success Curriculum, ME 4060/ESE 4060 and WB.

Life Sciences

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Physics

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

Electives

- One Math/Science Elective (min 3 CH total, select from department-approved list)
- One Business Elective (min 3 CH, select from department-approved list)

(See here for Math, Science and Business Elective options: [me_math_science_business_electives_2022_02_04.pdf](#) (uwyo.edu))

ESE Electives

Two ESE Electives (min 6 CH total) choose 2 from:

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H
A&S College Core 2015 ASG

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.
Dual Listed POLS 5051.
USP 2003-2014 Code U3WC
Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4350 - Sustainable Development and Global Policy

Credits: 3

Considers in-depth meaning of "sustainable development" and trade-offs necessary to achieve it. Considers this issue from global perspective through application of theories in economics, political science, international relations, technology studies and ethics.

Dual Listed POLS 5350.
Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

PETE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Studies social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed CHE 4000.

Prerequisite: junior standing and completion of two lab sciences.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

Technical Electives

Five Technical Electives (min 15 CH). Choose 5 from:

ARE4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ME 4430.

When Offered (Normally offered alternate spring semesters)

Former Course Number [ARE 3420, ARE 4810]

Prerequisite: Completion of the ME Success Curriculum, ARE 3400 and ARE 3360/ME 3360 or concurrent.

ARE4740 - Mechanical Systems Design Project

Credits: 3

Final course in the building mechanical systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's mechanical systems.

Cross Listed ARE/ME 4740

Prerequisite: ARE/CE 3110 and ARE 3400

CE3400 - Introduction to Environmental Engineering

Credits: 3

An introduction to the major topics in environmental engineering. Focus areas include water supply, wastewater treatment, air pollution control and solid and hazardous waste management. Quantitative aspects and engineering solutions to problems are emphasized.

Prerequisite: MATH 2205 and CHEM 1020 or equivalent.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

ES2800 - Physical Computing

Credits: 3

Emphasizes implementing python programs on the Raspberry Pi and then interfacing with power stages, mobile platforms, sensors and input/output devices. The goal is designing systems that sense the world, make decisions based on those sensations

Prerequisite: EE 1101 or ES 2210 or concurrent enrollment in ES2210 or Consent of the Instructor

ESE4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems. Cross-listed with ME 4455 and dual-listed with ME 5455.

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ESE4461 - Computational Fluid Dynamics I

Credits: 3

Max Credit 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed ME 4461

Dual Listed ME 5461

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

ME3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/ equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ARE 3400

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ME3450 - Properties of Materials

Credits: 3

Mechanical, electrical, thermal and chemical properties of materials. Theoretical treatment of structure of solids and design for specified properties.

When Offered (Normally offered spring semester)

Former Course Number [ES 3450]

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ME4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solarpowered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ESE 4460

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ME4340 - Gas Turbine Engines

Credits: 3

Thermodynamic analysis and design of ground-based and aero-propulsion gas turbine engines.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

PETE2050 - Fundamentals of Petroleum Engineering

Credits: 3

General introduction to petroleum engineering, including petroleum geology, exploration, reservoir rocks, and fluid flow through porous media, drilling fundamentals, completion technology, well logging and testing, methods of production, stimulation methods, enhanced oil recovery, reserves and economics.

Prerequisite: grade of C or better in both MATH 2205 and PETE 1060.

Universities Studies Program Requirements

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Notes:

- i. Before enrolling in any upper division ESE or ME course, students must complete the ME Success Curriculum (minimum 3.000 GPA in MATH 2200, MATH 2250, MATH 2210, and the seven ES courses).
- ii. Graduates must meet all college requirements and earn a minimum GPA of 2.000 in ME and ESE courses taken at UW. A minimum of 48 hours of upper division coursework are required, so ESE, business, and technical electives should be chosen appropriately.

Program Educational Objectives

- Successfully practice the profession of engineering
- Demonstrate career growth (e.g., increasing complexity of job assignment, career promotions, professional registration, patents, publications, and completion of advanced degrees)
- Apply energy systems engineering knowledge to find creative solutions to evolving challenges with global, economic, environmental, and societal impacts
- Successfully serve in a range of leadership and collaborative roles in the profession and in the community
- Exhibit high professional standards and commitment to ethical action

Energy Systems Student Outcomes

The Department's Student Outcomes are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Mathematics, B.A.

A comprehensive math degree with training in the fundamentals of proofs, analysis, algebra, computation and math modeling. Provides a strong background for teaching, work in industry and graduate programs in math.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Lower Division Core Courses

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2800 - Mathematics Major Seminar

Credits: 2

An introduction to modern mathematical reasoning and discourse, emphasizing the distinctive ways in which logic and language are used and the motivations behind them. Develops methods of precise definition and rigorous proof. Several topics are explored, illustrating mathematics as a living, dynamic subject with its own culture and conventions.

Upper Division

These courses, known as the transition courses, introduce students to the three main areas of mathematics research currently represented in the department.

At the upper division, all mathematics majors must take:

MATH3205 - Analysis I: Elementary Real Analysis

Credits: 3

An introduction to rigorous analysis in one real variable. Includes a rigorous reconsideration of the elements of calculus: the real number system, numerical sequences and series, limits, continuity, differentiability, and Riemann integrability for functions of one variable. Proof and mathematical writing are emphasized.

Prerequisite: Grade of C or better in MATH 2205 and MATH 2800.

MATH3500 - Algebra I: Introduction to Rings and Proofs

Credits: 3

Begins with common features of integers, rational numbers, and polynomials, leading to study of rings in general. Topics include divisibility, factorization, and modular arithmetic for integers and polynomials, and homomorphisms and ideals for rings. Proof techniques include direct proof, proof by contrapostive, mathematical induction, and proof by contradiction.

Prerequisite: MATH 2800 and grade C or better in MATH 2250 or concurrent registration in MATH 2250.

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

Depth Course

Every mathematics major must select one course that builds on the corresponding transition course. This sequence provides the student with an opportunity to study one of these areas in greater depth.

MATH4200 - Analysis 2: Advanced Analysis

Credits: 3

A second course in analysis. Includes metric space topology, sequences and series of functions, and analysis in \mathbb{R}^n .

When Offered (Offered fall semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 2210, MATH 2250 and MATH 3205.

OR

MATH4205 - Analysis 3: Undergraduate Topics in Analysis

Credits: 3

Special topics in analysis. Content varies. May be repeated for credit.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 4200.

OR

MATH4510 - Algebra II: Introduction to Group Theory

Credits: 3

An introduction to the fundamental properties of groups including: binary operations, groups, permutation groups, subgroups, homomorphisms, and quotient groups.

When Offered (Offered spring semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 3500.

OR

MATH4520 - Algebra III: Topics in Abstract Algebra

Credits: 3

Further examples and structure of rings and fields. Finite fields and number fields. Special topics.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 4510.

OR

MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed COSC 4340.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

OR

MATH4440 - Introduction to Partial Differential Equations I

Credits: 3

Survey of analytic methods for solving partial differential equations. Topics include: method of characteristics for solving first-order linear and quasi-linear equations; classification of second-order equations and canonical forms; background to separation of variables with applications; transform methods and Green functions; elliptic equations; heat and wave equations in one dimension.

Prerequisite: grade of C or better in MATH 2210 and MATH 2310.

Upper Division Math Courses

Finally, an additional 15 credits of upper division math courses (3000 and above) are required. It is recommended that these courses be selected to provide a broad view of mathematics.

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the major.

Mathematics, B.S.

A comprehensive math degree with training in the fundamentals of proofs, analysis, algebra, computation and math modeling. Provides a strong background for teaching, work in industry and graduate programs in math.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Required Lower Division Core Courses

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2800 - Mathematics Major Seminar

Credits: 2

An introduction to modern mathematical reasoning and discourse, emphasizing the distinctive ways in which logic and language are used and the motivations behind them. Develops methods of precise definition and rigorous proof. Several topics are explored, illustrating mathematics as a living, dynamic subject with its own culture and conventions.

Upper Division

These courses, known as the transition courses, introduce students to the three main areas of mathematics research currently represented in the department.

At the upper division, all mathematics majors must take

MATH3205 - Analysis I: Elementary Real Analysis

Credits: 3

An introduction to rigorous analysis in one real variable. Includes a rigorous reconsideration of the elements of calculus: the real number system, numerical sequences and series, limits, continuity, differentiability, and Riemann integrability for functions of one variable. Proof and mathematical writing are emphasized.

Prerequisite: Grade of C or better in MATH 2205 and MATH 2800.

MATH3500 - Algebra I: Introduction to Rings and Proofs

Credits: 3

Begins with common features of integers, rational numbers, and polynomials, leading to study of rings in general. Topics include divisibility, factorization, and modular arithmetic for integers and polynomials, and homomorphisms and ideals for rings. Proof techniques include direct proof, proof by contrapostive, mathematical induction, and proof by contradiction.

Prerequisite: MATH 2800 and grade C or better in MATH 2250 or concurrent registration in MATH 2250.

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

Depth Course

Every mathematics major must select one course that builds on the corresponding transition course. This sequence provides the student with an opportunity to study one of these areas in greater depth.

MATH4200 - Analysis 2: Advanced Analysis

Credits: 3

A second course in analysis. Includes metric space topology, sequences and series of functions, and analysis in \mathbb{R}^n .

When Offered (Offered fall semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 2210, MATH 2250 and MATH 3205.

OR

MATH4205 - Analysis 3: Undergraduate Topics in Analysis

Credits: 3

Special topics in analysis. Content varies. May be repeated for credit.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 4200.

OR

MATH4510 - Algebra II: Introduction to Group Theory

Credits: 3

An introduction to the fundamental properties of groups including: binary operations, groups, permutation groups, subgroups, homomorphisms, and quotient groups.

When Offered (Offered spring semester)

USP 2015 Code U5C3

Prerequisite: grade of C or better in MATH 3500.

OR

MATH4520 - Algebra III: Topics in Abstract Algebra

Credits: 3

Further examples and structure of rings and fields. Finite fields and number fields. Special topics.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 4510.

OR

MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed COSC 4340.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

OR

MATH4440 - Introduction to Partial Differential Equations I

Credits: 3

Survey of analytic methods for solving partial differential equations. Topics include: method of characteristics for solving first-order linear and quasi-linear equations; classification of second-order equations and canonical forms; background to separation of variables with applications; transform methods and Green functions; elliptic equations; heat and wave equations in one dimension.

Prerequisite: grade of C or better in MATH 2210 and MATH 2310.

Upper Division Math Courses

Finally, an additional 15 credits of upper division math courses (3000 and above) are required. It is recommended that these courses be selected to provide a broad view of mathematics.

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the major.

Mechanical Engineering, B.S.

Mechanical Engineers design, develop, build, and test mechanical and thermal systems and devices in a wide range of fields including energy, manufacturing, materials, machines, and more. The UW BS in Mechanical Engineering is ABET accredited.

Mechanical Engineering Success Curriculum

All undergraduate students in the B.S. Mechanical Engineering and B.S. Energy Systems Engineering programs must successfully complete the Mechanical Engineering Success Curriculum prior to enrolling in any upper-division (3000-level or above) courses taught by the Mechanical Engineering Department. The Mechanical Engineering Success Curriculum promotes successful completion of upper-division coursework by assuring a student that their foundational knowledge and skills are strong in mathematics and engineering fundamentals. AP/iB courses are excluded from the GPA calculation, but grades transferred from other institutions will be used in evaluating the ME Success Curriculum GPA.

Successful Completion

To successfully complete the Mechanical Engineering Success Curriculum, a student must earn a minimum 3.000 GPA in the following 10 courses:

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

Policy for Transfer Credit Towards Mechanical Engineering (ME) Core Coursework

In general, transfer of coursework towards a Mechanical Engineering degree will follow University of Wyoming policy. A course must be shown to be equivalent to its University of Wyoming course (latitude may be given for Mechanical Engineering electives without a direct University of Wyoming equivalent). However, six courses are considered to be the core of the Mechanical Engineering program, and therefore credit cannot be transferred from another institution. These courses are ME 3010, ME 3020, ME 3040, ME 3170, ME 3360, and ME 3450. Exceptions may be made for courses from approved study abroad programs or in extreme circumstances. Please note that failing a prerequisite course resulting in a delay of graduation does not constitute an extreme circumstance. Any transfer of ME courses requires explicit written approval from the Department.

Mechanical Engineering Curriculum

Chemistry

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Engineering Science

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

ES2800 - Physical Computing

Credits: 3

Emphasizes implementing python programs on the Raspberry Pi and then interfacing with power stages, mobile platforms, sensors and input/output devices. The goal is designing systems that sense the world, make decisions based on those sensations

Prerequisite: EE 1101 or ES 2210 or concurrent enrollment in ES2210 or Consent of the Instructor

Math

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

Mechanical Engineering

ME3005 - Engineering Experimentation

Credits: 3

A combined lecture/laboratory course introducing students to experimental methods in the context of dynamics. Written technical communication, intermediate structured programming, experimental design, fundamental statistics, and uncertainty methods (numerical and analytical) are emphasized. Collaborative writing and teamwork is introduced.

Cross Listed ESE 3005

Former Course Number [2010; 2020]

Prerequisite: Completion of the ME Success Curriculum, ES 1060, ES 2120.

ME3010 - Intermediate Mechanics of Materials

Credits: 3

Expansion of the principles of solid mechanics: stress, strain, principal stresses, elastic and plastic behavior, failure theories and the use of energy methods. Analysis and design of thick-walled pressure vessels, noncircular cross sections under torsion, nonsymmetric beams under bending and curved beams.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ESE 3020

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ME3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ESE 3040

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3060 - Numerical Methods for Engineers

Credits: 3

Numerical solutions of problems commonly encountered in mechanical engineering including differentiation, integration, differential equations, system of linear and nonlinear equations, and optimization. The structured

programming approach will be emphasized and applications from solid mechanics, thermal fluid sciences, materials science, and dynamic systems will be covered.

Cross Listed ESE 3060

Prerequisite: Completion of the ME Success Curriculum, ES 1060, and MATH 2310 or concurrent enrollment.

ME3160 - Thermal/Fluid Science Lab

Credits: 3

A laboratory course to introduce students to experimental methods for temperature measure and pressure/flow characteristics of fluids. Continuation of experience with communication (written, oral, and digital), intermediate programming, experimental design, data analysis, and teamwork skills is emphasized.

Cross Listed ESE 3160

Former Course Number [2140; 2160]

Prerequisite: Completion of the ME Success Curriculum, ES 2330; ME 3005/ESE 3005.

ME3170 - Machine Design

Credits: 3

Application of engineering mechanics and materials science to the analysis and design of mechanical components such as bolted connections, springs, gears, bearings and shafts. Design for dynamic loading conditions. Principles of hydrodynamic lubrication. Introduction to computer-aided design. Case studies with appropriate topics.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ARE 3360/ESE 3360

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310, and ES 2330.

ME3450 - Properties of Materials

Credits: 3

Mechanical, electrical, thermal and chemical properties of materials. Theoretical treatment of structure of solids and design for specified properties.

When Offered (Normally offered spring semester)

Former Course Number [ES 3450]

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME4060 - Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience. Student multidisciplinary teams prepare a project proposal or SOQ, generate a morphological study of their project and prepare project plans and specifications. Project management methods are also presented.

USP 2015 Code U5C3

Former Course Number [3070]

Prerequisite: Completion of the ME Success Curriculum, ME 3010 (or concurrent enrollment), ME 3170, and ME 3360/ESE 3360/ARE 3360.

ME4070 - Systems Design II

Credits: 3

Continuation of a two-course design sequence. The design teams refine their designs, fabricate the project, test the project for compliance with the design specifications, write a comprehensive engineering design report including socioeconomic factors, and prepare and deliver a presentation of the project in a public forum.

USP 2003-2014 Code U3WC

Prerequisite: Completion of the ME Success Curriculum, ME 4060/ESE 4060 and WB.

ME4150 - Mechanical Behavior of Materials

Credits: 3

Commonly encountered phenomenological and mechanistic behaviors that lead to mechanical failure are examined. Understanding the origin of mechanical failure of components allows for robust design of mechanical systems. Metallic, polymeric, and ceramic materials are covered.

Prerequisite: Completion of the ME Success Curriculum, ME 3450.

Physics

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PHYS2310 - Physics III: Waves and Optics

Credits: 4

Third-semester course primarily for majors in physics, astronomy, engineering, mathematics, and other sciences. Includes Gaussian Optics and matrix calculations, wave equations, interference, superposition principle, elementary Fourier Analysis, Fraunhofer and Fresnel Diffraction, application to optical instruments.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

OR

PHYS2320 - Physics IV: Modern Physics

Credits: 3

Fourth semester course primarily for majors in physics, astronomy, engineering, mathematics, and other physical sciences. Topics include introductory quantum mechanics, nuclear and particle physics, lasers, Planck's Blackbody Radiation, photoelectric effect, electron diffraction, wave-particle duality, deBroglie Wavelength, Bohr Atom, Heisenberg Uncertainty Principle, Schrodinger Equation, and Einstein's Special Theory of Relativity.

Prerequisite: PHYS 1220 or PHYS 1320 or equivalent.

OR

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

Electives

- Four ME Electives (min 12 CH total, any upper division ME course or EE 4620)
- Two Math/Science Electives (min 6 CH total, select from department-approved list)
- One Business Elective (min 3 CH, select from department-approved list)
- One Technical Elective (min 3 CH, any engineering, math/science or business course approved by the ME Dept)

(See here for Math, Science and Business Elective options: [me_math_science_business_electives_2022_02_04.pdf](#) (uwo.edu))

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

ME4010 - Mechanical Vibrations

Credits: 3

The theory of single and multi-degree-of-freedom systems with an introduction to continuous systems. Determination of equations of motion, including natural frequency for free vibration and amplitude of forced vibration. Design of discrete and continuous systems for transient and harmonic excitations.

When Offered (Normally offered fall semester)

Prerequisite: Completion of the ME Success Curriculum, ES 2120, ES 2410, and MATH 2310.

ME4020 - Design of Mechanical/Electronic Systems

Credits: 3

Theoretical and experimental study of sensors and actuators, interfacing sensors and actuators to a microcomputer, discrete and continuous controller design, analog and digital electronics, and real-time programming for control.

Prerequisite: Completion of the ME Success Curriculum, ME 3020.

ME4040 - Introduction to Finite Elements

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. The course includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 5040.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310 and (CE 4200/ARE 4200 or MATH 2250 or ME 3010 or ME 3060).

ME4100 - Manufacturing Processes

Credits: 3

Details of manufacturing processes used in production of metal, plastic and ceramic components with an emphasis on science and mechanics of processes.

Prerequisite: Completion of the ME Success Curriculum, ME 3010 and ME 3450.

ME4200 - Thermo/Kinetics of Materials

Credits: 3

Introduction to the foundations of thermodynamics and kinetics of materials, including Gibbs free energy, ideal solutions, alloy ordering, phase diagrams, atomistic mechanisms of diffusion, interfaces and microstructure, grain growth, solidification, and diffusional and diffusionless transformation in solids.

Dual Listed ME 5200.

Prerequisite: ME 3450

ME4210 - Introduction to Composite Materials

Credits: 3

Applications, mechanical properties and fabrication of fiber reinforced composite materials; stress analysis of laminated, anisotropic composite structures; study of special problems unique to composites.

Prerequisite: Completion of the ME Success Curriculum, ME 3010.

ME4215 - Composite Materials Design and Manufacturing

Credits: 3

Introduction to composite material manufacturing processes. Aspects of constituent material production, as well as design, fabrication, and testing of composite materials. Laboratory exercises, such as laminating, filament winding, pultrusion and compression molding.

Prerequisite: Completion of the ME Success Curriculum, ME 4210.

ME4240 - Gas Dynamics I

Credits: 3

Thermodynamics of a compressible fluid; one-dimensional isentropic flow, normal and oblique shocks, expansion wave, flows with friction and heat transfer.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

ME4340 - Gas Turbine Engines

Credits: 3

Thermodynamic analysis and design of ground-based and aero-propulsion gas turbine engines.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

ME4350 - Airplane Aerodynamics and Flight

Credits: 3

Introduces students to the fundamentals of airfoil and wing design, airplane aerodynamics, and airplane stability. Links these fundamental ideas to the design and performance of real aircraft.

Prerequisite: Completion of the ME Success Curriculum, ES 2330.

ME4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ARE 4430

Prerequisite: ARE 3400/ME 3400 and ARE 3360/ME 3360 or concurrent.

ME4450 - Principles of Materials Selection

Credits: 3

A review of the economic and engineering aspects of materials selection. A detailed study of the properties, applications and limitations of engineering materials systems. Emphasis is on metal alloy systems, but non-metallics are included. Forming and joining processes are outlined.

Former Course Number [3110]

Prerequisite: Completion of the ME Success Curriculum, ME 3450

ME4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Dual Listed ESE 4455

Prerequisite/Corequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solarpowered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ESE 4460

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ME4461 - Computational Fluid Dynamics I

Credits: 3
Max Credit 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed Cross-list with ME 4461

Dual Listed dual list with ME 5461

Prerequisite: ME Success Curriculum; ME/ESE 3060 - Numerical Methods; ME/ESE 3360 - Transport Phenomena

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

Universities Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Notes:

- i. Before enrolling in any upper division ESE or ME course, students must complete the ME Success Curriculum (minimum 3.000 GPA in MATH 2200, MATH 2250, MATH 2210, and the seven ES courses).
- ii. ES 2800 is NOT a part of the MESC
- iii. Graduates must meet all college requirements and earn a minimum GPA of 2.000 in ME and ESE courses taken at UW. A minimum of 48 hours of upper division coursework are required, so ME, business, and technical electives should be chosen appropriately.

Mechanical Engineering Program Educational Objectives

- Successfully practice the profession of engineering
- Demonstrate career growth (e.g. increasing complexity of job assignment, career promotions, professional registration, patents, publications, and completion of advanced degrees).
- Apply Mechanical Engineering knowledge to find creative solutions to evolving challenges with global, economic, environmental, and societal impacts.
- Successfully serve in a range of leadership and collaborative roles in the profession in the community.
- Exhibit high professional standards and commitment to ethical action.

Mechanical Engineering Program Student Outcomes

The Department's Student Outcomes are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Petroleum Engineering, B.S.

Petroleum engineers combine fundamentals of science & math with computer programming, materials science, fluid mechanics and thermodynamics to develop and apply new technology to recover hydrocarbons from conventional and unconventional reservoirs.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Undergraduate Curriculum

*Course meets USP requirement.

Applies to all undergraduate PETE programs.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

- GEOL Technical Elective Credits: 3

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and

functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

PHYS1220 - Engineering Physics II

Credits: 4

Follows PHYS 1210 and continues introduction to physics with calculus for engineering students. Includes electricity, magnetism and heat. Laboratories illustrate principles studied. Students receiving credit for PHYS 1220 cannot receive credit for PHYS 1050, 1120, or 1320.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: grades of C or higher in MATH 2200, 2205 and concurrent enrollment in MATH 2210.

PETE1060 - Introduction to Petroleum Engineering Problem Solving

Credits: 1

Covers elements of Petroleum Engineering calculations associated with typical computations in Drilling, Production, and Reservoir Engineering, Rock and Fluids properties, to simultaneously train the student on basic computing skills as well as basic language of Petroleum Engineering. The preferred computing tool is Matlab, which will be introduced through simple calculations on the computer. Notions of the petroleum engineering curriculum will also be provided through examples of the different subjects.

Prerequisite: Math placement 5 or concurrent enrollment in MATH 2200.

PETE2050 - Fundamentals of Petroleum Engineering

Credits: 3

General introduction to petroleum engineering, including petroleum geology, exploration, reservoir rocks, and fluid flow through porous media, drilling fundamentals, completion technology, well logging and testing, methods of production, stimulation methods, enhanced oil recovery, reserves and economics.

Prerequisite: grade of C or better in both MATH 2205 and PETE 1060.

PETE2060 - Introduction to Petroleum Engineering Computing

Credits: 3

Introduces Petroleum Engineering problems and principles, develops computational skills needed to solve them, and reinforces a computational tool that will be useful for other Petroleum Engineering classes.

Prerequisite: C or better in PETE 1060, and either a D or better in MATH 2310 or concurrent enrollment in MATH 2310.

PETE3015 - Multicomponent Thermodynamics

Credits: 3

Introduces mixture properties, such as chemical potentials, excess properties, partial molar properties, heats of mixing, fugacities, and practical tools for estimating them from solution theories and equations of state. These tools and concepts are applied to phase and chemical equilibria.

Prerequisite: C or better in ES 2310 and concurrent enrollment in PETE 2060. Student must be a Petroleum Engineering major.

PETE3025 - Heat and Mass Transfer

Credits: 3

Introduces energy and mass transfer concepts and the development of mathematical models of physical phenomena, including convection, conduction, radiation, and mass diffusion and convection.

Prerequisite: C or better in ES 2330 and MATH 2310. Student must be a Petroleum Engineering major.

PETE3100 - Rock and Fluids Lab

Credits: 2

Provides understanding of principles of rock and fluid properties and their measurement as part of conventional and special core analysis, as well as PVT characteristics of reservoir fluids. Students are expected to understand how to measure important rock and fluid properties using laboratory equipment, as part of reservoir characterization routines, formation damage evaluations and well log calibration protocols. Students are also expected to learn how to write succinct and organized reports.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3200 - Reservoir Engineering

Credits: 3

Covers rock and fluid properties, reserve estimation using volumetric and material balance methods, discussion of different reservoir drive mechanisms, aquifer models, Darcy's law and single-phase flow through porous media, introduction to well testing, solution of radial diffusivity equation, immiscible displacement, decline rate analysis, and reservoir simulation.

Prerequisite: PETE 3025, C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3255 - Basic Drilling Engineering

Credits: 3

Principles and practices of oil and gas well rotary drilling, including rock mechanics, drilling hydraulics, drilling fluids, and hold deviation. Drilling equipment analysis, casing design, and drilling fluid properties. Application of modern computer-based analysis and design methods.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE3265 - Drilling Fluids Laboratory

Credits: 3

Measurement of physical and chemical properties of drilling fluids, including experiments on mud density control, viscosity control, rheological properties, mud hydraulics, filtration properties, mud contaminants and their treatments. Includes design of experiments, data processing, interpretation and writing technical reports.

Prerequisite: PETE 3255, C or better in both ES 2310 and ES 2330. Student must be a Petroleum Engineering major.

PETE3715 - Production Engineering

Credits: 3

Provides elements for calculating the production rate of oil or gas wells, including reservoir inflow performance, which is determined by the reservoir rock and fluids properties and calculated based on Darcy's law, and tubing performance, which is determined by tubing parameters and calculated based on Newtonian dynamics. Basic design of artificial lift systems, reservoir stimulations and optimization of production systems are also included.

Prerequisite: C or better in ES 2310, ES 2330 and PETE 2050. Student must be a Petroleum Engineering major.

PETE3725 - Well Completions

Credits: 3

Covers many facets of completion and intervention in oil and gas wells, including design and procedures to meet deliverability, safety, and integrity, starting with completion, stimulation, workover, and intervention, ending with plug and abandonment requirements.

Prerequisite: C or better in both PETE 2050 and ES 2410. Student must be a Petroleum Engineering major.

PETE4225 - Well Test Analysis

Credits: 3

Covers knowledge of well test interpretation techniques. Theory for well testing include drawdown and buildup tests, single-rate and multi-rate testing, derivative analysis, wellbore storage, type curve matching, fall off and injectivity, fractured wells, fractured reservoirs, interference and pulse testing, and horizontal well analysis.

Prerequisite: PETE 3200. Student must be a Petroleum Engineering major.

PETE4320 - Well Log Interpretation

Credits: 3

Studies use of various types of open hole logs for quantitative evaluation of formations.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

PETE4340 - Petroleum Economics

Credits: 3

Applies principles of economics to petroleum properties. Studies taxation, present worth, rate of return, payout and decisions under uncertainty.

Prerequisite: PETE 3200. Student must be a Petroleum Engineering major.

PETE4736 - Petroleum Engineering Design

Credits: 4

Design and development of petroleum reservoirs using principles and skills learned in the Petroleum Engineering program. Application of software for design and analysis of the drilling, reservoir and production of petroleum.

USP 2015 Code U5C3

Prerequisite: PETE 3200, PETE 3255, PETE 3715, PETE 3725, and C or better in COM2. Student must be a Petroleum Engineering major.

- PETE Technical Electives Credits: 15

Technical Electives Policy

The technical electives in the PETE curriculum can be used to complete a curriculum emphasis option or a minor. The number of credits of upper division courses must be satisfied, therefore, 13 elective credits must be 3000-level courses or higher.

Notes: Technical Electives must be selected with your advisor's documented approval.

Minimum Grade Requirements

A grade of C or better is required for the following courses:

- USP designated courses: FYS, COM1, COM2, COM3
- All Engineering Science (ES) courses
- MATH courses that are prerequisites to ES & PETE courses

PETE1060 - Introduction to Petroleum Engineering Problem Solving

Credits: 1

Covers elements of Petroleum Engineering calculations associated with typical computations in Drilling, Production, and Reservoir Engineering, Rock and Fluids properties, to simultaneously train the student on basic computing skills as well as basic language of Petroleum Engineering. The preferred computing tool is Matlab, which will be introduced

through simple calculations on the computer. Notions of the petroleum engineering curriculum will also be provided through examples of the different subjects.

Prerequisite: Math placement 5 or concurrent enrollment in MATH 2200.

PETE2050 - Fundamentals of Petroleum Engineering

Credits: 3

General introduction to petroleum engineering, including petroleum geology, exploration, reservoir rocks, and fluid flow through porous media, drilling fundamentals, completion technology, well logging and testing, methods of production, stimulation methods, enhanced oil recovery, reserves and economics.

Prerequisite: grade of C or better in both MATH 2205 and PETE 1060.

PETE4736 - Petroleum Engineering Design

Credits: 4

Design and development of petroleum reservoirs using principles and skills learned in the Petroleum Engineering program. Application of software for design and analysis of the drilling, reservoir and production of petroleum.

USP 2015 Code U5C3

Prerequisite: PETE 3200, PETE 3255, PETE 3715, PETE 3725, and C or better in COM2. Student must be a Petroleum Engineering major.

Total Upper Division Credits Required

48

Total Hours Required for B.S. Degree

129

Petroleum Engineering Program Educational Objectives

Three to six years after graduation, graduates who choose to practice in Petroleum engineering should:

- (PETE-OB1) Successfully practice the profession/field of petroleum engineering or related discipline.
- (PETE-OB2) Demonstrate successful career accomplishment and civic engagement.

Petroleum Engineering Program Outcomes

During the course of study in Petroleum Engineering, the student should develop:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Statistics, B.A.

Statisticians (data scientists) provide analytic solutions to scientific problems. Statistics is the process of using data to answer a research question.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

30 hours of Statistics - Required Courses:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: STAT 2050 or equivalent

STAT4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed MATH 4255.

Dual Listed STAT 5255.

When Offered (Offered fall semester)

Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

STAT4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed MATH 4265.

Dual Listed STAT 5265.

Former Course Number [4260, 4010]

Prerequisite: STAT 4255/MATH 4255.

STAT4870 - Senior Thesis

Credits: 3

Encompasses senior thesis research project under faculty member guidance and supervision. Faculty sponsorship must be obtained prior to registration.

Prerequisite: 18 hours in statistics and senior standing.

Optional from (12 Hours)

STAT4045 - Categorical Data Analysis

Credits: 3

Applied methods for analyzing associations when some or all variables are measured in discrete categories, not continuous scales. Topics include the binomial, multinomial, and Poisson probability models, parameter estimation and hypothesis-testing about proportions, measures of association and tests for contingency tables, logistic regression, and log-linear models.

Dual Listed STAT 5045.

Former Course Number [4040]

Prerequisite: STAT 2050 or equivalent

STAT4070 - Causal Models

Credits: 3

Applications of least-squares and iterative maximum-likelihood methods for drawing cause and effect conclusions from nonexperimental data. Topics include regression-based path analysis, reciprocal causation, confirmatory factor analysis, measurement error, and structural equation models with unmeasured (latent) variables.

Cross Listed SOC 4070.

Prerequisite: one of STAT 3050, STAT 4015, STAT 5050, 5060, STAT 5070, STAT 5080 or equivalent (regression methods).

STAT4115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling. Computer analyses using MINITAB and SAS will be an important part of the course.

Cross Listed ECON 5115

Dual Listed STAT 5115.

Former Course Number [4110]

Prerequisite: STAT 4015 /5015

STAT4155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage sampling. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 5155.

Former Course Number [4150]

Prerequisite: choice of STAT 2010, STAT 2050, STAT 2070 or equivalent.

STAT4300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include: multivariate regression, canonical correlation, discriminate analysis, factor analysis and multidimensional scaling. A wide range of computer assistance is incorporated.

Dual Listed STAT 5300.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4350 - Survey Construction and Analysis

Credits: 3

Examines the issues surrounding the construction (item wording, test theory, and numerical scales), assessment (sampling and psychometrics), and analysis (item analysis, qualitative data analysis, and factor analysis) of survey instruments. Roughly a third of the course is devoted to each of these areas.

Dual Listed STAT 5350.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4360 - Spatial Statistics

Credits: 3

Emphasis is on a generalized linear model approach to the modeling of continuous data, placing model building and the various kriging methods into a single conceptual framework.

Dual Listed STAT 5360.

Prerequisite: STAT 4015.

STAT4370 - Survival Analysis

Credits: 3

Introduction to the modeling of time to event data as it arises in epidemiological and medical research. Topics include parametric and non-parametric estimation for censored data without covariates, and for data with covariates, the proportional hazards regression model, additive hazards regression model and parametric regression models.

Dual Listed STAT 5370.

Prerequisite: STAT 4015 and STAT 4025.

STAT4460 - Statistical Software

Credits: 1

Max Credit 1

An introduction to the various statistical software programs currently in use at the University of Wyoming. Topics will include the structure of each language, I/O, programming the basic statistical applications, and a comparison of the other languages.

Former Course Number [5480]

Prerequisite: STAT 2050

STAT4880 - Problems in Statistics

Credits: 1-4

Encourages individual initiative on part of students who work on extending their knowledge through library research.

Former Course Number [4790]

Prerequisite: senior standing, 8 hours in statistics and consent of instructor.

Mathematics (15 Hours)

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

Computer Science (6 Hours)

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

Electives

Chosen so that at least 42 hours are at the 3000/4000/5000 level

Total Hours: at Least 120

Only grades of C or better will be accepted for the major.

Statistics, B.S.

Statisticians (data scientists) provide analytic solutions to scientific problems. Statistics is the process of using data to answer a research question. The B.S. in Statistics is applied with some theory.

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

30 Hours of Statistics - Required Courses:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: STAT 2050 or equivalent

STAT4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed MATH 4255.

Dual Listed STAT 5255.
When Offered (Offered fall semester)
Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

STAT4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed MATH 4265.
Dual Listed STAT 5265.
Former Course Number [4260, 4010]

Prerequisite: STAT 4255/MATH 4255.

STAT4270 - Applied Bayesian Statistics

Credits: 3

This course introduces Bayesian data analysis in an applied context. We will learn about Bayesian statistics primarily in a regression model context, taken broadly. A conceptual understanding of popular Markov Chain Monte Carlo algorithms will be provided.

Dual Listed STAT 5270.
Prerequisite: STAT 4015 /5015

STAT4870 - Senior Thesis

Credits: 3

Encompasses senior thesis research project under faculty member guidance and supervision. Faculty sponsorship must be obtained prior to registration.

Prerequisite: 18 hours in statistics and senior standing.

Optional from (12 Hours)

STAT4045 - Categorical Data Analysis

Credits: 3

Applied methods for analyzing associations when some or all variables are measured in discrete categories, not continuous scales. Topics include the binomial, multinomial, and Poisson probability models, parameter estimation and hypothesis-testing about proportions, measures of association and tests for contingency tables, logistic regression, and log-linear models.

Dual Listed STAT 5045.
Former Course Number [4040]

Prerequisite: STAT 2050 or equivalent

STAT4070 - Causal Models

Credits: 3

Applications of least-squares and iterative maximum-likelihood methods for drawing cause and effect conclusions from nonexperimental data. Topics include regression-based path analysis, reciprocal causation, confirmatory factor analysis, measurement error, and structural equation models with unmeasured (latent) variables.

Cross Listed SOC 4070.

Prerequisite: one of STAT 3050, STAT 4015, STAT 5050, 5060, STAT 5070, STAT 5080 or equivalent (regression methods).

STAT4115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling. Computer analyses using MINITAB and SAS will be an important part of the course.

Cross Listed ECON 5115

Dual Listed STAT 5115.

Former Course Number [4110]

Prerequisite: STAT 4015 /5015

STAT4155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage sampling. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 5155.

Former Course Number [4150]

Prerequisite: choice of STAT 2010, STAT 2050, STAT 2070 or equivalent.

STAT4300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include: multivariate regression, canonical correlation, discriminant analysis, factor analysis and multidimensional scaling. A wide range of

computer assistance is incorporated.

Dual Listed STAT 5300.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4350 - Survey Construction and Analysis

Credits: 3

Examines the issues surrounding the construction (item wording, test theory, and numerical scales), assessment (sampling and psychometrics), and analysis (item analysis, qualitative data analysis, and factor analysis) of survey instruments. Roughly a third of the course is devoted to each of these areas.

Dual Listed STAT 5350.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4360 - Spatial Statistics

Credits: 3

Emphasis is on a generalized linear model approach to the modeling of continuous data, placing model building and the various kriging methods into a single conceptual framework.

Dual Listed STAT 5360.

Prerequisite: STAT 4015.

STAT4370 - Survival Analysis

Credits: 3

Introduction to the modeling of time to event data as it arises in epidemiological and medical research. Topics include parametric and non-parametric estimation for censored data without covariates, and for data with covariates, the proportional hazards regression model, additive hazards regression model and parametric regression models.

Dual Listed STAT 5370.

Prerequisite: STAT 4015 and STAT 4025.

STAT4460 - Statistical Software

Credits: 1

Max Credit 1

An introduction to the various statistical software programs currently in use at the University of Wyoming. Topics will include the structure of each language, I/O, programming the basic statistical applications, and a comparison of the other languages.

Former Course Number [5480]

Prerequisite: STAT 2050

STAT4880 - Problems in Statistics

Credits: 1-4

Encourages individual initiative on part of students who work on extending their knowledge through library research.

Former Course Number [4790]

Prerequisite: senior standing, 8 hours in statistics and consent of instructor.

Mathematics (15 Hours)

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

Computer Science (6 Hours)

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

Electives

- Chosen so that at least 42 hours are at the 3000/4000/5000 level

Total Hours: at Least 120

Only grades of C or better will be accepted for the major.

Minor

Biomedical Engineering Minor

Biomedical Engineering is an interdisciplinary field that combines principles of biology and medicine with engineering design to produce healthcare innovations. Biomedical engineers contribute to medical technologies in a variety of areas including diagnostics, therapeutics, imaging, bioinformatics, and rehabilitation.

Learning Outcomes:

A student who has completed the Biomedical Engineering Minor will have:

1. Experience and proficiency in applying principles of engineering, biology, human physiology, chemistry, calculus-based physics, differential equations, and statistics;
2. Experience and proficiency in solving biomedical engineering problems, including those associated with the interaction between living and nonliving systems;

3. Experience and proficiency in analyzing, modeling, designing, and realizing medical (biomedical engineering) devices, systems, components, or processes;
4. Experience and proficiency in making measurements on and interpreting data from living systems;
5. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
6. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
7. An ability to communicate effectively with a range of audiences.
8. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
9. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
10. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
11. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Biomedical Engineering is an interdisciplinary field that combines principles of biology and medicine with engineering design to produce healthcare innovations. Biomedical engineers contribute to medical technologies in a variety of areas including diagnostics, therapeutics, imaging, bioinformatics, and rehabilitation. Accordingly, biomedical engineers typically possess a broad biology background and strong engineering design and problem-solving principles. The purpose of this minor in Biomedical Engineering is to prepare students studying engineering or the life sciences for careers in industries that develop technologies to advance medicine.

The following curriculum is accessible to students from any major degree program in the College of Engineering and Applied Science (CEAS). Major-specific tracks anticipating the most appropriate groupings of electives are provided to the CEAS advising center. Specialized, more comprehensive programs of study are proposed for students with a particular interest in medical school preparation.

Coursework:

The minimum required coursework consists of 18 credits of electives. The course of study can be self-directed or tailored to a student's major degree program. Example coursework tracks are provided below for students pursuing specific engineering majors.

Chemical Engineering

Chemical Engineering draws upon the fundamentals of chemistry, physics, and biology to analyze and design processes. Chemical Engineers work in a variety of biomedical disciplines including pharmaceutical production, biomedical devices, tissue engineering, and medical sensing. The following coursework covers biological fundamentals and materials with a focus on process and device design.

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE4100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 5100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.
+ 6 Credits fo approved coursework

Electrical Engineering

BE4810 - Bioinstrumentation

Credits: 3

Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 5810.

Prerequisite: EE 2210 or similar electric circuit course.

BE4820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from

experimental data.

Dual Listed BE 5810.

Prerequisite: EE 3220, basic course, or equivalent.

EE5410 - Neural and Fuzzy Systems

Credits: 3

Theory of feed forward and recurrent neural networks. Supervised and unsupervised learning theories. Fuzzy logic and systems. Associative memories. Matching and self-organizing networks. Application of neural and fuzzy systems.

Prerequisite: EE 3220.

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

Mechanical Engineering

With a focus upon biomaterials and biomechanics, this minor combines biology and physiology with mechanical engineering. This coursework helps students apply mechanical engineering principles to biological challenges including prosthetics, robotic surgery instruments, and medical device design.

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE4100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 5100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

Medical School Preparation

With a focus upon biomaterials and biomechanics, this minor combines biology and physiology with mechanical engineering. This coursework helps students apply mechanical engineering principles to biological challenges including prosthetics, robotic surgery instruments, and medical device design.

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

Plus the following suggested coursework:

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

or

PHCY6120 - Advanced Pathophysiology

Credits: 3

Advanced course covering the molecular, cellular, genetic and clinical principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for Doctor of Pharmacy students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 3450 for interprofessional education revolving around student-led case study presentations.

Former Course Number [6220]

Prerequisite: LIFE 1010, LIFE 1020, CHEM 1020, CHEM 1030, CHEM 2420, CHEM 2440, MOLB 2240, MOLB 3610, ZOO 3115, ZOO 4125.

Additional Approved Courses:

In addition to the suggested tracks above, individual programs may be customized or augmented by selecting from any of the following approved credits, which may be counted in fulfillment of technical elective requirements within the major degree program.

Select 18 credit hours from the following:

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE4100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 5100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

CHE3900 - Undergraduate Research

Credits: 1-6

Students carry out research appropriate to undergraduates, under faculty supervision. May be taken more than once.

When Offered (Normally offered each semester)

Prerequisite: junior standing in chemical engineering.

CHE4220 - Metabolic and Protein Engineering

Credits: 3

An introduction to the design of biological systems for conversion of a feedstock to product, with emphasis on synthetic biology and directed evolution design principles, evolutionary mechanisms and tradeoffs. Metabolic pathways and molecules of industrial importance will be discussed, as well as ethics as applied to synthetic biology and bioengineering.

Dual Listed CHE 5220.

Prerequisite: MOLB 2021 or concurrent enrollment in CHE 3100.

BE4810 - Bioinstrumentation

Credits: 3

Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 5810.

Prerequisite: EE 2210 or similar electric circuit course.

BE4820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

Dual Listed BE 5810.

Prerequisite: EE 3220, basic course, or equivalent.

EE4800 - Problems in _____

Credits: 1-6

Max Credit (Max. 6)

Section 1 is individual study. Other sections are group study by seminar or class format. Features topics not included in regularly offered courses.

Prerequisite: consent of instructor.

EE5410 - Neural and Fuzzy Systems

Credits: 3

Theory of feed forward and recurrent neural networks. Supervised and unsupervised learning theories. Fuzzy logic and systems. Associative memories. Matching and self-organizing networks. Application of neural and fuzzy systems.

Prerequisite: EE 3220.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

MOLB4100 - Clinical Biochemistry

Credits: 4

Integrated discussion of biochemical, molecular, and physiological principles underlying human medical disorders and biochemical and molecular genetics tests used in prevention, diagnosis and treatment. Weekly discussion sessions review basic concepts studied by students independently and class sessions include problem solving in an active learning format, lectures and other applied activities.

When Offered Spring

Former Course Number [3980]

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600; course in physiology recommended (e.g. ZOO 3115).

MOLB4260 - Quantitative Microscopy

Credits: 1

Acquaints students with principles of light microscopy, use of fluorescent probes and image processing software. Students use phase contrast, fluorescent, and confocal microscopes learning to measure and compare size and intensity of images.

Dual Listed MOLB 5260.

When Offered Fall

Prerequisite: MOLB 3610 or CHEM 4400 or MOLB 4600, and PHYS 1120.

MOLB4400 - Immunology

Credits: 4

Biology of immune system; cellular and molecular mechanisms; host resistance to infectious agents; as well as hypersensitivities, autoimmunity, tumor and tissue rejection. Includes laboratory for immunological techniques.

Cross Listed PATB 4400.

Dual Listed MOLB 5400.

When Offered Fall

Prerequisite: MOLB 2021 or MICR 2021 or MOLB 2240 or PATB 2220, and a minimum grade of C in MOLB 3000 or MOLB 3610.

MOLB4600 - Advanced Biochemistry

Credits: 3

Emphasis will be placed on identifying essential chemical features of select biomolecules, understanding molecular mechanisms of representative biochemical and bioenergetic processes, and detailing experimental approaches for addressing important research questions in biochemistry.

Dual Listed MOLB 5600

When Offered Fall

Prerequisite: Minimum grade of C in MOLB 3610 or CHEM 4400

MOLB4610 - Biochemistry 2: Molecular Mechanisms

Credits: 3

Biochemical and molecular mechanisms underlying cell function, including gene expression and epigenetic regulation, RNA and protein modification and function, assembly of macromolecular complexes, signaling and regulation of the cell cycle, are discussed.

Dual Listed MOLB 5610

Prerequisite: Minimum grade of C in MOLB 3610 or MOLB 4600

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY6120 - Advanced Pathophysiology

Credits: 3

Advanced course covering the molecular, cellular, genetic and clinical principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for Doctor of Pharmacy students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 3450 for interprofessional education revolving around student-led case study presentations.

Former Course Number [6220]

Prerequisite: LIFE 1010, LIFE 1020, CHEM 1020, CHEM 1030, CHEM 2420, CHEM 2440, MOLB 2240, MOLB 3610, ZOO 3115, ZOO 4125.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

NOTE

CHE 3100 fulfills the LIFE 2021 & 3050 pre-requisite requirements for CHE 4100, 4160, and 4165.

Alternatively, students may take the following in lieu of CHE 3100: MICR 2021 Microbiology (4) or MOLB 3610 Principles of Biochemistry (4)

Computer Engineering Minor

Minor Requirements:

You must have a minimum of 12 credits of courses that are not counted toward your major.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

EE4490 - Hardware Descriptive Language (HDL) Digital Design

Credits: 3

Hardware Description Language design of digital systems. Industrial CAD tools are used to produce a functional description of hardware that is both simulated and then synthesized into hardware. Methods to describe both combinational logic and synchronous devices are given. Devices such as CPLDs and FPGAs are targeted in this design process. Emphasizes design techniques.

Prerequisite: EE 2390.

- 17 credits of electrical engineering (EE) or CPEN Elective courses.

COSC Courses

The following COSC courses can also be used:

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

OR

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

Computer Science Graduate Minor

A graduate minor in Computer Science gives you the skills and knowledge to understand how software-intensive systems are designed and implemented. With these skills, you can use computers to extend the state of the art in your major discipline.

Requirements:

12 credits are required, and must be completed with a grade of B or better.

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

- 9 additional credits of 5000-level computer science courses

Computer Science Minor

A minor in Computer Science gives you the skills and knowledge to understand how software-intensive systems are designed and implemented. With these skills, you can use computers to tackle problems specific to your major field.

Requirements

18 credits of Computer Science courses are required and must be completed with a grade of C or better.

COSC 1101 and COSC 1200 cannot be used for the Computer Science Minor.

Construction Management Minor

For UW undergraduate students in other majors, a Minor in Construction Management may be earned by:

Completing any 15 credits with a CM prefix, with the exceptions listed below.

Architectural Engineering majors will not be permitted to use the following courses to satisfy the Minor requirement (or as ARE Major Electives), because they duplicate content in required courses in their major:

CM 2120: Construction Materials and Methods

CM 2200: Structures

CM 2400: MEP Systems

CM 2600: Construction Documents

CM 3220: Soils and Concrete

CM 4600: Building Info. Modeling

Civil Engineering majors will not be permitted to use the following courses to satisfy the Minor requirements (or as CE MSTP Electives), because they duplicate content in required courses in their major:

CM 2200: Structures

CM 3220: Soils and Concrete

Minors in Construction Management are not accredited

Electrical Engineering Minor

Electrical Engineering Minor Requirements:

You must have a minimum of 12 credits of EE/BE courses that are not counted toward your major.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

- plus a total of 20 credits of electrical engineering (EE) or bioengineering (BE) courses

Interdisciplinary Computational Science Graduate Minor

In recognition of the importance of modeling and simulation in an increasing number of applications, the Graduate Interdisciplinary Computational Science Minor is intended to help prepare science, math, and engineering students for leading roles in their professions.

Requirements

- The student must earn 15 credit hours in specified courses.
- Within the 15 credits, the student must earn at least 12 credits in graduate level classes (5000).
- Within the 15 credits, the student must earn 6 credits outside of her/his department.
- Only grades of B or better will be accepted for a course counting towards the minor.
- For all students, the 15 hours of coursework will be divided into 9 credit hours of core courses and 6 credit hours of electives.

Core Courses

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

OR

COSC5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability.

Cross Listed MATH 5310.

Prerequisite: MATH 3310, COSC 1010.

COSC5010 - Graduate Topics in Computer Science

Credits: 1-6

Max Credit (Max. 12)

Individual or small group pursuit of computer science research areas.

