Although the foundation enabling innovative, independent thinking and knowledge discovery is deep discipline knowledge, the BMS program is also designed to promote student competency in information assessment, synthesis and integration, communication and translation to the broader community, teamwork, leadership and project management.

The BMS program trains graduates to be competent, skilled experimentalists, problem solvers, critical and independent thinkers, expert in their field, with both depth and breadth of knowledge.

In addition, the program aims to instill characteristics that are essential to long-term professional success, preparing scientists who are effective and dedicated mentors and teachers, organized administrators, exemplars of high ethical standards, and effective collaborators. Upon completion of the program, graduates will demonstrate:

- Independent, critical thinking skills
- Ability to identify appropriate biographical resources
- Knowledge of recent advances in discipline and related areas
- Understanding of a broad spectrum of research methodologies and their applications
- Ability to critically analyze research findings
- Ability to design and independently execute research
- Ability to use appropriate information technology to record, manage, and disseminate information
- Understanding of issues related to researcher and subject rights
- Motivation and aptitude needed to acquire knowledge
- Communication skills that are appropriate for a range of audiences and purposes
- Ability to construct and articulate arguments to a wide range of audiences
- Ability to effectively support the acquisition of knowledge by others when teaching or mentoring students
- Willingness to assume responsibility for their work
- Ability to design and teach undergraduate or graduate courses
- Ability to publish single/first authored papers in peer-reviewed journals

Additional Course Information:

The BMS Ph.D. program requires a minimum of 72 hours of credit from UW or another approved university. At least 42 hours of the 72 hours minimum must be earned in formal classroom courses. Twelve hours of credit at 4000-level coursework are permitted towards this. This 72-hour requirement may include graduate credits earned while working toward the M.S. degree in the same area but in that case, at least 42 hours of the 72 must be earned through formal course work. Additional credits toward the 72-hour requirement will comprise mainly or entirely of Dissertation Research (BMS 5980) credits. As indicated above, to be considered a full-time graduate student at the University of Wyoming students must be signed up for 9 credit hours each semester.

Required course work (12 credits):

Biomedical Sciences Research ethics (2 credits)

Graduate-level Physiology course (3 credits)

Epidemiology (3 credits)

Interdisciplinary Seminar in Biomedical Science (1 credit)

Beyond the Bench: Fundamental Skill Sets for Biomed. Researchers (3 Credits)

Three courses from the following list (9 credits):

STAT 5050 (or other statistics course; 3 credits)

MOLB 5600, General Biochemistry (3 credits)

BIOL 4600, Cell Biology (4 credits)

MOLB 5670, Develop. & Molecular Cell Biology (3 credits)

PHCY 6230, Pharmacology I (4 credits)

Recommended Program Electives (9 Credits)

KIN 5025, Exercise Physiology (3 credits)

KIN 5047, Research Biomechanics (3 credits)

FCSC 5145 Advanced Nutrition (4 credits)

FCSC 5147 Nutrition and Weight Control (3 credits)

KIN 5062, Applied Concepts in Human Aging (3 credits)

CHE 5100, Biomedical Engineering (3 credits)

PATB 5510, Introduction to Virology (3 credits)

HLSC 4700, Health Informatics (3 credits)

HLSC/MOLB 4520, Public Health Issues in Developing Countries (3 credits)

HLSC/MOLB 4530 Global Experience in Public Health (2 credits)

HLSC/MOLB 4310 Foundations of Scholarship and Discovery (1 credit)

Concentration Area (12 credits)

Research/Dissertation (remaining): Students are expected to conduct research leading to a publishable dissertation. While publication expectations are determined largely by the major advisor, it is required that one manuscript be submitted to a peer-reviewed journal prior to the defense. Students will need to demonstrate lead authorship on articles published in their dissertation.

Courses

BMS5880 - Biomedical Sciences Research Ethics

Credits: 2

Introduction to the field of bioethics, including major ethical theories and principles, with an emphasis on understanding the ethical issues that may arise while conducting biomedical research and potential strategies for properly addressing these ethical issues.

BMS5920 - Continuing Registration: On Campus,

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5940 - Continuing Registration: Off Campus,

Credits: 1-24
Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5980 - Dissertation Research,

Credits: 1-24
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

BMS5985 - Seminar

Credits: 1
Max Credit (Max. 3)

A series of weekly seminars presented by faculty from other universities, private or public sector health industries or by Biomedical Science Program faculty and students. Examines current topics and research in biomedical sciences through oral presentations and discussion.

Prerequisite: graduate standing and consent of instructor.

Ecology, Ph.D.

The Program in Ecology (PiE) provides you with long-term career development by exploring the linkages of ecology and evolution with other disciplines, and by reaching for emerging questions, concepts, and approaches that will shape the future of the field.

Additional Information

Program in Ecology, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128

Website: <http://www.uwyo.edu/pie/>
Email: ecology@uwyo.edu

Program Director: Melanie Murphy, Ph.D.

Degree Offered

Ph.D. in Ecology

The Program in Ecology prepares doctoral students to lead the discipline of ecology during the coming decades. The program is grounded in the natural history of organisms in their environment, but incorporates tools and perspectives from across the biological, physical, mathematical, computational, and earth sciences. Students develop conceptual, historical, and philosophical perspectives spanning the entire range of subdisciplines in ecology, while receiving advanced training in the subdiscipline of their individual interest.

The program fosters long-term career development by exploring the linkages of ecology with other disciplines, and by scanning the ecological horizon for emerging questions, concepts, and approaches that will shape the field in years to come.

Faculty members from several departments and colleges participate in the Program in Ecology. Their interests span the full range of topics covered in the field of ecology, and students in the program reflect this diversity.

Program Specific Admission Requirements

Only students seeking a doctoral degree will be admitted into the program. Minimum criteria for admission to the Program in Ecology are:

- Minimum undergraduate GPA of 3.000
- Agreement by a member of the PiE faculty to sponsor the student, or to co-sponsor the student together with a PiE affiliate
- Admission to a home department at the University of Wyoming

All applications to the program will be reviewed by the Graduate Affairs Committee, which has authority on admissions. Students applying to the program who lack a master's degree must show exceptional promise and commitment (e.g., through undergraduate or post-graduate research experiences, peer-reviewed publications, and/or success in competing for research fellowships). Such students are encouraged to consult with their prospective adviser on whether to apply directly to PiE or to master's programs in individual home departments of PiE faculty.

Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the program. Transfer is not pro forma. Transfer applications are subject to the same criteria as for entering students, and admission to the program for transfer students must be approved by the Graduate Affairs Committee.

Program Specific Degree Requirements

Advisory Committee

Before the end of the second semester of study, the student should nominate a five-member advisory committee to the Office of the Registrar. At least three members of the committee, including the committee chair (usually the student's adviser), will be members of the PiE faculty. One other member, who will serve as Graduate Faculty representative, must be from outside the home department of the major adviser, although (s)he can be a faculty member in a department that participates in the program. The committee will advise the student on his/her program of graduate study, execute and evaluate the student's preliminary examination, evaluate the student's dissertation proposal and dissertation, and conduct the student's dissertation defense.

Program of Study

All students are required to take ECOL 5100 or equivalent. This course should be taken during the first year of residency. Exceptions or substitutions of these requirements are subject to approval by the graduate affairs committee.

The program of study must include at least 6 credit hours aimed at developing a tool skill, which except for rare cases shall be in the quantitative/analytical domain (e.g., statistics, modeling, GIS, remote sensing, bioinformatics). Courses relating to research tools should be taken early in the student's residency to ensure that they can be used in thesis research and advanced studies. Specific coursework and tool-skill development for the student's program of study will be developed in consultation with and subject to approval by the student's advisory committee.

Admission to Candidacy

Admission to candidacy for the Ph.D. requires two steps: 1) providing evidence that the student is prepared to identify a research question, design an approach for investigating that question, and a plan for executing the approach, all in the format of an NSF-style research proposal, and 2) illustrating adequate proficiency in the subject matter of ecology through a process involving both written and oral exams.

Proposal

Students must submit a NSF-style proposal to their committee outlining their project, typically by the end of the fourth semester. Each committee member will provide feedback to the student on the proposed research and indicate approval of the proposal or request revision. The proposal must be approved by all committee members prior to starting the preliminary exams.

While this proposal should be a plan for actual dissertation research, unforeseen circumstances may require altering the student's dissertation work after the proposal has been approved by the committee. In the case of a major alteration, the student should reformulate a research plan and submit it to the committee in writing for committee approval.

Preliminary Exam

Passing the preliminary exam is the official admission to candidacy.

Written portion of the preliminary exam. The student will take the written exam portion of the preliminary exam no fewer than two weeks following approval of the research proposal. The goal of this exam is to test breadth of knowledge in ecology. The design of this exam will be coordinated by the graduate committee under the leadership of the adviser. Each written exam will cover the following topics:

- Ecological topics ranging from organismal/evolutionary to ecosystem-level perspectives, integrating concepts and perspectives from across the discipline, over a wide range of spatial and temporal scales.
- The philosophical and historical development of ecology.
- The conceptual background of the student's area of specialization.

The exam will consist of four to six questions developed collectively by the committee and organized by the student's major professor. The exam will be open book; however, the answers will be solely the work of the student. Answers should be fully cited and collectively should be no longer than 30 pages double-spaced exclusive of references cited. Students will have one full week (seven days) to complete the exam. Committee members will indicate pass/fail within one week following completion of written exams. Four of five passing votes are required.

Oral Portion of the Preliminary Exam. No sooner than two weeks after successfully passing the written exam, the student may proceed to an oral exam administered by his/her graduate committee. Oral exams center around three goals from which questions will be derived:

- To verify that the student is prepared, conceptually and methodologically, to carry out successful dissertation research.
- To evaluate the student's ability to conceptualize specific questions in a broad, integrative context.
- To evaluate the student's ability to think spontaneously and creatively and to articulate responses about unexpected or novel questions.

The advisory committee will discuss and organize specific questions based on these goals in a short session at the beginning of the exam period before admitting the student to the examination room and starting the exam. Following the exam each committee member will provide non-binding paper votes of pass/ fail for each of the three goals of the oral exam. Following discussion of the student's performance, committee members will each assign a grade of pass/fail for the overall exam. Four of five committee members must vote for passing the overall oral exam.

Students whose performance is unsatisfactory will be given one opportunity for retaking the oral examination. This retake will occur no later than the academic-year semester following the first examination.

Public Seminars

Students are required to give two oral presentations on their research. The purposes of these presentations are to provide the student with practice in oral presentations and to keep the PiE community informed of the student's progress. The first will describe the student's dissertation research proposal. This presentation will be given before the student submits his/her thesis proposal. The second presentation will summarize the student's completed dissertation research, and will normally be given the same semester as the student's dissertation defense. Under extraordinary circumstances (subject to approval by the Graduate Affairs Committee), this presentation may be given at an earlier time. These presentations must be open to the public, and may comprise part of a departmental or Program in Ecology seminar or brown-bag series.

Courses

ECOL5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ENR 5050/GEOG 5050.

Prerequisite: graduate standing.

ECOL5060 - Advanced Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed BOT 5060/ZOO 5060.

When Offered (Offered every other year)

Prerequisite: graduate student in good standing.

ECOL5100 - Ecology as a Discipline

Credits: 3

Covers the range of ecological questions, processes, scales, and research approaches, in context of the history and philosophy of science in general and of ecology in particular. Aimed at first-year students in the doctoral program in Ecology, although students in other graduate programs are welcome.

Prerequisite: graduate standing.

ECOL5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed REWM 5400.

Prerequisite: LIFE 3410 or equivalent.

ECOL5500 - Quantitative Analyses of Field Data

Credits: 4

A practical guide to the analysis of messy field data, including data exploration, generalized linear and additive models, mixed models, autocorrelation, and model selection using Program R. Students will have bootcamp to learn methods and spend the rest of the semester analyzing their own data.

Prerequisite: graduate standing.

ECOL5520 - Habitat Selection

Credits: 2

In this course we will cover theory and behavioral/evolutionary concepts related to the process of habitat selection, the contexts under which habitat choices are adaptive or maladaptive, and different types of anthropogenic habitat change and the consequences for animals in the wild. **Prerequisite:** Graduate students in good standing.

Cross Listed ZOO 5520

Prerequisite: Graduate students in good standing.

ECOL5540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540/SOIL 4540.

Dual Listed MOLB 5540/SOIL 5540.

Prerequisite: MOLB 2210.

ECOL5550 - Ecology as a Scientific Profession

Credits: 2

A capstone that prepares doctoral students for success and leadership in their careers as professional ecologists. Intended for students enrolled in the doctoral Program in Ecology in their final year.

Prerequisite: graduate standing.

ECOL5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed REWM 5580.

ECOL5610 - Quantitative Modeling in Landscape Ecology

Credits: 3

Emphasis on quantitative, spatial analysis of landscapes and application of these quantitative tools to making sound management decisions. Work with real data, acquire high-level quantitative skills, develop problem-solving skills, and discuss management application of model results. Analysis will encompass abiotic, biotic (plant and animal), and human use of ecological systems in a spatial context.

Cross Listed REWM 5610.

When Offered (Offered during even-year fall semesters)

Prerequisite: upper division stats course (e. g. , STAT 4015 or STAT 4025) and graduate standing.

ECOL5620 - Advanced Topics in Ecology

Credits: 1-4

Max Credit (Max. 12)

Provides advanced treatment of specific topics in ecology that are not covered in regular courses.

Prerequisite: graduate standing and consent of instructor.

ECOL5650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Cross Listed ECOL 5650.

Prerequisite: graduate standing.

ECOL5680 - Landscape Genetics

Credits: 3-4

Provides a unique opportunity for interdisciplinary training and international collaboration uniting some of the most active landscape genetics groups in North America and Europe. A key objective of landscape genetics is to study how landscape modification and habitat fragmentation affect organism dispersal and gene flow across the landscape. Meeting this and other landscape genetic objectives requires highly interdisciplinary specialized skills making intensive use of technical population genetic skills and spatial analysis tools (spatial statistics, GIS tools and remote sensing). To bring these diverse topics and skills together effectively, we are using a distributed model of teaching. Population genetics, spatial analysis/ statistics, and previous experience in Rare all extremely useful but not required.

Cross Listed Cross listed with: REWM 5680.

ECOL5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 5775 and BOT 5775.

When Offered (Offered during even-year fall semesters)

Prerequisite: LIFE 3400.

ECOL5780 - Research in Ecology

Credits: 1-6

Max Credit (Max. 12)

Designed for doctoral students pursuing exploratory research before they have determined a dissertation project, and for students to pursue independent research that will not comprise part of their dissertation. Research must be conducted under supervision of an Ecology Faculty member or Affiliate.

Prerequisite: admission to doctoral Program in Ecology.

ECOL5920 - Continuing Registration: On Campus,

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5940 - Continuing Registration: Off Campus,

Credits: 1-12

Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Hydrologic Sciences, Ph.D. (WRESE)

The Water Resources/Environmental Science and Engineering (WRESE) program facilitates Ph.D.-level course offerings in water-related disciplines, and coordinates offerings of these courses. Furthermore, the WRESE program serves as a focal-point for water-related graduate research and education at the University of Wyoming.

This interdisciplinary degree program encourages cross-department and inter-college coordination for research and education in hydrology and water resources.

Additional Requirements

Program Specific Admission Requirements

The WRESE Program only admits students seeking a doctoral degree.

Minimum criteria for admission to the Program are:

- Minimum undergraduate GPA of 3.000
- Agreement by a faculty member affiliated with the WRESE program to sponsor the student
- Admission to a home department at the University of Wyoming

Typically, students admitted into the program will have previously obtained a Masters-level degree. Under exceptional circumstance, students may be admitted directly after an undergraduate degree if they show exceptional promise and commitment. Students already admitted to doctoral programs in individual departments at the University of Wyoming may apply to transfer to the program.

Program Specific Degree Requirements

Students in the WRESE Program are expected to create their graduate committee within the first year of study. The committee should be composed of three faculty members within the PhD program in Hydrology and 2 should be from the student's departmental home. A committee shall be composed of no fewer than 5 members, of which only one may be from outside the University. Additional committee members may be added to support the student's learning and objectives on the discretion of the committee and WRESE Program chair.

Program of Study

Students enrolled in the Program should complete their Program of Study within the first 3 semesters. The student shall work with his/her research advisor and committee to determine the appropriate course of study relative to the student's research agenda. Students are expected to complete a rigorous course of study in quantitative hydrological sciences. Minimum requirements for the PhD include:

- Coursework credits: 42 hours (26 can be from an MS)
- Total credits: 72 hours
- Math expectations: students are encouraged to pursue a high level of math proficiency, with typical students progressing through differential equations. Individual math expectations will be determined by the committee and program chair.

A dissertation proposal should be approved by the end of the 4th semester. Students shall submit their proposal to their committee for review two weeks prior to a holding a committee meeting where the student (a) presents their proposal in a public presentation and (b) defends the proposal to the committee in a closed meeting. After the meeting, the student shall amend the proposal as required by the committee within a timely manner.

Admission to Candidacy / Preliminary Examination

Advance to candidacy is attained by passing preliminary exams within 3 years of initiating a degree program. Students should complete their preliminary exams as close to the end of their primary coursework as possible. Preliminary exams consist of two parts. The first part is a written examination wherein committee members shall submit written questions to the student. Once the student has passed their written exams, they will be administered an oral examination.

The written exam shall be administered by the student's research adviser, who will coordinate the questions so as to obtain a comprehensive review of the student's knowledge of the materials the student has learned in the classroom and needs to complete his/her research topic. Written questions should cover both conceptual and theoretical underpinnings in hydrological sciences and technical questions related to the student's research area.

Molecular and Cellular Life Sciences, Ph.D.

The Molecular and Cellular Life Sciences (MCLS) program serves as an inclusive and integrative graduate program for students being trained in basic biological and biomedical research at the molecular and cellular levels.

Additional Information

Molecular and Cellular Life Sciences, Ph.D. Program

Office of Graduate Education
Old Main 310
Phone: (307) 766-4128
Website: <http://www.uwyo.edu/mcls/>
Email: mcls@uwyo.edu

Program Director: Daniel Levy, Ph.D.

Degree Offered

Ph.D. in Molecular and Cellular Life Sciences

This interdisciplinary program with more than 30 faculty participants spans a wide range of research topics, such as: Biotechnology, bioengineering, biomaterials, and pharmacology, Cell biology and signaling, Genetics and development, Genomics, proteomics, and computational biology, Microbiology and infectious disease, and Structural biology and biophysics.

Coursework focuses on core courses in biochemistry and molecular biology, with electives that include such diverse courses as: Topics in Genomics, Biophysics, Microbial Physiology and Metabolism, Cell and Developmental Genetics, Mass Spectrometry and Analytical Chemistry, Biomedical Engineering, Mammalian Endocrinology, Cell Culture and Virology, Introduction to Bioinformatics, Protein Structure and Function, Microbial Genetics, Computational Biology, and Quantitative Microscopy.

Program Specific Admission Requirements

Admission to MCLS is a two-step process. The first level of evaluation is carried out by the MCLS admissions committee. This step does not require any fee but does require that all requested materials be submitted as described on our website. After an initial review of all complete applications, a subset of qualified applicants will be selected for video conference interviews with members of the MCLS admissions committee. Applicants who are chosen for admission to the MCLS program will then complete the final application step through the University of Wyoming Admissions office. This latter step requires the completion of several additional forms. Students are then officially notified by the university of their acceptance into the MCLS program.

We encourage students to submit their completed applications at the very latest by January 15 of each calendar year. However, because our review of applications will begin in the late fall, early submissions are encouraged and may stand a greater likelihood of success. Also note that we will continue to review new applications received after January 15 in the event that additional slots are available.

Program Specific Degree Requirements

MCLS doctoral students must fulfill the minimum requirements outlined by the university. In addition, students must obtain a high level of proficiency in the core foundations of the molecular and cellular life sciences through required courses in biochemistry/ molecular biology, scientific literature analysis proficiency, and the MCLS cornerstone course. Because of the broad range of research interests pursued by MCLS faculty and students, considerable flexibility will be exercised regarding the specific nature of the graduate-level elective courses that students may take.

Students must successfully complete four eight-week rotations in MCLS laboratories of their choice during the first year.

Students must pass a comprehensive assessment exam at the end of the first year. Towards the end of the second year, students will undertake a qualifying examination in order to be formally admitted to graduate degree candidacy. This exam will have both written and oral components and will cover areas of science that are relevant to the students' research.

The research and coursework progress of MCLS students will also be monitored and evaluated every year by the MCLS curriculum committee. In addition, an annual meeting with a research-specific dissertation committee will facilitate and evaluate the research progress of MCLS students beginning in the second year.

Students must attend weekly outside seminars on topics in the molecular life sciences for the durations of their studies.

For more information, please see the program's Web site at: www.uwyo.edu/MCLS/.

Neuroscience, Ph.D.

The Graduate Program in Neuroscience is interdisciplinary. Students receive broad and integrative training in neuroscience with emphasis on core concepts, skills, and methodologies.

Additional Information

Neuroscience, Ph.D. Program

Office of Graduate Education

Old Main 310

Phone: (307) 766-4128

Website: <http://www.uwyo.edu/neuroscience/>

Email: neuroscience@uwyo.edu

Program Director: Kara Pratt, Ph.D.

Degree Offered

Ph.D. in Neuroscience

The Graduate Neuroscience Program offers training leading to the Ph.D. degree in Neuroscience. The Neuroscience Program emphasizes systems and integrative approaches, and our goal is to provide the students with the necessary background to be broadly trained research neuroscientists and to carry out independent research in neuroscience. The Neuroscience Program emphasizes continuing interaction with faculty from several departments and we have a low student to faculty ratio. Advisors spend considerable time supervising and training each doctoral student. The educational philosophy of the Neuroscience Program is to encourage a problem-oriented rather than a strict discipline-bound approach to research. You will emerge from this program with the scientific and experimental training needed to comprehensively address a very wide range of research questions using a variety of techniques and analytic tools.

The Graduate Neuroscience Program is designed to enable graduate students to acquire competence in the various disciplines necessary for research and teaching careers in neuroscience. The current interests of the Neuroscience faculty include sensory neurophysiology, behavioral neuropharmacology, neurodevelopment, neurodegeneration, and synaptic plasticity.

Students and faculty have access to outstanding resources established by NIH Neuroscience and Sensory Biology Core grants. The Microscopy Core houses both light (Zeiss laser scanning, fluorescent) and electron (Transmission and Scanning) microscopes. Resources needed to conduct research ranging from molecular, cellular circuit level to behavior are readily available within the Neuroscience Center.

Doctoral Program Admission Minimum Requirements

- GRE: Accepted but not required;
- GPA: 3.000 (4.000 scale);
- Three favorable letters of recommendation;
- Bachelor's degree in a biological science from an accredited institution;
- Statement of research interests and career objectives. We recommend that students study the Neuroscience faculty web sites and contact faculty regarding openings and shared research interests.

You will be best prepared for our program if you have successfully completed courses in neuroscience, chemistry, biology, physiology, and cell/molecular biology. Students may be admitted with deficiencies in some of the areas if they are strong in many or all others. If so, the student's advisory committee will determine what additional work is necessary during the first year to correct any deficiency.

Program Specific Degree Requirements

All doctoral Neuroscience students are required to complete a program of core classwork that includes the following required courses: Introduction to Neuroscience, Structure and Function of the Nervous System and Neurophysiology. Students are required to take one course in Statistics (e.g. STAT 5050, STAT 5210) and the course that meets this requirement will be arranged with the student's committee. The statistics requirement must be met by the end of the second year. The Neuroscience Program is a research-oriented program and students are expected to take a minimum of 2 to 3 credit hours of research per semester. Students are also expected to enroll in an on-going Seminar in Neuroscience. The Neuroscience Seminar, which meets weekly and is attended by students and faculty members, provides an opportunity for intellectual and social exchange, as well as for the development of professional skills in critical thinking. The topic for seminar and the faculty member directing the seminar changes each semester. The remainder of the coursework for the doctor of philosophy degree is selected from designated courses in Neuroscience, physiology, pharmacology, and molecular biology. A grade of B or better is required for all Neuroscience courses.

A student is expected to have a graduate adviser at all times. The faculty adviser must be a participating member of the Neuroscience faculty. The adviser is responsible for directing the student's research and academic coursework. During the second year, the student will have an advisory committee. The advisory committee will consist of at least three neuroscience faculty members and an outside member. Normally, the student's adviser will chair the committee and help identify members of the committee who best match the student's area of interest. The role of the advisory committee is to oversee all aspects of the student's education after the first year.

In the student's second or third year, the advisory committee will set and evaluate the student's qualifying examination. After successful completion of the preliminary examination the student will profess to Ph.D. candidate status.

The dissertation is the single most important component of the graduate program. It reports the results and significance of the student's research. In addition to the written dissertation, the doctoral candidate will deliver a formal seminar based on their research. The seminar will be followed by an examination by the student's advisory committee.

Courses

NEUR4295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (Xenopus tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and drosophila).

Cross Listed ZOO 4295.

Dual Listed NEUR 5295.

Prerequisite: ZOO 4280.

NEUR4720 - Neuroscience Speaker Seminar

Credits: 2

Max Credit (Max. 6)

The purpose of this course is to use the Neuroscience/sensory biology visiting speaker series to build student knowledge in neuroscience, as well as skills in critical evaluation of the research literature, and oral/ written communication. This will maximize student learning from the speaker series. The course may be taken up to three times.

Dual Listed NEUR 5720.

Prerequisite: Graduate level standing in neuroscience, biomedical sciences, zoology/physiology, or other life science programs. Undergraduates: concurrent or prior ZOO 4280.

NEUR5100 - Structure and Function of the Nervous System

Credits: 4

Aimed at understanding the structure and interconnections within the nervous system, and how structure gives rise to the complex functions mediated by the brain. This is an essential feature of neuroscience. Covers gross anatomy of the central and peripheral nervous system, followed by detailed consideration of the divisions of the brain and their functional significance.

Cross Listed ZOO 5100.

Prerequisite: admission to the graduate neuroscience program, or graduate standing in another related program, or permission for undergraduate enrollment following discussion with the instructor.

NEUR5280 - Introduction to Neuroscience

Credits: 3

Examines the basic properties of neurons and from there identifies determinants of brain development and how neuronal circuits are formed. How neuronal circuits underlie processing sensory information, coordinated movement, complex functions (e. g. sleep, learning) and homeostasis are discussed.

Cross Listed ZOO 5280.

Prerequisite: ZOO 3115 or equivalent.

NEUR5295 - Neurodevelopment

Credits: 3

Through lecture and discussion of research articles, students learn mechanisms of nervous system development, from the birth and differentiation of neurons to the formation of synapses and circuits. Focus is on classical experiments done in vertebrates (*Xenopus* tadpole, chick, zebrafish, and mouse) and invertebrates (nematode and *Drosophila*).

Cross Listed ZOO 5295.

Dual Listed NEUR 4295.

NEUR5685 - Neurophysiology

Credits: 3

Designed to investigate the structure and function of nervous systems, drawing information from both vertebrate and invertebrate organisms. Topics such as sensory systems, motor coordination and central integrative mechanisms will be covered in addition to the basic neurophysiology of nerve cells.

Cross Listed ZOO 5685.

Prerequisite: one course in physiology, chemistry, physics.

NEUR5715 - Seminar in Neuroscience

Credits: 1-2
Max Credit (Max. 20)

A continuing seminar. All students in the graduate neuroscience program are expected to register for this seminar each semester. The interdisciplinary approach to the nervous system is used employing work from physiology, neuroanatomy and neurochemistry, psychology, pharmacology and biochemistry.

Cross Listed ZOO 5715.

Prerequisite: admission to the graduate neuroscience program or graduate standing.

NEUR5720 - Neuroscience Speaker Seminar

Credits: 2
Max Credit (Max. 6)

The purpose of this course is to use the Neuroscience/sensory biology visiting speaker series to build student knowledge in neuroscience, as well as skills in critical evaluation of the research literature, and oral/ written communication. This will maximize student learning from the speaker series. The course maybe taken up to three times.

Dual Listed NEUR 4720.

Prerequisite: Graduate level standing in neuroscience, biomedical sciences, zoology/physiology, or other life science programs. Undergraduates: concurrent or prior ZOO 4280.

NEUR5800 - Research in Neuroscience

Credits: 1-16
Max Credit (Max. 16)

The research must be conducted under the supervision of one of the neuroscience program faculty. Laboratory opportunities for research include neuroendocrinology, behavioral neuroscience, sensory neurophysiology, neuroanatomy, neuropharmacology, neurotoxicology, neural cell biology, and neurochemistry.

Prerequisite: admission to the graduate neuroscience program or graduate standing.

NEUR5887 - Molecular Neuropharmacology

Credits: 3
Focus on the molecularly-induced functional changes within the nervous system in normal and disease states. In addition, will provide a thorough explanation of the cellular and molecular actions of drugs on synaptic transmission and discuss the neurochemical basis of behavior.

Prerequisite: PharmD current standing and instructor's permission or NEUR 5280.

NEUR5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NEUR5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NEUR5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

First-Year Seminar.

Prerequisite: advanced degree candidacy.

Science & Mathematics Teaching Center Master's Degrees

30 graduate-level semester hours, B or better grades in all required courses and overall GPA of 3.0 required for majors. Required courses taken 6 or more years ago must be petitioned and approved to be used to satisfy degree requirements.

Email: smtc@uwyo.edu

Program Director: Sylvia Parker

The Science and Mathematics Teaching Center (SMTC) was established in 1970 and is committed to excellence in science, mathematics, technology and STEM education. As part of the Office of Graduate Education in Academic Affairs, the SMTC, in cooperation with the Wyoming Department of Education (WDE) and the Professional Teaching Standards Board (PTSB), serves as a resource and professional development center for the state. The SMTC offers transdisciplinary graduate degree programs with multiple degree concentrations, certification options, and endorsement options. All of the programs emphasize both strong content knowledge and instructional practices. Faculty from

throughout the university collaborate with the SMTC by teaching classes, reviewing applications, serving on committees, advising students, and working on externally funded research projects.

The SMTC provides extensive off-campus professional development that serves teachers, students, administrators, school districts and communities throughout Wyoming and the region. SMTC in-service and extension courses, workshops, institutes, and conferences are designed collaboratively to improve science and mathematics teaching in Wyoming.

The SMTC administers and supports five master's degree programs:

- (1) the Master of Science degrees in Natural Science with concentrations in Middle Level Math (MMA) and
- (2) Middle Level Science (MSC); these programs are designed for Wyoming's in-service elementary, middle, and high school teachers. They focus on general science and mathematics content with an emphasis on teaching middle school level learners. The course work leads to middle level endorsements provided by the Wyoming PTSB. Teachers must have two years of teaching experience to participate in these programs.
- (3) Master of Science in Teaching - Natural Science (MST - Natural Science). This is a self-directed master's degree program working with the SMTC, SER, and the Haub School as well as other colleges. The program is developed individually with the guidance of a graduate committee based on the interests of the graduate student. This program is primarily intended for individuals teaching at the secondary level and may be used take the 18 graduate-level credits in a specific teaching area often needed to teach Advanced Placement and community college courses.
- (4) Master of Science - Natural Science (MS - Natural Science). This is a self-directed master's degree program working with the SMTC, the College of Arts and Sciences, SER, and the Haub School and other colleges. The program is developed individually based on the interests of the graduate student and may emphasize formal or informal learning settings. Interdisciplinary study is encouraged.
- (5) Master of Science in Natural Science with a concentration in Natural Science Education (NED). This Master's degree program is designed for students pursuing careers as environmental and natural science educators in non-public school or non-formal education settings. These students spend one year at the Teton Science Schools (TSS) in Jackson. A long-standing MOU between the SMTC and TSS allows students to use 15 graduate credit hours earned at TSS towards a master's degree if they are accepted into the second year at UW within the SMTC.

SMTC Student Learner Outcomes

Upon successful completion of the MS degree program in Natural Science, a student will be able to:

- Engage in teacher research to transform STEM instruction:
 - Design and implement a research project that asks and answers a question using appropriate materials, concepts and methods, and ethical practices, and
 - Effectively communicate all aspects of the research project in both oral and written forms.
- Use professional and academic standards to ensure high-quality interdisciplinary instruction (i.e., place-based, culturally relevant, and/or social justice pedagogy) to maximize learning for all students.
- Engage in mathematical and/or scientific discourse and scientific thinking as active participants in communities of practice.
- Use emerging technology and science investigations as tools to engage students.

Program Specific Admission Requirements

For the MS-Natural Science Master's Degrees (with concentrations in MSC and MMA) and the MST:

Two years of teaching experience and a valid teaching license (required for MSC and MMA; may be waived for MST and MS-Natural Science)

Application Fee

Official Transcripts from all Institutions attended and Bachelor Degree conferring institution

3.0 undergraduate grade point average; provisional admission with a lesser GPA only with consent from Academic Affairs

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence (These items are not required of applicants who hold a prior master's degree)

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from the teacher's principal or an employers and two other colleagues.

For the MS-Natural Science Master's Degrees (with concentration in NED) - First Year Application:

Official Transcripts from all institutions attended and Bachelor Degree conferring institution Application Fee

Acceptance and admission by the Graduate Program at the Teton Science Schools in Jackson, WY

For the MS-Natural Science Master's Degrees (with concentration in NED) - Second Year Application:

GRE (minimum 292 score) or an Alternative Portfolio including evidence that supports the potential success of the candidate as a graduate student and a document that interprets the evidence

Writing Sample in response to three provided questions

Resume

Three Letters of Recommendation including a letter from a TSS Graduate Program Faculty Member, one from another TSS employee such as a Classroom Instructor or Field Instructor, and one from the first year application

Applicants complete a UW graduate application and upload all of the information on the Admissions Office website (<http://www.uwyo.edu/admissions/apply.html>). Application packets are reviewed by SMTC Admissions Committees and recommendations for admissions are submitted to the University of Wyoming Admissions Office. Any of the above requirements plus the university's minimum 3.00 grade point average may be waived if proper documentation and reasoning are given by the SMTC and approved by the Associate Vice Provost of Graduate Education.

International applicants, who are not native English-speakers, must submit TOEFL or IELTS scores. If an international applicant wishes to be considered for Graduate Assistantship funding, the applicant should also submit the results of an Oral Proficiency Interview (OPI). Please contact the UW English Language Center (<http://www.uwyo.edu/elc/>) for more information.

Please see the Graduate Admissions and Graduate Student Regulations and Policies entries in the front section of the UW Catalog for more information.

Application Due Dates for Master of Science - Natural Science with Concentrations in the following areas:

Middle-level Science (MSC): applications are accepted on an ongoing basis; new students may begin only in summer each year; final due date for admission in summer is April 1.

Middle-level Mathematics (MMA): applications are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Natural Science Education (NED): applications deadlines for Year 1 are established by Teton Science Schools (<https://www.tetonscience.org/programs/graduate-program/admissions/>); due date for admission to begin Year 2 in the fall at UW is February 1.

MST and the MS- Natural Science Masters Degree: applications for these self-designed programs are accepted on an ongoing basis; new students may begin any semester (fall, spring, summer); final due date for admission in fall is July 1; summer is April 1; spring is November 1.

Graduate Assistantships and Scholarships

The SMTC often has scholarships and graduate assistantships available for graduates accepted for the above Master's degree programs. More information upon admission and acceptance.

For the Master of Science in Natural Science Master's Degrees

Plan B (non-thesis)

- 30 Credit Hours of graduate-level coursework is required in all of the programs. This includes 24 credit hours in required coursework depending on the program plus 6 credit hours of additional coursework that may include a research class, Plan B independent research and an elective.
- The Middle Level Science (MSC) concentration is a 3-year program, for the required coursework, in the summers only on UW's main campus. Courses are offered on a 3-year rotation cycle; students may enter the program in any year.
- The Middle Level Math (MMA) concentration is a 2-year program with classes offered virtually in the fall and spring and in-person on the main campus in the summer, for the required courses. Students may enter the program in any semester.
- The Natural Science Education (NED) concentration is a 2-year program with classes offered in the graduate program at the Teton Science Schools in Jackson, WY, in year 1, and additional classes offered at the UW main campus in year 2.
- The MST (Master's of Science in Teaching) and the MS- Natural Science Master's Degrees are Main campus degrees. They are self-directed master's degree programs designed individually based on the student's interests and needs.
- All students must complete and defend a Plan B research project.
- A Plan A (thesis) may be completed with an extra year of research.

NOTE: Middle-Level Science & Middle-Level Mathematics; 24 credit hours in the core courses are required for institutional recommendation for WY middle-level endorsement from the Professional Teaching Standards Board, PTSB.

NOTE: *NASC 5810 Middle-Level Science and Mathematics 3 credit hour course Practica (required course for teachers without previous coursework or experience teaching middle-level students. Offered spring semester in even years only).

Other Degrees and their Requirements

The MST in Natural Science and the MS - Natural Science programs are self-directed master's degree programs designed individually based on the student's interests and needs. The programs require 30 graduate level credits plus a Plan B research project that is defended publicly. Requirements are based on the university minimum requirements.

For the NED Concentration - Year 1 (at Teton Science Schools)

These students spend their first year at the Teton Science Schools in Jackson, Wyoming. Students earn 15 credits that may be used towards the master's degree at the University of Wyoming in Year 2.

For the NED Concentration - Year 2 (at the University of Wyoming)

Plan B (non-thesis)

- This is a one-year program on the main campus.
- 30 credit hours of coursework is required for the master's degree, of which 15 credit hours of agreed upon courses are earned at TSS in year 1. The other 15 credit hours include two required courses: NASC 5650 (3 credits) and a graduate level research class (minimum 3 credits). Additional courses in environmental science and science pedagogy classes are chosen by the graduate student and their advisor.
- A concurrent major in Environmental and Natural Resources is an option with this Master's program.
- Students must complete and defend a Plan B research project.
- A Plan A (thesis) may be completed with an extra year of research.

Middle-Level Science Concentration and Master's Degree

Life Science Summer Core (2023, 2026, 2029, etc...)

BOT5790 - Special Topics in Ecology

Credits: 1-3

Max Credit (Max. 6)

Designed to acquaint advanced students with various topics not covered in other courses. Emphasis is placed on recent developments appearing in the journal literature.

Dual Listed BOT 4790.

Prerequisite: two courses in ecology.

ENTO5601 - Insects for Teachers: Collection and Identification of Insects

Credits: 1

Designed for school teachers K-12. Basic concepts such as insect classification, insect habitats, insect metamorphosis, and destructive and beneficial insects are discussed with emphasis on the presentation of these concepts in the school classroom. Half of the class is devoted to field trips, laboratories, workshop activities, and films. Each student will make an insect collection, and learn how to preserve, mount, and identify specimens to order level. Course may be taken independently of ENTO 5602. Identical to NASC 4790.

Prerequisite: junior standing. Offered summer term only.

NASC4790 - Topics in Natural Science

Credits: 1-6

Presents selected science topics to acquaint teachers or prospective teachers with new concepts, materials or techniques, as introduced in various new school curricula. Topics may include earth science for the middle school, computer learning and/or elementary school environmental science. Includes laboratory.

Prerequisite: junior standing.

NASC5130 - Life Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Investigates ecosystem composition and processes, and biological responses to changes in ecosystem parameters. Examines terrestrial and aquatic communities, photosynthesis, energy flow, biogeochemical cycles, global climate change, climate warning, deforestation, population ecology, DNA/ RNA structure, function, genetic engineering and forensic applications.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science education.

NASC5660 - Standards, Pedagogy and Research

Credits: 2

This course is designed to provide Master of Science in Natural Science students with background in three areas: current science standards, pedagogical practices, and the understanding of various types of educational research as well as some of the practices related to conducting their own research projects.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

Physical Science Summer Core (2021, 2024, 2027, etc...)

EE4800 - Problems in _____

Credits: 1-6

Max Credit (Max. 6)

Section 1 is individual study. Other sections are group study by seminar or class format. Features topics not included in regularly offered courses.

Prerequisite: consent of instructor.

NASC5110 - Physical Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Examines the global dynamics of energy, hydrocarbon combustion, and the physics and chemistry of water. Investigates relationships between energy transformations and pollutants. Considers environmental limitations of fresh water availability and the buffering effect of sea and fresh water.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in Elementary, middle school or general science education.

NASC5510 - Integrated Instructional Strategies, MSC

Credits: 2

Appropriate instructional strategies are discussed and modeled for aligning standards, expectations, and experiences in an integrated science environment. Attention is given to unique characteristics of each strategy, including a review of research on the effectiveness of each strategy on student achievement and attitudes.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

NASC5600 - Mathematics and Statistics in Science Teaching, MSC

Credits: 2

Provides science teachers with the knowledge and experience necessary to help students use statistics in the scientific process. Activities emphasize a hands-on inductive approach closely related to the school science curriculum. Important statistical ideas and methods are studied as they arise naturally in the biological, physical, and earth sciences.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

Earth Science Summer Core (2022, 2025, 2028, etc...)

ASTR4000 - Astronomy for Teachers

Credits: 1-5

Specifically designed for elementary school teachers. Presents basic concepts (time, seasons, light and its properties); planetary systems of the sun; the sun and stars; the Milky Way and galaxies; and cosmology and relativity. Emphasizes presenting these concepts to elementary school children. Half the class is devoted to laboratory and workshop activities to develop techniques for presenting these concepts through visual aides, demonstrations and films. Students may receive a maximum of 5 credits in a combination of ASTR 4000 and ASTR 4100.

When Offered (Offered summer session)

Prerequisite: 6 hours of physical or biological science, junior standing in education.

NASC5120 - Earth Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Emphasizes the lithosphere and atmosphere and their interactions with the hydrosphere and biosphere. Examines the interplay between tectonic processes, earth's radiation balance, ocean processes, ozone depletion and the greenhouse effect. Includes evaluation of methods of measuring and monitoring these phenomena.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teach certification in elementary, middle school or general science education.

NASC5300 - Classroom Assessment in Middle-level Science, MSC

Credits: 2

Deals with the design, construction, and testing of curriculum materials to bring the spirit of scientific inquiry to elementary school pupils. Research to be conducted in the Science and Mathematics Teaching Center.

NASC5400 - Spatial Data Instructional Technology

Credits: 1

Teaching strategies appropriate for elementary/middle school students' conceptual level of development. Positive attitudes toward teaching children about the Earth, its physical environment and human/environment relationships will be promoted. The course content will be supported by the use of geospatial technologies, such as GPS and GIS.

Prerequisite: graduate standing.

Middle-Level Mathematics Concentration and Master's Degree (courses in this program are cross listed with other departments)

MMA Even Years (2022, 2024, 2026...)

NASC5140 - Numbers, Operations, and Patterns for the Middle-Level Learner, MMA

Credits: 3

Provides working middle-level mathematics teachers opportunities to understand and discuss numbers, their representations, and operations on them, from an abstract perspective that includes elegant proof. Also emphasized is the role of language and purpose in composing definitions.

Cross Listed MATH 5140.

Prerequisite: admission to a UW graduate program, either degree or non-degree seeking status, and acceptance into the Middle-level mathematics program.

NASC5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner, MMA

Credits: 3

Empowers teachers of middle-level mathematics to design engaging experiences. Emphasizes the historical context for the development of mathematics, especially its symbols, tools, personalities, and classic problems.

Cross Listed MATH 5160.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5185 - Analysis of Data in the Media for the Middle-Level Learner, MMA

Credits: 3

Focuses on data collection, analysis, interpretation, and communication, using contexts relevant to everyday situations. Topics chosen integrate well with the concerns of middle-level teachers and connect with such curriculum areas as health, science, and social studies. This is not a research methods course.

Cross Listed STAT 5185

Prerequisite: Admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5215 - Using Technology for Middle-Level Mathematics

Credits: 3

Covers the use of technology appropriate to middle-level mathematics teaching, such as microworlds, geographic information systems, spreadsheets, and other content appropriate technologies. Cross Listed with EDCI 5215. Prerequisite: admission to the SMTC Program.

Cross Listed EDCI 5215

Prerequisite: Admission to the SMTC Program.

MMA Odd Years (2021, 2023, 2025...)

NASC5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner, MMA

Credits: 3

Showcases two aspects of 2D and 3D geometry: measurement and transformation. Emphasis reflects current State and National standards for middle-level mathematics classroom and teacher preparation, especially appropriate uses of technology, geometric tools, mathematical language, and problem-solving strategies.

Cross Listed MATH 5170.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, acceptance into the Middle-level mathematics program.

NASC5190 - Mathematics of Change and the Middle-Level Learner, MMA

Credits: 3

Students gain a solid understanding of data and functions in the service of calculus. Hands-on, project-driven, and

focuses on the essential concepts of functions and calculus and their role in middle-level mathematics. Emphasis is on writing and technology (calculators and probeware).

Cross Listed MATH 5190.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5205 - Methods of Teaching Middle-Level Mathematics, MMA

Credits: 3

Research-based pedagogy and pedagogical content knowledge for teaching middle-level mathematics. Designed for practicing teachers of middle-grades mathematics.

Cross Listed EDCI 5205.

Prerequisite: admission to the SMTC Program.

NASC5225 - Assessment for Middle-Level Mathematics, MMA

Credits: 3

Middle-level Mathematics Initiative teacher participants examine, analyze, and implement a variety of assessments that are aligned with standards and instruction appropriate to the middle level math learner.

Cross Listed EDCI 5225.

Prerequisite: admission to the SMTC Program.

Natural Science Education (NED)

Teton Science Schools Graduate Program - Year 1

EDCI5790 - Learning Theories and Instructional Principles

Credits: 3

This course focuses on making connections between theoretical perspectives on teaching and learning, empirical work, and the actual practice of teaching. As a result, learners should expect to examine multiple learning theories, read research based on those theories, explore pedagogy that grows out of these theories, and integrate theory into practice in their own classrooms.

Prerequisite: graduate standing.

NASC5610 - Field Studies in Environmental Education, NED

Credits: 4

Expands student's knowledge of ecological and physiological animal and plant adaptations to environmental conditions, the use of teaching methods and tools of naturalists, the range of resources available for designing and evaluating curriculum, and promotes an appreciation and understanding of the diversity of environments. Contains 4 modules.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5620 - Advanced Elements of Field Ecology Course Design, NED

Credits: 5
Max Credit (Max. 6)

Addresses designing field ecology courses that include research, outdoor leadership, and natural history components. Opportunities are provided to gain deeper understanding of key natural history and ecology concepts of the bioregion; practical strategies for teaching these concepts in field programs; and to formally present student work.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5625 - Place-Based Education-Teton Science School

Credits: 3
Introduces graduate students at Teton Science Schools to the theory and practice of place-based education. The design of the course exposes students to the historical, political, and eco-social underpinnings of place-based education while supporting students in developing thoughtful place-based pedagogies.

Prerequisite: graduate student status.

NASC5630 - Teaching Practicum-Teton Science School

Credits: 2-4
Max Credit (Max. 6)

To improve teaching methods and techniques and expand professional skills. Integrates the foundation of Teton Science Schools, applies coursework content understanding and develops leadership. The course is intended to challenge previously held instructional beliefs and nurture an evolving set of skills and instructional identity. Not equivalent to EDSE 4500 or EDCI 5990 or EDEL 4500.

Prerequisite: current enrollment at Teton Science School.

NASC5640 - Introduction to Field Science Teaching

Credits: 3
Designed to introduce graduate students at Teton Science Schools' to the field of environmental education and instructional concepts for teaching environmental science in the outdoors. Learn field science content, principals of connecting to place, teaching techniques, and learning theories related to environmental education and field science teaching.

Prerequisite: current enrollment at Teton Science School.

ZOO5405 - Winter Ecology of the Yellowstone Ecosystem

Credits: 2

Winter Ecology emphasizes the effects of winter abiotic conditions on organisms and organismal adaptations. Energy flux, snowpack physics, organismal adaptations, avalanche awareness, and the influence of winter on wildlife management are emphasized through lectures and field laboratories. Students will develop an independent research project and present their results.

Prerequisite: graduate standing.

ZOO5420 - Ecological Inquiry

Credits: 3

Addresses basic ecological concepts and natural resource management issues in the Greater Yellowstone Ecosystem (GYE). Emphasis will be placed on developing critical thinking skills and exploring the effects of resource management policy and actions. Course direction will involve moving from a known facts way of thinking in to realm of evaluating effects of human management of the GYE.

Prerequisite: LIFE 2022, LIFE 3400, and graduate standing.

ZOO5430 - Ecology of the Greater Yellowstone Ecosystem

Credits: 3

Covers plant and animal community ecology from both a qualitative and quantitative perspective. Topics include: community interaction of plants and animals; community dynamics, succession, and disturbance; basic data collection and statistical analysis of habitat association data; and the effect of abiotic factors on community structure.

Prerequisite: LIFE 2022, LIFE 3400, and graduate standing.

Natural Science Education (NED) - Year 2

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

Other Courses offered by SMTC available to Graduate Students in SMTC programs:

NASC5670 - Research Methodology

Credits: 4

This course provides foundational information on asking appropriate questions, researching (including IRB), writing, formatting, and defending a Plan B project. At the end of the semester students will have a committee, a preliminary

draft, and present their research. Spring semester will be used to complete projects with committee members.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

NASC5700 - Seminar in Science for Secondary School Teachers

Credits: 1-6
Max Credit (Max. 6)

A course to give graduate students in education, or in-service teachers, an in-depth view of the new materials for teaching science in secondary schools.

Prerequisite: consent of instructor.

NASC5770 - Investigation in Natural Science for Secondary Teachers

Credits: 1-5
Max Credit (Max. 10)

Deals with the design, construction, and testing of curricula materials to bring the spirit of scientific inquiry to secondary school students. Research to be conducted in the Science and Mathematics Teaching Center.

Prerequisite: consent of instructor.

NASC5890 - Directed Professional Study

Credits: 1-6
Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction.

Prerequisite: consent of instructor and graduate standing.

NASC5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

NASC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

NASC5961 - Plan B Project

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: must be enrolled in Plan B program and have program approval.

NASC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

NASC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: graduate standing.

Courses

NASC4790 - Topics in Natural Science

Credits: 1-6
Presents selected science topics to acquaint teachers or prospective teachers with new concepts, materials or techniques, as introduced in various new school curricula. Topics may include earth science for the middle school, computer learning and/or elementary school environmental science. Includes laboratory.

Prerequisite: junior standing.

NASC4800 - Field Studies in Natural Science

Credits: 1-6

Explores topics best studied in the field, on location, or otherwise outside the traditional classroom. Topics may include grassland ecosystem, geology field trips for elementary children and/or schoolyard study areas. Includes laboratory.

Prerequisite: junior standing.

NASC5110 - Physical Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Examines the global dynamics of energy, hydrocarbon combustion, and the physics and chemistry of water. Investigates relationships between energy transformations and pollutants. Considers environmental limitations of fresh water availability and the buffering effect of sea and fresh water.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in Elementary, middle school or general science education.

NASC5120 - Earth Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Emphasizes the lithosphere and atmosphere and their interactions with the hydrosphere and biosphere. Examines the interplay between tectonic processes, earth's radiation balance, ocean processes, ozone depletion and the greenhouse effect. Includes evaluation of methods of measuring and monitoring these phenomena.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teach certification in elementary, middle school or general science education.

NASC5130 - Life Science in Global Context, MSC

Credits: 3

One in a series of three courses investigating earth as a system. Investigates ecosystem composition and processes, and biological responses to changes in ecosystem parameters. Examines terrestrial and aquatic communities, photosynthesis, energy flow, biogeochemical cycles, global climate change, climate warning, deforestation, population ecology, DNA/ RNA structure, function, genetic engineering and forensic applications.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science education.

NASC5140 - Numbers, Operations, and Patterns for the Middle-Level Learner, MMA

Credits: 3

Provides working middle-level mathematics teachers opportunities to understand and discuss numbers, their

representations, and operations on them, from an abstract perspective that includes elegant proof. Also emphasized is the role of language and purpose in composing definitions.

Cross Listed MATH 5140.

Prerequisite: admission to a UW graduate program, either degree or non-degree seeking status, and acceptance into the Middle-level mathematics program.

NASC5160 - Social and Historical Issues in Mathematics and the Middle-Level Learner, MMA

Credits: 3

Empowers teachers of middle-level mathematics to design engaging experiences. Emphasizes the historical context for the development of mathematics, especially its symbols, tools, personalities, and classic problems.

Cross Listed MATH 5160.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5170 - Connecting Geometry with Problem- Solving for the Middle-Level Learner, MMA

Credits: 3

Showcases two aspects of 2D and 3D geometry: measurement and transformation. Emphasis reflects current State and National standards for middle-level mathematics classroom and teacher preparation, especially appropriate uses of technology, geometric tools, mathematical language, and problem-solving strategies.

Cross Listed MATH 5170.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, acceptance into the Middle-level mathematics program.

NASC5185 - Analysis of Data in the Media for the Middle-Level Learner, MMA

Credits: 3

Focuses on data collection, analysis, interpretation, and communication, using contexts relevant to everyday situations. Topics chosen integrate well with the concerns of middle-level teachers and connect with such curriculum areas as health, science, and social studies. This is not a research methods course.

Cross Listed STAT 5185

Prerequisite: Admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5190 - Mathematics of Change and the Middle-Level Learner, MMA

Credits: 3

Students gain a solid understanding of data and functions in the service of calculus. Hands-on, project-driven, and focuses on the essential concepts of functions and calculus and their role in middle-level mathematics. Emphasis is on writing and technology (calculators and probeware).

Cross Listed MATH 5190.

Prerequisite: admission to a UW graduate program, in either degree or non-degree seeking status, and acceptance into the Middle-level Mathematics program.

NASC5205 - Methods of Teaching Middle-Level Mathematics, MMA

Credits: 3

Research-based pedagogy and pedagogical content knowledge for teaching middle-level mathematics. Designed for practicing teachers of middle-grades mathematics.

Cross Listed EDCI 5205.

Prerequisite: admission to the SMTC Program.

NASC5215 - Using Technology for Middle-Level Mathematics

Credits: 3

Covers the use of technology appropriate to middle-level mathematics teaching, such as microworlds, geographic information systems, spreadsheets, and other content appropriate technologies. Cross Listed with EDCI 5215.

Prerequisite: admission to the SMTC Program.

Cross Listed EDCI 5215

Prerequisite: Admission to the SMTC Program.

NASC5225 - Assessment for Middle-Level Mathematics, MMA

Credits: 3

Middle-level Mathematics Initiative teacher participants examine, analyze, and implement a variety of assessments that are aligned with standards and instruction appropriate to the middle level math learner.

Cross Listed EDCI 5225.

Prerequisite: admission to the SMTC Program.

NASC5300 - Classroom Assessment in Middle-level Science, MSC

Credits: 2

Deals with the design, construction, and testing of curriculum materials to bring the spirit of scientific inquiry to elementary school pupils. Research to be conducted in the Science and Mathematics Teaching Center.

NASC5400 - Spatial Data Instructional Technology

Credits: 1

Teaching strategies appropriate for elementary/middle school students' conceptual level of development. Positive attitudes toward teaching children about the Earth, its physical environment and human/environment relationships will be promoted. The course content will be supported by the use of geospatial technologies, such as GPS and GIS.

Prerequisite: graduate standing.

NASC5510 - Integrated Instructional Strategies, MSC

Credits: 2

Appropriate instructional strategies are discussed and modeled for aligning standards, expectations, and experiences in an integrated science environment. Attention is given to unique characteristics of each strategy, including a review of research on the effectiveness of each strategy on student achievement and attitudes.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

NASC5600 - Mathematics and Statistics in Science Teaching, MSC

Credits: 2

Provides science teachers with the knowledge and experience necessary to help students use statistics in the scientific process. Activities emphasize a hands-on inductive approach closely related to the school science curriculum. Important statistical ideas and methods are studied as they arise naturally in the biological, physical, and earth sciences.

Prerequisite: graduate standing and teaching certification in elementary, middle school or general science; or, graduate standing and concurrent enrollment in a program leading to teacher certification in elementary, middle school or general science education.

NASC5610 - Field Studies in Environmental Education, NED

Credits: 4

Expands student's knowledge of ecological and physiological animal and plant adaptations to environmental conditions, the use of teaching methods and tools of naturalists, the range of resources available for designing and evaluating curriculum, and promotes an appreciation and understanding of the diversity of environments. Contains 4 modules.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5620 - Advanced Elements of Field Ecology Course Design, NED

Credits: 5

Max Credit (Max. 6)

Addresses designing field ecology courses that include research, outdoor leadership, and natural history components. Opportunities are provided to gain deeper understanding of key natural history and ecology concepts of the bioregion; practical strategies for teaching these concepts in field programs; and to formally present student work.

Prerequisite: graduate standing; must be accepted into the Teton Science School Program and matriculating at the TSS site.

NASC5625 - Place-Based Education-Teton Science School

Credits: 3

Introduces graduate students at Teton Science Schools to the theory and practice of place-based education. The design of the course exposes students to the historical, political, and eco-social underpinnings of place-based education while supporting students in developing thoughtful place-based pedagogies.

Prerequisite: graduate student status.

NASC5630 - Teaching Practicum-Teton Science School

Credits: 2-4

Max Credit (Max. 6)

To improve teaching methods and techniques and expand professional skills. Integrates the foundation of Teton Science Schools, applies coursework content understanding and develops leadership. The course is intended to challenge previously held instructional beliefs and nurture an evolving set of skills and instructional identity. Not equivalent to EDSE 4500 or EDCI 5990 or EDEL 4500.

Prerequisite: current enrollment at Teton Science School.

NASC5640 - Introduction to Field Science Teaching

Credits: 3

Designed to introduce graduate students at Teton Science Schools' to the field of environmental education and instructional concepts for teaching environmental science in the outdoors. Learn field science content, principals of connecting to place, teaching techniques, and learning theories related to environmental education and field science teaching.

Prerequisite: current enrollment at Teton Science School.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

NASC5660 - Standards, Pedagogy and Research

Credits: 2

This course is designed to provide Master of Science in Natural Science students with background in three areas: current science standards, pedagogical practices, and the understanding of various types of educational research as well as some of the practices related to conducting their own research projects.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

NASC5670 - Research Methodology

Credits: 4

This course provides foundational information on asking appropriate questions, researching (including IRB), writing, formatting, and defending a Plan B project. At the end of the semester students will have a committee, a preliminary draft, and present their research. Spring semester will be used to complete projects with committee members.

Prerequisite: Master of Natural Science - MMA, MSC, or NED who have completed at least one year of coursework, or permission of the instructor or SMTC program coordinator; graduate standing.

NASC5700 - Seminar in Science for Secondary School Teachers

Credits: 1-6

Max Credit (Max. 6)

A course to give graduate students in education, or in-service teachers, an in-depth view of the new materials for teaching science in secondary schools.

Prerequisite: consent of instructor.

NASC5770 - Investigation in Natural Science for Secondary Teachers

Credits: 1-5

Max Credit (Max. 10)

Deals with the design, construction, and testing of curricula materials to bring the spirit of scientific inquiry to secondary school students. Research to be conducted in the Science and Mathematics Teaching Center.

Prerequisite: consent of instructor.

NASC5810 - ML Science & Math Practicum

Credits: 3

Practica for graduate students in the MS-Natural Science MSC and MMA programs in Middle and Junior High schools. Mathematics and science classrooms will serve as sites for assignments. Students complete assignments for the content area of certification as well as appropriate discussions.

Prerequisite: Graduate students in department who have passed at least four departmental courses or consent of the instructor.

NASC5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction.

Prerequisite: consent of instructor and graduate standing.

NASC5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

NASC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NASC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

NASC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: graduate standing.

NASC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

NASC5961 - Plan B Project

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: must be enrolled in Plan B program and have program approval.

NASC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

College of Law

102 Law Building

Klint Alexander, Dean

Phone: (307)766-6416 FAX: (307)766-6417

Web site: www.uwyo.edu/law

Professors:

KLINT ALEXANDER, B.A. Yale University 1991; Ph.D./M.Phil. Cambridge University 1997; J.D. University of Virginia 1999; Dean & Professor of Law 2015.

MELISSA ALEXANDER, B.A. Yale University 1996; J.D. University of Virginia 1999; Professor of Law 2019, 2015.

JACQUELYN BRIDGEMAN, B.A. Stanford University 1996; J.D. University of Chicago 1999; Associate Dean for Academic Affairs and Professor of Law 2008, 2002.

KENNETH CHESTEK, B.A. Pennsylvania State University 1975; J.D. University of Pittsburg School of Law 1979; Professor of Law 2018, 2012.

DANIELLE R. COVER, B.A. University of Maryland 1994; J.D. Tulane University School of Law 1997; Professor of Law 2020, 2014; Director of Legal Services Clinic.

JAMES M. DELANEY, B.A. University of Washington 1985; J.D. Gonzaga University School of Law 1992; LL.M. in Taxation, University of Florida 1997; Professor of Law 2013.

STEPHEN M. FELDMAN, B.A. Hamilton College 1977; J.D. University of Oregon 1982; J.S.M. Stanford University 1986; Jerry W. Housel/ Carl F. Arnold Distinguished Professor of Law 2002.

MARK GLOVER, B.A. Washington University in St. Louis 2002; J.D. Boston University School of Law 2008; LL.M. Harvard Law School 2011; Professor of Law 2019, 2015.

DARRELL D. JACKSON, B.A. College of William and Mary 1987; J.D. George Mason University School of Law 1990; Ph.D. University of Colorado School of Education 2011; Professor of Law 2018, 2013.

SAM KALEN, B.A. Clark University 1980; J.D. Washington University 1984; Professor of Law 2014, 2009.

GEORGE MOCSARY, B.E. The Cooper Union School of Engineering 1995; MBA University of Rochester 1995; J.D. Fordham University School of Law 2009; Professor of Law 2019.

NOAH B. NOVOGRODSKY, B.A. Swarthmore College 1992; J.D. Yale Law School 1997; Professor of Law 2013, 2009.

TARA RIGHETTI, B.A. University of Colorado Boulder 2005; J.D. 2007; Professor of Law 2020, 2014.

JASON ROBISON, B.S. University of Utah 2003; J.D. University of Oregon 2006; LL.M. Harvard Law School 2009; S.J.D. 2013; Professor of Law 2019, 2015.

ALAN ROMERO, B.A. Brigham Young University 1990; J.D. Harvard University 1993; Professor of Law 2007, 2003.

MICHAEL R. SMITH, B.S. Florida State University 1982; J.D. University of Florida 1985; Professor of Law 2006.

Associate Professors:

LAUREN MCLANE, B.S. Radford University 2002; J.D. Seattle University School of Law 2008; Associate Professor of Law 2021, 2018; Director, Defender Aid Clinic.

DONA PLAYTON, B.S. University of Wyoming 1989; J.D. University of Wyoming 1993; Associate Professor of Law 2002, 2018; Director, Family and Child Legal Advocacy Clinic.

Assistant Professors:

JERRY FOWLER, B.A. Princeton University 1983; J.D. Stanford University 1990; Assistant Professor of Law 2019; Director, International Human Rights Clinic.

Academic Professionals:

DEBORA PERSON, B.A. Arizona State University 1981; M.L.S. Rutgers University 1992; Library Associate 1993; Administrative Law Librarian 2005, 1994.

TAWNYA PLUMB, B.A. University of Wyoming 1996; M.L.I.S. University of Texas at Austin 1998; Electronic Services and Assistant Librarian 2004.

Professors Emeritus

Debra L. Donahue, Harvey Gelb, Timothy Kearley, Jerry R. Parkinson, Dee Pridgen, Joel Selig, Elaine A. Welle

The College of Law was founded in 1920. The goal of the college is to provide a sound and thorough education in the law that will prepare the student to practice law in accordance with the highest standards of professional competence and responsibility. The emphasis in instruction is on analysis and understanding of legal principles and the

development of skills necessary to the practice of the profession. The course of study will prepare a graduate to practice in any jurisdiction which has adopted the Anglo-American system of law.

The curriculum of the College of Law consists of three years of study within the college. Required courses necessary to basic legal knowledge make up the first two semesters of study, while courses in the final four semesters are largely elective. Students become eligible to receive the Juris Doctor (J.D.) degree upon successful completion of 90 semester credit hours of law courses with a grade point average of at least 2.000.

The college acts as a law center for Wyoming. It serves lawyers, judges, and government by a program of continuing legal education for attorneys and others interested in significant legal developments, by research projects aimed at improving state law, and by publishing the Wyoming Law Review.

Accreditation

The college is approved by the American Bar Association and its graduates are eligible for admission to the bar in every state. A student planning to practice in a particular state should check its rules for admission to the bar.

The college is also a member of the Association of American Law Schools. Membership is conditioned upon the maintenance of an adequate teaching staff and library, the offering of a sound educational program and adherence to prescribed standards for the admission and graduation of students.

Prelegal Curriculum

There is no prescribed or required set of courses for prelegal work. A student must usually have a B.A. or B.S. degree before beginning the professional study of law. There are no restrictions on the field in which the degree is earned.

The objective of prelegal study should be to acquire knowledge and skills useful in the study and practice of law. College study should prepare the student for law school by developing language comprehension and use, understanding of political, economic, social and cultural institutions, and the ability to think logically and creatively. Courses promoting these objectives are included in the basic requirements for most undergraduate degrees. The choice of a major should be determined by the student's academic interest and professional objective in law.

Valuable background may be acquired through the study of English, history, philosophy, economics, political science, psychology, sociology, business administration, mathematics and the natural sciences.

For additional information, see the College of Law web site, (www.uwyo.edu/law).

Admission Requirements and Procedures

Admission to the professional curriculum in law is granted by the admissions committee of the College of Law. The College of Law restricts the number of entering students to a class size consistent with its facilities and its educational objectives. In evaluating an application, the committee considers the applicant's undergraduate college scholastic record and score on the Law School Admission Test (LSAT).

Other criteria relevant to the probability of success in the study and practice of law will also be considered.

1. Prior to beginning work in the College of Law, applicants must have a bachelor's degree from an accredited college or university, unless they have requested and been granted following exception:
 - a. An applicant who needs not more than 6 semester hours of college credit to qualify for a bachelor's degree may be admitted in exceptional cases to law school if the committee determines that the applicant has sufficient education and preparation for the study of law; has an outstanding

- undergraduate scholastic record; and has an approved program signed by the appropriate undergraduate official indicating that the remaining requirements for the bachelor's degree may be met by summer school attendance or by other means that will not interfere with the study of law.
2. Every applicant must take the Law School Admission Test. A packet giving information about the test, the dates on which it is given, and centers at which it can be taken, sample questions and an application form, may be obtained from Law School Admission Council, Box 2000, Newtown, PA 18940, by phone at (215) 968-1001, online at www.lsac.org.
 3. Every applicant must register with the Law School Admission Council Credential Assembly Service, CAS. Registration may be done through the LSAC website (www.lsac.org). The CAS will prepare a report that is transferred to the college.
 4. Every applicant must complete the electronic University of Wyoming College of Law Application through LSAC between October 15 and April 30. Applications received by December 15 will be considered for early admission.
 5. If admitted, official transcripts sent directly to the College of Law from each college attended must be on file in the Admissions Office at least 30 days before the student's registration date.

Application Deadline

An initial entering class will be selected from completed applications on file on April 30. Students who submit an application by December 15 will be considered for early admission. An application is complete only when the college has received the LSAT score, the CAS report, applications, and all supporting documents.

Admission With Advanced Standing

Transfer students are admitted only when the College of Law facilities and curriculum permit. A transfer student may transfer up to the number of credits the student could have earned had the student completed his or her first year at the University of Wyoming College of Law. Transfer credit will be given only for courses in which the student earned a grade of C or higher. Applicants admitted must satisfy the requirements for graduation established by the College of Law, including such other requirements as may be imposed as a condition of admission. Students interested in transferring should contact the College of Law for information concerning application procedures.

Academic Regulations

The Juris Doctor (J.D.) degree is awarded by the College of Law faculty to candidates who meet the following requirements:

Curriculum is subject to change at the College of Law Faculties discretion, which may cause the annually updated university catalog to be out of date. For students matriculating in or after the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of "C" or better for courses taken elsewhere) 90 credit hours (required for graduation) of law coursework in accordance with the official curriculum as adopted by the College of Law faculty. At least 59 of these credits must be completed at the University of Wyoming College of Law. Courses taken for S/U grades count toward the hours required for the J.D. degree only if the course is offered for the S/U grade only. Regardless of the matriculation date, students must complete at least 76 credit hours through graded (A-F) courses.

The course of study must be completed no earlier than 24 months (2 years) and not later than 84 months (7 years) after a student has commenced law study. No student shall be permitted to enroll at any time in coursework that, if successfully completed, would exceed 20 percent (18 hours) of the total coursework required for graduation.

Second and third year students may take up to six of 90 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students must receive a letter

grade of B or better for these non-law courses to count toward graduation requirements. Additionally, these courses will transfer in with a satisfactory grade of 'S' and will not impact their law school GPA. Students who wish to enroll in a non-law course on this basis must secure the prior approval of the course professor and the Associate Dean of Academic Affairs at the College of Law. Approval will be based on the student's submission of a Non-Law Grad Course Request form with a brief written statement explaining how the proposed coursework relates to and enhances the student's legal education. Students should be aware that non-law courses completed on this basis will not count toward the 76 hours that students must complete in graded courses as a requirement for graduation. The non-law coursework will instead be counted as credits the law students are permitted to take on an S/U basis.

The College of Law automatically approves up to 9 hours of any joint degree core courses with the corresponding prefix to their joint degree (i.e. MBAM, POLS, ENR) that meet the grade requirement to transfer in toward their law degree. If additional courses are needed outside of these respective prefixes, these will be approved on a case by case basis. Those students enrolled in a joint degree program may take up to 9 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students in a joint degree program who use 9 non-law credit hours toward their J.D. degree may reduce their required number of graded credits from 76 to 73 so that they can participate in other S/U offerings at the College of Law. To receive law school credit for the non-law course, a student will be required to earn a grade of B or better in the non-law course. The grade will not count, however, toward the student's law school GPA. The course will be counted as a "satisfactory" grade for purposes of the student's law school GPA. Joint degree students should be aware that non-law courses completed on this basis will not count toward the 73 hours that joint degree students must complete in graded courses as a requirement for graduation. The non-law coursework will instead be counted as credits the law students are permitted to take on an S/U basis.

To graduate, all students must earn a cumulative grade point average of 2.000 for all courses taken at the College of Law. If a course is repeated, both grades shall be included in computing the average. The student, except in exceptional circumstances, must have a baccalaureate degree. Candidates who meet these requirements are eligible for graduation at the end of any semester.

Academic Standing

The following requirements apply to any coursework at the College of Law. Courses that law students may complete outside of the College of Law do not count in calculation of the required College of Law grade point average (GPA).

In the first year, a student who fails to make a 1.800 GPA after the first semester, or fails to make a 1.900 cumulative GPA overall in the first year's work, shall be excluded from the College of Law. A student who at any time fails to make a passing grade in two of the courses for which the student is registered in any semester shall be excluded from the College of Law.

A student who enters the second year with a GPA lower than 2.000 but at 1.900 or above, or who fails to maintain a 2.000 cumulative GPA after the first year, shall be placed on academic probation. A student on academic probation who does not attain an overall grade point average of 2.000 within one semester shall be excluded.

A student excluded from the College of Law may petition the faculty for readmission. The faculty may, in its discretion, readmit the student upon receipt of satisfactory evidence of extenuating circumstances or marked improvement in grades and study habits. Readmission may be subject to conditions, including, but not limited to, the repeating of any or all courses, as the faculty may decide. If a student's petition for reinstatement is denied, the student must wait nine months before petitioning again for readmission. Also, all students are limited to two petitions for readmission. The entire faculty will automatically hear and consider a student's initial petition. In the event of a second petition for readmission, a committee selected by the Dean will hear and consider the petition. The committee will present a report and recommendation to the faculty for adoption. Denial of a second petition is final.

Advanced Writing Requirement

As a condition of graduation, all students must complete an upper-level writing requirement consisting of a research paper of a minimum length of 5,000 words, exclusive of footnotes. All students must follow a designated standard citation form. Students must submit a detailed outline of the paper to the supervising professor, then must rewrite the paper at least once after the professor reviews the first draft. With the professor's approval, the student can meet the advanced writing requirement in any law school elective course, including a seminar, as long as the above requirements are met. The supervising professor must certify that the writing requirement has been fulfilled.

All student articles written for law review, whether published or unpublished, must have a supervising faculty member and otherwise meet all other provisions of the College of Law Advanced Writing Requirement. A student may also fulfill the requirement through an independent study or by writing a case note or comment for the law review, under the supervision of a professor. It cannot be satisfied through participation in a clinic.

Attendance Requirement

Students must attend at least 75 percent of regularly scheduled classes in each required course. A professor in a required course may impose an attendance requirement of greater than 75 percent if the policy is announced in writing on the first day the class meets.

In elective courses, students must attend at least 75 percent of regularly scheduled classes unless the professor announces a different policy in writing on the first day the class meets. Any alternative policy must comply with the American Bar Association (ABA) requirement of regular and punctual attendance.

A student who fails to meet the minimum class attendance requirement in any class will be dropped from the course and receive a grade of F, unless extenuating circumstances are present, in which case the student shall receive a grade of W. A professor may impose sanctions for students who have met the minimum class attendance requirement but in other respects have violated specified attendance guidelines, if the professor announces the guidelines and possible sanctions in writing on the first day the class meets.

The following table indicates the number of classes a student must attend under the 75 percent rule in a two hour or three hour course, depending on the number of class meetings. Students must verify with the professor the number of classes required in a one or four hour course.

The ABA requires attendance at 75 percent of all scheduled class times.

3-Credit Course (meeting three times a week for 55 minutes each):

<u>Class Meetings</u>	<u>Must Attend</u>
40	30
41	31
42	32

2-Credit Course (meeting twice a week for 55 minutes each) or a 3-Credit Course (meeting twice a week for 80 minutes each):

<u>Class Meetings</u>	<u>Must Attend</u>
26	20
27	20
28	21

Class Rank

Students are ranked by class at the end of each of the fall and spring semesters once the faculty have submitted all grades. Class rankings will be available in the Front Office. Students can choose to have their spring class ranking letter mailed to them if they provide the Front Office with a self-addressed, stamped envelope. Transfer students to the College of Law shall not be ranked with other UW students until they have completed two full-time semesters at UW (or a minimum of 24 UW credits). Students who visit out at other ABA accredited law schools or who graduate early are ranked based on their ranking at the end of their last semester at UW.

Experiential Learning Requirement

As a condition of graduation, each student must successfully complete no fewer than 6.0 credit hours in experiential learning courses. Experiential learning courses include a simulation course, a law clinic, or an externship field placement. Simulation courses provide substantial experience not involving legal representation of an actual client, that (1) is reasonably similar to the experience of a lawyer advising or representing a client or engaging in other lawyering tasks in a set of facts and circumstances devised or adopted by a faculty member; and (2) includes: direct supervision of the student's performance by the faculty member; opportunities for performance, feedback from a faculty member, and self-evaluation; and a classroom instructional component (ABA Standard 303).

Typically students may fulfill the experiential learning requirement by successfully completing 6.0 credit hours in any of the following upper- class elective courses:

- Advanced Appellate Advocacy (LAW 6520)
- Advanced Legal Research (LAW 6990)
- Advanced Oil & Gas Law (LAW 6992)
- Advanced Persuasive Writing (LAW 6925)
- Alternative Dispute Resolution (LAW 6915)
- Business Planning (LAW 6560)
- Civil Pretrial Practice (LAW 6565)
- Clinic: Civil Legal Services (LAW 6930 or LAW 6931)
- Clinic: Defender Aid (LAW 6932 or LAW 6930)
- Clinic: Energy, Environ. & Natural Resources (LAW 6933 or LAW 6930)
- Clinic: Family & Child Advocacy (LAW 6930 or LAW 6934)
- Clinic: International Human Rights (LAW 6930)
- Clinic: Prosecution Assistance (LAW 6930 or LAW 6936)
- Contract Drafting (LAW 6935)
- Estate Planning (LAW 6670)
- Estate Planning Practicum (LAW 6937 or LAW 6930 or LAW 6915)
- Externships (LAW 6960)
- Interviewing, Counseling & Negotiation (LAW 6166 or LAW 6915)
- Summer Trial Institute (LAW 6850)
- Trial Practice (LAW 6850)

Note: classes may be removed from and/or added to this list each semester.

Grading

Grades are assigned on a plus/minus system. Grades of incomplete (I), and withdrawal (W), are disregarded. A required course in which a grade of F or W or U is received must be repeated. A course cannot otherwise be repeated without

the consent of the faculty. If a course is repeated, both grades are included in computing the student's grade point average.

A4.00	B +3.333	C+2.333	D+1.333	F0.000
A-3.667	B3.000	C2.000	D1.000	WF0.000
	B-2.667	C-1.667	D-0.667	

Satisfactory (S) or unsatisfactory (U) grading applies only if the course is offered on an S/U basis or a student takes a non-law graduate-level course as explained above. Students from other colleges who are permitted to take professional courses in the College of Law must take them for S/U credit. The grading scale is at discretion of the instructor for each course.

Bar Exam Passage Rate Improvement Program

Students matriculating after August 2021, a student whose first-year GPA is in the bottom one-third of the class will be required to pass four of the following courses as a requirement of graduation: Business Organizations (or one of either Agency and Partnership or Corporations); Secured Transactions; Trusts and Estates; Criminal Procedure; Criminal Adjudication; Family Law; Constitutional Law II; or Real Estate Finance. During the fall and spring semesters after the 1L year it is required to take at least one of these courses as a minimum each semester, until the requirement has been satisfied.

In order to graduate, a student whose first-year GPA is in the bottom one-third of the class will also be required to take and pass a law school-offered bar examination course as a 3L (typically in their final spring semester), unless for unanticipated reasons the College of Law does not offer that course in a particular year.

Curriculum

Required Courses: First (1L) Year Students (*Additional courses cannot be taken the first year without special permission from a dean.*)

Fall Semester

Civil Procedure I (6240) - 3

Contracts I (6110) - 3

Legal Research (6165) - 1

Legal Writing I (6160) - 3

Property I (6120) - 3

Torts I (6130) - 4

Spring Semester

Civil Procedure II (6340) - 2

Constitutional Law I (6250) - 3

Contracts II (6210) - 2

Criminal Law (6140) - 3

Legal Writing II (6260) - 2

Property II (6220) - 2

Required Courses: Second (2L) Year Students (offered once per year)

Evidence (6410) - 3

Professional Responsibility (6420) - 3

Elective Courses: Second (2L) & Third (3L) Year Students (* subject to availability)

See Law Courses section

Graduation with Honors

The degree of Juris Doctor is awarded with honors if the student achieves a grade point average of 3.400 or better on all resident credit in the College of Law.

Honor Roll

Students enrolled in a minimum of 12.0 semester hours of law courses carrying A-F grades, and who have no semester grades of incomplete (I), are eligible for the President's Honor Roll and the Dean's Honor Roll. Students with a semester average of 4.000 will be named to the President's Honor Roll. First-year students with a semester average of 3.250 or better and second-year and third-year students with a semester average of 3.400 or better will be named to the Dean's Honor Roll.

Minimum Hours

The College of Law does not permit students to attend on a part-time basis. Students are required to take the full load of required courses during their first two semesters and to carry at least 9 credit hours in each of the remaining semesters of law study. Notwithstanding, if a student has less than 9 credits remaining in their final semester of study, then said student may register for only the number of remaining credits (e.g. if a student only has 4 credits left to graduate, that student will only be required to register for 4 credits). First year students will be allowed to take less than the full load of required courses only if they present exceptional circumstances, as determined by the Dean or his/her delegate.

Transfer Credits

The College of Law admits transfer students only in the fall of their second year. A student granted transfer admission may transfer credits earned in courses taken at another ABA-accredited law school toward a degree from the UW College of Law up to the number of credits that a traditional UW student would have earned during the student's first year at the University of Wyoming (32 credits as of the 2020-21 academic year). In addition, University of Wyoming law students who visit out for a semester or full year may also transfer credits from other ABA approved law schools, as long as 59 credits are completed at the University of Wyoming. The College of Law will also accept up to 15 hours of transfer credit from another ABA accredited school for an international student previously enrolled in an LL.M. or other post-J.D. program. To receive transfer credit from a course, a grade must be a "C" or better. Transfer credits are recorded on the JD transcript as an "S" (Satisfactory), instead of graded credits. All transfer credits must be approved by the Associate Dean of Academic Affairs in advance.

Withdrawing from a Course &/or the University

Failure to attend class or failure to pay tuition does not constitute withdrawal from a class or from the University. Students who pre-register for classes on WyoWeb will be assessed tuition and fees. Students who drop or withdraw from their last or only class for a given term after the end of the drop/add time period must also meet with the Assistant Dean of the College of Law and complete the official withdraw forms required by the Office of Registrar. Financial aid recipients who withdraw from courses or reduce credit hours must consult with a financial aid counselor regarding repayment of financial aid funds if applicable. For more complete details regarding deadlines, refunds, and cancellations, see the University's Accounts Receivable web page <http://www.uwyo.edu/fsbo/accounts-receivable/>

Exam Procedures and Policies

1. Review the Honor Code before beginning the exam period. It applies to all examinations. If you have any questions about the materials allowed by a professor, please see the professor in advance of the exam.
2. A copy of the final exam schedule will be posted on the web, please check dates and times carefully.
3. We use exam numbers, rather than students' names, so that professors cannot identify the students' exams they are grading. Exam numbers will be available in ExamSoft one to two weeks before the exam period. You must write this number on all of your exams and blue books, or as your identification number for typed exams. **DO NOT** write your name on your exam. Midterm exams and final exams have unique numbers. Save these numbers, as you will use the same number for all of your midterm and final exams respectively. New numbers are assigned each semester.
4. All examinations must be: (A) written in ink in 8 1/2 x 11 size "blue books," OR (B) typed on the student's laptop using the ExamSoft software. Students provide their own blue books, pens or laptops. The law school will supply answer sheets and pencils for any multiple choice exams.
5. If you are using a laptop:
 - Exemplify (SofTest) is operable for PC's and Mac's. Please reference this site for the most up to date Minimum System Requirements, Exemplify: Minimum System Requirements - ExamSoft
 - You must download the exam software (free for students) well in advance of the exam day.
 - Have your laptop set up and the software running in the designated room before the time to begin the exam.
 - Instructions for using the ExamSoft Exemplify (SofTest) software are available at the Examssoft website (use Chrome or Firefox ONLY).
 - If you experience any problems with your computer during the exam, come to the front office immediately and someone will assist you.
 - Once you complete the exam, and have turned in your exam questions, be sure you receive the "upload successful" message to assure that your exam answers have been transmitted.
6. All exam reschedules must be approved by COL Assistant Dean, Lindsay Hoyt or the Registrar. You must meet the criteria published within the exam schedule to reschedule an exam, i.e., two exams on one day, three exams in three days, or four exams in five days. Fill out the exam reschedule request form and turn it into COL Registrar, Dave

Bluemel. Please note, that if possible, an elective will be rescheduled rather than a large required class, and rescheduled to a later, rather than an earlier date.

7. Students who are handwriting their exams must return the exam questions and blue books to a staff member in the lobby outside the Dean's office at or before the time indicated on the exam. Laptop users should exit the exam software and turn in the exam questions to a staff member at or before the time indicated. It is your responsibility to determine the precise time the exam is to be returned and to ensure that you meet the deadline. Use the clock in the exam room for reference, not the clock that may appear on your computer or the time on your wristwatch.

8. During the exam, turn off (or leave outside the room) all cell phones, smart watches, pagers, and PDA's. Do not leave them on vibrate, as this may be disturbing to other students.

9. When you finish your exam, please be courteous/quiet as you gather your belongings and leave the exam room. You MAY NOT return to the room to gather your belongings after you have turned in your exam, unless it is after the collection time indicated on the exam. **Be** aware that students are taking exams in both the morning and the afternoon and are taking exams that have differing ending times -- so please curb your talking in the classroom areas and halls during the administration of exams.

10. If you cannot take the exam at the set time due to illness, or other emergency, you must notify Assistant Dean Lindsay Hoyt, as soon as possible, prior to the exam and be prepared to supply appropriate documentation.

11. Final grades will be available on WyoWeb. No grades will be given over the telephone.

Final Exam Reschedule Policy

No student is required to take exams in the following circumstances as long as they submit a reschedule form two weeks prior to the first day of exams:

- two exams on one day
- Three exams in three consecutive days
- four exams in five consecutive days

Students who have six final exams cannot be provided relief due to the limited number of exam days. Efforts will be made, however, to distribute the six exams so as to avoid three in a row. A student who meets the above criteria must see Assistant Dean Lindsay Hoyt to reschedule. Exams are not normally rescheduled outside of the regular exam period.

Disability Assistance

The University of Wyoming College of Law is committed to making its programs accessible to individuals with disabilities and ensuring a robust academic experience for all students. The College of Law works closely with the Disability Support Services office on the University's main campus to coordinate a variety of services for students with disabilities. The Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973 guarantee equal access to programs and services to those with disabilities. In order to be a qualified individual subject to the protections of these Acts, a person must demonstrate that he or she has a disability that substantially limits a major life activity (e.g., seeing, hearing, walking, breathing, performing manual tasks, learning, caring for oneself, and working) and, as such, requires a reasonable accommodation in order to have equal access. This section of the College of Law's policies explains a student's rights and responsibilities in seeking to receive accommodations from the College of Law because of a disability. The process and procedures outlined here apply to law school classroom accommodations, exam accommodations, and accommodations related to accessing the University's facilities.

I. Rights and Responsibilities in Requesting Reasonable Accommodations

A. Accommodation Request Deadlines

1. The deadlines for students requesting accommodations is 2 weeks before the start of the academic year or semester for classroom and exam accommodations.
2. Extensions to these deadlines may be granted to students who were unable to meet the deadline due to extenuating circumstances. Accommodations are prospective; retroactive accommodations are not available. For this reason, it is important that the student timely submit requests for accommodations.

B. Accommodation Process and Procedure for Classroom and Exam Accommodations

1. A student who believes that he or she has a qualifying disability warranting accommodation for academic programs, exams or access to the University's facilities should submit their requests for accommodations through the University of Wyoming's Disability Support Services (DSS), by contacting udss@uwyo.edu or 307 766-3073 or applying through the website found here: <https://www.uwyo.edu/udss/>.
2. The DSS application process is required and separate from any communication with College of Law staff. Students *should not* go directly to any faculty in an effort to arrange accommodations for disabilities.
3. Once the student submits the completed application and supporting medical documentation, DSS will review the documentation to verify the existence of a qualifying and make a decision regarding the student's eligibility for services. DSS also may request additional documentation at any time or may request that the student's physician or other licensed health professional speak directly to the DSS staff.
4. Following the determination that the student has a qualified disability, DSS and the Assistant Dean of the College of Law, as the designated liaison for the College and its faculty, will consult together to make a determination regarding the student's requested accommodations related to the student's courses, exams, and access to university facilities.
5. A reasonable accommodation is an accommodation that does not impose an undue financial or administrative burden on the College of Law and does not fundamentally alter the nature of the educational service, program, or activity at the College of Law.
6. DSS is responsible for making determinations about reasonable accommodations after consulting with the Assistant Dean of the College of Law and will then notify the student by email of the decision to deny, grant, or partially grant or provide a reasonable alternative to the requested accommodations. This email is required prior to any accommodations being made.
7. Information regarding a student's disability and any accommodations provided shall be disclosed only when necessary in furtherance of the student's education or to individuals who have a need to know the information as determined by the University. As a general rule, when feasible, student anonymity will be maintained.
8. For any exam condition accommodations, DSS will notify the Assistant Dean of the College of Law who will oversee the implementation of the accommodation. DSS will also notify any other law school staff designated by the Assistant Dean of the College of Law who are needed to implement the accommodation (e.g. the designated testing coordinator, faculty etc.). Students will be provided notice of the time and place of their accommodated testing by DSS.
9. For classroom accommodations, the Assistant Dean of the College of Law will oversee implementation of the accommodations and notify the faculty of the particular course if the accommodations provided affect the conduct of the class.

10. If a student is denied eligibility for DSS or requested reasonable accommodations, the student may request a review of these determinations by the Vice President for Student Affairs consistent with the process mentioned here <https://www.uwyo.edu/udss/laws-and-complaint-processes/if-and-when-you-disagree.html> Students who have questions about the review process may contact DSS for more information. The Vice President for Student Affairs may consult with the Dean of the College of Law prior to making a final determination.

II. Rights and Responsibilities of the Student after Receiving Classroom and Exam Accommodations

- A. A student must renew his or her request for accommodations each semester by meeting with DSS in order to determine whether new and different accommodations are necessary for the student's disability to be accommodated. Requests for classroom and exam accommodations must be made two weeks prior to the beginning of the semester. At these meetings, DSS may request that the student submit updated documentation verifying the nature and extent of the student's disability.
- B. If a student's condition changes at any time, thereby affecting the nature and extent of his or her disability, the student must notify the DSS immediately and DSS will consult with the Assistant Dean of the College of Law, as the designated liaison for the College to engage in the interactive process set forth in section I(B)(4).
- C. If there is a problem with any accommodations that a student receives, whether it is related to a course, an exam, or access to a facility, the student must promptly notify DSS who will coordinate with the Assistant Dean of the College of Law so that steps may be taken, to the extent practicable, to resolve the problem.
- D. Communication via accommodations (including exam schedules and room assignments) will be made using the student's email account. A student is responsible for checking email on a timely basis to determine the status of any issue relating to the accommodation that has been put in place for a particular disability. If the student's disability prevents physical access to email, an alternative method of communication will be determined in consultation with DSS, the College of Law, and the student.

III. Requests for Accommodations Related to the College of Law Facilities

Any requests for disability accommodations related to the College of Law buildings or University grounds may be initiated by contacting DSS or the Assistant Dean of the College. DSS and/or the College of Law will work collaboratively regarding any requests and may involve other campus units, including but not limited to the UW Operations, in order to process and/or implement reasonable accommodations related to the College of Law facilities.

Joint Degree Programs

JD/MA in ENR Program

A joint Juris Doctor/Master of Arts of Environment and Natural Resources degree is available to all admitted law students upon application. Students in this joint degree program must take 18 credits outside the law school in ENR courses, and must take 12 law school credits from a menu of ENR related law courses to qualify for this joint degree. Students in the joint degree program must also complete a supervised research project. Additionally, nine (9) credits of approved MA coursework (see Academic Regulations) will be applied to the Juris Doctor degree.

Current core courses: ENR 5000, ENR 5900, ENR 5890.

JD/MBA Program

A joint Juris Doctor/Master of Business Administration program is available in the College of Law and the College of Business. This program will take approximately four years to complete. Students spend three years on-campus engaged in law studies. In either their second or third year, students will be enrolled full-time in the MBA Program, taking core Fall and Spring business courses followed by participation in an MBA Summer Project. The MBA Capstone course will be completed during the student's third year for a total of 38 MBA Program credits. Nine (9) credit hours of approved Law coursework will be transferred as elective hours to the MBA Program for a total of 47 credit hours. Additionally, nine (9) credits of approved MBA coursework (see Academic Regulations) will be applied to the Juris Doctor degree. Students successfully completing this lock-step program will earn dual Juris Doctor and Masters of Business Administration degrees.

Current core courses: MBAM 5102, MBAM 5104, MBAM 5107, MBAM 5202, MBAM 5204, MBAM 5207, MBAM 5208, MBAM 5209, MBAM 5305, MBAM 5330.

JD/MPA Program

A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in specified courses in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.

Current core courses: POLS 5000, POLS 5400, POLS 5410, POLS 5440, POLS 5684, POLS 5510, POLS 5690, POLS 5080, POLS 5060, POLS 5450, POLS 5460, POLS 5480

Nonprofessional Degree Students

Graduate students from other colleges of the University of Wyoming may be permitted to take one or more law courses on an S/U basis for non-law credit when the following conditions are met: the law course taken is acceptable for their degree program and the prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean has been obtained. In order to obtain audit or visitor privileges, students must obtain prior written approval of the professor assigned to the course and the Associate Dean or Assistant Dean. For further information and requirements contact the Associate Dean of Academic Affairs, College of Law, Dept. 3035, 1000 E. University Ave., Laramie, WY 82071.

Course descriptions may be obtained online at www.uwyo.edu/law.

Graduate

Juris Doctor

The goal of the College of Law is to provide a sound and thorough education in the law that will prepare the student to practice law in accordance with the highest standards of professional competence and responsibility.

Curriculum

Overall Hours

For students matriculating in or after the fall 2013 semester, each student must successfully complete (grade of "D-" or better for courses taken at this school, grade of "C" or better for courses taken elsewhere) 90 credit hours (required for graduation) in accordance with the official curriculum as adopted by the College of Law faculty. At least 59 of these credits must be completed at the University of Wyoming College of Law.

The College of Law automatically approves up to 9 hours of any joint degree core courses with the corresponding prefix to their joint degree (i.e. MBAM, POLS, ENR) that meet the grade requirement, of a letter grade of B or better, to transfer in toward their law degree. If additional courses are needed outside of these respective prefixes, these will be approved on a case by case basis. Those students enrolled in a joint degree program may take up to 9 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree.

Law A-F hours

Regardless of the matriculation date, students must complete at least 76 credit hours through graded (A-F) courses.

Those students enrolled in a joint degree program may take up to 9 hours required for graduation in non-law school graduate level courses (online courses will not be approved) and apply them toward their law degree. Students in a joint degree program who use 9 non-law credit hours toward their J.D. degree may reduce their required number of graded credits from 76 to 73 so that they can participate in other S/U offerings at the College of Law.

Required Courses: First (1L) Year Students

(Additional courses cannot be taken the first year without special permission from a dean).

Fall Semester

LAW6240 - Civil Procedure I

Credits: 3
Max Credit (Max. 3)

A study of modern practice in civil cases under Rules of Civil Procedure and other sources of procedural law. Civil Procedure I and its continuation, Civil Procedure II, cover all aspects of jurisdiction and other issues bearing on what court(s) may hear a case; choice of state or federal law; pleading; joinder of claims and parties; class actions; discovery and other pre-trial procedures; summary judgment; non-jury and jury trials; appeals; and claim and issue preclusion.

LAW6110 - Contract I

Credits: 3
Max Credit (Max. 3)

A study of the elements of simple contracts, including offer and acceptance, consideration, conditions, defenses, and damages. The impact of the Uniform Commercial Code on contracts is considered.

LAW6165 - Legal Research

Credits: 1
Max Credit (Max. 1)

Introduction to paper and electronic resources that cover primary & secondary legal materials, including case law, statutes, agency regulations for federal and state jurisdictions, & treatises, journals, restatements, and other secondary sources. Discusses research plans and develops brief research strategies for hypothetical situations.

LAW6160 - Legal Writing I

Credits: 3
Max Credit (Max. 3)

In this course students are introduced to the fundamentals of legal reasoning and analysis and the basics of legal writing.

LAW6120 - Property I

Credits: 3
Max Credit (Max. 4)

Covers two general areas. The first area is the rights that define property ownership, in relation to neighbors, the world, and others with interests in the property. Subjects include rights to use the land and its products, estates, concurrent ownership, and landlord-tenant law. The second area is private limitations on those rights, in the form of covenants and easements.

LAW6130 - Torts I

Credits: 4
Max Credit (Max. 4)

Study of the methods and policies for allocating risks of harm; intentionally inflicted harms; negligence in its general aspects and its application to products liability, landowners, and automobile traffic; emotional harms; defamation; and fraud. Principal areas of coverage typically include wrongful death, defenses, vicarious liability, strict liability, nuisance, products liability and defamation. If time permits we will also cover privacy, misrepresentation and other topics.

Spring Semester

LAW6340 - Civil Procedure II

Credits: 2
Max Credit (Max. 2)

A study of modern practice in civil cases under Rules of Civil Procedure and other sources of procedural law. Civil Procedure I and its continuation, Civil Procedure II, cover all aspects of jurisdiction and other issues bearing on what court(s) may hear a case; choice of state or federal law; pleading; joinder of claims and parties; class actions; discovery and other pre-trial procedures; summary judgment; non-jury and jury trials; appeals; and claim and issue preclusion.

LAW6250 - Constitutional Law I

Credits: 3
Max Credit (Max. 3)

Constitutional Law I is divided into two parts. Part I focuses on governmental structures. Part II begins our coverage of individual rights and liberties. Part I's coverage includes the power of judicial review, separation of powers, federalism, and congressional powers. Part II focuses on equal protection.

LAW6210 - Contracts II

Credits: 2
Max Credit (Max. 2)

A study of the elements of simple contracts, including offer and acceptance, consideration, conditions, defenses, and damages. The impact of the Uniform Commercial Code on contracts is considered.

LAW6140 - Criminal Law

Credits: 3
Max Credit (Max. 3)

The sources of criminal law and the purposes of criminal punishment, the constituent parts of criminal conduct, including act (or omission), culpable mental state, result, and causation. These general principles are brought to bear on homicide and sexual assault. Also considers common defenses to criminal charges, including self-defense, necessity, duress, insanity, and intoxication. Students are required to consider the constitutional limits of the criminal law and the relationship of substantive principles to practice.

LAW6260 - Legal Writing II

Credits: 2
Max Credit (Max. 2)

This course builds on the first semester Legal Writing course by introducing students to: (1) more sophisticated aspects of legal reasoning, analysis and legal research; (2) the basics of persuasive legal writing; (3) the basics of appellate procedure and an appellate brief; and (4) the basics of oral advocacy.

LAW6220 - Property II

Credits: 2
Max Credit (Max. 2)

First covers some private and public limitations on owners' property rights, primarily easements and zoning. The rest of the semester deals with acquiring ownership rights, possession and transfers, including the law relating to deeds and titles.

Required Courses: Second (2L) Year Students

(offered once per year)

LAW6410 - Evidence

Credits: 3
Max Credit (Max. 3)

A study of the means by which any alleged fact is established or disproved, including competency of witnesses; direct examination; cross-examination and impeachment; privileges; basic and special issues of relevancy; the hearsay rule and its exceptions; real, demonstrative, and documentary evidence; opinion and scientific evidence; judicial notice; and the responsibility of proof.

LAW6420 - Professional Responsibility

Credits: 3
Max Credit (Max. 3)

A study of the duties of attorneys to their clients and the public under the Model Rules of Professional Conduct and case law.

Experiential Hours

Each student must successfully complete no fewer than 6.0 credit hours in experiential learning courses:

LAW6166 - Interview, Counseling and Negotiation

Credits: 3
Introduction to the basic lawyering skills of interviewing, fact investigation, counseling, and negotiation. Employs simulation exercises, self-critiques, and feedback from the faculty member as well as other students. In addition to the exercises, exposure to the theoretical underpinnings of the skills and examine some of the ethical issues involved in creating and maintaining professional relationships with clients and opposing parties and counsel.

LAW6560 - Business Planning

Credits: 3
Max Credit (Max. 3)

Focus is primarily on a problem involving several persons who are organizing a business entity. Consideration will be given to the characteristics of several kinds of business organizations and to making a judgment as to which organization should be used to house the business being set up. Considers tax and non-tax aspects with respect to business organizations.

LAW6565 - Civil Pretrial Practice

Credits: 3
Max Credit (Max. 3)

Includes the civil litigation process from the filing of a complaint and decisions related to the complaint, to discovery including written discovery and depositions, to pre-trial motions such as motions to change venue, to exclude evidence, and for summary judgment, to preparation for pre-trial conferences and trial. Sample cases provide the basis for the drafting of various discovery documents and motions. There will be no exam.

LAW6670 - Estate Planning

Credits: 2
Max Credit (Max. 2)

Applies estate and gift tax principles in a survey of estate planning principles and techniques. Traditional estate planning tools including wills, trusts, and durable powers of attorney are discussed as well as post-mortem planning, administration issues, and planning for special situations, such as owners of closely held businesses, entrepreneurs, and the disabled.

LAW6850 - Trial Practice

Credits: 3
Max Credit (Max. 3)

Trial Practice is a rigorous learn-by-doing course designed to build courtroom skills. Through a combination of exercises, lectures, demonstrations, drills and complete trials, students are prepared to advocate before judges and juries. The first half of the course focuses on basic examination and exhibit skills, including direct, cross, redirect, making and responding to objections, and the introduction and use of real and demonstrative evidence. In the sixth week, students conduct bench trials. The second half of the course builds on the basic skills and covers advanced ones, including examination of expert witnesses, opening statement, closing argument and voir dire. Jury trials are conducted in the final two weeks.

LAW6930 - Legal Clinic

Credits: 2-3
Max Credit (Max. 6)

Supervised clinical training in law office and court procedures. Clinical programs available are the Defender Aid Program, Legal Services Program, and the Prosecution Assistance Program.

Prerequisite: Students must have completed first year of law school.

LAW6931 - Clinic: Civil Legal Services

Credits: 3
Max Credit (Max. 12)

The Civil Legal Services Clinic has provided legal assistance to Wyoming citizens for over 20 years. Students represent low-income and marginalized individuals across the state who could not otherwise afford legal representation. The CLSC's mission is to provide legal services in a broad range of general civil legal matters.

LAW6932 - Clinic: Defender Aid

Credits: 3
Max Credit (Max. 12)

Provides representation to indigent persons in Wyoming state and federal courts. We represent clients pending trial, on direct appeal from their convictions, and handle post-conviction matters in state and federal court.

LAW6933 - Clinic: Energy, Environment and Natural Resources

Credits: 3
Max Credit (Max. 12)

Fall: Classroom component of the Clinic will provide a practitioner's view of key aspects of federal court litigation practice in cases involving natural resources issues. Spring: Clinic will provide an overview of the Wyoming Administrative Procedure Act and the Wyoming statutes that govern the regulation of energy production, environmental protection, and natural resources management in Wyoming.

LAW6934 - Clinic: Family and Child Advocacy

Credits: 3
Max Credit (Max. 12)

Handle a wide array of cases including divorce, child custody, domestic violence protection orders, stalking orders, guardian ad litem appointments in juvenile and domestic relations cases, and other family law matters. In addition, law students represent children or their parents in child abuse and neglect cases, termination of parental rights, children in need of supervision and delinquency actions.

LAW6935 - Contract Drafting

Credits: 3
Max Credit (Max. 3)

Covers fact investigation and the role of the lawyer in a transaction proposed by the client, including possible negotiations with other parties; drafting a contract in Plain English; and the ethical obligations of a transactional lawyer, through simulations and problem-solving exercises.

Prerequisite: LAW 6110.

LAW6936 - Clinic: Prosecution Assistance

Credits: 3
Max Credit (Max. 12)

The program is heavily involved with the Wyoming Attorney General's office, usually in representing the state in criminal appeals before the Wyoming Supreme Court. In handling these appeals, students are responsible for the entire preparation of appellate briefs and the presentation of oral argument to the Supreme Court.

LAW6937 - Estate Planning Practicum

Credits: 3
Max Credit (Max. 12)

Provides students the opportunity to work with low-income clients around the State of Wyoming in a transactional law setting. Prepare wills, powers of attorney, advance health care directives, deeds, affidavits of distribution and other probate documents for small estates and will learn how to plan an estate for beneficiaries who are minors or who have special needs.

LAW6960 - Legal Externships

Credits: 1-3
Max Credit (Max. 6)

The externship program provides second and third year students with an opportunity to learn through practice by working directly with attorneys or judges for academic credit. Externship placements are limited to judges, government agencies and nonprofit organizations, and must be pre-approved by the College of Law faculty.

LAW6925 - Advanced Persuasive Writing

Credits: 3

Max Credit (Max. 3)

Art and science of written legal persuasion. Specifically, course explores the nature of legal persuasion from the standpoints of numerous disciplines, including classical rhetoric, psychology, literary theory, and morality theory, and based on these principles, covers specific strategies lawyers can use to make their writing more persuasive.

Prerequisite: LAW 6160 and LAW 6260, and completion of first year of law school.

LAW6992 - Advanced Oil and Gas Law

Credits: 3

Simulate the work of an oil and gas attorney. Explore oil and gas financing arrangements including the farmout, JOA, and productions sharing agreements, drilling and service agreements, downstream marketing and purchase agreements, conveyances of oil and gas real property interests, the purchase and sale of petroleum properties, oil and gas development on federal lands, and title examination.

Prerequisite: C or better in LAW 6790.

Advanced Writing

As a condition of graduation, all students must complete an upper-level writing requirement.

Elective Courses:

Second (2L) & Third (3L) Year Students (* subject to availability);

See Law Courses section

Juris Doctor/Master of Arts in Environment and Natural Resources

Students working toward the J.D./M.A. in ENR consult a Haub School advisor to design a program of study tailored to meet their educational goals.

Academic Regulations

A joint Juris Doctor/Master of Arts of Environment and Natural Resources degree is available to all admitted law students upon application. Students in this joint degree program must take 18 credits outside the law school in ENR courses, and must take 12 law school credits from a menu of ENR-related law courses to qualify for this joint degree. Students in the joint degree program must also complete a supervised research project. Additionally, nine (9) credits of

approved MA coursework (see Academic Regulations) will be applied to the Juris Doctor degree. Current core courses: ENR 5100, ENR 5900, ENR 5890, ENR 5750.

Juris Doctor/Master of Business Administration

The Juris Doctor/MBA program offered with the UW Colleges of Law and Business provides students with a high ROI. Optimize time and money spent by pursuing this dual program and tapping into quality education, networking, and career possibilities.

Academic Regulations

A dual Juris Doctor/Master of Business Administration program is available in the College of Law and the College of Business. This program will take approximately four years to complete. Students spend three years on-campus engaged in law studies. In their second year, students will be enrolled full-time in the MBA Program taking required core business courses during the Fall, Spring, and Summer as well as participating in additional required program activities (orientation, Experiential Leadership Program, Jackson Leadership Summit, MBA Executive Speaker Series, Professional Development activities, etc.). The MBA Capstone course will be the final course completed in the summer term for a total of up to 36 MBA program credits. Nine (9) credit hours of approved coursework will be transferred as elective hours to the Juris Doctor degree and up to six (6) credit hours of approved coursework will be transferred as elective hours to the MBA degree. Students successfully completing this dual program will earn dual Juris Doctor and Masters of Business Administration degrees.

Current Core Courses:

MBAM5101 - MBA Foundations

Credits: 1

The purpose of this course is to prepare students for the academic rigors of the MBA program.

Restricted Enrollment in MBAM or MBAF degree program.

Prerequisite: Admission to full-time MBA program.

MBAM5102 - Operations Management

Credits: 3

Production and operations management. Topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, and scheduling.

Prerequisite: Admission to the MBAM program.

MBAM5104 - Organization Behavior and Human Resource Management

Credits: 3

Enables students to recognize psychological phenomena influencing individual, group & organizational behavior and helps them understand different HRM functions and how HRM fits within the overall organization's strategy.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5107 - Decision Making I

Credits: 1

This course develops a systematic process for making decisions in complex business situations, by integrating six dimensions of business risk: competitive, financial, organizational, legal, social, and ethical. The process combines analytical and ethical reasoning methods that compensate for the flawed decision making common in business organizations.

Prerequisite: Admission to the MBAM program.

MBAM5202 - Data and Decision Modeling

Credits: 3

This course will prepare students to use computer-based models for solving problems in the areas of operations, finance, supply chain, and marketing by using tools associated with predictive and prescriptive data analytics including, but not limited to forecasting, optimization modeling, and Monte Carlo simulation. #304.

Prerequisite: Admission to the MBAM program.

MBAM5204 - Financial Management

Credits: 3

Students taking this course should expect to learn the fundamentals principles of environmental influences on corporate financial decision-making and measurement devices useful in corporate financial management. Provides an in-depth understanding of the financial manager's role in a corporate setting and exposes students to other aspects of finance in the economy. #304.

Prerequisite: Admission to the MBAM program.

MBAM5207 - Marketing Management

Credits: 3

Provide an in-depth understanding of marketing management. Marketing managers are responsible for co-creating customer value for a sustained competitive advantage.

Restricted Admitted to MBA, MBAE or MBAF program.

Prerequisite: Admission to the MBAM program.

MBAM5208 - Managerial Accounting

Credits: 3

This course introduces concepts and methodologies of managerial accounting focusing on the use of accounting information for internal decision-making purposes. The primary objective is to learn how cost-based information is used to make informed business decisions for strategic planning and control as well as performance evaluation of business decisions.

Prerequisite: Admission to the MBAM program.

MBAM5209 - Decision Making II

Credits: 1

An experiential learning course that builds on MBAM 5107. Students apply systematic business decision making process to real-world business situations. Student teams work directly with owners and managers of Wyoming companies to address their strategic, competitive, operational, financial, and/or administrative challenges in real time.

Prerequisite: MBAM 5107.

MBAM5305 - Strategic Management

Credits: 3

Business strategy is a core function of executive leadership. Students learn methods, models and frameworks for formulating business and corporate level strategies for assessing and sustaining competitive advantage in dynamic and global business environments. Students master these tools through in-depth application and analysis of business programs resulting in strategic recommendations.

Prerequisite: Admission to the MBAM program. #304.

MBAM5330 - Global Business Environment

Credits: 3

Max Credit 3

Introduction to international business through theoretical and applied macroeconomics and the environment in which global business occurs. Focuses on interest/exchange rates; effects of culture on consumers and organizational environments; product/information flows; budget/trade balances; organizations central to a functioning global economy; demand/fulfillment; and legal/ethical issues.

Restricted Admission to the MBA, MBAE, or MBAF program.

Prerequisite: Admission to the MBA program, or permission from the MBA Program Director.

Juris Doctor/Master of Public Administration

The Master's in Public Administration degree offered at the University of Wyoming is considered an ethics based program where complicated issues of administrative decision making are the hallmarks of professional life.

Academic Regulations

A student in the joint Juris Doctor/Master of Public Administration program must be admitted to both the College of Law and College of Arts and Sciences. The degrees are awarded concurrently by each college upon successful completion of the combined degree program requirements. In fulfillment of the J.D. degree, the College of Law will accept up to nine hours of MPA credits in courses approved by the law faculty (see Academic Regulations). In fulfillment of the MPA degree, the College of Arts and Sciences will accept up to 12 hours of credits earned in specified courses in the J.D. program. For additional information regarding these joint degree programs, contact the College of Law or the joint program of interest.

Armed Forces Services

LTC George R. Rigglin, Commander, Army ROTC
LtCol. Anthony Kusek, Commander, Air Force ROTC

It has been the consistent policy of the university in cooperation with the federal government to make courses in military science and aerospace studies available on a voluntary basis to all qualified students.

Academic credits for Army and Air Force Reserve Officers' Training Corps (ROTC) are applied toward baccalaureate and graduate degrees in varying amounts depending upon the degree plan of the student and as determined by the college concerned.

Minor

Aerospace Studies Minor

Air Force ROTC offers an Aerospace Studies minor.

The 24 credit hours required to accomplish the Aerospace Studies minor will effectively compliment many majors, provide a sound basis for future professional development, and increase the career opportunities of a UW graduate.

Minor Requirements

For the Aerospace Studies minor, the student must complete the core AFROTC program plus:

- 3 credit hours in any Management (MGT) course in the current UW catalog **AND**
- 3 credit hours in one Political Science (POLS) course listed below
OR
- 6 credit hours of Political Science courses listed below.

Political Science

POLS1200 - Non-Western Political Cultures

Credits: 3

Gives students appreciation of non-western political cultures and how these cultures have created different political institutions and practices. Non-Western nations of Asia, Africa, and the Middle East are used as case studies.

Cross Listed INST 1200.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 o r POLS 1250 o r permission of the instructor.

POLS2290 - Governments and Politics of Latin America

Credits: 3

Studies chief cultural and historical factors influencing Latin American political process. Surveys major institutions and political patterns of the region.

Prerequisite: POLS 1200 or POLS 1250 or permission of the instructor.

- POLS 2300

POLS2310 - Introduction to International Relations

Credits: 3

Analyzes the nature of international relations, emphasizing various methods of explaining and interpreting the behavior of nation-states. In doing so, the course illustrates the contemporary problems of world politics.

Cross Listed INST 2310.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

POLS3220 - Government and Politics of Russia and FSU

Credits: 3

Examines the political, economic and identity transitions of Russia and other states of the former Soviet Union during the post-communist era. Explores how current challenges relate to past Soviet practices.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3270 - Governments and Politics of the Middle East

Credits: 3

Acquaints students with basic political, social and economic institutions of Middle Eastern countries. Emphasizes post-World War I developments, contemporary issues and problems. Special attention is given to politics of major nations in the Middle East such as Turkey, Iran, Israel, Egypt, Saudi Arabia, Iraq and Syria.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

POLS3300 - Model United Nations

Credits: 1-3

Max Credit (Max. 6)

Focuses on the United Nations (UN) system and multilateral diplomacy to prepare students to participate in a Model UN simulation. Students learn to evaluate the UN system, learn strategies to address international problems, and develop skills to effectively represent a country in a role-playing exercise.

Prerequisite: POLS 1200 or POLS 1250 or permission of instructor.

- POLS 4220

POLS4230 - Governments and Politics of Asia

Credits: 3

Studies political systems of East Asia. Analyzes impact of social and economic factors upon political institutions.

Dual Listed POLS 5230.

Prerequisite: POLS 1200 or POLS 1250 or POLS 2310 or permission of instructor.

POLS4255 - Politics of Developing Nations

Credits: 3

An analysis of the processes of political, economic and social change in the non-Western world.

Cross Listed INST 4255.

Dual Listed POLS 5255.

Prerequisite: 9 hours of political science or international studies, including POLS 1200/INST 1200 or POLS 1250/INST 1250 or POLS 2310/INST 2310, or permission of instructor.

- POLS 4300

POLS4340 - International Organizations

Credits: 3

Encompasses development of world organizations, such as League of Nations, United Nations and its affiliate bodies. Also studies regional organizations and private international bodies.

Cross Listed INST 4340.

Dual Listed POLS 5340.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4360 - International Peace and Conflict

Credits: 3

Why do nations go to war, engage in atrocities such as genocide, or move toward peace following conflict? Examines underlying processes behind both conflict and peace in the international system, including sources of conflict and ways conflicts might be moved toward sustainable peace.

Cross Listed INST 4360.

Dual Listed POLS 5360.

Prerequisite: 9 hours of political science or international studies including POLS 2310.

POLS4870 - Seminar in International Relations

Credits: 3

Max Credit (Max. 6)

Encompasses reading and research in international law and politics.

Dual Listed POLS 5870.

USP 2015 Code U5C3

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

Army ROTC Military Science Minor

The military science minor, encompassing 22 credit hours, will prepare selected students for commissioning and establish a sound basis for their future professional development.

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

Minor Requirements

Army ROTC offers a military science minor. Effective with the Fall 2015 semester, the requirements for a minor in military science are as follows:

ARMY3010 - Leadership and Tactics I

Credits: 3

Studies leadership techniques and tactical operations at the small-unit level. Instruction covers the decision-making process, troop leading procedures, land navigation and operation orders. In-depth analysis of team/squad tactical procedures and techniques. Numerous student oral presentations and practical exercises.

USP 2003-2014 Code U30

Prerequisite: ARMY 2010, ARMY 2020, basic camp or consent of department head.

ARMY3020 - Leadership and Tactics II

Credits: 3

Studies platoon-level tactics and leadership techniques. Instruction covers the solving of complex tactical problems. Illustrates techniques for properly managing personnel, resources and time to accomplish organizational goals. Introduces Army staff functions and prepares students for successful completion of ARMY 3030.

Prerequisite: ARMY 3010.

ARMY3025 - Conduct of Training

Credits: 1

Introduces the Army's system of conducting training exercises. Covers prerequisite training, pre-execution checks, officer/NCO responsibilities, training presentation techniques, sustainment training and training assessment.

Prerequisite: consent of instructor.

ARMY3026 - Assessment of Training

Credits: 1

Introduces the Army's system of training assessment. Covers formal and informal after-action reviews (AARs); preparation for, conduct of, and goals of an AAR; and writing of Army after-action reports.

Prerequisite: consent of instructor.

ARMY3030 - Practicum in Leadership

Credits: 3

Encompasses Leadership Development and Assessment Course, a five week test of the cadet's leadership ability. Each cadet is evaluated in ten different positions. Positions include both garrison and tactical situations. Each position requires the cadet to plan, implement and execute a wide variety of tasks. The cadet must control all personnel under this command. The cadet is extensively evaluated by cadre Tactical Officer/Non-commissioned Officer on twelve leadership dimensions. Successful completion of the Leadership Development and Assessment course is required for commissioning.

Prerequisite: successful completion of ARMY 3010 and ARMY 3020.

ARMY4010 - Dynamics of the Military Organization I

Credits: 2

Studies and analyzes organization, resources and functions of military staff. Reviews formal staff problem-solving procedures, including student effective writing and briefing presentations. Introduces ethics and the military profession.

Former Course Number [4030]

Prerequisite: ARMY 3010, ARMY 3020 or consent of department head.

ARMY4020 - Dynamics of the Military Organization II

Credits: 2

Introduces military law; planning and management of personal affairs; Army transportation, logistics and personnel management systems. Studies officer/NCO relations. Includes student writing and briefing presentations on assigned topics.

Former Course Number [4040]

Prerequisite: ARMY 4010 or consent of department head.

ARMY4015 - Staff Officer Practicum I

Credits: 1

Gives students practical experience in serving on an Army staff. Under supervision of an Army ROTC cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4010.

ARMY4016 - Staff Officer Practicum II

Credits: 1

Gives students experience in serving on an Army staff. Under the supervision of an Army ROTC Cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4020.