Prerequisite: graduate standing and consent of instructor.

MATH5340 - Computational Methods II

Credits: 3

Second semester of a three-semester computational methods series with emphasis on numerical solution of differential equations. Topics include explicit and implicit methods, methods for stiff ODE problems, finite difference, finite volume, and finite element methods for time-independence PDEs semi/fully discrete methods for time-dependent PDEs.

Prerequisite: MATH 5310.

OR

- COSC 5340 - Computational Methods II Credits: 3

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

OR

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

GEOL4030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 5030.

Prerequisite: MATH 2205 and GEOL 4444/GEOL 5444.

OR

GEOL5030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 4030.

Prerequisite: MATH 2205, GEOL 5444.

ME5461 - Computational Fluid Dynamics I

Credits: 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed Dual list with ME 4461 and ESE 4461

Prerequisite: graduate standing

ME5462 - Computational Fluid Dynamics II

Credits: 3

A study of advanced techniques in modern-day scientific computing as applied to Computational Fluid Dynamics. These include unstructured mesh generation using Delaunay triangulation, searching and sorting techniques, and efficient data structures. Other topics cover efficient hardware implementation including cache-effects and parallel computing and sensitivity analysis for design optimization.

Prerequisite: ME 5461

STAT5660 - Computationally Intensive Methods in Statistics

Credits: 3

Advanced statistical inference often relies on methods which are computationally intensive. The basic methods include Newton-Raphson; the EM algorithm; bootstrap and other resampling procedures; kernel density estimators; Laplace's method, importance sampling and MCMC, and saddlepoint and Edgeworth approximations.

Prerequisite: STAT 5520.

Electives

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

STAT5680 - Advanced Bayesian Statistics

Credits: 3

Philosophical principles underlying Bayesian and non-Bayesian statistics. Decision theoretic foundations of Bayesian statistics including loss functions, minimaxity, and admissibility. Construction of conjugate prior distributions and non-informative prior distributions. Bayesian point estimation, hypothesis tests and credible sets. Computational tools for Bayesian problems including Markov chain Monte Carlo (MCMC) and other methods for approximating posterior distributions with some emphasis on implementation via a programming language or statistical computing software. As time and interest permit: the normal linear model, non-normal models, hierarchical models, Bayesian model averaging, other topics.

Prerequisite: STAT 5380; 5420 and STAT 5520.

STAT5380 - Bayesian Data Analysis

Credits: 3

Bayesian statistical methods for analyzing various kinds of data. Topics include basic Bayesian ideas and model formulation (priors, posteriors, likelihoods), single- and multiple-parameter models, hierarchical models, generalized linear models, multivariate models, survival models and an introduction to computation methods.

Prerequisite: STAT 5255

- High-Performance Computing in Geosciences, 2 hrs
- MATH 5320 - Mathematics Modeling of Processes Credits: 3

CHEM4560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical, density functional, semi-empirical and molecular mechanics methods.

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 5560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

OR

CHEM5560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical,

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 4560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

PHYS4840 - Mathematical and Computational Physics II

Credits: 4

Second semester of a two-semester course. Provides a comprehensive overview of computational physics and provides numerous numerical techniques applied to physics problems. Topics include: numerical computations and visualizations, numerical solutions of ordinary differential equations, linear systems, curve fitting, discrete Fourier transforms, partial differential equations, integration, and Monte Carlo simulations of general stochastic systems. A weekly lab session will be held.

Prerequisite: MATH 2210, PHYS 2320 and PHYS 3000.

MATH4300 - Introduction to Mathematical Modeling

Credits: 3

A model of a real world problem captures the essential features of the problem, while scaling it down to a manageable size. In this course, symbolic tools and mathematical techniques are used to construct, analyze and interpret various mathematical models which arise from problems in the physical, biological and social sciences.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250 or MATH 2310.

Interdisciplinary Computational Science Minor

In recognition of the importance of modeling and simulation in an increasing number of applications, the Undergraduate Interdisciplinary Computational Science Minor is intended to help prepare science, math, and engineering students for leading roles in their professions.

The Undergraduate Minor in Computational Science is based on the following requirements:

1. The student must earn 15 credit hours in specified courses.
2. Within the 15 credits, the student must earn 9 credits at the upper-division level (3000 or above).
3. Within the 15 credits, the student must earn 6 credits outside of her/his major.
4. Within the 15 credits, the student must earn at least 6 credits in core courses.
5. Only grades of C or better will be accepted for the minor.

The 15 hours of coursework are divided between core and elective courses as listed below.

Core Courses

MATH4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed COSC 4340.

When Offered (Offered spring semester)

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

OR

COSC4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis, and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed MATH 4340.

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

- High-Performance Computing (Offered as a topics course).

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

OR

COSC3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed MATH 3340.

Prerequisite: grade of C or better in MATH 2210.

STAT4460 - Statistical Software

Credits: 1

Max Credit 1

An introduction to the various statistical software programs currently in use at the University of Wyoming. Topics will include the structure of each language, I/O, programming the basic statistical applications, and a comparison of the other languages.

Former Course Number [5480]

Prerequisite: STAT 2050

Elective Courses

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

OR

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

PHYS4840 - Mathematical and Computational Physics II

Credits: 4

Second semester of a two-semester course. Provides a comprehensive overview of computational physics and provides numerous numerical techniques applied to physics problems. Topics include: numerical computations and visualizations, numerical solutions of ordinary differential equations, linear systems, curve fitting, discrete Fourier transforms, partial differential equations, integration, and Monte Carlo simulations of general stochastic systems. A weekly lab session will be held.

Prerequisite: MATH 2210, PHYS 2320 and PHYS 3000.

CHEM4560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical, density functional, semi-empirical and molecular mechanics methods.

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 5560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

OR

CHEM5560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical,

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 4560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

- ES 3070 - C with Numerical Methods for Engineers

MATH4300 - Introduction to Mathematical Modeling

Credits: 3

A model of a real world problem captures the essential features of the problem, while scaling it down to a manageable size. In this course, symbolic tools and mathematical techniques are used to construct, analyze and interpret various mathematical models which arise from problems in the physical, biological and social sciences.

When Offered (Offered fall semester)

Prerequisite: grade of C or better in MATH 2250 or MATH 2310.

ME4040 - Introduction to Finite Elements

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. The course includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 5040.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310 and (CE 4200/ARE 4200 or MATH 2250 or ME 3010 or ME 3060).

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

International Engineering Minor

The International Engineering minor is an 18 credit hour program open to all engineering students. Cornerstones are a study abroad experience and coursework to help students gain understanding of perspectives and viewpoints from around the world.

Study Abroad Requirement

All students earning the International Engineering Minor must complete an educational experience outside of the United States. Examples are:

- Semester or year abroad at a college or university
- UW faculty-led study abroad program
- International service-learning experience (such as Engineers Without Borders, or Alternative Spring Break)
- Internship with a company outside the United States
- Research experience outside the United States

Coursework

The coursework is 18 total credits - these credits may also count toward major degree program. The coursework is intended to help students gain understanding of perspectives and viewpoints from around the world.

Lower Division Coursework

Select 9 credits from the following courses:

- Foreign language courses (except American Sign Language)
- 1000 or 2000 level Engineering courses completed during a Study Abroad program
- 1000 or 2000 level courses in International Studies (INST)
- Any of the courses listed below

ANTH2200 - World Culture

Credits: 3

Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)

USP 2003-2014 Code U3G, U3CS

A&S College Core 2015 ASG

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

ERS1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ECON 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H
A&S College Core 2015 ASG

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

RELI1000 - Introduction to Religion

Credits: 3

Introduces world religions and shared characteristics. Draws on various academic approaches to religion study, emphasizing similarities and differences among wide variety of religions.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

RELI2315 - History of Non-Western Religions

Credits: 3

Max Credit 9

Introduces students to religions outside the Judeo-Christian realm familiar in the west. Each religion analyzed in its world views, its ways of life, and in its social organization. History of each religion and its changes.

Cross Listed HIST 2315.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

INBU1040 - Introduction to International Business

Credits: 3

A broad survey of the field of international business which introduces basic concepts of international business activity and theory and reviews major foreign environmental forces--financial, economic and socioeconomic, physical, sociocultural, political, legal, labor, competitive and distributive.

Cross Listed INST 1040.

A&S College Core 2015 ASG

Former Course Number [BUSN 2000]

Upper Division Coursework

Select 9 credits from the following courses:

- 3000 or 4000 level Engineering courses completed during a Study Abroad program
- 3000 or 4000 level courses in International Studies (INST)
- Engineering design courses with an International focus
- Internship credits earned from an International internship
(Must be approved by International Engineering Minor Coordinator, in advance, with course syllabus or internship plan with detailed International content.)
- Undergraduate Research (for-credit) experience with an International focus
(Must be approved by International Engineering Minor Coordinator, in advance, with course syllabus or internship plan with detailed International content.)
- Any of the courses listed below

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ART3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ARE 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

CHE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Examines social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed PETE 4000.

Prerequisite: junior standing and completion of two lab sciences.

PETE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Studies social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed CHE 4000.

Prerequisite: junior standing and completion of two lab sciences.

Land Surveying Minor

A minor in Land Surveying requires 31 hours of specific course work. This minor includes the Wyoming Board of Professional Engineers and Professional Land Surveyor's education requirements for a Land Surveyor in Training license. The Land Surveying minor may be paired with any major. All Land Surveying classes are offered as distance learning through Distance Education Programs.

Curriculum Requirements:

LS2010 - Engineering Surveying Lecture

Credits: 2

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Basic principles of surveying and map making.

Former Course Number [CE 2072]

Prerequisite: a working knowledge of algebra and trigonometry.

LS2015 - Engineering Surveying Laboratory

Credits: 1

Field surveying activities consisting of traversing, differential leveling, construction staking and gathering topographic data.

Former Course Number [CE 2073]

Prerequisite: LS 2010 or concurrent.

LS2020 - GPS for Land Surveyors

Credits: 4

From fundamental theory to practical application and advanced technologies, this class covers all aspects of GPS needed to understand and use GPS as a land surveyor including the basics of GPS technology, common hardware, surveying methods, survey design, planning and observing, real-time kinematics and DGPS.

Former Course Number [CE 2090]

Prerequisite: LS 2400.

LS2100 - Records Research for Surveyors

Credits: 3

Introduced to the public, quasi-public, and private depositories of recorded and non-recorded documents that establish land ownership boundaries, easement boundaries, and land use rights and restrictions in both the Public Land Survey System and the Colonial States. Assignments will require work to be conducted during depositories' normal business hours.

Former Course Number [CE 2076]

LS2110 - Real Property Law

Credits: 3

Covers all major areas of real property law, including the nature of real property, types of ownership, real estate contracts, title and insurance, financing, landlord and tenant, land use, environmental law and regulation. An understanding of real property law is fundamental to understanding boundary law.

Former Course Number [CE 2050]

LS2400 - Basic Geodesy for Today's Land Surveyor

Credits: 2

The history of geodesy including measurement techniques, coordinate systems, ellipsoids, and datums is reviewed. The modern geodetic and Cartesian coordinates systems, as well as the differences between grid and ground coordinates systems, and the current geodetic and Cartesian coordinate systems available today are discussed.

Former Course Number [CE 2089]

Prerequisite: CE 2070 or LS 2010.

LS3100 - Real Property Descriptions

Credits: 2

Historical and current issues for land description writing and usage for the practicing surveyor. Relationship between written descriptions and field survey data, interpreting old descriptions and the structure principles of description.

Former Course Number [CE 2088]

Prerequisite: CE 2070 or LS 2010, and LS 2100 and LS 2110.

LS3110 - Boundary Evidence

Credits: 2

A practical and working guide to understanding survey evidence and the laws of boundary location for efficient, accurate boundary determination. This material aids in the elimination of errors in location of land boundaries. The surveyor's liability and statutes of limitations are explored in depth. Also included are discussions of the surveyor's role in court. Normally offered only through the Outreach School.

Former Course Number [CE 3750]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3120 - Boundary Principles

Credits: 2

This course in boundary law addresses the fundamental principles of real property as applied to land surveying and related professions. Discussion and applications center on practical situations and concepts commonly encountered while conducting boundary surveys and the determination of the extent of ownership rights. Students explore the scope of the surveyors' judiciary role in real property ownership. Primarily offered through the Outreach School.

Former Course Number [CE 3740]

Prerequisite: CE 2070 or LS 2010, and LS 3100 and LS 2110.

LS3130 - Public Land Surveys

Credits: 3

Basic fundamentals of the Public Land Survey System (PLSS), dependent and independent resurveys, survey plats, "bona fide rights", riparian boundaries, non-rectangular entities, corner evidence and the role of the modern day surveyor.

Former Course Number [CE 2085]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3200 - Route Surveying

Credits: 3

Laying out of super elevation and circular, parabolic, and spiral curves; the difference between highway and railway horizontal curve geometry; offsets to spiral curves as boundaries; area and volumes of earthwork.

Former Course Number [CE 3710, CE 4710]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3210 - Advanced Surveying

Credits: 4

Advanced topics in surveying computations and procedures, including traverse error analysis, topographic surveying, mapping, astronomical observations, coordinate geometry applications, and state plane coordinates.

Former Course Number [CE 3720, CE 4720]

Prerequisite: CE 2070 or LS 2010.

Total Credits: 31 Hours

¹ Computer Aided Drafting 1 offered through Sheridan College Outreach Programs.

The intent of this application based minor is to prepare the student for the pursuit of Professional Licensure. Those only seeking the remote learning Land Surveying courses should see the Cadastral Land Surveying Certificate found at <http://www.uwyo.edu/civil/landsurvey/>.

Mathematics Minor

The minor in mathematics focuses on fundamental aspects of mathematics that are essential for further study in mathematics and a variety of other disciplines. Students may customize the minor by choosing the appropriate transition course and upper-division electives.

Lower Division Core Courses

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

MATH2205 - Calculus II

Credits: 4

Continues MATH 2200. Includes elementary functions, derivatives, integrals, analytical geometry, infinite series and applications.

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 2200 or Advanced Placement credit in MATH 2200.

MATH2210 - Calculus III

Credits: 4

Applies calculus to situations described by more than one variable. Includes vectors, multivariable equations and functions, parameterization of curves and surfaces, partial derivatives, directional derivatives, the gradient, optimization methods, integration over curves and surfaces using Cartesian, polar, cylindrical, and spherical coordinates, vector fields, and Green's, Stokes's, and the Divergence Theorems.

Prerequisite: grade of C or better in MATH 2205 or Advanced Placement credit in MATH 2205.

MATH2310 - Applied Differential Equations I

Credits: 3

Includes solution of ordinary differential equations, integral transforms. Emphasizes construction of mathematical models arising in physical science and other areas.

Prerequisite: grade of C or better in MATH 2205.

MATH2250 - Elementary Linear Algebra

Credits: 3

Studies linear equations and matrices, vector spaces, linear transformations, determinants, orthogonality, eigenvalues and eigenvectors.

Prerequisite: grade of C or better in MATH 2200 or MATH 2350.

MATH2800 - Mathematics Major Seminar

Credits: 2

An introduction to modern mathematical reasoning and discourse, emphasizing the distinctive ways in which logic and language are used and the motivations behind them. Develops methods of precise definition and rigorous proof. Several topics are explored, illustrating mathematics as a living, dynamic subject with its own culture and conventions.

Upper Division

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, www.uwyo.edu/mathstats/.

Only grades of C or better will be accepted for the minor.

At the upper division, all mathematics minors must take ONE of

MATH3205 - Analysis I: Elementary Real Analysis

Credits: 3

An introduction to rigorous analysis in one real variable. Includes a rigorous reconsideration of the elements of calculus: the real number system, numerical sequences and series, limits, continuity, differentiability, and Riemann integrability for functions of one variable. Proof and mathematical writing are emphasized.

Prerequisite: Grade of C or better in MATH 2205 and MATH 2800.

OR

MATH3500 - Algebra I: Introduction to Rings and Proofs

Credits: 3

Begins with common features of integers, rational numbers, and polynomials, leading to study of rings in general.

Topics include divisibility, factorization, and modular arithmetic for integers and polynomials, and homomorphisms and ideals for rings. Proof techniques include direct proof, proof by contrapostive, mathematical induction, and proof by contradiction.

Prerequisite: MATH 2800 and grade C or better in MATH 2250 or concurrent registration in MATH 2250.

OR

MATH3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed COSC 3340.

Prerequisite: grade of C or better in MATH 2210.

- as well as 3 additional credits of upper division math courses (3000 and above)

Process Control Minor

Process control engineers optimize processes and implement quality control systems in the manufacturing industry.

They design, test, and oversee the implementation of new processes. Process control engineers are often employed at manufacturing plants that process chemicals, metals, and other materials.

Required Courses

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)

Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHE2090 - Practical Fundamentals of Process Control

Credits: 2

Introduces students to sensors, valves, actuators and the assembly of process control components. Provide hands-on practical experience with level control, flow control, temperature control and pressure control processes. This course consists of one (1) hour of lecture and two (2) hours of laboratory per week.

Prerequisite: C or better in MATH 2205.

CHE3090 - Applying Simulation to Dynamic Processes

Credits: 1

Introduces students to dynamic simulation software for controlling individual chemical engineering processes. This course consists of two (2) hours of laboratory per week.

Prerequisite: C or better in CHE 2005.

CHE4092 - Controlling Process Systems

Credits: 3

Capstone process control course. Students will design process control for systems of linked processes including sensing and transmission, final control elements, and controller. This course consists of two (2) hours of lecture and three (3) hours of laboratory per week.

Prerequisite: C or better in CHE 3090 and concurrent enrollment in either CHE 4090, EE 4620, or EE 4621.

CHE4090 - Process Dynamics and Control

Credits: 3

Encompasses analysis and design control systems for the chemical process industry including steady-state approximation, types of controllers, simple unsteady-state analysis, use of mathematical models and process dynamics under control.

Prerequisite: C- or better in CHE 3028 and CHE 4060.

or

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

or

EE4621 - Honors Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers. Honors students will at the end of the semester design a high-performance control system for a sophisticated plant with realistic feedback limitations.

Prerequisite: EE 2220 or ME 3020.

Approved Elective Courses

At least 6 hours of approved elective courses are required for this minor.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution; difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

ME4020 - Design of Mechanical/Electronic Systems

Credits: 3

Theoretical and experimental study of sensors and actuators, interfacing sensors and actuators to a microcomputer, discrete and continuous controller design, analog and digital electronics, and real-time programming for control.

Prerequisite: Completion of the ME Success Curriculum, ME 3020.

COSC4450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the World Wide Web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 5450.

Prerequisite: COSC 3020 and MATH 2250.

COSC4765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

CHE4972 - Internship in Process Control Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students serving as interns with an approved organization that provides process control and instrumentation experience.

Prerequisite: Be enrolled in the Process Control and Instrumentation minor.

Learning Outcomes

An engineer who has completed the Process Control and Instrumentation Minor will be able to examine an engineering process that requires automated control and provide a practical control design by:

- Identifying key performance and technical features of the process
- Specifying process variables to control to achieve desired process outcomes
- Identifying the appropriate manipulated variables to achieve control
- Selecting appropriate measurement instrumentation for process variables
- Specifying needed final control elements to effect change of manipulated variables
- Selecting an appropriate controller and control algorithm that achieves stable control
- Testing and tuning the control design in simulation

- Evaluating the control design against performance and economic objectives
- Understand key nomenclature and terms in process control
- Understand the difference between analog and digital components

Statistics Minor

Statisticians (data scientists) provide analytic solutions to scientific problems. Statistics is the process of using data to answer a research question. The B.S. in Statistics is applied with some theory. The minor of Statistics is all application.

Requirements

The following courses are required for a statistics minor:

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

12 Additional Hours from the Following:

STAT4015 - Regression Analysis

Credits: 3

Contains standard topics, as well as some newer and more unconventional ones. Oriented towards analysts who use computer packages for problem solutions. Includes balance of application and theory.

Dual Listed STAT 5015.

Former Course Number [4010, 4410]

Prerequisite: STAT 2050 or equivalent

STAT4025 - Design and Analysis of Experiments I

Credits: 3

Reviews design and analysis of one-factor experiments and introduces multifactor experiments, Latin squares, nested designs and random effects. Includes topics such as polynomial response curves, trend analysis, split plots and incomplete blocks as time permits.

Dual Listed STAT 5025.

Former Course Number [4020, 4310]

Prerequisite: STAT 2050 or equivalent

STAT4045 - Categorical Data Analysis

Credits: 3

Applied methods for analyzing associations when some or all variables are measured in discrete categories, not continuous scales. Topics include the binomial, multinomial, and Poisson probability models, parameter estimation and hypothesis-testing about proportions, measures of association and tests for contingency tables, logistic regression, and log-linear models.

Dual Listed STAT 5045.

Former Course Number [4040]

Prerequisite: STAT 2050 or equivalent

STAT4070 - Causal Models

Credits: 3

Applications of least-squares and iterative maximum-likelihood methods for drawing cause and effect conclusions from nonexperimental data. Topics include regression-based path analysis, reciprocal causation, confirmatory factor analysis, measurement error, and structural equation models with unmeasured (latent) variables.

Cross Listed SOC 4070.

Prerequisite: one of STAT 3050, STAT 4015, STAT 5050, 5060, STAT 5070, STAT 5080 or equivalent (regression methods).

STAT4115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling. Computer analyses using MINITAB and SAS will be an important part of the course.

Cross Listed ECON 5115
Dual Listed STAT 5115.
Former Course Number [4110]

Prerequisite: STAT 4015 /5015

STAT4155 - Fundamentals of Sampling

Credits: 3

Develops methodology of simple random sampling, stratified sampling, and multistage sampling. Provides applications related to physical, social, and biological sciences. Discusses single and two-variable estimation techniques. Presents estimation based on subsamples from subpopulations.

Dual Listed STAT 5155.
Former Course Number [4150]

Prerequisite: choice of STAT 2010, STAT 2050, STAT 2070 or equivalent.

STAT4255 - Mathematical Theory of Probability

Credits: 3

Calculus-based. Introduces mathematical properties of random variables. Includes discrete and continuous probability distributions, independence and conditional probability, mathematical expectation, multivariate distributions and properties of normal probability law.

Cross Listed MATH 4255.
Dual Listed STAT 5255.
When Offered (Offered fall semester)
Former Course Number [4250]

Prerequisite: grade of C or better in MATH 2210.

STAT4265 - Introduction to the Theory of Statistics

Credits: 3

Presents derivations of theoretical and sampling distributions. Introduces theory of estimation and hypothesis testing.

Cross Listed MATH 4265.
Dual Listed STAT 5265.
Former Course Number [4260, 4010]

Prerequisite: STAT 4255/MATH 4255.

STAT4350 - Survey Construction and Analysis

Credits: 3

Examines the issues surrounding the construction (item wording, test theory, and numerical scales), assessment (sampling and psychometrics), and analysis (item analysis, qualitative data analysis, and factor analysis) of survey instruments. Roughly a third of the course is devoted to each of these areas.

Dual Listed STAT 5350.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4360 - Spatial Statistics

Credits: 3

Emphasis is on a generalized linear model approach to the modeling of continuous data, placing model building and the various kriging methods into a single conceptual framework.

Dual Listed STAT 5360.

Prerequisite: STAT 4015.

STAT4370 - Survival Analysis

Credits: 3

Introduction to the modeling of time to event data as it arises in epidemiological and medical research. Topics include parametric and non-parametric estimation for censored data without covariates, and for data with covariates, the proportional hazards regression model, additive hazards regression model and parametric regression models.

Dual Listed STAT 5370.

Prerequisite: STAT 4015 and STAT 4025.

STAT4300 - Applied Multivariate Analysis

Credits: 3

The application of multivariate statistical methods in behavioral science research. Topics include: multivariate regression, canonical correlation, discriminant analysis, factor analysis and multidimensional scaling. A wide range of computer assistance is incorporated.

Dual Listed STAT 5300.

Prerequisite: STAT 4015 /5015 and STAT 4025 /5025

STAT4270 - Applied Bayesian Statistics

Credits: 3

This course introduces Bayesian data analysis in an applied context. We will learn about Bayesian statistics primarily in a regression model context, taken broadly. A conceptual understanding of popular Markov Chain Monte Carlo algorithms will be provided.

Dual Listed STAT 5270.

Prerequisite: STAT 4015 /5015

Total: 18-19 Hours

Only grades of C or better will be accepted for the minor.

Graduate

Architectural Engineering, M.S.

The MSCE Quick Start (Plan A) program in Civil and Architectural Engineering (CAE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor of science (BS) degree in Civil Engineering or Architectural Engineering. These students must apply for admission to the Quick Start (Plan A) program no later than the second semester of their junior year. Areas of study in the master of science program include: building mechanical systems, building energy modeling, structural engineering. The master of science degree in each of these areas requires completion of 12 to 18 hours of engineering courses related to the particular program area.

Plan A (Thesis)

The degree of master of science, Plan A, requires a minimum of 26 hours of coursework and a minimum of 4 hours thesis research in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework for approval by the departmental graduate studies committee (AREGS), and the department head.

Plan A is required of all state or contract supported graduate assistants.

Plan B (Non-thesis)

Requires a minimum of 30 hours of coursework and a Plan B paper, in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework and the course number that the Plan B paper covers for approval by the AREGS and the department head.

Atmospheric Science, M.S.

The Master of Science degree in Atmospheric Science prepares the recipient to work in fields related to meteorology, weather and forecasting, air quality, climate change and environmental regulation.

Program Specific Degree Requirements

Approval of research plan by the graduate committee

Colloquium and oral defense of M.S. thesis

Approval of M.S. thesis by the graduate committee

A minimum of 30 hours of acceptable graduate credit hours that includes at least:

- 26 hours of acceptable graduate coursework and
- 4 hours of thesis research

21 graduate credits must be earned in the Department of Atmospheric Science

Required Courses

These courses are required for the master's program.

ATSC5010 - Physical Meteorology I

Credits: 4

First and second law of thermodynamics applied to energy transformations in the atmosphere, including dry, moist, and saturated processes and atmospheric stability. Fundamentals of radiation including blackbody, planetary budget, and propagation and how these drive the thermodynamics of the earth's atmosphere.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5011 - Physical Meteorology II

Credits: 4

Quantitative description of cloud particle nucleation, growth by condensation, and growth by deposition and collection. Ties to other atmospheric processes, e. g. , radiation budgets and cloud dynamics, are also emphasized. Course material is presented in lecture and computer-based laboratory settings. A numerical cloud model is developed and analyzed in the laboratory.

Prerequisite: ATSC 5010.

ATSC5014 - Dynamic Meteorology

Credits: 4

Development and interpretation of the atmospheric equations of motion, scales of motion, horizontal atmospheric winds, thermal wind equation, circulation and vorticity, mesoscale motions. Introduction to planetary boundary layer flows. Data visualization software is also introduced and used to develop understanding of dynamical processes.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5016 - Synoptic Meteorology

Credits: 4

Large-scale vertical motion as viewed from quasigeostrophic and isentropic potential vorticity perspectives. Baroclinic instability, and the structure and evolution of extratropical cyclones. Identification and development of fronts, jet streams and associated weather features. Role of topography on large-scale circulations.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5018 - Ethics and Research Methods

Credits: 1

Ethics and ethical dilemmas in research and academia and how to address them are discussed. This course also covers general research methodology and describes processes for research funding and disseminating research findings and the peer-review process.

Prerequisite: graduate standing.

Atmospheric Science, Ph.D.

The Doctorate of Philosophy degree in Atmospheric Science prepares the recipient for a career in research studying the atmosphere. Graduates may work in academia, governmental laboratories and agencies, and private industry.

Program Specific Degree Requirements

Approval of research plan by the graduate committee

Successful completion of the Preliminary Examination

Approval of Ph.D. dissertation by the graduate committee

A minimum of 72 hours of acceptable graduate credit hours that includes at least:

- 42 hours of acceptable graduate coursework, and
- 10 hours of thesis or dissertation research

24 graduate coursework hours must be earned in the Department of Atmospheric Science

Chemical Engineering, M.S.

Graduate Study Guidelines

All incoming M.S. Plan A and M.S. Plan B students must have an adviser. The student is responsible for contacting faculty members in order to find an adviser.

All Chemical Engineering graduate students must take the following Chemical Engineering Core courses:

CHE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed PETE 5020.

Prerequisite: graduate standing.

CHE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed PETE 5010.

Prerequisite: ES 2330, MATH 2310, and graduate standing in Chemical or Petroleum Engineering.

CHE5030 - Reaction Kinetics

Credits: 3

An analysis of reactions involving phase boundaries, heterogeneous catalysis, gas-solid systems, and gas-liquid systems.

Prerequisite: CHE 4060.

CHE5355 - Mathematical Methods in Chemical Engineering

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Dual Listed PETE 5355

Prerequisite: MATH 2210, CHE/PETE 3025 or equivalent.

Credit Hours

- Total (from above) Credits: 12
- CHE 5960 - Thesis Research Credits: 4
- Electives Credits: 14
- Total Credits: 30

Plan B (Non-Thesis)

The coursework requirements are the same as the M.S. Plan A requirements except that Thesis Research (CHE 5960) is not required. Plan B students take an additional 4 hours of elective course credits (a total of 30 hours required).

M.S. Plan B students must write a paper on a topic assigned by the adviser and present their work to their graduate committee. This paper must be submitted to the student's graduate committee for approval at least one week prior to the oral presentation.

M.S. Seminar Requirements

All chemical engineering graduate students must enroll in CHE 5890, Chemical Engineering Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Registered off-campus graduate students can be exempt from having to enroll in CHE 5890.

M.S. Thesis

All M.S. Plan A students must orally defend their thesis at a public final examination. At least two weeks before the examination, the student must provide each member of the graduate committee with a copy of the written M.S. thesis and provide the department an announcement of their defense for advertisement by bulletin board, e-mail, or other means. The results of the examination are reported on the Report of Final Examination form. Graduate committee members may request changes in the thesis, and they may postpone signing the form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Graduate Student Resources web site. This copy will be rejected if the format standards specified by the Thesis and Dissertation Format Guide are not met. This guide allows for a publication-ready format. If required by the department and/or committee, additional printed copies should be delivered to the University Store for binding. Students should consult with the adviser to determine if the adviser wants a copy of the thesis, dissertation, or other research documentation.

Chemical Engineering, Ph.D.

The Department of Chemical Engineering offers graduate programs leading to the M.S. and Ph.D. degrees in chemical engineering. The M.S. degree is offered under Plan A and Plan B. In addition, an environmental engineering program, run jointly by the Department of Chemical Engineering and the Department of Civil and Architectural Engineering, offers graduate programs leading to an M.S. in environmental engineering under either Plan A or Plan B.

The mission of the graduate program in Chemical Engineering is to prepare students to be leaders in industry, government, or academia.

A master's degree is not required to enter a Ph.D. program.

Graduate Core Classes

All incoming Ph.D students must have an adviser. The student is responsible for contacting faculty members in order to find an adviser.

All Chemical Engineering graduate students must take the following Chemical Engineering Core courses:

CHE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed PETE 5020.

Prerequisite: graduate standing.

CHE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed PETE 5010.

Prerequisite: ES 2330, MATH 2310, and graduate standing in Chemical or Petroleum Engineering.

CHE5030 - Reaction Kinetics

Credits: 3

An analysis of reactions involving phase boundaries, heterogeneous catalysis, gas-solid systems, and gas-liquid systems.

Prerequisite: CHE 4060.

- CHE 5355 - Mathematical Methods in Chemical Engineering Credits: 3

Doctoral Program

Credit Hours

- CHE 5980 - Dissertation Research Credits: 30
- Electives - Credits: 30 (CHE 5980 will count toward your electives)
- Total Credits: 72

Ph.D. Seminar Requirements

All chemical engineering graduate students must enroll in CHE 5890, Chemical Engineering Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Registered off-campus graduate students can be exempt from having to enroll in CHE 5890.

Ph.D. Preliminary Examination

All Ph.D. students must pass a preliminary examination no later than the end of the student's fifth full semester in the graduate program and a least 15 weeks prior to the dissertation defense. Prior to attempting the Ph.D. preliminary examination, students must have completed all required core classes no later than the end of their fourth semester in the graduate program. Students must file a program of study prior to attempting the preliminary examination.

The goal of the preliminary exam is for the student to demonstrate his or her research progress to-date and present the research proposition that will be investigated and lead to his or her final dissertation. The preliminary exam consists of three components: a written document provided to each member of the student's graduate committee at least one week prior to the oral presentation; a public oral presentation; and a private examination by the student's graduate committee immediately following the oral presentation.

The written document may be in any format but must concisely provide a survey of the relevant literature, a summary of the student's progress to-date, and a clear, detailed plan for the successful completion of the proposed work. The preliminary exam oral presentation should be consistent with the written document. It should provide an appropriate

literature background, demonstrate proficiency with proposed experimental/computational techniques, identify details of the experiments to be performed, and provide a timeline to final defense.

The student's committee will pass or fail the student on the strength of the preliminary examination, with an option to conditionally pass the student while requiring an interim committee meeting prior to the final Ph.D. examination. A form sent by the student's adviser to the Office of the Registrar reports the results of the examination.

Ph.D. Final Examination (Dissertation Defense)

All Ph.D. students must orally defend their thesis or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public thesis defense in oral presentation format. At least two weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis of Ph.D. dissertation and provide the department an announcement of their defense for advertisement by bulletin board, e-mail, or other means. The results of the examination are reported on the Report of Final Examination form. Graduate committee members may request changes in the thesis or dissertation, and they may postpone signing the form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Graduate Student Resources web site. This copy will be rejected if the format standards specified by the Thesis and Dissertation Format Guide are not met. This guide allows for a publication-ready format. If required by the department and/or committee, additional printed copies should be delivered to the University Store for binding. Students should consult with the adviser to determine if the adviser wants a copy of the thesis, dissertation, or other research documentation.

Civil Engineering, M.S.

Program Specific Degree Requirements

Master's Program

Areas of study in the master of science program include: building mechanical systems engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. The master of science degree in each of these areas requires completion of 12 to 18 hours of engineering courses related to the particular program area.

Plan A (Thesis)

The degree of master of science, Plan A, requires a minimum of 26 hours of coursework and a minimum of 4 hours thesis research in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework for approval by the departmental graduate studies committee (CEGS), and the department head.

Plan A is required of all state or contract supported graduate assistants.

Plan B (Non-Thesis)

Requires a minimum of 30 hours of coursework and a Plan B paper, in addition to the minimum requirements set forth in this bulletin.

Early in the program, the student must submit a program of study listing coursework and the course number that the Plan B paper covers for approval by the CEGS and the department head.

Civil Engineering, Ph.D.

Areas of study in the doctor of philosophy program include: building mechanical systems engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering.

Minimum of 42 hours of coursework beyond the baccalaureate, 36 hours of which must be 5000-level (graduate-level) courses or the equivalent, and concentrated independent research leading to an acceptable dissertation.

In addition to expertise in the specific dissertation topic, the candidate must demonstrate competence in two or more research areas that will help to insure a high-quality dissertation acceptable to the student's graduate committee.

Subject to department and university requirements, the student's coursework is arranged by consultation between the student, his or her adviser, and his or her committee, and must also be approved by the CEGS and by the department head.

Coursework is defined in a program of study that should be filed by the end of the second semester of the Ph.D. program.

At a time near the completion of formal coursework, the student is required to take and pass a preliminary examination on the Ph.D. coursework and, as a part of the examination, is required to present a written and oral dissertation proposal to his or her committee for approval.

Finally, the student must demonstrate research competence in an oral defense of the dissertation and must submit an acceptable written version of the dissertation to his or her graduate committee in a timely manner to meet deadlines. In addition, the student is to meet the minimum requirements set forth in this bulletin.

Computer Science, M.S.

Computer scientists learn the theory and practice of computing, which is essential in the modern world. An M.S. in Computer Science extends your technical expertise in computer science to design, implement, and secure software-intensive systems.

Program Specific Degree Requirements

Plan A (Thesis)

A total of at least 31 credit hours must be completed. The student must complete a minimum of 27 hours of courses, including the CORE and BREADTH REQUIREMENTS. At least 19 credit hours must be COSC courses. All COSC

courses must be at the 5000 level. Courses from other departments, including no more than 6 hours of 4000-level courses, may be included with the approval of the supervising M.S. committee.

Plan A students are required to formally defend their theses before their supervising committees. All defenses must be open and announced at least two weeks in advance. The thesis must be distributed to the committee at least two weeks in advance of the defense. If the student does not pass the defense, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Plan B (Non-Thesis)

The student must complete a minimum of 33 hours of courses, including the CORE and BREADTH REQUIREMENTS. At least 22 credit hours must be COSC courses. All COSC courses must be at the 5000 level. Courses from other departments, including no more than 6 hours of 4000-level courses, may be included with the approval of the supervising M.S. committee.

UW Coursework Requirements for M.S. Transfer Students:

M.S. transfer students must complete at least 21 credit hours at the University of Wyoming. At least 12 credits of the CORE & BREADTH REQUIREMENTS must be taken at the University of Wyoming. No more than one class per category of breadth may be counted towards this 12-credit total. The algorithms course credits may be counted toward this 12-credit total.

Summary of Credit Requirements

Plan A

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

- Breadth: theory course, AI course, two systems courses Credits: 12
- Additional courses Credits: 12

COSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

OR

COSC5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Total Credits: 31 Hours

Plan B

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

- Breadth: theory course, AI course, two systems courses Credits: 12
- Additional courses Credits: 18

Total Credits: 33 Hours

Computer Science, Ph.D.

Computer scientists learn the theory and practice of computing, which is essential in the modern world. A Ph.D. in Computer Science prepares you to advance the state of the art in computing principles and practice.

Program Information

Each doctoral student will have a supervising committee of at least five members appointed. The primary functions of this committee are to suggest coursework, to administer the qualifying, preliminary, and final examinations, and to oversee and evaluate the research of the candidate. The committee will consist of at least three members of the computer science department faculty and at least one non-COSC faculty member. The standards that this committee should consider when recommending programs of study are outlined in the following sections.

Coursework Requirements:

A total of at least 72 credit hours must be completed. A minimum of 42 of these credit hours must be taken as coursework, including the CORE and BREADTH REQUIREMENTS. A minimum of 12 hours of COSC5980 - Dissertation Research must be taken. All COSC courses must be at the 5000 level. Courses from other departments, including no more than 12 hours of 4000-level courses, may be included with the approval of the supervising Ph.D. committee. All course requirements MUST be completed or enrolled with satisfactory midterm progress prior to scheduling the Ph.D. Final Examination.

UW Coursework Requirements for Ph.D. Transfer Students:

Ph.D. transfer students must complete at least 24 credit hours at the University of Wyoming. At least 12 credits of the CORE and BREADTH REQUIREMENTS must be taken at the University of Wyoming. No more than one class per category of breadth may be counted towards this 12-credit total. The algorithms course credits may be counted toward this 12-credit total.

Program:

A program of original and innovative research will be undertaken by the candidate. At the end of this program, the candidate will document this research in a dissertation. The dissertation will present the details and results of the candidate's research in addition to providing a critical comparison with relevant previously-published works.

Each successful doctoral student must pass three examinations. These include a qualifying examination, a preliminary examination, and a final (dissertation) defense.

Qualifying Exam Criteria:

The student must complete the CORE REQUIREMENT and pass a closed oral examination on a research area administered by the supervising committee. Although closed to the public, faculty members of the Department of Computer Science are welcome to attend. The exam must be announced to the faculty at least two weeks in advance. The research area will be chosen in consultation with the committee. The student must demonstrate background knowledge of the state of the art in the area and preliminary work. This will involve, but is not limited to, presenting material and answering questions covering the relevant area knowledge. The format of the exam will be defined by the committee prior to the exam to allow for sufficient preparation. This examination is intended to motivate the candidate to review relevant literature extensively prior to pursuing the original and innovative portions of the research. Qualifying exam criteria must be completed within the first two years of enrollment in the Ph.D program. If the student does not pass the qualifying exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass. The closed oral examination requirement may be waived for a student who has completed an M.S. degree in COSC at UW if their M.S. presentation was at a research level that demonstrated background knowledge of the state of the art in the area, at the discretion of the supervising Ph.D. committee.

Preliminary Exam Criteria:

Prior to scheduling the Preliminary Examination, the student must be making satisfactory progress towards completion of their course requirements, including the BREADTH REQUIREMENTS. A Preliminary Examination will consist of a presentation and defense of the already-completed portion of the dissertation research and the research that is proposed to complete the dissertation. The Preliminary Examination must be open and announced at least two weeks in advance. The preliminary examination must be completed within two years of enrollment in the Ph.D program (within three years of enrollment for students who do not have an M.S. degree). This examination is intended to motivate the candidate to make significant progress on work towards their Ph.D. dissertation and propose milestones for completion. If the nature of the proposed continued research and methodology is deemed to be sufficiently original and innovative by the supervising committee, then the committee will approve the research direction after having administered this

examination. If the student does not pass the preliminary exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Option for M.S. degree en route to Ph.D.:

After completing the Qualifying Exam and Preliminary Exam, a Ph.D. student may additionally earn an M.S. degree after completing the remaining M.S. course requirements, including the BREADTH REQUIREMENTS. COSC 5980 may be substituted for COSC 5960 in the M.S. requirements at the discretion of the supervising committee. The M.S. degree will be granted only after completion of the preliminary exam. For an M.S. degree to be granted prior to completion of the preliminary exam, the student should enroll in the M.S. degree program and complete the remaining M.S. requirements.

Final Exam Criteria:

Prior to scheduling the Ph.D. Final Examination (often referred to as a "defense"), all course requirements, including the BREADTH REQUIREMENTS, MUST be completed or enrolled with satisfactory midterm progress. The Final Examination (dissertation defense) will consist of an oral presentation by the candidate of his/her research and the results that were derived. At this examination, the candidate is expected to defend the research as being original and contributory to the discipline of computer science. The Final Examination must be open and announced at least two weeks in advance. The dissertation must be distributed to the supervising committee at least two weeks in advance of the Final Examination. If the student does not pass the final exam, the committee will instruct the student as to what needs to be accomplished (and by when) to pass.

Time to degree for part-time students:

Exceptions to the completion deadlines for the Qualifying Exam and Preliminary Exam may be made for part-time students at the discretion of the supervising committee.

Computer Science Core Requirements

COSC5110 - Analysis Of Algorithms must be completed with a grade of B or better. A grade of B- is not sufficient. Students are strongly encouraged to take COSC 5110 the first time it is offered after enrollment.

Computer Science Breadth Requirements

Students must earn a grade of B or better in one class from the Theory category, one class from the Artificial Intelligence category, and two classes from the Systems category. A grade of B- is not sufficient. Thus there must be 12 credits taken to satisfy the breadth requirement. A list of courses in each category is available from the Department. Although some courses may be listed under multiple categories, a course may only count once towards the breadth requirement.

Program Specific Degree Requirements

Summary of Credit Requirements

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

- Breadth: theory course, AI course, two systems courses Credits:12
- Additional courses Credits: 27

COSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

OR

COSC5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

- Other credits (may include courses or COSC 5960/COSC 5980) Credits: 18

Total Credits: 72 Hours

Electrical Engineering, M.S.

Plan A (Thesis)

This is a minimum 30 credit hour program, 26 hours coursework and 4 hours of thesis

- Minimum 16 Course Hours in Electrical and Computer Engineering Course Work
- Minimum 3 Course Hours in Formal Course Work outside the Electrical and Computer Engineering Department approved by the student's committee
- 7 Additional Formal Course Hours in or out of the Electrical and Computer Engineering Department
- 4 credits of MS thesis research
- No more than 12 credit hours can be at the 4000 level
- No more than 3 credit hours of independent study

Of the above credit hours in formal coursework, no more than 12 credit hours can be 4000 level

The candidate must meet the minimum requirements for the Master of Science degree and also complete and defend a master's thesis.

Plan B (with Paper)

This is a 30 hour program:

- Minimum 18 Course Hrs in Electrical and Computer Engineering Course Work
- Minimum 3 Course Hrs in Formal Course Work outside the Electrical and Computer Engineering Department
- 9 Additional Formal Course Hrs in or out of the Electrical and Computer Engineering Department
- No more than 12 credit hours can be at the 4000 level
- No more than 3 credit hours of independent study

Plan B (Coursework Only)

This is a 30 hour program:

- Minimum 18 Course Hrs in Electrical and Computer Engineering Course Work
- Minimum 3 Course Hrs in Formal Course Work outside the Electrical and Computer Engineering Department
- 9 Additional Formal Course Hrs in or out of the Electrical and Computer Engineering Department
- No more than 12 credit hours can be at the 4000 level
- No more than 3 credit hours of independent study

Of the above credit hours in formal coursework, no more than 12 can be 4000 level.

Electrical Engineering, Ph.D.

Degree Requirements

Ph.D. Degree Requirements:

Ph.D. Credit Allocation (all at 4000 level minimum)

- 72 hours (minimum) of acceptable graduate coursework
- 42 hours (minimum) from ECE and closely related formal course work (EE5980 - Dissertation Research not counting toward this minimum)

Of those 42 hours, no more than 12 hours can be at the 4000 level

Courses required by the department bachelor of science degree may not be applied for graduate credit

- 6 hours (maximum) of EE4800 - Problems in _____ can be counted for program of study credit
- 6 hours (maximum) of EE 5880 - Problems in ... can be counted for program of study credit
- 9 hours (maximum) of EE5600 - Statistical Signal Processing in: can be counted for program of study credit.

In addition to the minimum requirements of the university, doctoral students must pass a written and oral comprehensive examination, part of which is a written proposal explaining their planned dissertation research. The student after completing successfully the oral comprehensive examination and before defending the completed

dissertation must present their research work at an ECE department seminar. The student must also present and defend a completed dissertation. Programs of study, including coursework and any research tools, are arranged by consultation between the students and their graduate committee.

Engineering and Applied Science, MBA/MS Dual Degree

Students who hold both an MBA and an MS in Engineering set themselves apart when entering the competitive marketplace. As leaders, not only do they speak the technical lingo, they also understand the overall strategy and operational goals.

MS/MBA Dual Degree Requirements

The MS/MBA is typically a non-thesis option. An additional 21 credits in engineering, science or mathematics must be earned beyond the BS degree. At least 15 credits of graduate course work must be at the 5000-level from the respective EAS graduate program.

MBA Courses

All students pursuing a dual degree program with the College of Engineering and Applied Science and the College of Business must meet the admission requirements for both programs in order to be considered for the dual degree program. If admitted to both programs, students will complete the following requirements:

Any 9 credit hours of the following required MBA core courses can be counted towards the MS/MBA degree.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5102 - Operations Management

Credits: 3

Production and operations management. Topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, and scheduling.

Prerequisite: Admission to the MBAM program.

MBAM5104 - Organization Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamentals principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBAM program.

MBAM5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions.

Prerequisite: Admission to the MBAM program.

MBAM5330 - Global Business Environment

Credits: 3

Max Credit 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted Admission to the MBA, MBAE, or MBAF program.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director.

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

Program Specific Requirements

Please review the specific program requirements for each program within the dual degree agreement.

- Business Administration, M.B.A.
- Mechanical Engineering, M.S.
- Petroleum Engineering, M.S.

Thesis Option

For a thesis option, students will only count one MBAM course from the above list and are required to complete 4 credits of ME 5960 and 2 credits for ME 5478 similar to the Plan A option.

Environmental Engineering, M.S.

A master of science in environmental engineering is available in the College of Engineering through a joint effort of the Department of Civil and Architectural Engineering and the Department of Chemical Engineering.

Core Courses (9 Hours)

All Environmental Engineering M.S. students must take the following Core courses (9 hrs):

- ENVE 5425 - Environmental Engineering Microbiology

ENVE5430 - Environmental Engineering Chemistry

Credits: 3

Focus includes inorganic, organic, physical, equilibrium, biochemistry, colloidal and nuclear chemistry with an emphasis on the problems/solutions encountered by environmental and civil engineers.

Prerequisite: CHEM 1020.

CE5435 - Environmental Transport Processes

Credits: 3

Designed for graduate students and engineering seniors interested in the principles of mass transport and their application to environmental systems. Deals with the hydrodynamics of mixing and transport, as well as the interaction of mixing and various reaction rate processes. Applications include water and wastewater treatment, groundwater pollution, and transport and mixing in rivers, lakes and reservoirs.

Cross Listed ENVE 5435 and CHE 5435.

Prerequisite: MATH 2310 and ES 2330.

Recommended Courses (3 Hours)

Students should also take at least one of the following Recommended courses (3 hrs):

ENVE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems.

Cross Listed CE 5410/CHE 5410.

Prerequisite: consent of instructor.

ENVE5450 - Advanced Physical Chemical Treatment

Credits: 3

A study of physical and chemical processes for treatment of water, and waste water.

Cross Listed CE 5450.

Prerequisite: CE 4400.

Approved Elective Coursework

Plan A (Thesis) students complete another 14 hours of Approved Elective coursework, at least 4 hours of ENVE5960 - Thesis Research, and write and defend their thesis. Plan B (Project) students complete another 18 hours of Approved Elective coursework and write and present their project.

Total Required Credit Hours: 30 (Minimum)

Mathematics, M.A.

A comprehensive mathematics degree, with training in the fundamentals of analysis, abstract algebra, computation, and mathematical modeling. Provides a strong foundation for teaching, work in industry, and continued study in graduate-level programs.

Common Requirements

The following requirements are common to all four tracks:

- The student must maintain a 3.000 cumulative GPA.
- The student must complete 30 hours of formal mathematics coursework at the 5000 level.
- The student must pass the department's Foundation Exam. This exam covers material from advanced vector calculus and linear algebra at the upper-division undergraduate level and is offered before the beginning of each semester.
- Take one hour of the seminar MATH 4970: Professional Development in Mathematics and one hour of the seminar MATH 4970: Professional Development in Teaching.

5000-level Mathematics Courses

As part of the 30 hours of formal 5000-level mathematics courses, the student must complete the following courses with a grade of B or better:

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

Tracks:

In addition to the common elements above, students must select and complete one of the capstone experiences described in the tracks below.

Track #1: Master's Thesis (Plan A)

Within the 30 hours of 5000-level courses, the Plan A student must complete 4 hours of MATH5960 - Thesis Research. At least 26 hours of 5000-level coursework must be mathcontent courses (not thesis research).

The student must prepare a master's thesis (Plan A) and give an oral defense of the thesis. In the mathematics program, a Plan A thesis reports on the result(s) of independent and original research completed by the student under the direction of a faculty member. The thesis should describe the research and its results and be written to the standards of the appropriate area of mathematics.

Track #2: Master's Paper (Plan B)

The student must prepare a master's paper (Plan B) and give an oral defense.

To write a Plan B paper, the student must present an expository paper on a designated mathematical subject. Students are guided by their advisor in the subject matter and in the preparation of the paper. A successful paper and defense

demonstrates that the student has mastered a substantial mathematical topic that is beyond those covered in formal foundational coursework.

Track #3: Coursework/Project (Plan B)

A second M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper, the student takes a sequence of three 5000-level courses that all address a common mathematical theme. The sequence must be approved by the student's advisor and the mathematics graduate committee. Two of the courses must be mathematics-department offerings, and the third may be either a mathematics course (including reading/topics courses) or a course from another department in a related field.

- The student must complete an additional 6 hours of courses at the 5000 level. Thus, Track #3 requires the completion of 36 hours of graduate-level coursework.
- Within the 36 hours, the student must propose and complete with a grade of B or better an appropriate 3-course sequence
- The student will write a short paper illustrating how the common mathematical theme of the sequence manifests itself in the content of each course and give a presentation/defense of the paper.

In approving the student's proposal for this option, the graduate committee and the advisor will consider how the writing and independent study spirit of the Plan B option are fulfilled within the recommended plan.

Track #4: Qualifying Exam (Plan B)

A third M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper or taking additional coursework, the student must take and pass the department's PhD Qualifying Examination in one of the three areas: Analysis, Algebra, or Applied Mathematics. These examinations focus on the material in the required courses.

These examinations are given twice a year at the beginning of the fall and spring semesters. This option is intended for students who will continue for a PhD at UW.

- The oral component of this Track will consist of a defense of the student's written answers to qualifying exam.
- Pass one of the department's qualifying exams in:

Analysis

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of

one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

Algebra

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

Applied Mathematics

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

Mathematics, M.A.T.

Applicants are required to have:

- A. A valid teaching endorsement in any state or educational requirements satisfied for secondary teaching;
- B. courses equivalent to MATH 3205, MATH 3500, MATH 4000 and MATH 4600;
- C. a course in computer programming.

Students who enter the program with a deficiency in the courses listed in (b) must take them at UW, but these courses may not be counted toward the course requirements of the M.S.T./M.A.T. program.

Mathematics, M.S.

A comprehensive mathematics degree, with training in the fundamentals of analysis, abstract algebra, computation, and mathematical modeling. Provides a strong foundation for teaching, work in industry, and continued study in graduate-level programs.

Common Requirements

The following requirements are common to all four tracks:

- The student must maintain a 3.000 cumulative GPA.
- The student must complete 30 hours of formal mathematics coursework at the 5000 level.
- The student must pass the department's Foundation Exam. This exam covers material from advanced vector calculus and linear algebra at the upper-division undergraduate level and is offered before the beginning of each semester.
- Take one hour of the seminar MATH 4970: Professional Development in Mathematics and one hour of the seminar MATH 4970: Professional Development in Teaching.

5000-level Mathematics Courses

As part of the 30 hours of formal 5000-level mathematics courses, the student must complete the following courses with a grade of B or better:

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of

one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

Tracks:

In addition to the common elements above, students must select and complete one of the capstone experiences described in the tracks below.

Track #1: Master's Thesis (Plan A)

Within the 30 hours of 5000-level courses, the Plan A student must complete 4 hours of MATH5960 - Thesis Research. At least 26 hours of 5000-level coursework must be mathcontent courses (not thesis research).

The student must prepare a master's thesis (Plan A) and give an oral defense of the thesis. In the mathematics program, a Plan A thesis reports on the result(s) of independent and original research completed by the student under the direction of a faculty member. The thesis should describe the research and its results and be written to the standards of the appropriate area of mathematics.

Track #2: Master's Paper (Plan B)

The student must prepare a master's paper (Plan B) and give an oral defense.

To write a Plan B paper, the student must present an expository paper on a designated mathematical subject. Students are guided by their advisor in the subject matter and in the preparation of the paper. A successful paper and defense demonstrates that the student has mastered a substantial mathematical topic that is beyond those covered in formal foundational coursework.

Track #3: Coursework/Project (Plan B)

A second M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper, the student takes a sequence of three 5000-level courses that all address a common mathematical theme. The sequence must be approved by the student's advisor and the mathematics graduate committee. Two of the courses must be mathematics-department offerings, and the third may be either a mathematics course (including reading/topics courses) or a course from another department in a related field.

- The student must complete an additional 6 hours of courses at the 5000 level. Thus, Track #3 requires the completion of 36 hours of graduate-level coursework.
- Within the 36 hours, the student must propose and complete with a grade of B or better an appropriate 3-course sequence
- The student will write a short paper illustrating how the common mathematical theme of the sequence manifests itself in the content of each course and give a presentation/defense of the paper.

In approving the student's proposal for this option, the graduate committee and the advisor will consider how the writing and independent study spirit of the Plan B option are fulfilled within the recommended plan.

Track #4: Qualifying Exam (Plan B)

A third M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper or taking additional coursework, the student must take and pass the department's PhD Qualifying Examination in one of the three areas: Analysis, Algebra, or Applied Mathematics. These examinations focus on the material in the required courses.

These examinations are given twice a year at the beginning of the fall and spring semesters. This option is intended for students who will continue for a PhD at UW.

- The oral component of this Track will consist of a defense of the student's written answers to qualifying exam.
- Pass one of the department's qualifying exams in:

Analysis

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

Algebra

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

Applied Mathematics

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

Mathematics, M.S.T.

Applicants are required to have:

- A. A valid teaching endorsement in any state or educational requirements satisfied for secondary teaching;
- B. courses equivalent to MATH 3205, MATH 3500, MATH 4000 and MATH 4600;
- C. a course in computer programming.

Students who enter the program with a deficiency in the courses listed in (b) must take them at UW, but these courses may not be counted toward the course requirements of the M.S.T./M.A.T. program.

Mathematics, Ph.D.

A rigorous PhD program in mathematics, culminating in an original research project. Math PhDs have excellent career prospects in a variety of settings, including academia, industry, research, engineering, economics and government.

Mathematics PhD Information

The student must maintain a 3.0 cumulative GPA.

The student must teach two semesters of college mathematics.

The student must complete a combination of 72 hours of coursework and dissertation research. Within the 72 hours, a maximum of 12 hours can be at the 4000 level, and 42 hours must be formal courses at the 5000 level. The courses must be mathematics courses or courses with significant mathematical content, as approved by the department's graduate committee.

The Student Must Complete

Within the 42 hours of 5000-level courses, the student must:

- Complete the courses distributed in three areas: algebra, analysis, and applied mathematics. The student must take at least two courses in each of two categories and at least one course from the third category. The department maintains a list of course categories.

MATH5200 - Real Variables I

Credits: 3

Develops the theory of measures, measurable functions, integration theory, density and convergence theorems, product measures, decomposition and differentiation of measures, and elements of function analysis on L_p spaces. Lebesgue theory is an important application of this development.

Prerequisite: MATH 4200.

MATH5230 - Complex Variables I

Credits: 3

Develops the function theory of holomorphic (analytic) and harmonic functions. Topics covered include the Cauchy-Riemann equations, Cauchy-Goursat theorem, Cauchy integral theorem, Morera's theorem, maximum modulus theorem, Liouville's theorem, power series representation, harmonic functions, theory of singularities of functions of one complex variable, contour integration, analytic continuation, Riemann mapping theorem and topology of spaces of holomorphic functions.

Prerequisite: MATH 4200.

MATH5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability. Identical to COSC 5310.

Prerequisite: COSC 1010.

MATH5400 - Methods of Applied Mathematics I

Credits: 3

First semester of a one-year survey of topics and methods of applied mathematics, with emphasis on applications from physics and engineering. The full sequence includes introductions to mathematical aspects of mechanics (e. g. , conservation laws), asymptotic expansions, systems of ODE and stability, integral equations and calculus of variations, PDE with boundary value problems and generalized solutions (including wave, heat, and potential equations), numerical methods and stability.

Prerequisite: MATH 2250, MATH 4200 or 4400, and MATH 2310 or 4430.

MATH5500 - Advanced Linear Algebra

Credits: 3

An introduction to the theory of abstract vector spaces and linear transformations from an axiomatic point of view, with applications to matrix theory. Topics include vector spaces, dimension, linear transformations, dual spaces and functionals, inner product spaces, and structure theorems.

Prerequisite: MATH 3500 and MATH 4500.

MATH5550 - Abstract Algebra I

Credits: 3

Studies the structure of groups, rings, and fields. For each, concepts of substructures, quotient structures, extensions, homomorphism, and isomorphism are discussed.

Prerequisite: MATH 3500 or MATH 5500.

Take Two Hours of

MATH5800 - Seminar in Mathematics

Credits: 1-3

Max Credit (Max. 8)

Prerequisite: consent of instructor.

In Addition

In addition, the student must:

- Pass the foundation exam, the qualifying exam in the student's research area, and the preliminary exam.
- Write a dissertation containing the student's original mathematical results and present an oral defense of the research.
- Take one hour of the seminar 4970: Professional Development in Mathematics and one hour of the seminar MATH4970 - Professional Development in Teaching.

Mechanical Engineering, M.S.

The UW Mechanical Engineering MS program offers two options: thesis (Plan A) or non-thesis (Plan B). Both tracks offer opportunities to take graduate coursework in topics of thermal fluids, materials, experimentation, computational tools, and more.

Program Specific Degree Requirements

Plan A (Thesis)

A thesis project is chosen in consultation with an ME faculty member, and constitutes 4 credit hours of ME 5960 in the 30-hour Plan A program. ME 5478 (Seminar) is to be taken during the final semester when the thesis is presented and defended, and constitutes 2 credit hours of the 30-hour Plan A program. Classes must meet the following constraints:

- ME courses (5000-level): minimum of 15 hours
- A maximum of 9 credits at the 4000 level outside of ME may be taken
- Thesis research (ME 5960): 4 credit hours
- Seminar (ME 5478): 2 credit hours
- Total: Minimum of 30 CH.

Courses outside of ME must be chosen with the approval of the academic adviser. They can be in mathematics, statistics, science, or other engineering disciplines. Up to two courses may be from the fields of business, ENR, or public policy. Special topic credits may be earned using ME 5475 (maximum of 6 credits).

Plan B (Non-Thesis)

The Plan B M.S. degree can be completed by earning a minimum of 31 credits beyond the baccalaureate degree. Classes must meet the following constraints:

- ME courses (5000-level): minimum of 15 hours
- A maximum of 9 credits at the 4000 level outside of ME may be taken
- Graduate Project (ME 5961): minimum of 1 hour
- Total: minimum of 31 hours

Courses outside of ME must be chosen with the approval of the academic adviser. They can be in mathematics, statistics, science, or other engineering disciplines. Special topic credits may be earned using ME 5475 (maximum of 6 credits). Research credits earned through ME 5960 as part of an unfinished M.S. Plan A program may not be counted. Although the Plan B M.S. degree is not research-oriented, the program must contain an "element of discovery," documented by completing ME 5961 (Graduate Project). This could be a special project performed as independent study or as part of a graduate course.

MS-ME/MBA Dual Program

The UW Mechanical Engineering MS/MBA program offers the opportunity to pursue MS and MBA degrees simultaneously and reduce course requirements by applying course credit towards both degrees. There are thesis and non-thesis options for the MS degree.

MS-ME/MBA Program Requirements

The MS-ME component is typically a non-thesis option. An additional 21 credits in engineering, science or mathematics must be earned beyond the BS degree. At least 15 credits of graduate course work must be at the 5000-level from ME. The following MBA courses will be counted towards the MS-ME degree and constitute 9 credit hours of the 30 hours MS-ME program

Choose two of the following courses:

MBAM5103 - Business Research Methods

Credits: 3

An overview of the scientific research process applied in the context of business. Topics include problem definition, selection of a methodological approach, design and implementation of field work (qualitative and survey methods), analysis techniques (thematic analysis for qualitative research and statistical analysis for survey research, and

communicating results.

Prerequisite: Admission to the MBAM program.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5301 - MBA Summer Project

Credits: 3

Serves as an externship for individual MBA students or MBA teams to work with a client on a business issue under the supervision of a qualified faculty member in the College of Business.

Prerequisite: Completion of the first-year (Fall & Spring semester) on campus MBA courses.

MBAM5501 - Energy Economics and Policy

Credits: 3

Applies the tools of economic analysis to attain and understanding of energy markets and energy policy analysis. Sec. 1 Overviews the major energy and environmental policy issues facing the United States and the world. Sec 2 Determinants of energy demand. Sec. 3 Technologies and costs to produce and deliver energy. Sec. 4 Determinants of energy price.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduces students to basic financial accounting and reporting issues related to energy producing activities. Specifically, the course will investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. The course will also cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Cross Listed ACCT 5503.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MBAM5506 - Energy Finance: Securities, Hedging, and Trading

Credits: 3

Overview of security analysis applied to energy firms, hedging strategies, and trading activities in energy markets. Trading activities covered include the use of forward and futures contracts, swaps, options, and related derivatives.

Prerequisite: Permission of MBA Program Director.

MBAM5508 - Marketing and Sustainable Consumption

Credits: 3

Focuses on understanding household and business energy consumption. Emphasizes the environmental, economic, social and psychological influences on consumer decision making and sustainable consumption. Course deals with developing customer value propositions, and for marketing strategy development in branding, product-line offerings, pricing, retailing and distribution, and public policy.

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

MGT5504 - Energy Industry Value Chain

Credits: 3

Examines the overall energy industry with detailed exploration of the major energy subsectors and supply chains. Students will develop knowledge of the energy industry value chain including coverage of market dynamics, prevalent strategies, finance, operations, externalities and network effects, environmental and ethical considerations, and associated policy issues.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director

Required course:

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

MS-ME/MBA Thesis Option

For a thesis option, students will only count one MBAM course from the above list and are required to complete 4 credits of ME 5960 and 2 credits for ME 5478, similar to the Plan A option.

Mechanical Engineering Graduate Level Courses

ME5040 - Introduction to Finite Element Analysis

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. Includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 4040

Prerequisite: MATH 2310 and (CE 4200 or ARE 4200 or ME 3010)

ME5045 - Advanced Finite Element Analysis

Credits: 3

Advanced topics in finite element analysis with emphasis on mathematical foundations of the method, numerical algorithms for software implementation, and analysis of problems with material and geometric nonlinear behavior.

Cross Listed CE 5045

Prerequisite: ME 4040 or ME 5040 or CE 5040.

ME5200 - Thermo/Kinetics of Materials

Credits: 3

Introduction to the foundations of thermodynamics and kinetics of materials, including Gibbs free energy, ideal solutions, alloy ordering, phase diagrams, atomistic mechanisms of diffusion, interfaces and microstructure, grain growth, solidification, and diffusional and diffusionless transformation in solids.

Dual Listed ME 4200

Prerequisite: ME 3450

ME5432 - Advanced Materials Science

Credits: 3

An analysis of the relationships between the structures of materials and their mechanical and physical properties, leading to the application of these relationships to the design of materials for advanced engineering systems. Topics include crystallography, lattice defects, transport phenomena, phase transformations, fracture, environmental effects, and control of microstructure by processing.

Prerequisite: ME 3450

ME5434 - Computational Materials Science

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: graduate standing.

ME5435 - Failure of Engineering Materials

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: ME 3450 or equivalent.

ME5438 - Plasticity and Viscoelasticity

Credits: 3

Analysis of stress and deformation of idealized plastic and viscoelastic solids. Limit theorems in plasticity. Time-dependent behavior of viscoelastic materials.

Prerequisite: ME 5472 or equivalent.

ME5440 - Fluid Mechanics

Credits: 3

Lagrangian and Eulerian descriptions, conservation laws, stress and rate-of-stress tensors, Navier-Stokes equations, energy equations, vorticity and circulation inviscid and potential flows, laminar flows, turbulent flows, boundary-layer theory.

Cross Listed CHE 5440.

ME5442 - Advanced Fluid Mechanics

Credits: 3

Introduction to inviscid and viscous hydrodynamic stability; closure in turbulent flows; vorticity and vortex dynamics, theoretical aerodynamics, numerical simulations of viscous flows, experimental methods in fluid flows.

Prerequisite: ME 5440.

ME5446 - Turbulence

Credits: 3

Basic notions, properties and scales in turbulent flows. Transport equations; Reynold's stresses, mixing and phenomenological theories. Turbulence dynamics; mean and fluctuating kinetic energy balances, vorticity and temperature fluctuations. Statistical description of turbulence; correlations and spectra, transport, isotropy and homogeneity. Shear flows; plane jets, wakes and boundary layers (including planetary). Turbulent diffusion.

Cross Listed CHE 5446.

Prerequisite: ME 5440.

ME5448 - Experimental Fluid Dynamics.

Credits: 3

Provides an introduction to the design of fluid dynamics experiments. Specific instrumentation will be discussed and methods of analyzing and assessing data will be presented.

Prerequisite: graduate standing.

ME5452 - Convection Heat Transfer

Credits: 3

Convection, including heat and momentum transfer. Boundary layer theory. Laminar and turbulent flows, steady and unsteady formulations including differential and integral descriptions. High velocity, compressible systems.

Cross Listed CHE 5452.

Prerequisite: ES 3360 or consent of instructor.

ME5461 - Computational Fluid Dynamics I

Credits: 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed Dual list with ME 4461 and ESE 4461

Prerequisite: graduate standing

ME5462 - Computational Fluid Dynamics II

Credits: 3

A study of advanced techniques in modern-day scientific computing as applied to Computational Fluid Dynamics. These include unstructured mesh generation using Delaunay triangulation, searching and sorting techniques, and efficient data structures. Other topics cover efficient hardware implementation including cache-effects and parallel computing and sensitivity analysis for design optimization.

Prerequisite: ME 5461

ME5472 - Continuum Mechanics

Credits: 3

The basic laws of the physical behavior of continuous media. Stress and deformation at a point; fundamental equations of balance of mass, momentum, and energy; second law of thermodynamics; curvilinear coordinate analysis. Applications to linear elasticity and fluid mechanics.

Prerequisite: graduate standing.

ME5478 - Seminar in Mechanical Engineer

Credits: 2

Prerequisite: graduate standing in engineering.

ME5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ME5961 - Graduate Projects

Credits: 1-4

Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project. Prerequisites: enrollment in Plan B program and have departmental approval.

ME5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Mechanical Engineering, Ph.D.

The UW Mechanical Engineering PhD program includes coursework and a substantial research component. Research is performed with an advisor, and a dissertation is produced. Program requirements include Qualifying, Preliminary, and Final Examinations.

Program Requirements

For students of outstanding academic ability and with demonstrated capacity for undertaking independent research on advanced engineering problems, the Ph.D. program in mechanical engineering is offered. The Ph.D. requires a minimum of 72 graduate hours, at least 42 of which must be earned in formal coursework. In addition to coursework requirements, graduate students pursuing a Ph.D. in Mechanical Engineering must complete three examinations: Qualifying, Preliminary, and Final.

Classes must meet the following constraints:

- A minimum of 24 in-resident coursework hours is required
- ME courses (5000-level): minimum of 15 hours
- A maximum of 9 credits at the 4000 level outside of ME may be taken

All graduate students in Mechanical Engineering are expected to follow the graduate education policies of the College of Engineering and Applied Sciences.

Qualifying Exam

In consultation with their advisor, students are allowed to take the Qualifying Exam after declaring pursuit of a Ph.D. degree. Graduate students do not require a M.S. to take the Qualifying Exam. The format is a knowledge-based examination consisting of three subject areas, each with both a written and an oral component. The candidate will be evaluated for each subject area, based on the cumulative performance in both (written and oral) components. Should the student fail a single subject area, at the discretion of the committee, they may repeat the failed portion at the next available opportunity. A third attempt is not permitted. The successful completion of the Qualifying Exam is required before the Preliminary Exam.

Preliminary & Final Exam

The purpose of the Preliminary Exam is to evaluate the aptitude of the Ph.D. candidate to perform research based on preliminary results, and to assess the student's plan for completing the research necessary for the Final Exam. The Preliminary Exam follows university regulations and, at a minimum, consists of a seminar attended by the student's committee members.

The purpose of the Final Exam is to ensure the Ph.D. candidate has sufficient accomplishments to be awarded a Ph.D. The Final Exam consists of an oral defense of the dissertation in accordance with university policy.

Mechanical Engineering Graduate Level Courses

ME5045 - Advanced Finite Element Analysis

Credits: 3

Advanced topics in finite element analysis with emphasis on mathematical foundations of the method, numerical algorithms for software implementation, and analysis of problems with material and geometric nonlinear behavior.

Cross Listed CE 5045

Prerequisite: ME 4040 or ME 5040 or CE 5040.

ME5040 - Introduction to Finite Element Analysis

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. Includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Dual Listed ME 4040

Prerequisite: MATH 2310 and (CE 4200 or ARE 4200 or ME 3010)

ME5200 - Thermo/Kinetics of Materials

Credits: 3

Introduction to the foundations of thermodynamics and kinetics of materials, including Gibbs free energy, ideal solutions, alloy ordering, phase diagrams, atomistic mechanisms of diffusion, interfaces and microstructure, grain growth, solidification, and diffusional and diffusionless transformation in solids.

Dual Listed ME 4200

Prerequisite: ME 3450

ME5432 - Advanced Materials Science

Credits: 3

An analysis of the relationships between the structures of materials and their mechanical and physical properties, leading to the application of these relationships to the design of materials for advanced engineering systems. Topics include crystallography, lattice defects, transport phenomena, phase transformations, fracture, environmental effects, and control of microstructure by processing.

Prerequisite: ME 3450

ME5434 - Computational Materials Science

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: graduate standing.

ME5435 - Failure of Engineering Materials

Credits: 3

Fundamentals of quantum and statistical physics with application to modeling and simulation of engineering materials at the atomic scale. Course includes simulation of structural and mechanical properties of nanostructured materials.

Prerequisite: ME 3450 or equivalent.

ME5438 - Plasticity and Viscoelasticity

Credits: 3

Analysis of stress and deformation of idealized plastic and viscoelastic solids. Limit theorems in plasticity. Time-dependent behavior of viscoelastic materials.

Prerequisite: ME 5472 or equivalent.

ME5440 - Fluid Mechanics

Credits: 3

Lagrangian and Eulerian descriptions, conservation laws, stress and rate-of-stress tensors, Navier-Stokes equations, energy equations, vorticity and circulation inviscid and potential flows, laminar flows, turbulent flows, boundary-layer theory.

Cross Listed CHE 5440.

ME5442 - Advanced Fluid Mechanics

Credits: 3

Introduction to inviscid and viscous hydrodynamic stability; closure in turbulent flows; vorticity and vortex dynamics, theoretical aerodynamics, numerical simulations of viscous flows, experimental methods in fluid flows.

Prerequisite: ME 5440.

ME5446 - Turbulence

Credits: 3

Basic notions, properties and scales in turbulent flows. Transport equations; Reynold's stresses, mixing and phenomenological theories. Turbulence dynamics; mean and fluctuating kinetic energy balances, vorticity and temperature fluctuations. Statistical description of turbulence; correlations and spectra, transport, isotropy and homogeneity. Shear flows; plane jets, wakes and boundary layers (including planetary). Turbulent diffusion.

Cross Listed CHE 5446.

Prerequisite: ME 5440.

ME5448 - Experimental Fluid Dynamics.

Credits: 3

Provides an introduction to the design of fluid dynamics experiments. Specific instrumentation will be discussed and methods of analyzing and assessing data will be presented.

Prerequisite: graduate standing.

ME5452 - Convection Heat Transfer

Credits: 3

Convection, including heat and momentum transfer. Boundary layer theory. Laminar and turbulent flows, steady and unsteady formulations including differential and integral descriptions. High velocity, compressible systems.

Cross Listed CHE 5452.

Prerequisite: ES 3360 or consent of instructor.

ME5455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Dual Listed ME 4455 ESE 4455

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME5461 - Computational Fluid Dynamics I

Credits: 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed Dual list with ME 4461 and ESE 4461

Prerequisite: graduate standing

ME5462 - Computational Fluid Dynamics II

Credits: 3

A study of advanced techniques in modern-day scientific computing as applied to Computational Fluid Dynamics. These include unstructured mesh generation using Delaunay triangulation, searching and sorting techniques, and efficient data structures. Other topics cover efficient hardware implementation including cache-effects and parallel computing and sensitivity analysis for design optimization.

Prerequisite: ME 5461

ME5472 - Continuum Mechanics

Credits: 3

The basic laws of the physical behavior of continuous media. Stress and deformation at a point; fundamental equations of balance of mass, momentum, and energy; second law of thermodynamics; curvilinear coordinate analysis. Applications to linear elasticity and fluid mechanics.

Prerequisite: graduate standing.

ME5474 - Energy Methods

Credits: 3

Introduction to variational calculus with applications in solid mechanics. The basic theorems of virtual work, minimum potential energy, and complementary energy are developed. Direct methods such as Castigliano's theorem as well as the approximate methods of Ritz and Galerkin are developed and used to obtain solutions for a variety of problems in solid mechanics.

Prerequisite: ME 3010

ME5478 - Seminar in Mechanical Engineer

Credits: 2

Prerequisite: graduate standing in engineering.

ME5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Petroleum Engineering, M.S.

Petroleum M.S. Students With a B.S. In Petroleum Engineering

All Petroleum M.S. students with a B.S. in Petroleum Engineering from an accredited program must take the following required courses:

Required Courses

PETE5355 - Mathematical Methods

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Cross Listed CHE 5355.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1

Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

Core Courses

At least three Core Courses from the following:

PETE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed CHE 5060

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5080 - Interfacial Phenomena

Credits: 3

Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

PETE5350 - Advanced Reservoir Engineering

Credits: 3

Covers high-level understanding of modern reservoir engineering. Provides knowledge of scientific principles to formulate fluid flow, heat and mass transport in permeable media. Use analytical and computational tools to resolve research-oriented problems. Develop competence in interpreting results of modeling.

Prerequisite: graduate standing.

Total Credits: 14 Hours

Plan A Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 12

PETE5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Total Credits: 30 Hours

Plan B Non-Thesis Additional Course Requirements:

4000-level or above approved electives

PETE5970 - MS Plan B Research Project

Credits: 1-2

Max Credit 2

Students complete a non-thesis capstone project on a topic of choice within the petroleum or energy field, under the guidance of their graduate committee. Students must produce at least one final paper and present their results in a public forum (Final Examination). Must complete a minimum of two credit hours for the M.S. degree.

Prerequisite: Graduate Standing.

Total Credits: 30 Hours

Petroleum M.S. Students With a B.S. In Chemical or Mechanical Engineering

All Petroleum M.S. students with a B.S. in Chemical or Mechanical Engineering from an accredited program must take the following required courses:

Required Courses:

PETE5055 - Drilling Engineering

Credits: 3
Max Credit 3

Principles and practices of oil and gas well rotary drilling, including rock mechanics, drilling hydraulics, drilling fluids, and hole deviation. Drilling equipment analysis, casing design, and drilling fluid properties. Application of modern computer-based analysis and design methods.

Prerequisite: Graduate Standing

PETE5340 - Reservoir Engineering.

Credits: 3
Covers rock and fluid properties, reserve estimation using volumetric and material balance methods, discussion of different reservoir drive mechanisms, aquifer models, Darcy's law and single-phase flow through porous media, introduction to well testing, solution of radial diffusivity equation, immiscible displacement, decline rate analysis, and reservoir simulation.

Prerequisite: Graduate standing.

PETE5715 - Production Engineering

Credits: 3
Provides elements for calculating production rate of oil/ gas wells, including reservoir inflow performance, determined by reservoir rock and fluids properties using Darcy's law, and tubing performance, determined by tubing parameters and using Newtonian dynamics. Basic design of artificial life systems, reservoir stimulations and optimization of production systems are included.

Prerequisite: graduate standing.

Core Courses

At least five Core Courses from the following:

PETE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed CHE 5060

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5080 - Interfacial Phenomena

Credits: 3

Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

PETE5350 - Advanced Reservoir Engineering

Credits: 3

Covers high-level understanding of modern reservoir engineering. Provides knowledge of scientific principles to formulate fluid flow, heat and mass transport in permeable media. Use analytical and computational tools to resolve research-oriented problems. Develop competence in interpreting results of modeling.

Prerequisite: graduate standing.

Total Credits: 26 Hours

Plan A Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 7

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

PETE5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Total Credits: 40 Hours

Plan B Non-Thesis Additional Course Requirements:

- 4000-level or above approved electives Credits: 9

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

PETE5970 - MS Plan B Research Project

Credits: 1-2

Max Credit 2

Students complete a non-thesis capstone project on a topic of choice within the petroleum or energy field, under the guidance of their graduate committee. Students must produce at least one final paper and present their results in a public forum (Final Examination). Must complete a minimum of two credit hours for the M.S. degree.

Prerequisite: Graduate Standing.

Total Credits: 40 Hours

Graduate Seminar Requirements

All petroleum engineering PhD students must enroll in PETE5890 - Petroleum Engineering Graduate Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester. MS students are required to take PETE 5890 for at least two semesters.

Graduate Teaching Requirement

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by a faculty mentor will work with their mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

Petroleum Engineering, Ph.D.

Students with a B.S. in Petroleum Engineering

All Petroleum Ph.D. students with a B.S. in Petroleum Engineering must take the following required courses:

Required Courses

PETE5090 - Graduate Research Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, career options with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific method, developing hypotheses, grant proposals, paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

PETE5355 - Mathematical Methods

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Cross Listed CHE 5355.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1

Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

Core Courses

At least three Core Courses from the following:

PETE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed CHE 5060

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5080 - Interfacial Phenomena

Credits: 3

Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

Electives

- 4000-level or above approved electives Credits: 21

Research

PETE5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Total Credits: 72

Students with an M.S. in Petroleum Engineering

All Petroleum Ph.D. students with an M.S. in Petroleum Engineering from UW must take the following required courses:

Plan A MS Courses Credits: 26

See Petroleum Engineering, M.S. program

Required Courses

PETE5090 - Graduate Research Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, career options with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific method, developing hypotheses, grant proposals, paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1
Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

Electives

- 4000-level or above approved electives Credits: 9

Research

PETE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Total Credits: 72

Students with an M.S. in Petroleum Engineering

All Petroleum Ph.D. students with an M.S. in Petroleum Engineering from another institution must take the following required courses:

Transferred MS Courses Approved by Student's Committee Credits: 14

Required Courses

PETE5090 - Graduate Research Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, career options with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific method, developing hypotheses, grant proposals, paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1
Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

Core Courses

At least four Core Courses from the following:*

PETE5010 - Transport Phenomena

Credits: 3
Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3
Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3
Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed CHE 5060

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5080 - Interfacial Phenomena

Credits: 3
Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

PETE5350 - Advanced Reservoir Engineering

Credits: 3

Covers high-level understanding of modern reservoir engineering. Provides knowledge of scientific principles to formulate fluid flow, heat and mass transport in permeable media. Use analytical and computational tools to resolve research-oriented problems. Develop competence in interpreting results of modeling.

Prerequisite: graduate standing.

PETE5355 - Mathematical Methods

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Cross Listed CHE 5355.

Prerequisite: graduate standing.

Electives

- 4000-level or above approved electives Credits: 9

Research

PETE5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Total Credits: 72 Hours

*Some or all of these credit hours can be transferred by petition, provided they are non-degree credits.

Students with an M.S. Degree in a Geoscience

All Petroleum Ph.D. students with an M.S. degree in a geoscience from another accredited institution must take the following required courses:

Transferred MS Courses Approved by Student's Committee Credits: 12

Required Courses

PETE5090 - Graduate Research Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, career options with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific method, developing hypotheses, grant proposals, paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

PETE5890 - Petroleum Engineering Graduate Seminar

Credits: 1

Max Credit (Max. 9)

Departmental seminar on current research with formal training for student presentation of technical papers.

Prerequisite: graduate standing.

Core Courses

At least six Core Courses from the following:*

PETE5010 - Transport Phenomena

Credits: 3

Examines the modeling of momentum, heat and mass transport.

Cross Listed CHE 5010.

Prerequisite: graduate standing.

PETE5020 - Thermodynamics

Credits: 3

Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed CHE 5020.

Prerequisite: graduate standing.

PETE5060 - Flow through Porous Media

Credits: 3

Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing of oil and gas reservoirs, including drawdown, build-up, faulted systems, interference, drillstem tests, and isochronal test analysis.

Cross Listed CHE 5060

Dual Listed PETE 4060.

Prerequisite: graduate standing.

PETE5080 - Interfacial Phenomena

Credits: 3

Introduction to surface and colloid chemistry, coagulation and flocculation, surface energy and thermodynamics of surfaces, adsorption at interfaces, surface tension, capillarity and wetting, spontaneous imbibition, applications to hydrocarbon reservoirs and oil recovery.

Prerequisite: graduate standing.

PETE5310 - Fundamentals of EOR

Credits: 3

The application of physical principles to increasing the recovery from reservoirs. Miscible fluid flooding in-situ combustion, and thermal recovery.

Dual Listed PETE 4310.

Prerequisite: graduate standing.

PETE5350 - Advanced Reservoir Engineering

Credits: 3

Covers high-level understanding of modern reservoir engineering. Provides knowledge of scientific principles to formulate fluid flow, heat and mass transport in permeable media. Use analytical and computational tools to resolve research-oriented problems. Develop competence in interpreting results of modeling.

Prerequisite: graduate standing.

PETE5355 - Mathematical Methods

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs): the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Cross Listed CHE 5355.

Prerequisite: graduate standing.

At Least Eight Additional Courses:

- Six (6) credits in advanced mathematics
- 18 credits in petroleum engineering

Petroleum Engineering Credits Include:

- PETE 5340
- PETE 5055

PETE5715 - Production Engineering

Credits: 3

Provides elements for calculating production rate of oil/ gas wells, including reservoir inflow performance, determined by reservoir rock and fluids properties using Darcy's law, and tubing performance, determined by tubing parameters and using Newtonian dynamics. Basic design of artificial life systems, reservoir stimulations and optimization of production systems are included.

Prerequisite: graduate standing.

Electives

- 4000-level or above approved electives Credits: 9

Research

PETE5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Total Credits: 100 Hours

*Some or all of these credit hours can be transferred by petition, provided they are non-degree credits.

Graduate Seminar Requirements

All petroleum engineering graduate students must enroll in PETE5890 - Petroleum Engineering Graduate Seminar, every semester. All seminars, including the required presentations described below, must be scheduled by the seminar coordinator. Graduate students enrolled in continuous registration are exempt from having to enroll in PETE 5890 in their final semester.

Graduate Teaching Requirement

All Petroleum Engineering graduate students must complete at least one semester as a teaching assistant within the Petroleum Engineering curriculum. Students receiving a state-funded graduate assistantship will be required to serve as a teaching assistant every semester of their award. Students funded by a faculty mentor will work with their mentor to determine an appropriate time to complete this requirement.

Program of Study Requirement

All Petroleum Engineering graduate students must complete their Program of Study worksheet at the beginning of their second academic year of study or 3rd semester of enrollment, and PhD students must submit it prior to their preliminary examination.

Ph.D. Preliminary Examination

Candidacy in the doctorate occurs upon certification of successful completion of the preliminary examination. The preliminary examination will be held at least 15 weeks prior to the final examination. The preliminary examination may not be given before: (a) the research tool requirements, if any, have been met and certification approved; (b) at least 30 hours of coursework have been completed; and (c) the doctoral program of study has been approved.

The goal of the preliminary exam is for the student to present the research proposition that is being investigated and will lead to the final dissertation, and demonstrate progress to-date. The preliminary exam consists of three components:

- a written document provided to each member of the student's graduate committee at least three weeks prior to the oral presentation;
- a public oral presentation; and
- a private examination by the student's graduate committee immediately following the oral presentation.

The written document may be in any format but must concisely provide a survey of the relevant literature, a summary of the student's progress to-date, and a clear, detailed plan for the successful completion of the proposed work. The preliminary exam oral presentation should be consistent with the written document. It should provide an appropriate literature background, demonstrate proficiency with proposed experimental/computational techniques, identify details of the experiments to be performed, and provide a timeline to final defense.

The student's committee will pass or fail the student on the strength of the preliminary examination, with an option to conditionally pass the student while requiring an interim committee meeting prior to the final Ph.D. examination. The Report on Preliminary Examination for Admission to Candidacy form sent to the Office of the Registrar reports the results of the examination.

M.S. and Ph.D. Final Examination (Thesis or Dissertation Defense)

All M.S. and Ph.D. students must orally defend their final report, thesis, or dissertation at a public final examination. If, for any reason, a student's Ph.D. research goals are substantially changed after successful completion of the preliminary examination, the student must arrange a subsequent meeting to provide their committee with an accurate and current overview of their proposed work. The final examination consists of a public defense in oral presentation format. At least three weeks before the examination, the student must provide each member of the graduate committee with a copy of the written thesis or dissertation and provide the department an announcement of their defense for public advertisement. The results of the defense are reported by the committee on the Report of Final Examination form. Often, graduate committee members request changes in the final thesis or dissertation, and they may postpone signing this form until they are satisfied that those changes have been made.

Publication of Thesis or Dissertation

After the defense, an electronic copy (in PDF format) of the thesis or dissertation must be uploaded in accordance with the directions provided on the Registrar's web site. This copy will be rejected if the format standards specified by the Thesis or Dissertation Format Guide are not met. This guide allows for a publication-ready format. An electronic copy must also be submitted to the department for the departmental library. Most students will want copies for their own use. Students should consult with their chair to determine if they also want a copy of the final paper or other research documentation.

Statistics Graduate Minor

A graduate minor in statistics can be a great way to signal your interest and skill in data analysis as it relates to your field of study.

Requirements

Twelve hours of STAT courses at the 5XXX-level, with the exception of:

STAT 5000

STAT 5185

STAT4220 - Basic Engineering Statistics

Credits: 3

Introduces probability models, properties of distributions, statistical inference and development of statistical models for physical and engineering sciences. Credit cannot be earned in more than one of the following courses: STAT 2010, STAT 2050, STAT 2070, 4220 and 5000.

Former Course Number [4020]

Prerequisite: MATH 2205, MATH 2355 or equivalent.

- STAT 5000

Statistics, M.S.

Profile

The Master's Program in Applied Statistics will give the student an extensive and broad background in statistical methods, data analysis, and written and oral presentation skills. This degree is a terminal experience in graduate statistical education and should not be viewed as preparatory for entrance into a Ph.D. program in statistics. Graduates will have the necessary background to work as data management specialists, statistical analysts, and as project managers within a wide range of research organizations.

Plan B (Option 1)

Coursework

In addition to the general requirements of the university all candidates for the MS (Plan B - Option 1) degree must successfully take and complete:

Required: 15 Credit Hours

STAT5210 - Advanced Regression

Credits: 3

Advanced methodologies, with particular focus on concepts and methods related to regression. Topics include generalized linear models, nonlinear regression, elementary linear model theory, and Data Science topics such as resampling inference, ridge regression and the lasso, and k-fold cross-validation.

Prerequisite: MATH 4265/STAT 4265/STAT 5265 and STAT 4015/STAT 5015. STAT 4025/STAT 5025 and STAT 4045/STAT 5045 are recommended.

STAT5220 - Advanced Design

Credits: 3

Advanced study of experimental designs, observational designs, and mixed models. Topics include fixed and random effects, factorial, split-plot and repeated measures designs, and hierarchical models. Linear model methodology and Data Science concepts will also be emphasized.

Prerequisite: MATH 5265/STAT 4265/STAT 5265, and at least one of STAT 4015/STAT 5015, STAT 4025/STAT 5025, or STAT 5210.

STAT5470 - Data Analysis

Credits: 3

This course is designed to develop the skill of analyzing data sets using methods of classic statistical analysis, such as analysis of variance, regression, discrete models, descriptive analysis, non-parametrics, and multivariate methods. The focus will be on understanding the various models and methods, computer assisted data analysis, and communication of results (oral and written).

Prerequisite: 12 graduate level hours in statistics (excluding STAT 5000).

STAT5380 - Bayesian Data Analysis

Credits: 3

Bayesian statistical methods for analyzing various kinds of data. Topics include basic Bayesian ideas and model formulation (priors, posteriors, likelihoods), single- and multiple-parameter models, hierarchical models, generalized linear models, multivariate models, survival models and an introduction to computation methods.

Prerequisite: STAT 5255

STAT5660 - Computationally Intensive Methods in Statistics

Credits: 3

Advanced statistical inference often relies on methods which are computationally intensive. The basic methods include Newton-Raphson; the EM algorithm; bootstrap and other resampling procedures; kernel density estimators; Laplace's method, importance sampling and MCMC, and saddlepoint and Edgeworth approximations.

Prerequisite: STAT 5520.

Electives

a minimum of 15 credit hours in other acceptable graduate courses. Acceptable courses include statistics courses numbered 5000 or higher, excepting:

- STAT 5000
- STAT 5050 - Statistical Methods for the Biological Science
- STAT 5060
- STAT 5070 - Statistical Methods for the the Social Sciences
- STAT 5080 - Statistical Methods for the Agricultural and Natural Resource Sciences
- STAT 5185 - Analysis of Data

Total Credits: 30 Hours

Graduation Requirements: (1) successful completion of coursework and (2) a data analysis project (Plan B paper).

Certificate

Cadastral Surveying Certificate

Program Information

- Students must be properly admitted as Cadastral Surveying Certificate students through the University of Wyoming Admissions Office to be eligible for this Certificate.
- This certificate requires a minimum of 30 semester hours as listed below. 21 credit hours must be successfully completed at the University of Wyoming.
- All transfer credit is subject to review by the UW Land Surveying Director.
- A grade of C or better must be earned in each course.
- The Certificate meets the Wyoming Board of Professional Engineers and Land Surveying licensing requirements for the surveying specific course work required to apply to be a Land Surveyor in Training (LSIT).
- Students earning the Cadastral Surveying Certificate are NOT eligible for Federal Financial Aid. Students may utilize private student loan programs available through the Student Financial Aid Office.
- The UW Cadastral Surveying program is not ABET Accredited.
- Students should have a working knowledge of algebra and trigonometry, and some experience with spreadsheets prior to beginning in this program.
- AutoCAD Civil 3D is recommended.

Course Requirements

LS2010 - Engineering Surveying Lecture

Credits: 2

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Basic principles of surveying and map making.

Former Course Number [CE 2072]

Prerequisite: a working knowledge of algebra and trigonometry.

LS2020 - GPS for Land Surveyors

Credits: 4

From fundamental theory to practical application and advanced technologies, this class covers all aspects of GPS needed to understand and use GPS as a land surveyor including the basics of GPS technology, common hardware, surveying methods, survey design, planning and observing, real-time kinematics and DGPS.

Former Course Number [CE 2090]

Prerequisite: LS 2400.

LS2100 - Records Research for Surveyors

Credits: 3

Introduced to the public, quasi-public, and private depositories of recorded and non-recorded documents that establish land ownership boundaries, easement boundaries, and land use rights and restrictions in both the Public Land Survey

System and the Colonial States. Assignments will require work to be conducted during depositories' normal business hours.

Former Course Number [CE 2076]

LS2110 - Real Property Law

Credits: 3

Covers all major areas of real property law, including the nature of real property, types of ownership, real estate contracts, title and insurance, financing, landlord and tenant, land use, environmental law and regulation. An understanding of real property law is fundamental to understanding boundary law.

Former Course Number [CE 2050]

LS2400 - Basic Geodesy for Today's Land Surveyor

Credits: 2

The history of geodesy including measurement techniques, coordinate systems, ellipsoids, and datums is reviewed. The modern geodetic and Cartesian coordinates systems, as well as the differences between grid and ground coordinates systems, and the current geodetic and Cartesian coordinate systems available today are discussed.

Former Course Number [CE 2089]

Prerequisite: CE 2070 or LS 2010.

LS3100 - Real Property Descriptions

Credits: 2

Historical and current issues for land description writing and usage for the practicing surveyor. Relationship between written descriptions and field survey data, interpreting old descriptions and the structure principles of description.

Former Course Number [CE 2088]

Prerequisite: CE 2070 or LS 2010, and LS 2100 and LS 2110.

LS3110 - Boundary Evidence

Credits: 2

A practical and working guide to understanding survey evidence and the laws of boundary location for efficient, accurate boundary determination. This material aids in the elimination of errors in location of land boundaries. The surveyor's liability and statutes of limitations are explored in depth. Also included are discussions of the surveyor's role in court. Normally offered only through the Outreach School.

Former Course Number [CE 3750]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3120 - Boundary Principles

Credits: 2

This course in boundary law addresses the fundamental principles of real property as applied to land surveying and related professions. Discussion and applications center on practical situations and concepts commonly encountered while conducting boundary surveys and the determination of the extent of ownership rights. Students explore the scope of the surveyors' judiciary role in real property ownership. Primarily offered through the Outreach School.

Former Course Number [CE 3740]

Prerequisite: CE 2070 or LS 2010, and LS 3100 and LS 2110.

LS3130 - Public Land Surveys

Credits: 3

Basic fundamentals of the Public Land Survey System (PLSS), dependent and independent resurveys, survey plats, "bona fide rights", riparian boundaries, non-rectangular entities, corner evidence and the role of the modern day surveyor.

Former Course Number [CE 2085]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3200 - Route Surveying

Credits: 3

Laying out of super elevation and circular, parabolic, and spiral curves; the difference between highway and railway horizontal curve geometry; offsets to spiral curves as boundaries; area and volumes of earthwork.

Former Course Number [CE 3710, CE 4710]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3210 - Advanced Surveying

Credits: 4

Advanced topics in surveying computations and procedures, including traverse error analysis, topographic surveying, mapping, astronomical observations, coordinate geometry applications, and state plane coordinates.

Former Course Number [CE 3720, CE 4720]

Prerequisite: CE 2070 or LS 2010.

Required Credits: 30 Hours Minimum

Cybersecurity Certificate

Cybersecurity is the practice of ensuring the confidentiality, integrity, and availability of information within interconnected systems. The certificate in Cybersecurity prepares you for a career securing software-intensive systems.

Requirements

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC4010 - Special Topics in Computer Science

Credits: 1-3

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of advanced topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: COSC 3020 concurrently and consent of instructor.

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

- STAT 2010 Credits: 4
- OR**

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT4220 - Basic Engineering Statistics

Credits: 3

Introduces probability models, properties of distributions, statistical inference and development of statistical models for physical and engineering sciences. Credit cannot be earned in more than one of the following courses: STAT 2010, STAT 2050, STAT 2070, 4220 and 5000.

Former Course Number [4020]

Prerequisite: MATH 2205, MATH 2355 or equivalent.

Minimum Required: 20 Credits

Note: COSC 4760 can also be replaced by the ECE version ECE 4870 or a second COSC4010 - Special Topics in Computer Science.

QuickStart Program

Chemical Engineering Quick Start, B.S./M.S.

The BS/MS Quick Start program in Chemical Engineering (CHE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their Bachelor of Science (B.S.) degree in Chemical Engineering. These students may apply for admission to the Quick Start program during the second semester of their junior year or during their senior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and better-planned use of time should result in reduction of the time required for obtaining the Master of Science in Chemical Engineering (M.S. CHE) degree. Students who enter the Quick Start program must accept the primary responsibility for actively planning their programs of study to assure timely completion of their coursework and research programs.

The Quick Start program contains two essential elements:

Qualified students may receive provisional admission to the Chemical Engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.

Students in the program may apply up to 6 credit hours of 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to 6 credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level coursework as undergraduates, easing their transition to the Chemical Engineering graduate program.

For additional information and an application form, please contact the CHE graduate program coordinator at che-info@uwyo.edu or stop by 4055 Engineering Building.

Civil and Architectural Engineering Quick Start, B.S./M.S.

The MSCE Quick Start (Plan A) program in Civil and Architectural Engineering (CAE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor of science (BS) degree in Civil Engineering or Architectural Engineering.

Electrical and Computer Engineering Quick Start, B.S./M.S.

The combined B.S./M.S. program in electrical and computer engineering enables especially well-qualified students to be admitted to the M.S. program during the junior year of their B.S. program, and to work thereafter towards both the B.S. and M.S. degrees. These students would earn the B.S. in either electrical engineering or computer engineering and the M.S. degree in electrical engineering following the current curricula.

This program allows for early planning of the M.S. portion of the student's education, taking graduate courses as part of the B.S. degree, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit hour load.

Degree Requirements

Up to 6 credit hours from UW, at the 5000-level or above, may be counted toward both the B.S. and M.S. degree programs.

For further information please visit our Web site at <http://www.uwyo.edu/electrical/graduate/prospective/ms/quickstart.html>.

Mathematics Quick Start BS/MS

A five-year combined Master's and Bachelor's degree in mathematics, in which six credits of graduate coursework is counted toward both degrees. UW students must apply to be considered for this degree.

Mathematics Quick Start Information

Overview

The combined BS/MS program in Mathematics is designed to afford highly qualified students in their junior or senior year the opportunity to work towards both the BS and MS degrees in Mathematics. The program allows for advanced students to jump-start the graduate portion of their education by applying credits for graduate courses to both their BS and MS requirements. The MS degree earned under the combined BS/MS program is not a new or separate category of degree. However, through careful planning and coordination, this program can result in a reduction of the time required to complete both the Mathematics, B.S. and Mathematics, M.S. degrees.