ARMY4025 - Principles of Training Management

Credits: 1

Introduces students to the Army's system of training management. Covers principles and philosophy of training, training guidance, training cycles, soldiers/leader tasks, techniques for collective and multi-echelon training, as well as procedures for short-term planning.

Prerequisite: consent of instructor.

ARMY4026 - Preparation of Training

Credits: 1

Introduces the Army's system of training preparation. Covers short-range training plans, training meetings, development of timelines, publishing of training schedules, training and evaluation outlines, as well as rehearsals.

Prerequisite: consent of instructor.

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

OR

- HP 4900 Credits: 3

Total Credit Hours: 22

Haub School of Environment and Natural Resources

Helga Otto Haub School of Environment and Natural Resources

John Koprowski, Dean
Bim Kendall House, 804 E. Fremont St.

Phone: (307) 766-5080 FAX: (307) 766-5099
Web site: www.uwyo.edu/haub

Degrees Offered

The Haub School offers undergraduate and graduate degrees, concurrent majors and minors, certificates, and a graduate degree in partnership with the College of Law:

Bachelor of Science in Environmental Systems Science (for baccalaureate students)

Bachelor of Science in Environment & Natural Resources (for baccalaureate students, required concurrent major)

Environment & Natural Resources concurrent major (for baccalaureate or master's students earning a degree from UW)

Bachelor of Science in Outdoor Recreation & Tourism Management (for baccalaureate students)

Environment & Natural Resources minor (for baccalaureate, master's, and doctoral students)

Sustainability minor (for baccalaureate students)

Outdoor Leadership minor (for baccalaureate students)

Master of Science in Environment, Natural Resources & Society (for master's students)

Master of Arts in Environment & Natural Resources (J.D./M.A. for law students only)

Collaborative Practice minor (for master's and doctoral students)

Program Admission

Undergraduate students will apply for admission to the University of Wyoming, and then declare a major or minor within the Haub School at any point during their course of study. To declare a major or minor, students must meet with a Haub School academic advisor.

Graduate students interested in the concurrent major or minor in Environment & Natural Resources (ENR) will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR major or minor. A one-page Statement of Purpose is required to apply. Visit the Haub School website at <https://www.uwyo.edu/haub> for details.

Applicants to the M.S. in Environment, Natural Resources & Society must apply to the University of Wyoming. Applications for graduate assistantships should be directed to the Haub School. Current application requirements are available online.

Applicants to the J.D./M.A. in ENR must apply to both the College of Law and the Haub School. Admission to the joint degree program is contingent on acceptance to the College of Law. Current application requirements are available online.

More information, including complete curricula for each academic offering, is available from the Haub School.

Haub School Requirements for Undergraduate Programs

All students declared in undergraduate Haub School programs, including majors and minors, must earn a C or better in all Haub School program requirements. Students enrolled in multiple Haub School programs must earn 12 credits unique to each program.

Undergraduate students earning a B.S. in Environmental Systems Science, a B.S. in Outdoor Recreation & Tourism Management, and/or a B.S. in Environment & Natural Resources (plus a concurrent major in another field) must also fulfill the additional following Haub School Requirements:

- Complete two courses (totaling a minimum of 6 credit hours), one to meet the U.S. Diversity (ASD) requirement and one to meet the Global Awareness (ASG) requirement. Courses approved to meet these requirements are searchable within WyoRecords under the Browse Classes feature.
- Meet all University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program (USP) requirements and maintaining a minimum 2.0 cumulative GPA for good academic standing and graduation.

Major

Environment & Natural Resources, B.S. or Concurrent Major

Environment & Natural Resources (ENR) students will gain depth and breadth across a range of interdisciplinary fields that engage with complex ENR ideas and challenges, with the goal of integrating across fields of study.

Program Overview

Students can choose to pursue:

- a concurrent major in ENR, earned alongside an approved baccalaureate degree in any other discipline, or
- B.S. in ENR, earned alongside an additional major in any other discipline.

The ENR curriculum is designed to prepare students to demonstrate learning in six key areas:

1. **Specialization & Integration** - Students will complement their disciplinary depth with broad exposure to ENR-related disciplines and approaches.
2. **Spatial & Temporal Perspectives** - Students will understand the temporal and spatial characteristics of ENR challenges.
3. **Policy** - Students will recognize the content and implications of past and current ENR policies.
4. **Cultures & Values** - Students will appreciate the diversity of ENR perspectives and experiences, including the role of personal and collective value systems and structural inequalities in shaping those systems.
5. **Complexity, Risk, & Uncertainty** - Students will understand that ENR problems inherently involve complexity, risk, and uncertainty.

6. Professional & Academic Skills - Students will acquire specific skills necessary to succeed in a range of ENR professions and/or graduate and professional school, especially proficiency in written and oral communication, applied problem solving, and collaboration.

All undergraduate students in ENR complete their coursework in conjunction with another major in any discipline.

Students must complete 36+ hours of coursework in ENR, including:

15+ Credit Hours of ENR Core Courses:

Foundations of Environmental Science

(Choose one course):

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Environment & Society

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

Approaches to Problem Solving

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

Environmental Assessment

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

Applied Experience (2 credits)

ENR4970 - ENR Internship

Credits: 1-6
Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

21+ Credit Hours of ENR Disciplines Courses:

Cultures & Values

(Choose one course):

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP 2003-2014 Code [CH< >(none)]

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

GEOG4570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Cross Listed GEOG 5570, INST 4570, INST 5570

Prerequisite: 6 hours in social science

HLED4020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 5020.

Prerequisite: Completed COM 2 course and minimum 2.750 cumulative UW GPA.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

Economics

(Choose one course):

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

GEOG3050 - Economic Geography

Credits: 3

Economic Geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

Environmental Management

(Choose one course):

ENR4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 4800.

Dual Listed ENR 5800.

Prerequisite: ARE 3020 or AMST 5400.

AMST4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 4800.

Dual Listed AMST 5800.

Prerequisite: ARE 3020 or AMST 5400.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical

ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

Data Analysis

(Choose one course):

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language,

including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

Physical & Natural Science

Choose One Course:

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

ATSC2200 - Severe and Unusual Weather

Credits: 3

A nontechnical course on severe and unusual weather events that occur around the globe. The focus of the course is on a wide range of weather events that have profound impacts on societies, economics, and cultures, and the material is presented in a qualitative manner such that is highly accessible by students coming from all backgrounds.

USP 2003-2014 Code U5PN

ENR3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed REWM 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

OR Complete all Three Courses:

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

Policy

(Choose one course):

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

INST4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 4455.

Dual Listed INST 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.

Dual Listed POLS 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 4475.

Dual Listed POLS 5475.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

ENR Electives

(Select from the following, minimum three credits required):

Any course with code ENR 1000-4999

An Approved Major in Any Discipline

All undergraduate students in ENR complete their coursework in conjunction with another major in any discipline.

Students can choose to pursue:

- a concurrent major in ENR, earned alongside an approved baccalaureate degree in any other discipline, or
- B.S. in ENR, earned alongside an additional major in any other discipline.

Haub School Requirements (for B.S. ENR only)

Students earning a B.S. in ENR with their degree awarded from the Haub School must additionally complete 6 credit hours of Haub School Requirements:

1. U.S. Diversity (choose one course)
2. Global Awareness (choose one course)

University Studies Program

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor(s) if needed to meet minimum credits to earn a B.S. in ENR (minimum 120 credits, including 42 upper division credits) or to meet primary degree requirements.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Environmental Systems Science, B.S.

Environmental Systems Science (ESS) is an interdisciplinary undergraduate degree in environmental science, focusing on the interactions between the various components of Earth and environmental systems.

Program Overview

Students earning a B.S. in Environmental Systems Science will

1. demonstrate a knowledge of interdisciplinary perspective and integrative thinking,

1. understand physical and biological components of environmental systems, including the human component;
2. design, conduct, and interpret scientific investigations,
 1. understand the ethics of scientific investigation,
 2. demonstrate proficiency in data collection, statistical analysis, and use of information technology tools and modeling;
3. apply systems concepts to problems concerning environmental systems and their components, and construct conceptual and quantitative systems models;
4. examine spatial, temporal, and spatial-temporal patterns in environmental systems, and use information technology tools to depict, project, and communicate such patterns.

Students earning a B.S. degree in ESS complete coursework including:

23+ Credit Hours of Foundations Courses:

Intro to Systems Science

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

Foundation of Biological Sciences

(Choose one course):

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Foundation of Earth Sciences

(Choose one course):

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Foundation of Physical Sciences

(Complete all courses):

Chemistry

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

Physics

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

OR

PHYS1050 - Concepts of Physics

Credits: 4

Introduces the physical world. For students whose background in math and science is minimal; recommended for students in paramedical sciences and medical technology. Three lecture hours per week are supplemented by two hours per week of laboratory work.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

Geochemical Cycles

ESS2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed GEOL 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

OR

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

15+ Credit Hours of Spheres Courses:

Anthrosphere

(Choose one course):

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS

Former Course Number [G&R 3550]

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

Atmosphere

(Choose one course):

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

ATSC2200 - Severe and Unusual Weather

Credits: 3

A nontechnical course on severe and unusual weather events that occur around the globe. The focus of the course is on a wide range of weather events that have profound impacts on societies, economics, and cultures, and the material is presented in a qualitative manner such that is highly accessible by students coming from all backgrounds.

USP 2003-2014 Code U5PN

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and

local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

Biosphere

Choose One Course:

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their

application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics,

evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

OR Complete all Three Courses

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

Lithosphere - Environmental Change

(Choose one course):

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

Lithosphere - Hydrology & Surface Processes

(Choose one course):

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

17+ Credit Hours of Skills & Tools Courses:

College Algebra

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

Statistics or Calculus

(Choose one course):

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

Data Analysis

(Choose one course):

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP 2003-2014 Code [I< >(none)]

Prerequisite: One USP designated science course with lab.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

GIS/Remote Sensing

(Choose one course):

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

Applied Experience (1 credit)

ESS4970 - Internship in Earth System Science

Credits: 1-6

Max Credit (Max. 6)

Offers students an individualized opportunity to connect their academic training, professional experiences, and future goals. Students must first consult with their Haub School advisor and have completed and appropriate internship, professional and/ or applied experience that provides exposure to complex environmental systems, scientific practices, and relevant interactions in the professional world.

Prerequisite: ESS 1000.

Capstone

ESS4950 - Exploring the Earth System

Credits: 3

Conduct critical and interdisciplinary assessments on complex topics addressing physical, biological, and human components of the Earth System. Through multiple written, oral, and digital communication products, students will work independently and collaboratively to critically review existing literature, define knowledge gaps, analyze evidence, and synthesize results for multiple audiences.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ESS 1000 and either ESS 3480 or ENR 3450.

18+ Credit Hours in an Approved Minor or Concurrent Major

18+ credit hours in an approved* minor or concurrent major as an area of specialization: Agroecology, Agronomy, Anthropology, Astronomy, Biology, Botany, Chemistry, Environment & Natural Resources, Forest Resources, Geography, Geology, GIS & Remote Sensing Certificates, Horticulture, Insect Biology, Land Surveying, Paleoenvironmental Studies, Physics, Plant Protection, Rangeland Ecology & Watershed Management, Reclamation & Restoration Ecology, Secondary Earth Science Education, Soil Science, Statistics, Sustainability, Wildlife & Fisheries Biology & Management, or Zoology

** other options available; subject to advisor approval*

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Business & Hospitality Management Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, and entrepreneurial and business management strategies.

Program Overview

Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership
 1. competency in leading and building diverse, collaborative teams;
 2. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
2. Professional Practice
 1. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
3. Communication
 1. ability to manage dynamic relationships and demonstrate best practices in communication.
4. Nimble and Creative Thinking
 1. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
5. Trans-disciplinarity
 1. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 2. tourism and outdoor recreation theories and best practices;
 3. entrepreneurial and business management strategies.
6. Place-based and Global Understanding
 1. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP 2015 Code U5C2

Prerequisite: ORTM 1000.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences.

Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Business Fundamentals:

(Complete One Course from Each Area):

Economics:

(Choose One Course)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V
USP 2015 Code U5V

Management:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Marketing:

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE
USP 2015 Code U5PN
Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE
USP 2015 Code U5PN

Conservation & Sustainability:

(Choose One Course)

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH
USP 2015 Code U5H

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3

Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests, watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP 2015 Code U5PN

People & Culture:

Social Science:

(Choose One Course)

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG
Former Course Number [G&R 1020]

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS
USP 2015 Code U5H

Culture/Diversity:

(Choose One Course)

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB
USP 2015 Code U5H

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP 2003-2014 Code U3I, U3L

A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

13+ Credit Hours in Synthesis & Applied Experience:

Professional Semester:

(Complete all Courses in the Same Semester)

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP 2015 Code U5C3

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

Applied Experience (One Credit Minimum):

**students must complete a 400-hour internship experience prior to enrolling in ORTM 4970*

ORTM4970 - Internship

Credits: 1-6

Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

19+ Credit-Hour Concentration:

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and

enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

HOSP4800 - Hospitality Operations Management

Credits: 3

This course provides a broad-reaching, applications-based understanding of hospitality operations and management. It provides a managerial perspective on the operations of each component of hospitality management and operations, including the financial aspect.

Prerequisite: HOSP 2000

Management:

(Choose One Course)

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

Sales & Marketing:

(Choose One Course)

MKT4230 - Integrated Marketing Communication

Credits: 3

Introduction to integrated marketing communication, the coordination of an organization's advertising and promotional efforts. Emphasis on how marketing communication is used by organizations to further their marketing objectives. Among the tools available to the integration process are advertising, sales promotion, personal selling, sponsorship marketing, and public relations.

Prerequisite: MKT 2100, advanced business standing.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

MKT4440 - Services Marketing

Credits: 3

This course is designed for students who may be interested in working in service industries and will address the distinct needs and problems of service firms in the area of marketing.

Prerequisite: HOSP 2000 or MKT 2100 .

MKT4520 - Marketing Research and Analysis

Credits: 3

Investigation of the systematic procedures and tools of research available to the marketing researcher, including a survey of contemporary practices.

Prerequisite: MKT 2100, junior class standing.

SELL3310 - Professional and Technical Selling

Credits: 3

This Professional Selling class focuses on business-to-business selling. It examines Organizational Buying Behavior to develop students' understanding of customers. It also investigates the process salespeople go through when presenting solutions to customers. This course is for students from various disciplines wanting to explore sales-focused opportunities within their field.

USP 2015 Code U5C2

Prerequisite: COM1 and sophomore class standing.

Approved Electives:

(Choose Two Courses):

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows

and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

HOSP3000 - Managing Profitability in Hospitality

Credits: 3

This course examines the complexities of profitability in the hospitality industry, driven by issues of pricing and cost management. Areas explored can include restaurants, hotels, and other hospitality ventures.

Prerequisite: ACCT 2010

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Creative Studies in Recreation & Tourism Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, and entrepreneurial and business management strategies.

Program Overview

Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership
 1. competency in leading and building diverse, collaborative teams;
 2. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
2. Professional Practice
 1. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
3. Communication
 1. ability to manage dynamic relationships and demonstrate best practices in communication.
4. Nimble and Creative Thinking

1. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
5. Trans-disciplinarity
 1. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 2. tourism and outdoor recreation theories and best practices;
 3. entrepreneurial and business management strategies.
6. Place-based and Global Understanding
 1. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP 2015 Code U5C2

Prerequisite: ORTM 1000.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Business Fundamentals:

(Complete One Course from Each Area)

Economics:

(Choose One Course)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V

USP 2015 Code U5V

Management:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Marketing:

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Conservation & Sustainability:

(Choose One Course)

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3

Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests,

watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP 2015 Code U5PN

People & Culture:

Social Science:

(Choose One Course)

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Culture/Diversity:

(Choose One Course)

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing

environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.
USP 2003-2014 Code U3I, U3L
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

13+ Credit Hours in Synthesis & Applied Experience:

Professional Semester:

(Complete all Courses in the Same Semester)

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and

opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP 2015 Code U5C3

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

Applied Experience (One Credit Minimum):

**students must complete a 400-hour internship experience prior to enrolling in ORTM 4970*

ORTM4970 - Internship

Credits: 1-6
Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

19+ Credit-Hour Concentration:

- Self-designed program of study; requires approval from Haub School advisor

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Cultural & International Tourism Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, and entrepreneurial and business management strategies.

Program Overview

Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership
 1. competency in leading and building diverse, collaborative teams;
 2. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
2. Professional Practice
 1. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
3. Communication
 1. ability to manage dynamic relationships and demonstrate best practices in communication.
4. Nimble and Creative Thinking
 1. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
5. Trans-disciplinarity
 1. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 2. tourism and outdoor recreation theories and best practices;
 3. entrepreneurial and business management strategies.
6. Place-based and Global Understanding
 1. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP 2015 Code U5C2

Prerequisite: ORTM 1000.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Business Fundamentals:

(Complete One Course from Each Area)

Economics:

(Choose One Course)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V

USP 2015 Code U5V

Management:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Marketing:

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Conservation & Sustainability:

(Choose One Course)

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3

Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests, watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP 2015 Code U5PN

People & Culture:

Social Science:

(Choose One Course)

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Culture/Diversity:

(Choose One Course)

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict

between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP 2003-2014 Code U3I, U3L
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

13+ Credit Hours in Synthesis & Applied Experience:

Professional Semester:

(Complete all Courses in the Same Semester)

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining

social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP 2015 Code U5C3

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

Applied Experience (One Credit Minimum):

**students must complete a 400-hour internship experience prior to enrolling in ORTM 4970*

ORTM4970 - Internship

Credits: 1-6

Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

19+ Credit-Hour Concentration

Global Tourism:

ORTM4050 - Global Tourism

Credits: 3

This course focuses on global destinations and the people who inhabit and visit them. Students will examine tourism from different human angles including that of the tourist, the tourism service providers, the government agencies that promote and regulate it, researchers, and the local populations whose lives are impacted.

A&S College Core 2015 ASG

Prerequisite: COM2 and ORTM 1000; junior or senior standing.

International Experience:

- Students must complete a faculty-led, semester-, or year-long study abroad course or experience

Cultural Resources:

(Choose One Course)

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.
Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD
Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.
USP 2003-2014 Code U3CS, U3D
Prerequisite: one course in American Indian culture.

GEOG4570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Cross Listed GEOG 5570, INST 4570, INST 5570
Prerequisite: 6 hours in social science

INST3000 - Social Change

Credits: 3

Studies causes, processes and consequences of structural transformations in historical and comparative perspective. Reviews and assesses forces that account for sociological changes. Explores social change globally as well as in the U. S.

Cross Listed SOC 3000.
USP 2003-2014 Code U3G
A&S College Core 2015 ASG
Former Course Number [2100]

Prerequisite: SOC 1000.

INST3200 - Comparative Political Cultures

Credits: 3

Histories and experiences of various societies have shaped their values, norms, beliefs, expectations, and attitudes. This class explores how the beliefs, values, and lifestyles of various societies shape peoples' views of their place in the politics of the state and of the state's place in their daily lives.

Cross Listed POLS 3200.

Prerequisite: POLS 1200/INST 1200 or POLS 1250/INST 1250 or permission of instructor.

INST4060 - NGOs, Development, and Culture

Credits: 3

Non-governmental organizations (NGOs) have grown exponentially in number and are often viewed as the new and best vehicle for international development. By focusing on international non-governmental organizations (INGOs), in the contexts of Western aid to post-colonial societies and the role they play in the international aid system, the course explores INGOs from historical, global, and cultural perspectives.

Dual Listed INST 5060.

Prerequisite: junior standing and instructor permission.

INST4350 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology. Identical to ANTH 4340.

Prerequisite: ANTH 1200.

POLS4475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 4475.

Dual Listed POLS 5475.

Prerequisite: 9 hours of international studies or social science coursework and junior standing.

The American West:

(Choose One Course)

GEOG4500 - The American Landscape

Credits: 3

This course trains students to interpret patterns and processes of contemporary landscapes of the Americas (North, Central, and South America) by viewing those landscapes historically. We investigate the relationship between landscape, politics, and economy, or, more generally, the relationship between landscape as a geographical form and cultural politics in the hemisphere. Students are introduced to research techniques and methodologies in historical geography.

Cross Listed Cross listed with GEOG 5500, INST 4500, INST 5500

Former Course Number [G&R 4500]

Prerequisite: 6 credits of international studies or social science coursework

GEOG4502 - Images of Wyoming and the West

Credits: 3

The West is nothing more than a barren, desolate landscape to some while to others it offers great spiritual and cultural significance. Examines how individuals and groups perceive Wyoming and the West, how such perceptions have been constructed over time, and how these differing views create images of the region both real and imagined.

Dual Listed GEOG 5502.

Prerequisite: GEOG 1000 or GEOG 1020 and junior standing.

HIST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed GWST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

HIST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed AAST 4020.

USP 2003-2014 Code U3CH, U3D

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

HIST3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the plains region of the U.S. from prehistory to the present.

Cross Listed NAIS 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

NAIS3000 - Plains Culture and History

Credits: 3

An ethnohistorical study of those Native peoples inhabiting the Plains region of the U. S. from prehistory to the present.

Cross Listed HIST 3000.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: 6 hours of HIST or NAIS.

HIST4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses

interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed NAIS 4000
Dual Listed HIST 5000
USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 9 hours of HIST or NAIS.

NAIS4000 - Indians of Wyoming

Credits: 3

Examines Native American culture in Wyoming from pre-history to the 21st century. Analyzes social, political, and economic developments of Native peoples of Wyoming before, during, and after contact with Europeans. Discusses interaction between these diverse societies and explores the changing relationships between Indians and Euro-Americans through the periods after contact.

Cross Listed HIST 4000.
USP 2003-2014 Code U3D
A&S College Core 2015 ASD
Prerequisite: 9 hours of HIST or NAIS.

NAIS3200 - Indigenous Peoples and the Environment

Credits: 3

Understand the historical, political, and socio-economic forces that have shaped the relationships of Indigenous peoples to their environments, and be able to discern the similarities and dissimilarities of Indigenous issues across international borders. The course may include a study abroad component.

Prerequisite: 6 hours NAIS credit.

Language:

(Complete two consecutive language or ASL courses)

LANG1010 - First Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

LANG1020 - Second Semester in (TOPIC)

Credits: 1-4
Max Credit (Max. 12)

Prerequisite: LANG 1010.

Cultural/International Museum Studies:

(Choose One Course)

ANTH2200 - World Culture

Credits: 3

Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)

USP 2003-2014 Code U3G, U3CS

A&S College Core 2015 ASG

ANTH2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed HIST 2600.

USP 2015 Code U5H

ANTH2700 - Introduction to Museology

Credits: 3

Max Credit 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ART 2700/HIST 2700.

USP 2003-2014 Code U3CH

AMST2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History

and History.

Cross Listed ART 2700/ANTH 2700/HIST 2700.
USP 2003-2014 Code U3CH

ANTH3410 - Maya, Aztec, and Inca Cultures

Credits: 3

An exploration of the early states and empires of the New World through the archaeological record. Compares and contrasts the Aztec, Maya, and Inca cultures with emphasis placed on origins, political and social organization, ritual beliefs, and reasons for collapse.

Prerequisite: ANTH 1300.

INST2230 - Introduction to Asian Studies

Credits: 3

Asia, the world's largest continent, is home to virtually half of humanity and a broad spectrum of peoples, languages, religions, and cultures. This course introduces the cultural, political, economic, and environmental landscapes of this diverse region.

USP 2003-2014 Code U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

INST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed AAST 2240.
USP 2003-2014 Code U3WB
USP 2015 Code U5C2

INST2250 - Introduction to Latin American Studies

Credits: 3

An introduction to the culture, history and politics of Latin America, from the US/Mexico border to the Antarctic ice fields of Patagonia. We will consider historical events and encounters from pre-Conquest times to contemporary crises. Our toolkit includes geography, anthropology, history, political economy, literature and cultural studies.

USP 2015 Code U5C2

INST2280 - Introduction to European Studies

Credits: 3

This class explores the historical development of notions of community and difference, territories and borders, race and identity, and nationalism and post-national integration in Europe between 1789 and the present. It draws upon history, politics, geography, cultural studies, and anthropology.

Cross Listed HIST 2280.

USP 2015 Code U5C2

INST2350 - Introduction to Global Studies

Credits: 3

Taking an interdisciplinary approach to the study of globalization, the course explores the links between trade, consumption, civil society, social justice, and ecological integrity.

USP 2003-2014 Code U3CS, U3G

POLS2200 - Politics of Europe and the European Union

Credits: 3

Examines formal and informal aspects of politics in European countries and the European Union.

USP 2015 Code U5C2

Prerequisite: POLS 1200 o r POLS 1250 o r permission of the instructor.

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3
Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Management of Recreation Resources Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, and entrepreneurial and business management strategies.

Program Overview

Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership
 1. competency in leading and building diverse, collaborative teams;
 2. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
2. Professional Practice
 1. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
3. Communication
 1. ability to manage dynamic relationships and demonstrate best practices in communication.
4. Nimble and Creative Thinking

1. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
5. Trans-disciplinarity
 1. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 2. tourism and outdoor recreation theories and best practices;
 3. entrepreneurial and business management strategies.
6. Place-based and Global Understanding
 1. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP 2015 Code U5C2

Prerequisite: ORTM 1000.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Business Fundamentals:

(Complete One Course from Each Area)

Economics:

(Choose One Course)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V

USP 2015 Code U5V

Management:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Marketing:

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Conservation & Sustainability:

(Choose One Course)

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3

Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests,

watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP 2015 Code U5PN

People & Culture:

Social Science:

(Choose One Course)

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Culture/Diversity:

(Choose One Course)

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing

environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G
USP 2015 Code U5C2
A&S College Core 2015 ASG

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.
USP 2003-2014 Code U3I, U3L
A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.
USP 2003-2014 Code U3CS, U3D
A&S College Core 2015 ASD

13+ Credit Hours in Synthesis & Applied Experience:

Professional Semester:

(Complete all Courses in the Same Semester)

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and

opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP 2015 Code U5C3

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

Applied Experience (One Credit Minimum):

**students must complete a 400-hour internship experience prior to enrolling in ORTM 4970*

ORTM4970 - Internship

Credits: 1-6
Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

19+ Credit-Hour Concentration:

Environmental or Biological Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

Resource Management:

(Choose One Course)

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ZOO2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed Crosslisted with ENR 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

Human Dimensions:

(Choose One Course)

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on

our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

Law & Policy:

(Choose One Course)

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental

matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

Planning:

(Choose One Course)

AGEC4660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 5660.

Prerequisite: AGEC 1010/ ECON 1010, ECON 1020 , and junior standing.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

Geographic Information Systems or Analytics:

(Choose One Course)

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Outdoor Recreation & Tourism Management, Outdoor Recreation Leadership Concentration, B.S.

A B.S. in Outdoor Recreation and Tourism Management (ORTM) emphasizes stewardship and conservation of natural resources, tourism and outdoor recreation theories and best practices, and entrepreneurial and business management strategies.

Program Overview

Students choose one of five different concentrations.

Students earning a degree in ORTM will be expected to demonstrate learning in six key areas:

1. Leadership
 1. competency in leading and building diverse, collaborative teams;
 2. application and evaluation of ethical, resourceful leadership principles to challenges and solutions within the ORTM industry.
2. Professional Practice
 1. ability to apply and critically evaluate practical, creative, ethical, and theoretical frameworks in diverse and complex professional circumstances.
3. Communication
 1. ability to manage dynamic relationships and demonstrate best practices in communication.
4. Nimble and Creative Thinking
 1. ability to strategically design, implement, and evaluate sustainable and emergent services, experiences, and opportunities.
5. Trans-disciplinarity
 1. synthesis and application of ecological and human communities, with the capacity to provide wise stewardship and conservation of natural resources;
 2. tourism and outdoor recreation theories and best practices;
 3. entrepreneurial and business management strategies.
6. Place-based and Global Understanding
 1. skills to implement solutions appropriate for local environments that demonstrate fluency in global contexts and diverse cultures.

To fulfill the requirements, students must complete the following, earning 76+ credit hours in specified categories:

18 Credit Hours of ORTM Core Courses:

ORTM1000 - Foundations of Recreation and Tourism

Credits: 3

Introduces the conceptual foundations, array of services, and management with recreation and tourism. Primary focal points for this course include historical and psychological underpinnings, market trends, types of resources and services, cultural, economic, political, and legal considerations, and career opportunities. Emphasizes the relationship to resource stewardship.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture,

history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM2000 - Foundations of Customer Service and Hospitality

Credits: 3

Customer service and hospitality are fundamental to providing high-quality services. This course examines critical elements of excellent customer service in the tourism industry, including transportation, accommodation, food and beverage, and attractions. Students will develop communication skills relating to customer service, self-presentation, and interpersonal interactions, including international and cultural communications.

Cross Listed HOSP 2000

ORTM2050 - Program Planning, Design and Delivery

Credits: 3

Design, delivery, and marketing of programs to diverse and inclusive audiences. Students will utilize tools, analytics, and techniques in both the direct supply and facilitation of a planned experience. Students will design and implement a program to a non-peer group.

USP 2015 Code U5C2

Prerequisite: ORTM 1000.

ORTM3000 - Tourism Theory and Practice

Credits: 3

Tourism is a dynamic system of global interconnection that impacts human and natural environments in myriad ways. This course examines the behavioral, social, economic, political, and environmental issues implicated in and affected by tourism and its industries. Students will develop a critical understanding of the implications on the practice of tourism today.

Prerequisite: junior standing.

ORTM3050 - Operations, Management and Environmental Stewardship

Credits: 3

Operations and management are critical aspects of the successful delivery of quality recreation and tourism experiences. Students will evaluate environmental stewardship challenges and potential solutions with the integration of operations and management. Students will develop an understanding of functions that are critical to operational leadership, such as revenue management (budgeting, cost controls, profit centers), and human capital management.

Prerequisite: ORTM and junior standing.

20+ Credit Hours in ORTM Foundations Courses:

Statistics:

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

OR

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

Business Fundamentals:

(Complete One Course from Each Area):

Economics:

(Choose One Course)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECEC 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V

USP 2015 Code U5V

Management:

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

Marketing:

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

Environment & Natural Resources:

Environmental Science:

(Choose One Course)

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Conservation & Sustainability:

(Choose One Course)

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might

guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

RNEW1000 - Wyoming Wildlands: Science and Stewardship

Credits: 3

Introduces students to the breadth of Wyoming natural resources and ecosystems. In this class we investigate the science and management of the Wyoming landscape. Students are introduced to the rangelands, wildlife, forests, watersheds, and disturbed lands of Wyoming with an emphasis on understanding the ecology and natural history of the region. Throughout the course, students are exposed to how the extensive ecosystems of the West are managed by public and private groups and how human decisions change the landscape.

USP 2015 Code U5PN

People & Culture:

Social Science:

(Choose One Course)

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

PSYC1000 - General Psychology

Credits: 3

Surveys the field of psychology through lectures, class discussion and assigned readings. Includes development of behavior, physiological mechanisms of behavior, perception, motivation and emotion, learning, intelligence, individuality and personality and mental health.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

SOC1000 - Sociological Principles

Credits: 3

Provides a survey of the discipline and foundation for other sociology courses. Explores major areas of interest - ranging from small groups and families to bureaucracies and social movements. Introduces significant concepts and theories, along with tools of social research. Gives attention to contemporary American society, as well as comparative and historical material.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Culture/Diversity:

(Choose One Course)

AMST2010 - Introduction to American Studies

Credits: 3

Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5H

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

HIST2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed NAIS 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS2290 - History of North American Indians

Credits: 3

Studies American Indian history through 500 years and across the continent. Considers Indian political, social, and economic continuity and change. Focuses on how Indian peoples experienced and responded to times of dramatic change.

Cross Listed HIST 2290.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

NAIS1001 - Foundations in American Indian Studies

Credits: 3

Explains the development of American Indian studies and will show how a variety of disciplines continue to inform this field and interact to facilitate the exploration of its major topics of concern, including Native histories, cultures, and contemporary lives.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP 2003-2014 Code U3I, U3L

A&S College Core 2015 ASD

NAIS1350 - American Indians in Contemporary Society

Credits: 3

Examines social and cultural issues and concerns of American Indians both on and off the reservations. Additionally, the status of American Indian people within the dominant society and culture will be explored.

Cross Listed SOC 1350.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

13+ Credit Hours in Synthesis & Applied Experience:

Professional Semester:

(Complete all Courses in the Same Semester)

ORTM4900 - Outdoor Recreation and Tourism Management Business Strategies

Credits: 3

Application of the successful delivery of hospitality, tourism, and outdoor recreation enterprises. Business activities covered include tourism- specific marketing, market-based research and analytics, regional challenges and opportunities, business plan components, financial risk analysis, and law and policy.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4902 - Recreation Venue Operations

Credits: 3

Applied best practices of resource and facility management in conjunction with recreation use and infrastructure development and maintenance. Students will examine the importance and challenges of matching user expectations with quality amenities of both private business and resource management agencies. Students will evaluate real-world problems and opportunities.

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

ORTM4903 - Capstone

Credits: 3

Integrates theory and practice to create solutions for real-world problems and opportunities in outdoor recreation and tourism. Industry or government sponsors will mentor projects; students will research and execute a project and share a product with direct value to the sponsor and community.

USP 2015 Code U5C3

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

Applied Experience (One Credit Minimum):

**students must complete a 400-hour internship experience prior to enrolling in ORTM 4970*

ORTM4970 - Internship

Credits: 1-6

Max Credit (Max. 6)

Provides students the potential to succeed as professional at management or higher levels in park, recreation, tourism, or related organizations. Internships are required to be at least 400 clock hours, and no fewer than 10 weeks. Please discuss the criteria and requirements of employers/sponsors and students with your advisor.

Restricted Restricted to ORTM majors only.

Prerequisite: Any ORTM class and junior standing.

19+ Credit-Hour Concentration:

Outdoor Leadership:

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

OR

ORTM2800 - Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. There is a significant focus on self-awareness, judgment, and decision-making. The specific skills and theories students learn in the class provide a foundation for other leadership endeavors.

Cross Listed ENR 2800

Prerequisite: COM 1

Business Ethics:

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

Wilderness First Responder and CPR Certifications:

- ENR 3900 - Wilderness Medicine Credits: 1-3

OR

- provide proof of certification to advisor

**certifications must be current at time of graduation.*

Leadership:

(Choose One Course)

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3

Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP 2003-2014 Code U3I, U3L

Prerequisite: WA and junior status.

AGRI4700 - Elements of Leadership

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 5700.

Prerequisite: Restricted enrollment. Prior approval required.

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

CNSL3010 - Student Leadership Strategies

Credits: 2

Develops skills and competencies requisite to effective leadership. Provides student leaders with skills they will profit from, both while enrolled at the university and later in their chosen careers.

When Offered (Normally offered each spring semester)

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases

the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

Business:

(Choose One Course)

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MKT4590 - Sustainable Business Practices

Credits: 3

A close look at what is happening in business practice today through the lens of sustainability. Business models and systems will be discussed and a framework proposed for assessing the ways in which principles of sustainability may be embedded within corporate strategy.

Cross Listed INST 4590.

Dual Listed MKT 5590.

Prerequisite: advanced business standing.

Law & Policy:

(Choose One Course)

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

Human Dimensions:

(Choose One Course)

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

HIST4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed ENR 4412.

Dual Listed HIST 5412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

HIST4475 - American Environmental History

Credits: 3

Explores history of American attitudes and actions toward the land and natural resources.

Dual Listed HIST 5475.

Former Course Number [4670]

Prerequisite: 9 hours of HIST.

MKT4240 - Consumer Behavior

Credits: 3

A study of the dimensions of the consumer market and decision-making processes of consumers through analyzing economic, personal, social and situational influences on the consumer market and on buying behavior.

Prerequisite: MKT 2100, junior class standing.

Natural History:

Choose One Course:

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

GEOG4000 - Terrain Analysis

Credits: 3

Studies techniques for acquiring and analyzing spatial data from maps, remotely sensed imagery and field surveys for landscape assessment. Emphasizes deriving maps that describe physical suitability of landscapes for specific human activities. Field trip required.

Former Course Number [G&R 4000]

Prerequisite: Completion of USP PN requirement or consent of instructor.

OR Complete all Three Courses

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

6+ Credit Hours of Haub School Requirements Courses:

- U.S. Diversity (choose one course)
- Global Awareness (choose one course)

University Studies Program

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Additional Requirements:

Students complete additional credit hours in consultation with advisor if needed to meet minimum 120 credits, including 42 upper division credits, to earn a bachelor's degree from the University of Wyoming.

Additionally, students must:

- earn a C or better in all courses fulfilling program requirements - including Haub School U.S. Diversity and Global Awareness courses, and degree, major, and/or minor courses;
- earn 12 credits unique to each program when enrolled in multiple Haub School programs;
- meet University of Wyoming requirements for earning a bachelor's degree, including, but not limited to, completion of University Studies Program and maintaining minimum 2.0 GPA for good academic standing and graduation.

Minor

Environment & Natural Resources Minor

An Environment & Natural Resources (ENR) minor may accompany any primary field of study. The ENR core, plus one elective course, fulfills the 18 credit hour requirement for the minor.

15+ Credit Hours of ENR Core Courses:

Foundations of Environmental Science:

(Choose one course):

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Environment & Society:

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

Approaches to Problem Solving:

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

Environmental Assessment:

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical

thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

Applied Experience (2 Credits):

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

3+ Credit Hours of ENR Electives

(Select from the following, minimum three credits required):

Any course with code ENR 1000-4999

Outdoor Leadership Minor

The Outdoor Leadership minor is available to any undergraduate student at the University of Wyoming. Students earning the minor will study leadership, ethics, field ecology, outdoor recreation, and wilderness medicine.

6+ Credit Hours of Outdoor Leadership Foundations Courses:

Introduction to Outdoor Leadership:

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

OR

ORTM2800 - Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. There is a significant focus on self-awareness, judgment, and decision-making. The specific skills and theories students learn in the class provide a foundation for other leadership endeavors.

Cross Listed ENR 2800

Prerequisite: COM 1

Environmental Science:

(Choose one):

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOG1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

8+ Credit Hours of Concepts Courses:

Field Ecology:

Choose One Course:

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

OR Complete all Three Courses:

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

Leadership:

(Choose one):

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3

Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP 2003-2014 Code U3I, U3L

Prerequisite: WA and junior status.

AGRI4700 - Elements of Leadership

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 5700.

Prerequisite: Restricted enrollment. Prior approval required.

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

CNSL3010 - Student Leadership Strategies

Credits: 2

Develops skills and competencies requisite to effective leadership. Provides student leaders with skills they will profit from, both while enrolled at the university and later in their chosen careers.

When Offered (Normally offered each spring semester)

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

Ethics & Culture:

(Choose one):

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the

American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP 2003-2014 Code [CH< >(none)]

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

ORTM1050 - Natural and Cultural Resources of the West

Credits: 3

The American West is an attraction for visitors, largely due to its unique sense of place, blend of people and culture, history and natural resources. Within the context of outdoor recreation and cultural/historical tourist attractions, students will examine diverse natural and cultural resources.

ORTM4901 - Human Dimensions of Outdoor Recreation and Tourism Management

Credits: 3

This course synthesizes social, environmental, and economic aspects of outdoor recreation and tourism by examining social science methods and research conducted within these spheres. This course will be an applied experience in learning how to answer the question "Why do recreationists and tourists do what they do?"

Restricted Restricted to ORTM majors only.

Prerequisite: Senior standing, ORTM 3050.

3+ Credit Hours of Applied Experience:

(Choose from the following; minimum three credits required):

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

Wilderness First Responder and CPR Certifications:

- ENR 3900 - Wilderness Medicine Credits: 1-3
OR

- provide proof of certification to advisor

**certifications must be current at time of graduation.*

Program Overview

Students earning a minor in outdoor leadership will:

1. develop an understanding of leadership theories, including leadership movements, qualities, styles, and models;
2. identify and evaluate the cultural and environmental dimensions of outdoor leadership, including moral and ethical responsibilities, the fundamentals of ecological systems, and the human impact on the natural world;
3. demonstrate and apply outdoor leadership competency in a practical leadership role;
4. plan, implement, supervise, and analyze a high-quality, safe outdoor adventure and/or educational program;
5. earn and maintain a professional certification of Wilderness First Responder.

To fulfill the requirements for the minor, students must complete the following, earning 17+ credits in specified categories:

Sustainability Minor

The Sustainability minor is available to any undergraduate student at the University of Wyoming. The minor prioritizes systems thinking, civic engagement, and personal development rooted in sustainability for everyday challenges.

Program Overview

Students completing the sustainability minor will be expected to:

1. demonstrate a theoretical and historical understanding of sustainability;

2. develop a model of sustainability informed by personal values and integrated into student's worldview;
3. think holistically about consequences of actions and intellectually respond to perspectives of sustainability outside their own, as well as explore and evaluate the implications of sustainability values;
4. develop and implement sustainability solutions in their community and have the ability to apply sustainability principles to a range of disciplines and professional settings.

To fulfill the requirements for the minor, students must earn 18 credit hours:

9 Credit Hours of Sustainability Core Courses:

Foundations of Sustainability

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

Campus Sustainability

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

Ethics & Justice:

(Choose one course):

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP 2003-2014 Code [CH< >(none)]

OR

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

OR

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

HLED4020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 5020.

Prerequisite: Completed COM 2 course and minimum 2.750 cumulative UW GPA.

NAIS1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed AAST 1030/AMST 1030/GWST 1030/LTST 1030.

USP 2003-2014 Code U3I, U3L

A&S College Core 2015 ASD

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

9+ Credit Hours of Sustainability Electives Courses:

(choose three courses from any of the following categories)

Culture & Society

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

AMST4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 4800.

Dual Listed AMST 5800.

Prerequisite: ARE 3020 or AMST 5400.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary

environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

OR

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

OR

NAIS3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select Indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed GEOG 3400.

USP 2003-2014 Code U3CS, U3D

Prerequisite: one course in American Indian culture.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS

Former Course Number [G&R 3550]

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

Economics & Policy

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

OR

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

OR

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

OR

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

INST4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 4455.

Dual Listed INST 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

OR

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.

Dual Listed POLS 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

Energy & Environment

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

ARE2410 - Fundamentals of Building Performance

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

OR

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

OR

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

ENR3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed REWM 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

OR

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to

these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed CHEM 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological,

geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

OR

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of

formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

Food Systems

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences

between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

AGEC3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed INST 3860.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3G

USP 2015 Code U5H

Former Course Number [4860]

Prerequisite: AGEC 1010/ECON 1010 or AGEC 1020.

ANTH4260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 5260.

Prerequisite: ANTH 1100 or ANTH 1200.

BOT3100 - Plants and Civilization

Credits: 3

Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L

A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

HLED4020 - Food, Health, and Justice

Credits: 3

Maps ways our dominant national and global food systems affect health and equity in health, largely though not only negatively. Students will critically assess practiced and potential strategies for creating alternative food systems that support health and equity, particularly at the U. S. community level.

Dual Listed HLED 5020.

Prerequisite: Completed COM 2 course and minimum 2.750 cumulative UW GPA.

PLNT4020 - Sustainable Agriculture

Credits: 3

Focuses on the sustainability of agroecosystems and the human communities that maintain them in the context of regional, national and global food and fiber requirements. Topics include: the scale of agriculture, low-input systems, current energy and transportation challenges, markets, and integrated crop and livestock production.

Dual Listed PLNT 5020

Prerequisite: 8 hours of Life Sciences

PLNT4120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 5120

Prerequisite: 8 hours of LIFE and/or CHEM

Graduate

Collaborative Practice Graduate Minor

The Collaborative Practice minor is designed to provide students with skills in designing, organizing, facilitating, and evaluating collaborative decision-making processes.

Program Overview

Students pursuing the Collaborative Practice minor will:

- build process competencies in collaborative decision making and problem solving, and
- deepen their knowledge in the application of collaborative processes in specific contexts (natural resources, health, education, business, etc.).

Collaborative Practice minor students who are currently working towards an ENR graduate major may not count ENR 5910 or ENR 5921 towards their ENR major. ENR5450 - Negotiation and one elective (approved for both the Collaborative Practice minor and the ENR major) may count for both.

In addition to degree requirements of the student's home department, students must complete 12 credit hours:

9 Credit Hours in Collaborative Practice Core Courses:

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

ENR5910 - Collaborative Practice Methods

Credits: 3

This course introduces students to the principles, concepts, and methods of collaborative decision making as it is practiced in a variety of settings. Students acquire collaborative skills and competencies in collaborative processes such as working in teams and facilitating groups, negotiating and managing conflict, conducting situation assessments and issue analyses, and developing methods and standards for integrating technical information in collaborative decision making. The course will involve extensive use of cases, role-plays, and related participative activities.

Prerequisite: Admission by consent of instructor.

ENR5921 - Collaborative Practicum

Credits: 1-3

Max Credit (Max. 3)

Under the guidance and instruction of ENR faculty, students will have the opportunity to apply the skills and information gained in ENR 5910 to real-world situations. Students will gain practical experience in collaboration, facilitative leadership, and conflict resolution and to develop and refine skills in one or more of the learning objectives and expected competencies.

Prerequisite: ENR 5910.

3 Credit Hours in Collaborative Practice Electives:

Students will consult with their Haub School advisor to choose an elective to deepen their process competencies or build knowledge for application of collaborative governance in specific contexts (natural resources, health, education, business, etc). Context specific electives should focus on policy within that context.

Environment & Natural Resources Graduate Major

The ENR graduate major is completed in tandem with any UW graduate degree. Graduates will understand and evaluate the relationship of their primary discipline to other environmental fields to address the complexity of environmental challenges.

Program Overview

Students earning the ENR graduate major will take classes and conduct research in such fields as cultural studies, ecology, economics, law and politics, and management to:

- be conversant across a range of field of environmental significance, spanning science and technology to human dimensions of natural resources;
- understand and evaluate the relationship of your primary discipline to other relevant ENR fields; and
- produce discourse, scholarship, and practical solutions that address the complexity of ENR challenges.

Graduate students interested in the concurrent major in ENR will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR major. During the Haub School admission process, students will submit a one-page Statement of Purpose. Current application requirements are available online.

In addition to degree requirements of the student's home department, students must complete 15 credit hours:

6 Credit Hours in ENR Core Courses:

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and

natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

9+ Credit Hours in ENR Electives Courses:

(Choose three+ courses from any of the following categories)

Human Dimensions

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 4660.

Prerequisite: AGEC 1020/ ECON 1020 or SOC 2090 and junior standing.

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.

Dual Listed AMST 4030.

Prerequisite: graduate status.

ANTH5260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and

theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 4260.

Prerequisite: ANTH 1100 or ANTH 1200.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGECE 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.
OR

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG5570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 4570.
Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 4590.
Former Course Number [5574]

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

REWM5103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Preparation of public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 4103.

Prerequisite: REWM 2000 and CS course.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

Law & Policy

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

OR

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

OR

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

INST5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 5455.

Dual Listed INST 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

OR

POLS5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 5455.

Dual Listed POLS 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

LAW6660 - Environmental Law

Credits: 3
Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6700 - Indian Law

Credits: 3
Max Credit (Max. 3)

Surveys the law that applies to Native Americans and tribal governments. Deals primarily with federal law because of the unique relationship between the federal government and tribes, which are sovereign entities, and because federal law controls most Native American activities. The main issues are jurisdictional; that is, they concern the allocation of legislative (or regulatory) and judicial (both civil and criminal) jurisdiction among federal, tribal, and state governments.

LAW6800 - Public Lands

Credits: 3
Max Credit (Max. 3)

Examines the law governing management of the federal public lands/national parks, national forests, wildlife refuges, BLM lands, etc. Among other laws, we study NEPA, General Mining Law of 1872, Mineral Leasing Act of 1920, National Forest Management Act of 1976, Taylor Grazing Act, Federal Land Policy and Management Act, Endangered Species Act, and Wilderness Act. In addition to examining Congress' prescriptions for public land management and the constraints it has imposed on land managers, the course also explores how the public and politics influence public land policy and decision making.

LAW6860 - Water Law and Policy

Credits: 3
Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

LAW6865 - Natural Resources Law

Credits: 3
Max Credit (Max. 3)

Comprehensive view of the general law governing natural and environmental resources. Students will learn to understand how our legal system has organized the various problems of allocation, use rights, duties and limitations, and governance, in the context of establishing rules governing human use of the earth's natural endowment.

Prerequisite: completion of first year of law school.

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

POLS5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 5475.

Dual Listed POLS 4475.

Prerequisite: graduate standing.

Natural & Physical Sciences

BOT5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.

Dual Listed BOT 4280.

Prerequisite: graduate standing.

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

OR

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

OR

PATB5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 5240

Dual Listed PATB 4240

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .

Prerequisite: Graduate standing.

PLNT5120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 4120

Prerequisite: 8 hours of LIFE and/or CHEM

REWM5000 - Range Resource Management

Credits: 3

Basic concepts and theories of rangeland resource management, trends in rangeland classification, grazing management and improvement practices.

Prerequisite: graduate classification in agriculture or related natural resource subject matter areas.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture

production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

REWM5750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 4750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed ECOL 5400.

Prerequisite: LIFE 3410 or equivalent.

RNEW5500 - Stable Isotope Ecology

Credits: 3

Application of stable isotope measurements to organismal and systems ecology. Lectures address the theory underlying the use of stable isotopes at natural abundance levels as tracers and integrators of important physiological and ecological processes. Laboratory exercises provide hands on experience with stable isotope ratio measurements.

Prerequisite: graduate classification in a natural science or agriculture discipline.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

Quantitative & Qualitative Methods:

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

OR

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGEC 4550.

Prerequisite: QA/Q.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

OR

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

GIST5100 - Foundations of Geospatial Information Science and Technology

Credits: 3

This online and on-campus graduate-level course provides an introduction to key concepts in geospatial information science and technology (GIST) including spatial data structures, coordinate systems, cartographic principles, spatial analysis, modeling, spatial cognition, and applications of GIS in a multidisciplinary context. Lecture and project-based (poster).

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Additional Program Requirements:

1. **Statement of Purpose:** Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.
2. **Cumulative Learning Analysis:** Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
3. **Program Completion Letter:** Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Environment & Natural Resources Graduate Minor

The Environment & Natural Resources (ENR) graduate minor is designed for doctoral students in any discipline who want to broaden their perspectives, experiences, and critical thinking skills to complex environmental problems.

Program Overview

The ENR minor is also available to master's students.

Graduate students interested in the concurrent minor in ENR will apply for admission to a primary degree program at the University of Wyoming. Once accepted to their primary graduate program, students must complete an additional online process to confirm their enrollment in the ENR minor. During the Haub School admission process, students submit a one-page Statement of Purpose. Current application requirements are available online.

In addition to degree requirements of the student's home department, students must complete 12 credit hours:

6 Credit Hours in ENR Core Courses:

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of

knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

6+ Credit Hours in ENR Electives Courses:

(Choose three+ courses from any of the following categories)

Human Dimensions:

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 4660.

Prerequisite: AGEC 1020/ ECON 1020 or SOC 2090 and junior standing.

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.
Dual Listed AMST 4030.
Prerequisite: graduate status.

ANTH5260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 4260.
Prerequisite: ANTH 1100 or ANTH 1200.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3
Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC
USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGECE 5450.
Dual Listed ENR 4450.
Prerequisite: completion of USP O requirement; junior standing.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

OR

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG5570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 4570.

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 4590.

Former Course Number [5574]

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

REWM5103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Preparation of public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 4103.

Prerequisite: REWM 2000 and CS course.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

Law & Policy:

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

OR

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

OR

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

INST5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 5455.

Dual Listed INST 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

OR

POLS5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 5455.

Dual Listed POLS 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6700 - Indian Law

Credits: 3

Max Credit (Max. 3)

Surveys the law that applies to Native Americans and tribal governments. Deals primarily with federal law because of the unique relationship between the federal government and tribes, which are sovereign entities, and because federal law controls most Native American activities. The main issues are jurisdictional; that is, they concern the allocation of legislative (or regulatory) and judicial (both civil and criminal) jurisdiction among federal, tribal, and state governments.

LAW6800 - Public Lands

Credits: 3

Max Credit (Max. 3)

Examines the law governing management of the federal public lands/national parks, national forests, wildlife refuges, BLM lands, etc. Among other laws, we study NEPA, General Mining Law of 1872, Mineral Leasing Act of 1920, National Forest Management Act of 1976, Taylor Grazing Act, Federal Land Policy and Management Act, Endangered Species Act, and Wilderness Act. In addition to examining Congress' prescriptions for public land management and the constraints it has imposed on land managers, the course also explores how the public and politics influence public land policy and decision making.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

LAW6865 - Natural Resources Law

Credits: 3
Max Credit (Max. 3)

Comprehensive view of the general law governing natural and environmental resources. Students will learn to understand how our legal system has organized the various problems of allocation, use rights, duties and limitations, and governance, in the context of establishing rules governing human use of the earth's natural endowment.

Prerequisite: completion of first year of law school.

POLS5051 - Environmental Politics

Credits: 3
Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.
Dual Listed POLS 4051.
Prerequisite: POLS 1000.

POLS5475 - Politics of Natural Resources in Latin America

Credits: 3
This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 5475.
Dual Listed POLS 4475.
Prerequisite: graduate standing.

Natural & Physical Sciences:

BOT5280 - Paleobotany

Credits: 4
An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.
Dual Listed BOT 4280.
Prerequisite: graduate standing.

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

OR

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

OR

PATB5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 5240

Dual Listed PATB 4240

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .

Prerequisite: Graduate standing.

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

PLNT5120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 4120

Prerequisite: 8 hours of LIFE and/or CHEM

REWM5000 - Range Resource Management

Credits: 3

Basic concepts and theories of rangeland resource management, trends in rangeland classification, grazing management and improvement practices.

Prerequisite: graduate classification in agriculture or related natural resource subject matter areas.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

REWM5750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 4750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed ECOL 5400.

Prerequisite: LIFE 3410 or equivalent.

RNEW5500 - Stable Isotope Ecology

Credits: 3

Application of stable isotope measurements to organismal and systems ecology. Lectures address the theory underlying the use of stable isotopes at natural abundance levels as tracers and integrators of important physiological and ecological processes. Laboratory exercises provide hands on experience with stable isotope ratio measurements.

Prerequisite: graduate classification in a natural science or agriculture discipline.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units

representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

Quantitative & Qualitative Methods:

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

OR

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGEC 4550.

Prerequisite: QA/Q.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

OR

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

GIST5100 - Foundations of Geospatial Information Science and Technology

Credits: 3

This online and on-campus graduate-level course provides an introduction to key concepts in geospatial information science and technology (GIST) including spatial data structures, coordinate systems, cartographic principles, spatial analysis, modeling, spatial cognition, and applications of GIS in a multidisciplinary context. Lecture and project-based (poster).

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

OR

- RNEW 5130

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Additional Program Requirements:

1. **Statement of Purpose:** Prior to or concurrent with declaring an Environment and Natural Resources (ENR) graduate major or minor, students must submit a 1-page Statement of Purpose describing how the Haub School's program aligns with their academic and professional goals.
2. **Cumulative Learning Analysis:** Immediately prior to graduation, students must submit a 1-2 page Cumulative Learning Analysis, analyzing their learning as a whole throughout their graduate work, informed by their coursework, research and co-curricular activities.
3. **Program Completion Letter:** Upon completion of ENR coursework, students will arrange a meeting with their advisor to ensure all requirements have been met. Once this step is complete, their advisor will submit a signed Program Completion Letter to the registrar, indicating the student should receive the ENR concurrent degree.

Environment & Natural Resources, J.D./M.A.

Through this concurrent degree program law students can add a master's degree in ENR. Students develop experience in interdisciplinary content, analytical tools, and collaborative problem-solving skills for addressing complex natural resource issues.

Juris Doctor

The Juris Doctor requirements are found here: [Juris Doctor](#)

Juris Doctor/MA in Environment & Natural Resources

Here you will find information on the Juris Doctor/Master of Arts in Environment and Natural Resources

Program Overview

Applicants to the J.D./M.A. in Environment & Natural Resources (ENR) must apply to both the College of Law and the Haub School. Admission to the joint degree program is contingent on acceptance to the College of Law. Current application requirements are available online.

Students working toward the J.D./M.A. in ENR consult a Haub School advisor to design a program of study tailored to meet their educational goals.

Students must earn a minimum of 30 credits for the master's degree:

9 Credit Hours in ENR Core Courses:

Foundations of ENRS

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR Policy in Practice

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

Plan B Writing Seminar (1 credit)

Typically completed in the second semester of the second year. Students must select an advisor-approved ENR 5890 section to meet this requirement.

ENR5890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 4890.

Prerequisite: ENR 5100 or consent of instructor.

Plan B Thesis: JD/MA (2 credits)

ENR5961 - Plan B Projects

Credits: 2

Max Credit (Max. 6)

Limited to students enrolled in a Plan B graduate program. Students will be involved in non-course scholarly activities in support of the Plan B project.

Restricted Restricted to ENR graduate students.

9 Credit Hours in ENR Electives Courses:

Students must take a minimum of 9 credits outside the College of Law. Courses familiarize students with non-law ENR perspectives and approaches. Students work with a Haub School advisor to select courses from an approved list.

(Choose three+ courses in consultation with Haub School advisor):

Humanities

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.

Dual Listed AMST 4030.

Prerequisite: graduate status.

- ANTH 5620

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

OR

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

Environmental Science

BOT5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.

Dual Listed BOT 4280.

Prerequisite: graduate standing.

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

OR

PATB5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in

animals, plants, and humans.

Cross Listed ENR 5240

Dual Listed PATB 4240

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

OR

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .

Prerequisite: Graduate standing.

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

PLNT5120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 4120

Prerequisite: 8 hours of LIFE and/or CHEM

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

RNEW5400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness as well as management strategies for invasive plant species.

Cross Listed PLNT 5400.

Dual Listed RNEW 4400.

Prerequisite: LIFE 3400.

RNEW5500 - Stable Isotope Ecology

Credits: 3

Application of stable isotope measurements to organismal and systems ecology. Lectures address the theory underlying the use of stable isotopes at natural abundance levels as tracers and integrators of important physiological and

ecological processes. Laboratory exercises provide hands on experience with stable isotope ratio measurements.

Prerequisite: graduate classification in a natural science or agriculture discipline.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

Social Science

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGECE 1020 or equivalent; QB course, WB course; senior standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGECE 4660.

Prerequisite: AGECE 1020/ ECON 1020 or SOC 2090 and junior standing.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

OR

AGEC5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 5450.

Dual Listed AGEC 4450.

Prerequisite: completion of USP O/COM2 requirement; junior standing or consent of instructor.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

OR

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGECE 4550.

Prerequisite: QA/Q.

ENR5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ECOL 5050/GEOG 5050.

Prerequisite: graduate standing.

OR

ECOL5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ENR 5050/GEOG 5050.

Prerequisite: graduate standing.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

OR

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

POLS5051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

GIST5211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 4211.

Former Course Number [BOT 5211; GEOG 5211]

Prerequisite: GIST 5111 or GIST 5130.

INST5445 - Drug War Geopolitics in the Americas

Credits: 3

This course examines illegal drug commodity chains and international efforts to police the drug trade in the Americas. It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed POLS 5445.

Dual Listed INST 4445.

Prerequisite: graduate standing.

OR

POLS5445 - Drug War Geopolitics in the Americas

It approaches the drug war through a "critical geopolitics" framework, also covering broader themes such as international politics, livelihoods, development, environmental justice, the global economy, race-based discrimination, public health, and resistance movements.

Cross Listed INST 5445.

Dual Listed POLS 4445.

Prerequisite: 9 hours of international studies or social science coursework

INST5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 5455.

Dual Listed INST 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

OR

POLS5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

INST5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed POLS 4475 /POLS 5475
INST 4475 /5475

GEOG 4475

Dual Listed POLS 4475/5475

INST 4475/5475

GEOG 4475

Prerequisite: graduate standing.

OR

POLS5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 5475.

Dual Listed POLS 4475.

Prerequisite: graduate standing.

POLS5710 - Topics In Political Science

Credits: 1-3

Max Credit (Max. 9)

Intended to accommodate various specialized subjects not offered as regular courses.

Prerequisite: graduate standing.

REWM5000 - Range Resource Management

Credits: 3

Basic concepts and theories of rangeland resource management, trends in rangeland classification, grazing management and improvement practices.

Prerequisite: graduate classification in agriculture or related natural resource subject matter areas.

REWM5103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Preparation of public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 4103.

Prerequisite: REWM 2000 and CS course.

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

12 Credit Hours in Environmental and Natural Resources Law Specialization Courses:

Students will take 12 credits to gain depth in ENR law, selected from the following options in consultation with Haub School advisor. Special approval may be granted for special topics courses.

LAW6510 - Administrative Law

Credits: 3

Max Credit (Max. 3)

A review of administrative law practice and procedure, primarily at the federal level. The course begins with materials on the nature and function of administrative agencies. Agency rulemaking power, emphasizing federal and state Administrative Procedure Act (APA) requirements. Considers the adjudicative powers of administrative agencies, including an agency's obligation to afford persons due process of law. Finally, the course examines judicial review of administrative agency decisions.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6700 - Indian Law

Credits: 3

Max Credit (Max. 3)

Surveys the law that applies to Native Americans and tribal governments. Deals primarily with federal law because of the unique relationship between the federal government and tribes, which are sovereign entities, and because federal law controls most Native American activities. The main issues are jurisdictional; that is, they concern the allocation of legislative (or regulatory) and judicial (both civil and criminal) jurisdiction among federal, tribal, and state governments.

LAW6790 - Oil and Gas

Credits: 3

Max Credit (Max. 3)

A study of the law regarding private property interests in oil and gas. Subjects include the acquisition, transfer, lease, and assignment of oil and gas interests; rules and contracts governing the relationships among surface owners, oil and gas lessors, oil and gas lessees, and neighboring owners; and government regulation.

LAW6800 - Public Lands

Credits: 3

Max Credit (Max. 3)

Examines the law governing management of the federal public lands/national parks, national forests, wildlife refuges, BLM lands, etc. Among other laws, we study NEPA, General Mining Law of 1872, Mineral Leasing Act of 1920, National Forest Management Act of 1976, Taylor Grazing Act, Federal Land Policy and Management Act, Endangered Species Act, and Wilderness Act. In addition to examining Congress' prescriptions for public land management and the constraints it has imposed on land managers, the course also explores how the public and politics influence public land policy and decision making.

LAW6860 - Water Law and Policy

Credits: 3

Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

LAW6890 - Land Use Law

Credits: 3

Max Credit (Max. 3)

Deals primarily with public methods of making decisions concerning the use and development of land. Land use decisions range from the issuance of building permits or variances to zoning to long-range planning. Examines tensions between private and public interests (private landowners, community residents, developers, business persons, and city/county officials) over the use of private property, the legal principles that inform the possible resolutions of these

tensions and define governmental authority, and the implications of land use regulation for the exercise of other rights, such as free speech.

LAW6910 - Seminar

Credits: 1-2

LAW6991 - Advanced Water Law and Policy

Credits: 3

Research projects within the fields of domestic, international, or comparative water law and policy. Focuses on the elaborate body of laws governing allocation and management of water in and around the Colorado River Basin - i. e. , the "Law of the River. " Explore the Law of the River's historical evolution and current composition as well as cutting-edge policy issues currently facing it. Writing-intensive format satisfies the College of Law's Advanced Writing Requirement.

Prerequisite: C or better in LAW 6860.

LAW6992 - Advanced Oil and Gas Law

Credits: 3

Simulate the work of an oil and gas attorney. Explore oil and gas financing arrangements including the farmout, JOA, and productions sharing agreements, drilling and service agreements, downstream marketing and purchase agreements, conveyances of oil and gas real property interests, the purchase and sale of petroleum properties, oil and gas development on federal lands, and title examination.

Prerequisite: C or better in LAW 6790.

LAW6915 - Topics in Law

Credits: 1-3

Specific subject matter varies each year and between each section because the course is normally taught by a visiting faculty or by a law faculty member or interdisciplinary team who wish to present a special topic not able to be offered on a regular basis. Students should check class schedules for current offerings each semester.

Prerequisite: completion of first year of law school; consent of instructor required for non-law students.

- LAW 6500 - Agricultural Law

Plan B Project Research

Students must complete a cumulative work of scholarship known as the Plan B project. The Plan B offers more flexibility than a traditional thesis in content and format. Students will be required to choose a Haub School faculty committee chair and at least two additional committee members. Committee composition is subject to approval by the program chair and Dean of the Haub School. A public oral defense of the project is required. All members of the student's committee must be present at the defense. The student's committee has to give final approval of the student's Plan B thesis and defense via a report of final examination.

Environment, Natural Resources & Society, M.S.

This master's degree program develops collaborative, interdisciplinary leaders in environmental fields such as natural resource management, planning, and administration across nonprofit, for profit, government, and academic settings.

Program Overview

Students earning the master of science in Environment, Natural Resources & Society (ENRS) will consult a Haub School advisor to design a program of study tailored to meet their educational goals. Students take courses and complete a Plan A research thesis or Plan B research project focusing on issues pertinent to environmental or natural resources management or policy.

Graduates of this program will:

- develop an interdisciplinary and collaborative mindset;
- experience critical engagement with community stakeholders and decision-makers;
- excel in team-based collaborative environments;
- gain experience in relevant and emergent research methods and practices;
- demonstrate excellent written, oral, and digital communication across a range of audiences and purposes, including developing expertise in public engagement;
- apply conceptual, critical, and creative thought to relevant environmental and natural resource issues; and,
- analyze and evaluate complex systems that contribute to inclusive, sound, and well-informed decisions.

Applicants to the M.S. in Environment, Natural Resources & Society must apply directly to the University of Wyoming. Applications for graduate assistantships should be directed to the Haub School. Current application requirements are available online.

Students must earn a minimum of 32 credit hours for the Plan A thesis option and 30 credit hours for the Plan B option:

11 Credit Hours in ENRS Core Courses:

ENR5001 - Orientation to ENRS

Credits: 2

ENR 5001 aims to develop program culture and introduce resources and norms, provide common frames for understanding ENRS challenges, develop leadership and teamwork skills, and identify and explore some of the ENRS challenges in Wyoming.

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

ENR5921 - Collaborative Practicum

Credits: 1-3

Max Credit (Max. 3)

Under the guidance and instruction of ENR faculty, students will have the opportunity to apply the skills and information gained in ENR 5910 to real-world situations. Students will gain practical experience in collaboration, facilitative leadership, and conflict resolution and to develop and refine skills in one or more of the learning objectives and expected competencies.

Prerequisite: ENR 5910.

Plan A Thesis Credit (4 credit hours):

ENR5960 - Thesis Research

Credits: 1-12

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

Or Plan B Thesis Credit (2 credit hours):

ENR5961 - Plan B Projects

Credits: 2

Max Credit (Max. 6)

Limited to students enrolled in a Plan B graduate program. Students will be involved in non-course scholarly activities in support of the Plan B project.

Restricted Restricted to ENR graduate students.

17 Credit Hours in ENRS Electives:

Students will consult with their Haub School advisor to choose electives that support their plan of study and Plan A or Plan B thesis. Choose courses from any of the following categories:

Social & Cultural Sciences

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 4660.

Prerequisite: AGEC 1020/ ECON 1020 or SOC 2090 and junior standing.

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.

Dual Listed AMST 4030.

Prerequisite: graduate status.

ANTH5260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 4260.

Prerequisite: ANTH 1100 or ANTH 1200.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on

cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR5910 - Collaborative Practice Methods

Credits: 3

This course introduces students to the principles, concepts, and methods of collaborative decision making as it is practiced in a variety of settings. Students acquire collaborative skills and competencies in collaborative processes such as working in teams and facilitating groups, negotiating and managing conflict, conducting situation assessments and issue analyses, and developing methods and standards for integrating technical information in collaborative decision making. The course will involve extensive use of cases, role-plays, and related participative activities.

Prerequisite: Admission by consent of instructor.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

OR

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

OR

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOG 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG5570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings

in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 4570.

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 4590.

Former Course Number [5574]

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

NASC5650 - Place-Based Learning

Credits: 3

Place-based learning is explored and related to cognitive development, assessment, and education for a democracy. The focus is on science and mathematics and how to use "place" to provide meaningful learning experiences for students while making contributions to the community. Students develop a local place-based project.

REWM5103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Preparation of public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 4103.

Prerequisite: REWM 2000 and CS course.

Law & Policy

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR5890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 4890.

Prerequisite: ENR 5100 or consent of instructor.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

OR

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

OR

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

INST5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 5455.

Dual Listed INST 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

OR

POLS5455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 5455.

Dual Listed POLS 4455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

LAW6660 - Environmental Law

Credits: 3

Max Credit (Max. 3)

Provides an overview of the broad field of environmental law, with an emphasis on the major federal environmental statutes such as the National Environmental Policy Act, the Endangered Species Act, the Clean Air and Clean Water Acts, and statutes regulating both hazardous wastes and toxic chemicals in commerce. In considering these various statutes, we consider both their substantive requirements and their conceptual approaches to environmental protection. Touches briefly on issues such as the role of states in implementing these national laws, various approaches to enforcement of these laws, common-law doctrines relevant to environmental protection, and economic aspects of environmental law.

LAW6700 - Indian Law

Credits: 3
Max Credit (Max. 3)

Surveys the law that applies to Native Americans and tribal governments. Deals primarily with federal law because of the unique relationship between the federal government and tribes, which are sovereign entities, and because federal law controls most Native American activities. The main issues are jurisdictional; that is, they concern the allocation of legislative (or regulatory) and judicial (both civil and criminal) jurisdiction among federal, tribal, and state governments.

LAW6800 - Public Lands

Credits: 3
Max Credit (Max. 3)

Examines the law governing management of the federal public lands/national parks, national forests, wildlife refuges, BLM lands, etc. Among other laws, we study NEPA, General Mining Law of 1872, Mineral Leasing Act of 1920, National Forest Management Act of 1976, Taylor Grazing Act, Federal Land Policy and Management Act, Endangered Species Act, and Wilderness Act. In addition to examining Congress' prescriptions for public land management and the constraints it has imposed on land managers, the course also explores how the public and politics influence public land policy and decision making.

LAW6860 - Water Law and Policy

Credits: 3
Max Credit (Max. 3)

A study of the allocation and reallocation of water resources with particular emphasis on prior appropriation systems in the Western United States. Riparian systems and groundwater management are also addressed, along with interstate conflicts, federal water rights, federal-state relations, and the effect of environmental laws on water allocation and the exercise of water rights.

LAW6865 - Natural Resources Law

Credits: 3
Max Credit (Max. 3)

Comprehensive view of the general law governing natural and environmental resources. Students will learn to understand how our legal system has organized the various problems of allocation, use rights, duties and limitations, and governance, in the context of establishing rules governing human use of the earth's natural endowment.

Prerequisite: completion of first year of law school.

POLS5051 - Environmental Politics

Credits: 3
Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051/ ENR 4051/GEOG 4051/REWM 4051.

Dual Listed POLS 4051.

Prerequisite: POLS 1000.

POLS5475 - Politics of Natural Resources in Latin America

Credits: 3

This course examines major trends in resource extraction, management, and conservation in Latin America, and the politics surrounding those trends, from theoretical, social, political, economic, and ecological perspectives and through a variety of grounded case studies. The theories and concepts we study are applicable to resource politics beyond Latin America.

Cross Listed INST 5475.

Dual Listed POLS 4475.

Prerequisite: graduate standing.

Natural & Physical Sciences

BOT5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.

Dual Listed BOT 4280.

Prerequisite: graduate standing.

BOT5700 - Vegetation Ecology

Credits: 4

The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

AND

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

OR

REWM5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 5285.

Dual Listed REWM 4285.

Prerequisite: graduate standing and University Studies QA.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

OR

PATB5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed ENR 5240

Dual Listed PATB 4240

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .

Prerequisite: Graduate standing.

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

PLNT5120 - Organic Food Production

Credits: 3

A complete review of the federal organic production guidelines, methods and applications for organic production facilities, alternative marketing principles, concepts of organic fertilizer use, organic pest control and concepts for using environmentally friendly methods to reduce chemical, petroleum and synthetic inputs for more sustainable crop and livestock agricultural systems.

Dual Listed PLNT 4120

Prerequisite: 8 hours of LIFE and/or CHEM

REWM5000 - Range Resource Management

Credits: 3

Basic concepts and theories of rangeland resource management, trends in rangeland classification, grazing management and improvement practices.

Prerequisite: graduate classification in agriculture or related natural resource subject matter areas.

REWM5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed ECOL 5400.

Prerequisite: LIFE 3410 or equivalent.

REWM5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed ECOL 5580.

Dual Listed REWM 4580.

REWM5710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing and mineral and natural gas extraction on surface water and ground water quality. Emphasis is placed on water quality modeling and management.

Dual Listed REWM 4710.

Prerequisite: CHEM 1000.

REWM5750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 4750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

RNEW5500 - Stable Isotope Ecology

Credits: 3

Application of stable isotope measurements to organismal and systems ecology. Lectures address the theory underlying the use of stable isotopes at natural abundance levels as tracers and integrators of important physiological and ecological processes. Laboratory exercises provide hands on experience with stable isotope ratio measurements.

Prerequisite: graduate classification in a natural science or agriculture discipline.

SOIL5150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forest and ranges and soil properties, such as nutrient availability and water relations, which influence plant growth.

Dual Listed SOIL 4150.

Prerequisite: SOIL 2010 and LIFE 2020.

Communication

ENR5270 - Writing and Reviewing Science

Credits: 4

This course will help students prepare a scientific manuscript for submission to a peer-reviewed journal; in so doing, students will become more effective, efficient, and confident writers. Students will learn principles of effective writing, how to prepare a manuscript for publication, navigate the peer-review process, and write a constructive review.

Cross Listed ZOO 5270.

Prerequisite: Students must have graduate standing and an analyzed dataset on which the manuscript will be based. Students must have approval from their advisors and key collaborators before embarking on this journey. Students are also encouraged to maintain this approval throughout the semester.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

OR

AGEC5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 5450.

Dual Listed AGEC 4450.

Prerequisite: completion of USP O/COM2 requirement; junior standing or consent of instructor.

ENR5870 - Graduate Seminar

Credits: 1

Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Prerequisite: graduate standing.

Quantitative & Qualitative Methods

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

OR

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGEC 4550.

Prerequisite: QA/Q.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

OR

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

GIST5050 - Basics of Spatial Data Science

Credits: 3

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e.g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050] **Restricted** Grad students only

GIST5100 - Foundations of Geospatial Information Science and Technology

Credits: 3

This online and on-campus graduate-level course provides an introduction to key concepts in geospatial information science and technology (GIST) including spatial data structures, coordinate systems, cartographic principles, spatial analysis, modeling, spatial cognition, and applications of GIS in a multidisciplinary context. Lecture and project-based (poster).

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

OR

- RNEW 5130

STAT5050 - Statistical Methods for the Biological Science

Credits: 3

General statistical analyses and their application to the biological and behavioral sciences. Analysis of variance, regression and correlation methods are studied from a data analytic perspective, emphasizing the conceptual understanding of where and when these techniques should be used and the interpretation of their results. Available computer programs will be utilized. Credit cannot be earned in more than one of the following courses: STAT 3050, 5050, 5060, STAT 5070.

Cross Listed ZOO 5050.

Prerequisite: one course in statistics (all introductory courses except 2000).

Plan A or Plan B Project Research:

Both Plan A and Plan B theses lead to original thought, synthesis, or integration of relevant elements of scholarship on issues pertinent to environmental and natural resources management or policy. The Plan A thesis will incorporate original research and data analysis on an applied environmental or natural resource management problem. The Plan B thesis project is somewhat more flexible and may take a variety of forms. Students will consult their major advisor and graduate committee on the form and content of the Plan A and Plan B thesis.

Other Programs

UW Credit Options for NOLS

UW recognizes the following credit options for taking a NOLS course:

Short Courses (less than 14 days)

Students may be eligible to complete 2 Hours of UW credits in the following course(s).

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

Quarter Length Courses (14-65 days)

Students may be eligible to complete up to 9 hours in the following courses.

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

Semester & Year-long Courses (more than 65 days)

Students may be eligible to complete up to 12-24 hours in the following courses.

For year-long courses, independent study credits are also available.

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-

awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit 12

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

Note:

**There are additional course requirements for 4000-level NOLS credit. Syllabi and course expectations will be shared upon enrollment.

***For courses with a Wilderness First Responder component only.

Information Literacy

Coe Library 304

Phone: (307) 766-5313

The University Libraries offer research assistance and information literacy instruction to students and faculty. Librarians provide customized class orientations to information sources in every discipline, as well as individual research consultations. Students needing research help may call, text, email, instant message, or visit any library branch.

The University of Wyoming addresses information competencies utilizing the Framework for Information Literacy for Higher Education as approved by the Association of College & Research Libraries (ACRL) and endorsed by the American Association for Higher Education. Librarians collaborate with teaching faculty in addressing these information competencies in course assignments or lectures. Information literacy is the ability to recognize and define the need for information, then locate, evaluate, and use that information effectively and ethically.

Information literacy learning outcomes are included in University Studies First Year Seminar (FYS) and Communication (COM) courses and are similar to the critical thinking learning outcomes in the H, PN, and V courses.

The Libraries also offer credit courses to help students improve research skills and to meet the Communications 2 requirement of the University Studies Program.

Learning Outcomes

We expect that students completing LBRY courses will become knowledgeable consumers of information through learning how to:

1. Recognize and define the need for information;
2. Efficiently locate information in the library or on the Internet;
3. Evaluate the quality of information;
4. Utilize information effectively, ethically, and legally.

Librarians

TAMSEN EMERSON HERT, B.A. Colorado State University 1979; M.L.S. Emporia State University 1984; M.A. 1988; Librarian, 2014, 1986.

DAVID D. KRUGER, B.S. South Dakota State University 1991; B.S.Ed. Minot State University 1994; M.A. Kansas State University 1996; M.L.S. University of Missouri at Columbia 1998; Librarian 2016, 1998.

LAWRENCE O. SCHMIDT, B.S. Montana State University 1987; M.S. 1995; M.L.S. Emporia State University 2002; Librarian 2020, 2008.

Associate Librarians

KAIJSA J. CALKINS, B.A. University of Washington, Bothell 2001, M.L.I.S. University of Washington, Seattle 2004; Associate Librarian 2012, 2006.

JANICE GROVER, B.A. University of Wyoming 2005; M.L.S. Emporia State University 2009; M.A. University of Wyoming 2017; Associate Librarian 2021.

Assistant Librarians

SAMANTHA PETER, B.A. University of Wyoming 2016; M.S.I.S. University of Texas at Austin 2018; Assistant Librarian 2018.

Geospatial Information Science and Technology

Wyoming Geographic Information Science Center
337 Agriculture C Building

Ramesh Sivanpillai, Program Director
(307)766-2532
Web site: www.uwyo.edu/WyGISC

The Wyoming Geographic Information Science Center (WyGISC) offers undergraduate and graduate courses, degrees, and certificates in Geospatial Information Science and Technology under the GIST prefix. These provide fundamental geospatial science education to undergraduate and graduate students from across disciplines at UW and are appropriate for science and non-science majors. They cover core and advanced geospatial concepts and subdisciplines including Geographic Information Systems (GIS), remote sensing, spatial data analysis, spatial visualization, spatial databases, cartography, programming, and other topics.

Faculty:

SHANNON E. ALBEKE, B.A. University of Colorado, Boulder 1997; Ph.D. University of Georgia 2010. Associate Research Scientist 2019, 2010.

KENNETH L. DRIESE, B.S. University of Virginia 1981; M.S. University of Wyoming 1992; Ph.D. 2004; Senior Lecturer in Geospatial Information Science and Technology 2019, 2002.

JEFFREY D. HAMERLINCK, B.S. University of North Dakota 1988; M.P. University of Wyoming 1992; Ph.D. University of Colorado - Boulder 2011; Senior Research Scientist 2004.

PADDINGTON HODZA, BSC, University of Zimbabwe, 1994; MSC, University of Zimbabwe, 1998; Ph.D. West Virginia University, 2007; Associate Research Scientist 2016, 2013.

AUSTIN MADSON, B.A. University of California, Los Angeles 2012; M.A. 2015; Ph.D. 2020; Assistant Professor of Geospatial Information Science and Technology 2021.

RAMESH SIVANPILLAI, B.Sc. Bharathiar University 1987; M.Sc. Cochin University of Science and Technology 1990; M.Phil. Bharathiar University 1992; M.S. University of Wisconsin, Green Bay 1995; Ph.D. Texas A&M University 2002; Senior Research Scientist 2012.

CHEN XU, B.S. Sichuan University, China 1999; M.S. Sam Houston State University 2005; Ph.D. Texas A&M University 2010; Associate Professor of Geospatial Information Science and Technology 2019.

DI YANG, B.S. Liaoning University of Petroleum and Chemical Technology 2011; M.S. Texas A&M 2013; Ph.D. University of Florida 2019; Assistant Professor of Geospatial Information Science and Technology 2020.

Geographic Information Science and Technology Degrees and Certificates

GIST degrees and certificates include a Bachelor of Science Degree in GIST (to launch Fall 2022 contingent on demonstration of student demand), undergraduate certificates in GIST and Remote Sensing, each of which can contribute to the B.S. degree; a Research Master's Degree (with thesis), an online Professional Master's Degree (no thesis), and three online graduate certificates, in GIST, Remote Sensing, and Unmanned Aerial Systems (UAS, a.k.a. drones).

Drawing on expertise from geography, computer science, mathematics, statistics, psychology, design, and others, geospatial information science refers to the multi-disciplinary research enterprise that addresses the nature of geospatial information and the application of geospatial technologies to scientific questions. Geospatial information technology is a specialized set of information and communication technologies that support the acquisition, management, analysis, and visualization of geo-referenced data. Examples include: geographic information systems; global navigation satellite systems; and satellite, airborne, drone-based, shipboard and ground-based remote sensing and image processing systems.

Successful students in Geospatial Information Science and Technology (GIST) combine proficiency in spatial thinking and geospatial data science analysis with fluency in geographic information systems, remote sensing, data analytics, and visualization. As professionals, graduates apply their knowledge and skills in a wide range of fields, from environmental management and public health, to civil engineering and urban planning, to economic analysis and marketing.

Any courses listed in degree plans that are not described in the GIST course list are under development and will be added in future catalogs as they are approved.

Undergraduate Certificates

Undergraduate certificates in GIS and Remote Sensing provide a means of adding credentials to your degree that reflect expertise in geospatial science.

Graduate Certificates

Graduate certificates provide a means for students and professionals to earn marketable credentials over the course of 1-2 semesters. These certificates require a combination of core and elective courses as outlined below and will be delivered primarily online.

Graduate

Geospatial Information Science with Thesis, Research M.S.

The Research Master of Science degree (with thesis) is delivered mainly on the UW campus but with many online courses. Students work with a graduate advisor who will guide their thesis research and chair their graduate committee. This degree requires a combination of core and elective courses that can be completed in 2 years.

Program Specific Admission Requirements

In addition to University of Wyoming graduate admission requirements, prospective students for the Research Master of Science Degree are required to submit a statement of purpose describing their background and interest in the degree, a CV or resume, and two letters of recommendation addressing their potential for success in this master's program. Students are encouraged to initiate correspondence with a faculty member who shares their research interests before applying.

Semester 1

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5200 - Geographic Visualization

Credits: 3

This online lecture and lab course emphasizes advanced theory and hands-on practice for creating applying interactive, dynamic, and multidimensional graphical representations of geographic data. Students will be introduced to web programming to allow them to develop mobile and online visualization tools.

GIST5050 - Basics of Spatial Data Science

Credits: 3

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e.g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050] **Restricted** Grad students only

Semester 2

- GIST Elective Credits 6

GIST5220 - Spatial Modeling & Data Analysis

Credits: 3

Using raster modeling, hybrid vector/raster approaches, and geo-computational techniques, this course will explore a variety of modeling concepts and related issues. This course will examine a variety of both practical and theoretical issues, with special emphasis on understanding spatial questions that are not readily addressed by basic GIS. We will also consider issues related to error, resolution, scale, and a variety of other factors.

Former Course Number GEOG 5220

Semester 3

- GIST Electives Credits: 9

Semester 4

GIST5002 - Geospatial Forum

Credits: 1

Students attend a geospatial sciences speaker series and contribute by presenting their proposed or completed research to faculty and other students in a professional manner analogous to presenting scientific research at professional meetings.

- GIST 5960 - Thesis Research Credits: 4-12

Geospatial Information Science without Thesis, Professional M.S.

The Professional Master of Science Degree (no thesis) is delivered online. It provides a pathway for traditional students and professionals to earn a graduate credential in 2 years, but students may choose to take longer depending on their professional or personal time constraints.

Program Specific Admission Requirements

In addition to University of Wyoming graduate admission requirements, prospective students for the Professional Master of Science Degree are required to submit a statement of purpose describing their background and interest in the degree and a CV or resume.

Course Sequence

Semester 1

GIST5050 - Basics of Spatial Data Science

Credits: 3

Centers on the role of information technology in support of scientific research. Through integration of multiple

software packages (e.g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050] **Restricted** Grad students only

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5200 - Geographic Visualization

Credits: 3

This online lecture and lab course emphasizes advanced theory and hands-on practice for creating applying interactive, dynamic, and multidimensional graphical representations of geographic data. Students will be introduced to web programming to allow them to develop mobile and online visualization tools.

GIST5280 - Navigating GIST Professions

Credits: 1

An introduction to work in the geospatial profession for online GIST master's program students. Focus is on workplace, management and occupation-specific competencies across and within specific domain application areas. Topics include evaluation and appropriate use of technology and data, developing career pathway options, the role of professional certification, and the value of continuing education and professional network connections.

Semester 2

- GIST Electives Credits: 6

GIST5220 - Spatial Modeling & Data Analysis

Credits: 3

Using raster modeling, hybrid vector/raster approaches, and geo-computational techniques, this course will explore a variety of modeling concepts and related issues. This course will examine a variety of both practical and theoretical issues, with special emphasis on understanding spatial questions that are not readily addressed by basic GIS. We will also consider issues related to error, resolution, scale, and a variety of other factors.

Former Course Number GEOG 5220

Semester 3

- GIST Electives Credits: 3

GIST5300 - Web Mapping and Internet GIS

Credits: 3

With a combination of lecture-based information and hands-on lab exercises, students learn to design, develop, and implement web- and internet-based GIS and mapping applications. Commonly used web and internet GIS tools are used, and students learn to assess the quality, utility, and legal aspects of web GIS products.

GIST5350 - Enterprise GIS

Credits: 3

This course provides a comprehensive overview of the design, development, and management of enterprise GIS platforms. In addition to learning about enterprise architecture, students set up cloud services for managing, sharing, and processing spatial data using proprietary and open source tools.

GIST5002 - Geospatial Forum

Credits: 1

Students attend a geospatial sciences speaker series and contribute by presenting their proposed or completed research to faculty and other students in a professional manner analogous to presenting scientific research at professional meetings.

Semester 4

- GIST 5780 Credits: 3

GIST5002 - Geospatial Forum

Credits: 1

Students attend a geospatial sciences speaker series and contribute by presenting their proposed or completed research to faculty and other students in a professional manner analogous to presenting scientific research at professional meetings.

Certificate

Geospatial Information Science and Technology Graduate Certificate

This 15-credit graduate certificate gives you a rigorous academic credential in GIS that includes exposure to fundamental and advanced concepts and the chance to pursue your own interests with generous elective opportunities.

Core (9 Credits)

GIST5050 - Basics of Spatial Data Science

Credits: 3

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e.g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050]Restricted Grad students only

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5220 - Spatial Modeling & Data Analysis

Credits: 3

Using raster modeling, hybrid vector/raster approaches, and geo-computational techniques, this course will explore a variety of modeling concepts and related issues. This course will examine a variety of both practical and theoretical issues, with special emphasis on understanding spatial questions that are not readily addressed by basic GIS. We will also consider issues related to error, resolution, scale, and a variety of other factors.

Former Course Number GEOG 5220

Electives (6 Credits)

- Choose from other GIST courses (see M.S. courses) or interdisciplinary courses

Total: 15 Credits

Remote Sensing Graduate Certificate

Remote sensing scientists use data collected by satellites, aircraft, and Unmanned Aerial Systems (drones) to address questions important for agriculture, natural resource and wildlife management, global change science, energy development and other applications. From Google Earth to complex spectral analysis, remote sensing is playing an increasingly important role in many fields. This 15-credit online graduate certificate teaches you the fundamentals of remote sensing and digital image processing, and the freedom to use elective courses to pursue your own interests in related topics.

Core (6 Credits)

- BOT 5111 - Introduction to Remote Sensing of the Environment Credits: 3
OR

GIST5111 - Introduction to Remote Sensing

Credits: 3

Combined online lecture and laboratory course introduces students to fundamental principles and techniques of remote sensing and the application of digital satellite and aerial imagery to the study of the earth's surface. Includes hands-on application of digital imaging processing techniques discussed in lecture.

Former Course Number [BOT 5111; GEOG 5111]

GIST5120 - Integration of RS and GIS Data

Credits: 3

Many geospatial analyses involve combining remotely sensed (RS) data and products with other geospatial data stored in GIS. This 3-credit online course will overview the topics pertaining to the integration of RS data in raster format with GIS data stored in vector format.

Prerequisite: graduate standing.

Electives (9 Credits)

- Choose from other remote sensing and UAS courses or interdisciplinary RS courses

Total: 15 Credits

Undergraduate Certificate in GIS

Undergraduate certificate in GIS provides a means of adding credentials to your degree that reflect expertise in geospatial science.

Core (10 credits)

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

Undergraduate Certificate in Remote Sensing

Undergraduate certificate in Remote Sensing provides a means of adding credentials to your degree that reflect expertise in geospatial science.

Undergraduate Certificate in Remote Sensing Core (3 credits)

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

Electives (6 credits)

Select any remote sensing or UAS courses (6 credits)

Total: (9 credits)

Unmanned Aerial Systems Graduate Certificate

In this certificate program, you will learn to safely use Unmanned Aerial Systems (drones) and to collect and process geospatial data acquired by them. Demand for professionals trained to operate drones and process drone imagery is growing rapidly in agriculture, natural resource management, construction, energy, transportation, business, and many other fields. A significant aspect of this 11-credit online graduate certificate (with a 2-credit, field-based flight school) is to prepare you to become an FAA certified pilot and to use industry-standard image processing techniques.

Core (8 Credits)

GIST5410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 4410.

GIST5420 - UAS Mission Planning

Credits: 1

This 1-credit online course provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 4420.

GIST5430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 4430.

GIST5440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 4440.

GIST5450 - UAS Photogrammetry and Imagery Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery data acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 4450.

Prerequisite: graduate standing or approval from the instructor.

Electives (3 Credits)

(may be optional for some graduate students, depending on their program of study)

- Choose from remote sensing courses or interdisciplinary UAS applications courses

Total: 8-11 Credits

School of Energy Resources

301 Energy Innovation Center

Phone: (307)766-6879 FAX (307)766-6701

Holly Krutka, Executive Director

Website: www.uwyo.edu/ser

The School of Energy Resources facilitates interdisciplinary academic and research programs in engineering and science, economics, and environment and natural resources policy to address critical energy-related issues faced by our society.

Our mission is to leverage and add to the already significant energy-related talent and resources in the University of Wyoming colleges to develop human resources, know-how, and technical solutions to ensure a secure and sustainable energy future for the state, region, and nation.

The University of Wyoming (UW) School of Energy Resources (SER) was created in 2006 by the Wyoming Legislature through State Statute 21-17-117. Our goal is to enhance the university's energy-related education, research, and engagement. SER directs and funds cutting-edge energy research and technology development, which integrates with the formulation and conduct of academic programs at UW and bridges academics and industry through targeted engagement efforts. The bridges formed between academics and industry ensure programs are relevant, current, and deliver impact and high value to stakeholders and the state. Since its inception in 2006, SER has maintained flexibility in its focus and structure to meet the changing needs of Wyoming's energy industries and the state's economy which is now more critical than ever.

Professors:

TIMOTHY J. CONSIDINE, B.A. Loyola University 1975; M.S. Purdue University 1977; Ph.D. Cornell University 1981; SER Professor of Energy Economics 2008.

CRAIG C. DOUGLAS, A.B. Chicago University 1977; M.S. Yale University 1978; M.Phil. 1980; Ph.D. 1982; SER Professor of Mathematics 2008.

MAOHONG FAN, B.S. Wuhan University of Science and Engineering, 1984; M.S. Beijing University of Science and Technology, 1992; Ph.D. Chinese Academy of Sciences, 1997; Ph.D. Iowa State University, 2000; Ph.D. Osaka University 2003; SER Professor of Chemical Engineering 2015, 2008.

JOHN P. KASZUBA, B.S. Beloit College, 1982; M.S. Virginia Polytechnic Institute & State University 1986; Ph.D. Colorado School of Mines, 1997; SER Professor Geology & Geophysics, 2019, 2008.

SUBHASHIS MALLICK, B.Sc. Indian Institute of Technology 1976; M.Sc. 1978; Ph.D. University of Hawaii 1987; SER Professor of Geology & Geophysics 2008.

BRUCE A. PARKINSON, B.S. Iowa State University 1972; Ph.D. California Institute of Technology 1977; SER Professor of Chemistry 2008.

TARA RIGHETTI, B.A. University of Colorado Boulder 2005; J.D. 2007; SER Professor of Law 2020, 2017, 2014.

Associate Professors:

PO CHEN, B.S. Beijing University 2000; Ph.D. University of Southern California 2005; SER Associate Professor of Geology and Geophysics 2014, 2008.

DARIO GRANA, B.S. University of Pavia, 2003; M.S. 2005; M.S. University of Milano Bicocca, 2006; Ph.D. Stanford University, 2013; SER Associate Professor of Geology and Geophysics 2019, 2013.

Academic Professional:

KRISTOPHER KOSKI, B.S. Colorado School of Mines, 2005; J.D. University of Wyoming, 2008; Associate Lecturer 2017.

Accreditation

All programs at the University of Wyoming are accredited by The Higher Learning Commission, a commission of the North Central Association of Colleges and Schools Commission on Institutions of Higher Education. In addition, the Professional Land Management Concentration is one of only a few programs accredited nationally by the American Association of Professional Landmen.

Graduates from the PLM program are afforded the opportunity to sit for the Registered Landman exam. Individuals with certification can increase their salary by 20% on average. Visit landman.org to learn more.

SER Vision Statement

SER pursues the creation, sharing, and implementation of technology and knowledge for sustainable economic production of Wyoming's natural resources to generate additional employment and revenue opportunities for the state that include supply of clean energy and materials and products.

SER Mission Statement

The School of Energy Resources' academic mission is to ensure students within its interdisciplinary academic programs can illustrate a foundational understanding of fundamentals relative to energy companies and systems. In order to prepare students to meet the demands of the modern-day workforce, students will utilize critical thinking skills, negotiation techniques, and problem-solving methods applicable to a diverse array of energy projects.

Program Admission

Undergraduate students will apply for admission to the University of Wyoming and then declare a major or minor within SER at any point during their course of study. To declare a major, students must meet with the SER academic advisor. Any student can add the SER minor without meeting with an SER advisor.

One of the most important challenges of the 21st century will be to develop and manage energy resources in a sustainable manner. Projections show energy consumption worldwide will increase nearly 50 percent by 2035. And half of the leadership in the energy industries is expected to retire in the next five to ten years.

The future of energy will be characterized by increasing knowledge, relentless change, and technological innovation. As global energy industry increases in complexity, demand will dramatically grow for professionals with a multidisciplinary, entrepreneurial skillset. Future leaders must understand complex technology within the context of business, legal, social, and public policy in order to create comprehensive and sustainable solutions.

The Energy Resource Management and Development (ERMD) B.S. program is designed to fill this need through a combination of rigorous courses, real-world internships, and undergraduate research experiences. The curriculum balances depth of learning with the breadth of understanding to train graduates for sustained competitive success in the energy workforce at the frontiers of knowledge and for self-directed, life-long learning. Students learn to focus on continuous improvement, constant assessment, and the importance of a sense of urgency and consideration of profit motive in the energy industry

Our program emphasizes career planning and provides constant one-on-one guidance and assistance to ensure optimal workforce placement. Students are strongly encouraged to complete an industry internship (the minimum GPA requirement is typically 3.000). Opportunities are also available for undergraduate research, a study abroad experience, or a summer field trip. Multiple events during the year connect students to energy industry professionals.

General Policies

- A minimum 2.00 UW GPA is required to apply for the minor.
- It is the student's responsibility to monitor requirements for the minor, along with their advisor.
- Additional courses may be required to meet individual course prerequisites.
- All classes in the minor must be passed with a grade of "C" or better.

Student Learning Outcomes

The School of Energy Resources was created in 2006 to enhance the University of Wyoming's energy-related education, research, and outreach. The Energy Resource Management and Development Program is designed to meet the demands of the energy workforce and enhance social literacy related to complex energy issues. Competency-based learning that integrates problem-solving, critical analysis of uncertain and complex issues, and constant improvement in performance are overarching components of our undergraduate program.

Energy Resource Management and Development B.S. Program Learning Outcomes:

- Identify or describe fundamental concepts of energy systems.
- Illustrate a foundational understanding of business fundamentals relative to energy companies, including organizational structure, management, entrepreneurship, and international commerce.
- Make use of critical thinking and problem-solving methods within a written group energy project.

Energy and Environmental Systems Concentration Learning Outcomes:

- Outline the skills in environmental monitoring and compliance.

- Explain energy regulation and management.
- Demonstrate the necessary skills related to the physical and social science dimensions of sustainability.

Professional Land Management Concentration Learning

Outcomes:

- Apply concepts and skills to real-world problems to gain practical understanding and experience.
- Identify and navigate a valid real property transaction from contract to transfer of title.
- Define and navigate the legal and regulatory hurdles for energy development on federal, state, and fee lands.

Energy Resource Management Minor Learning Outcomes:

- Gain appreciation and understanding of fundamental concepts of energy systems.
- Acquire a foundational understanding of the commercial aspects of energy industries.
- Exhibit critical thinking and problem solving related to energy and environmental problems.
- Apply knowledge of energy technology to societal problems requiring economic and policy analysis while working in a multidisciplinary environment.

Minor

Students looking to create a focus for their coursework can add minors to the ERMD program. Courses applying towards the minor must be completed with a grade of "C" or better.

Students not already majoring in BS-Energy Resource Management and Development may add the SER minor to their program of study. More information can be found on the SER website: <http://www.uwyo.edu/ser/academic-programs/minor-erm.html>

Major

Energy Resource Management and Development, Energy & Environmental Systems Concentration, B.S.

ERMD EES Concentration

EES majors can become environmental scientists who collect samples of air, soil, & water to identify environmental impacts, resolve environmental threats, & provide guidance on quality regulation and manage natural resources.

University Studies Program Requirements

The University Studies Program 2015 develops a student's foundational knowledge to prepare them for the Bachelor of Science degree program. Some of the categories of USP will be completed by completing the degree requirements as outlined below. Students should review their degree audits carefully to ensure that USP requirements are completed. Students transferring with a qualifying associate degree will have most of

the lower division portion of the USP requirement waived. For more information about qualifying earned associate degree, see the "Articulation: Earned Associate Degrees" information in this catalog.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

EES Curriculum

Students must earn a letter grade of C or better in each course and a cumulative GPA of 2.000 or better.
Students will complete 120 credit hours for the BS in Energy Resources Management and Development.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.
USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA
USP 2015 Code U5C1

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.
USP 2003-2014 Code U3O
USP 2015 Code U5PN

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

OR

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

COM2 Elective, Pick ONE

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

ERS2500 - Communication Across Topics in Energy

Credits: 3

Students will develop interdisciplinary communication skills from an Energy Resources perspective. Communication will include oral, digital, and written forms. Audiences for communication projects will often be live, and from a variety of backgrounds.

USP 2015 Code U5C2

Prerequisite: WA/COM1.

GEOL2220 - Communicating Earth Science

Credits: 3

This course will focus on communicating science to non-scientists. Students will deliver earth science information through written, digital and oral presentations to be informative and interesting to the public.

USP 2015 Code U5C2

Prerequisite: grade of C or higher in GEOL 2010, COM1.

HP2020 - Honors Colloquium II

Credits: 3

Max Credit 3

Honors Colloquium II is the second course in a two-semester sequence introducing students to the Honors College and to interdisciplinary modes of inquiry and expression through intensive analytical reading and writing, lectures, Scholars Sessions, and experiential learning.

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Prerequisite: WA. COM I

UWYO1600 - Veterans Transition Course

Credits: 1

Provides returning veterans skills for successful transition to college and civilian life. Reviews tools for academic success, resources available to the veteran, information on veteran related challenges, and career planning resources. Students will develop skills in written, oral, and digital communication.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3I,U3L

USP 2015 Code U5C2

Prerequisite: Students must be a U. S. military veteran or an active duty military member.

COM3 Elective-Pick ONE

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop

oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

ENGL3020 - Culture, Communication, Work

Credits: 3

Examines individual identity and group cultures, and how they influence communication in the workplace. Helps students develop strategies for working across cultural differences and for effective negotiation and conflict resolution skills.

USP 2003-2014 Code [(none)< >COM3]

Prerequisite: Completion of COM2.

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4040 - Rhetoric, Media, and Culture

Credits: 3

This class will guide us through the ways in which popular culture shapes the way that we view ourselves and other, and gives us a vocabulary to describe this phenomenon, critique it, and even push back against it.

USP 2003-2014 Code [(none)< >COM3]

Prerequisite: COM1 and COM2.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

Concurrent ENR majors must take ENR 4900

ESS4950 - Exploring the Earth System

Credits: 3

Conduct critical and interdisciplinary assessments on complex topics addressing physical, biological, and human components of the Earth System. Through multiple written, oral, and digital communication products, students will work independently and collaboratively to critically review existing literature, define knowledge gaps, analyze evidence, and synthesize results for multiple audiences.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ESS 1000 and either ESS 3480 or ENR 3450.

POLS4840 - Seminar in Public Law

Credits: 3

Max Credit (Max. 6)

Includes reading and research on selected problems in public law.

Dual Listed POLS 5840.

USP 2015 Code U5C3

Prerequisite: 9 hours of political science or related fields including POLS 1000 and consent of instructor.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Chemistry Elective- Pick ONE (USP:PN for all listed)

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

Economics Elective- Pick ONE

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP 2015 Code U5H

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

ECON4420 - Seminar: Economics for ENR

Credits: 2-4

For students with little or no background in economics interested in economic perspectives on ENR. Emphasis is on integrated ecology-economics approach to investigate the economics environmental services, biological resources, and the ecosystems that contain them. CBEC and ECON majors cannot earn upper-division economics credit for this course.

Prerequisite: successful completion of Q and senior standing.

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

Negotiation Elective-Pick ONE

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated

outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

Data Analysis Elective-Pick ONE

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP 2003-2014 Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

GEOL4250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 5250

Prerequisite: MATH 1400 and 1405 or consent of instructor.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students,

including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

Technical Elective- Pick ONE

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making. Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

ENR3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed REWM 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGECE 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit 12

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

ENR4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 4240.

Dual Listed ENR 5240.

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070.

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

ENR4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed COJO 4700.

Dual Listed ENR 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

ENR4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 4800.

Dual Listed ENR 5800.

Prerequisite: ARE 3020 or AMST 5400.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ENR4975 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

Offers students the opportunity to independently complete special academic studies under direction of a faculty member. Readings, papers, and projects are completed as directed.

Dual Listed ENR 5975.

Prerequisite: 6 credits in ENR.

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

GEOG3030 - Geography and Development

Credits: 3

Examines distribution of wealth and poverty in the world; theories of development, from traditional modernization theories through Marxist critiques and sustainable development; and case studies from around the world of development successes and failures, chosen to illustrate and illuminate theories of development.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

Former Course Number [G&R 3030]

Prerequisite: GEOG 1000 or GEOG 1020 or 3 credit hours of social science with global focus.

GEOG3050 - Economic Geography

Credits: 3

Economic Geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS

Former Course Number [G&R 3550]

GEOG4000 - Terrain Analysis

Credits: 3

Studies techniques for acquiring and analyzing spatial data from maps, remotely sensed imagery and field surveys for landscape assessment. Emphasizes deriving maps that describe physical suitability of landscapes for specific human activities. Field trip required.

Former Course Number [G&R 4000]

Prerequisite: Completion of USP PN requirement or consent of instructor.

GEOG4013 - Political Geography

Credits: 3

Geographic space mediates political action and is generated by it, and spatial forms are produced by governmental agencies that must respond or adapt to emerging patterns of political disruption and tendencies of social change. Students in this course learn to think about the relationship between politics and space at multiple scales and in global context. They also develop an inter-disciplinary approach to the sub-discipline of political geography in social and historical context, and, in that sense, develop a capacity to think and act as political geographers.

Cross Listed GEOG 5013 , INST 4013, INST 5013

Prerequisite: 6 hours in social science

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOG4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/1405 or MATH 1450.

REWM3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Prerequisite: LIFE 2022 or LIFE 2023.

REWM3390 - Range Judging

Credits: 2

Judging rangelands based on soil, plant and animal resources and applying science-based information to make management decisions. Participation in a field trip and UW SRM judging teams is required including Plant Team and

URME. This course is intended for members of the SRM competitive Teams.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000, REWM 2400 and REWM 3020, as well as the Team Coach permission.

REWM3500 - Rangeland Plant Ecophysiology

Credits: 3

Examines plant physiological processes that have application to ecological and land management issues. Topics include carbon assimilation, water relations, mineral nutrition as applied to plant distributions, plant and system responses to grazing, as well as plant tolerance of extreme conditions including drought, excessive temperatures and changes in climate.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 2022 or LIFE 2023.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.

Prerequisite: POLS 1000.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of public and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Students prepare public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 5103.

When Offered (Normally offered spring semester)

Former Course Number [3103]

Prerequisite: C or better in REWM 2000 and CS course.

REWM4150 - Behavior Modification for Production of Grazing Herbivores

Credits: 3

Strategies for manipulation of behavior and management of the grazing herbivore will be developed from scientific and practical information. Designed to equip the student to manage for animal and natural resource production.

Dual Listed REWM 5150.

When Offered (Normally offered spring semester)

Former Course Number [3150]

Prerequisite: C or better in REWM 2000 and REWM 3020 or ANSC 3100.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 5300.

When Offered (Normally offered spring semester)

Former Course Number [3320]

Prerequisite: REWM 2500 or LIFE 2023.

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4340 - Reclamation Techniques Field Trip

Credits: 2

Provides increased comprehension of current land reclamation problems and solutions by means of a field trip to sites in region where land reclamation is occurring.

When Offered (Normally offered fall semester)

Prerequisite: REWM 4200.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

REWM4500 - Rainfall-Runoff Modeling

Credits: 3

Introduction to hydrologic modeling that teaches the foundations of model development, calibration, and interpretation. Examines the different components of the water cycle and how they are being integrated into watershed models. Equips the students with the necessary skills to parameterize hydrologic models, understand the underlying principles, and interpret model outputs.

Dual Listed REWM 5500.

Prerequisite: REWM 4285.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

REWM4550 - Internship in:

Credits: 1

Max Credit (Max. 4)

Supervised field experience in range management or disturbed land reclamation. No more than 4 credits.

Prerequisite: basic course work in subject selected and consent of instructor.

REWM4600 - Drone-Based Remote Sensing

Credits: 3

This class teaches the basics of remote sensing applications in environmental sciences with a focus on unmanned aerial vehicles (UAVs, aka "drones"). Students will receive training in drone operation, data collection and analysis, and will be prepared to take the FAA Remote Pilot Certification.

Prerequisite: MATH 1400 or higher

REWM4750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration ecology for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 5750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM4810 - Experiments in Restoration

Credits: 2

Emphasis on the experimental design using examples from restoration science. Focus on experiments to test concepts in ecosystem science, food webs, population genetics, metapopulation biology, biodiversity and invasion, and climate change. Address topics in experimental, ecological restoration.

Dual Listed REWM 5810.

Prerequisite: STAT 2050 or equivalent.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

REWM4990 - Undergraduate Teaching Practicum

Credits: 1
Max Credit (Max. 2)

Teaching experience in classroom or laboratory assisting faculty instructor.

When Offered (Offered based on sufficient demand and resources)

RNEW3000 - Tropical Ecology

Credits: 3

Examines the characteristics of tropical ecosystems, how they evolved, their value to humans, their present status, and current issues relating to biodiversity, deforestation, extinction, and conservation.

Prerequisite: LIFE 1101 or LIFE 1010.

RNEW4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed PLNT 4130/GIST 4130.

Prerequisite: QA course and 9 credit hours in student's major field and junior/senior standing or permission of instructor.

RNEW4400 - Invasive Plant Ecology

Credits: 3

Ecological impacts of invasive, non-indigenous plant species, the ecological, genetic and evolutionary hypotheses for invasiveness, as well as management strategies for invasive plant species.

Cross Listed RNEW 4400, PLNT 4400, RNEW 5400, PLNT 5400

Dual Listed RNEW 5400.

Prerequisite: LIFE 3400.

RNEW4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed BOT 4775.

Prerequisite: LIFE 3400.

RNEW4800 - Undergraduate Research

Credits: 1-3
Max Credit (Max. 18)

Undergraduate student research can be an important component in the intellectual and professional development of future scientists and land managers. Undergraduate students working with a faculty member in a research capacity can register for up to 3 credit hours per semester. The student and faculty member will identify an academic outcome that is associated with their research effort, such as a research paper, oral presentation, or poster session at an appropriate venue. Instructor's permission required.

RNEW4990 - Topics in:

Credits: 1-4
Max Credit (Max. 8)

Special topics pertaining to renewable natural resource management. Intended to accommodate instruction in various specialized subjects not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Dual Listed RNEW 5990.

Prerequisite: consent of the instructor to pursue study of the topic.

SOIL3000 - Irrigated Agriculture

Credits: 3
Study of the complexity of plant/soil water relationships and its importance on irrigation. Soil and water relations, reference/crops evapotranspiration, and management of the water balance. Principles of chemigation, computer modeling/ monitoring included. Methods for irrigation scheduling and the importance of water use efficiency as a strategy for water conservation.

Cross Listed PLNT 3000.

Prerequisite: MATH 1400, SOIL 2010.

SOIL3130 - Environmental Quality

Credits: 3
Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.
Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.
When Offered (Normally offered fall semester)
Prerequisite: SOIL 2010.

General Electives- Must take 13 credits, 4 credits must be upper division

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.
Dual Listed BOT 5775.
When Offered (Normally offered fall semester of odd-numbered years)
Prerequisite: LIFE 3400.

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)
Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHE4050 - Unit Operations Laboratory II

Credits: 3

Laboratory experiments examining heat transfer and process control. Also requires students to design, conduct and analyze 'open-ended' experiments. Introduces LabView and covers factorial experimental design and linear and non-linear data regression approaches. Emphasizes the preparation of a formal report describing all aspects of the experiments.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

Prerequisite: C- or better in CHE 3040. (Normally offered spring semester)

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON4430 - Energy Economics

Credits: 3

Economics of energy, particularly oil and gas. Includes a discussion of the history of the oil industry, as well as aspects of contemporary markets. Apply a variety of concepts from microeconomics, particularly related to industrial economics.

Prerequisite: ECON 3020, MATH 2200 or MATH 2350.

EDSE3040 - Energy and Power Technology

Credits: 3

A conceptual analysis and synthesis of energy requirements and sources, with emphasis on alternate energy systems. Analysis of energy conversion and the application of mechanical, fluid, thermal and electrical power systems.

When Offered (Offered through UW/CC)

Former Course Number [EDIE 3040]

Prerequisite: PHYS 1050 or PHYS 1110.

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning

and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit 12

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

ENR4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ERS1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed GEOL 1650.

USP 2015 Code U5PN

ERS4960 - Energy Field Studies

Credits: 1-3

Various facets of energy resource management and development are covered by visits to oil and gas wells, coal mines, power plants, wind farms, and other energy production and research sites. A trip is normally planned for 5 to 6 days.

Prerequisite: WB; ERS 1000/ENR 1000 or ECON 1300/ERS 1300. Undergraduate Research.

ERS4970 - Internship

Credits: 1-3

Max Credit (Max. 3)

A formalized internship designed to provide students with relevant practical experience in the energy sector allowing synthesis and application of principles in energy science to energy asset management.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4975 - Global Experience in Energy

Credits: 2-4
Max Credit (Max. 4)

A 1-3 month integrative energy experience in China or Australia. Students will participate, in collaboration with partnering energy professionals, in outcomes focused education and research programs designed to address globally relevant challenges. Students will gain a global perspective within the cultural context of the partner institution.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6
Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

ESE4460 - Solar and Geothermal Engineering

Credits: 3
An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ME 4460.

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ESE4470 - Wind and Ocean Energy Engineering

Credits: 3
Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented.

Cross Listed ME 4470.

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

GEOG3050 - Economic Geography

Credits: 3
Economic Geography is the study of the location, distribution and spatial organization of economic activities across the

globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS

Former Course Number [G&R 3550]

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical

ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.
USP 2003-2014 Code U3WC
Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOG4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/1405 or MATH 1450.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

GEOG4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG/GEOL 4470/5470

Former Course Number [G&R 4470]

Prerequisite: Some basic knowledge of Earth processes GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG4550 - Geography of Wine

Credits: 3

Examine the regional influence of climate, terrain and cultural characteristics on the production of grape varieties and demonstrate the implications of this influence on the location and distribution of wines produced. Discussion will focus on the world-wide production and consumption of wine and impacts of multi-national corporations.

Prerequisite: junior standing and at least 21 years of age.

GEOG4880 - Current Topics

Credits: 1-6

Max Credit (Max. 6)

Special course on a topic of current interest.

Dual Listed GEOG 5880.

Former Course Number [G&R 4880, 4850]

Prerequisite: junior standing.

GEOG4885 - Seminar: (TOPICS)

Credits: 1-3
Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Former Course Number [G&R 4885, 4900]

Prerequisite: GEOG 4750.

GEOL1001 - Earth Science and Society

Credits: 1

Introduces students to the study of Earth Science and its role in society through examination and discussion of current events, and through projects researching geologic topics of societal interest.

USP 2003-2014 Code Y3I, U3L

Prerequisite: GEOL 1100 or concurrent enrollment.

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of

resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOL1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed ERS 1650.

USP 2015 Code U5PN

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP 2003-2014 Code [I< >(none)]

Prerequisite: One USP designated science course with lab.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4010 - Exploration Geoscience

Credits: 3

Provides students with information and skills necessary to understand the energy exploration modeling process. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, and reservoir characterization.

Cross Listed ERS 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

GEOL4060 - Rocky Mountain Field Trip

Credits: 1

Max Credit (Max. 3)

A six-day geological field trip to various classic localities in the Rocky Mountains.

Prerequisite: senior standing and GEOL 2010 and GEOL 4610 or GEOL 4050.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

GEOL4191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Dual Listed GEOL 5191.

Prerequisite: GEOL 4190.

GIST1001 - GIST Orientation and Portfolio

Credits: 1

Introduces students to the GIST degree, the resources necessary to be successful in the program, and the broader geospatial field and its impact on society. Topics include a survey of domain applications, the ethical, legal and social implications of using geospatial data, and geospatial certifications and credentialing.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2110 - Techniques in Cartography

Credits: 3

Max Credit 3

This course covers cartographic theory, techniques, and hands-on map-making. Students design thematic and reference maps using different platforms including web mapping. Students learn principles of graphic design and data journalism for effective communication, and they evaluate map purpose, design, data quality, and cognitive and political bias in maps.

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application or remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST4410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 5410.

GIST4420 - UAS Mission Planning

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 5420.

GIST4430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 5430.

GIST4440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 5440.

GIST4450 - UAS Photogrammetry and Image Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 5450.

Prerequisite: Junior/Senior standing or approval from the instructor.

GIST4790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 5790.

GIST4870 - Internship in Geospatial Information Science and Technology

Credits: 1-12

Max Credit (Max. 12)

Provide undergraduates with the opportunity to receive credit for practical experience in geospatial information science and technology. Internship opportunities must be approved by faculty and work supervisors.

GIST4950 - Undergraduate Research in Geospatial Information Science and Technology

Credits: 1-6

Max Credit (Max. 6)

Undergraduate research in Geospatial Information Science and Technology (GIST) under the mentorship of UW faculty. Students are encouraged to present their research at professional meetings and to publish their work. GIST is multidisciplinary, so research problems span a wide range of topics.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

LIFE1002 - Discovering Science

Credits: 3

Integrates Biology, Chemistry, Physics, and Earth Science and is intended for non-science majors. Fundamental concepts from each discipline are discussed through lectures and in-class activities, and students learn how to understand science and its importance in larger societal issues. There is no laboratory component of this course. Meets the S requirement in USP 2003 and the PN requirement in USP 2015.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Former Course Number [BIOL 1002]

LIFE1003 - Current Issues in Biology

Credits: 4

Emphasizes central themes of biology - cell biology, genetics, evolution, ecology - and scientific methodology by focusing on current issues in biology. Fundamental concepts are addressed through classroom and laboratory activities and discussions. This course is intended for non-science majors. Students cannot receive duplicate credit for LIFE 1010 or LIFE 1020.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1003]

LIFE1020 - Life Science

Credits: 4

An integrated lab and lecture emphasizing fundamental principles of biology including cell structure and function, genetics, ecology, evolution and organismal biology. Considers applications of these principles to societal issues such as the conservation of biodiversity, overpopulation and global environmental changes, biotechnology, and human wellness and disease. If you take LIFE 1020, you cannot get duplicate credit for LIFE 1000, 1003, or 1010.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN
Former Course Number [BIOL 1020]

Prerequisite: elementary education majors only; concurrent enrollment in EDEL 1430.