Qualification/Admission

Application for admission may be submitted to the department at any time after the student has completed 75 undergraduate credits. Graduate credits may be applied toward the MS under this program upon the completion of 90 undergraduate credits. Additional minimum requirements for admission are:

1. Minimum GPA of 3.25
2. Minimum GPA in undergraduate math courses of 3.5
3. Completion of two transition courses or their equivalents
4. Three letters of recommendation from UW faculty (at least 2 from UW-Math)

Credits

The BS/MS-Math program allows for students under the guidance of their academic advisor to take graduate courses as part of their BS degree. During their senior year, up to six graduate credits (5000+ level) can be counted simultaneously towards both the BS and MS degrees in Mathematics. In principle, this "double dipping" allows students to earn a MS after completing only 144 credits (120 to earn the BS, 6 of which are applied toward the 30 credits required to earn the MS) instead of 150 credits. In addition, students may reserve a further six credits of 5000 level credits for their MS degrees prior to earning their BS; however, these credits will not be counted toward the BS degree.

Satisfactory progress

The department's Foundation Exam must be passed by the beginning of their second semester of their 4th year. Students in the BS/MS program must have a faculty advisor, with whom they consult to complete a program of study. The Program of Study (POS) must be submitted to the Mathematics Graduate Committee for approval by the end of the midterm of the first semester in which the student has been admitted into the program. The POS must include all courses to be taken during their senior year to the end of the students MS program. Any of the tracks (plan A or B) available to our Masters students will be available to students in this program. The advisor will aid the student in determining which track is the best for completion of the Masters.

Regulations

Students in this program will be governed by the regulations applicable to any undergraduate student in Mathematics until the student has completed 120 credit hours applicable to the BS degree in Mathematics. Once those 120 credit hours have been completed, the student will be enrolled as a graduate student and be governed by graduate student regulations in the Mathematics graduate program. To the extent possible, once the student transitions to being a graduate student, the student should complete the MS degree in 12 months.

University of Wyoming requirements:

Students must have a minimum cumulative GPA of 2.0 to graduate. • Students must complete 42 hours of upper division (3000-level or above) coursework, 30 of which must be from the University of Wyoming. • Courses must be taken for a letter grade unless offered only for S/U. • University Studies Program (USP) Human Culture (H) and Physical & Natural World (PN) courses must be taken outside of the major subject, but can be cross-listed with the major.

College of Arts and Sciences requirements:

Students must take two "core" courses in addition to UW's University Studies Program requirements: Diversity in the United States (ASD) and Global Awareness (ASG). • No more than 60 hours in the major subject may be used toward the 120 credit hours required for graduation. • At least 30 hours in the major subject must be completed with a grade of C or better (the major may require more).

Mechanical Engineering Quick Start, B.S./M.S.

The UW Mechanical Engineering BS/MS QuickStart program offers Mechanical Engineering and Energy Systems Engineering undergraduate students the opportunity to start on MS graduate coursework early and gain credit towards BS and MS degree requirements.

Requirements for Admission

Through judicious choice of undergraduate electives, this program allows double-counting up to two 5000-level courses from the B.S. program toward M.S. degree requirements, thus reducing the time requirement for completing an M.S. degree. Students can apply for admission to the B.S./M.S. program by achieving junior status and meeting the following requirements for admission:

- completion of the four core ME courses (listed below),
- a minimum overall GPA of 3.250,
- a minimum GPA of 3.250 in ME courses, and
- a minimum of three letters of recommendation (at least two must be from ME faculty at UW).

Core Mechanical Engineering Courses

Completion of the following four ME courses is required for admission.

ME3010 - Intermediate Mechanics of Materials

Credits: 3

Expansion of the principles of solid mechanics: stress, strain, principal stresses, elastic and plastic behavior, failure theories and the use of energy methods. Analysis and design of thick-walled pressure vessels, noncircular cross sections under torsion, nonsymmetric beams under bending and curved beams.

Prerequisite: Completion of the ME Success Curriculum, ES 2410.

ME3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ESE 3020

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ME3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ESE 3040

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ARE 3360/ESE 3360

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310, and ES 2330.

Additional Information

Students must maintain a GPA of at least 3.250 in their undergraduate and at least 3.000 in their graduate coursework in order to remain in good standing in the program. Not meeting the GPA requirement places a student on probation for one semester. If the GPA requirement is not met after that semester, the student will be dismissed from the Quick Start program. Transfer students must have taken courses equivalent to the ME core courses. Transfer students must have also completed at least 15 credit hours of courses at UW in order to be eligible for admission.

Until a student in this program has completed a total of 131 credit hours of courses applicable to the B.S. degree in Mechanical Engineering, or a total of 129 credit hours of courses applicable to the B.S. degree in Energy Systems

Engineering, he/she will be governed by the regulations applicable to undergraduate students in the Department. After a student has accumulated a total of 131 or 129 applicable credit hours, he/she will be governed by the regulations applicable to any graduate student in the ME department. These regulations include the requirement that every student must take the GRE general examination. It is the intention of the department that, to the degree possible, a student in this program is treated on the same basis as any other student in the department at a comparable stage of his/her academic career.

As many as 6 credit hours of ME department courses at the 5000 level may be counted towards both the undergraduate degree requirements and the requirements for the MS degree. In principle, therefore, the minimum number of course credit hours required for the BS/MS degrees will be 151 for Plan A students (+ 4 additional hours of thesis research) or 156 for Plan B students (non-thesis option).

Petroleum Engineering Quick Start, B.S./M.S.

The BS/MS Quick Start program is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their BS degree in Petroleum Engineering. These students may apply for admission during their junior year.

Quick Start Program Requirements

The BS/MS Quick Start program in Petroleum Engineering (PETE) is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their Bachelor of Science (B.S.) degree in Petroleum Engineering. These students may apply for admission to the Quick Start program during their junior year or before starting their senior year.

This program allows for early planning of the graduate portion of a student's education and provides more flexibility in the number of required courses and the order in which they are taken. The more efficient and better planned use of time should result in reduction of the time required for obtaining the Master of Science in Petroleum Engineering degree. Students who enter the Quick Start program must accept primary responsibility for actively planning their Programs of Study to assure timely completion of their course work and research programs.

The Quick Start program contains two essential elements:

1. Qualified students may receive provisional admission to the Petroleum Engineering graduate program prior to completing the normal application process. This provisional admission will permit students to make their long-term educational plans earlier in their studies, thus providing enhanced opportunities for course selection and involvement in research.
2. Students in the program may apply up to 6 credit hours of 5000-level courses toward both the B.S. and M.S. degree programs. By completing successfully up to 6 credit hours of graduate classes during their senior year, these students will have demonstrated their ability to do graduate-level course work as undergraduates, easing their transition to the Petroleum Engineering graduate program.

For additional information, visit our website for admissions information <http://www.uwyo.edu/petroleum/undergraduate/current-students/quickstart.html> or contact our graduate admissions coordinator at pete-info@uwyo.edu.

Quick Start Prerequisites

Cumulative GPA of 3.25.

PETE GPA of 3.50

3 letters of recommendation, at least 2 from PETE faculty at UW.

PETE3200 - Reservoir Engineering

Credits: 3

Covers rock and fluid properties, reserve estimation using volumetric and material balance methods, discussion of different reservoir drive mechanisms, aquifer models, Darcy's law and single-phase flow through porous media, introduction to well testing, solution of radial diffusivity equation, immiscible displacement, decline rate analysis, and reservoir simulation.

Prerequisite: PETE 3025, C or better in PETE 2050. Student must be a Petroleum Engineering major.

Prerequisite courses: PETE 2050 and PETE 3025

PETE3255 - Basic Drilling Engineering

Credits: 3

Principles and practices of oil and gas well rotary drilling, including rock mechanics, drilling hydraulics, drilling fluids, and hold deviation. Drilling equipment analysis, casing design, and drilling fluid properties. Application of modern computer-based analysis and design methods.

Prerequisite: C or better in PETE 2050. Student must be a Petroleum Engineering major.

Prerequisite courses: ES 2330 and PETE 2050

PETE3715 - Production Engineering

Credits: 3

Provides elements for calculating the production rate of oil or gas wells, including reservoir inflow performance, which is determined by the reservoir rock and fluids properties and calculated based on Darcy's law, and tubing performance, which is determined by tubing parameters and calculated based on Newtonian dynamics. Basic design of artificial lift systems, reservoir stimulations and optimization of production systems are also included.

Prerequisite: C or better in ES 2310, ES 2330 and PETE 2050. Student must be a Petroleum Engineering major.

Prerequisite courses: ES 2310, ES 2330 and PETE 2050

Transfer Students' Requirements

Must have taken at least two of the three required PETE courses listed above at UW.

Transfer course work must be from an accredited institution and deemed equivalent to current UW PETE core courses.

Must have completed at least 15 credit hours of PETE course work at UW prior to starting the Quick Start program.

Quick Start Program Retention

Prior to completion of the BS degree, students must:

- Complete all requirements for admission to UW graduate school and the PETE graduate program.
 - The Graduate Records Examination (GRE) requirement will be waived.

- Additional English proficiency testing for admission is also waived for international students.
- Maintain a cumulative GPA of at least 3.25 in their overall undergraduate program.
- Maintain a GPA of 3.5 in their PETE courses.
- Maintain a GPA of at least 3.0 in 5000-level (graduate) courses.
- Failure to complete graduate admission requirements prior to the start of the final year of undergraduate study will result in immediate suspension from the program.
- Failure to meet any GPA requirements places a student on academic probation for one semester.
- If the GPA requirement is still not met after academic probation, the student will be suspended from the program.

Statistics Quick Start BS/MS

An advanced degree in Statistics is powerful in its own right; statistical methods are part of the core of data science, so stands as a useful foundation for that as well. The Program in Statistics at the University of Wyoming now offers a QuickStart ("4+1") MS program, within which qualified students can obtain a **Statistics, B.S.** and a **Statistics, M.S.** degree in five years.

The program is intended for inspired, high-achieving students; the pace will be intense, as you will need to be taking courses at the graduate level in your undergraduate senior year.

The MS degree requires 30 credits; in order to make the 4+1 program work enrolled students can

1. Have two three-credit 4XXX/5XXX classes count towards both the BS and MS degrees. Enrollment must be for the 5XXX section of the course. Tuition is charged at the undergraduate rate.
2. Reserve two three-credit 4XXX/5XXX classes for graduate credit. Tuition is charged at the undergraduate rate, but these two classes *will only count towards the MS.*

With these four courses counting towards the MS, there remains 18 credits, which can be done in two semesters of three (three-credit) classes each.

Steps:

1. Apply (usually in the Spring of your Junior year) online to the QuickStart- Statistics BS/MS -College of Arts & Science program[1]. You will need (unofficial is fine) college transcripts, a statement of purpose, and three letters of recommendation[2].
2. Once you are enrolled in the program, the Admissions Office will work with you to put into play the double-dip and reserved courses mentioned above.

Acceptance into the MS is conditional until your undergraduate degree is awarded and results are in from your taking the GRE, which we recommend you take in your last undergraduate year.

[1] Instructions from the registrar: Apply at: <https://www.uwyo.edu/admissions/apply-online.html>

The log-in is different from WyoWeb. If you remember the log-in email/password form when you originally applied to UW, you can use the Returning Users option. Otherwise, use the First Time users option. When you get to the page where you select your program of study, select **QuickStart- Statistics BS/MS -College of Arts & Science**. All the Quickstart program are under Q to (hopefully) reduce confusion for non-quickstart applicants. Any questions during the application process can be directed to admissions@uwyo.edu or 766-5160.

[2] These documents are standard for applying to our graduate program; we anticipate we will have a mix of QuickStart students and regular (i.e. 2-year) MS students who are applying from elsewhere.

College of Health Sciences

235 Health Sciences Center

David Jones, Dean

Phone: (307)766-6556 FAX: (307)766-6608

Web site: www.uwyo.edu/hs

The College of Health Sciences is the place for students interested in improving and maintaining the physical, mental, and social health of others. We offer challenging degree programs in the "helping professions" and serve as the gateway to schools of medicine, dentistry, physical and occupational therapy, physician's assistant study, optometry, and more.

Health sciences students receive not only a superior education from knowledgeable and caring faculty but also precise and personal guidance from conscientious advising personnel. Students benefit, too, from practicums and internships that help them refine and test the skills acquired in lectures and labs as well as opportunities to participate in dynamic, interdisciplinary research projects.

The college is also the home of the Wyoming Institute for Disabilities (WIND); two Family Medicine Residency Centers; and the WWAMI Medical Education Program.

We serve as the state certifying office for the Wyoming, Washington, Alaska, Montana, and Idaho (WWAMI) medical education contract program with the University of Washington School of Medicine; WYDENT, the dental education contract program with the University of Nebraska and Creighton University; and two programs for the Western Interstate Commission of Higher Education (WICHE): the Professional Student Exchange Program (PSEP) and the Western Regional Graduate Program (WRGP). Refer to the sections on WWAMI, WYDENT, and WICHE in this catalog for program descriptions or go to www.uwyo.edu/certwy.

Any student seeking admission to programs in the College of Health Sciences will be required to obtain a background check as specified by college policy. Please contact your school or division for specific information.

The College of Health Sciences retains the right to deny or revoke admission to any of its programs for academic, disciplinary, ethical, or professional standards reasons.

Programs of Study

Undergraduate Degrees

Bachelor of Science

Kinesiology and Health Promotion

Medical Laboratory Science

Physical Education Teacher Education K-12

Speech, Language and Hearing Sciences

Bachelor of Science in Dental Hygiene

Bachelor of Science in Nursing

Bachelor of Social Work

Graduate Degrees

Master of Science

- Health Services Administration
- Nursing
- Kinesiology and Health
- Speech-Language Pathology

Master of Social Work

Professional Degrees

Doctor of Nursing Practice

Doctor of Pharmacy

Minor in the College of Health Sciences

Disability Studies

Disability studies is a diverse interdisciplinary field that investigates broad questions about the nature, meanings, and consequences of disability from interrelated social, historical, cultural, and political perspectives. Students will gain a broad understanding of disability issues for working with people with disabilities rather than specific disciplinary skills and techniques. The minor complements any major and consists of 18 credit hours. See www.uwyo.edu/hs/divisions-and-programs/minor-indisability-studies.html.

Undergraduate and Pre-Health Advising Office

Health Sciences Center, 110

The Undergraduate and Pre-Health Advising Office (UPHAO) in the College of Health Sciences (www.uwyo.edu/preprof/) provides pre-professional health advising to all UW students regardless of their academic majors, who are interested in pursuing future study in athletic training, chiropractic, dentistry, medicine, optometry, occupational therapy, physical therapy, physician assistant, or other health care careers such as public health. A bachelor's degree is usually required for admission to a professional school. The University of Wyoming does not offer degrees in pre-professional areas. Students may pursue any UW degree program in which they have an interest and at the same time complete the admission requirements for the professional schools they wish to attend. The UPHAO advises students for their professional program prerequisites as well as other aspects of becoming solid candidates. Each student will also have an advisor in his/her major.

Through this office, pre-health students can access current information about admission requirements, entrance examinations, application process, professional school curriculums, interviewing skills, and test preparation. Specific schools may have additional requirements; students are urged to check with the schools they wish to attend.

Information and Wyoming state residency applications for the WICHE PSEP program, the WWAMI medical education program, and the WYDENT dental education program, may be found online at <http://www.uwyo.edu/certwy>.

Please view individual division and program pages list for full course and curriculum listings

Major

B.S. in Dental Hygiene (BSDH)

Dental hygienists play an important role in promoting health by helping patients understand the connection between good oral health and an overall healthy body. They provide patient education and individualized therapeutic services to help patients reach their oral health goals.

Program Prerequisites

Students interested in the bachelor's degree in dental hygiene should contact the Health Sciences Advising Office at Health Sciences 110, phone (307)766-3878, e-mail: hsadvise@uwyo.edu.

Prerequisite courses for admission into the Dental Hygiene program at Sheridan College includes a cumulative GPA of 2.750 or better in the courses listed below. These may be taken at any institution, but if taken at the University of Wyoming, the course numbering will be as follows:

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.
OR CHEM 1020 General Chemistry I

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR MOLB 2021 General Microbiology

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

UW Requirements for the BSDH Degree

In order to receive a BSDH through the University of Wyoming, students must also take the following courses:

1. Program prerequisites
2. A.A.S. in Dental Hygiene from Sheridan College (competitive application required)
3. Completion of all USP requirements, including the US and Wyoming Constitutions (USP-V) and Communication III (USP-COM3) requirements
4. STAT 2050 or STAT 2070
5. At least 120 credits hours, 42 of which are upper-division credits. This usually requires the completion of additional upper-division elective credits. Note: talk to an advisor to know whether you need to fulfill any additional credits toward your BSDH (hsadvise@uwoyo.edu).

Required Courses

Required courses after admission to the Dental Hygiene program at Sheridan College (NWCC-D):

Sheridan College Courses

Sheridan College courses, taught ONLY at Sheridan College in Sheridan, WY.

- DHYG 2100 - Dental Health Education Credits: 3
- DHYG 2300 - Preclinical Dental Hygiene Credits: 3
- DHYG 2305 - Clinical Dental Technology Credits: 1

- DHYG 2405 - Dental Anatomy Credits: 2
- DHYG 2450 - Oral Radiology Credits: 3
- DHYG 2451 - Oral Radiology Lab Credits: 1
- DHYG 2470 - Orientation to Dental Hygiene Credits: 3
- DHYG 2200 - Pharmacology Credits: 2
- DHYG 2210 - Dental Embryology & Histology Credits: 2
- DHYG 2350 - Clinical Dental Hygiene I Credits: 3
- DHYG 2400 - Head, Neck, and Oral Anatomy & Physiology Credits: 2
- DHYG 2420 - Clinical Seminar I Credits: 2
- DHYG 2455 - Dental Materials Credits: 2
- DHYG 2456 - Dental Materials Lab Credits: 1

University of Wyoming Courses

University of Wyoming courses (details below), taught ONLY at Sheridan College in Sheridan, WY.

DHYG3230 - Clinical Seminar II

Credits: 2

This course is a continuation of the Clinical Seminar Series. Course content will focus on the review and enhancement of instrumentation skills; the essentials of instrument selection; the role of root planing in dental hygiene; the development and refinement of skills needed for treatment of more advanced periodontal cases, which includes the initiation of a periodontal case study; and the introduction and preparation for the use of state-of-the-art clinical technologies.

Prerequisite: DHYG 2420.

DHYG3300 - Clinical Dental Hygiene II

Credits: 5

This course provides students the opportunity to gain further practical experience in dental hygiene procedures by providing comprehensive patient care in clinical settings. A flexible format allows students to meet requirements in procedures for patient record-keeping, patient education, dental prophylaxis, dental radiography and routine clinical procedures.

Prerequisite: DHYG 2350.

DHYG3400 - General and Oral Pathology

Credits: 3

This course is designed to teach students the concepts underlying general and oral manifestations of human disease states, manifestations of specific diseases, relationships to body defense mechanisms, and potential implications for medical and dental hygiene treatment. To the extent possible, applications to clinical situations in dental hygiene practice will be made.

Prerequisite: one year pre-dental hygiene (including general pathology); MOLB 2021 or equivalent.

DHYG3600 - Ethics and Law in Dental Hygiene

Credits: 2

This course provides an introduction to basic concepts in the analysis of ethical theories, principles, values, the professional code of ethics, and legal aspects associated with the dental hygiene healthcare profession. Contemporary issues are examined in dentistry and medicine as a strategy to explore and apply ethical principles in diverse cultures and situations.

Prerequisite: successfully complete all first-year dental hygiene courses.

DHYG3750 - Periodontology

Credits: 3

This course reviews the anatomy and histology of periodontal structures and dental accretions followed by a study of the classifications and etiology of periodontal diseases including both local and systemic factors. A thorough exploration of the hygienist's role in disease recognition, prevention, therapeutic procedures and maintenance is also included.

DHYG3770 - Pain Management

Credits: 2

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/oxygen.

Prerequisite: successful enrollment in dental hygiene major or consent of instructor.

DHYG3775 - Pain Management Lab

Credits: 1

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/ oxygen.

Prerequisite: successful completion of sophomore year course work in dental hygiene, current certifications in CPR, and curriculum enrollment in dental hygiene major or consent of instructor.

DHYG3250 - Clinical Seminar III

Credits: 2

This course prepares the dental hygiene student to make the transition from an educational setting to private practice. Focus is on applying, synthesizing, and transferring clinical and didactic knowledge to clinical and ethical decision-making. Students will be engaged in problem-based case studies, application of motivational theories, and analysis of evidence-based research.

Prerequisite: DHYG 3230, DHYG 3300 and DHYG 3350 or concurrent enrollment.

DHYG3350 - Clinical Dental Hygiene III

Credits: 5

This course assists students in gaining practical experience in clinical procedures requiring greater skill and knowledge than procedures previously undertaken. This course prepares students for the transition to private office practice.

Prerequisite: DHYG 3300.

DHYG3550 - Community Dental Health

Credits: 3

This course provides the dental hygiene student with an introduction to basic skills needed to evaluate the dental health community, including research methodology and basic statistical analysis. It provides the student with a basic understanding of the significant social, political, psychological and economic factors influencing the American Health System.

Prerequisite: DHYG 2100.

DHYG3720 - Office Practice

Credits: 2

This course is designed to provide the dental hygiene student with both current information and experience in office practice and management. Also included are discussions of professionalism, decision-making and leadership roles, including legal and ethical responsibilities, team responsibilities in the dental office and discussion of selecting, securing and maintaining employment.

Prerequisite: DHYG 2300, 2350, DHYG 3300 and a communications course.

DHYG3800 - Board Review

Credits: 1

This course is designed to assist dental hygiene students in preparing for the National Board Dental Hygiene Exam, the western and central regional clinical and anesthesia board exams, and state jurisprudence exams. These exams are required for licensure to practice dental hygiene in the United States. This course includes discussion of the distinction between various agencies in the education, healthcare and legal system which have jurisdiction over the licensure process, and the impact of cheating during any portion of the process on the public welfare.

Prerequisite: DHYG 3300.

Kinesiology and Health Promotion, B.S.

The B.S. in Kinesiology and Health Promotion degree prepares students for careers in clinical exercise physiology, health and movement coaching, biomechanics, nutrition, basic science, and behavioral science. The program is also excellent for students seeking to enter the field of medicine.

USP - University Studies Program Requirements

The following University Studies Program requirements are required to graduate and are not covered by the Kinesiology and Health Promotion major. These courses should be taken before KIN 3021 & 3022, except the Communications III (USP-C3) course.

First Year Seminar (3 credits)

Communications I (3 credits)

ENGL 1010 English Composition

Communications II (3 credits)

Communications III (3 credits)

U.S. & Wyoming Constitution (3 credits)

Human Culture

Any USP-H course (not HLED) (3 credits, meets 3 out of 6 credits of Human Culture USP requirement)

Courses required for major

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer

sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR CHEM 1020 - General Chemistry I

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

HLED1006 - Personal Health

Credits: 3

Introduces multiple concepts of personal health (e. g. , physical activity, diet, stress, social pressure, public health, human behavior, disease prevention, healthcare access, and health-oriented citizenship) in relation to improving individual health and understanding the health of a society and cultural differences in human health and health behavior.

USP 2015 Code U5H

KIN1006 - Introduction to Kinesiology and Health

Credits: 1

A survey of the disciplines of kinesiology and health and exposure to foundational literature in the field.

Prerequisite: Declared Kinesiology & Health Promotion major or permission of instructor.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR STAT 2070 Introductory Statistics for the Social Sciences

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.
OR PHYS 1110 General Physics I

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

HLED3020 - Community and Public Health

Credits: 3

Public health aim to create the conditions where people can be healthy. This course introduces goals and applications of community and public health work in the US, illustrated with case studies from the most urgent health issues facing our nation.

Former Course Number [4050]

Prerequisite: HLED 1006, completion of a COM2 course, and minimum 2.750 GPA.

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular circulatory, and respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

A minimum cumulative GPA of 2.750 (preferred 3.000) is required before taking KIN 3021

KIN3022 - Lab Exp in Exercise Physiology

Credits: 1

An in-depth examination of the measurement of physiological principles and mechanisms related to human movement. Lab exercises emphasize skills necessary for basic morphological through advanced exercise performance testing variables. Laboratory writing exercises focus on improving students' ability to read and comprehend scientific articles and produce scientific writing based on their own experiments and data.

Prerequisite: KIN 3021 or concurrent enrollment.

KIN3024 - Fundamentals of Health and Fitness Assessment

Credits: 3

Fundamental concepts of health appraisal, assessment of health-related fitness levels, individual and group exercise programming and leadership, and methods of behavioral change. Theory and practical application of fitness presented with an emphasis on adults. Has lecture and lab components. Completion of KIN 3021 highly recommended.

Former Course Number [PEPR 3010]

Prerequisite: completed or concurrent enrollment in KIN 3021; 2.750 GPA.

KIN3034 - Lifespan Motor Development

Credits: 3

Studies lifespan motor development. Emphasizes developmental periods of infancy through adolescence. Gives attention to observation and analysis of motor behavior and movement performance of individuals across lifespan.

Former Course Number [PEPR 3034]

Prerequisite: grade of C or better in PSYC 1000; junior standing; 2.750 GPA.
OR KIN 4020 Motor Behavior

KIN3037 - Sport Psychology

Credits: 3

Studies psychological theories and techniques applied to sport to enhance the performance and personal growth of athletes and coaches. Emphasizes the influence of personality, anxiety, motivation, social factors, and psychological skills training.

Former Course Number [PEPR 3037]

Prerequisite: Admitted to the last two years of one of the programs in DK&H.
OR KIN 3038 Exercise Psychology

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

Minimum of 6 hours total in:

KIN4015 - Internship Experience in Kinesiology

Credits: 1-12

Variable-credit (1-12) and S/U course required of Kinesiology and Health undergraduate majors to provide experiential learning in kinesiology and health in a real world setting. Intended to integrate theory and technique with practical application to expose students to areas of professional/career interest and assist with building professional careers. Must have CPR/ AED/1st Aid Certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed HLED 4015.

Former Course Number [PEPR 4015]

Prerequisite: Grade of C or better in KIN 3024;
OR

HLED4015 - Internship Experience in Health

Credits: 1-12

Max Credit (Max. 12)

Variable-credit (1-12) and S/U course required of Kinesiology and Health undergraduate majors to provide experiential learning in kinesiology and health in a real world setting. Intended to integrate theory and technique with practical application to expose students to areas of professional/career interest and assist with building professional careers. Must have CPR/AED/1st Aid Certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed KIN 4015.

Prerequisite: Grade of C or better in KIN 3024; 2.750 GPA; completion of a minimum of 18 credits in KIN/HLED upper division coursework.

OR

KIN4016 - Research Experience in Kinesiology and Health

Credits: 1-6

Max Credit (Max. 6)

Offered to students who wish to gain a research experience in Kinesiology and Health. Meant for students who are interested in pursuing an advanced degree. Students may choose to complete KIN/ HLED 4016 instead of KIN/HLED 4015. Must have CPR/AED/1st Aid certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed HLED 4016.

Prerequisite: minimum sophomore standing; declared KHP major; permission of instructor; 2.750 GPA.

OR

HLED4016 - Research Experience in Kinesiology and Health

Credits: 3-6
Max Credit (Max. 6)

Offered to students who wish to gain a research experience in Kinesiology and Health. Meant for students who are interested in pursuing an advanced degree. Students may choose to complete KIN 4016/HLED 4016 instead of KIN 4015/HLED 4015. Must have CPR/AED/1st Aid certification prior to enrollment. Background check must be completed prior to start of course.

Cross Listed KIN 4016.

Prerequisite: minimum sophomore standing; declared KHP major; permission of instructor; and minimum 2.750 GPA.

Elective Courses

KIN/HLED Upper-Division Elective Coursework (15 credits)

15 credits of 3000-4000 level KIN/HLED elective coursework is required in addition to the required KIN & HLED courses listed above.

Consult with your advisor to see list of possible courses.

General Electives (25 credits)

Degree must include 120 credits, at least 48 of which must be upper-division credits.

KIN and HLED electives (i.e., non required courses) from above may be counted towards these 25 credits. KIN 2050 is recommended as one elective course.

Consult with your academic advisor and your pre-health advisor (if applicable). Pre-health students will need to take additional professional prerequisite courses as electives.

Additional Requirements

Students must complete 48 credit hours of upper division coursework (3000- or 4000-level courses) to meet the Division's minimum 48 credit hour requirement for the B.S. degree in Kinesiology and Health Promotion.

NOTE: Students should complete CPR & first aid certification and the certification should remain current throughout the program. Cards can be presented to the division registrar in Corbett 119 to be cleared of the requirement on the degree evaluation.

PRE-HEALTH ANNOUNCEMENT

This degree is great preparation for various careers in health care and allied health. If you are interested in becoming a strong applicant to graduate school for a career in these fields, please tell your primary advisor and connect with the Pre-Health Advising Office on campus as soon as possible: <https://www.uwyo.edu/preprof/> or hsadvise@uwyo.edu Your career of choice will determine which math and science courses you need to take in your first years, so talk to them early!

Medical Laboratory Science, B.S.

A degree in Medical Laboratory Science prepares healthcare professionals to perform clinical diagnostic testing in the areas of microbiology, hematology, chemistry, immunohematology, urinalysis, serology, and molecular biology.

USP - University Studies Program Requirements

Completion of all University Studies Program requirements is necessary to obtain a bachelors degree from the University of Wyoming. These requirements may be covered by the Medical Laboratory Technician Associates degree at Casper College. Please work with your advisor to ensure these requirements are fulfilled.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

Casper College Requirements

MLTK and PEAC courses are available through an articulation agreement with Casper College **and can be taken only through Casper College**. Students are responsible for fulfilling all University Studies requirements. The articulation agreement, with a proposed semester-by-semester sequence, is available at:

<http://www.uwyo.edu/TRANSFER/articulation/agreements/medical-laboratory-science.html>

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.
Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.
OR MOLB 2021 General Microbiology (Casper College equivalent: MOLB 2210)

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA
USP 2015 Code U5C1

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN
Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

- PEAC xxxx: Online Activity Credits: 1
- CMAP 1505 Introduction to Computers Credits: 1
- Elective Credits: 3
- MLTK 1500 - Hematology Credits: 3
- MLTK 1600 - Clinical Immunohematology Credits: 3
- MLTK 1700 - Microscopy: UA Body Fluids Credits: 2
- MLTK 2600 - Clinical Microbiology I Credits: 2
- MLTK 2500 - Clinical Chemistry Credits: 3
- MLTK 2650 - Clinical Microbiology II Credits: 2
- MLTK 2700 - Immunology Credits: 4
- MLTK 2971 - Clinical Practicum: Hematology Credits: 2
- MLTK 2972 - Clinical Practicum: Chemistry Credits: 2
- MLTK 2973 - Clinical Practicum: Immunohematology Credits: 2
- MLTK 2974 - Clinical Practicum: Microbiology Credits: 2
- MLTK 2976 - Clinical Practicum: Serology Credits: 1
- MLTK 2977 - Clinical Practicum: UA / Body Fluids Credits: 1
- MLTK 2978 - MLT Professionalism Credits: 1

- MLTK 2800 - Clinical Pathophysiology Credits: 4
- MLTK 1800 - Principles of Phlebotomy Credits: 3

University of Wyoming Requirements

Upper-division courses required to complete the Bachelor of Science in Medical Laboratory Science (**All MLSK courses are only available through UW-Casper.**):

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3600 - Cell Biology

Credits: 4

Focuses on cell structure, cell function and the regulation of cell processes. Examines many levels of organization, ranging from single molecules and individual cells to multi-cellular systems and the whole organism. Discussion section is required.

Former Course Number [BIOL 3600/ BIOL 4600]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

MLSK4840 - Laboratory Education Methodology

Credits: 1

This course provides an overview of education methodology and issues related to roles as educators in the clinical laboratory profession. Course topics and assignments include pedagogy, curriculum design, assessment and accreditation. Major educational responsibilities for clinical laboratory professionals relating to continuing education, competency assurance, certification and licensure will be addressed.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4850 - Clinical Research Design

Credits: 2

A course in research design methods commonly used in clinical research. Emphasis is on research design, process, measurement, regulatory issues, and ethics, as used by investigators. The focus is to equip students with knowledge and skills necessary to critically examine professional literature, methodology and ethical considerations that influence research design.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4860 - Laboratory Management

Credits: 3

This course introduces students to laboratory management systems, testing, reimbursement, accrediting/regulatory issues, finances, information systems, QA/QC improvement and supervisory roles in the clinical laboratory. Emphasis is on management and communication skills needed to work successfully as entry-level professionals in a health care setting.

USP 2015 Code U5C3

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4870 - Advanced Clinical Chemistry

Credits: 4

This course is designed to introduce students to advanced topics in clinical chemistry in relation to instrumentation, diagnostic testing and its correlation to disease states, and method correlation and validation. Students will demonstrate the ability to describe principles and applications required for the entry level laboratory scientist.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

MLSK4880 - Advanced Hematology: Erythrocytes

Credits: 2

Advanced hematology principles and techniques prepare students for practice in the clinical laboratory. This course will focus on advanced topics of hematology, focusing on normal and abnormal erythrocytes in relation to assessment, and disease correlation.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

MLSK4981 - Advanced Clinical Practicum-Hematology

Credits: 3

Advanced hematology principles and techniques prepare students for practice in the clinical laboratory. Topics include

leukopoiesis, leukemias, lymphomas, hemostasis, coagulopathies, urinalysis and body fluids. Laboratory will focus on abnormal smears, normal and leukemic bone marrow evaluations, and coagulation mixing studies, factor assays and body fluids related to clinical disease states.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4982 - Advanced Clinical Practicum-Molecular

Credits: 3

Principles of molecular technology used in clinical laboratories. Laboratory experiences include cytogenetics, nucleic acid extraction, hybridization, detection, amplification, sequencing, microarrays, and in-situ hybridization. Emphasis is on the areas of the clinical laboratory that use molecular techniques related to genetics, oncology, infectious disease, and identity testing for forensic and transplant purposes.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4983 - Advanced Clinical Practicum-Immunohematology

Credits: 3

Principles of immunology theory, blood group systems, genetics, and immunohematology techniques. Procedures including evaluation of blood samples, pretransfusion compatibility testing, and transfusion reactions are studied. Serologic testing and problem-solving in antibody identification and complex procedures are stressed. Laboratory emphasizes modern practices, resolution of compatibility problems and advanced antibody identification methods.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4984 - Advanced Clinical Practicum- Microbiology

Credits: 3

Focus is on underlying mechanisms of microbial pathogenesis, host responses to infectious disease and clinical diagnosis procedures. Emphasis is on detailed mechanisms of infection, pathogenesis, and major discoveries and technologies in medical microbiology. Current issues in public and global health, epidemiology, bioterrorism, biotechnology and vaccination programs will be studied.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an associate of science degree in medical laboratory technician within 5 years.

MLSK4890 - Professional Career Paths and Review

Credits: 2

This Medical Laboratory Sciences program prepares students for a variety of graduate degrees and careers in laboratory medicine. This course is designed to help students investigate career and education opportunities after becoming a certified Medical Laboratory Scientist and also provides students with a cumulative review to ensure mastery of content.

Prerequisite: Medical Laboratory Technician (ASCP) certification or completion of an AS degree in MLT within the past 5 years.

- Upper-division elective credits: 1 (see below, consult your academic advisor)

Upper Division Elective Credit Hours

One upper division elective credit hour must be completed in the student's junior or senior year to meet the total 42 required upper division credits to graduate. Students may take a three credit class to meet this requirement.

These credits must be 3000 and above, and achieved through online outreach or on campus courses. A list of courses that are acceptable to fulfil this requirement can be made available to the student. If a course is in question, it is highly suggested to the student to contact the UW-C advising department or the MLS program director for requirement fulfillment confirmation.

Enrichment Rotations and Laboratory Sessions

The final semester of the student's senior year is comprised of didactic material being delivered in an online hybrid manner, supplemented with on campus lab sessions at the UW-Casper campus. These lab sessions will be accompanied by an observational enrichment rotation at a clinical site. This enrichment rotation will allow for the observation of advanced methodologies in a practical environment. It will be the students' responsibility for all travel and housing costs associated with the advanced clinical practicum courses.

Probation

Students who do not meet the minimum grade requirements stated above for MLSK course work will be placed on probation. In this period of time, students will be allowed to continue in the program under supervision, but will submit a petition which is an individualized plan of study for the next semester that is developed by the student in agreement with and signed by an academic advisor. All completed MLSK courses that fail to meet minimum grade requirements (C or 2.000 or better) must be repeated by the student. Students shall not be allowed to progress to the final semester until all courses in the previous semesters are successfully completed and a GPA of 2.000 is obtained.

Additional Requirements

The program requires 124 credit hours total, with 54 credit hours obtained in the junior/senior years to graduate. Students must complete a minimum of 42 upper division hours, 30 of which must be earned from the University of Wyoming.

Prerequisite for admission to the Medical Laboratory Sciences degree is completion of the Medical Laboratory Technician program at Casper College, or another accredited MLT program. Students interested in the MLS degree who already hold a bachelors degree should contact program director Jed Doxtater at jdoxtate@uwyo.edu.

Nursing, B.S.N., Basic BSN Option

"Basic BSN" is an on-campus BSN option for students who want to become a registered nurse and earn the Bachelor of Science in Nursing degree. Learning facilities include state-of-the-art classrooms and Clinical Simulation Center.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Pre-Clinical Component

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

Clinical Component

(Note: Course requirements/expectations are subject to change. Maintain contact with FWWSO for current expectations.)

NURS2340 - Developmental Influences on Health

Credits: 3

Explores interaction between development and health. Discusses human development of physiological, psychological, cognitive, sociocultural, and spiritual systems across the lifespan. Identifies selected theories associated with development over the lifespan and implications for healthcare.

Prerequisite: Completion or concurrent enrollment in NURS 3445 or NURS 3745, NURS 3665 or NURS 3730 and NURS 3790, and PHCY 3450.

NURS3445 - Fundamentals and Health Assessment in Professional Nursing Practice

Credits: 4

This course introduces the concepts of nursing care, safety, and assessment. Students learn to assess and document normal variations and potential alterations of physiological, psychological, sociocultural, spiritual, and developmental dimensions of individuals across the lifespan.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3665, and PHCY 3450.

NURS3490 - Health Promotion in Professional Nursing Practice

Credits: 4

Students will learn and apply concepts of health promotion across the lifespan. Emphasis is on cultural diversity, health risks, behavior change and healthy practices for individuals, families, and populations. Students will incorporate evidence in designing interventions to promote health and prevent illness for self and clients.

A&S College Core 2015 **Course changes effective Fall 2022** - Credits: 3 credits; Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3690, NURS 3695, and NURS 4125.

Prerequisite: Progression or admission to the clinical component of the program and completion or concurrent enrollment with NURS 2340, NURS 3435, and PHCY 3450 or PHCY 4450.

NURS3665 - Foundations of Professional Nursing Roles

Credits: 3

This course introduces the student to professionalism, leadership, safety, and patient-centeredness. The concepts emphasized provide the foundation for professional nursing practice.

Prerequisite: Fall 2021: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3690, and NURS 3695. **Effective Spring 2022:** Completion or concurrent enrollment in NURS 2340, NURS 3445, and PHCY 3450.

NURS3690 - Professional Nursing Acute/Chronic Illness

Credits: 3

Students will examine concepts of nursing practice in the care of adults with acute and chronic illness. Emphasis is on utilizing the nursing process to develop clinical judgement.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3490, NURS 3695, and NURS 4125.

Prerequisite: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3665, and NURS 3695.

NURS3695 - Professional Nursing Acute/Chronic Illness Practicum

Credits: 4

Students provide nursing care using the nursing process in a clinical setting with adult clients experiencing acute and chronic illness. Emphasis is on demonstration of clinical judgement.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: NURS 3445, PHCY 4470, and completion or concurrent enrollment in NURS 3490, NURS 3690, and NURS 4125.

Prerequisite: NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3665, and NURS 3690.

NURS3890 - Professional Nursing Care in Complex Illness

Credits: 3

Students will examine concepts of nursing practice in the care of adults with complex illness. Emphasis is on utilizing the nursing process to develop clinical judgment.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3891, NURS 3892, and NURS 3895.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3891, 3892, 3895, 4125.

NURS3891 - Professional Nursing Care of Older Adults

Credits: 3

Students will examine concepts of nursing practice in the care of older adults. Emphasis is on utilizing the nursing process to develop clinical judgment.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3892, and NURS 3895.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3892, NURS 3895, NURS 4125.

NURS3892 - Professional Nursing Care in Mental Health and Illness

Credits: 3

This course explores mental health and illness concepts. Emphasis is on the role of the professional nurse in caring for clients with alterations in mental health.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3891, and NURS 3895.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3891, NURS 3895, NURS 4125.

NURS3895 - Professional Nursing Care in Complex Illness Practicum

Credits: 4

Students provide patient-centered care using the nursing process in clinical setting with adult and older adult clients experiencing complex illness and alterations in mental health. Emphasis is on demonstration of clinical judgment.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3891, and NURS 3892.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3892, NURS 3891, NURS 3892, NURS 4125.

NURS4125 - Evidence-Based Nursing

Credits: 3

Prepares students to engage in evidence-based nursing, specifically how to ask meaningful clinical questions, find

relevant evidence, critically appraise evidence, and integrate best evidence with clinical expertise and patient/community values.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB or COM1 and COM2; STAT 2050 or STAT 2070 or equivalent; admission into the nursing major component of the program.

NURS4665 - Healthcare Informatics in Professional Nursing Practice

Credits: 3

Utilizing a conceptual framework, students will examine nursing informatics within healthcare systems. Emphasis is placed on examining the role of clinical information systems in improving patient outcomes across practice, education, administrative, research, and interdisciplinary applications. Ethical and legal considerations of data management are examined.

A&S College Core 2015 **Course changes effective Fall 2023 - Prerequisite:** *NURS 3895 and completion or concurrent enrollment in NURS 4690, NURS 4691, and NURS 4695.*

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4690, 4691, 4695.

NURS4690 - Professional Nursing Care of Populations

Credits: 4

Introduces the student to population-focused nursing and applies the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, planning, and implementation; analysis of the healthcare system; emergency preparedness; and ethical/ legal aspects of public health.

A&S College Core 2015 **Course changes effective Fall 2023 - Description:** *Introduces the student to population-focused nursing and applies the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, and analysis of the healthcare system. Prerequisite:* *NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4691, and NURS 4695.*

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4691, NURS 4695.

NURS4691 - Professional Nursing Care of Children and Families

Credits: 3

This course encompasses the care of women, children, and their families across physiological, psychological, spiritual, developmental, and socio-cultural dimensions. The focus of this class is on women's health, obstetrical, and pediatric nursing care including health promotion and wellness specific to maternal and pediatric health.

A&S College Core 2015 **Course changes effective Fall 2022 - Credits:** *4 credits; Course changes effective Fall 2023 - Description:* *This course encompasses the care of women, children, and their families across physiological, psychological, spiritual, developmental, and sociocultural*

dimensions. The focus is on women's health, obstetrical, and pediatric nursing care including health promotion and wellness specific to maternal and pediatric health.

Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4690, and NURS 4695.

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4690, NURS 4695.

NURS4695 - Professional Nursing Care of Populations Practicum

Credits: 4

Students will apply the nursing process to childbearing families, children, and communities. The focus is on physiological, psychological, spiritual, developmental, and socio-cultural dimensions of individuals, families, and populations. Students will incorporate professional nursing roles into population-based care.

A&S College Core 2015 **Course changes effective Fall 2023** - Description: *The focus is on the application of professional nursing roles to the physiological, psychological, spiritual, developmental, and sociocultural dimensions of individuals, families, communities, and populations.* Prerequisite: NURS 3895 and completion or concurrent enrollment in NURS 4665, NURS 4690, and NURS 4691.

Prerequisite: NURS 3895 and completion or concurrent enrollment with NURS 4665, NURS 4690, NURS 4691.

NURS4865 - Professional Nursing Leadership

Credits: 3

The role of the nurse leader in nursing practice is developed through integration of leadership, management, and organizational theories. Emphasis is on interprofessional care management, planned change, advocacy, activism, and professional development.

A&S College Core 2015 **Course changes effective Spring 2024** - Description: *The role of the nurse leader is developed through integration of leadership, management, and organizational theories. Emphasis is on interprofessional care, planned change, advocacy, activism, and professional development.* Prerequisite: NURS 4695 and completion or concurrent enrollment in NURS 4895.

Prerequisite: NURS 4695 and completion or concurrent enrollment with NURS 4895.

NURS4895 - Professional Nursing Capstone Practicum

Credits: 9-12

Students utilize and synthesize basic concepts of professional nursing practice. The course socializes students into a healthcare system. Learning experiences allow students to gain confidence in managing patient care, practicing critical thinking, developing leadership and advocacy skills, and exploring ethical decision-making in clinical situations.

A&S College Core 2015 **Course changes effective Spring 2024** - Description: *Students synthesize concepts of professional nursing practice. The course socializes students into a healthcare system. Learning experiences allow students to manage patient care, apply critical judgment, develop leadership and explore ethical decision-making in healthcare settings.* Prerequisite:

NURS 4695 and completion or concurrent enrollment in NURS 4865 .

Prerequisite: NURS 4695 and completion or concurrent enrollment with NURS 4865.

With approval from FWWSO, ARMY 3050 may be applied to this requirement and NURS 4895 taken for 9 credits.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies.

This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY4470 - Fundamentals of Pharmacology

Credits: 4

Studies pharmaceutical agents used for treatment, diagnosis or prevention of disease with particular emphasis on mechanisms of action, therapeutic and adverse effects.

When Offered (Normally offered fall semester)

Former Course Number [3510]

Prerequisite: PHCY 3450.

Additional Requirements

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

1. Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
2. Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
3. Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
4. Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
5. Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.

6. Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
7. Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
8. Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
9. Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
10. Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
11. Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Basic BSN has two different admission entries: 1) Freshman Admission to the Nursing major and 2) Non-Freshman Admission to the Nursing major. Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Freshman Admission or Non-Freshman Admission under Admission to Basic BSN*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for Basic BSN. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Basic BSN Student Handbook - section 6 Scholastic Requirements*).

Curriculum

The minimum requirement to graduate with a BSN is 120 semester hours of credit. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450] and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability.

Nursing courses are offered fall and spring semesters of the university academic calendar. Students are required to have transportation to all clinical sites. A number of clinical sites are located in Cheyenne. The capstone practicum experience during spring of the senior year requires students to live in locations away from campus.

Program of Study

A detailed, semester sequenced Basic BSN Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, Basic BSN, Basic BSN Program of Study*). All required courses identified under Pre-Clinical Component and Clinical Component must be passed with a C or better (or S) except for CHEM 1000, which requires a B or better. .

Applicable for: Freshman/Non-Freshman Admission to the Nursing Major

Nursing, B.S.N., BRAND Option

"Bachelors Reach for Accelerated Nursing Degree": an accelerated Bachelor of Science (BSN) option for students with a previous non-nursing baccalaureate degree who desire to become a registered nurse. This option is a 'summer to summer' format with a full-time schedule of courses.

University Studies Program Requirements

The University Studies Program 2015

V - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Prerequisite Courses

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces

statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY4470 - Fundamentals of Pharmacology

Credits: 4

Studies pharmaceutical agents used for treatment, diagnosis or prevention of disease with particular emphasis on mechanisms of action, therapeutic and adverse effects.

When Offered (Normally offered fall semester)

Former Course Number [3510]

Prerequisite: PHCY 3450.

Nursing Courses

(Note: Course requirements/expectations are subject to change. Maintain contact with FWWSON for current expectations.)

NURS2340 - Developmental Influences on Health

Credits: 3

Explores interaction between development and health. Discusses human development of physiological, psychological, cognitive, sociocultural, and spiritual systems across the lifespan. Identifies selected theories associated with development over the lifespan and implications for healthcare.

Prerequisite: Completion or concurrent enrollment in NURS 3445 or NURS 3745, NURS 3665 or NURS 3730 and NURS 3790, and PHCY 3450.

NURS3730 - Introduction to Professional Nursing

Credits: 2

Introduces students to the core concepts of professional nursing practice. Nursing process, domains of nursing practice, health policy, evidence-based practice, legal and professional standards will be introduced.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3745, NURS 3790, and PHCY 3450.

NURS3745 - Nursing Fundamentals and Health Assessment

Credits: 4

Includes concepts of basic care/comfort, technical skills, medical equipment, asepsis, medication administration, nurse/client safety, and client rights. Students learn to assess and document normal variations and potential alterations of physiological, sociocultural, spiritual, and developmental dimensions of individuals across the lifespan.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3730, NURS 3790, and PHCY 3450.

NURS3790 - Health Promotion of Individuals, Families, and Populations

Credits: 3

Components of the nursing process and evidence-based nursing practice are used to protect the health of clients through health promotion, risk reduction, and disease prevention.

Prerequisite: Completion or concurrent enrollment in NURS 2340, NURS 3730, NURS 3745, and PHCY 3450.

NURS3770 - Nursing Care in Acute and Chronic Illness

Credits: 8

Discern critical elements of professional nursing medical-surgical concepts for adults experiencing acute/chronic health alterations progressing to complex health alterations. Focuses on patient safety principles; quality initiatives; evidence-based nursing; information technology; interprofessional collaboration, communication; health promotion strategies; and critical thinking in the planning of client centered nursing care for the adult.

Prerequisite: NURS 3745 and completion or concurrent in NURS 3771, NURS 3780, and NURS 4765

NURS3771 - Nursing Care in Acute and Chronic Illness Practicum

Credits: 6

Application of critical elements of professional nursing practice with adults experiencing acute and chronic health alterations. Focus is on incorporation of patient safety principles; quality initiatives; evidence-based nursing practice; information technology; interprofessional collaboration and communication; health promotion strategies; and critical thinking and clinical reasoning in the provision of nursing care.

A&S College Core 2015 **Course changes effective Fall 2022** - Name: *Nursing Care in Acute, Chronic, and Complex Illness Practicum*; Credits: 4 credits; Prerequisite: NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3780, and NURS 4765.

Prerequisite: NURS 3710, NURS 3750, NURS 3730, NURS 3780.

NURS3780 - Evidence-Based Practice in Nursing

Credits: 4

Prepares nursing students to engage in evidence-based practice in nursing, specifically how to search the literature and

databases, ask meaningful clinical questions, find relevant evidence, critically appraise evidence, integrate best evidence with clinical expertise and patient/community values.