LIFE1101 - Introduction to Ecological Research

Credits: 3

Learn science by doing science! This course-based undergraduate research experience (CURE) will focus on beaver pond ecosystems in Medicine Bow National Forest. Students will engage in outdoor fieldwork in addition to classroom learning. They will carry out hands-on projects and gain experience in ecological sampling, lab work, data analysis, and scientific writing. Students who complete the course are encouraged to continue research and are eligible for summer internships.

USP 2015 Code U5FY

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

LS2010 - Engineering Surveying Lecture

Credits: 2

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Basic principles of surveying and map making.

Former Course Number [CE 2072]

Prerequisite: a working knowledge of algebra and trigonometry.

LS2015 - Engineering Surveying Laboratory

Credits: 1

Field surveying activities consisting of traversing, differential leveling, construction staking and gathering topographic data.

Former Course Number [CE 2073]

Prerequisite: LS 2010 or concurrent.

LS2020 - GPS for Land Surveyors

Credits: 4

From fundamental theory to practical application and advanced technologies, this class covers all aspects of GPS needed to understand and use GPS as a land surveyor including the basics of GPS technology, common hardware, surveying methods, survey design, planning and observing, real-time kinematics and DGPS.

Former Course Number [CE 2090]

Prerequisite: LS 2400.

LS2100 - Records Research for Surveyors

Credits: 3

Introduced to the public, quasi-public, and private depositories of recorded and non-recorded documents that establish land ownership boundaries, easement boundaries, and land use rights and restrictions in both the Public Land Survey System and the Colonial States. Assignments will require work to be conducted during depositories' normal business hours.

Former Course Number [CE 2076]

LS2410 - GIS in Surveying

Credits: 3

Covers the basic concepts of geographic information systems, the methods and software used to implement them, and their applications to surveying and analysis of other surveying problems.

Former Course Number [CE 2083]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3120 - Boundary Principles

Credits: 2

This course in boundary law addresses the fundamental principles of real property as applied to land surveying and related professions. Discussion and applications center on practical situations and concepts commonly encountered while conducting boundary surveys and the determination of the extent of ownership rights. Students explore the scope of the surveyors' judiciary role in real property ownership. Primarily offered through the Outreach School.

Former Course Number [CE 3740]

Prerequisite: CE 2070 or LS 2010, and LS 3100 and LS 2110.

LS3130 - Public Land Surveys

Credits: 3

Basic fundamentals of the Public Land Survey System (PLSS), dependent and independent resurveys, survey plats, "bona fide rights", riparian boundaries, non-rectangular entities, corner evidence and the role of the modern day surveyor.

Former Course Number [CE 2085]

Prerequisite: CE 2070 or LS 2010, and LS 2110.

LS3200 - Route Surveying

Credits: 3

Laying out of super elevation and circular, parabolic, and spiral curves; the difference between highway and railway horizontal curve geometry; offsets to spiral curves as boundaries; area and volumes of earthwork.

Former Course Number [CE 3710, CE 4710]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3210 - Advanced Surveying

Credits: 4

Advanced topics in surveying computations and procedures, including traverse error analysis, topographic surveying, mapping, astronomical observations, coordinate geometry applications, and state plane coordinates.

Former Course Number [CE 3720, CE 4720]

Prerequisite: CE 2070 or LS 2010.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

MGT4240 - Performance and Compensation

Credits: 3

In Human Resource Management the management of employee performance and compensation are key functions that drive organizational success. This course helps students become familiar with total compensation systems, including intrinsic and extrinsic rewards, base and variable pay, and benefits, and their relationship with employee performance and satisfaction.

Prerequisite: MGT 3410

MGT4260 - Training and Development

Credits: 3

In Human Resource Management training employees in the latest technical and managerial skills and helping them gain developmental experiences helps drive organizational success. Students will learn how to recognize training and developmental needs, how to develop employee training systems, and how to implement these training systems.

Additionally, students will learn about career and leader development.

Prerequisite: MGT 3410

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 2010 and junior class standing.

MGT4370 - Employment Law

Credits: 3

Provides a comprehensive foundation for understanding the law as it relates to the employer-employee relationship. This course will provide students the legal background necessary to make better decisions both as a worker as well as a manager of other.

Prerequisite: MGT 2010 or equivalent, junior class standing.

MGT4430 - Organization Design and Change

Credits: 3

Examines organizations, what they are, how they operate and are structured and how they can be changed. Focus is on macro managerial issues in the design and change of work organizations.

Prerequisite: MGT 2100, MGT 3410, MGT 3420; advanced business standing, junior class standing.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3
Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

MGT4900 - Independent Study in Management

Credits: 1-4
Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Management not included in other structured management courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT4910 - Topics in Management

Credits: 3
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships; marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

PETE4860 - Energy, Environment, and Materials

Credits: 3

Understanding the connection between materials, energy and environment, including the history of climate and different types of energy in use for a greener planet. Provides broad knowledge in the areas of energy, material science, chemical, petroleum, and environmental engineering.

Dual Listed PETE 5860.

Prerequisite: Junior standing and PETE 2050 or consent of instructor.

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP 2003-2014 Code U3CH

Former Course Number [1100]

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT1150 - Pesticide Safety and Application

Credits: 1

Introduces various types and safe methods of pesticides application. Subsequent to completion, students may take the certification test administered by the Wyoming Department of Agriculture.

Cross Listed ENTO 1150.
Former Course Number [CROP 1150]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)
Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070
When Offered (Normally offered fall semester)
Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130
Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.
Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS4385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed INST 4385.

Dual Listed POLS 5385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.

Dual Listed POLS 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST/GEOG 4555 & POLS 5555

Dual Listed INST/GEOG 4555 & POLS 5555

Prerequisite: 9 hours of international studies or social science coursework.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4

Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Prerequisite: LIFE 2022 or LIFE 2023.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM3390 - Range Judging

Credits: 2

Judging rangelands based on soil, plant and animal resources and applying science-based information to make management decisions. Participation in a field trip and UW SRM judging teams is required including Plant Team and URME. This course is intended for members of the SRM competitive Teams.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000, REWM 2400 and REWM 3020, as well as the Team Coach permission.

REWM3500 - Rangeland Plant Ecophysiology

Credits: 3

Examines plant physiological processes that have application to ecological and land management issues. Topics include carbon assimilation, water relations, mineral nutrition as applied to plant distributions, plant and system responses to grazing, as well as plant tolerance of extreme conditions including drought, excessive temperatures and changes in climate.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 2022 or LIFE 2023.

REWM4000 - Poisonous Plants and Plant Toxins

Credits: 3

Plants poisonous to livestock in Wyoming and the Mountain West; identification, ecology, toxic principles, physiologic responses of animals, situations leading to poisoning, control and management to prevent losses.

When Offered (Normally offered spring semester)

Prerequisite: 12 hours of biological and chemical sciences.

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources

of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.

Prerequisite: POLS 1000.

REWM4100 - Nutritional Ecological Management of Range Herbivores

Credits: 3

Examines ecological processes and management of nutritional resources by domestic and wild rangeland herbivores. Topics include nutrient availability, nutritional demand, foraging behavior, diet composition, grazing systems, stocking rates, livestock/wildlife competition, predation, parasitism, plant toxicity, and influences on ecological condition. Students evaluate case studies and analyze nutritional data using current technologies.

Dual Listed REWM 5100.

Prerequisite: LIFE 1010 or LIFE 1020.

REWM4103 - Range and Ranch Recreation

Credits: 3

Understanding of public demands for leisure use of public and private rangelands; potential impacts on rangeland resources, ranch practices and families and other rangeland users. Students prepare public range or private ranch recreation operations plan. Graduate students assist in preparation and presentation of lecture.

Dual Listed REWM 5103.

When Offered (Normally offered spring semester)

Former Course Number [3103]

Prerequisite: C or better in REWM 2000 and CS course.

REWM4150 - Behavior Modification for Production of Grazing Herbivores

Credits: 3

Strategies for manipulation of behavior and management of the grazing herbivore will be developed from scientific and practical information. Designed to equip the student to manage for animal and natural resource production.

Dual Listed REWM 5150.

When Offered (Normally offered spring semester)

Former Course Number [3150]

Prerequisite: C or better in REWM 2000 and REWM 3020 or ANSC 3100.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4300 - Grass Taxonomy

Credits: 3

Identification of grasses and their place in range management and world agriculture.

Dual Listed REWM 5300.

When Offered (Normally offered spring semester)

Former Course Number [3320]

Prerequisite: REWM 2500 or LIFE 2023.

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4340 - Reclamation Techniques Field Trip

Credits: 2

Provides increased comprehension of current land reclamation problems and solutions by means of a field trip to sites in region where land reclamation is occurring.

When Offered (Normally offered fall semester)

Prerequisite: REWM 4200.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

REWM4500 - Rainfall-Runoff Modeling

Credits: 3

Introduction to hydrologic modeling that teaches the foundations of model development, calibration, and interpretation. Examines the different components of the water cycle and how they are being integrated into watershed models. Equips the students with the necessary skills to parameterize hydrologic models, understand the underlying principles, and interpret model outputs.

Dual Listed REWM 5500.

Prerequisite: REWM 4285.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4540 - Problems

Credits: 1-4

Max Credit (Max. 6)

Experimental work or intensive reading and discussion on range management problems. Includes problems offered in the following areas of range management: natural resources ecology, livestock habitat, business, improvements, watershed, reclamation, extension, and international development.

Prerequisite: basic training in field of problem selected and consent of instructor.

REWM4550 - Internship in:

Credits: 1

Max Credit (Max. 4)

Supervised field experience in range management or disturbed land reclamation. No more than 4 credits.

Prerequisite: basic course work in subject selected and consent of instructor.

REWM4600 - Drone-Based Remote Sensing

Credits: 3

This class teaches the basics of remote sensing applications in environmental sciences with a focus on unmanned aerial vehicles (UAVs, aka "drones"). Students will receive training in drone operation, data collection and analysis, and will be prepared to take the FAA Remote Pilot Certification.

Prerequisite: MATH 1400 or higher

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration ecology for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 5750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM4810 - Experiments in Restoration

Credits: 2

Emphasis on the experimental design using examples from restoration science. Focus on experiments to test concepts in ecosystem science, food webs, population genetics, metapopulation biology, biodiversity and invasion, and climate change. Address topics in experimental, ecological restoration.

Dual Listed REWM 5810.

Prerequisite: STAT 2050 or equivalent.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

REWM4990 - Undergraduate Teaching Practicum

Credits: 1

Max Credit (Max. 2)

Teaching experience in classroom or laboratory assisting faculty instructor.

When Offered (Offered based on sufficient demand and resources)

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

SOIL4780 - Seminar:

Credits: 1-9

Consideration of special topics of current interest in social work. May be repeated for a maximum of 15 hours credit when the seminar topic is different.

Prerequisite: advanced major status; or consent of instructor and junior standing for non-social work majors.

Energy Resource Management and Development- Professional Land Management Concentration, B.S.

ERMD PLM Concentration

Professional Land Management majors determine ownership and title of surface and subsurface rights to negotiate leases with land/mineral owners, coordinate field exploration, and ensure compliance with governmental regulations.

University Studies Program Requirements

The University Studies Program 2015 develops a student's foundational knowledge to prepare them for the Bachelor of Science degree program. Some of the categories of USP will be completed by completing the degree requirements as outlined below. Students should review their degree audits carefully to ensure that USP requirements are completed. Students transferring with a qualifying associate degree will have most of the lower division portion of the USP requirement waived. For more information about qualifying earned associate degree, see the "Articulation: Earned Associate Degrees" information in this catalog.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

PLM Curriculum

Students must earn a letter grade of C or better in each course and a cumulative GPA of 2.000 or better.
Students will complete 120 credit hours for the BS in Energy Resources Management and Development.

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP 2003-2014 Code U3O

USP 2015 Code U5PN

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ERS2010 - Introduction to Land Management

Credits: 3
Max Credit 3

Provides an introduction to land management in the various energy industries. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry. In addition, provides an overview of ethical issues that arise and professional conduct expected in the industry.

ERS4010 - Exploration Geoscience

Credits: 3
The purpose of this course is to provide students with information and skills necessary to understand the oil and gas modeling process from exploration to production. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, reservoir characterization, reservoir production, well planning and decision making.

Cross Listed GEOL 4010.
Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

ERS4100 - Property I

Credits: 3
Property I addresses the nature of property ownership and the rights associated with property as well as the acquisition and transfer of ownership rights in property and the sharing of ownership rights over time, including estates, future interest, and concurrent estates.

ERS4105 - Property II

Credits: 3
Property II covers rights inherent to the ownership of property and public limitations on those rights.

Prerequisite: ERS 4100.

ERS4110 - Law of Contracts

Credits: 3
The Law of Contracts addresses the formation of a contract and the meaning of agreements and the justification of non-performance and breach.

Prerequisite: MGT 1040 and WB/C

ERS4120 - Federal Public Land Law

Credits: 3
Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4130 - Oil and Gas Law

Credits: 3

Focuses on the basic legal rules and principles governing the ownership and development of oil and gas, derived from a combination of property, contract, administrative, tort, and constitutional law.

ERS4135 - Advanced Energy Law

Credits: 3

Covers oil, gas and other energy development and financing arrangements including assignments, leases, farmouts, joint operating agreements, purchase and sale agreements, service agreements and marketing agreements. Covers oil, gas and other energy development regulation, including, oil and gas conservation commission and state and federal environmental regulation. Introduces other forms of energy development, including, but not limited to, renewables, nuclear, CCUS, hydrogen, and the various agreement and regulatory nuances of such energy development. Covers ethical issues that may arise in energy development.

USP 2015 Code U5C3

Prerequisite: ERS 4130.

ERS4985 - Seminar

Credits: 1-3

Max Credit (Max. 3)

Energy professionals, including accredited professional landmen, practicing attorneys, and other energy professionals will present a colloquium styled course to bridge conceptual content with realistic workforce focused applications.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300 and WA and QB.

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200, and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators

are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH2355 - Mathematical Applications for Business

Credits: 4

Primarily for students in the College of Business. Includes the mathematics of finance; systems of linear equations and matrices; linear programming; sets, counting, and probability. Students will learn to use Excel spreadsheets to solve business application problems in a computer lab that meets one day per week.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

MGT2010 - Legal Environment of Business

Credits: 3

Provides a broad overview of business-related legal topics. Students are familiarized with courts and alternative dispute resolution, constitutional law, torts, contracts, intellectual law, criminal law, and cyber law.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

COM2 Elective, Pick ONE

COMM2010 - Public Speaking

Credits: 3

Beginning public speaking course. Students will develop foundational oral, digital and written communication skills. Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

ERS2500 - Communication Across Topics in Energy

Credits: 3

Students will develop interdisciplinary communication skills from an Energy Resources perspective. Communication will include oral, digital, and written forms. Audiences for communication projects will often be live, and from a

variety of backgrounds.

USP 2015 Code U5C2

Prerequisite: WA/COM1.

GEOL2220 - Communicating Earth Science

Credits: 3

This course will focus on communicating science to non-scientists. Students will deliver earth science information through written, digital and oral presentations to be informative and interesting to the public.

USP 2015 Code U5C2

Prerequisite: grade of C or higher in GEOL 2010, COM1.

HP2020 - Honors Colloquium II

Credits: 3

Max Credit 3

Honors Colloquium II is the second course in a two-semester sequence introducing students to the Honors College and to interdisciplinary modes of inquiry and expression through intensive analytical reading and writing, lectures, Scholars Sessions, and experiential learning.

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Prerequisite: WA. COM I

UWYO1600 - Veterans Transition Course

Credits: 1

Provides returning veterans skills for successful transition to college and civilian life. Reviews tools for academic success, resources available to the veteran, information on veteran related challenges, and career planning resources. Students will develop skills in written, oral, and digital communication.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3I,U3L

USP 2015 Code U5C2

Prerequisite: Students must be a U. S. military veteran or an active duty military member.

Ethics Elective- Pick ONE

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming,

Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP 2003-2014 Code [CH<>(none)]

ENR2345 - Natural Resource Ethics

Credits: 3

Introduces students to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed PHIL 2345/RNEW 2345.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

LS3300 - Ethics for the Professional Surveyor

Credits: 1

Introduction to the common ethical and moral issues facing professional surveyors in modern practice.

Former Course Number [CE 2074]

Prerequisite: One of LS 3110 or LS 3120 or LS 3130.

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-

making is developed through this process.

Prerequisite: sophomore class standing.

PHIL2300 - Ethics in Practice

Credits: 1-3

Alerts preprofessional students and other interested individuals to various ethical issues they will encounter and relevant professional work on those issues. Emphasis of the course concentrates one time on biomedical ethics, another on technology and engineering ethics, another on ethics in the professions.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

PHIL2330 - Environmental Ethics

Credits: 3

Introduction to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed ENR 2330.

USP 2003-2014 Code U3CH

PHIL2345 - Natural Resource Ethics

Credits: 3

Introduction to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed ENR 2345/RNEW 2345.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

PHIL3250 - Global Justice

Credits: 3

An examination of global justice, normative international relations, and international ethics, using the methodology and theories of analytical political philosophy. Possible topics include global economic justice and world poverty, human rights, humanitarian duties, intervention and sovereignty, cosmopolitanism, nationalism, patriotism, world hunger, and immigration.

USP 2003-2014 Code U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: 3 hours of philosophy or international studies.

PHIL3300 - Ethical Theory

Credits: 3

A philosophical investigation of such concepts as morality, obligation, goodness, freedom and responsibility, and of recurring types of ethical theory.

Prerequisite: 3 hours of philosophy.

PHIL4300 - Topics in Ethics

Credits: 3-6

Max Credit (Max. 6)

An advanced investigation of selected topics in ethics. Examples include derivative and basic principles of obligation; justice; morality and utility; generalization of norms; and the relation of morality and law.

Dual Listed PHIL 5300.

Prerequisite: 6 hours of philosophy.

PHIL4340 - Issues in Environmental Ethics

Credits: 3

Encompasses selected topics in environmental and natural resource ethics.

Dual Listed PHIL 5340.

Prerequisite: PHIL 2330, PHIL 2345, PHIL 3250, PHIL 3300 or PHIL 3350.

Economics Elective- Pick ONE

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP 2015 Code U5H

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

ECON4420 - Seminar: Economics for ENR

Credits: 2-4

For students with little or no background in economics interested in economic perspectives on ENR. Emphasis is on integrated ecology-economics approach to investigate the economics environmental services, biological resources, and the ecosystems that contain them. CBEC and ECON majors cannot earn upper-division economics credit for this course.

Prerequisite: successful completion of Q and senior standing.

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

Negotiation Elective-Pick ONE

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

Data Analysis Elective- Pick ONE

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP 2003-2014 Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

GEOL4250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 5250

Prerequisite: MATH 1400 and 1405 or consent of instructor.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing

techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

STAT3050 - Statistical Methods

Credits: 3

Provides undergraduate majors in the Colleges of Arts and Sciences, Agriculture and Education with training in statistical methodology for multiple variable situations. Integrates computer analysis packages such as R MINITAB, SAS and SPSSX into statistical topics. Credit cannot be earned in more than one of the following courses: STAT 2110, 3050 and STAT 5050, 5060, STAT 5070, STAT 5080.

Prerequisite: STAT 2050, STAT 2070 or equivalent.

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

General Electives- 21 credits in total, 9 credits must be upper division

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)

Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and

inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGEC 1010.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

ECON4430 - Energy Economics

Credits: 3

Economics of energy, particularly oil and gas. Includes a discussion of the history of the oil industry, as well as aspects of contemporary markets. Apply a variety of concepts from microeconomics, particularly related to industrial economics.

Prerequisite: ECON 3020, MATH 2200 or MATH 2350.

EDSE3040 - Energy and Power Technology

Credits: 3

A conceptual analysis and synthesis of energy requirements and sources, with emphasis on alternate energy systems. Analysis of energy conversion and the application of mechanical, fluid, thermal and electrical power systems.

When Offered (Offered through UW/CC)
Former Course Number [EDIE 3040]

Prerequisite: PHYS 1050 or PHYS 1110.

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH
USP 2015 Code U5H

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGECE 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit 12

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

ENR4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ENR4560 - Conservation Entrepreneurship

Credits: 3
Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.
Prerequisite: ENR 3000

ENR4600 - Campus Sustainability

Credits: 3
Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600
Prerequisite: USP WB or COM2 course, junior or senior standing.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6
Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.
Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4900 - Capstone in ENR

Credits: 3
An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.
USP 2003-2014 Code U3WC
USP 2015 Code U5C3
Prerequisite: ENR 3000.

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ERS1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed GEOL 1650.

USP 2015 Code U5PN

ERS4960 - Energy Field Studies

Credits: 1-3

Various facets of energy resource management and development are covered by visits to oil and gas wells, coal mines, power plants, wind farms, and other energy production and research sites. A trip is normally planned for 5 to 6 days.

Prerequisite: WB; ERS 1000/ENR 1000 or ECON 1300/ERS 1300. Undergraduate Research.

ERS4970 - Internship

Credits: 1-3
Max Credit (Max. 3)

A formalized internship designed to provide students with relevant practical experience in the energy sector allowing synthesis and application of principles in energy science to energy asset management.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4975 - Global Experience in Energy

Credits: 2-4
Max Credit (Max. 4)

A 1-3 month integrative energy experience in China or Australia. Students will participate, in collaboration with partnering energy professionals, in outcomes focused education and research programs designed to address globally relevant challenges. Students will gain a global perspective within the cultural context of the partner institution.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6
Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

ESE4460 - Solar and Geothermal Engineering

Credits: 3
An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ME 4460.

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ESE4470 - Wind and Ocean Energy Engineering

Credits: 3
Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview

of ocean energy capture systems is also presented.

Cross Listed ME 4470.

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

FIN3310 - Investment Management

Credits: 3

Fundamental principles of investments and practical implications of financial theory. Students acquire a framework for understanding returns on financial assets, risk and return, fundamentals of portfolio theory, efficient market hypothesis, and asset pricing models. Other topics include financial statement analysis, behavioral finance, and introduction to options and futures.

Former Course Number [4310]

Prerequisite: FIN 2100 and advanced business standing.

FIN3520 - Financial Markets

Credits: 3

Portfolio and capital market theory and the analysis of risk are introduced. Integrates theory into practical aspects of financial markets.

Former Course Number [4520]

Prerequisite: FIN 2100, STAT 2010 or STAT 2050/STAT 2070, and advanced business standing.

GEOG3050 - Economic Geography

Credits: 3

Economic Geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450
Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480
USP 2003-2014 Code U3G, U3WB
A&S College Core 2015 ASG
Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS
Former Course Number [G&R 3550]

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.
GEOL 4040
USP 2003-2014 Code U3CS
Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental

matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOG4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/1405 or MATH 1450.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

GEOG4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG/GEOL 4470/5470

Former Course Number [G&R 4470]

Prerequisite: Some basic knowledge of Earth processes GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG4880 - Current Topics

Credits: 1-6

Max Credit (Max. 6)

Special course on a topic of current interest.

Dual Listed GEOG 5880.

Former Course Number [G&R 4880, 4850]

Prerequisite: junior standing.

GEOG4885 - Seminar: (TOPICS)

Credits: 1-3

Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Former Course Number [G&R 4885, 4900]

Prerequisite: GEOG 4750.

GEOL1001 - Earth Science and Society

Credits: 1

Introduces students to the study of Earth Science and its role in society through examination and discussion of current events, and through projects researching geologic topics of societal interest.

USP 2003-2014 Code Y3I, U3L

Prerequisite: GEOL 1100 or concurrent enrollment.

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOL1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed ERS 1650.

USP 2015 Code U5PN

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP 2003-2014 Code [I< >(none)]

Prerequisite: One USP designated science course with lab.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are

examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4010 - Exploration Geoscience

Credits: 3

Provides students with information and skills necessary to understand the energy exploration modeling process. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, and reservoir characterization.

Cross Listed ERS 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

GEOL4060 - Rocky Mountain Field Trip

Credits: 1

Max Credit (Max. 3)

A six-day geological field trip to various classic localities in the Rocky Mountains.

Prerequisite: senior standing and GEOL 2010 and GEOL 4610 or GEOL 4050.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

GEOL4191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Dual Listed GEOL 5191.

Prerequisite: GEOL 4190.

GIST1001 - GIST Orientation and Portfolio

Credits: 1

Introduces students to the GIST degree, the resources necessary to be successful in the program, and the broader geospatial field and its impact on society. Topics include a survey of domain applications, the ethical, legal and social implications of using geospatial data, and geospatial certifications and credentialing.

GIST2140 - Survey of Remote Sensing Applications

Credits: 3

This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN

Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2190 - Intro to Programming

Credits: 3

Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3

Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.
Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST4410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 5410.

GIST4420 - UAS Mission Planning

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 5420.

GIST4430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 5430.

GIST4440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 5440.

GIST4450 - UAS Photogrammetry and Image Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery acquired by

unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 5450.

Prerequisite: Junior/Senior standing or approval from the instructor.

GIST4790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 5790.

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

IMGT2400 - Introduction to Information Management

Credits: 3

Concerned with the role of information systems in managing organizations to make them more competitive and efficient. Specific topics include organizational and technical foundations of information systems and building and managing systems. Special emphasis will be made on learning hands on tools that are easily accessible to students, including Microsoft Excel and Microsoft Access.

Former Course Number [2400]

Prerequisite: MATH 1400.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3410 - Introduction to Field Ecology

Credits: 2

Field and laboratory course. Introduces methods used in plant and animal ecology.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3410/BIOL 2410]

Prerequisite: LIFE 3400 (may be concurrently enrolled).

LS2010 - Engineering Surveying Lecture

Credits: 2

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Basic principles of surveying and map making.

Former Course Number [CE 2072]

Prerequisite: a working knowledge of algebra and trigonometry.

LS2015 - Engineering Surveying Laboratory

Credits: 1

Field surveying activities consisting of traversing, differential leveling, construction staking and gathering topographic data.

Former Course Number [CE 2073]

Prerequisite: LS 2010 or concurrent.

LS2020 - GPS for Land Surveyors

Credits: 4

From fundamental theory to practical application and advanced technologies, this class covers all aspects of GPS needed to understand and use GPS as a land surveyor including the basics of GPS technology, common hardware, surveying methods, survey design, planning and observing, real-time kinematics and DGPS.

Former Course Number [CE 2090]

Prerequisite: LS 2400.

LS2100 - Records Research for Surveyors

Credits: 3

Introduced to the public, quasi-public, and private depositories of recorded and non-recorded documents that establish land ownership boundaries, easement boundaries, and land use rights and restrictions in both the Public Land Survey System and the Colonial States. Assignments will require work to be conducted during depositories' normal business hours.

Former Course Number [CE 2076]

LS2410 - GIS in Surveying

Credits: 3

Covers the basic concepts of geographic information systems, the methods and software used to implement them, and their applications to surveying and analysis of other surveying problems.

Former Course Number [CE 2083]

Prerequisite: CE 2070 or LS 2010, and ES 1060 or ES 1061.

LS3210 - Advanced Surveying

Credits: 4

Advanced topics in surveying computations and procedures, including traverse error analysis, topographic surveying, mapping, astronomical observations, coordinate geometry applications, and state plane coordinates.

Former Course Number [CE 3720, CE 4720]

Prerequisite: CE 2070 or LS 2010.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

MGT2030 - Principle-Based Ethics

Credits: 3

Max Credit 3

Studies the cognitive, social, behavioral, and corporate processes affecting individual, group, and organizational behavior in morally questionable situations. Through exploration and analysis of real-world cases, students understand what factors give rise to ethical dilemmas and how ethical principles guide ethical behavior. Student ethical decision-making is developed through this process.

Prerequisite: sophomore class standing.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

MGT3420 - Organizational Behavior and Leadership

Credits: 3

An interdisciplinary study of individual, group, and organizational processes that affect employee behavior at work. Prepares students for various managerial roles by synthesizing successful leadership practices in both domestic and international settings and by examining critical areas such as individual differences, organizational politics and culture.

Former Course Number [4420]

Prerequisite: MGT 2100, junior class standing and advanced business standing.

MGT4240 - Performance and Compensation

Credits: 3

In Human Resource Management the management of employee performance and compensation are key functions that drive organizational success. This course helps students become familiar with total compensation systems, including intrinsic and extrinsic rewards, base and variable pay, and benefits, and their relationship with employee performance and satisfaction.

Prerequisite: MGT 3410

MGT4260 - Training and Development

Credits: 3

In Human Resource Management training employees in the latest technical and managerial skills and helping them gain developmental experiences helps drive organizational success. Students will learn how to recognize training and developmental needs, how to develop employee training systems, and how to implement these training systems. Additionally, students will learn about career and leader development.

Prerequisite: MGT 3410

MGT4340 - Law for Managers

Credits: 3

Provides an overview of laws and legal issues associated with managing a business, incorporating aspects of sustainable business practices. Topics include agency and employment, business organizations, including securities laws and corporate governance standards, government regulation of businesses, including environmental/sustainability regulations, and an introduction to international law and global economy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4350 - Commercial Law

Credits: 3

A study of the basic principles of commercial law, including property, sales, negotiable instruments, secured transactions, creditors' rights and bankruptcy.

Prerequisite: MGT 2010 or equivalent and junior class standing.

MGT4360 - Business Law for Entrepreneurs

Credits: 3

A survey of the various legal issues confronted by entrepreneurs, particularly related to new ventures.

Prerequisite: MGT 2010 and junior class standing.

MGT4370 - Employment Law

Credits: 3

Provides a comprehensive foundation for understanding the law as it relates to the employer-employee relationship. This course will provide students the legal background necessary to make better decisions both as a worker as well as a manager of other.

Prerequisite: MGT 2010 or equivalent, junior class standing.

MGT4430 - Organization Design and Change

Credits: 3

Examines organizations, what they are, how they operate and are structured and how they can be changed. Focus is on macro managerial issues in the design and change of work organizations.

Prerequisite: MGT 2100, MGT 3410, MGT 3420; advanced business standing, junior class standing.

MGT4470 - Negotiations and Conflict Resolution

Credits: 3

Max Credit 3

Focuses on all aspects of formal managerial negotiation including dealings with suppliers, buyers, unions and etc. Also examined are the theory and practice of interpersonal negotiation. Conflict resolution is approached by identifying types and sources of conflict, organizational parameters of conflict, as well as resolution skills and behavior.

USP 2015 Code U5C3

Prerequisite: MGT 2100, advanced business standing.

MGT4800 - Business Strategy and Policy

Credits: 3

A capstone course designed to integrate prior courses into a general manager's overall organization perspective. Coverage will emphasize strategic management models which provide frameworks that assist in this task and integrate those internal organization factors with the firm's environment.

USP 2015 Code U5C3

Prerequisite: ACCT 2010, ACCT 2020, MGT 2010, DSCI 2100, FIN 2100, MGT 2100, MKT 2100, STAT 2050 or equivalent, advanced business standing, and senior class standing. To be taken graduating semester of senior year.

MGT4900 - Independent Study in Management

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Management not included in other structured management courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MGT4910 - Topics in Management

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

MKT2100 - Introduction to Marketing

Credits: 3

An investigation of the marketing discipline with emphasis on vocabulary; principles; functional interrelationships;

marketing strategies, practices and problems in national and international environments.

Prerequisite: sophomore class standing and completion of COM1.

PETE4860 - Energy, Environment, and Materials

Credits: 3

Understanding the connection between materials, energy and environment, including the history of climate and different types of energy in use for a greener planet. Provides broad knowledge in the areas of energy, material science, chemical, petroleum, and environmental engineering.

Dual Listed PETE 5860.

Prerequisite: Junior standing and PETE 2050 or consent of instructor.

PHIL2420 - Critical Thinking

Credits: 3

Shows that argument is a skill of fundamental importance to any field of endeavor. Explains methods used in evaluating an argument. Introduces such topics as: patterns of reasoning, counterexamples, fallacies; inductive and deductive logic.

USP 2003-2014 Code U3CH

Former Course Number [1100]

PLNT1000 - Agroecology

Credits: 4

Introduces ecological interactions that affect food producing (agricultural) systems. Lectures and laboratory exercises study the various biological components and the science of sustainable agricultural production. Features differences between developed and developing countries. Explores crises and challenges facing agriculture and global society.

USP 2003-2014 Code U3G, U3SB

USP 2015 Code U5PN

Former Course Number [CROP/BOT 2000]

PLNT1150 - Pesticide Safety and Application

Credits: 1

Introduces various types and safe methods of pesticides application. Subsequent to completion, students may take the certification test administered by the Wyoming Department of Agriculture.

Cross Listed ENTO 1150.

Former Course Number [CROP 1150]

PLNT3030 - Ecological Web: Ecology of Plant Protection

Credits: 3

Introduces students to concurrent evolution of crop cultivation and organisms, both plant and animal, that attack them. Provides basic skills necessary to understand ecology and management of economic crop pests.

When Offered (Normally offered fall semester)

Former Course Number [2030]

Prerequisite: LIFE 1010 and PLNT 1000

PLNT4070 - Weed Science and Technology

Credits: 4

Management and physiological principles involved in control of economically important farm and range weeds.

Dual Listed PLNT 5070

When Offered (Normally offered fall semester)

Former Course Number [CROP 4070]

Prerequisite: PLNT 1000, LIFE 1010

PLNT4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130/GIST 4130

Prerequisite: Q course and 9 credit hours in student's major field and junior/senior standing

POLS3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed ENR 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

POLS4385 - Environment and Resource Conflict

Credits: 3

Drawing on key theory and contemporary real-world case studies this course explores how environmental change and the competition for scarce resources (such as food, water, oil, gems, and timber) have increasingly been linked to violent interstate and intrastate conflict and how such conflicts might be addressed, managed, or resolved through international and national action.

Cross Listed INST 4385.

Dual Listed POLS 5385.

Prerequisite: 9 hours of POLS or INST, including POLS 2310/INST 2310.

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.

Dual Listed POLS 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4555 - Political Ecology

Credits: 3

Political ecology is a multidisciplinary field of study that emphasizes the role of politics, power relations, and inequality in the study of human-environment relations. In this course we will consider how political ecology can help us rethink environmental knowledge and problem solving in a variety of contexts locally and globally.

Cross Listed INST/GEOG 4555 & POLS 5555

Dual Listed INST/GEOG 4555 & POLS 5555

Prerequisite: 9 hours of international studies or social science coursework.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses.

Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and POLS 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

REWM4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/GEOG 4052/AMST 4052.

Prerequisite: POLS 1000.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurred on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed ENR 4285.

Dual Listed REWM 5285.

When Offered (Normally offered fall semester)

Prerequisite: QA

REWM4330 - Rangeland Ecosystem Assessment and Monitoring

Credits: 4

Assessment, monitoring, and analysis of rangeland ecosystems and processes. Students integrate sampling design, measurements of vegetation attributes, indicators of rangeland health, ecological site information, riparian and wildlife habitat values, utilization, and statistical applications to evaluate rangeland resource integrity and sustainable use. Students collect, analyze, and report data using current technologies. REWM students will be given enrollment preference.

When Offered (Normally offered fall semester)

Prerequisite: REWM 2400 and STAT 2050 or STAT 2070. Concurrent enrollment in REWM 2400 and STAT 2050 or STAT 2070 is allowed with permission.

REWM4340 - Reclamation Techniques Field Trip

Credits: 2

Provides increased comprehension of current land reclamation problems and solutions by means of a field trip to sites in region where land reclamation is occurring.

When Offered (Normally offered fall semester)

Prerequisite: REWM 4200.

REWM4440 - Applied Fire Ecology

Credits: 3

Course examines drivers and patterns of wildfire in rangeland and forested ecosystems, fire behavior, fuel

characteristics, fire effects, suppression tactics and mitigation strategies, prescribed burning precautions and applications, applications/uses of fire to meet resource objectives, policies and regulations, and modeling software. Required field trips out of class time.

Dual Listed REWM 5440.

Restricted Junior standing or greater class standing required.

Prerequisite: General biology and MATH 1400 or above.

REWM4500 - Rainfall-Runoff Modeling

Credits: 3

Introduction to hydrologic modeling that teaches the foundations of model development, calibration, and interpretation. Examines the different components of the water cycle and how they are being integrated into watershed models. Equips the students with the necessary skills to parameterize hydrologic models, understand the underlying principles, and interpret model outputs.

Dual Listed REWM 5500.

Prerequisite: REWM 4285.

REWM4530 - Seminar

Credits: 1

Max Credit (Max. 2)

Discusses pertinent range management problems.

Prerequisite: REWM 2000 (earn at least a C) or ENR 4000.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

REWM4600 - Drone-Based Remote Sensing

Credits: 3

This class teaches the basics of remote sensing applications in environmental sciences with a focus on unmanned aerial vehicles (UAVs, aka "drones"). Students will receive training in drone operation, data collection and analysis, and will be prepared to take the FAA Remote Pilot Certification.

Prerequisite: MATH 1400 or higher

REWM4700 - Wildland Watershed Management

Credits: 3

Studies hydrological cycle with specific emphasis on the role of vegetation in hydrologic processes such as interception, surface detention storage, infiltration, percolation, run-off, and water quality. Utilization of watersheds and vegetation manipulation practices to modify these hydrologic processes.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1101 or LIFE 1010.

REWM4710 - Watershed Water Quality Management

Credits: 3

Studies watershed processes controlling water quality. Examines impacts of land use activities such as agriculture production, livestock grazing, and mineral and natural gas extraction on surface water and ground water quality. Emphasis will be placed on water quality modeling and management.

Dual Listed REWM 5710.

When Offered (Normally offered spring semester)

Former Course Number [4180]

Prerequisite: CHEM 1000.

REWM4750 - Wildlife Habitat Restoration Ecology

Credits: 3

Emphasis on fundamental and applied aspects of restoration ecology for terrestrial wildlife habitats following anthropogenic and natural disturbances. Although the course overviews theoretical concepts applicable to many systems, there is a focus on applications for wildlife habitats in western North America.

Dual Listed REWM 5750.

Prerequisite: Minimum of 6 hours of Biology or Life Sciences courses.

REWM4810 - Experiments in Restoration

Credits: 2

Emphasis on the experimental design using examples from restoration science. Focus on experiments to test concepts in ecosystem science, food webs, population genetics, metapopulation biology, biodiversity and invasion, and climate change. Address topics in experimental, ecological restoration.

Dual Listed REWM 5810.

Prerequisite: STAT 2050 or equivalent.

REWM4830 - Ecological Applications for Wildland Management

Credits: 3

Emphasis on applying understanding of interactions among components of rangelands to facilitate sustainable provision of ecosystem services. The influences of stochasticity and disturbances on ecosystem structure and function will be the focus of discussion and technical writing exercises.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: WA, REWM 2000 (earn at least a C), LIFE 3400 (latter may be concurrent).

REWM4850 - Rangeland Vegetation Management Techniques

Credits: 3

Uses applied ecological principles in restoration of degraded rangeland ecosystems to introduce methods for manipulating rangeland vegetation that satisfy land management objectives. Provides ecologically-sound practices to maintain optimal and sustained yield of rangeland products.

When Offered (Normally offered spring semester)

Prerequisite: C or better in REWM 2000 and SB.

REWM4900 - Rangeland Management Planning

Credits: 3

Applies planning processes that integrate soil, vegetation, water, livestock, wildlife, and environmental regulatory considerations within the context of satisfying ecologically sustainable rangeland management objectives.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: REWM 4830, ECON 1010 or AGECE 1010 or AGECE 1020, SOIL 4120 or SOIL 4150 (may be concurrent), REWM 3020 (may be concurrent), REWM 4330 (may be concurrent).

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

SOIL3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and

vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed ENR 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

SOIL4105 - Soil Physics Laboratory

Credits: 2

Teaches students the methodology and use of equipment to measure soil physical properties in the laboratory and field. Experiments include particle size analysis, soil surface area, soil-water measurement with neutron probe and TDR, field infiltration rate, soil-water retention curve, soil pore size distribution saturated and unsaturated conductivities, soil water potential and solute breakthrough curve.

Dual Listed SOIL 5105.

Prerequisite: SOIL 2010.

SOIL4120 - Genesis, Morphology and Classification of Soils

Credits: 4

Processes of soil development and methods of description, survey and classification. Includes field trips which examine soils in the Laramie Basin and surrounding mountains.

Dual Listed SOIL 5120.

When Offered (Offered fall semester)

Prerequisite: SOIL 2010.

SOIL4130 - Chemistry of the Soil Environment

Credits: 3

Introduction to the chemical properties and reactions that occur in the soil environment. Fundamental principles of soil mineralogy, organic matter and equilibrium chemistry as they relate to soil chemical reactions, plant nutrient availability and pedogenetic processes will be emphasized.

Dual Listed SOIL 5130.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010, CHEM 1030 or CHEM 1060.

SOIL4140 - Soil Microbiology

Credits: 4

Fundamental principles of soil microbiology and how they relate to microbial ecology, environmental contamination, agriculture and forestry.

Cross Listed MICR 4140.

Dual Listed SOIL 5140.

Prerequisite: SOIL 2010.

SOIL4150 - Forest and Range Soils

Credits: 3

Characteristics and management of forest and range soils primarily in arid environments. Examines pedagogical units representative of forests and ranges and soil properties, such as nutrient availability and water relations that influence plant growth.

Dual Listed SOIL 5150.

When Offered (Normally offered fall semester)

Prerequisite: SOIL 2010.

SOIL4160 - Soil Health and Nutrient Cycling

Credits: 3

Physical, chemical, and biological aspects of soils that impact fertilizer fate, uptake, and plant growth.

Dual Listed SOIL 5160.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: SOIL 2010.

SOIL4540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design.

Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540.

Dual Listed MOLB 5540/SOIL 5540/ECOL 5540.

Prerequisite: MOLB 2210.

SOIL4565 - Research: Soil Science

Credits: 1-4
Max Credit (Max. 6)

Library, laboratory, and/or green-house investigations on select research topics. Graduate students will be required to give a presentation to the soil science group on their final product/ report.

Dual Listed SOIL 5565.
Prerequisite: basic training in soil science research.

SOIL4780 - Seminar:

Credits: 1-9
Consideration of special topics of current interest in social work. May be repeated for a maximum of 15 hours credit when the seminar topic is different.

Prerequisite: advanced major status; or consent of instructor and junior standing for non-social work majors.

Minor

Energy Resource Management Minor

ERM Minor

The purpose of the ERM minor is to provide students at UW the opportunity to learn about energy and expand their career opportunities with this credential.

Core Courses- 6 credit hours needed

ERS1000 - Energy and Society

Credits: 3
Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ENR 1000.
USP 2003-2014 Code U3O
USP 2015 Code U5PN
OR

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP 2003-2014 Code U3O

USP 2015 Code U5PN

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

OR

ECON3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ERS 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300, and sophomore class standing.

Elective Courses- 6 credit hours needed

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

OR

ERS1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will

be investigated in case studies.

Cross Listed ECON 1300.
USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.
Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.
OR

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.
When Offered (Offered spring semester of odd-numbered years)
Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

INST4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed POLS 4455.
Dual Listed INST 5455.
Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.
OR

POLS4455 - Energy Security

Credits: 3

Evaluates the geopolitical and socioeconomic issues surrounding the roots of energy insecurity and the global challenge to provide adequate, affordable, and accessible energy. Topics of study include the questions of energy nationalism, climate security, import dependence and transportation insecurities, the future of fossil fuels and alternative energies.

Cross Listed INST 4455.

Dual Listed POLS 5455.

Prerequisite: 9 hours of INST or POLS, including INST 2310/POLS 2310.

POLS4350 - Sustainable Development and Global Policy

Credits: 3

Considers in-depth meaning of "sustainable development" and trade-offs necessary to achieve it. Considers this issue from global perspective through application of theories in economics, political science, international relations, technology studies and ethics.

Dual Listed POLS 5350.

Prerequisite: Consent of instructor. POLS 2310 strongly recommended.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOC3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed ENR 3950.

Prerequisite: SOC 1000.

OR

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ERS2010 - Introduction to Land Management

Credits: 3

Max Credit 3

Provides an introduction to land management in the various energy industries. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry. In addition, provides an overview of ethical issues that arise and professional conduct expected in the industry.

ERS4100 - Property I

Credits: 3

Property I addresses the nature of property ownership and the rights associated with property as well as the acquisition and transfer of ownership rights in property and the sharing of ownership rights over time, including estates, future interest, and concurrent estates.

ERS4110 - Law of Contracts

Credits: 3

The Law of Contracts addresses the formation of a contract and the meaning of agreements and the justification of non-performance and breach.

Prerequisite: MGT 1040 and WB/C

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4130 - Oil and Gas Law

Credits: 3

Focuses on the basic legal rules and principles governing the ownership and development of oil and gas, derived from a combination of property, contract, administrative, tort, and constitutional law.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed CHEM 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

OR

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

GEOL4010 - Exploration Geoscience

Credits: 3

Provides students with information and skills necessary to understand the energy exploration modeling process. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, and reservoir characterization.

Cross Listed ERS 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

OR

ERS4010 - Exploration Geoscience

Credits: 3

The purpose of this course is to provide students with information and skills necessary to understand the oil and gas modeling process from exploration to production. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, reservoir characterization, reservoir production, well planning and decision making.

Cross Listed GEOL 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

OR

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of

resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOL1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed ERS 1650.

USP 2015 Code U5PN

OR

ERS1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed GEOL 1650.

USP 2015 Code U5PN

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

OR

GEOL5190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 4190.

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 5720

When Offered (Normally offered fall semester)

Former Course Number [GEOL 4700]

Prerequisite: a grade of C or better in GEOL 2020.

OR

GEOL5720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 4720.

Prerequisite: GEOL 2010.

ME4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ESE 4460

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

OR

ESE4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ME 4460.

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ME4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented..

Cross Listed ESE 4470

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

OR

ESE4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented.

Cross Listed ME 4470.

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6
Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

NAIS4340 - Natural Resource Management on Western Reservations

Credits: 3

Examines natural resource management techniques on western reservations. Focus is on the management and planning of water, grazing, extractive industries, and forestry. Fieldwork on the Wind River Indian Reservation is included.

Cross Listed GEOG 4340.

Prerequisite: 6 hours of 2000-level NAIS courses.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

OR

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

OR

AMST4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052 / ENR 4052 / GEOG 4052 / REWM 4052.

Prerequisite: POLS 1000.

OR

POLS4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed AMST 4052/ ENR 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

GEO4210 - Topics in Geophysics

Credits: 1-3

Max Credit (Max. 9)

Studies particular geophysics topics in-depth at undergraduate level.

Former Course Number [GEO420]

Prerequisite: senior standing and 20 hours in geology.

RNEW4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed BOT 4775.

Prerequisite: LIFE 3400.

SOIL4100 - Soil Physics

Credits: 3

Examines forms and interrelations of matter and energy in the soil environment. Primarily addresses fluxes and transformations of soil water and solutes, as well as physical properties that influence soil productivity.

Dual Listed SOIL 5100.

When Offered (Offered spring semester)

Prerequisite: SOIL 2010 or equivalent introductory soils course.

PETE4860 - Energy, Environment, and Materials

Credits: 3

Understanding the connection between materials, energy and environment, including the history of climate and different types of energy in use for a greener planet. Provides broad knowledge in the areas of energy, material science, chemical, petroleum, and environmental engineering.

Dual Listed PETE 5860.

Prerequisite: Junior standing and PETE 2050 or consent of instructor.

PHYS2250 - Thermodynamic Systems in Energy Science

Credits: 4

Introduces the principles of thermodynamics and their application to energy science. Intended for students majoring in Energy Resource Science.

USP 2003-2014 Code U3SP

Prerequisite: PHYS 1210, grade of C or higher in MATH 2205.

ESE4474 - Topics in Energy Systems Engineering

Credits: 1-3

Max Credit (Max. 4)

Directed research in mechanical engineering.

Prerequisite: Completion of the ME Success Curriculum, ME 3005/ESE 3005.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4020 - Global Biogeochemistry

Credits: 3

Biogeochemistry is the exploration of the physical, chemical, and biological processes that govern the exchange of energy and elements between the biosphere and the geosphere. This course will examine pri

Prerequisite: GEOL/ESS 2000

HIST4535 - History of Oil

Credits: 3

Intensive study of the history of oil development throughout the world. Emphasizes comparative studies of the industry as it developed in various parts of the world and during various time periods, from pre-historic times to the present. The Wyoming oil/energy mineral history is an important component.

Dual Listed HIST 5535.

Prerequisite: 9 hours in history.

ESE4060 - Energy Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience on an energy-related project. Multidisciplinary teams prepare a project proposal or Statement of Qualifications, generate a morphological study of their project, develop mathematical models of their design, and prepare project plans and specifications. Project management and methods are also presented.

USP 2015 Code U5C3

Prerequisite: Completion of the ME Success Curriculum, ESE 3040 and ESE 3360.

ERS4960 - Energy Field Studies

Credits: 1-3

Various facets of energy resource management and development are covered by visits to oil and gas wells, coal mines, power plants, wind farms, and other energy production and research sites. A trip is normally planned for 5 to 6 days.

Prerequisite: WB; ERS 1000/ENR 1000 or ECON 1300/ERS 1300. Undergraduate Research.

EDSE3040 - Energy and Power Technology

Credits: 3

A conceptual analysis and synthesis of energy requirements and sources, with emphasis on alternate energy systems. Analysis of energy conversion and the application of mechanical, fluid, thermal and electrical power systems.

When Offered (Offered through UW/CC)

Former Course Number [EDIE 3040]

Prerequisite: PHYS 1050 or PHYS 1110.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the

approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

BKCH3021 - Fundamentals of Blockchain

Credits: 3

The purpose of this course is to provide a fundamental understanding of blockchain technologies and their implications. Topics will focus on understanding how blockchain may change the way we think about money, disrupt traditional financial institutions and eliminate costly intermediaries.

Prerequisite: Requires Junior Class Standing.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

EE4510 - Power Systems

Credits: 3

Electric power distribution and transmission. Distribution systems, transmission line calculations, installation and protection; substations, corona, protective relaying and carrier current communication and telemetering. Introduction to system stability studies.

Prerequisite: ES 2210 and EE 3510.

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE3510 - Electric Machines and Power Systems

Credits: 4

Polyphase AC circuits; single phase and polyphase transformers; AC synchronous and induction machines; introduction to power systems and per unit system; transmission line parameters; steady-state operations of transmission lines; power flows; transient stability; synchrophasor system and its applications.

Prerequisite: ES 2210, or ES 2215 and ES 2216.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

PETE2050 - Fundamentals of Petroleum Engineering

Credits: 3

General introduction to petroleum engineering, including petroleum geology, exploration, reservoir rocks, and fluid flow through porous media, drilling fundamentals, completion technology, well logging and testing, methods of production, stimulation methods, enhanced oil recovery, reserves and economics.

Prerequisite: grade of C or better in both MATH 2205 and PETE 1060.

CE3400 - Introduction to Environmental Engineering

Credits: 3

An introduction to the major topics in environmental engineering. Focus areas include water supply, wastewater treatment, air pollution control and solid and hazardous waste management. Quantitative aspects and engineering

solutions to problems are emphasized.

Prerequisite: MATH 2205 and CHEM 1020 or equivalent.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

CHE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430 /ENR 4430.

Prerequisite: CHEM 1020.

ME3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/ equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ARE 3400

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ME3450 - Properties of Materials

Credits: 3

Mechanical, electrical, thermal and chemical properties of materials. Theoretical treatment of structure of solids and design for specified properties.

When Offered (Normally offered spring semester)

Former Course Number [ES 3450]

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ME3975 - Internship

Credits: 3

Students may apply for credit for extended work experience (>10 weeks; full-time) engaging in mechanical engineering work and supervised by an engineer in mechanical engineering (or closely related field). Students should apply through their adviser prior to the work experience.

Restricted Enrollment is by departmental approval only.

Prerequisite: consent of the department head.

ME4340 - Gas Turbine Engines

Credits: 3

Thermodynamic analysis and design of ground-based and aero-propulsion gas turbine engines.

Prerequisite: Completion of the ME Success Curriculum, ES 2310 and ES 2330.

ESE4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems. Cross-listed with ME 4455 and dual-listed with ME 5455.

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ME4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ARE 4430

Prerequisite: ARE 3400/ME 3400 and ARE 3360/ME 3360 or concurrent.

ME4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems.

Dual Listed ESE 4455

Prerequisite/Corequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

QuickStart Program

Quickstart 3+3, School of Energy Resources + College of Law

UW offers qualified undergraduate students a fast-track to a Juris Doctorate. The 3+3 Program at UW is an opportunity for qualified undergraduate students to earn their **bachelor's degree and law degree in six years** instead of seven years.

University Studies Program Requirements (Required for both EES and PLM)

The University Studies Program 2015

The University Studies Program 2015 develops a student's foundational knowledge to prepare them for the Bachelor of Science degree program. Some of the categories of USP will be completed by completing the degree requirements as outlined below. Students should review their degree audits carefully to ensure that USP requirements are completed. Students transferring with a qualifying associate degree will have most of the lower division portion of the USP requirement waived. For more information about qualifying earned associate degree, see the "Articulation: Earned Associate Degrees" information in this catalog.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3
Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3
Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Energy and Environmental Systems (Years 1-3)

Students accepted by UW College of Law (COL) into the 3+3 program begin taking classes at COL in what would otherwise be their senior year. Year one of law school (31 credits) counts toward both the BS and the JD degrees. Students must select one path for Years 1-3, either Energy and Environmental Systems or Professional Land Management.

EES majors can become environmental scientists who collect samples of air, soil, & water to identify environmental impacts, resolve environmental threats, & provide guidance on quality regulation and manage natural resources.

Students will complete a minimum of 85-95 credits in their baccalaureate (undergraduate) program by the end of their junior year (including required general education and major courses). Students will complete 90 credits with the College of Law. Students will be granted a BS upon completion of the 120 credit hours required for the undergraduate degree in BS-ERMD (using year one of College of Law coursework), with a cumulative minimum UW GPA of 2.0 or higher. Students must complete 42 hours of upper-division (3000-level or above) coursework, 30 of which must be from the University of Wyoming. During the Energy Resource Management and Development program (years 1-3), students will be advised by the School of Energy Resources advisor. During the College of Law program (years 4-6), students will receive advising from the College of Law.

EES Core Required Curriculum

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP 2003-2014 Code U3O

USP 2015 Code U5PN

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

GIST1200 - Geospatial Foundations

Credits: 3

Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2023 - Biology of Plants and Fungi

Credits: 4

An integrated course dealing with the central themes of biology including cell and molecular biology, genetics, evolution and ecology of plants and fungi. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered fall semester).

Former Course Number [BIOL 2023]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

REWM2000 - Principles of Rangeland Management

Credits: 3

Basic principles of range management as they apply to various regions and vegetative types. Relationship of range management practices to livestock production, wildlife management, forestry, hydrology and other land uses. Introductory course for majors and non-majors.

Prerequisite: LIFE 1101 or LIFE 1010.

REWM2400 - Range Ecosystems and Plants

Credits: 4

Ecology of range ecosystems of western North America and identification of 200 most common plants species, including taxonomic keying.

Former Course Number [2500]

Prerequisite: REWM 2000 with a grade of C or better.

REWM3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed ENR 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

REWM4200 - Reclamation of Drastically Disturbed Lands

Credits: 3

Overviews reclamation of drastically disturbed lands in the west, emphasizing surface mined lands. Includes principles of ecology, agronomy, soils and other relevant disciplines as applied to mitigate adverse environmental impacts of land disturbance.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400, AECL 2100.

REWM4580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various disturbed ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic influences on degradation and strategies for vegetative rehabilitation. Strong focus on current research to formulate restoration strategies.

Dual Listed REWM 5580.

Prerequisite: REWM 4200 or LIFE 3400.

SOIL2010 - Introduction to Soil Science

Credits: 4

Introduces soil ecological processes and management in terrestrial environments. Discusses interaction of soil, biological, chemical, morphological, and physical properties with land management in wild land and agricultural ecosystems. Emphasis is on plant response to soil conditions.

USP 2003-2014 Code U3SE

Prerequisite: CHEM 1000 or CHEM 1020.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Please see this list to choose your elective.

Professional Land Management (Years 1-3)

Students accepted by UW College of Law (COL) into the 3+3 program begin taking classes at COL in what would otherwise be their senior year. Year one of law school (31 credits) counts toward both the BS and the JD degrees. Students must select one path for Years 1-3, either Energy and Environmental Systems or Professional Land Management.

Professional Land Management majors determine ownership and title of surface and subsurface rights to negotiate leases with land/mineral owners, coordinate field exploration, and ensure compliance with governmental regulations.

Students will complete a minimum of 85-95 credits in their baccalaureate (undergraduate) program by the end of their junior year (including required general education and major courses). Students will complete 90 credits with the College of Law. Students will be granted a BS upon completion of the 120 credit hours required for the undergraduate degree in BS-ERMD (using year one of College of Law coursework), with a cumulative minimum UW GPA of 2.0 or higher. Students must complete 42 hours of upper-division (3000-level or above) coursework, 30 of which must be from the University of Wyoming. During the Energy Resource Management and Development program (years 1-3), students will be advised by the School of Energy Resources advisor. During the College of Law program (years 4-6), students will receive advising from the College of Law.

PLM Core Required Curriculum

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGECE 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

OR

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGEC 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA
USP 2015 Code U5C1

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP 2003-2014 Code U3O
USP 2015 Code U5PN

ERS2010 - Introduction to Land Management

Credits: 3

Max Credit 3

Provides an introduction to land management in the various energy industries. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry. In addition, provides an overview of ethical issues that arise and professional conduct expected in the industry.

ERS4010 - Exploration Geoscience

Credits: 3

The purpose of this course is to provide students with information and skills necessary to understand the oil and gas modeling process from exploration to production. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, reservoir characterization, reservoir production, well planning and decision making.

Cross Listed GEOL 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4985 - Seminar

Credits: 1-3

Max Credit (Max. 3)

Energy professionals, including accredited professional landmen, practicing attorneys, and other energy professionals will present a colloquium styled course to bridge conceptual content with realistic workforce focused applications.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300 and WA and QB.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6
Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

FIN2100 - Principles of Finance

Credits: 3
Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

FYS-First Year - Seminar

Credits: 3
Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

GEOL1100 - Physical Geology

Credits: 4
Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE
USP 2015 Code U5PN

GIST1200 - Geospatial Foundations

Credits: 3
Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

OR

MATH1450 - Algebra and Trigonometry

Credits: 5

Emphasizes aspects of algebra, trigonometry and problem solving important in the study of calculus. Functions and their applications to real world problems. Classes of functions including polynomial, exponential, logarithmic and trigonometric functions. Intuitive introduction to the idea of limit and sequence which are developed further in the calculus sequence. For the student with considerable prior exposure to trigonometry and algebra. Graphing calculators are used frequently in class and on assignments. See instructor for specifications.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

OR

MATH2355 - Mathematical Applications for Business

Credits: 4

Primarily for students in the College of Business. Includes the mathematics of finance; systems of linear equations and matrices; linear programming; sets, counting, and probability. Students will learn to use Excel spreadsheets to solve business application problems in a computer lab that meets one day per week.

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 26 or Math SAT of 600.

MGT2100 - Management and Organization

Credits: 3

An introduction to the theory and practice of management with emphasis on individual and small group behavior, design and structure of organizations, relationship between the organization and its environment and statistical and quantitative skills used in examination of management processes. Also covers interpersonal communications, ethics and international management.

Prerequisite: COM1, sophomore class standing.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

V- - U.S. & WY Constitution

Credits: 3

Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

College of Law Required Courses (Years 4-6)

Please visit the College of Law Juris Doctor Program.

University Honors College

Guthrie House

Peter Parolin, Dean

Phone: (307) 766-4110

Web site: uwyo.edu/honors

The Honors College provides academically ambitious students with a series of curricular and co-curricular opportunities. Through these opportunities, students gain the breadth of knowledge needed by citizens, professionals, and family members to be effective in a lifetime of stimulating and enriching pursuits. Honors students learn to write cogently for a variety of audiences in their academic disciplines and beyond. They learn to locate and use reliable information and trustworthy opinion. Through appropriate coursework, they learn how to become engaged citizens and to understand the ethnic and cultural diversity of America and the world. They learn the purposes and values of the arts, humanities, sciences and social sciences. The Capstone Project is a sustained research or creative activity through which students demonstrate what they have learned: to formulate a project independently, to develop the intellectual and creative means to complete it, and to write and speak effectively about their work. The Capstone Project is frequently used as evidence of critical thinking in graduate and career applications.

Honors College Learning Outcomes

Students graduating from the Honors College will be able to: (1) engage in problemsolving, research, and creative pursuits that utilize an interdisciplinary approach (2) articulate the value of international and diversity-focused perspectives (3) develop their own styles of leadership and service and identify meaningful opportunities for engagement in these areas and (4) create intentional pathways through career development, including utilizing internship opportunities.

Honors College Admissions

The Honors College seeks well-rounded, ambitious, and curious learners and leaders. Students are invited to apply to the college prior to their first year. First year applicants should apply to the Honors College when submitting their general application to UW. The Honors College admissions committee considers academic performance and test scores holistically alongside an application essay and high school transcript.

Students admitted into the Honors College who are College of Engineering majors will automatically be accepted as Honors College Engineering students.

The Honors College reviews applications on a rolling basis. Students are admitted to the Honors College only after they have been accepted to UW. Incoming, continuing, and transfer students who are interested in applying to Honors should consult our Admissions page: <https://www.uwyo.edu/honors/applications/>

The Honors College also welcomes application from new transfer students. Transfer students entering the Honors College typically have an overall college GPA of 3.25 or higher. The college also admits transfer students and current UW students with at least three semesters remaining prior to graduation.

To maintain good standing in the college, a student must achieve a 3.0 GPA at the conclusion of the student's first year of study. A 3.25 GPA at the conclusion of the student's second year of study is required, with this standard remaining throughout their academic career. Interested high school seniors and transfer students are encouraged to come by the Honors College or to write to the Dean, The Honors College, Dept. 3413, 1000 University Ave, Laramie, WY 82071. The email address is honors@uwyo.edu.

Scholarships

The Honors College supports UW in financial aid packages for students. In keeping with the vision of Honors to facilitate an international experience, Honors provides scholarships to assist with study abroad. Fellowships for supporting research or creative projects for the senior thesis may also be available.

Program Requirements

To earn a minor in Honors, Honors students must complete a total of five courses in Honors and a Capstone Project, and complete the First-Year and Advanced Honors SOAR badge requirements. They must also graduate with a 3.25 GPA. Students who transfer to UW or join Honors as continuing UW students may have some of their required Honors courses and SOAR requirements waived.

The Honors curriculum immerses students in multi-disciplinary inquiry. Students begin by taking the First Year Colloquium, a two-semester course sequence that takes a complex topic - for example, *Dreams and Reality - or- What Does it Mean to be a Human* and explores it with readings based in the humanities, arts, sciences, and social sciences. The course includes visits to the theatre, the Art Museum, and other UW resources, building community while learning about UW. Thereafter, students enroll in three additional courses: an Honors Non-Western Perspectives course and six hours of upper-division coursework in Honors that emphasize interdisciplinarity. At the upper division, it is strongly recommended that students take at least one Honors course per year. Throughout their Honors academic track, students will complete each level of the Honors SOAR Badge.

The Honors experience concludes with a Capstone Project, either a paper or project, done under faculty mentorship and presented publicly. This requirement ensures that students gain creative or research experience in an area of their interest. These projects often lead to graduate studies or a special career path.

Honors College Minor Curriculum

Specific details about required Honors College coursework can be found at:

[Honors College Minor Curriculum](#)

Honors College SOAR Badge requirements

Students are required to complete each level of the Honors SOAR Badge program. Assistance is available from the Honors College.

Honors College SOAR Badge Requirements

Capstone Project (Creative or Research-based)

- Students are not required to register for a specific course to complete the Capstone Project. There is no specific Capstone Project course; students complete the project independently in coordination with a faculty mentor.
- Honors offers optional research and capstone methods courses (i.e. HP 4990) that prepare students for independent capstone projects and in some cases work directly on those projects.
- Honors does offer an optional independent study course if desired. Up to 6 hours of credit in the optional HP4976 - Independent Study are allowed.
- HP 4976, HP 4990, and any other research methods courses contribute to the capstone projects. As such, they do not count toward required Honors coursework or USP requirements.
- Students may be pursuing a major that requires a senior or capstone project, and a major-specific project may also meet the requirement for the Honors College Capstone Project. Please contact the Capstone Project Coordinator for details. Email: honorscapstone@uwo.edu

Honors College Additional Requirements

Students must also graduate with a 3.25 cumulative UW GPA.

Successful completion of the program is indicated on transcripts and diplomas, and seniors are recognized at graduation ceremonies.

Priority registration for enrollment in Honors courses is given to Honors College students, although non-Honors students with a 3.25 GPA or with permission of the instructor are eligible and encouraged to enroll once the general registration period begins, if space is available.

Honors College Advising

The Honors College offers supplemental advising that supports the work that students do with their primary major advisors. Honors Advising instructs students on Honors curriculum requirements and helps students select their Honors courses as well as take advantage of special Honors College opportunities. Students cannot register for Fall or Spring classes without meeting with their primary major advisor.

Other Programs

Honors College Minor Curriculum

Required Courses

Honors Colloquium I (3 Hours)

HP1020 - Honors Colloquium I

Credits: 3
Max Credit 3

Honors Colloquium I is the first course in a two-semester sequence introducing students to the Honors College and to interdisciplinary modes of inquiry and expression through intensive analytical reading and writing, lectures, Scholars Sessions, and experiential learning.

When Offered (Offered fall semester)

USP 2003-2014 Code U3L, U3WA

USP 2015 Code U5C1

Restricted Honors College

Prerequisite: participation in UW Honors College.

Honors Colloquium II (3 Hours)

HP2020 - Honors Colloquium II

Credits: 3
Max Credit 3

Honors Colloquium II is the second course in a two-semester sequence introducing students to the Honors College and to interdisciplinary modes of inquiry and expression through intensive analytical reading and writing, lectures, Scholars Sessions, and experiential learning.

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Prerequisite: WA. COM I

Honors Non-Western Perspectives (3 Hours)

Honors Non-Western Perspective courses are listed as HP 3151

A single course cannot count as both the Non-Western and an Upper Division Interdisciplinary Honors Elective.

Upper Division Interdisciplinary Honors Electives (6 Hours)

Must be three unique courses to meet these requirements; a single course cannot count as both the Non-Western and an Upper Division Interdisciplinary Honors Elective.

- Any two upper division Honors courses excluding HP 4976 and HP 4990

University Studies Program Requirements

The University Studies Program 2015

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

HP 4990

UWYO

UWYO courses are designed to help students acculturate to college life and coursework and learn key academic skills. Course content is combined with training in critical reading, academic writing, research, formal presentation, and many other emphases. UWYO courses have low student-teacher ratios in an effort to help students experience richer connection with the instructor and students in the course. Most UWYO courses imbed intellectual self-awareness within the course goals. Several UWYO courses are part of UW learning communities and provide additional opportunities for students to engage with and work together in their cohort.

Major

Bachelor of General Studies (BGS)

General Studies is a multidisciplinary degree that bridges academic disciplines to facilitate degree completion. This degree is designed for students with significant college credit and/or complex curricular interests.

Learning Outcomes

Students completing the Bachelor of General Studies will:

- Demonstrate knowledge in focus areas
- Demonstrate the capacity to integrate knowledge and modes of thinking from two or more disciplines
- Demonstrate an ability to think creatively about complex problems in order to construct, evaluate, and implement innovative possible solutions
- Demonstrate an ability to communicate to academic or professional audiences in written, oral, and digital form as appropriate to specific disciplines and interdisciplinary fields
- Demonstrate higher-order thinking skills such as interpretation, analysis, evaluation, synthesis, creative generation, and innovation

The Four Year Degree Plan below demonstrates the flexibility of the Bachelor of General Studies; which is particularly valuable for transfer students with high student credit hours. However, this degree is not designed for first year students. The degree requires 60 credit hours and intensive advising before it can be declared as a major. Addendum I includes a degree check-list which may be more useful for degree planning

University Studies Program Requirements

- First Year Seminar (3)
- Communication Skills 1 (USP, C1) (3)
- Quantitative Reasoning (USP) (3)
- Physical and Natural World (3)
- Communication Skills 2 (USP C2) (3)
- Physical and Natural World (USP) (3)
- Human Culture (USP) (3)
- US and Wyo government (USP) (3)
- Human Culture (USP) (3)
- Upper Division Capstone (USP, C3) (3)

Focus Areas (Each requires 18 hours)

A minimum of 6 hours in each Focus Area must be Upper Division

Focus Areas Listed by College

College of Agriculture and Natural Resources

- Biomedical Sciences: Microbiology (MICR), Molecular Biology (MOLB), Pathobiology (PATB), Family and Consumer Science (FCSC), Animal Science (ANSC), Food Science (FDSC)
- Agricultural and Natural Resources Sciences: Animal Science (ANSC), Ecosystem Science and Management (ESM), Renewable Resources (RNEW), Entomology (ENTO), Soil Science (SOIL), Agroecology (AECL), Plant Sciences (PLNT), Agricultural Economics (AGEC)
- Human Sciences and Public Policy: Family and Consumer Sciences (FCSC), Agriculture (AGRI), Agricultural Economics (AGEC), Food Science (FDSC)

College of Arts and Sciences:

- Humanities: Art & Art History (ART), English (ENGL), Modern and Classical Languages (LANG), Philosophy (PHIL), Religious Studies (RELI), American Studies (AMST), History (HIST), Anthropology (ANTH), African American Diaspora Studies (AAST), Native American & Indigenous Studies (NAIS), Latina/o Studies (LTST), Gender and Women's Studies (GWST), International Studies (INST), Theatre and Dance (THEA)
- Fine Arts: Theatre and Dance (THEA), Music (MUSC), Art and Art History (ART), African American Diaspora Studies (AAST), Native American & Indigenous Studies (NAIS), Latina/o Studies (LTST), Gender and Women's Studies (GWST), Creative Writing (CW), English (ENGL)
- Social Sciences: Communications and Journalism (COMM/COJO), History (HIST), Anthropology (ANTH), Criminal Justice (CRMJ), Geography (GEOG), Religious Studies, (RELI), Sociology (SOC), Political Science (POLS), International Studies (INST), Native American & Indigenous Studies (NAIS), Psychology

(PSYC), Statistics (STAT), African American Diaspora Studies (AAST), Latina/o Studies (LTST), Gender and Women's Studies (GWST)

- Math & Sciences: Math (MATH), Statistics (STAT), Botany (BOT), LIFE Program (LIFE), Psychology (PSYC), Zoo/Physiology (ZOO), Chemistry (CHEM), Geology and Geophysics (GEOL), Physics and Astronomy (PHYS), Anthropology (ANTH), Geography (GEOG)

College of Business

- *Management, Marketing, and Decision Science: Management (MGT), Marketing (MKT), Decision Science (DSCI)
- *Accounting and Finance: Accounting (ACCT), Finance (FIN)
- Economics: Economics (ECON)

*Due to accreditation requirements, a student may not choose both the "Management, Marketing, and Decision Science" and the "Accounting and Finance" focus areas to comprise their Bachelor of General Studies major.

College of Education:

- +Elementary Education: Early Childhood (EDEC), Elementary Education (ELED), Curriculum and Instruction (EDCI)
- +Education and Society: Educational Studies (EDST), Exceptional Children (EDEX), Instructional Technology (ITEC), Curriculum and Instruction (EDCI)

+The Bachelor of General Studies does not satisfy the requirements for teacher licensure through the Wyoming Professional Teaching Standards Board.

College of Engineering:

- *Engineering Studies: Engineering Science (ES), Architectural Engineering (ARE), Civil Engineering (CE), Chemical Engineering (CHE), Electrical Engineering (EE), Energy Systems Engineering (ESE), Mechanical Engineering (ME), Petroleum Engineering (PETE)
- *Applied Science Studies: Atmospheric Science (ATSC), Computer Science (COSC)

*The Bachelor of General Studies does not satisfy the requirements for an ABET/EAC accredited engineering degree or an ABET/CAC accredited computer science degree.

College of Health Sciences:

- Community and Public Health: Health Education (HLED), Wyoming Institute for Disabilities (WIND)

Haub School of Environment and Natural Resources:

- Environment and Natural Resources: Environment and Natural Resources (ENR), Environmental Systems Science (ESS)

Upper Division

21 in major/42 total

Additional Information

Degree Structure: The Bachelor of General Studies is comprised of two curricular focus areas and one 3 credit capstone that fulfills the University Studies Program (USP) "Communications Skills 3" (C3) requirement. Each focus area is defined by subject area, fielded by a specific college, and comprised of at least 18 credit hours. Students can choose from a menu of 16 focus areas across the university. Of the 39 credits required for the major, 21 credits must be upper division with a minimum of 6 upper division credits in each focus area. As a university-wide degree, all USP and university-wide requirements must be met.

No course can count toward more than one area of focus. Students must earn a C or better for all credits counting toward the major. One USP "Human Culture" (H) course and one "Physical & Natural World" (PN) course may also count toward the major. No college core applies to the degree. To declare this major, students must have earned 60 credit hours and received intensive advising from the college fielding their primary focus area.

Focus Areas: Each of the focus areas identifies a knowledge domain that includes courses from a range of disciplines within a particular college. Focus areas include all courses from each of the disciplinary prefixes/subject areas or programs specified as belonging to the focus area (no course exceptions or course lists will be maintained). This will make advising for the degree manageable and will ensure access to needed coursework. Students should choose courses from within the focus area thematically to gain a breadth and depth of knowledge appropriate to the curricular or professional interest that ties together the two focus areas of the student's major. Students should work with their advisor to ensure that their coursework includes the skills and methods necessary for expertise in the substantive area of interest. Proposed focus areas are listed below by college.

Advising Career Exploratory Studies

STEP

USP Codes are listed in brackets by the 2003 USP code followed by the 2015 USP code (e.g. [QB><Q]).

STEP courses are housed within the Learning Resource Network (LeaRN) Program and comprise first-year and academic success courses aimed at supporting students in college research, written and professional communication, major and career exploration, and general transition strategies. STEP courses are often embedded in first-year programs including Fall Bridge, First-Year Experience, First-Year Interest Groups (FIGs), and First-Year Seminars.

English Language Center

Cheney International Center 28

Frederica Suess, Director

Phone: (307) 766-3630

Web site: www.uwyo.edu/geo/elc

Our Mission

The English Language Center serves the University of Wyoming and surrounding community by preparing non-native speakers of English linguistically, culturally, and academically to meet the requirements for success in U.S. higher education environments and to fully engage in campus life.

IEP Conditional Admission: Conditional admission is available for undergraduate applicants who are academically eligible but have low language proficiency scores. Students need to do 2 applications; one for IEP and one for a degree program for consideration. *Only one application fee is needed. Contact us directly if you are interested in this option: elc@uwyo.edu.

Other Programs

Intensive ESL Program

The Intensive ESL Program is a full-time English language study program. Students are in class 20 hours every week for one whole semester of 15 weeks. To study in the Intensive ESL Program, students must have an F-1 Student Visa. All instructors are experienced ESL professionals and qualified with a Masters Degree or higher in TESL or a relevant field of study.

Courses

Students take three classes daily, Monday through Thursday:

- **Reading & Vocabulary:** College vocabulary skills, reading strategies, and study skills.
- **Listening & Speaking:** Pronunciation/conversation, lecture listening, note-taking skills, and academic presentations.
- **Integrated Skills:** Grammar-focused reading, writing, and speaking class using top-ics from academic content areas.

University of Wyoming at Casper

University of Wyoming at Casper

Brent L. Pickett, Ph.D., Dean

125 College Drive, Casper WY 82601

(307) 268-2713

Web site: <https://www.uwyo.edu/uwcasper/>

Since 1976, the University of Wyoming at Casper (UWC), in partnership with Casper College, has offered on-site courses and a slate of university degree programs in Casper. UW-Casper is also the location in Natrona County for statewide degree programs and classes offered through Distance Credit Programs.

UW-Casper was established to meet the needs of students unable to move to Laramie. Some of these students are nontraditional students who may be older or have families, homes, or jobs in the Casper area. UW-Casper is designed to meet the academic needs of students in a setting that provides small class sizes, dedicated staff, and award-winning faculty. Courses are taught by resident and visiting faculty who are regular or part-time members of UW academic departments. A full-service student success office handles admission, registration, financial aid, and advising.

Classes are taught onsite on the Casper College campus. More than 4,000 students have received their UW degrees through UW at Casper support and programs.

UW-Casper also has the Bachelor's of Applied Science (BAS) program. This fully online program is designed to stack onto an associate's degree to help persons already in the job market further develop their skills and advance their career potential. There are two areas of concentration available in the BAS, one in Health Services Administration and the other in Organizational Leadership.

Undergraduate Majors

Organizational Leadership, B.A.S.

For more information, contact UW at Casper at 125 College Drive, Casper, WY 82601; (307) 268-2713, (877) 264-9930; or by e-mail at uwcasper@uwoyo.edu.

Major

Organizational Leadership, B.A.S.

The Bachelor of Applied Science degree (BAS) is a completely online program designed for individuals who have completed an associate's degree and who need or desire the additional breadth in skills, knowledge, and professional expertise to enhance their capabilities in their own careers and in the organizations in which they work.

Major Requirements (12 credits)

FCSC3110 is REQUIRED for Option A.

AGRI4350 is REQUIRED for Option B.

PHCY4441 is REQUIRED for Option C.

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3

Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP 2003-2014 Code U3I, U3L

Prerequisite: WA and junior status.

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

OR

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

OR

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3

Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

PHCY4441 - Intro Health Institution Leadership

Credits: 3

Max Credit 3

This course provides undergraduates information through analysis of theory and application. The course will use discussion boards to highlight examples of leadership roles and discuss differences in types of leadership roles. Organizational, team, and individual dimensions of leadership are examined.

Restricted Selection of leadership track in BAS program

Contemporary Society Requirement (2 courses, 6 credits)

Pick **two courses** from the following courses listed:

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

HIST4340 - The Social History of American Women

Credits: 3

Explores everyday life experiences of American women from the 17th century to the present. Focuses on the complex influence of gender, race and class in shaping those experiences; also, analyzes the ways in which women's dissatisfaction with their position in society formed the basis for the development of American feminism and led to the formation of an organized women's movement.

Dual Listed HIST 5340.

USP 2015 Code U5H

Former Course Number [4840]

Prerequisite: 9 hours of HIST or GWST.

HIST4490 - Modern America, 1960 to Present

Credits: 3

Studies political and diplomatic aspects of the U.S. since 1960. Emphasizes impact of Cold War, social and political tensions at home, civil rights and government policies.

Dual Listed HIST 5490.

Prerequisite: 9 hours of HIST.

HIST4545 - The Multicultural West

Credits: 3

Explores the American West as a meeting ground of diverse peoples and their diverse cultures. Focuses on the sustained cross-cultural interchange between Native Americans, Euro-Americans, African Americans, Latin Americans, and Asian Americans from trans-Appalachia to the Pacific Coast from the eighteenth century to the present.

Prerequisite: 9 hours of HIST.

POLS3100 - Politics and the Judicial Process

Credits: 3

Analyzes courts and their personnel in the American political system, including examination of functions of courts, characteristics of judicial process, approaches to the study of judicial behavior, and role of courts as policy makers.

Former Course Number [2100]

Prerequisite: POLS 1000.

POLS3600 - American Political Thought

Credits: 3

Examines key primary sources and traditions from the founding to present.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: POLS 1000 or permission of instructor.

POLS4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, GEOG 4051 and REWM 4051.

Dual Listed POLS 5051.

USP 2003-2014 Code U3WC

Former Course Number [4050]

Prerequisite: POLS 1000.

SOC3150 - Collective Behavior and Social Movements

Credits: 3

Analyzes and explains fads, fashions, rumors, riots and mass behavior in light of theoretical frameworks. Studies social movements including blacks, women, labor, religions and students.

Prerequisite: SOC 1000.

SOC4370 - Global Political Economy

Credits: 3

Examines the interaction of politics and the economy at the global level. Evaluates how political and economic decisions of one country or groups of countries affect institutions and life circumstances in others. Assesses the causes of consequences of globalization as rooted in political economy.

Cross Listed INST 4370.

USP 2003-2014 Code U3G

Prerequisite: SOC 1000 and junior standing or SOC 3000.

Career Electives (9 credits)

Students will work with their advisor to identify these career electives.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3

Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Option A: Community Resources (12 Credits)

The Community Resources option guides students through an examination of how managers operate effectively with stakeholders and employees in community leadership and non-profit settings.

AGEC4720 - Water Resource Economics

Credits: 3
Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGEC 1020 or equivalent; QB course, WB course; senior standing.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3
Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.
Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3
Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

Option B: Business Management (12 Credits)

The Business Management option guides students through an examination of how managers create value by understanding and developing employee and customer relationships.

MGT3410 - Human Resources Management

Credits: 3

A study of the formal systems used to manage people at work. Emphasis is on concepts and procedures of EEO, diversity, job analysis, job evaluation, wage and salary administration, performance evaluation, safety, employee services and fringe benefits.

Prerequisite: MGT 2100 and advanced business standing.

Option C: Health Services Administration (HSA) Concentration (11 Credits)

The Health Services Administration (HSA) concentration allows students to meet their career goals. This concentration:

Is designed for students who are interested in careers such as health services administrators, patient service associates, community outreach coordinators, healthcare office managers, and various positions in community health agencies and the health care industry.

Benefits students who are interested in working side by side with health care workers.

Provides an excellent option for those who want to advance in healthcare but who do not want to pursue additional clinical education.

Students pursuing this concentration must take the business management track and will substitute PHCY 4160/4441 Intro to Health Leadership in lieu of AGRI 4350.

PHCY4050 - Evolution of American Health

Credits: 2

PHCY4141 - Health Economics and Outcomes

Credits: 3

This course considers the role of the range of outcomes used by clinicians and health care systems in assessing treatment modalities. The framework for conducting and assessing outcomes research will be emphasized.

PHCY4241 - Biopharmaceutical Regulatory Compliance

Credits: 3

This course considers the role of regulatory agencies that prescribe conduct in the healthcare industries and professions, focusing on the Food and Drug Administration. The functioning of other agencies, such as the federal Drug Enforcement Administration, state boards of pharmacy and state departments of health are also considered.

PHCY4341 - Intro to Healthcare Quality

Credits: 3

This course will provide an overview of healthcare quality and performance measurement. It will also provide a review of quality improvement strategies used in various healthcare settings.

Program Overview

Dr. Josh Valk, Director- Bachelor of Applied Science Program

jvalk@uwyo.edu

This program is available by distance delivery only. Entry into the program requires an application process. Students must apply for admission to UW first. Official transcripts from all institutions attended must be submitted to UW Admissions. Entry into this program requires an existing associate's degree. Transcripts will not be analyzed prior to application.

All students pursuing a bachelor's of applied science degree in Organizational Leadership are required to complete: a) University Studies Program (USP) requirements, b) 120 approved credits, 42 of which must be upper division (with 30 coming from UW), and c) courses within the program checklist. The program is designed to be completed in two years, but students may move at a pace that works for them.

All courses within the Bachelor of Applied Science must be completed with a grade of C or better. If you do not pass the course with a grade of C or better after three attempts you will be dismissed from your organizational leadership major.

Each student is assigned an advisor, who can be reached at (bas@uwyo.edu), and will be advised each semester. It is important that you work closely with your advisor to plan your course schedule.

University Requirement - All degrees at the University of Wyoming require 42 upper division credit hours (3000+).

Residency Requirement - All degrees must include a minimum of 30 upper division credit hours from UW

Zoology, B.S. UW - Casper

Zoology is the study of animals: their structure, physiology, development and evolution. One of the enduring fascinations of zoology is that we can learn so much about ourselves and our environment by studying what our fellow creatures do.

At the end of this program students will have a comprehensive knowledge of zoology, will be well prepared for graduate education, and will be equipped to enter any of the many employment opportunities that are available.

University Studies Program Requirements

The University Studies Program 2015

FYS-First Year - Seminar

Credits: 3

Provides the skills and philosophy necessary for success as a student and life-long learner. Students will have an opportunity to select from a wide range of academic courses covering unique and interesting subject matter focused on developing critical thinking, communication, and information literacy skills. Colleges, departments, and programs cannot require a particular first-year seminar class for a major. Must be completed with a C or better.

COM1 - Communication 1

Credits: 3

College Composition and Rhetoric must be completed with a C or better.

COM2 - Communication 2

Credits: 3

Max Credit 3

Successful completion of C1 is required prior to enrolling in a C2 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

COM3 - Communication 3

Credits: 3

Max Credit 3

Successful completion of C2 is required prior to enrolling in a C3 course. This category can be fulfilled by courses taken from the student's major department. Must be completed with a C or better.

Q- - Quantitative Reasoning

Credits: 3

Max Credit 3

All students must fulfill the Q requirement, either by placing out of the course or through successfully completing the Q course.

PN- - Physical and Natural World (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

PN- - Physical and Natural World (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

H- - Human Culture (1)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken within the student's major department.

H- - Human Culture (2)

Credits: 3
Max Credit 3

Approved coursework does not include courses taken from the students' major department.

V- - U.S. & WY Constitution

Credits: 3
Max Credit 3

Approved V courses fulfill both US and Wyoming Constitutions requirements.

Foundation Courses

Foundation Courses

MATH1400 - College Algebra

Credits: 3

Emphasizes aspects of algebra important in the study of calculus. Includes notation of algebra, exponents, factoring, theory of equations, inequalities, functions, graphing and logarithms. For students who plan to enroll in a calculus course (MATH 2200 or MATH 2350).

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in Math 0925 or Level 3 on the Math Placement Exam or Math ACT of 23 or Math SAT of 600.

MATH1405 - Trigonometry

Credits: 3

Emphasizes aspects of trigonometry important in the study of calculus. Interplay between trigonometric expressions and their graphs. Students are expected to use a graphing calculator in the course and on exams. See instructor for specifications. Topics include: angle measurement, trigonometric functions, graphing, laws of sines and cosines, identities, equations, polar equations and graphs, vectors, complex numbers, DeMoivre's theorem. This course is designed for students with little or no prior knowledge of trigonometry who plan to enroll in MATH 2200.

USP 2003-2014 Code U3QA

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1400 or Level 4 on the Math Placement Exam or Math ACT of 25 or Math SAT of 600.

MATH2200 - Calculus I

Credits: 4

Emphasizes physical science applications. Includes plane analytic geometry, differentiation, applications of the derivative, differential equations, integration and applications.

USP 2003-2014 Code U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1405 or MATH 1450 or Level 5 on the Math Placement Exam or Math ACT of 27 or Math SAT of 600.

STAT2050 - Fundamentals of Statistics

Credits: 4

Presents central ideas and fundamental techniques of statistical inference on applications in the biological sciences. Includes probability models and inferences for means, variances and parameters of discrete distributions. Introduces statistical computer packages in biweekly labs. Credit cannot be earned in more than one of the following courses: STAT 2010, 2050, STAT 2070, STAT 4220 and 5000.

USP 2003-2014 Code U3Q,U3QB

USP 2015 Code U5Q

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

STAT2070 - Introductory Statistics for the Social Sciences

Credits: 4

Presents central ideas of descriptive statistics and statistical inference, as applied to questions in social sciences. Includes graphs, averages, sampling, estimation, hypothesis-testing and relationships between variables. Introduces associated computer skills. Credit cannot be earned in more than one of STAT 2010, STAT 2050, 2070, STAT 4220, 5000.

Cross Listed SOC 2070.

USP 2003-2014 Code U3Q,U3QB

Prerequisite: grade of C or better in MATH 1000, MATH 1400, or equivalent.

LIFE2100 - Intro Research and Analysis

Credits: 4

Students gather and analyze data in the context of life science research projects. provides a foundation in research design, probability and inference, and basic computational skills to support graphical and formal analyses of research data.

USP 2015 Code U5Q

Prerequisite: LIFE 1010 with a grade of C or better.

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM2230 - Quantitative Analysis

Credits: 5

Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2300 - Introductory Organic Chemistry

Credits: 4

Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit

earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4

First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.

When Offered (Normally offered fall)

Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4

Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies.

Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

PHYS1110 - General Physics I

Credits: 4

First course of two-semester sequence. Introduces elementary college physics without calculus. Primarily for premedical, pre dental, preoptometry, prephysical therapy and other students requiring insight into workings of the physical world. Includes classical mechanics, gravitation and heat. Laboratory sessions will illustrate principles studied. Students receiving credit for PHYS 1110 cannot receive credit for PHYS 1050, PHYS 1210 or PHYS 1310.

When Offered (Normally offered fall and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: MATH 1450, 1405 or equivalent.

PHYS1120 - General Physics II

Credits: 4

Follows PHYS 1110 and completes introduction to physics without calculus. Includes electricity, magnetism, optics and modern physics. Laboratory sessions illustrate principles studied. Students receiving credit in PHYS 1120 cannot receive credit in PHYS 1050, PHYS 1220 or PHYS 1320.

When Offered (Normally offered spring and summer semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: P HYS 1110.

LIFE1010 - General Biology

Credits: 4

Fundamental concepts of biology, including basic chemistry of living systems, cell structures and functions, energy relations, genetics, molecular biology, ecology, population dynamics and evolutionary theory. Living invertebrate and vertebrate organisms studied during some lab meetings. Laboratory is required. If you take LIFE 1010, you cannot get duplicate credit for LIFE 1000, LIFE 1003, or LIFE 1020.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

Former Course Number [BIOL 1010]

Prerequisite: Math ACT score of 23 or above, or concurrent enrollment or eligibility for concurrent enrollment in MATH 1400 or higher.

LIFE2022 - Animal Biology

Credits: 4

An integrative course addressing the evolution, anatomy, physiology, and ecology of animals. Continues building upon the four themes in LIFE 1010, cell and molecular biology, genetics, evolution, and ecology. Preserved animal specimens are dissected during some labs. Intended for students majoring in the life sciences. Laboratory is required.

When Offered (Normally offered spring semester)

Former Course Number [BIOL 2022]

Prerequisite: LIFE 1010 with a grade of C or better.

LIFE3050 - Genetics

Credits: 4

Introduces principles of heredity and variation in living organisms, including a study of the nature of the genetic material and its transmission, influence of heredity and environment on the development of individual characters, as well as evolution of organisms and artificial selection of plant and animal varieties. Emphasizes application to today's society.

Former Course Number [BIOL 3050/BIOL 4000]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3400 - General Ecology

Credits: 3

Presents fundamental concepts in population and ecosystem ecology. Emphasizes basic principles and their use in manipulated ecosystems.

Former Course Number [BIOL 3400/ BIOL 2400]

Prerequisite: completion of LIFE 1010 and one of LIFE 2022, LIFE 2023, MICR 2021/MOLB 2021, or MICR 2240/MOLB 2240 with a grade of C or higher in each.

LIFE3500 - Evolutionary Biology

Credits: 3

Presents modern evolutionary theory. Examines evolution and evolutionary mechanisms from several viewpoints, with particular attention given to genetic mechanisms underlying processes of evolution and speciation.

When Offered (Normally offered fall semester)

Former Course Number [BIOL 3500]

Prerequisite: completion of LIFE 1010 and LIFE 3050 with a grade of C or higher in each.

ZOO4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4100.

USP 2003-2014 Code U3L,U3WC

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

ZOO4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed BOT 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course. Preference given to seniors.

Advanced Zoology Course

* if more than one of the required courses is completed, additional courses can count towards the Zoology Approved Core Electives below.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

Zoology Approved Core Electives

A minimum of 10 of 18 Zoology Approved Core Electives must be exclusive to the ZOOL major.

Choose a total of 18 credits from:

ZOO4400 - Population Ecology

Credits: 3

Explores quantitative ecology of animal populations, emphasizing theoretical and empirical work. Provides modern coverage of principles of population ecology for wildlife majors and others who expect to deal with ecological problems in their careers.

Dual Listed ZOO 5400.

When Offered (Offered spring semester)

Prerequisite: LIFE 1010, LIFE 3400 and STAT 2050 or consent of instructor.

ZOO4415 - Behavioral Ecology

Credits: 3

Applies empirical and theoretical approaches to ecological and evolutionary underpinnings for behaviors ranging from foraging and predation to social grouping and mating systems. Emphasizes comparative analyses (what phylogenetic patterns exist across diverse species?) as well as genetic/fitness benefits (how do individuals benefit from apparently puzzling behaviors?).

Dual Listed ZOO 5415.

When Offered (Offered fall semester)

Prerequisite: ZOO 3600 or LIFE 3400 or permission of the instructor.

ZOO4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ENR 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ZOO4430 - Limnology Laboratory

Credits: 2

Utilizes basic field techniques in limnology. Emphasizes analysis and interpretation of data obtained from field and laboratory exercises.

When Offered (Offered fall semester)

Prerequisite: concurrent enrollment in ZOO 4440.

ZOO4440 - Limnology

Credits: 3

Studies ecology of inland waters; biological, chemical and physical features of lakes and streams.

When Offered (Offered fall semester)

Prerequisite: LIFE 1010, LIFE 3400 and CHEM 1030 or consent of instructor.

ZOO4540 - Invertebrate Zoology

Credits: 4

Studies major invertebrate phyla of the animal kingdom. Studies each phylum with respect to morphological and taxonomic characteristics; functional and evolutionary relationships; environmental adaptations; life cycles of representative types. Includes laboratory.

Dual Listed ZOO 5540.

When Offered (Offered fall semester)

Prerequisite: LIFE 2022.

ZOO4735 - Advanced Topics in Physiology

Credits: 1-4

Max Credit (Max. 12)

Designed to cover advanced topics in Physiology for students specializing in Physiology or related fields. Examples of topics include endocrinology, cardiovascular, renal, neurological, respiratory, and metabolic physiology. Integrative topics (e. g. circadian rhythms, thermal stress) may also be included.

Dual Listed ZOO 5735.

Former Course Number [5730]

Prerequisite: ZOO 3115 or equivalent as approved by the instructor.

ZOO4235 - Marine Biology

Credits: 3

This course explore major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed BOT 4235.

Dual Listed ZOO 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

ZOO4300 - Wildlife Ecology and Management

Credits: 5

Integrates concepts of vertebrate ecology with the art of wildlife management, stressing approaches to deal with the inherent uncertainty of managing populations. Strategies to increase or decrease populations of target species, tools used to determine population status (e. g. , viability analysis, monitoring, habitat assessment), and ecosystem management approaches. Laboratory included.

Dual Listed ZOO 5300.

When Offered (Offered fall semester)

Former Course Number [4720]

Prerequisite: LIFE 3400, STAT 2050 or STAT 2070, and ZOO 2450.

ZOO4310 - Fisheries Management

Credits: 3

Acquaints students with theory and techniques of inland fisheries management. Includes methods of evaluating growth and production, rates of mortality and recruitment and use of yield models in fisheries biology. Includes laboratory and field exercises.

Dual Listed ZOO 5310.

When Offered (Normally offered fall semester)

Former Course Number [4730]

Prerequisite: ZOO 4330.

ZOO4330 - Ichthyology

Credits: 3

Anatomy, physiology and classification of fishes, emphasizing classification and identification of Wyoming fishes. Includes laboratory.

Dual Listed ZOO 5330.

When Offered (Normally offered spring semester)

Former Course Number [4750]

Prerequisite: LIFE 2022.

ZOO4340 - Developmental Biology and Embryology

Credits: 4

Introduces study of vertebrate embryology and cellular differentiation. Includes gametogenesis, fertilization, blastulation and organogenesis, growth and differentiation, teratology, metamorphosis, regeneration and asexual reproduction. Emphasizes mechanisms that create form and regulate cellular differentiation.

Dual Listed ZOO 5340.

When Offered (Normally offered spring semester)

Prerequisite: one year of life sciences, one year of chemistry.

ZOO4350 - Ornithology

Credits: 3

Acquaints students with classification, identification, morphology, distribution, natural history and ecology of the birds of North America. Includes laboratory.

Dual Listed ZOO 5350.

When Offered (Offered spring semester)

Former Course Number [4780]

Prerequisite: LIFE 2022.

ZOO4370 - Mammalogy

Credits: 3

Studies mammals of the world, emphasizing natural history, distribution, taxonomy, ecology and morphology of mammalian species. Includes laboratory.

Dual Listed ZOO 5370.

When Offered (Offered fall semester)

Former Course Number [4790]

Prerequisite: LIFE 2022.

ZOO4380 - Herpetology

Credits: 3

Introduces the ecology, behavior, morphology, evolution, systematics and conservation of reptiles and amphibians.

Dual Listed ZOO 5380.

Prerequisite: LIFE 2022.

ZOO3115 - Human Systems Physiology

Credits: 4

Covers the fundamental function(s) of the human body systems, from cells and tissues through organs and systems, focusing also on biological communication and homeostasis. Students learn how to interpret physiological data. Includes laboratory and tutorial sessions. Fulfills degree requirement in physiology subsection for zoology major.

Prerequisite: At least ((C in CHEM 1020 or CHEM 1050) or B in CHEM 1000) and C in LIFE 1010.

ZOO3600 - Principles of Animal Behavior

Credits: 3

Intensively introduces scientific study of animal behavior. Utilizes evolutionary, ecological and physiological approach.

When Offered (Normally offered spring semester)

Prerequisite: introductory course in zoology, biology or psychology.

ZOO4190 - Comparative Environmental Physiology

Credits: 4

Studies and interprets principles of physiology which adapt animals to various environmental constraints. Introduces discipline which has risen between traditional fields of physiology and ecology and provides understanding of animal distribution and survival. Fulfills degree requirements in physiology subsection for the zoology major.

Dual Listed ZOO 5190.

When Offered (Offered spring semester)

Former Course Number [4230]

Prerequisite: LIFE 2022 or LIFE 2023 and CHEM 1030 or CHEM 1060.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

MOLB3000 - Introduction to Molecular Biology

Credits: 3

An introduction to molecular biological processes governing cellular events is presented in the context of the structure of genomes, genes and chromosomes, DNA replication, gene expression, signal transduction pathways and the regulation of cellular processes in disease and development. Experimental methods and technologies will also be discussed.

Prerequisite: LIFE 1010 and CHEM 1030; MOLB 2021 or MICR 2021 recommended.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4664 - Special Topics in Evolution

Credits: 1-4
Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

PATB4710 - Medical Virology

Credits: 3

Human and animal viruses as biological entities. Methods of study, classification, replication strategies, diagnostic approaches, epidemiology and significance as disease agents.

Cross Listed MICR 4710

Dual Listed PATB 5710

When Offered (Normally offered fall semester)

Prerequisite: MOLB 2240

Course Offerings

Changes in Catalog Information

The course offerings and requirements of the University of Wyoming are under examination and revision continually. This catalog is not a contract; it merely presents the offerings and requirements in effect at the time of publication and in no way guarantees that the offerings and requirements will not change.

Not all courses are offered each term. The listing of courses does not imply a contractual obligation to offer the same during the year of publication of this catalog. The university reserves the right to offer, limit, or cancel course offerings for academic, funding, or facility considerations, and to cancel any offered course for which there is not sufficient enrollment.

The university reserves the right to change approved course listings at any time during a student's term of residence.

Preparatory Courses Taught at UW by Laramie County Community College

The University of Wyoming has contracted for Laramie County Community College to offer preparatory courses on the university campus. University students will register through the normal university registration process. Inclusion of these courses in a student's schedule will count as part of the credit load for determining full-time status; however, UW credit is not awarded. For further information, contact the LCCC coordinator, at (307) 766-2514 or go to Ross Hall, rooms 26 and 27.

Course Credits

The amount of credit offered for any course work published in this catalog is based on and governed by prior university faculty recommendation and institutional determinations.

A credit hour denotes a unit of academic work. Normally, one credit hour is earned in a course meeting one hour per week for a semester (15-16 weeks). Each credit hour unit requires an average of three hours of student-effort per week. In variable-credit courses, the efforts required of the students are proportional to the credit hours attempted.

Even if topics differ in separate sections, variable-credit courses have limits on the number of credits which can be earned in that course in a semester and/or a student's career.

Format of Course Listings

On the following pages, courses approved for offering are listed by college, program subject, and course level (number).

The heading which precedes the brief description of each course shows the current course identification number; former course number(s), if any, in brackets; course title; a designation in bold brackets ([QB<>Q], e.g. [USP 2003 designation<>USP 2015 designation]), if any, concerning applicability of the course to the University Studies Program (see below for designation); the number of semester credit hours established for the course (fixed or variable with the semester); and the career maximum of credit for successive term enrollments in the identified course, if

different from the established semester credit-hours limit. For example, “1-3 (Max.9)” means that a student may earn between 1 and 3 hours of credit for that course within one semester and a maximum of 9 hours within a degree career. The course description indicates any prerequisites for that course and if it is offered for satisfactory/unsatisfactory grading only.

Course Levels

University courses are distinguished by number indicating five levels of instruction as follows:

0000-0999	Preparatory courses (no credit)
1000-2999	Primarily for Freshmen and Sophomores
3000-4999	Primarily for Juniors and Seniors
5000-5999	Primarily for Graduate Students
6000-6999	Law courses, WWAMI courses, and Doctor of Pharmacy courses

A bracketed course number [] indicates a previous number of the same course. Double credit cannot be earned by repeating a course.

Prerequisites are the primary factor which normally govern whether a student may enroll for any particular course. However, individual departments and/or colleges may place additional restrictions on course enrollments (e.g. enrollment may be restricted by student classification).

Enrollment in engineering courses is generally limited to engineering students.

Law courses are normally open only to students approved for the program.

Graduate students may enroll in courses numbered 1000-3999 to satisfy undergraduate deficiencies but only courses numbered 4000 and above will be computed into the graduate GPA and allowed for graduate credit.

Accounting

ACCT2010 - Principles of Accounting I

Credits: 3

Provides a basic understanding of the financial accounting information role in business and society. Focuses on the recording and reporting of business operating, financing, and investing events. Provides insights on business and enables students to become familiar with shareholder/external party reporting conventions.

Former Course Number [1010]

Prerequisite: Sophomore class standing and MATH 1400

ACCT2020 - Principles of Accounting II

Credits: 3

Provides a basic understanding of the managerial accounting information role in business decision-making. Provides insights on how businesses operate and enables students to become familiar with the conventions used by business to make decisions and how accounting information is reported to managers.

Former Course Number [1020]

Prerequisite: ACCT 2010, Sophomore class standing.

ACCT3070 - Tax I

Credits: 3

This class covers a broad range of the tax concepts applicable to the taxation of individual taxpayers. Special emphasis will be placed on the role of taxation of the individual and the related decision-making process.

Prerequisite: ACCT 2010 and ACCT 2020, Advance Business Standing.

ACCT3100 - Financial Statement Analysis

Credits: 3

Advanced study of financial statements and how to analyze those statements from both an internal and external perspective.

Former Course Number [4100, 2000, 3000]

Prerequisite: ACCT 2010 ,ACCT 2020 , FIN 2100 (or equivalent), sophomore class standing.

ACCT3230 - Intermediate Accounting I

Credits: 3

First of two courses studying financial reporting. Topics include recording and reporting events in the expenditure and revenue cycles.

Former Course Number [2230]

Prerequisite: ACCT 2010 , ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3240 - Cost Accounting I

Credits: 3

Organizational uses of information to plan, make decisions, and evaluate performance. Specific topics include job order and process costing, cost estimation and CVP analysis, budgeting and variance analysis.

Former Course Number [2240]

Prerequisite: ACCT 2010, ACCT 2020 and MATH 1400 with grades of C or better in each; sophomore class standing.

ACCT3430 - Intermediate Accounting II

Credits: 4

Second of two courses studying financial reporting. Topics include debt, equity, revenue recognition, and special issues in expense and liability recognition.

Prerequisite: ACCT 3230 with grade of C or better; advanced business standing, or special permission of Department Head.

ACCT3610 - Accounting Information Systems

Credits: 3

Provides an understanding of accounting information systems and internal controls. Emphasis on the use of current accounting technology, accounting software and internal control systems.

Former Course Number [2040, 3010]

Prerequisite: ACCT 3230 with a grade of C or better; advanced business standing.

ACCT3900 - Accounting Professional Sales

Credits: 2

This once-a-week course provides a setting for accounting students to interact directly with industry professionals and experts. Each week will include a presentation from an invited speaker who will discuss relevant topics to the accounting profession.

Restricted Open to junior accounting majors only

Prerequisite/Corequisite: ACCT 2010

ACCT3900 - Accounting Professional Studies

Credits: 2

Professional development course with guest speakers. Preferably taken in the junior year.

Restricted Open to junior accounting majors only

ACCT4060 - Auditing I

Credits: 3

A study of the scope, activities, and responsibilities of professional auditors. Topics include assurance services by public accountants and the methods and techniques used to provide these services, with a focus on the audits of financial statements and internal controls performed by external auditors.

Prerequisite: ACCT 3230 with a grade of C or better; ACCT 3610 with a grade of C or better (or concurrent enrollment)

ACCT4540 - Cost Accounting II

Credits: 3

Advanced topics in cost accounting concerning the organizational uses of information to plan, make decisions, and evaluate performance.

Prerequisite: ACCT 3240 with a grade of C or better and sophomore standing.

ACCT4600 - Professionalism and Ethics

Credits: 3

Examines professional ethics for accountants from both a philosophical and business perspective. Moral development, ethical reasoning, and ethical decision making provides a framework for examining the importance of ethics in the accounting profession. Professional guidance on ethics in accounting is also examined, including the AICPA Code of Professional Conduct, the Sarbanes-Oxley Act, and the codes for other professional accounting organizations.

Prerequisite: ACCT 3070, 3610, and ACCT 3430 (or equivalents) with grades of C or better in each; ACCT 4060 with a C or better or concurrent enrollment; advanced business standing.

ACCT4700 - CPA Exam Prep

Credits: 1

Max Credit 4

This course is designed to prepare students for taking the Uniform Certified Public Accountant Examination. The course includes intensive preparation for the CPA exam.

Prerequisite: ACCT 4060

ACCT4900 - Ind. Study in Accounting

Credits: 1-6
Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Blockchain not included in other structured Accounting courses.

When Offered (Offered based on sufficient demand and resources)
Restricted Include: Juniors, Seniors Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

ACCT4910 - Topics in Accounting

Credits: 1-6
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

ACCT4960 - Volunteer Income Tax Assistance

Credits: 1-3
Max Credit 3

The Volunteer Income Tax Assistance (VITA) program is an IRS-sanctioned program designed to help low-income individuals and families file their federal and state taxes through trained volunteers. This course trains students to assist taxpayers in filing tax returns through the VITA program.

Prerequisite: ACCT 3070 (or concurrent).

ACCT5030 - Advanced Financial Accounting

Credits: 3
Advanced topics in financial reporting for students planning careers as professional accountants. Topics may include: business combinations, consolidated financial reporting, segment and interim reporting, SEC reporting, multinational accounting and reporting, and other emerging topics.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5040 - Seminar in Managerial Accounting

Credits: 3

Organizational development of financial and nonfinancial budgets, interaction between performance measurement systems and human behavior, and advanced topics in uses of information for decision making.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5060 - Auditing II

Credits: 3

An in-depth study of the financial statement audit and the professional responsibilities of public accountants. The role of professional judgment and skepticism is emphasized in case studies and research involving current auditing issues, including financial statement fraud.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5065 - Fraud Examination

Credits: 3

The study of fraud against organizations and individuals. Includes consideration of how and why fraud is committed, the basics of fraud investigation, and fraud prevention. Coverage may also include an in-depth study of specific fraud cases based on the above elements.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5066 - Seminar on Management Fraud

Credits: 3

An in-depth study and analysis of the causes, methods, and consequences of financial statements fraud committed by top management in the organization. The course covers psychological and criminological theories of management fraud, as well as detailed analysis of high-profile managements frauds. Seminar format.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5070 - Tax II

Credits: 3

Choice of entity and special tax subjects. Emphasis will be placed on the importance of ethical considerations, competent tax research, and thoughtful tax planning.

Restricted MS-ACCT

Prerequisite: Admission to the MS in Accounting Program or department approval.

ACCT5503 - Fundamentals of Accounting in the Energy Industry

Credits: 3

Introduces students to basic financial accounting and reporting issues related to energy producing activities. Specifically, the course will investigate current accounting practices of energy producing companies related to exploration, acquisition, development, and delivery of energy products. The course will also cover financial requirements of the Financial Accounting Standards Board (FASB), the International Accounting Standards Board (IASB), and the Securities and Exchange Commission (SEC).

Prerequisite: Permission of MBA Program Director, or student's graduate program coordinator in consultation with MBA Program Director.

ACCT5850 - Advanced Problems in Accounting

Credits: 1-8

Max Credit (Max. 8)

An arrangement whereby students may investigate a more advanced problem area in accounting on an individual basis.

Prerequisite: consent of instructor; graduate standing.

ACCT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ACCT5990 - Internship

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

Adult Education

ADED1008 - Eastern Thought Western Practice

Credits: 2

Major concepts of Eastern thought from Confucius and Osho are explored, examined, to understand eastern ways of perceiving reality, knowledge, and values. Hands-on activities are employed to experience and practice the applications of the concepts. Students are challenged to critically think, analyze, and compare with their own, increase their consciousness of diversity.

USP 2003-2014 Code U3I

ADED5050 - Learning Theories for Education

Credits: 3

Learning and development theories are essential for educators who are designing and implementing educational applications and opportunities. Topics covered include orientations toward learning, motivation, life transitions, cognition, learning how to learn, self-directed learning, and strategies for improving learning in educational contexts.

Prerequisite: graduate standing.

ADED5880 - Special Problems in Adult Education

Credits: 1-6

Max Credit (Max. 9)

Provides a broad perspective through selected reading material. Wherever possible, the student collects and uses original information from an adult education/instructional technology setting. All work is done independently under the direction of a faculty member.

Prerequisite: graduate standing.

ADED5890 - Seminar in Adult Education

Credits: 1-6

Max Credit (Max. 8)

Advanced students in education work together intensively on current issues and problems relevant to adult education and participate in systematic, critical interpersonal evaluation. Eight hours are permitted on a doctoral program.

Prerequisite: graduate standing.

Advising Career Exploratory Studies

ACES1101 - FYS: New Geography of Jobs

Credits: 3

This course will provide students with a view of the evolving world of work in the United States, with specific attention to Innovation, Manufacturing, Natural Resource Extraction, and Agriculture. The course will survey the history of jobs in the U.S. with specific attention to changes through time, location and events. We will also look ahead to the age of automation. Students will participate in a significant research project, through which they will create a case study of a

specific economic ecosystem.

USP 2003-2014 Code U5FY

ACES1105 - Academic Success Skills

Credits: 2

Designed to provide students the necessary skills to succeed at the University and beyond. Skills covered include time management, learning styles, note taking, self-motivation, and more.

When Offered (Offered each semester)

ACES1150 - Major & Career Exploration

Credits: 1

This course is for freshmen who have no idea what to major in, or who are open to investigating possibilities. Students will gain information about themselves, opportunities in higher education, and the world of work, which they can use to make an informed decision about a major.

ACES3000 - Peer Advising

Credits: 3

This course is designed to help you develop the skills, understanding, competencies, and dispositions needed to be an effective peer advisor at UW. Course content will cover student development theory, interpersonal skills, Ethics of working with college students, UW policies/procedures, UW academic requirements, and advising approaches.

When Offered (Offered Spring Semester Only)

Prerequisite: Sophomore standing and completion of USP15-C2

ACES3100 - Peer Advising Internship

Credits: 1-6

Max Credit (Max. 6)

Designed to help you apply the skills, competencies, and dispositions that were developed in ACES 3000. The course will allow you to apply and reflect upon student development theory, interpersonal skills, UW policies/procedures, UW academic requirements, and advising approaches. Each internship credit will require a minimum of 3 hours of work per week in the ACES office. Students and the peer advising supervisor will consult in establishing individual student hours.

Prerequisite: ACES 3000 and application to ACES Internship.

African and American Diaspora Studies

AAST1000 - Introduction to African American Studies

Credits: 3

Surveys African presence in America. Selected teachings are designed to give the student a concise understanding of the heritage of African people in America.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

AAST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities. Enrollment preference will be given to We The People FIG students.

Cross Listed NAIS 1030 /AMST 1030 / WMST 1030/LTST 1030.

USP 2003-2014 Code A3D, U3I

A&S College Core 2015 ASD

AAST1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

AAST2240 - Introduction to African Studies

Credits: 3

Confronts African stereotypes by exploring the continent's complex history and current affairs, with the help of different disciplinary perspectives, such as economics, political science, and anthropology. Equipped with the basics, students will be primed to tackle more advanced courses on Africa.

Cross Listed INST 2240.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

AAST2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed ENGL 2350.

USP 2003-2014 Code U3D, U3WB

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

AAST2360 - African American History

Credits: 3

Surveys African-American history in America, particularly emphasizing issues of identity, class, and progress as well as exploring African-Americans' quest for full participation in American life.

Cross Listed HIST 2360.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5C2

A&S College Core 2015 ASD

AAST2450 - Traditional African Religion

Credits: 3

Surveys traditional religions of Africa, both ancient and contemporary.

Cross Listed RELI 2450.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

AAST2990 - Topics:

Credits: 1-3 or 3

Accommodates seminar series and/or course offerings including those by interdisciplinary teams and visiting faculty in African American & Diaspora Studies not covered by program courses.

USP 2003-2014 Code U3D

AAST3000 - African American Studies in Music

Credits: 3

Surveys African American music from its origins in Africa to current, popular jazz, rock, soul and rap forms.

USP 2015 Code U5H

AAST3010 - The African American Aesthetic

Credits: 3

Examines interrelationship of the creative process with cultural and philosophical motifs, as well as the spiritual and the artistic amongst African people on the continent and Diaspora.

Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST3130 - Global Impact of African Cultures

Credits: 3

Examines concepts of culture and value systems as applied to Africa and African-derived cultures and the impact on civilizations around the globe. Using the lens of the Diaspora, this course examines aspects of African culture on the African continent along with the traditions, experiences, socialization, and histories that continue for dispersed peoples of African descent.

USP 2003-2014 Code U3CS, U3G

Prerequisite: AAST 1000 or any AAST 2000-level course.

AAST3260 - African Spirits in the New World

Credits: 3

Begins with Yoruba roots in Africa travels with the African Diaspora focusing on spirit possession in Haitian Vodou, Cuban Santeria, Jamaican Revival Zion, Jamaican Rastafarianism, Brazilian Candomblé, and "Black Church" in the United States using ethnography and postcolonial theory of religious studies.

Cross Listed RELI 3260.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Prerequisite: AAST 1000 or any AAST 2000 level course or RELI 1000.

AAST3670 - African Diaspora

Credits: 3

Examines process through which aspects of African culture have endured in Diaspora. Analyzes social relations between Diaspora Africans and non-African populations in N. and S. America, the Caribbean, Britain, Asia and the Mediterranean. Discusses cultural hybridization as a product of culture contact.

Cross Listed HIST 3670.

A&S College Core 2015 ASG

Prerequisite: AAST 1000, any AAST 2000-level course, or AAST 2360/ HIST 2360.

AAST3933 - African Philosophy

Credits: 3

Examines the work of philosophers of Africa, of African descent and others who deal with the African diaspora. Topics include the nature of African philosophy and the African American struggle, African colonialism, philosophy, political philosophy and gender, traditional African thought.

Cross Listed INST 3933 /PHIL 3933.

USP 2015 Code U5H

A&S College Core 2015 ASG

Restricted Restricted to junior or senior class standing.

Prerequisite: A prior course in AAST, INST or PHIL.

AAST4000 - Black Freedom Movement, AAST 1955- Present

Credits: 3

Presents the struggle of African Americans for self-definition, self-development, and self-determination from the inception of the modern civil rights movements to the contemporary period.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 USD

Prerequisite: 3 hours of AAST courses.

AAST4020 - The Black West

Credits: 3

This course explores the historical experiences and contributions of people of African descent to the American West from their earliest recorded presence in the 16th Century through the present.

Cross Listed HIST 4020.

USP 2003-2014 Code U3D, U3CH

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, junior/senior standing, or three hours of any level of HIST course.

AAST4050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 4050.

Dual Listed AAST 5050.

Prerequisite: junior standing and instructor consultation.

AAST4100 - African American Religious Culture

Credits: 3

Mid-level writing-intensive seminar. Comparative study of African American religious celebration, primarily in the context of Afro-Christianity, but touching on Islam, Candomble, "Voodoo," Santeria, and Rastafarianism.

Cross Listed RELI 4100.

USP 2003-2014 Code WC, D

USP 2015 Code COM3

A&S College Core 2015 ASD

Prerequisite: WB and one of the following: AAST 1000 or any AAST 2000-level course or RELI 1000.

AAST4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 4160.

Dual Listed AAST 5160.

USP 2003-2014 Code U3D, U3CH

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 9 credit hours in AAST or COJO.

AAST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 4233 and GWST 4233; dual-listed with AAST 5233.

USP 2003-2014 Code U3WC

USP 2015 Code U5WC, U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

AAST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Former Course Number [AAST 4200]

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AAST4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of

American society.

Cross Listed COJO 4260.

Dual Listed AAST 5260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [AAST 4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

AAST4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed Cross list with ENGL 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

AAST4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 4455.