A&S College Core 2015 **Course changes effective Fall 2022** - Credits: 3 credits; Prerequisite: STAT 2050 or STAT 2070 or equivalent; NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3771, and NURS 4765.

Prerequisite: admission to the BRAND program, concurrent enrollment in NURS 3770.

NURS4765 - Healthcare Informatics in Nursing

Credits: 3

Students will describe information and technology utilized to communicate, manage knowledge, support clinical decision-making, and effectively optimize patient outcomes while adhering to ethical and legal considerations of data management.

Prerequisite: NURS 3745 and completion or concurrent enrollment in NURS 3770, NURS 3771, and NURS 3780.

NURS4710 - Population Health

Credits: 4

Introduces the student to population-focused nursing and applied the nursing process to the community as client. Addresses core functions and essential services of public health. Focuses on vulnerable populations; epidemiology; community assessment, planning and implementation; analysis of the health care system; emergency preparedness; and legal aspects of public health.

A&S College Core 2015 **Course changes effective Spring 2023** - Name: *Nursing Care for Population Health*; Description: *Introduces the student to population-focused and public health nursing through the application of the nursing process with the community as client. Focuses on vulnerable populations; epidemiology; community assessment, and analysis of the healthcare system.* Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4735, NURS 4740, and NURS 4771.

Prerequisite: NURS 3770, NURS 3771; concurrent enrollment in NURS 4740, NURS 4741, NURS 4735, NURS 4736.

NURS4735 - Vulnerable Populations and Mental Health

Credits: 3

This course introduces students to nursing principles and concepts of mental health psychopathology, physiology, psychology, and spirituality, along with developmental and socio-cultural considerations while incorporating treatment modalities related to the nursing of the middle-aged and aging adult.

A&S College Core 2015 **Course changes effective Spring 2023** - Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4740, and NURS 4771.

Prerequisite: NURS 3770 and NURS 3780; concurrent enrollment in NURS 4736.

NURS4740 - Nursing Care of the Young Family

Credits: 6

Utilizes nursing process to assess, promote, and protect the health of young families as client. Focus is human sexuality and reproduction, family planning, pregnancy stages, neonatal, pediatrics. Growth and development, health promotion, disease prevention, family dynamics are included. Evidence-based nursing guides practice to promote a healthy family and family system.

A&S College Core 2015 **Course changes effective Spring 2023** - Description: *Utilizes nursing process to assess, promote, and protect the health of young families as client. Focus is human sexuality and reproduction, family planning, pregnancy stages, and pediatrics to promote a healthy family and family system. Credits: 4 credits; Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4735, and NURS 4771.*

Prerequisite: NURS 3770; NURS 3771, and concurrent enrollment in NURS 4741.

NURS4771 - Nursing Care of Young Families and Vulnerable Populations Practicum

Credits: 4

Applies and synthesizes clinical judgment related to nursing care of clients with a focus on the young family and vulnerable populations across the lifespan. Concepts address human sexuality, reproduction, mental health, and core functions of public health.

Prerequisite: NURS 3771 and completion or concurrent enrollment in NURS 4710, NURS 4735, and NURS 4740.

NURS4775 - Nursing Senior Capstone

Credits: 10

Provides opportunities to utilize and synthesize core concepts of professional nursing. Intensive clinical experience allowing students to become socialized into health care delivery system; gain in autonomy/confidence in performing skills; practice critical thinking and clinical reasoning in making ethical clinical decisions; develop leadership in providing and coordinating evidence-based nursing care.

A&S College Core 2015 **Course changes effective Summer 2023** - Description: *Provides opportunities to synthesize core concepts of professional nursing through intensive clinical experiences. Focuses on students' socialization into the healthcare system through application of clinical judgment in making safe and ethical decisions while coordinating evidence-based nursing care. Prerequisite: NURS 4771 and completion or concurrent enrollment in NURS 4785.*

Prerequisite: NURS 4710; NURS 4735; NURS 4736; and concurrent enrollment in NURS 4785.

NURS4785 - Nursing Integration

Credits: 2

Focuses on the continuing integration of previously learned concepts. The student further develops the role of consumer of research and incorporates leadership and management skills as a member of the profession.

A&S College Core 2015 **Course changes effective Summer 2023** - Name: *Integration of Leadership in Nursing;*

Description: *Focuses on the continuing integration of previously learned concepts of leadership, management, and professional development. The student further develops their role as a consumer of research and as a leader of an interprofessional healthcare team.* Prerequisite: NURS 4771 and completion or concurrent enrollment in NURS 4775.

Prerequisite: NURS 4735; NURS 4736; NURS 4710; and concurrent enrollment in NURS 4775.

Additional Requirements

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

1. Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
2. Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
3. Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
4. Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
5. Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
6. Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
7. Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
8. Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
9. Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
10. Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
11. Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Students who meet university requirements are admitted to the university in the pre-nursing component of BRAND (*declared PNBR major*). The number of students admitted to BRAND is limited, and admission is a competitive process. Applicants meeting minimum requirements are not guaranteed admission.

Criteria for admission to BRAND as well as application instructions and deadlines can be found on the nursing website, www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, Admission Criteria/Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for BRAND. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, BRAND Student Handbook - section 6, Scholastic Requirements*).

Curriculum

The minimum requirement for the second bachelor's (SB) degree candidate to graduate with a BSN is 50 semester hours of credit. This curriculum option totals 55 credit hours.

The minimum requirement for an SB degree is 30 additional semester hours earned from UW, 12 of which must be in upper division level courses. If prior baccalaureate degree was earned through UW, the 30 credit minimum is in addition to the credits earned for previous degree. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450] and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability. PHCY 3450 and PHCY 4470 must be completed within three years **before** the May start date.

Program of Study

A detailed, semester sequenced BRAND Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BRAND, BRAND Program of Study*). All required courses identified under Prerequisite Courses and Nursing Courses must be passed with a C or better (or S).

Nursing, B.S.N., BSN Completion - ReNEW Option

The BSN Completion - ReNEW (Revolutionizing Nursing Education in Wyoming) option is Wyoming's shared BSN nursing curriculum. Entry into the ReNEW option begins at a participating Wyoming community college ADN nursing program.

University Studies Program Requirements

The University Studies Program 2015

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Related Coursework

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.
Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.
OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021
When Offered Fall and Spring
Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.
OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.
Prerequisite: LIFE 1010.
OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.
When Offered Spring
Prerequisite: LIFE 1010.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY4470 - Fundamentals of Pharmacology

Credits: 4

Studies pharmaceutical agents used for treatment, diagnosis or prevention of disease with particular emphasis on mechanisms of action, therapeutic and adverse effects.

When Offered (Normally offered fall semester)

Former Course Number [3510]

Prerequisite: PHCY 3450.

- Humanities Elective course Credits: 3 (*not PSYC 1000*)

Nursing Courses

NURS3005 - ReNEW Distance Foundations

Credits: 1

Prepares learners for ReNEW BSN Completion in a distance delivery format. The course includes concept-based delivery in the UW learning system, APA formatting, writing scholarly papers, and library resources and skills.

Prerequisite: Enrolled in or graduate of Wyoming ReNEW Nursing Program.

NURS4055 - Application of Evidence in Nursing Practice

Credits: 3

Prepares RN students to engage in evidence-based nursing, specifically how to ask meaningful clinical questions, find relevant evidence, critically appraise evidence, and integrate best evidence with clinical expertise and patient/community values.

USP 2003-2014 Code U3L

USP 2015 Code U5C3

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; STAT 2050 or STAT 2070 or equivalent; COM1 and COM2.

NURS4630 - Public/Community Health

Credits: 2

Learners examine public/community health nursing roles and apply the nursing process to community as client. Focuses on improving community health, levels of prevention, and addresses multiple determinants of health. Core functions, essential services, community assessment and planning, emergency preparedness, and analysis of the public healthcare system will be studied.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4635 - Community as Client

Credits: 2

Learners will understand relationships among health, disease, and the environment, with emphasis on the role of community health agencies and programs for communities in need of health care support, regionally, nationally, and globally. In this course, an assessment and planning framework guides students in assessing the health of a community.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4640 - Health Equity

Credits: 2

Learners will examine population-focused concepts to assess vulnerable and oppressed populations. The magnitude of health disparities both in the United States and globally will be discussed. Focuses on a multi-level and multi-cultural view of population health challenges, alleviating health disparities, and a commitment to health equity.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4645 - Population Health

Credits: 2

Focuses on analysis of local, regional, national, and international data that are indicators of population health. Disease outbreaks are analyzed. Learners study development of innovative, collaborative, multi-disciplinary interventions and policies to improve public health. This course provides opportunities for learners to improve population health through application of theory and evidence.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4660 - Healthcare Informatics

Credits: 3

Students will develop knowledge and skills to utilize and evaluate information technologies to improve patient outcomes across diverse populations. Includes the use of Clinical Information Systems to plan and document the nursing process. Ethical and legal considerations of data management and interdisciplinary use of healthcare informatics are presented.

Prerequisite: ReNEW Progression or Current RN license.

NURS4830 - Leadership in Healthcare Today

Credits: 2

Focuses on the role of nurse leader and manager through integration of leadership, management, and organizational concepts, models, and theories. Emphasis in on leadership, followership, management, advocacy, professional development and activism, and managing resources.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4835 - Leading Nursing Practice

Credits: 2

Focuses on nurse leaders making a difference using evidence-based nursing practice. Learners utilize and synthesize basic concepts of professional nursing practice. This course creates the opportunity for learners to lead nursing practice in a variety of settings.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4840 - Healthcare Systems and Policy

Credits: 2

Learners examine healthcare quality and the regulation of professional nursing practice in various settings. The focus is on ethical and legal issues and policy development for healthcare delivery.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4845 - Innovation in Nursing Practice

Credits: 2

Focus in on use and synthesis of concepts in professional nursing practice. This course provides an opportunity to employ critical thinking, to apply ethical decision-making, to use evidence, and to demonstrate the ability to lead planned change.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4855 - Contemporary Nursing Practice

Credits: 2

Focus in on practice as critically effective members and leaders of the healthcare team. Learners analyze a variety of societal, economic, political, and professional issues that influence contemporary nursing. This course provides an opportunity to be creative in examining trends in nursing and healthcare.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

Additional Requirements

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

1. Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
2. Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
3. Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
4. Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
5. Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
6. Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
7. Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
8. Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
9. Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
10. Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.
11. Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Students who apply to UW and meet university requirements are admitted to the university in the pre-nursing component of ReNEW BSN (*declared PNRN*). Criteria for UW admission can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for BSN Completion. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW or RN-BSN, BSN Completion Student Handbook - section 6, Scholastic Requirements*).

Curriculum

The minimum UW requirement to graduate with a BSN in 120 semester hours of credit. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450], and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability.

Program of Study

A detailed Program of Study for ReNEW ADN Entry can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW, Program of Study for ReNEW ADN Entry*). All required courses identified under Related Coursework and Nursing Courses must be passed with a C or better (or S).

Nursing, B.S.N., BSN Completion - RN-BSN Option

The BSN Completion - RN-BSN option is for non-ReNEW associate degree or diploma-educated registered nurses. This option is delivered nationwide with no on-campus time required.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Related Coursework

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB
USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences.

Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

OR

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

MICR2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implications for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MOLB 2021.

Former Course Number [MICR 2210]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent.

OR

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

OR

MICR2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors, introduces students to microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance; also covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MOLB 2240.

Prerequisite: LIFE 1010.

OR

MOLB2240 - Medical Microbiology

Credits: 4

Designed primarily for nursing and pre-pharmacy majors. Introduces microbiology, including the diversity of prokaryotic and eukaryotic microbes, their structural and physiological properties, and their applied medical significance. Covers the basic principles of the immune system and emphasizes the communicable diseases of man caused by microbial pathogens.

Cross Listed MICR 2240.

When Offered Spring

Prerequisite: LIFE 1010.

PHCY3450 - Foundational Pathophysiology

Credits: 4

Foundational principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for pre-nursing students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 6120 for interprofessional education revolving around student-led case study presentations.

When Offered (Normally offered spring semester)

Former Course Number [4450]

Prerequisite: LIFE 1010, CHEM 1000 or equivalent, and ZOO 3115.

PHCY4470 - Fundamentals of Pharmacology

Credits: 4

Studies pharmaceutical agents used for treatment, diagnosis or prevention of disease with particular emphasis on mechanisms of action, therapeutic and adverse effects.

When Offered (Normally offered fall semester)

Former Course Number [3510]

Prerequisite: PHCY 3450.

- An approved Human Anatomy course Credits: 4
- An approved Human Physiology course Credits: 4

Nursing Courses

NURS3425 - Bridging Nursing Paradigms

Credits: 3

This course prepares incoming ADN- or Diploma-educated Registered Nurses for completion of the Fay W. Whitney School of Nursing (FWWSON) BSN degree. Nursing knowledge, skills, and abilities in selected content areas will be evaluated and augmented in preparation for BSN Completion coursework.

Prerequisite: Current RN license.

NURS4055 - Application of Evidence in Nursing Practice

Credits: 3

Prepares RN students to engage in evidence-based nursing, specifically how to ask meaningful clinical questions, find relevant evidence, critically appraise evidence, and integrate best evidence with clinical expertise and patient/community values.

USP 2003-2014 Code U3L

USP 2015 Code U5C3

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; STAT 2050 or STAT 2070 or equivalent; COM1 and COM2.

NURS4630 - Public/Community Health

Credits: 2

Learners examine public/community health nursing roles and apply the nursing process to community as client. Focuses on improving community health, levels of prevention, and addresses multiple determinants of health. Core functions, essential services, community assessment and planning, emergency preparedness, and analysis of the public healthcare system will be studied.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4635 - Community as Client

Credits: 2

Learners will understand relationships among health, disease, and the environment, with emphasis on the role of community health agencies and programs for communities in need of health care support, regionally, nationally, and globally. In this course, an assessment and planning framework guides students in assessing the health of a community.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4640 - Health Equity

Credits: 2

Learners will examine population-focused concepts to assess vulnerable and oppressed populations. The magnitude of health disparities both in the United States and globally will be discussed. Focuses on a multi-level and multi-cultural view of population health challenges, alleviating health disparities, and a commitment to health equity.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4645 - Population Health

Credits: 2

Focuses on analysis of local, regional, national, and international data that are indicators of population health. Disease outbreaks are analyzed. Learners study development of innovative, collaborative, multi-disciplinary interventions and policies to improve public health. This course provides opportunities for learners to improve population health through application of theory and evidence.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4660 - Healthcare Informatics

Credits: 3

Students will develop knowledge and skills to utilize and evaluate information technologies to improve patient outcomes across diverse populations. Includes the use of Clinical Information Systems to plan and document the nursing process. Ethical and legal considerations of data management and interdisciplinary use of healthcare informatics are presented.

Prerequisite: ReNEW Progression or Current RN license.

NURS4830 - Leadership in Healthcare Today

Credits: 2

Focuses on the role of nurse leader and manager through integration of leadership, management, and organizational concepts, models, and theories. Emphasis in on leadership, followership, management, advocacy, professional development and activism, and managing resources.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4835 - Leading Nursing Practice

Credits: 2

Focuses on nurse leaders making a difference using evidence-based nursing practice. Learners utilize and synthesize basic concepts of professional nursing practice. This course creates the opportunity for learners to lead nursing practice in a variety of settings.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4840 - Healthcare Systems and Policy

Credits: 2

Learners examine healthcare quality and the regulation of professional nursing practice in various settings. The focus is on ethical and legal issues and policy development for healthcare delivery.

Prerequisite: ReNEW Progression or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4845 - Innovation in Nursing Practice

Credits: 2

Focus in on use and synthesis of concepts in professional nursing practice. This course provides an opportunity to employ critical thinking, to apply ethical decision-making, to use evidence, and to demonstrate the ability to lead planned change.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

NURS4855 - Contemporary Nursing Practice

Credits: 2

Focus in on practice as critically effective members and leaders of the healthcare team. Learners analyze a variety of societal, economic, political, and professional issues that influence contemporary nursing. This course provides an opportunity to be creative in examining trends in nursing and healthcare.

Prerequisite: ReNEW ADN Benchmark or Formal RN-BSN Admission; NURS 3005 or NURS 3425.

Escrow Courses

(Credits are automatically posted to the student's UW transcript during the semester of NURS 4855 enrollment. These credits represent credit for nursing content learned in the associate degree or diploma in nursing program.)

(Note: Course requirements/expectations are subject to change. Maintain contact with FWWSO for current expectations.)

NURS3665 - Foundations of Professional Nursing Roles

Credits: 3

This course introduces the student to professionalism, leadership, safety, and patient-centeredness. The concepts emphasized provide the foundation for professional nursing practice.

Prerequisite: **Fall 2021:** NURS 3490, PHCY 4470, and completion or concurrent enrollment in NURS 3635, NURS 3690, and NURS 3695. **Effective Spring 2022:** Completion or concurrent enrollment in NURS 2340, NURS 3445, and PHCY 3450.

NURS3890 - Professional Nursing Care in Complex Illness

Credits: 3

Students will examine concepts of nursing practice in the care of adults with complex illness. Emphasis is on utilizing the nursing process to develop clinical judgment.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3891, NURS 3892, and NURS 3895.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3891, 3892, 3895, 4125.

NURS3895 - Professional Nursing Care in Complex Illness Practicum

Credits: 4

Students provide patient-centered care using the nursing process in clinical setting with adult and older adult clients experiencing complex illness and alterations in mental health. Emphasis is on demonstration of clinical judgment.

A&S College Core 2015 **Course changes effective Spring 2023 - Prerequisite:** *NURS 3695 and completion or concurrent enrollment in NURS 3890, NURS 3891, and NURS 3892.*

Prerequisite: NURS 3695 and completion or concurrent enrollment with NURS 3890, NURS 3892, NURS 3891, NURS 3892, NURS 4125.

Additional Requirements

Expected Student Learning Outcomes

At completion of the Bachelor of Science in Nursing (BSN) degree, graduates will be able to meet the end of program student learning outcomes:

1. Minimize risk of harm to patients and providers through both system effectiveness and individual performance.
2. Advance nursing practice related to patient care technologies, information systems, and communication devices that support safe nursing practice.
3. Achieve optimal individual, family, group, community, and population outcomes guided by clinical reasoning and appraisal of evidence of best practice.
4. Demonstrate effective leadership through heightened self-awareness to empower others in the attainment of optimal patient outcomes.
5. Use mutually respectful communication, collaboration, and leadership skills within interprofessional teams in the management of care in diverse, complex, global, and dynamic healthcare systems.
6. Participate as a nursing professional in the development and implementation of healthcare policy, finance, and regulatory entities, including local, state, national, and global healthcare trends.
7. Provide patient-centered care by reflecting on the uniqueness of an individual patient's background, personal preferences, culture, values, traditions, and family, which promotes optimal health outcomes by involving patients and families as they make clinical care decisions.
8. Demonstrate respectful, efficient, safe, and well-coordinated transitions of the patient through all levels of care.
9. Provide respectful, efficient, safe and well-coordinated patient-centered care to populations by reflecting on beliefs, values, attitudes, and practices.
10. Model professionalism with consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and populations by wisely applying principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.

11. Encourage evidence-based health promotion and make a positive contribution to immediate and long-term health status, through the provision of education to individuals, families, groups, communities, and populations that encourages healthy behaviors and choices, prevention of disease, protection from preventable illness and disastrous emergencies.

Admission

Students who apply to UW and meet university requirements are admitted to the university in the pre-nursing component of RN-BSN (*declared PNBS*). Criteria for admission as well as application instructions can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, RN-BSN, Admission Criteria/ Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for BSN Completion. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, Wyoming's ReNEW or RN-BSN, BSN Completion Student Handbook - section 6, Scholastic Requirements*).

Curriculum

The minimum UW requirement to graduate with a BSN is 120 semester hours of credit. Evaluation of transfer courses is required to determine credit eligibility.

The required courses, PHCY3450 - Foundational Pathophysiology [4450], and PHCY4470 - Fundamentals of Pharmacology, must be upper division (3000/4000 level). Lower division/Community College (1000/2000 level) courses do not satisfy this requirement. Transfer courses must be reviewed for acceptability.

Program of Study

A detailed Program of Study for RN-BSN Entry can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, BSN, BSN Completion, RN-BSN, Program of Study for RN-BSN Entry*). All required courses identified under Related Coursework and Nursing Courses must be passed with a C or better (or S).

Physical Education Teacher Education K-12, B.S.

The Physical Education program is a nationally accredited program where students learn the content and teaching methods required to be certified to teach physical education K-12 in the public schools of Wyoming.

USP - University Studies Program Requirements

The following University Studies Program requirements are required to graduate. Many of these requirements are covered by the Physical Education Teacher Education K-12 major. All USP courses except the Communications II (USP-C2) and Communications III (USP-C3) courses must be completed prior to admission into the Physical Education Teacher Education Program.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Prerequisites for Admission

Prerequisites for admission into the Physical Education Teacher Education program:

PSYC1000 - General Psychology

Credits: 3
Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

MATH1400 - College Algebra

Credits: 3
Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

OR MATH 1405 Trigonometry

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.
OR CHEM 1020 - General Chemistry

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

HLED1006 - Personal Health

Credits: 3

Introduces multiple concepts of personal health (e. g. , physical activity, diet, stress, social pressure, public health, human behavior, disease prevention, healthcare access, and health-oriented citizenship) in relation to improving individual health and understanding the health of a society and cultural differences in human health and health behavior.

USP 2015 Code U5H

KIN2000 - Movement Core I: Striking/Fielding and Invasion Games

Credits: 2

Exposes students to skill and tactical themes comprising striking/fielding and invasion games. Course aims for students' ability to understand, demonstrate and analyze the different offensive and defensive tactics that facilitate game play success in invasion (soccer, tag rugby, basketball) and striking/fielding (softball, cricket) games.

Former Course Number [PEPR 2000]

Prerequisite: sophomore standing.

KIN2001 - Movement Core II: Net and Target Games

Credits: 2

Exposes students to skill and tactical themes comprising net and target games. Course aims for students' ability to understand, demonstrate and analyze different offensive and defensive tactics facilitating game play success in net (volleyball, tennis, badminton) and target (archery) games.

Former Course Number [KIN 1025, PEPR 1025]

Prerequisite: sophomore standing.

KIN2003 - Move Core IV: Adv. & Otdr. Ed.

Credits: 2

Max Credit 2

Movement Core IV: Adventure and Outdoor Education - To provide prospective pre-service physical education teachers (PTs) with the skills and knowledge necessary to teach adventure and outdoor education curricula to K-12 learners.

Former Course Number [KIN 1000, PEPR 1000]**Restricted** Sophomore standing

Prerequisite: sophomore standing.

KIN2004 - Move Core V: FMS & Ind. Act.

Credits: 3

Max Credit 3

Movement Core V: Fundamental Movement Skills, Gymnastics, Dance, and Swimming - To provide prospective pre-service physical education teachers (PTs) with the skills and knowledge necessary to teach fundamental motor skills, gymnastics, dance, and swimming to K-12 learners.

USP 2003-2014 Code U3CA

Former Course Number [KIN 3025, PEPR 3025]**Restricted** Sophomore standing

KIN2005 - Movement Core VI: Physical Fitness and Physical Activity

Credits: 2

Designed for prospective school-based physical and health education teachers K-12. Focuses on five primary content areas: what is fitness education and why do we need it; development of content-based fitness curriculum; teaching cognitive aspects of fitness education; teaching physical aspects of fitness education; and promoting fitness education.

Former Course Number [KIN 2025, PEPR 2025]

Prerequisite: sophomore standing.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.
OR PHYS 1110 General Physics I

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.
OR STAT 2070 Introductory Statistics for the Social Sciences

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

EDSE3540 - Teaching Reading and Study Strategies in the Content Areas

Credits: 2-4

Provides students majoring in secondary education programs with a knowledge of reading factors as they relate to various disciplines. Content includes estimating students' reading ability, techniques for vocabulary development, questioning strategies, and developing reading related study skills.

Former Course Number [EDCI 3540]

Prerequisite: junior standing and minimum 12 hours in discipline area.

Required Courses After Admission

Required courses after admission into the professional program.

Consult with your academic advisor for the order in which these courses must be taken, or if you have any questions.

KIN3011 - Teaching Methods in Physical Education K-12

Credits: 3

Develops knowledge, skills and understandings appropriate to successful participation in a class setting when functioning in the teaching role.

Former Course Number [PEPR 3011]

Prerequisite: grade of C or better in KIN 3012; concurrent enrollment in KIN 3015 and KIN 4080.

KIN3012 - Teaching Laboratory I

Credits: 3

Provides the opportunity to develop skills and acquire knowledge needed to teach physical education. Allows the opportunity for students to evaluate the motor status and progress of a preschool aged child, as well as plan and implement a developmentally appropriate motor program.

When Offered (Offered fall semester)

USP 2015 Code U5C2

Former Course Number [PEPR 3012]

Prerequisite: Admitted to PHET program.

KIN3015 - Teaching Laboratory II

Credits: 3

Provides pre-service physical education teacher with skills, knowledge and principles of teaching through application of peer teaching and small group elementary school teaching. Emphasizes and practices program development, lesson planning and development of a physical education teaching unit.

When Offered (Offered spring semester)

USP 2003-2014 Code U3WC

Former Course Number [PEPR 3015]

Prerequisite: grade of C or better in KIN 3012; concurrent enrollment in KIN 3011, KIN 4080.

KIN3021 - Physiology of Exercise

Credits: 3

Applies physiological principles to human physical activities. Emphasizes interaction of neuromuscular, circulatory, and respiratory mechanisms as affecting, and affected by, immediate exercise situations and physical training. Students who are not K&H or PHET majors may be allowed to register with permission of the instructor.

Former Course Number [PEPR 3021]

Prerequisite: 2.750 GPA. For Kinesiology & Health majors: grade of C or better in MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115. Or declared PHET major with the following courses completed: MATH 1400/MATH 1405/MATH 1450, KIN 2040, KIN 2041, and ZOO 3115.

KIN3022 - Lab Exp in Exercise Physiology

Credits: 1

An in-depth examination of the measurement of physiological principles and mechanisms related to human movement. Lab exercises emphasize skills necessary for basic morphological through advanced exercise performance testing variables. Laboratory writing exercises focus on improving students' ability to read and comprehend scientific articles and produce scientific writing based on their own experiments and data.

Prerequisite: KIN 3021 or concurrent enrollment.

KIN3034 - Lifespan Motor Development

Credits: 3

Studies lifespan motor development. Emphasizes developmental periods of infancy through adolescence. Gives attention to observation and analysis of motor behavior and movement performance of individuals across lifespan.

Former Course Number [PEPR 3034]

Prerequisite: grade of C or better in PSYC 1000; junior standing; 2.750 GPA.

KIN3037 - Sport Psychology

Credits: 3

Studies psychological theories and techniques applied to sport to enhance the performance and personal growth of athletes and coaches. Emphasizes the influence of personality, anxiety, motivation, social factors, and psychological skills training.

Former Course Number [PEPR 3037]

Prerequisite: Admitted to the last two years of one of the programs in DK&H.
OR KIN 3038 Exercise Psychology

KIN3042 - Biomechanics of Human Movement

Credits: 3

Introduces fundamental principles of human movement. Includes study and elementary analysis of human motion based on anatomical and mechanical principles.

Former Course Number [PEPR 3042]

Prerequisite: grade of C or better in PHYS 1050 or PHYS 1110 or PHYS 1210 or PHYS 1310; completion of KIN 2040; and minimum 2.750 GPA.

KIN3050 - Prevention and Care of Athletic Injuries

Credits: 2

Encompasses theory and practical work in the field of athletic training. Strongly emphasizes prevention and care of

athletic injuries, including wrapping and taping techniques.

Former Course Number [PEPR 3050]

Prerequisite: junior standing; C or better in KIN 2040; minimum 2.750 GPA.

KIN3060 - Understanding Skill Acquisition for Teaching

Credits: 3

Addresses practical questions specific to teaching physical activity

Prerequisite: C or better in PSYC 1000; junior standing; declared major in KHP or PHET; 2.750 GPA; or permission of instructor.

KIN4012 - Curriculum Development in Physical Education

Credits: 3

Focuses on the design of K-12 school physical education programs. It provides opportunities to study alternative curriculum models, engage in the process of curriculum design, and examine policy and theoretical issues of concern to curriculum designers.

When Offered (Offered fall semester)

Former Course Number [PEPR 4012]

Prerequisite: grade of C or better in KIN 3011, KIN 3015 and KIN 4080.

KIN4013 - School Administration for the Health Sciences

Credits: 2

Provides teaching majors with information about staff-administrator relationships in school settings. Topics include principles of leadership, school organization and culture, legal issues, financial issues, building and facilities management.

Prerequisite: grade of C or better in KIN 3011, KIN 3015, KIN 4080.

KIN4017 - Teaching Laboratory III

Credits: 3

Focuses on the application of teaching skills and the effective utilization of sport-based curricular and instructional models in the secondary public school setting.

When Offered (Offered fall semester)

Former Course Number [PEPR 4017]

Prerequisite: grade of C or better in KIN 3011, KIN 3015, and KIN 4080; 2.750 minimum cumulative GPA; concurrent enrollment in KIN 4012.

KIN4055 - Adapted Physical Education

Credits: 2

Presents skills necessary to plan, implement and evaluate individualized physical education programs in the least restrictive environment. Acquaints students with current laws, characteristics, assessment instruments and nationally validated programs in physical education for the disabled child.

When Offered (Offered spring semester)

Former Course Number [PEPR 4055]

Prerequisite: KIN 3012.

KIN4080 - Assessment in Physical Education

Credits: 3

Provides prospective teachers with a thorough knowledge of learner assessment as applied to physical education K-12.

When Offered (Offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Former Course Number [PEPR 4080]

Prerequisite: grade of C or better in KIN 3012.

KIN4099 - Student Teaching in Physical Education

Credits: 1-16

Student teaching is the culminating experience required of all students in teacher education for graduation and recommendation for certification. Consists of full-time assignment of 16 weeks in an approved school station in Wyoming under supervision of an experienced, approved supervising teacher.

Former Course Number [PEPR 4099]

Prerequisite: grade of C or better in KIN 4017.

Note(s):

*** Note: Students must be certified in first aid and CPR prior to enrollment in KIN 4099.

Additional Requirements

Students must complete 48 credit hours of upper-division coursework (3000- or 4000-level courses) to meet the Division's requirement for the B.S. in Physical Education Teacher Education. For any elective coursework, it is recommended that these courses are selected from the Affiliated Options on this page.

In order to advance into the professional program, students must be admitted through a competitive application process. The entry course for admission to the Physical Education Teacher Education (PHET) program is KIN 3012, Teaching Lab 1. To be eligible for the PHET professional program, students must have completed all program course prerequisites and have a minimum cumulative grade point average of 2.750, preferred GPA of 3.000.

NOTE: Students should complete CPR certification and the certification should remain current throughout the program. Cards can be presented to the division registrar in Corbett 119 to be cleared of the requirement on the degree evaluation.

Affiliated Options

The Division of Kinesiology and Health offers two options for the general undergraduate population. They require course work beyond degree requirements.

Athletic Coaching Endorsement/Permit

Students who wish to qualify for an athletic coaching permit to coach in Wyoming public schools must complete four courses. Note: Endorsements are for current teachers. Permits are for those who are not a licensed educator.

- CPR Certification

KIN3050 - Prevention and Care of Athletic Injuries

Credits: 2

Encompasses theory and practical work in the field of athletic training. Strongly emphasizes prevention and care of athletic injuries, including wrapping and taping techniques.

Former Course Number [PEPR 3050]

Prerequisite: junior standing; C or better in KIN 2040; minimum 2.750 GPA.

- Foundations of Coaching KIN 4090 /KIN 5090 - 3 Credit Hours
- Students completing the Physical Education Teacher Education undergraduate degree are exempt from the KIN 4090/5090 requirement.
- Coaching in... Experience (completed at a community college or complete a coaching experience in a specific sport for one season or more with a letter written by your supervising coach to submit with your PTSB endorsement application form).

School Health Education K-12

In addition to completing a bachelor's degree in teaching at the secondary level from an approved university program, 25 credit hours are required to be endorsed to teach health education K-12 in the public schools of Wyoming.

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

HLED1006 - Personal Health

Credits: 3

Introduces multiple concepts of personal health (e. g. , physical activity, diet, stress, social pressure, public health, human behavior, disease prevention, healthcare access, and health-oriented citizenship) in relation to improving individual health and understanding the health of a society and cultural differences in human health and health behavior.

USP 2015 Code U5H

- CPR Certification

HLED4120 - Assessment in Health

Credits: 3

Provide students with an understanding of components of a balanced assessment system in school health education. Students review the basics of standards-based health education and explore innovations in assessment that provide teachers and students with a more complete and authentic picture of student learning.

Prerequisite: Minimum 2.500 GPA; concurrent enrollment in KIN 4099 or certified K-12 teacher.

HLED4025 - Teaching Sensitive Issues In Human Sexuality

Credits: 3

Prepares educators and other helping professionals whose work involves promoting healthy sexuality in children, young people, and adults. It also provides detailed investigation into important aspects of teaching sensitive issues related to human sexuality. Students practice, critique, develop, and evaluate sexuality education processes and resources.

Dual Listed HLED 5025.

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

HLED4110 - Teaching Health in Schools K-12

Credits: 3

Presented appropriate knowledge and skills to become health literate. Explore ways to teach health skills and knowledge and use assessment strategies for health education.

When Offered (Offered fall semester)

Prerequisite: Grade C or better in KIN 3015 or certified K-12 teacher.

HLED4130 - Management of Coordinated School Health Programs

Credits: 3

Reviews the coordinated school health program (CSHP) model and identifies research that supports the eight components of the model. Prepares students to advocate for CSHP and to develop the school infrastructure necessary to carry out such a program. Also prepares individuals to work with school from job settings outside the school.

Dual Listed HLED 5130.

When Offered (Offered fall semester)

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

HLED4030 - Teaching About Alcohol and Substance Abuse

Credits: 3

Introduces students to the issues of societal and personal attitudes towards alcohol and substance use, misuse and abuse. Prepares an educator to teach about alcohol and substance abuse in the classroom and out of the school setting.

Prerequisite: Sophomore standing; minimum 2.750 GPA; or permission of instructor.

Adapted Physical Education K-12 Endorsement

In addition to completing the Bachelor of Science degree in physical education teacher education from the University of Wyoming, students can qualify for K-12 endorsements in adapted physical education and/or health education by completing the following course requirements:

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

KIN4055 - Adapted Physical Education

Credits: 2

Presents skills necessary to plan, implement and evaluate individualized physical education programs in the least restrictive environment. Acquaints students with current laws, characteristics, assessment instruments and nationally validated programs in physical education for the disabled child.

When Offered (Offered spring semester)

Former Course Number [PEPR 4055]

Prerequisite: KIN 3012.

KIN4065 - Resources in Adapted Physical Education

Credits: 2-3

Max Credit (Max. 3)

Offers flexible credit for students interested in pursuing intensive study of resources for adapted physical education. Required for state endorsement in Adapted Physical Education.

Former Course Number [PEPR 4065]

Prerequisite: grade of C or better in KIN 4055.

KIN4075 - Assessment in Adapted Physical Education

Credits: 3

Designed to provide an overview of the assessment process in adapted physical education. Developmentally and disability appropriate psychomotor assessments and procedures for administering them are examined.

Prerequisite: grade of C or better in KIN 4055 and KIN 4080.

Social Work, B.S.W.

Want to make a difference in the world? Turn your passion into action. Our BSW program combines classroom and field experience to provide you with knowledge and skills to help improve the quality of life of individual clients and impact communities.

USP - University Studies Program Requirements

The following University Studies Program requirements are required to graduate and are not covered by the Social Work major.

First Year Seminar (3 credits)

Communications I (3 credits)

ENGL 1010 College Composition and Rhetoric

Communications II (3 credits)

Quantitative Reasoning (3 credits)

MATH 1000 Problem Solving

Physical and Natural World (minimum 6 credits)

LIFE 1003 Current Issues in Biology (4 credits) strongly recommended (LIFE 1010 General Biology also acceptable)

Any other USP Physical & Natural World course (3-4 credits)

Prerequisites for Admission

Prerequisites for admission into the BSW program includes a C or higher in the following courses:

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

POLS1000 - American and Wyoming Government

Credits: 3

Introduction to the Constitutions and governmental processes of the U. S. and Wyoming.

When Offered (Offered each semester)

USP 2003-2014 Code U3V

USP 2015 Code U5V

SOWK2000 - Introduction to Social Work

Credits: 3

Introduces social work and social welfare through an overview of the history, philosophy, ethics, values, methods, and fields of practice to generalist social work.

Former Course Number [3000]

Prerequisite: Sophomore standing or higher and completion of USP-C2 with a grade of C or higher.

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

- Human Biology. Credits: 3. (PSYC 2080: Biological Psychology or KIN 2040: Human Anatomy)*
*This requires a prerequisite general biology course, usually LIFE 1003: Current Issues in Biology.

Required courses after admission into the Social Work program

NOTE: Once admitted, social work students must achieve a C or better in all social work courses and maintain a 2.500 or above UW and SOWK GPA every semester after admittance to Admitted Major. Please view full requirements and expectations for admitted majors on the Division of Social Work catalog page.

SOWK3530 - Human Behavior and the Social Environment I

Credits: 3

Covers theories and knowledge of human bio-psycho-social-spiritual development and social interactions within a systems framework. Introduces theories of individuals and families and their development. Paradigms of culture, marginalization and oppression are examined.

USP 2003-2014 Code U3CS

Prerequisite: admitted social work major status.

SOWK3630 - Generalist Social Work Practice I, Individual and Families

Credits: 3

Introduces generalist social work practice at all systems' levels, with focus on individuals and families. It covers the nature of social work practice, theoretical perspectives, ethics and values, engagement, assessment, intervention and evaluation processes and skills.

Prerequisite: admitted social work major status.

SOWK3645 - Ethical Social Work Practice

Credits: 3

Focuses on the ethical principles that undergird the practice of social work, addresses how to practice ethically, and explores the process of ethical decision-making. Social work practice with various client systems will be considered, as well as practice in varied settings.

SOWK4060 - Diversity and Difference in Social Work Practice

Credits: 3

Practice class examines social works' roles and issues related to human diversity. Social work values and ethics and social and economic justice are explored throughout.

USP 2003-2014 Code U3D

Prerequisite: admitted social work major status.

SOWK3540 - Human Behavior and Social Environment II

Credits: 3

Covers theories and knowledge of human bio-psycho-social-spiritual development and social interactions within a systems framework, with a focus on groups, communities, organizations and institutions.

USP 2003-2014 Code U3CS

Prerequisite: SOWK 3530 with a C or better and admitted social work major status.

SOWK3640 - Generalist Social Work Practice II, Groups

Credits: 3

Focuses on group work within the generalist social work perspective, covering theoretical perspectives, ethics and values, and problem-solving skills applied to task and treatment groups.

Prerequisite: SOWK 3630 and SOWK 3530 with a C or better and admitted major status.

SOWK3650 - Generalist Social Work Practice III; Communities and Organizations

Credits: 3

Teaches engagement, assessment, intervention and evaluation with organizations, communities and institutions within the generalist social work perspective.

Prerequisite: SOWK 3630 with a C or better; SOWK 3540 pre or concurrent; admitted social work major status.

SOWK4850 - Human Rights, Social Justice and Social Policy

Credits: 3

Examines human rights, social welfare policy, and social, political and economic justice, as well as systems that oppress and create injustice, both in the US and internationally. A focus of the course will be the analysis of social welfare policy as it affects social justice issues.

Restricted Include: BSW-SOWK major, Exclude: Freshman & Sophomore class standings

Prerequisite: SOWK 4060 and admitted social work major status

SOWK4560 - Social Work Research

Credits: 3

Max Credit 3

Introduces social work research and practice evaluation. Prepares students to use research in practice.

Restricted Include: SOWK students (= admitted majors), Exclude: Freshman & Sophomore class standing

Prerequisite: Admitted social work major status.

SOWK4990 - Social Work Practicum

Credits: 5-10

Max Credit (Max. 10)

Represents the culmination of preparation for entry level generalist social work practice. Supervised practice in the knowledge, values and skills learned in the classroom.

Prerequisite: SOWK 3640, SOWK 3650 and application to the field program.

SOWK4991 - BSW Field Seminar I

Credits: 2

Develops and supports student integration of classroom and field practicum experiences in a final demonstration of competencies for the beginning practitioner. This course is taken in Fall, concurrent with SOWK 4990, Field Practicum.

Prerequisite: concurrent enrollment in SOWK 4990.

SOWK4570 - Research-Informed Practice

Credits: 3

Learn about and engage in methods of research applicable to their social work practice. Competence in methods such as single system design and program evaluation will be assessed in this course.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: SOWK 4560 with a C or better and admitted social work major status.

SOWK4992 - BSW Field Seminar II

Credits: 2

Develops and supports student integration of classroom and field practicum experiences in a final demonstration of competencies for the beginning practitioner.

Prerequisite: taken concurrently with SOWK 4990, Field Practicum.

- Social Work electives Credits: 6 (selected with advisor consultation)

Electives

General Electives (28-29 credits)

Degree must include 120 credits total, at least 42 of which must be upper-division credits. Total number of general elective credit needed may vary per student. Consult with your academic advisor to determine the best electives for your particular interests or needs. It may be worthwhile to add a minor to your degree.

Suggested lower-division electives:

Below are suggested lower-division electives that can be taken before admission into the BSW program. Consult with your academic advisor to determine the best electives for your particular interests or needs. It may be worthwhile to add a minor to your degree.

- SPAN1010 - First Year Spanish I Credits: 4
- SPAN1020 - First Year Spanish II Credits: 4
- RELI1000 - Introduction to Religion Credits: 3
- WIND2100 - Introduction to Disability Studies Credits: 3
- SOC2350 - Race and Ethnic Relations Credits: 3

Suggested upper-division electives:

- FCSC 3110 Personal Finance Credits: 3
- FCSC 4112 Family Decision-Making and Resource Management Credits: 3

Additional Requirements

Social work is a professional degree program. Prior to admission to the professional degree program, students who are working to complete program prerequisites and most University Studies courses are "Social Work-Pre-Admit" majors. Students must be accepted into the BSW program as an admitted "Social Work" major in order to proceed in the program and enroll in professional degree courses beginning in the fall semester (usually of the junior year).

Acceptance to Admitted Major (professional degree program) is competitive and requires an application. See the Division of Social Work catalog page for full admission requirements.

The program requires 120 credit hours to graduate. Students must have completed all social work requirements, 42 upper-division hours, maintain a 2.500 GPA overall, a 2.500 GPA in social work coursework, and have achieved a grade of C or better in all social work courses. Courses must be taken for a letter grade unless offered for S/U only.

Speech, Language and Hearing Science, B.S.

Learn about working with people to improve their speech, language, and hearing. Study American Sign Language. This pre-professional degree is preparation for application to a graduate studies in speech-language pathology, audiology, or other areas.

USP - University Studies Program Requirements

The following University Studies Program requirements are required to graduate and are not covered by the Speech, Language and Hearing Science major:

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

Courses required for major

PSYC1000 - General Psychology

Credits: 3
Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

MATH1400 - College Algebra

Credits: 3
Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA
USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

LIFE1010 - General Biology

Credits: 4
Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN
Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

FCSC2121 - Child Development

Credits: 4

Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

SPPA1010 - Introduction to Communication Disorders

Credits: 3

Introduces information regarding basics of speech and hearing. Discusses disorders of speech and hearing by defining the problem, etiology or theories of cause, classifications and controversies, evaluation techniques and therapies to correct the disorder.

USP 2003-2014 Code U3I,U3L

SPPA2110 - American Sign Language I

Credits: 4

Basic comprehension and expression of American Sign Language (ASL), the language used by the Deaf community in the United States. ASL vocabulary, grammar, and pragmatics are taught through lecture, conversation, and storytelling. The direct experience method (using ASL with no voice) is utilized to enhance the learning process.

USP 2015 Code U5H

Former Course Number [4100]

SPPA2120 - American Sign Language II

Credits: 4

Second level of ASL comprehension and expression. ASL vocabulary, grammar, and pragmatics, along with increased fluency, are taught through lecture, conversation, and storytelling. Translation from English to ASL is addressed.

USP 2015 Code U5H

Former Course Number [4120]

Prerequisite: SPPA 2110.

SPPA2210 - Phonetics

Credits: 3

Articulatory and acoustic description of speech sound production. Introduction to the International Phonetic Alphabet

and phonetic transcription.

Former Course Number [3210]

Prerequisite: SPPA 1010 or consent of instructor.

SPPA3160 - Speech and Language Development

Credits: 4

Deals with the development of speech sound production, phonology, semantics, syntax, morphology, discourse, and pragmatics for typically-developing children from infancy to adolescence. Includes prelinguistic and paralinguistic communication, the cognitive correlates of communication, and written language. Considers the effects of sociocultural context and multiple language acquisition. Application component provides weekly experience in language sample analysis.

Former Course Number [4160]

Prerequisite: SPPA 2210 or instructor permission.

SPPA3265 - Anatomy and Physiology of Speech, Swallowing and Hearing

Credits: 4

Introduces the student to the anatomy of the normal speech and hearing systems as well as the physiologic underpinnings of the speech (respiration, phonation, articulation), swallowing, and hearing (external, middle, and inner ear) systems. Theories of speech production and speech perception are presented.

Former Course Number [3400]

Prerequisite: KIN 2040 or consent of instructor.

SPPA4240 - Speech and Language Disorders Across the Lifespan

Credits: 3

The nature and causes of developmental and acquired speech and language disorders across the lifespan are examined. Principles of assessment and intervention are introduced.

Prerequisite: SPPA 3160 or consent of instructor.

SPPA4340 - Basic Audiology

Credits: 3

An introduction to audiology as a profession, with primary focus on screening and diagnostic methods for the clinical evaluation of hearing loss in children and adults.

When Offered (Normally offered spring semester)

Prerequisite: SPPA 3265 or concurrent enrollment.

SPPA4150 - Aural Rehabilitation

Credits: 3

Examines basis for and characteristics of communication problems created by hearing loss and management procedures to facilitate communication and adjustment to hearing loss. Includes acoustic and visual properties of speech, amplification devices and hearing loss in school children.

Prerequisite: SPPA 4340 or consent of instructor.

SPPA4250 - Clinical Methods

Credits: 4

Introduction to clinical procedures, such as: collecting data, clinical writing and documentation, reviewing practice regulations, interviewing, and counseling. Students will obtain initial clinical experience (i. e. observation, simulation and/ or clinical assignment). Requirements (e. g. , background check, TB screen) must be met for involvement in the Speech & Hearing Clinic.

Prerequisite: SPPA 3265

SPPA4380 - Neurological Basis of Communication

Credits: 3

Studies details of human nervous system, including central and peripheral nervous systems, major motor and sensory pathways and special senses. Emphasizes neurology of various communication disorders.

Prerequisite: SPPA 3265 or consent of instructor.

Notes:

A grade of C or better must be earned in all SPPA courses; courses in the major must be taken for a letter grade unless offered for S/U only. Also note that speech, language, and hearing topic courses from community colleges do not transfer or count as course equivalents.

Elective Courses

Upper-Division Social Behavior Credits (choose one)

Choose one from the list below (students are responsible for knowing prerequisites for these courses).

CNSL4520 - Fundamentals of Counseling (B)

Credits: 3

Students learn some of the skills of counseling and develop an understanding of elementary principles of counseling theory, as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 5520.

When Offered (Offered on campus and online all semesters)

Prerequisite: junior standing; 6 hours of education or psychology and graduate standing to receive graduate credit.

PSYC4310 - Developmental Psychopathology

Credits: 3

Provides basic understanding of developmental psychopathology. Examines characteristics, etiology, assessment and treatment of psychological disorders in children including autism, mental retardation, anxiety, depression, attention, learning, and conduct problems.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or FCSC 2121 or EDST 2450.

PSYC4320 - Intellectual Disability

Credits: 3

Acquaints students with all aspects of intellectual disability including assessment, diagnosis and classification, etiology, and associated health and mental health difficulties. Prevention, educational and psychological intervention, family adaptation, and community involvement are also addressed.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 4300 or FCSC 2121 or EDST 2450.

Electives

Lower division (1/2000) open electives (student choice - any course that does not meet another university or major requirement): 24 credits

Upper division (3/4000) open elective (student choice - any course that does not meet another university or major requirement): 12 credits

Additional Information

The BS degree prepares students for graduate study in communication disorders disciplines. Students study the normal processes associated with understanding and producing speech and language. These include anatomy, physiology, and neurology. Students also learn about normal development of speech and language in children, and they are introduced to disorders and clinical methods. Courses in related areas, such as anatomy, psychology, child development, statistics, and linguistics are also part of the program. Students obtain initial clinical experiences through observing clinical practice in the UW Speech & Hearing Clinic as part of coursework.

The B.S. degree is considered pre-professional preparation for entrance into a graduate program in speech-language pathology, audiology, or related fields. A clinical graduate degree is required in order to become a speech-language pathologist or an audiologist. The B.S. degree at UW is not designed to meet requirements to become a speech-language pathology assistant (SLP-A), additional practicum and some coursework at another institution would be required to become an SLP-A. For information on SLP-A technical programs please visit ASHA.org.

Student Learning Objectives

The BS degree provides students with a broad-based foundation in the sciences and humanities, fundamental knowledge of human communication, communication development, and the nature of communication disorders across the lifespan. Specific learning objectives can be found on the BS program website.

<http://www.uwyo.edu/comdis/undergraduate/bachelors-of-speech-language-and-hearing-science.html>

Criminal Background Check

Eligibility for the B.S. degree is contingent upon passing a criminal background check. Usually during the senior year, each student will be required to obtain, pay for, and pass a criminal background check as part of enrollment in advanced courses. These background checks are required in order to participate in any aspect of the UW Speech & Hearing Clinic. The results of the background check may impact a student's ability to complete the required coursework and obtain the degree. Please see the College of Health Sciences website for the policy and procedures document.