Dual Listed AAST 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

AAST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed LTST 4675 /GWST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of

AAST4970 - Internship in AAST

Credits: 1-12

Designed for students to utilize the knowledge and skills obtained in their program of study to be applied at an organization or institution. Students will provide a job description, sign an internship contract, keep daily work journals, provide work samples, submit a paper, and include a final evaluation by their Internship supervisor.

Prerequisite: 9 hours in AAST courses.

AAST4975 - Independent Research

Credits: 1-3

Max Credit (Max. 6)

Independent study in African American Studies.

Prerequisite: AAST 1000 and consent of instructor.

AAST4990 - Topics:

Credits: 3

In-depth study of a topic not offered as regular course.

Prerequisite: COM1.

AAST5050 - Development, Africa, and Culture

Credits: 3

Focuses on the complex and checkered relationships between Western-inspired development and African cultures. Striking a balance among ethnographic case studies, theoretical lenses, and practical implications, understand what Euro-American efforts at foreign development, including contemporary globalization, look like from an African perspective. Provides an understanding of African expectations of development and developers.

Cross Listed INST 5050.

Dual Listed AAST 4050.

Prerequisite: junior standing and instructor consultation.

AAST5060 - NGOs, Development, and Culture

Credits: 3

Non-governmental organizations (NGOs) have grown exponentially in number and are often viewed as the new and best vehicle for international development. By focusing on international non-governmental organizations (INGOs), in the contexts of Western aid to post-colonial societies and the role they play in the international aid system, the course explores INGOs from historical, global, and cultural perspectives.

Cross Listed INST 5060.

Prerequisite: junior standing and instructor permission.

AAST5160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed COJO 5160.

Dual Listed AAST 4160.

Prerequisite: 9 credit hours in AAST or COJO.

AAST5233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with COJO 5233 and GWST 5233; dual-listed with AAST 4233.

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

AAST5250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U. S. , including Africa and the Caribbean.

Cross Listed AMST 4200.

Dual Listed AMST 4250.

Prerequisite: AAST 1000, AMST 2010, AMST 2110, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AAST5260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/ social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed COJO 5260.

Dual Listed AAST 4260.

When Offered (Offered spring semester of even-numbered years)

USP 2003-2014 Code U3D

Former Course Number [AAST 5985]

Prerequisite: graduate standing.

AAST5455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed ENGL 5455.

Dual Listed AAST 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

AAST5560 - Black Popular Culture

Credits: 3

Approaches African American popular culture from theoretical perspectives which include black feminist, postcolonial, and poststructuralist analyses.

Cross Listed AMST 5560.

Prerequisite: graduate standing; instructor consent for undergraduate students.

Agricultural Economics

AGEC1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed ECON 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

AGEC1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed ECON 1020.
USP 2003-2014 Code U3CS
USP 2015 Code U5H

AGEC1101 - First-Year Seminar

Credits: 3
USP 2003-2014 Code U5FY

AGEC1499 - Ag Business Pathways for Success

Credits: 1

We explore student pathways to success in the Agribusiness degree program through college and into careers. This course will help students grow in three focus areas: 1) Skills for program success; 2) Career opportunities afforded by a BS in Agribusiness degree; and 3) Networking with peers, faculty, and alumni.

Prerequisite: Agribusiness major.

AGEC2020 - Farm and Ranch Business Management

Credits: 4

Discusses economic principles, business methods and science applied to organization and operation. Includes measurements of size of business; rate and efficiency of production.

When Offered (Normally offered spring semester)

AGEC2040 - Excel Applications in Ag Business

Credits: 3

From production records to financial statements, agribusiness managers must be able to manage and analyze data. The purpose of this course is to teach students how to use Microsoft Excel for common agribusiness management activities.

AGEC3030 - Applied Economic Decisions

Credits: 3

The purpose of the class is twofold: 1) To practice applying concepts, tools, and models from principles of economics to real-world problems affecting agriculture and agribusiness; and, 2) To understand the role of individual behavior in economic outcomes that particularly affect agriculture.

Former Course Number [3020]**Restricted** Restricted to AGEC majors.

Prerequisite: AGEC 1010/ECON 1010, AGEC 1020/ECON 1020, and MATH 1400.

AGEC3400 - Agricultural Law

Credits: 3

Surveys legal issues and principles of practical concern to agriculture and examines legal institutions authorized to carry out laws affecting agriculture.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Former Course Number [4400]

Prerequisite: WA/ COM1 and junior standing.

AGEC3420 - Applied Equity Investing

Credits: 3

Introduces the fundamentals of understanding how the stock market works, what types of investment products are available, how to purchase them and what to look out for in making investment decisions. Students will make investment decisions on a simulated portfolio and write justifications for their purchases.

When Offered (Normally offered spring semester)

Prerequisite: COM2 and MATH 1400.

AGEC3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed ENR 3750.

Former Course Number [4750]

Prerequisite: QA/Q, WA/COM1 and junior standing.

AGEC3860 - World Food, Ag, & Development

Credits: 3

Explores economic approaches to improving nutrition, agriculture production, and the environment in developing regions of the world. Students gain understanding of complex conditions surrounding food security; institutions involved with food policy, aid, and production; environmental factors influencing agricultural production; inequality; and international cultural and societal food disparities.

Cross Listed INST 3860.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3G

USP 2015 Code U5H

Former Course Number [4860]

Prerequisite: AGEC 1010/ECON 1010 or AGEC 1020.

AGEC4050 - Agribusiness Marketing

Credits: 3

Students develop a strategic marketing plan for an agricultural and food product. Content includes study of aspects of the global food industry influencing consumer demand; contemporary topics in food marketing and policy; agricultural supply marketing; marketing research methods; marketing profitability measures; pricing; new product introduction; branding, and industry competitive analysis.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020 or ECON 1020 and MATH 1400.

AGEC4060 - Agribusiness Management

Credits: 3

Applies quantitative, economic, financial and managerial analysis to agribusiness sector.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 and MATH 1400.

AGEC4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed GWST 4200.

Dual Listed AGEC 5200.

USP 2015 Code U3D

A&S College Core 2015 ASD

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB/COM2.

AGEC4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 4230

Dual Listed AGEC 5230

When Offered (Normally offered spring semester)

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

AGEC4280 - International Food and Farm Cultures

Credits: 3

Study-tour course in western France of lectures, fieldtrips, and other cultural activities are integrated into a curriculum to study sustainable food cultures and farming systems. Students live with host families and learn about current policies, belief systems and cultural practices that guide food production, consumption and marketing in Europe.

USP 2003-2014 Code U3G

Prerequisite: completion of WA/COM1 and I/FYS.

AGEC4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 4450.

Dual Listed AGEC 5450.

Prerequisite: completion of USP O/COM2 requirement; junior standing.

AGEC4460 - Agriculture and Economic Development

Credits: 3

Examines the roles of agriculture in the transformation of the economics of underdeveloped countries. Examines development theories, case studies and analytical techniques.

Former Course Number [5460]

Prerequisite: AGEC 1010, AGEC 1020 and a G course.

AGEC4500 - Agricultural Finance

Credits: 3

Principles of financial management; compounding and discounting; leverage and capital budgeting and alternatives in resource control.

When Offered (Normally offered spring semester)

Former Course Number [650]

Prerequisite: AGEC 1020 or equivalent.

AGEC4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 4550.

Dual Listed AGEC 5550.

Prerequisite: QA/Q.

AGEC4600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic analysis, fiscal impact analysis and benefit cost analysis.

Dual Listed AGEC 5600.

USP 2015 Code U5H

Prerequisite: ECON 3010, ECON 3020, and MATH 1400.

AGEC4640 - Advanced Farm/Ranch Management

Credits: 3

Tools of management decision-making applied to problems of farm-ranch management and resource acquisition and use.

When Offered (Normally offered fall semester)

Prerequisite: AGEC 1020, AGEC 2020 and MATH 1400.

AGEC4660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 5660.

Prerequisite: AGEC 1010/ ECON 1010, ECON 1020 , and junior standing.

AGEC4700 - Economics of Range Resources

Credits: 3

Applies economic and decision theory to management and allocation of public and private range resources.

When Offered (Normally offered spring semester)

Prerequisite: AGEC 1020 or equivalent.

AGEC4710 - Natural Resource Law and Policy

Credits: 3

Legal and economic examination of laws intended to resolve environmental conflicts. Surveys economic rationales both for private property and government intervention in environmental disputes; content of selected environmental laws in the U. S. ; and basic principles of environmental mediation.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: AGECE 1020, ECON 1020 or equivalent and 3 hours of business law or agricultural law.

AGEC4720 - Water Resource Economics

Credits: 3

Presents principles and procedures appropriate to water resource allocation and development decisions. Studies agricultural, recreational, industrial and other uses of water.

Prerequisite: AGECE 1020 or equivalent; QB course, WB course; senior standing.

AGEC4830 - Agricultural Commodities and Futures Markets

Credits: 3

Economics of price determination for agricultural commodities and development of pricing strategies in cash and futures markets.

When Offered (Normally offered fall semester)

Prerequisite: AGECE 1020 or equivalent.

AGEC4840 - Agricultural Market Analysis

Credits: 3

Applies economic theory to an analysis of economic organization and operation of agricultural markets, including price behavior.

When Offered (Normally offered spring semester of odd-numbered years)

Prerequisite: MATH 1400 and ECON 3020.

AGEC4880 - International Agricultural Trade, Markets and Policy

Credits: 3

International agricultural commodity markets, product markets and market channels are characterized and examined. Presents economic theory relevant to description and analysis of international markets. Characterizes and analyzes historical and contemporary U. S. commercial trade policy and agricultural policy and their effect on markets.

When Offered (Normally offered spring semester of even-numbered years)

USP 2003-2014 Code U3G

Prerequisite: ECON 3020 and junior or senior standing.

AGEC4890 - Special Topics in _____

Credits: 1-3

Accommodates seminar series or course offering by visiting faculty whose subject matter is not included in other courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing and/or consent of instructor.

AGEC4910 - Problems in Agricultural Economics

Credits: 1-3

Consists of supervised study and investigation on topics of current importance in agricultural economics.

Prerequisite: 12 hours in AGECE or ECON and consent of instructor.

AGEC4930 - Agricultural Economics Internship

Credits: 1-6

Provides practical agricultural business firm and/or agency experience. Develops working knowledge of how basic economic concepts are used by firms and agencies in policy and procedures development and decision making by the organization.

Prerequisite: 10 hours of AGECE and approval of faculty supervisor.

AGEC4965 - Agribusiness Entrepreneurship

Credits: 3

Designed for students preparing to launch or work with an entrepreneurial venture. Students develop a business plan, synthesizing knowledge of agricultural economics, agribusiness management and finance, human resources and accounting. Emphasis is placed on advancing student professional communication abilities for agribusiness management careers.

USP 2003-2014 Code U3WC

Prerequisite: senior standing, WB/COM2 writing course and AGECE 2020, or AGECE 4500, or AGECE 4060, or FIN 2100.

AGEC4970 - Technical Communication for Agribusiness

Credits: 3

This course is the senior capstone for agribusiness majors. Students will use written, oral, and digital communication appropriate for the discipline to complete a technical report and oral presentation on a complex topic affecting agriculture or natural resources.

USP 2003-2014 Code U5C3

AGEC5200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed WMST AGEC 5200.

Dual Listed AGEC 4200.

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB/COM2.

AGEC5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variables, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed ECON 5230.

Dual Listed AGEC 4230.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5310 - Theory of Producer Behavior

Credits: 3

Economic models of optimization as they apply to firm-level production decisions. Topics include the properties of production functions, theories of linear and non-linear optimization, firm decision making under perfect and imperfect competition and firm decision making under uncertainty.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5320 - Quantitative Methods in Agricultural Economics

Credits: 3

Covers mathematical programming and simulation techniques for solving applied problems in agricultural economics. Emphasizes the formulation of economic research problems in quantitative terms and the use of computer software packages to derive solutions.

Prerequisite: ECON 3020, STAT 2050 and MATH 2350.

AGEC5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed ENR 5450.

Dual Listed AGEC 4450.

Prerequisite: completion of USP O/COM2 requirement; junior standing or consent of instructor.

AGEC5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed ENR 5550.

Dual Listed AGEC 4550.

Prerequisite: QA/Q.

AGEC5600 - Community Economic Analysis

Credits: 3

Analysis of regions and rural communities; their problems, socioeconomic characteristics, land use and economic development. Provides training in regional economic theory, regional economic analysis, fiscal impact analysis and benefit cost analysis.

Prerequisite: consent of instructor.

AGEC5630 - Advanced Natural Resource Economics

Credits: 3

An in-depth treatment of theoretical issues, quantitative techniques, and institutional arrangements in the natural resource field. Topics include welfare economics, property rights, market failure and externalities, and benefit cost analysis.

Prerequisite: ECON 3010 and ECON 3020, STAT 2050 and MATH 2350.

AGEC5650 - Communicating Research

Credits: 3

Focuses on the broad methods, and written and oral communication of research in applied economics. Topics include formulating a research question, organizing a manuscript, editing for clarity and conciseness, building effective figures and tables, finding and citing literature, developing and delivering effective presentations, and upholding research ethics.

Prerequisite: graduate standing.

AGEC5660 - Community and Economic Development

Credits: 3

Community development from an interdisciplinary perspective, integrating theory, concepts and methods from sociology, economics, political science, and community development. Students learn how community theory can be used to design and support effective economic development programs. Includes readings, lectures, guest lectures, field trips and community analysis projects.

Dual Listed AGEC 4660.

Prerequisite: AGEC 1020/ ECON 1020 or SOC 2090 and junior standing.

AGEC5710 - Advanced Agricultural Market Theory

Credits: 3

Theoretical foundations of the study of agricultural markets and how business is conducted in those markets. Topics include pure competition, industrial organization concepts related to imperfect competition including game theory, principal-agent theory, transaction costs economics, intermediary theory, and welfare implications of alternative agricultural market structures.

Prerequisite: ECON 3020 and MATH 2350.

AGEC5740 - Consumer Behavior and Prices Analysis

Credits: 3

Focuses on microeconomic consumer theory and its application. Topics include utility theory, market demand theory, expected utility theory, and econometric applications.

Prerequisite: ECON 3020, MATH 2350 and STAT 2050.

AGEC5880 - Advanced Seminar

Credits: 1-2

Max Credit (Max. 2)

Involves reporting to the seminar group on research methods and results obtained in the investigation of a topic or question relevant to the field of agricultural economics.

Prerequisite: 9 credits in AGEC and/or ECON.

AGEC5890 - Advanced Problems in Agricultural Economics

Credits: 1-3

Max Credit (Max. 6)

Supervised study and research on current problems in marketing, farm and ranch management, policy prices, land economics or finance.

Prerequisite: graduate standing in AGEC or ECON.

AGEC5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

AGEC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AGEC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AGEC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

AGEC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Agricultural Education

EDAG3150 - Community Programs in Agricultural Education

Credits: 3

This course is designed to determine the resources and trends of local communities with respect to agricultural production and agribusiness. Emphasis will be placed on agricultural education program policies, FFA chapter advisement, planning and managing the instructional program, and the identification and completion of records and

reports required of a teacher of agricultural education in Wyoming.

Prerequisite: Agricultural Education major.

EDAG3160 - Principles of Agricultural Education

Credits: 3

Explores the background, scope and content of agricultural education. Specific competencies required for teacher certification including history, philosophy and trends, successful program planning, applied sciences, organization/utilization of advisory groups, adult education, curriculum, career counseling computer applications, cooperative and SAE programs, facilities and advising the FFA.

Prerequisite: Prerequisites: junior standing.

EDAG4170 - Principles of Agricultural Mechanics and Technology

Credits: 3

Content will emphasize those skills commonly taught in Wyoming agricultural education in the secondary school system with an emphasis on advanced gas and plasma welding theory, small gas engines, and advanced electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4170, EDVE 4170]

Prerequisite: EDAG 4070 or approval of instructor.

EDAG4180 - Techniques of Agricultural Mechanics and Technology

Credits: 3

Techniques of agricultural mechanics and instruction. Content will emphasize those skills commonly taught in the Wyoming school system agricultural mechanics program with emphasis on woodworking, welding theory, agricultural plumbing, and electrical wiring and practices. Designed for students preparing to teach agricultural science in the Wyoming public school system.

Former Course Number [EDAS 4180, EDVE 4180]

Prerequisite: Junior standing or consent of instructor.

EDAG4970 - Individual Problems

Credits: 1-3

Provides flexible credit for seniors who may need credit for graduation, or for students who wish to undertake intensive study of a special problem identified in a regular class. Offered in areas of vocational education, vocational agriculture, family and consumer sciences, and trade and industrial education.

Former Course Number [EDAS 4970, EDVE 4970]

Prerequisite: 12 hours of education courses.

Agriculture

AGRI1520 - Field Practices: Extension

Credits: 1-2
Max Credit (Max. 2)

Project based work that includes practice applications of Extension programming. Directed by Extension faculty around matching topics of youth development, rangeland resources, food safety and nutrition, community development, or profitable and sustainable agriculture. Local issues are addressed in the context of applied research for public good.

AGRI2100 - International Experiences in Natural Resources

Credits: 1-3
Max Credit (Max. 3)

Cultural and environmental topics in another country through classroom sessions, self study, and a visit to the host country. Topics discussed include similarities and differences in natural resource and environmental issues, history, traditions, and cultural norms, focusing on the host country and the United States.

AGRI3000 - Discovering and Utilizing Ideas and Information

Credits: 3
Learning in this area guides students to accessing, evaluating, and utilizing information and ideas; communicating information and ideas effectively and responsibly; civic engagement for individual, organizational and community problem-solving, and applying new skills, knowledge, and perspectives in a contemporary society.

USP 2003-2014 Code U3I, U3L
Prerequisite: WA and junior status.

AGRI4350 - Problem Solving in Organizational Settings

Credits: 3
Students apply organizational leadership perspectives and methods to the resolution of a variety of simulations and real world problems. The course will emphasize leadership development as a tool for individual, organizational and community problem solving.

Prerequisite: junior or senior standing and COM2.

AGRI4500 - International Experiences in Agriculture

Credits: 1
Learn about agricultural customs in another country through classroom lectures, written assignments, and a visit to the

host country during the spring break period. Topics discussed include the influence of foreign agriculture on U. S. economies and agricultural practices, focusing on the host country.

Prerequisite: completion of WA course and junior standing.

AGRI4520 - Field Practicum: Extension Work

Credits: 1-4
Max Credit (Max. 8)

Provides practical experiences to those wanting to pursue a career with Cooperative Extension Service. Interns are matched with county-based personnel for hands-on learning experiences across the state. Develop working knowledge of CES's mission to provide the citizens of Wyoming with education and applied research.

Dual Listed AGRI 5520.

Prerequisite: must pass volunteer screening process.

AGRI4600 - Developing Organizational Leadership

Credits: 3

A senior capstone experience for Bachelor of Applied Science students, bringing together reading, research, writing, and communication skills to focus on a major project. Leadership skills and approaches to organizational problem-solving are deepened using the structural, human resource, political, and symbolic frames to change and improve leadership and organizational culture.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, AGRI 3000, and senior status.

AGRI4700 - Elements of Leadership

Credits: 3

Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 5700.

Prerequisite: Restricted enrollment. Prior approval required.

AGRI4960 - Bachelor of Applied Science Internship

Credits: 6

Provides Bachelor of Applied Science students academic credit for advanced work experiences in their area of specialization. Required to complete academic assignments such as a weekly journal, discussion and writing assignments in addition to their field-based responsibilities. Takes place in a mentored, supervised setting.

Prerequisite: Bachelor of Applied Science student, AGRI 3000, senior status, and consent of instructor.

AGRI4970 - Internship/Practicum

Credits: 1-8
Max Credit (Max. 8)

Internship or practicum experience in Agricultural Communications.

Prerequisite: COM2 or WB.

AGRI4975 - Agricultural Communications Senior Project

Credits: 1
A baccalaureate degree capstone experience incorporating self assessments of student learning, reflective writings, and an analysis, synthesis and evaluation of the agricultural communications curriculum. Students develop and present a personalized, comprehensive, professional portfolio.

Prerequisite: agricultural communication major with senior standing and WB.

AGRI4990 - Topics

Credits: 1-6
Max Credit (Max. 8)

Accommodates topics whose subject matter is not included in other College of Agriculture and Natural Resources and Natural Resources offerings. Please see the class schedule for current topic.

Prerequisite: WB.

AGRI5520 - Field Practicum: Extension Work

Credits: 1-4
Max Credit (Max 9)

Organization, teaching, and promotion of county programs.

AGRI5700 - Elements of Leadership

Credits: 3
Focuses on a basic understanding of theory and practice. Will develop self-awareness and provide a foundation for continued development of leadership skill in the workplace, the community and the home.

Dual Listed AGRI 4700.

Prerequisite: Restricted enrollment. Prior approval required.

AGRI5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

AGRI5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

AGRI5959 - Enrichment Studies:1

Credits: 3
Max Credit (Max 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: Credit in this course may not be included in a graduate program of study for degree purposes.

AGRI5960 - Thesis Research

Credits: 1
Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Air Force ROTC

AIR1000 - Leadership Laboratory

Credits: 0
The concept of leadership laboratory is to provide leadership training experiences which will improve a cadet's ability to perform as a USAF officer. Leadership laboratory is largely cadet planned and directed. All cadets must enroll in leadership laboratory.

Prerequisite: none.

AIR1010 - Heritage and Values of the Air Force I

Credits: 1-0.5
A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.

AIR1020 - Heritage and Values of the Air Force II

Credits: 1-0.5
Continues AIR 1010.

Prerequisite: AIR 1010 or consent of instructor.

AIR2010 - Team and Leadership Fundamentals I

Credits: 1-0.5
Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

Prerequisite: AIR 1010 and AIR 1020 or consent of instructor.

AIR2020 - Team and Leadership Fundamentals II

Credits: 1-0.5
Continues AIR 2010.

Prerequisite: AIR 1010, AIR 1020, and AIR 2010 or consent of instructor.

AIR3010 - Leading People/Effective Communication I

Credits: 3
Teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

USP 2015 Code U5C2
Former Course Number [4010]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, and AIR 2020 or consent of instructor.

AIR3020 - Leading People/Effective Communication II

Credits: 3
Continues AIR 3010.

USP 2003-2014 Code U3CS
Former Course Number [4020]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020, AIR 3010 or consent of instructor.

AIR4010 - National Security Affairs/Preparation for Active Duty I

Credits: 3

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty.

USP 2003-2014 Code U3G

USP 2015 Code U5C3

Former Course Number [4050]

Prerequisite: AS 400, AS 100/AS200/AS300 or approval from Commander

AIR4020 - National Security Affairs/ Preparation for Active Duty II

Credits: 3

Continues AIR 4010.

Former Course Number [4060]

Prerequisite: AIR 1010, AIR 1020, AIR 2010, AIR 2020 , AIR 3010, AIR 3020, AIR 4010 or consent of instructor.

American Studies

AAST2370 - Blues and African American Lit

Credits: 3

Max Credit 3

This course examines scholarship on blues music (the first form of African American popular music) as well as literature that employs blues themes. Specific attention is given to the discourse of authenticity

Cross Listed ENGL 2370

AMST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities. Enrollment preference will be given to We The People FIG students.

Cross Listed AAST 1030/NAIS 1030/ GWST 1030/LTST 1030.
USP 2003-2014 Code U3D, U3I
A&S College Core 2015 ASD

AMST1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

AMST2010 - Introduction to American Studies

Credits: 3
Introduces the interdisciplinary study of American culture. Focuses on themes, values and ideas which continue to reverberate through U.S. cultural experience.

When Offered (Offered at least once each year)
USP 2003-2014 Code U3CH, U3WB
USP 2015 Code U5H

AMST2400 - Introduction to Historic Preservation

Credits: 3
Online course introduces students to historic preservation theory and philosophy, the history of the preservation movement and contemporary historic preservation as practiced in the public, nonprofit and private realms. Assignments include reading, research, online discussion and lectures (podcasts, videos or PowerPoint presentations), as well as directed field work.

AMST2700 - Introduction to Museology

Credits: 3
Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed ART 2700/ANTH 2700/HIST 2700.
USP 2003-2014 Code U3CH

AMST2705 - Museology II

Credits: 3
Max Credit 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger

ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes Cross listed between Anthropology, History, American Studies and Art.

Cross Listed ANTH/ART/HIST 2705

AMST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U.S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program, or instructor approval.

AMST3100 - Food in American Culture

Credits: 3

An interdisciplinary exploration of food as a medium of cultural expression, social interaction, and aesthetic experience in American life, both past and present. Examines food as, among other things, a symbolic system, a vehicle of social communication, and an arena for the performance of regional ethnic, gender, etc. identities.

USP 2003-2014 Code U3C

Prerequisite: any 2000-level course in American Studies, or ANTH 1200, or instructor approval.

AMST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both oppression and liberation.

Cross Listed GWST 3400.

USP 2003-2014 Code U3CH,U3D

Prerequisite: WA.

AMST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the U.S.

Cross Listed LTST 3800 /GWST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

AMST4010 - Independent Study

Credits: 1-3

Max Credit 6

For upper division students in any major who can benefit from independent study in American Studies with minimal supervision.

Dual Listed AMST 5010.

Prerequisite: 3 hours in American Studies and approval of instructor.

AMST4020 - American Folklife

Credits: 3

Introduces materials and methods of folklife research, examining both verbal and nonverbal expressions of traditional cultures in America. Topics include material culture, belief systems, traditional events and celebrations, and folk performances of many kinds.

Dual Listed AMST 5020.

Prerequisite: Any six hours from among AMST 2010, ENGL 2400, NAIS 2340, AAST 2450, AAST 2730, AAST 3000, AAST 3010.

AMST4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 4030.

Dual Listed AMST 5030.

Prerequisite: 3 hours in any interdisciplinary program.

AMST4040 - Historic Preservation and Sustainability

Credits: 3

Explores the historic preservation and sustainability movements and contemporary practices in these inter-related fields. Through reading, lectures, discussions and site visits, students will study how the historic preservation and the building industry professions can address advanced issues in sustainability related to the environment, culture and economics.

Cross Listed ARE 4040.

Prerequisite: 6 hours in AMST or ARE.

AMST4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed POLS 4051 / ENR 4051 / GEOG 4051 / REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

AMST4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052 / ENR 4052 / GEOG 4052 / REWM 4052.

Prerequisite: POLS 1000.

AMST4250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 4250.

Dual Listed AMST 5250.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST4300 - American Culture and the Public Sector

Credits: 3

Surveys American culture studies in the public sector. Topics include history and theory of public sector humanities and social sciences; types of public sector jobs and institutions where public humanists work; and public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 5300.

When Offered (Offered once a year)

Prerequisite: 12 credits in humanities or social science courses having to do with American culture.

AMST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many

institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed GWST 4430.

Dual Listed AMST 5430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

AMST4500 - American Civilization

Credits: 1-8

Max Credit 8

Explores various interdisciplinary approaches to the American experience, past and present. May include topical, thematic, historical, literary and cultural integrations; for a given semester, the course's precise focus will be indicated in the class schedule.

AMST4640 - Art and Ecology

Credits: 3

Focuses on the intersection of contemporary art with ecological concerns. Readings present philosophical, historical and cultural aspects of the art/ecology relationship; students reflect and question their own beliefs. Examples of art/artists are reviewed as well as how ecological artwork is developed. Students propose solutions and/ or create art in, out of, or about the environment; local sites are encouraged.

Prerequisite: 6 hours of ART and/or AMST or consent of the instructor.

AMST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed LTST 4650/INST 4650/ GWST 4650.

Dual Listed AMST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

AMST4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 4800.

Dual Listed AMST 5800.

Prerequisite: ARE 3020 or AMST 5400.

AMST4900 - Field Studies in American Culture

Credits: 1-4

Max Credit (Max. 4)

Field Studies in American Culture: Gives students hands-on field-based training and experience in researching, documenting, and presenting aspects of American culture. Topics may include historic preservation, folklife, oral history or related fields.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 credits in American Studies or related field. May also be taken for graduate credit.

AMST4970 - Internship

Credits: 1-3

Max Credit (Max. 6)

Gives undergraduate students practical experience by working on a project at a public institution, agency or educational/cultural organization. Offered for S/U only.

Prerequisite: junior standing, completion of AMST 2010 and 12 hours in major and consent of instructor.

AMST4985 - Senior Seminar

Credits: 3

With AMST 4010 or AMST 4970, completes the capstone coursework in AMST. Identifies a broad intellectual tradition in American Studies as foundation for student's research interests; builds a specific scholarly context appropriate to student's research; culminates in a substantial piece of written research appropriate in an identified subfield of American Studies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: senior standing in American studies or consent of program director.

AMST5010 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

For graduate students in any graduate program who can benefit from independent research and writing in American Studies.

Dual Listed AMST 4010.

Prerequisite: 3 hours in American Studies and consent of instructor.

AMST5020 - American Folklife

Credits: 3

Introduces materials and methods of folklife research, examining both verbal and nonverbal expressions of traditional cultures in America. Topics include material culture, belief systems, traditional events and celebrations, and folk performances of many kinds.

Dual Listed AMST 4020.

Prerequisite: any six hours from among: AMST 2010, ENGL 2400, NAIS 2340, AAST 2450, 2730, AAST 3000 or AAST 3010.

AMST5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed ENR 5030.

Dual Listed AMST 4030.

Prerequisite: graduate status.

AMST5200 - Material Culture

Credits: 3

Designed to introduce advanced students to the theory, methods, and practice of material culture study. A significant portion of the course will be devoted to a studio exercise in which students collectively document and analyze a material culture form that has been designated by the instructors.

Prerequisite: graduate status or consent of instructor.

AMST5250 - The Harlem Renaissance

Credits: 3

Examines the florescence of African American creativity, centered in Harlem, New York, between the end of World War I and the onset of the Great Depression. This movement had a tremendous impact on African American culture in and outside of the U.S., including Africa and the Caribbean.

Cross Listed AAST 5200.

Dual Listed AMST 4250.

Prerequisite: AAST 1000, AMST 2010, any AAST 2000-level course, junior or senior standing, or nine credit hours in any level AMST course.

AMST5300 - American Culture and the Public Sector

Credits: 3

A survey of American culture studies in the public sector. Topics covered include the history and theory of public sector humanities and social sciences, types of public sector jobs and institutions where public humanists work, and

public sector work in specific fields such as museums, arts, humanities, archives, folklife, oral history, and historic preservation.

Dual Listed AMST 4300.

Prerequisite: graduate status.

AMST5400 - American Built Environment

Credits: 3

Examination of America's built environment from pre-Colonial times to the present day. Factors affecting the architecture and built form of a given period are discussed together with what the material legacy says about the culture of the period.

Prerequisite: ARE 3020.

AMST5430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed GWST 5430.

Dual Listed AMST 4430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

AMST5500 - Topics in American Studies

Credits: 3

Selected problems in the theory, practice, and bibliography of American studies. Required of graduate majors in the program and is recommended for students with an interdisciplinary interest in American Culture.

Prerequisite: survey knowledge of American literature and history; graduate standing or consent of instructor.

AMST5510 - Readings in American Studies

Credits: 3

Selected readings in the theory, practice, and bibliography of American Studies. Surveys scholarship in the field and is designed to help graduate students develop thesis topics.

Prerequisite: graduate standing in American studies or related field; consent of instructor.

AMST5550 - Varieties of Literary Evidence

Credits: 3

Selected problems in the use of literary evidence for American studies scholarship.

Prerequisite: graduate standing in American studies or a related field; consent of instructor.

AMST5560 - Black Popular Culture

Credits: 3

Approaches African American popular culture from theoretical perspectives which include black feminist, postcolonial, and poststructuralist analyses.

Cross Listed AAST 5560.

Prerequisite: graduate standing; instructor consent for undergraduate students.

AMST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed LTST 5650 /INST 5650 / GWST 5650.

Dual Listed AMST 4650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

AMST5800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed ENR 5800.

Dual Listed AMST 4800.

Prerequisite: ARE 3020 or AMST 5400.

AMST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

AMST5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AMST5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

AMST5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: Credit in this course may not be included in a graduate program of study for degree purposes.

AMST5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

AMST5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

REWM5200 - Hierarchical Model for Ecolog

Credits: 3

Application of hierarchical models to many different types of ecological observations for the purpose of estimating and explaining abundance and occupancy of animals in JAGS and R. Statistical exploration of many common survey designs (point counts, distance sampling, repeated observations of marked animals) that imperfectly record spatial and temporal variation in the abundance and distribution of wild populations. Use of simulated and real-world data sets to draw inference when dealing with missing data, changes in survey protocols, and imperfect detection.

Cross Listed ECOL 5200

Animal Science

ANSC1009 - Introduction to Animal Science for 4-H/Youth

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses. Intended for high school undergraduates.

ANSC1010 - Introduction to Animal Science

Credits: 4

Introduction to the field of animal science, including meat and dairy products, nutrition, reproduction, breeding and genetics, livestock selection, and diseases and health of domestic livestock species, with application to the management of beef cattle, sheep and wool, dairy cattle, swine, and horses.

When Offered (Normally offered fall semester)

ANSC1030 - Equine Management

Credits: 3

An overview of the horse industry and proper way to manage horses.

When Offered (Normally offered spring semester)

ANSC1070 - Livestock Fitting and Showing

Credits: 1

Teaches fitting and showing techniques for domestic livestock. Students will have the opportunity to fit an animal of their choice and participate in the Little International Livestock Show at the Animal Science Livestock Center.

When Offered (Normally offered fall semester)

ANSC1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

ANSC2010 - Domestic Animal Metabolism

Credits: 3

Integrates cellular and whole-animal metabolism through introduction to metabolic regulation. Introduces students to the nomenclature, structures and functions of cellular metabolites and vitamins. Knowledge of chemical structure will

be applied to cellular reactions in various tissues of domestic animals. Ruminants and non-ruminants will be contrasted.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ANSC2020 - Feeds and Feeding

Credits: 4

Nutrient classification and use, feed value, ration formulation and feeding domestic animals.

When Offered (Normally offered spring semester)

ANSC2035 - Companion Animal Nutrition

Credits: 3

Nutrition and biology of digestion of companion/ pet animals. Fundamentals of nutrition and the nutrients, as well as appropriate terminology will be covered, with direct application to companion animals.

When Offered (Normally offered spring semester)

ANSC2070 - Livestock Behavior and Handling

Credits: 2

Teaches basic behavior of livestock species including cattle, swine, sheep and goats. Apply knowledge to effectively learn humane handling techniques and facility design for low-stress management.

Prerequisite: ANSC 1010.

ANSC3010 - Comparative Anatomy and Physiology of Domestic Animals

Credits: 4

Teaches comparative anatomy and physiology of digestion, circulation, production, reproduction and environment of farm animals.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 1010 and LIFE 2022, or concurrent registration with LIFE 2022.

ANSC3100 - Principles of Animal Nutrition

Credits: 3

Description of the nutrients, nutrient digestion and absorption, and nutrient function within the body of various domesticated animals.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 2300 or ANSC 2010.

ANSC3150 - Equine Nutrition and Physiology

Credits: 3

Provides general knowledge of nutrition, physiology and biochemistry of exercise and reproductive processes of equine.

When Offered (Normally offered fall semester)

Prerequisite: 4 hours of biology.

ANSC3250 - Equine Behavior and Welfare

Credits: 3

To familiarize students with an equine interest about behavior, learning, and welfare issues associated with management and training of equine.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC3535 - Introduction to Wool Evaluation

Credits: 2

Objectively evaluate raw wool characteristics and quality determining factors across various wool grades and breed types. Particular emphasis will be given to how quality determining factors influence replacement selection and the end product produced. Competitive wool judging format will be used to enhance organizational skills, wool judging terminology, oral articulation skills.

Prerequisite: ANSC 1010.

ANSC3540 - Collegiate Wool Judging

Credits: 1

Students representing the university in regional and national wool intercollegiate contests are selected from this course.

Prerequisite: ANSC 3535.

ANSC3545 - Introduction to Livestock Evaluation

Credits: 3

Objectively evaluate livestock species including cattle, sheep, swine, and goats for both market and breeding standards. Improve communication skills and terminology through oral and written reasons. Gain an understanding of expected progeny differences and how they relate to selection and livestock production.

Prerequisite: FDSC 2040 or instructor approval.

ANSC3550 - Advanced Livestock Evaluation

Credits: 1-2

Students representing the university in national and regional contests are selected from this course. Requires field trips.

Prerequisite: ANSC 3545.

ANSC3555 - Equine Evaluation and Selection

Credits: 3

Objectively evaluate equine for performance and breeding purposes according to breed standards and or discipline. Emphasis will be placed on learning how conformation relates to overall function and longevity of equine. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills.

Prerequisite: ANSC 1010 and ANSC 1030.

ANSC3560 - Advanced Equine Evaluation and Selection

Credits: 1-2

Max Credit (Max. 3)

Objectively evaluate equine for halter and performance according to breed standards and or discipline. Competitive horse judging team criteria will be used to build organizational skills, equine terminology, and communication skills. Students will compete as members of the Collegiate Horse Judging Team and represent University of Wyoming at national horse judging competitions.

Prerequisite: ANSC 3555.

ANSC3650 - Exploring Graduate Study in Animal Science

Credits: 1

Gives undergraduates the opportunity to explore graduate studies in Animal Science. Discussions center on graduate program searches, applications, and interviews as well as graduate student responsibilities and career possibilities. Undergraduates are paired with graduate student mentors, participate in data collection, and attend departmental seminars.

Prerequisite: consent of instructor, junior standing and 3.000 GPA or higher recommended

ANSC4050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 5050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

ANSC4061 - Cell Signaling

Credits: 3

Cell signaling pathways in animal growth and development. Defines how cells respond to external stimuli. Includes: G-protein couple signaling, calcium signaling, growth factor associated signaling, redox signaling, lipid related signaling, and apoptosis.

Dual Listed ANSC 5061.

When Offered (Normally offered fall semester of alternative years)

Prerequisite: MOLB 3610 or an equivalent biochemistry or cell biology course.

ANSC4100 - Nutritional Management

Credits: 3

Integration and application of the principles of nutrition. Addresses nutrient requirements, feed composition and nutritional value, in addition to feeding management strategies for various classes of farm animals. Provides practical nutritional experience through laboratory.

Dual Listed ANSC 5100.

Prerequisite: ANSC 3100.

ANSC4111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 4111.

Dual Listed ANSC 5111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC4120 - Principles of Mammalian Reproduction

Credits: 4

Overview of the anatomy, physiology, endocrinology and biochemistry of reproductive processes in male and female mammals. Includes lecture and laboratory components.

Dual Listed ANSC 5120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 OR ZOO 3115

ANSC4130 - Management of Reproduction

Credits: 3

Lecture-laboratory course. Introduces methods of manipulating reproduction within livestock management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, induction of

parturition, embryo transfer and control and prevention of diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120.

ANSC4132 - Equine Reproduction

Credits: 2

Introduces methods of manipulating reproduction within equine management systems. Includes artificial insemination, diagnosis of pregnancy, induction and control of estrus and ovulation, parturition, embryo transfer, and control and prevention of equine reproductive diseases.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 4120 and ANSC 1030

ANSC4150 - Physiology of Ruminant Digestion

Credits: 3

Anatomical structure, function and symbiotic relationship of ruminant digestive system.

Dual Listed ANSC 5150.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3100.

ANSC4210 - Wool Structures and Properties

Credits: 2

Chemical structure and reactions of wool fiber, as well as physical properties as related to structure.

Prerequisite: CHEM 2300 or equivalent.

ANSC4220 - Advanced Beef Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in beef production management schemes. Emphasizes analysis and decision making. Consists of two hours of lecture and two hours of lab, with approximately one-half of labs meeting at Animal Science Livestock Center.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 3100, ANSC 4120 , ANSC 4540 .

ANSC4230 - Advanced Sheep Production & Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in sheep production management schemes.

When Offered (Normally offered spring semester)
Prerequisite: ANSC 3100, ANSC 4120, ANSC 4540.

ANSC4240 - Advanced Swine Production and Management

Credits: 3

Integrates animal breeding, nutrition and reproductive physiology in swine production management schemes. Consists of two hours of lecture and two hours of lab, with at least one-half of labs meeting at Animal Science Livestock Center.

Former Course Number [3330]

Prerequisite: ANSC 3100, ANSC 4120, or ANSC 4540.

ANSC4250 - Advanced Equine Production and Management

Credits: 3

A capstone course for students wanting to pursue a career in the equine industry with main focus on equine management. Business applications, health, facilities, and management will be explored in depth. Integrates equine breeding, nutrition, and reproductive physiology in equine production management schemes.

When Offered (Normally offered spring semester)
Prerequisite: ANSC 1030, ANSC 3100 , ANSC 4120, and ANSC 4540 .

ANSC4260 - Mammalian Endocrinology

Credits: 3

Introduces principles of endocrinology, role of endocrine systems in regulating metabolism, growth, reproduction and lactation in mammals.

Dual Listed ANSC 5260.

When Offered (Normally offered fall semester)
Prerequisite: ANSC 3010, ZOO 3115, or equivalent.

ANSC4500 - Problems in Animal Science

Credits: 1-3

Provides opportunity for students to conduct supervised research in breeding, genetics, management, nutrition and physiology.

Prerequisite: 6 hours in animal science and consent of instructor.

ANSC4540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of

mating; and selection.

Dual Listed ANSC 5540.

When Offered (Normally offered fall semester)

Prerequisite: STAT 2050 or STAT 2070.

ANSC4550 - Internship in Animal Science

Credits: 2

Provides opportunities to acquire experience in a field of interest to the student. Offers learning experiences that are difficult, if not impossible, to realize in classroom settings. Following off-campus educational experience, students are more able to evaluate potential career opportunities and select additional classes on-campus to complement career direction.

Prerequisite: sophomore standing; 2.500 GPA

ANSC4630 - Topics and Issues in Animal Science

Credits: 3

Writing-intensive course that focuses on writing projects related to current topics and issues in animal science. Emphasizes writing skills, strategies, information gathering and critical judgment. Assignments include short and long papers, resumes, letters of transmittal, and oral presentations.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: senior standing and COM2.

ANSC4900 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Participation of undergraduates in the teaching of ANSC or FDSC courses under the supervision of ANSC faculty/staff.

Prerequisite: junior standing and consent of instructor.

ANSC5050 - Animal Growth and Development

Credits: 3

Explores aspects of animal growth and development, with a focus on skeletal muscle, adipose, soft connective tissues, and bone. Addresses genetic, endocrine, nutritional, and environmental impacts on tissue development and growth.

Dual Listed ANSC 4050.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2022.

ANSC5061 - Cell Signaling

Credits: 3

Cell signaling pathways in animal growth and development. Defines how cells respond to external stimuli. Includes: G-protein couple signaling, calcium signaling, growth factor associated signaling, redox signaling, lipid related signaling, and apoptosis.

Dual Listed ANSC 4061.

When Offered (Normally offered fall semester of alternative years)

Prerequisite: MOLB 3610 or an equivalent biochemistry or cell biology course.

ANSC5100 - Nutritional Management

Credits: 3

Integration and application of the principles of nutrition. Addresses nutrient requirements, feed composition and nutritional value, in addition to feeding management strategies for various classes of farm animals. Provides practical nutritional experience through laboratory.

Dual Listed ANSC 4100.

Prerequisite: ANSC 3100.

ANSC5111 - Equine Health and Disease

Credits: 3

To familiarize students with identification, prevention and treatment of diseases in horses through proper health management techniques.

Cross Listed PATB 5111.

Dual Listed ANSC 4111.

When Offered (Normally offered spring semester)

Prerequisite: ANSC 1030, ANSC 3150.

ANSC5120 - Principles of Mammalian Reproduction

Credits: 4

In addition to attendance in the lecture component of this course, graduate students will be expected to participate in in-depth weekly discussions of the scientific literature and to prepare a research grant proposal on a specific topic.

Dual Listed ANSC 4120.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3010 or similar course.

ANSC5150 - Physiology of Ruminant Digestion

Credits: 3

The anatomical structure, function, and symbiotic relationship of the ruminant digestive system.

Dual Listed ANSC 4150.

When Offered (Normally offered fall semester)

Prerequisite: ANSC 3100.

ANSC5180 - SAS Applications in Agriculture

Credits: 2

Use of PC Statistical Analysis (SAS) software for analysis of data generated using experimental designs common to the agricultural sciences. Course will emphasize applied programming and interpretation of results.

Prerequisite: STAT 5080 or equivalent.

ANSC5260 - Mammalian Endocrinology

Credits: 3

Introduction to the principles of endocrinology. The role of endocrine systems in regulating metabolism, growth, reproduction, and lactation in mammals are discussed.

Dual Listed ANSC 4260.

When Offered (Normally offered fall semester)

Prerequisite: graduate standing.

ANSC5300 - Stem Cell & Regenerative Bio.

Credits: 3

Max Credit 3

Stem cell types, cellular reprogramming, stem cell isolation and characterization, and generating stem cells for research and therapeutic purposes will be discussed. Practical goals are to gain an understanding of pioneering research in stem cell and regenerative biology, enhance presentation skills, critically evaluate primary literature, and develop grantsmanship skills.

Prerequisite: Graduate standing.

ANSC5510 - Mineral Metabolism

Credits: 3

Lectures on current mineral nutrition topics with student reports on recent journal articles.

Prerequisite: ANSC 3100.

ANSC5540 - Principles of Animal Breeding

Credits: 3

Discusses genetic principles underlying animal improvement; introductory population genetics; heritability; systems of mating; and selection.

Dual Listed ANSC 4540.

When Offered (Normally offered fall semester)

ANSC5550 - Investigations in Animal Nutrition

Credits: 2-3

Max Credit (Max. 6)

Special problems involving nutritional research with domestic or laboratory animals.

Prerequisite: ANSC 3100 and consent of instructor.

ANSC5620 - Wool Measurement Methods

Credits: 3

Theory and practice relating to routine and standard analytical fiber measurements.

Prerequisite: ANSC 3040 and STAT 2050 or consent of instructor.

ANSC5680 - Wool Problems Analysis

Credits: 1-5

Max Credit (Max. 10)

Scientific papers on assigned topics.

Prerequisite: STAT 2050.

ANSC5770 - Lipid Metabolism

Credits: 3

An in-depth study of lipid metabolism and regulation of genes and enzymes involved in transport, synthesis, mobilization, and oxidation of lipids with application to ruminant and non-ruminant species as well as to humans.

Cross Listed FDSC 5770.

Prerequisite: ANSC 3100 or MOLB 3610 or FCSC 4145.

ANSC5780 - Investigations in Animal Breeding

Credits: 1-3

Max Credit (Max. 6)

Assigned problems involving genetic and physiological research with domestic or laboratory animals.

Prerequisite: ANSC 4540.

ANSC5865 - Advanced Seminar in Nutrition

Credits: 1-2
Max Credit (Max. 2)

Preparation and presentation of seminars on a variety of topics relating to animal nutrition, metabolism, and livestock production.

Prerequisite: graduate standing.

ANSC5870 - Reproductive Biology Seminar

Credits: 1
A graduate seminar designed to examine a variety of topics relating to the physiological processes of reproduction in mammals.

Prerequisite: graduate standing.

ANSC5880 - Advanced Topics

Credits: 1-3
Max Credit (Max. 6)

Special topics will be offered based on interest of students and faculty. Credit hours are variable

Prerequisite: graduate standing.

ANSC5890 - Advanced Seminar

Credits: 1-2
Max Credit (Max. 6)

Preparation, presentation, and discussion of assigned reports. Invitational lectures by visiting guests.

ANSC5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ANSC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANSC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANSC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Credit in this course may not be included in a graduate program of study for degree purposes.

ANSC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ANSC5961 - Graduate Project

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of the Plan B project.

Prerequisite: must be enrolled in Plan B program and have departmental approval.

ANSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

ANSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Anthropology

ANTH1100 - Introduction to Biological Anthropology

Credits: 4
Basic concepts relating to the origin, evolution and biological nature of the human species.

USP 2003-2014 Code U3SB
USP 2015 Code U5PN

ANTH1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

ANTH1200 - Introduction to Cultural Anthropology

Credits: 3
Introduction to foreign, especially non-western, cultures through anthropological concepts, films and ethnographies.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

ANTH1300 - Introduction to Archaeology

Credits: 3
Explores ways in which prehistoric material remains can provide an understanding of the cultural way of life. General background in archaeological method and theory is used to examine case studies from throughout the world, based on themes such as ceramic technology and artistry development, growth of early civilizations and North American prehistory.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5PN
A&S College Core 2015 ASG

ANTH1325 - Wyoming Archaeology

Credits: 3
Max Credit 3

Wyoming's archaeological record spans 13,000 years, from stone tools left by Ice Age mammoth hunters to the wooden dwellings of native Shoshone Indians to the nation's first trans-continental railroad. Through the tools of archaeology, students learn chronology, modes of subsistence, and material remains left by human cultures in Wyoming.

USP 2015 Code U5H

ANTH1450 - World Archaeology

Credits: 3
World Prehistory. Recommended for non-majors. A survey of the archaeology of Africa, Asia, Europe, Australia, and the Americas from the evolution of humans to the origins of agriculture to the rise of civilizations such as that of Egypt, China, and Mexico.

USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

ANTH2000 - Introduction to Linguistic Anthropology

Credits: 3
Demonstrates the interrelationship of language, human biology, and culture at the introductory level. Linguistic anthropological methods and theories are used to examine linguistic behaviors used throughout the world.

USP 2003-2014 Code U3L
USP 2015 Code U5C2
Prerequisite: ANTH 1100, ANTH 1200 or ANTH 1300.

ANTH2200 - World Culture

Credits: 3
Provides an understanding of cultural behavior of people in various geographical areas of the world. Students read ethnographies, cultural descriptions of societies, written by cultural anthropologists.

When Offered (Normally offered at least once a year)
USP 2003-2014 Code U3G, U3CS
A&S College Core 2015 ASG

ANTH2210 - North American Indians

Credits: 3
Comparative consideration of North American Indian culture areas at European contact period.

Cross Listed NAIS 2210.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3D

USP 2015 Code U3CS

A&S College Core 2015 ASD

ANTH2600 - Forgotten Africa: Intro to African Civilizations

Credits: 3

This survey course introduces students to African states and empires, dating from classical to modern times. The course challenges depictions of Africa as timeless and underdeveloped within contemporary narratives by highlighting the continent's vibrant cultures, sophisticated technologies, dynamic and complex political systems and participation in long-distance trade.

Cross Listed HIST 2600.

USP 2015 Code U5H

ANTH2700 - Introduction to Museology

Credits: 3

Max Credit 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ART 2700/HIST 2700.

USP 2003-2014 Code U3CH

ANTH2705 - Museology II

Credits: 3

Max Credit 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes Cross listed between Anthropology, History, American Studies and Art.

Cross Listed AMST/ART/HIST 2705

ANTH3015 - Introduction to the Music of the World's Peoples

Credits: 3

Introduces music of the world's peoples. Students actively study and document living musical traditions and hear, research and study music from a wide variety of geographical areas of the world.

Cross Listed MUSC 3015.

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [2015]

Prerequisite: MUSC 1000.

ANTH3300 - Ethnographic Methods in Anthropology

Credits: 3

Introduces anthropology majors to ethnographic fieldwork, the fundamental method in cultural anthropology. Students conduct fieldwork and discuss research problems including ethics and the role of the researcher. Open to students in related fields of humanities and social sciences.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: ANTH 1200.

ANTH3310 - Introduction to Anthropology Research Methods

Credits: 3

Introduces anthropology majors to use of the discipline's scientific method through problem formation, research data acquisition and research techniques used by anthropologists.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, ANTH 1200, and ANTH 1300.

ANTH3400 - Hunters/Gatherers

Credits: 3

Max Credit 3

USP 2003-2014 Code UCNW

USP 2015 Code U5H

A&S College Core 2015 ASG

ANTH3410 - Maya, Aztec, and Inca Cultures

Credits: 3

An exploration of the early states and empires of the New World through the archaeological record. Compares and contrasts the Aztec, Maya, and Inca cultures with emphasis placed on origins, political and social organization, ritual beliefs, and reasons for collapse.

Prerequisite: ANTH 1300.

ANTH3420 - The Anthropology of Global Issues

Credits: 3

Using anthropology's long-term, holistic and comparative approaches, the course examines key global issues, e. g. , poverty, war, disease, environmental degradation, and terrorism from an anthropological perspective.

Cross Listed INST 3420.

Prerequisite: ANTH 1200.

ANTH3900 - Historical Archaeology

Credits: 3

Introduces the field of historical archaeology, the archaeological and archival study of literate societies. Introduces the history of the discipline, a survey of contemporary historical archaeological practice, major theoretical debates, and multidisciplinary methods.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH4000 - Conference

Credits: 1-4

Guided independent study.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: senior standing and 15 hours in anthropology.

ANTH4010 - History of Anthropological Thought

Credits: 3

Designed as the capstone course for senior majors. Surveys anthropological theory development. Explores major trends and their relationships. (Normally taken in student's final semester)

USP 2003-2014 Code U3WC

Prerequisite: ANTH 1100, ANTH 1200, ANTH 1300, ANTH 3300, and ANTH 3310.

ANTH4015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of significant topics. Addresses questions, such as: How do archaeologists identify and solve problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 5015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH4020 - Seminar

Credits: 3-6

Considers current topics of anthropological interest. May be repeated for a maximum of 6 hours credit when the subject matter of the seminar is different.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 1100, ANTH 1200, or ANTH 1300.

ANTH4021 - Seminar in Archaeology

Credits: 3

Considers current topics of archaeological interest.

Prerequisite: ANTH 1300.

ANTH4022 - Seminar in Biological Anthropology

Credits: 3

Considers current topics of interest within biological anthropology.

Prerequisite: ANTH 1100.

ANTH4023 - Seminar in Cultural Anthropology

Credits: 3

Considers current topics of interest within cultural anthropology.

Prerequisite: ANTH 1200.

ANTH4024 - Seminar in Linguistic Anthropology

Credits: 3

Considers current topics of interest within linguistic anthropology.

Prerequisite: ANTH 2000.

ANTH4110 - Zooarchaeology I

Credits: 3

Introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological

relationships and problem-oriented taphonomic research.

Dual Listed ANTH 5110.

Prerequisite: ANTH 1300.

ANTH4115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

Dual Listed ANTH 5115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH4120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historic times.

Dual Listed ANTH 5120.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4125 - Northwestern Plains Prehistory

Credits: 3

Northwestern Plains archaeology from the Paleoindian period to historic contact. A review of important sites and artifact types, ongoing UW research projects, regional and other expressions of ideology, Native American ethnohistory and contemporary perspectives, and historic preservation issues.

Dual Listed ANTH 5125.

When Offered (Normally offered every third semester)

Former Course Number [4100]

Prerequisite: ANTH 1300.

ANTH4130 - Old World Archaeology

Credits: 3

Surveys major archaeological sequences of the Old World.

Dual Listed ANTH 5130.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1300.

ANTH4135 - Quantitative Methods in Anthropology

Credits: 3

A consideration of the use of quantitative methods in anthropological research, including descriptive and inferential statistics, pattern search, mathematical modeling and computer simulation.

Dual Listed ANTH 5135.

Prerequisite: STAT 2070 or equivalent.

ANTH4140 - Archeological Field School

Credits: 2-6

Summarizes a regional prehistory and gives practical and theoretical training in archaeological field methods. Field projects are located specific areas of the world (e. g. , Wyoming, Croatia, Peru).

When Offered (Normally offered summer session)

Prerequisite: ANTH 1300 or ANTH 4120 or ANTH 4125 or ANTH 4130 or ANTH 4150.

ANTH4145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 5145.

Prerequisite: ANTH 1300.

ANTH4150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max. 9)

Covers the prehistory of a specified region or time period within that region. Emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 5150.

Prerequisite: ANTH 1300.

ANTH4155 - Computer Programming for Archaeologists

Credits: 3

Introduces the application of computer programming to the collection, management, and analysis (hypothesis testing) of archaeological data. Develop models and simulations of complex prehistoric systems. Begins with an introduction to Microsoft Excel (Visual Basic for Applications), programming structure, and applications to archaeology. Specific assignments in writing programs relevant to typical archaeological problems.

Dual Listed ANTH 5155.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH4160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) hands-on-experience with GIS applications in archaeology through demonstrations, lectures, and structured inquiries.

Dual Listed ANTH 5160.

Prerequisite: ANTH 1200, or ANTH 1300.

ANTH4170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphical processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 5170.

Prerequisite: ANTH 1300.

ANTH4175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 5175.

Prerequisite: ANTH 1300.

ANTH4190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies and regulations; compliance, heritage, and avocational archaeology, cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 5190

ANTH4210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 5210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH4215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 5215.

When Offered (Normally offered every third semester)

Former Course Number [4200]

Prerequisite: ANTH 1100.

ANTH4220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 5220.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1100.

ANTH4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed CRMJ 4230.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ANTH 1100.

ANTH4240 - Forensic Anthropology Laboratory

Credits: 2

Studies details of advanced osteometric procedures, particularly as applied to problems of human skeletal identification.

Dual Listed ANTH 5240.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ANTH 4210.

ANTH4255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 5255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH4260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 5260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH4300 - Anthropology of Religion

Credits: 3

Provides a comparative anthropological study of religious systems, emphasizing analysis of symbolism, myth and ritual.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 4310.

Dual Listed ANTH 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

Dual Listed ANTH 5320.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4325 - Symbolic Anthropology

Credits: 3

Teaches several anthropological approaches to symbolic and cultural analysis, while reading ethnographic examples of how symbolic analysis can be used to understand different cultures. Coursework assumes a basic knowledge of social science concepts.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4330 - Social Organization

Credits: 3

Provides theories of social organization, interrelations of social institutions, and current anthropological methods of interpretation.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 5340.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ANTH4350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, global politics of AIDS and other pandemics.

Dual Listed ANTH 5350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH4380 - Visual Anthropology

Credits: 3

Offers anthropological interpretation of visual representations and media, including analysis of the development of ethnographic films and their contemporary use. Visual representations of many cultures as well as mainstream United States examples are analyzed.

Prerequisite: ANTH 1200.

ANTH4740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 5740.

Prerequisite: ANTH 2000 or consent of instructor.

ANTH4765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 5765.

Prerequisite: ANTH 2000 or consent of the instructor.

ANTH4785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 5785.

Prerequisite: ANTH 1200 or ANTH 2000.

ANTH4795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change are discussed. The use of linguistic data for questions of migration and cultural contact are also explored.

Dual Listed ANTH 5795.

Prerequisite: ANTH 2000.

ANTH4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Allows students to gain hands-on experience, bridging the gap between anthropology as an academic discipline and anthropology as practiced in museums, public archaeology agencies, non-governmental organizations, and private consulting companies. Involves a required academic component in addition to work experience. Internship credit cannot fulfill requirements of the major.

Prerequisite: anthropology major of junior/senior standing and consent of internship director and/or department head.

ANTH4975 - Undergraduate Practicum in Anthropology

Credits: 1-4

Max Credit (Max. 6)

Affords students the opportunity to extend research projects in field or lab locations and receive additional credit for their work. Students sign up for these hours only in conjunction with another course and with the instructor's consent.

Prerequisite: 9 hours in anthropology, consent of instructor.

ANTH5000 - Special Problems

Credits: 1-4

Max Credit (Max. 12)

Conference course to allow graduate students opportunity for both guided and independent research.

Prerequisite: graduate standing and consent of instructor.

ANTH5005 - Graduate Seminar in Anthropology

Credits: 3

Prerequisite: graduate standing or consent of instructor.

ANTH5010 - 20th Century Anthropology Theory

Credits: 3

Examines major thinkers and schools of thought in anthropology of the 20th century. Emphasis is on cultural theory within the context of the four-field approach.

Prerequisite: graduate standing in anthropology.

ANTH5015 - Archaeological Theory and Method

Credits: 3

Introduces the students to past and present archaeological theories through a literature survey of most significant topics. Addresses questions, such as: How do archaeologists go about identifying and solving problems? What do they perceive to be problems? What is the logic of archaeological arguments?

Dual Listed ANTH 4015.

Prerequisite: ANTH 1200, ANTH 1300, ANTH 3310, and at least one 4000 regional course.

ANTH5020 - Biological Anthropology

Credits: 3

Offers a graduate level overview of biological anthropology. Beginning with the history of relevant areas of human biology, provides extensive discussion of such areas as paleoanthropology, primatology, and human variation. Also includes detailed theoretical examinations of topics within hominid evolution, the concept of race and sociobiology.

Prerequisite: first year anthropology graduate student standing.

ANTH5030 - Linguistic Anthropology

Credits: 3

Demonstrates interrelationships between language, human biology, and culture. In particular, the relevance of the study of language to biological anthropology, archaeology, and cultural anthropology is emphasized. Examines classic approaches in anthropological linguistics and recent controversies such as the origin of language in human evolution.

ANTH5110 - Zooarchaeology I

Credits: 3

An introductory level seminar in the archaeological analysis of faunal materials. Emphasis is on the identification and curation of bones from archaeological and Late Pleistocene paleontological contexts, including their use in the interpretation of prehistoric and historic human behavior, the investigation of paleoenvironmental conditions and paleoecological relationships and problem-oriented taphonomic research.

Dual Listed ANTH 4110.

Prerequisite: ANTH 1300.

ANTH5115 - Lithic Analysis

Credits: 3

An overview of the analysis of stone tools and waste flakes from archaeological sites. Emphasizes appropriate use of typology and methods of debitage analysis.

Dual Listed ANTH 4115.

Prerequisite: ANTH 1300 and 9 additional hours in anthropology.

ANTH5120 - North American Archaeology

Credits: 3

Studies North American prehistory from the earliest evidence to historical times.

Dual Listed ANTH 4120.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5125 - Northwestern Plains Prehistory

Credits: 3

Covers the Northwestern Plains from the Paleo-Indian to historic contact, including relationships to surrounding areas.

Dual Listed ANTH 4125.

Prerequisite: ANTH 1300.

ANTH5130 - Old World Archaeology

Credits: 3

Survey of the major archaeological sequences of the Old World.

Dual Listed ANTH 4130.

Prerequisite: ANTH 1300.

ANTH5135 - Quantitative Methods in Anthropology

Credits: 3

A consideration of the use of quantitative methods in anthropological research, including descriptive and inferential statistics, pattern search, mathematical modeling and computer simulation.

Dual Listed ANTH 4135.

Prerequisite: STAT 2070 or comparable course.

ANTH5145 - Origins of the State

Credits: 3

This course takes a comparative approach to the study of the origins of the archaic states. Focus is given to themes in complexity such as emergence of social economic inequality, private property, power, ideology, and urbanism. Comparative civilizations/regions include China, Mesopotamia, Egypt, Central Mexico, and Peru.

Dual Listed ANTH 4145.

Prerequisite: ANTH 1300.

ANTH5150 - Seminar in Prehistory

Credits: 1-3

Max Credit (Max 9)

Covers the prehistory of a specified region or time period within that region. emphasizes learning prehistoric sequences, material culture, and research questions associated with the topic. Topics include, but are not limited to, Paleoindian, Archaic, Siberian, Northern Plains, Great Basin, Rocky Mountain, or Southwestern Archaeology.

Dual Listed ANTH 4150.

Prerequisite: ANTH 1300.

ANTH5155 - Computer Programming for Archaeologists

Credits: 3

Introduces the application of computer programming to the collection, management, and analysis (hypothesis testing) of archaeological data. Develop models and simulations of complex prehistoric systems. Begins with an introduction to Microsoft Excel (Visual Basic for Applications), programming structure, and applications to archaeology. Specific assignments in writing programs relevant to typical archaeological problems.

Dual Listed ANTH 4155.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5160 - GIS in Anthropology

Credits: 4

Introduction to how and why geographic information systems (GIS) are used in anthropology. Considers: 1) Background, definitions, and concepts of geographic data and GIS; 2) Anthropological and archaeological approaches to GIS; and 3) Hands-on experience with GIS applications in archaeology through demonstrations, lectures, and structured inquires.

Dual Listed ANTH 4160.

Prerequisite: ANTH 1200 or ANTH 1300.

ANTH5165 - Advanced Archaeological Research

Credits: 3-6

Max Credit (Max. 6)

Intended for graduate students in archeology which will cover a wide range of topics in advanced research techniques.

Prerequisite: graduate standing.

ANTH5170 - Geoarchaeology

Credits: 3

Introduces students to theory and method in geoarchaeological research. Emphasis is placed upon geomorphological processes of archaeological site formation and paleoenvironmental reconstruction.

Dual Listed ANTH 4170.

Prerequisite: ANTH 1300 or consent of instructor.

ANTH5175 - South American Prehistory

Credits: 3

Intensive study of the archaeology of South America covering its entire prehistory from first peopling at perhaps 14,000 years ago, to the colonial period. The course focuses not only on the well known Andean cultures, but also on the archaeology of the entire continent.

Dual Listed ANTH 4175.

Prerequisite: ANTH 1300.

ANTH5180 - Advanced Archaeological Field Studies

Credits: 6

Covers the entire archaeological process from project planning and budgeting to professional presentation of the results with an emphasis on field methods. Up to date field techniques with electronic data collection and analysis are introduced. Interdisciplinary philosophy is emphasized with lectures, demonstrations and hand-on experience.

Prerequisite: graduate level students or upper level undergraduates with field school experience and consent of instructor.

ANTH5190 - Public Archaeology

Credits: 3

A consideration of archaeological legislation, policies, and regulations; compliance, heritage, and avocational archaeology; cultural resource management; curation; and professional archaeological ethics.

Dual Listed ANTH 4190.

Prerequisite: ANTH 1300.

ANTH5210 - Human Osteology

Credits: 3

Provides a detailed study of the human skeleton.

Dual Listed ANTH 4210.

When Offered (Normally offered spring semester)

Prerequisite: ANTH 1100, LIFE 2022.

ANTH5215 - Hominin Evolution

Credits: 3

Surveys hominin fossil record in context of evolutionary process, stressing structure-function and the dynamics of adaptive responses.

Dual Listed ANTH 4215.

When Offered (Normally offered every third semester)

Former Course Number [ANTH 5200]

Prerequisite: ANTH 1100.

ANTH5220 - Human Variation

Credits: 3

Studies human biological variation as viewed from the anthropological perspective. Focuses on populational variation among humans in terms of genetic, morphological, and acclimatized characteristics with particular focus on the interaction of biology and culture in shaping these variations.

Dual Listed ANTH 4220.

Prerequisite: ANTH 1100.

ANTH5240 - Forensic Anthropology Laboratory

Credits: 2

Studies details of advanced osteometric procedures, particularly as applied to problems of human skeletal identification.

Dual Listed ANTH 4240.

Prerequisite: ANTH 4210.

ANTH5255 - Bioarchaeology

Credits: 3

Study of the human skeleton in archaeological context to reveal the biological and cultural pasts of individuals and communities. Using case studies, covers the history of the field, ethics of working with human remains, theoretical and methodological approaches to mortuary archaeology. Gain hands-on experience by working with specimens from the UWyoming Human Remains Repository.

Dual Listed ANTH 4255.

Prerequisite: ANTH 1100 or ANTH 1300.

ANTH5260 - Anthropology of Food, Culture, and Nutrition

Credits: 3

Offers a biocultural perspective to the study of diet, nutrition, subsistence, and food systems. Study includes basic nutritional principles and diet seen in evolutionary, cross-cultural, ethnographic, and historical perspective; method and theory in nutritional anthropology; and contemporary issues in nutrition, cuisine, and foodways.

Dual Listed ANTH 4260.

Prerequisite: ANTH 1100 or ANTH 1200.

ANTH5310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ENR 5310.

Dual Listed ANTH 4310.

Prerequisite: ANTH 1200.

ANTH5320 - Political Anthropology

Credits: 3

Encompasses theories and descriptions of relationships between power and society in both less formal tribal contexts and more highly structured political institutions.

ANTH5340 - Culture Change

Credits: 3

Examines representative theories of change, factors involved, dynamics of modernization and applied anthropology.

Dual Listed ANTH 4340.

Prerequisite: ANTH 1200.

ANTH5350 - Medical Anthropology

Credits: 3

Understandings of health and illness vary widely. Taking a comparative historical approach, this class examines how an individual's interactions with sociocultural and physical environments influence the experiences of health and illness. Topics include symbolic healing, biomedicine as a cultural system, disease and international development, and the global politics of AIDS and other pandemics.

Dual Listed ANTH 4350.

Prerequisite: ANTH 1200 or SOC 1000.

ANTH5730 - Field Techniques

Credits: 3

Students work directly with the speaker of an unwritten non- Indo-European language to learn techniques for eliciting the data requisite to begin a description of the language's structure. Identical to LANG 5310.

Prerequisite: ANTH 5100 or LANG 5300.

ANTH5740 - Native American Languages and Cultures

Credits: 3

Demonstrates the interrelationship of language and culture in several Native American communities. Examines anthropological and linguistic theories regarding language spread and the peopling of North America, narrative

performance, translation, and the connection between linguistic structures and cultural features.

Cross Listed NAIS 4740.

Dual Listed ANTH 4740.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5765 - Language Humor and Games

Credits: 3

This course examines various forms of language play and the role of language characteristics (ambiguity, phonology, homophony, etc.) in creating humorous utterances and texts. Anthropological understandings of humor and its use also will be explored. Students will construct and analyze forms of humor throughout the course.

Dual Listed ANTH 4765.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5775 - Language and Gender

Credits: 3

Investigates the relationship between language use, linguistic categories, and gender categories. Examines the linguistic practices involved in the formulation, discussion, and performance of gender categories in a number of different cultures.

Dual Listed ANTH 4775.

Prerequisite: ANTH 5010, ANTH 5030, or consent of instructor.

ANTH5785 - Language and Racism

Credits: 3

Explores the ways in which racist ideology and socially-based racial categories are reinforced and changed through language and linguistic usage. The forms of language used in the construction of covertly and overtly racist communication, and the media through which racism is communicated also will be investigated.

Dual Listed ANTH 4785.

Prerequisite: ANTH 5030 or consent of the instructor.

ANTH5795 - Language Change

Credits: 3

Considers how languages change over time, due to both internal and external forces. The effects of language contact, borrowing, and structural change will be discussed. The use of linguistic data for questions of migration and cultural contact also will be explored.

Dual Listed ANTH 4795.

Prerequisite: ANTH 5030 or consent of instructor.

ANTH5875 - Graduate Practicum

Credits: 1-4
Max Credit (Max. 6)

Affords graduate students the opportunity to extend research projects in field or lab locations and receive additional credit for their work. Students sign up for these hours only in conjunction with another course and with the instructor's consent.

Prerequisite: graduate standing and consent of instructor.

ANTH5880 - Professionalism

Credits: 3
Provides an opportunity for the integration of graduate training and career choice. Examines issues of professionalism in the discipline ranging from ethical conduct to the research process and publication.

Prerequisite: admission to the doctoral program in anthropology.

ANTH5890 - Teaching Anthropology

Credits: 3
Anthropology is increasingly relevant to many audiences. Provides practical insight and examination of controversial anthropological concepts

Prerequisite: admission to the doctoral program in anthropology.

ANTH5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ANTH5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANTH5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ANTH5959 - Enrichment Studies:

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: Credit in this course may not be included in a graduate program of study for degree purposes.

ANTH5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ANTH5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

ANTH5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Arabic

ARBC1010 - First Year Arabic I

Credits: 4
Introduces beginning language learners to the Arabic writing system and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) at word, phrase and sentence levels.

USP 2015 Code U5H

ARBC1020 - First Year Arabic II

Credits: 4

Introduces beginning language learners to the fundamentals of Modern Standard Arabic and provides opportunities for developing the four basic language skills (listening, speaking, reading, and writing) and practicing them in a variety of academic contexts.

USP 2015 Code U5H

Prerequisite: ARBC 1010 or LANG 1010.

ARBC2030 - Second Year Arabic I

Credits: 4

Aims to help students attain an elementary level of communication in Modern Standard Arabic through emphasis on listening, speaking, reading and writing. Students expand their vocabulary pool, gain a deeper understanding of Arabic language system, and develop their knowledge of Arab culture.

Prerequisite: ARBC 1020 or LANG 1020.

ARBC2040 - Second Year Arabic II

Credits: 3

Aims to help students attain a lower intermediate level of communication in Modern Standard Arabic with an emphasis on listening, speaking, reading, and writing. Students develop a wider vocabulary pool, gain a deeper understanding of Arabic morphological and grammatical rules, and get acquainted with different aspects of Arab culture.

Prerequisite: ARBC 2030 or LANG 2030.

ARBC3050 - Modern Arabic and its Dialects

Credits: 3

This course exposes students to a range of Arabic dialects and explores their relationship with the Standard and each other. Additionally, this course provides students with opportunities to systematically practice and simulate a variety of dialectal excerpts.

Prerequisite: ARBC 2030 or LANG 2030.

ARBC3060 - Arabic Writing

Credits: 3

This intensive, lower intermediate, Arabic writing course helps students develop the skills acquired during the second year through analyzing and producing different text genres ranging from 200 to 500 words. It will move the student from writing letters, dialogs, reports, and summaries to longer narratives, descriptions, and opinion pieces.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: ARBC 2040 or equivalent.

ARBC4990 - Topics in Arabic

Credits: 3

Max Credit (Max 9)

Accommodates seminar series and/or course offerings including those not provided by permanent course offerings.

Prerequisite: ARBC 2040 and consent of instructor.

Architectural Engineering

ARE1000 - Exploring CAECM

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globaliztion, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed CE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

ARE1600 - Architectural Design Studio I

Credits: 3

Freshman-level architectural design in a project-based learning environment. Introduction to Building Information Modeling (BIM); architectural presentation drawings; freehand sketching; essentials of architectural design and building code compliance.

Former Course Number [ARE 2100]

ARE2410 - Fundamentals of Building Performance

Credits: 3

Introduction to building performance measures that embrace a global notion of environmental stewardship. Emphasis on passive heating and cooling systems and daylighting strategies to manage the thermal and luminous environments over the facility life cycle.

Prerequisite: PHYS 1210.

ARE2600 - Architectural Design Studio II

Credits: 3

Sophomore-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 1600, with a new emphasis on building materials and construction methods.

Former Course Number [ARE 2200]

Prerequisite: ARE 1600.

ARE3030 - History of Architecture

Credits: 3

A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ART 3030.

USP 2003-2014 Code U3CH, U3G

USP 2015 Code U5H

Prerequisite: WA or COM1.

ARE3110 - Professional Practice

Credits: 3

Max Credit 3

Professional practice in civil and architectural engineering including economics, ethics, professional responsibility and licensure; business and management principles; project management structure; leadership and public policy.

Cross Listed CE 3110

Prerequisite: Gateway requirement for Civil & Architectural Engineering majors

ARE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed CE 3200.

Prerequisite: ES 2410.

ARE3210 - Civil Engineering Materials

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Non-destructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed CE 3210.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: COM2 and ES 2410.

ARE3300 - Building Electrical and Plumbing Systems

Credits: 3

Introduction to National Electrical Code. The topics include basic circuits, AC and DC single phase, three phase power, transients, capacitance and inductance, branch circuits. Study of plumbing systems and fixtures including wastewater, water supply, storm water, and venting systems. Study of International Plumbing Code.

Prerequisite: ARE 1600 or CE 1010, and ES 2330 or concurrent enrollment.

ARE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ESE 3360/ME 3360.

Former Course Number [ARE 3430, ARE 4420]

Prerequisite: MATH 2310, ES 2310 and ES 2330.

ARE3400 - Heating, Ventilating and Air Conditioning of Buildings

Credits: 3

Qualitative and quantitative study in concepts of basic air-conditioning with focus on buildings including building envelope, moist air thermodynamics, human comfort, thermal load calculations, thermal behavior of buildings, HVAC systems/equipment, and design of space air-conditioning and its relationship to architectural design.

Cross Listed ME 3400.

Former Course Number [ARE 3800]

Prerequisite: ES 2310, ARE 2410 or ME 3360, ES 2330 or concurrent enrollment.

ARE3600 - Architectural Design Studio III

Credits: 3

Junior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). This course builds upon skills learned in ARE 2600, with a new emphasis on the complexities that accompany mid-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 2410 and ARE 2600.

ARE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ARE4040 - Historic Preservation and Sustainability

Credits: 3

Explores the historic preservation and sustainability movements and contemporary practices in these inter-related fields. Through reading, lectures, discussions and site visits, students will study how the historic preservation and the building industry professions can address advanced issues in sustainability related to the environment, culture and economics.

Cross Listed AMST 4040.

Prerequisite: 6 hours in AMST or ARE.

ARE4050 - Modern Engineering Practice

Credits: 3

Study of current professional practices in Architectural Engineering. Students will learn about leading-edge practices through guest speakers, office visits, site visits and research projects focusing on modern building innovation. May be offered as Study Abroad in London, Paris, and Barcelona, or on-campus.

Prerequisite: ARE 2000.

ARE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed CE 4200

Prerequisite: ARE 3200/CE 3200.

ARE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

Cross Listed CE 4250.

Prerequisite: ARE 3200/CE 3200.

ARE4260 - Structural Concrete Design

Credits: 3

Design of structural components and systems using reinforced concrete.

Cross Listed CE 4260.

Prerequisite: ARE 3200/CE 3200.

ARE4265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed CE 4265.

Dual Listed ARE 5265.

Prerequisite: ARE 4260/CE 4260.

ARE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed CE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [ARE 4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

ARE4295 - Structural Timber Design

Credits: 3

Design of structural components and systems utilizing timber.

Cross Listed CE 4295.

Dual Listed ARE 5295.

Former Course Number [ARE 4290]

Prerequisite: CE 3200 or equivalent.

ARE4330 - Building Electrical Systems

Credits: 3

Analysis and design of electrical systems in buildings using the National Electrical Code. The topics include panel boards, motors, system sizing, electrical distribution in buildings, methodology of reducing the available short circuit current, transformers, capacitors in buildings, and power systems harmonics. Students will perform an electrical building design project.

Prerequisite: ARE 3300.

ARE4390 - Building Safety and Fire Protection

Credits: 3

Fundamentals of building design for fire and life safety. Emphasis is on a systematic design approach. Basic considerations of building codes, fire loading, fire resistance, means of egress design, introduction to protective systems including fire protection systems, and fundamentals of fire and smoke control.

Prerequisite: ARE 3300.

ARE4430 - HVAC Systems Analysis and Design

Credits: 3

Engineering design and performance analysis procedures for commercial building mechanical systems including energy conservation techniques. Relationship to aesthetic, architectural and structural elements are considered.

Cross Listed ME 4430.

When Offered (Normally offered alternate spring semesters)

Former Course Number [ARE 3420, ARE 4810]

Prerequisite: Completion of the ME Success Curriculum, ARE 3400 and ARE 3360/ME 3360 or concurrent.

ARE4490 - Modeling and Optimization of Energy Systems

Credits: 3

Application of principles of thermodynamics, fluids, and heat and mass transfer in the component and system-level design of energy/thermal systems, including modeling, simulation and optimization techniques. Examples are drawn from building environmental control, energy conversion and thermal industrial processes. Students work on projects for integration of these components in the design of energy/thermal systems. Requires enrollment in associated laboratory session.

Cross Listed ME 4490.

Prerequisite: ARE 3400.

ARE4600 - Architectural Design Studio IV

Credits: 3

Senior-level architectural design in a project-based learning environment using Building Information Modeling (BIM). The course builds upon skills learned in ARE 3600, with a new emphasis on the complexities that accompany high-rise construction, and the integration of structural and mechanical systems.

Prerequisite: ARE 3600.

ARE4720 - Structural Systems Design Project

Credits: 3

Final course in the building structural systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's structural systems.

Prerequisite: ARE/CE 3110, ARE 4200, ARE 4250, and ARE 4260 or concurrent enrollment.

ARE4740 - Mechanical Systems Design Project

Credits: 3

Final course in the building mechanical systems sequence incorporating elements of previous design courses by executing design of a hypothetical building with a concentration on a detailed design of the project's mechanical systems.

Cross Listed ARE/ME 4740

Prerequisite: ARE/CE 3110 and ARE 3400

ARE4920 - Senior Architectural Engineering Problems

Credits: 1-3

Max Credit (Max. 6)

A study of current engineering design problems that are applicable to architectural engineering either on an individual basis or for small seminar type groups. Not for graduate credit.

Prerequisite: senior standing or consent of department head.

ARE4975 - Civil and Architectural Engineering Internship

Credits: 1-3

Max Credit (Max. 3)

Students may apply for credit for extended work experience (>10 weeks; full-time) at a professional engineering or architectural firm, supervised by a licensed professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

Cross Listed CE 4975.

When Offered (Offered summer only).

Prerequisite: consent of department head.

ARE5265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed CE 5265.

Dual Listed ARE 4265.

Prerequisite: ARE 4260/CE 4260.

ARE5285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed CE 5285.

Dual Listed ARE 4285 and CE 4285.

ARE5295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed CE 5295.

Dual Listed ARE 4295.

Prerequisite: CE 3200 or equivalent.

ARE5600 - Collaborative BIM Design

Credits: 3

An advanced comprehensive building design course integrating architectural and engineering skills, where design decisions are supported by performance simulation and analysis. Students will use Building Information Modeling (BIM) software and simulate a professional Integrated Project Delivery (IPD) experience by collaborating with a practicing architect on a real-world project.

Prerequisite: ARE 3600.

ARE5700 - Architectural Engineering Problems I

Credits: 1-3

Max Credit (Max. 6)

A special course, designed to make possible the study and investigation of problems or phases of architectural engineering selected to fit the needs of the students.

Prerequisite: consent of instructor.

Army ROTC/Military Science

ARMY1010 - Introduction to Military Science

Credits: 2

Encompasses dynamics of leadership applicable to all careers through instruction in Rifle Marksmanship; Land Navigation; Leadership Laboratory; Field Training Exercises; U. S. Army Customs, Courtesies and Career Opportunities and various leadership dimensions.

ARMY1011 - Basic Military Conditioning Level I

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY1020 - Dynamics of Leadership II

Credits: 2

Second semester of a one-year series. Continues ARMY 1010.

ARMY1021 - Advanced Military Conditioning Level I

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2010 - Leadership Skills and Management

Credits: 2

Studies principles and theories of leadership and team dynamics. Develops student leadership potential through the study of the values and attributes of effective leaders. Students gain self-confidence through the application of principles and techniques of leadership in a military environment.

Former Course Number [2030]

Prerequisite: ARMY 1010, ARMY 1020 or consent of instructor.

ARMY2011 - Basic Military Conditioning Level II

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2020 - Leadership Skills and Small Unit Management

Credits: 2

Studies principles in small-unit management, tactics, operations and leadership. Develops students' self-confidence in their leadership ability through progressive application of knowledge, decision making, communication and control.

Former Course Number [2040]

Prerequisite: ARMY 2010 or consent of instructor.

ARMY2021 - Advanced Military Conditioning Level II

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY2050 - Internship: Leader's Training Course

Credits: 3

A four week leadership practicum which orients students to U. S. Army, trains them in basic military skills, develops and evaluates their officer leadership potential, and qualifies them for enrollment in the ROTC Advanced Course Program. Increases confidence, self-discipline and decisiveness through physical and academic challenges.

Prerequisite: sophomore standing or above.

ARMY2060 - Competent and Confident Leadership

Credits: 2

Interdisciplinary course whose aim is to encourage assessment of our obligations, commitments, and roles in society by inquiring into the nature of leadership and the responsibilities of both leaders and followers. Examines leadership traits that transcend the military aspect of leadership.

ARMY3010 - Leadership and Tactics I

Credits: 3

Studies leadership techniques and tactical operations at the small-unit level. Instruction covers the decision-making process, troop leading procedures, land navigation and operation orders. In-depth analysis of team/squad tactical procedures and techniques. Numerous student oral presentations and practical exercises.

USP 2003-2014 Code U3O

Prerequisite: ARMY 2010, ARMY 2020, basic camp or consent of department head.

ARMY3011 - Basic Military Conditioning Level III

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY3015 - Junior Staff Office Practicum I

Credits: 1

This course provides a basic introduction to Army staff processes and the many diverse systems and processes within the Army that impact an officer's ability to successfully lead his/her unit.

Prerequisite: This course requires concurrent enrollment in ARMY 3010.

ARMY3016 - Junior Staff Office Practicum I

Credits: 1

This course provides a basic introduction to Army staff processes and the many diverse systems and processes within the Army that impact an officer's ability to successfully lead his/her unit.

Prerequisite: This course requires concurrent enrollment in ARMY 3020.

ARMY3020 - Leadership and Tactics II

Credits: 3

Studies platoon-level tactics and leadership techniques. Instruction covers the solving of complex tactical problems. Illustrates techniques for properly managing personnel, resources and time to accomplish organizational goals. Introduces Army staff functions and prepares students for successful completion of ARMY 3030.

Prerequisite: ARMY 3010.

ARMY3021 - Advanced Military Conditioning Level III

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to

commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY3025 - Conduct of Training

Credits: 1

Introduces the Army's system of conducting training exercises. Covers prerequisite training, pre-execution checks, officer/NCO responsibilities, training presentation techniques, sustainment training and training assessment.

Prerequisite: consent of instructor.

ARMY3026 - Assessment of Training

Credits: 1

Introduces the Army's system of training assessment. Covers formal and informal after-action reviews (AARs); preparation for, conduct of, and goals of an AAR; and writing of Army after-action reports.

Prerequisite: consent of instructor.

ARMY3030 - Practicum in Leadership

Credits: 3

Encompasses Leadership Development and Assessment Course, a five week test of the cadet's leadership ability. Each cadet is evaluated in ten different positions. Positions include both garrison and tactical situations. Each position requires the cadet to plan, implement and execute a wide variety of tasks. The cadet must control all personnel under this command. The cadet is extensively evaluated by cadre Tactical Officer/Non-commissioned Officer on twelve leadership dimensions. Successful completion of the Leadership Development and Assessment course is required for commissioning.

Prerequisite: successful completion of ARMY 3010 and ARMY 3020.

ARMY3050 - Army ROTC Nurse Summer Training Program

Credits: 3

Allows Army ROTC nursing cadets to obtain college credit for nursing experience gained in an army hospital during nurse summer training program. Students practice military skills, leadership, clinical nursing, administrative and interpersonal skills.

Prerequisite: ARMY 3010, ARMY 3020.

ARMY3060 - Military Skills Practicum: Ranger Challenge

Credits: 1-4

Max Credit (Max. 4)

Encompasses training and intercollegiate competition in fundamental military skills. Students learn and compete in

areas of physical conditioning training, land navigation, rifle marksmanship, rope bridging and other skills practiced during small-unit military operations.

Prerequisite: consent of department or instructor.

ARMY3070 - Cadet Professional Development Practicum

Credits: 2

Consists of attendance as an Army ROTC cadet at an Army specialty producing school including Airborne, Air Assault, Northern Warfare School or Mountain Warfare School.

Prerequisite: ARMY 1010, ARMY 1020, ARMY 2010 and ARMY 2020 and/or consent of department head.

ARMY4010 - Dynamics of the Military Organization I

Credits: 2

Studies and analyzes organization, resources and functions of military staff. Reviews formal staff problem-solving procedures, including student effective writing and briefing presentations. Introduces ethics and the military profession.

Former Course Number [4030]

Prerequisite: ARMY 3010, ARMY 3020 or consent of department head.

ARMY4011 - Basic Military Conditioning Level IV

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4012 - Basic Military Conditioning Level V

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4015 - Staff Officer Practicum I

Credits: 1

Gives students practical experience in serving on an Army staff. Under supervision of an Army ROTC cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4010.

ARMY4016 - Staff Officer Practicum II

Credits: 1

Gives students experience in serving on an Army staff. Under the supervision of an Army ROTC Cadre member, students undergo training and conduct practical exercises in one of the following specialties: command and control, operations, personnel or logistics.

Prerequisite: concurrent enrollment in ARMY 4020.

ARMY4020 - Dynamics of the Military Organization II

Credits: 2

Introduces military law; planning and management of personal affairs; Army transportation, logistics and personnel management systems. Studies officer/NCO relations. Includes student writing and briefing presentations on assigned topics.

Former Course Number [4040]

Prerequisite: ARMY 4010 or consent of department head.

ARMY4021 - Advanced Military Conditioning Level IV

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4022 - Advanced Military Conditioning Level V

Credits: 0.5

This class will instruct and evaluate students in military conditioning. Physical fitness and leadership expectations in the physical conditioning class increase each semester and build toward peak physical performance prior to commissioning as an Army officer upon graduation. Military leaders have always recognized that the effectiveness of Soldiers depends largely on their physical condition. Full spectrum operations place a premium on the Soldier's strength, stamina, agility, resiliency, and coordination.

ARMY4025 - Principles of Training Management

Credits: 1

Introduces students to the Army's system of training management. Covers principles and philosophy of training, training guidance, training cycles, soldiers/leader tasks, techniques for collective and multi-echelon training, as well as procedures for short-term planning.

Prerequisite: consent of instructor.

ARMY4026 - Preparation of Training

Credits: 1

Introduces the Army's system of training preparation. Covers short-range training plans, training meetings, development of timelines, publishing of training schedules, training and evaluation outlines, as well as rehearsals.

Prerequisite: consent of instructor.

ARMY4050 - Management Internship: Cadet Troop Leadership Training

Credits: 2

Conducted at an active Army installation. Students (under supervision) assume duties of and function as a junior commissioned officer for three-week period. Written evaluation of student's performance is returned.

Prerequisite: ARMY 3010, ARMY 3020 and consent of department head.

ARMY4975 - Military Science Independent Study

Credits: 1

Max Credit (Max. 2)

A continuation of ARMY 4010 and ARMY 4020. Projects and events are set at the discretion of the professor and subject to change.

Prerequisite: ARMY 4010 and ARMY 4020.

ARMY4976 - Advanced Military Science Independent Study

Credits: 1

The purpose of this course is to instill leadership ability, technical and tactical skills, and professional values necessary for your completion of the UW Military Science program. Introducing students to small unit tactics, leadership positions, and developing the student's ability to make informed decisions in any military environment.

Art

ART1001 - Art and Human Culture

Credits: 3

Max Credit 3

This course will equip students with the basic knowledge needed to understand art and visual culture which they will then apply to their understanding of the visual reality of their own lives. Students will learn about the formal aspects of art, basic theory, diverse media, and historical and cultural traditions, via reading, writing, discussion, lecture and

creative activities. This course will introduce students to the human phenomenon of art making.

USP 2003-2014 Code H

ART1005 - Drawing I

Credits: 3

A foundation level drawing course introducing fundamentals of observation, artistic invention, and basic principles of perspective and composition through problems in still life, landscape, and live model. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding of the drawing process.

USP 2003-2014 Code U3CA

ART1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

ART1110 - Foundation: Two Dimensional

Credits: 3

First in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of two-dimensional mediums. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1115 - Digital Media

Credits: 1

An introductory level course designed to investigate the role of digital media in visual literacy. Students gain practice with basic graphics software, explore using the Internet in informing the development of art work, and discuss how application of these skills are used in classroom, studio, and commercial art fields.

USP 2003-2014 Code U3I

ART1120 - Foundation: Three Dimensional

Credits: 3

Second in a sequence of three foundation courses that investigate the fundamentals of design. Basic aesthetic/formal concepts and conceptual approaches are covered through a variety of three-dimensional mediums. Structural form is emphasized in various contextual settings. Structured critiques are employed to provide students in the experience of assessing formal, conceptual, and technical aspects of art.

ART1130 - Foundation: Color Theory

Credits: 3

Third in a sequence of three foundation courses that investigate the fundamentals of design. Explores color theories based on the color wheel/light spectrum including hue, value, chroma, and aesthetic color relationships. Optical color,

emotional/psychological color, and color symbolism are also covered. Structured critiques are employed to provide students the experience of assessing formal, conceptual, and technical aspects of art.

ART1140 - Foundation: Four Dimensional

Credits: 3

Foundation: Four Dimensional will introduce the basic principles of time-based media in order to expand students' temporal and spatial awareness within the art making process. Analyzing both the actual and perceived experiences of time, the course will investigate concepts such as tempo, duration, chronology, fragmentation, and memory. A historical and contemporary context will be provided, as well as a range of both physical and digital exercises. Projects will be assessed through critiques in terms of formal, technical and conceptual development.

Restricted Art Major's Only

ART2000 - Portfolio Review

Credits: 1

One-semester course in which work is created for a portfolio review at midterm based on the content and principles learned in the foundation core classes. Art majors may only attempt successful completion of this course once.

Prerequisite: successful completion of ART 1005, ART 1110, ART 1120, and ART 1130, and a UW GPA of 2.500 or above.

ART2002 - Special Topics In:

Credits: 3

Max Credit (Max. 6)

Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter.

Prerequisite: ART 1005; ART 1130; sophomore standing.

ART2005 - Drawing II

Credits: 3

An intermediate level drawing course building upon fundamentals of observation, artistic invention, perspective and composition through problems in still life, landscape, explorations in wet and dry media, and color with pastels. Lectures, drawing sessions, and critiques develop formal, conceptual, expressive and technical understanding.

Prerequisite: ART 1005.

ART2010 - Art History I

Credits: 3

First semester of a one-year survey. Studies ancient, medieval, renaissance and modern art with special reference to various social, economic and historic factors which motivated and conditioned the aesthetic forms. Includes ancient,

medieval and early renaissance periods. ART 2010 and ART 2020 are required of all art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2020 - Art History II

Credits: 3

Second semester of a one-year survey. Studies European/American Art from the Renaissance through Contemporary with special emphasis and historical factors which motivated and conditioned the aesthetic forms. Covers Renaissance, Baroque, Rococo, 18th Century, 19th Century, Early Modernism and Contemporary Art. ART 2010 and 2020 are required of art majors and should be taken in sequence.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

ART2030 - History of Graphic Design

Credits: 3

History of graphic language and evolution of graphic communication. Includes an extensive examination of the social forces that shaped the design profession and how in turn design has shaped society. The theories that moved designers to act to remake society are also considered.

ART2110 - Type I: Thinking with Type

Credits: 3

Max Credit 3

Examines history and structure of type as a form of communication and art. Students will reference type as visual expression, data visualization, messaging, and representative of power, political, and socio-economic movements. Explorations in type as a concept and critical expression will explore the fields of graphic design and computer visualization.

Prerequisite: ART 1115

ART2112 - VCD I Visual Thinking

Credits: 3

Max Credit (Max. 6)

Explores techniques of graphic design preparation from concept through paste-up to the printed page, both on as a field that engages both the verbal and the visual is stressed. Problems include a variety of experimental and practical approaches that engage historical and contemporary formal and conceptual exercises.

When Offered (Offered fall semester)

Former Course Number [2120]

Prerequisite: ART 1110 and ART 1115.

ART2122 - VCD II Visual Programming

Credits: 3

Max Credit (Max. 9)

Explores digital art principles in Web spaces through the understanding and use of design tools and techniques. Creative approaches consist of informed planning, thoughtful concepting, strategic wire frame development and creative execution. Projects include explorations of HTML, CSS, and visual programming, and time-based media and image manipulation.

When Offered (Normally offered spring semester)

Former Course Number [3110]

Prerequisite: ART 1110 and ART 1115.

ART2210 - Painting I

Credits: 3

Introduces problems in painting, developing skill, techniques and concepts.

Prerequisite: ART 1005, ART 1110, and ART 1130; ART 1120 may be taken concurrently.

ART2255 - Introduction to Photography, Digital

Credits: 3

Fundamentals of Digital and Color photography. Students will learn how to use their digital cameras, how to input images to Photoshop and out put them to prints. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of color photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2265 - Introduction to Photography, Black and White

Credits: 3

Fundamentals of Black and White film photography, including use of SLR cameras, how to correctly expose film, process it and create prints in the darkroom. The class will begin with an investigation of techniques before moving through a series of assignments designed to develop the understanding of how to compose a body of work around a specific theme or concept. Lectures will work through the concepts and history of Black and White photography and regular critiques will guide students towards creating a final portfolio of images.

Prerequisite: ART 1110, ART 1130.

ART2305 - Techniques: Wood/Art Preparation

Credits: 1

Art Tech 2305 covers two curricular units, one in which students are introduced to the processes, equipment, hand tools, materials, and necessary safety procedures related to the art department woodshop. In the other unit in this course, students are taught art preparation techniques which they will encounter both as a student and professional.

ART2310 - Sculptural Practices I

Credits: 3

This beginning sculptural practices course introduces fundamentals in traditional and contemporary sculpture. Students are asked to explore various mediums, techniques, and equipment including: wood and metal fabrication, casting with plaster, and mixed media and digital technology processes. Assigned projects, extensive sketchbook work, artist research, and critique participation is expected.

Former Course Number [1310]

ART2350 - Metalsmithing I

Credits: 3

Introduces basic technical approaches to fabricating small scale, non-ferrous metals (silver, copper, brass, nickel) including sawing, soldering, filing, drilling, form raising/pressing, texturing, and finishing processes. Investigation into the rich history of metalsmithing as well as innovative contemporary applications will manifest in both sculptural objects and jewelry. Individual studio projects and critical discussion will address aesthetic, conceptual and technical aspects of metalsmithing.

Prerequisite: ART 1120.

ART2410 - Ceramics I

Credits: 3

Introduces ceramic form through traditional hand processes, simple mold making and slip casting. Includes underglaze decoration, glaze application, image transfer, low and high firing processes. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process and the formation of a personal voice in the medium.

ART2420 - Ceramics II

Credits: 3

Introduces ceramic form through wheel throwing technique. Includes underglaze decoration, glaze application, image transfer, and high temperature surfaces. Emphasizes formal and conceptual understanding, the development of a strong foundation in ceramic process, and the formation of a personal voice in the medium.

ART2700 - Introduction to Museology

Credits: 3

Introduces students to the various roles and responsibilities of museum professionals in the areas of leadership and management, collections, exhibits, education and engagement, and security. Practice-based assignments, readings, discussions, field trips, and meetings with museum professionals will provide students with a solid understanding of

key aspects central to the working of all museums, regardless of the nature of the collection, and introduce students to available career paths in these institutions. Crosslisted between American Studies, Anthropology, Art and Art History and History.

Cross Listed AMST 2700/ANTH 2700/HIST 2700.
USP 2003-2014 Code U3CH

ART2705 - Museology II

Credits: 3
Max Credit 3

Introduces students to the history of museums, as well as major theoretical, legal and political challenges within museum studies. Students are encouraged to think beyond their specific disciplinary background to gain a greater appreciation for the lessons that can be learned from related disciplines and types of repositories, including larger ethical and cultural concerns that have been raised through the creation of modern museum standards. The combination of readings, discussion, and fieldtrips to a variety of museums/repositories will provide students a solid introduction to these themes Cross listed between Anthropology, History, American Studies and Art.

Cross Listed ANTH/AMST/HIST 2705

ART3002 - Special Topics In:

Credits: 3
Max Credit (Max. 9)

Courses of broad general appeal will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See current class schedule for topics.

Prerequisite: ART2010 - Art History I, and ART2020 - Art History II.

ART3005 - Drawing III

Credits: 3
An advanced drawing course applying the fundamentals of drawing to creative individual problems in figure, still life, and/or landscape composition. Structured yet open assignments, lectures and critiques develop formal, conceptual, expressive, and technical understanding. Course may be repeated for a maximum of 6 credit hours.

When Offered (Offered spring semester).

Prerequisite: ART 2000 and ART 2005.

ART3030 - History of Architecture

Credits: 3
A survey of the history of architecture and its allied fields, focusing on the formal, aesthetic, cultural and socio-political dimensions, from prehistory to the present.

Cross Listed ARE 3030.
USP 2003-2014 Code U3CH, U3G
USP 2015 Code U5H
Prerequisite: WA or COM1.

ART3052 - Life Drawing I

Credits: 3

An advanced drawing course working from a life model with an emphasis on composition, monochromatic media, drawing techniques and the skeletal and muscular construction as related to action and proportion in the human figure. Lectures, drawing sessions, and critiques develop formal, conceptual, and technical understanding.

When Offered (Normally offered fall semester)
Prerequisite: ART 2000 and ART 2005.

ART3112 - Type: Type, Images, and Narrative

Credits: 3

Examines the experimental use of type, its history, structure and background in reference to visual expression, data visualization, messaging, representative power, and time-based and site-specific explorations. Advanced explorations in type as concept and critical expression will explore the fields of graphic design and computer visualization.

When Offered (Offered spring semester)
Former Course Number [2110]

Prerequisite: ART 2000 and ART 2112.

ART3120 - VCD III: Visual Making

Credits: 3

Studies advanced graphic design preparation, idea generation, conceptualization, and critical thinking. Sustainable design problems include print and package design and an exploration of historical impact of design for reproduction through analog and digital means. Contemporary socio-cultural issues will be emphasized along with design as an agent for positive change.

When Offered (Offered fall semester)
Prerequisite: ART 2000 and ART 2112.

ART3150 - VCD IV: Visual Imaging in Time

Credits: 3

Explores digital video, sound and site-specific experiments. Students learn and use experimental digital design tools and techniques to develop site-specific time-based individual and collaborative works. Students also collaborate and install works on campus, town and other venues. Projects include video and sound design and editing, graphic arts, computer graphics and digital art history.

Former Course Number [4140]

Prerequisite: ART 2000, and ART 2112 or ART 2122.

ART3180 - VCD VI: Visual Effects

Credits: 3

Studies specialized and advanced graphic design preparation, idea generation, conceptualization, collaboration and critical thinking, from paste-up through production. All work is executed both on and off the computer. Design problems include print and packaging design. History of graphic design and advanced production methods are discussed.

Prerequisite: ART 2000, ART 2112, and ART 3120.

ART3210 - Painting II

Credits: 3

Max Credit (Max. 6)

Investigates various painting techniques to create individual work. Emphasizes contemporary and classical treatment of formal, aesthetic and conceptual creative expression.

Prerequisite: ART 2000 and ART 2210.

ART3250 - Watercolor Painting I

Credits: 3

Investigates watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 1130, 2000 and ART 2210.

ART3260 - Illustration I

Credits: 3

This is an introductory Illustration course. This primary class objective is to develop conceptual skills through a variety of media traditionally used in fine art illustration and a variety of illustration problems and projects. This class is designed to further your interest in illustration and initiate portfolio development.

Prerequisite: ART 2000.

ART3265 - Intermediate Photography

Credits: 3

Focuses on the production of a fully realized portfolio of images. Students will be guided with a set of conceptual

projects towards exploring technical boundaries and potential of photography. Research and readings will lead towards the production of a finished and installed body of work.

Prerequisite: ART 2255 and ART 2265.

ART3310 - Sculptural Practices: Cast Form I

Credits: 3

Max Credit (Max. 6)

This intermediate sculptural practices course explores a wide variety of mold-making and processes including cold-casting (paper/fabric/resin casting) and both non-ferrous (bronze and aluminum) and ferrous metal (cast iron) casting techniques. Assigned projects will allow students to engage in the production of finished cast sculpture. Extensive sketchbook, artist research, and critique participation is required.

When Offered (Offered fall semester)

Prerequisite: ART 2310 and 2000.

ART3320 - Sculptural Practices: Mixed Media I

Credits: 3

Max Credit (Max. 6)

This intermediate course explores mixed media processes in sculptural practices including soft sculpture fabrication with fabric and fiber, found object manipulation, and digital processes involving 3D printing and laser cutting. Assigned projects will engage students in the production of artwork related to the topic. Extensive sketchbook, artist research, and critique participation is expected.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2310 and ART 2000.

ART3330 - Sculptural Practices: Assembled Form I

Credits: 3

Max Credit (Max. 6)

Investigates constructed and assembled form as an essential means of sculptural expression. Emphasizes wood construction, assembled metals and mixed media. Utilizes general carpentry techniques, a variety of welding methods (oxyacetylene, arc, M. I. G. and T. I. G.) and other means of assembling materials. Includes investigation of concepts in assemblage and exposure to classic and contemporary forms of assembled sculpture.

When Offered (Offered spring semester)

Prerequisite: ART 2310 and ART 2000.

ART3345 - Sculptural Practices: Special Topics

Credits: 3

Max Credit (Max. 9)

This course addresses specific areas of contemporary sculptural practices such as: Installation, Video/Sound manipulation, kinetic sculpture, and figure modeling. Assigned projects will engage the students in production of artwork related to the topic. Extensive sketchbook work, artist research, and critique participation is expected.

Prerequisite: ART 2310 and ART 2000.

ART3350 - Metalsmithing II

Credits: 3

Introduces intermediate approaches to fabricating small scale, non-ferrous metals through hammer-raised forming, lost-wax casting, enameling and hardware fabrication. Historical and innovative contemporary applications are fostered through sculptural objects and jewelry-based pieces. Individual studio projects, critical discussion and presentations address aesthetic, conceptual, and technical aspects of metalsmithing.

Prerequisite: ART 2000 and ART 2350.

ART3410 - Ceramics III/I

Credits: 3

Studies development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning class. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420 and consent of instructor based on portfolio review.

ART3420 - Ceramics III/II

Credits: 3

A second semester continuation of the development of ceramic form through multiple construction methods. Problems are designed to develop fluidity and versatility in the different processes introduced in the beginning classes. Glaze exploration and development are introduced. Emphasizes design, conceptual development, and professional practices.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: completion of Foundation Core, ART 2000, ART 2410, ART 2420, and consent of instructor based on portfolio review.

ART3430 - Methods I

Credits: 3

Students investigate ways to translate art making practices and media into K-12 arts curricula and develop effective approaches to teaching these to the K-12 learner. Students create and teach lesson plans based on what they learn through their explorations; they also create their own artwork inspired by their studio investigations.

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.

ART3490 - Philosophy, Theory and Issues

Credits: 3

Students explore the foundational elements involved in the history and philosophies of Art Education and the key issues that shape contemporary approaches to teaching in the field. These investigations are undertaken to support students' developing teaching philosophies and inform the connections between their teaching and creative practices.

USP 2003-2014 Code U3CH

USP 2015 Code U5C2

Restricted Restricted to junior class standing.

Prerequisite: ART 2000.

ART3500 - Book Arts

Credits: 3

Introduction to the history of the book as an object and the traditional crafts associated with book construction through the exploration of the book as a vehicle for artistic expression. A basic knowledge of technical processes pertaining to book construction, a general familiarity with the history of the book and a conceptual exploration of image making will be gained through demonstrations, hands-on studio work, slide lectures, visits to the museum and archives and through assigned readings.

Prerequisite: ART 2000 and completion of WB or junior standing.

ART3510 - Printmaking I

Credits: 3

Investigates and experiments with processes and properties of print media, including intaglio, lithography and relief. Explores ideas and works of traditional and contemporary printmaking.

Prerequisite: ART 1005 and ART 1110 and ART 1130 or concurrent registration in ART 1130.

ART3550 - Art Education Practicum

Credits: 1-3

Max Credit (Max. 3)

Practicums are integral to an art education student's development as a teacher. They offer opportunities for immersion and hands-on teaching experiences in art classrooms guided by experienced teachers in the field and the UW faculty. Students develop skills and teaching strategies that complement classroom learning and strengthen their teaching practices.

Prerequisite: ART 3430 and ART 3490.

ART3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/GWST 3710.

When Offered (Offered once a year)

USP 2003-2014 Code [CH<> COM2]

Prerequisite: GWST 1080 or ENGL 1010.

ART3720 - Art and Architecture of Medieval Islam

Credits: 3

Studies the art and architecture produced by Islamic societies from the time of the Prophet Mohammed to the time of the Crusades (7th-14th centuries CE), and the geographic scope surrounds the Mediterranean Sea, including the Near Middle East, northern Africa, and Spain.

Former Course Number [2720]

Prerequisite: USP WA and WB courses.

ART3760 - American Art History

Credits: 3

Addresses American art within the continental United States from first European encounters with the New World to 1900. Will investigate painting, sculpture, and architecture, but will also include some photography, prints, and the decorative arts.

Prerequisite: ART 2020.

ART4000 - Post Baccalaureate Seminar

Credits: 1

Enhance and formalize the Post Baccalaureate experience while creating a creative community across artistic disciplines. Students will read and respond to relevant text, discuss pedagogical concerns, critique their creative research, and develop a professional dossier in support of their future career goals.

Prerequisite: Completion of all BA/BFA degree requirements and acceptance into the Department of Art Post Baccalaureate program.

ART4005 - Drawing IV

Credits: 3

An advanced drawing course exploring conceptual, expressive, personal and technical limits of process and media.

Individually proposed projects lead to a coherent body of work. Open discussion and structured critiques develop personal and technical understanding. Repeatable for a maximum of 9 credit hours.

Prerequisite: ART 2000 and ART 3005.

ART4010 - Contemporary Art: Theory/Practice

Credits: 3

Max Credit 3

Taught from the perspective of a studio artist, this course enables students to situate their art within a theoretical context. Students examine how issues in contemporary art relate to philosophical concerns through reading, discussion, and critique. Emphasis is placed on an interdisciplinary framework through which students can discuss their work.

USP 2015 Code U5C3

Prerequisite: ART 2000 , and junior standing.

ART4052 - Life Drawing II

Credits: 3

An advanced drawing course building upon figure construction fundamentals with heavy emphasis on composition, personal expression, wet and dry media, and color with pastels. Lectures, drawing sessions and critiques develop formal, conceptual, expressive and technical understanding. May be repeated for a maximum 9 credit hours.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3052

ART4060 - VCD V: Visual Interactivity

Credits: 3

Explores digital art in 3D - 4D spaces, through the experimental use of digital design tools and techniques. Students develop and build digital projects in AR/VR/MR spaces. Projects include explorations in graphic design, 3D modeling and motion graphics design, multi-media manipulation and image manipulation.

Prerequisite: ART 2000 and ART 2112 or ART 2122.

ART4110 - Computer Graphics II

Credits: 3

Advanced work on current computer graphic design software. Presents graphic design problems to augment working knowledge of the programs. Lab/lecture. Second course in a two semester sequence.

When Offered (Normally offered spring semester)

Prerequisite: ART 2000 and ART 3120.

ART4120 - VCD VI: Senior Design Studio

Credits: 3

Specialized research for the advanced design student who will develop a mature voice and sense of design. Individual projects are determined by student interest with the instructor in order to best prepare students for industry careers and graduate school. Students are encouraged to explore new to them, and emerging approaches.

When Offered (Normally offered fall semester)

Prerequisite: ART 2000, ART 2112, ART 2122.

ART4210 - Painting III

Credits: 3

Prerequisite: ART 2000 and ART 3210.

ART4220 - Painting Topics

Credits: 6

This is an advanced painting course that will cover specific painting approaches for an entire semester. Examples of topics can include Abstraction and color field, figuration, narrative painting, experimental painting media and surfaces, etc. This course will enable students to experience a more comprehensive and targeted set of painting problems for the semester. Topics will vary based on the instructor.

Prerequisite: ART 2000, ART 2210, ART 3210.

ART4250 - Watercolor Painting II

Credits: 3

Advanced investigation of watercolor techniques in the development of creative work. Discussion, application and criticism of contemporary ideas about structure, form and color constitute the main activity.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and ART 3250.

ART4260 - Illustration II

Credits: 3

This is the second level Illustration course for students who have had ART 3350. Students will continue to develop conceptual skill in creating narrative illustrations for a variety of projects. The majority of the semester will be dedicated to developing a single project: Graphic Novelization or book illustrations. Students will be focusing on character development, narrative arc, and compelling imagery using materials appropriate for their project.

A&S College Core 2015 ASG

Prerequisite: ART 2000 and ART 3260.

ART4265 - Photography III

Credits: 3

An advanced photography class focusing on the production of a fully realized portfolio of images. Students interests

will help shape a course dedicated to providing them with additional technical tools (traditional printing techniques, high level photoshop tools) and readings and discussions designed to push them beyond the comfortable boundaries of their photographic world.

Prerequisite: ART 2000.

ART4310 - Sculptural Practices: Cast Form II

Credits: 3

This course is an advanced investigation in mold making, cold casting, and metal casting as an essential means of sculptural expression. Emphasis is placed on personal expression and portfolio building at this level. Extensive sketchbook work, artist research, and critique participation is required.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [5310]

Prerequisite: ART 2000, ART 2310, ART 3310, and portfolio review by instructor.

ART4330 - Sculptural Practices: Assembled Form II

Credits: 3

This course is an advanced investigation in assemblage including wood and metal fabrication as an essential means of sculptural expression. Emphasis is placed on personal expression and portfolio building as this level. Extensive sketchbook work, artis research, and critique participation is expected.

Prerequisite: ART 2000, ART 2310, ART 3310, and portfolio review by instructor.

ART4355 - Metalsmithing III

Credits: 3

Introduces advanced fabrication and surface techniques which build on skills developed in Metalsmithing I and II. Students propose a body of work for the semester based on individual aesthetic, conceptual and technical interests. Professional practices including resume writing, documenting, presenting and exhibiting artwork are addressed at this advanced level.

Prerequisite: ART 2000 and ART 3350.

ART4360 - Metalsmithing: Special Topics

Credits: 3

Focuses on a specific technique in the field of Metalsmithing for an in-depth exploration into topics such as lost-wax casting, chasing and repoussé, enameling, etc. Individual projects and critical discussion will address the special topic aesthetically, technically and conceptually.

Prerequisite: ART 2000 and ART 2350.

ART4400 - Internship

Credits: 1-3
Max Credit (Max. 9)

Allows students to bridge the gap between theoretical problems solved in the classroom and the real work world. Students are placed in a setting where they perform duties similar to a working environment. Specific arrangements are made through the major area adviser. Students are evaluated at mid-term and finals. Minimum of three contact hours of internship per week for a semester equals an hour course credit.

Prerequisite: ART 2000 and 12 hours in the major area.

ART4410 - Ceramics IV/I

Credits: 3
Studies and develops traditional and experimental forms. Applies wide range of three-dimensional decorative and conceptual approaches. Continuation of technical and glaze research and professional practices. Introduces kiln operation. Given studio problems accompany individually directed exploration.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000, ART 3320, ART 3410, and consent of instructor based on portfolio review.

ART4420 - Ceramics IV/II

Credits: 3
A second semester continuation of the development of traditional and experimental forms. Applies wide range of three-dimensional formal and conceptual approaches. Continuation of technical and glaze research. Introduces kiln operation. Given studio problems accompany individual directed exploration.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000, ART 3320, ART 3410, and consent of instructor based on portfolio review.

ART4425 - Graphics Internship

Credits: 3
This course allows graphic design students to better understand real-world design practices, learn about industry standards, and discuss career opportunities and preparedness. Students will be expected to secure internships and meet with an intern advisor regularly, to gain a strong understanding of the graphic design industry.

Prerequisite: ART 2000, ART 2112, and ART 2122.

ART4440 - Methods II

Credits: 3
Students incorporate their understanding of the stages of artistic development with essential components of curriculum design to create lesson plans that engage the K-12 student in student-directed, holistic learning in the visual arts. Another component of the course is professional practice that includes classroom management and preparing

professional portfolios.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

ART4460 - Curriculum Design

Credits: 3

Students develop a thorough knowledge of all the components of curriculum design in Art Education and will create a unit of instruction that includes a focus on enduring understandings, clarity of learning objective, assessment for the visual arts, instructional strategies, differentiation, and alignment with standards.

Restricted Restricted to senior class standing.

Prerequisite: ART 3430 and ART 3490.

ART4510 - Printmaking II

Credits: 3

Continues development of printmaking skills gained in introductory printmaking and focuses in particular on the relationship between process and image. Through demonstrations and studio work, slide lectures, visits to the museum and archives, and readings and discussions, technical processes will be refined, print history will be further explored and image making will continue to be developed.

Prerequisite: completion of Foundation Core, ART 2000 and ART 3510.

ART4520 - Advanced Printmaking II : Exhibition and Professional Preparation

Credits: 3

Preparation to continue as exhibiting artists. Students further develop their work as artist-printmakers in preparation for a solo or two-person exhibition at the completion of the semester. Presentation and execution of slides, resume, artist statement, locating opportunities and correspondence will be developed throughout the term.

Prerequisite: ART 2000, ART 4510 and portfolio approval from instructor.

ART4600 - Professional Practices and Strategies

Credits: 3

This course offers information to junior/senior level art majors in regards to: finding jobs in art, finding/applying for exhibition opportunities, applying/finding grant opportunities, furthering education including finding/applying for a Masters in art, and overall life possibilities after the completion of an undergraduate art degree. Writing is expected in the form of cover letters, resumes, artist statements, and project proposals.

USP 2015 Code U5C3

Prerequisite: ART 2000, junior or senior standing.

ART4620 - Problems in Art

Credits: 1-3

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ART 2000 and 6 hours in art.

ART4635 - Preparation for International Study in Art

Credits: 1

An introductory course to international study in art. Specifically focusing on various issues of culture, language, history, art and archeology the student may encounter while traveling abroad. Also provides time for the coordination of practical issues of travel, necessary documentation and insurance. Issues specific to the country of travel will also be addressed.

Prerequisite: 6 hours in Art, WA, junior standing.

ART4650 - International Study of Art

Credits: 3

Students will respond creatively to the historical, cultural and aesthetic experience in the country of travel and will use journaling, drawing, and collection of visual material to continue a more in-depth response upon return. Course sections will vary regarding structure/context. All sections will include studio and/or art historical curriculum.

USP 2003-2014 Code U3G

A&S College Core 2015 ASG

Prerequisite: ART 4635.

ART4655 - Outdoor Studio

Credits: 3

The emphasis in this course will be on the expressive nature of outdoor creative work. Students will need to be responsive to the natural environment through a variety of media, including watercolor, oil sticks, drawing, sculpture, photography, video, etc. This course involves travel and day trips to a variety of sites throughout the county and state.

Prerequisite: ART 2000.

ART4670 - Completion International Study in Art

Credits: 1

A completion course to international study in art. Students will compile and complete their response to their experiences encountered in the culture, language, history, art and archeology while traveling abroad. Concise structured critiques will provide time for discussion and digestion of their individual and shared experiences. When possible an exhibition of creative work will be included as a culmination of the program.

Prerequisite: ART 4650.

ART4720 - 15th Century Renaissance Art

Credits: 3

Explores artistic developments of the 15th century, primarily in Italy, in order to appreciate the relationships between artistic production and innovation and other aspects of the social and cultural environment.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010, ART 2020.

ART4730 - 19th Century European Art

Credits: 3

Studies 19th-century European painting, prints, and literature, covering Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Artists include Elisabeth Vigee-Lebrun, court portraitist; Mary Cassatt and Edgar Degas, famed Impressionists; Edouard Manet, controversial and troubled; Honore Daumier, jailed for incendiary political cartooning; and the eccentric Paul Gauguin and Vincent Van Gogh.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: ART 2020.

ART4740 - 20th Century European Art

Credits: 3

Studies 20th-century European art from 1900 to 1945. Covers the 2-D and 3-D art of Expressionism, Cubism, the Bauhaus, Dada and Surrealism, and other important movements in the first half of the 20th century.

When Offered (Normally offered spring semester)

Prerequisite: ART 2010 and ART 2020.

ART4760 - American Art in the 20th Century

Credits: 3

Max Credit 3

Studies 2-D and 3-D art in 20th-century America. Topics will include art of the Gilded Age, the Jazz Age, the Progressive Era, the Great Depression, the World Wars, etc. Styles include American Impressionism, the Ashcan School, American Modernism, Social Realism, the Harlem Renaissance, Regionalism, Abstract Expressionism, and more.

When Offered (Normally offered spring semester of every other year)

Prerequisite: Prerequisites: ART 2010 and 2020.

ART4770 - Contemporary Arts Seminar

Credits: 3

Studies the major movements in the visual arts from 1945 to the present. Investigate major theories, stylistic movements, and key artists since WWII with a special focus on the increasing globalization of art during this era.

When Offered (Normally offered fall semester of every other year)

Prerequisite: ART 2010 and ART 2020.

ART4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the 20th century.

Cross Listed GWST 4780.

When Offered (Normally offered fall semester)

Prerequisite: ART 2010 or ART 2020 or 3 hours of WMST courses; and WB.

ART4790 - Art Seminar

Credits: 1-3

Special topic in art history and criticism for advanced students.

When Offered (Offered based on sufficient demand and resources)

USP 2015 Code U5C3

Prerequisite: 6 hours in art history.

ART4800 - BFA Capstone I

Credits: 3

BFA Capstone I course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by creating work for their BFA exhibition.

Prerequisite: ART 2000 and 6 credits of a studio beyond Art 2000; 3.0 overall gpa; 3.25 gpa in Art/Art History; major acceptance into the BFA VCD degree or BFA in Studio Art degree.

ART4810 - Residency for Elementary

Credits: 6

This is an eight-week residency for teaching art full time at the elementary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4820, students are certified in Wyoming to teach K-12 Art. Satisfactory/Unsatisfactory only.

Prerequisite: ART 4440 and ART 4460

ART4820 - Residency for Secondary

Credits: 6

This is an eight-week residency for teaching art full time at the secondary level. Students team-teach with an experienced mentor teacher, taking on considerable responsibility for all aspects of teaching art. Upon successful completion of this course and ART 4810, students are certified in Wyoming to teach K-12 Art.

Prerequisite: ART 4440 and ART 4460.

ART4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

Interdisciplinary approach to study of women's issues in art. Uses literary/cultural texts to reinforce/contradict and/or expand/enlarge the art historical basis. Topics include domestic goddess, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 4830/GWST 4830.

When Offered (Normally offered every sixth semester)

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

ART4840 - BFA Capstone II

Credits: 3

Max Credit 3

BFA Capstone II course is designed to allow students time to participate in group critiques with their BFA cohort group, to refine their writing and documentation process, to learn from visiting artists and various professors in the art department, and to strengthen their studio practice by finishing work for their BFA exhibition and defending it once the artwork is completed.

Restricted BFA in Studio Art

Prerequisite: Successful completion of ART 2000 and ART 4800 , 3.0 overall GPA, 3.25 GPA in Art/Art History, and acceptance into BFA program.

ART4975 - Independent Study and Research

Credits: 1-3

Research options in all creative areas. Students work independently and provide demonstrated ability and background knowledge to carry out self-directed research or creative activity in the research area. Arrangements regarding curricular obligations and meeting times are made with the instructor in advance.

Prerequisite: ART 2000 and 12 hours of art in research area and prior consent of instructor.

ART5430 - Lo-Tech Ceramics

Credits: 3

Exploration of elementary forming, decorating, firing processes developed by various pottery cultures. Examination of basic geology, clay prospecting, kiln design and construction. Includes historical overview and contemporary survey.

Prerequisite: 12 hours of humanities/ GED/USP.

ART5650 - Art and Ideas

Credits: 3

Students in this seminar explore the literatures of art. Each seminar has a reading list and a thematic structure. Major critical papers are written during the course of the seminar. Required for M. A. and M. A. T. program Plan B option.

Prerequisite: 30 hours in art.

ART5670 - Term Creative Project

Credits: 1-5

Max Credit (Max. 15)

For M. F. A. candidates only; professional creative achievement in painting, drawing, printmaking, ceramics, or sculpture, leading to presentation of graduate exhibition. Typically, student will consult a single professor in major area for crediting this course.

Prerequisite: admission to candidacy for M. F. A. degree and consent of instructor.

ART5710 - Medieval Art

Credits: 3

Studies the unique qualities of art of this intriguing era of transition between classical and renaissance times.

Prerequisite: ART 1010, ART 2010.

ART5740 - 20th Century European Art

Credits: 3

Studies European art from 1900 to present.

Dual Listed ART 4740.

Prerequisite: ART 2010 and ART 2020, consent of instructor.

ART5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ART5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ART5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

ART5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

Arts and Sciences/ Special Courses

AS2000 - Study Abroad

Credits: 1-18
Max Credit (Max. 18)

Students may register through the University of Wyoming for up to two semesters of academic work abroad with the approval of the academic adviser, head of the major department and coordinator of the Study Abroad Program.

Former Course Number [ENGL 2110]

AS2400 - Lower-Division Internship in ____

Credits: 1-12
Max Credit (Max. 12)

Allows students to gain hands-on experience that will help to bridge the gap between the theory of academia and the practicality of the work world. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Planning will involve the internship agency, the student's academic adviser and the associate dean of the college.

Prerequisite: sophomore standing and the approval of the adviser, head of the major department and an associate dean of A&S.

AS2490 - Special Topics in __

Credits: 1-3
Max Credit (Max. 6)

Courses of broad general appeal and an interdepartmental flavor will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See current class schedule for topics.

Prerequisite: sophomore standing.

AS4400 - Upper-Division Internship in ____

Credits: 1-12
Max Credit (Max. 12)

Permits students to contribute in the areas of their expertise and gain hands-on experience that will help to bridge the gap between academia and the real world of work. Specific arrangements must be made in advance to identify the academic component of the internship and the grading criteria. Such planning will involve the internship agency, the student's academic adviser and the associate dean of the college.

Prerequisite: approval of adviser, head of the major department and the college advising coordinator.

AS4900 - Special Topics in _____

Credits: 1-3
Max Credit (Max. 6)

Courses of broad general appeal and an interdepartmental flavor will be offered from time to time under this title. Permits utilization of unusual faculty expertise and provides highly-specialized and particularly pertinent, timely subject matter. See current class schedule for topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing.

AS4975 - Independent Study

Credits: 1-3
Max Credit (Max. 6)

Offers the advanced student the opportunity to pursue an individualized topic of interest with the assistance and direction of an instructor.

Prerequisite: junior/senior standing and consent of instructor.

Astronomy

ASTR1000 - Descriptive Astronomy

Credits: 3
Covers essential features of the solar system, stellar astronomy and time measurement.

USP 2003-2014 Code U5PN, U3SE
USP 2015 Code U5PN

A&S College Core 2015 Students who have taken ASTR 2310 may not earn credit in ASTR 1000, and not more than 4 credit hours may be earned by taking both ASTR 1000 and ASTR 1050.

ASTR1050 - Survey of Astronomy

Credits: 4
Consists of 3 lecture periods and a two-hour laboratory in observational and laboratory astronomy. Observing sessions are scheduled after dark and held when weather permits. Designed primarily for non-science majors.

USP 2003-2014 Code [SE< >PN]

Prerequisite: MATH 1000 or equivalent, or passing the Mathematics Placement examination at Level 2.

ASTR1070 - The Earth: Its Physical Environment

Credits: 4
Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society. Cross listed with GEOL 1070. Prerequisites: MATH 1100 or equivalent; enrollment reserved for elementary and elementary/special education majors, or consent of instructor.

Cross Listed GEOL 1070.
USP 2003-2014 Code [SE< >PN]
Prerequisite: MATH 1100

ASTR2310 - General Astronomy I

Credits: 4
[(none)<>PN] Covers the history of astronomy, orbital mechanics, solar system (the Sun, planetary interiors, atmospheres, moons, comets, meteors); interaction of radiation and matter (physical processes in gas, black body radiation) astronomical instrumentation and detectors. Laboratory includes exercises in observational astronomy.

Observing sessions are scheduled after dark and held when weather permits.

When Offered (Normally offered spring semester)

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR2320 - General Astronomy II

Credits: 4

Covers the properties of stars, stellar atmospheres and stellar evolution, interstellar matter, galaxies and cosmology including models of the universe, the Big Bang, and dark energy. Laboratory includes exercises in observational astronomy. Observing sessions are scheduled after dark and held when weather permits.

USP 2003-2014 Code PN

Prerequisite: PHYS 1210 or PHYS 1310, MATH 2200.

ASTR4000 - Astronomy for Teachers

Credits: 1-5

Specifically designed for elementary school teachers. Presents basic concepts (time, seasons, light and its properties); planetary systems of the sun; the sun and stars; the Milky Way and galaxies; and cosmology and relativity. Emphasizes presenting these concepts to elementary school children. Half the class is devoted to laboratory and workshop activities to develop techniques for presenting these concepts through visual aides, demonstrations and films. Students may receive a maximum of 5 credits in a combination of ASTR 4000 and ASTR 4100.

When Offered (Offered summer session)

Prerequisite: 6 hours of physical or biological science, junior standing in education.

ASTR4100 - Astrophysics for Secondary Teachers

Credits: 1-3

Discusses modern physics, emphasizing obtaining and analyzing real data. Adaptable to junior and senior high school science classrooms. Special projects include analysis of planetary positions and images; direct observations of the sun; predictions of eclipses and tides; analyses of basic astronomical data of stars, star clusters, galaxies and clusters of galaxies; and cosmological modeling. Students may receive a maximum of 5 credits in a combination of ASTR 4000 and 4100.

When Offered (Offered summer session)

Prerequisite: junior standing in secondary science education.

ASTR4610 - Introduction to Astrophysics

Credits: 3

Includes astrophysical sources of radiation, radiation transport, nonequilibrium processes, stellar atmospheres, stellar interiors and the interstellar medium.

Prerequisite: ASTR 2310, PHYS 2310 and concurrent registration in PHYS 4210 and PHYS 4410.

ASTR4620 - Modern Research in Astrophysics

Credits: 3

Taught jointly by astrophysics faculty and others. Includes several topics of current research in astrophysics.

Prerequisite: ASTR 4610.

ASTR4860 - Problems in (TOPIC)

Credits: 1-4

Independent, in-depth study of selected problems in astronomy and astrophysics. Entirely laboratory-oriented investigations of astronomical objects.

Prerequisite: ASTR 2310 and PHYS 2310.

ASTR5150 - Astronomical Techniques

Credits: 4

Discusses selected topics in observational astronomy such as applications of the Fourier transform, design of optical instruments, properties of various detectors of electromagnetic radiation, sources of uncertainty in astronomical data, reduction techniques for these data, and techniques of image processing.

Prerequisite: graduate standing in astrophysics.

ASTR5160 - Data Mining in Large Astronomical Surveys

Credits: 4

Aimed at an understanding of how to manipulate and analyze catalog-level data from large astronomical surveys. Students will address realistic problems in data mining large astronomical surveys using one or more programming languages.

Prerequisite: graduate standing.

ASTR5420 - Stellar Evolution and Structure

Credits: 4

The life cycle of stars forms the basis for this course, including formation and early evolution, hydrostatic structure, and late stages of evolution. In addition, energy generation and transport are presented.

Prerequisite: graduate standing in astrophysics.

ASTR5460 - Galactic Structure and Evolution: Cosmology

Credits: 4

Presents material describing current cosmological models and their application to areas of extragalactic astronomy. Topics include cosmic dynamics, introduction to relativistic models, measuring parameters, dark matter, dark energy,

the cosmic microwave background radiation, big bang nucleosynthesis.

Prerequisite: Graduate standing in astrophysics.

ASTR5465 - Galaxies

Credits: 4

Presents material necessary for study of the Milky Way, galaxies, active galaxies, and the large-scale structure of the universe. Topics include stellar populations, kinematics and dynamics in the Milky Way and other galaxies, galaxy classification and properties, and active nuclei and quasars.

Prerequisite: graduate standing in astrophysics.

ASTR5470 - Interstellar Medium and Diffuse Matter

Credits: 4

The material between stars is the primary topic, including the chemistry, energetics, and evolution of interstellar matter. The formation of molecules and dust grains, and their composition, are also discussed. Emission processes characteristic of the ISM are described.

Prerequisite: ASTR 5460.

ASTR5490 - Planets and Their Stars

Credits: 4

Reviews recent and current research in planets and exoplanets. Topics may include planet formation, known properties of exoplanets, comparisons to Solar System planets, properties of planet-hosting stars, and evolution of planetary systems.

Prerequisite: graduate standing or permission of the instructor.

ASTR5630 - General Relativity and Cosmology I

Credits: 3

Presents a detailed study of Einstein's theory of the gravitational field with emphasis on the geometric structure of space-time, and selected topics in general relativity.

Prerequisite: PHYS 5320, PHYS 5420.

ASTR5860 - Independent Study

Credits: 1-4

Max Credit (Max. 24)

Investigations on the level of original graduate research in astrophysics.

Prerequisite: ASTR 4860 or equivalent.

ASTR5870 - Special Topics in Astronomy

Credits: 1-4
Max Credit (Max. 20)

Prerequisite: graduate standing

ASTR5960 - Thesis Research

Credits: 1-9
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ASTR5980 - Dissertation Research

Credits: 1-9
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate degree program.

Atmospheric Science

ATSC1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

ATSC2000 - Introduction to Meteorology

Credits: 4

First course in meteorology for students with minimal background in math and science. Provides general and practical understanding of weather phenomena. Emphasizes observational aspects of the science, meteorological view of the physical world and the impact the science has on life and society. Includes three hours of lecture and one laboratory per week. Includes atmospheric composition and structure, radiation, winds and horizontal forces, stability and vertical motions, general circulation, synoptic meteorology, clouds and precipitation, severe storms and atmospheric optics.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ATSC2100 - Global Warming: The Science of Humankind's Energy Consumption Impacting Climate

Credits: 3

Introduces non-specialists to the fundamental scientific principles governing climate change. The underlying physics of both human and natural contributions to global warming is presented along with uncertainties in predicting climate. Potential strategies to mitigate global warming (alternative energy, carbon capture, and geoengineering) are also discussed.

USP 2003-2014 Code U5PN

ATSC2200 - Severe and Unusual Weather

Credits: 3

A nontechnical course on severe and unusual weather events that occur around the globe. The focus of the course is on a wide range of weather events that have profound impacts on societies, economics, and cultures, and the material is presented in a qualitative manner such that is highly accessible by students coming from all backgrounds.

USP 2003-2014 Code U5PN

ATSC3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ATSC4009 - Objective Data Analysis

Credits: 3

Max Credit 3

Techniques for extracting information from data as used in the physical science literature such as compositing, time series analysis, singular value decomposition, principle component analysis, and filtering. More recent techniques from machine learning such as artificial neural networks, self-organizing maps, and traceable AI will be presented.

Cross Listed ATSC 5009

Prerequisite: MATH 2210 and MATH 2250 OR PERMISSION OF INSTRUCTOR

ATSC4320 - The Ocean Environment

Credits: 3

Focuses on the ocean as a system. Objective is the development of interdisciplinary understanding of marine processes, especially those processes occurring along coastal margins. Emphasis is on the development of quantitative models and their use in understanding anthropogenic impact on ocean resources.

Dual Listed ATSC 5320.

Prerequisite: MATH 2310, PHYS 1310, CHEM 1030, ES 3060 (or ES 3070), LIFE 1010, senior standing or higher.

ATSC4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed BE 4580/CE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

ATSC4650 - Undergraduate Research in Atmospheric Science

Credits: 2-6

Max Credit (max 9)

Course Description and

Prerequisite: Independent research in atmospheric science under supervision of an atmospheric science faculty member. Projects are possible in the fields of cloud and aerosol physics, radar meteorology, mesoscale dynamics, and stratospheric chemistry. Participation in field work, involving the UW aviation or stratospheric ballooning facilities, is a possibility. Research results are summarized in a report.

ATSC4900 - Problems in Atmospheric Science

Credits: 1-3

Max Credit (Max. 10)

Independent study of a particular problem or phrase of atmospheric science, or presentation of reviews and discussion of current advances in atmospheric science investigations.

Prerequisite: ATSC 4010, 4031, and 4035.

ATSC5005 - Objective Analysis in Geosci.

Credits: 3

Techniques for extracting information from geophysical data directly, such as compositing, time series analysis,

singular value decomposition, principal component analysis, and filtering as well as some specialized topics such as wavelet analysis.

Prerequisite: Calculus III (such as MATH 2210) and Differential equations (such as MATH 2310).

ATSC5008 - Mesoscale Meteorology

Credits: 3

Fundamental dynamics of mesoscale motions including departures from hydrostatic balance. Mesoscale energy sources. Boundary layer circulations. Convective initiation. Structure and dynamics of deep convection and mesoscale organized convection. Atmospheric waves. Thermally and dynamically forced flow over mountains.

Prerequisite: permission of the instructor.

ATSC5009 - Objective Data Analysis

Credits: 3

Max Credit 3

Techniques for extracting information from data as used in the physical science literature such as compositing, time series analysis, singular value decomposition, principle component analysis, and filtering. More recent techniques from machine learning such as artificial neural networks, self-organizing maps, and traceable AI will be presented.

Cross Listed ATSC 4009

Prerequisite: MATH 2210 and MATH 2250 OR PERMISSION OF INSTRUCTOR

ATSC5010 - Physical Meteorology I

Credits: 4

First and second law of thermodynamics applied to energy transformations in the atmosphere, including dry, moist, and saturated processes and atmospheric stability. Fundamentals of radiation including blackbody, planetary budget, and propagation and how these drive the thermodynamics of the earth's atmosphere.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5011 - Physical Meteorology II

Credits: 4

Quantitative description of cloud particle nucleation, growth by condensation, and growth by deposition and collection. Ties to other atmospheric processes, e. g. , radiation budgets and cloud dynamics, are also emphasized. Course material is presented in lecture and computer-based laboratory settings. A numerical cloud model is developed and analyzed in the laboratory.

Prerequisite: ATSC 5010.

ATSC5014 - Dynamic Meteorology

Credits: 4

Development and interpretation of the atmospheric equations of motion, scales of motion, horizontal atmospheric winds, thermal wind equation, circulation and vorticity, mesoscale motions. Introduction to planetary boundary layer flows. Data visualization software is also introduced and used to develop understanding of dynamical processes.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5016 - Synoptic Meteorology

Credits: 4

Large-scale vertical motion as viewed from quasigeostrophic and isentropic potential vorticity perspectives. Baroclinic instability, and the structure and evolution of extratropical cyclones. Identification and development of fronts, jet streams and associated weather features. Role of topography on large-scale circulations.

Prerequisite: MATH 2210, PHYS 1310 and PHYS 1320 or equivalent.

ATSC5018 - Ethics and Research Methods

Credits: 1

Ethics and ethical dilemmas in research and academia and how to address them are discussed. This course also covers general research methodology and describes processes for research funding and disseminating research findings and the peer-review process.

Prerequisite: graduate standing.

ATSC5040 - Climate Science and Climate Change

Credits: 3

Global climate system components, and their interactions. Radiative, dynamic, thermodynamic, chemical, and feedback processes affecting the climate system. Natural and anthropogenic drivers of climate change. Past and present climate variability and sensitivity, and its simulation. Structure of climate models, their components, parameterizations, and attributes. Current climate modeling results and predictions of future climate.

Prerequisite: ATSC 5001, ATSC 5016.

ATSC5155 - Weather Analysis & Forecasting

Credits: 1

Max Credit 3

Analysis of operational meteorological data, including observations and 3D NWP model output. Use of python tools for meteorological interpretation, using fundamental understanding of atmospheric processes, gained in the core graduate ATSC classes. All scales are relevant, but emphasis is placed on mesoscale processes, including those driven by terrain or by deep convection.

Prerequisite: ATSC 5010 , ATSC 5014

ATSC5210 - Cloud and Precipitation Systems

Credits: 3

Types of clouds and precipitation systems, and the precipitation mechanisms in those systems; structure of convective, orographic, and frontal systems and severe storms. Schematic and numerical models of clouds and storms with emphasis on hailstorms.

Prerequisite: ATSC 5011 and ATSC 5014.

ATSC5310 - Atmospheric Dynamics II

Credits: 3

Introduction to the dynamic energetics of the atmosphere, wave motions, atmospheric instabilities. Introduction to numerical modeling, applications.

Prerequisite: ATSC 5014.

ATSC5320 - The Ocean Environment

Credits: 3

Focuses on the ocean as a system. Objective is the development of interdisciplinary understanding of marine processes, especially those processes occurring along coastal margins. Emphasis is on the development of quantitative models and their use in understanding anthropogenic impact on ocean resources.

Dual Listed ATSC 4320.

Prerequisite: MATH 2310, PHYS 1310, CHEM 1030, ES 3060 (or ES 3070), LIFE 1010, senior standing or higher.

ATSC5330 - Boundary Layer Meteorology

Credits: 3

A quantitative and descriptive study of the thermodynamics and dynamics of the planetary boundary layer, including budgets (heat, moisture, momentum, turbulent kinetic energy, radiation), stability, turbulence and turbulent fluxes, convection, terrain effects, phenomenology, and measurement and analysis techniques.

Prerequisite: ATSC 5010, ATSC 5014.

ATSC5340 - Radar Meteorology

Credits: 3

The theory of radar and the application of radars to studies of the atmosphere, including basic radar design, distributed targets, attenuation, polarization, Doppler velocities, analysis techniques, and examples of radar studies of clear air, clouds, and precipitation.

Prerequisite: ATSC 5010, ATSC 5011.

ATSC5350 - Atmospheric Chemistry

Credits: 3

Origin and composition of the atmosphere. Sources, lifetimes, transport of gases and aerosols. Cycles of C, S, N and trace elements. Removal processes: precipitation, and dry deposition. Homogenous and Heterogeneous kinetics. Anthropogenic influences: effect of air pollution on radiation balance and cloud processes.

Prerequisite: graduate standing in a physical science or engineering.

ATSC5360 - Aircraft Instrumentation

Credits: 3

An introduction to instrumentation used on research aircraft to measure properties of the atmosphere. Topics include measuring atmospheric state, atmospheric particles, and other constituents (i. e. trace gases) from aircraft. Principles of measurement techniques are described, complexities due to clouds are presented, and resulting uncertainties and limitations are explored.

Prerequisite: Graduate student in Atmospheric Science or consent of instructor.

ATSC5370 - Satellite Remote Sensing

Credits: 3

Physical principles of atmospheric remote sensing, with a breadth of applications in passive and active remote sensing of the atmosphere. Offers a solid understanding of remote sensing instrumentation and retrieval approaches for a variety of atmospheric parameters.

Prerequisite: graduate student in Atmospheric Science or consent of instructor.

ATSC5600 - Advanced Cloud Microphysics

Credits: 3

Analysis of the processes involved in cloud and precipitation formation. Detailed treatments of the condensation, ice nucleation, vapor growth, and collection processes. Emphasis is on reviewing the current state of knowledge in the field and on surveying directions of research.

Prerequisite: ATSC 5010 and ATSC 5011.

ATSC5700 - Numerical Modeling of Atmosphere

Credits: 3

Governing equations and assumptions, finite differencing, subgrid-scale processes, cloud processes, aerosol and atmospheric chemistry, boundary layer processes, radiative transfer, cumulus parameterizations, parcel models, kinematic models, large-eddy simulating (LES) models, cloud-resolving models (CRMs), large-scale regional and global climate models (GCMs).

Prerequisite: ATSC 5010 or ATSC 5011 or ATSC 5014 or consent of instructor.

ATSC5880 - Atmospheric Science Problems

Credits: 1-3
Max Credit (Max. 6)

A special course for graduate students in atmospheric science only, designed to make possible the study and investigation of problems or phases of atmospheric science selected to fit the needs of students.

ATSC5890 - Atmospheric Science Seminar

Credits: 1-3
Max Credit (Max. 6)

A seminar-type class furnishing motivation for advanced study of current problems by means of library research, study of current literature, and carefully guided class discussions.

Prerequisite: consent of department head.

ATSC5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ATSC5920 - Continuing Registration: On Campus

Credits: 1-12
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ATSC5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ATSC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

ATSC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ATSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

ATSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Bioengineering

BE4580 - Honors Undergraduate Research

Credits: 3
An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/CE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

BE4810 - Bioinstrumentation

Credits: 3
Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 5810.

Prerequisite: EE 2210 or similar electric circuit course.

BE4820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

Dual Listed BE 5810.

Prerequisite: EE 3220, basic course, or equivalent.

BE5410 - Rehabilitation Engineering

Credits: 3

This course covers the engineering principles of multiple rehabilitation technologies, including rehabilitation robots, exoskeletons, wearable sensors, electrical stimulators, implants, and virtual reality. Students will learn the technical and biological principles of all of these technologies via lectures, projects, and literature reviews.

Prerequisite: graduate standing.

BE5810 - Bioinstrumentation

Credits: 3

Electronic systems used to monitor physiological systems and function (cardiovascular, pulmonary, nervous); transducer systems, amplifiers and recording systems used in research and clinical applications. Laboratory.

Dual Listed BE 4810.

Prerequisite: EE 2210 or similar electric circuit course.

BE5820 - Biomedical Signal Processing

Credits: 3

Extraction of signals from noise and data analysis. Emphasis on system modeling of physiological functions from experimental data.

Dual Listed BE 4820.

Prerequisite: EE 3220, basic course, or equivalent.

BE5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics. Note: credit in this course may not be included in a graduate program of study for degree purposes.

Biomedical Science

BMS5880 - Biomedical Sciences Research Ethics

Credits: 2

Introduction to the field of bioethics, including major ethical theories and principles, with an emphasis on understanding the ethical issues that may arise while conducting biomedical research and potential strategies for properly addressing these ethical issues.

BMS5920 - Continuing Registration: On Campus,

Credits: 1-12

Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5940 - Continuing Registration: Off Campus,

Credits: 1-24

Max Credit (Max. 24)

Prerequisite: graduate standing.

BMS5960 - Thesis Research,

Credits: 1-24

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

BMS5980 - Dissertation Research,

Credits: 1-24

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

BMS5985 - Seminar

Credits: 1
Max Credit (Max. 3)

A series of weekly seminars presented by faculty from other universities, private or public sector health industries or by Biomedical Science Program faculty and students. Examines current topics and research in biomedical sciences through oral presentations and discussion.

Prerequisite: graduate standing and consent of instructor.

Botany

BOT1101 - First-Year Seminar

Credits: 3
USP 2003-2014 Code U5FY

BOT3000 - Plant Ecophysiology/Plant Form and Function

Credits: 4
Integration of basic vascular plant anatomy, morphology, physiology within the contexts of modern evolutionary and ecological theory. Students receive in depth exposure to fluid flow, energetics, development, growth, general metabolism, and structure, and functions for plant cells, tissue and organs.

Cross Listed Cross listed with: REWM 3000.

Prerequisite: LIFE 2022 or LIFE 2023.

BOT3100 - Plants and Civilization

Credits: 3
Overview of past and current roles plants have in human civilizations and culture. Socio-economic impacts of agriculture, famine, deforestation, wealth allocation, politics and technology will be discussed in relation to specific plants and plant products. Examples include plant fibers, stimulants, drugs and medicinals, foods, spices and other plant-derived resources.

USP 2003-2014 Code U3L
A&S College Core 2015 ASG

Prerequisite: COM1 or equivalent writing course.

BOT3600 - Plant Diversity and Systematics

Credits: 4
A broad introduction to modern vascular plant systematics, with emphasis on identification, classification, nomenclature, speciation, adaptation, convergence, and phylogenetic methods. Lab emphasizes learning major flowering plant families and genera, major invasive species, use of keys and manuals, and plant collection, with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023, or equivalent.

BOT4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed ATSC/ESS 4001/GEOL 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

BOT4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

BOT4100 - Scientific Communication

Credits: 2

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences.

Cross Listed ZOO 4100.

USP 2003-2014 Code U3L, U3WC

USP 2015 Code U5C3

A&S College Core 2015 Preference given to seniors.

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

BOT4101 - Scientific Communication Lab

Credits: 1

This course is designed to provide intensive instruction in written, oral, and digital communication for zoology and physiology, biology, and botany majors. The course teaches students to communicate and execute research using practices common in the biological sciences. Preference given to seniors.

Cross Listed ZOO 4101.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and concurrent or prior upper division BOT, ZOO, or LIFE course.

BOT4200 - Plant-Microbe Interactions

Credits: 3

This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 5200.

Prerequisite: LIFE 1010 and LIFE 2021.

BOT4235 - Marine Biology

Credits: 3

This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 4235.

Dual Listed BOT 5235.

Prerequisite: LIFE 3400 with a grade of C or better.

BOT4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 4280.

Dual Listed BOT 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

BOT4360 - Mushrooms of the Rocky Mountains

Credits: 3

A broad introduction to the biology of mushrooms, with emphasis on identification, ecology, and safety for consumption. Lab emphasizes learning major mushroom families and genera and their features, use of keys and manuals, and mushroom collections with a Wyoming and Rocky Mountain focus.

Prerequisite: LIFE 2023 or equivalent.

BOT4395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and

fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 5395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed ENR 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

BOT4550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 5550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT4640 - Flora of the Rocky Mountains

Credits: 3

Field course. Acquaints students with the flora of the surrounding region. Emphasizes field identification and collection from plant communities encompassing a wide range of environments, such as grasslands, forests and alpine tundra.

When Offered (Normally offered summer session)

Prerequisite: LIFE 2023.

BOT4664 - Special Topics in Evolution

Credits: 1-4

Max Credit (Max. 6)

Advanced topics in evolutionary biology are engaged by studying primary research and topical synthesis in the current literature.

Dual Listed BOT 5664.

Prerequisite: LIFE 3500 or equivalent.

BOT4680 - Taxonomy of Vascular Plants

Credits: 4

A study of classification principles, nomenclature rules and systematic botany literature. Plants of the Rocky Mountain region are used primarily as examples, but the course gives a comprehensive view of the characteristics and relationships of the principal plants families.

When Offered (Normally offered spring semester)

Prerequisite: LIFE 2023.

BOT4700 - Vegetation Ecology

Credits: 4

Reviews the ecology of major vegetation types, emphasizing patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 5700.

When Offered (Normally offered fall semester)

Prerequisite: LIFE 3400.

BOT4730 - Plant Physiological Ecology

Credits: 4

Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms.

Cross Listed RNEW 4730.

Dual Listed BOT 5730.

When Offered (Normally offered spring semester)

Prerequisite: one course in physiology and one course in ecology.

BOT4745 - Terrestrial Ecosystem Ecology

Credits: 3

Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. We study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Cross Listed ECOL 5745.

Dual Listed BOT 5745.

Prerequisite: 1 course in ecology.

BOT4775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 4775.

Dual Listed BOT 5775.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: LIFE 3400.

BOT4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 4780.

Dual Listed BOT 5780.

Prerequisite: Consent of instructor.

BOT4790 - Special Topics in Ecology

Credits: 1-3

Acquaints students with various topics not covered in regular courses. Emphasizes recent developments appearing in journal literature.

Dual Listed BOT 5790.

Former Course Number [4710]

Prerequisite: two courses in ecology.

BOT4965 - Undergraduate Research in Botany

Credits: 1-10

Max Credit (Max. 10)

Undergraduate research or study in botany done under the guidance of a Botany Faculty Member. Encouraged to present their research at local, regional, or national scientific meetings, and, when appropriate, submit a manuscript for publication.

Prerequisite: LIFE 2023, undergraduate status in good academic standing; consent of a botany faculty research mentor.

BOT4970 - Internship

Credits: 1-12

Max Credit (Max. 12)

Provides undergraduate students with academic credit for approved work experiences in the fields of botany and biology. Must be arranged in consultation with a botany faculty member and the work supervisor.

Prerequisite: junior or senior standing,

BOT5000 - Graduate Seminar

Credits: 1-3
Max Credit (Max. 6)

Selected topics on current research in the botanical sciences.

Prerequisite: 15 hours of botany or biology.

BOT5060 - Fundamental Concepts in Evolution

Credits: 3
Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed ECOL 5060/ZOO 5060.

Prerequisite: graduate student in good standing.

BOT5150 - Research in Remote Sensing

Credits: 1-6
Max Credit (Max. 6)

Independent research into problems on the remote sensing of vegetation using satellite technology.

Prerequisite: graduate standing and consent of instructor.

BOT5200 - Plant-Microbe Interactions

Credits: 3
This course is designed to improve content knowledge in Microbiology, with a specific focus on plant-microbe interactions and their application to ecology, conservation, agriculture, and rangeland management, and to enhance oral presentation skills.

Dual Listed BOT 4200.

BOT5235 - Marine Biology

Credits: 3
This course explores major topics of physical oceanography, marine biodiversity and ecology, and human impacts on the ocean. Emphasis is placed on reading, evaluating, and synthesizing primary literature.

Cross Listed ZOO 5235.

Dual Listed BOT 4235.

Prerequisite: graduate standing.

BOT5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed GEOL 5280.

Dual Listed BOT 4280.

Prerequisite: graduate standing.

BOT5320 - Research in Mycology

Credits: 1-3

Max Credit (Max. 6)

Prerequisite: graduate standing or consent of instructor.

BOT5395 - Symbiosis

Credits: 3

Symbiosis, the living together of unlike organisms, encompasses mutually beneficial to reciprocally detrimental interactions. The course examines conditions required for establishment and maintenance of important symbioses including mycorrhizae, lichens, endophytes, nitrogen-fixing and endosymbiotic bacteria, fungal/insect interactions, and fungal pathogens. Symbioses in forest ecosystems will be emphasized.

Dual Listed BOT 4395.

Prerequisite: LIFE 2022 or LIFE 2023, and LIFE 3400.

BOT5420 - Research in Physiology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5480 - Spatial Information Sciences Seminar

Credits: 1

There are many earth science technologies, remote sensing, GIS and GPS. Synergism among these technologies increase the range of solutions for research and management. This course is a forum for presentation of these solutions or questions requiring solutions.

Cross Listed GEOL 5480.

Prerequisite: a course in remote sensing, GIS, GPS, and graduate standing.

BOT5550 - Computational Biology

Credits: 4

Introduces concepts and skills that are generally applicable to computational analysis of biological questions. Content is motivated by applied projects that require basic computer programming for analysis. Two computer languages are introduced and utilized.

Dual Listed BOT 4550.

Prerequisite: MATH 2200 or STAT 2050 or equivalent; LIFE 1010 or equivalent.

BOT5555 - Computational Biol Practicum

Credits: 3

Students will perform computational analysis of data to address contemporary biology questions for clients. Teams of students will work together, with consultation and direction from the instructor, to perform analyses, answer scientific questions, and report findings to a client, using best practices in report generation and reproducible research.

Prerequisite: BOT 4550/BOT 5550.

BOT5600 - Ecological Modeling

Credits: 3

Course will immerse students in the most important and fundamental statistical modeling techniques for data analysis. Each class will include theoretical content delivered through a brief lecture and the immediate application of the theory through activities using R software.

Prerequisite: STAT 2050, STAT 3050, or an equivalent course.

BOT5610 - Research in the Taxonomy of Vascular Plants

Credits: 1-6

Max Credit (Max. 6)

The University of Wyoming is especially well equipped for research on the classification of native plants. The Rocky Mountain Herbarium offers an abundance of material for study and the library is especially rich in taxonomic literature. Monographic work may be done on an assigned genus or on the plants of a limited area. Cytological, anatomical, and biochemical techniques may be employed in the solution of certain problems.

Prerequisite: graduate standing and consent of instructor.

BOT5650 - Readings in Plant Systematics

Credits: 1

Max Credit (Max. 6)

Centered on readings involving selected topics in the current plant systematics literature.

Prerequisite: BOT 4680.

BOT5664 - Topics: Evolution

Credits: 1-4
Max Credit (Max. 12)

Advanced topics in evolutionary biology are engaged by studying primary research and topical syntheses in the current literature.

Dual Listed BOT 4664.

Prerequisite: LIFE 3500 or equivalent.

BOT5665 - Research in Evolutionary Biology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5690 - Special Topics in Systematics

Credits: 1-4
Max Credit (Max. 12)

Designed to acquaint students with various topics not covered in regular courses. Emphasis is placed on recent developments in the journal literature.

Prerequisite: BOT 4680 or 5680 or equivalent.

BOT5700 - Vegetation Ecology

Credits: 4
The ecology of major vegetation types, with emphasis on patterns of vegetation distribution, vegetation-environment relationships, succession, the effect of fire and management decisions, and methods of vegetation analysis.

Dual Listed BOT 4700.

Prerequisite: LIFE 3400.

BOT5710 - Research in Ecology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5720 - Research in Physiological Ecology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing and consent of instructor.

BOT5730 - Plant Physiological Ecology

Credits: 4
Acquaints advanced students with environmental factors which affect the establishment and growth of plants. Emphasizes adaptive mechanisms. Lecture with inclusive hands-on laboratory.

Cross Listed RNEW 5730.

Dual Listed BOT 4730.

Prerequisite: one course in ecology and one in physiology.

BOT5745 - Terrestrial Ecosystem Ecology

Credits: 3
Advanced course examines fundamental ecosystem functions and their relationship to ecosystem structure using a systems approach. Study cycles of carbon, water and nutrients through ecosystem components with an emphasis on interactions among plants, soil, and the atmosphere. Current readings focus on responses of terrestrial ecosystems to global climate change and human disturbance.

Dual Listed BOT 4745.

Prerequisite: one course in ecology.

BOT5750 - Seminar in Ecophysiology

Credits: 1-3
Max Credit (Max. 8)

Prerequisite: 1 course in physiology and 1 course in ecology.

BOT5775 - Forest Ecology

Credits: 4
Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed ECOL 5775/RNEW 5775.

Dual Listed BOT 4775.

Prerequisite: LIFE 3400.

BOT5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed ESS 5780.

Dual Listed BOT 4780.

Prerequisite: Consent of instructor.

BOT5790 - Special Topics in Ecology

Credits: 1-3

Max Credit (Max. 6)

Designed to acquaint advanced students with various topics not covered in other courses. Emphasis is placed on recent developments appearing in the journal literature.

Dual Listed BOT 4790.

Prerequisite: two courses in ecology.

BOT5900 - Practicum in College Teaching1

Credits: 3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

BOT5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

BOT5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

BOT5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

BOT5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Business

BKCH3021 - Fundamentals of Blockchain

Credits: 3

The purpose of this course is to provide a fundamental understanding of blockchain technologies and their implications. Topics will focus on understanding how blockchain may change the way we think about money, disrupt traditional financial institutions and eliminate costly intermediaries.

Prerequisite: Requires Junior Class Standing.

BKCH4021 - Business Applications of Blockchain

Credits: 3

This course provides advanced concepts underpinning the applications of global blockchain technologies for business and their use cases. Students will learn about the underlying technologies to be well-prepared to develop blockchain applications in the business world.

Prerequisite: BKCH 3021.

BKCH4121 - Case Studies in Block Chain

Credits: 3

This experiential learning focused course is targeted toward understanding the creation and development of blockchain ventures. Besides course lecture materials, students will study and support new blockchain ventures in a real-world setting.

Prerequisite: BKCH 3021.

BKCH4900 - Ind. Study in Blockchain

Credits: 1-6
Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Blockchain not included in other structured Blockchain courses

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

BKCH4910 - Topics in Blockchain

Credits: 1-6
Max Credit 3

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing and consent of instructor

BUSN1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

BUSN2600 - Internship in Business

Credits: 3
Max Credit 6

Provides students with practical business knowledge and a perceptual basis for later coursework. Students work as interns in operating organizations.

Prerequisite: Approved internship application through the Peter M. & Paula Green Johnson Student Success Center and 2.5 GPA.

BUSN4600 - Advanced Internship in Business

Credits: 3
Max Credit 6

Provides students with practical business knowledge, policy, procedure, and decision making. Students work as interns in operating organizations.

Prerequisite: MKT 2100, MGT 2100, FIN 2100, advanced business standing, approved internship application through the Peter M. & Paula Green Johnson Student Success Center.

BUSN4990 - Senior Exit Exam

Credits: 0

The Senior Exit Exam test content encompasses the core COB curriculum: accounting, economics, finance, ethics, legal and social environment, management, marketing, and quantitative business analysis (decision science). The purpose of this test is to assess students' mastery of core business/economic concepts. This course is taken during the same semester as the students capstone course (MGT 4800/ECON 4240).

Chemical Engineering

CE5430 - Environmental Engineering Chem

Credits: 3

Environmental Engineering Chemistry, focusing on water quality questions and the effects of water on engineered infrastructure. When students complete this course they will be able to use chemistry more effectively to solve environmental engineering problems and will also have sufficient background for further graduate study in environmental engineering.

Cross Listed ENVE 5430, CHE 5430

Prerequisite: CHEM 1020 and CE 3400, or graduate standing.

CHE1005 - Introduction to Chemical Engineering

Credits: 1

Provides an overview of chemical engineering and its role in the current technological importance: energy, biotechnology, production of chemicals, and materials processing. Introduces strategies for solving engineering problems, including ethical considerations and teamwork, discusses process variables, units, mass balance, and data analysis, and incorporates active learning exercises using spreadsheet to solve chemical engineering problems.

Prerequisite: concurrent enrollment in MATH 2200.

CHE2005 - Chemical Process Analysis

Credits: 3

Introduces analysis of chemical processes using stoichiometry, material and energy balances, thermodynamics and economics.

When Offered (Normally offered fall semester)

Former Course Number [3000]

Prerequisite: C- or better in either CHEM 1050 or CHEM 1020 and concurrent enrollment in MATH 2205.

CHE2060 - Chemical Engineering Computing

Credits: 3

Introduces fundamental concepts in linear algebra, numerical methods and applied statistics needed to solve engineering problems. In this context, this course also introduces and reinforces computational tools that will be useful for other CHE classes.

Prerequisite: C or better in CHE 1005 or ES 1060; C or better in CHE 2005; concurrent enrollment in MATH 2310.

CHE2070 - Chemical Thermodynamics

Credits: 3

Discusses first and second laws of thermodynamics applied to chemical processes, production of power from heat, refrigeration, and liquefaction processes, develops thermodynamic relations for calculating thermodynamic properties of fluids, including the use of equations of state, and introduces heat effects, Gibbs-energy change of reaction, and chemical-reaction equilibria.

Prerequisite: C- or better in CHE 2005, PHYS 1210; C or better in MATH 2210.

CHE2080 - Chemical Engineering Fluid Mechanics

Credits: 3

Introduces the fundamental aspects of macroscopic fluid mechanics, including physical properties, fluid statics, mass, energy, and momentum balances, momentum transport, and flow through pumps, pipes, and other chemical engineering equipment for both incompressible and compressible fluids, and of microscopic fluid mechanics, including differential mass and momentum balances.

Prerequisite: C- or better in CHE 2005, PHYS 1210, and C or better in MATH 2210.

CHE2090 - Practical Fundamentals of Process Control

Credits: 2

Introduces students to sensors, valves, actuators and the assembly of process control components. Provide hands-on practical experience with level control, flow control, temperature control and pressure control processes. This course consists of one (1) hour of lecture and two (2) hours of laboratory per week.

Prerequisite: C or better in MATH 2205.

CHE3015 - Chemical Thermodynamics II

Credits: 3

Introduces mixture properties, such as chemical potentials, excess properties, partial molar properties, heats of mixing, fugacities, and practical tools for estimating them from solution theories and equations of state. These tools and concepts are applied to phase and chemical equilibria.

When Offered (Normally offered fall semester)

Former Course Number [3010]

Prerequisite: C or better in CHE 2060, and CHE 2070 or ES 2310.

CHE3026 - Heat Transfer

Credits: 3

Introduces the theory and application of energy transport (e. g. conduction, convection, radiation), discusses in depth fundamentals of microscopic energy transport, and applies the knowledge to macroscopic chemical engineering processes and systems.

Prerequisite: C- or better in CHE 2060, and CHE 2080 or ES 2330.

CHE3028 - Mass Transfer

Credits: 3

Introduces mass transfer concepts, including molecular diffusion, convective mass transfer, and mass transfer between phases, and the development of mathematical models of these physical phenomena, applicable to the analysis and design of chemical processes.

Prerequisite: C- or better in CHE 2005, CHE 2060, and CHE 2080 or ES 2330.

CHE3035 - Separation Processes

Credits: 3

Applies transport and equilibrium concepts and models to the analysis and design of separation processes, such as distillation, absorption, extraction, leaching, adsorption, crystallization, and membrane separation processes.

Prerequisite: C or better in CHE 2060, and CHE 2070 or ES 2310.

CHE3040 - Unit Operations Laboratory I

Credits: 3

Laboratory experiments examining settling, pump performance, heat transfer, adsorption, gas transfer, and distillation. Introduces topics in statistics including: probability distributions, mean, median, mode, variance and standard deviation, systematic and random error, confidence intervals, and t-tests, F-tests and ANOVA. Emphasizes the preparation of formal laboratory reports including experimental error analysis.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: C- or better in CHE 3026 and CHE 3028 and CHE 4060. (Normally offered fall semester)

CHE3050 - Unit Operations Laboratory I

Credits: 3

Laboratory experiments examining settling, pump performance, heat transfer, adsorption, gas transfer, and distillation. Introduces topics in statistics including: probability distributions, mean, median, mode, variance and standard deviation, systematic and random error, confidence intervals, and t-tests, F-tests and ANOVA. Emphasizes the preparation of formal laboratory reports including experimental error analysis. Prerequisites: C- or better in CHE 3026 and CHE 3028 and CHE 4060. (Normally offered fall semester)

When Offered Fall Semester

CHE3090 - Applying Simulation to Dynamic Processes

Credits: 1

Introduces students to dynamic simulation software for controlling individual chemical engineering processes. This course consists of two (2) hours of laboratory per week.

Prerequisite: C or better in CHE 2005.

CHE3100 - Fundamentals of Bioengineering

Credits: 3

An introduction to select biological concepts with emphasis on their relevancy to bioengineering. Topics include model organisms, cells and organelles, bioenergetics and metabolism, macromolecules, DNA replication and modern molecular biology methods, and control mechanisms.

Prerequisite: C- or better in LIFE 1010.

CHE3200 - Fundamentals of Solids Handling

Credits: 3

Introduces students to particle technology (solids-handling) including particle rate processes, fundamentals of particle transport, mathematics of particle systems, particle properties and characterization and processing operations. This course consists of three hours of lecture and one hour of laboratory per week and an introduction to ASPEN modeling of solids handling.

Prerequisite/Corequisite: C or better in MATH 2205

CHE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/ARE 3890/CE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

CHE3900 - Undergraduate Research

Credits: 1-6

Students carry out research appropriate to undergraduates, under faculty supervision. May be taken more than once.

When Offered (Normally offered each semester)

Prerequisite: junior standing in chemical engineering.

CHE4000 - Environment, Technology and Society

Credits: 3

Explores relationships among technology, the environment and society. Examines social and humanistic aspects of using current and future technology to understand and solve environmental problems.

Cross Listed PETE 4000.

Prerequisite: junior standing and completion of two lab sciences.

CHE4050 - Unit Operations Laboratory II

Credits: 3

Laboratory experiments examining heat transfer and process control. Also requires students to design, conduct and analyze 'open-ended' experiments. Introduces LabView and covers factorial experimental design and linear and non-linear data regression approaches. Emphasizes the preparation of a formal report describing all aspects of the experiments.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3WC

Prerequisite: C- or better in CHE 3040. (Normally offered spring semester)

CHE4060 - Reaction Engineering

Credits: 3

Introduces chemical process kinetics, catalysis and reactor design. Includes homogeneous and heterogeneous reaction kinetics; design of batch, stirred-tank and tubular reactors; and nonisothermal operation.

When Offered (Normally offered spring semester)

Prerequisite: C- or better in CHE 3015 and CHE 3026 and concurrent enrollment in CHE 3028.

CHE4070 - Process Simulation & Economics

Credits: 4

Max Credit 4

Introduces simulation software used to model chemical processing. Techniques used to determine economic feasibility

of chemical plants are described.

When Offered (Normally offered fall semester)

Prerequisite: C or better in CHE 3028 and CHE 4060

CHE4080 - Senior Design

Credits: 4

Max Credit 4

Intended for the senior year. Applies all previous courses to the design of safe, economical and environmentally benign processes.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: COM-2, concurrent enrollment in CHE 4070

CHE4090 - Process Dynamics and Control

Credits: 3

Encompasses analysis and design control systems for the chemical process industry including steady-state approximation, types of controllers, simple unsteady-state analysis, use of mathematical models and process dynamics under control.

Prerequisite: C- or better in CHE 3028 and CHE 4060.

CHE4092 - Controlling Process Systems

Credits: 3

Capstone process control course. Students will design process control for systems of linked processes including sensing and transmission, final control elements, and controller. This course consists of two (2) hours of lecture and three (3) hours of laboratory per week.

Prerequisite: C or better in CHE 3090 and concurrent enrollment in either CHE 4090, EE 4620, or EE 4621.

CHE4100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 5100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE4160 - Biomedical Engineering-Transport Processes

Credits: 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. Involves topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Prerequisite: consent of instructor and grade of C or better in at least three courses counting no more than two from CHEM 1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2022, MATH 2200, KIN 2040, MOLB 2021, MOLB 2240, CHE 3000, ES 2310.

CHE4165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastic, and silk.

Dual Listed CHE 5165.

Prerequisite: LIFE 1010 and CHEM 1020 or CHEM 1050, or permission of instructor.

CHE4200 - Industrial Chemical Production

Credits: 3

Integration of chemical engineering and chemistry as practiced in modern industry. Engineering of chemical reactions and processes for commodity chemicals, petroleum-based fuels, petrochemicals, intermediates, specialty chemicals, pharmaceuticals, and engineered materials. Environmental strategies for waste minimization and pollution prevention.

Prerequisite: CHEM 2420 and CHE 3015 (may be taken concurrently).

CHE4210 - Natural Gas Processes and Modeling

Credits: 3

After a quick introduction to the Hysys simulation program, the main chemical processes used to convert well-head gas to products will be reviewed and modeled (fractionation train, sulfur recovery, tail gas clean-up, dehydration, refrigeration, nitrogen rejection) in high detail, including appropriate property models to use.

Prerequisite: CHE 3070.

CHE4220 - Metabolic and Protein Engineering

Credits: 3

An introduction to the design of biological systems for conversion of a feedstock to product, with emphasis on synthetic biology and directed evolution design principles, evolutionary mechanisms and tradeoffs. Metabolic pathways and molecules of industrial importance will be discussed, as well as ethics as applied to synthetic biology and bioengineering.

Dual Listed CHE 5220.

Prerequisite: MOLB 2021 or concurrent enrollment in CHE 3100.

CHE4270 - Advanced Process Simulation

Credits: 3

Advanced topics for a commercial process simulation software that is routinely used in industry will be covered. Topics will include: electrolyte systems, physical property methods and regression of parameters, petroleum industry component selection and distillation, solids handling capabilities including coal processing, advanced recycle stream convergence techniques, and equation-oriented solution methods.

Prerequisite: CHE 3070.

CHE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430 /ENR 4430.

Prerequisite: CHEM 1020.

CHE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

CHE4970 - Internship in Chemical Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students in appropriate engineering activities while serving as interns in an industrial, government, or other setting.

Prerequisite: must be involved in a chemical engineering co-op/internship experience.

CHE4972 - Internship in Process Control Engineering

Credits: 1-6

Max Credit (Max. 6)

Enables credit for students serving as interns with an approved organization that provides process control and instrumentation experience.

Prerequisite: Be enrolled in the Process Control and Instrumentation minor.

CHE4990 - Topics in Chemical Engineering

Credits: 1-6
Max Credit (Max. 6)

Features topics not included in regularly offered classes. Section I is individual study. Other sections are group study by seminar or in class format.

Prerequisite: CHE 3000 or concurrent enrollment.

CHE5010 - Transport Phenomena

Credits: 3
Examines the modeling of momentum, heat and mass transport.

Cross Listed PETE 5010.

Prerequisite: ES 2330, MATH 2310, and graduate standing in Chemical or Petroleum Engineering.

CHE5020 - Thermodynamics

Credits: 3
Utilizing the laws of thermodynamics to a wide variety of process applications. Evaluating current methods for predicting thermodynamic properties of pure fluids and mixtures. Modeling multiphase, multicomponent equilibria.

Cross Listed PETE 5020.

Prerequisite: graduate standing.

CHE5030 - Reaction Kinetics

Credits: 3
An analysis of reactions involving phase boundaries, heterogeneous catalysis, gas-solid systems, and gas-liquid systems.

Prerequisite: CHE 4060.

CHE5060 - Flow through Porous Media

Credits: 3
Review of properties of porous media. Relationships of permeability to porosity. Formulation of the Fundamental Flow equation. Constant Rate Solutions. Constant Pressure Solutions. The Principle of Superposition. Transient well testing

of oil and gas reservoirs, including drawdown, build-up faulted systems, interference, drillstem tests, and isochronal test analysis.

Dual Listed PETE 5060.

Prerequisite: graduate standing.

CHE5090 - Graduate Teaching and Research: Theory and Methods

Credits: 3

A general approach to scientific research and graduate school. Topics include: purpose of graduate school, careers with graduate degrees, communication basics, literature search skills, presentations, research instrumentation, the scientific methods, developing hypotheses, grant proposal, and paper writing, research ethics, copyrights, patents, research notebooks, and classroom teaching techniques.

Prerequisite: graduate standing.

CHE5100 - Biochemical Engineering

Credits: 3

Applies chemical engineering principles to the analysis and design of biological processes widely used in the pharmaceutical, food and environmental remediation industries. Topics include kinetics of enzyme-catalyzed reactions, cellular growth and metabolism, bioreactor design and mass transfer considerations.

Dual Listed CHE 4100.

Prerequisite: Completion with a C- or better or concurrent enrollment in CHE 3100 or MOLB 2021.

CHE5150 - Topic in Chemical Engineering

Credits: 1-3

Max Credit 12

Selected topics in chemical engineering.

Prerequisite: Consent of instructor

CHE5160 - Biomedical Engineering - Transport Processes

Max Credit 3

Focuses on chemical and physical transport processes with applications toward the development of drug delivery systems, artificial organs, bioartificial organs and tissue engineering. This will involve topics covering body fluids, capillary solute transport, physical and flow properties of blood, tissue oxygen transport, pharmacokinetic models and cell physiology.

Dual Listed CHE 4160

Prerequisite: Consent of instructor and grade of C or better in at least 3 courses counting no more than 2 from CHEM

1020, CHEM 1030, CHEM 1050, LIFE 1010, LIFE 1020 and at least one from LIFE 2020, MATH 2200, KIN 2040, MOLB 2240, CHE 3000, ES 2310, graduate standing.

CHE5165 - Biomaterials

Credits: 3

Material science and engineering of the various materials used for biomedical applications, in-depth discussion of the molecular and cellular interactions to implanted materials, as well as a survey of practical applications. Materials covered will include polymers, ceramics, metals, composites, silicones, and natural materials, such as collagen, elastin, and silk.

Dual Listed CHE 4165

Prerequisite: LIFE 1010 and CHEM 2420 or permission of instructor.

CHE5190 - Polymeric Chemistry Engineering

Credits: 3

This course discusses basic methods in the synthesis of polymers (polymerization) as well as their applications toward to common and new promising polymer products. In addition, the kinetics of these methods, the synthetic processing techniques and the end products will be addressed together with applications and characterization of various polymers

Prerequisite: CHE 3015, CHE 4060, and CHEM 2440.

CHE5220 - Metabolic and Protein Engineering

Credits: 3

An introduction to the design of biological systems for conversion of a feedstock to product, with emphasis on synthetic biology and directed evolution design principles, evolutionary mechanisms and tradeoffs. Metabolic pathways and molecules of industrial importance will be discussed, as well as ethics as applied to synthetic biology and bioengineering.

Prerequisite: MOLB 2021 or concurrent enrollment in CHE 3100.

CHE5230 - Advanced Catalysis and Characterization

Credits: 3

Focus on modern ideas and techniques used to describe gas-solid interactions, including adsorption and chemical reactions. The usefulness of photon and electron spectroscopies for evaluating the structure of real catalysts will be discussed. Catalysis of important classes of chemical reactions will be related to results obtained by various materials characterization methods.

Prerequisite/Corequisite: CHE 5030.

CHE5355 - Mathematical Methods in Chemical Engineering

Credits: 3

Covers mathematical modeling: conservation laws and constitution relationships; partial differential equations (PDEs):

the types and analytical solution techniques; applied linear algebra; matrices and Eigen-analysis; numerical solution techniques: finite difference and finite element methods, Newton-Raphson method, and temporal discretization techniques, and linear solution techniques: direct and iterative methods.

Dual Listed PETE 5355

Prerequisite: MATH 2210, CHE/PETE 3025 or equivalent.

CHE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems

Cross Listed CE/ENVE 5410

Prerequisite: Consent of instructor.

CHE5440 - Fluid Mechanics

Credits: 3

Lagrangian and Eulerian descriptions, conservation laws, stress and rate-of-stress tensors, Navier-Stokes equations, energy equations, vorticity and circulation inviscid and potential flows, laminar flows, turbulent flows, boundary-layer theory.

Cross Listed ME 5440

CHE5600 - Research Data Management

Credits: 3

A general approach to research data management for graduate students and researchers. Topics include: the case for data management, data management planning, meeting grant requirements, formatting and organizing, storing and transferring, legal and ethical issues, strategies for research teams, sharing data, and publishing, citing, and rights to research data.

Cross Listed ES/GRAD/LBRY/PETE 5600

CHE5700 - Fundamentals of Coal Utilization

Credits: 3

Following introduction to coal structure, constituents and classification, fundamental principles of coal utilization technologies will be examined. The topics to be covered include behavior of coal stockpiles, drying, pyrolysis, combustion/gasification of coal. Reactor models for utilization of coal will be discussed with reference to current environmental issues and remediation.

Prerequisite: Graduate standing

CHE5880 - Problems in Chemical Engineering

Credits: 1-6
Max Credit 6

A special course designed to make possible the study and investigation of problems or phases of chemical engineering selected to fit the needs of the student.

Prerequisite: Graduate standing in engineering

CHE5890 - Chemical Engineering Seminar

Credits: 1
Max Credit 9

Departmental seminar on current research with formal training for student presentation of technical papers.

Cross Listed PETE 5890

Prerequisite: Graduate standing

CHE5900 - Practicum in College Teaching

Credits: 1-3
Max Credit 3

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience

Prerequisite: Graduate Status

CHE5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit 16

Prerequisite: Advanced Degree Candidacy

CHE5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit 16

Prerequisite: Advanced degree candidacy

CHE5960 - Thesis Research

Credits: 1-12
Max Credit 24

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis

Prerequisite: Enrolled in a graduate degree program.

CHE5980 - Dissertation Research

Credits: 1-12
Max Credit 48

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: Enrolled in a graduate level degree program.

CHE5990 - Internship

Credits: 1-12
Max Credit 48

Prerequisite: Graduate standing

Chemistry

CHEM1000 - Introductory Chemistry

Credits: 4

Deals with principles of chemistry and some applications to inorganic chemistry. For students in family and consumer sciences, nursing, education, general arts and sciences and most agriculture curricula. Students who have credit in CHEM 1020 or CHEM 1050 may not receive duplicate credit for this course.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: Minimum grade of C in MATH 0925, or level 3 on the MPE, or ACT math score of 23 or above.

CHEM1001 - The Chemical Community

Credits: 1

A survey of chemistry both as a major and a discipline. Chemistry's historical role, the scientific method, scientific ethics, as well as current challenges in the major fields of chemistry are discussed. Information literacy is strongly emphasized, both by familiarization with university resources as well as specialized chemical databases.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3I, U3L

CHEM1020 - General Chemistry I

Credits: 4

First semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1020, CHEM 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3S

USP 2015 Code U5PN

Prerequisite: ACT Math score of 23 or above, or concurrent enrollment in MATH 1400, or MATH 1405 or CHEM 1050.

CHEM1030 - General Chemistry II

Credits: 4

Second semester of a one-year introductory series. Provides broad coverage of chemistry principles with inorganic and organic systems applications. Credit will not be allowed for more than one of CHEM 1030 and CHEM 1060.

Lab/Lecture Hours Laboratory and discussion: 3 hours per week.

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1020.

CHEM1050 - Advanced General Chemistry I

Credits: 4

First semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1020, 1050 and CHEM 1000.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: one year high school chemistry, and an ACT Math score of 27 or higher or concurrent enrollment in MATH 2200.

CHEM1060 - Advanced General Chemistry II

Credits: 4

Second semester of a one-year series covering chemical principles. Emphasizes inorganic chemistry and briefly discusses qualitative analysis. Credit not given for more than one of CHEM 1030 and 1060.

Lab/Lecture Hours Laboratory: 3 hours per week.

When Offered (Normally offered spring semester)

USP 2003-2014 Code U3SP

USP 2015 Code U5PN

Prerequisite: CHEM 1050 or CHEM 1020, with permission of the instructor.

CHEM2000 - Special Topics in the Laboratory

Credits: 1
Max Credit (Max. 4)

Introduces students to laboratory experience in chemistry.

Prerequisite: special permission from the chemistry department.

CHEM2230 - Quantitative Analysis

Credits: 5
Broad, general coverage of analytical techniques, principles and calculations.

Lab/Lecture Hours Laboratory: 6 hours per week.
When Offered (Normally offered spring semester)
Prerequisite: CHEM 1030, CHEM 1060 or equivalent.

CHEM2300 - Introductory Organic Chemistry

Credits: 4
Terminal course in organic and beginning biological chemistry. No credit will be allowed in CHEM 2300 if credit earned in CHEM 2420. This course is not an acceptable prerequisite for CHEM 2440.

When Offered (Normally offered spring semester)
Prerequisite: CHEM 1020, CHEM 1050, CHEM 1000 or equivalent.

CHEM2420 - Organic Chemistry I

Credits: 4
First semester of a one-year sequence in organic chemistry. Approached from the viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week. No credit allowed in CHEM 2420 if credit earned in CHEM 2300.
When Offered (Normally offered fall)
Prerequisite: CHEM 1030 or CHEM 1060.

CHEM2440 - Organic Chemistry II

Credits: 4
Second semester of a one-year sequence in organic chemistry. Approached from viewpoint of modern chemical theory, emphasizing structural and mechanistic concepts. The course incorporates a laboratory integrated with the lecture. Students desiring a one-semester terminal course should take CHEM 2300.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

A&S College Core 2015 Note: CHEM 2300 is not an acceptable prerequisite for CHEM 2440.

Prerequisite: CHEM 1030 or CHEM 1060 and CHEM 2420.

CHEM3020 - Environmental Chemistry

Credits: 3

Environment and modern environmental problems in terms of chemical structures and reactions. Chemical principles of equilibrium, kinetics, and thermodynamics are used to help understand our changing environment. Topics include toxicological chemistry, aquatic chemistry, atmospheric chemistry, and green chemistry.

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 2230; and QA course.

CHEM3550 - Physical Chemistry for the Life Sciences

Credits: 3

Deals with areas of physical chemistry of interest to students majoring in the life sciences. Covers thermodynamics, kinetics, equilibrium and spectroscopy, using biological systems for development and illustration. Credit is allowed for only one of the courses: CHEM 3550 or CHEM 4507.

When Offered (Normally offered every other year)

Prerequisite: CHEM 1030, MATH 2200.

CHEM4000 - Career Skills

Credits: 3

Max Credit 3

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

When Offered (Normally offered fall semester)

Prerequisite: At least 6 credit hours of Chemistry (CHEM) classes.

CHEM4040 - Chemical Literature

Credits: 1-2

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 2300 or CHEM 2420; CHEM 4507 or CHEM 3550 or concurrent enrollment.

CHEM4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed ERS 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

CHEM4100 - Inorganic Chemistry Laboratory

Credits: 2

Introduces basic inorganic laboratory synthetic techniques and methods of analysis.

When Offered (Offered fall semester)

Prerequisite: CHEM 2440 and CHEM 4110 or concurrent enrollment.

CHEM4110 - Introductory Inorganic Chemistry

Credits: 3

A basic course on theoretical and descriptive inorganic chemistry.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2420, and physical chemistry.

CHEM4230 - Instrumental Methods of Chemical Analysis

Credits: 5

Introduces optical, electroanalytical and separation methods of analysis, emphasizing practical industrial applications.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 2230.

CHEM4400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 5400.

Prerequisite: CHEM 2440 or consent of instructor

CHEM4507 - Physical Chemistry I

Credits: 3

First semester of a one-year sequence. Emphasis on introductory quantum mechanics, atomic structure, molecular bonding and structure and spectroscopy. Kinetic molecular theory of gasses may be introduced. Uses multivariable calculus, differential equations and some linear algebra.

When Offered (Normally offered fall semester)

Prerequisite: one year of general chemistry, multivariable calculus, one year of general college physics.

CHEM4508 - Physical Chemistry II

Credits: 3

Second semester of a one year sequence, emphasizes kinetic theory of gasses and non-ideal solutions, chemical equilibrium, electrochemistry, statistical thermodynamics, and reaction kinetics. Uses multivariable calculus and differential equations.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4507.

CHEM4515 - Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. This includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software and mathematical analysis of physical chemistry problems.

Dual Listed CHEM 5515.

Prerequisite: MATH 2200 and MATH 2205, CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

CHEM4516 - Applied Mathematics in Physical Chemistry II

Credits: 3

Covers the advanced mathematical techniques in physical and theoretical chemistry. This includes introduction into probability and stochastic processes, infinite series, vector and tensor calculus, Fourier transforms and partial differential equations. Includes practical numerical problem solutions using MatLab software and applications of the mathematical analysis to specific physical chemistry problems.

Dual Listed CHEM 5516.

Prerequisite: CHEM 4515.

CHEM4525 - Physical Chemistry Lab I

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with an emphasis on quantum mechanical (spectroscopic) methodologies.

Prerequisite: CHEM 4507 or concurrent enrollment.

CHEM4530 - Physical Chemistry Laboratory II

Credits: 1

Illustrates principles of physical chemistry, techniques of measurement, and analysis and interpretation of data with

emphasis on thermodynamics and kinetics.

Lab/Lecture Hours 3 hours per week.

When Offered (Normally offered spring semester)

Prerequisite: CHEM 4508 or concurrent enrollment.

CHEM4560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical, density functional, semi-empirical and molecular mechanics methods.

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 5560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

CHEM4920 - Special Problems in Chemistry

Credits: 1-3

Probes deeply into special areas of chemistry through library or laboratory work. Taken under supervision of faculty in the area of the investigation.

When Offered (Offered every semester)

Prerequisite: consent of instructor.

CHEM4930 - Undergraduate Research

Credits: 1-3

Research activities on a chemical project of limited scope or as part of a laboratory project of great scope. A written report is submitted to the department each semester of enrollment.

When Offered (Offered every semester)

Prerequisite: chemistry major and consent of instructor.

CHEM5000 - Seminar in Chemistry

Credits: 1

Max Credit (Max. 3)

This class will help students develop their communication and job seeking skills for a professional career in chemical sciences. Additionally, it will help build their problem solving, chemical literature, laboratory safety, teamwork and ethical skills that are necessary to succeed in their professional careers in chemical sciences.

Prerequisite: graduate standing in chemistry or biochemistry.

CHEM5100 - Special Topics in Advanced Inorganics

Credits: 1-9
Max Credit (Max. 12)

A course designed for students with an interest in contemporary inorganic chemistry. Recent problems in the literature and techniques for their solution will be addressed.

When Offered (Normally offered during Summer Session)

CHEM5111 - Advanced Inorganic Chemistry

Credits: 3
A graduate-level course on theoretical and descriptive inorganic chemistry. Topics will include molecular symmetry, spectroscopy, electronic structure/bonding, magnetism, electron transfer, and catalysis.

Former Course Number [5110]

Prerequisite: CHEM 2420, CHEM 4110 and CHEM 3550 or CHEM 4507.

CHEM5115 - Descriptive Inorganic Chemistry

Credits: 3
Advanced survey of inorganic chemistry, emphasizing the synthesis, structural, and reactivity properties of inorganic compounds. Emphasis will be placed on the application of bonding theory and periodic principles to the chemistry of main-group, d-block, and f-block elements.

Prerequisite: CHEM 4110, CHEM 5110 or CHEM 5111.

CHEM5140 - Organometallic Chemistry

Credits: 3
A survey of bonding and synthetic reactions of transition metal organometallic chemistry.

Prerequisite: CHEM 4110/5110.

CHEM5150 - Inorganic Group Seminar

Credits: 1
Max Credit (Max. 9)

Course designed for students with an interest in contemporary inorganic chemistry. Recent problems in the literature and techniques for their solution are addressed.

CHEM5190 - Research in Inorganic Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4110/5110.

CHEM5200 - Special Topics in Analytical Chemistry

Credits: 1-6
Max Credit (Max. 12)

Material selected from chromatography, electroanalytical chemistry, ion exchange, chemical separations, optical methods of analysis, polarography and other areas.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 4230, CHEM 4507.

CHEM5220 - Modern Electroanalytical Methods

Credits: 3

An advanced survey of electroanalytical chemistry including ion selective potentiometry, electrolysis, coulometry, polarography and voltammetry.

CHEM5240 - Optical Methods of Chemical Analysis

Credits: 3

An advanced survey of the theory, instrumentation and applications of optical methods of chemical analysis.

Prerequisite: CHEM 4230, CHEM 4507.

CHEM5250 - Advanced Chemical Instrumentation

Credits: 3

Introduces chemistry students to the basic elements of electronics. Specific topics include networks, passive and active filters, digital electronics, logic gates, counters, flip-flops, and converters. Second half of course introduces students to experimental design, pattern recognition, factorial analysis, and multivariate statistical methods.

Prerequisite: CHEM 4230 or its equivalent.

CHEM5260 - Separation Methods

Credits: 3

A detailed survey of the theoretical and practical aspects of modern separation methods with emphasis on chromatography.

Prerequisite: CHEM 2230, CHEM 2440, and CHEM 4508.

CHEM5290 - Research in Analytical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 2230, CHEM 4507.

CHEM5300 - Special Topics Synthetic

Credits: 1-6
Max Credit (Max. 9)

Material will be selected from one of the following areas: heterocycles, organometallics, natural products, physical and chemical methods of structure elucidation, organic photochemistry, and other special areas of organic chemistry.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 5330.

CHEM5310 - Organic Group Seminar

Credits: 1
Max Credit (Max. 9)

Designed for students with an interest in organic reaction mechanisms. A problem solving approach using electron pushing techniques will be emphasized.

Prerequisite: CHEM 5340.

CHEM5320 - Spectroscopic Methods of Structure Determination

Credits: 3
Provides theoretical and practical treatment of spectroscopic methods for application in research. Topics include ultraviolet, infrared, and nuclear magnetic resonance spectroscopy and mass spectrometry.

Prerequisite: CHEM 2440, CHEM 4507.

CHEM5330 - Advanced Organic Chemistry

Credits: 3
Treatment of organic chemistry from the viewpoints of structure and mechanism with emphasis on structural theory of bonding, stereochemistry and the general classes of organic reactions.

Prerequisite: CHEM 2440 and CHEM 4507.

CHEM5340 - Synthetic Methods in Organic Chemistry

Credits: 3
Surveys and applies the important synthetic methods of organic chemistry with particular attention to recent developments.

Prerequisite: CHEM 5330.

CHEM5390 - Research in Organic Chemistry

Credits: 1-3

Max Credit (Max. 12)

Prerequisite: CHEM 5320.

CHEM5400 - Biological Chemistry

Credits: 3

Covers the main principles of biological chemistry from a chemical standpoint. Highlights the chemical structure of biological molecules and examines biological processes with emphasis on the underlying organic chemistry. Introduces biological NMR spectroscopy and other biophysical methods. Discusses main metabolic pathways.

Dual Listed CHEM 4400.

Prerequisite: CHEM 2440 or consent of instructor.

CHEM5500 - Special Topics in Physical Chemistry

Credits: 1-6

Max Credit (Max. 9)

Material will be selected from one of the following fields: electrochemistry, surface chemistry, catalysis, colloids, photochemistry, and other special fields of physical chemistry.

When Offered (Normally offered during Summer Session)

Prerequisite: CHEM 4507 and 5510.

CHEM5501 - Physical Group Seminar

Credits: 1-9

Max Credit (Max. 9)

Designed for students with an interest in theoretical and experimental physical chemistry. Students are required to give presentations on current literature and research topics.

Prerequisite: graduate standing.

CHEM5515 - Methods of Applied Mathematics in Physical Chemistry I

Credits: 3

Designed to introduce the necessary mathematical background and essential computer programming tools for students of physical and theoretical chemistry. Includes an introduction into linear algebra, multivariate calculus, differential equations, analysis and modeling of experimental data, use of Matlab software, and mathematical analysis of physical

chemistry problems.

Dual Listed CHEM 4515.

Prerequisite: MATH 2200 and MATH 2205, 1 yr. CHEM 1020/CHEM 1030 or CHEM 1050/CHEM 1060.

CHEM5516 - Applied Mathematics in Physical Chemistry II

Credits: 3

Covers the advanced mathematical techniques in physical and theoretical chemistry. This includes an introduction into probability and stochastic processes, infinite series, vector and tensor calculus, Fourier transforms and partial differential equations. Includes practical numerical problem solutions using Matlab software and applications of the mathematical analysis to specific physical chemistry problems.

Dual Listed CHEM 4516.

Prerequisite: CHEM 4515/CHEM 5515.

CHEM5530 - Quantum Chemistry

Credits: 3

The quantum mechanical description of time-dependent and independent processes, including discussions of the Schrodinger equation, wave packets, approximate methods, and interaction of matter with radiation.

Prerequisite: two semesters of undergraduate physical chemistry.

CHEM5540 - Molecular Spectroscopy

Credits: 3

Introduction to the relationships among quantum mechanical formulations, experimentally determinable quantities obtained via spectroscopic methods, and physical parameters related to the structure of molecular systems.

Prerequisite: CHEM 5530.

CHEM5560 - Molecular Modeling

Credits: 3

Emphasizes practical training in computational modeling of molecular properties using modern computer software. Includes ab-initio quantum mechanical,

Lab/Lecture Hours 3 hours per week.

Dual Listed CHEM 4560.

When Offered (Normally offered alternating spring semesters)

Prerequisite: CHEM 4507.

CHEM5590 - Research in Physical Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: CHEM 4507.

CHEM5790 - Research in Biological Chemistry

Credits: 1-3
Max Credit (Max. 12)

Prerequisite: consent of instructor.

CHEM5820 - Advanced Problems in Chemistry

Credits: 1-3
Max Credit (Max. 3)

A graduate level course for students desiring to probe more deeply into a special area of chemistry. Taken under the supervision of a faculty member in the field of investigation.

Prerequisite: consent of instructor.

CHEM5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

CHEM5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CHEM5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CHEM5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

CHEM5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

CHEM5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

CHEM5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Chinese

CHIN1010 - First Year Chinese I

Credits: 4
Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP 2015 Code U5H

CHIN1020 - First Year Chinese II

Credits: 4
Fundamentals of grammar, conversation, and reading. Introduction to Chinese culture through the language.

USP 2015 Code U5H

Prerequisite: CHIN 1010 or equivalent.

CHIN1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

CHIN2030 - Second Year Chinese I

Credits: 4

Grammar, composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 1020 or equivalent.

CHIN2040 - Second Year Chinese II

Credits: 4

Further studies in grammar composition, conversation and more vocabulary in Chinese.

Prerequisite: CHIN 2030 or CHIN equivalent.

CHIN2041 - Contemporary and Traditional Chinese Culture

Credits: 3

Designed to provide those with a serious interest in China and Chinese language with a cultural context for learning Chinese language. Incorporates economic and social material to give students a clear view of Chinese culture with an emphasis on Chinese language instruction.

Prerequisite: CHIN 2030.

CHIN3050 - Intermediate Composition and Conversation

Credits: 3

Develop abilities to read and write complex Chinese texts with an intermediate level of understanding, including texts in both conversational and narrative styles. Reading and writing skills will build considerably on the skills learned in two years of university study in Chinese language.

Prerequisite: CHIN 2040 or equivalent.

CHIN3055 - Business Chinese

Credits: 3

Comprehensive course on business language skills. For students with proficiency in Mandarin at the Intermediate Mid level or higher. Focus is on language functions for the workplace. Productive skills, both spoken and written, will

include the composition of extended frequently-used business documents

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: CHIN 3050 or equivalent.

CHIN3065 - Intermediate Composition and Conversation II

Credits: 3

Students will not only understand and construct complex speech and writing but will gain the ability to do so effectively to persuade, discuss and communicate accurately with native Chinese speakers. Students will be able to relate topics such as personal experience, daily routine, reports, opinions and judgment in well-written Chinese paragraphs.

Prerequisite: CHIN 3050 or equivalent.

CHIN3160 - See Movies, Touch China

Credits: 3

This course combines exploration of classical and contemporary Chinese cultures through prominent Chinese films. The audio-video materials selected will be discussed in their historical context. Students will explore the transformations China has undergone, and will seek to understand the Chinese mindset.

USP 2003-2014 Code [(none)< >H]

Prerequisite: COM1.

CHIN4070 - Business Chinese II

Credits: 3

Apply previously acquired skills in complex Chinese language and business topics to the thorough analysis of case studies in Chinese business scenarios. Students will be able to read, discuss, and reach conclusions based on case studies of international companies in China and Chinese companies in international markets.

Prerequisite: CHIN 3055.

Civil Engineering

CE1000 - Exploring CAECM

Credits: 1

Introduction to civil and architectural engineering professions through exploration of modern engineering challenges. Students work on a design project, starting with problem definition and working towards concept designs using spreadsheet and communication tools. Professional topics introduced include globalizability, diversity, professional ethics, design limitations and constraints, sustainability, environmental stewardship, and engineering economics.

Cross Listed ARE 1000.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE1010 - Civil Engineering Tools

Credits: 3

This course is an introduction to computing tools commonly used in civil engineering practice including 3-D Computer Aided Drafting, Spreadsheets and Presentation Software. Tools will be introduced through design work on typical civil engineering design projects.

Prerequisite/Corequisite: of MATH 2200.

CE2070 - Engineering Surveying

Credits: 3

Principles of measurements of distances, elevation and angles. Basic error theory in measurement and calculations. Traverse field techniques and office calculations. Basic principles of surveying and map making.

Prerequisite/Corequisite: of MATH 1450 or MATH 1405.

CE3110 - Professional Practice

Credits: 3

Max Credit 3

Professional practice in civil and architectural engineering including economics, ethics, professional responsibility and licensure; business and management principles; project management structure; leadership and public policy.

Cross Listed ARE 3110

Prerequisite: Gateway requirement for Civil & Architectural Engineering majors

CE3200 - Structural Analysis I

Credits: 3

Introductory design and analysis topics in loads on building, stress and displacement analysis of structures, including beams, trusses and frames, classical flexibility and stiffness methods.

Cross Listed ARE 3200.

USP 2003-2014 Code [WB<>(none)]

Prerequisite: ES 2410.

CE3210 - Civil Engineering Materials

Credits: 4

Laboratory investigation and design of materials used in civil engineering: metals, masonry, concrete and timber. Nondestructive evaluation of materials. Analysis and presentation of data, including various types of written reports and oral presentations.

Cross Listed ARE 3210.
USP 2003-2014 Code U3WB
USP 2015 Code U5C3
Former Course Number [2210]

Prerequisite: COM2 and ES 2410.

CE3300 - Hydraulic Engineering

Credits: 3

Develops analysis, design and modeling techniques for incompressible pipe flow, steady uniform and gradually varied open channel flow, and hydraulic structures.

Former Course Number [4320]

Prerequisite: ES 2330.

CE3400 - Introduction to Environmental Engineering

Credits: 3

An introduction to the major topics in environmental engineering. Focus areas include water supply, wastewater treatment, air pollution control and solid and hazardous waste management. Quantitative aspects and engineering solutions to problems are emphasized.

Prerequisite: MATH 2205 and CHEM 1020 or equivalent.

CE3500 - Transportation Engineering

Credits: 4

Introduction to the major topics in Transportation Engineering. The topics covered include human, vehicle and roadway characteristics and performance, traffic characteristics and flow theory, roadway capacity and Level of Service (LOS) concepts, intersection and traffic signal design, public transportation, transportation planning, geometric design of highways, traffic safety, highway materials, and pavement design

Former Course Number [4500]

Prerequisite: CE 1010.

CE3600 - Soil Mechanics I

Credits: 4

A study of soil and the properties which influence its usefulness as an engineering material. Principles governing movement of soil, water and propagation of stresses through soil masses are studied.

Former Course Number [4600]

Prerequisite: ES 2410.

CE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ATSC 3890/ARE 3890/CHE 3890/COSC 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

CE4010 - Civil Engineering Design

Credits: 3

Students will prepare final civil engineering documents including construction plans, specifications, and engineering estimates for a civil engineering project. Concepts of standard specifications and sustainability measures will also be applied to the design.

Former Course Number [3010]

Prerequisite: STAT 2050.

CE4200 - Structural Analysis II

Credits: 3

Stress and displacement of indeterminate structures. Determination of loads on buildings. Matrix stiffness methods.

Cross Listed ARE 4200

Prerequisite: ARE 3200/CE 3200.

CE4250 - Structural Steel Design

Credits: 3

Design of structural components and applications utilizing steel.

Cross Listed ARE 4250.

Prerequisite: ARE 3200/CE 3200.

CE4260 - Structural Concrete Design

Credits: 3

Design of structural components and applications utilizing reinforced concrete.

Cross Listed ARE 4260.

Prerequisite: ARE 3200/CE 3200.

CE4265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in RE/CE 4260.

Cross Listed ARE 4265.

Dual Listed CE 5265.

Prerequisite: ARE 4260/CE 4260.

CE4285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed ARE 4285.

Dual Listed ARE 5285 and CE 5285.

When Offered Offered on a three semester rotation.

Former Course Number [4280]

Prerequisite: ARE 4260/CE 4260 and ARE 3200/CE 3200.

CE4295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed ARE 4295.

Dual Listed CE 5295.

Former Course Number [4290]

Prerequisite: CE 3200 or equivalent.

CE4400 - Design of Water Treatment Facilities

Credits: 3

A theoretical and practical design course for municipal potable water treatment systems. Major emphasis includes health criteria, operational control procedures, primary and secondary drinking water regulations, as well as the latest treatment design standards for production of drinking water.

Prerequisite: CE 3400.

CE4410 - Design of Wastewater Treatment Facilities

Credits: 3

A theoretical and practical design course for treatment of municipal wastewaters. Major areas of emphasis include waste characterization and physical, chemical and biological unit processes.

Prerequisite: CE 3400.

CE4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CHE 4430 /ENR 4430.

Former Course Number [3420, 2420]

Prerequisite: CHEM 1020.

CE4441 - Solid Waste Engineering

Credits: 3

Municipal solid waste characteristics and quantities, collection, landfills, processing of municipal solid waste, materials separation, combustion and energy recovery, and biochemical processes with an emphasis on materials flow. Integrated solid waste management principles are also discussed.

Former Course Number [4440]

Prerequisite: CE 3400.

CE4510 - Pavement Design for Airports and Highways

Credits: 3

Designing flexible and rigid pavements for highways and airports. Topics include pavement materials and common uses, soil stabilization, quality control of materials, pavement design procedures.

Dual Listed CE 5510.

Former Course Number [5510]

Prerequisite: CE 3500 or CE 3600.

CE4530 - Traffic Engineering: Operations

Credits: 3

Basic characteristics of traffic, such as drivers, vehicles, volumes, speeds, delay, origins and destinations, intersection performance, capacity, termination and accidents; techniques for making traffic engineering investigations; traffic laws and ordinances, regulations, design and application of signal systems; curb parking control; enforcement and traffic administration; and public relations.

Dual Listed CE 5530.

Prerequisite: CE 3500.

CE4555 - Geometric Design of Highways

Credits: 3

Criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity design standards for different highway types; design of sight distance, alignment, grade; cross-section design; access control, frontage roads; intersection design elements, and design of intersections and interchanges.

Dual Listed CE 5555.

A&S College Core 2015 Students may not receive credit for both CE 4555 and CE 5555.

Former Course Number [4520]

Prerequisite: CE 3500.

CE4565 - Traffic Simulation

Credits: 3

Traffic modeling and simulation study development; definition, construction, calibration, validation of traffic simulation models; traffic flow dynamics in transportation networks; mathematical optimization of transportation networks; traffic simulation software.

Dual Listed CE 5565.

Prerequisite: CE 3500.

CE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CHE 4580/COSC 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

CE4610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 5610.

Prerequisite: CE 3600.

CE4620 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 5660.

Prerequisite: CE 3600.

CE4630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

Dual Listed CE 5630.

Prerequisite: CE 3600.

CE4650 - Instrumentation in Civil Engineering

Credits: 3

This lab based course will provide hands on learning to students to install instruments, collect data, analyze results, and use civil engineering judgment to make decisions.

Dual Listed CE 5650.

Prerequisite: ES 2410.

CE4695 - Undergraduate Research

Credits: 1-3

Max Credit (Max. 3)

Research activities on a relevant project of limited scope or as part of a laboratory project of greater scope under the advisement of a faculty member or mentor. The normal workload for 3 credits is considered to be 9 hours per week.

Students will present at Undergraduate Research Day.

Prerequisite: CE 1000/ARE 1000.

CE4800 - Hydrology

Credits: 3

Analysis of elements of the hydrologic cycle and design with emphasis on precipitation, evapotranspiration, infiltration, runoff and groundwater. Precipitation/Runoff relationships, routing methods, flood prediction, groundwater yield and drawdown in unconfined and confined aquifers, unsteady well behavior, and method of images are also introduced.

Prerequisite: CE 3300.

CE4810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 5810.

Prerequisite: ES 2330.

CE4840 - Groundwater Contamination

Credits: 3

Develop principles and fundamental parameters that control groundwater flow and solute transport in groundwater systems. Introduce basic geochemical processes and contaminant chemistry and site monitoring techniques relevant to groundwater problems.

Dual Listed CE 5840.

Prerequisite: CE 4810 or equivalent.

CE4870 - Water Resource Engineering

Credits: 3

Study in water resource planning and design and problem solving applying engineering principles and procedures. Western United States water problems are emphasized, including user completion, reallocation, consumptive use, water development, conservation, conveyance losses, and return flows.

Dual Listed CE 5870.

Prerequisite: CE 3300.

CE4900 - Comprehensive Design Experience

Credits: 3

Team comprehensive project design experience considering the sub-disciplines of civil engineering.

Prerequisite: ARE/CE 3110 and 3 of CE 3200, CE 3300, CE 3400, CE 3500, CE 3600, and two of CE 4250, CE 4260, CE 4610, CE 4555, CE 4510, CE 4400, CE 4410, or CE 4800, or instructor consent.

CE4920 - Senior Civil Engineering Problems

Credits: 1-3

Max Credit (Max. 6)

A study of current engineering problems that are applicable to civil engineering either on an individual basis or for small seminar type groups.

Prerequisite: senior standing or approval of department head.

CE4959 - Enrichment Studies

Credits: 1-4

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may NOT be included in an undergraduate or graduate program of study for a degree or for credit towards a certificate program.

Prerequisite: consent of instructor.

CE4965 - Undergraduate Research

Credits: 1-3

Max Credit 3

Research activities on a relevant project of limited scope or as part of a laboratory project of greater scope under the advisement of a faculty member or mentor. The normal workload for 3 credits is considered to be 9 hours per week. Students will present at Undergraduate Research Day.

Prerequisite: CE 1000 or ARE 1000, consent of the department head.

CE4970 - Wyoming DOT Design Squad Cooperative Experience

Credits: 3

Experience with Wyoming Department of Transportation design procedures and fundamentals. Participation in development of design documents used to construct actual projects.

Prerequisite: selection for Laramie Design Squad employment and consent of department head.

CE4975 - Civil and Architectural Engineering Internship

Credits: 1-3
Max Credit (Max. 3)

Students may apply for credit for extended work experience (>10 weeks; full-time) at a professional engineering or architectural firm, supervised by a licensed professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

Cross Listed ARE 4975.

When Offered Offered summer only.

Prerequisite: consent of department head.

CE5010 - Advanced Mechanics of Materials

Credits: 3

Elements of elasticity, unified approach to strength of structural members design and failure criteria; basic concepts of fracture mechanics; stress concentration factors; treatment of torsion, bending, axial and shear in structural members including plastic effects; bending of flat plates.

Prerequisite: ME 3010 or CE 3200, MATH 2310.

CE5040 - Introduction to Finite Element Analysis

Credits: 3

An introduction to the theory and application of finite elements to the solution of various problems with emphasis on structural mechanics. Includes development of the underlying matrix equations, the treatment of element generation and properties, and implementation of boundary conditions.

Cross Listed ME 5040.

Former Course Number [5020]

Prerequisite: MATH 2310 and (CE 4200 or ARE 4200 or ME 3010).

CE5045 - Advanced Finite Element Analysis

Credits: 3

Advanced topics in finite element analysis with emphasis on mathematical foundations of the method, numerical algorithms for software implementation, and analysis of problems with material and geometric nonlinear behavior.

Cross Listed ME 5045.

Prerequisite: ME 4040 or ME 5040 or CE 5040.

CE5200 - Advanced Structural Analysis

Credits: 3

Analysis of framed structures with stiffness-based matrix methods including plane trusses, frames, and grid systems and space trusses and frames. Column, beam, beam-column and frame stability. Geometric and material nonlinearities of framed structures. Plastic analysis and moment-curvature relationships. Computer applications are emphasized.

Prerequisite: CE 4200 or equivalent.

CE5220 - Structural Dynamics

Credits: 3

Introduction to general structural dynamics, general dynamic loading, generalized coordinated and nonlinear structural response, linear and nonlinear response spectra, multiple degree of freedom systems, continuous systems, and discretization of continuous systems. Introduction to seismic load specifications.

Prerequisite: CE 4200 or equivalent and MATH 2310.

CE5230 - Advanced Materials

Credits: 3

The objective of this course is to introduce the graduate student to the behavior of various materials found in typical structural engineering applications and to the mechanics of obtaining materials properties and structural response.

Prerequisite: CE 4260.

CE5240 - Structural Systems Design

Credits: 1-5

Max Credit (Max. 6)

A comprehensive design course for steel and reinforced concrete building structures. Topics include preliminary design, selection of framing systems, braced and unbraced frames, stability effects and nonlinear behavior. Students use case studies to develop design alternatives.

Prerequisite: CE 4200, CE 4250, CE 4260.

CE5255 - Advanced Steel Design

Credits: 3

A comprehensive design course for steel building structures. Topics include preliminary design, selection of framing systems, braced and unbraced frames, stability effects and nonlinear behavior. Includes building design project for seismic regions.

Prerequisite: grade of C or better in CE 4250 or ARE 4250.

CE5265 - Prestressed Concrete Design

Credits: 3

This is a classical course on designing prestressed and precast concrete systems. Principles and behavior of prestressed concrete build the foundation for topics that included flexure, shear, and axial load, construction and fabrication, and application. The course continues with fundamental concepts taught in ARE 4260/CE 4260.

Cross Listed ARE 5265.

Dual Listed CE 4265.

Prerequisite: ARE/CE 4260.

CE5270 - Highway Bridge Engineering

Credits: 3

A study of the analysis, design and rating of highway bridges, including consideration of dead and vehicular loads, analysis of typical systems, service, fatigue and ultimate strength behavior, rating of existing bridge design, and bridge operations. Composite and non-composite steel and concrete bridges are considered. Includes investigations that require field trips outside the schedule class times. Contemporary issues are routinely discussed.

Prerequisite: CE 4250 and CE 4260.

CE5280 - Behavior of Reinforced Concrete

Credits: 3

Broad-based coverage of the behavior of concrete, both at the member and structure level. The course will have no assigned text, although students will be expected to have an undergraduate concrete design textbook and a current ACI Code. Readings will include a number of technical papers in each area covered. Emphasis will be on the background of the code, code development, and investigative techniques.

Prerequisite: CE 4200 and CE 4260.

CE5285 - Masonry Design

Credits: 3

Design of structural components in reinforced masonry buildings, including walls, columns, beams and connections. Particular attention is paid to current codes, specifications and analysis.

Cross Listed ARE 5285.

Dual Listed ARE 4285 and CE 4285.

When Offered Offered on a three semester rotation.

CE5290 - Earthquake Engineering

Credits: 3

Second course in a series to design earthquake resistant structures. Topics include interpreting code requirements, calculating design forces on structures, evaluating inelastic behavior of structures, understanding how materials behave and advances in earthquake engineering.

Prerequisite: CE 5220.

CE5295 - Structural Timber Design

Credits: 3

Design of structural components and applications utilizing timber.

Cross Listed ARE 5295.

Dual Listed CE 4295.

Prerequisite: CE 3200 or equivalent.

CE5300 - Open-Channel Hydraulics

Credits: 3

Analysis and design of steady, uniform, gradually varied and spatially varied flow in open channels. Emphasis on basic fluid flow equations associated with natural and man-made open channels.

Prerequisite: CE 3300.

CE5321 - Engineering and Environment Geophysics

Credits: 3

Theoretical background for electrical, electromagnetic, georadar, and other near-surface geophysical measurements. Practical exercises focused on modeling, inversion, data analysis and experimental design. Discussion of applications to engineering and environmental problems. Basic knowledge of MATLAB programming language is helpful, but not required.

Cross Listed GEOL 5321.

Prerequisite: MATH 2250 or MATH 2200.

CE5400 - Water Treatment

Credits: 3

Advanced theory and practice of collection, purification, and distribution of potable water; special emphasis on purification techniques, and plant requirements and design.

Prerequisite: CE 4400.

CE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems.

Cross Listed CHE/ENVE 5410.

Prerequisite: consent of instructor.

CE5435 - Environmental Transport Processes

Credits: 3

Designed for graduate students and engineering seniors interested in the principles of mass transport and their application to environmental systems. Deals with the hydrodynamics of mixing and transport, as well as the interaction of mixing and various reaction rate processes. Applications include water and wastewater treatment, groundwater pollution, and transport and mixing in rivers, lakes and reservoirs.

Cross Listed ENVE 5435 and CHE 5435.

Prerequisite: MATH 2310 and ES 2330.

CE5445 - Environmental Remediation

Credits: 3

The contamination of soil, air, and groundwater by improper disposal of hazardous wastes is covered. Control and cleanup of contaminated groundwater plumes, treatment of polluted soils and soil gases is emphasized. Case studies are extensively used.

Cross Listed ENVE 5445 and CHE 5445

Prerequisite: CE 3400.

CE5450 - Advanced Physical-Chemical Treatment

Credits: 3

A study of physical and chemical processes for treatment of water and waste water.

Cross Listed ENVE 5450.

Prerequisite: CE 4400.

CE5510 - Pavement Design for Airports and Highways

Credits: 3

Designing flexible and rigid pavements for highways and airports. Topics include pavement materials and common uses, soil stabilization, quality control of materials and pavement design procedures.

Dual Listed CE 4510.

Prerequisite: CE 3500 or CE 3600.

CE5530 - Traffic Engineering: Operations

Credits: 3

Basic characteristics of traffic, such as drivers, vehicles, volumes, speeds, delay, origins and destinations, intersection performance, capacity, termination and accidents; techniques for making traffic engineering investigations; traffic laws and ordinances, regulations, design and application of signal systems; curb parking control; enforcement and traffic administration; and public relations.

Dual Listed CE 4530.
Former Course Number [5520]

Prerequisite: CE 3500.

CE5540 - Traffic Control

Credits: 3

Planning, designing, and operating transportation facilities to optimum efficiency using traffic control devices. Topics included are traffic flow theory; pavement markings, signing, and signal design; computer design of signal systems using linear and network models; traffic control in construction areas.

Prerequisite: CE 3500 and ES 2110.

CE5545 - Transport Network Analysis

Credits: 3

Traffic assignment and network modeling techniques; deterministic and stochastic user equilibrium assignment; mathematical programming formulations and solution algorithms; extensions to basic models; and applications to roadway pricing and other planning scenarios.

Prerequisite: graduate standing in civil engineering.

CE5555 - Geometric Design of Highways

Credits: 3

Criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity design standards for different highway types; design of sight distance, alignment, grade; cross-section design; access control, frontage roads; intersection design elements; and design of intersections and interchanges. CE 5555 students are required to do an additional integrated design term project using design software.

Dual Listed CE 4555.

A&S College Core 2015 Students may not receive credit for both CE 4555 and CE 5555.

Prerequisite: CE 3500.

CE5560 - Traffic Safety

Credits: 3

Safety design and operational practices for streets and highways including safety improvement programs, design of barrier systems, bicycle and pedestrian consideration; access control; safety evaluation; and measures of effectiveness.

Prerequisite: CE 3500 and STAT 4220.

CE5565 - Traffic Simulation

Credits: 3

Traffic modeling and simulation study development; definition, construction, calibration, validation of traffic simulation models; traffic flow dynamics in transportation networks; mathematical optimization of transportation networks; traffic simulation software.

Dual Listed CE 4565.

Prerequisite: graduate standing.

CE5570 - Transportation Planning

Credits: 3

Short and long-range transportation planning; land-use planning, travel behavior and transportation studies including demand forecasting; parking and transit studies; highway and street planning; and freight transportation and multi-model planning.

Prerequisite: CE 3500.

CE5575 - Intelligent Transportation Systems

Credits: 3

The use of Intelligent Transportation Systems (ITS) to improve the safety, efficiency, reliability, and/or security of transportation systems. Covers ITS applications, technologies, deployment issues, and system performance in both urban and rural environments.

Prerequisite: CE 3500.

CE5585 - Pavement Management Systems

Credits: 3

A study of the systems that a transportation agency may utilize to manage the pavement in their road network. History and purpose of pavement management are studied as well as how to make objective pavement management decisions. The distinction between project-level and network-level management concerns is explored and the implementation of a pavement management system is studied. Finally, methods for utilizing the information from the management system is studied.

Prerequisite: CE 3500.

CE5590 - Pavement Materials

Credits: 3

Selecting materials for highway construction, testing aggregates and bituminous materials, designing and testing asphalt mixtures; and recommending maintenance and rehabilitation strategies for deteriorated pavements.

Prerequisite: CE 3500.

CE5610 - Foundation Engineering

Credits: 3

Site characterization, laboratory shear tests and determination of soil properties. Analyses include bearing capacity, stress distribution and settlement. Design of shallow and control of deep foundations using static and dynamic methods.

Dual Listed CE 4610.

Prerequisite: CE 3600.

CE5630 - Ground Improvement, Reinforcement and Treatment

Credits: 3

This course is designed to help students understand a number of available geotechnical ground improvement, reinforcement and treatment techniques currently in use.

Dual Listed CE 4630.

Prerequisite: CE 3600.

CE5640 - Geotechnical Earthquake Engineering

Credits: 3

The purpose of this course is to familiarize students with the field of geotechnical earthquake engineering and soil dynamics. Lectures will focus on stress wave propagation in soil and rock; characterization of earthquakes and ground motions; influence of soil conditions on seismic ground motion characteristics; and liquefaction of soils.

Prerequisite: CE 3600 or graduate standing.

CE5650 - Instrumentation in Civil Engineering

Credits: 3

This lab based course will provide hands on learning to students to install instruments, collect data, analyze results, and use civil engineering judgment to make decisions.

Dual Listed CE 4650.

Prerequisite: ES 2410.

CE5660 - Soil and Rock Slope Engineering

Credits: 3

Advanced engineering and geologic classification of landslides; detailed field investigations; solid and rock strength properties for stability analysis; advanced analytical and numerical methods for analysis of slope stability; design of engineered stabilization systems.

Dual Listed CE 4620.

Prerequisite: graduate standing.

CE5700 - Civil Engineering Problems I

Credits: 1-3
Max Credit (Max. 6)

A special course, designed to make possible the study and investigation of problems or phases of civil engineering selected to fit the needs of the students.

Prerequisite: consent of instructor.

CE5710 - Civil Engineering Seminar I

Credits: 1-3
Max Credit (Max. 6)

A seminar type class furnishing motivation for advanced study of current problems in broad field of civil engineering by means of library research, study of current literature, and carefully guided class discussion.

Prerequisite: consent of instructor.

CE5720 - Civil Engineering Problems II

Credits: 1-3
Max Credit (Max. 6)

A special course designed to make possible the study and investigation of problems or phases of civil engineering selected to fit the needs of the student.

Prerequisite: consent of instructor.

CE5730 - Civil Engineering Seminar II

Credits: 1-3
Max Credit (Max. 6)

A seminar-type class furnishing motivation for advanced study of current problems in the broad field of engineering by means of library research, study of current literature, and carefully guided class discussions.

Prerequisite: consent of instructor.

CE5785 - HT Person Seminar

Credits: 3
Special topics in engineering as presented by the H.T. Person distinguished professor.

Prerequisite: graduate standing.

CE5810 - Groundwater Hydrology

Credits: 3

Principles and basic equations associated with saturated and unsaturated flow in soils describing groundwater and drainage flow. Laws governing the movement, recharge, and production of underground water with special emphasis on techniques and modeling methods for development of groundwater resources.

Dual Listed CE 4810.

Prerequisite: CE 4800.

CE5820 - Design of Small Earth Dams

Credits: 3

Develop understanding, analysis, design and construction techniques for all components considered in small earth dam design. Integration of hydrology, hydraulics and soil mechanics into a sound dam design. Dam design will be emphasized from foundation through embankment.

Prerequisite: CE 3300, CE 3600 and CE 4800 or concurrent enrollment.

CE5830 - Flow in Porous Media

Credits: 3

Examines fluid (liquid, gas, vapor) and heat flow in porous media and its effects specifically in soil. Near surface effects (impibation, infiltration and evaporation) is emphasized. Analytic and numerical solution techniques will be developed.

Prerequisite: CE 5810 or consent of instructor.

CE5840 - Groundwater Contamination

Credits: 3

Develop principles and fundamental parameters that control groundwater flow and solute transport in groundwater systems. Introduce basic geochemical processes and contaminant chemistry and site monitoring techniques relevant to groundwater problems.

Dual Listed CE 4840.

Prerequisite: CE 5810 or equivalent.

CE5850 - Advanced Subsurface Hydrology

Credits: 3

This course introduces recent advances in dealing with uncertainty issues in subsurface hydrology. Covered topics include reviewing basic statistics required for the course and subsurface flow and transport, uncertainty analysis using Monte Carlo simulations, sensitivity analysis in flow and contaminant transport, heterogeneity of hydrological processes in subsurface, and Bayesian updating.

Prerequisite: CE 5810 or CE 4800.

CE5865 - Deterministic Hydrology

Credits: 3

Philosophy of modeling, hydrologic model formulation and design; lumped, semi-distributed, and physics-based hydrologic models for watershed- and landscape-scale predictions; process-level mathematical and numerical descriptions and coupling; model calibration, testing, and validation; parameterization, numerical approximations of flow equations; scale effects, modeling ethics.

Prerequisite: CE 4800.

CE5870 - Water Resource Engineering

Credits: 3

Study in water resource planning and design and problem solving applying engineering principles and procedures. Western United States water problems are emphasized, including user completion, reallocation, consumptive use, water development, conservation, conveyance losses, and return flows.

Dual Listed CE 4870.

CE5875 - Probabilistic Hydrology

Credits: 3

Introduction to the language, methods and tools in systems analysis in stochastic hydrologic modeling; parameter estimation; sensitivity analysis; optimization schemes; uncertainty analysis; probabilistic forecasting; state-space modeling with Kalman filtering, and data assimilation.

Prerequisite: CE 4800.

CE5880 - Advanced Hydrology

Credits: 3

Advanced hydrologic analysis for the Mountain States, principles of hydrological system, and numerical models.

Prerequisite: MATH 2310.

CE5885 - Hydrometeorology

Credits: 3

Global radiation budget, global hydrologic cycle, precipitation formation, occurrence and remote sensing, snow melt, evapotranspiration, interception, infiltration and runoff generation mechanisms, overland flow, land surface modeling, stream routing.

Prerequisite: CE 3300.

CE5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CE5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

CE5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

CE5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrolled in a graduate degree program.

CE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

Classics

CLAS2020 - Classical Greek Civilization

Credits: 3

Examines some of the most important developments of ancient Greek culture. Includes development of government in the city-states, with particular attention to Athenian democracy; tragedies of Aeschylus, Sophocles and Euripides; comedies of Aristophanes; crisis of values of the Peloponnesian War; and philosophy of Plato.

USP 2003-2014 Code U3C, U3WB

USP 2015 Code U5H

Prerequisite: WA or COM1.

CLAS2040 - Classical Roman Civilization

Credits: 3

Examines some of the most interesting political, legal, artistic, literary, and engineering developments of the Republic and Principate (510 BC-AD 212) These include representational government, citizens' rights, sanctioned violence, Rome's infrastructure, and major literary works of oratory, comedy, history, epic, and philosophy.

USP 2003-2014 Code U3CH, U3WB

Prerequisite: WA or COM1.

CLAS3050 - Athenian Democracy

Credits: 3

Examines democratic government in ancient Athens: its origins and development, its practical workings, how politics were conducted and power was gained and exercised, citizen participation, law courts, and evaluations of democracy in the ancient world and since.

Cross Listed HIST 3050/POLS 3050.

Prerequisite: WB or COM2.

CLAS3160 - "What Killed Socrates?"

Credits: 3

This course will reexamine Socrates' trial in 399 BCE, widely regarded as a miscarriage of justice, in its total historic context, seeking to understand the reasons for Socrates' conviction. In the process, it will impart a broad understanding of the cultural, philosophical, political, and legal life of classical Athens.

Cross Listed HIST 3160/PHIL 3160.

Prerequisite: WB or COM2.

CLAS4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed ENGL 4230/THEA 4230.

Prerequisite: WB or COM2.

CLAS4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed ENGL 4270.

Prerequisite: WB or COM2.

CLAS4975 - Independent Study

Credits: 1-4

Max Credit (max. 12)

Specialized study in aspects of Greek or Roman civilization of interest to the student, with topic and plan of work to be worked out by the student and the instructor together.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of instructor.

CLAS4990 - Topics in Classical Civilization

Credits: 1-4

Max Credit (max. 12)

Study in depth of special areas in ancient civilization that are not covered in regularly offered courses.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: 6 hours of Classics courses or consent of the instructor.

Communication and Journalism

COJO3000 - History of American Journalism

Credits: 3

Presents history and development of American journalism from colonial times to present, emphasizing 20th century.

Prerequisite: COMM 1000.

COJO3010 - Business and Professional Communication

Credits: 3

Studies theories and techniques of professional communication activities including interviewing skills, group processes, and professional presentations; for students who are beyond elementary oral communication level. Students develop oral communication skills through projects and presentations.

USP 2015 Code U5C3

Prerequisite: COJO 1010 or COMM 2010 and junior standing.

COJO3040 - Advanced Communication Theory

Credits: 3

Considers nature of human communication theories. Analyzes problems in developing communication theory based on current social science methods.

Prerequisite: COMM 1000 and COMM 1040.

COJO3070 - Communication Research

Credits: 3

Focuses on problems in communication and mass communication research. Specifically studies and applies language of science, basic concepts of communication, mass communication research, types and limitations of empirical research, as well as measurement procedures and analysis.

Prerequisite: COMM 1000 or COMM 1040 and STAT 2050 or STAT 2070.

COJO3100 - Public Affairs Reporting

Credits: 3

Practices in public affairs reporting, emphasizing local and state political organization as foundation for such reporting. Specialized reporting fields. News analysis.

Prerequisite: COMM 2100.

COJO3160 - Theory of Language and Society

Credits: 3

Considers contributions to communication theory from linguistics, sociolinguistics, sociology, social psychology and anthropology to understanding a spoken language.

USP 2003-2014 Code U3WC

Prerequisite: COMM 1040 and 6 additional hours in the department.

COJO3190 - Cross-Cultural Communication

Credits: 3

Studies human communication processes within the context of various cultures and subcultures. Opportunity for field

study of the effect of culture on communication behavior.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: COMM 1040 and junior standing.

COJO3195 - Cultural Encounters in China

Credits: 3

This course is designed to study the relationship between cultures and communication through a 3-week stay in China. We will explore how cultures and communication interact, interrelate, and influence each other as well as investigating how and why cross-cultural communication is filled with both challenges and opportunities through our daily interactions with Chinese people.

USP 2003-2014 Code [(none)< >H]

Prerequisite: COMM 1040.

COJO3200 - Graphics of Communication

Credits: 3

Combines editing and design. Studies evaluation, selection and editing of magazine and newspaper news copy. Practice in publication design, including headline writing, printing methods, page layout and other display techniques.

USP 2003-2014 Code U3CA

Prerequisite: COMM 1000.

COJO3300 - Advertising in the Media

Credits: 3

Studies fundamentals of copywriting in mediated communication. Provides information about the psychology of advertising, advertising appeals, strategy, and structure of ads and other marketing materials. Includes exercises in basic principles of copywriting for print, electronic and digital media.

Prerequisite: COMM 2100.

COJO3310 - Public Relations

Credits: 3

Studies how organizations can improve their relationships with their publics. Explores public opinion and how to research audiences. Explains different skills needed in the field, including its relationship to advertising and marketing.

Prerequisite: COMM 2100.

COJO3480 - Internship

Credits: 1-12

Review and evaluation of approved internship experience. At the conclusion, students must submit a journal containing work samples and a critique of their performance and internship experience. Maximum of 6 hours of internship credit can be used to fulfill requirements of the major.

Prerequisite: signed contract and 9 hours in the department.

COJO3500 - Test Course July

Credits: 3

Max Credit 3

Test Course COJO

When Offered Fall

USP 2015 Code COM1

A&S College Core 2015 D

Former Course Number None

Prerequisite: COM1

COJO3520 - Communication Technology and Society

Credits: 3

Studies role of communication technology in functioning of society. Examines history of effects on personal growth, self-concept, world view, creative thinking, personal relationships and social processes.

Prerequisite: COMM 1000 or COMM 1040.

COJO3530 - Multimedia Production

Credits: 3

Intensive introduction to reporting, writing, producing, editing, and managing content for the web. Integration of writing, photography, social media, audio, video, and blogging for both journalism and strategic communication (e. g. , public relations, marketing). Focus on grammar, AP style, deadlines, accuracy, news judgment, ethics, and appreciation of our diverse society.

Prerequisite: COMM 2100.

COJO3550 - Political Communication

Credits: 3

Examines the intersection of politics and communication. For example, may cover politics and media, interpersonal political discussion, organizational and governmental political communication, political campaigns, politics and technology, etc. Moreover, it may cover the effects of political communication on individuals' opinions and behavior.

Cross Listed POLS 3550.

Prerequisite: COMM 1000, COMM 1040, or POLS 1000.

COJO3900 - Family Communication

Credits: 3

This course will assist students in a study of the concept of family from a communication perspective. The goals of the course include:

Prerequisite: COMM 1040.

COJO4020 - Mass Media and Society

Credits: 3

Studies ethical and related problems of mass communication from contemporary and historical viewpoints. Critical analysis of the performance of the mass media.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4030 - Advanced Interpersonal Communication

Credits: 3

Studies research and theory in interpersonal relationships; formation and maintenance of friendships; marriages; and group relationships.

Prerequisite: COMM 1040 and 6 hours in the department.

COJO4040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 5040.

Prerequisite: 9 hours of COJO coursework.

COJO4050 - Communication and Conflict

Credits: 3

Studies research and theory concerning communication in conflict development and management. Examines forms of conflict, including occurrences in interpersonal, group, organizational and cultural contexts.

Prerequisite: COMM 1000 or COMM 1040 and 6 hours in the department.

COJO4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 4061

Dual Listed COJO 5061

USP 2015 Code U5C3

Prerequisite: COMM 1040 and junior standing.

COJO4100 - Investigative Reporting

Credits: 3

Practices developing and writing articles of depth and substance in areas of public concern. Emphasizes careful research, weighing conflicting viewpoints, interpreting complex issues and critical evaluation.

USP 2003-2014 Code U3WC

Prerequisite: COMM 2100.

COJO4110 - Feature Writing Seminar

Credits: 3

This course critically examines how to produce content for a magazine and how to write feature stories. Among the topics covered are how to develop a good idea, analyze a target audience, gather information using interviews and research, write a feature article, edit your writing, and market a feature story.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: COMM 2100.

COJO4120 - News Editing

Credits: 3

Students develop skills in editing copy for newspapers and magazines. Focus is on copy editing for grammar, syntax, style, clarity, spelling, word usage, fairness and balance, conciseness, and accuracy. Students also learn to write effective headlines and cutlines, do effective design and layout of tabloid and broadcast pages, and create effective information graphics and photo features.

Prerequisite: COMM 2100.

COJO4140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the area of nonverbal communication. Students are required to complete an independent study of some aspect of nonverbal communication relevant to interests.

Dual Listed COJO 5140.

Prerequisite: junior standing.

COJO4160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed AAST 4160.

Dual Listed COJO 5160.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 9 credit hours in AAST or COJO.

COJO4200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 5200.

Prerequisite: 9 hours of COJO coursework.

COJO4210 - Special Topics in Communication

Credits: 1-3

Intensive study of such special problems and topics in human communication processes as gender relations, power dynamics, family and political communication. Content varies.

Dual Listed COJO 5210.

Prerequisite: COMM 1040 and 9 hours in the department.

COJO4230 - Special Topics in Mass Media

Credits: 1-3

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations, and the Internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic, and theoretical perspectives.

Dual Listed COJO 5230.

Former Course Number [4910]

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed AAST 4233 and GWST 4233.

Dual Listed COJO 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO4250 - Advanced Organizational Communication

Credits: 3

Studies communication processes in political, educational, industrial, medical and nonprofit organizations. Emphasizes in-depth analysis of theories and methods of organizational research and practice.

COJO4260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. It attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 4260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

USP 2015 Code U5C3

A&S College Core 2015 ASD

Former Course Number [4985]

Prerequisite: Minimum of 9 credit hours in AAST or COJO and junior standing.

COJO4270 - Documentaries

Credits: 3

Max Credit 3

This film theory/film studies class explores the history of documentaries, the unique aspects that define and differentiate documentaries from other genres, various techniques used in documentary films, and other related topics. We will view, analyze, and discuss several documentaries throughout the semester.

Cross Listed COJO 5270

COJO4310 - Public Relations Techniques

Credits: 3

Practical application of public relations writing, planning and program implementation. Includes exercises in writing news releases, structuring news conferences and writing preliminary and formal public relations strategies. The plans also incorporate advertising and marketing segments for external publics, newsletter design, editing and interpersonal relations.

Prerequisite: COJO 3310.

COJO4400 - Photojournalism

Credits: 3

Studies and intensively practices reporting news and features photographically, plus essentials of advertising photography. Includes advanced camera and darkroom techniques and photo editing. Two one-hour lectures and one two-hour laboratory weekly.

Prerequisite: COMM 2400.

COJO4500 - Mass Communication Law

Credits: 3

Studies development of First Amendment law. Includes practical application of law to mass media practice; relationship of legal and social responsibilities of the mass media; and problems of law and regulation, such as constitutional, statutory and administrative.

Prerequisite: COM2 with a grade of C or better.

COJO4530 - Web Design

Credits: 3

Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 5530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO4600 - Mass Media Ethics

Credits: 3

Studies ethical theory, emphasizing how it can be applied to problem solving in the media. Examines major ethical perspectives and requires application to actual case studies.

Dual Listed COJO 5600.

Prerequisite: 6 hours at 3000-level in the department.

COJO4620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 5620.

Prerequisite: COMM 1000 or COJO 1400.

COJO4640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 5640.

Prerequisite: COMM 1000 or COMM 1040.

COJO4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed ENR 4700.

Dual Listed COJO 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

COJO4990 - Independent Study in Communication

Credits: 1-3

Prerequisite: 15 hours in the department and consent of department chair.

COJO5010 - Texts of Mass Media

Credits: 3

Intensive critical examination of the history, theory, social responsibility and empirical research in the production and consumption of mediated messages.

Prerequisite: graduate standing.