National Student Speech Language Hearing Association

Students can join the UW chapter of the National Student Speech Language Hearing Association (NSSLHA) to become a part of a community of students interested in communication sciences and disorders. Objectives are to promote and recognize scholastic achievement and to support clinical, research, and service endeavors.

Minor

Disability Studies Minor

A diverse interdisciplinary field that investigates the nature, meanings, and consequences of dis/ability from social, cultural, and policy perspectives.

Program Goals:

Disability studies views disability as a political construction, cultural identity, and valued lived experience, not simply as a medical condition. The minor curriculum embeds these overarching goals:

1. Promoting full civic integration of people with disabilities;
2. Positioning disability as an integral aspect of human diversity; and
3. Addressing disability rights, equity, and justice in personal, relational, community, and structural contexts.

Requirements:

All students in the minor are required to complete 18 credit hours consisting of three WIND core courses, one WIND elective, and two additional WIND or external electives related to disability studies. External electives should be selected in consultation with a disability studies faculty advisor.

Required Core Courses: 9 Credits

WIND2100 - Introduction to Disability Studies

Credits: 3

Provides students with an overview of the disability studies field. Students gain introductory knowledge about the disability studies perspective by examining the work of scholars from many academic backgrounds, which will facilitate students' understanding of the interdisciplinary nature of disability studies.

USP 2003-2014 Code U3CH,U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

WIND4020 - Disability Studies Theory and Practice

Credits: 3

Explores the interdisciplinary nature of disability studies theory and scholarship, including investigation of embodied knowledge, cultural meanings, and socio-political practices related to disability. Students will develop in-depth critical disability research papers and deliver accessible, professional presentations.

Cross Listed SOWK 4020.

Dual Listed WIND 5020.

USP 2003-2014 Code U3CS

USP 2015 Code U5C3

Prerequisite: WIND 2100 or WB or COM2.

WIND4500 - Practicum

Credits: 3

Provides students practical experience in the field of Disability. Typically taken during a student's final semester in the Disability Studies Minor.

Prerequisite: completion of WIND 2100, and WIND elective, WIND 4020 (or concurrent enrollment).

WIND Electives: 3-9 Credits

At least 3 credits, and up to 9 credits, selected from WIND electives:

WIND2500 - Special Topics

Credits: 1-3

Max Credit (Max. 6)

Provides undergraduate students with the opportunity to gain introductory knowledge of critical topics and new areas of inquiry in the field of disability studies.

WIND2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and

subjectivity, and the politics of health, sexuality, and care.

Cross Listed GWST 2700.
USP 2003-2014 Code U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

WIND3150 - Literature and Medicine

Credits: 3

This course explores how literature and memoirs have grappled with illness, disease, and disability, paying particular attention to the perspectives of doctors, nurses, patients, families, and communities in shaping meanings of diagnoses, health, and access to care.

Prerequisite: Completion of COM1.

WIND4050 - Independent Study

Credits: 1-3
Max Credit (Max. 6)

Offers the advanced student the opportunity to pursue a topic of interest with the direction of an instructor in disability studies.

Dual Listed WIND 5050.
Prerequisite: WB and consent of instructor.

WIND4100 - Global Disability Studies

Credits: 3

The course investigates global approaches to disability, including the UN Convention on the Rights of Persons with Disabilities (CRPD), and crucial disability issues such as education, employment, poverty and social integration. Students will carry out research projects and present on their work.

USP 2003-2014 Code [none] < >COM3]
Prerequisite: COM2

WIND4200 - Diverse Minds

Credits: 3

Through investigations of novels, memoirs, films, and media representations of intellectual disability, autism/neurodiversity, and psychiatric disability, students critically analyze figurations of "unstable," "unruly," or what we will conceptualize as "diverse" minds.

Dual Listed WIND 5200.
USP 2003-2014 Code [none] < >COM3]
Prerequisite: COM2

WIND4600 - Special Topics

Credits: 3

Provides upper division undergraduate students with the opportunity for in-depth examination of critical topics and new areas of inquiry in the field of disability studies.

Prerequisite: WIND 2100 , Junior standing and consent of instructor.

External Electives: 0-6 Credits

The following UW courses are accepted as external electives:

SPPA2110 - American Sign Language I

Credits: 4

Basic comprehension and expression of American Sign Language (ASL), the language used by the Deaf community in the United States. ASL vocabulary, grammar, and pragmatics are taught through lecture, conversation, and storytelling. The direct experience method (using ASL with no voice) is utilized to enhance the learning process.

USP 2015 Code U5H

Former Course Number [4100]

SPPA2120 - American Sign Language II

Credits: 4

Second level of ASL comprehension and expression. ASL vocabulary, grammar, and pragmatics, along with increased fluency, are taught through lecture, conversation, and storytelling. Translation from English to ASL is addressed.

USP 2015 Code U5H

Former Course Number [4120]

Prerequisite: SPPA 2110.

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

SPPA4070 - Deaf Studies

Credits: 3

Studies deaf culture and deaf history in the United States. Culture topics will include deaf community dynamics, humor, behavior, emotional and social interaction, besides issues involving deaf children as a linguistic minority.

History will be discussed from the 1700s to the present in the U. S.

USP 2003-2014 Code U3CS,U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: SPPA 2110.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

PSYC4320 - Intellectual Disability

Credits: 3

Acquaints students with all aspects of intellectual disability including assessment, diagnosis and classification, etiology, and associated health and mental health difficulties. Prevention, educational and psychological intervention, family adaptation, and community involvement are also addressed.

Prerequisite: A grade of C or better in PSYC 1000 and PSYC 2300 or PSYC 4300 or FCSC 2121 or EDST 2450.

- Note: many courses in GWST, AMST, and other units in the School of Culture, Gender, and Social Justice would also be acceptable external electives.

More Information:

As an interdisciplinary minor, this program complements majors across the university. For more information, visit the website: www.uwyo.edu/wind/disabilitystudies/index.html, contact program director, Michelle Jarman at mjarman@uwyo.edu or by phone at 766-5060, or visit the WIND office located in the Health Sciences Building, room 147.

18 Credit Hours Total

Graduate

Doctor of Pharmacy, MBA/PharmD Dual Degree

This dual degree program provides students with a complementary business degree to start their own business or to advance into management positions in their careers. Students acquire decision-making skills that allow them to excel in their field of practice.

Additional Requirements

The School of Pharmacy offers an MBA/Pharm.D. dual degree program that is geared toward students who have already obtained a Bachelor's degree. A dual M.B.A./Pharm.D. degree allows a student to diversify their skill set and enhance their value proposition to prospective employers.

The Doctor of Pharmacy/Master of Business Administration dual degree takes five years to complete - four years of Pharmacy studies and one year of MBA core courses. Students spend their first year (Fall, Spring, and Summer semesters) in the MBA program taking core courses and completing other program requirements. The next four years will encompass the traditional Pharm.D. curriculum. Students completing this program will earn a Doctor of Pharmacy degree and a Master of Business Administration degree. Please review the program specific information for each program:

- Business Administration, M.B.A.
- Pharmacy, Pharm.D.

MBAM5101 - MBA Foundations

Credits: 1

The purpose of this course is to prepare students for the academic rigors of the MBA program.

Restricted Enrollment in MBAM or MBAF degree program.

Prerequisite: Admission to full-time MBA program.

MBAM5102 - Operations Management

Credits: 3

Production and operations management. Topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, and scheduling.

Prerequisite: Admission to the MBAM program.

MBAM5104 - Organization Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5107 - Decision Making I

Credits: 1

This course develops a systematic process for making decisions in complex business situations, by integrating six dimensions of business risk: competitive, financial, organizational, legal, social, and ethical. The process combines analytical and ethical reasoning methods that compensate for the flawed decision making common in business

organizations.

Prerequisite: Admission to the MBAM program.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamentals principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBAM program.

MBAM5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions.

Prerequisite: Admission to the MBAM program.

MBAM5209 - Decision Making II

Credits: 1

An experiential learning course that builds on MBAM 5107. Students apply systematic business decision making process to real-world business situations. Student teams work directly with owners and managers of Wyoming companies to address their strategic, competitive, operational, financial, and/or administrative challenges in real time.

Prerequisite: MBAM 5107.

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

MBAM5330 - Global Business Environment

Credits: 3

Max Credit 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted Admission to the MBA, MBAE, or MBAF program.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director.

MBA-MBA students, including dual degree students, must take an additional nine (9) credit hours of 4000 or 5000 level College of Business courses. Three (3) of these credit hours can be taken outside of the College of Business. Dual degree students (JD/PharmD/MS) may take three (3) credit hours outside the College of Business following dual degree agreement guidelines. Please contact your advisor for additional information.

Health Services Administration, M.S.

The School of Pharmacy offers a Master of Science online degree in health services administration (MSHSA).

- o Healthcare Writing and Reporting

Biopharmaceutical Regulatory Compliance Group

MS-HSA Curriculum

The following table provides a list of the core courses required for all tracks.

PHCY5040 - The Evolution of American Health

Credits: 2

This course explores the evolution of the healthcare system in response to various needs and crises over the years. The professionalization of health care; the development of the modern hospital; the implications of computerized health information; and the empowerment of patients will be covered.

Prerequisite: Admission into the Health Services Administration MS program.

PHCY5042 - Statistics for Health Services

Credits: 3

This course will introduce students to correlation analysis, regression, analysis of variance and selected non-parametric tests, focusing on appropriate use of each and how to interpret the output of a statistical test to answer a research question.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5043 - Empirical Analysis for Health Services Administration

Credits: 3

This course will equip students with an understanding of research and policy debates related to economic, political, and administrative aspects of health services by providing an overview of how research can be used by health service researchers to draw conclusions about health services and their administration.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5045 - Health Services Administration Applied Research

Credits: 1-4

This course provides the opportunity for students to apply knowledge and skills obtained in the HSA program while gaining practical experience with real-world projects.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5046 - Health Services Administration Seminar1

Credits: 1

Max Credit (Max. 2)

An in-depth investigation of a timely issue in health services, including the regulatory, economic, patient-safety, marketing, leadership, and ethical aspects of that issue. Students will participate in separate group analysis of a presented problem, and in their presentations of their group's assessment of the problem.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5041 - Health Services Administration Research Methods

Credits: 2

This course will cover the basic research designs used in health services research. Focus will be given on framing the research questions, selecting the appropriate study design and threats to the internal validity of the study designs.

Prerequisite: Must be enrolled in the HSA program.

Sub-Total Program Required Coursework: 15 credit hours

Biopharmaceutical Regulation & Compliance Track

The following tables provides a list of required courses for the track listed

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions,

focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5242 - The Food and Drug Administration

Credits: 2

This course examines the regulatory climate for FDA-regulated drug and biological products. Regulatory standards are reviewed (including discovery of new therapeutic modalities, their approval, manufacturing, promotion, and distribution), and the enforcement authority of the FDA is examined (focusing on methods that promote safe and effective drug use).

Prerequisite: PHCY 5241.

PHCY5243 - The Drug Enforcement Administration

Credits: 2

This course examines the balance of health professionals and institutions working with regulators to develop programs that reflect both the best interests of individual patients and of society. Focusing on challenges of treating chronic pain, prescription drug abuse, and actions that have led to conflict between regulators and health practitioners.

Prerequisite: PHCY 5241.

PHCY5244 - State Regulations of Health Professions

Credits: 2

This course examines how state regulatory agencies assure the initial competence of practitioners, as well as their continuing competence in the years following the completion of academic training. The course also examines the factors that are applied to the regulation of health care settings, using the structure-process-outcomes typology of Donabedian.

Prerequisite: PHCY 5241.

Specialty Track Electives (choose 6 hours)

Healthcare Risk Management Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5342 - Healthcare Risk and Quality

Credits: 3

This course surveys the importance and processes of quality and risk in health care institutions. Students will be assigned to lead topics. Current events/topics will be utilized to inform the class.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5670 - Medication Malpractice

Credits: 2

Using a case-study approach, potential legal liability issues are studied, within a health care context that primarily focuses on legal liability related to the use of medications. Strategies for reduction of legal liability are explored. The implementation and oversight of legal risk management programs is addressed.

Dual Listed Dual listed with: PHCY 4670.

Prerequisite: Enrollment in graduate or professional program or department permission.

PHCY5240 - Pharmaceutical Homicide

Credits: 2

Legal pharmaceutical products are sometimes used by healthcare professional criminals to kill people. This course focuses on identifying the zone of risk for people who could be harmed by pharmaceuticals, and the development of best practices to protect patients and others from the harm.

Dual Listed PHCY 4240.

Prerequisite: Enrollment in graduate or professional program or department permission.
Specialty Track Electives (Choose 6 hours)

Forensic Pharmacy Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5240 - Pharmaceutical Homicide

Credits: 2

Legal pharmaceutical products are sometimes used by healthcare professional criminals to kill people. This course focuses on identifying the zone of risk for people who could be harmed by pharmaceuticals, and the development of best practices to protect patients and other from the harm.

Dual Listed PHCY 4240.

Prerequisite: Enrollment in graduate or professional program or department permission.

PHCY 5XXX The Chemistry of Poisonings 2 Credits

PHCY 5XXX Thr Process of Forensic Science 2 Credits

Specialty Track Electives (choose 6 hours)

Healthcare Policy Analysis Track

Specialty Track Required Coursework (9 credit hours)

PHCY5047 - Pandemic Preparedness Policy

Credits: 2

Analysis of regulatory measures undertaken to protect the public from adverse effects of a global pandemic. Evaluation of alternative means of preparing for a pandemic and for management of pandemic response. Considers balancing of individual interests and community interests.

PHCY5148 - Health Economics and Policy

Credits: 2

This course explores the financing and structure of the U. S. healthcare system with the purpose of understanding how these systems impact patient care, health policy, and economics. Topics include organization of healthcare systems, insurance programs, legislation, healthcare labor markets and drug costs.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5246 - Prescription Drug Costs

Credits: 2

Max Credit 2

Overview of prescription drug prices and the consequences for patients and society of the high cost of pharmaceutical products. Causes of escalating pharmaceutical prices are reviewed. Legal and economic factors that contribute to high drug prices are considered. Potential solutions are identified.

Restricted Professional and Graduate students only.

Biopharmaceutical Product Representation Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5541 - Introduction to Biopharmaceutical Marketing and Production

Credits: 3

This course will review empirical evidence in various topic areas within the fields of biopharmaceutical marketing, sales promotion, communication, and selling effectiveness focusing on the history and structure of the biopharmaceutical product representative function and theoretical domains associated with the associated activities.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

Specialty Track Electives (choose 6 hours)

Clinical Research Administration Track

Specialty Track Required Coursework (10 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5242 - The Food and Drug Administration

Credits: 2

This course examines the regulatory climate for FDA-regulated drug and biological products. Regulatory standards are reviewed (including discovery of new therapeutic modalities, their approval, manufacturing, promotion, and distribution), and the enforcement authority of the FDA is examined (focusing on methods that promote safe and effective drug use).

Prerequisite: PHCY 5241.

PHCY 5XXX Biomedical Ethics 3 Credits

PHCY 5XXX Clinical Research Regulation 2 Credits

Specialty Track Electives (choose 5 hours from list)

Patient Safety Systems Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5341 - Principles of Healthcare Quality

Credits: 3

Max Credit (Max. 3)

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

Specialty Track Electives (choose 6 hours)

Healthcare Security Systems Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY 5XXX Cybersecurity 2 Credits

PHCY 5XXX HIPPA Compliance 2 Credits

PHCY 5XXX Disaster Management 2 Credits

Specialty Track Electives (choose 6 hours)

Healthcare Ethics & Equity Track

Specialty Track Required Coursework (10 Credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY 5XXX Biomedical Ethics 3 Credits

PHCY 5XXX HIPAA Compliance 2 Credits

PHCY 5XXX Clinical Research Regulation 2 Credits

Specialty Track Electives (choose 5 hours)

Health Institution Leadership Group

MS-HSA Curriculum

The following table provides a list of the core courses required for all tracks

PHCY5040 - The Evolution of American Health

Credits: 2

This course explores the evolution of the healthcare system in response to various needs and crises over the years. The professionalization of health care; the development of the modern hospital; the implications of computerized health

information; and the empowerment of patients will be covered.

Prerequisite: Admission into the Health Services Administration MS program.

PHCY5041 - Health Services Administration Research Methods

Credits: 2

This course will cover the basic research designs used in health services research. Focus will be given on framing the research questions, selecting the appropriate study design and threats to the internal validity of the study designs.

Prerequisite: Must be enrolled in the HSA program.

PHCY5042 - Statistics for Health Services

Credits: 3

This course will introduce students to correlation analysis, regression, analysis of variance and selected non-parametric tests, focusing on appropriate use of each and how to interpret the output of a statistical test to answer a research question.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5043 - Empirical Analysis for Health Services Administration

Credits: 3

This course will equip students with an understanding of research and policy debates related to economic, political, and administrative aspects of health services by providing an overview of how research can be used by health service researchers to draw conclusions about health services and their administration.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5045 - Health Services Administration Applied Research

Credits: 1-4

This course provides the opportunity for students to apply knowledge and skills obtained in the HSA program while gaining practical experience with real-world projects.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5046 - Health Services Administration Seminar1

Credits: 1

Max Credit (Max. 2)

An in-depth investigation of a timely issue in health services, including the regulatory, economic, patient-safety, marketing, leadership, and ethical aspects of that issue. Students will participate in separate group analysis of a presented problem, and in their presentations of their group's assessment of the problem.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.
Sub-Total Program Required Coursework: 15 Hours

Health Institution Leadership Track

Specialty Track Required Coursework (9 credit hours)

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5442 - Healthcare Financial Planning

Credits: 2

This course explores financial principles incorporating the unique environment of the health institution. The mix of services (inpatient, outpatient, nursing facilities, urgent/emergency care and components) will be studied through extensive use of case studies and models to develop the health institution leader's financial skills.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5443 - Healthcare Human Capital Plan

Credits: 2

This course will provide skills for developing and managing human capital by the health institution leader through exploration of best practices for human capital selection and development to optimize the performance of the workforce while complying with legal, regulatory, and contractual requirements through extensive use of case studies and models.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5444 - Healthcare Strategic Innovation

Credits: 2

This course develops strategic skills by the health institution leader through exploration of principles incorporating the unique environment of the health institution. The strategic skills will be applied to the concept of innovation through extensive use of case studies and models.

Prerequisite: Must be enrolled in the HSA program, or by permission.
Specialty Track Electives (choose 6 hours)

Health Economics and Outcomes

Specialty Track Required Coursework (10 credit hours)

PHCY5141 - Principles of Health Econ and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5142 - Health Economic Decision Analysis

Credits: 2

This class is designed to provide the student with the methods of comparative effectiveness research with special focus on how various decision makers use comparative effectiveness data to assist in decision-making.

Prerequisite: PHCY 5141.

PHCY5143 - Comparative Effectiveness Research

Credits: 2

This class is designed to provide the student with the methods of comparative effectiveness research with special focus on how various decision makers use comparative effectiveness data to assist in decision-making.

Prerequisite: PHCY 5141.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
Specialty Track Electives (Choose 5 hours)

Healthcare Quality & Outcomes Track

Specialty Track Required Coursework (8 credit hours)

PHCY5341 - Principles of Healthcare Quality

Credits: 3

Max Credit (Max. 3)

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5342 - Healthcare Risk and Quality

Credits: 3

This course surveys the importance and processes of quality and risk in health care institutions. Students will be assigned to lead topics. Current events/topics will be utilized to inform the class.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

Specialty Track Electives (choose 7 hours)

Rural Healthcare Coordination Track

Specialty Track Required Coursework (9 credit hours)

PHCY5141 - Principles of Health Econ and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5341 - Principles of Healthcare Quality

Credits: 3

Max Credit (Max. 3)

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
Specialty Track Electives (choose 6 hours)

Geriatric Care Systems Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5341 - Principles of Healthcare Quality

Credits: 3

Max Credit (Max. 3)

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
Specialty Track Electives (choose 6 hours)

Healthcare Entrepreneurism Track

Specialty Track Required Coursework (9 credit hours)

PHCY5241 - Principles for Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5541 - Introduction to Biopharmaceutical Marketing and Production

Credits: 3

This course will review empirical evidence in various topic areas within the fields of biopharmaceutical marketing, sales promotion, communication, and selling effectiveness focusing on the history and structure of the biopharmaceutical product representative function and theoretical domains associated with the associated activities.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
Specialty Track Electives (choose 6 hours)

Healthcare Financing Track

Specialty Track Required Coursework (9 credit hours)

PHCY5141 - Principles of Health Econ and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.

PHCY5541 - Introduction to Biopharmaceutical Marketing and Production

Credits: 3

This course will review empirical evidence in various topic areas within the fields of biopharmaceutical marketing, sales promotion, communication, and selling effectiveness focusing on the history and structure of the biopharmaceutical product representative function and theoretical domains associated with the associated activities.

Prerequisite: Completion or concurrent enrollment in PHCY 5040.
Specialty Track Electives (choose 6 hours)

Health Information Technology Track

Specialty Track Required Coursework (9 credit hours)

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
PHCY 5XXX Information Design and Analysis 2 Credits
PHCY 5XXX Healthcare Information Systems 2 Credits
PHCY 5XXX Information Management 2 Credits
Specialty Track Electives (choose 6 hours from list)

Healthcare Writing & Reporting Track

Specialty Track Required Coursework (9 credit hours)

PHCY5441 - Introduction to Health Leadership

Credits: 3

This course will develop the health institution leader through analysis of theory and application to practice by extensive use of case studies and models. Organizational, team and individual dimensions of leadership are examined. Leadership for optimization resources and effective use of data analytics are explored.

Prerequisite: Must be enrolled in the HSA program, or by permission.
PHCY 5XXX Professional Writing in Healthcare 2 Credits
PHCY 5XXX Health Data in Figures, Tables & Graphs 2 Credits
PHCY 5XXX The Healthcare Message 2 Credits
Specialty Track Electives (choose 6 hours)

Additional Notes

NOTE: Specialty track electives can be any course provided in the MSHSA program.

Please consult with the program director if you have questions on the electives to choose for a specific track.

Those course numbers with PHCYXXXX are currently being built or waiting on approval from the University. Please contact the MS HSA program for questions.

Additional Requirements

This degree is geared toward new and mid-career practitioners including pharmacists, nurses, physicians, social workers, and other health care professionals who want to become department directors, patient safety coordinators and/or directors, regulatory compliance officers, clinical research associates, health outcomes researchers or take on leadership roles as advanced practice practitioners.

The program also benefits health care workers in fields such as management positions, pharmaceutical sales representatives, medical science liaisons, and pharmacy technician educators as well as new clinical faculty at newly established pharmacy colleges.

Available nationwide the master's program is delivered via a mix of online self-study and online project-based coursework.

The program can be completed in two years of part-time study. Students are requested to travel to the UW Laramie campus for two weekend seminars during the two-year program (based on travel restrictions during the pandemic this course was held online). Graduates will be expected to complete 30 credit hours of coursework and pass a comprehensive final exam. Coursework will be completed over five consecutive semesters however students can take up to 6 years to complete the program.

A prospective student should have earned at least a bachelor's degree from a regionally accredited institution. To find out more about the application process please see the following website www.uwyo.edu/pharmacy/online-ms-program or contact the Student Services Office.

Kinesiology and Health Distance Education, M.S.

Master of Science Distance Education Program is designed for teachers, coaches, and other health professionals to fit into their busy schedules. Students can complete the Master of Science degree via synchronous or online modalities in a three, four, or five year period of time.

Plan B (Paper)

General Information

Teachers of health and physical education typically teach throughout the day and coach during the evenings and weekends. Therefore, traditional on campus Master's degree programs that require students to attend the University of Wyoming in Laramie are often simply impossible for teachers and other health professionals to fit into their busy schedule.

The Division of Kinesiology and Health offers the Master of Science degree in Kinesiology and Health as an off-campus, distance education program. All courses are delivered via synchronous or online modalities. The distance

education program is designed such that you can complete the Master of Science degree in a three, four, or five year period of time.

This program involves a minimum of thirty (30) total credit hours of coursework and a culminating paper or case study presentation (experiential learning option) that is developed on a topic selected by the student in conjunction with her or his graduate faculty advisor. The process for composing the culminating paper or case study includes the development of a prospectus and final presentation of the paper or case study. Students who elect the experiential learning option will also be required to complete three (3) credits of KIN 5990 (Internship) . At least twenty-one (21) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the nine (9) hours of general required courses.

General Required Courses (9 Credits)

¹ May substitute EDRE 5530

KIN5080 - Investigations in Kinesiology and Health

Credits: 1-3
Max Credit (Max. 3)

Designed to develop Master of Science level graduate students into critical consumers of research. An additional purpose is to develop research skills to the level necessary to complete a master of science Plan B paper.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5085 - Research Methods

Credits: 3
Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

EDRE5600 - Introduction to Quantitative Research

Credits: 3
Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

OR

EDRE5640 - Introduction to Qualitative Research

Credits: 3
This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

Kinesiology and Health Electives (15 Credits)

12 credits selected from the following KIN courses:

KIN5011 - Teacher Socialization in PE

Credits: 3

Max Credit 3

This course provides students with understanding of how physical educators are recruited into, professionally trained, and function in the workplace. Students will have the opportunity to analyze, critique, and evaluate empirical evidence related to socialization in physical education, as well as conduct research on given topics from the socialization literature.

Prerequisite: Graduate standing or permission from instructor

KIN5014 - Teaching Tactics in Sport-Based Physical Education

Credits: 3

Introduces students to the instructional strategy of the Tactical Games Approach (Mitchell, Oslin, & Griffin, 2006) of teaching sport-based activities in physical education. Emphasis is on planning, implementing, assessing and evaluating the tactical approach within the K-12 physical education context.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5016 - Analysis and Supervision of Teaching in Physical and Health Education

Credits: 3

Introduces various evaluative and supervisory techniques which are designed to improve teaching effectiveness and student learning. Emphasis will be placed on utilizing various strategies of evaluation in instructional settings.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5018 - Psychology of Teaching Physical Education

Credits: 3

Weaves together theory, research, and practical information related to the psychological aspects of teaching physical education. It shows how you can use psychological principles and strategies to manage behavior, motivate students, achieve program goals, and establish a positive learning environment.

Prerequisite: graduate standing in KIN or permission of instructor.

- KIN 5019 - Instructional Models for Physical Education Credits: 3

KIN5090 - Foundations of Coaching

Credits: 3

Coaches must be effective teachers, trainers, fund-raisers, recruiters, motivators, administrators, and counselors. The major purpose of this course is to provide future coaches with current information about the eight domains of essential coaching skills identified in the NSSC. These domains include philosophy and ethics, safety and injury prevention, physical conditioning, growth and development, teaching and communication, sport skills and tactics, organization and administration, and evaluation.

Dual Listed KIN 4090.

Prerequisite: graduate standing in KIN or permission of instructor.

Elective Courses (6 Credits)

Students are encouraged to complete at least one course from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Coursework to M.S. Degree Program

- Investigation in Kinesiology and Health: Maximum of 3 credit hours of Investigation in Kinesiology and Health (KIN 5080) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Thesis Research: No credit hours of Thesis Research (KIN 5960) may contribute to the Plan B Degree Program.
- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097 /KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900 /KIN 5900) or KIN 5990 - Internship may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.

Kinesiology and Health, Exercise and Sport Science Emphasis, M.S.

Master of Science with Emphasis in Exercise and Sport Science is designed for students who want to pursue doctoral degrees and careers in exercise physiology, biomechanics, exercise and sport psychology, motor learning and control, physical activity and lifespan development, etc.

Plan A (Thesis)

The Plan A option of the Master of Science degree in ESS is designed to prepare students for careers in one of the subdisciplines (e.g., exercise physiology, biomechanics, exercise and sport psychology, motor learning and control, physical activity and lifespan development, etc.).

All students complete a series of general required courses and a concentration of courses in their specific ESS subdiscipline. The ESS area of emphasis involves a minimum of thirty (30) total credit hours of coursework, a thesis,

and a final oral examination. At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, STAT 5080; or EDRE 5600 or EDRE 5640. Decision made in conjunction with the advisor.

- Two semesters of KIN 5588 - Kinesiology and Health Intellectual Seminar Credits: 0

KIN5085 - Research Methods

Credits: 3

Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: graduate standing in KIN or permission of instructor.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Specialized Required Courses (9-15 Credits)

Area of specialization will include three to five courses (9-15 hours) within the student's chosen ESS subdiscipline. Your advisor will identify courses to be taken specific to the selected area of emphasis.

Elective Courses (Minimum 6 Credits)

Students are encouraged to complete at least one of their elective course selections from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Coursework to M.S. Degree Program

1. Thesis Research: Maximum of 4 credit hours of Thesis Research (KIN 5960) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
2. Investigations in Kinesiology and Health: No credit hours of Investigations in Kinesiology and Health (KIN 5080) may contribute to the Plan A (Thesis) Degree Program.
3. Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
4. Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (KIN 5900) or Internship (KIN 5990) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
5. 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.

Kinesiology and Health, Health Emphasis, M.S.

Master of Science with Emphasis in Health is designed to prepare students for careers in public and community health settings.

Plan A (Thesis)

The Plan A option of the Master of Science degree in the area of HLED is designed to prepare students for careers in public and community health settings. All students complete a series of general required courses and a concentration of courses in the area of HLED.

The HLED area of emphasis involves a minimum of thirty (30) total credit hours of coursework, a thesis, and a final oral examination. At least twenty-one (21) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070 or STAT 5080 ,EDRE 5640 or EDRE 5660. Decision made in conjunction with the advisor.

- Two semesters of KIN 5588 - Kinesiology and Health Intellectual Seminar Credits: 0

KIN5085 - Research Methods

Credits: 3

Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: graduate standing in KIN or permission of instructor.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Specialized Required Courses (9-15 Credits)

Coursework will include three to five courses (9-15 hours). Your advisor will identify courses to be taken.

Elective Courses (Minimum 6 Credits)

Students are encouraged to complete at least one of their elective course selections from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Coursework to M.S. Degree Program

- Thesis Research: Maximum of 4 credit hours of Thesis Research (KIN 5960) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Investigations in Kinesiology and Health: No credit hours of Investigations in Kinesiology and Health (KIN 5080) may contribute to the Plan A (Thesis) Degree Program.
- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Practicum Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 21 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.

Kinesiology and Health, M.S.

Master of Science, Plan B, is designed for students who are seeking a terminal degree in Kinesiology and Health. This option is not designed for students seeking to pursue a doctoral degree at the completion of the Master of Science degree.

Plan B (Paper and Experiential Learning Option)

The Plan B option of the Master of Science degree in Kinesiology and Health is designed to prepare students who are seeking a terminal degree. This option is not designed for students seeking to pursue a doctoral degree at the completion of the Master of Science degree in Kinesiology and Health.

This program involves a minimum of thirty (30) total credit hours of coursework and a culminating paper or case study presentation (experiential learning option) that is developed on a topic selected by the student in conjunction with her or his graduate faculty advisor. The process for composing the culminating paper or case study includes the development of a prospectus and final presentation of the paper or case study. Students who elect the experiential learning option will also be required to complete three (3) credits of KIN 5990 - Internship . At least twenty-four (24) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the nine (9) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, STAT 5080 , EDRE 5600 or EDRE 5640. Decision made in conjunction with the advisor.

- Two semesters of KIN 5588 - Kinesiology and Health Intellectual Seminar Credits: 0

KIN5080 - Investigations in Kinesiology and Health

Credits: 1-3
Max Credit (Max. 3)

Designed to develop Master of Science level graduate students into critical consumers of research. An additional purpose is to develop research skills to the level necessary to complete a master of science Plan B paper.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5085 - Research Methods

Credits: 3
Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Elective Kinesiology and Health Courses (Minimum of 15 Credits)

Elective Courses (Minimum of 6 Credits)

Students are encouraged to complete at least one course from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Coursework to M.S. Degree Program

- Investigation in Kinesiology and Health: Maximum of 3 credit hours of Investigation in Kinesiology and Health (KIN 5080) may contribute to the 24 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Thesis Research: No credit hours of Thesis Research (KIN 5960) may contribute to the Plan B Degree Program.
- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097 /KIN 5097) or Special Problems (HLED 5587/KIN 5587) may contribute to the 24 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Practicum/Internship Coursework: Maximum of 3-credit hours of Practicum in College Teaching (HLED 5900 /KIN 5900) or KIN 5990 - Internship may contribute to the 24 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 24 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.

Kinesiology and Health, Physical Education Teacher Education Emphasis, M.S.

Master of Science with Emphasis in Physical Education Teacher Education is designed for teachers who have attained their licensure for teaching physical education and want to pursue an advanced degree to further develop their professional knowledge of teaching.

Plan A (Thesis)

The Plan A option of the Master of Science degree in the area of PETE is for teachers who have attained their licensure for teaching physical education and want to pursue an advanced degree to further develop their professional knowledge of teaching.

The PETE program of studies involves a minimum of thirty (30) total credit hours of coursework, a thesis, and a final oral examination. At least twenty-five (25) credit hours of coursework is required from the Division of Kinesiology and Health (i.e., HLED and KIN courses), which includes the ten (10) hours of general required courses.

General Required Courses (10 Credits)

¹ May substitute STAT 5060, STAT 5070, STAT 5080; or EDRE 5600 or EDRE 5640. Decision made in conjunction with the advisor.

- Two semesters of KIN 5588 - Kinesiology and Health Intellectual Seminar Credits: 0

KIN5085 - Research Methods

Credits: 3

Focuses on methods and techniques for evaluating and conducting research. Potential and completed research problems are analyzed and evaluated. Research processes are reviewed with emphasis on application. Standards for writing literature reviews and research proposals are also emphasized.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: graduate standing in KIN or permission of instructor.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Specialized Required Courses

(12 Credits Selected from The Following KIN Courses)

KIN5011 - Teacher Socialization in PE

Credits: 3
Max Credit 3

This course provides students with understanding of how physical educators are recruited into, professionally trained, and function in the workplace. Students will have the opportunity to analyze, critique, and evaluate empirical evidence related to socialization in physical education, as well as conduct research on given topics from the socialization literature.

Prerequisite: Graduate standing or permission from instructor

KIN5014 - Teaching Tactics in Sport-Based Physical Education

Credits: 3

Introduces students to the instructional strategy of the Tactical Games Approach (Mitchell, Oslin, & Griffin, 2006) of teaching sport-based activities in physical education. Emphasis is on planning, implementing, assessing and evaluating the tactical approach within the K-12 physical education context.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5016 - Analysis and Supervision of Teaching in Physical and Health Education

Credits: 3

Introduces various evaluative and supervisory techniques which are designed to improve teaching effectiveness and student learning. Emphasis will be placed on utilizing various strategies of evaluation in instructional settings.

Prerequisite: graduate standing in KIN or permission of instructor.

KIN5018 - Psychology of Teaching Physical Education

Credits: 3

Weaves together theory, research, and practical information related to the psychological aspects of teaching physical education. It shows how you can use psychological principles and strategies to manage behavior, motivate students, achieve program goals, and establish a positive learning environment.

Prerequisite: graduate standing in KIN or permission of instructor.

- KIN 5019 - Instructional Models for Physical Education Credits: 3

KIN5090 - Foundations of Coaching

Credits: 3

Coaches must be effective teachers, trainers, fund-raisers, recruiters, motivators, administrators, and counselors. The major purpose of this course is to provide future coaches with current information about the eight domains of essential coaching skills identified in the NSSC. These domains include philosophy and ethics, safety and injury prevention, physical conditioning, growth and development, teaching and communication, sport skills and tactics, organization and administration, and evaluation.

Dual Listed KIN 4090.

Prerequisite: graduate standing in KIN or permission of instructor.

Elective Courses (Minimum 8 Credits)

Students are encouraged to complete at least one course from outside the Division of Kinesiology and Health. All elective course decisions must be made in conjunction with your advisor.

Contributions of Coursework to M.S. Degree Program

- Thesis Research: Maximum of 4 credit hours of Thesis Research (KIN 5960) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Investigations in Kinesiology and Health: No credit hours of Investigations in Kinesiology and Health (KIN 5080) may contribute to the Plan A (Thesis) Degree Program.
- Independent Study Coursework: Maximum of 3-credit hours of Individual Problems (HLED 5097/KIN 5097) or Special Problems (HLED 5587/HLED 5587) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- Practicum/Internship Coursework: Maximum of 3-credit hours of KIN 5900 - Practicum in College Teaching or KIN 5990 - Internship may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.
- 4000 Level Coursework: Maximum of two 4000 level courses (3 or 4 credit hours each) may contribute to the 25 credit hours from the Division of Kinesiology and Health and the 30 total credit hours.

Nursing, D.N.P., Family Nurse Practitioner Concentration

The Family Nurse Practitioner (FNP) concentration prepares advanced practice nurses to provide primary health care to diverse individuals and their families in a variety of outpatient settings, especially rural settings.

DNP Core Courses

NURS5140 - Pharmacotherapy for Primary Care

Credits: 4

Prepares primary care practitioners in drug therapy management for a variety of client populations with an emphasis on rural practice.

Prerequisite: NURS 5601, NURS 5602, NURS 5603, NURS 5604, NURS 5605, and NURS 5830.

NURS5165 - DNP: Adv Pathophysiology

Credits: 2

A system-based approach is used to explore selected pathophysiological states encountered across the lifespan in primary care. The developmental physiology, etiology, pathogenesis, clinical manifestations, and physiological responses to illness and treatment regimens are examined, providing a basis for the foundation of clinical decisions.

Prerequisite: NURS 5603 , NURS 5604 , NURS 5605 , and NURS 5830

NURS5601 - Theoretical Foundations Advanced Practice Nursing

Credits: 3

An introduction to the discipline of nursing for graduate nursing students

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5602 - Advanced Nursing Leadership

Credits: 3

Focus on developing advanced nursing leadership skills and attributes for interprofessional collaboration to create viability of the profession and health-related practice environments

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5603 - Evidence-Based Practice for Advanced Nursing

Credits: 3

Focuses on the use of EBP to solve clinical, educational, and administrative problems in advanced nursing practice.

Prerequisite: Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5604 - Population and Health Policies

Credits: 3

Emphasis on population health, epidemiology, and health policy related to rural and global health issues.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice

Credits: 3

Emphasis on theoretical and scientific foundations for quality improvement, safety, and informatics in health care.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5820 - Health Behavior Change I: Primary Prevention and Wellness

Credits: 3

This course will cover the application of theories and techniques of health behavior change and principles of epidemiology to health issues from the individual to the community level.

Prerequisite: Admission to the DNP program.

NURS5824 - Advanced Health Assessment and Clinical Decision-Making for Nurse Practitioners

Credits: 2

Builds upon basic nursing assessment skills; includes a human cadaver lab experience to enhance learners' understanding of anatomy, physiology, and pathophysiology, progressing to didactic, hands-on practice, and check-offs of student ability to perform client interviewing and advanced physical assessment techniques. Prepares learners for the clinical decision-making required of nurse practitioners.

A&S College Core 2015 **Course changes effective Fall 2022** - **Credits:** 3 credits; **Description:** *Advanced health assessment and diagnostic decision-making for nurse practitioners. Builds on previous nursing assessment skills. Emphasizes person-centered communication skills and a systematic diagnostic-reasoning approach that leads to accurate clinical decision-making. Clinical correlation amongst anatomy, physiology, pathophysiology, and physical examination.* **Prerequisite:** NURS 5140 and NURS 5165.

Prerequisite: NURS 5165, NURS 5800, NURS 5805, NURS 5810, and NURS 5865

NURS5830 - Health Behavior Change II: Behavioral Skills for Secondary and Tertiary Prevention

Credits: 3

This course will cover the application of health behavior change skills in advanced nursing practice, including theories/models and techniques, with a focus on chronic illness.

Prerequisite: NURS 5820 and NURS 5865.

NURS5865 - DNP Seminar

Credits: 1

Max Credit (Max. 6)

Instructor and student-led discussions designed to facilitate role transition of the doctorally-prepared nurse practitioner. Seminars include topics related to integration and application of nursing and other health-related theories and models in rural nurse practitioner-delivered care.

Prerequisite: Admission to the DNP program.

NURS5866 - DNP Seminar II

Credits: 1

Instructor and students lead discussions designed to facilitate role transition of the doctorally prepared nurse practitioner. Seminars include topics related to transitioning from nurse practitioner students into practicing nurse practitioners.

A&S College Core 2015 **Course changes effective Fall 2023** - Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891, NURS 5862 and NURS 5883 OR NURS 5891, NURS 5875 and NURS 5876.

NURS5891 - DNP Project I

Credits: 3

In collaboration with a facility, learners will examine clinically relevant data to target a practice and/or patient outcome for improvement. Learners will collect and critically appraise related evidence and develop an intervention, including an outcome evaluation plan.

A&S College Core 2015 **Course changes effective Summer 2023** - Credits: 1 credit; Description: In collaboration with a health-related organization, learners will identify a problem, concern, or question that can be addressed through a rapid cycle quality improvement project for a Doctor of Nursing Practice project. Prerequisite: NURS 5873, NURS 5877 and NURS 5827 or NURS 5882, NURS 5883 and NURS 5828.

Prerequisite: NURS 5850.

NURS5892 - DNP Project II

Credits: 3

Continuation of NURS 5891, DNP Project I. In collaboration with facility, learners will implement the proposed clinical intervention, evaluate the outcome, and professionally disseminate the results.

A&S College Core 2015 **Course changes effective Fall 2023** - Description: Continuation of NURS 5891, DNP Project I. In collaboration with a health-related organization, learners will plan and begin to implement a quality improvement project. Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891 AND NURS 5875, NURS 5876 OR NURS 5862, NURS 5883.

NURS5893 - DNP Project III

Credits: 1

Continuation of NURS 5892, DNP Project II. In collaboration with a health-related organization, learners will continue to implement their scholarly quality improvement project.

Prerequisite: NURS 5874, NURS 5892 and NURS 5866 or NURS 5863, NURS 5892, NURS 5866.

NURS5894 - DNP Project IV

Credits: 2

Continuation of NURS 5893, DNP Project III. In collaboration with a health-related organization, learners will finalize their scholarly quality improvement project and disseminate the findings.

Prerequisite: NURS 5893.

Family Nurse Practitioner Specialty Courses

NURS5825 - Advanced Health Assessment and Clinical Decision-Making for Family Nurse Practitioners

Credits: 4

Advanced health assessment and diagnostic decision-making for family nurse practitioners. Builds on previous assessment skills and covers specialty exams used in primary care. Emphasizes a systematic diagnostic reasoning approach that leads to accurate clinical decision-making. Additionally, course focuses on sociocultural influences, growth and development, and gender concepts.

A&S College Core 2015 **Course changes effective Fall 2022** - Name: *Advanced Health Assessment for Family NPs*; Credits: 2 credits; Description: *Advanced primary care assessment skills for family nurse practitioners. Focusing on specialty examination techniques for all body system.* Prerequisite: NURS 5140 and NURS 5165.
Prerequisite: NURS 5166, NURS 5815, NURS 5820, and NURS 5824.

NURS5827 - Skills for Family NP

Credits: 3

Developing skills for advanced practice nursing and practice management for the family nurse practitioner.

Prerequisite: NURS 5824, NURS 5825, NURS 5871, and NURS 5875.

NURS5871 - Wellness for Adults in Primary Care

Credits: 3

Provision of wellness primary care for adults across the lifespan, including primary and secondary prevention.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: *NURS 5165 and NURS 5140.*
Prerequisite: NURS 5140 and NURS 5825.

NURS5872 - Practicum for Wellness in Primary Care

Credits: 3

Clinical practicum for NURS 5871, Wellness for Adults in Primary Care.

A&S College Core 2015 **Course changes effective Summer 2023** - Name: *Practicum: Diagnosis and Management of the Primary Care Client for the FNP I*; Credits: 5 credits; Description: *Clinical practicum focused on beginning level diagnostic and clinical management competencies for the FNP.* Prerequisite: *NURS 5873, NURS 5877, and NURS 5827.*

Prerequisite: NURS 5140 and NURS 5825.

NURS5873 - Primary Care for Children, Adolescents, and Families

Credits: 3

Provision of primary care for children, adolescents, and families across the lifespan, including primary and secondary prevention.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: NURS 5871, NURS 5875, NURS 5824, and NURS 5825.

Prerequisite: NURS 5440, NURS 5830, NURS 5871 and NURS 5872.

NURS5874 - Practicum for Primary Care for Children, Adolescents, and Families

Credits: 3

Clinical practicum for NURS 5873, Primary Care for Children, Adolescents, and Families.

A&S College Core 2015 **Course changes effective Fall 2023** - Name: *Diagnosis and Management of the Primary Care Client for the FNP II*; Credits: 5 credits; Description: *Clinical practicum that allows students to continue to practice and refine competencies in the FNP role.* Prerequisite: NURS 5872 and NURS 5891.

Prerequisite: NURS 5440, NURS 5830, NURS 5871 and NURS 5872.

NURS5875 - Primary Care for Acute & Chronically Ill Adults

Credits: 3

Diagnosis and management of select acute and chronic illnesses experienced by adults across the lifespan. Primary focus is on those physical and behavioral illnesses with high prevalence in rural primary care.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: NURS 5165 and NURS 5140.

Prerequisite: NURS 5850.

NURS5876 - Practicum for Primary Care for Acute & Chronically Ill Adults

Credits: 3

Clinical practicum for NURS 5875, Primary Care for Acute & Chronically Ill Adults I.

A&S College Core 2015 **Course changes effective Fall 2023** - Name: *Final FNP Practicum*; Credits: 6 credits; Description: *This final clinical experience provides learners with the opportunity to integrate previous learning from the FNP program in the provision of evidence-based health care.* Prerequisite: NURS 5866, NURS 5874, NURS 5892, and NURS 5893.

Prerequisite: NURS 5850.

NURS5877 - Primary Care for Acute & Chronically Ill Adults II

Credits: 3

Continuation of NURS 5875. Diagnosis and management of select acute and chronic illnesses experienced by adults across the lifespan. Primary focus is on those physical and behavioral illnesses with high prevalence in rural primary care.

A&S College Core 2015 **Course changes effective Spring 2023** - Prerequisite: NURS 5871, NURS 5875, NURS 5824, and NURS 5825.

Prerequisite: NURS 5875, NURS 5876 and NURS 5891.

Additional Requirements

Expected Student Learning Outcomes

Graduates will:

1. engage in evidence-based practice to optimize health outcomes; and
2. engage in leadership activities to promote excellence in rural health care.

Core Concepts:

- Transformation:

Transformation includes learning, education, leadership, and nursing as a whole; engaging creativity with theory and evidence-based practice to result in critical reflection and cognitive flexibility.

- Rurality/Frontier

Practice in a low population area where resources and/or access to care are limited and be able to innovate accordingly.

- Service

Providing advanced practice nursing care and services to individuals, families, groups, communities, and populations includes altruism, leadership, decision-making, cooperation, education, listening, problem-solving, person-centered care, fidelity, advocacy, ethical behavior, and practice.

- Comprehensive Global healthcare system perspective

An interconnected and comprehensive global health care system perspective incorporating the following attributes: advocacy, altruism, creativity, ethical conduct, effective communication skills, leadership, problem-solving skills, professionalism, and scholarship.

- Clinical Scholarship

Activities that systematically advance nursing science, including its teaching, research, and practice through rigorous inquiry that 1) is significant to the profession, 2) is creative, 3) can be documented, 4) can be replicated or elaborated, and 5) can be peer-reviewed through various methods and includes discovery, teaching, practice, and integration.

Admission

The University of Wyoming must receive complete application materials for the DNP Program by the application deadline to be considered for fall admission (*the entire DNP application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/ fees. The number of students admitted is limited. Admission is a competitive process and applicants meeting minimum requirements are not guaranteed admission to the program. Admission to the university does not guarantee admission to the DNP program in the School of Nursing.

Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, Admission Criteria & Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for the DNP Program. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP Program Student Handbook - section 6 Scholastic Requirements*).

Curriculum

All DNP students, regardless of concentration will take a set of core courses. In addition to the core courses a group of specialty courses are required for each NP concentration. Students earning the DNP degree will complete a final scholarly project which is integrated into the FMY and PSH curricula.

The DNP core and clinical courses will be delivered using a combination of online courses; synchronous video web-conferencing, and hybrid courses with periodic intensive on-campus experiences. Clinical placements will be arranged at health care facilities in Wyoming, north central Colorado, or southern Montana.

Program of Study

A detailed, semester sequenced DNP-FMY Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP-FMY Program of Study*).

Nursing, D.N.P., Psychiatric Mental Health Nurse Practitioner Concentration

The Psychiatric Mental Health Nurse Practitioner (PSH) concentration prepares advanced practice nurses to provide a full range of psychiatric care. Graduates are prepared to assess, diagnose, and manage, to include prescribing psychotropic medications, for people with chronic and acute psychiatric disorders.

DNP Core Courses

NURS5140 - Pharmacotherapy for Primary Care

Credits: 4

Prepares primary care practitioners in drug therapy management for a variety of client populations with an emphasis on rural practice.

Prerequisite: NURS 5601, NURS 5602, NURS 5603, NURS 5604, NURS 5605, and NURS 5830.

NURS5165 - DNP: Adv Pathophysiology

Credits: 2

A system-based approach is used to explore selected pathophysiological states encountered across the lifespan in primary care. The developmental physiology, etiology, pathogenesis, clinical manifestations, and physiological responses to illness and treatment regimens are examined, providing a basis for the foundation of clinical decisions.

Prerequisite: NURS 5603 , NURS 5604 , NURS 5605 , and NURS 5830

NURS5601 - Theoretical Foundations Advanced Practice Nursing

Credits: 3

An introduction to the discipline of nursing for graduate nursing students

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5602 - Advanced Nursing Leadership

Credits: 3

Focus on developing advanced nursing leadership skills and attributes for interprofessional collaboration to create viability of the profession and health-related practice environments

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5603 - Evidence-Based Practice for Advanced Nursing

Credits: 3

Focuses on the use of EBP to solve clinical, educational, and administrative problems in advanced nursing practice.

Prerequisite: Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5604 - Population and Health Policies

Credits: 3

Emphasis on population health, epidemiology, and health policy related to rural and global health issues.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice

Credits: 3

Emphasis on theoretical and scientific foundations for quality improvement, safety, and informatics in health care.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5820 - Health Behavior Change I: Primary Prevention and Wellness

Credits: 3

This course will cover the application of theories and techniques of health behavior change and principles of epidemiology to health issues from the individual to the community level.