COJO5030 - Seminar in Interpersonal Communication

Credits: 3

Intensive examination of contemporary theoretical perspectives and empirical research on interpersonal communication, including the role of communication in self-concept formation, social relationship development, and the structure and function of ordinary discourse in human interaction.

Dual Listed COJO 4030.

Prerequisite: graduate standing.

COJO5040 - Digital Video Production

Credits: 3

This course teaches technical skills and creative principles involved in shooting and editing single camera video. Topics include video technology, design, lighting, audio, continuity, and editing. Students will gain experience planning, shooting, and editing video projects through hands-on exercises and assignments.

Dual Listed COJO 4040.

Prerequisite: graduate standing.

COJO5061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music and film.

Cross Listed ENGL 5061.

Dual Listed COJO 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

COJO5070 - Quantitative Research Methods

Credits: 3

Design, implementation, and examination of research questions in communication with quantitative, social scientific methodologies. Attention primarily on survey design, experimental design, and quantitative content analysis. Analysis of quantitative data with statistical programs. Theories and ethical issues with quantitative research. Design and implement a quantitative study start to finish.

Prerequisite: graduate standing.

COJO5080 - Qualitative Research Methods

Credits: 3

Students study principles and issues associated with qualitative methods used in communication and media research. The class explores methods that use interpersonal communication and observation as tools for data collection and explores methods that analyze media content from a critical and qualitative perspective.

Prerequisite: graduate standing.

COJO5140 - Nonverbal Communication Studies

Credits: 3

Critical analysis of current studies in the areas of nonverbal communication. Students are required to complete an independent study of some aspects of nonverbal communication relevant to interests.

Dual Listed COJO 4140.

Prerequisite: COMM 1040 or COMM 1000.

COJO5160 - African American Rhetoric

Credits: 3

African American discourse and its relationship to equality and participation. Through examination of various media, music, speeches, and art this course uses the struggle of African Americans as an instructive exemplar, to come to terms with the philosophical concepts, political issues, moral complexities, and discursive characteristics of African American Rhetoric.

Cross Listed AAST 5160.

Dual Listed COJO 4160.

Prerequisite: 9 credit hours in AAST or COJO.

COJO5200 - Visual Communication

Credits: 3

The purpose of this course is to combine visual communication theory and application in order to enhance visual literacy and practical skills. Content includes analyzing visual messages, developing and producing visual messages, and understanding how audiences process and are affected by visual messages.

Dual Listed COJO 4200.

Prerequisite: graduate standing.

COJO5210 - Special Topics in Communication

Credits: 1-3

Max Credit (Max. 6)

Intensive examination of current theoretical issues in communication. Course content varies. Graduate students are expected to follow a rigorous reading schedule and submit a major paper or research project.

Dual Listed COJO 4210.

Prerequisite: graduate standing.

COJO5230 - Special Topics in Mass Media

Credits: 1-3
Max Credit (Max. 6)

Intensive study of problems and topics specific to the mass media, including print, broadcast, advertising, public relations and the internet. Course content varies and may include historical, legal, ethical, political, sociocultural, economic and theoretical perspectives. Graduate students are expected to follow a rigorous reading schedule and submit a major paper or research project.

Dual Listed May dual list with COJO 4230.
Prerequisite: graduate standing.

COJO5233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with AAST 5233 and GWST 5233; dual-listed with COJO 4233.

USP 2003-2014 Code U3D, U3WC

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

COJO5250 - Seminar in Organizational Communication

Credits: 3

Intensive examination of the historical and contemporary theoretical approaches and empirical research in organizational dynamics. Attention primarily focuses on how the institutionalized collective affects and is affected by other social systems.

Dual Listed COJO 4250.
Prerequisite: graduate standing.

COJO5260 - Rhetoric and Social Justice

Credits: 3

Analyzes concepts of ableism, anti-Semitism, heterosexism, racism, sexism, and socioeconomic class through a critical/social construction framework. Attempts to develop a "working" definition of these concepts by analyzing historical and current conceptualizations and identifying marginalization and disenfranchisement as it is woven in the fabric of American society.

Cross Listed AAST 5260.

Dual Listed COJO 4260.

USP 2003-2014 Code U3D

Former Course Number [5985]

Prerequisite: graduate standing.

COJO5270 - Documentaries

Credits: 3
Max Credit 3

This film theory/film studies class explores the history of documentaries, the unique aspects that define and differentiate documentaries from other genres, various techniques used in documentary films, and other related topics. We will view, analyze, and discuss several documentaries throughout the semester.

Cross Listed COJO 4270

COJO5310 - Seminar in Mass Communications

Credits: 3
The study of contemporary, historical, critical and behavioral theories of mass communication processes. Attention primarily on the social functions performed by mediated messages.

Prerequisite: graduate standing.

COJO5530 - Web Design

Credits: 3
Addresses the theory and logistics of web design and online interactivity. Students will create and maintain a professional portfolio website that showcases their communication and design talents. It is applicable to journalism, public relations, advertising, marketing, photography, and any other media-related career path that uses new media.

Dual Listed COJO 4530.

Prerequisite: COMM 1000 and 9 hours in the department.

COJO5540 - Seminar in Communication Theory

Credits: 3
An intensive examination of various metatheoretical assumptions and theoretical models used in the study of communicative dynamics.

Prerequisite: graduate standing.

COJO5600 - Mass Media Ethics

Credits: 3
The study of ethical theory with special emphasis on how that theory can be applied to problem solving in the media. Examines major ethical perspectives and requires the application of those perspectives to actual case studies. Graduate students are expected to follow a rigorous project.

Dual Listed COJO 4600.

Prerequisite: graduate standing.

COJO5620 - Intergroup Communication

Credits: 3

The course will provide an overview of theory and research on intergroup relations to demonstrate how communication both affects and reflects our social group memberships. The objective is to provide students with the theoretical foundation to view various contexts of communication through an "intergroup lens. "

Dual Listed COJO 4620.

Prerequisite: graduate standing.

COJO5640 - Communication Apprehension/ Competence

Credits: 3

This course examines theoretical explanations, research findings, and interventions. Students are required to develop research projects aimed at helping people cope with communication fear or anxiety in various contexts.

Dual Listed COJO 4640.

Prerequisite: graduate standing.

COJO5700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed ENR 5700.

Dual Listed COJO 4700.

Prerequisite: graduate standing.

COJO5800 - Foundations of Communication and Journalism

Credits: 3

Examines current issues and trends in the various areas of communication and journalism that are represented within the department. Students analyze the historical roots of these issues and trends as a way of understanding the present context and future evolution of communication and journalism scholarship.

Prerequisite: first year of graduate study and acceptance into the COJO graduate program.

COJO5890 - Problems: Communication

Credits: 1-4

Max Credit (Max. 6)

Prerequisite: 18 hours at the 5000 level in the department.

COJO5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

COJO5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COJO5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COJO5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: Designed to provide an enrichment experience in a variety of topics.

COJO5960 - Thesis Research

Credits: 1-12
Max Credit (Max 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

COJO5961 - Graduate Projects

Credits: 1-4
Max Credit (Max. 4)

Limited to those students enrolled in a Plan B graduate program. Students should be involved in non-course scholarly activities in support of their Plan B project.

Prerequisite: enrollment in Plan B program and departmental approval.

COJO5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Introduction to the practice and principles of construction management as it relates to both vertical and horizontal construction projects. . Construction Materials and Methods.

COMM1000 - Intro to Mass Media

Credits: 3
An overview of mass media, newspapers, magazines, books, radio, television and films. Studies mass media's historical development, emphasizing understanding techniques of expression and impact on American culture. Surveys content of mass media; considers contemporary problems and trends.

USP 2003-2014 Code U3CS
USP 2015 Code U5H
Former Course Number COJO 1000

COMM1030 - Interpersonal Communication

Credits: 3
Focuses on interpersonal communication settings or face-to-face interaction. Basic unit of study is, therefore, the dyad. Also includes some work in small group settings.

USP 2015 Code U5H
Former Course Number COJO 1030

COMM1040 - Intro to Communication Theory

Credits: 3
Introduces theories and research of social and behavioral scientists on communication process. Orients beginning communication students by focusing on concepts and issues central to human communication.

USP 2003-2014 Code U3CS
USP 2015 Code U5H
Former Course Number COJO 1040

COMM1101 - First-Year Seminar

Credits: 3
USP 2003-2014 Code [(none)< >FYS]
Former Course Number COJO 1101

COMM2010 - Public Speaking

Credits: 3
Beginning public speaking course. Students will develop foundational oral, digital and written communication skills.

Emphasizes message construction, performance and critique in public communication settings. Includes speech preparation, listening, audience analysis, writing strategies, digital communication, critical thinking, language/nonverbal behavior and various speaking formats. (Offered fall, spring and summer).

USP 2003-2014 Code U3O

USP 2015 Code U5C2

Former Course Number COJO 2010

Corequisite: Prerequisite: Successful completion of a COM1 course.

COMM2095 - Persuasive Argumentation

Credits: 3

Develops student competencies in persuasive argument in its written, oral, and digital dimensions. Students participate in a series of debate exercises that draw upon digital research, written speech and message composition, and extemporaneous oral speaking. The ethics of persuasion and critical research literacy in a digital environment are also featured.

USP 2015 Code U5C2

Former Course Number COJO 2090, COJO 2095

Prerequisite: Successful completion of a COM1 course.

COMM2099 - Special Topics in Debate

Credits: 1-3

Max Credit (Max. 12)

Explores the argumentative and rhetorical facets of the annual intercollegiate policy debate topic. Participation on the University's debate team is required for enrollment.

Former Course Number COJO 2060, COJO 2099

Prerequisite: Instructor permission required.

COMM2100 - Media Writing

Credits: 3

This course focuses on an introduction to basic news writing, reporting, editing, interviewing, PR and advertising. Strong writing, deadlines, accuracy, news judgment, ethical practices and sensitivity of our pluralistic society are expected. This course provides skills necessary for various media careers including media writing, PR, marketing and magazine writing.

USP 2003-2014 Code U3WB

Former Course Number COJO 2100

Prerequisite: Prerequisite: WA or COM1

COMM2400 - Introduction to Photography

Credits: 3

Basic course in still photography. Includes classroom demonstrations in techniques of camera use, composition, computer software, and use of photographs, especially for communication and journalism applications.

USP 2003-2014 Code U3CA

Former Course Number COJO 2400

Computer Science

COSC1010 - Introduction to Computer Science I

Credits: 3

Introduction to Programming that emphasizes good software design principles and fundamental programming skills. It aims to provide students with an understanding of the role computation can play in solving problems.

COSC1015 - Introduction to Programming for Data Science

Credits: 3

Provides an accelerated introduction to computing in the setting of Data Science. Topics include basic programming techniques; data transformation; computing with vectors, matrices, and data frames; data visualization; and text processing.

USP 2015 Code U5Q

A&S College Core 2015 Credit may not be earned for both COSC 1010 and COSC 1015. Priority given to Engineering Honors students.

Prerequisite: grade of C or better in MATH 1400 or Level 4 or higher on the Math Placement Exam within one year prior to the start of the course.

COSC1030 - Computer Science I

Credits: 4

Continues the introduction to the methodology of programming from an object-oriented perspective. The course emphasizes basic software design, expands the students' knowledge of programming language syntax, expands the students' ability to think and design in an object-oriented paradigm. Introduces the students to UML, pseudocode, and simple planning for the design of software. Also introduces the students to templates and the C STL.

Prerequisite: COSC 1010.

COSC1100 - Computer Science Principles and Practice

Credits: 3

Introduces use of computers for algorithmic problem solving. Studies scope, major contributions, tools and current status of computer science. Presentation of computer science principles; use of software packages and evaluation of their effectiveness; and elementary programming.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: C or better in MATH 1400 or in any University Studies QB or Level 4 or higher on Mathematics Placement Exam.

COSC1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

COSC1200 - Computer Information Systems

Credits: 3

Introduces computers and information processing, computer systems and hardware, computer software, information processing systems, information systems and information resource management. Uses word processing, data base language and electronic spreadsheet program in hands-on exercises.

Prerequisite: passing of Mathematics Placement Examination at Level 2 or equivalent.

COSC2000 - Undergraduate Topics: Computer Science

Credits: 1-3

Elementary topics current in computer science.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

COSC2030 - Computer Science II

Credits: 4

Builds on the introduction to object-oriented programming begun in COSC 1010 and COSC 1030 with an emphasis on algorithms, data structures, and software engineering.

Prerequisite: COSC 1030.

COSC2150 - Computer Organization

Credits: 3

Introduces students to the organization and architecture of computer systems, beginning with the standard von Neumann model and then moving forward to more recent architectural concepts.

Cross Listed EE 2150

Prerequisite: COSC 1030.

COSC2300 - Discrete Structures

Credits: 3

Introduces the mathematical concepts that serve as foundations of computer science: logic, set theory, relations and functions, graphs (directed and undirected), inductively defined structures (lists and trees), and applications of mathematical induction. Provides an introduction to abstract and rigorous thinking in advanced mathematics and computer science.

Cross Listed MATH 2300.

Prerequisite: COSC 1030, MATH 2200 or MATH 2350.

COSC3011 - Introduction to Software Design

Credits: 3

Introduces the principles and practice of software design, including UML and design patterns. Uses case studies to illustrate design in action.

Prerequisite: COSC 2030.

COSC3015 - Functional Programming

Credits: 3

Studies programming in the context of a functional language that emphasizes algorithmic strategies over syntactic detail.

Prerequisite: COSC 2030 and COSC 2300.

COSC3020 - Algorithms and Data Structures

Credits: 4

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to parallelism and the analysis of parallel programs.

Prerequisite: COSC 2300 , COSC 2030

COSC3050 - Ethics for the Computer Professional

Credits: 1

The proliferation of computers has had a profound effect on our society. Computing professionals must be aware of the social and ethical implications of our activities. Examines the codes of behavior related to computer science through readings, discussions and case studies.

Prerequisite: junior standing and COSC major.

COSC3100 - Computer Science Education Seminar

Credits: 2

Provides an overview of the current social and research issues, technical trends and challenges facing computer science educators.

Prerequisite: COSC 1030 and Education major only.

COSC3340 - Introduction to Scientific Computing

Credits: 3

Introduces basic numerical methods to solve scientific and engineering problems. Topics include: code structure and algorithms, basic numerical methods for linear systems, eigenvalue problems, interpolation and data fitting, nonlinear systems, numerical differentiation and integration.

Cross Listed MATH 3340.

Prerequisite: grade of C or better in MATH 2210.

COSC3750 - Linux Programming for System Applications

Credits: 3

Provide the necessary tools and skills to begin programming effectively on UNIX and Linux operating systems. Topics will include, shells and basic shell scripting, Linux utilities, editors, compilation, I/O and the file system, sockets and interprocess communication, and time permitting, threads.

Prerequisite: COSC 2150 and COSC 2030.

COSC3765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

COSC3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/EE 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

COSC3900 - Upper Division Topics in Computer Science

Credits: 1-3

Max Credit (Max. 9)

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of topics of interest within industry.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: consent of instructor.

COSC3970 - Internship in Computing

Credits: 1-3

Max Credit (Max. 3)

Allows students to gain practical experience in computing. A signed contract with a supervisor and departmental adviser must be completed before enrolling for the internship.

Prerequisite: COSC 3020.

COSC4000 - Topics in Computer Science for Educators

Credits: 1-6

Current computer science topics appropriate for K-12 teachers.

When Offered (Offered based on sufficient demand and resources)

A&S College Core 2015 Credit may not be applied to major requirements in computer science or management information systems.

Prerequisite: graduate standing.

COSC4010 - Special Topics in Computer Science

Credits: 1-3

Individual or small group pursuit of interdisciplinary problems in the use of computers or study of advanced topics.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: COSC 3020 concurrently and consent of instructor.

COSC4014 - Blockchain Design and Programming

Credits: 3

Blockchain provides proof of accuracy and immutability of data, and this is the basis for Bitcoin and many other applications. Covers both usage of blockchain and how it is implemented. Focus will be on the application of blockchain to financial systems and how blockchain provides and insures security and data validity.

Prerequisite: COSC 3020

COSC4100 - Foundations of Computing

Credits: 3

Introduces several theoretical areas which are the basis of computer science. Languages and automata, computability, complexity, analysis of algorithms, logic, and the specification and correctness of programs.

Prerequisite: COSC 3020.

COSC4200 - Computability and Complexity

Credits: 3

Introduction to theoretical study of computability and efficient computation. Finite-state and pushdown automata; turing machines and the Church-Turing thesis; undecidability, computational complexity; NP-completeness.

Prerequisite: COSC 3020.

COSC4210 - Web Application Development

Credits: 3

The course covers the basics of developing data driven web applications. Topics include using responsive design for user interfaces, architectural patterns and frameworks, object-relational mapping, language-integrated queries, authentication, authorization, unit testing, using source control for code management, publishing web applications and cloud computing.

Prerequisite: COSC 3011.

COSC4220 - Design and Implementation in Emerging Environments

Credits: 3

Students who have completed the analysis and design course extend their knowledge by implementing an information system in an emerging systems environment. Teams use project management principles to implement the system.

Prerequisite: COSC 4210.

COSC4340 - Numerical Methods for Ordinary and Partial Differential Equations

Credits: 3

Further develops the skills needed for computational problem solving and numerical analysis. Topics addressed include: one-step and linear multistep methods for solving initial value problems; truncation errors, stability analysis,

and convergence of the numerical methods; finite difference approximation for elliptic equations and initial boundary value problems; iterative methods for sparse linear systems. Students typically complete a final project in this course.

Cross Listed MATH 4340.

Prerequisite: grade of C or better in MATH 2310 and MATH 3340.

COSC4420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed MATH 4420/PHIL 4420.

Dual Listed COSC 5420.

Prerequisite: PHIL 3420 or equivalent.

COSC4450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the World Wide Web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 5450.

Prerequisite: COSC 3020 and MATH 2250.

COSC4550 - Introduction to Artificial Intelligence

Credits: 3

A computational study of intelligent behavior. Focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 5550.

Prerequisite: COSC 3020.

COSC4552 - Advanced Topics in AI

Credits: 3

Advanced topics in AI are presented and discussed via research paper review.

Dual Listed Dual list with COSC 5014

Prerequisite: COSC 3020

COSC4555 - Machine Learning

Credits: 3

Goal is to program machines to learn and improve their performance on their own, based on experience and/or data. First half covers machine learning techniques; second half covers applications.

Dual Listed COSC 5555.

Prerequisite: COSC 3020.

COSC4560 - Modern Robots and Softbots

Credits: 3

Popular agent designs: logic-based, biomimetic, and physicomimetic. Foundational issues on internal robot and softbot knowledge representations. Planning and control, followed by issues of how agents can reason and plan under real-world conditions of environmental uncertainty. Concludes with discussions about papers on modern robot and softbot applications, as well as invited lectures by graduate students and faculty.

Dual Listed COSC 5560.

COSC4570 - Data Mining

Credits: 3

Examine methods that have emerged from artificial intelligence and statistics and proven to be of value in recognizing patterns and making predictions with large data sets. Will include both theory and practice while developing several projects.

Prerequisite: COSC 4550.

COSC4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department. Must be in the Engineering Honors Program.

Cross Listed ATSC 4580/BE 4580/CE 4580/CHE 4580/ES 4580/ESE 4580/PETE 4580.

Prerequisite: junior or senior standing.

COSC4730 - Mobile Application Programming

Credits: 3

Introduces development of applications on mobile devices. Presents the principles, techniques, and tools for developing mobile applications. Differences between desktop applications and mobile applications are discussed.

Dual Listed COSC 5730.

Prerequisite: six hours of upper division COSC coursework.

COSC4735 - Advanced Mobile Programming

Credits: 3

Continues the development of applications on mobile devices. The focus is device sensors, such as camera, AR, VR, Bluetooth, embedded and connected devices.

Dual Listed COSC 5735.

Prerequisite: COSC 4730.

COSC4740 - Operating Systems Design

Credits: 4

Studies systems programming languages and computer systems design. Includes interacting processes, main storage management, procedure and data sharing, scheduling, deadlock problems and file management in batch processing and multi-programming systems. Operating system implementation.

Prerequisite: COSC 2150 and COSC 3020.

COSC4750 - Systems Programming and Management

Credits: 3

Comparatively studies features found in commercial and experimental operating systems. Discusses issues in system-level programming and administration, including shell programming, file management, resource control, configuration and security. Advanced topics include multiprocessor and real-time operating systems.

Prerequisite: COSC 2030.

COSC4760 - Computer Networks

Credits: 3

Examines network protocols using a top-down approach based on the Internet model. Course focuses on the application, transport, network and link layers. Also covers wireless communication. Discusses problems and current solutions regarding the efficient use of network resources in the global, multi-media Internet.

Prerequisite: COSC 2150 and COSC 2030.

COSC4765 - Computer Security

Credits: 3

Security is paramount to creating software and systems. This course introduces the fundamentals of computer security and applied cryptography. Topics include vulnerability analysis, common exploits and defense, network/wireless security, reverse engineering, and applied cryptography.

Prerequisite: COSC 2030

COSC4780 - Principles of Programming Languages

Credits: 3

Introduces the methods of analysis and design of programming languages. Covers syntax, typing schemes and the semantics (denotational and operational) in the context of functional and imperative programming languages. Students build interpreters to explore the implications of the different constructs on computational behavior.

Prerequisite: COSC 3015.

COSC4785 - Compiler Construction

Credits: 3

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation from a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 5785.

Prerequisite: COSC 2150 and COSC 3020.

COSC4820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 2030.

COSC4840 - Software Engineering

Credits: 3

Extends the ideas of software design and development from the introductory programming sequence to encompass the problems encountered in large-scale programs. Topics include software engineering techniques from the technical and managerial perspectives, with a strong emphasis on software design.

Prerequisite: COSC 3020 and COSC 3011.

COSC4950 - Senior Design I

Credits: 1

Students choose a senior design project, investigate alternate solutions and submit a preliminary project design. Periodic oral and written project progress reports are required.

Prerequisite: COSC 3011 and COSC 3020.

COSC4955 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in COSC 4950. Successful communication of the details of the solution through written documents and oral presentations will be required.

Prerequisite: COSC 4950.

COSC5000 - Seminar in Computer Science

Credits: 1-3

Max Credit (Max. 10)

One or more current research areas in computer science are investigated.

Prerequisite: consent of instructor.

COSC5010 - Graduate Topics in Computer Science

Credits: 1-6

Max Credit (Max. 12)

Individual or small group pursuit of computer science research areas.

Prerequisite: graduate standing and consent of instructor.

COSC5014 - Blockchain Design and Programming

Credits: 3

Blockchain provides proof of accuracy and immutability of data, and this is the basis for Bitcoin and many other applications. Covers both usage of blockchain and how it is implemented. Focus will be on the application of blockchain to financial systems and how blockchain provides and insures security and data validity.

Dual Listed Dual list with COSC 4014

Prerequisite: COSC 3020

COSC5050 - Research Writing in Computer Science

Credits: 3

Instruction in methods for performing and reporting research in the field of computer science. The primary task is preparation of a research paper; to that end, the class covers how to collect and analyze previously published work, generate and develop a research topic, and present research results in acceptable written form.

Prerequisite: graduate standing, consent of instructor.

COSC5110 - Analysis Of Algorithms

Credits: 3

Analysis of algorithms to determine their time and space requirements. Beginning with data structures such as lists, stacks, trees, and sets and their implementations. The class then analyzes specific algorithms for internal sorting, hashing, and string search. Offered fall semester of even numbered years.

Prerequisite: COSC 3020 or equivalent and consent of the department.

COSC5120 - Theory Of Computation

Credits: 3

Models of computation, the Church-Turing thesis, computable functions, decidable and enumerable sets, unsolvable problems, correctness of programs, and complexity of computation. The theory of computation provides precise answers to the fundamental questions of computer science: Which problems can be solved by machine computation and which can be solved using a reasonable amount of computer resources.

Prerequisite: COSC 4100.

COSC5200 - Computational Complexity

Credits: 3

Study of efficient computation and computational intractability. Time and space complexity; P, NP, and the polynomial-time hierarchy; reductions and completeness; randomized complexity; non-uniform complexity; approximation algorithms and inapproximability.

Prerequisite: COSC 4100 or COSC 4200.

COSC5220 - Languages and Automata

Credits: 3

The study of regular, context-free, and context-sensitive languages and their relations to finite-state, pushdown and linear-bounded automata. Context-free language recognition. The halting problem and decidability results.

Prerequisite: COSC 4100.

COSC5310 - Computational Methods in Applied Sciences I

Credits: 3

First semester of a three-semester computational methods series. Review of iterative solutions of linear and nonlinear systems of equations, polynomial interpolation/approximation, numerical integration and differentiation, and basic ideas of Monte Carlo methods. Comparison of numerical techniques for programming time and space requirements, as well as convergence and stability.

Cross Listed MATH 5310.

Prerequisite: MATH 3310, COSC 1010.

COSC5345 - Computational Methods in Applied Sciences III

Credits: 3

Third semester of a three-semester computational methods series with emphasis on numerical solution of problems displaying sharp fronts and interfaces (nonlinear conservation laws, Hamilton-Jacobi equations).

Cross Listed MATH 5345.

Prerequisite: MATH 5340/COSC 5340.

COSC5420 - Advanced Logic

Credits: 3

Studies advanced topics in mathematical logic. Takes up such topics as: uninterpreted calculi and the distinctive contributions of syntax and semantics; metatheory, including completeness and consistency proofs; modal logic and semantics; logic as a philosophical tool.

Cross Listed COSC/MATH 5420.

Dual Listed COSC 4420.

Prerequisite: PHIL 3420 or equivalent; graduate standing.

COSC5450 - Computer Graphics

Credits: 3

Introduction to computer graphics, an increasingly important area of computer science. Computer graphics, together with multimedia and the world-wide web, offers exciting new possibilities for the design of human-computer interfaces. Presents the principles, techniques, and tools that enable these advances.

Dual Listed COSC 4450.

Prerequisite: COSC 3020, MATH 2250.

COSC5540 - Computer Vision

Credits: 3

Provides students with an understanding of applying computer methodologies to process two-dimensional and three-dimensional images. Primary areas of investigation are image preprocessing, knowledge representation, pattern recognition and motion understanding.

Prerequisite: COSC 3020, MATH 2205, MATH 2250.

COSC5550 - Introduction to Artificial Intelligence

Credits: 3

A computational study of intelligent behavior. The focus is on intelligent agents, which could be software agents or robots. Covers how agents sense, reason, and act within their environment. Includes problem-solving, search, knowledge representation, planning, game playing, learning, and neural and belief networks.

Dual Listed COSC 4550.

Prerequisite: COSC 3020.

COSC5552 - Advanced Topics in AI

Advanced topics in AI are presented and discussed via research paper review.

Dual Listed Dual list with COSC 4014

Prerequisite: COSC 3020

COSC5555 - Machine Learning

Credits: 3

To program machines to learn and improve their performance on their own, based on experience and/ or data. The first part covers machine learning techniques. The second part covers applications.

Dual Listed COSC 4555.

Prerequisite: COSC 3020.

COSC5560 - Modern Robots and Softbots

Credits: 3

Begins with a presentation of popular agent designs: logic-based, biomimetic, and physicomimetc. Presents foundational issues on internal robot and softbot knowledge representations. Planning and control are then covered, followed by issues of how agents can reason and plan under real-world conditions of environmental uncertainty. Concludes with discussions about papers on modern robot and softbot applications, as well as invited lectures by graduate students and faculty in the UW COSC and ECE departments.

Dual Listed COSC 4560.

COSC5730 - Mobile Application Programming

Credits: 3

Introduces development of applications on mobile devices. Presents the principles, techniques, and tools for developing mobile applications. Differences between desktop applications and mobile applications are discussed.

Dual Listed COSC 4730.

Prerequisite: COSC 3020.

COSC5735 - Advanced Mobile Programming

Credits: 3

Continues the development of applications on mobile devices. The focus is device sensors, such as camera, AR, VR, Bluetooth, embedded and connected devices.

Dual Listed COSC 4735.

Prerequisite: COSC 4730.

COSC5750 - Distributed Computing Systems

Credits: 3

Provides an in-depth study of distributed computing systems, including both architecture and software issues. Topics include concepts of distributed computing, communication primitives, distributed operating systems, distributed file management, and distributed programming languages. Particular attention is paid to modeling and analysis of distributed systems and algorithms. Programming projects and research papers are assigned.

Prerequisite: COSC 5740.

COSC5785 - Compiler Construction I

Credits: 3

Theory and implementation of interpreters and compilers. Compiler topics include lexical analysis, top-down and bottom-up parsing methods, symbol tables, and code generation for a block-structured language with recursion and parameters. Project uses compiler writing tools.

Dual Listed COSC 4785.

Prerequisite: COSC 2150 and COSC 3020.

COSC5790 - Compiler Construction II

Credits: 3

Advanced topics concerning the front end of a programming language compiler, the description and implementation of features found in the back end of a compiler, and the run time environment. Topics include data type checking, global data flow analysis, flow graph reduction, local and global code optimization, and code generation. Reports on recent research papers.

Prerequisite: COSC 4785 or COSC 5785.

COSC5820 - Database Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database design, in-depth coverage of data models and database languages. Students acquire practical skills of conceptual/logical database design and general familiarity with the problems and issues of database management.

Prerequisite: COSC 3020.

COSC5825 - Advance Data Systems

Credits: 3

Provides comprehensive coverage of the problems involved in database system design and an in-depth examination of contemporary structures and techniques used in modern database management systems and database applications.

Prerequisite: COSC 4820.

COSC5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

COSC5940 - Continuing Registration: Off Campus

Credits: 1-16
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

COSC5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 3)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

COSC5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

COSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

COSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Construction Management

CM2000 - Introduction to Construction Management

Credits: 3

Introduction to the practice and principles of construction management as it relates to both vertical and horizontal construction projects.

CM2120 - Construction Materials and Methods

Credits: 3

Introduction to building materials and construction practices used in the construction industry to construct both vertical and horizontal construction projects.

Prerequisite: COM1.

CM2300 - Construction Safety

Credits: 3

Introduce students to the various causes of construction accidents and adopted strategies to prevent worksite injuries and illnesses with an emphasis on OSHA standards.

Prerequisite: CM 2000.

CM2400 - MEP Systems

Credits: 3

Introduction to mechanical, electrical and plumbing systems in site infrastructure and vertical construction projects.

Prerequisite: C in PHYS 1110.

CM2600 - Construction Documents

Credits: 3

Introduction to the creation and interpretation of construction documents used in the construction industry to build today's vertical and horizontal construction projects.

Prerequisite: CM 2000.

CM3100 - Construction Scheduling

Credits: 3

Principles of construction scheduling including analytical and quantitative scheduling and management techniques as they apply to both vertical and horizontal construction projects.

Prerequisite: CM 3210

CM3140 - Built Environment Markets

Credits: 3

This course provides students with a broad exposure to the landscape of real estate markets, from single-family housing to large-scale commercial property markets as viewed from a real estate financial perspective.

Prerequisite: CM 2000 and CM 2120.

CM3160 - Construction Law & Contracts

Credits: 3

The course covers different contract methods, or arrangements, used by the Construction industry to contract and procure construction work. The course also introduces students to construction law in support of planning and the execution of construction work.

Prerequisite: CM 2600.

CM3180 - Evolving Technologies in CM

Credits: 3

The course introduces students to Leadership in Energy and Environmental Design (LEED), Building Information Modeling (BIM) and evolving technologies in construction.

Prerequisite/Corequisite: Grade of C in CM 2000

CM3200 - Statics & Structural Systems

Credits: 4

The course introduces students to the basic principles of statics and structural analysis and design. It provides students with a concise presentation of structural technology, from the determination of structural loads, sizing and design as it relates to timber, steel and concrete structures.

Prerequisite: PHYS 1110 and MATH 2200 with grades of C or better.

CM3210 - Construction Estimating

Credits: 3

The course introduces students to concepts in estimating including but not limited to labor and equipment calculations, the use of price databases, direct and indirect cost, bid preparation and computer applications.

Prerequisite: C in CM 2600.

CM3220 - Soils and Concrete

Credits: 3

This course will introduce students with the construction process that includes, site clearing, soil mechanics, testing, concrete foundations, concrete mix design, concrete construction practice, and concrete testing.

Prerequisite: GEOL 1110 with a grade of C or better and concurrent enrollment in CM 3200.

CM3230 - Construction Economics

Credits: 3

This course introduces students to construction economics in residential and commercial planning, developing, constructing, and managing projects.

Prerequisite: CM 2000 and CM 2120.

CM4100 - Project Management

Credits: 3

This course guides students through fundamental Project Management concepts and behavioral skills needed to success-fully launch and lead construction projects in the construction sector.

Prerequisite: CM 3100.

CM4140 - Heavy CM Methods

Credits: 3

The course provides student an overall understanding of construction equipment and selected construction methods used on large scale construction projects. With specific reference to selection, economy, and productivity of common construction equipment and construction procedures for site development and industrial, heavy and civil construction.

Prerequisite: CM 2120 and CM 3200.

CM4600 - Building Info. Modeling

Credits: 3

This course focuses on the skills and information needed to effectively use an existing Building Information Model (BIM) in plan execution for a building construction project. This is a projectbased course where students develop skills on the implementation of BIM concepts throughout the lifecycle of a building, from planning and design, to construction operations.

Prerequisite: CM 2600.

CM4900 - Capstone Project

Credits: 3

This course requires students to participate in a "real" construction situation involving all aspects of managing a project; from initial planning to completion, including budgets, estimating, scheduling, financing and creating contracts

and other construction forms as necessary. Case studies will be utilized to develop critical thinking skills.

Prerequisite: CM 4100.

CM4970 - Construction Management Internship

Credits: 3

Students may apply for credit for extended work experience (>10 weeks; full-time) in the construction industry, supervised by a professional. Students should apply through their adviser prior to the work experience. Enrollment is by departmental approval only.

When Offered Offered summer only.

Counseling

CNSL1000 - Relationship Skills: Counseling in Action

Credits: 3

Content-based course that focuses on the critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry; introducing students to the role of counseling in diverse settings. Themes discussed include classroom human relations skills, counseling in a diverse society, legal and ethical issues in human relations fields, and various specialties in the practice of counseling.

USP 2003-2014 Code U3I, U3L

CNSL1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

CNSL2200 - Introduction to Student Leadership

Credits: 2

Acquaints student leaders with skills and competencies necessary for successful service in the university community.

When Offered (Normally offered each fall semester)

USP 2003-2014 Code U3CS, U3L

CNSL2300 - Counseling Skills for the Helping Professions

Credits: 3

Presents instruction and practice in basic counseling and communication skills. Emphasizes listening, responding, encouraging and initiating change in interpersonal communication through mediation and conflict resolution.

Prerequisite: sophomore standing; permission of Coordinator of Counselor Education program.

CNSL2800 - Undergraduate Seminar in:

Credits: 1-3
Max Credit (Max. 9)

Reserved for academic course work related to student interest in classes associated with examining the discipline of counseling from many varied perspectives.

Prerequisite: Declared major in the social sciences, human services, or education.

CNSL3010 - Student Leadership Strategies

Credits: 2
Develops skills and competencies requisite to effective leadership. Provides student leaders with skills they will profit from, both while enrolled at the university and later in their chosen careers.

When Offered (Normally offered each spring semester)

CNSL4520 - Fundamentals of Counseling (B)

Credits: 3
Students learn some of the skills of counseling and develop an understanding of elementary principles of counseling theory, as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 5520.

When Offered (Offered on campus and online all semesters)

Prerequisite: junior standing; 6 hours of education or psychology and graduate standing to receive graduate credit.

CNSL4620 - Organization and Administration in Student Affairs

Credits: 3
An introduction to college student affairs practice, specifically exploring issues related to the organization and administration of student personnel services. Explores the history, the philosophy, and the skills utilized in student personnel services within the context of various higher education institutions and settings.

Prerequisite: department consent.

CNSL5020 - Workshop

Credits: 1-4
Max Credit (Max. 99)

Usually offered only during summer sessions, this course provides an opportunity for special consideration on particular areas of counseling or pupil personnel services.

Prerequisite: graduate standing, nine hours of education or behavioral science.

CNSL5030 - Short Course

Credits: 1-2
Max Credit (Max. 12)

Provides opportunities for intensive study of some specific topic or set of topics in personnel work, to meet the special needs of a group of students with common interests. No more than six hours may be applied to any one degree program.

Prerequisite: graduate standing and 6 hours in education and/or behavioral sciences.

CNSL5040 - Relationship Skills

Credits: 3
Designed to help students and administrators develop their human relation skills to improve interpersonal effectiveness and communication as related to generic life skills.

Prerequisite: 12 hours of education and/or psychology.

CNSL5060 - Counseling Ethics and Professional Issues

Credits: 3
Designed to provide students with a philosophical base for making ethical decisions in the professional situations they encounter. In addition, it involves a chance to discuss many specific ethical and professional issues that are commonly encountered in the profession.

Prerequisite: program admission or consent of instructor.

CNSL5110 - Group Procedures

Credits: 3
Designed as an introduction to group work used in various organizational settings. Basic group techniques and procedures are covered using lecture/ discussion methods, video, observation, and participation in practicing group leadership skills. Participation in a group experience during the course is required.

Prerequisite: CNSL 4520/CNSL 5520, six semester hours of education and/or psychology, consent of instructor, and graduate standing.

CNSL5120 - School Counseling

Credits: 3
Provides specialized training for individuals preparing to be school counselors at levels K-12.

Prerequisite: graduate standing.

CNSL5125 - School Counseling II

Credits: 3

Explores the leadership role of the professional school counselor within the P-12 school setting and focuses on skills and experiences related to equity, advocacy, and social justice for systemic change, as well as program development, implementation and evaluation.

Prerequisite: Graduate standing, program admission and CNSL 5120.

CNSL5130 - Mental Health Counseling

Credits: 3

Encompasses specific counseling and professional development issues encountered by licensed counselors working in mental health agencies or private practice. Understanding the nature of the clientele and the issues, strategies for resolving client difficulties, collaborative practice, ethics, advocacy, knowledge and skills related to diversity and social justice are considered.

Prerequisite: enrollment in Counselor Education program, successful completion or enrollment in CNSL 5060, CNSL 5650 and CNSL 5310.

CNSL5140 - Counseling & Addictions

Credits: 3

Focuses on students acquiring specialized knowledge of assessment and multi-disciplinary treatment of chemical and other addictions.

Prerequisite: six hours in administration of justice, psychology, sociology, or social work at the 4000 or 5000 level.

CNSL5150 - Mental Health Counseling II

Credits: 3

Explores the leadership role of the professional counselor within a variety of mental health settings. Areas of application include program development, best practices, management, evaluation, consultation, social justice and supporting client advocacy.

Prerequisite: graduate standing, program admission and CNSL 5130.

CNSL5170 - Counseling and Career Across the Lifespan

Credits: 3

Offers an overview of human lifespan functioning with a primary focus on psychosocial development and counseling and career development across the lifespan. Additionally, this course presents the opportunity to examine the role of career and its influences on personal development.

CNSL5175 - Human Growth and Development

Credits: 3

Provides an understanding of the nature and needs of individuals at all developmental levels, across the entire lifespan, and in diverse multicultural contexts through addressing theories of individual and family development, transitions

across the life span, theories of learning, personality development, and neurobiological behavior.

Prerequisite: Instructor permission and bachelors degree.

CNSL5180 - Assessment in CNSL

Credits: 3

Emphasis is on counselor development for facilitating client self-understanding through the application of various assessment procedures and knowledge about educational information systems and tools.

Prerequisite: graduate standing, 15 hours in education and/or behavioral sciences.

CNSL5200 - Couple and Family Theory

Credits: 3

Provides students with a foundation in conceptualizing and working with couple and family systems. Areas to be addressed include the history of couple and family counseling, ethical issues, professional orientation and an introduction to major systems theories. Participants are expected to explore their own family of origin.

Prerequisite: admission to program.

CNSL5210 - Group Experience

Credits: 1

Designed to provide a structured growth group experience through both in-class experience and reading. It is designed for students involved in human relationship fields. In-class groups are led by advanced group counseling students under the supervision of the faculty instructor.

Prerequisite: graduate standing and consent of instructor.

CNSL5310 - Pre-Practicum

Credits: 3

The first semester of a one-year sequence focused on learning, developing and practicing the fundamental process of counseling. Students do role-playing and have supervised experience with clients in a laboratory setting. Individual supervision is provided. Individual, live and observation of supervision is extensive.

Prerequisite: graduate standing, program approval.

CNSL5320 - Practicum

Credits: 3

Second course in a two semester sequence which includes class work, supervised counseling with clients in laboratory, extensive individual, group, live and observational supervision.

Prerequisite: graduate standing, CNSL 5310, program approval.

CNSL5330 - Counseling Children and Adolescents

Credits: 3

Students increase knowledge and skills in the processes of counseling children and adolescents.

Prerequisite: six hours in education and/or behavioral sciences.

CNSL5340 - Play Therapy

Credits: 3

Provides students with an overview of the field of play therapy. The historical roots of play therapy and the importance of play in child development will be explored. Various play therapy theories and techniques for assessment and intervention and professional issues will be surveyed.

Prerequisite: graduate standing or consent of instructor.

CNSL5341 - Play Therapy Theories & Skills

Credits: 3

This course is designed to provide students with an introduction to child-centered play therapy along with an overview of the field of play therapy, play therapy theories, and play therapy practice.

Prerequisite: Acceptance to the Online Play Therapy Certificate Program or consent of the instructor.

CNSL5342 - Expressive Arts & Play Therapy

Credits: 1

This course will provide a history and rationale for the use of expressive arts in counseling as well as experiential exercises to foster student's professional growth. Professional issues (ethics/credentials) pertinent to the play therapist will also be examined.

Prerequisite: CNSL 5341 or consent of the instructor.

CNSL5343 - Filial and Family Play Therapy

Credits: 3

Students will develop an understanding of the theoretical concepts of the filial play therapy. Students will gain the necessary skills to organize, implement, structure and facilitate filial therapy and family play therapy sessions. Conducting a filial group is essential to this course, current professional liability insurance is required.

Prerequisite: CNSL 5341, CNSL 5342 or consent of the instructor.

CNSL5350 - Multicultural Counseling

Credits: 3

Increases counselor competency and skills with diverse clients.

Prerequisite: admission to the UW counseling program.

CNSL5510 - Trends and Issues

Credits: 1-4

Max Credit (Max. 4)

This course is used from time to time as a systematic means for students to explore a developing trend or issue related to personnel services. Students make in-depth studies of one or more issues, trends, practices, and applications, under the supervision of one or more instructors.

Prerequisite: graduate standing, and 15 hours in education and/or behavioral sciences.

CNSL5520 - Fundamentals of Counseling

Credits: 3

Beginning course in the basis and process of counseling. Exposes students to some of the skills of counseling and enables them to develop an understanding of the elementary principles of counseling theory as well as a better understanding of themselves in relation to other people.

Dual Listed CNSL 4520.

Prerequisite: 6 hours of education or psychology and graduate standing.

CNSL5580 - Supervised Internship

Credits: 1-6

Max Credit (Max. 16)

Provides a capstone clinical experience, preparing graduates to enter the practice of counseling PK-12 schools, mental health settings, and student affairs services in higher education. Students engage in professional counseling activities at approved placement sites.

Prerequisite: graduate standing, CNSL 5310, CNSL 5320 and consent of the designated field setting authority.

CNSL5610 - Advanced Practice in Group and Family Counseling

Credits: 3

Designed to provide a theoretical framework for understanding group dynamics and family systems, as well as offer intervention guidelines, best practices, and supervised experience in group leadership and family counseling.

Prerequisite: program admission and consent of instructor.

CNSL5630 - Trauma-Informed Counseling

Credits: 3

This capstone course helps prepare students to understand and work with clients around trauma issues in mental health and school settings. Previous learning will be reviewed and synthesized with knowledge about trauma-informed care across the lifespan, including psychological first aid. Research-based best practices, counselor wellness, and effective service delivery are emphasized.

Prerequisite: graduate standing.

CNSL5640 - Diagnosis, Psychopathology, and Psychopharmacology

Credits: 3

Introduction to the etiology, prevention, and treatment of mental and emotional disorders. Includes a focus on the skills of biopsychosocial case conceptualization and treatment planning, and multi-axial differential diagnosis using the current edition of the Diagnostic and Statistical Manual. Also addresses basic classifications, indications and contraindications of common pharmacological interventions.

Prerequisite: program consent.

CNSL5650 - Counseling Theories

Credits: 2-3

Max Credit (Max. 3)

Designed to increase understanding of major counseling theories, with an emphasis on the integration of theoretical and philosophical assumptions with personal viewpoints.

Prerequisite: previous or concurrent enrollment in CNSL 4520/CNSL 5520 or equivalent, admission to counseling program, consent of instructor.

CNSL5860 - Doctoral Practicum in Counselor Education

Credits: 1-8

Max Credit (Max. 8)

Enrollment is limited to five graduate students per instructor. In this practicum, advanced graduate students are given an intensive supervised experience in counseling students over an extended period of time. The actual counseling experience is supplemented by input and evaluation seminars for all enrollees and by supervisory conferences designed to improve sensitivity and skill in counseling.

Prerequisite: admission to the doctorate program in counseling, mastery of basic interviewing and counseling skills, and consent of instructor.

CNSL5865 - Supervision Theory

Credits: 3

Provides students with the theoretical, knowledge and research base of clinical supervision as it relates to the counseling profession.

Prerequisite: CNSL 5860.

CNSL5870 - Seminar

Credits: 1-6
Max Credit (Max. 12)

Advanced students work together intensively on current issues and problems and participate in systematic, critical interpersonal evaluation. Seminars are organized with various patterns of emphasis and provide for a variety of small group experiences related to curricular areas within the department.

Prerequisite: consent of instructor and graduate standing.

CNSL5871 - Doctoral Seminar I: Professional Identity and Ethics

Credits: 3
The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar I focuses on counselor education identity development and professional ethics for future counselor educators.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5872 - Doctoral Seminar II: Diversity and Social Change

Credits: 3
The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar II focuses on the role of diversity and social change in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5873 - Doctoral Seminar III: Research, Assessment & Scholarship

Credits: 3
The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar III focuses on the role of research, assessment and scholarship in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD student.

CNSL5874 - Doctoral Seminar IV: Leadership, Consultation and Advocacy

Credits: 3
The doctoral seminar course sequence provides a structure for collegial discussion and collaboration among counselor education doctoral students and faculty. Doctoral Seminar IV focuses on the role of leadership, consultation and advocacy in counselor education.

Prerequisite: Admission as a Counselor Education & Supervision PhD Student.

CNSL5875 - Doctoral Practicum in Supervision

Credits: 1-6
Max Credit (Max. 6)

Designed to provide the prospective counseling educator or supervisor with an understanding of the learning process in counseling and the supervisory behaviors requisite for improving the competencies and professional growth of counselors. Specialized knowledge, skills, and attitudes related to the act of supervising are supplemented by various methods and techniques such as videotape, films, film-tape synchronization, simulation material, role-playing, group dynamics, communication games, interpersonal recall, interaction and content analysis, and micro-counseling.

Prerequisite: CNSL 5860, graduate standing, and consent of instructor.

CNSL5880 - Special Problems

Credits: 1-9
Max Credit (Max. 9)

Provides a broad perspective through selected reading material. Wherever possible the student collects and uses original information from a practical work situation. All work is done independently under the direction of a faculty member. A minimum of three conferences are held as necessary to assure successful completion of the project.

Prerequisite: consent of instructor and program, and graduate standing.

CNSL5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

Creative Writing

CW1040 - Intellectual Community: Introduction to Creative Writing

Credits: 3
Focus on critical learning skills as they relate to creative writing. Read from a variety of genres, attend literary events on campus, acquire research skills, and produce creative writing. Will produce portfolios of creative work in these areas, along with a self-reflective essay applying the critical skills learned throughout the semester.

CW1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

CW2050 - Introduction to Fiction

Credits: 3
Max Credit (Max. 6)

Analyzes forms of fiction and the practice of creative writing at an introductory level.

Prerequisite: WA/COM1.

CW2060 - Introduction to Nonfiction

Credits: 3
Max Credit (Max. 6)

The new nonfiction course will be described according to the emphasis the individual professor chooses to impart. In general, the course will teach students to research, organize, and express themselves in a nonfiction genre, such as essay, memoir, article, biography, autobiography, etc.

Prerequisite: WA/COM1.

CW2070 - Creative Autobiographical Writing

Credits: 3
Students read and explore autobiographical writing in various forms, potentially including: brief bio for publicity and job application purposes, memoir, personal essay, confession and fictional monologue. What you can reveal about yourself, when and how and for whom.

Prerequisite: completion of WA/COM1.

CW2080 - Introduction to Poetry

Credits: 3
Max Credit (Max. 6)

Analyzes forms of poetry and practice of creative writing at introductory level.

Prerequisite: WA/COM1.

CW2125 - Special Topics in Writing

Credits: 3
Max Credit 6

Analyze and write in a variety of popular fiction and non-fiction genres. Study publishers' descriptions and read

examples and critical analysis of the genres. Finally, produce a rhetorical description and an original text work in one chosen genre.

USP 2003-2014 Code U3WB

CW2200 - Creativity in the 21st Century

Credits: 3

Max Credit 3

What does it mean to be creative today? Writers and artists increasingly publish/exhibit online; interaction with editors, publishers, agents and gallery owners/museum curators is performed in a variety ways ; writing itself has moved from pen and paper to computer, as has the visual art process; and the audience for the written and visual arts is as much online as it is in print, or perhaps in person. This course will examine how these changes have affected writing and visual art in the 21st century, for those who produce as well those who consume/experience it.

USP 2003-2014 Code U5C2

Prerequisite: COM1

CW3125 - Studies in _____

Credits: 3

Max Credit 6

This upper level Seminar, developing skills and abilities established in the University's COM 2 courses, is dedicated to the intensive study of traditions and current modes of making. Students are expected to read intensively and respond critically and creatively as writers.

Prerequisite: COM2

CW4050 - Writer's Workshop

Credits: 3

Max Credit (Max. 6 at undergraduate, Max. 12 for graduate)

Students submit manuscripts in the short story, poetry, drama, etc. Includes class and conference criticism and consultation. Considers different types of creative writing in various semesters, as announced in class schedule.

Prerequisite: 3 hours of a 2000-level creative writing class in the appropriate genre and consent of instructor.

CW5540 - Seminar in Creative Writing

Credits: 1-4

Seminar in creative Writing. 1-4. Includes form and theory classes, publications workshops, and readings courses. Depending on the particulars, students review important texts about writing, review literary magazines, and publishing houses, discuss publishing procedures with faculty and guests, participate in close readings of original texts, and/ or produce an independent writing project.

Restricted Include: Graduate students, undergraduate students with faculty approval. Exclude: Undergraduate students with No Faculty Approval

Prerequisite: Graduate standing.

CW5550 - Independent Study in Creative Writing

Credits: 1-3
Max Credit (Max. 6)

Guided independent writing of poetry or imaginative prose at an advanced level. Limited enrollment.

A&S College Core 2015 No more than 9 hours of ENGL 4050 and ENGL 5550 combined may be counted toward the M.A. in English.

Prerequisite: consent of instructor and graduate status or 6 hours of ENGL 4050.

CW5560 - Graduate Writing Workshop

Credits: 1-4
Max Credit (Max. 28)

Graduate level workshop that emphasizes reading as well as writing in a specific genre (poetry, nonfiction, fiction) or in relation to a theme that combines genres, at the discretion of the instructor.

Prerequisite: 12 hours of 4000-level creative writing or graduate status or consent of instructor.

CW5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students who coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

CW5990 - M.F.A. Internship

Credits: 1-12
Max Credit (Max. 24)

Internship.

Prerequisite: Enrollment in a graduate degree program.

Criminal Justice

CRMJ1001 - Introduction to Criminal Justice

Credits: 3

Introduces the American criminal justice system. Examines nature of crime and describes historical and philosophical foundations of law enforcement agencies, criminal courts and correctional institutions. Discusses major issues facing the criminal justice system.

Former Course Number [2120]

CRMJ2210 - Criminal Law

Credits: 3

Introduces the fundamental principles of substantive criminal law: the history and philosophy of modern criminal law, the basic dimension of criminality, the elements of major crimes, criminal defenses and the nature of criminal sanctions.

Prerequisite: CRMJ 1001 and POLS 1000.

CRMJ2400 - Criminology

Credits: 3

Generally introduces the nature of crime, statistics on crime, types of criminal behavior and explanations of crime.

Cross Listed SOC 2400.

Prerequisite: SOC 1000.

CRMJ2685 - Research Methods

Credits: 3

Max Credit 3

Introduces students to fundamental issues associated with the application of scientific methods to criminal justice problems. Students examine research designs involving ethnographic, archival, historical, and quantitative methods and how they relate to criminal justice issues.

Cross Listed SOC 2685

Former Course Number [3680]**Restricted** Criminal Justice or Sociology majors and minors

Prerequisite: CRMJ 1001 OR SOC 1000

CRMJ3110 - Criminal Courts and Processes

Credits: 3

Examines the structure, organization and operation of criminal courts and their role in the larger criminal justice

system; the process of adjudication of criminal cases from initial charging through post-conviction review; the constitutional rights of the accused; and the roles of the major courtroom participants.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ3250 - Juvenile Delinquency

Credits: 3

Considers the nature of delinquency, including an analysis of treatment methods and the juvenile justice system.

Cross Listed SOC 3250.

Prerequisite: CRMJ 2400/SOC 2400.

CRMJ3350 - Correctional Theory and Practice

Credits: 3

Examines the various components of the correctional complex from both theoretical and practical frameworks.

Students are exposed to the abundance of research that informs current correctional practice and will be called upon to critically evaluate this research and its implications for correctional policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 2685.

CRMJ3400 - Deviant Behavior

Credits: 3

Examines theory and research relevant to understanding deviant behavior in general and specific types of individual and subcultural deviancy.

Cross Listed SOC 3400.

Prerequisite: SOC 1000.

CRMJ3490 - Issues in Policing

Credits: 3

Examines the various components of policing from both theoretical and practical frameworks. Students are exposed to the abundance of research that informs current policing practice and will be called upon to critically evaluate this research and its implications for policing policy and practice.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, CRMJ 2685.

CRMJ3500 - Drugs and the Criminal Justice System

Credits: 3

Focus on drugs and their impact on society. Particular interest is paid to the extent of drug use/abuse in America, and the effects of this problem on the criminal justice system and society as a whole. Strategies for controlling both supply and demand are discussed.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4110 - Constitutional Law: Civil Liberties and Rights

Credits: 3

Encompasses case-study analysis of judicial decisions and policies of the constitutional interpretation of the 1st Amendment (freedom of speech, press, association and religion), privacy rights, the rights of the criminally accused, and civil rights (racial and gender equality).

Cross Listed POLS 4110.

Prerequisite: POLS 1000, POLS 3100 recommended.

CRMJ4130 - Leadership and Management in the Criminal Justice System

Credits: 3

There is a clear need for managers and administrators to understand leadership and ethics. This course is designed to provide students with a foundation in the management and leadership discourse surrounding criminal justice agencies.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3490.

CRMJ4140 - Criminal Legal Procedure

Credits: 3

Examines the constitutional principles that safeguard the rights and liberties of criminal suspects and constrain police during the investigatory stages of the criminal justice process: arrest; search and seizure; interrogation; undercover operations; pretrial identification; and the exclusionary rule.

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400, or declared Public Law minor.

CRMJ4150 - Community-Based Corrections

Credits: 3

Designed to provide students with an in-depth look at the community corrections complex. It will examine the history and growth of community corrections, the probation system, methods of post-incarceration supervision, intermediate sanctions, and correctional programming and treatment in the community.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and CRMJ 3350.

CRMJ4151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 5151.

Former Course Number [3150]

Prerequisite: CRMJ 1001, CRMJ 2210, and CRMJ 2400/SOC 2400.

CRMJ4200 - Ethics in Administration of Justice

Credits: 3

Introduces basic ethical theories, emphasizing how ethical theory can be applied to contemporary problems in law enforcement, corrections and adjudication. Students will be called upon to apply these various ethical frameworks to typical moral dilemmas in criminal justice.

Former Course Number [3200]

Prerequisite: CRMJ 3110, CRMJ 3350, and CRMJ 3490.

CRMJ4230 - Forensic Anthropology

Credits: 3

Introduces methods and purposes of physical anthropology as applied in human identification for law enforcement agencies.

Cross Listed ANTH 4230.

Prerequisite: ANTH 1100.

CRMJ4260 - Gangs

Credits: 3

Considers the nature and the characteristics of gangs and gang members. The theoretical and empirical evidence regarding the phenomenon of gangs is evaluated. Particular emphasis is placed on the social and policy implications of this social problem.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 5280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400, and junior standing.

CRMJ4350 - Sociology of Law

Credits: 3

A consideration of sociological concepts such as inequality, stratification, social control and social change in an analysis of the law and legal institutions. Topics include: the role of the police, lawyers, judges, and juries; race, sex, age, and sexuality discrimination and civil rights; free speech, and toxic torts.

Cross Listed SOC 4350.

Prerequisite: 6 hours of sociology/criminal justice, including SOC 1000, and at least junior standing.

CRMJ4370 - Criminal Psychopathology

Credits: 3

Provides an overview of current theories and empirical evidence concerning the relationship between psychological disorder and criminal behavior. Examines various clinical syndromes and their role in biological, social and psychological genesis of crime, as well as the concept of criminal responsibility.

Cross Listed PSYC 4370.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 / GWST 5540 .

Dual Listed CRMJ 5540.

Prerequisite: ENGL 1080/WMST/GWST 1080 , WMST/GWST 2500 , WMST/SOC 3500, or CRMJ 2400/SOC 2400.

CRMJ4600 - Political Violence

Credits: 3

Examines causes and consequences of violence both among individuals and among nations.

Cross Listed POLS 4600.

When Offered (Normally offered every other year)

Prerequisite: POLS 1000, or SOC 1000, or POLS 1200, or POLS 1250, or POLS 2310, or permission of instructor.

CRMJ4705 - Terrorism

Credits: 3

Examines the concept, causes, incidence, types, consequences of, and responses to terrorism. Highlights the distinction between domestic and international terrorism and expands on the latter within the framework of the global environment.

Cross Listed INST 4705, POLS 4705, and SOC 4705.
Former Course Number [4700]

Prerequisite: 9 hours in CRMJ, INST, POLS, or SOC coursework.

CRMJ4730 - Psychology and Law

Credits: 3

Exposes students to the application of psychological principles to problems in law. Emphasizes the American trial system, correction systems and civil commitment.

Cross Listed PSYC 4730.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4750 - Criminal Justice Internship

Credits: 1-12

Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

Restricted Junior Standing.

Prerequisite: Integrates practical criminal justice experience with academic knowledge. Students participate in specifically assigned duties and observe broader activities of the sponsoring organization, and reflect upon these experiences through written assignments.

CRMJ4760 - Child Maltreatment

Credits: 3

Examines the phenomenon of child abuse and neglect. Includes an overview of attitudes towards and legal definitions of child maltreatment. Explores parental factors, contextual influences and developmental consequences of maltreatment. Relies heavily on current research in child abuse and neglect. Emphasizes policy implications.

Cross Listed PSYC 4760.

Prerequisite: A grade of C or better in 6 hours in psychology.

CRMJ4860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 5860.

Prerequisite: CRMJ 1001, CRMJ 2210, CRMJ 2400/SOC 2400 and junior standing.

CRMJ4965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides undergraduates with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 5965.

Prerequisite: upper division standing and consent of instructor required in advance.

CRMJ4975 - Readings

Credits: 1-3

Max Credit (Max. 6)

Special programs of readings in criminal justice related subjects will be outlined to meet needs of individual students.

Prerequisite: consent of instructor.

CRMJ4990 - Topics:

Credits: 1-3

Max Credit (Max. 6)

Intended to accommodate various special subjects not offered as regular courses.

Prerequisite: as listed for housing department's topics course.

CRMJ5000 - Survey of Criminal Justice

Credits: 3

Provides an overview of criminal justice theory by providing critical evaluation and discussion of research in the criminal justice field. It will emphasize seminal works and review current research concerning the structure, function, operation, interaction of the criminal justice system's primary components, and future trends.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5100 - Public Policy and Crime

Credits: 3

This course is designed to take a multidimensional look at public policy issues related to the prevention and control of crime in the United States. Issues covered include the development, implementation, and evaluation of crime control

policy.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5151 - Crime Causation

Credits: 3

Examines the causal mechanisms that produce crime. Theoretical perspectives and empirical research from various disciplines will be evaluated, with particular emphasis placed on social factors that may cause crime. Policy implications of the different perspectives will be discussed.

Dual Listed CRMJ 4151.

Prerequisite: graduate standing or consent of instructor.

CRMJ5280 - Comparative Criminal Justice

Credits: 3

Compares the incidence, trends, control, treatment and prevention of crime across nations using mainstream criminological theories. Examines criminal justice systems from an international perspective and draws lessons for the American society. Explores forms of international cooperation and difficulties in the control of transnational crimes.

Dual Listed CRMJ 4280.

USP 2003-2014 Code U3G, U3WC

A&S College Core 2015 ASG

Prerequisite: graduate standing.

CRMJ5500 - Internship in Criminal Justice

Credits: 3

Educationally-oriented assignments for work in selected criminal justice agencies, with tutorial types of supervision.

Prerequisite: Admission to the MPA Program or consent of instructor.

CRMJ5540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed GWST 4540 /GWST 5540.

Dual Listed CRMJ 4540.

Prerequisite: ENGL 1080 /WMST/GWST 1080 , WMST/GWST 2500 , CRMJ 2400 /SOC 2400 , or WMST/SOC 3500.

CRMJ5860 - Social Inequality, Crime, Criminal Justice and the Law

Credits: 3

Provides an in-depth look at social inequality and its impact on crime, criminal justice, and the law. Particular emphasis will be given to the individual and interactive effects of race, class, and gender inequality. Critical theoretical perspectives that promote social justice will be the primary analytical focus.

Dual Listed CRMJ 4860.

Prerequisite: graduate standing or consent of the instructor.

CRMJ5965 - Research Hours in Criminal Justice

Credits: 1-6

Max Credit (Max. 6)

Provides students with an opportunity to assist in conducting various aspects of research under the supervision of criminal justice faculty. Specific research activities and requirements will be determined in consultation with the sponsoring faculty person. Credit is only available for research corresponding to enrollment in this course.

Dual Listed CRMJ 4965.

Prerequisite: graduate standing; consent of instructor required in advance.

CRMJ5975 - Graduate Readings

Credits: 1-3

Max Credit (Max. 3)

This course provides students the opportunity to engage in an in-depth inquiry into a criminal justice topic through a thorough review of the existing literature under the supervision of a faculty member.

Curriculum and Instruction

EDCI4050 - Minority Sexual/Gender Identity Issues in Education

Credits: 3

How youth of minority sexual and gender identities have been educated: the challenges they experience in U. S. K-16 schools, the risk factors related to academic success (health, safety, and emotional well being), and strategies to create safe, caring, and inclusive learning environments for all youth.

Cross Listed GWST 4050.

Dual Listed EDCI 5050.

Prerequisite: completion of WA and GWST 2000 with C or better.

EDCI4120 - Literature for Young Adults

Credits: 3

Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. The course involves the reading and

critique of literature.

Dual Listed EDCI 5120.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [LIBS 4120]

Prerequisite: senior level or graduate standing.

EDCI4140 - Storytelling

Credits: 3

An investigation of storytelling as an art and as an aid to instruction. Emphasis is on literature for preschool and elementary age children.

Dual Listed EDCI 5140.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [LIBS 4140]

Prerequisite: junior standing or EDCI 4120 is recommended.

EDCI4160 - Recent Trends in Children's and Young Adult Literature

Credits: 3

Important new developments in the subject matter, settings and style of children's and young adult books are identified and studied. Students in this course are expected to have a strong basic knowledge of children's and young adult literature.

Dual Listed EDCI 5160.

Former Course Number [LIBS 4160]

Prerequisite: EDCI 4120.

EDCI4300 - Clinical Assessment and Instruction

Credits: 3

Provides students with opportunities to work with school-aged students experiencing literacy difficulties. Students in this class tutor school-aged children for an entire semester under the direct guidance of the course instructor and director of the LRCC.

Prerequisite: Completion of COM1; background check on file.

EDCI4330 - Advanced Diagnosis, Corrective Reading Instruction

Credits: 3-4

Max Credit (Max. 4)

Designed to provide students with opportunities to work with children who have reading problems. Students in this class tutor under the direct guidance of the course instructor.

Prerequisite: EDCI 3100, EDCI 4300 and consent of instructor.

EDCI4350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Focus is on the classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 5350.

EDCI4390 - Literature and Reading/Writing Instruction

Credits: 3

Links the use of literature for children with instruction and practice in reading, writing, spoken language, and critical thinking skills. Students are expected to have a strong background knowledge of literature for children before taking this course.

Dual Listed EDCI 5390.

Prerequisite: EDEL 2280, or basic children's literature course work.

EDCI4450 - Issues In Multicultural Education

Credits: 3

Provides the future teacher and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group.

Dual Listed EDCI 5450.

Former Course Number [4250]

Prerequisite: students must have at least 12 credit hours in education classes.

EDCI4665 - History and Philosophy of American Education

Credits: 3

Provides cultural, philosophical, and historical perspectives drawn from the American experience and centered in the American ideology of equality of educational opportunity. Major trends and philosophies that have developed, and are developing, in American education will be shared through discussion, presentations, and written projects.

Dual Listed EDCI 5665.

Prerequisite: Completion of WA with C or better.

EDCI4761 - Linguistics, Sociolinguistics, and Social Literacies for Teachers

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies that are necessary for understanding and working with children from diverse linguistic and cultural backgrounds. As such, the course was designed to redirect students' attention from a sole focus on schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring to school from their own sociocultural contexts.

Prerequisite: EDST 3480.

EDCI4762 - Essential Sociolinguistics for English as a Second Language Learning and Teaching

Credits: 3

This course is designed for the candidates in the ESL endorsement and graduate certificate program to focus on English as a second language teaching and learning. The issues addressed will include: (a) social and cultural approach to language and literacy; (b) second language learning and identity; (c) culture, ethnicity, race, and language variations; (d) bilingualism, and (e) language attitudes.

Prerequisite: admission to the English as a Second Language Endorsement Program.

EDCI5000 - Principles of Curriculum

Credits: 3

Provides an overview of general understandings fundamental to the study of all aspects of curriculum to include pre-school, kindergarten thru high school. Consideration is given to the various factors, institutions and societal issues that impinge on and affect the decision making processes of curriculum developers.

Prerequisite: graduate standing in education.

EDCI5010 - Supervision of the School Music Program

Credits: 2-4

Max Credit (Max. 4)

Two sections: vocal; instrumental. Designed for graduate students who have a background in music education and for other interested graduate students in education.

Prerequisite: 12 hours of education and graduate standing.

EDCI5020 - Curriculum Workshop

Credits: 1-4

Max Credit (Max. 4)

Two sections: vocal; instrumental. Designed for graduate students who have a background in music education and for other interested graduate students in education.

Prerequisite: 12 hours of education and graduate standing.

EDCI5050 - Minority Sexual/Gender Identity Issues in Education

Credits: 3

How youth of minority sexual and gender identities have been educated: the challenges they experience in U. S. K-16 schools, the risk factors related to academic success (health, safety, and emotional well being), and strategies to create safe, caring, and inclusive learning environments for all youth.

Cross Listed GWST 5050.

Dual Listed EDCI 4050.

Prerequisite: completion of WA and GWST 2000 with C or better; graduate standing; completion/concurrent enrollment in ADED 5260.

EDCI5070 - Educational Trends

Credits: 1-6

Max Credit (Max. 6)

Provides reading, discussion, research, and appraisal of new methods, materials, equipment, and experimental programs concerned with the improvement of education as it pertains to curriculum and instruction. The maximum allowable credit applies to the total offerings under this number.

Prerequisite: 12 hours of education courses.

EDCI5090 - Plan B Research

Credits: 1-3

Max Credit (Max. 9)

Under the guidance of a committee chair, the enrolled graduate student will complete a scholarly Plan B project. Plan B projects emerge from practice, typically involving a problem of interest within a student's school, classroom, or work site. Admission in the Curriculum and Instruction graduate program required.

Prerequisite: graduate standing.

EDCI5110 - Foundations of American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political and societal factors before, during and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed NAIS 5110.

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

EDCI5120 - Literature For Young Adults

Credits: 3

Designed for prospective and working library media specialists and teachers who wish to strengthen their backgrounds in the utilization of literature with young adults in classrooms and libraries. Involves reading and critiquing literature.

Dual Listed EDCI 4120.

Prerequisite: senior level or graduate standing.

EDCI5121 - History and Philosophy of American Indian Education

Credits: 3

Addresses the history of Indian education in the U. S. and Canada, examination of missionary initiatives, government programs, and tribal efforts. Review of documentary accounts of Native education, review autobiographical accounts of Native teachers and children. We will develop insight necessary for development of appropriate teaching methods and materials.

Cross Listed NAIS 5121.

Prerequisite: Post-Baccalaureate standing.

EDCI5130 - Cultural Foundations of American Indian Education

Credits: 3

In-depth study and analysis of the educational experiences of American Indians, focusing on contemporary educational issues and experiences, examining the impacts of cultural orientations, stereotypes, bias and other issues on the educational attainment of American Indian students. Critique instructional practices and programs developed addressing the needs of American Indian students.

Cross Listed NAIS 5130.

Prerequisite: Post-Baccalaureate status.

EDCI5140 - Storytelling

Credits: 3

An investigation of storytelling as an art and as an aid to instruction. Emphasis is on literature for preschool and elementary age children.

Dual Listed EDCI 4140.

Prerequisite: junior standing or EDCI 4120 is recommended.

EDCI5141 - Instructional Methods in American Indian Education

Credits: 3

Addresses culturally responsive methodologies for teaching American Indian students, review of documentary accounts of Native education and autobiographical accounts of Native teachers and children as students develop appreciation of the complexity and difficulties of Native education. Students acquire insight necessary for development of appropriate teaching methods and materials.

Cross Listed NAIS 5141.

Prerequisite: Post-Baccalaureate status.

EDCI5160 - Recent Trends in Children's and Young Adult Literature

Credits: 3

Important new developments in the subject matter, settings and style of children's and young adult books are identified and studied. Students in this course are expected to have a strong basic knowledge of children's and young adult literature.

Dual Listed EDCI 4160.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: EDCI 4120.

EDCI5205 - Methods of Teaching Middle-Level Mathematics

Credits: 3

Research based pedagogy and pedagogical content knowledge for teaching middle-level mathematics. Designed for practicing teachers of middle-grades mathematics.

Cross Listed NASC 5205.

Prerequisite: admission to the SMTC program.

EDCI5215 - Using Instructional Technology for Middle-Level Mathematics

Credits: 3

Covers the use of technology appropriate to middle-level mathematics teaching, such as microworlds, geographic information systems, spreadsheets, and other content appropriate technologies.

Cross Listed NASC 5215.

Prerequisite: admission to the SMTC Program.

EDCI5225 - Assessment for Middle-Level Mathematics

Credits: 3

Middle-level Mathematics Initiative teacher participants examine, analyze, and implement a variety of assessments that are aligned with standards and instruction appropriate to the middle level math learner.

Cross Listed NASC 5225.

Prerequisite: admission to the SMTC program.

EDCI5250 - Advanced Topics in Pedagogy

Credits: 3

A graduate level seminar to be taken concurrently with undergraduate methods courses in specific content areas (EDSE 425X-4260, EDEL 4309).

Restricted EDCI 5250 is restricted to students pursuing teacher certification leading to a Master of Arts in Curriculum and Instruction.

Prerequisite: Successful completion of EDCI 5550, EDCI 5870, Seminar in Assessment, earned Bachelor's degree from an accredited institution.

EDCI5310 - Reading Comprehension Processes and Instruction

Credits: 3

Designed to acquaint the student with recent developments, research findings, and newer practices. Viewpoints expressed by experts are compared, and an emphasis is given to the objectives of knowledge and to an understanding of attitude and skills.

Prerequisite: graduate standing.

EDCI5320 - Writing Instruction K-5

Credits: 3

Examines contemporary research and practice in elementary writing instruction. Students will read and discuss cutting-edge instructional and assessment methods addressing writing skills and processes related to transcription, spelling, written language conventions, and genre-based writing. In addition, students will analyze their current writing instruction and develop, implement, and evaluate new approaches.

Prerequisite: graduate standing.

EDCI5350 - Introduction to Second Language Acquisition

Credits: 3

Addresses theoretical and conceptual foundations of working with second language learners. Classroom applications of this theoretical base to interactions with English language learners, curriculum, instruction, assessment and evaluation, classroom organization, and school-community relations. Native American language revitalization issues are featured.

Dual Listed EDCI 4350.

Prerequisite: graduate standing.

EDCI5360 - History of Lit Res & Instruction

This course traces the historical lineages of research and practice in literacy. Students will explore major paradigm shifts and epistemological perspectives related to various domains of knowledge within literacy research and instruction across time. Implications for current in-school and out-of-school practices are examined.

Prerequisite: Graduate Standing

EDCI5365 - Trends in Literacy Research

Credits: 3

Max Credit 3

Examines teachers as consumers of literacy research and the organizations that provide access to literacy research. Analyzes the current science of reading movement and key recent research initiatives that impact literacy teaching.

Restricted Graduate Standing

EDCI5370 - Writing Instruction 6-12

Credits: 3

Max Credit 3

Examines contemporary research and practice in writing instruction at the middle and high school level. Students will read about and discuss cutting-edge instructional and assessment methods addressing writing skills and processes related to transcription, spelling, written language conventions, and genre-based writing. In addition, students will analyze their current writing instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Restricted Graduate Standing

Prerequisite: Graduate Standing

EDCI5380 - Literacy Leadership

Credits: 3

Examines the role of educators as literacy leaders (e.g., specialist, coach, administrator, teacher leader) as it relates to students, parents, staff, and other stakeholders. Analyzes current trends as they affect the role of educators who serve as literacy leaders in school contexts.

Restricted Graduate Standing

Prerequisite: Graduate Standing

EDCI5390 - Literature and Reading/Writing Instruction

Credits: 3

Links the use of literature for children with instruction and practice in reading, writing, spoken language, and critical thinking skills. Students are expected to have a strong background knowledge of literature for children before taking this course.

Dual Listed EDCI 4390.

Prerequisite: EDEL 2280, or basic children's literature course work.

EDCI5400 - Midpoint Portfolio Reflection

Credits: 1

Allows students to reflect, self-assess, and receive guidance related to their progress in the C&I Master's Program. Requirements include: self assessment of progress toward the C&I program outcomes, completion of a series of research abstracts, formation of the students' graduate committees and approval of programs of study.

Prerequisite: admission to the Curriculum and Instruction Master's Program and completion of at least 12 hours of EDCI coursework.

EDCI5430 - Theory and Methods of ESL I

Credits: 3

Provides an overview of theoretical and practical considerations in the teaching of English as a second/foreign language; acquaints students with different approaches, methods and procedures in TESL/TEFL; examines issues in the profession; requires a teaching/tutoring component.

Prerequisite: EDCI 5350.

EDCI5440 - Theory and Methods of ESL II

Credits: 3

Continues the theoretical and practical considerations in the teaching of ESL. Emphasis on Specifically Designed Academic Instruction in English (SDAIE) and literacy development for intermediate and advanced English language learners. Application of different approaches, methods, and procedures in TESL/TEFL. Development of curriculum. Issues in the profession. Requires teaching/tutoring component.

Prerequisite: EDCI 5430.

EDCI5450 - Issues in Multicultural Education

Credits: 3

Provides future and inservice teachers and other interested students with a better understanding of current issues and social foundations of multicultural America. Enables more accurate educational decisions related to utilizing strengths and diversity of each cultural group. Additional assignments are required of students completing this course for graduate credit.

Dual Listed EDCI 4450.

Prerequisite: 12 credit hours of education classes.

EDCI5480 - Short Course

Credits: 1-6
Max Credit (Max. 6)

Provides offerings in special topics in curriculum and instruction on the basis of need. The maximum allowable credit is six semester hours.

Prerequisite: 6 hours of education courses.

EDCI5490 - Individual Problems

Credits: 1-6
Max Credit (Max. 6)

Provides flexible credit for seniors who may need the credit for graduation, or for students who wish to undertake intensive study of a special problem identified in a regular class.

Prerequisite: 12 hours of education courses and consent of instructor.

EDCI5500 - Classroom Assessment

Credits: 3

Provides reading, discussion, and research examining a variety of classroom-based assessments with a focus on the alignment of teaching, learning, and classroom assessment at the P-12 level.

Prerequisite: graduate status.

EDCI5515 - National Board Certification Seminar

Credits: 1-3
Max Credit (Max. 12)

Provides information and support for teachers in the National Board Certification process. Content includes: reviewing, understanding, and applying best practice research; development of differentiated instruction; integration of formative assessment and reflective practice; understanding problem solving across the curriculum; and focuses on writing strategies for National Board Certification success.

Prerequisite: graduate student standing.

EDCI5550 - The Art and Science of Teaching

Credits: 3

Students will engage in a variety of experiences related to teacher decision making. Students research a variety of curriculum and instruction topics to discern the range of theories and associated models and develop personal theories and methods they plan to employ in their classrooms.

Prerequisite: successful completion of EDST 4000 and earned Bachelor's degree from an accredited institution.

EDCI5551 - Practicum Graduate Certificate

Credits: 1

This 1 credit hour course provides practicum experiences for students enrolled in EDCI 5550.

Prerequisite: Successful completion of, or concurrent enrollment in, EDCI 5550 and earned Bachelor's degree from an accredited institution.

EDCI5560 - Seminar in Assessment

Credits: 1

One credit hour course is designed for students in the (post baccalaureate) teaching credential program with master's option. Covers important concepts of assessment such as teachers as graders, self-and peer-assessment techniques, standardized assessment instruments, challenges facing new teachers, using assessment for planning/modifying instruction to improve learning experiences, and differentiated assessment in diverse classrooms.

Prerequisite: successful completion of (grade C or higher) or concurrent registration in EDST 2550 or EDST 3500.

EDCI5580 - Internship1

Credits: 8

Max Credit (Max 12)

An internship experience may be required as part of the planned program in curriculum and instruction. A maximum of eight hours may be counted in meeting the minimum requirements of a graduate degree, but additional credit may be taken beyond this limit for the recording of appropriate supervised experience.

Prerequisite: 15 hours of education, consent of department head, and graduate standing.

EDCI5600 - Diversity in Education

Credits: 3

Provides practicing teachers and graduate level students with an understanding of the macrolevel influences on diversity in education. Includes an examination of competing models of diversity in education as well as reviews critical scholarly work in the field (including alternative methodological frameworks for engaging in this research). Includes competencies for developing advocacy-oriented skills and dispositions.

Prerequisite: graduate level students only.

EDCI5665 - History and Philosophy of American Education

Credits: 3

Provides cultural, philosophical, and historical perspectives drawn from the American experience and centered in the American ideology of equality of educational opportunity. Major trends and philosophies that have developed, and are developing, in American education will be shared through discussion, presentations, and written projects.

Dual Listed EDCI 4665.

Prerequisite: Graduate student status; priority enrollment given to students registered in the C&I/Curriculum Studies area.

EDCI5710 - Genre-based, Discipline-based Literacies

Credits: 3

Designed to provide educators with knowledge of reading factors as they relate to various genres and disciplines. Includes new literacies, assessment and development of comprehension, writing and oral language as learning tools, techniques for the development of vocabulary, questioning and study strategies appropriate to various disciplines and genres.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Examines contemporary research and practice related to 1) literacy difficulties, 2) classroom assessment, and 3) RTI & school literacy reform. Students will read and discussion research addressing these issues and also engage in projects focused on intervention with struggling students and school wide-systems for literacy intervention.

Prerequisite: at least one year of successful teaching experience in a recognized K-12 school setting.

EDCI5730 - Learning and Cognition

Credits: 3

The purpose of this course is to explore and critically analyze various learning theories from 1900 to present, including, but not limited to, behaviorism, constructivism, information processing, situated cognition, meaning learning, and cognitivism. Focus is on applying learning theories to impact K-12 student outcomes.

Prerequisite: graduate standing or permission of instructor.

EDCI5750 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part I

Credits: 3-6

Max Credit (Max. 6)

Examines contemporary research and practice in literacy instruction. Read about and discuss cutting-edge literacy methods related to 1) word recognition, 2) beginning and fluent text reading, 3) reading comprehension, and 4) vocabulary development. In addition, students will analyze their current literacy instruction and develop, implement, and evaluate lessons that involve new instructional approaches.

Prerequisite: EDEC 4320 or EDCI 4330, EDCI 5310 or EDCI 5320 or graduate standing in education.

EDCI5755 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Grades K-5, Part II

Credits: 3

Second of two related courses that address research in literacy instruction in elementary classrooms. The two-course sequence is required for students seeking the Wyoming K-5 Literacy Endorsement. Can also serve as a literacy content course in the Literacy Education Ph. D. option or as an elective in other graduate degree programs.

Prerequisite: EDCI 5750.

EDCI5760 - Social Linguistics Literacies

Credits: 3

Introduces key concepts in linguistics, sociolinguistics, and social literacies necessary for understanding and working with children from diverse linguistic and cultural backgrounds. Redirects focus from schooled language and literacy to an understanding of the diverse language and literacy knowledges and skills that children bring from their own sociocultural contexts.

Prerequisite: at least one year of successful classroom teaching experience in a recognized K-12 school setting.

EDCI5770 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part I (6-12)

Credits: 3

Critically examines reading-writing research for the express purpose of recognizing fundamentals of superior studies. Students are encouraged to select and pursue a topic in reading-writing research for intensive examination. Students may pursue areas of emphasis in elementary, secondary, or higher education.

Prerequisite: Graduate standing in education.

EDCI5775 - Research in Literacy Learning, Teaching, and Assessment in Classrooms, Part II (6-12)

Credits: 3

Designed to be the second in a two-course sequence that focuses on research and practice in adolescent literacy learning, teaching, and assessment. Will focus on applying research to practice.

Prerequisite: Graduate standing in education.

EDCI5790 - Learning Theories and Instructional Principles

Credits: 3

This course focuses on making connections between theoretical perspectives on teaching and learning, empirical work, and the actual practice of teaching. As a result, learners should expect to examine multiple learning theories, read research based on those theories, explore pedagogy that grows out of these theories, and integrate theory into practice in their own classrooms.

Prerequisite: graduate standing.

EDCI5800 - Curriculum Development

Credits: 3

The process of developing an early childhood through grade 12 curriculum are learned. Factors involved in initiating, developing, and evaluating curricula are studied.

Prerequisite: EDCI 5000 and 5650.

EDCI5810 - Writing for Professional Publications

Credits: 3

Designed to give students a structured experience with writing to publish in professional journals. Students will be expected to have written and submitted a publishable article by the end of the course.

Prerequisite: 8 hours of graduate coursework completed.

EDCI5870 - Seminar

Credits: 1-6

Max Credit (Max. 8)

Advanced students in curriculum and instruction work intensively on current issues and problems and participate in systematic, critical interpersonal evaluation. Students may pursue areas of emphasis in elementary, secondary, or higher education in the seminar. Only six hours may be allowed in the curriculum and instruction program on a student's program under this number.

Prerequisite: consent of instructor and graduate standing.

EDCI5880 - Special Problems

Credits: 1-6

Max Credit (Max. 9)

Provides a broad perspective through selected reading material and, wherever possible, the student collects and uses original information from a practical school situation. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of the project.

Prerequisite: consent of instructor and school director, and graduate standing.

EDCI5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 9)

Provides additional opportunity for the student to pursue advanced graduate work through independent research. Projects are done under the direction of a graduate faculty member offered in the areas of business education and distributive education.

Prerequisite: consent of the instructor, the department head, and graduate standing.

EDCI5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

EDCI5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EDCI5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EDCI5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

EDCI5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

EDCI5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

EDCI5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Decision Sciences

DSCI2100 - Introduction to Operations and Supply Chain Management

Credits: 3

An introductory course in production and operations management. Typical topics include operations strategy, quality management, facilities location, facilities layout, forecasting, inventory management, production planning, scheduling and project management.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, MATH 2355, sophomore class standing. (EN majors: MATH 2205 and sophomore class standing.)

DSCI4230 - Purchasing and Supply Management

Credits: 3

Examines how to manage supply function. Topics include organization, planning procedures, category management, supplier selection, quality, inventory decisions, ethical and profession standards, costing, and price determination.

Prerequisite: DSCI 2100, junior class standing, advanced business standing.

DSCI4240 - Computer Applications in Decision Sciences

Credits: 3

A study of decision science topics such as mathematical programming, Monte Carlo simulation, forecasting, project management and decision theory. The applications of computer techniques is emphasized.

Prerequisite: IMGT 2400 or equivalent, STAT 2050 or equivalent, and junior class standing.

DSCI4250 - Revenue Management

Credits: 3

Examines the tools used by many industries in the service sector to maximize revenue, including forecasting demand, overbooking customers, group decision making, how to allocate fixed assets, and control of the overall network.

Prerequisite: DSCI 2100, advanced business standing, junior class standing.

DSCI4260 - Project Management

Credits: 3

Examines the coordination project management activities. This includes the initiation, planning, implementation, control and evaluation of projects.

Prerequisite: ACCT 2010, MATH 2350 and STAT 2050 or equivalents in each, grade of C or better in each, junior class standing (EN majors: MATH 2200, ES 1060 or equivalent, junior class standing).

DSCI4270 - Logistics

Credits: 3

Presents a synthesis of the principles in logistics activities resident in the supply chain. The course emphasizes how to manage the operation and integration of transportation (inbound and outbound), inventory, warehousing, facility location, customer service, packaging and materials handling.

Prerequisite: DSCI 2100, junior standing, advanced business standing.

DSCI4280 - Supply Chain Management

Credits: 3

Explores the links between overall business strategy and supply chain strategy, with a focus on strategic design and effective operation of supply chains to improve the organizations' productivity and competitiveness. Examines impact of technologies transforming global supply chains such as blockchain, machine learning, analytics, robotics, and other advancements.

Prerequisite: DSCI 2100, junior class standing, advanced business standing.

DSCI4900 - Independent Study in Decision Science

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study , on an individual basis, any aspect of Decision Sciences not included in other structured Decision Science courses

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

DSCI4910 - Topics in Decision Science

Credits: 3
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

DSCI5890 - Advanced Problems in Decision Science

Credits: 1-8
Max Credit (Max. 8)

An arrangement whereby a student is permitted to develop some advanced phase of decision sciences not offered in the formally structured courses or to investigate a particular decision sciences problem. A written report is required.

Prerequisite: consent of instructor and acceptance into a graduate program.

Dental Hygiene

DHYG3230 - Clinical Seminar II

Credits: 2

This course is a continuation of the Clinical Seminar Series. Course content will focus on the review and enhancement of instrumentation skills; the essentials of instrument selection; the role of root planing in dental hygiene; the development and refinement of skills needed for treatment of more advanced periodontal cases, which includes the initiation of a periodontal case study; and the introduction and preparation for the use of state-of-the-art clinical technologies.

Prerequisite: DHYG 2420.

DHYG3250 - Clinical Seminar III

Credits: 2

This course prepares the dental hygiene student to make the transition from an educational setting to private practice. Focus is on applying, synthesizing, and transferring clinical and didactic knowledge to clinical and ethical decision-making. Students will be engaged in problem-based case studies, application of motivational theories, and analysis of evidence-based research.

Prerequisite: DHYG 3230, DHYG 3300 and DHYG 3350 or concurrent enrollment.

DHYG3300 - Clinical Dental Hygiene II

Credits: 5

This course provides students the opportunity to gain further practical experience in dental hygiene procedures by providing comprehensive patient care in clinical settings. A flexible format allows students to meet requirements in procedures for patient record-keeping, patient education, dental prophylaxis, dental radiography and routine clinical procedures.

Prerequisite: DHYG 2350.

DHYG3350 - Clinical Dental Hygiene III

Credits: 5

This course assists students in gaining practical experience in clinical procedures requiring greater skill and knowledge than procedures previously undertaken. This course prepares students for the transition to private office practice.

Prerequisite: DHYG 3300.

DHYG3400 - General and Oral Pathology

Credits: 3

This course is designed to teach students the concepts underlying general and oral manifestations of human disease states, manifestations of specific diseases, relationships to body defense mechanisms, and potential implications for medical and dental hygiene treatment. To the extent possible, applications to clinical situations in dental hygiene practice will be made.

Prerequisite: one year pre-dental hygiene (including general pathology); MOLB 2021 or equivalent.

DHYG3550 - Community Dental Health

Credits: 3

This course provides the dental hygiene student with an introduction to basic skills needed to evaluate the dental health community, including research methodology and basic statistical analysis. It provides the student with a basic understanding of the significant social, political, psychological and economic factors influencing the American Health System.

Prerequisite: DHYG 2100.

DHYG3600 - Ethics and Law in Dental Hygiene

Credits: 2

This course provides an introduction to basic concepts in the analysis of ethical theories, principles, values, the professional code of ethics, and legal aspects associated with the dental hygiene healthcare profession. Contemporary issues are examined in dentistry and medicine as a strategy to explore and apply ethical principles in diverse cultures and situations.

Prerequisite: successfully complete all first-year dental hygiene courses.

DHYG3720 - Office Practice

Credits: 2

This course is designed to provide the dental hygiene student with both current information and experience in office practice and management. Also included are discussions of professionalism, decision-making and leadership roles, including legal and ethical responsibilities, team responsibilities in the dental office and discussion of selecting, securing and maintaining employment.

Prerequisite: DHYG 2300, 2350, DHYG 3300 and a communications course.

DHYG3750 - Periodontology

Credits: 3

This course reviews the anatomy and histology of periodontal structures and dental accretions followed by a study of the classifications and etiology of periodontal diseases including both local and systemic factors. A thorough exploration of the hygienist's role in disease recognition, prevention, therapeutic procedures and maintenance is also included.

DHYG3770 - Pain Management

Credits: 2

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/oxygen.

Prerequisite: successful enrollment in dental hygiene major or consent of instructor.

DHYG3775 - Pain Management Lab

Credits: 1

This course provides clinical experience with local anesthesia and inhalation sedation techniques. It includes the detection of anatomic landmarks in the mouth pertaining to specific injection sites, preparation of the armamentarium, maintenance of asepsis, simulated and real injection of anesthetic agents at predetermined sites and administration of nitrous oxide/ oxygen.

Prerequisite: successful completion of sophomore year course work in dental hygiene, current certifications in CPR, and curriculum enrollment in dental hygiene major or consent of instructor.

DHYG3800 - Board Review

Credits: 1

This course is designed to assist dental hygiene students in preparing for the National Board Dental Hygiene Exam, the western and central regional clinical and anesthesia board exams, and state jurisprudence exams. These exams are required for licensure to practice dental hygiene in the United States. This course includes discussion of the distinction between various agencies in the education, healthcare and legal system which have jurisdiction over the licensure process, and the impact of cheating during any portion of the process on the public welfare.

Prerequisite: DHYG 3300.

DHYG4850 - Education Practicum in Dental Hygiene

Credits: 6

Allows students to experience both clinical and didactic elements of dental hygiene teaching.

Prerequisite: completion of dental hygiene didactics, all requirements of program. Only available by permission of instructor. For students wishing to teach in dental hygiene programs.

Early Childhood Education

EDEC1020 - Introduction to Early Childhood Education

Credits: 3

Introduces students to the field of early childhood education through lecture, discussion, observation and participation. The student will be exposed to different programs currently in operation in the community and region. Special emphasis will be placed on evaluating early childhood education as a career.

Former Course Number [EDCI 1020]

EDEC1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

EDEC2000 - Engaging Families in Early Childhood Settings

Credits: 3

Focus on the philosophical, psychological, and sociocultural aspects of working with families and children in early childhood educational, home, and community settings.

EDEC2275 - Literature for Young Children

Credits: 3

Introduce major genres and conventions. Will develop critical skills for reading and writing about children's literature and culture; interpretive skills to enrich the understanding of literature for readers

USP 2003-2014 Code U3CH

Prerequisite: ENGL 1010 and sophomore standing.

EDEC3000 - Observing Young Children

Credits: 3

The general goal of the course is to introduce students to observation and recording techniques appropriate for assessing the growth and development of young children in the school setting. A secondary goal is to understand how

observation and recording techniques can facilitate curriculum planning and parent-teacher conferences.

Prerequisite: EDEC 1020 and FCSC 2121.

EDEC3220 - Curriculum and Learning Environments in Early Childhood Education

Credits: 3

Early childhood curriculum and instructional practices will be reviewed, developed, and integrated with a focus on the role of learning environments, materials and play in supporting the teaching and learning process. Students have the opportunity to design meaningful learning experiences through practicum.

Former Course Number [EDCI 3220]

Prerequisite: EDEC 1020 and FCSC 2121 (or both PSYC 2300 and FCSC 2122).

EDEC4209 - Early Literacy Methods

Credits: 3

This course focuses on the pedagogical content knowledge and instructional and assessment practices that will prepare students to implement research-based reading and writing instruction for children from ages 3-8. Key topics include reading aloud to young children; phonological awareness, phonics, and word recognition; reading fluency and comprehension; vocabulary; and writing.

Restricted Early Childhood or Elementary Education Majors

Prerequisite: EDEL 2140 and EDST 3100 or concurrent enrollment.

EDEC4320 - Oral and Written Language Acquisition

Credits: 3

Introduces the student to the nature of language development as it pertains to oral and written communication in education. Recent research in the areas of oral and written language acquisition is compared and contrasted. Implications for facilitating the development of all language modes in educational settings is emphasized.

Former Course Number [EDCI 4320]

Prerequisite: EDST 3480 or equivalent, junior standing and declared Elementary Education or Family and Consumer Sciences major.

EDEC4350 - Health Management Issues in Early Education

Credits: 3

Provides the student the opportunity to examine the implications of a child's health status on his/her personal, educational, social and cognitive development. Provides personnel working closely with the young child with disabilities and his/her family an understanding of the issues related to health concerns and a framework for

intervention planning. Special emphasis is placed on concerns specific to the child in a day care, preschool or other school setting.

Prerequisite: junior standing and consent of the instructor.

EDEC4580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 5580.

Prerequisite: permission of the instructor is required.

EDEC5220 - Children with Disabilities

Credits: 3

Purpose is to introduce students to the effects of a disability on the development of the young child. Recent research in the area of early childhood special education will be examined. Educational implications will be emphasized.

Prerequisite: Bachelor's degree in education.

EDEC5230 - Curriculum and Materials for Young Children with Disabilities

Credits: 3

Involves the study and development of curriculum strategies appropriate for the child with disabilities from birth through age five.

Prerequisite: graduate standing.

EDEC5240 - Evaluation of Young Children with Disabilities

Credits: 3

Prepares students to select, administer, and interpret evaluation tools appropriate for planning with young children with disability.

Prerequisite: graduate standing.

EDEC5250 - Legal Issues in Early Childhood Special Education

Credits: 2

Introduces students to the legal issues surrounding the education of young children with disabilities. The intent and implications of P. L. 99457 will be explored and examined to better assist the specialist in serving children with

disabilities and their families.

Prerequisite: EDEC 5220.

EDEC5580 - Internship in Early Childhood/Early Childhood Special Education

Credits: 1

Max Credit (Max. 6)

The internship experience allows the early childhood/early childhood special education program candidate to demonstrate the knowledge and skill gained from coursework offered throughout the EC/ESCE programs. Candidates enroll in the internship after completion of all required courses in the programs.

Dual Listed EDEC 4580.

Prerequisite: permission of the instructor is required.

Ecology

ECOL5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ENR 5050/GEOG 5050.

Prerequisite: graduate standing.

ECOL5060 - Advanced Concepts in Evolution

Credits: 3

Explores fundamental concepts in evolutionary biology including evolutionary ecology, population genetics, and speciation with an emphasis on both theoretical frameworks and practical applications. Discussion included.

Cross Listed BOT 5060/ZOO 5060.

When Offered (Offered every other year)

Prerequisite: graduate student in good standing.

ECOL5100 - Ecology as a Discipline

Credits: 3

Covers the range of ecological questions, processes, scales, and research approaches, in context of the history and philosophy of science in general and of ecology in particular. Aimed at first-year students in the doctoral program in Ecology, although students in other graduate programs are welcome.

Prerequisite: graduate standing.

ECOL5400 - Community Ecology

Credits: 3

Community ecology is the study of interactions within and among groups of species. This course focuses on (1) the major classical concepts and theories in community ecology, (2) the ways in which population dynamics can impact communities and how community dynamics can impact ecosystem processes and functioning, and (3) implementation of quantitative methods for conducting research that includes community ecology.

Cross Listed REWM 5400.

Prerequisite: LIFE 3410 or equivalent.

ECOL5500 - Quantitative Analyses of Field Data

Credits: 4

A practical guide to the analysis of messy field data, including data exploration, generalized linear and additive models, mixed models, autocorrelation, and model selection using Program R. Students will have bootcamp to learn methods and spend the rest of the semester analyzing their own data.

Prerequisite: graduate standing.

ECOL5520 - Habitat Selection

Credits: 2

In this course we will cover theory and behavioral/evolutionary concepts related to the process of habitat selection, the contexts under which habitat choices are adaptive or maladaptive, and different types of anthropogenic habitat change and the consequences for animals in the wild. **Prerequisite:** Graduate students in good standing.

Cross Listed ZOO 5520

Prerequisite: Graduate students in good standing.

ECOL5540 - Microbial Diversity and Ecology

Credits: 4

Introduces the diversity and ecology of soil microbes through an integrated lecture and laboratory course. Emphasis on molecular approaches to analyzing microbial diversity and evolution, and student-directed experimental design. Provides a continuum of realistic research experiences in molecular microbial ecology, from field work to evolutionary analysis of DNA sequence data.

Cross Listed MOLB 4540/MICR 4540/SOIL 4540.

Dual Listed MOLB 5540/SOIL 5540.

Prerequisite: MOLB 2210.

ECOL5550 - Ecology as a Scientific Profession

Credits: 2

A capstone that prepares doctoral students for success and leadership in their careers as professional ecologists. Intended for students enrolled in the doctoral Program in Ecology in their final year.

Prerequisite: graduate standing.

ECOL5580 - Rangeland Restoration Ecology

Credits: 3

Detailed analysis of various ecosystems unique to western rangelands. Primary emphasis on plant community restoration following degradation from edaphic, biotic, hydrologic, and topographic factors. Application of ecological principles to rehabilitate vegetation and restore ecosystem function. Strong emphasis on current research to formulate restoration strategies.

Cross Listed REWM 5580.

ECOL5610 - Quantitative Modeling in Landscape Ecology

Credits: 3

Emphasis on quantitative, spatial analysis of landscapes and application of these quantitative tools to making sound management decisions. Work with real data, acquire high-level quantitative skills, develop problem-solving skills, and discuss management application of model results. Analysis will encompass abiotic, biotic (plant and animal), and human use of ecological systems in a spatial context.

Cross Listed REWM 5610.

When Offered (Offered during even-year fall semesters)

Prerequisite: upper division stats course (e. g. , STAT 4015 or STAT 4025) and graduate standing.

ECOL5620 - Advanced Topics in Ecology

Credits: 1-4

Max Credit (Max. 12)

Provides advanced treatment of specific topics in ecology that are not covered in regular courses.

Prerequisite: graduate standing and consent of instructor.

ECOL5650 - Tropical Field Ecology Ecuador

Credits: 4

Course comprises 10 days in Ecuador in January (before spring semester), followed by one lecture per week during spring semester. Focus will be ecology, biodiversity and conservation of tropical forests and behavioral ecology of birds and mammals. Field site is at 1100m on west slope of the Andes.

Cross Listed ECOL 5650.

Prerequisite: graduate standing.

ECOL5680 - Landscape Genetics

Credits: 3-4

Provides a unique opportunity for interdisciplinary training and international collaboration uniting some of the most active landscape genetics groups in North America and Europe. A key objective of landscape genetics is to study how landscape modification and habitat fragmentation affect organism dispersal and gene flow across the landscape. Meeting this and other landscape genetic objectives requires highly interdisciplinary specialized skills making intensive use of technical population genetic skills and spatial analysis tools (spatial statistics, GIS tools and remote sensing). To bring these diverse topics and skills together effectively, we are using a distributed model of teaching. Population genetics, spatial analysis/ statistics, and previous experience in Rare all extremely useful but not required.

Cross Listed Cross listed with: REWM 5680.

ECOL5775 - Forest Ecology

Credits: 4

Integrative study of the structure, function, and ecological diversity of forested ecosystems, and the physical factors that influence this diversity, including emergent properties of energy flow and nutrient cycling. Special emphasis is given to understanding forest disturbances and succession, and implications for impacts of management and sustainability are discussed throughout.

Cross Listed RNEW 5775 and BOT 5775.

When Offered (Offered during even-year fall semesters)

Prerequisite: LIFE 3400.

ECOL5780 - Research in Ecology

Credits: 1-6

Max Credit (Max. 12)

Designed for doctoral students pursuing exploratory research before they have determined a dissertation project, and for students to pursue independent research that will not comprise part of their dissertation. Research must be conducted under supervision of an Ecology Faculty member or Affiliate.

Prerequisite: admission to doctoral Program in Ecology.

ECOL5920 - Continuing Registration: On Campus,

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5940 - Continuing Registration: Off Campus,

Credits: 1-12

Max Credit (Max. 16)

Prerequisite: graduate standing.

ECOL5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Economics

ECON1000 - Global Economic Issues

Credits: 3

Economics: creating value through trade, enhancing society through ideas, and protecting the environment by design. This introductory course will help you understand better on how people use both free markets and government regulations to create value, enhance society, and protect nature. You will explore how economic ideas and tools address big global issues like poverty and prosperity, inequality of wealth, capital and labor, sustainable development, free trade vs fair trade, climate change, war and peace, migration, brain drains, and science and nature.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

ECON1010 - Principles of Macroeconomics

Credits: 3

An introductory course on why economics matters. We examine why countries like the US are rich, while others are poor. We explore economic booms & busts, and policies to avoid them. We address GDP growth, unemployment and inflation, government debt, deficits, tax policy, and whether robots will take our jobs.

Cross Listed AGECE 1010.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1020 - Principles of Microeconomics

Credits: 3

You make tradeoffs - your time and money are limited. Microeconomics evaluates how people think about tradeoffs and how we create value through markets, institutions, and policy. Economic incentives influence choices to consume and produce goods and services. Market failure creates a role for government to protect health, culture, and nature.

Cross Listed AGECE 1020.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON1101 - First-Year Seminar: Viking Economics

Credits: 3

The people we've come to know as the Vikings were major influencers on the history and economic development of Western and Eastern Europe, the Middle East, North Africa, and North America. In this course, we will come to understand the Vikings not only as warriors, but also in other roles for which they should be known: merchants, social and economic innovators, entrepreneurs and explorers, shipbuilders and seafarers, and creators of a remarkable literature of myths and sagas.

USP 2015 Code U5FY

ECON1200 - Economics, Law and Government

Credits: 3

Markets and free enterprise depend on supportive legal and political institutions. The course exposes students to the U. S. political economy. Important relationships between market development, the legal framework and the political system are presented. The U. S. and Wyoming constitutions are studied to show their importance to free enterprise. Topics deal with public choice, cost-benefit analysis in policy, the importance of property rights and regulation.

USP 2003-2014 Code U3V

USP 2015 Code U5V

ECON1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will be investigated in case studies.

Cross Listed ERS 1300.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

ECON1400 - Sports Economics

Credits: 3

Examines economic issues pertaining to professional and collegiate sports. Topics include: determinants of player salaries, owner profits and team values; effects of salary caps, revenue sharing, etc. on competitive balance; labor markets and discrimination; antitrust issues, and the impact of franchises on local economies.

USP 2003-2014 Code U3CS

USP 2015 Code U5H

ECON2100 - Introduction to Money and Banking

Credits: 3

An introduction to the entire area of money and public finance. Oriented towards students wishing to obtain a broad general understanding of importance of money and public finance upon economic activity. Covers money and private financial institutions, monetary theory and policy, as well as public finance and fiscal policy. Credit will not be allowed for more than one of: ECON 2100 or FIN 3520.

Prerequisite: ECON 1010, ECON 1020.

ECON2190 - High Country Economics

Credits: 3

Max Credit (Max. 3)

Allows students to connect economic theory to tangible Wyoming and Rocky Mountain West issues.

Prerequisite: ECON 1010 and ECON 1020, or written consent of instructor.

ECON2400 - Economics of the Environment

Credits: 3

This introductory course examines the links between economics and the natural environment. We consider the efficient use of natural resources like minerals, forests, and fisheries. We also explore how to use economics to sharpen environmental policy for challenges like water and air pollution, climate change, and biodiversity protection.

When Offered (Offered based on sufficient demand and resources)

USP 2003-2014 Code U3G, U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: ECON 1010 recommended, ECON 1020 required.

ECON2500 - The Impact of the Union Pacific on Wyoming History

Credits: 3

Students will experience and interpret the impact of the building of the Union Pacific Railroad on the history and culture of Wyoming through the lens of three disciplinary perspectives. Students will explore how the railroad impacted Wyoming geography, economic development and the people of the state through personal research projects.

Cross Listed GEOG 2500 and HIST 2500.

ECON2910 - Topics in Economics

Credits: 3

A study of selected topics & problems in modern economics. Topics include but are not limited to sports economics, managerial economics, and behavioral economics.

ECON3010 - Intermediate Macroeconomics

Credits: 3

A presentation and study of national income aggregates and accounting; equilibrium analysis of output, employment and the price level; general equilibrium analysis; and an introduction to economic dynamics.

Former Course Number [2010, 4010]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3020 - Intermediate Microeconomics

Credits: 3

Key problems of environmental degradation and natural resource scarcity are identified. Main underlying causes of misuse and overuse are explained from an economics perspective. Policy options for improved management are presented. These economic concepts and tools are then applied to current real world environment and natural resource issues.

Former Course Number [2020, 4020]

Prerequisite: ECON 1010, ECON 1020, MATH 2200 (or MATH 2350), STAT 2050 or STAT 2070 strongly recommended, and sophomore class standing.

ECON3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ERS 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300, and sophomore class standing.

ECON3900 - Economics Internship/Research

Credits: 1-3

Max Credit (Max. 3)

Students gain practical experience in economic applications and research. A contract with an Economics adviser and cooperating sponsor required before enrolling. Requires student paper and sponsor assessment.

Prerequisite: ECON 1010, ECON 1020, and sophomore class standing.

ECON4000 - Conference

Credits: 1-4

A tutorial-conference course intended to give economics majors an opportunity to engage in extensive research in some aspect of economics. Specific topics vary with students' needs and interests.

Prerequisite: ECON 3010, ECON 3020, or the consent of the instructor.

ECON4030 - Managerial Economics

Credits: 3

An advanced course on the theory of demand, production, cost, and supply; the theory of the firm, including market price under monopoly, monopolistic competition and oligopoly. Attention is given to the theory of factor prices and topics on welfare economics.

A&S College Core 2015 Credit cannot be earned for this course and ECON 3020.

Prerequisite: senior standing or above.

ECON4115 - Time Series Analysis

Credits: 3

Max Credit 3

Designed to have an applied orientation in a number of estimation procedures, such as exponential smoothing and forecasting with and without the presence of trends and seasonal repetitive patterns. The Box-Jenkins procedure will be covered in detail. Students become proficient in the application of statistical tools used in time series analysis of economic data.

Cross Listed STAT 3050 or equivalent; or one of STAT 4015/5015

Dual Listed Dual-list with ECON 5300

When Offered (Offered based on sufficient demand and resources)

Former Course Number [4110]

Prerequisite: STAT 3050 or equivalent; STAT 4015/STAT 5015 recommended.

ECON4230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGECE 4230.

Dual Listed ECON 5230.

When Offered (Normally offered spring semester)

Former Course Number [4340]

Prerequisite: ECON 3020, STAT 2050 or STAT 2070, and MATH 2350.

ECON4240 - Evolution of Economic Ideas

Credits: 3

Focuses on the most influential economists who have shaped the evolution of economic thinking throughout history. Emphasis is on tracing the evolution of economic thought into the modern intellectual foundation of economics. Traces changing economic thought from mercantilism through modern paradigms.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Restricted Restricted to Seniors in Economics, Business Economics, or a concurrent major with Economics.

Prerequisite: Senior standing and ECON 3010 and ECON 3020, or permission of instructor.

ECON4350 - Game Theory

Credits: 3

Discusses a variety of important concepts from game theory - the study of how individuals interact strategically. The course focuses on the development of students' ability to think strategically. To that end the course covers basic concepts in game theory; notions related to credibility; and notions related to forming and evaluating strategies.

Prerequisite: ECON 3020 and either MATH 2200 or MATH 2350

ECON4360 - Seminar in Economics

Credits: 1-3

Max Credit (Max. 6)

An analysis of selected problems of economics theory. Topics vary with student interest and with current stress in economics theory.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010, ECON 3020.

ECON4390 - Mathematical Economics

Credits: 3

This course provides a broad set of practical tools that allow an analysis of important economic problems. The mathematical tools analyze human behavior and predict the response of economic systems to changes in circumstances and alternative policies, for applications such as investment project evaluation, capacity expansion, production decisions, or demand for various goods.

Dual Listed ECON 5390.

Former Course Number [4320]

Prerequisite: ECON 3010, ECON 3020, MATH 2205 or MATH 2355.

ECON4400 - Environmental Economics

Credits: 3

The class explores how economics can help guide cost-effective environmental policy. We consider economic growth, the social costs of pollution (water and air), health risks, climate change, loss of biodiversity, and land development/conservation. We consider economic policies such as green taxes, cap-and-trade permit systems, and liability rules. We examine how to value environmental and ecosystem services in a market economy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4410 - Natural Resource Economics

Credits: 3

A study of the economics of the use and protection of renewable and nonrenewable resources. We focus on minerals, fossil fuels, fisheries, water, forestry resources, and ecosystem services. We explore optimal extraction and depletion, conservation, market structure, institutional design, and the role of time, space, and uncertainty.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Sophomore class standing.

ECON4420 - Seminar: Economics for ENR

Credits: 2-4

For students with little or no background in economics interested in economic perspectives on ENR. Emphasis is on integrated ecology-economics approach to investigate the economics environmental services, biological resources, and the ecosystems that contain them. CBEC and ECON majors cannot earn upper-division economics credit for this course.

Prerequisite: successful completion of Q and senior standing.

ECON4430 - Energy Economics

Credits: 3

Economics of energy, particularly oil and gas. Includes a discussion of the history of the oil industry, as well as aspects of contemporary markets. Apply a variety of concepts from microeconomics, particularly related to industrial economics.

Prerequisite: ECON 3020, MATH 2200 or MATH 2350.

ECON4450 - Monetary Theory

Credits: 3

Topics in this course center on theories of the value of money and price levels; central banking theory and policy;

international exchange; world monetary institutions.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010, MATH 2200 or MATH 2350.

ECON4520 - Public Economics

Credits: 3

Studies the role of government within a market economy. The focus is on how governments fund and provide non-market goods demanded by society, e. g. , health care, military, education. Examines public goods, taxation, environmental challenges, affects on economic growth and stability, benefit-cost analysis, and state/local finance.

Prerequisite: ECON 3010, ECON 3020.

ECON4530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 5530.

Prerequisite: ECON 3020, and one of STAT 2010, STAT 2050, STAT 2070, or STAT 2110.

ECON4700 - Economic Development

Credits: 3

Encompasses the study of institutional and social, as well as economic, mechanisms for modernizing an economy while eliminating absolute poverty. Covers the economic concepts that help us explain why some countries are poor and how economic policies can assist those countries in becoming more developed. Case studies of specific country experiences are presented along with the economic theories in an integrated manner.

Prerequisite: ECON 3010.

ECON4710 - Why Economies Succeed and Fail

Credits: 3

The study of the successes and failures of alternative economic systems; origins, similarities, and differences across capitalist, socialist, and communist systems, including the UW, Chinese, European, Russian, Latin American, and African economies. What does history teach us? Are there different tools to grow economy?

Cross Listed INST 4710.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010; Q.

ECON4720 - International Trade

Credits: 3

The gains from specialization and trade are studied, as are explanations of trade patterns among countries, policies affecting trade such as tariffs, quotas, tax breaks, subsidies, cartels and price stabilization plans. Topics on labor migration and multinational corporations are covered.

When Offered (Normally offered fall semester)

Prerequisite: ECON 3020 and Junior class standing.

ECON4730 - Advanced Regional Analysis

Credits: 3

An advanced study of regional economic models. Included are structural and simulation models, regional growth models, and income estimation models. Emphasis is placed on quantitative analysis of regional growth and development.

This course introduces students to regional economic models, analytical techniques, and relevant policy issues useful for analyzing regions and their economies. Throughout the course, the focus will be on applied research, which will provide students with useful skills and experience, especially those interested in data analytics or economic development work.

Cross Listed ECON 5730

Prerequisite: ECON 3010 , ECON 3020 or equivalent

ECON4740 - International Economics and Policy

Credits: 3

The focus is on foreign exchange markets, balance of payments analysis and effects of international trade and capital flows on the domestic economy. Policies to correct payment deficits, gold, international liquidity and international financial institutions are studied.

Prerequisite: ECON 3010 and ECON 3020; QA.

ECON4800 - Labor Economics

Credits: 3

The study of labor supply, labor demand, wage determination, resource allocation and income distribution. Emphasis is on public policy.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3010 and ECON 3020; QA.

ECON4820 - Industrial Organization and Public Policy

Credits: 3

The conduct and performance of market structures is analyzed. Structures include perfect competition, monopolistic competition, oligopoly and monopoly. Special attention is given to the study of strategic behavior in industry. Game theory is introduced. Public policy against monopoly practices is reviewed.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 3020 and Q.

ECON4840 - Public Utility Economics

Credits: 3

The economic foundations of the public utility industries; the theory of public utility rate making; pricing and resource allocation; and the effectiveness of utility regulation.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ECON 1010 and ECON 1020; QA.

ECON4900 - Ind. Study in Economics

Credits: 1-6

Max Credit 6

This course provides students the opportunity to study on an individual basis, any aspect of Economics not included in other structure Economics courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

ECON4910 - Topics in Economics

Credits: 3

Max Credit (Max. 6)

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

ECON5010 - Advanced Macroeconomic Analysis

Credits: 3

An advanced application of economic theory to complex macroeconomics problems facing the economy of the state and nation, such as inflation, unemployment, and fiscal and monetary policies.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5020 - Advanced Microeconomic Analysis

Credits: 3

A rigorous course in the analysis of demand and the theory of consumer behavior, supply and the theory of the firm, market equilibrium and stability, and income distribution.

Prerequisite: ECON 3010, ECON 3020, or equivalent.

ECON5110 - Advanced Topics in Economic Theory

Credits: 3

A study of selected topics in modern economic theory. Topics include growth theory, optimal control, dynamics, uncertainty, and game theory.

Prerequisite: ECON 5010, ECON 5020.

ECON5115 - Time Series Analysis and Forecasting

Credits: 3

An applied introduction to time series and forecasting. Brief coverage of time series regression, decomposition methods, and smoothing will lead into a more detailed coverage of Box-Jenkins (ARIMA) modeling.

Cross Listed STAT 5115.

Dual Listed ECON 4115.

Prerequisite: STAT 3050 or equivalent, STAT 4015/STAT 5015 recommended.

ECON5120 - Advanced Analysis II-Microeconomics

Credits: 3

Part of a sequence with ECON 5020. It is advanced microeconomic analysis covering general equilibrium and welfare economics, and advanced topics in consumption and production theory.

Prerequisite: ECON 5010, ECON 5020.

ECON5130 - Dynamic Optimization

Credits: 3

Covers methods for obtaining the optimal choice for economic variables that change over time, including calculus of variations and optimal control. These methods are applied to various dynamic economic problems, including optimal resource extraction, optimal capital allocation, and optimal growth.

Prerequisite: ECON 5020, ECON 5370.

ECON5230 - Intermediate Econometric Theory

Credits: 3

Covers simple and multiple regression models, problems of estimation, hypothesis and diagnostic testing, dummy variable, autoregressive and distributed lag models, and time-series analysis. The objective is to understand the

underlying theory of econometric modeling and obtain operational ability to construct, estimate, and test econometric models.

Cross Listed AGEC 5230.

Dual Listed ECON 4230.

Prerequisite: admission to the Master's Program in Economics.

ECON5300 - Game Theory

Credits: 3

Discusses a variety of important concepts from game theory - the study of how individuals interact strategically. The course focuses on the development of students' ability to think strategically. To that end the course covers basic concepts in game theory.

Restricted Course is restricted to MS ECON

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5310 - Research Methods

Credits: 3

A variety of topics of importance to the advanced student who is preparing to write his or her dissertation are discussed.

Restricted Economics Graduate Students

Prerequisite: Admission to the graduate program in Economics

ECON5330 - Advanced Mathematical Economics

Credits: 3

Study of the principal mathematic techniques used in economic theory and modeling. Taught jointly with ECON 5020.

Prerequisite: graduate standing.

ECON5340 - Applied Econometrics

Credits: 3

Presents a thorough coverage of the general and normal linear regression models. Then proceeds to deal with the standard methodologies for estimating variations of this model including autocorrelation and hetero-skedasticity, extreme multicollinearity, disturbance-related sets of regression equations, simultaneous equation bias, and simultaneous equation models.

Prerequisite: ECON 3010, ECON 3020 and STAT 2010.

ECON5350 - Advanced Econometrics Theory I

Credits: 3

Review topics in probability theory and mathematical statistics. Also provides an introduction to the classical linear regression model, estimation, hypothesis testing, and prediction.

Prerequisite: Calculus and Basic Statistics.

ECON5360 - Advanced Econometrics Theory II

Credits: 3

Continue the analysis in ECON 5350 and cover topics such as panel data, limited-dependent variables, simultaneous systems, nonlinear models, Bayesian analysis, and time series methods.

Prerequisite: ECON 5350.

ECON5370 - Advanced Econometric Theory III

Credits: 1-3

Max Credit (Max. 9)

More in-depth coverage of topics in ECON 5350 and ECON 5360. Topics are selected based on current advancements in econometrics and students' research interests and may include generalized method of moments (GMM), nonparametric estimation, state-space models and the Kalman filter, mixed and nested logit models, multinomial discrete-choice models, and simulated maximum likelihood.

Prerequisite: ECON 5360.

ECON5380 - Experimental Methods in Economics

Credits: 3

Accepted experimental techniques in behavioral economics are studied. Critical review of previous experimental work is used to learn proper procedure. The value of subject control and creative construction is stressed.

Former Course Number [5320]

Prerequisite: graduate standing.

ECON5390 - Math Microeconomics

Credits: 3

This course provides a broad set of practical tools that allow an analysis of important economic problems. The mathematical tools analyze human behavior and predict the response of economic systems to changes in circumstances and alternative policies, for applications such as investment project evaluation, capacity expansion, production decisions, or demand for various goods.

Dual Listed ECON 4390.

Prerequisite: ECON 3010, ECON 3020, MATH 2205 or MATH 2355.

ECON5400 - Advanced Resource and Environmental Economics

Credits: 3

This course examines how we use economics to sharpen natural resource use and environmental policy. We focus on the behavioral and institutional underpinnings of market success and failures, choice under risk, time, space, conflict, cooperation, incentive design, non-market valuation, and prosperity.

Prerequisite: ECON 3020, ECON 4400 or consent of instructor.

ECON5410 - Seminar in Advanced Resource and Environmental Economics

Credits: 1-3

Max Credit (Max. 6)

This course explores the modern theory and empirics in environmental and natural resource economics. We focus on cost-benefit analysis, land use, energy, biodiversity protection, climate change, forestry, ecosystem services, fisheries, water, and sustainable development.

Prerequisite: ECON 4400 and ECON 5020.

ECON5520 - Advanced Public Economics

Credits: 3

This course examines when and what policies maximize welfare, and their distributional impact. It addresses market failures and behavioral biases as potential justifications for government intervention. It also addresses preferences for redistributions, benefit-cost analysis, the economics of taxation, information and nudges.

Prerequisite: ECON 5010, ECON 5020 or equivalent.

ECON5530 - Computational Economics

Credits: 3

An introduction to computational tools used to analyze economic data and policies. Provides operational knowledge of how to formulate numerical economic models to conduct analyses of consumer behavior, markets, trade, and state and local fiscal administration. Special emphasis on applications to Wyoming problems.

Dual Listed ECON 4530.

Prerequisite: admission to the Master's program in Economics.

ECON5640 - Financial Economics I

Credits: 3

Focuses on theoretical topics. Covers optimal portfolio selection under uncertainty and differential information as well

as fundamental theoretical issues in banking and financial intermediation. In the latter part of the semester, students have an opportunity to present one of the assigned articles in class and lead a discussion on it, with active participation by the entire class.

Prerequisite: PhD-level microeconomics class (5020) and at least one 4000-level finance class.

ECON5650 - Financial Economics II

Credits: 1-3
Max Credit (Max. 6)

Topics include corporate finance, capital structure and the theoretical valuation of financial securities; also, asset pricing and financial econometrics.

Prerequisite: ECON 5640.

ECON5700 - Advanced Economic Development

Credits: 3
Explores basic growth theory, "economic history" models of economic expansion, theories of natural resource based development and trade-resource models, the role of institutions and public policy in influencing development, and the effects of population, trade and finance on development.

Prerequisite: ECON 5010, ECON 5020.

ECON5720 - Advanced International Economics

Credits: 3
Studies the economics of trade between nations. Important trade theories are studied along with their empirical evaluation. Time is devoted to the importance of international trade growth. Government trade policies are given theoretical and empirical evaluation.

Prerequisite: ECON 5020.

ECON5730 - Advanced Regional Analysis

Credits: 3
An advanced study of regional economic models. Included are structural and simulation models, regional growth models, and income estimation models. Emphasis is placed on quantitative analysis of regional growth and development.

Prerequisite: ECON 3010, ECON 3020 and 4600 or equivalents.

ECON5820 - Advanced Industrial Organization and Public Policy

Credits: 3

An application of market and price theory to concentration, size, competition; antitrust; close-knit and loose-knit combinations; business practices; price leadership and discrimination; delivered pricing; fair trade; unfair competition; and public policy.

Prerequisite: ECON 5010, ECON 5020, or equivalent.

ECON5830 - Empirical Industrial Organization

Credits: 3

Focuses on methods of analyzing data and testing hypotheses arising in the field of industrial organization. Much of the material builds on concepts introduced in ECON 5020 along with concepts presented in econometrics classes. Although many of the relevant concepts are primarily covered in ECON 5820, this course can be taken before or without taking ECON 5820.

Prerequisite: admission to the graduate program in Economics and Finance.

ECON5890 - Seminar in Advanced Economics

Credits: 1-3

Max Credit (Max. 9)

An advanced tutorial-conference course intended to give graduate students experience in research in economic problems.

Prerequisite: consent of instructor.

ECON5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

ECON5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ECON5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ECON5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

ECON5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

ECON5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Ecosystem Science and Management

ESM4990 - Topics

Credits: 1-4
Max Credit (Max 8)

Topics pertaining to ecosystem science and natural resource management. Intended to accommodate instruction in various specialized subjects being offered for the first time or not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Prerequisite: Appropriate to the particular topic will be specified in the course advertisement.

ESM5995 - Topics

Credits: 1-4
Max Credit (Max 8)

Topics pertaining to ecosystem science and natural resource management. Intended to accommodate instruction in various specialized subjects being offered for the first time or not offered on a regular basis. Students may enroll in more than one section of this course provided topics are different.

Prerequisite: Appropriate to the particular topic will be specified in the course advertisement.

Educational Leadership

EDAD1000 - Schools and Democracy

Credits: 1

Content-based course focuses on critical-thinking skills necessary to understand, analyze, and produce knowledge within the framework of educational inquiry; introducing students to the themes of the agenda of the National Network for Educational Renewal which focuses on the purpose of schools in America.

USP 2003-2014 Code U3I

EDAD5010 - Leadership for Curriculum Development

Credits: 3

Focuses on leadership skills that support curriculum and curriculum development in student learning and achievement. Key topics include: K-12 curriculum alignment; incorporating standards and community values; curriculum development, implementation, and evaluation; equity and access for diverse learning needs; and effective communication about curriculum.

Prerequisite: Admission to program or consent of instructor.

EDAD5020 - Leadership for School Organization

Credits: 3

Focuses on organizational leadership. Topics include: history of organizational leadership, leadership styles, change process, strategic planning, federal, state, and local governance as well as politics, power and policy, and school operations, to include budget, facilities, scheduling, recruitment, selection and induction.

Prerequisite: Admission to program or consent of instructor.

EDAD5030 - Leadership for School and Community Relations

Credits: 3

Focuses on the leadership role of the principal in building relations with students, staff, family, and community. Topics include school culture and climate, community and family involvement, public relations and communications, student discipline, and crisis management.

Prerequisite: admission to program or consent of instructor.

EDAD5040 - Leadership for Instruction

Credits: 3

Focuses on the principal as instructional leader. Topics include: developing a school vision of learning; employing effective instructional strategies, supervision and evaluation of teacher performance; integration of supervision, evaluation, and student achievement with professional development and professional learning communities, and instructional trends and issues within diverse learning communities.

Prerequisite: Admission to program or consent of instructor.

EDAD5050 - Leadership for Democratic Schools

Credits: 3

Designed to increase awareness of future school leaders of the principles of equity and excellence in education focused on democratic practices. Topics include democratic educational practices, ethical leadership, renewal of public schools, and educational leadership in urban, suburban, and rural communities, and in ethnically and socio-economically diverse settings.

Prerequisite: graduate standing.

EDAD5060 - Capstone in Educational Leadership

Credits: 3

Designed to assist the student in the creation of their master's program final project, which will be used as the written demonstration of mastery of the course outcomes as well as meeting the educational leadership (ELCC) standards.

Prerequisite: complete Core (EDAD) courses.

EDAD5080 - Introduction to School Law

Credits: 3

This course provides legal foundations of U. S. public schools and examines general principles of statutory and case law and applies judicial decisions to educational environments. Additionally, the course focuses on legal responsibilities, constraints, and opportunities for school leaders.

Prerequisite: admission into UW Educational Administration, K-12.

EDAD5150 - Assessment, Accountability, and Student Learning

Credits: 3

Focuses on the knowledge and skills necessary to lead schools in the alignment of standards, assessment, and instruction. Topics include analysis and interpretation of assessment results and educational data, recent history and current context of educational accountability in Wyoming, role of assessment and accountability in improving student learning.

Prerequisite: graduate standing.

EDAD5580 - Supervised Internship in Educational Administration

Credits: 1-8
Max Credit (Max. 12)

Expand student knowledge by providing an intensive clinical experience in educational administration along with other activities that involve practical experiences with peers and with practising K-12 administrators.

Prerequisite: Admission into the UW Educational Leadership Principal Certificate, Master's or EdD Doctoral program.

EDAD5600 - Educational Leader as Manager of Human Resources

Credits: 3
Focuses on linking theory related to organizations (including Bureaucracy Theory), decision-making and organizational effectiveness with effective practices in management of organizational personnel.

Prerequisite: graduate standing.

EDAD5650 - Educational Leader as Communicator

Credits: 3
Focuses on inter- and intra-personal communication skills; group facilitation; organization and community public relations; parent and community involvement; negotiation; and conflict management.

Prerequisite: graduate standing.

EDAD5700 - Educational Leader For Instruction

Credits: 3
Focuses on the study of curriculum development and implementation, instructional practice, assessment and staff development.

Prerequisite: graduate standing.

EDAD5720 - Educational Leader as Change Agent

Credits: 3
Focuses on the study of change theory, change processes, change dynamics, decision-making models, and implementation of change in the organization setting.

Prerequisite: graduate standing.

EDAD5750 - Educational Leader for the Board and Community

Credits: 3
Concentrates on the administrator as the leader of an organization's board and community.

Prerequisite: graduate standing.

EDAD5800 - Educational Leader as Resource Manager

Credits: 3

Focuses upon the successful management and operation of the organizations fiscal resources, facilities, and support services. Includes work in the areas of transportation, food service, funding and budget, compensation, facilities, legal issues, calendar, special education, and policy influence.

Prerequisite: graduate standing.

EDAD5815 - Advanced School Law

Credits: 3

Designed to provide advanced information concerning K-12 school law as it relates to public education. Students will acquire a deeper understanding of legal issues that routinely arise in the K-12 school setting.

Prerequisite: Admission into the UW Educational Leadership EdD/ PhD Doctoral Program.

EDAD5850 - Educational Leader as Direction Setter

Credits: 3

Investigates how the educational leader can effectively create a futuristic vision and mission for the organization after assessing the existing culture and climate, and organizational readiness for change.

Prerequisite: graduate standing.

EDAD5870 - Seminar in Legal Issues

Credits: 1-6

Max Credit (Max. 8)

Advanced students in education work together intensively on current issues and problems relevant to educational administration and participate in systematic, critical interpersonal evaluation. Eight hours are permitted on a doctoral program.

Prerequisite: consent of instructor and graduate standing.

EDAD5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.
Prerequisite: advanced degree candidacy.

Educational Research

EDRE5000 - Educational Research

Credits: 3

EDRE5530 - Introduction To Research

Credits: 3

Basic concepts of educational research design, statistics, and measurement. The focus of the course is on reading and critiquing research articles, both quantitative and qualitative, and includes an introduction to statistics. Students learn to conduct a review of the literature relevant to a specific research problem.

Prerequisite: graduate standing.

EDRE5550 - Action Research

Credits: 3

Introduces experienced classroom teachers to action research methodology. Action research studies will be reviewed and critiqued. Students will learn to plan, implement, and write up an action research study conducted in a classroom setting.

Prerequisite: graduate standing.

EDRE5580 - Supervised Internship

Credits: 1-8

Max Credit (Max. 12)

EDRE5600 - Introduction to Quantitative Research

Credits: 3

Basic concepts of educational survey research design, statistics, and measurement. The focus is on descriptive statistics (measures of central tendency, variability, percent and frequency distribution, bivariate correlation, graphical displays, testing hypotheses about proportions). Students develop questionnaires and plan, conduct, and report on a survey study.

EDRE5610 - Educational Research: Group Comparison Research

Credits: 3

Concepts of experimental and ex post facto research designs, statistics, and measurement. The focus is on inferential statistics. Students construct attitude scales and other instruments used in research and they plan, conduct, and report on a group comparison study.

Prerequisite: EDRE 5600.

EDRE5620 - Correlational Research

Credits: 3
Max Credit 3

Concepts of correlational research, statistics, and measurement. Focus is on the design and analysis of results from correlational studies. Statistical topics include MANOVA, multiple regression, factor analysis, and discriminant analysis. Includes measurement topics in classical measurement theory and additional topics in validity and reliability. Plan, conduct, and report on a correlational study.

Prerequisite: EDRE 5600

EDRE5630 - Educational Research IV: Multivariate Research

Credits: 3
An advanced educational research, statistics, and measurement course. Design and analysis of results from studies with several dependent and independent variables. Includes multivariate statistics such as MANOVA, discriminant analysis, canonical correlation, multidimensional scaling, structural equation modeling, logit regression. Measurement topics include generalizability theory, item response theory, equating, and standard setting.

Prerequisite: At least one of the following: EDRE 5610 or EDRE 5620

EDRE5640 - Introduction to Qualitative Research

Credits: 3
This course introduces qualitative research. Students will explore the foundations, social science theories, methods, and processes of qualitative research and will learn to critically evaluate published research. Emphases will include basic design principles, trustworthiness, and analysis. Students will engage in original data collection and will produce a mini report.

Prerequisite: EDRE 5530.

EDRE5645 - Phenomenology, Case Study, and Grounded Theory in Qualitative Research

Credits: 3
In-depth examination of phenomenology (with great emphases on its philosophical roots), qualitative case study, and grounded theory. Characteristics of each qualitative tradition will be explored by way of critiquing published peer reviewed journal articles. Students will conduct and report on a mini study.

Prerequisite: EDRE 5640

EDRE5655 - Ethnography and Narrative Inquiry in Qualitative Research

Credits: 3
In-depth exploration of narrative inquiry (including autoethnography) and educational ethnography. Issues of ethics, politics, diversity, and the researcher's role will be integral to the course. Students will conduct and report on a mini

study.

Prerequisite: EDRE 5630

EDRE5660 - Dissertation/Thesis Prospectus Writing

Credits: 3

Prepare graduate students to plan, develop, and write research proposals suitable for a dissertation/thesis. In consultation with the committee chair, students will focus on their own problem for research, conduct a literature review, choose appropriate methods for investigating the problem, and write a research proposal.

Prerequisite: at least two of the following: EDRE 5600, EDRE 5610, EDRE 5620, EDRE 5630, EDRE 5640, EDRE 5645, EDRE 5655, EDRE 5670, or EDRE 5870.

EDRE5670 - Mixed Methods Research

Credits: 3

Provide an overview of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. Specifically, they will learn the definition, history and foundations, and specific types of mixed methods designs. Also plan a mixed methods research study.

Prerequisite: EDRE 5600 and EDRE 5640.

EDRE5870 - Seminar

Credits: 1-8

Max Credit (Max. 8)

EDRE5890 - Directed Professional Study

Credits: 1-6

Max Credit (Max. 9)

EDRE5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

Educational Studies

EDST1101 - First-Year Seminar: So You Want to be a Superhero? Exploring the Teaching Profession

Credits: 3
USP 2003-2014 Code U5FY

EDST1200 - Practicum I

Credits: 1

The course is designed to build educator identity, develop skills in observing the physical environment of educational settings, understand the responsibilities and ethics of educational professionals, and engage in and reflect on service learning activities. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Prerequisite: Background check on file in the Teacher Preparation and Advising Office.

EDST2200 - Practicum 2

Credits: 1

Students will display an educator identity; develop skills in creating student-centered and culturally relevant/sustaining learning environments; apply ethical principles in service-learning activities; and collaborate in planning, implementing and reflecting on activities for learners. Students engage in classwork and at least 30 clock hours of practicum in educational settings.

Restricted Education major

Prerequisite: EDST 1200 or equivalent and Sophomore standing. Background check must be on file in the Teacher Preparation and Advising Office prior to start of practicum experiences.

EDST2450 - Foundations of Development and Learning

Credits: 3

Introduces students to the essential understandings of child/adolescent development and learning. The course emphasizes various theories and concepts related to student development with attention to cognitive, social, and physical perspectives.

When Offered (Offered each semester)

USP 2003-2014 Code U3CS

USP 2015 Code U5H

Former Course Number [EDFD 2450]

Prerequisite: 2.500 UW institutional GPA.

EDST2475 - Independent Studies

Credits: 1-3

Max Credit (Max. 9)

Offers students the opportunity to complete special course-related work independently under direction of a college faculty member. Directed readings are done and projects are completed. Requires at least two conferences with instructor.

Former Course Number [EDUC 2475]

Prerequisite: consent of instructor.

EDST2550 - Educational Assessment

Credits: 3

Max Credit 3

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. Topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs

Prerequisite: Declared Education major; Completed Q requirement with a C or better; UW Cumulative GPA of 2.5 or higher

EDST3100 - Teacher as Practitioner

Credits: 3

Culminating practicum experience prior to student teaching. Practicum experiences are integral. This course links theory and philosophy to classroom practice. Focuses on three major topics: planning for educational experiences, instructional models and strategies, and managing classrooms.

When Offered (Offered each semester)

USP 2003-2014 Code U3O, U3WB

USP 2015 Code U5C2

Former Course Number [EDUC 3000]

Prerequisite: successful completion of COM I, grade of C or better in Q, 2.75 cumulative GPA, grade of C or better in EDST 3480, grade of C or better in ITEC 2360, grade of C or better in EDEX 2484, junior standing, current State of Wyoming substitute teaching license. Concurrent enrollment in EDST 3101.

EDST3101 - Practicum 3

Credits: 2

This course provides students with practicum experiences in a K-12 classroom, investigating theory and best practices regarding classroom management and instructional strategies. Students will engage in coursework and at least 45 hours of practicum interacting with their mentor teacher and students, planning and teaching lessons, implementing classroom management, and reflecting.

USP 2015 Code U5C2

Prerequisite: Concurrent enrollment or successful completion of EDST 3100 with a C or better, Successful completion of COM1 with a C or better, 2.75 cumulative GPA, Successful completion of EDST 2450, ITEC 2360, EDEX 2484, EDST 2550, EDST 1200, and EDST 2200 with a C or better, junior standing, and current State of Wyoming substitute teaching license.

EDST3200 - Foundations of ESL Learning

Credits: 3

This course introduces students to basic principles of second language acquisition and factors that influence the processes. Understanding the processes of language acquisition, will better equip students to plan instructional strategies that facilitate English language learners' language.

EDST3480 - Diversity & the Politics of Schooling

Credits: 3

Designed to acquaint the student with philosophical, social, and political influences on North American education, to develop an understanding of the qualities of critical thinking, to raise awareness of critical issues in education, to develop an understanding of individual differences, diversity, and multiculturalism.

USP 2003-2014 Code U3D

Prerequisite: grade C or better in EDST 2450, junior standing, 2.50 cumulative gpa.

EDST3550 - Educational Assessment

Credits: 2

Designed to introduce students to key concepts and issues in classroom and standardized education assessments. topics include standards, reliability and validity of norm- and criterion-referenced assessments, and special issues surrounding the assessment of students with special needs. Addresses the basic ideas of classroom test design.

Prerequisite: Prerequisites: Grade of C or better in a Q course, and EDST 2480, 2.75 Cumulative UW Institutional GPA.

EDST3600 - Preparing Teaching Abroad

Credits: 1

Prepares students for teaching abroad, by helping them to adapt to and understand the host country's culture, history, geography, political, and economic context. The course provides the practical information necessary for a foreign experience by exploring the principles of culture shock, ethnocentrism, cultural relativism, and the fundamentals of cross-cultural communication. Offered S/U only.

Restricted Educaiton Majors Only

Prerequisite: Junior or Senior class standing or consent of instructor. Acceptance into advanced standing of the teacher education program.

EDST4000 - Foundations of Education for a Diverse Society

Credits: 3

Designed to acquaint students with philosophical, social, and political influences of North American education; to develop an understanding of the qualities of critical thinking for reflective teaching; to raise awareness of contemporary critical issues in education; to develop an understanding of individual differences, diversity, and multiculturalism. Practicum included.

Prerequisite: earned bachelor's degree from an accredited institution, a cumulative UW institutional GPA of 2.750 or better and EDST 2450.

EDST4050 - Diversity & Social Justice: Theory and Practice

Credits: 3

Addresses multiple disciplines. Expose students to domestic and international perspectives of diversity and social justice. This course will move students from a theoretical lens of diversity and social justice toward becoming change agents.

Prerequisite: Junior/senior standing and WMST/CHST/AMST/AAST/NAIS 1040.

EDST4110 - Foundations of American Indian Education

Credits: 3

Examines cultural, geographical, linguistic, spiritual, political and societal factors before, during and after colonization of the Americas. Definitions and day-to-day realities of terms like ethnocentrism, cultural relativism, assimilation, acculturation, and institutional racism. Development of insights into positive teacher-pupil-community relationships that honor culture and language differences and enhance achievement.

Cross Listed NAIS 4110.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: NAIS 1001 and 15 credit hours of NAIS or EDST.

EDST4600 - Diversity & Social Justice Minor Capstone

Credits: 3-6

Max Credit (Max. 6)

In community-engaged learning, sometimes called "service learning," students have the privilege of gaining work experience with the benefit of a community mentor. This course is a seminar class with a field experience. Students will meet as a group as well as assigned a community field placement experience.

EMAT5800 - Culture, Power, and Identity in Mathematics Education

Credits: 3

The purposes of this course is to examine issues related to culturally specific pedagogy (CSP), power and identity in the mathematics classroom. Students will explore ways to integrate CSP in the classroom to facilitate mathematics teaching and learning with the goal of developing students' interest and motivation in mathematics.

Restricted Graduate students only

Electrical Engineering

EE1010 - Introduction to Electrical and Computer Engineering

Credits: 1

Introduction to Electrical and Computer Engineering through a laboratory experience. Students perform both hardware and computer laboratory exercises in a wide range of areas of electrical and computer engineering.

EE1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

EE2220 - Circuits and Signals

Credits: 4

Review of sinusoidal steady state analysis and ac power. Mutual inductance and linear transformers. Laplace transform. Laplace transform in circuit analysis. Frequency dependent circuits, including RLC circuit resonance. Magnitude and phase response, complex poles and zeros. Bode plots. Filter circuit fundamentals. Fourier series. Laboratory.

When Offered (Offered spring semester only)

Former Course Number [3320]

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE2390 - Digital Systems Design

Credits: 4

Binary logic, digital logic gates, reduction of Boolean expressions, combinational logic design. MSI and LSI combinational logic ICs, flip-flops, synchronous and asynchronous sequential systems design, MSI and LSI sequential system ICs, and algorithmic state machines.

Prerequisite: COSC 1010 or COSC 1015 or COSC 1030 or ES 1060, and MATH 2205.

EE3150 - Electromagnetics

Credits: 3

A thorough study of static electric and magnetic fields using vector methods with an introduction to dynamic fields.

Prerequisite: ES 2210, or ES 2215 and ES 2216, MATH 2210, and PHYS 1220 or concurrent enrollment.

EE3220 - Signals And Systems

Credits: 3

Discrete and continuous-time signals and systems. Topics include linear time-invariant systems; convolution; difference equations; FIR and IIR systems; sampling, aliasing, reconstruction, and quantization. Frequency domain concepts include discrete and continuous Fourier transforms, Z-transforms, system frequency response, Laplace transform properties, and applications of digital filters and DFT analysis.

When Offered (Offered spring semester only)

Prerequisite: EE 2220.

EE3311 - Electronics I

Credits: 3

Physical characteristics and models of semiconductor devices with application to electronic circuit design. Diode circuits, single transistor amplifiers, biasing, and load lines. Prerequisites: (PHYS 1220 or PHYS 1320 or EE 3150), and EE 2220 or concurrent enrollment.(Offered fall semester only)

Prerequisite: PHYS 1220 or PHYS 1320 or EE 3150, and EE 2220 or concurrent enrollment

EE3312 - Electronics I Laboratory

Credits: 1

Hands on interactive laboratory investigation of the physical characteristics of semiconductor devices and applications in electronic circuit design. Study of diode and transistor characteristics as well as diode circuits and single transistor amplifier circuit design, construction and testing. Prerequisites: EE3311 must be taken either concurrently or as a prerequisite. (Offered fall semester only)

When Offered (Offered fall semester only)

Prerequisite: EE3311 must be taken either concurrently or as a prerequisite.

EE3331 - Electronics II

Credits: 3

Current sources, differential and multistage amplifiers; circuits with ideal and non-ideal operational amplifiers; low and high band frequency response, feedback, stability, gain and phase margin of amplifiers; output stages, class A and push-pull; monolithic operational amplifier; oscillators; transistors as switches and introduction to digital electronic circuits. Laboratory. Prerequisites: (EE 3310 or EE 3311) and EE 2220. (Offered spring semester only)

When Offered (Offered spring semester only)

Prerequisite: (EE 3312 or EE 3311) and EE 2220

EE3332 - Electronics II Laboratory

Credits: 1

Hands on interactive laboratory investigation of transistor switching circuits, differential amplifiers, current sources, amplifier frequency response, feedback, output stages, and oscillators. Prerequisites: EE 3312 and EE 3331 concurrently (offered spring semester only).

Prerequisite: EE 3312 and EE 3331 concurrently

EE3510 - Electric Machines and Power Systems

Credits: 4

Polyphase AC circuits; single phase and polyphase transformers; AC synchronous and induction machines;

introduction to power systems and per unit system; transmission line parameters; steady-state operations of transmission lines; power flows; transient stability; synchrophasor system and its applications.

Prerequisite: ES 2210, or ES 2215 and ES 2216.

EE3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/COSC 3890/ES 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

EE4075 - C++ with Numerical Methods for Engineers

Credits: 4

Introduction to the fundamentals of practical engineering programming, using specific applications of numerical methods to demonstrate these principles. The use of an object oriented approach using C++ in an efficient manner is emphasized. Other solution approaches, including C and Matlab will be discussed as appropriate.

A&S College Core 2015 Credit will not be allowed in both EE 4075 and ES 3070.

Prerequisite: MATH 2205 and (COSC 1010, COSC 1015, or ES 1060) and (MATH 2250 or MATH 2310) or consent of instructor.

EE4220 - Probabilistic Signals and Systems

Credits: 3

Fundamentals of probability and statistics for engineers; reliability in engineering systems; random processes, statistical estimation, auto/ cross correlation and power spectral density functions and linear filtering of random signals.

Prerequisite: MATH 2210 and EE 3220. EE 3220 may be taken concurrently.

EE4245 - Digital Signal Processing

Credits: 3

Sampling and oversampling A/D's; FIR and IIR digital filter design, effects of quantization, practical realizations; applications of the discrete and fast Fourier Transform (DFT and FFT); correlation, periodograms, window effects, multi-rate techniques, multi-dimensional signal processing, and other topics in digital signal processing.

Prerequisite: EE 3220.

EE4250 - Network Synthesis

Credits: 3

Characterization and design specification of analog filters. First and second order passive and active filters. Butterworth and Chebyshev filter responses. Audio frequency active filter synthesis using operational amplifiers. Introduction to frequency transformations and sensitivity.

Prerequisite: EE 2220 and EE 3331 or concurrent enrollment.

EE4300 - Microwave and RF Circuits

Credits: 3

Analysis and design of microwave and RF circuits with applications to communication and radar systems. Review of transmission line concepts and the Smith Chart, scattering parameters, microstrip lines, and matching networks. Analysis and design of microwave and RF amplifiers, oscillators, and mixers.

Dual Listed EE 5300.

Prerequisite: EE 3150 or PHYS 1220, EE 3331 or concurrent enrollment, or consent of instructor.

EE4330 - Electronic Systems Design

Credits: 4

Analog integrated circuits such as amplifiers (operational, instrumentation, isolation, video, transconductance, comparator, logarithmic and exponential); voltage regulators; analog multipliers and dividers; AC to DC converters; sample and hold circuits; digital to analog converters; analog to digital converters; function generators; phase locked loops. Includes design procedures for electronic systems implementing analog integrated circuits. Laboratory.

Former Course Number [4370]

Prerequisite: EE 2390 and EE 3331.

EE4340 - Semiconductor Materials and Devices

Credits: 3

Physical properties of semiconductor materials and devices, including crystal lattices and energy bands, carrier generation, transport, and recombination. PN, metal-semiconductor, and heterojunction operation. Field Effect Transistors, including Metal Oxide Semiconductor (MOSFET), Junction (JFET), Metal Semiconductor (MESFET), and High Electron Mobility (HEMT) transistors. Bipolar Junction (BJT) and Heterojunction (HBT) Transistor operation.

Cross Listed PHYS 4340.

Prerequisite: PHYS 1220 or PHYS 1320.

EE4345 - Hardware Digital Signal Processing

Credits: 3

Hands-on introduction to real-time digital signal processing. Programming DSP algorithms using C on modern DSP hardware. Students gain deep understanding of fundamental DSP concepts by implementing selected applications including sampling, reconstruction, FIR and IIR filters, signal generation, and FFT. Hardware concepts include EDMA, memory maps, interrupts, buffered serial ports.

Prerequisite: EE 3220.

EE4360 - VLSI Design

Credits: 3

Introduction to CMOS processing, MOS fundamentals including devices models; switching and timing; analog subcircuits and amplifiers; inverters and CMOS gates; concept of standard cells and fully custom design; use of SPICE, digital simulation, and chip layout and verification software.

Prerequisite: EE 2390, and EE 3331 or concurrent enrollment.

EE4390 - Microprocessors

Credits: 3

Design of microcomputers, controllers and instruments which use microprocessors. Semiconductor memory design, CPU architecture, bus structure and timing, input-output interfaces and devices, assembly language programming, assemblers, compilers, editors and simulators. Emphasizes design techniques. Laboratory.

When Offered (Normally offered once a year)

Prerequisite: EE 2390.

EE4440 - Communication Theory

Credits: 3

Amplitude and angle modulation and demodulation; digital baseband and carrier communication systems; performance of communication systems; and current topics in communication systems.

When Offered (Normally offered once a year)

Prerequisite: EE 3220 and EE 4220.

EE4490 - Hardware Descriptive Language (HDL) Digital Design

Credits: 3

Hardware Description Language design of digital systems. Industrial CAD tools are used to produce a functional description of hardware that is both simulated and then synthesized into hardware. Methods to describe both combinational logic and synchronous devices are given. Devices such as CPLDs and FPGAs are targeted in this design process. Emphasizes design techniques.

Prerequisite: EE 2390.

EE4510 - Power Systems

Credits: 3

Electric power distribution and transmission. Distribution systems, transmission line calculations, installation and protection; substations, corona, protective relaying and carrier current communication and telemetering. Introduction to system stability studies.

Prerequisite: ES 2210 and EE 3510.

EE4590 - Real Time Embedded Systems

Credits: 3

Emphasizes a systems approach to real time embedded systems. Students are expected to apply methodical system design practices to designing and implementing a microprocessor-based real time embedded system. Students employ a robot-based educational platform to learn the intricacies of real time embedded systems, distributed processing, and fuzzy logic. Students learn processor input/output interfacing techniques. Students use state-of-the-art design and troubleshooting tools.

Dual Listed EE 5590.

Prerequisite: EE 4390.

EE4620 - Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers.

Prerequisite: EE 2220 or ME 3020.

EE4621 - Honors Automatic Control Systems

Credits: 3

Control theory and design methods focused on application. Feedback. Performance limits. Routh-Hurwitz, root locus, Nyquist. Nonminimum-phase systems. State feedback. Proportional-Integral-Derivative control. Lead/lag. High-order compensation. Discrete controllers. Honors students will at the end of the semester design a high-performance control system for a sophisticated plant with realistic feedback limitations.

Prerequisite: EE 2220 or ME 3020.

EE4800 - Problems in _____

Credits: 1-6

Max Credit (Max. 6)

Section 1 is individual study. Other sections are group study by seminar or class format. Features topics not included in regularly offered courses.

Prerequisite: consent of instructor.

EE4820 - Senior Design I

Credits: 2

Students choose a senior design project and complete the preliminary design. This stage of senior design includes investigation of alternative solutions that meet the project's requirements, cost analysis, and building the prototype circuit. Periodic oral and written project progress reports are required.

When Offered (Offered fall semester only)

Prerequisite: EE 2220, EE 2390, and EE 3312 or concurrent enrollment, plus 6 hours of 4000 level EE/BE classes, or concurrent enrollment. COM2 must be passed with a C or better grade.

EE4830 - Senior Design II

Credits: 2

Students complete the senior design project partially designed in EE 4820. The final result of the senior design project includes assembly of a PC board hardware that meets the project's requirements and final report describing the design procedure, designed hardware and software, and results of final testing. Periodic oral and written project progress reports are required.

When Offered (Offered spring semester only)

Prerequisite: EE 4820 and selected courses in the area of the design project.

EE4870 - Computer Network Hardware

Credits: 4

Basic LANs, Ethernet LAN architecture, and classical Ethernet CSMA/CD MAC protocol. 10Mbps, 100 Mbps, and gigabit Ethernet architecture. Introduction to switching, queuing theory, architecture, design and performance analysis of switch fabrics. Architecture, design, algorithms and performance analysis of Routing. Cellular Networks. TCP/IP Protocol.

Prerequisite: EE 2390.

EE4990 - Advanced Microprocessors

Credits: 3

Architecture and instruction set of Intel family of microprocessors; Intel System Development Kit and its monitor program; Microsoft Macro Assembler (MASM) and Visual C/C++ Express; modular programming; High level language compilers of object code; Interface design issues of peripheral devices to Personal Computer.

Prerequisite: EE 4390.

EE5210 - Systems Theory

Credits: 3

Review of linear time-invariant systems theory. Laplace, Fourier, and Z-transforms. Introduction to complex variable theory and its application to integral transform inversion. State variable formulation of physical systems. Application of linear algebra and matrices to the analysis of finite-state constant differential systems. Controllability and observability.

Prerequisite: EE 4620.

EE5300 - Microwave and RF Circuits

Credits: 3

Analysis and design of microwave and RF circuits with applications to communication and radar systems. Review of transmission line concepts and the Smith Chart, scattering parameters, microstrip lines, and matching networks. Analysis and design of microwave and RF amplifiers, oscillators, and mixers.

Dual Listed EE 4300.

Prerequisite: EE 3150 or PHYS 1220, EE 3331 or concurrent enrollment, or consent of instructor.

EE5330 - Advanced Electronic Systems Design

Credits: 3

Theory of errors. High accuracy: multiplexers; voltage references; sample and hold circuits. Amplifiers: programmable gain; high speed voltage feedback; current feedback. Noise in integrated circuits. Pulse code modulation ADC; sigma delta ADC; oversampling; undersampling. Analog and digital audio systems. CD players. Superheterodyne and digital receivers. Signal transmission and conditioning. Hardware design techniques.

Prerequisite: EE 4330 and EE 4210.

EE5340 - Advanced Semiconductor Material and Devices

Credits: 3

Advanced semiconductor materials and device concepts including noise in semiconductors, heterostructure and quantum fundamentals, high power materials and devices, high performance transistors including the MESFET, HEMT, and HBT. Also discusses GUNN and IMPATT diodes, Resonant Tunneling devices, and future computing devices based on the quantum properties of semiconductors.

Prerequisite: EE 4340.

EE5350 - Optoelectronic Semiconductor Materials and Devices

Credits: 3

Optoelectronic properties of semiconductor materials and devices. Includes a review of the basic electronic properties of semiconductor materials, epitaxial growth, optical properties including absorption and emission of light, effects of quantum confinement and strain, and Heterostructures. Operation and optimization of basic optoelectronic devices including: photodetectors, LEDs Lasers, and modulators.

Prerequisite: EE 4340.

EE5360 - Digital VLSI Design

Credits: 3

Digital building blocks, stick diagrams, CMOS cells and arrays, CMOS digital subsystems and systems. Chip design software such as layout, simulators and digital synthesis using HDL. Digital design verification and timing issues.

Prerequisite: EE 4360.

EE5390 - Computer Architecture

Credits: 3

Examines the various methodologies used in the design of high-performance computer systems. Topics include CISC and RISC architecture and instruction sets, pipelining, instruction-level parallelism, memory hierarchy (including cache) design and computer networks.

Prerequisite: EE 4390.

EE5400 - Introduction To Robotics

Credits: 3

Representation of pose using Euler angles, quaternions and homogeneous coordinate transformations. Forward and inverse kinematics of rigid body manipulators. Velocity and force transformation in a rigid robot using Jacobians. Trajectory generation using splines. Robotic vision for depth measurement. Analysis of actual robotic systems.

Prerequisite: MATH 2250.

EE5410 - Neural and Fuzzy Systems

Credits: 3

Theory of feed forward and recurrent neural networks. Supervised and unsupervised learning theories. Fuzzy logic and systems. Associative memories. Matching and self-organizing networks. Application of neural and fuzzy systems.

Prerequisite: EE 3220.

EE5430 - 3-D Computer Vision

Credits: 3

This course is intended to provide a mathematical framework for describing three dimensional imaging and computer vision. Topics include 3-D coordinate transforms, image formation, camera calibration, reconstruction from two views, SIFT detection, hidden Markov models, Markov random fields, and "bag-of-words" visual description.

Prerequisite: EE 4220, MATH 2250.

EE5440 - Geometric/Deep Computer Vision

Credits: 3
Max Credit 3

Geometric methods including exponential coordinates for describing rigid motion, quaternions, pinhole models of cameras, and models of stereo cameras. Reconstruction of a 3D scene. Deep learning methods using convolutional and other neural networks will be used for computer vision. CNN architectures, classification, optimization, detection, identification, segmentation, GANs, and transformers are covered.

Prerequisite: MATH 2250

EE5450 - Topics in Robotics

Credits: 3

Topics vary between offerings, but include exponential coordinates for describing rigid motion, parallel machines, robotic vision, actuators and sensors, calibration, quaternions, motion planning, multifinger grasp dynamics, singularities, and singularity-free design, and limited-DOF machines.

Prerequisite: MATH 2250 senior or higher level standing and permission of the instructor.

EE5460 - Probabilistic Robotics

Credits: 3

Fundamental theory underlying the robust sensing and planning used in self-driving machines is developed. Topics covered are: Bayesian, Kalman, and Particle Filters; simple ground robot motion models; mobile robot localization; simultaneous localization and mapping; partially observable Markov decision processes.

Prerequisite: EE 4220.

EE5490 - Convex Optimization

Credits: 3

Covers fundamentals of numerical convex optimization. These methods have potential applications in many fields, so the goal of the course is to develop the skills and background needed to recognize, formulate, and solve convex optimization problems. Covers convex sets, convex functions, convex optimization problems and applications.

Prerequisite: MATH 2250 and senior or higher level standing.

EE5590 - Real Time Embedded Systems

Credits: 3

Emphasizes a systems approach to real time embedded systems. Students are expected to apply methodical system design practices to designing and implementing a microprocessor-based real time embedded system. Students employ a robot-based educational platform to learn the intricacies of real time embedded systems, distributed processing, and fuzzy logic. Students learn processor input/output interfacing techniques. Students use state-of-the-art design and troubleshooting tools.

Dual Listed EE 4590.
Corequisite: EE 4390.

EE5600 - Statistical Signal Processing in:

Credits: 2-4
Max Credit (Max. 9)

Topics vary between offerings but include signal detection, feature extraction and pattern recognition, information theory and coding, spectral analysis, identification, speech processing, image processing, and seismic processing.

Prerequisite: EE 4220.

EE5610 - Random Processing Theory I

Credits: 3
Introduction to statistical models. Applications of sampling theorems. Correlation functions and spectra. Shot noise and thermal noise. Introduction to measurements and computational techniques. Nonlinear random processes. Term papers on special problems.

Prerequisite: EE 4220.

EE5620 - Digital Image Processing

Credits: 3
Methodologies and algorithms for processing digital images by computer. Includes gray level transformations, histogram analysis, spatial domain filtering, 2D Fourier transforms, frequency domain filtering, image restoration, and reconstruction of computer tomography (CT) medical images.

When Offered (Offered fall of even-numbered years)
Former Course Number [4530]

Prerequisite: EE 3220 or equivalent background.

EE5625 - Spectral Analysis

Credits: 3
Spectral estimation including nonparametric methods such as Welch and Blackman-Tukey; modern parametric methods for AR, MA and ARMA spectra including Yule-Walker and Levinson-Durbin. Parametric line spectral subspace methods including MUSIC and ESPRIT. Filterbank and spatial methods such as beamforming.

Prerequisite: EE 3220, EE 4220 or equivalent.

EE5630 - Advanced Image Processing

Credits: 3

Introduces students to advanced aspects of image processing (IP), using specific applications to demonstrate these principles. Concepts such as medical imaging; color IP; wavelets and multiresolution IP; image compression; morphological IP; image segmentation, representation, description and understanding are covered.

Prerequisite: EE 5620.

EE5640 - Adaptive Filters and Signal Processing

Credits: 3

Adaptive filtering including eigenanalysis, low-rank modeling, Wiener filters, linear prediction, steepest descent methods, least mean-squares and recursive least squares methods, adaptive beamforming. Performance, convergence, and stability issues. Realization techniques.

Prerequisite: EE 4220.

EE5650 - Object and Pattern Recognition

Credits: 3

Introduces students to both fundamental and advanced aspects of object and pattern recognition, using specific applications to demonstrate these principles. Concepts such as Bayesian, maximum-likelihood, principal components, nonparametric, linear discriminant, multi-layer neural networks, etc., and the trade-offs and appropriateness of classification techniques are covered.

Prerequisite: EE 4220.

EE5660 - System Identification

Credits: 3

Fundamental and advanced topics in identification of system models from measured data. A variety of model structures are studied such as ARX, ARMAX, and State Space. Both non-parametric and parametric identification techniques are investigated with applications to real world systems and data. Experiment design and model validation are also examined.

Prerequisite: EE 4220.

EE5670 - Digital Image Formation

Credits: 3

This course introduces fundamental aspects of practical digital image formation, using specific applications to demonstrate these principles. Standard CCD and CMOS cameras (both still and video) and standard camera lens systems are assumed.

Prerequisite: EE 3220 or equivalent background.

EE5700 - Power Engineering

Credits: 2-6
Max Credit (Max. 6)

Design of transmission lines and distribution systems. Coordination studies. System stability studies, load distribution and dispatching. System interconnections. Correlation of machines and transmission systems.

Prerequisite: EE 3510.

EE5710 - Electric Power Quality

Credits: 3
Max Credit 3

Power quality is gaining increasing interests among both electric utilities and end users of electric power. In this course, a comprehensive introduction to the electric power quality engineering will be given to prepare you for the incoming power quality challenges of the modern power systems. Topics include power quality disturbances and causes, voltage sag and interruptions, electric transient, and harmonics.

Prerequisite: EE 3510 or graduate standing.

EE5740 - Digital Control Systems

Credits: 3
Mathematical models of digital control system components; Sample-and-Hold Device, A/D and D/A conversion, Pulse transfer function, Modified Z-transform; Jury's and Routh-Hurwitz test, Bilinear Transformations, Nyquist Criterion, Root Locus; Frequency Domain Techniques (Bode Diagrams, Nichols Charts); Digital Control Design, Observers; DT state space representation; Sampling and Quantization, Aliasing. Design Project.

Prerequisite: EE 4620.

EE5770 - Non Linear Systems

Credits: 3
Time variable parameter systems, approximation methods for small nonlinearities. Phase-plane methods. The second method of Liapunov. Describing function. Optimum switched systems. Adaptive control systems.

Prerequisite: EE 4620.

EE5880 - Problems In Electrical Engineering

Credits: 1-6
Max Credit (Max. 9)

A graduate special topics course in which advanced developments are studied. Section 1 is individual study. Other sections are primarily seminar format in which participants present reports on the subject under study.

Prerequisite: Prior approval of the instructor is required.

EE5885 - Special Topics in Electrical Engineering

Credits: 1-6
Max Credit (Max. 30)

Features topics not included in regularly offered classes. Normally offered in regular class lecture format; may include a lab component if appropriate.

Prerequisite: Prior approval of the instructor is required.

EE5890 - Reliability of Engineering Systems

Credits: 3
This course will cover general reliability modeling and evaluation; probability and stochastic processes; system modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis, decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Prerequisite: MATH 2310 with a grade of C or better.

EE5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

EE5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EE5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

EE5959 - Enrichment Studies:

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

EE5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 12)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrolled in a graduate degree program.

EE5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate level degree program.

EE5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Elementary Education

EDEL1200 - Introduction to Elementary Education

Credits: 3
This course is designed to introduce first-year elementary education majors to educational issues relevant to teaching, learning, curriculum, assessment, school politics, and special needs of students in elementary settings.

EDEL1430 - Life Science in the Elementary School

Credits: 1
Covers selection of basic life science concepts, materials and curricula appropriate for elementary school. This course parallels the content of LIFE 1020 and concurrent enrollment in LIFE 1020 is expected.

Former Course Number [EDCI 1430]

EDEL2100 - Engaging Family and Community in Schools

Credits: 3

This course examines the relationship between children, families, communities, and teachers. The focus is on strengthening adult-child and parent-teacher relationships in home, school, and community settings. The development of teacher strategies for supportive relationships with socially, culturally, and linguistically diverse families is included.

USP 2015 Code U5H

Prerequisite: EDEC 1020

EDEL2140 - Teaching Literacy in the Elementary School

Credits: 3

Provides an acquaintance with basic assumptions underlying curriculum and processes in literacy and to give opportunity for selecting and using instructional materials.

Prerequisite: ENGL 1010, sophomore standing, admitted into Elementary Education program.

EDEL2170 - Art in the Elementary School

Credits: 3

Provides a foundation for understanding art in order to facilitate the teaching of art and the integration of art education into the elementary school curriculum. Involves both applied reading and studio production. Attention is given to development of artistic skills and meaningful art experiences based on DBAE principles.

USP 2003-2014 Code [CA<>(none)]

Former Course Number [EDCI 3170]

EDEL2280 - Literature for Children

Credits: 3

A survey course, the purpose of which is to prepare prospective elementary teachers and library-media specialists to provide knowledgeable service in the use of print and non-print materials for children. Includes study of evaluative criteria, wide reading, viewing and listening as well as discussion of literature for children.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

Former Course Number [LIBS 2280]

Prerequisite: successful completion of ENGL 1010, sophomore standing, education major.

EDEL3140 - Teaching Reading in the Elementary School

Credits: 2-4

Provides an acquaintance with basic assumptions underlying curriculum and processes in reading and to give opportunity for selecting and using instructional materials.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [EDCI 3140]

Prerequisite: junior standing.

EDEL3710 - Disciplinary/Genre-Based Literacy

Credits: 3

Introduction to instruction in genre-specific and disciplinary appropriate literacy practices, with a focus on characteristics of a variety of genres and disciplines and how those characteristics inform appropriate comprehension instruction.

Prerequisite: EDEL 2140.

EDEL3720 - Literacy Difficulties: Assessment and Instruction

Credits: 3

Focuses on the causes of student difficulties with reading and writing and assessment and instruction for students with such difficulties.

Prerequisite: EDEL 2140.

EDEL3724 - Elementary Science Education

Credits: 3

Includes content and pedagogy in teaching science in the elementary school. Addresses the following topics to encourage the development of scientific literacy: 1) Current national and state science standards; 2) science education pedagogical models; 3) curriculum; and 4) theory translated into instructional planning and practice.

Restricted Elementary Education Majors; ELSP Majors

Prerequisite: Students must have completed at least one of the three required science content courses with a grade of C or better.

EDEL4000 - Becoming a Reflective Practitioner: Practicum

Credits: 2

Part of Phase IIIa of the teacher education program. Practicum experience is integral to EDUC 4250 and must be taken concurrently.

Former Course Number [EDUC 4000]

Prerequisite: 2.500 cumulative GPA, successful completion of EDST 3100 (grade, interview and portfolio).

EDEL4109 - Elementary Humanities Education

Credits: 5

Content and pedagogy to develop the reflective practitioner of teaching humanities in the elementary school. The following themes are addressed: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

Former Course Number [EDUC 4109]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EDST 2550; concurrent enrollment in EDEL 4309 and EDEL 4409.

EDEL4309 - Elementary Literacy Education

Credits: 2-5

Max Credit (Max. 6)

Encompasses content and pedagogy to develop the reflective practitioner for teaching literacy in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4309]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; Grade C or better in EDST 3100, successful completion of specific content courses required in major; grade C or better in EDST 2550. Concurrent enrollment in EDEL 4109 and EDEL 4409.

EDEL4409 - Elementary Math/ Science Education

Credits: 5

Max Credit (Max. 6)

Includes content and pedagogy in teaching math/science in the elementary school. Addresses the following themes: curriculum; theory translated into instructional planning and practice; practices that promote effective learning; behavior and relationships; and teaching strategies.

USP 2003-2014 Code U3WC

Former Course Number [EDUC 4409]

Prerequisite: 2.750 cumulative GPA; 2.500 content GPA; grade of C or better in EDST 3100; successful completion of specific content courses required in major; grade of C or better in EST 2550; concurrent enrollment in EDEL 4109 and EDEL 4309.

EDEL4410 - Elementary Mathematics Educ

Credits: 5
Max Credit 5

The focus of the course pertains to student learning, teaching, curriculum, assessment, and technology in elementary mathematics classrooms for pre-service teachers. Students will extend their understanding of mathematics content and gain an appreciation for the interplay between theory and practice in mathematics education.

USP 2015 Code U5C3
Restricted Declared ELEM, ELEM/SpEd or TES Grad Cert

Prerequisite: Declared ELEM, ELEM/SpEd or TES; 2.75 cum. GPA; 2.5 content GPA; grade of C or better in EDST 3100/3101 or EDCI 5550; completion of required content courses in major.

EDEL4500 - Residency in Teaching

Credits: 1-16
Comprises the final professional academic semester of the teacher education program. A full-time residency, including a period of being intensively mentored and coached, a period of independent teaching and a period of team teaching.

Cross Listed EDSE 4500.
Former Course Number [EDUC 4500]

Prerequisite: 2.750 cumulative GPA, 2.500 GPA in major content courses, completion of all content courses.

EDEL4740 - Field Studies in (TOPIC)

Credits: 1-12
Offered only through extension services. Broad and flexible and can be utilized in numerous situations to meet local needs. Credit in this course is not applicable toward advanced degrees.

When Offered (Offered based on sufficient demand and resources)
Former Course Number [EDCI 4740]

Prerequisite: 6 hours of education.

EDEL4975 - Independent Study

Credits: 1-3
Max Credit (Max. 6)

Primarily for upper-division students who can benefit from independent study with minimal supervision. Given to allow interested students to pursue specific aspects of curriculum and instruction.

Cross Listed EDSE 4975.
Former Course Number [EDCI 4975]

Prerequisite: 12 hours of education courses and consent of instructor.

Engineering Science

ES1000 - Orientation to Engineering Study

Credits: 1

Skills and professional development related to engineering. Involves problem solving, critical thinking and ethics, as well as activities to help transition to university environment. Required of all freshmen entering engineering curricula.

USP 2003-2014 Code U3I, U3L

A&S College Core 2015 Students with credit in UNST 1000 may not receive credit for this course.

ES1002 - Introduction to Engineering Information Literacy

Credits: 0.5

Offers transfer students the opportunity to satisfy the College of Engineering and Applied Science requirements for the Information Literacy and the initial O component of the University Studies Program.

USP 2003-2014 Code U3L

ES1060 - Introduction to Engineering Problem Solving

Credits: 3

An overview of the methodology and tools used in the engineering profession for analyzing problems. Example problems are solved using spreadsheet tools and structured programming language. Laboratory.

Prerequisite: MATH 2200 or concurrent enrollment.

ES1061 - Engineering Problem Solving with Spreadsheets

Credits: 1

An introduction to engineering problem solving through the use of computer spreadsheets. Topics include functions, referencing, conditional statements, graphs, trendlines, and iterative solvers.

Prerequisite: MATH 1400 or MATH 1450 or ACT Math Score of 25 or Math Placement Exam score of 4.

ES1062 - Introduction to Structured Programming

Credits: 1

Introduction to structured programming through the use of computer applications. Topics include built-in functions, user functions, logical operators, flowcharts, pseudo code, selection structures, repetition structures, and plotting.

Prerequisite: ES 1061.

ES1063 - Graphical Communication and Solid Modeling

Credits: 1

An introduction to solid models and graphical communication. Topics include geometric relationships, solid parts, solid assemblies, constraints, orthogonal projection, multiview representation, dimensioning, and drawing annotation.

Prerequisite: MATH 1400 or MATH 1450 or ACT Math Score of 25 or Math Placement Exam score of 4.

ES1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

ES2110 - Statics

Credits: 3

Vector statics of particles and rigid bodies, including equilibrium in two and three dimensions, center of gravity, centroids, distributed loads, truss analysis, simple structures and machines, friction, and internal actions.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2120 - Dynamics

Credits: 3

Vector dynamics of particles and rigid bodies, including impulse-momentum and work-energy.

Prerequisite: ES 2110 and MATH 2205; PHYS 1210 or concurrent enrollment.

ES2210 - Electric Circuit Analysis

Credits: 3

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. Laboratory.

Prerequisite: MATH 2205 or concurrent enrollment.

ES2215 - Electric Circuit Analysis Lecture

Credits: 2

Basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasors, three-phase circuits. No laboratory.

Restricted Available for Outreach students only.

Prerequisite: MATH 2205.

ES2216 - Electric Circuit Analysis Laboratory

Credits: 1

Laboratory activities focusing on basic concepts of electric circuit theory, dependent sources, network theorems, first and second order circuits, phasers, three-phase circuits.

Prerequisite: ES 2215.

ES2310 - Thermodynamics I

Credits: 3

Macroscopic systems involving energy and its various forms. Fundamental concepts including energy, mass and entropy balances. Pure substances and availability. Reversible and irreversible processes.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2330 - Fluid Dynamics

Credits: 3

Incompressible flow of ideal and real fluids. Potential and stream functions; similitude and dimensional analysis.

Prerequisite: MATH 2210 and either ES 2120 or PHYS 1210.

ES2410 - Mechanics of Material I

Credits: 3

Mechanics of deformable bodies, including energy methods.

Prerequisite: ES 2110 and MATH 2205 .

ES2800 - Physical Computing

Credits: 3

Emphasizes implementing python programs on the Raspberry Pi and then interfacing with power stages, mobile platforms, sensors and input/output devices. The goal is designing systems that sense the world, make decisions based on those sensations

Prerequisite: EE 1101 or ES 2210 or concurrent enrollment in ES2210 or Consent of the Instructor

ES3001 - International Systems Engineering

Credits: 3

This 4-week service learning course will offer students hands-on experience in fabricating, assembling and installing a system as part of a team. Students will learn about materials, welding, electrical systems, and aerodynamics, all the while experiencing international life and cultures.

Prerequisite: MATH 2310.

ES3010 - Culture and Engineering in Latin America

Credits: 3

Engineering and Culture of Latin America - A study of ancient engineering problems in Latin America that are applicable to civil engineering. Students will be exposed to cultural aspects that influenced Mayan infrastructure.

USP 2015 Code U5H

Prerequisite: ES 2110 or PHYS 1210.

ES3020 - Comparison of Entrepreneurial Ecosystems

Credits: 3

The goal of this course is to expose students to different entrepreneurial ecosystems and let them think about how the environment, legal, technical, cultural, and economic, could impact their entrepreneurial endeavors. The class will accomplish this by visiting a developed country (e.g. Spain) and a developing country (e.g. Morocco) to learn about the ecosystems and talk with entrepreneurs to see how the forces impacted their startups.

Cross Listed ENTR 3020.

ES3100 - Internship Prepared

Credits: 1

The purpose of this Internship Preparation course is to prepare students for applying to internships in all applicable facets. Students will learn how to build their resume, write job specific cover letters, search for positions, and communicate with employers effectively. This course is a self-study with assignments given weekly. Students will be required to complete assignments and schedule individual appointments with an instructor in order to follow up on assignments.

Prerequisite: 6 credits within your discipline.

ES3890 - Engineering Honors Program Research Methods

Credits: 3

A general approach to scientific research and graduate school preparation. Topics will include: finding a research mentor, literature search skills, using the scientific method for approaching a research problem and developing a research methodology, writing a research funding proposal, delivering a research presentation and selecting and applying for graduate school.

Cross Listed ARE 3890/ATSC 3890/CE 3890/CHE 3890/COSC 3890/EE 3890/PETE 3890.

Restricted Restricted to College of Engineering Honors Program students.

Prerequisite: sophomore standing.

ES4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing research mentor, obtaining approval by said mentor, and communicating the student/ faculty partnership to the appropriate staff in their home department.

Cross Listed ATSC 4580/BE 4580/CE 4580/CHE 4580/COSC 4580/ESE 4580/PETE 4580.

Restricted Must be in the Engineering Honors Program.

Prerequisite: junior or senior standing.

ES4910 - Survey of Engineering Management

Credits: 3

Offers a survey of a variety of topics related to engineering management. The objective is to introduce students to some of the nontechnical aspects of engineering practice and management.

Prerequisite: junior standing in an engineering degree program.

ES4920 - Entrepreneurship for Engineers

Credits: 3

Traditional engineering education does not prepare graduates for work in entrepreneurial ventures. The goal of this course is to have students demonstrate skills in developing business ideas, performing preliminary market research, estimating cash flow, and launching a business.

Prerequisite: 9 hours within an engineering discipline and junior standing.

ES4970 - Engineering CO-OP

Credits: 1

Max Credit (Max. 6)

Provides a mechanism for students on engineering co-op to maintain continuous registration and have the co-op experience reflected on their transcript. Credit earned will not normally count toward graduation credit.

Prerequisite: must be involved in an engineering co-op experience.

ES5600 - Research Data Management

Credits: 3

A general approach to research data management for graduate students and researchers. Topics include: the case for data management, data management planning, meeting grant requirements, formatting and organizing, storing and transferring, legal and ethical issues, strategies for research teams, sharing data, and publishing, citing, and rights to research data.

Cross Listed GRAD 5600/LBRY 5600.

Prerequisite: graduate standing.

HYDR5980 - Hydrologic Sciences

Graduate level course designed for students who are involved in research for their dissertation project. Also used for student whose coursework is complete and are writing their dissertation.

Prerequisite: Enrolled in a graduate level degree program.

Energy Resources

ERS1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ENR 1000.

USP 2003-2014 Code U3O

USP 2015 Code U5PN

ERS1101 - First-Year Seminar (Energy, Environment and Economy)

Credits: 3

ERS 1101 Energy, Environment, and Economy is designed to meet the First Year Seminar (FYS) requirement of the 2015 University Studies Program. Through focused research and critical examination of diverse information, students will explore how energy resource use and development has shaped Wyoming: past, present, and future. The course will actively engage students in meaningful issues through an interdisciplinary approach to promote thoughtful and informed dialogue targeting Wyoming's energy resource use and development

USP 2015 Code U5FY

ERS1300 - Oil: Business, Culture, and Power

Credits: 3

A multi-disciplinary approach to understanding how oil affects the international relations and commerce. The relationships between oil technology, social and political institutions, the unique cultures in oil-producing regions will

be investigated in case studies.

Cross Listed ECON 1300.
USP 2003-2014 Code U3CS, U3G
USP 2015 Code U5H
A&S College Core 2015 ASG

ERS1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed GEOL 1650.
USP 2015 Code U5PN

ERS2010 - Introduction to Land Management

Credits: 3
Max Credit 3

Provides an introduction to land management in the various energy industries. Covers the knowledge and skills needed by land professionals including survey systems, land descriptions, mineral ownership, title examination, leases, surface use agreements, and contracts frequently used in the industry. In addition, provides an overview of ethical issues that arise and professional conduct expected in the industry.

ERS2500 - Communication Across Topics in Energy

Credits: 3

Students will develop interdisciplinary communication skills from an Energy Resources perspective. Communication will include oral, digital, and written forms. Audiences for communication projects will often be live, and from a variety of backgrounds.

USP 2015 Code U5C2
Prerequisite: WA/COM1.

ERS3010 - Air Quality Management

Credits: 3

Provides an overview of air quality management approaches. In this course an interdisciplinary approach is adopted that includes diverse information from physical, natural and socioeconomic systems. With consideration of global and local issues this class focuses upon the energy sector.

Prerequisite: CHEM 1000 or CHEM 1020 and WA or COM1.

ERS3400 - Energy Markets & Policy

Credits: 3

This course provides an economic analysis of recent developments in energy markets and policies.

Cross Listed ECON 3400.

Prerequisite: ECON 1000, ECON 1010, ECON 1020, ECON 1200, ECON 1300, ECON 1400, or ERS 1300.

ERS4010 - Exploration Geoscience

Credits: 3

The purpose of this course is to provide students with information and skills necessary to understand the oil and gas modeling process from exploration to production. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, reservoir characterization, reservoir production, well planning and decision making.

Cross Listed GEOL 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

ERS4050 - Solar Energy Conversion

Credits: 3

Provides an overview of the science behind current and future solar thermal and photovoltaic technologies. Environmental aspects, legal issues and cost associated with solar energy will also be included.

Cross Listed CHEM 4050.

When Offered (Offered spring semester)

Prerequisite: CHEM 1030 or CHEM 1060 and PHYS 1210 or PHYS 1310 and MATH 2200.

ERS4100 - Property I

Credits: 3

Property I addresses the nature of property ownership and the rights associated with property as well as the acquisition and transfer of ownership rights in property and the sharing of ownership rights over time, including estates, future interest, and concurrent estates.

ERS4105 - Property II

Credits: 3

Property II covers rights inherent to the ownership of property and public limitations on those rights.

Prerequisite: ERS 4100.

ERS4110 - Law of Contracts

Credits: 3

The Law of Contracts addresses the formation of a contract and the meaning of agreements and the justification of non-performance and breach.

Prerequisite: MGT 1040 and WB/C

ERS4120 - Federal Public Land Law

Credits: 3

Federal Public Land Law addresses public interest as the central principal of public land natural resource management. The course examines the acquisition and disposition of the public domain, federal and state regulatory authority, and the management of hard rock, energy, and range resources.

ERS4130 - Oil and Gas Law

Credits: 3

Focuses on the basic legal rules and principles governing the ownership and development of oil and gas, derived from a combination of property, contract, administrative, tort, and constitutional law.

ERS4135 - Advanced Energy Law

Credits: 3

Covers oil, gas and other energy development and financing arrangements including assignments, leases, farmouts, joint operating agreements, purchase and sale agreements, service agreements and marketing agreements. Covers oil, gas and other energy development regulation, including, oil and gas conservation commission and state and federal environmental regulation. Introduces other forms of energy development, including, but not limited to, renewables, nuclear, CCUS, hydrogen, and the various agreement and regulatory nuances of such energy development. Covers ethical issues that may arise in energy development.

USP 2015 Code U5C3

Prerequisite: ERS 4130.

ERS4960 - Energy Field Studies

Credits: 1-3

Various facets of energy resource management and development are covered by visits to oil and gas wells, coal mines, power plants, wind farms, and other energy production and research sites. A trip is normally planned for 5 to 6 days.

Prerequisite: WB; ERS 1000/ENR 1000 or ECON 1300/ERS 1300. Undergraduate Research.

ERS4965 - Undergraduate Research

Credits: 1-3

Max Credit 6

Research activities on an energy related project of limited scope or as part of a laboratory project of greater scope under the advisement of a faculty member. Students will work 4 to 10 hours per week. Students will submit a written report summarizing the results of the research.

ERS4970 - Internship

Credits: 1-3
Max Credit (Max. 3)

A formalized internship designed to provide students with relevant practical experience in the energy sector allowing synthesis and application of principles in energy science to energy asset management.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4975 - Global Experience in Energy

Credits: 2-4
Max Credit (Max. 4)

A 1-3 month integrative energy experience in China or Australia. Students will participate, in collaboration with partnering energy professionals, in outcomes focused education and research programs designed to address globally relevant challenges. Students will gain a global perspective within the cultural context of the partner institution.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300; QB; SP or SE.

ERS4985 - Seminar

Credits: 1-3
Max Credit (Max. 3)

Energy professionals, including accredited professional landmen, practicing attorneys, and other energy professionals will present a colloquium styled course to bridge conceptual content with realistic workforce focused applications.

Prerequisite: ERS 1000/ENR 1000 or ECON 1300/ERS 1300 and WA and QB.

ERS4990 - Topics in Energy Resource Development and Management

Credits: 1-6
Max Credit (Max. 6)

Special topics in contemporary energy development and management will be offered in response to changing industry and academic demands. The specific subject matter is based on faculty requirements and workforce innovation.

Energy Systems Engineering

ESE3005 - Engineering Experimentation

Credits: 3

A combined lecture/laboratory course introducing students to experimental methods in the context of dynamics. Written technical communication, intermediate structured programming, experimental design, fundamental statistics, and uncertainty methods (numerical and analytical) are emphasized. Collaborative writing and teamwork is introduced.

Cross Listed ME 3005.

Former Course Number [2010; 2020]

Prerequisite: Completion of the ME Success Curriculum, ES 1060; ES 2120.

ESE3020 - System Dynamics

Credits: 3

Theoretical and experimental study of the dynamics of linear and non-linear lumped parameter models of mechanical, electrical, electronic, fluid, thermal and mixed systems.

Cross Listed ME 3020.

Prerequisite: Completion of the ME Success Curriculum, ES 2210 and MATH 2310.

ESE3040 - Thermodynamics II

Credits: 3

Consideration of advanced thermodynamic topics including Maxwell's relations, compressible flow, and combustion. Applications to design of refrigeration cycles, humidification systems, and Rankine cycles.

Cross Listed ME 3040.

Prerequisite: Completion of the ME Success Curriculum, CHEM 1020 and ES 2310.

ESE3060 - Numerical Methods for Engineers

Credits: 3

Numerical solutions of problems commonly encountered in mechanical engineering including differentiation, integration, differential equations, system of linear and nonlinear equations, and optimization. The structured programming approach will be emphasized and applications from solid mechanics, thermal fluid sciences, materials science, and dynamic systems will be covered.

Cross Listed ME 3060.

Prerequisite: Completion of the ME Success Curriculum, ES 1060 and corequisite of MATH 2310.

ESE3160 - Thermal/Fluid Science Lab

Credits: 3

A laboratory course to introduce students to experimental methods for temperature measure and pressure/flow characteristics of fluids. Continuation of experience with communication (written, oral, and digital), intermediate programming, experimental design, data analysis, and teamwork skills is emphasized.

Cross Listed ME 3160.

Former Course Number [2140; 2160]

Prerequisite: Completion of the ME Success Curriculum, ES 2330; ME 3005/ESE 3005.

ESE3360 - Fundamentals of Transport Phenomena

Credits: 3

Basic concepts of heat and mass transfer and their applications to problems involving engineering analysis and design. Topics include steady-state and transient conduction, free and forced convection (heat and mass), radiation and heat exchangers.

Cross Listed ME 3360/ARE 3360.

Prerequisite: Completion of the ME Success Curriculum, MATH 2310, ES 2310 and ES 2330.

ESE4060 - Energy Systems Design I

Credits: 3

First of a two-course design sequence constituting a capstone design experience on an energy-related project. Multidisciplinary teams prepare a project proposal or Statement of Qualifications, generate a morphological study of their project, develop mathematical models of their design, and prepare project plans and specifications. Project management and methods are also presented.

USP 2015 Code U5C3

Prerequisite: Completion of the ME Success Curriculum, ESE 3040 and ESE 3360.

ESE4070 - Energy Systems Design II

Credits: 3

Continuation of a two-course design sequence. The design teams refine their designs, fabricate the project, test the project for compliance with the design specifications, write a comprehensive engineering design report including socioeconomic factors, and prepare and deliver a presentation of the project in a public forum.

USP 2003-2014 Code U3WC

Prerequisite: Completion of the ME Success Curriculum, ME 4060/ESE 4060 and WB.

ESE4455 - Combustion Engineering

Credits: 3

The basic physics and chemistry of combustion engineering and its applications are covered, including thermodynamics, chemical kinetics, multicomponent conservation equations, laminar premixed and nonpremixed flames, detonations, droplet combustion, modern engines and energy systems. Cross-listed with ME 4455 and dual-listed with ME 5455.

Prerequisite: Completion of the ME Success Curriculum, ME 3040/ESE 3040 and ME 3360/ARE 3360/ESE 3360.

ESE4460 - Solar and Geothermal Engineering

Credits: 3

An introduction to the engineering of solar-powered energy systems, including evaluation of the energy resource, passive design considerations, economics of active solar systems, design of flat plate collectors and water heating systems, and design of concentrating collectors for larger building or electrical generation applications. Design

considerations for geothermal energy systems for both small-scale and commercial-scale applications.

Cross Listed ME 4460.

Prerequisite: Completion of the ME Success Curriculum, ESE 3360 or ME 3360 or ARE 3360.

ESE4461 - Computational Fluid Dynamics I

Credits: 3

Max Credit 3

An introduction to the fundamental techniques, theory, and application of computational fluid dynamics. Topics include the process for practical CFD problem solving using a commercial CFD software, discretization methods, numerical stability, consistency and convergence, solution techniques (explicit and implicit methods), and verification and validation procedures.

Cross Listed ME 4461

Dual Listed ME 5461

ESE4470 - Wind and Ocean Energy Engineering

Credits: 3

Introduction to the harvesting of wind and ocean energy, including discussions of the wind resource, wind turbine aerodynamics, blade materials, turbine dynamics, electrical systems, control systems, and energy storage. An overview of ocean energy capture systems is also presented.

Cross Listed ME 4470.

Prerequisite: Completion of the ME Success Curriculum, ES 2210, ES 2310, ES 2330, and ES 2410.

ESE4474 - Topics in Energy Systems Engineering

Credits: 1-3

Max Credit (Max. 4)

Directed research in mechanical engineering.

Prerequisite: Completion of the ME Success Curriculum, ME 3005/ESE 3005.

ESE4580 - Honors Undergraduate Research

Credits: 3

An independent research experience for undergraduate students enrolled in the Engineering Honors Program. Before registering for this class, students are responsible for discussing their interests with faculty, identifying a willing faculty research mentor.

Prerequisite: junior or senior standing.

English

ENGL1010 - College Composition and Rhetoric

Credits: 3

A composition course emphasizing expository writing, analytical reading, and academic and civic argumentation in a range of print, oral, and digital genres. A grade of C or better is required to meet the COM1 requirement. Students may not have credit in both ENGL 1010 and UWYO 1000, 1110 or 1210.

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

ENGL1030 - Intellectual Community in Cinema Etc

Credits: 3

Introduces students to a range of issues within the humanities through the analysis of film, television, and theater.

USP 2003-2014 Code U3I

ENGL1080 - Introduction to Women's Studies

Credits: 3

An introduction to key issues in women's studies. A topical examination of women's participation in and relationship to institutions of society, such as family and school, as well as processes and activities, such as work, art, and politics in historical and cross-cultural analysis.

Cross Listed GWST 1080.

USP 2003-2014 Code U3D, U3CH

USP 2015 Code U5H

A&S College Core 2015 ASD

ENGL1101 - First-Year Seminar

Credits: 3

USP 2003-2014 Code U5FY

ENGL2005 - Writing in Technology and the Sciences

Credits: 3

Develops writing styles specifically suited to technological and scientific fields of study. Includes focus on disciplinary conventions and styles as well as audience/readership considerations. Introduces techniques for data interpretation and visualization, and helps students analyze, understand, and adapt common field genres and formats.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: successful completion of WA/COM1.

ENGL2015 - College Composition and Rhetoric II: College and Career

Credits: 3

ENGL 2015 helps students become stronger writers, speakers, and thinkers, and features assignments that explore issues that pertain to students' majors and future careers. Students will engage in different genres for a range of audiences, revise substantially, and practice critical thinking in academic, civic, and professional contexts.

USP 2015 Code U5C2

Prerequisite: ENGL 1010/Synergy 1010 (COM1).

ENGL2020 - Literature, Media and Culture

Credits: 3

Introduces students to the basic tools of literary, film, and media analysis and develops students' critical writing, digital analysis, and oral communication skills. No expertise in literary criticism or film theory is necessary in this course; all majors are welcome.

USP 2003-2014 Code U3CH, U3WB

USP 2015 Code U5C2

Prerequisite: COM1. COM1 may not be taken concurrently.

ENGL2025 - Introduction to English Studies

Credits: 3

This course provides an introduction to English Studies, covering the history of English as an academic field, the options available within it, and possible career paths. Students will also be taught the skills they need to succeed as English majors, including critical reading and writing, and literary and rhetorical analysis.

USP 2015 Code U5C2

Prerequisite: COM1; English major status.

ENGL2035 - Writing for Public Forums

Credits: 3

Introduction to professional writing that focuses on analyzing and producing texts designed to influence public opinion. Genres may include letters, editorials, web pages, pamphlets, e-mail, speeches, and position papers. Focuses on skills in collaboration and use of technology necessary for ethical, effective participation in public discourse.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: WA/COM1.

ENGL2125 - Writing Tutor Pedagogy/Practicum

Credits: 3

Prepares students for professional employment as writing tutors in a writing center environment. Students will gain a detailed understanding of the history of writing centers, the development of writing center studies and theory, and the

innovative trends in contemporary writing center practices and organization.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: ENGL 1010 or COM1/transfer equivalent with a grade of B or higher; 3.000 GPA or higher.

ENGL2170 - The Bible as Literature

Credits: 3

A study of the Bible as a body of literary expression with an introduction to critical technique appropriate to such study.

A&S College Core 2015 ASG

Prerequisite: WA/COM1.

ENGL2190 - African Literature

Credits: 3

A study of the modern literature of Africa written in English, against its background of the continent's oral traditions.

Prerequisite: WA/COM1.

ENGL2240 - Arthurian Legend

Credits: 3

An introduction to both Arthurian romance and writing about literature. Traces the Arthurian Legend from its roots in Welsh mythology through its development in the Middle Ages and to its current manifestations in popular culture.

Prerequisite: WA/COM1; sophomore standing.

ENGL2340 - Native American Culture and Literature

Credits: 3

Broad cultural study of Native Americans, past and present. Emphasizes folklore and literature.

Cross Listed NAIS 2340.

USP 2003-2014 Code U3CH, U3D

A&S College Core 2015 ASD

Prerequisite: WA/COM1.

ENGL2345 - American Indians in Hollywood Film

Credits: 3

Examines the ways Hollywood film has constructed various forms of racial identity for American Indians.

Cross Listed NAIS 2345.
USP 2003-2014 Code U3CH, U3D
A&S College Core 2015 ASD
Prerequisite: WA/COM1.

ENGL2350 - Introduction to African American Literature

Credits: 3

Provides an introduction to the major works of the African American literary tradition. Covering a wide range of fiction, poetry, drama, and autobiography, the course introduces students to some of the most exciting works of literature ever to appear in America.

Cross Listed AAST 2350.
USP 2003-2014 Code U3D, U3WB
A&S College Core 2015 ASD
Prerequisite: WA/COM1.

ENGL2360 - Mexican American Literature

Credits: 3

Discusses literary reflections of Chicanoism. Studies literature of the Hispanic Southwest, Mexican-American folklore and the contemporary Chicano movement.

Cross Listed LTST 2360.
USP 2003-2014 Code U3CH, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD
Prerequisite: WA/COM1.

ENGL2370 - Blues and African American Lit

Credits: 3

This course examines scholarship on blues music (the first form of African American popular music) as well as literature that employs blues themes. Specific attention is given to the discourse of authenticity.

Cross Listed AAST 2370

ENGL2410 - Literary Genres

Credits: 3
Max Credit (Max. 6)

Studies specific genres of literature. Emphasis will vary (poetry, fiction, drama, etc.) from semester to semester, depending on curricular needs.

USP 2003-2014 Code U3CH, U3WB
USP 2015 Code U5H
Prerequisite: WA/COM1.

ENGL2420 - Survey in Rhetoric & Writing

Credits: 3

This course traces the emergence of major pedagogical traditions in rhetoric & writing studies. Students will develop an appreciation for the diverse intellectual traditions the larger field embraces, & will understand how the identities, activities, and approaches of rhetoric & writing studies scholars have changed over time & been influenced by broader cultural contexts.

USP 2015 Code U5H

Former Course Number 2410

Prerequisite: COM 1/English 1010 or concurrent enrollment

ENGL2425 - Literatures in English I

Credits: 3

Surveys major figures and literary movements in literatures written in English through 1750.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2430 - Literatures in English II

Credits: 3

Surveys major figures and literary movements in literatures written in English 1750-1865.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2435 - Literatures in English III

Credits: 3

Surveys major figures and literary movements in literatures written in English 1865-present.

USP 2003-2014 Code U3CH

Prerequisite: WA/COM1.

ENGL2440 - Rhet & Writing Pedagogy

Credits: 3

Max Credit 3

This course traces the emergence of major pedagogical traditions in writing studies. Students will develop an appreciation for the diverse intellectual traditions the larger field embraces, and will understand how the identities, activities, and approaches of writing studies scholars have changed over time and influenced by broader cultural contexts.

USP 2003-2014 Code U5C3

Prerequisite: ENGL 1010 /COM 1 Equivalent

ENGL2490 - Studies in (TOPIC)

Credits: 1-6

Presents a variety of topics in literature.

Prerequisite: WA/COM1.

ENGL3000 - Literary Theory

Credits: 3

An introduction to critical theory as a methodology within literary studies. The course covers major schools of theory and major figures within those schools. Students will read, discuss, and write about literary texts and cultural artefacts by placing them in dialogue with important works of both theory and literary criticism.

Prerequisite: ENGL 2025 and junior standing.

ENGL3010 - Approaches to Rhetoric, Composition Pedagogy, and Professional Writing

Credits: 3

Introduces common methods, concepts, and theories emphasized in these interrelated intellectual traditions. It asks students to examine how research traditions have developed alongside each other over time, and prepares students to design a multimodal research project.

Prerequisite: ENGL 2025 and junior standing.

ENGL3020 - Culture, Communication, Work

Credits: 3

Examines individual identity and group cultures, and how they influence communication in the workplace. Helps students develop strategies for working across cultural differences and for effective negotiation and conflict resolution skills.

USP 2003-2014 Code [(none)<>COM3]

Prerequisite: Completion of COM2.

ENGL3100 - Tribal Literatures of the Great Plains

Credits: 3

Familiarizes students with American Indian literatures of the Great Plains. The Great Plains region is the locus of much historical and contemporary significance in regard to American Indian cultures. The literature of Great Plains Indians allows students to confront and reexamine the national narratives surrounding American Indians.

Cross Listed NAIS 3100.

USP 2003-2014 Code U3D, U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of NAIS or ENGL.

ENGL3150 - World Literature

Credits: 3

Max Credit (Max. 6)

Encompasses reading and analysis of major works representative of significant periods or literary forms in the history of literature.

USP 2003-2014 Code U3CH, U3G

Prerequisite: WA and WB/COM1 and COM2.

ENGL3200 - Topics in: Medieval Literature

Credits: 3

Max Credit (Max. 12)

This course focuses on the language, literature, history, and culture of England between 800 and 1485, including influential texts from continental and Arabic traditions. Students will be taught to read Middle English and the class will include a translation component.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3300 - Topics in: Renaissance Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, Europe, and the "new world" from 1500-1642. Covers major literary movements and genres, and contextualizes materials by discussing the historical, cultural, and political developments of the period. Examines how literature is produced and consumed in the sixteenth century. Specific focus varies by section.

Prerequisite: COM1 and 6 hours of 2000-level literature courses.

ENGL3330 - Global Shakespeare in Performance

Credits: 3

Max Credit (Max. 12)

Shakespeare's works are constantly being reinterpreted around the globe, because their cultural capital invites many cultures to rebrand Shakespeare as their own. While helping us to see universal connections, recorded re-interpretations provide opportunities for viable cross-cultural analysis, as we explore and compare the hot-button cultural issues

addressed through global performance.

A&S College Core 2015 ASG

Prerequisite: COM1.

ENGL3340 - Philosophy in Literature

Credits: 3

Max Credit (Max. 6)

Examines central themes in literary works with philosophical significance; studies related general issues. Issues include questions of interpretation, criticism, and translation, as well as the possibility of direct philosophical influence on authors.

Cross Listed ENGL 3340.

Prerequisite: one course in philosophy or one course in literature or consent of instructor.

ENGL3400 - Topics in: Eighteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

Topics in eighteenth-century American and/or British literatures. Readings situated amid the historical and social developments of the era, including the expansion of mercantilism and slavery, the spread of secularism, the rise of print capitalism, and the emergence of new ideas of self and authorship. Subject matter varies by section.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3500 - Topics in: Nineteenth-Century Literature

Credits: 3

Max Credit (Max. 12)

This course surveys authors, movements, and/or genres significant to 19th Century American or British literature, and contextualizes materials by discussing the historical, cultural, and political developments of the period. COM1 and 6 hours of 2000-level literature courses in ENGL.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3600 - Topics in: 20th Century Literature

Credits: 3

Max Credit (Max. 12)

Surveys important authors and texts from Britain, the U.S., and around the world from 1900 to present-day. Covers major literary movements and genres, including modernism and postmodernism, and contextualizes materials by

discussing the historical, cultural, and political developments of the period. Examines how literature is produced in our contemporary moment.

Prerequisite: COM1, ENGL 2025, and any one of the following: ENGL 2425, ENGL 2430, ENGL 2435, ENGL 2340, ENGL 2350, or ENGL 2360.

ENGL3610 - Non-Western Women Writers

Credits: 3

Examines literature written by women in non-western cultures. The geographical region, time period, and genres of literature may vary by semester. Analyzes representations of such topics as family, marriage, sexuality, community, and colonialism as expressed in fiction, drama, literary non-fiction, and/or poetry.

Prerequisite: ENGL 1010 or GWST 1080; junior standing.

ENGL3710 - Gender: Humanities Focus

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity, and class.

Cross Listed ART 3710/GWST 3710.

USP 2003-2014 Code U3Ch

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

ENGL4000 - 21st Century Issues in Professional Writing

The capstone course in the professional writing minor and also satisfies the COM 3 USP requirement. This spring, we will spend some time constructing a theoretical framework geared toward understanding key issues in the study and practice of professional and technical communication. We'll start with some foundational material, looking at the role of rhetoric, design, and audience in increasingly digital professional writing spaces and then move to more focused study of ethics, visual rhetoric, and the impact of technology on professional communication, among other things. More traditionally academic (journal review) and professional (e.g., usability test and documentation) projects will range widely and include both individual and collaborative work done in different media for different audiences, some academic, some professional. Students will develop a final portfolio project at the end of the term.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

ENGL4010 - Technical Writing in the Professions

Credits: 3

Enhances professional writing skills applicable to a variety of professions. Includes audience analysis and adaptation, information design and use of visuals, and a range of formats and genres. Emphasizes clarity and precision of language. May feature primary research and problem-based or service-learning projects.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WA and WB/COM1 and COM2; junior or senior standing.

ENGL4020 - Editing for Publication

Credits: 3

Theory and practice of editing in the contexts of book, magazine, newspaper, and web-based publications. Standard editing practices for using grammar, proofreading marks, and computer editing tools.

Prerequisite: WA/COM1, WB/COM2 (ENGL 2035 and ENGL 3000 recommended).

ENGL4025 - Writing for the Web

Covers a variety of issues relevant for composing in the 21st century. As students learn to design and generate effective writing for a particular audience in a digital environment, they will also develop skills with advanced web and print research, basic HTML programming language, and standard web design software. Prerequisites: WB or COM2 and junior standing.

When Offered U3L, U3WC

USP 2003-2014 Code U5C3

Restricted Cannot be enrolled in one of the following Classes:

Freshman (FR)

ENGL4030 - Writing for Magazines

Credits: 3

Students write a variety of articles that would be appropriate for submission to a magazine. Feedback is given through class workshops and consultation with the instructor. Award-winning articles are read and discussed. The business aspect of magazine writing is also covered.

Prerequisite: COM1, COM2, and junior standing.

ENGL4040 - Rhetoric, Media, and Culture

Credits: 3

This class will guide us through the ways in which popular culture shapes the way that we view ourselves and other, and gives us a vocabulary to describe this phenomenon, critique it, and even push back against it.

USP 2003-2014 Code [(none)< >COM3]

Prerequisite: COM1 and COM2.

ENGL4061 - Rhetorical Theory and Criticism

Credits: 3

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 4061.

Dual Listed ENGL 5061.

USP 2015 Code U5C3

Prerequisite: COMM 1040 and COJO 3040 or ENGL 2035.

ENGL4070 - Film Directors:

Credits: 3

Max Credit (Max. 6)

Offers an intensive examination of representative films by selected film makers.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4075 - Writing for Non-Profits

Credits: 3

Designed for students interested in working in the non-profit sector. Explores rhetorical, political, and social dimensions of writing and communicating in the non-profit world and features intensive study of special topics and problems related to non-profit communication, including activism, grant writing, organizational rhetoric, and non-profit genres. Content varies.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: WB/COM2.

ENGL4080 - Film Genre Studies (TOPIC)

Credits: 3

Max Credit (Max. 6)

Offers structural, film historical, and political analyses of selected major film genres.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4090 - Film and Religion

Credits: 3

Movies use religion to convey messages; they debate religious issues and use religion to debate non-religious issues. This course analyzes how film makers use religion and religious themes to transform religions into advocates for social issues and to shape religion's role in society. Popular films drawn from many genres.

Prerequisite: 6 hours of 2000-level or higher literature courses or religion courses.

ENGL4230 - Greek Tragedy

Credits: 3

Reading and discussion of major plays by Aeschylus, Sophocles, and Euripides, together with examination of the performance and social context of Greek drama, its use of traditional myths, and selected issues in contemporary scholarship on the tragedies.

Cross Listed CLAS 4230/THEA 4230.

When Offered (Offered in spring in alternate years)

Prerequisite: WB or COM2.

ENGL4270 - Classical Epic Poetry

Credits: 3

Reading and discussion of major works of Greek and Latin epic poetry, centered on Homer and Vergil. Also includes consideration of the background of these works (both mythological and historical) and the development of the epic tradition in the ancient world.

Cross Listed CLAS 4270.

Prerequisite: WB or COM2.

ENGL4450 - African American Novel

Credits: 3

Considers aesthetic dimension and cultural matrix of novels written by Black Americans.

Cross Listed AAST 4450.

USP 2003-2014 Code U3D

Prerequisite: AAST 1000, any AAST 2000 level course, junior/senior standing, six hours of 2000-level literature courses in ENGL.

ENGL4455 - Slavery and Freedom

Credits: 1-4

Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 4455.

Dual Listed ENGL 5455.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: AAST 1000, any AAST 2000-level course, and junior/senior standing, or six credit hours of literature courses in ENGL.

ENGL4460 - American Indian Literature

Credits: 3

Advanced critical study of the history of American Indian literature, emphasizing the authors' views of social change.

Cross Listed NAIS 4460.

USP 2003-2014 Code U3WC

A&S College Core 2015 ASD

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4470 - Studies in Chicano Folklore

Credits: 3

Provides a survey of the origins, development and contemporary folklore of the Mexican American Chicano people of the United States with comparative relation to Mexico and other groups in the United States.

Cross Listed LTST 4470.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: LTST 1100 and WA/COM1.

ENGL4480 - Regional Literature of the US: The West

Credits: 3

Encompasses major themes and writers in western American literature.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4600 - Studies in (TOPIC)

Credits: 1-6

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in American, English, or other literatures.

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4610 - Special Studies Abroad in (TOPIC)

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: 6 hours of 2000-level literature courses.

ENGL4620 - Independent Reading in (TOPIC)

Credits: 1-3

Involves independent study and research experience in given topic, person, movement in literature.

Prerequisite: 6 hours of 2000-level literature courses, consent of instructor, and permission of department chair.

ENGL4630 - English Honors Thesis

Credits: 1-3

Max Credit (Max. 3)

Directed study under the supervision of an English honors thesis chairperson. Results in production of an English honors thesis. Maximum of three credits of ENGL 4630 can be applied to the degree.

Prerequisite: consent of the Director of the English Honors Program, instructor and department chair.

ENGL4635 - English Department Honors

Credits: 0

Satisfactory completion of this course indicates that English Departmental Honors have been conferred on the student.

Prerequisite: successful completion and defense of English Honors thesis.

ENGL4640 - Studies in Emerging Fields and Approaches

Credits: 3

Max Credit (Max. 12)

Presents from semester to semester a variety of significant topics in emerging fields or approaches to literature written in English.

A&S College Core 2015 ASG

Prerequisite: six hours of 2000 level literature courses.

ENGL4780 - History of the English Language

Credits: 3

Considers major sources of change in the English language historically, as well as some of the internal and external catalysts for the process. Identical to ANTH 4780.

Prerequisite: ENGL 4750.

ENGL4785 - Linguistics, Language Teaching and Social Context

Credits: 3

Introduces prospective teachers of English as second language to the basic components of language and to the social aspects of human language use. Explores a variety of concepts about language: how it is used and perceived, how

languages change, how diverse cultures respond to such changes.

Cross Listed LANG 4785.

Prerequisite: WB/COM2.

ENGL4830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed ART 4830/GWST 4830.

Dual Listed ENGL 5830.

USP 2003-2014 Code U3CA

A&S College Core 2015 ASG

Prerequisite: ART 2020, GWST 1080/ENGL 1080.

ENGL4970 - Writing Internship

Credits: 3

Students work 6-8 hours per week as "writing interns" for a private business or public agency, performing specific writing/editing tasks for that client. Students are supported and enabled through a series of classroom sessions and individual meetings with the course instructor. Formal progress reports and a comprehensive final report are required.

Prerequisite: successful completion of ENGL 4010, ENGL 4020, or 4050.

ENGL4999 - Senior Seminar

Credits: 3

This course is the capstone course in the English major. Subject matter varies by section. In all sections students will exercise skills acquired in the major (close-reading, historical analysis, application of theory) to explore significant texts and to reflect on the nature of English study today.

USP 2015 Code U5C3

Prerequisite: COM1, COM2, and either ENGL 3000 or ENGL 3010; Senior standing.

ENGL5000 - Studies In:

Credits: 1-8

Max Credit (Max. 8)

Provides an opportunity for specialized seminar approaches to subjects in literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5010 - Rhetoric and Composition: History, Theory, Practice

Credits: 1-4
Max Credit (Max. 4)

Prepares graduate students to teach college composition and rhetoric at UW and beyond, with attention to the intellectual traditions that inform our writing program's pedagogy. It examines the theories that support informed writing instruction and offers classroom strategies that may be applied to any course in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5020 - Public-Facing English Studies

Credits: 1-4
Max Credit (Max. 8)

Introduction to the history and theory of public intellectualism and English studies. Students develop theoretical and practical knowledge and explore alternative applications for academic research for publics beyond the classroom.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5050 - Writing in Public Genres

Credits: 1-4
Max Credit (Max. 8)

Intensive introduction to public-facing writing in English subject areas, including articles, book reviews, think pieces, TED talks, podcasts, and other genres of commentary associated with public intellectual work in English studies.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5055 - Narrative and Storytelling

Credits: 1-4
Max Credit 8

Exploration of the structure and use of narrative, stories, and/or storytelling from a variety of theoretical and disciplinary perspectives. Considers how narrative materials function as foundational to meaning making and to community building.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5061 - Rhetorical Theory and Criticism

Credits: 1-4
Max Credit (Max. 8)

An investigation into how rhetorical theory, spanning from its ancient roots in Aristotelian thinking to its current postmodern components, operates in society. Explores how various critical methods can be utilized to gain a stronger understanding of public communication texts, including newspapers, speeches, music, and film.

Cross Listed COJO 5061.

Dual Listed ENGL 4061.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5062 - Ancient Rhetorics

Credits: 1-4

Max Credit 8

Investigates contemporary problems in composition and rhetorical studies, as they are played out through ancient texts on composing and rhetoric. Course will focus on how ancient texts are enlisted in current debates/concerns over pedagogy, ethics, change, subjectivity, agency, and the social.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5063 - Feminist Rhetorics

Credits: 1-4

Max Credit 8

Analysis of influential women speakers and writers over time. Course focuses on how feminists construct arguments, frame objects of analysis, energize social justice movements, and theorize sex/gender/sexuality in relation to race, class, democracy, and suffrage. Course may include special focus on Wyoming women and suffrage.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5070 - Qualitative Methods in English

Credits: 1-4

Max Credit (Max. 8)

Advanced introduction to qualitative research methods in English and Rhetoric. Students will survey different types of qualitative methods and will learn to evaluate qualitative projects. Includes an emphasis on working with human participants and on ethics.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5071 - Qualitative Analysis

Credits: 1-4

Max Credit (Max 8)

Examination and application of different ways of making knowledge in English studies. Develops understanding of links among theory, methodology, and methods, and engages students in data analysis and evaluation of interpretive

moves. "Texts" can encompass a range of artifacts, from print to video games to nonverbal behaviors.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5072 - Topics in Technical Writing

Credits: 1-4
Max Credit 8

Seminar course on one or more topics in technical communication research, theory, or industry practice. Topics may include user experience methods, women in technical communication, activity theory, ethics and technology, information design, narrative practices, workplace cultures, and technical communication and social justice.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5073 - Topics in Rhet-Comp & Tech-Com

Credits: 1-4
Max Credit 8

Seminar on key theories and foundational research in technical and professional communication. Introduces students to pedagogical approaches, topics, and tools suitable for teaching and administering undergraduate technical and professional communication courses and programs.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5074 - Studies in Civic Discourse

Credits: 1-4
Max Credit 8

Seminar focusing on communication in the public sphere. Considers definition of public(s), both terrestrial and online, and the forming of publics and counter-publics. Focuses on rhetorical needs of audiences and may include primary research or partnering with local organizations.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5075 - Non-Profit Writing and Grants

Credits: 1-4
Max Credit (Max. 8)

Non-profit writing from a rhetorical perspective. Students analyze different kinds of non-profit communication, including fundraising, mission development, social media. Participate in grant proposal development or other organizational communication activity.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5080 - Graduate Apprenticeship

Credits: 1

The graduate apprenticeship furthers a graduate student's professional development by allowing him/her to teach in a course other than Freshman Composition and to engage in a close working relationship with a faculty member. Apprentices will engage in a full range of teaching activities, such as grading, constructing assignments and exams, lecturing, leading discussion, and so on. Does not apply to hour requirement for the degree.

Prerequisite: graduate standing and permission of the English department chair.

ENGL5220 - Studies in Medieval Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar course in selected genres, figures, and themes in Medieval English literature.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5230 - Studies in English Renaissance Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of the sixteenth and early seventeenth centuries.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5250 - Studies in Shakespeare

Credits: 1-4

Max Credit (Max. 8)

To provide advanced students with the opportunity to study problems of text, sources, staging, theatrical history, and/or critical theory with reference to the works of William Shakespeare.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5270 - Studies in 18c English Literature

Credits: 1-4

Max Credit (Max. 8)

A seminar in selected genres, figures, and themes of restoration and eighteenth century English literature.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5280 - Studies in 19c English Literature

Credits: 1-4
Max Credit (Max. 4)

A seminar in selected genres, figures, and themes of the romantic and Victorian periods.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5290 - Studies in 20c English Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in significant writers of poetry, drama, fiction, and biography from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5310 - Early American Literature

Credits: 4
Seminar designed to acquaint graduate students with selected texts from the colonial period to 1800, relevant secondary works, and scholarly methods.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5320 - Studies in 19c American Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar designed to acquaint graduate students with selected principal works of American literature, relevant secondary works, and scholarly method.

Prerequisite: graduate status of 12 hours or 4000-level work.

ENGL5330 - Studies in 20c American Literature

Credits: 1-4
Max Credit (Max. 8)

A seminar in selected significant writers of poetry, drama, and prose from the end of the nineteenth century to the present.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5340 - Intellectual Currents in Modern American Literature

Credits: 1-4
Max Credit (Max. 4)

Devoted to the study of writers such as Marx and Freud and more recent American writers.

Prerequisite: graduate status or 12 hours or 4000-level work.

ENGL5350 - Global Literatures in English

Credits: 1-4
Max Credit (Max. 8)

Examines significant texts, authors, cultural and historical contexts, and literary and theoretical movements in postcolonial or global literatures. May involve comparative study or may be focused on a single country context.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5355 - Global Englishes

Credits: 1-4
Max Credit 8

Advanced investigation of the spread of English as the lingua franca for business, technology, research, education, and popular culture around the world. Does the spread create cross-cultural communication or intensify global economic inequality? This course explores global Englishes in their historical and present contexts, engaging the fields of linguistics, sociolinguistics, postcolonial studies, and English language teaching.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5360 - Literatures of Diversity

Credits: 1-4
Max Credit (Max. 8)

A study of literature and culture of selected minority or marginalized communities.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5455 - Slavery and Freedom

Credits: 1-4
Max Credit (Max. 8)

Students engage in an in-depth study of the literary voices that emerged from the history of enslavement in the Americas from colonial times through the end of Reconstruction in 1877.

Cross Listed AAST 5455.

Dual Listed ENGL 4455.

Prerequisite: graduate status or 12 hours of 3000-4000 level work.

ENGL5520 - History of Literacy Criticism: Enlightenment and 19th Century

Credits: 4

Historical survey of the mainstream of European literary criticism, including the critics of antiquity and the Renaissance.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5530 - Modern Critical Theory and Practice

Credits: 1-4

Max Credit (Max. 4)

Major trends in modern poetics and practical criticism.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5600 - Research in Writing Studies

Credits: 1-4

Max Credit 8

Introductory graduate seminar on research methods in writing studies. Course culminates in an individual research project of professional quality. Course studies books and articles that students identify as particularly powerful examples in order to understand what research is and ways to conduct such research efficiently and ethically.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural, and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage, and divorce.

Cross Listed GWST 5830.

Dual Listed ENGL 4830.

Prerequisite: ART 2020, GWST 1080, ENGL 1080.

ENGL5835 - Writing Program Administration

Credits: 1-4
Max Credit 8

Seminar introduction to the field of writing program administration. Recognizing that not all universities are research institutions with large numbers of graduate students, this course approaches administration broadly, considering not only the traditional WPA, but other types of WPA work, including research, program building, developing intra-institutional relationships, and more.

Prerequisite: Graduate status or 12 hours of 4000-level ENGL courses

ENGL5880 - Studies in Modern Fiction

Credits: 4

A study of modern fiction, examining theory and practice, and covering works of English, European, and American origin.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5885 - Studies in Popular Culture

Credits: 1-4
Max Credit 8

An interdisciplinary seminar in which students analyze and apply theories and methodologies from multiple disciplines to the study of selected texts, figures, media, and themes of popular culture.

ENGL5890 - Consumption, Markets, Cultures

Credits: 1-4
Max Credit (Max. 8)

An interdisciplinary investigation of the ways in which cultural venues curate and market stories, history, and texts. Analyzes and applies theories and methodologies from literary and cultural tourism studies, as well as marketing and consumer culture, to museums, performances, tourist sites and theme parks. This class will include hands-on field research.

Prerequisite: graduate status or 12 hours of 4000-level work.

ENGL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 4)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENGL5915 - Tutorial

Credits: 1

Graduate standing or consent of instructor. One credit hour for fee purposes.

ENGL5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENGL5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENGL5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Credit in this course may not be included in a graduate program of study for degree purposes.

Prerequisite: enrollment in a graduate degree program.

ENGL5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENGL5964 - Thesis Writing Workshop

Designed for students who have reached an advanced stage in the writing of the thesis. Provides targeted, personalized support from peers during the research and writing process and runs concurrently with ENGL 5965.

Prerequisite: ENGL 5960 and enrollment in a graduate degree program

ENGL5965 - Thesis Research II

Credits: 1-3
Max Credit (Max. 3)

Designed for students who have reached an advanced stage in the writing of the thesis. Also to inform students of professional genres and practices as well as academic and non-academic careers following the MA degree.

USP 2015 Code U5H

Prerequisite: ENGL 5960 and enrollment in a graduate degree program.

ENGL5975 - Independent Studies

Credits: 1-4
Max Credit (Max. 6)

Independent study and research experience in a given topic, person, or movement in literature at an advanced level.

Prerequisite: permission of chair; graduate standing.

ENGL5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

English as a Second Language

ESL1110 - Introduction to Academic Writing Skills

Credits: 3

Designed to introduce non-native speakers of English, who do not demonstrate the required competency in writing to enter ESL 1210, to academic writing skills. Includes instruction in grammar and sentence structure, paragraph and essay writing.

Former Course Number [AS 1110]

Prerequisite: TOEFL of 18 or lower; IELTS of 5 or lower.

ESL1210 - English Composition for International Students

Credits: 3

The objective is to equip international students with procedural knowledge

USP 2003-2014 Code U3WA

USP 2015 Code U5C1

Former Course Number [AS 1210; ENGL 1210]

Prerequisite: TOEFL Writing sub-score of 18 or higher, IELTS Writing sub-score of 5 or higher, or instructor's consent.

ESL1310 - Academic Listening for International Students

Credits: 3

This course equips non-native speakers with focused listening strategies and note-taking skills that can be applied across a variety of academic content areas and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Listening subscore of 18 or lower IELTS subscore 5.0 or lower; or instructor's consent.

ESL1410 - Academic Reading for International Students

Credits: 3

This course equips non-native speakers with focused academic reading strategies across a variety of academic content areas, introduces the Academic Core Vocabulary lists, and familiarizes students with discipline specific discourse patterns.

Prerequisite: TOEFL Reading subscore of 18 or lower, IELTS Reading subscore of 5.0 or lower, or instructor's consent.

ESL2110 - English Oral Skills

Credits: 3

Instruction for Novice to advanced Low speakers in refining English pronunciation, stress and intonation, listening comprehension, oral grammar practice and building vocabulary.

Former Course Number [AS 2110; ENGL 2110]

Prerequisite: consent of instructor.

ESL3050 - Advanced Academic Writing for International Students

Credits: 3

Through ESL learner targeted instruction, practices, and feedback, the course will emphasize and progressively develop transferrable skills for students' academic work and future professions. It will continue to build on writing skills and emphasize foundational oral and digital communication skills.

USP 2003-2014 Code U3WB

USP 2015 Code U5C3

Prerequisite: WA/COM1.

ESL4010 - Technical Writing for International Students

Credits: 3

Prepares students from a culturally diverse background for the communication demands of the 21st century. Students conduct rhetorical analysis of various audiences and purposes in order to design, develop, revise and edit disciplinary and interdisciplinary technical communications, such as reports, proposals, job applications, research related documents and oral presentations.

USP 2003-2014 Code [WC<>COM3]

Prerequisite: WA/COM1, WA/COM2, and junior standing.

ESL5910 - International TA Preparation

Credits: 4

Prepares international teaching assistants for the challenges language, culture, and instruction in the American classroom impose on them: training includes pronunciation/intonation, presentation skills, basics of methodology, understanding of cultural differences, and mock-lessons. One Oral Skills Lab hour per week is included.

Prerequisite: graduate standing.

Entomology

ENTO1000 - Insect Biology

Credits: 3

Introduces insects and related arthropods. Introduces aspects of insect biology, behavior, life history and diversity, as well as many ways that insects affect humans.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1001 - Insect Biology

Credits: 4

Covers same lecture material as ENTO 1000, but includes a laboratory.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENTO1101 - Pests, Plagues and Plants

Credits: 3

Max Credit 3

Science improves our lives through better food production, improved human health and more-efficient machines. Or does it? While some scientists suggest that new technologies promote human health and sustainable agriculture, other scientists warn of harmful, if not catastrophic, outcomes. This course examines current controversies in the science and technology of agriculture and pest management, including the development of "super weeds," biofuels, and genetically modified mosquitoes.

USP 2015 Code U5FY

ENTO1150 - Pesticide Safety and Application

Credits: 1

Introduces various types and safe methods of pesticides application. Subsequent to completion, students may take the certification test administered by the Wyoming Department of Agriculture.

Cross Listed CROP 1150.

When Offered (Normally offered the week prior to spring semester)

ENTO4300 - Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Prerequisite: ENTO 1000 or LIFE 1003 or LIFE 1020 or consent of instructor.

ENTO4678 - Aquatic Entomology

Credits: 3

Emphasizes biology, ecology, distribution, and taxonomy of aquatic insects. Includes aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 5678.

When Offered (Normally offered fall semester of even-numbered years)

Prerequisite: ENTO 1000, ENTO 1001.

ENTO4682 - Insect Anatomy and Physiology

Credits: 5

Studies structure and function of the insect body, particularly emphasizing the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 5682.

When Offered (Normally offered spring semester of even-numbered years)

Prerequisite: ENTO 1000.

ENTO4684 - Classification of Insects

Credits: 4

Studies insect orders, families and taxonomic treatises. Requires collection of adult insects representing 100 families, or equivalent museum project, for completion of course requirements.

Dual Listed ENTO 5684.

When Offered (Normally offered fall semester of odd-numbered years)

Prerequisite: ENTO 1000.

ENTO4686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO4687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders, diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 5687.

Prerequisite: ENTO 4684 required; ENTO 4670, ENTO 4682 recommended.

ENTO4884 - Insect Behavior

Credits: 3

Examines the behavior of insects, including foraging, mating and social behavior. The course focuses on the applied as well as the fundamental aspects of behaviors, and both the strategic and physiological bases of behavior.

Dual Listed ENTO 5884.

Prerequisite: ENTO 1000.

ENTO5080 - Statistical Methods for the Agricultural and Natural Resource Sciences

Credits: 3

Brief review of statistical principles. Use of SAS programming. Numerous analysis of variance techniques along with commonly used experimental designs. Multiple mean comparisons, linear contrasts, power of F test, simple linear regression, polynomial regression, analysis of covariance, and some categorical data techniques for student in the agriculture and natural resources sciences. Credit cannot be earned in more than one of the following courses: STAT 2100, STAT 3050, STAT 5050, 5060, STAT 5070, STAT 5080.

Cross Listed STAT 5080.

Prerequisite: STAT 2050 or equivalent.

ENTO5300 - Applied Insect Ecology

Credits: 3

Examines concepts of insect ecology and their application to the management of agricultural and rangeland insect pests. Control of rangeland weeds using insects is also examined. Covers population dynamics, predator-prey and insect-plant interactions, biological control and integrated pest management.

Dual Listed ENTO 4300.

Prerequisite: ENTO 1000 or 9 hours of biology or ecology related coursework.

ENTO5601 - Insects for Teachers: Collection and Identification of Insects

Credits: 1

Designed for school teachers K-12. Basic concepts such as insect classification, insect habitats, insect metamorphosis, and destructive and beneficial insects are discussed with emphasis on the presentation of these concepts in the school classroom. Half of the class is devoted to field trips, laboratories, workshop activities, and films. Each student will make an insect collection, and learn how to preserve, mount, and identify specimens to order level. Course may be taken independently of ENTO 5602. Identical to NASC 4790.

Prerequisite: junior standing. Offered summer term only.

ENTO5602 - Insects in the Classroom: Insects and Their Ways

Credits: 1

Designed for school teachers K-12. Basic concepts of insect structure and function (insect morphology, insect physiology, insect ecology, and insect behavior) are discussed with emphasis on the presentation of these concepts using living insects in the classroom. Half of the class is devoted to field trips, laboratories, workshop activities, and films. Each student will design, conduct, and write-up an experiment with insects. Course may be taken independently of ENTO 5601. Identical to NASC 4790.

Prerequisite: junior standing. Offered summer term.

ENTO5678 - Aquatic Entomology

Credits: 3

Biology, ecology, distribution and taxonomy of aquatic insects will be emphasized. Additional material covered will include aquatic insects as indicators of pollution. Students must make and identify a collection of immature aquatic insects.

Dual Listed ENTO 4678.

Prerequisite: 1 year of basic biology.

ENTO5682 - Insect Physiology

Credits: 5

Structure and function of the insect body, with particular emphasis on the relationship between anatomical features and their cellular/biochemical functions.

Dual Listed ENTO 4682.

Prerequisite: ENTO 1000.

ENTO5684 - Classification of Insects

Credits: 4

A study of insect orders, families and taxonomic treatises. Collection of adult insects representing 100 families, or equivalent museum project, is required for completion of course requirements.

Dual Listed ENTO 4684.

Prerequisite: ENTO 1000; ENTO 4670 is recommended.

ENTO5686 - Problems in Entomology

Credits: 1-3

Max Credit (Max. 6)

Individual library, laboratory or field study of insects.

Dual Listed ENTO 4686.

Prerequisite: 4 hours of biological science and 3 hours of entomology.

ENTO5687 - Insect Evolution

Credits: 3

Examines major events of insect evolution including origins, fossils, wings and flight, metamorphosis, extinct orders, diversification patterns of modern orders, climate change, plate tectonics, coevolution with plants, parasitism, social behavior, and origin of modern faunas.

Dual Listed ENTO 4687.

Prerequisite: ENTO 4684/ENTO 5684 required. Recommended: ENTO 4670/5670, ENTO 4682/ENTO 5682.

ENTO5689 - Topics in Entomology

Credits: 1-4

Max Credit (Max. 6)

Current topics in entomology taught by entomology faculty, adjunct faculty or visiting faculty. Please check class schedule for current title.

ENTO5850 - Research in Entomology

Credits: 1-3

Max Credit (Max. 8)

Individual investigations of particular problems.

Prerequisite: graduate standing

ENTO5852 - Senior/Graduate Seminar

Credits: 1

Max Credit (Max. 6)

Discussion of important contributions to entomology.

Prerequisite: graduate standing.

ENTO5884 - Insect Behavior

Credits: 3

Fundamentals of insect behavior and an analysis of behavioral patterns.

Dual Listed ENTO 4884.

Prerequisite: one year of basic biology or equivalent; ENTO 5682 is recommended.

ENTO5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate status.

ENTO5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENTO5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

ENTO5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

ENTO5980 - Dissertation Research

Credits: 1-12

Max Credit (Max. 48)

Graduate level course designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

Entrepreneurship

ENTR2700 - Entrepreneurial Mindset

Credits: 3

This course introduces students to entrepreneurial mindsets and concepts essential to success in startups or within established firms. Provides a basic overview of creativity and innovation, and students experience the process of identifying and evaluating ideas and developing them into business opportunities.

Prerequisite: COM1, sophomore class standing.

ENTR3020 - Comparison of Entrepreneurial Ecosystems

Credits: 3

The goal of this course is to expose students to different entrepreneurial ecosystems and let them think about how the environment, legal, technical, cultural, and economic, could impact their entrepreneurial endeavors. The class will accomplish this by visiting a developed country and a developing country to learn about the ecosystems and talk with entrepreneurs to see how the forces impacted their startups.

Cross Listed ES 3020.

ENTR3700 - Innovation, Ideation, and Value Proposition

Credits: 3

This course explores opportunity recognition, innovation, and building value propositions based on customer discovery through interviews, surveys, and other methods. Students learn to develop a lean start-up and build customer focused value propositions. The focus is on rapid hypothesis testing and developing minimum viable products.

Prerequisite: ENTR 2700.

ENTR4700 - Business Model Creation and Launch

Credits: 3

Students build on previous learning to develop a complete business model including sales and marketing strategies, operations, financial forecasts, and partners. Deliverables include a pitch to start-up investors as part of a real-world entrepreneurship experience (for example, an entrepreneurship competition). Students learn primarily through hands-on application of concepts.

Prerequisite: ENTR 3700.

ENTR4750 - Theories of Entrepreneurship

Credits: 3

A broad examination of historical, literary, and business perspectives on entrepreneurship. Students explore the role of individuals, new ventures, and established organizations in the discovery, evaluation, and exploitation of opportunities. Emphasis is on the evolution of entrepreneurship theories over time, and current trends related to the application of these theories.

Prerequisite: ENTR 3700.

ENTR4900 - Independent Study in Entrepreneurship

Credits: 1-4

Max Credit 6

This course provides students the opportunity to study on an individual basis, any aspect of Entrepreneurship not included in other structure Entrepreneurship courses

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

ENTR4910 - Topics in Entrepreneurship

Credits: 3

Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Prerequisite: Junior class standing, consent of instructor

Environment and Natural Resources

ENR1000 - Energy and Society

Credits: 3

Introduces humans' past, present, and future sources of energy and their advantages and limitations. Discusses society's current, non-sustainable pattern of energy use from a supply and environmental perspective. Investigates the technical, environmental, political, and societal problems associated with the eventual conversion to renewable energy resources.

Cross Listed ERS 1000.

USP 2003-2014 Code U3O

USP 2015 Code U5PN

ENR1100 - Environment and Natural Resource Problems and Policies

Credits: 2

Survey of environmental and natural resources issues and policies at local/regional, national, and global scales. Students are challenged to think critically as they dissect the causes, complexities, and solutions of contemporary, interdisciplinary environmental and natural resource challenges.

USP 2003-2014 Code U3I, U3L

ENR1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

ENR1200 - Environment

Credits: 4

Introductory environmental science course appropriate for science and nonscience majors. Uses case studies and applied laboratories to explore core biological principles such as nutrient flow and cycling, population and community ecology, and ecosystem structure and function, as well as the non-science dimensions of ENR issues. Early-semester, weekend field trips/labs required.

USP 2003-2014 Code U3SB

USP 2015 Code U5PN

ENR1400 - Biodiversity: Science and Society

Credits: 3

Biodiversity lays the foundation for nature's ability to properly function. In turn humans depend on a healthy-functioning natural system. Adequate biodiversity provides us with many things including new genetic material for agriculture, medical discoveries, recreational opportunities and good mental health. This course will examine key themes in our understanding of biodiversity. Students enrolled in this course will have a better understanding of issues, challenges and potential solutions to our current biodiversity crisis. Course meetings will largely consist of group discussions of assigned readings. Discussions will focus on critically evaluating and analyzing information, hypotheses and knowledge that arise from the readings. Writing assignments will emphasize succinct but thorough interpretation of information, policy, conservation and societal impacts of biodiversity.

USP 2003-2014 Code U3I, U3L

ENR1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed GEOL 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

ENR2000 - Environment and Society

Credits: 3

Develops understanding of the nature and dimensions of environmental and natural resource issues. Explores ways in which elements of society approach, evaluate, and develop positions relative to environmental issues. Uses case studies to illustrate the contemporary and historical role of individuals and societies in identifying and addressing environmental issues at scales ranging from local to global.

USP 2003-2014 Code U3G

USP 2015 Code U5C2

A&S College Core 2015 ASG

ENR2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed HIST 2030.

USP 2003-2014 Code [(none)< >H]

ENR2100 - Forest Management

Credits: 3

Principles of forest management. Topics include the laws affecting forest management, methods of harvesting wood from forests, fire and insect management, the effects of disturbances on stream flow and nutrient cycling, and the challenges of developing management plans for forests.

Cross Listed RNEW 2100.

Former Course Number [BOT 2100]

Prerequisite: LIFE 1101 or LIFE 1010.

ENR2300 - Foundations of Sustainability

Credits: 3

Examine the basic concepts, theories, and practice of sustainability as a foundation for future learning in the field. Explore principles of sustainability in our community and personal lives through various lenses and systems.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR2330 - Environmental Ethics

Credits: 3

Introduces students to ethical theory in environmental problem cases, and to philosophical issues in environmental philosophy. Ethical theories include natural law, utilitarianism, deontological and rights-based theories, relativism. Topics may include: conservation/preservation, resource management, pollution, overpopulation, factory farming, Leopold's land ethic, deep ecology, holism, eco-feminism.

Cross Listed PHIL 2330.

USP 2003-2014 Code [CH< >(none)]

ENR2345 - Natural Resource Ethics

Credits: 3

Introduces students to ethics in context of natural resource extraction, use, conservation, preservation, and distribution. Ethical frameworks include teleological and deontological theories primarily applied to human needs and wants. Concepts and applications of environmental justice are addressed, including private property, sustainability, and obligations to future generations.

Cross Listed PHIL 2345/RNEW 2345.

USP 2003-2014 Code U3CH

USP 2015 Code U5H

ENR2450 - Fish and Wildlife Management in the Anthropocene

Credits: 4

Course examines fundamental principles in management of natural resources, especially fish and wildlife populations. Students explore historical to contemporary context of management, population biology, management tools and their application, career opportunities, with specific emphasis on human dimensions, law, and policy. Students will develop oral and written communication skills.

Cross Listed ZOO 2450.

USP 2015 Code U5C2

Prerequisite: LIFE 1010, LIFE 2022, and COM1.

ENR2800 - Introduction to Outdoor Leadership

Credits: 3

Designed to increase knowledge and competencies related to leading others in the outdoors. Significant focus is on self-awareness, judgment, and decision-making. The specific skills and theories students learn throughout provide a foundation for other leadership endeavors.