Prerequisite: Admission to the DNP program.

NURS5824 - Advanced Health Assessment and Clinical Decision-Making for Nurse Practitioners

Credits: 2

Builds upon basic nursing assessment skills; includes a human cadaver lab experience to enhance learners' understanding of anatomy, physiology, and pathophysiology, progressing to didactic, hands-on practice, and check-offs of student ability to perform client interviewing and advanced physical assessment techniques. Prepares learners for the clinical decision-making required of nurse practitioners.

A&S College Core 2015 **Course changes effective Fall 2022** - Credits: 3 credits; Description: *Advanced health assessment and diagnostic decision-making for nurse practitioners. Builds on previous nursing assessment skills. Emphasizes person-centered communication skills and a systematic diagnostic-reasoning approach that leads to accurate clinical decision-making. Clinical correlation amongst anatomy, physiology, pathophysiology, and physical examination.* Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5165, NURS 5800, NURS 5805, NURS 5810, and NURS 5865

NURS5830 - Health Behavior Change II: Behavioral Skills for Secondary and Tertiary Prevention

Credits: 3

This course will cover the application of health behavior change skills in advanced nursing practice, including theories/models and techniques, with a focus on chronic illness.

Prerequisite: NURS 5820 and NURS 5865.

NURS5865 - DNP Seminar

Credits: 1

Max Credit (Max. 6)

Instructor and student-led discussions designed to facilitate role transition of the doctorally-prepared nurse practitioner. Seminars include topics related to integration and application of nursing and other health-related theories and models in rural nurse practitioner-delivered care.

Prerequisite: Admission to the DNP program.

NURS5866 - DNP Seminar II

Credits: 1

Instructor and students lead discussions designed to facilitate role transition of the doctorally prepared nurse practitioner. Seminars include topics related to transitioning from nurse practitioner students into practicing nurse practitioners.

A&S College Core 2015 **Course changes effective Fall 2023** - Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891, NURS 5862 and NURS 5883 OR NURS 5891, NURS 5875 and NURS 5876.

NURS5891 - DNP Project I

Credits: 3

In collaboration with a facility, learners will examine clinically relevant data to target a practice and/or patient outcome

for improvement. Learners will collect and critically appraise related evidence and develop an intervention, including an outcome evaluation plan.

A&S College Core 2015 **Course changes effective Summer 2023** - Credits: 1 credit; Description: In collaboration with a health-related organization, learners will identify a problem, concern, or question that can be addressed through a rapid cycle quality improvement project for a Doctor of Nursing Practice project. Prerequisite: NURS 5873, NURS 5877 and NURS 5827 or NURS 5882, NURS 5883 and NURS 5828.

Prerequisite: NURS 5850.

NURS5892 - DNP Project II

Credits: 3

Continuation of NURS 5891, DNP Project I. In collaboration with facility, learners will implement the proposed clinical intervention, evaluate the outcome, and professionally disseminate the results.

A&S College Core 2015 **Course changes effective Fall 2023** - Description: Continuation of NURS 5891, DNP Project I. In collaboration with a health-related organization, learners will plan and begin to implement a quality improvement project. Prerequisite: NURS 5872 and NURS 5891 OR NURS 5862 and NURS 5891.

Prerequisite: NURS 5891 AND NURS 5875, NURS 5876 OR NURS 5862, NURS 5883.

NURS5893 - DNP Project III

Credits: 1

Continuation of NURS 5892, DNP Project II. In collaboration with a health-related organization, learners will continue to implement their scholarly quality improvement project.

Prerequisite: NURS 5874, NURS 5892 and NURS 5866 or NURS 5863, NURS 5892, NURS 5866.

NURS5894 - DNP Project IV

Credits: 2

Continuation of NURS 5893, DNP Project III. In collaboration with a health-related organization, learners will finalize their scholarly quality improvement project and disseminate the findings.

Prerequisite: NURS 5893.

Psychiatric Mental Health Nurse Practitioner Specialty Courses

NURS5826 - Advanced Health Assessment for Psych NPs

Credits: 2

Advanced assessment skills for psychiatric mental health nurse practitioners. Focusing on specialty examination techniques in the mental health setting.

Prerequisite: NURS 5165 and NURS 5140.

NURS5828 - Skills for Psych NP

Credits: 2

Developing skills for advanced practice nursing and practice management for the psychiatric mental health nurse practitioner.

Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

NURS5862 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP I

Credits: 5

Clinical practicum that allows students to continue to practice and refine competencies in the PMHNP role with multiple and complex psychiatric populations.

A&S College Core 2015 **Course changes effective Summer 2023** - Prerequisite: *NURS 5828, NURS 5882, and NURS 5883.*

Prerequisite: NURS 5850.

NURS5863 - Practicum: Diagnosis and Management of the Psychiatric Client for the PMHNP II

Credits: 5

Clinical practicum that allows students to continue to practice and refine competencies in the PMHNP role with multiple and complex psychiatric populations.

A&S College Core 2015 **Course changes effective Fall 2023** - Prerequisite: *NURS 5862 and NURS 5891.*

Prerequisite: NURS 5862, NURS 5883 and NURS 5891.

NURS5864 - Final PSH Practicum

Credits: 6

This final clinical experience provides learners with the opportunity to integrate previous learning from the PMHNP program in the provision of evidence-based health care.

Prerequisite: NURS 5863, NURS 5866, NURS 5892, and NURS 5893.

NURS5880 - Neurobiology & Psychopharm

Credits: 3

The advanced study of neurobiology and psychopharmacology in the treatment of psychiatric disorders across the lifespan. In depth exploration of how the advanced practice psychiatric nurse can utilize pharmacodynamics and pharmacogenetics to inform the clinical decision making in the treatment complex mental illnesses and addiction.

A&S College Core 2015 **Course changes effective Fall 2022** - Name: *Neurobiology and Psychopharmacology;*

Credits: 4 credits; Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5140.

NURS5881 - Psychotherapy Models and Theories for Advanced Practice Mental Health Nursing

Credits: 3

Utilization of psychotherapy frameworks in the care of individuals, families, and groups. Emphasizing the counseling role and skill development of the advanced practice mental health nurse in the assessment, intervention and evaluation of diverse populations across the lifespan. Issues of ethics, rural practice, and diversity are addressed throughout the course.

A&S College Core 2015 **Course changes effective Fall 2022** - Prerequisite: NURS 5140 and NURS 5165.

Prerequisite: NURS 5140.

NURS5882 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Adult, Older Adult, and Vulnerable Populations

Credits: 4

Advanced knowledge of evidence based assessment, diagnosis, treatment, management, and health promotion of adults and aging adults with mental illness. Explore culturally sensitive care among vulnerable populations. Examine the professional, ethical, policy, and practice issues influencing the role of the advanced practice psychiatric nurse.

A&S College Core 2015 **Course changes effective Spring 2023** - Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

Prerequisite: NURS 5440, NURS 5830, NURS 5880 and NURS 5881.

NURS5883 - Advanced Psychiatric Mental Health Nursing Diagnosis and Management for the Child and Adolescent

Credits: 4

Evidenced based assessment, diagnosis, treatment and management of mental health disorders in children and adolescence at the individual, family and community level. Theories of family development including behavioral patterns will be assessed using a culturally sensitive lens. Review of psychotherapy, psychopharmacology, psychoeducation, and health promotion as is developmentally appropriate.

A&S College Core 2015 **Course changes effective Spring 2023** - Prerequisite: NURS 5824, NURS 5826, NURS 5880, and NURS 5881.

Prerequisite: NURS 5850.

Additional Requirements

Expected Student Learning Outcomes

Graduates will:

1. engage in evidence-based practice to optimize health outcomes;

- engage in leadership activities to promote excellence in rural health care.

Core Concepts:

- Transformation:

Transformation includes learning, education, leadership, and nursing as a whole; engaging creativity with theory and evidence-based practice to result in critical reflection and cognitive flexibility.

- Rurality/Frontier

Practice in a low population area where resources and/or access to care are limited and be able to innovate accordingly.

- Service

Providing advanced practice nursing care and services to individuals, families, groups, communities, and populations includes altruism, leadership, decision-making, cooperation, education, listening, problem-solving, person-centered care, fidelity, advocacy, ethical behavior, and practice.

- Comprehensive Global healthcare system perspective

An interconnected and comprehensive global health care system perspective incorporating the following attributes: advocacy, altruism, creativity, ethical conduct, effective communication skills, leadership, problem-solving skills, professionalism, and scholarship.

- Clinical Scholarship

Activities that systematically advance nursing science, including its teaching, research, and practice through rigorous inquiry that 1) is significant to the profession, 2) is creative, 3) can be documented, 4) can be replicated or elaborated, and 5) can be peer-reviewed through various methods and includes discovery, teaching, practice, and integration.

Admission

The University of Wyoming must receive complete application materials for the DNP Program by the application deadline to be considered for fall admission (*the entire DNP application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/ fees. The number of students admitted is limited. Admission is a competitive process and applicants meeting minimum requirements are not guaranteed admission to the program. Admission to the university does not guarantee admission to the DNP program in the School of Nursing.

Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, Admission Criteria & Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for the DNP Program. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP Program Student Handbook - section 6 Scholastic Requirements*).

Curriculum

All DNP students, regardless of concentration will take a set of core courses. In addition to the core courses a group of specialty courses are required for each NP concentration. Students earning the DNP degree will complete a final scholarly project which is integrated into the FMY and PSH curricula.

The DNP core and clinical courses will be delivered using a combination of online courses; synchronous video web-conferencing, and hybrid courses with periodic intensive on-campus experiences. Clinical placements will be arranged at health care facilities in Wyoming, north central Colorado, or southern Montana.

Program of Study

A detailed, semester sequenced DNP-PSH Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, DNP, DNP-PSH Program of Study*).

Nursing, M.S., Nurse Educator/Nurse Leader Concentrations

The MS program is a part-time, online degree open to registered nurses with a minimum of a baccalaureate degree in nursing from a program nationally accredited by CCNE or NLNAC. The MS program has two concentrations: 1) Nurse Educator (NE) and 2) Nurse Leader (NL).

MS Core Courses

NURS5472 - Integrated Advanced Pathophysiology, Pharmacology, and Assessment

Credits: 3

Emphasis on the integration of advanced pathophysiology, pharmacology, and assessment in relation to chronic conditions.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5602 , NURS 5604 ; Co-requisite NURS 5605

NURS5473 - Advancing Healthcare Transform

Credits: 2

Max Credit 2

Emphasis on academic/practice partnerships as avenues for addressing population health and related workforce development.

Prerequisite: Admission to the NURS MS program, NURS 5405, NURS 5410

NURS5483 - Practicum: Rural Healthcare Leadership

Credits: 3

Emphasis on the integration of learning through a practicum experience in educational or healthcare leadership.

Prerequisite: Completion of all required MS courses, corequisite NURS 5473.

NURS5601 - Theoretical Foundations Advanced Practice Nursing

Credits: 3

An introduction to the discipline of nursing for graduate nursing students

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5602 - Advanced Nursing Leadership

Credits: 3

Focus on developing advanced nursing leadership skills and attributes for interprofessional collaboration to create viability of the profession and health-related practice environments

Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5603 - Evidence-Based Practice for Advanced Nursing

Credits: 3

Focuses on the use of EBP to solve clinical, educational, and administrative problems in advanced nursing practice.

Prerequisite: Prerequisite: Admission to the MS-NURS or DNP-DNP programs.

NURS5604 - Population and Health Policies

Credits: 3

Emphasis on population health, epidemiology, and health policy related to rural and global health issues.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

NURS5605 - Informatics and Quality Improvement for Advanced Nursing Practice

Credits: 3

Emphasis on theoretical and scientific foundations for quality improvement, safety, and informatics in health care.

Prerequisite: Admission to the MS-NURS or DNP-DNP program.

Nurse Educator Specialty Courses

NURS5452 - Curriculum Development

Credits: 3

Emphasis on the process of developing curricula in nursing educational or healthcare setting to include evaluation of program outcomes.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5605 , NURS 5472 ; Co-requisite of NURS 5462.

NURS5462 - Teaching Methodologies and Evaluation

Credits: 3

Emphasis on evidence-based teaching methodologies, development of course materials, and evaluation of students learning outcomes.

Prerequisite: Admission to MS; NURS 5405; NURS 5410.

Nurse Leader Specialty Courses

NURS5420 - Leadership Within Health Care Systems

Credits: 3

Emphasis on strategic use of systems and outcomes as a foundation for professional leadership development.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5606, NURS 5472.

NURS5461 - Business of Healthcare

Credits: 3

Emphasis on leading and managing entrepreneurial healthcare opportunities.

Prerequisite: Admission to UW's MS Nursing Program; NURS 5605 , NURS 5472

Additional Requirements

Expected Student Learning Outcomes

M.S. Graduate are prepared to ensure better care, better health, and lower costs through their knowledge, skills, and abilities to:

- Demonstrate competence and caring in the advanced professional nurse role to serve Wyoming, the region, and the world in urban, rural, and frontier health care settings as a provider, leader, and/or educator in the health care system.
- Transform rural health through leadership, service, and clinical scholarship that reflects an interconnected and comprehensive global health perspective.
- Demonstrate an advanced understanding of nursing and other sciences and humanities and integrates this knowledge to manage and improve health care across settings
- Synthesize broad organizational, financial, economic, client-centered, and culturally appropriate concepts from nursing and other sciences to address population health.
- Engage in scholarly inquiry and evidence-based practice to lead change for quality outcomes and implement safe health care to diverse populations in a variety of settings.

Core Concepts:

- Transformation:

Transformation includes learning, education, leadership, and nursing as a whole; engaging creativity with theory and evidence-based practice to result in critical reflection and cognitive flexibility.

- Rurality/Frontier

Practice in a low population area where resources and/or access to care are limited and be able to innovate accordingly.

- Service

Providing advanced practice nursing care and services to individuals, families, groups, communities, and populations includes altruism, leadership, decision-making, cooperation, education, listening, problem-solving, person-centered care, fidelity, advocacy, ethical behavior, and practice.

- Comprehensive Global healthcare system perspective

An interconnected and comprehensive global health care system perspective incorporating the following attributes: advocacy, altruism, creativity, ethical conduct, effective communication skills, leadership, problem-solving skills, professionalism, and scholarship.

- Clinical Scholarship

Activities that systematically advance nursing science, including its teaching, research, and practice through rigorous inquiry that 1) is significant to the profession, 2) is creative, 3) can be documented, 4) can be replicated or elaborated, and 5) can be peer-reviewed through various methods and includes discovery, teaching, practice, and integration.

Admission

The University of Wyoming must receive complete application materials for the MS Program by the application deadline to be considered for fall admission (*the entire MS application process is completed online*). The applicant is responsible to make certain that UW is in receipt of all application materials/fees.

Criteria for admission as well as application instructions and deadlines can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, Admission Criteria/Application*).

Scholastic Requirements

University and College of Health Sciences policies governing scholastic requirements (e.g. major changes, probation and dismissal) apply to students enrolled in the School of Nursing. In addition to university/college requirements, the School of Nursing has further scholastic requirements for the MS Program. These requirements can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, MS Program Student Handbook - section 6 Scholastic Requirements*).

Curriculum

All MS students, regardless of concentration will take a set of core courses. In addition to the core courses, a group of specialty courses are required for each MS concentration.

Program of Study

A detailed, semester sequenced MS Program of Study can be found on the nursing website: www.uwyo.edu/nursing (*click on Nursing Programs, MS, MS Program of Study*).

Pharmacy, Pharm.D.

The School of Pharmacy offers only the four-year curriculum leading to the Doctor of Pharmacy (Pharm.D.) degree. Students admitted to the professional pharmacy program follow a four year program of study leading to the Doctor of Pharmacy Degree. Students complete a total of 146 hours.

In order to keep abreast with changes in pharmaceutical education, the following curriculum is subject to change or modification as required by the accrediting agency. Students should be aware that changes must be expected and they will be included in their academic program. The School of Pharmacy does not plan to change graduation requirements inadvertently, but does reserve the right to change any provisions or requirement deemed necessary at any time within the student's term of residence.

Required Curriculum

ZOO4125 - Integrative Physiology

Credits: 5

Examines how functional organ systems are coordinated and integrated by the CNS and endocrine systems to establish and maintain health. Includes lecture, flipped component and tutorial session. Students must register for lecture and tutorial.

Former Course Number [3120]

Prerequisite: grade of C or higher in ZOO 3115; and/or a Pharmacy 1 standing.

PHCY6100 - Dose Form Design

Credits: 4

Extensively introduces various types of dosage forms, discusses advantages and disadvantages of each. Pharmaceutical calculations are a major component of the course, as well as physicochemical principles involved in dose form stability.

Prerequisite: CHEM 2420 and CHEM 2440.

PHCY6106 - Pharmaceutical Calculations

Credits: 2

Application of basic mathematics and quantitative reasoning to pharmaceutical calculations, emphasizing calculations of doses, dosage requirements, compounding of formulations and parenterals.

Former Course Number [6105]

Prerequisite: MATH 1000 or MATH 1400.

PHCY6110 - Medicinal and Natural Products Chemistry I

Credits: 3

Three-semester series that studies the physicochemical, biochemical and pharmacological properties of substances of natural and synthetic origin that are used as medicinal agents.

Prerequisite: CHEM 2440 and MOLB 3610.

PHCY6140 - Introduction to Social Administrative Pharmacy

Credits: 2

Provides an introduction to socio-cultural, behavioral and administrative principles of pharmacy with a focus on pharmacist roles and their historical evolution, health disparities, health behavior theory and practice philosophy, and a survey of the U. S. health care system.

Prerequisite: Enrollment in the professional program or consent of instructor.

PHCY6160 - Pharmacist Skills I

Credits: 1

Preparation and evaluation of dosage forms is main thrust of course. Laboratory emphasizes manipulative and mathematical skills, prescription formats, packaging and storage as they apply to pharmaceuticals.

Former Course Number [6101]

Prerequisite: concurrent enrollment in PHCY 6100; MATH 2100.

PHCY6102 - Biopharmaceutics and Pharmacokinetics

Credits: 4

Discusses biopharmaceutic and pharmacokinetic aspects of dosage form design. Basic pharmacokinetics and biopharmaceutics are interrelated to clinical applications. Also covers classical kinetics and dissolution.

USP 2015 Code U5C3

Prerequisite: MATH 2200 and PHCY 6100.

PHCY6111 - Medicinal and Natural Products Chemistry II

Credits: 3

Continuation of Medicinal and Natural Products Chemistry I.

Former Course Number [6210]

Prerequisite: Ph1 status in PharmD program or consent of instructor.

PHCY6120 - Advanced Pathophysiology

Credits: 3

Advanced course covering the molecular, cellular, genetic and clinical principles of tissue dysfunction and disease, incorporating clinical lab values and human case studies. This course is primarily designed for Doctor of Pharmacy students who will transition into their clinical rotations. Students will jointly meet once per week with students within PHCY 3450 for interprofessional education revolving around student-led case study presentations.

Former Course Number [6220]

Prerequisite: LIFE 1010, LIFE 1020, CHEM 1020, CHEM 1030, CHEM 2420, CHEM 2440, MOLB 2240, MOLB 3610, ZOO 3115, ZOO 4125.

PHCY6151 - Pharmacy Practice

Credits: 2

Provides didactic content that enables students to accurately prepare and dispense prescription medications.

Former Course Number [6354]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6152 - Therapeutics I

Credits: 3

Emphasizes the role of the pharmacist in pharmaceutical self care, appropriate triage and referral involving prescription, non-prescription pharmaceuticals, complimentary, alternative therapies and devices in community dwelling patients with both acute and chronic self-care conditions.

Former Course Number [6352]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6161 - Pharmacist Skills II

Credits: 1

Provides laboratory and other related experiences that enable students to accurately prepare and dispense prescription medications.

Prerequisite: P1 status in PharmD program or consent of instructor.

PHCY6170 - Introductory Pharmacy Practice Experience-IPPE1

Credits: 1

Provides an early curricular exposure to the roles and functions of pharmacists in their work environment through a shadow experience.

Prerequisite: satisfactory completion of PHCY 6185.

PHCY6480 - Introduction to Community Pharmacy Practice

Credits: 4

Four-week rotation in community pharmacy practice completed under the guidance of a licensed pharmacist. Patient care activities will include, but not be limited to, basic patient and drug therapy assessment, performing medication histories and prospective drug utilization reviews, basic patient counseling and active participation in the medication distribution process.

Prerequisite: grade of C or higher in PHCY 6352 and 6354 and satisfactory completion of all courses within the P1 curriculum (i. e. P2 standing).

PHCY6482 - Introduction to Hospital Pharmacy Practice

Credits: 4

Four-week rotation in hospital pharmacy practice completed under the guidance of a licensed pharmacist. Patient-care activities will include basic drug therapy and patient assessment, prospective drug utilization reviews, participating in the hospital's medication distribution process, performing calculations, compounding preparations and understanding pharmacy's role within the health-system through interdisciplinary interactions.

Prerequisite: grade of C or higher in PHCY 6352 and 6354 and satisfactory completion of all courses within the P1 curriculum (i. e. P2 standing).

PHCY6215 - Medicinal and Natural Products Chemistry III

Credits: 3

Continuation of Medicinal and Natural Products Chemistry II.

Former Course Number [6211]

Prerequisite: PHCY 6111.

PHCY6230 - Pharmacology I

Credits: 4

First semester of a one-year series. Studies action of chemical agents on living systems to include pharmacodynamics, toxicology, and clinical therapeutics. Concepts are emphasized through case presentations and discussion.

Prerequisite: PHCY 4450.

- PHCY 6230 - Pharmacology I Discussion Credits: 0

PHCY6240 - Research and Evaluation Methods in Pharmacy

Credits: 3

The course focuses on research design and statistical analyses, as well as pharmaco-economic, pharmacoepidemiology and public health concepts and methods for evidence-based practice applications and health care policy development.

Prerequisite: MATH 2200 and PharmD program P2 status.

PHCY6245 - Patient/Professional Interactions

Credits: 3

Focuses on psychosocial and communication concepts pertaining to human interactions, with application to professional practice environments and clinical counseling situations.

USP 2015 Code U5C3

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6260 - Pharmacist Skills III

Credits: 1

This course is the third in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in the different subdisciplines represented in the SOP curriculum.

Prerequisite: P2 status in PharmD program or consent of instructor.

PHCY6231 - Pharmacology II

Credits: 4

Second semester of a one-year series. Continuation of PHCY 6230. Lecture with separately scheduled discussion section.

Prerequisite: PHCY 6230.

- PHCY 6231 - Pharmacology II Discussion Credits: 0

PHCY6246 - Pharmacy Management, Marketing and Finance

Credits: 3

Examines management functions and leadership in various types of contemporary pharmacy practice including pharmacy services, drug distribution, technology, human resources, marketing, finance and accounting.

Prerequisite: P2 status.

PHCY6251 - Therapeutics II

Credits: 3

Introduces pharmacotherapeutic principles employed in the patient care process for managing select disease states and specific patient populations. The course emphasizes the role of evidence-based medicine in developing pharmaceutical care plans (e. g. recommending therapy, evaluating and monitoring the efficacy and safety of medications).

Prerequisite: PHCY 6120, PHCY 6230.

PHCY6261 - Pharmacist Skills IV

Credits: 2

This course is the fourth in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P2 status in PharmD program or consent of instructor.

PHCY6270 - Intermediate Pharmacy Practice Experience-IPPE2

Credits: 1

An advanced exposure to the practice of pharmacy in health care environments.

USP 2015 Code U5C3

Prerequisite: satisfactory completion of PHCY 6170.

PHCY6312 - Clinical Toxicology

Credits: 3

Focuses on biological and pharmacological effects of environmental, chemicals, OTC and prescription drug poisoning cases. Emphasis will be placed on the use of historical, laboratory and clinical data to diagnose and develop clinical management approaches for both acute and chronic poisoning cases.

Prerequisite: PHCY 6230, MOLB 3610.

PHCY6341 - Pharmacy Practice Law

Credits: 3

Coverage of state, federal and local laws and regulations which relate directly to the practice of pharmacy. The Wyoming Pharmacy Act serves as a model for analogous laws in other states. Case law at the federal and state levels affecting pharmacy practice is analyzed and discussed.

Prerequisite: PH3 or consent of instructor.

PHCY6344 - Pharmacy Ethics

Credits: 1

Focuses on ethical issues confronting pharmacists in practice, pharmacy as a profession, the health care delivery system and society.

Former Course Number [6280, 6385]

Prerequisite: enrollment in the doctor of pharmacy professional program.

PHCY6350 - Therapeutics III

Credits: 4

Provides an overview of the treatment of selected disease states. Students will develop skills in providing patient-centered care as a medication expert, interpreting evidence, and formulating, monitoring, and adjusting care plans. Course will build upon skills learned in PHCY 6251.

Prerequisite: grade of C or higher in PHCY 6251.

PHCY6357 - Clinical Pharmacokinetics

Credits: 2

Course will provide the student with an overview of the clinical application of pharmacokinetic concepts as used in providing quality patient care. Principles of pharmacokinetics may be applied to the therapeutic use of all medications, including those inherently discussed during this course.

Prerequisite: PHCY 6102.

PHCY6360 - Pharmacist Skills V

Credits: 1

This course is the fifth in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6300 - Sterile Products

Credits: 2

An introduction to the preparation and clinical application of sterile dosage forms in accordance with USP 797 and other related standards. Emphasizes basic principles related to preparation, dispensing and administration of parenteral medications in health care settings.

Former Course Number [6103]

Prerequisite: PHCY 6100, PHCY 6160, PHCY 6106, and concurrent enrollment in PHCY 6301.

PHCY6301 - Sterile Products Laboratory

Credits: 1

A hands-on training in techniques used to prepare, dispense and administer parenteral admixtures, parenteral nutrition, chemotherapy and ophthalmics forms in accordance with USP 797 and other related standards.

Former Course Number [6104]

Prerequisite: PHCY 6100, PHCY 6160, PHCY 6106 and concurrent enrollment in PHCY 6300.

PHCY6340 - Health Care Policy and Advocacy

Credits: 2

Prepares the future pharmacist leader to analyze and engage in professional advocacy and the healthcare policy process at the local, state and national level. Content will include details of the U. S. healthcare system, health policy, the policy-making process, key stakeholders' roles, sociocultural influences and current issues.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6351 - Therapeutics IV

Credits: 4

Provides the student with an overview of the treatment of complex disease states. Students will build on their patient-centered skills from PHCY 6350 by interpreting evidence, prioritizing patient needs, and formulating and monitoring evidence-based care plans. These skills will be essential as students begin advanced pharmacy practice experiences.

Prerequisite: grade of C or higher in PHCY 6350.

PHCY6353 - Drug Literature Application

Credits: 2

This course is designed to provide students with the fundamental knowledge and skills to practice evidence-based pharmacotherapy. Topics include: evaluation of drug information requests, informatics, understanding drug information resources, development and execution of search strategies, primary literature and research design analysis, and writing and presentation skills.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6361 - Pharmacist Skills VI

Credits: 2

This course is the sixth and final course in a series that will allow students to practice what they learn during didactic class time with an integrated approach that meaningfully pulls in different subdisciplines represented in the SOP curriculum.

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6370 - Advanced Pharmacy Practice Experience-IPPE3

Credits: 2

Designed to prepare the student for 4th year advanced pharmacy practice experience (APPE) activities by discussion of

logistics, professionalism, regulatory issues, portfolio requirements and assessment tools. In addition, students will continue building their clinical skills through a patient care practice experience.

USP 2015 Code U5C3

Prerequisite: P3 status in PharmD program or consent of instructor.

PHCY6485 - Reflective Learning in Pharmacy

Credits: 1

Max Credit (Max. 4)

Designed to help prepare P4 pharmacy students to be knowledgeable and well-rounded practitioners. Provides an opportunity to reflect on rotation experiences, give professional level presentations, and exposure to content not covered elsewhere in curriculum. Course includes guest speakers, Pharm. D. seminars, assessment activities, job/residency fairs, P4 portfolio, and reflective writing.

USP 2003-2014 Code [COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.
Students complete 3 sections of PHCY 6485, 1 credit each.

PHCY6470 - Internal Medicine I

Credits: 4

An advanced practice experience to develop skills as a medication expert within an inpatient internal medicine or family medicine experiential setting. Students will coordinate, collaborate, and communicate among themselves, their preceptor, and other members of the interprofessional healthcare team to provide patient-centered care.

USP 2003-2014 Code [COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6473 - Ambulatory Pharmaceutical Care

Credits: 4

An experiential course focusing on the pharmacist as the drug expert in a multidisciplinary health care team. Students will provide direct patient care to patients in an outpatient setting.

USP 2015 Code U5C3

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.
(Students complete a second semester of either Internal Medicine or Ambulatory Care)

PHCY6471 - Internal Medicine II

Credits: 4

Course is a continuation of PHCY 6470 in which students take on increasing responsibility and/or more complex patient cases to develop skills as a medication expert in the acute care setting. Students will continue providing patient-centered care by collaborating with their preceptor and other members of the interprofessional healthcare team.

USP 2015 Code U5C3

Prerequisite: PHCY 6470.

PHCY6474 - Ambulatory Pharmacy Care II

Credits: 4

Course is a continuation of PHCY 6473 in which students will take on increasing responsibilities, develop an expanded understanding for systems management, and further advance their clinical skills as medication experts in the outpatient setting.

USP 2003-2014 Code [COM3]

Prerequisite: PHCY 6473.

PHCY6481 - Advanced Community Pharmacy

Credits: 4

An advanced practice experience in community pharmacy designed to build upon introductory experiences and promote active participation in caring for patients in this practice setting. Students will spend 25-30 of their time in non-dispensing activities (e. g. screenings, in-depth counseling, MTM, immunizations, self-care treatment, community presentations, etc.).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6483 - Advanced Institutional Pharmacy

Credits: 4

An advanced practice experience in institutional/hospital pharmacy designed to build upon introductory experiences and promote active participation within the health-system through interdisciplinary interactions, projects, presentations, and patient care activities. Students will devote at least 50 of their time to nondispensing activities (e. g. monitoring meds, consults, discharge counseling, medication reconciliation, inservices).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6465 - Elective Rotation In:

Credits: 4

Max Credit (Max. 16)

Elective advanced pharmacy practice experience that is available in a variety of practice environments (e. g. direct patient care settings, management, research, and other pharmacy-related locations). Rotation requires active participation and application of knowledge, skills, values, and attitudes.

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

Students complete 4 sections of PHCY 6465, 4 credits each.

- Students complete 7 hours of electives during the P1-P3 year.

Total Hours 146

Fourth Year [PH4]:

Consists of nine experiential rotations of four credit hours each and three reflective learning weeks. Rotations are considered full-time. Students may not enroll in any other coursework concurrent with rotations. Consequently, all other coursework (107 credits) must be satisfactorily completed before enrollment in P4 coursework. Note: Students will be required to live in locations other than Laramie when enrolled in experiential rotations. Responsibility for living cost and travel arrangements associated with experimental rotations rests with the student. Students participating in all experimental activities will be required to have a vehicle or an acceptable approved alternative.

Students must complete the following Core or Required Experiential Rotations (subject to change):

PHCY6470 - Internal Medicine I

Credits: 4

An advanced practice experience to develop skills as a medication expert within an inpatient internal medicine or family medicine experiential setting. Students will coordinate, collaborate, and communicate among themselves, their preceptor, and other members of the interprofessional healthcare team to provide patient-centered care.

USP 2003-2014 Code [COM3]

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6473 - Ambulatory Pharmaceutical Care

Credits: 4

An experiential course focusing on the pharmacist as the drug expert in a multidisciplinary health care team. Students will provide direct patient care to patients in an outpatient setting.

USP 2015 Code U5C3

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6471 - Internal Medicine II

Credits: 4

Course is a continuation of PHCY 6470 in which students take on increasing responsibility and/or more complex patient cases to develop skills as a medication expert in the acute care setting. Students will continue providing patient-centered care by collaborating with their preceptor and other members of the interprofessional healthcare team.

USP 2015 Code U5C3

Prerequisite: PHCY 6470.

or

PHCY6474 - Ambulatory Pharmacy Care II

Credits: 4

Course is a continuation of PHCY 6473 in which students will take on increasing responsibilities, develop an expanded understanding for systems management, and further advance their clinical skills as medication experts in the outpatient setting.

USP 2003-2014 Code [COM3]

Prerequisite: PHCY 6473.

PHCY6481 - Advanced Community Pharmacy

Credits: 4

An advanced practice experience in community pharmacy designed to build upon introductory experiences and promote active participation in caring for patients in this practice setting. Students will spend 25-30 of their time in non-dispensing activities (e. g. screenings, in-depth counseling, MTM, immunizations, self-care treatment, community presentations, etc.).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

PHCY6483 - Advanced Institutional Pharmacy

Credits: 4

An advanced practice experience in institutional/hospital pharmacy designed to build upon introductory experiences and promote active participation within the health-system through interdisciplinary interactions, projects, presentations, and patient care activities. Students will devote at least 50 of their time to nondispensing activities (e. g. monitoring meds, consults, discharge counseling, medication reconciliation, inservices).

Prerequisite: grade of C or higher in PHCY 6351 and PHCY 6357.

- Plus 4 Elective Rotations (PHCY 6465)

Social Work, M.S.W.

Want to make a difference in the world? Join our MSW program and accelerate into bold thinking and professional leadership via multiple paths in human services. Our MSW's advocate for change for a better world! Join us.

Admission Requirements for the Standard MSW Program

- A baccalaureate degree from a nationally accredited college or university that reflects a broad liberal arts preparation. This consists of having completed at least 21 credit hours in social and behavioral sciences and 6 credit hours each in natural sciences, humanities, visual and performing arts, and quantitative reasoning;
- A human biology course (beyond introductory biology), receiving a grade of C or better;
- A statistics course, receiving a grade of C or better;
- An undergraduate cumulative grade point average (GPA) of 3.000 or above on a 4-point scale.

Admission Requirements for the Advanced Standing MSW Program

- A bachelor's degree in Social Work from a Council on Social Work Education accredited social work program;
- An undergraduate social work GPA of 3.250 or above;
- An overall undergraduate GPA of 3.000 or above;
- Received a B or better and/or a satisfactory grade in BSW Field Education Practicum.

*International students have special requirements for admission to UW. All are encouraged to contact the International Students and Scholars Office for details before applying.

All Applicants

All applicants will be evaluated on:

- Intellectual and personal qualities essential to the successful practice of social work, such as sensitivity and responsiveness in relationships, concern for the needs of others, adaptability, good judgment, creativity and integrity;
- Commitment to social justice and equality;
- Written and verbal communication skills;
- Professional references; and
- Compatibility of career goals with the MSW program's advanced generalist perspective.

All applicants meeting minimum criteria will be considered for admission. Admitted applicants will be required to complete a criminal background check through the College of Health Sciences.

Program Specific Degree Requirements

All incoming students enter the MSW program in the summer semester of their first year, completing introductory and/or bridge courses as needed for their specific program phase. The MSW program is divided into two levels: generalist and advanced generalist. The generalist year of the MSW program prepares students without a BSW degree for the advanced generalist curriculum in the second year. Students who have already obtained their BSW degree may apply for Advanced Generalist in the MSW program. These students complete only the second-year courses.

Master of Social Work Field Practicum

All students, regardless of status, participate in a field practicum experience, starting in their first fall semester. New students submit an initial application upon formal admission to the program.

Foundation students will complete 900 hours in practicum over the course of their two years of study, 400 and 500 hours respectively. Advanced Standing students will complete 500 hours in their one year of study. All students in practicum will take a corresponding field seminar class each semester.

Grading is done as Satisfactory/Unsatisfactory. Receiving a grade of U is considered a failing grade and can result in termination from the practicum. If the practicum is terminated, the student may be offered a remediation plan to retake the required hours. This opportunity is only offered one time. The student may also be referred to the DOSW faculty for review according to the Student Academic and Professional Performance policy.

Specific information and procedures relating to all aspects of the field practicum experience can be found in the Field Practicum Manual located on the Division of Social Work's website.

Master of Social Work

- Students complete all SOWK required courses.
- Students complete either the SOWK 5755 Capstone course or the optional SOWK 5960 - Thesis Research.

For students who complete the Capstone course:

- Complete SOWK 5755. The SOWK 5755 portfolio project requires a minimum of 2 credit hours, usually taken as 1 credit in the fall semester and 1 credit in the spring of the advanced year.
- A final written paper with oral defense is required.
- Thesis is NOT required.

For students who choose the optional thesis:

- Complete SOWK 5960 - Thesis Research. SOWK 5960 requires a minimum of 4 credit hours, usually take as 2 in the fall semester and 2 in the spring semester.
- Students who choose to produce a thesis are required to carry out original research.
- Thesis proposal defense, thesis implementation, and final defense are required per university regulations for a thesis project.

Speech-Language Pathology, M.S.

Earn a Master of Science (M.S.) in speech-language pathology, our program is accredited by ASHA's CAA and includes 3 semesters of on-campus coursework and clinic work followed by 3 semesters of distance education and external clinical placements.

Accreditation

The Master of Science in Speech-Language Pathology is a professional degree program that includes 61-64 semester credit hours of enrollment (see typical programs below). Students may pursue either a thesis or non-thesis track during their graduate studies. Both tracks lead to eligibility for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), granted by the Council for Clinical Certification in Audiology and Speech-Language-Pathology (CFCC), which is a council serving the American Speech-Language Hearing Association. Graduates are also eligible for the Wyoming license in speech-language pathology. A supervised Clinical Fellowship Year (CFY) is required beyond the graduate degree for certification.

Accreditation. The Master's of Science (MS) education program in speech-language pathology {residential} at the University of Wyoming is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Typical Programs of Study

There are two programs of study for the MS SLP program. The Plan A is the thesis option (64-credit hour program), and Plan B is the non-thesis option (61-credit hour program). The Plan A (thesis) option requires and 38 credits of graduate academic work (including 4 credits of SPPA 5960 Thesis Research) and 26 credits of graduate clinical practicum. The Plan B (non-thesis) option requires 35 credits of graduate academic work (including 1 credit of SPPA 5961 Graduate Projects/Oral Comprehensive Exam) and 26 credits of graduate clinical practicum.

35-38 Hours of Graduate Academic Work Usually Includes:

SPPA5020 - Phonological Assessment and Intervention

Credits: 3

Emphasis on normal phonetic and phonologic development, diagnosis and clinical management of articulatory and phonological disorders.

Prerequisite: SPPA 3210.

SPPA5140 - EBP and Evaluation Procedures in Communication Disorders

Credits: 4

Focuses on research and evaluation procedures in speech-language pathology. Topics include evidence-based practice, evaluating research, an overview of models of disability across applied settings, assessment and evaluation processes including interviewing, understanding tool psychometrics, and using norm-based referenced tools, criterion-based measurements, and dynamic assessment.

Prerequisite: Acceptance to the University of Wyoming's graduate SLP program.

SPPA5280 - Early Language Intervention

Credits: 3

Principles and techniques of language assessment and intervention for preschoolers, infants, and low-functioning individuals.

Prerequisite: SPPA 3160.

SPPA5220 - Voice Disorders

Credits: 3

Study of the etiology, assessment, and remediation of voice disorders. Includes a discussion of preventing disorders, maintaining a healthy voice, and normal changes in voice. Presentation of rehabilitation options for laryngectomized speaker.

Prerequisite: SPPA 3265.

SPPA5130 - Adult Neurogenic Disorders

Credits: 4

This course will cover acquired neurogenic communication disorders. Topics include language disorders (focusing on Aphasia) as well as cognitive-communication disorders (i. e. , traumatic brain injury, Right Hemisphere Dysfunction, and Neurocognitive disorder). This graduate course provides 1) a basic understanding of the neuroanatomical/physiological basis and 2) instruction regarding evaluation and treatment methods.

Prerequisite: SPPA 4380.

SPPA5330 - School-Age Language Intervention

Credits: 3

Principles and techniques of language assessment and intervention for school-age children and adolescents with particular attention to service delivery issues in schools.

Prerequisite: SPPA 3160.

SPPA5120 - Stuttering

Credits: 2

Theories of etiology, symptoms of the problem, diagnosis and treatment of childhood non-fluency and various approaches to therapy for the adult stutterer.

Prerequisite: graduate level standing.

SPPA5110 - Craniofacial Disorders

Credits: 2

Studies communication disorders related to cleft lip and palate disorders and associated craniofacial sequences and syndromes. Assessment and treatment of these communication disorders is presented in the context of interdisciplinary management. Surgical and nonsurgical treatment procedures employed to manage speech problems associated with velopharyngeal insufficiency are included.

Prerequisite: SPPA 3265, SPPA 2210.

SPPA5230 - Dysphagia

Credits: 3

Provides information regarding the anatomy and physiology of the adult and pediatric swallowing mechanisms, the diagnosis of dysphagia and feeding disorders using clinical and instrumental approaches, the medical diagnoses for which dysphagia is a common symptom, and methods that are commonly used to treat dysphagia and feeding disorders.

Prerequisite: SPPA 3265.

SPPA5100 - Motor Speech Disorders

Credits: 2

Evaluation and treatment of motor speech disorders. Topics will include characteristics of disordered speech associated with neurological impairments/diseases; methods for evaluating communication disorders associated with dysarthria, apraxia of speech, and other neurological and acquired conditions, and treatment approaches.

Prerequisite: SPPA 4380 or a course covering neuroanatomy/physiology of normal and disordered communication.

SPPA5210 - Augmentative and Alternative Communication

Credits: 2

Selection, design, and application of augmentive and alternative communication (AAC) systems to enhance communication, education, and quality of life for individuals with development and acquired disorders.

SPPA5380 - Professional Practice

Credits: 3

Max Credit (Max. 9)

Emphasizes issues related to professional practice of speech-language pathology, such as professional ethics, scope of practice, professional standards, and techniques of counseling clients. This course applies to speech-language pathologists working in either the medical or school setting. This course prepares the speech-language pathologist to collaborate with other professional in the workplace through discussion and activities of inter-professional practice and education (IPP and IPE).

Prerequisite: graduate standing in Communication Disorders and consent of instructor.

SPPA5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

SPPA5961 - Graduate Projects

Credits: 1-4

Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: must be enrolled in Plan B program and have departmental approval.

26 Hours of Graduate Clinical Practicum Include:

SPPA5030 - Clinical Practicum

Credits: 1-4

Max Credit (Max. 12)

Supervised clinical experience with speech, language, and hearing disordered children and adults under supervision of University of Wyoming Speech and Hearing Clinic faculty.

Prerequisite: matriculating graduate students only.
(14 credits total required)

SPPA5270 - Educational Practicum

Credits: 1-12
Max Credit (Max. 12)

Under supervision, the student is given increased responsibility for performing speech and language assessments, hearing screenings, and treatment of children in an educational setting. Students will relate to other educational personnel and counsel teachers and families about communication disorders.

Prerequisite: completion of at least two semesters (including summer) of approved graduate coursework and clinical practicum (SPPA 5030); and approval of faculty.
(6 credits total required)

SPPA5290 - Medical Practicum

Credits: 1-12
Max Credit (Max. 12)

Under supervision, the student is given increased responsibility for performing speech and language assessments, hearing screenings and treatment of children and adults in a medical setting. Students relate to other medical and clinical personnel and counsel professionals and families about communication disorders.

Prerequisite: Completion of at least two semesters (including summer) of approved graduate coursework and clinical practicum; and approval of faculty.
(6 credits total required)

Note:

Note: Specific degree requirements (course name and content), may change based on departmental decisions or requirement changes from accreditation and licensure bodies.

Additional Information

Admissions to the M.S. Degree Program in Speech-Language Pathology

Admission to the master's program in speech-language pathology is made on a competitive basis. We accept students to start in the fall of each year. For application, admission, and a description of the program, see the division website. Applicants must have completed a bachelor's degree or equivalent from a regionally accredited institution. All applicants should have at least a 3.000 cumulative GPA (scale of 4.000).

Additional required undergraduate coursework and discipline specific coursework.

Admitted students must also have taken required coursework in the 4 Foundational Areas (Biological Sciences, Physical Sciences, Social/Behavioral Sciences, and Statistics). For the UW M.S. SLP program, admitted students must also have completed coursework in phonetics; speech & language development; anatomy and physiology of speech, hearing, and swallowing; audiology; neural basis of communication; and aural rehabilitation. Coursework in each of these areas is needed in order to meet the requirements of the Council for Clinical Certification in Audiology and Speech-Language-Pathology (CFCC) certification requirements and/or in order to graduate from the UW MS SLP program. Students missing any of these courses must complete requirements in order to be considered eligible for the M.S. in SLP degree.

Application Procedure

Applications to our master's program must be made through an electronic, centralized application service: the Communication Sciences and Disorders Centralized Application Service for Clinical Education in Audiology and Speech Language Pathology (CSDCAS). Instructions and application procedures are available at <https://csdcas.liasoncas.org/>. Check the division web site in September for instructions.

Applicants will be notified of the division's decision on acceptance, alternate, or denial by mid-March. Applicants must respond to the offer by April 15. Alternates may be offered positions that become available after April 15.

International Students

For all International students, the university must determine whether financial resources are sufficient for study here.

International students from non-English speaking countries need a TOEFL score of 600 to show English proficiency. Additional sources of evidence may be requested by the division to make a final decision. English proficiency must be sufficient for success in graduate school and certification as a speech-language pathologist in the United States, even if the applicant intends to return to the native country.

Conditional Status

An applicant may be admitted conditionally if he or she does not meet the GPA requirements for full admission, and the Division determines that there are sufficient areas of strength for success in graduate school in comparison to other applicants. Conditions will be placed on admission such as graduate grade point average, performance criteria, or completion of certain courses.

Requirements Following Offer of Admission

Students who accept an offer of admission to the program must then provide numerous pieces of required documentation for admission to UW and program, and will also need to be responsive to emails from the Division and faculty throughout onboarding.

Criminal Background Check

Admission to the graduate program in speech-language pathology is contingent upon passing a criminal background check. Each student recommended for admission into program will be required to obtain, pay, and pass a criminal background check. Additional background checks are routinely required by schools, hospitals, and other agencies that participate in the clinical education of our students. The results of the background checks may determine admission and/or ability to complete the UW M.S. SLP program. Please see the College of Health Sciences web site for the policy and procedures document.

Vaccination Requirements

Students' admission to our program is contingent on verification of vaccinations, including COVID-19 vaccination. Other medical information (TB test) will also be requested. Admitted students can request a COVID-19 vaccination exemption from the University, but keep in mind that external clinical placements have their own processes and are not bound to accept University of Wyoming determinations. Students who are not vaccinated may be at risk for extended programs of study and/or inability to complete the degree by completing required and approved externships.

Graduate Student Outcome Data

As of September 2021, 98.04% of MS SLP students completed the program "on-time" over the last three years, 100% obtained employment, and reported Praxis Exam pass rate was 100%.

Program Specific Graduate Assistantships

Financial help for graduate students is available each year through the department with assistantships and other funding. Typically, graduate assistantships include one-half tuition support and a monthly stipend. These assistantships require the student to spend 10 hours per week assisting faculty members in teaching and research. Graduate Assistantships and scholarship awards are competitive and based on past academic performance, evidence of professional promise, and letters of recommendation.

Differential Tuition

The graduate program in speech-language pathology has a differential tuition rate. See the Division website and/or fee book for details.

WWAMI Medical Education

The WWAMI Medical Education Program is Wyoming's medical school. Our students are admitted into the University of Washington School of Medicine, complete their foundation phase in Laramie at UW, and finish their medical education in the WWAMI region.

Required Courses

HM6710 - Fund. Medical Sci. & Research

Credits: 1
Max Credit 9

Comprehensive introduction to foundational basic science and research concepts in medicine. Topics covered include

molecular and cell biology; human physiology, genetics and biochemistry; community health and disease; clinical epidemiology, research study design and data analysis. Incorporates fundamental principles of anatomy, pathology, and pharmacology, and medicine in society.

Restricted Restricted to WWAMI medical students

HM6603 - Clinical Studies

Credits: 2

Instruction in communication skills, interviewing techniques, physical examination, documentation and clinical reasoning. The course will include hospital based patient encounters and developing comfort and introduction to the physical role.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6720 - Infection & Immunity

Credits: 1

Max Credit 7

Comprehensive introduction to the fundamentals of the immune system; microbiology; infectious diseases; inflammation and repair. Topics covered include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, and the basis of immunologic diagnostics. Integrates relevant principles of anatomy, pathology, and pharmacology and medicine in society.

Restricted Restricted to WWAMI medical students

HM6730 - Cancer, Hormones & Blood1

Credits: 1

Max Credit 7

Comprehensive introduction to the fundamentals of endocrinology, hematology, and oncology. Topics covered include endocrine regulation of metabolism; normal physiology and pathophysiologic mechanisms responsible for clinically important endocrine disorders; disturbances in red cell, white cell and platelet production; abnormalities of hemostasis; and malignant neoplasia. Integrates relevant principles of anatomy, pathology and pharmacology, and medicine in society.

Restricted Restricted to WWAMI medical students
(7 credits required)

HM6602 - Introductory Primary and Continuity Care Clerkship

Credits: 2

Introduces medical students to continuity of care by working with practicing physicians. The course demonstrates how to work with an individual to help them achieve optimal health, and includes topics in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health and pain management.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

- HM 6740 (5 credits required)

HM6750 - Cardiovascular System

Credits: 5

Max Credit 5

Provides an interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Topics include thoracic anatomy, cardiac electrophysiology, cardiac muscle mechanics, myocardial infarction, and cardiac repair.

Restricted Restricted to WWAMI medical students.

HM6755 - Medicine, Health, & Society 1

Credits: 1

Max Credit 1

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

Restricted WWAMI medical students only.

HM6760 - Respiration and Regulation

Credits: 6

Max Credit 6

Provides an interdisciplinary approach to respiratory and renal-urinary medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Topics include ventilatory mechanics, gas exchange, renal function, and common renal & pulmonary-vascular diseases.

Restricted Restricted to WWAMI medical students.

HM6770 - Head, Neck, & Gut

Credits: 5

Max Credit 5

Integrates discussions of head/neck anatomy, metabolism, and gastrointestinal/liver physiology including physiology and pathophysiology of digestion and hepatic function. Relevant anatomy, pathology, and pharmacology of the gastrointestinal systems will be covered.

Restricted Restricted to WWAMI medical students.

HM6775 - Medicine, Health, & Society 2

Credits: 3

Max Credit 3

This course integrates thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health.

Restricted WWAMI medical students only.

HM6800 - Mind, Brain, Behavior

Credits: 9

Explains the foundational principles of the organization and function of the head, neck, and central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Covers current therapeutic approaches to disease including pharmacological, behavioral, surgical, and other therapies.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

HM6900 - Life Cycles and Reproduction

Credits: 5

Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology.

Prerequisite: Must be enrolled in the WWAMI Medical Education Program.

Total Hrs. 70

Certificate

American Sign Language Studies Certificate

Gain basic foundational skills in American Sign Language (ASL), understand sociocultural aspects of Deaf communities, teach other students the basics of ASL.

The American Sign Language Studies (ASL Studies) certificate provides a basic or beginning understanding of ASL and an introduction to Deaf sociocultural issues. The ASL Studies certificate may be helpful to anyone in the health and education fields in learning to communicate with and understand individuals who are Deaf. The certificate is a nominal recognition for students who wish to pursue more education in the fields of speech-language pathology, sign language interpreter, teacher of the deaf, preschool and K-12 education, audiology, nursing, counseling and other areas. The ASL Studies Certificate is not designed or adequate to meet educational requirements for any specific professional license or certification. The ASL Studies certificate from UW is a nominal recognition of basic or beginning ASL skills and Deaf

culture. It does not prepare or entitle a student or recipient for any certification or licensure from any state or national associates, agencies or governmental bodies. For more information on the ASL Studies learning objectives, see the website: <http://www.uwyo.edu/comdis/american-sign-language/index.html>.

ASL Studies Certificate Requirements:

Students must have earned a grade of A for all three language courses (SPPA 2110, SPPA 2120, and SPPA 4130) in order to be eligible for the certificate. ASL coursework needs to have been completed within the last 5 years in order to pursue the ASL Studies Certificate, exceptions can be granted if the student demonstrated adequate skills during a structured interview with a UW ASL instructor.

Course sequence for the certificate, 16 credits total:

SPPA2110 - American Sign Language I

Credits: 4

Basic comprehension and expression of American Sign Language (ASL), the language used by the Deaf community in the United States. ASL vocabulary, grammar, and pragmatics are taught through lecture, conversation, and storytelling. The direct experience method (using ASL with no voice) is utilized to enhance the learning process.

USP 2015 Code U5H

Former Course Number [4100]

SPPA2120 - American Sign Language II

Credits: 4

Second level of ASL comprehension and expression. ASL vocabulary, grammar, and pragmatics, along with increased fluency, are taught through lecture, conversation, and storytelling. Translation from English to ASL is addressed.

USP 2015 Code U5H

Former Course Number [4120]

Prerequisite: SPPA 2110.

SPPA4070 - Deaf Studies

Credits: 3

Studies deaf culture and deaf history in the United States. Culture topics will include deaf community dynamics, humor, behavior, emotional and social interaction, besides issues involving deaf children as a linguistic minority. History will be discussed from the 1700s to the present in the U. S.

USP 2003-2014 Code U3CS,U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: SPPA 2110.

SPPA4130 - Advanced ASL

Credits: 4

Third level of ASL comprehension and expression. Addresses increased fluency in ASL; register variation for different conversational participants; and specialized vocabulary, including sexuality and religion. Translation from English to ASL is addressed.

Prerequisite: SPPA 2120.

SPPA4140 - Undergraduate Teaching Assistant

Credits: 1

Max Credit (Max. 2)

Students assist instructor in major courses that they have successfully completed, including assisting with lab or practice sessions, providing individual student assistance, and participating in other student outreach activities on behalf of the Division. One semester credit hour requires 4 hours of work per week.

Prerequisite: consent of instructor/department and junior standing.

Community and Public Health

This certificate covers foundational public health concepts, use of epidemiological data, designing evidence-based projects and community collaborations, and building public, political and financial support for public health.

Required Courses

Students must earn a B or better (an A or a B) in all four classes to earn the certificate.

HLED5021 - Creating Conditions for Community Health

Credits: 3

In this course we will analyze and discuss how local, national and international environments impact individual and community health and how to improve health through changes in policy, economic, social, cultural and physical environments. The focus is primarily in the U. S. , though students can choose to focus assignments in other contexts.

Dual Listed HLED 4021.

Prerequisite: graduate standing.

HLED5022 - Unlocking the Potential of Public Health

Credits: 3

Introduces core concepts in community and public health. Using practical exercises and problem based learning, students will investigate how social structures shape our health and how to alter them to improve community.

Prerequisite: Graduate standing or permission of the instructor.

HLED5023 - Using Epidemiology to Build Health

Credits: 3

Focusing on epidemiological questions generated by the student, this course introduces concepts essential to understanding epidemiology, the foundational science of public health. It is focused on using existing epidemiologic data to inform your work.

Prerequisite: Graduate standing or permission from the instructor.

HLED5024 - Increasing Support for PH

Credits: 3

Students learn how to effectively build support for improving the health of their communities. Support includes funding, coalition and partnership building, effective communications with the public and policy makers, and participatory project planning with community stakeholders. In addition, this course will cover how to establish project evaluation frameworks.

Prerequisite: Graduate standing or permission from instructor.

Students may either earn a 12-credit *University Graduate Certificate in Community & Public Health* or a 15-credit *University Graduate Certificate in Community & Public Health, Specializing in [Specialization Name]*.

Approved specialization courses include:

HLED5020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 4020.

Prerequisite: graduate standing or permission of the instructor.

HLED5026 - Rural Community Health

Credits: 3

Max Credit 3

This course invites students to apply principles of community and public health in rural and frontier United States settings. It outlines challenges and assets that a rural or frontier setting brings to improving community health. It is designed to assist students to bridge gaps that rural settings face and create a plan for improvement within their chosen community or state.

Prerequisite: Graduate standing or permission from instructor.

HLED5027 - Emergency Prep and Response

Credits: 3

Max Credit 3

This class provides an overview of emergency management. It teaches students skills that will help them prepare themselves, their families, and their community for natural and human made disasters. The class emphasis will be on active learning via role-playing assignments, communication planning, and personal preparedness plans.

Prerequisite: HLED 3020, OR Senior Standing, OR permission of the instructor

Additional specialization courses may be approved by Community & Public Health faculty.

Endorsement

Adapted Physical Education K-12 Endorsement

In addition to completing the Bachelor of Science degree in physical education teacher education from the University of Wyoming, students can qualify for K-12 endorsements in adapted physical education and/or health education by completing the following course requirements:

Course Requirements

EDEX2484 - Introduction to Special Education

Credits: 3

Designed to meet the needs of education majors for a required course in special education. Students will explore the history of, understanding of and services for individuals with low/high incidence disabilities.

Prerequisite: EDST 2450 completed with a C or better and an institutional GPA of 2.50.

KIN4055 - Adapted Physical Education

Credits: 2

Presents skills necessary to plan, implement and evaluate individualized physical education programs in the least restrictive environment. Acquaints students with current laws, characteristics, assessment instruments and nationally validated programs in physical education for the disabled child.

When Offered (Offered spring semester)

Former Course Number [PEPR 4055]

Prerequisite: KIN 3012.

KIN4065 - Resources in Adapted Physical Education

Credits: 2-3

Max Credit (Max. 3)

Offers flexible credit for students interested in pursuing intensive study of resources for adapted physical education. Required for state endorsement in Adapted Physical Education.

Former Course Number [PEPR 4065]

Prerequisite: grade of C or better in KIN 4055.

KIN4075 - Assessment in Adapted Physical Education

Credits: 3

Designed to provide an overview of the assessment process in adapted physical education. Developmentally and disability appropriate psychomotor assessments and procedures for administering them are examined.

Prerequisite: grade of C or better in KIN 4055 and KIN 4080.

Athletic Coaching Endorsement/Permit

Students who wish to qualify for an athletic coaching permit to coach in Wyoming public schools must complete four courses. Note: Endorsements are for current teachers. Permits are for those who are not a licensed educator.

Course Requirements

- CPR Certification

KIN3050 - Prevention and Care of Athletic Injuries

Credits: 2

Encompasses theory and practical work in the field of athletic training. Strongly emphasizes prevention and care of athletic injuries, including wrapping and taping techniques.

Former Course Number [PEPR 3050]

Prerequisite: junior standing; C or better in KIN 2040; minimum 2.750 GPA.

- Foundations of Coaching KIN 4090 /KIN 5090 Credits: 3
- Students completing the Physical Education Teacher Education undergraduate degree are exempt from the KIN 4090/5090 requirement.
- Coaching in... Experience (completed at a community college or complete a coaching experience in a specific sport for one season or more with a letter written by your supervising coach to submit with your PTSEB endorsement application form).

School Health Education K-12 Endorsement (For non-Physical Education Teacher Education Majors)

In addition to completing a bachelor's degree in teaching at the secondary level from an approved university program, 21 credit hours are required to be endorsed to teach health education K-12 in the public schools of Wyoming.

Course Requirements

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

HLED1006 - Personal Health

Credits: 3

Introduces multiple concepts of personal health (e. g. , physical activity, diet, stress, social pressure, public health, human behavior, disease prevention, healthcare access, and health-oriented citizenship) in relation to improving individual health and understanding the health of a society and cultural differences in human health and health behavior.

USP 2015 Code U5H

- CPR Certification

HLED4120 - Assessment in Health

Credits: 3

Provide students with an understanding of components of a balanced assessment system in school health education. Students review the basics of standards-based health education and explore innovations in assessment that provide teachers and students with a more complete and authentic picture of student learning.

Prerequisite: Minimum 2.500 GPA; concurrent enrollment in KIN 4099 or certified K-12 teacher.

HLED4025 - Teaching Sensitive Issues In Human Sexuality

Credits: 3

Prepares educators and other helping professionals whose work involves promoting healthy sexuality in children, young people, and adults. It also provides detailed investigation into important aspects of teaching sensitive issues related to human sexuality. Students practice, critique, develop, and evaluate sexuality education processes and resources.

Dual Listed HLED 5025.

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

HLED4110 - Teaching Health in Schools K-12

Credits: 3

Presented appropriate knowledge and skills to become health literate. Explore ways to teach health skills and knowledge and use assessment strategies for health education.

When Offered (Offered fall semester)

Prerequisite: Grade C or better in KIN 3015 or certified K-12 teacher.

HLED4130 - Management of Coordinated School Health Programs

Credits: 3

Reviews the coordinated school health program (CSHP) model and identifies research that supports the eight components of the model. Prepares students to advocate for CSHP and to develop the school infrastructure necessary to carry out such a program. Also prepares individuals to work with school from job settings outside the school.

Dual Listed HLED 5130.

When Offered (Offered fall semester)

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

HLED4030 - Teaching About Alcohol and Substance Abuse

Credits: 3

Introduces students to the issues of societal and personal attitudes towards alcohol and substance use, misuse and abuse. Prepares an educator to teach about alcohol and substance abuse in the classroom and out of the school setting.

Prerequisite: Sophomore standing; minimum 2.750 GPA; or permission of instructor.

School Health Education K-12 Endorsement (For Physical Education Teacher Education Majors)

In addition to completing the Bachelor of Science degree in physical education teacher education from the University of Wyoming, students can qualify for K-12 endorsements in adapted physical education and/or health education by completing the following course requirements:

Course Requirements

HLED4025 - Teaching Sensitive Issues In Human Sexuality

Credits: 3

Prepares educators and other helping professionals whose work involves promoting healthy sexuality in children, young people, and adults. It also provides detailed investigation into important aspects of teaching sensitive issues

related to human sexuality. Students practice, critique, develop, and evaluate sexuality education processes and resources.

Dual Listed HLED 5025.

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

HLED4110 - Teaching Health in Schools K-12

Credits: 3

Presented appropriate knowledge and skills to become health literate. Explore ways to teach health skills and knowledge and use assessment strategies for health education.

When Offered (Offered fall semester)

Prerequisite: Grade C or better in KIN 3015 or certified K-12 teacher.

HLED4120 - Assessment in Health

Credits: 3

Provide students with an understanding of components of a balanced assessment system in school health education. Students review the basics of standards-based health education and explore innovations in assessment that provide teachers and students with a more complete and authentic picture of student learning.

Prerequisite: Minimum 2.500 GPA; concurrent enrollment in KIN 4099 or certified K-12 teacher.

HLED4130 - Management of Coordinated School Health Programs

Credits: 3

Reviews the coordinated school health program (CSHP) model and identifies research that supports the eight components of the model. Prepares students to advocate for CSHP and to develop the school infrastructure necessary to carry out such a program. Also prepares individuals to work with school from job settings outside the school.

Dual Listed HLED 5130.

When Offered (Offered fall semester)

Prerequisite: Minimum 2.500 GPA; Junior class standing or certified K-12 teacher.

PSYC2210 - Drugs and Behavior

Credits: 3

Surveys drugs which affect behavior, emphasizing both psychotherapeutic agents and drugs with abuse potential. Includes brief introduction to the chemistry of the brain and how drugs may have their effects. Behavioral, social, historical and medical aspects of each major class of psychoactive drugs are discussed.

Prerequisite: A grade of C or better in PSYC 1000.

OR

HLED4030 - Teaching About Alcohol and Substance Abuse

Credits: 3

Introduces students to the issues of societal and personal attitudes towards alcohol and substance use, misuse and abuse. Prepares an educator to teach about alcohol and substance abuse in the classroom and out of the school setting.

Prerequisite: Sophomore standing; minimum 2.750 GPA; or permission of instructor.

Preprofessional Program

Preprofessional Pharmacy Program (PPCY)

Students will not receive a degree in prepharmacy. The prepharmacy curriculum guides students as they fulfill requirements for admission to the professional pharmacy degree program.

Required Curriculum

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get

duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

KIN2040 - Human Anatomy

Credits: 3

Study of human structure in terms of its microscopic and gross anatomy. Provides students with adequate background to study human physiological function. The corresponding course, to be taken concurrently, is KIN 2041.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2040]

Prerequisite: LIFE 1000, LIFE 1003, LIFE 1010, or ANTH 1100.

KIN2041 - Human Anatomy Laboratory

Credits: 1

A laboratory study of human structure in terms of human microscopic and gross anatomy. This laboratory course is designed to provide students with an adequate background to study human physiology and kinesiological function.

USP 2003-2014 Code U3SB

Former Course Number [PEPR 2041]

Prerequisite: KIN 2040 or concurrent enrollment in KIN 2040.

MOLB2021 - General Microbiology

Credits: 4

Introduces nature and diversity of microorganisms and their implication for all of biology. Covers comparative properties of eukaryotic and prokaryotic microbes, as well as their roles as disease agents, ecological agents, and model systems for understanding of fundamental biological processes at the molecular level.

Cross Listed MICR 2021 and LIFE 2021

When Offered Fall and Spring

Former Course Number [2210]

Prerequisite: Minimum grade of C in LIFE 1010 and CHEM 1000 or CHEM 1020.

MOLB3610 - Principles of Biochemistry

Credits: 4

One-semester biochemistry course for life-, health- and physical-science students. Introduces a full range of biochemical concepts including discussion of major macromolecules, metabolism and molecular biology.

Prerequisite: LIFE 1010 and a minimum grade of C in CHEM 2300 or CHEM 2420.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

- General Electives (6 credits total)

USP Requirement

The USP-COM 3 requirement is fulfilled in the professional doctoral program.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Interdisciplinary Programs

Biomedical Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website <http://www.uwyo.edu/biomedphd/>
Email: bms@uwyo.edu

Program Director: Sreejayan Nair, Ph.D.

Degree Offered

Ph.D. in Biomedical Sciences

Biomedical sciences is the study of human biological processes; the complex interactions between physiological, genetic and environmental factors that influence disease and health. It spans the spectrum from fundamental discovery to innovation and application.

Areas of focus may include but not limited to cardiac health, nutrition, reproductive biology, toxicology, diagnostic & imaging and medical engineering.

The PhD program in biomedical sciences is designed to position graduates for long-term competitive success in the rapidly changing and multifaceted health-related arena in the 21st century. It is a comprehensive, interdisciplinary program, making connections between various disciplines to gain new insights, discover and apply new knowledge, and promote self-directed, life-long learning.

Biomedical Sciences is a research & discovery focused program balancing depth and breadth of content knowledge with "enabling" skills including problem solving, innovation, entrepreneurship, communication and leadership.

Program Specific Admission Requirements

1. Minimum requirements. Applicants who do not meet the minimum requirements may be conditionally accepted at the discretion of the BMS Admission Committee. Please submit the application packet comprising the following documents for pre-admission screening:

a. Faculty sponsor. Contact potential biomedical sciences graduate program faculty sponsor in your area of interest prior to submitting an application. NOTE: a letter indicating the sponsorship by a faculty is strongly recommended as the program does not have sufficient number of graduate assistantships to support all students.

b. Official academic transcripts. Successful completion of a bachelor's degree from an accredited institution with one or more semesters of biology, physics, anatomy, physiology, chemistry, biochemistry/molecular biology, math are recommended. All applicants should have at least a 3.0 cumulative GPA (scale of 4.0). While a master's degree is not required for admissions into the biomedical sciences Ph.D. program, a master's degree with a strong background in the research area of focus is a plus.

c. TOEFL/IELTS/Duolingo: The minimum acceptable scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries may be exempt from providing

additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia, Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/ cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency, until further notice.

d. GRE: A composite minimum score of 291 on the verbal and quantitative sections of the GRE is recommended. The GRE may be waived at the discretion of the admission committee if the applicant already possesses a master's degree, and/or documented research accomplishment in the chosen discipline.

e. Three letters of recommendation.

f. Statement of research interests and career objectives. A letter stating research & career interests and goals, prior research experience and outcomes, reasons for interest in BMS program. Include your contact information in the letter.

g. Current professional resume

2. Application Process. The BMS admissions committee reviews the completed application.

a. Contact faculty in your area of interest and obtain their endorsement. Faculty may choose to interview the candidate on-campus or via zoom.

b. Submit your application materials (pdf files of cover letter/statement of purpose, letter of sponsorship from the faculty, three letters of reference, transcripts, TOEFL/GRE scores to the admissions office via the University's admission portal.

c. To ensure full application review for fall semester admission, applications should be received by **February 15**.

d. Review by BMS Admissions Committee.

e. Forward application packet with BMS recommendation to the faculty and host department.

f. Notification of decision to applicant by **May 1**.

Program of Study

Rationale: The program of study is designed according to student learning goals and research opportunities. It blends depth and breadth of preparation by providing broad core requirements with electives promoting specialization in a "parent" discipline. This is recognized on program documentation by a Doctorate in Biomedical Sciences/"specialization" area. For example, Doctorate in Biomedical Sciences/Reproductive Biology.

Student Learning Outcomes: The BMS program provides unique array of formal courses and informal discovery experiences focused on ensuring aptitudes, behaviors, and skills necessary for leadership and competitive success in the biomedical science arena.

Although the foundation enabling innovative, independent thinking and knowledge discovery is deep discipline knowledge, the BMS program is also designed to promote student competency in information assessment, synthesis and integration, communication and translation to the broader community, teamwork, leadership, and project management.

The BMS program trains graduates to be competent, skilled experimentalists, problem solvers, critical and independent thinkers, expert in their field, with both depth and breadth of knowledge.

In addition, the program aims to instill characteristics that are essential to long-term professional success, preparing scientists who are effective and dedicated mentors and teachers, organized administrators, exemplars of high ethical standards, and effective collaborators.

Upon completion of the program, graduates will demonstrate:

- Independent, critical thinking skills
- Ability to identify appropriate biographical resources
- Knowledge of recent advances in discipline and related areas
- Understanding of a broad spectrum of research methodologies and their applications
- Ability to critically analyze research findings
- Ability to design and independently execute research
- Ability to use appropriate information technology to record, manage, and disseminate information
- Understanding of issues related to researcher and subject rights
- Motivation and aptitude needed to acquire knowledge
- Communication skills that are appropriate for a range of audiences and purposes
- Ability to construct and articulate arguments to a wide range of audiences
- Ability to effectively support the acquisition of knowledge by others when teaching or mentoring students
- Willingness to assume responsibility for their work
- Ability to design and teach undergraduate or graduate courses
- Ability to publish single/first authored papers in peer-reviewed journals.

Program in Ecology, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/pie/>
Email: ecology@uwyo.edu

Program Director: Melanie Murphy, Ph.D.

Degree Offered

Ph.D. in Ecology

The Program in Ecology prepares doctoral students to lead the discipline of ecology during the coming decades. The program is grounded in the natural history of organisms in their environment, but incorporates tools and perspectives from across the biological, physical, mathematical, computational, and earth sciences. Students develop conceptual, historical, and philosophical perspectives spanning the entire range of subdisciplines in ecology, while receiving advanced training in the subdiscipline of their individual interest.

The program fosters long-term career development by exploring the linkages of ecology with other disciplines, and by scanning the ecological horizon for emerging questions, concepts, and approaches that will shape the field in years to come.

Faculty members from 11 departments and 3 colleges participate in the Program in Ecology. Their interests span the full range of topics covered in the field of ecology, and students in the program reflect this diversity.

Program Specific Admission Requirements

The Program in Ecology (PiE) is an interdisciplinary graduate program leading to the Doctor of Philosophy degree in Ecology. Students and faculty from multiple departments and colleges at the University of Wyoming participate in the Program. Graduate students admitted to the Program will have a home department, which will typically be the home department of the respective committee chair or co-chair. Those interested in graduate study in this program, are encouraged to contact individual faculty members in the potential student's area of interest (http://www.uwyo.edu/pie/who_we_are/faculty.html) and the Program in Ecology (307-766-4128; ecology@uwyo.edu) for more information and guidance regarding applying.

In order to apply: 1) **Contact:** Identify a faculty advisor (all PiE students **must** be sponsored by a faculty advisor (http://www.uwyo.edu/pie/who_we_are/faculty.html)). These contacts are generally made in the fall the year before submission, but successful contacts may be made later. 2) **Admission to home department:** Apply to the University of Wyoming via the online application system (<http://www.uwyo.edu/admissions/apply.html>): letter of intent, CV, transcripts, and three letters of recommendation. For department, please select the department of the potential advisor. A minimum of three letters of recommendation are required and up to two additional letters may be submitted. A suggested deadline for application is January 31 to be considered for fall admission, but applications will be continued to be considered. A minimum of a 3.0 undergraduate cumulative GPA is required for admission or MS degree. International applicants, who are not native English-speakers, must submit TOEFL (recommended minimum 525) or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements. 3) **Admission to PiE:** Submit a letter of interest to the Program in Ecology (ecology@uwyo.edu), stating explicitly why you would wish to be considered for PiE and identifying the faculty advisor immediately after completing your online application. Admission to PiE requires admission is predicated on admission to home department. All applications to the Program will be reviewed by the Graduate Affairs Committee, which has authority on admissions. Students applying to the Program who lack a Master's degree must show exceptional promise and commitment (e.g., through undergraduate or post-graduate research experiences, peer-reviewed publications, and/or success in competing for research fellowships). Such students are encouraged to consult with their prospective advisor on whether to apply directly to PiE or to Master's programs in individual home departments of PiE faculty.

Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the Program. Students who wish to transfer into the Program from department-based doctoral programs must submit a formal application and must satisfy all the admission requirements specified above. Such application will consist of copies of all the application materials originally submitted to the program in which the student is currently enrolled, as well as a letter of recommendation from their prospective PiE advisor. In addition, they must submit a letter stating their reasons for seeking this transfer. All applications will be reviewed by the Graduate Affairs Committee. In addition, the following apply to transfer students:

- Students enrolled in departmental programs who have not yet taken their preliminary examinations may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules before they take their preliminary examinations, and (b) fulfill the curricular requirements.
- Students who have been admitted to departmental programs, and who have already taken their preliminary examinations, may pursue the PhD in Ecology provided they (a) appoint an Advisory Committee under Program rules within one month of admission to the Program, and (b) fulfill the curricular requirements. The student's Advisory Committee has the option of requiring a new preliminary examination.

Program Specific Degree Requirements

Advisory Committee

Before the end of the second semester of study, the student should nominate a (minimum) five-member advisory committee to the Office of the Registrar. At least three members of the committee, including the committee chair (usually the student's adviser), will be members of the PiE faculty. One other member, who will serve as Graduate Faculty representative, must be from outside the home department of the major adviser, although (s)he can be a faculty member in a department that participates in the program and/or a faculty member of PiE. The committee will advise the student on his/her program of graduate study, execute and evaluate the student's preliminary examination, evaluate the student's dissertation proposal and dissertation, and conduct the student's dissertation defense.

Program of Study

All students are required to take ECOL 5100 or equivalent. This course should be taken during the first year of residency. Exceptions or substitutions of these requirements are subject to approval by the graduate affairs committee.

The program of study must include at least 6 credit hours aimed at developing a tool skill, which except for rare cases shall be in the quantitative/analytical domain (e.g., statistics, modeling, GIS, remote sensing, bioinformatics). Courses relating to research tools should be taken early in the student's residency to ensure that they can be used in thesis research and advanced studies. Specific coursework and tool-skill development for the student's program of study will be developed in consultation with and subject to approval by the student's advisory committee.

Admission to Candidacy

Admission to candidacy for the Ph.D. requires two steps: 1) providing evidence that the student is prepared to identify a research question, design an approach for investigating that question, and a plan for executing the approach, all in the format of an NSF-style research proposal, and 2) illustrating adequate proficiency in the subject matter of ecology through a process involving both written and oral exams.

Proposal

Students must submit a NSF-style proposal to their committee outlining their project, typically by the end of the fourth semester. Each committee member will provide feedback to the student on the proposed research and indicate approval of the proposal or request revision. The proposal must be approved by all committee members prior to starting the preliminary exams.

While this proposal should be a plan for actual dissertation research, unforeseen circumstances may require altering the student's dissertation work after the proposal has been approved by the committee. In the case of a major alteration, the student should reformulate a research plan and submit it to the committee in writing for committee approval.

Preliminary Exam

Passing the preliminary exam is the official admission to candidacy.

Written Portion of the Preliminary Exam. The student will take the written exam portion of the preliminary exam no fewer than two weeks following approval of the research proposal. The goal of this exam is to test breadth of knowledge in ecology. The design of this exam will be coordinated by the graduate committee under the leadership of the adviser. Each written exam will cover the following topics:

Ecological topics ranging from organismal/evolutionary to ecosystem-level perspectives, integrating concepts and perspectives from across the discipline, over a wide range of spatial and temporal scales.

The philosophical and historical development of ecology.

The conceptual background of the student's area of specialization.

The exam will consist of four to six questions developed collectively by the committee and organized by the student's major professor. The exam will be open book; however, the answers will be solely the work of the student. Answers should be fully cited and collectively should be no longer than 30 pages double-spaced exclusive of references cited. Students will have one full week (seven days) to complete the exam. Committee members will indicate pass/fail within one week following completion of written exams. Four of five passing votes are required.

Oral Portion of the Preliminary Exam. No sooner than two weeks after successfully passing the written exam, the student may proceed to an oral exam administered by his/her graduate committee. Oral exams center around three goals from which questions will be derived:

To verify that the student is prepared, conceptually and methodologically, to carry out successful dissertation research.

To evaluate the student's ability to conceptualize specific questions in a broad, integrative context.

To evaluate the student's ability to think spontaneously and creatively and to articulate responses about unexpected or novel questions.

The advisory committee will discuss and organize specific questions based on these goals in a short session at the beginning of the exam period before admitting the student to the examination room and starting the exam. Following the exam each committee member will provide non-binding paper votes of pass/ fail for each of the three goals of the oral exam. Following discussion of the student's performance, committee members will each assign a grade of pass/fail for the overall exam. Four of five committee members must vote for passing the overall oral exam.

Students whose performance is unsatisfactory will be given one opportunity for retaking the oral examination. This retake will occur no later than the academic-year semester following the first examination.

Public Seminars

Students are required to give two oral presentations on their research. The purposes of these presentations are to provide the student with practice in oral presentations and to keep the PiE community informed of the student's progress. The first will describe the student's dissertation research proposal. This presentation will be given before the student submits his/her thesis proposal. The second presentation will summarize the student's completed dissertation research, and will normally be given the same semester as the student's dissertation defense. Under extraordinary circumstances (subject to approval by the Graduate Affairs Committee), this presentation may be given at an earlier time. These presentations must be open to the public, and may comprise part of a departmental or Program in Ecology seminar or brown-bag series.

Hydrologic Sciences (WRESE), Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/wrese>
E-mail: wrese@uwyo.edu

Program Director: Andrew D. Parsekian, Ph.D.

Degree Offered

Ph.D. in Hydrologic Sciences

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D. level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

The WRESE Program grants a PhD in Hydrological Sciences.

Program Specific Admission Requirements

Ph.D. in Hydrologic Sciences

The WRESE Program only admits students seeking a doctoral degree.

Those interested in graduate study in this program, are encouraged to contact the WRESE program (wrese@uwyo.edu) for more information and guidance regarding applying. In order to apply, please submit an application to the program via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>). Prospective students applying to the WRESE program must satisfy the minimum criteria for admission of their advisor's home department (i.e., number of reference letters required; minimum GRE scores, if requested; other supporting documents, if requested; etc.). Similarly, applicants should adhere to the submission deadline indicated by their advisor's home department.

Minimum criteria for admission to the WRESE Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under certain circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the WRESE program.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) if you have questions regarding the English proficiency requirements.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

The written exam will consist of a series of questions as decided upon by the committee and should take no more than two weeks to complete.

Each committee member shall grade their portion of the exam as pass/fail. The student shall be viewed as passing the written exam if no more than one person grades their portion of the exam as failing.

The oral examination will be held no sooner than two weeks after the written exams, and only after the student has passed their written examinations. The oral exam should be no less than 90 minutes long and no longer than 3 hours.

Following the exam, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Dissertation

The student will prepare a dissertation and make the document available to the committee at least two weeks in advance of an oral defense of the document. The oral defense must be at least 15 weeks after the student has been advanced to candidacy. Students shall present a public defense to the university community that is expected to be approximately 45 minutes long, with a public question-and-answer period after the presentation. If the committee determines that the student has presented a suitable oral presentation of his/her research findings, a closed session meeting will be held in which the student defends their research to the committee. At the conclusion of the defense, each committee member must vote pass/fail. The student will be deemed as passing if they receive no more than one failing vote.

Other information:

Students in the WRESE Program may participate from any college, with the expectation that their program of study and dissertation will focus on quantitative issues of hydrology and water resources. The Program welcomes academic diversity, and students in WRESE have entered into the Program from a wide range of academic backgrounds and have hailed from numerous home departments, including Ecosystem Science and Management, Civil and Architectural Engineering, Botany, Zoology and Physiology, and Geology and Geophysics.

Molecular and Cellular Life Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/mcls/>
Email: mcls@uwyo.edu

Program Director: Daniel Levy, Ph.D.

Degree Offered

Ph.D. in Molecular and Cellular Life Sciences

This interdisciplinary program with more than 30 faculty participants spans a wide range of research topics, such as:

Biotechnology-bioengineering, biomaterials, pharmacology, cell biology and signaling, genetics and development, genomics, proteomics, computational biology, microbiology and infectious disease, structural biology, and biophysics.

Coursework focuses on core courses in biochemistry and molecular biology, with electives that include such diverse courses as:

Topics in Genomics, Biophysics, Microbial Physiology and Metabolism, Cell and Developmental Genetics, Mass Spectrometry and Analytical Chemistry, Biomedical Engineering, Mammalian Endocrinology, Cell Culture and Virology, Introduction to Bioinformatics, Protein Structure and Function, Microbial Genetics, Computational Biology, and Quantitative Microscopy.

Program Specific Admission Requirements

1. Applicants should apply through the online graduate application link. This process requires uploading a statement of purpose, a CV, academic transcripts, and test scores. The statement of purpose should include a brief narrative that describes the applicant's motivation to pursue graduate studies in the life sciences, relevant experiences, and specific reasons for applying to the MCLS program at the University of Wyoming. The program does not adhere to strict test score minimums, however, for international applicants minimum suggested scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS, respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries will be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores of 110 or higher as proof of English proficiency until further notice. More information for international applicants can be found on the University of Wyoming graduate admissions website. The application also requests that three reference letters be submitted in support of the candidate's application. Completed applications are due on January 1.

2. The MCLS admissions committee reviews completed applications starting in early January of each application cycle. Promising applications are selected based on research experience, grades, test scores, and reference letters. The most compelling statements of purpose convincingly describe why the applicant is interested in pursuing graduate studies in the life sciences, detailing relevant past research experience and how it has prepared the student for PhD studies. Reference letters that include specific details and anecdotes about the applicant are most useful. The committee generally looks for grades of B or better in life science and chemistry courses, although lower grades can be balanced by a sufficiently strong research background. Successful applicants will be notified of admission decisions by May 1 at the latest, although the majority of decisions will be made by March 15.

3. Following the initial reviews, selected applicants are invited for a Zoom interview. Applicants will be provided with a primary research paper that they should read in preparation for the interview.

4. Zoom interviews are conducted with at least two members of the admissions committee. Applicants are asked a variety of questions, including why they are interested in the MCLS program, how their previous research experience has prepared them for PhD studies, their perceived strengths and weaknesses as a scientist, and future career goals. The interviewers also ask questions about the research paper and more general molecular biology questions to determine if the applicants have a sufficiently strong background to succeed in the MCLS program.

5. Shortly after the interview sessions, the MCLS admissions committee discusses the results of the Zoom interviews and ranks applicants for offers of admission, conditional upon approval by the Office of Admissions.

Program Specific Degree Requirements

MCLS doctoral students must fulfill the minimum requirements outlined by the university. In addition, students must obtain a high level of proficiency in the core foundations of the molecular and cellular life sciences through required courses in biochemistry/ molecular biology, scientific literature analysis proficiency, and the MCLS cornerstone course. Because of the broad range of research interests pursued by MCLS faculty and students, considerable flexibility will be exercised regarding the specific nature of the graduate level elective courses that students may take. Students must successfully complete four eight-week rotations in MCLS laboratories of their choice during the first year. Additionally, students must pass a comprehensive assessment exam at the end of the first year. Near the end of their second year in the program, students will undertake a qualifying examination in order to be formally admitted to graduate degree candidacy. This exam will have both written and oral components and will cover areas of science that are relevant to the students' proposed research. Annual meetings with a research-specific dissertation committee will facilitate and evaluate the research progress of MCLS students beginning in the second year. Students must also attend weekly outside seminars on topics in the molecular life sciences for the durations of their studies. For more information, please see the program's Website at: <http://www.uwyo.edu/MCLS/>.

Neuroscience, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/neuroscience/>
Email: neuroscience@uwyo.edu

Program Director: Kara Pratt, Ph.D.

Degree Offered

Ph.D. in Neuroscience

The Graduate Neuroscience Program offers training leading to the Ph.D. degree in Neuroscience. The Neuroscience Program emphasizes systems and integrative approaches, and our goal is to provide the students with the necessary background to be broadly trained research neuroscientists and to carry out independent research in neuroscience. The Neuroscience Program emphasizes continuing interaction with faculty from several departments and we have a low student to faculty ratio. Advisors spend considerable time supervising and training each doctoral student. The educational philosophy of the Neuroscience Program is to encourage a problem-oriented rather than a strict discipline-bound approach to research. You will emerge from this program with the scientific and experimental training needed to comprehensively address a very wide range of research questions using a variety of techniques and analytic tools.

The Graduate Neuroscience Program is designed to enable graduate students to acquire competence in the various disciplines necessary for research and teaching careers in neuroscience. The current interests of the Neuroscience faculty include sensory neurophysiology, behavioral neuropharmacology, neurodevelopment, neurodegeneration, and synaptic plasticity.

Students and faculty have access to outstanding resources established by NIH Neuroscience and Sensory Biology Core grants. The Microscopy Core houses both light (Zeiss laser scanning, fluorescent) and electron (Transmission and Scanning) microscopes. Resources needed to conduct research ranging from molecular, cellular circuit level to behavior are readily available within the Neuroscience Center.

Program Specific Admission Requirements

Steps for applying to the Program in Neuroscience:

Step 1: Contact faculty whose research is of interest.

Although not mandatory, applicants are encouraged to read through the faculty research summaries to identify faculty that they are interested in training with. It is strongly recommended that prospective students contact individual faculty for more information regarding their research programs and openings in their laboratories before submitting an application. This initial step is recommended because, due to the limited availability of Graduate Assistantships (GA's), graduate students are oftentimes recruited directly into a laboratory and supported straight away by the advisor's NIH or NSF funding.

Step 2: Submit the online application packet via the University of Wyoming's online application system (<http://www.uwyo.edu/admissions/apply.html>).

For full consideration for fall and spring admissions, applications should be submitted by January 1 and June 30, respectively. The application packet is comprised of the following items:

- **Application form**
- **Official academic transcripts:** Applicants should have at least a 3.0 cumulative GPA (scale of 4.0), and a bachelor's degree in a discipline that is related to neuroscience such as biology, psychology, physiology, chemistry, physics, or chemical or bioengineering. We encourage motivated applicants from degrees in diverse areas that are interested in transitioning to neuroscience. Students with an MS degree in neuroscience or related fields are also encouraged to apply.
- **GRE scores:** Accepted but not required
- **Three letters of recommendation**
- **TOEFL/IELTS:** For international students whose native language is not English. The minimum acceptable scores are 550 (79 iBT) and 6.5 for TOEFL and IELTS, respectively. (The University of Wyoming's school code for TOEFL = 4855.)

- **Personal statement:** A 1-3 page personal statement describing the student's motivation for pursuing a PhD in the field of neuroscience. Please describe areas of interest and any specific research topics or techniques with which you have experience. If your interests are still broad, indicate your general interests and graduate training goals.
- We are also interested in learning about your long-term career goals. What do you aspire to do after graduation? What are you specifically interested in the University of Wyoming? Finally, if you have established a potential faculty advisor (step 1), this should be clearly stated here in the personal statement.

Step 3: The interview

The graduate advisory committee reviews submitted application packets. Only complete packets are reviewed. Applicants deemed strong by the committee will be invited to participate in either an in-person or virtual (via zoom or phone) interview. The interview allows for the committee to learn more about the applicant, and, likewise, for the applicant to interview the committee.

Step 4: Verification of admittance by UW Admissions Office. Applicants that are chosen for admission to the Program in Neuroscience will then be requested to complete the application process through the University of Wyoming Admissions Department. Eligibility for enrollment will be verified by the UW Admissions Office, including the receipt of official transcripts and documents.

Program Specific Degree Requirements

Doctoral Program

All doctoral Neuroscience students are required to complete a program of core classwork that includes the following required courses: Introduction to Neuroscience, Structure and Function of the Nervous System and Neurophysiology. Students are required to take one course in Statistics (e.g. STAT 5050, STAT 5210) and the course that meets this requirement will be arranged with the student's committee. The statistics requirement must be met by the end of the second year. The Neuroscience Program is a research-oriented program and students are expected to take a minimum of 2 to 3 credit hours of research per semester. Students are also expected to enroll in an on-going Seminar in Neuroscience. The Neuroscience Seminar, which meets weekly and is attended by students and faculty members, provides an opportunity for intellectual and social exchange, as well as for the development of professional skills in critical thinking. The topic for seminar and the faculty member directing the seminar changes each semester. The remainder of the coursework for the doctor of philosophy degree is selected from designated courses in Neuroscience, physiology, pharmacology, and molecular biology. A grade of B or better is required for all Neuroscience courses.

A student is expected to have a graduate adviser at all times. The faculty adviser must be a participating member of the Neuroscience faculty. The adviser is responsible for directing the student's research and academic coursework. During the second year, the student will have an advisory committee. The advisory committee will consist of at least three neuroscience faculty members and an outside member. Normally, the student's adviser will chair the committee and help identify members of the committee who best match the student's area of interest. The role of the advisory committee is to oversee all aspects of the student's education after the first year.

In the student's second or third year, the advisory committee will set and evaluate the student's qualifying examination. After successful completion of the preliminary examination the student will profess to Ph.D. candidate status.

The dissertation is the single most important component of the graduate program. It reports the results and significance of the student's research. In addition to the written dissertation, the doctoral candidate will deliver a formal seminar based on their research. The seminar will be followed by an examination by the student's advisory committee.

Science and Mathematics Teaching Center Master's Degrees

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/smtc/>
Email: smtc@uwyo.edu

Program Director: Sylvia Parker

The Science and Mathematics Teaching Center (SMTC) was established in 1970 and is committed to excellence in science, mathematics, technology and STEM education. As part of the Office of Graduate Education in Academic Affairs, the SMTC, in cooperation with the Wyoming Department of Education (WDE) and the Professional Teaching Standards Board (PTSB), serves as a resource and professional development center for the state. The SMTC offers transdisciplinary graduate degree programs with multiple degree concentrations, certification options, and endorsement options. All of the programs emphasize both strong content knowledge and instructional practices. The affiliate faculty for the SMTC includes faculty from the Colleges of Agriculture and Natural Resources, Arts and Science, Education, and Engineering and Applied Science, and the Haub School of Environment and Natural Sciences.

The SMTC provides extensive off-campus professional development that serves teachers, students, administrators, school districts and communities throughout Wyoming and the region. SMTC in-service and extension courses, workshops, institutes, and conferences are designed collaboratively to improve science and mathematics teaching in Wyoming.

The SMTC administers and supports five master's degree programs:

- (1) the Master of Science degrees in Natural Science with concentrations in Middle Level Math (MMA) and
- (2) Middle Level Science (MSC); these programs are designed for Wyoming's in-service elementary, middle, and high school teachers. They focus on general science and mathematics content with an emphasis on teaching middle school level learners. The course work leads to middle level endorsement provided by the Wyoming PTSB. Teachers must have two years of teaching experience to participate in these programs.
- (3) Master of Science in Teaching - Natural Science (MST - Natural Science). This is a self-directed master's degree program working with the SMTC, SER, and the Haub School as well as other colleges. The program is developed individually with the guidance of a graduate committee based on the interests of the graduate student. This program may be used by teachers to take the 18 graduate-level credits often needed to teach Advanced Placement and community college courses.
- (4) Master of Science - Natural Science (MS - Natural Science). This is a self-directed master's degree program working with the SMTC, the College of Arts and Sciences, SER, and the Haub School and other colleges. The program is developed individually based on the interests of the graduate student and may emphasize formal or informal learning settings. Interdisciplinary study is encouraged.
- (5) Master of Science in Natural Science with a concentration in Natural Science Education (NED). This Master's degree program is designed for students pursuing careers as environmental and natural science educators in non-public school or non-formal education settings. These students spend one year at the Teton Science Schools (TSS) in Jackson. A long-standing MOU between the SMTC and TSS allows students to use 15 graduate credit hours earned at TSS towards a master's degree if they are accepted into the second year at UW within the SMTC.

SMTC Student Learner Outcomes

Upon successful completion of the MS degree program in Natural Science, a student will be able to:

- Engage in teacher research to transform STEM instruction:
 - Design and implement a research project that asks and answers a question using appropriate materials, concepts and methods, and ethical practices, and
 - Effectively communicate all aspects of the research project in both oral and written forms.
- Use professional and academic standards to ensure high-quality interdisciplinary instruction (i.e., place-based, culturally relevant, and/or social justice pedagogy) to maximize learning for all students.
- Engage in mathematical and/or scientific discourse and scientific thinking as active participants in communities of practice.
- Use emerging technology and science investigations as tools to engage students.

Program Specific Admission Requirements

For the MSC, MMA, MST and MS-Natural Science Master's Degrees:

Two years of teaching experience and a valid teaching license (required for MSC and MMA; may be waived for MST and MS-Natural Science)

Application Fee, unless a UW Graduate

Official Transcripts from all Institutions attended and Bachelor Degree conferring institution

3.0 undergraduate grade point average; provisional admission with a lesser GPA only with consent from Academic Affairs

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence (These items are not required of applicants who hold a prior master's degree)

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from the teacher's principal and two other colleagues.

The NED Degree - First Year Application:

Official Transcripts from all institutions attended and Bachelor Degree conferring institution Application Fee, unless a UW Graduate

Acceptance and admission by the Graduate Program at the Teton Science Schools in Jackson, WY

The NED Degree - Second Year Application:

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from a TSS Graduate Program Faculty Member, one from another TSS employee such as a Classroom Instructor or Field Instructor, and one from the first year application

Applicants complete a UW graduate application and upload all of the information on the Admissions Office website (<http://www.uwyo.edu/admissions/apply.html>). Application packets are reviewed by SMTC Admissions Committees and recommendations for admissions are submitted to the University of Wyoming Admissions Office. Any of the above requirements plus the university's minimum 3.00 grade point average may be waived if proper documentation and reasoning are given by the SMTC and approved by the Associate Vice Provost of Graduate Education.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) for more information.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Application Due Dates for Master of Science - Natural Science with Concentrations in the following areas:

Middle-level Science (MSC): applications are accepted on an ongoing basis; new students may begin only in summer each year; final due date for admission in summer is April 1.

Middle-level Mathematics (MMA): applications are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Natural Science Education (NED): applications deadlines for Year 1 are established by Teton Science Schools (<https://www.tetonscience.org/programs/graduate-program/admissions/>); due date for admission to begin Year 2 in the fall at UW is February 1.

MST and the MS- Natural Science Masters Degree: applications for these self-designed programs are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Graduate Assistantships and Scholarships

The SMTC often has scholarships and graduate assistantships available for graduates accepted for the above Master's degree programs. More information upon admission and acceptance.

Graduate

Biomedical Sciences, Ph.D.

The Biomedical Sciences graduate program seeks to provide the students with a unique research training environment to integrate a variety of scientific approaches to address complex health-related challenges.

Additional Information

Biomedical Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website <http://www.uwyo.edu/biomedphd/>
Email: bms@uwyo.edu

Program Director: Sreejayan Nair, Ph.D.

Degree Offered

Ph.D. in Biomedical Sciences

Biomedical sciences is the study of human biological processes; the complex interactions between physiological, genetic and environmental factors that influence disease and health. It spans the spectrum from fundamental discovery to innovation and application.

Areas of focus may include but not limited to cardiac health, nutrition, reproductive biology, toxicology, diagnostic & imaging and medical engineering.

The PhD program in biomedical sciences is designed to position graduates for long-term competitive success in the rapidly changing and multifaceted health-related arena in the 21st century. It is a comprehensive, interdisciplinary program, making connections between various disciplines to gain new insights, discover and apply new knowledge, and promote self-directed, life-long learning.

Biomedical Sciences is a research & discovery focused program balancing depth and breadth of content knowledge with "enabling" skills including problem solving, innovation, entrepreneurship, communication and leadership.

Admission to the Biomedical Sciences PhD Program

1. Minimum requirements. Applicants who do not meet the minimum requirements may be conditionally accepted at the discretion of the BMS Admission Committee. Please submit the application packet comprising the following documents for pre-admission screening:

a. Faculty sponsor. Contact potential biomedical sciences graduate program faculty sponsor in your area of interest prior to submitting an application. NOTE: a letter indicating the sponsorship by a faculty is strongly recommended as the program does not have sufficient number of graduate assistantships to support all students.

b. Official academic transcripts. Successful completion of a bachelor's degree from an accredited institution with one or more semesters of biology, physics, anatomy, physiology, chemistry, biochemistry/molecular biology, math are recommended. All applicants should have at least a 3.0 cumulative GPA (scale of 4.0). While a master's degree is not required for admissions into the biomedical sciences Ph.D. program, a master's degree with a strong background in the research area of focus is a plus.

c. TOEFL/IELTS/Duoling: The minimum acceptable scores are 540 (76 iBT) and 6.5 for TOEFL and IELTS respectively. An applicant whose native language is English and is a citizen of one of the following countries or has earned a university level degree from a school in one of the following countries may be exempt from providing additional proof of English proficiency: Antigua & Barbuda, Bahamas, Belize, Grenada, Guyana, Jamaica, St. Kitts & Nevis, St. Lucia, Dominica, St. Vincent & the Grenadines, Trinidad & Tobago, Australia, Bermuda, Canada (all

provinces except Quebec), Ireland, New Zealand, United Kingdom, and the United States. Due to COVID-19 related postponements/ cancellations of TOEFL/IELTS exams, we will be accepting Duolingo scores or 110 or higher as proof of English proficiency, until further notice.

d. GRE: A composite minimum score of 291 on the verbal and quantitative sections of the GRE is recommended. The GRE may be waived at the discretion of the admission committee if the applicant already possesses a master's degree, and/or documented research accomplishment in the chosen discipline.

e. Three letters of recommendation.

f. Statement of research interests and career objectives. A letter stating research & career interests and goals, prior research experience and outcomes, reasons for interest in BMS program. Include your contact information in the letter.

g. Current professional resume

2. Application Process. The BMS admissions committee reviews the completed application.

a. Contact faculty in your area of interest and obtain their endorsement. Faculty may choose to interview the candidate on-campus or via zoom.

b. Submit your application materials (pdf files of cover letter/statement of purpose, letter of sponsorship from the faculty, three letters of reference, transcripts, TOEFL/GRE scores to the admissions office via the University's admission portal.

c. To ensure full application review for fall semester admission, applications should be received by **February 15**.

d. Review by BMS Admissions Committee.

e. Forward application packet with BMS recommendation to the faculty and host department.

f. Notification of decision to applicant by **May 1**.

Program of Study

Rationale: The program of study is designed according to student learning goals and research opportunities. It blends depth and breadth of preparation by providing broad core requirements with electives promoting specialization in a "parent" discipline. This is recognized on program documentation by a Doctorate in Biomedical Sciences/"specialization" area. For example, Doctorate in Biomedical Sciences/Reproductive Biology.

Student Learning Outcomes: The BMS program provides unique array of formal courses and informal discovery experiences focused on ensuring aptitudes, behaviors and skills necessary for leadership and competitive success in the biomedical science arena.