Cross Listed ORTM 2800

Prerequisite: consent of instructor.

ENR3000 - Approaches to ENR Problem Solving

Credits: 3

Provides an introduction to environmental and natural resources problem solving and decision making. Students learn how scholars and practitioners define and structure ENR problems for management and policy decision making.

Additionally, students learn approaches, processes and techniques that address problems analytically and in a values-oriented context.

USP 2003-2014 Code U3CS, U3WB

USP 2015 Code U5H

Former Course Number [4000]

Prerequisite: ENR 2000.

ENR3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed AMST 3050/GWST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

ENR3100 - Principles of Wildland Water Quality

Credits: 3

Basic principles of aquatic chemistry and water quality as they relate to watershed management practices including livestock production, agronomic production, mineral and natural gas extraction and other land uses.

Cross Listed REWM 3100.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000.

ENR3130 - Environmental Quality

Credits: 3

Introduction to environmental quality issues and events. Course emphasizes impacts to soil, water, atmospheric, and vegetative ecosystems due to different nutrients and contaminants, including nitrogen, phosphorus, sulfur, trace elements, and organic chemicals. Current information pertaining to environmental quality is discussed and a field trip to the Union Pacific Tie Plant.

Cross Listed SOIL 3130.

When Offered (Offered fall semester)

Prerequisite: complete at least 1 University Studies Science course SB, SP or SE.

ENR3300 - Environmental Policy, Conservation and Development in India

Credits: 3

This course will focus on India's environmental policies pertaining to conservation and development. Case studies will be used to understand how these policies were developed, put in place, and their intended and actual outcomes. Students are required to select a suitable topic and conduct research and submit a research report.

USP 2015 Code U5C2

Prerequisite: WA/ COM1 course.

ENR3450 - Weather and Climate

Credits: 3

Systematically examines elements and controls of weather and climate with application to regions.

Cross Listed GEOG 3450 and GEOL 3450

When Offered (Normally offered fall semester)

Former Course Number [G&R 3450]

Prerequisite: GEOG 1000, GEOG 1010 or GEOG 1020.

ENR3620 - Environmental Justice

Credits: 3

Examines core philosophical understandings of justice and applies them to the environment through a variety of case studies, analytical essays and monographs.

Cross Listed POLS 3620.

Prerequisite: POLS 1000, POLS 2460, or POLS 3600, or permission of instructor.

ENR3700 - Wyoming Conservation Corps Practicum

Credits: 1

Max Credit 2

Required for students entering the WCC. Students will be required to make weekly journal entries and write a paper on a topic germane to their WCC experience. Additionally, necessary training for the Wyoming Conservation Corps program will be included in the course content.

Prerequisite: Acceptance into the Wyoming Conservation Corps program.

ENR3750 - Natural Resource Planning and Economics

Credits: 3

Economic concepts and rudimentary analytical tools are applied to federal, state and local natural resource planning and management programs. The value of economic input into natural resource policy is examined. Evaluating tradeoffs and resolving conflicts play a particularly important role in the course content.

Cross Listed AGEC 3750.

When Offered (Offered spring semester of odd-numbered years)

Former Course Number [4750]

Prerequisite: QA, WA and junior standing.

ENR3900 - Seminar in Environment and Natural Resources

Credits: 1-3

Max Credit 12

Examines research and policy perspectives by a variety of authorities on selected environment and natural resource problems and issues.

Prerequisite: ENR 3000 or consent of instructor.

ENR3950 - Environmental Sociology

Credits: 3

Explores how ecology, technology, politics, economics, and culture intersect. By analyzing key contemporary environmental debates, students will develop an understanding of sociological analyses, and the impact of social life on our environment, as well as the effect of the environment on social life. Topics covered include: the environmental movement; sustainable development; developing nations and their environment; capitalism and technology; and environmental justice.

Cross Listed SOC 3950.

Prerequisite: SOC 1000.

ENR4010 - Winter Ecology: Skills of the Winter Naturalist

Credits: 1

Emphasizes field naturalist skills, the effects of winter abiotic conditions on organisms and subsequent adaptations to these conditions, animal tracking, introduction to snow dynamics and winter safety.

Prerequisite: 6 hours of ENR or science courses.

ENR4011 - Winter Ecology: Snowpack Science and Dynamics

Credits: 1

Emphasizes snow science and avalanche safety through lectures and inquiry-based field laboratories.

Prerequisite: 6 hours of ENR or science courses.

ENR4012 - Winter Ecology: Wildlife and Plant Adaptations

Credits: 1

Emphasizes animal and plant adaptations to cope with the stresses of winter, as well as the predicted impacts of climate change, through lectures and inquiry-based field laboratories. Students also conduct field research in a winter environment.

Prerequisite: 6 hours of ENR or science courses.

ENR4030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 4030.

Dual Listed ENR 5030.

Prerequisite: 3 hours in any interdisciplinary program.

ENR4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed BOT 4040/GEOG 4040.

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

ENR4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, POLS 4051, GEOG 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Prerequisite: POLS 1000.

ENR4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/AMST 4052/GEOG 4052/REWM 4052.

Prerequisite: POLS 1000.

ENR4240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 4240.

Dual Listed ENR 5240.

Prerequisite: LIFE 2022 or LIFE 2023 and STAT 2050 or STAT 2070.

ENR4285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 4285.

Dual Listed ENR 5285.

Prerequisite: University Studies QA.

ENR4310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 4310.

Dual Listed ENR 5310.

When Offered (Normally offered every third semester)

Prerequisite: ANTH 1200.

ENR4412 - Global Environment History

Credits: 3

This course is designed to introduce undergraduate and graduate students to the new field of global environmental history. The Global Environmental History course will provide a new way of looking at humans, animals, and the lives they've built in the environment and the costs of their decisions to the environment.

Cross Listed HIST 4412.

USP 2015 Code U5H

Prerequisite: 9 hours of HIST or ENR.

ENR4420 - Conservation Biology

Credits: 3

Addresses the broadest environmental issues facing society (habitat loss, invasion, overexploitation) and the mechanisms driving them, with particular attention to the Intermountain West. Through computer exercises, students also learn how to evaluate conservation efforts and make management recommendations.

Cross Listed BOT 4420/ZOO 4420.

Prerequisite: LIFE 3400 and one of the following: ENR 3500, STAT 2050, or STAT 2070.

ENR4430 - Green Chemistry and Global Environmental Problems

Credits: 3

Focus includes study of the chemistry of air, water, and soil as well as the effects of anthropogenic activities on natural processes. Emphasis is also placed on sustainability and green chemistry practices and technologies.

Cross Listed CE 4430/CHE 4430.

Prerequisite: CHEM 1020.

ENR4450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGEC 4450.

Dual Listed ENR 5450.

Prerequisite: completion of USP O requirement; junior standing.

ENR4500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of

students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 5500.

USP 2003-2014 Code U3QB

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real-world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

ENR4550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 4550.

Dual Listed ENR 5550.

Former Course Number [4700]

Prerequisite: QA.

ENR4560 - Conservation Entrepreneurship

Credits: 3

Max Credit 3

This course introduces students to foundational concepts in social entrepreneurship applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches.

Dual Listed ENR 5560.

Prerequisite: ENR 3000

ENR4600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 5600

Prerequisite: USP WB or COM2 course, junior or senior standing.

ENR4700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed COJO 4700.

Dual Listed ENR 5700.

Prerequisite: COMM 1000 or ENR 1200 or ENR 1500 or ENR 2000.

ENR4750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 5750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR4800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 4800.

Dual Listed ENR 5800.

Prerequisite: ARE 3020 or AMST 5400.

ENR4890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies

each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 5890.

Former Course Number [4990]

Prerequisite: ENR 3000 or permission of the instructor.

ENR4900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 5900.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ENR 3000.

ENR4950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 4950.

Dual Listed ENR 5950.

Prerequisite: ENR 3700 and consent of instructor.

ENR4960 - Field Studies in:

Credits: 1-6

Field-based courses in Environment and Natural Resources are taught under this number. The specific subject matter varies depending upon the location and content of each courses. Students frequently need to apply in advance.

Prerequisite: 6 credits of ENR coursework.

ENR4970 - ENR Internship

Credits: 1-6

Max Credit (Max. 6)

Provides practical experience in environmental and natural resource policy, management and decision processes, as well as interaction with professionals in the field. Offered S/U only.

Prerequisite: ENR 3000.

ENR4975 - Independent Study

Credits: 1-6
Max Credit (Max. 6)

Offers students the opportunity to independently complete special academic studies under direction of a faculty member. Readings, papers, and projects are completed as directed.

Dual Listed ENR 5975.

Prerequisite: 6 credits in ENR.

ENR5001 - Orientation to ENRS

Credits: 2

ENR 5001 aims to develop program culture and introduce resources and norms, provide common frames for understanding ENRS challenges, develop leadership and teamwork skills, and identify and explore some of the ENRS challenges in Wyoming.

ENR5030 - Ecology of Knowledge

Credits: 3

Examines the development of "disciplines" and explores definitions, theories, methods and practices of interdisciplinary work.

Cross Listed AMST 5030.

Dual Listed ENR 4030.

Prerequisite: graduate status.

ENR5050 - Techniques in Environmental Data Management

Credits: 4

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e. g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Cross Listed ECOL 5050/GEOG 5050.

Prerequisite: graduate standing.

ENR5100 - Foundations of ENRS

Credits: 3

This course, required of students in all ENR graduate programs, provides students with language and conceptual frameworks for understanding a range of perspectives that stakeholders bring to ENRS issues. It builds students' "epistemological toolbox" for interacting with others who bring different paradigms of thought, values, ways of

knowing, and terminology into the "big tent" of environmental studies.

Prerequisite: Graduate student status.

ENR5150 - Environmental Science: Perspectives and Methods

Credits: 3

This course will use complex, real-world environmental challenges to explore fundamental scientific principles. Students will learn how scientists tackle environmental issues by formulating objectives, collecting and analyzing scientific data, as well as to critically evaluate information sources and limitations to scientific approaches due to constraints associated with each study.

Prerequisite: graduate standing.

ENR5240 - Disease Ecology

Credits: 3

Introduction to 1) how interactions among species, ecosystems, human systems, and abiotic components of the environment affect patterns and processes of disease, and 2) considerations for coevolution of hosts and pathogens, conservation biology, models used to understand disease dynamics, and approaches to manage and control disease in animals, plants, and humans.

Cross Listed PATB 5240.

Dual Listed ENR 4240.

ENR5270 - Writing and Reviewing Science

Credits: 4

This course will help students prepare a scientific manuscript for submission to a peer-reviewed journal; in so doing, students will become more effective, efficient, and confident writers. Students will learn principles of effective writing, how to prepare a manuscript for publication, navigate the peer-review process, and write a constructive review.

Cross Listed ZOO 5270.

Prerequisite: Students must have graduate standing and an analyzed dataset on which the manuscript will be based. Students must have approval from their advisors and key collaborators before embarking on this journey. Students are also encouraged to maintain this approval throughout the semester.

ENR5285 - Wildland Hydrology

Credits: 3

Teaches essential and unique characteristics of hydrologic cycle as occurs on range and forest lands, concentrating on quantification of these processes and storages.

Cross Listed REWM 5285.

Dual Listed ENR 4285.

Prerequisite: graduate standing and University Studies QA.

ENR5310 - Environmental Anthropology

Credits: 3

Addresses how human societies interact with their surroundings, emphasizing cultural understandings of the environment. Introduces variety of theoretical and methodological approaches to topics ranging from problems of the American West to global environmental change.

Cross Listed ANTH 5310.

Dual Listed ENR 4310.

Prerequisite: ANTH 1200.

ENR5450 - Negotiation

Credits: 3

Examines how to use negotiation to resolve conflict and get agreement. Describes conflict; outlines ways to address conflict; examines different negotiation strategies and the impact of cognitive bias, power, ethics, and individual and cultural differences; and explores mediation practices. Students complete negotiations, role-plays, and questionnaires.

Cross Listed AGECE 5450.

Dual Listed ENR 4450.

Prerequisite: completion of USP O requirement; junior standing.

ENR5500 - Risk Analysis

Credits: 4

Introduces basic concepts of risk analysis, including risk perception, identification, assessment, communication, management, and policy. Provides quantitative treatment of risk assessment procedures, fundamental mathematical models, and the concepts of variability and uncertainty; and practical experience in risk analyses conducted by teams of students. Emphasizes environment and natural resource examples. Laboratory.

Dual Listed ENR 4500.

Prerequisite: MATH 1000 or MATH 1400, introductory statistics and familiarity with Excel spreadsheets.

ENR5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed GEOL 4525/GEOL 5525.

Dual Listed ENR 5525.

ENR5550 - Negotiation Analysis

Credits: 3

Focuses on using an analytical perspective for maximizing joint gains between negotiators. Students learn analytical techniques to prepare for negotiation, evaluate options and proposals during a negotiation, and evaluate negotiated outcomes with respect to maximization of joint gains and fairness criteria.

Cross Listed AGEC 5550.

Dual Listed ENR 4550.

Former Course Number [5700]

Prerequisite: QA.

ENR5560 - Conservation Entrepreneurship

Credits: 3

This course introduces students to foundational concepts in social entrepreneurship and applies them to environmental conservation issues. Students will learn the legal, financial, and ecological concepts underpinning entrepreneurial approaches to conservation. Students will apply concepts to real world examples to understand the strength and weaknesses of these approaches. Prerequisites: graduate standing.

Dual Listed ENR 4560

Prerequisite: Graduate standing.

ENR5600 - Campus Sustainability

Credits: 3

Uses campus as a setting to explore long-term environmental, economic, and social sustainability theory and practice. Students design and implement a semester-long project to improve sustainability of the UW campus. This is an interdisciplinary course and is appropriate for students of all disciplines.

Dual Listed ENR 4600

Prerequisite: Graduate standing.

ENR5700 - Media, Science, and Society

Credits: 3

This course discusses why scientific, health, and environmental issues are covered in particular ways in media. We will also examine how these messages impact people's attitudes, opinion, knowledge, and emotions about science, health, and the environment.

Cross Listed COJO 5700.

Dual Listed ENR 4700.

Prerequisite: graduate standing.

ENR5750 - ENR Law and Policy

Credits: 3

Explores the policy underpinnings of environmental and natural resource issues and the legal responses to these

problems. Students will gain a basic understanding of: (1) the causes of environmental problems, including energy, water, wildlife, and other western land use issues; (2) the range of policy and instrument choices; and (3) the approaches actually taken in current laws. Students also will apply the law in an interdisciplinary, problem-based learning context.

Dual Listed ENR 4750.

Prerequisite: ENR 2000 and upper division standing or permission of instructor.

ENR5800 - Historic Preservation

Credits: 3

Review of the roots of historic preservation in Western culture with an emphasis on the historical and legal context of architectural conservation in America. Current issues in preservation are examined through case studies and guest presentations.

Cross Listed AMST 5800.

Dual Listed ENR 4800.

Prerequisite: ARE 3020 or AMST 5400.

ENR5870 - Graduate Seminar

Credits: 1

Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Prerequisite: graduate standing.

ENR5890 - Topics in Environment and Natural Resources

Credits: 1-6

Max Credit (Max. 12)

Special topics in environment and natural resources are offered under this number. The specific subject matter varies each year because the course is normally taught by faculty who wish to present a specialized topic of interest to ENR and other students. Check class schedule for specific topics offered each year.

Dual Listed ENR 4890.

Prerequisite: ENR 5100 or consent of instructor.

ENR5900 - Capstone in ENR

Credits: 3

An integrative course in which students work in multidisciplinary teams to synthesize and apply environment and natural resources analytical frameworks, perspectives, methods, and theories. Students develop and refine critical thinking skills to address a real-world environment and natural resources challenge.

Dual Listed ENR 4900.

Prerequisite: graduate standing and ENR 5100.

ENR5910 - Collaborative Practice Methods

Credits: 3

This course introduces students to the principles, concepts, and methods of collaborative decision making as it is practiced in a variety of settings. Students acquire collaborative skills and competencies in collaborative processes such as working in teams and facilitating groups, negotiating and managing conflict, conducting situation assessments and issue analyses, and developing methods and standards for integrating technical information in collaborative decision making. The course will involve extensive use of cases, role-plays, and related participative activities.

Prerequisite: Admission by consent of instructor.

ENR5921 - Collaborative Practicum

Credits: 1-3

Max Credit (Max. 3)

Under the guidance and instruction of ENR faculty, students will have the opportunity to apply the skills and information gained in ENR 5910 to real-world situations. Students will gain practical experience in collaboration, facilitative leadership, and conflict resolution and to develop and refine skills in one or more of the learning objectives and expected competencies.

Prerequisite: ENR 5910.

ENR5940 - Continuing Registration: Off Campus

Credits: 1-2

Prerequisite: Advanced degree candidacy.

ENR5950 - Leadership in Natural Resources Management

Credits: 2

Provides Crew Leaders in the Wyoming Conservation Corps with an understanding of the complex dynamics of natural resources management while also equipping students with the tools to confidently lead groups of students on conservation-oriented service-learning projects on Wyoming's public lands during the summer months.

Cross Listed ERS 5950.

Dual Listed ENR 4950.

Prerequisite: ENR 3700 and consent of instructor.

ENR5960 - Thesis Research

Credits: 1-12

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: Enrollment in a graduate degree program.

ENR5961 - Plan B Projects

Credits: 2

Max Credit (Max. 6)

Limited to students enrolled in a Plan B graduate program. Students will be involved in non-course scholarly activities in support of the Plan B project.

Restricted Restricted to ENR graduate students.

ENR5975 - Independent Study

Credits: 1-6

Max Credit (Max. 6)

Offers students the opportunity to independently complete special academic studies under direction of a faculty member. Readings, papers, and projects are completed as directed.

Dual Listed ENR 4975.

Prerequisite: 6 credits in ENR.

Environmental Engineering

ENVE5410 - Advanced Biological Wastewater Treatment

Credits: 3

Theory and practice of advanced biological treatment processes for municipal and industrial wastewaters, sludges, groundwater bioremediation and solid waste. Emphasis is on fundamental principles applied to the design and control of existing processes and the development of innovative systems.

Cross Listed CE 5410/CHE 5410.

Prerequisite: consent of instructor.

ENVE5430 - Environmental Engineering Chemistry

Credits: 3

Focus includes inorganic, organic, physical, equilibrium, biochemistry, colloidal and nuclear chemistry with an emphasis on the problems/solutions encountered by environmental and civil engineers.

Prerequisite: CHEM 1020.

ENVE5445 - Environmental Remediation

Credits: 3

The contamination of soil, air, and groundwater by improper disposal of hazardous wastes is covered. Control and cleanup of contaminated groundwater plumes, treatment of polluted soils and soil gases is emphasized. Case studies are extensively used.

Cross Listed CE 5445.

Prerequisite: CE 3400.

ENVE5450 - Advanced Physical Chemical Treatment

Credits: 3

A study of physical and chemical processes for treatment of water, and waste water.

Cross Listed CE 5450.

Prerequisite: CE 4400.

ENVE5885 - Problems

Credits: 1-3

Max Credit (Max. 6)

Special course designed to make possible individual investigation of problems of environmental engineering selected to fit student's educational research needs.

Prerequisite: consent of instructor.

ENVE5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

Environmental System Sciences

ESS1000 - Wyoming in the Earth System

Credits: 3

Introduces the study of environmental systems science by investigating Earth's anthrosphere, atmosphere, biosphere, and lithosphere. Studying Wyoming's unique environments and current issues, students will access, analyze, and interpret data to understand how natural and human-caused changes influence larger Earth and environmental systems.

USP 2003-2014 Code U3I, U3L
USP 2015 Code U5PN

ESS2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed GEOL 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

ESS3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed GEOG 3480.

USP 2003-2014 Code U3G, U3WB

Prerequisite: GEOG 1010 or any USP PN course and USP COM1.

ESS4001 - Analysis of Nature's Data

Credits: 3

"Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write." In this course, we lead with environmental questions to examine elements of statistics, statistical thinking, data analysis, and data visualization in the environmental sciences. We use program R for all applications.

Prerequisite: STAT 2050 , or STAT 2070 , or consent of the instructor.

ESS4780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed BOT 4780.

Dual Listed ESS 5780.

Prerequisite: Consent of instructor.

ESS4950 - Exploring the Earth System

Credits: 3

Conduct critical and interdisciplinary assessments on complex topics addressing physical, biological, and human components of the Earth System. Through multiple written, oral, and digital communication products, students will work independently and collaboratively to critically review existing literature, define knowledge gaps, analyze evidence, and synthesize results for multiple audiences.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: ESS 1000 and either ESS 3480 or ENR 3450.

ESS4970 - Internship in Earth System Science

Credits: 1-6

Max Credit (Max. 6)

Offers students an individualized opportunity to connect their academic training, professional experiences, and future goals. Students must first consult with their Haub School advisor and have completed and appropriate internship, professional and/ or applied experience that provides exposure to complex environmental systems, scientific practices, and relevant interactions in the professional world.

Prerequisite: ESS 1000.

ESS5780 - Biogeochemistry

Credits: 3

A comprehensive treatment of biogeochemistry with emphasis on biogenic elements and biological processes. Reviews occurrence of elements, their behavior in the biosphere, and how their cycles are affected by humans.

Cross Listed BOT 5780.

Dual Listed ESS 4780.

Prerequisite: Consent of instructor.

Family and Consumer Science

FCSC1009 - Introduction to Family and Consumer Sciences

Credits: 1-3

Introduction to Family and Consumer Sciences is an introductory course for high school students directed by faculty and extension educators. Topics include human nutrition and food; human development and family sciences; and textiles, design, merchandising and textiles.

FCSC1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

FCSC1141 - Principles of Nutrition

Credits: 3

This course will provide an introduction to the fundamental concepts of nutrition science and the role of nutrition in overall health. Students develop an understanding of nutritional requirements as related to metabolism of nutrients in various physiological states. Designed for nutrition majors and interested non-majors.

FCSC1150 - Scientific Study of Food

Credits: 3

Comprehensive introduction to the study of food. Food science theories relative to composition are applied through the laboratory experiences.

FCSC1170 - Introduction to Apparel Construction

Credits: 3

Introduction to basic and industry production techniques applied to apparel and interior products. Development of decision-making skills in selection and use of materials.

FCSC1175 - Design Communication

Credits: 3

Explores philosophical and practical factors of the design communication process. Incorporates various methods of communicating design ideas and concepts from hand drawing and rendering to digital techniques through Adobe Creative Suite.

FCSC1180 - Applied Design

Credits: 3

A study of design principles and elements and their relation to the design of marketable consumer goods. Emphasizes developing creative thinking and proper fabrication techniques in solving both 2-D and 3-D design problems.

USP 2003-2014 Code U3CA

USP 2015 Code U5H

FCSC1185 - Introduction to Design, Merchandising and Textile Industry

Credits: 3

Introduction to the functions of the design, merchandising and textiles industry. This course will give a base of knowledge of the industry including textile and garment production and manufacturing, design processes for apparel and interiors, and retailing. Students will also be introduced to potential career paths within the industry.

FCSC2050 - Safety, Nutrition and Health in Early Childhood Programs

Credits: 2

Designed to enrich students' understanding of practices which support children's health development. Issues to be explored include record keeping related to child care health and safety, use of health consultants, accident and injury prevention, immunizations, nutrition and food safety in child care settings.

When Offered (Offered alternate summers.)

FCSC2101 - Special Topics In:

Credits: 1-3
Max Credit (Max. 6)

Provides freshman and sophomore level undergraduate students opportunities to pursue a class of special interest or of a timely subject in a selected family and consumer sciences area and for faculty to pilot lower division courses.

FCSC2110 - Fundamentals of Aging and Human Development

Credits: 3
Discusses aging as a lifelong process, involving interrelationships of the individual and his or her environment. Includes future demographic trends, family health care, social policy and mass media.

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2121 - Child Development

Credits: 4
Incorporates classroom instruction with laboratory application of child development research and theory in physical, intellectual and social/emotional domains. Emphasizes early childhood years.

USP 2003-2014 Code U3CS

Prerequisite: PSYC 1000 or SOC 1000 or EDST 2450.

FCSC2122 - Child Development Lab

Credits: 1
Laboratory observation course designed for students with a background in child development theory. Students learn child observation techniques, how to write laboratory reports, and how to apply them to evaluating a child's development in all domains.

Prerequisite: PSYC 2300.

FCSC2131 - Family Relations

Credits: 3
Provides an overview of current research on family relations, family theory, and family dynamics across the lifespan. An ecological and family systems approach is used, with particular focus paid to the understanding of contextual influences on families.

Prerequisite: COMM 1030 or EDEC 1020 or PSYC 1000 or SOC 1000.

FCSC2133 - Intimate Relationships

Credits: 3
Use of social science theory and research to understand psycho-socio-cultural influences in the development of

personal and intimate relationships including human sexuality from development and interpersonal perspectives. Emphasizes application of current research and theory to facilitate positive individual growth, satisfaction, and stability in close relationships.

Former Course Number [3133]

Prerequisite: PSYC 1000 or SOC 1000.

FCSC2135 - Women and Aging

Credits: 3

Focuses on women and the aging process with emphasis given to both the problems and promises of aging. Topics to be explored within a multicultural, sociological framework include the definition of self, relationships, community, health and health care, work and service, retirement, economic realities and new perspectives on aging.

Cross Listed WMST/SOC/NURS 2135.

Prerequisite: ENGL 1080/SOC/GWST 1080 or SOC 1000 or FCSC/NURS/SOC 2120.

FCSC2141 - Nutrition Controversies

Credits: 2

This course expands upon nutrition concepts covered in FCSC 1141 by exploring current nutrition-related controversies. Skills related to the interpretation of research literature will be emphasized.

Prerequisite: FCSC 1141.

FCSC2165 - Introduction to Fashion and Dress

Credits: 3

Course explores the system of dress, from body to garment selection, and the influences of psychology, culture and subculture on dress and self-presentation. Topics discussed include body image, society and social control, norms and dress outside the western world. Course will conclude by exploring current designers.

USP 2015 Code U5H

Former Course Number [1165]

FCSC2175 - Fashion Illustration

Credits: 3

Introduces the fashion figure, light and dark contrasts, color, fabric and texture sketching techniques. Computer applications for layout of the design are also covered.

When Offered (Offered alternate fall semesters)

Prerequisite: FCSC 1180 or ART 1110; FCSC 1175.

FCSC2180 - Housing and Residential Design

Credits: 3

Cross-cultural examination of the evolution of housing and residential design, both as artifacts of material culture, and as the setting which affects human development and well-being. Explores implications of housing construction on economic, social, and environmental health. Studies effective research and design of residential spaces in response to course concepts.

Prerequisite: WA/COM1.

FCSC2185 - Trend Forecasting and Analysis

Credits: 3

This course introduces concepts and techniques for color, textile, interior and fashion trend forecasting. Students will learn how to recognize current trends in lifestyle and ready-to-wear as well as signals for predicting forthcoming trends which impact retail merchandising and marketing decisions.

FCSC2188 - Interior Design Studio I

Credits: 3

Beginning interior design course in which students practice design principles and the design process to create functional, sustainable, and aesthetically pleasing residential interior spaces. Explores effective space planning and innovation for small footprint spaces. Emphasizes design development through hand drawing and rendering techniques. Sophomore standing or consent of instructor.

Prerequisite: FCSC 1180 or consent of instructor.

FCSC2200 - Professionalism and Communication in FCSC

Credits: 3

An introduction to the field of Family and Consumer Sciences. Students will learn the history and approaches to problem solving using the body of knowledge in the field. The course will focus on professionalism and communication strategies using our departmental competencies.

USP 2015 Code U5C2

Prerequisite: FCSC major, FYS and COM1.

FCSC2210 - Fashion Show Event Planning

Credits: 2

Provides students with a real-world, integrative experience with planning a large-scale special event, specifically, a fashion show. Opportunities include garment and model acquisition and organization, production (music planning, scheduling judges, MCs and guest speakers), promotion, budgeting and stage/runway design. Students experience the entire process of planning, setup and execution.

FCSC2270 - Advanced Apparel Construction

Credits: 3

Development of advanced apparel construction and tailoring techniques. Continued development of decision-making skills in selection, use and evaluation of materials.

Former Course Number [3170]

Prerequisite: FCSC 1170.

FCSC3110 - Personal Finance

Credits: 3

Acquaints students with personal budgeting and financial matters and relate these activities to financial institutions involved.

Prerequisite: junior standing.

FCSC3119 - Parent-Child Relationships

Credits: 3

Provides an overview of research and theory related to the processes of parent-child relationships across the lifespan. Emphasizes developmental and family theory and contexts that influence parent-child relationships. Introduces parent education as a method for applying parenting scholarship to professional practice.

Former Course Number [4119]

Prerequisite: PSYC 1000 or FCSC 2121 or EDST 2450.

FCSC3122 - Adolescence

Credits: 3

Studies biological, cognitive, and social/emotional development and adjustment within the adolescent and emerging adulthood years. Emphasis on the importance of theoretically grounded research and the integration of theory, research, and practice during adolescence.

Former Course Number [4122]

Prerequisite: PSYC 1000.

FCSC3129 - Social Development in Young Children

Credits: 3

Designed to provide professional child development and early childhood education majors with an opportunity to learn more about how to encourage healthy social development in young children. In addition, topics of self-esteem, emotional regulation, and secure attachment will be discussed in depth with regards to how they affect overall development.

Prerequisite: FCSC 2121 or PSYC 2300.

FCSC3142 - Geriatric Nutrition

Credits: 2

Studies nutrition requirements in elderly as effected by physiological changes with aging and the impact of nutrition and healthy lifestyle on prevention and treatment of age related conditions, diseases and social issues.

Former Course Number [4142]

Prerequisite: FCSC 1141; LIFE 1010.

FCSC3145 - Sports Nutrition and Metabolism

Credits: 3

Discusses roles played by carbohydrate, fat, protein, water, and key vitamins and minerals as they relate to physical exercise. Applies principles of nutrition.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC3147 - Community Nutrition

Credits: 3

Provides an introduction to the field of community nutrition and develops an appreciation of the importance of nutrition in community health programs at the local, state, national, and international level. Topics covered include the role of the community nutritionist; the identification of nutrition problems; food insecurity; nutrition policy; nutrition education; assessing community resources; and program planning and evaluation.

Prerequisite: FCSC 1141; SOC 1000 or SOC 1100.

FCSC3150 - Intermediate Foods

Credits: 2

Examines food management concepts in regards to the service of safe food, modified menu development, and understanding of federal food regulations for food and nutrition labelling.

Prerequisite: FCSC 1150; CHEM 1020; MOLB 2021; junior standing and FCSC majors and minors.

FCSC3152 - Food Systems Production

Credits: 3

Quantity food purchasing and production, along with institutional food services experience.

Former Course Number [4152]

Prerequisite: FCSC 3150 and LIFE 1010.

FCSC3160 - Merchandise Retailing and Buying

Credits: 3

Provides students with the knowledge involved in the buying function of the merchandising and retailing process, including merchandise planning and retail math. Gives students the necessary skills to pursue a career in retail buying.

Prerequisite: FCSC 2185 and MATH 1000 or MATH 1400.

FCSC3171 - Introduction to Textile Science

Credits: 3

Textiles are part of your everyday life. This course introduces fiber and polymer manufacturing, fiber properties, yarn properties, yarn manufacturing, fabric properties, fabric manufacturing, and coloration/ finishing of textile materials. Understanding of the science behind fabric and clothing care instructions, quality indicators and new developments on the horizon for textiles will be gained.

USP 2015 Code U5PN

Former Course Number [2171]

Prerequisite: Completion of USP Q requirement.

FCSC3173 - Visual Merchandising and Promotion

Credits: 3

Principles of visual merchandising, consumer behavior for effective promotions, and selling techniques are discussed. Topics include brand development, advertising, visual display, publicity, fashion shows, special events, store space planning and layout. Students will have hands-on experience with several techniques.

When Offered (Offered alternating fall semesters, odd years)

Former Course Number [4173]

Prerequisite: FCSC 1180 and FCSC 2188.

FCSC3174 - Flat Pattern Design

Credits: 3

Principles and instructions for drafting and hand grading patterns using slopers through standard or individual measurements. Techniques of garment design are learned to create three-dimensional designs using the flat pattern method.

When Offered (Offered alternate spring semesters)

Former Course Number [4170]

Prerequisite: FCSC 2175 and FCSC 2270.

FCSC3175 - Apparel Design Through Draping

Credits: 3

Draping garment patterns through fabric manipulation, molding, and shaping to create three-dimensional form utilizing couture construction techniques.

Prerequisite: FCSC 2270

FCSC3180 - Contract Design I

Credits: 3

Interior design course focused on designing sustainable contract spaces primarily for the hospitality industry. As needed, other public space design may be explored. Design development and communication through advanced design and rendering software will be utilized. Students will learn to write specifications and practice design development through evidence based design.

Prerequisite: FCSC 2188 and FCSC 3288 or concurrent enrollment, or consent of instructor.

FCSC3185 - Product Development Through Design Thinking

Credits: 3

Students will expand their understanding of design and the strategies utilized to bring desirable and human-centered products to market. Techniques and skills for developing textile, interior and apparel products will be discussed. Students will gain understanding and recognition of the elements of design through product analysis.

Prerequisite: FCSC 1180.

FCSC3188 - Interior Design Studio II

Credits: 3

Building upon skills developed in ID Studio 1, students will gain advanced knowledge of lighting, building codes and systems, specifications, materials, and space planning through more complex residential design problems. Design thinking and human centered design are emphasized. Explores design development and communication through CAD based and hand rendering techniques.

Prerequisite: FCSC 2188.

FCSC3220 - Multicultural Influences on Children and Families

Credits: 3

Designed to enrich students' understanding of cultural contexts of children and families. Issues to be explored will include cultural values, learning styles, acquisition of concepts of race and ethnicity, bi-lingualism, the theory of

bicultural/ bicognitive development, and effective communication and problem-solving strategies that apply in multiple professional settings.

USP 2003-2014 Code U3CS, U3D

USP 2015 Code U5H

Prerequisite: FCSC 2121 or PSYC 2300 or FCSC 2131.

FCSC3288 - Environmental Psychology and Inclusive Design

Credits: 1

Online design primer focused on preparing students for the contract interior design series. Explores how humans interact with, experience, and behave in public spaces. Advances understanding of design inclusivity by interpreting and applying ADA regulations, along with considerations for diverse ages, circumstances, and abilities.

Prerequisite: FCSC 2180 , FCSC 2188 , or concurrent enrollment in 2188

FCSC4044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 5044.

Former Course Number [3140]

Prerequisite: FCSC 1141; LIFE 1010; ZOO 3115.

FCSC4104 - Field Studies in Family and Consumer Sciences

Credits: 1-3

Concentrated on-site study of family and consumer sciences-related businesses, agencies and organizations to better understand challenges and potentials of various career opportunities in family and consumer sciences.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: junior standing.

FCSC4105 - Family and Consumer Sciences Internship

Credits: 6-8

Max Credit (Max. 8)

Gives students experience in workplace related to selected family and consumer sciences options (i. e. , retail store, social service agency and preschool or day care).

Prerequisite: junior standing in family and consumer sciences and consent of instructor.

FCSC4106 - Special Problems in Family and Consumer Sciences

Credits: 1-3

Provides advanced undergraduate students opportunities to pursue a topic of special interest in a selected family and consumer sciences area, under guidance of a department faculty member.

Prerequisite: junior or senior standing and advanced consultation with department head and an instructor in subject matter area.

FCSC4112 - Family Decision-Making and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection.

Dual Listed FCSC 5112.

Prerequisite: PSYC 1000 or SOC 1000 or COMM 1030 or COMM 1040; WB/COM2.

FCSC4113 - Consumer Issues

Credits: 3

Provides research/ applied understanding of consumer rights/ responsibilities, government/business roles, legislation, advocacy, and redress. Emphasizes introductory consumer law/legal research, critical thinking, self-reflection, and cultural examination. Ethical theories and issues examined within an interdependent world. Meets requirements for certification in family and consumer sciences education. Internship opportunities possible upon successful completion. Companion web site used.

Prerequisite: ECON 1000 or SOC 1000 or PSYC 1000; WB/COM2.

FCSC4117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 5117.

USP 2003-2014 Code U3CS

Prerequisite: senior standing and satisfactory completion of a WB/COM2 course.

FCSC4118 - Family Policy

Credits: 3

Explores the relationships between public programs/policies/laws and family functioning. The roles of family professionals in advocacy and education regarding policies will be discussed. Attention will be paid to current events

relevant to family policy issues and the policy process at the state level.

Dual Listed FCSC 5118.

Prerequisite: FCSC 2131; junior standing.

FCSC4124 - Families of Young Children With Special Needs

Credits: 3

Deals with importance of including family in the process of early intervention with the preschool child with special needs.

Prerequisite: FCSC 2121 or PSYC 2300; junior standing.

FCSC4125 - Professional Practices in Human Development and Family Sciences

Credits: 3

Explores key professional and ethical issues related to professional practice in Human Development and Family Sciences. Reviews Family Life Education history, purpose, and methodology. Emphasizes skills and knowledge needed to work in various settings with individuals and families across the lifespan. This class is a prerequisite for HDFS student internships (FCSC 4130; FCSC 4131; FCSC 4132).

When Offered (Offered fall semester only)

Prerequisite: FCSC 2110, FCSC 3119, FCSC 3122, FCSC 3220 AND FCSC 2131.

FCSC4127 - Directing Preschool and Daycare Programs

Credits: 3

Effective methods for establishing and operating preschool and day-care programs for children under six years of age. Includes programming, classroom management, parent involvement and administration of food and nutrition programs.

USP 2003-2014 Code U3WC

Prerequisite: FCSC 2121, EDEC 1020 or 3210; junior standing.

FCSC4130 - Internship in Child Development

Credits: 6-8

Max Credit (Max. 8)

Provides professional child development and early childhood education majors with an in-depth experience working with children from birth to age five. Students gain experience including planning lessons, teaching, assessing children and conducting parent conferences.

Prerequisite: FCSC 2121; EDEC 3000; EDEC 3220; senior standing.

FCSC4131 - Administration Internship in Child Development

Credits: 6-8
Max Credit (Max. 8)

Provides professional child development and early education majors with an in-depth experience working with families and staff. Students gain experience in observing and assessing early childhood programs, planning and presenting staff trainings/professional workshops, staff supervision, writing newsletters, and other professional documents and professional activities.

Prerequisite: FCSC 2121; FCSC 4127; senior standing.

FCSC4132 - Internship in Human Development and Family Sciences

Credits: 4-6
Max Credit 6

Students will acquire skills and gain familiarity in direct services, policy development, or program planning in a human services agency/organization. Opportunities to apply theories and knowledge gained in classroom settings to professional practice will be provided. Offered spring or summer semesters.

When Offered (Offered spring and summer semesters only)

Prerequisite: FCSC 4125

FCSC4135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 5135.

Prerequisite: Junior standing.

FCSC4138 - Family Stress and Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative stressors and crisis in the lives of individuals and families. Attention is paid to the application of theory and research to professional practice.

Dual Listed FCSC 5138.

Prerequisite: FCSC 2131; junior standing.

FCSC4145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 5145.

When Offered (Offered fall semester)

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological and metabolic determinants of weight control emphasizing pathology, psychodynamics, assessment and treatment of obesity.

Dual Listed FCSC 5147.

Prerequisite: FCSC 1141; ZOO 3115.

FCSC4150 - Experimental Foods

Credits: 3

Studies physical and chemical properties of raw and processed food materials and tests for evaluation of food quality. Students develop ability to use and interpret recent research findings, as well as skills in planning, conducting and reporting food experiments.

Prerequisite: FCSC 1150, CHEM 2300, STAT 2020, ENGL 4010, FCSC major.

FCSC4160 - Merchandising Strategies and Technology

Credits: 3

Students will be exposed to advanced merchandising strategies for retail buying and planning. Technologies used for gathering pertinent retail data, such as foot traffic and inventory management software, will be introduced. Course will expand on concepts introduced in prerequisite coursework.

Prerequisite: FCSC 3160.

FCSC4171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 5171.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4172.

FCSC4172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 5172.

Prerequisite: FCSC 3171 and concurrent enrollment in FCSC 4171.

FCSC4176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Includes information from approximately 3000 B.C. through the 20th century. Dual listed with FCSC 5176.

Cross Listed FCSC 5176

When Offered (offered alternate spring semesters, odd years)

Prerequisite: FCSC 2165

FCSC4178 - Fiber Arts

Credits: 3

Max Credit (Max. 6)

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 5178.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 5181.

When Offered (Offered spring semester odd years)

USP 2003-2014 Code U3G

Prerequisite: FCSC 1185.

FCSC4182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 5182.

When Offered (Offered alternate spring semesters)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: completion of USP WB/COM2 requirement.

FCSC4185 - Product Development and Technology

Credits: 3

This course introduces students to various technologies used to bring products to market. 3-D body scanning, computer apparel pattern digitizing, grading, marker making and repeats for digitally-printed, knit and woven fabrics will be discussed. Students will complete product technical packages based on product specifications.

Prerequisite: FCSC 3185, FCSC 4171, and FCSC 4172.

FCSC4188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 5188.

Prerequisite: FCSC 2188 and FCSC 3288 (or concurrent enrollment), or consent of instructor.

FCSC4190 - Apparel Collection Development

Credits: 3

Students will utilize their pattern-making and apparel construction skills and continue to expand their knowledge of fit on live models through creation of their own apparel collection. They will be responsible for the creation of the collection from inspiration to final product. Collections will be showcased through a real-world fashion show.

Prerequisite: FCSC 3174 or FCSC 3175.

FCSC4210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 5210.

Prerequisite: ZOO 3115, MOLB 3610, and FCSC 4145 or concurrent enrollment.

FCSC4220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 5220.

Prerequisite: MOLB 4100.

FCSC4230 - Therapeutic Nutrition Counseling

Credits: 2

Course is designed to help students develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client.

Dual Listed FCSC 5230

A&S College Core 2015 Dietetics students only.

Prerequisite: FCSC 4220 or concurrent enrollment.

FCSC4288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 5288.

Prerequisite: FCSC 3180 or FCSC 4188.

FCSC4346 - Clinical Practicum in Dietetics

Credits: 1

Concentrated clinical practicum designed to provide dietetic majors with experience in the institutional, practitioner and clinical settings.

A&S College Core 2015 Enrollment is limited to dietetics students only.

Prerequisite: FCSC 4220 and permission of instructor.

FCSC4960 - International Study Tour FCS

Credits: 3

Max Credit (Max. 6)

Designed to provide students with an opportunity to learn more about food, design, and human services in international settings. Students will visit locations relevant to the Family and Consumer Science discipline.

When Offered (Offered based on sufficient demand and resources every other spring/summer term, odd years; international destinations vary)

Prerequisite: consent of instructor.

FCSC4970 - Design and Merchandising Internship

Credits: 3

Max Credit (Max. 6)

Provides practical experience in retail, interior design or apparel design settings.

Prerequisite: junior standing or consent of instructor.

FCSC4985 - Seminar: Development in Community Leadership

Credits: 2-3

Emphasizes basic core components of individual leadership: assessment of leadership skill and style; community-based experiences for understanding of community and resources; group community development projects for students; engagement with others and the community. Upon completion, students understand various leadership styles and philosophies and articulate their personal leadership philosophy.

Dual Listed FCSC 5985.

Prerequisite: senior or post-graduate equivalent status and consent of instructor.

FCSC5044 - Maternal, Infant and Adolescent Nutrition

Credits: 3

Addresses nutrition requirements prior to and during pregnancy and lactation and continuing through infancy and adolescents and the physiological and endocrine changes influencing such requirements. Discusses dietary patterns and practices and the importance of healthy lifestyles during these periods for disease prevention and treatment.

Dual Listed FCSC 4044.

Prerequisite: graduate standing.

FCSC5101 - Special Topics in Family and Consumer Sciences

Credits: 1-3

Max Credit (Max. 6)

Intended to accommodate a seminar series and a course offering by visiting faculty whose subject matter is not included in other course offerings.

FCSC5102 - Special Problems

Credits: 1-12

Max Credit (Max. 18)

Study in a selected problem area for broader perspective or greater specialization in the student program.

Prerequisite: advanced or graduate standing and consultation with department head and instructor in subject matter area.

FCSC5103 - Graduate Seminar in Family and Consumer Sciences I

Credits: 1

Integrative Seminar in Family and Consumer Sciences. Students are exposed to faculty research, discuss common readings and present their own research.

Prerequisite: graduate student standing.

FCSC5104 - Graduate Seminar in Family and Consumer Sciences II

Credits: 1

Integrative seminar in Family and Consumer sciences. Students are exposed to faculty research, will discuss common readings, and will present their own research. Graduate Seminar II can only be taken for a letter grade.

Prerequisite: FCSC 5103.

FCSC5107 - Family and Consumer Sciences Extension Practicum

Credits: 8

To provide experience in county extension programs.

Prerequisite: AGRI 4010, advanced standing and consent of instructor.

FCSC5112 - Family Decision and Resource Management

Credits: 3

Utilizes theories to facilitate understanding of problem-solving and resource management in various family structures/ contexts across the life span. Emphasizes internal family dynamics, global interdependence, critical thinking, cultural examination, ethical decision-making, and self-reflection. Designed to meet family studies requirement for license in marriage and family therapy at graduate level. Companion website used.

Dual Listed FCSC 4112.

Prerequisite: graduate standing.

FCSC5117 - Understanding Community Leadership

Credits: 3

Understanding Community Leadership. Introduces students to the scope and functions of professionals working in rural communities as leaders. Students will explore community dynamics, leadership skills and managing change, and understand the complexities of leadership within communities. Understanding communities and leadership increases the likelihood of success for community based professionals.

Dual Listed FCSC 4117.

Prerequisite: graduate standing.

FCSC5118 - Family Policy

Credits: 3

Explores the relationships between family functioning and public/ private policies. The roles of family professionals in advocacy and education regarding policies are discussed. Attention is paid to the policy process at the state level.

Dual Listed FCSC 4118.

Prerequisite: graduate standing.

FCSC5120 - Infancy and Toddlerhood

Credits: 3

Examines development and behavior, focusing on a broad range of topics which includes: physical development, prenatal influences, sensory processes, biological factors, cognitive development, language development, social interaction and relationship. A broad family and consumer sciences perspective (the family in its environment) are applied.

Prerequisite: FCSC 2121 or equivalent course in child development.

FCSC5121 - Ethics in Research and Professional Practice

Credits: 3

Includes ethical theories, responsible conduct of research and professional practice defined by government, professional organizations, journals, and employers. Concepts include plagiarism, fabrication, falsification, conflict of interest, and conflict of commitment, and institutional review boards protecting human subjects. Concepts will be applied to research and professional practice in different settings.

Prerequisite: acceptance into a graduate program.

FCSC5122 - Developmental Contexts Across the Lifespan

Credits: 3

A variety of contexts in which children, adults, and families live and develop. Attention is given to the constant interactions that occur between humans and their environments, as well as how different environments may foster or hinder development. Includes discussions of the practical, professional and political implications of contextual research.

Prerequisite: graduate standing.

FCSC5123 - Positive Youth Development

Credits: 3

This course explores positive youth development (PYD), or the understanding and promotion of the well-being and health of youth. In this course, we will examine PYD theory and frameworks, research regarding how to best assess and foster PYD, and interventions designed to promote PYD and associated outcomes.

Prerequisite: graduate standing.

FCSC5135 - Program Evaluation

Credits: 3

Explores techniques for evaluating programs in the public and/or private sectors. Includes determining need, identifying/communicating with stakeholders, developing program theory/logic models, implementation, evaluation methods/instruments, and interpreting/reporting evaluation results.

Dual Listed FCSC 4135.

Prerequisite: Graduate standing.

FCSC5138 - Family Stress/Coping

Credits: 3

Theoretical and empirical research on family stress, coping and resiliency is emphasized as well as the study of normative and nonnormative stressors and crises in the lives of families. Attention is paid to professional practice applications.

Dual Listed FCSC 4138.

Prerequisite: graduate standing.

FCSC5140 - Nutritional Aspects of Proteins and Amino Acids

Credits: 3

Advanced study of protein and amino acid metabolism in various physiological conditions.

Prerequisite: MOLB 3610 or equivalent; FCSC 4145 or equivalent.

FCSC5141 - Carbohydrate and Ethanol Metabolism

Credits: 3

Advanced study of carbohydrate and ethanol metabolism in various physiological conditions.

Prerequisite: MOLB 3610 or equivalent and FCSC 4145 or equivalent.

FCSC5145 - Advanced Nutrition

Credits: 4

Discusses functions of components of diet in human metabolism. Applies principles of nutrition.

Dual Listed FCSC 4145.

Prerequisite: graduate standing.

FCSC5147 - Nutrition and Weight Control

Credits: 3

Advanced course in physiological determinants of weight control emphasizing pathology, psychodynamics,

assessment, and treatment of obesity.

Dual Listed FCSC 4147.

Prerequisite: graduate standing.

FCSC5151 - Sensory Analysis

Credits: 1

Examines the principles and techniques applied to the subjective evaluation of food.

Prerequisite: graduate standing; STAT 5080.

FCSC5171 - Advanced Textiles and Product Evaluation

Credits: 3

Coloration is a key determinant in consumer textile purchases. This course introduces color science, dye properties and application and colorfastness evaluation. Quality control, testing standards, laboratory tests and specifications and how they are used to evaluate textiles products will also be discussed.

Dual Listed Dual listed with: FCSC 4171.

Prerequisite: graduate standing.

FCSC5172 - Advanced Textiles and Product Evaluation Lab

Credits: 1

Practical application of various textile science and quality assurance tests discussed in FCSC 3171 and FCSC 4171. Basic and advanced levels of testing on products in different stages of manufacture conducted. Students will use select test results to generate product specifications.

Dual Listed FCSC 4172.

Prerequisite: graduate standing.

FCSC5173 - Textile Science Seminar

Credits: 3

Advanced study of textile science, physical and chemical modification of fibers, developments in dyeing and finishing technology. Environmental aspects of textile technology. Extensive use of current literature is utilized.

FCSC5176 - Historic Clothing

Credits: 3

Surveys history of clothing in the Western World. Course content includes information from approximately 3000 BC through the 20th century.

Dual Listed FCSC 4176.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5178 - Fiber Arts

Credits: 3

Development and enhancement of technical and creative apparel design skills with a focus on embellishment techniques and creative pattern-making culminating in the creation of a distinctive piece of wearable art.

Dual Listed FCSC 4178.

Prerequisite: graduate standing.

FCSC5179 - Historic Textiles

Credits: 3

History of all major textile industries is explored. Processes and technical terms are explained. The role and impact of textiles in western economies and societies are examined.

When Offered (Offered alternate fall semesters)

Prerequisite: graduate standing.

FCSC5181 - Global Trade and Sourcing for Textile Products

Credits: 3

Discusses global textile industry, how the U. S. fits into the global industry, textiles and apparel trade policy, as well as balancing conflicting interests in the world marketplace.

Dual Listed FCSC 4181.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5182 - Environmental Sustainability in Design, Merchandising and Textiles

Credits: 3

Examines the environment, the impact of the textile industry on the environment, and issues facing the textile industry to provide more environmentally friendly products.

Dual Listed FCSC 4182.

When Offered (Offered alternate spring semesters)

Prerequisite: graduate standing.

FCSC5188 - Contract Design II

Credits: 3

Explores space planning and design as applied to contract interiors. Focused on healthcare and corporate design, but may survey other public spaces as appropriate. Advanced design, rendering, and visualization software used to conceptualize and present design solutions. Sustainable, accessible and functional design is highlighted.

Dual Listed FCSC 4188.

Prerequisite: graduate standing.

FCSC5210 - Therapeutic Nutrition I: Nutrition Assessment and Diagnosis

Credits: 4

Nutrition assessment and diagnosis as part of the nutrition care process; experience in dietary and nutrient assessment of the apparently healthy and sick individual with discussion of case studies.

Dual Listed FCSC 4210.

Prerequisite: graduate standing and permission of instructor.

FCSC5220 - Therapeutic Nutrition II

Credits: 4

Rationale for dietary modifications in pathological conditions; experience with learning and applying the nutrition care process to develop nutrition care plans for individuals with various medical conditions with discussion of case studies.

Dual Listed FCSC 4220.

Prerequisite: graduate standing.

FCSC5230 - Therapeutic Nutrition Counseling

Credits: 4

Students will develop basic nutrition counseling and communication skills. Students will learn how to apply the concepts learned during lecture through interactive classroom experiences with peers and outside of the classroom experiences with an assigned client. Dietetics students only.

Dual Listed FCSC 4230.

Prerequisite: graduate standing or permission of instructor.

FCSC5288 - Professional Practice and Advanced Interiors Studio

Credits: 4

Explores standards of practice, project management, contract documents, portfolio development, and professional ethics and conduct in interior design. Studio based projects are focused on creating residential or contract designs through collaboration and integrated practice with interdisciplinary teams, and/or designs created for clients through service based learning.

Dual Listed FCSC 4288.

Prerequisite: graduate standing.

FCSC5890 - Seminar in Food Science and Nutrition

Credits: 1

A seminar course on topics in food science and human nutrition.

Cross Listed FDSC 5890.

Prerequisite: graduate standing.

FCSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FCSC5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FCSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FCSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

FCSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FCSC5985 - Development of Community Leadership

Credits: 2-3
Max Credit (Max 98)

Emphasizes basic core components of individual leadership: assessment of leadership skill and style; community based experiences for understanding of community and resources; group community development projects for student engagement with others and the community. Upon completion of course, students will understand various leadership styles and philosophies and articulate their personal leadership philosophy.

Dual Listed FCSC 4985.

Prerequisite: senior or post graduate equivalent status and consent of instructor.

Finance

FIN2010 - Personal Finance and Investments

Credits: 3

A general course treating the fundamentals and organization of the securities markets, types of orders, elementary market computations, basic investment management and etc. For students university-wide who have an interest in investments.

When Offered (Offered based on sufficient demand and resources)

Former Course Number [3010]

FIN2100 - Principles of Finance

Credits: 3

Studies the management of capital in business. Students learn how to use the time value of money to value cash flows and how to perform a financial valuation of a firm's assets and liabilities.

Prerequisite: ACCT 2010, MATH 2350 or MATH 2355 or MATH 2200 , and STAT 2010, STAT 2050, or STAT 2070, all with C or better, and sophomore class standing.

FIN3100 - Real Estate Development

Credits: 3

This course presents the basic principles involved in real estate development. Topics include: land acquisition and appraisal, site improvements, market feasibility analysis, development financing, real estate government approval and regulations, real estate engineering and construction issues, real estate marketing and property operations and performances.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: ACCT 2010.

FIN3310 - Investment Management

Credits: 3

Fundamental principles of investments and practical implications of financial theory. Students acquire a framework for understanding returns on financial assets, risk and return, fundamentals of portfolio theory, efficient market hypothesis, and asset pricing models. Other topics include financial statement analysis, behavioral finance, and introduction to options and futures.

Former Course Number [4310]

Prerequisite: FIN 2100 and advanced business standing.

FIN3520 - Financial Markets

Credits: 3

Portfolio and capital market theory and the analysis of risk are introduced. Integrates theory into practical aspects of financial markets.

Former Course Number [4520]

Prerequisite: FIN 2100, STAT 2010 or STAT 2050/STAT 2070, and advanced business standing.

FIN4250 - Advanced Corporate Finance

Credits: 3

Give students a better appreciation of the techniques and theories of corporate finance and investments that may have been introduced in introductory finance courses.

USP 2015 Code U5C3

Prerequisite: FIN 2100.

FIN4340 - Portfolio Management I

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4350 - Portfolio Management II

Credits: 3

Manage, monitor and invest real money provided by the State of Wyoming and the University of Wyoming Foundation. Students should obtain from the course the ability to construct investment portfolios from scratch, to learn the signals from which to obtain sell and buy data and the ability to act on this information.

Prerequisite: FIN 3310 and advanced business standing.

FIN4360 - Options and Futures

Credits: 3

Provides an introduction to financial futures such as currency futures and interest rate futures. Explores the markets on which they are traded. Also analyzes pricing of options and other derivative securities. Includes the leverage and risk aspects of options.

Prerequisite: FIN 2100, FIN 3310.

FIN4400 - Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 5400.

Prerequisite: FIN 2100, FIN 3310, IMGT 2400, advanced business standing.

FIN4460 - Multinational Finance

Credits: 3

Deals with quantitative techniques used by financial managers and investors in global financial markets. Topics covered include exchange rate determination, management of foreign exchange exposure, international portfolio investment, and current topics in international finance.

Prerequisite: FIN 2100.

FIN4510 - Bank Management

Credits: 3

Deals with financial decision-making in financial institutions, particularly emphasizing commercial banks. Topics covered include managing financial assets, deposit acquisition and capital management.

Prerequisite: FIN 2100 and advanced business standing.

FIN4530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 5530.

Prerequisite: FIN 2100, advanced business standing.

FIN4540 - Banking Policy

Credits: 3

Intended to be taken either with or after FIN 4510, Bank Management, and will cover similar topics but in greater depth and breadth. Integrated application of these topics will take place in a selection of case studies, some of which will be analyzed in teams.

Prerequisite: FIN 4510 or concurrent enrollment in FIN 4510.

FIN4710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 5710.

Prerequisite: FIN 2100

FIN4800 - Real Estate Finance

Credits: 3

Exposes students to the fundamentals of real estate finance such as mortgage financing, commercial leases, pro-forma analysis, financial modeling, tax implications, leveraged real estate and valuation of income producing properties. While the theory of each topic will be presented, the focus is on the applications of the material.

Prerequisite: FIN 2100 and advanced business standing.

FIN4810 - Real Estate Investment

Credits: 3

Covers advance real estate investment topics such as investments risk and valuation sensitivity analysis, futures and real options, liquid real estate investments, analysis of development projects, and commercial mortgage backed securities. While the theory the topics will be presented, the course focus is on the application of the material.

Prerequisite: FIN 2100 and advanced business standing

FIN4900 - Ind. Study in Finance

Credits: 1-6

Max Credit 6

This course provides students the opportunity to study, on an individual basis, any aspect of Finance not included in other structured Finance courses.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

FIN4910 - Topics in Finance

Credits: 1-6
Max Credit 6

This course is an in-depth investigation into a specialty area of the instructor.

Restricted Include: Juniors, Seniors/Exclude: Freshman/Sophomores

Prerequisite: Junior class standing, consent of instructor

FIN5070 - Tax Planning for Financial Planners

Credits: 3
Focuses on principles, current law, and practice of income taxation and its impact on financial planning for individuals, couples, and families in their role as investors, employees, and business owners.

Dual Listed FIN 4070.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5250 - Cases in Corporate Finance

Credits: 3
Max Credit 3

The goal of this course is to enhance students' understanding of major corporate decisions, and to explore the role such decisions play in value creation within a corporation. Some issues covered in the course will include analyzing companies' historical performance, forecasting future performance, estimating hurdle rates, and analyzing resource allocation choices.

Restricted MS Finance and/or CFP Certificate

Prerequisite: Admission to MS Finance and/or CFP Certificate Program, or department approval

FIN5310 - Advanced Investment Analysis

Credits: 3

The theory of investment management and security values, portfolio management including the analysis of investment policies and objectives, the analysis and use of investment information, and the development and application of the tools for determining values.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5320 - Corporate Finance and Governance

Credits: 3

Designed to provide a framework to analyze issues in corporate finance and governance. The firm is viewed as a nexus of contracts designed to reduce the costs of trade-and corporate finance is regarded as an investigation of the incomplete contracts that involve the providers of capital.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5400 - Advanced Financial Modeling

Credits: 3

Involves the application of basic econometric methods to the analysis of financial data. Focus is on utilizing spreadsheets and other softwares to facilitate financial decision making.

Dual Listed FIN 4400.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5502 - Energy Finance: Project Evaluation

Credits: 3

This course introduces students to the key methods used to evaluate investments in energy industry projects from the perspective of the developer as well as the lender and other stakeholders. Topics include project finance modeling, techno-economic considerations, business structures, regulatory and legal issues, risk analysis, and deal terms.

Restricted Admitted to CERT-MBAE or MBA-MBA.

Prerequisite: Admission to the MBA or Energy Business certificate program, or permission of the MBA Program Director.

FIN5530 - Fixed Income Securities

Credits: 3

Provides an overview of the fixed income securities markets, pricing and risk management. In so doing, the course follows the CFA institute learning objectives of the CFA exam. We first introduce the major forms of fixed income securities. We then delve into valuation of these securities using a myriad of pricing techniques. We then embark on credit risk analysis, followed by fixed income portfolio management. Ultimately, the course aims at preparing students for most challenging and yet active fixed income markets: corporate bonds and mortgage securities.

Dual Listed FIN 4530.

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5710 - Risk Management

Credits: 3

Analyzes the risk management and insurance problem in the business enterprise with emphasis on methodology for risk analysis; techniques for risk and loss control; and models for risk management decision-making.

Dual Listed FIN 4710.

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5720 - Insurance and Retirement Planning

Credits: 3

This class is designed to help graduate students understand various topics in retirement and insurance planning for individuals and families.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5750 - Fundamentals of Financial Planning

Credits: 3

This is a survey course for financial planning and wealth management. The topics include insurance planning, tax planning, investment planning, retirement planning, estate planning, and professional conduct. The course will focus on acquiring a framework for understanding the major components of financial planning and developing a coordinated financial plan.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5780 - Estate Planning

Credits: 3

This course will cover general reliability modeling and evaluation; probability and stochastic processes; system modeling; methods of reliability assessment (state space, frequency balancing, cut-set and tie-set analysis,

decomposition, Monte Carlo simulation); and reliability modeling and analysis of electric power systems: bulk power systems, distribution systems, and industrial systems.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5800 - CFP Capstone

Credits: 3

This course will be organized around the four major areas of financial planning, as outlined by the College of Financial Planning curriculum. These four key areas are as follow: retirement planning; income tax planning; investment planning; and estate tax planning.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to the MS program or permission of the Department Head.

FIN5890 - Advanced Problems in Finance

Credits: 1-9

Max Credit (Max. 9)

An arrangement whereby a student is permitted to develop an advanced phase of finance not offered in the formally structured courses or to investigate a finance problem, a written report is required.

Restricted MS-FIN and/or CERT-CFP

Prerequisite: Admission to MS in Finance and/or CFP Certificate Program or department approval.

FIN5920 - Continuing Registration: On Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FIN5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FIN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Food Science

FDSC1101 - First-Year Seminar

Credits: 3
USP 2015 Code U5FY

FDSC1410 - Scientific Study of Food

Credits: 3
Scientific Study of Food is an introductory course in the science of food, which includes selection, preparation, to meet physical, psychological, and social needs. This course fulfills the Physical and Natural World USP.

When Offered (Normally offered fall semester)
USP 2003-2014 Code PN

FDSC1411 - Scientific Study of Food Lab

Credits: 1
Max Credit 1

The Scientific Study of Food lab gives students a hands-on introductory experience with food science, food selection, and preparation, and food safety. Concurrent enrollment in FDSC 1410 is required for FCSC Dietetics students.

Restricted FCSC Dietetics student status

FDSC2040 - Principles of Meat Animal Evaluation

Credits: 3
Live animal and carcass evaluation of beef, sheep and swine. Slaughter, meat inspection and anatomy are discussed.

When Offered (Normally offered spring semester)

FDSC3060 - Principles of Meat Science and Muscle Biology

Credits: 3
Principles of muscle, adipose, and connective tissue growth, structure and metabolism; conversion of muscle into meat; fresh meat properties and quality; chemical properties of meat; meat microbiology, preservation and storage; meat by-products; HACCP.

When Offered (Normally offered fall semester)

Prerequisite: CHEM 1000 and LIFE 1010.

FDSC3061 - Livestock Slaughter Practicum

Credits: 1

Students learn and practice proper techniques of livestock slaughter.

When Offered (Normally offered fall semester)

Prerequisite: 4 credits of biological sciences.

FDSC3062 - Carcass Fabrication

Credits: 2

Principles of carcass fabrication; Institutional Meat Purchase Specifications and North American

When Offered (Normally offered spring semester)

Prerequisite: 4 credits of biological sciences.

FDSC3063 - Meat Processing

Credits: 2

Principles of applicable meat protein chemistry, heat transfer and other processing parameters applicable to production of sausage, cured meat, and other processed products. A variety of processed meat products will be manufactured in lab.

When Offered (Normally offered spring semester)

Prerequisite: FDSC 3060 or concurrent registration.

FDSC3545 - Introduction to Meat Judging

Credits: 3

USDA grading standards, value pricing, yield and quality attributes of meat are used to evaluate products. Improve communication skills and terminology through oral and written reasons. Requires field trips.

When Offered (Normally offered fall semester)

Prerequisite: FDSC 2040.

FDSC3550 - Advanced Meat Judging

Credits: 1-2

Students representing the university in national and regional contests are selected from this course. Requires field trips.

Former Course Number [2100]

Prerequisite: FDSC 3545.

FDSC3720 - Applied Food Chemistry

Credits: 3

Study of chemistry and composition of nutrients in raw and processed foods.

When Offered (Normally offered spring semester)

Former Course Number [4720]

Prerequisite: CHEM 2300 or ANSC 2010.

FDSC4090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Cross Listed MICR 4090.

Dual Listed FDSC 5090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021 or MICR 2021.

FDSC4100 - Laboratory Techniques in Food Microbiology

Credits: 1

Lab techniques used in food microbiology.

Cross Listed MICR 4100.

Dual Listed FDSC 5100.

When Offered (Normally offered spring semester)

Former Course Number [610]

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

FDSC4800 - Problems in Food Science

Credits: 1-3

Examines special problems related to quality control, formulation and processing of meat, poultry and dairy foods. Offers research techniques and instrumentation in foods.

Prerequisite: 6 hours in FDSC, 6 hours in chemistry and consent of instructor.

FDSC4900 - Food Safety

Credits: 3

Issue-oriented lecture/ discussion course. Includes topics such as what is safe food, what makes food unsafe and how safety of a food is determined. Presents laws and regulations on food safety. In addition to a text, area experts are invited to discuss important issues.

When Offered (Offered fall semester of odd-numbered years)

Prerequisite: 6 hours of biological science.

FDSC4990 - Undergraduate Teaching Practicum

Credits: 1-2

Max Credit (Max. 4)

Participation of undergraduates in the teaching of FDSC courses under the supervision of faculty/staff.

Prerequisite: junior standing or consent of instructor.

FDSC5090 - Food Microbiology

Credits: 3

Discusses microorganisms and theory of their growth and survival in relation to spoilage and preservation of foods and health hazards in foods.

Dual Listed FDSC 4090.

When Offered (Normally offered spring semester)

Prerequisite: MOLB 2021 or MICR 2021.

FDSC5100 - Food Microbiology Laboratory

Credits: 1

Laboratory techniques used in food microbiology.

Dual Listed FDSC 4100.

When Offered (Normally offered spring semester)

Prerequisite: FDSC 4090 or FDSC 5090, taken concurrently.

FDSC5880 - Advanced Problems and Topics

Credits: 1-3

Max Credit (Max 6)

Designed to allow graduate students to pursue advanced research problems and advanced topics and to obtain experience in the teaching process.

Prerequisite: graduate standing and consent of instructor.

FDSC5890 - Seminar in Food Science and Nutrition

Credits: 1

A seminar course on topics in food science and human nutrition.

Dual Listed FDSC 4890.

Prerequisite: graduate standing.

FDSC5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FDSC5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FDSC5959 - Enrichment Studies

Credits: 1-3

Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may NOT be included in a graduate program of study for degree purposes.

FDSC5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FDSC5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrolled in a graduate degree program.

FDSC5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

French

FREN1010 - First Year French I

Credits: 4
Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

FREN1020 - First Year French II

Credits: 4
Fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: FREN 1010 or two years of high school French.

FREN2030 - Second Year French I

Credits: 4
Emphasizes the development of communication skills (listening, speaking, reading and writing) so as to help students function effectively in real-life contexts. Provides a systematic review of grammatical structures necessary for successfully communicating in French.

USP 2015 Code U5H

Prerequisite: FREN 1020 or three years of high school French.

FREN2040 - Second Year French II

Credits: 3
A course stressing the usage of the language through composition, conversation, oral presentations and grammar

review.

USP 2015 Code U5H

Prerequisite: FREN 2030, three years of high school French or FREN 1010, FREN 1020 with grade of B or better.

FREN2130 - Contemporary French Culture

Credits: 3

Designed as an introduction to contemporary French culture. It gives students an in-depth insight into contemporary French life. It also deals with issues affecting the French-speaking world in general: Quebec, Africa, New Caledonia, Switzerland, Monaco, etc.

USP 2015 Code U5H

Prerequisite: FREN 1020 or equivalent.

FREN2140 - Introduction to Reading

Credits: 3

Introduction to the literature of France; analysis of major literary types and elements of criticism.

USP 2003-2014 Code U3CH, U3G

Prerequisite: FREN 2030.

FREN3005 - French Phonetics and Pronunciation

Credits: 3

Focus on the phonetic structures of French through systematic pronunciation drills and phonetic transcriptions. Varied oral activities and exercises will help develop an awareness of spoken French and improve students' pronunciation.

Prerequisite: FREN 2040 or equivalent.

FREN3050 - Third Year French I

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

Prerequisite: FREN 2040.

FREN3060 - Third Year French II

Credits: 3

A course stressing the usage of the language through composition, conversation, oral presentations and grammar review.

Prerequisite: FREN 3050.

FREN3110 - Contemporary French Civilization

Credits: 3

Emphasizes the institution and values of contemporary France. Deals with the major political, social, cultural and economic aspects of today's France. Will be taught in French.

Prerequisite: FREN 3050.

FREN3990 - Independent Study

Credits: 1-4

Books or periodicals of special interest to the student, selected in consultation with a member of the staff; independent reading and reports.

Prerequisite: FREN 2030.

FREN4080 - Studies in the French Language

Credits: 3

Max Credit (Max. 9)

The topics explored under this general heading include: translation, history of the French language, French of the media and conversation.

Dual Listed FREN 5080.

Prerequisite: FREN 3060.

FREN4100 - A Survey of French Literature I

Credits: 3

A study of French Literature and civilization from the Middle Ages through the 18th century.

Prerequisite: FREN 2140 or equivalent.

FREN4110 - A Survey of French Literature II

Credits: 3

A study of French Literature and civilization from the 19th century to the present.

Prerequisite: FREN 2140 or equivalent.

FREN4120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: epic, courtly poetry, Arthurian romance, theatre and the poetry of Villon.

Dual Listed FREN 5120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 5140.

USP 2003-2014 Code U3WC

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4200 - Introduction to Research

Credits: 3

Senior seminar on a topic varying from year to year.

USP 2015 Code U5C3

Prerequisite: COM2 (FREN 3050), Survey I and II courses (FREN 4100 and FREN 4110).

FREN4250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism focuses on novels of Flaubert and Zola, while the symbolist school of poetry is represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 5250.

Former Course Number [4150]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into four parts: pre-World War I, between the wars, post-World War II and the New Wave. These periods are represented by authors including Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 5260.

Former Course Number [4160]

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN4350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature), to be selected according to interest and currency).

Dual Listed FREN 5350.

Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN4990 - Advanced Independent Study

Credits: 1-3

Special projects designed to meet the needs of individual students, designed in consultation with instructor.

Prerequisite: FREN 3050 and consent of instructor.

FREN5080 - Studies in French Language

Credits: 3

Topics explored include: French translation, history of the French language, French of the media, and conversation.

Prerequisite: FREN 3060.

FREN5120 - Medieval French Literature

Credits: 3

A survey of medieval French literature: Epic, courtly poetry, Arthurian romance, theatre, and the poetry of Villon.

Dual Listed FREN 4120.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5140 - 17th Century French Literature

Credits: 3

A survey of representative works from the major literary genres from the formative period to classicism and its aftermath.

Dual Listed FREN 4140.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5160 - Graduate Readings

Credits: 1-5
Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

FREN5170 - Special Problems

Credits: 1-2
Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

FREN5250 - 19th Century French Literature

Credits: 3

Development of romanticism from Rousseau on with excerpts from Chateaubriand and romantic poets like Hugo and Vigny. The period of realism-naturalism will focus on novels each of Flaubert and Zola while the Symbolist School of poetry will be represented by Baudelaire, Verlaine and Rimbaud.

Dual Listed FREN 4250.

Prerequisite: FREN 2050; FREN 4100 and FREN 4110 strongly recommended.

FREN5260 - 20th Century French Literature

Credits: 3

The era since 1900 is divided into 4 parts: Pre- World War I, between the wars, post-World War II and the New Wave. These periods are represented by such authors as Valery, Proust, Malraux, Saint-Exupery, Camus, Sartre and others.

Dual Listed FREN 4260.

Prerequisite: FREN 3050; FREN 4100 and FREN 4110 strongly recommended.

FREN5350 - Studies in French and Francophone Literatures

Credits: 3

An intensive study of a topic, period or author (pertaining to French or Francophone literature, to be selected according to interest and currency).

Dual Listed FREN 4350.

Prerequisite: FREN 3060; FREN 4100 and FREN 4110 strongly recommended.

FREN5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

FREN5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FREN5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

FREN5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 credit in this course may not be included in a graduate program of study for degree purposes.

FREN5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

FREN5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Gender and Women's Studies

GWST1030 - Social Justice in the 21st Century

Credits: 3

Appropriate for students interested in diversity and social justice. Topics covered through an interdisciplinary study of people and society range from identity, critical thinking, empowerment, role models, stereotyping, institutional discrimination, and tolerance. The key lynchpin is active participation in the development and maintenance of just communities.

Cross Listed LTST 1030/AAST 1030/AMST 1030/NAIS 1030.

USP 2003-2014 Code U3D, U3I

A&S College Core 2015 ASD

GWST1080 - Intro Gender & Women's Studies

Credits: 3

This course serves as an introduction to the field of Gender and Women's Studies. Students will examine a range of GWST topics, gain knowledge of gender, feminist, and intersectional theories, and learn to apply course concepts and frameworks to analyses of socio-political and representational issues, primarily in U.S. contexts.

Cross Listed ENGL 1080.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST1900 - Women and Leadership

Credits: 3

Students examine theoretical, historical and cultural aspects of leadership, values in leadership, gender differences in leadership styles, and practical applications of leadership skills through oral communication and information literacy. Individual and collaborative work is expected.

Cross Listed SOWK 1900.

USP 2003-2014 Code U3L, U3O

Former Course Number [4510]

GWST2000 - Introduction to LGBTQ/NS Studies

Credits: 3

Lesbian, Gay, Bisexual, Transgender, Queer and New Sexuality Studies (LGBTQ/NS) explores the interdisciplinary study of sexuality and its importance to the organization of social relations and social institutions. Primary among its concerns is the study of the lives, the politics, and the creative work of sexual minorities.

USP 2003-2014 Code U3C, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST2060 - Topics in Women's Studies

Credits: 1-4

Popular and current topics in women's studies.

GWST2070 - Gender and Religion

Credits: 3

Aims to help students understand how religion constructs and reinforces gender roles in religion and society. Looks at traditional gender roles in Christianity and the transformation they have undergone in the past century or so.

Cross Listed RELI 2070.

GWST2389 - History of Women in the American West

Credits: 3

Surveys the roots of society's marginal historical depiction of women in the American West from the colonial period through the twentieth century. From the perspective of race, class, ethnicity, and gender, the course focuses on the development of a multi-dimensional understanding of women's roles using an interdisciplinary approach.

Cross Listed HIST 2389.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

GWST2500 - Gender and Society

Credits: 3

Examines the social construction of gender using interdisciplinary methods of analysis. The readings and assignments emphasize the importance of denaturalizing the gender stereotypes and norms that impact women's and men's lives. Intersections between gender, race, class, age, and sexual orientation are examined within their cultural contexts. This course will prepare students for advanced work in Gender and Women's Studies.

USP 2003-2014 Code U5C2

Former Course Number [3500]

Prerequisite: GWST 1080 or cross listed equivalent.

GWST2700 - Gender and Disability

Credits: 3

Disability studies draws upon critical theory to investigate disability as a discursive construction. Investigates how intersecting conceptions of disability and gender have shaped cultural meanings and the social positioning of specific groups, especially women with disabilities. Topics include non-normative embodiment, issues of representation and subjectivity, and the politics of health, sexuality, and care.

Cross Listed WIND 2700.

USP 2003-2014 Code U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

GWST3050 - Cultures of Nature in the United States

Credits: 3

Uses artistic, philosophical, historical and literary material to investigate how ideas about and representations of nature have changed over time in the U. S. Culminates in an examination of a wide range of contemporary environmental ideas within this broad historical and cultural context.

Cross Listed ENR 3050/AMST 3050.

Prerequisite: 2000-level course in one of the following departments: AMST, American history, American literature, or a 2000-level course approved for the ENR program.

GWST3200 - Perspectives in Chicana Studies

Credits: 3

An interdisciplinary introduction to the study of the history, culture, gender relations, and contemporary political, economic status of Chicanas/Mexican American women. Examines the origins, development of Chicana studies as a major emphasis in Chicano/ Chicana studies.

Cross Listed LTST 3200.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100.

GWST3300 - Psychology of Gender

Credits: 3

In this course, we will examine a variety of psychological theories and research on the experiences and behaviors of men and women. We will study attitudes about gender, theories of gender development, and research about similarities and differences between men and women.

Cross Listed PSYC 3300.

Prerequisite: A grade of C or better in PSYC 1000.

GWST3400 - Popular Music and Sexualities

Credits: 3

Looks at ways in which popular music has intersected with sexual and gendered identities as a means and expression of both oppression and liberation.

Cross Listed AMST 3400.

USP 2003-2014 Code U3CH, U3D

Prerequisite: WA.

GWST3710 - Gender and Humanities

Credits: 3

Explores how men and women are imaged differently, studying the influence of representation on gender (including representations in literature, film, art, popular culture, and/or performance). Sharpens students' ability to analyze texts and images and investigate those texts' messages about gender, sexuality, ethnicity and class.

Cross Listed ENGL 3710/ART 3710.

When Offered (Offered once a year)

USP 2003-2014 Code U3CH

USP 2015 Code U5C2

Prerequisite: GWST 1080 or ENGL 1010.

GWST3800 - Chicanas/os in Contemporary Society

Credits: 3

Focuses on three major movements within the Chicana/o community; labor, nationalism, and feminism. Students will assess these three movements to determine what role they have played in transforming the social conditions and political identity of the Chicana/o and Latina/o population in the US.

Cross Listed AMST/ LTST 3800.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: LTST 1100 or GWST 1080 or AMST 2010.

GWST4200 - Gender and Race in the Economy

Credits: 3

Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGEC 4200.

Dual Listed GWST 5200.

A&S College Core 2015 ASD

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST4233 - Race, Gender, Ethnicity in the Media

Credits: 3

Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society.

Cross Listed Cross-listed with AAST 4233 and COJO 4233;

Dual Listed dual-listed with GWST 5233.

USP 2003-2014 Code U3D, U3WC

USP 2015 Code U5C3

A&S College Core 2015 ASD

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST4300 - The Politics of Sexuality

Credits: 3

Addresses issue of how sexuality has become gendered with different meanings for both males and females as to reproductive behavior, especially how women's bodies are defined in sexual terms.

When Offered (Offered every other year)

Prerequisite: GWST 1080, 3500 or GWST 3710.

GWST4335 - Women and Islam

Credits: 3

Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Cross Listed HIST 4335 and RELI 4335.

Dual Listed GWST 5335.

Prerequisite: 9 hours of HIST, WMST, INST, or RELI.

GWST4360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed NAIS 4360/SOC 4360.

Prerequisite: 6 hours of 2000-level NAIS classes.

GWST4430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 4430.

Dual Listed GWST 5430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

GWST4440 - Queer Life Through Memoir

Credits: 3

This reading intensive class explores queer life in the late 20th and early 21st centuries in the United States of America. Through close reading and analysis of the texts and discussions, issues of sexuality, race, class, violence and place are explored.

Cross Listed GWST 5440

Prerequisite: GWST 2000 , GWST 4430 , or GWST 5430 or graduate standing, or permission of instructor

GWST4450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 5450.

Prerequisite: 6 hours in WMST, PHIL, and/or ENR.

GWST4500 - Special Topics in Women's Studies

Credits: 1-4

Presents current research issues by visiting and regular faculty.

Prerequisite: GWST 1080, 3500, GWST 3710 or consent of instructor.

GWST4540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540.

When Offered (Offered every other year)

Prerequisite: ENGL 1080/GWST 1080, WMST/SOC 3500, or CRMJ 2400/SOC 2400 , WMST/GWST 2500

GWST4630 - Gender and Politics

Credits: 3

Max Credit 3

Using theoretical perspectives of pluralism, elitism, and intersectionality, this course examines how sex and gender operate in U.S. political processes, including elections, parties, interest groups, and social movements. Specific focus will be on women in politics and analyses of power dynamics in shaping marginalized identities; sex/gender, race and ethnicity, sexual orientation, class and ability.

Cross Listed POLS 4630

Prerequisite: GWST/ENGL 1080, GWST 2000, or POLS 1000; at least 9 hours combined credit hours in POLS or GWST, and junior standing.

GWST4650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve

as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 4650/LTST 4650/INST 4650.

Dual Listed GWST 5650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST4675 - USWomen of Color

Credits: 3

Examines in comparative perspective the social conditions that shape the experiences of Chicanas/Latinas in the U. S. Students gain an understanding of how the intersection of race, class, gender, and sexuality shape the lived experiences of U. S. women of color through ideological, economic, and political forces.

Cross Listed AAST 4675/LTST 4675.

USP 2003-2014 Code U3D

A&S College Core 2015 ASD

Prerequisite: junior standing and/or a combination of

GWST4700 - Feminist Theories

Credits: 3

Surveys contemporary feminist theories and places those theories within the framework of social, literary, and artistic criticism. Uses feminist theories to address questions such as nature of meaning in literature and artistic forms; construction of science; and identity of the individual as these phenomena are affected by gender construction.

When Offered (Offered once a year)

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: 12 hours of women's studies.

GWST4780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Cross Listed ART 4780.

Dual Listed GWST 5780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST4830 - Victorian Women's Lives: Their Art, Literature and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ART 4830/ENGL 4830.

Dual Listed GWST 5830.

When Offered (Offered every other year)

A&S College Core 2015 ASG

Prerequisite: Either ART 2020 or GWST 1080/ENGL 1080.

GWST4960 - Women's Bodies, Women's Minds

Credits: 3

Explores women's physiologic and psychologic development and the influences of patriarchal society upon the interpretation of what constitutes normalcy across the female life cycle. Historical, cultural and contemporary attitudes of the health care system and women's perspectives on menstruation, childbearing, breastfeeding and menopause will be analyzed.

When Offered (Offered every other year)

USP 2003-2014 Code U3CS

Prerequisite: upper division status.

GWST4965 - Senior Honors Project

Credits: 3

The student consults with the director/faculty supervisor to identify a topic and (a) produces a 30-40 page research paper or (b) a shorter 15-20 page paper plus a creative or service learning component, showing originality, firm knowledge of the discipline(s), and solid research skills, with a thesis defense as culmination.

Former Course Number [4980]

Prerequisite: GWST 4700, or concurrent enrollment with instructor consent, and a 3.500 GPA.

GWST4970 - Internship

Credits: 3

Max Credit (Max. 12)

Students gain practical experience in the application of principles learned in women's studies courses. Students will work with the director of women's studies internships to select a site; will intern approximately ten hours per week in the host organization; and will complete written assignments which reflect the student's work.

Former Course Number [4000]

Prerequisite: 12 semester hours of WMST coursework,

GWST4975 - Independent Studies

Credits: 1-4
Max Credit (Max. 9)

Offers the advanced student the opportunity to pursue a topic of interest with the assistance and direction of an instructor in women's studies.

Former Course Number [4970]

Prerequisite: 6 hours in women's studies or consent of instructor.

GWST5000 - Special Topics

Credits: 1-4
Max Credit (Max. 8)

Presents findings from current research and new areas of inquiry into women's studies at the graduate level, by present and visiting faculty.

Prerequisite: 18 hours of undergraduate women's studies.

GWST5200 - Gender and Race in the Economy

Credits: 3
Focuses on the role gender and race play in the economy; specifically the way that gender and race affect economic outcomes for individuals in the United States.

Cross Listed AGEC 5200.

Dual Listed GWST 4200.

Prerequisite: AGEC 1020 or equivalent, or SOC 1000, or GWST 1080, and WB.

GWST5233 - Race, Gender, Ethnicity in the Media

Credits: 3
Examine the role mass media plays in the Black community and other racial, ethnic, gendered, and socioeconomic communities. Students will develop a critical understanding of the way the mass media uses stereotypes and prejudice to influence society's views about ethnic minorities and women in contemporary United States society. Cross-listed with AAST 5233 and COJO 5233; dual-listed with GWST 4233.

Prerequisite: 3 credit hours in AAST, COJO, or WMST, WB/COM2, and junior standing.

GWST5335 - Women and Islam

Credits: 3
Examines women's lives in Islamic societies from the seventh century to the present in the Middle East and throughout the world. Themes include women's position in Islamic law, society and culture, Western images of Muslim women, veiling and Islamist movements, theoretical readings on power, gender and agency.

Dual Listed GWST 4335.

Prerequisite: graduate standing.

GWST5360 - American Indian Women

Credits: 3

Explores the lives of American Indian women in a variety of contexts through time. The complexity and diversity of Indian women's experiences throughout history are emphasized. Much of the class concerns Indian women's lives within the reality of European American colonization and its consequences for Indian peoples.

Cross Listed SOC 5360.

Dual Listed GWST 4360.

Prerequisite: 6 hours of NAIS 2000-level classes.

GWST5430 - Queer Theory

Credits: 3

Introduces students to the intellectual lens used to evaluate the messages regarding gender and sexuality of many institutions and the way in which some actual experiences fall out of line with those norms.

Cross Listed AMST 5430.

Dual Listed GWST 4430.

USP 2015 Code U5H

A&S College Core 2015 ASD

Prerequisite: Consent of instructor.

GWST5450 - Ecofeminism

Credits: 3

Focus is on issues of gender, women and ecology. Ecofeminist thinkers argue that there is no liberation for women and no solution to the ecological crisis without a fundamental shift in relationships of domination. Uniting the two movements results in a radical reshaping of modern socioeconomic relations.

Dual Listed GWST 4450.

Prerequisite: six credits from women's studies, philosophy, and/or ENR.

GWST5540 - Gender and Crime

Credits: 3

Addresses issues pertaining to gender and the criminal justice system to include women's roles as offenders and victims and their unique experiences in the criminal justice system. Feminist perspectives, LGBTQ+ and special populations are also explored.

Cross Listed CRMJ 4540/ 5540

Dual Listed GWST 4540

Prerequisite: ENGL/WMST/GWST 1080 , WMST/GWST 2500 , CRMJ/SOC 2400 , or WMST/SOC 3500

GWST5650 - Women, Gender & Migration

Credits: 3

From an international context and perspective, this course examines the gendered transformations immigrant women experience. Gender, theories of international migration, assimilation, race, ethnicity, and identity transformation serve as categories of analysis. From a cross-discipline comparative approach, we focus on women's lives to examine differences and similarities to complicate notions of immigration.

Cross Listed AMST 5650/LTST 5650/INST 5650.

Dual Listed GWST 4650.

Prerequisite: Junior standing and 6 hours of AMST, LTST, INST, and/or WMST coursework or instructor approval.

GWST5710 - Feminist Theoretical Perspectives

Credits: 3

Intensive introduction to the epistemology and application of a wide range of trans-historical, trans-cultural, and trans-national feminist theories. Students will be asked to apply self-selected feminist theories to their own thesis work and graduate fields, as well as to current examples of sex, gender, gender performance, and gendered coding in American media.

Prerequisite: graduate standing.

GWST5780 - History of Women Artists

Credits: 3

Studies documented influence of women as subjects, makers and receivers of art. Emphasizes careers and works of women over a wide range of times and places and under a variety of social circumstances. Greatly emphasizes developments in the twentieth century.

Dual Listed GWST 4780.

Prerequisite: ART 2010 or ART 2020 or 3 hours of Women's Studies courses; and WB.

GWST5830 - Victorian Women's Lives: Their Art, Literature, and Culture

Credits: 3

An interdisciplinary approach to the study of women's issues in art, using literary, cultural and sociological texts to enlarge the art historical basis. Topics include "domestic goddess," class issues, racial questions, working women, prostitution, education, marriage and divorce.

Cross Listed ENGL 5830.

Dual Listed GWST 4830.

Prerequisite: ART 2020 or ENGL 1080/GWST 1080.

GWST5900 - Practicum in College Teaching

Credits: 1-3

Max Credit (Max. 3)

Work in classroom with a major professor. Students are expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

GWST5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

GWST5960 - Thesis Research

Credits: 1-6
Max Credit 6

Designed for graduate students who are involved in gender studies research for their thesis project, especially students in gender and women's studies or queer studies graduate minor programs.

Prerequisite: Enrollment in a graduate degree program

GWST5970 - Independent Studies

Credits: 1-4
Max Credit (Max. 8)

Allows the graduate student to pursue studies in gender issues with the supervision of an instructor from the Women's Studies faculty.

Prerequisite: graduate standing.

GWST5990 - Internship

Credits: 1-12
Max Credit (Max. 12)

Prerequisite: graduate standing.

Geography

GEOG1000 - World Regional Geography

Credits: 3

Covers the distributions, traits, and processes of the Earth's peoples and landscapes through the perspective of regional geography, which is the study of the spatial relationships of natural environments and human societies.

Cross Listed INST 1060.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1000]

GEOG1010 - Introduction to Physical Geography

Credits: 4

Systematically studies natural aspects of geographic environments, including weather and climate, landforms, soils and vegetation. Lab fee required.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Former Course Number [G&R 1010]

GEOG1020 - Introduction to Human Geography

Credits: 3

Analyzes spatial patterns of and interaction between the world's great cultural systems. Includes settlement patterns, behavioral patterns, agricultural land use and resource utilization.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

Former Course Number [G&R 1020]

GEOG1101 - Surviving the Apocalypse: The Geography of Natural Disasters (FYS)

Credits: 3

Students examine the natural and human dimensions of disasters by focusing on environmental settings, risk assessment, recovery, and reducing impacts of environmental hazards and disasters globally. Course considers human vulnerability, mitigation, protection, and adaptation to different hazards in both more developed and less developed nations.

USP 2015 Code U5FY

GEOG2370 - Chicano History: Origins to GEOG 1900

Credits: 3

General survey that traces the geographic distribution and historical processes that have shaped the life experiences, socio-economic development and cultural contributions of peoples of Mexican descent in the United States from their indigenous and Hispanic origins to the end of the 19th century.

Cross Listed LTST 2370/HIST 2370.
USP 2003-2014 Code U3CS, U3D
USP 2015 Code U5H
A&S College Core 2015 ASD

GEOG3010 - Geomorphology of Earth's Dynamic Landscapes

Credits: 3

A Systematic exploration of Earth's surface, emphasizing the geographic distribution of various landforms and their evolution over time. Introduces general geomorphic principles and describes the application of these principles to specific landscape features. The processes that drive landscape change are examined through case studies, computer-based mapping exercises, and basic calculations.

Former Course Number [G&R 3010]

Prerequisite: Either GEOG 1010 or GEOL 1500 or equivalent.

GEOG3030 - Geography and Development

Credits: 3

Examines distribution of wealth and poverty in the world; theories of development, from traditional modernization theories through Marxist critiques and sustainable development; and case studies from around the world of development successes and failures, chosen to illustrate and illuminate theories of development.

USP 2003-2014 Code U3CS, U3G
A&S College Core 2015 ASG
Former Course Number [G&R 3030]

Prerequisite: GEOG 1000 or GEOG 1020 or 3 credit hours of social science with global focus.

GEOG3050 - Economic Geography

Credits: 3

Economic Geography is the study of the location, distribution and spatial organization of economic activities across the globe; specifically how the economic realm is intertwined with other spheres of international social life. It explores the inherent logics and mechanisms of the capitalist system, and the social and spatial inequalities that result.

Former Course Number [G&R 3050]

Prerequisite: 6 hours of Social Sciences or International Studies.

GEOG3400 - Traditional Ecological Knowledge

Credits: 3

Description of the interaction between economy, religion, language and the ecosystem for select indigenous peoples

and discussion of the pedagogical methods for preserving their ecological knowledge. An examination of the conflict between contemporary society's demands and preserving traditional society's heritage.

Cross Listed NAIS 3400.

USP 2003-2014 Code U3CS, U3D

A&S College Core 2015 ASD

Prerequisite: one course in American Indian culture.

GEOG3450 - Weather and Climate

Credits: 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Cross Listed ENR 3450 and GEOL 3450

Former Course Number [G&R 3450]

Prerequisite: GEOG 1010 OR any USP PN course.

GEOG3480 - Environmental Change

Credits: 3

Examines changes in the bio-physical environments and landscapes of Earth during its habitation by humans. Emphasizes integrated approaches to understanding environmental changes based on climatological, ecological, geological, archeological, and historical evidence. Explores how humans have modified Earth's environments and how societies have responded to natural and anthropogenic environmental change.

Cross Listed ESS 3480

USP 2003-2014 Code U3G, U3WB

A&S College Core 2015 ASG

Former Course Number [G&R 3480]

Prerequisite: GEOG 1010 or any USP PN course; and USP COM1.

GEOG3550 - Natural Hazards and Society

Credits: 3

Considers societal structures and processes as they interact with hazards in the natural environment.

USP 2003-2014 Code U3CS

Former Course Number [G&R 3550]

GEOG4000 - Terrain Analysis

Credits: 3

Studies techniques for acquiring and analyzing spatial data from maps, remotely sensed imagery and field surveys for

landscape assessment. Emphasizes deriving maps that describe physical suitability of landscapes for specific human activities. Field trip required.

Former Course Number [G&R 4000]

Prerequisite: Completion of USP PN requirement or consent of instructor.

GEOG4013 - Political Geography

Credits: 3

Geographic space mediates political action and is generated by it, and spatial forms are produced by governmental agencies that must respond or adapt to emerging patterns of political disruption and tendencies of social change. Students in this course learn to think about the relationship between politics and space at multiple scales and in global context. They also develop an inter-disciplinary approach to the sub-discipline of political geography in social and historical context, and, in that sense, develop a capacity to think and act as political geographers.

Cross Listed GEOG 5013 , INST 4013, INST 5013

Prerequisite: 6 hours in social science

GEOG4040 - Conservation of Natural Resources

Credits: 3

Geographically analyzes conservation of natural and human resources, as well as political, social and ethical ramifications of our environmental policy.

Cross Listed ENR 4040.

GEOL 4040

USP 2003-2014 Code U3CS

Former Course Number [G&R 4040]

Prerequisite: 6 hours of geography or ENR.

GEOG4051 - Environmental Politics

Credits: 3

Analyzes environmentalism as a political phenomenon. Provides students with a basic understanding of how to analyze political issues by: (1) examining the historical and contemporary issues that produce controversy over environmental matters; and (2) surveying the impacts of these issues on the formulation and implementation of laws, policies, and regulations.

Cross Listed AMST 4051, ENR 4051, POLS 4051 and REWM 4051.

USP 2003-2014 Code U3WC

Former Course Number [G&R 4051]

Prerequisite: POLS 1000.

GEOG4052 - Federal Land Politics

Credits: 3

Examines the political forces that have shaped and continue to shape federal land policy and management. Explores the interactions between democratic decision making and science in the management of federal lands. Surveys the sources of controversy over federal land management and methods for harmonizing public demands with technical expertise.

Cross Listed POLS 4052/ENR 4052/AMST 4052/REWM 4052.

Former Course Number [G&R 4052]

Prerequisite: POLS 1000.

GEOG4080 - Management of Major River Basins

Credits: 3

Examines geography of water resources, including distribution, water as a resource and water as a hazard to humans. Focuses on water management case studies on the scale of major river basins in North America and elsewhere in the world.

Former Course Number [G&R 4080]

Prerequisite: Completion of the USP PN requirement or consent of instructor.

GEOG4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/1405 or MATH 1450.

GEOG4440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 5440.

Prerequisite: GEOG 3450/ENR 3450 or instructor's consent.

GEOG4441 - Advanced Climate Variability

Credits: 3

Max Credit 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Cross Listed GEOG/GEOL 4441-5441

Prerequisite/Corequisite: GEOG 3450/ENR 3450/ GEOL 3450 or instructor consent

GEOG4450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 5450.

Former Course Number [G&R 4450]

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or consent of instructor.

GEOG4460 - Biogeography

Credits: 3

A systematic study of the distribution of plants and animals, communities and ecosystems, the processes that produce patterns of distribution and their change over time. Interactions of climate, soil geomorphology, biota and human activities are emphasized.

Former Course Number [G&R 4460, 3460]

Prerequisite: junior standing and GEOG 1010 or LIFE 2022 or LIFE 2023.

GEOG4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG/GEOL 4470/5470

Former Course Number [G&R 4470]

Prerequisite: Some basic knowledge of Earth processes GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG4500 - The American Landscape

Credits: 3

This course trains students to interpret patterns and processes of contemporary landscapes of the Americas (North, Central, and South America) by viewing those landscapes historically. We investigate the relationship between landscape, politics, and economy, or, more generally, the relationship between landscape as a geographical form and cultural politics in the hemisphere. Students are introduced to research techniques and methodologies in historical geography.

Cross Listed Cross listed with GEOG 5500, INST 4500, INST 5500

Former Course Number [G&R 4500]

Prerequisite: 6 credits of international studies or social science coursework

GEOG4502 - Images of Wyoming and the West

Credits: 3

The West is nothing more than a barren, desolate landscape to some while to others it offers great spiritual and cultural significance. Examines how individuals and groups perceive Wyoming and the West, how such perceptions have been constructed over time, and how these differing views create images of the region both real and imagined.

Dual Listed GEOG 5502.

Prerequisite: GEOG 1000 or GEOG 1020 and junior standing.

GEOG4550 - Geography of Wine

Credits: 3

Examine the regional influence of climate, terrain and cultural characteristics on the production of grape varieties and demonstrate the implications of this influence on the location and distribution of wines produced. Discussion will focus on the world-wide production and consumption of wine and impacts of multi-national corporations.

Prerequisite: junior standing and at least 21 years of age.

GEOG4560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed INST 4560.

Dual Listed GEOG 5560.

USP 2015 Code U5H

Prerequisite: 9 hours of international studies or geography.

GEOG4570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Cross Listed GEOG 5570, INST 4570, INST 5570

Prerequisite: 6 hours in social science

GEOG4580 - Sense of Place

Credits: 3

Examines how individuals and groups perceive specific geographic locations, how such perceptions are constructed, and how these differing views and feelings play out in our everyday.

Dual Listed GEOG 5580.

Former Course Number [4572]

Prerequisite: Completion of USP H requirement or consent of instructor.

GEOG4590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 5590.

Former Course Number [4574]

Prerequisite: Completion of USP H requirement or consent of instructor.

GEOG4875 - Independent Studies

Credits: 1-6

Max Credit (Max. 6)

Considers current research topics in consultation with faculty member.

Dual Listed GEOG 5875.

Former Course Number [G&R 4875, 4950]

Prerequisite: 9 hours in subject area of topic of current research.

GEOG4880 - Current Topics

Credits: 1-6
Max Credit (Max. 6)

Special course on a topic of current interest.

Dual Listed GEOG 5880.
Former Course Number [G&R 4880, 4850]

Prerequisite: junior standing.

GEOG4885 - Seminar: (TOPICS)

Credits: 1-3
Max Credit (Max. 6)

Faculty-student discussion, reading, and study focused on a selected topic and interest.

Former Course Number [G&R 4885, 4900]

Prerequisite: GEOG 4750.

GEOG4960 - Field Studies

Credits: 1-6
Max Credit (Max. 6)

Intensive introduction to field methods used in geographic research in one or more of the subdivisions of geography.

Former Course Number [4860, G&R 4860]

GEOG4965 - Directed Studies/ Research Problems

Credits: 1-6
Max Credit (Max 6)

Intensive introduction to methods used in geographic research.

Former Course Number [4865, G&R 4865]

Prerequisite: consent of instructor and at least 12 hours in geography.

GEOG4990 - Internship/ Practicum

Credits: 1-6
Max Credit (Max. 12)

Experience in applying student skills and training in an agency, organization, or business.

Dual Listed GEOG 5990.
Former Course Number [4870, G&R 4990]

Prerequisite: for majors only, minimum of 12 hours in the major, junior standing and consent of the instructor.

GEOG5013 - Political Geography

Credits: 3

Geographic space mediates political action and is generated by it, and spatial forms are produced by governmental agencies that must respond or adapt to emerging patterns of political disruption and tendencies of social change. Students in this course learn to think about the relationship between politics and space at multiple scales and in global context. They also develop an inter-disciplinary approach to the sub-discipline of political geography in social and historical context, and, in that sense, develop a capacity to think and act as political geographers.

Cross Listed GEOG 4013, INST 4013, INST 5013
Dual Listed GEOG 4013.
Prerequisite: graduate standing.
Prerequisite/Corequisite: 6 hours in social science

GEOG5060 - Landscape Ecology

Credits: 3

A study of structure, function, and change in the biosphere on the scale of kilometers. Includes a consideration of the effects of human land uses, natural disturbances, and other processes on landscapes.

Prerequisite: GEOG 4460 or LIFE 3400 or BOT 4700.

GEOG5440 - Advanced Global Climate Variability

Credits: 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Dual Listed GEOG 4440 .
Prerequisite: Graduate standing.

GEOG5441 - Advanced Climate Variability

Credits: 3
Max Credit 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Cross Listed GEOG/GEOL 4441-5441

GEOG5450 - Fluvial Geomorphology

Credits: 4

A systematic examination of rivers and related land forms. Emphasizes understanding how processes of flow and sediment transport influence channel form and behavior. Considers rivers systems across a range of scales, from movement of individual sediment particles to organization of continental drainage basins. Explores connections to aquatic ecosystems and human impacts.

Dual Listed GEOG 4450.

Prerequisite: GEOG 3010 or GEOL 2100 or GEOL 2150 or equivalent and graduate standing.

GEOG5470 - Fire Ecology

Credits: 3

Natural and human-caused fires are an important phenomenon affecting ecosystems and human communities throughout the world. Explores the geography, ecology, and management of fires.

Dual Listed GEOG 4470.

Prerequisite: GEOG 4460, BOT 4700, LIFE 3400 or graduate standing.

GEOG5500 - Landscapes of the Americas

Credits: 3

This course trains students to interpret patterns and processes of contemporary landscapes of the Americas (North, Central, and South America) by viewing those landscapes historically. We investigate the relationship between landscape, politics, and economy, or, more generally, the relationship between landscape as a geographical form and cultural politics in the hemisphere. Students are introduced to research techniques and methodologies in historical geography.

Cross Listed Cross listed with GEOG 4500, INST 4500, INST 5500

Restricted Sophomore standing

Prerequisite: 6 credits of international studies or social science coursework

GEOG5502 - Images of Wyoming and the West

Credits: 3

The West is nothing more than a barren, desolate landscape to some while to others it offers great spiritual and cultural significance. Examines how individuals and groups perceive Wyoming and the West, how such perceptions have been constructed over time, and how these differing views create images of the region both real and imagined.

Dual Listed GEOG 4502.

Prerequisite: GEOG 1000 or GEOG 1020 or equivalent and graduate standing.

GEOG5560 - Global Cities

Credits: 3

Globalization accelerates urbanization processes and creates a new type of city: the global city. This course investigates the debates over global cities, urban culture, new urban landscapes, urban planning practices, and social disparity. Using case studies from around the world, this class explores the diversity of global city formation processes.

Cross Listed INST 5560.

Dual Listed GEOG 4560.

Prerequisite: 9 hours of international studies or geography.

GEOG5570 - Cultural Geography

Credits: 3

Cultural Geography is an overview in qualitative cultural landscape studies. The course emphasizes what a cultural landscape is, how it can be examined, and what can be learned from such landscapes. Students are exposed to readings in cultural geography from a wide array of viewpoints with an emphasis placed on classic works.

Dual Listed GEOG 4570.

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5580 - Sense of Place

Credits: 3

Examines how individuals and groups perceive specific geographic locations, how such perceptions are constructed, and how these differing views and feelings play out in our everyday.

Dual Listed GEOG 4580.

Former Course Number [5572]

Prerequisite: GEOG 1000 or GEOG 1020.

GEOG5590 - Geography of Conflicts

Credits: 3

Explores the representation of place and how various groups often have differing views of how a place should be represented and/or thought of. Various local representations of contested land use, group place identity, and personal place identity are discussed.

Dual Listed GEOG 4590.

Former Course Number [5574]

Prerequisite: GEOG 1000 or GEOG 1020 or graduate standing.

GEOG5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOG5940 - Continuing Registration: Off Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOG5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Graduate level course designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GEOG5990 - Internship/Practicum

Credits: 1-12
Max Credit (Max. 12)

Experience in applying student skills and training in an agency, organization, or business.

Dual Listed GEOG 4990.

Prerequisite: graduate standing.

Geology and Geophysics

GEOL1001 - Earth Science and Society

Credits: 1
Introduces students to the study of Earth Science and its role in society through examination and discussion of current events, and through projects researching geologic topics of societal interest.

USP 2003-2014 Code Y3I, U3L

Prerequisite: GEOL 1100 or concurrent enrollment.

GEOL1005 - Earth History

Credits: 4

Reviews the evolution of the Earth including: the creation of the Universe, formation of a layered earth, development and history of continents, controls on climate change, and the origin and evolution of life. Class introduces basic geologic, chemical, physical and biologic concepts used to decipher Earth history.

USP 2003-2014 Code U3S

GEOL1050 - Gold and the American West

Credits: 3

The gold rushes in the western United States offer a window into geologic principles and processes resulting to the accumulation of gold, and the consequences of resource extraction on the prospective geologic record of the Anthropocene. This course provides an interdisciplinary approach to natural resources.

USP 2015 Code U5PN

GEOL1060 - Geology of the National Parks

Credits: 3

This course provides an overview of the geologic settings and processes that form the landscapes and features in the US National Parks and Monuments. We will use the National Parks to explore fundamental geologic concepts, Earth materials, natural hazards, and the dynamic tectonic forces that have affected the planet throughout geologic history.

USP 2015 Code U5PN

GEOL1070 - The Earth: Its Physical Environment

Credits: 4

Discusses selected topics from geology, astronomy and meteorology illustrating fundamental concepts, processes, products and the interrelationships among them. Emphasizes nature of science and relationship between selected topics and society.

Cross Listed ASTR 1070.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

Prerequisite: Math level 3 or equivalent courses, consent of instructor, elementary education major and EDCI 1450 must be taken concurrently.

GEOL1100 - Physical Geology

Credits: 4

Studies modern concepts of the Earth's physical makeup including minerals and rocks, topography, crustal structure, plate tectonics and processes and forces acting on and within the earth.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1101 - The Anthropocene: Human's Control of Nature

Credits: 3

This course introduces students to the essential realities of living on a dynamic Earth. Students examine how geological events and processes (earthquakes, floods, landslides, volcanic eruptions, and long-term and short-term climate changes) affect our survival, evolution, and adaptation. The course also critically examines 'geoengineering', which has created many solutions to problems that would have otherwise impeded civilization's progress, but has also resulted in many unintended consequences. Most importantly, this course will encourage students to examine their potential to transform our civilization to one that is aligned to the essential symbiotic relationship we have with our dynamic Earth. Finally, as a First Year Seminar the course introduces incoming freshman and transfer students to fundamental academic essentials important to a successful University of Wyoming experience.

USP 2015 Code U5FY

GEOL1110 - Physical Geology for Engineers

Credits: 4

Introduction to geologic principles for engineers with emphasis on near surface processes and material properties. The first half will teach planetary basics, mineral/ rock and geologic structure, surface processes, geologic material strength and deformation, and geohazards. The final half covers methods and analysis with the collection of geophysical data on-campus to assess near-surface properties with a full lab report.

USP 2003-2014 Code [(none)< >PN]

Prerequisite: MATH 1400 and MATH 1405 or MPE score of 5 or higher or SAT Math score of 600 or higher or ACT Math score of 27 or higher.

GEOL1500 - Water, Dirt, and Earth's Environment

Credits: 4

Introductory environmental geology course focusing on water and soil both as hazards and as life-sustaining resources. Explores surface processes and climate change over geological and human timescales. Case studies illustrate the environmental tradeoffs of resource use.

Cross Listed ENR 1500.

USP 2003-2014 Code U3SE

USP 2015 Code U5PN

GEOL1600 - Global Sustainability: Managing Earth's Resources

Credits: 4

Uses biology, chemistry, physics and Earth science to examine Global Sustainability and how this worldview might guide our future management of Earth resources. Case studies in different international settings place questions of resource exploitation (discovery, extraction, processing, use and disposal) and sustainability in a larger global context.

USP 2003-2014 Code U3G, U3S

GEOL1650 - The Water-Energy-Climate Nexus

Credits: 3

Among the grand challenges facing humanity, arguably the most significant are water, energy, and climate. These issues are, however not isolated but intimately connected, i. e. water-energy-climate (WEC) nexus. Using critical thinking and problem-solving skills, the significance of the WEC nexus to humanity will be explored from STEM and non-STEM perspectives.

Cross Listed ERS 1650.

USP 2015 Code U5PN

GEOL2000 - Geochemical Cycles and the Earth System

Credits: 4

Introduces the Earth system, including the solid Earth, hydrosphere, biosphere and atmosphere. Emphasizes the evolution of the Earth, rock associations and geochemical cycles.

Cross Listed ESS 2000.

When Offered (Normally offered fall semester)

USP 2003-2014 Code U3SE

Prerequisite: a 1000-level GEOL course with a lab and concurrent enrollment in CHEM 1020.

GEOL2010 - Mineralogy

Credits: 3

Introduction to rock forming minerals. Includes introduction to crystallography, crystal chemistry, and the occurrence and identification of the common minerals, with emphasis on silicates. Field trip required.

Prerequisite: GEOL 1005, GEOL 1100, or GEOL 1500; CHEM 1020 or concurrent enrollment.

GEOL2020 - Introduction to Petrology

Credits: 2

Introduces the study of igneous, sedimentary, and metamorphic rocks in hand specimen. Covers textural and mineralogic classification of rocks and the tectonic environments in which they occur. Field trip required.

Prerequisite: a grade of C or better in GEOL 2010.

GEOL2050 - Principles of Paleontology

Credits: 4

Max Credit 4

Examines principles, biological and geological, that underlie general study of ancient life on Earth. Includes interactions of evolutionary, taphonomic, and paleogeographic concepts within various approaches to paleobiology and systematic paleontology. Optional field trip.

When Offered (Normally offered spring semester)

Prerequisite: 1000-level GEOL or LIFE 1000 or LIFE 1010

GEOL2070 - Introduction to Oceanography

Credits: 4

Survey of ocean processes, including the major subdisciplines of physical, geological, chemical, and biological oceanography. Studies the form of the world ocean; composition and chemistry of seawater; circulation, currents, waves and tides; nutrients and organisms; estuaries and coastal processes; origin and distribution of deep-sea sediments; and impacts of human activities.

When Offered (Normally offered the first half of the fall semester)

Prerequisite: GEOL 1005, GEOL 1100, 1200, GEOL 1500 or ENR 1500; MATH 1405 or MATH 1450.

GEOL2080 - General Field Geology

Credits: 3

Covers basic concepts of geology and field techniques emphasizing interpretation of geologic features in the field and constructing geologic products (e.g. measured sections and geologic maps). Students are expected to be able to identify the common rock forming minerals and common rocks in hand-sample. Weekly field trip required.

When Offered (Normally offered the first half of the fall semester)

USP 2003-2014 Code U3SE

Prerequisite: GEOL 1100 and at least one other GEOL course.

GEOL2100 - Stratigraphy and Sedimentation

Credits: 4

Introduces principles of stratigraphy, materials and processes of sedimentation. Laboratory includes study and interpretation of sedimentary rocks, sedimentary structures and stratigraphic techniques. Field trip required.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010.

GEOL2120 - Quantitative GeoMethods

Credits: 3

Focuses on fundamental mathematical concepts used in geosciences. This course provides the tools to solve quantitative problems in geosciences applications. Students should demonstrate mathematical skills needed to formulate, analyze, and interpret quantitative arguments in geosciences.

USP 2003-2014 Code U5Q

Prerequisite: Level 5 in Math Placement Test OR 23 in Math ACT OR 600 in Math SAT.

GEOL2150 - Geomorphology

Credits: 4

Discusses general principles of landform description and analysis.

Prerequisite: GEOL 1100 or equivalent.

GEOL2220 - Communicating Earth Science

Credits: 3

This course will focus on communicating science to non-scientists. Students will deliver earth science information through written, digital and oral presentations to be informative and interesting to the public.

USP 2015 Code U5C2

Prerequisite: grade of C or higher in GEOL 2010, COM1.

GEOL3005 - Principles of Geophysics

Credits: 4

Mechanisms and driving forces of Earth deformation, at length-scales from the tectonic to the microstructural. Introduces solid bodies, including stress and strain, with applications to plate tectonics, and surficial processes. Heat flow, electrical and electromagnetic fields are introduced, with applications to tectonic and hydrologic problems.

When Offered (Normally offered fall semester)

Former Course Number [GEOL 2005]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210.

GEOL3040 - Introduction to Groundwater

Credits: 3

This class will introduce the basic principles of Groundwater Hydrology such as hydrological cycle, mass balance, fluid properties, mechanics of flow through porous media, Darcy's law, aquifer and aquitards, groundwater wells, groundwater geology, and surface water/ groundwater interaction.

Prerequisite: A grade of B or higher in MATH 1405 or MATH 1450.

GEOL3110 - Invertebrate Paleontology

Credits: 4

Encompasses taxonomy and morphology of major groups of invertebrate fossils. Includes examples of their use in correlation, environmental reconstruction and interpretation of evolution.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 1200.

GEOL3250 - Geosciences and Computers

Credits: 4

An integrated introduction to the basic components of modern scientific computing and to illustrate basic computing concepts through geoscience applications.

USP 2003-2014 Code [I< >(none)]

Prerequisite: One USP designated science course with lab.

GEOL3400 - Geologic Hazards: A Historical and Scientific Review

Credits: 4

Geologic hazards include well-known catastrophic events such as earthquakes, volcanic eruptions and landslides, as well as lesser known processes such as soil expansion, land subsidence and ground failure. Economically, the latter processes have a much greater impact each year than the more notorious geologic events. Reviews geologic hazards from a historical and scientific perspective. Describes relevant geologic processes, how geologic evidence is used to identify regions at risk, monitoring procedures and the role of the scientist in predicting catastrophic geologic events. Prehistoric and historic events are used to illustrate temporal and spatial scales of geologic hazards.

USP 2003-2014 Code U3SE

Prerequisite: junior standing.

GEOL3450 - Weather and Climate

Credits: 3

Max Credit 3

Systematically examines the patterns and process of Earth's climate system, focusing on atmospheric and surface energy and water balances; atmospheric motion; past, present, and future climate change.

Prerequisite: GEOG 1010 OR any USP PN course.

GEOL3500 - Global Change: A Geological Perspective

Credits: 4

Considers the geochemical and geophysical systems that control the Earth's climate, the geological and historical record of climate change, and then discusses the possible effect that human activities will have upon these chemical and geophysical systems.

Prerequisite: junior standing and an introductory class in the physical sciences.

GEOL3600 - Earth and Mineral Resources

Credits: 4

Explores the geologic formation, production, and use of Earth and mineral resources, including building materials, chemical minerals, industrial minerals and metals. For each resource, the geologic environment and processes of formation are discussed. Exploration and mining techniques for each resources are also reviewed and associated environmental problems and regulations examined. Beneficial and detrimental aspects of the use of each resource are also discussed.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL3650 - Energy for Society: Addressing the Energy Grand Challenge

Credits: 4

Examines the energy needs of a modern industrialized society. Looks at the types of energy, the natural laws that govern its use, transformation, and conservation. The different sources of energy available to modern societies are examined. Examination includes fossil fuels, nuclear power as well as alternative energy sources. The formation of the resource is discussed, how it is extracted, and any environmental consequences associated with its extraction and use.

USP 2003-2014 Code U3G, U3SE

USP 2015 Code U5PN

Prerequisite: completion of USP QA and L.

GEOL4000 - Paleomagnetism in Geology/Geophysics

Credits: 3

Studies paleomagnetic solutions in geoscience topics. Includes plate reconstructions; sea-floor formation; structural geology; dating of structural/tectonic events; western North American tectonics; global geomagnetic polarity reversals and time scale; magnetostratigraphic correlation; stratigraphic dating; dating diagenetic events; characteristics of core and mantle; extraterrestrial impacts and geologic phenomena; environmental and climate change applications. Field trip and laboratory project required.

Dual Listed GEOL 5000.

Prerequisite: GEOL 1000 or GEOL 1100; GEOL 1200 desirable.

GEOL4001 - Modeling the Earth System

Credits: 4

Takes a modeling approach to demonstrate how the Earth is integrated into an interconnected system through exchanges of energy and matter, and how Earth system functioning is susceptible to human alteration. Unifying concepts focus on quantitative interactions between the Earth and the Sun, and between the Earth's lithosphere, hydrosphere, biosphere and atmosphere.

Cross Listed BOT 4001/ATSC/ESS 4001.

Prerequisite: MATH 2205 or equivalent and ESS 2000 or GEOL 2000.

GEOL4010 - Exploration Geoscience

Credits: 3

Provides students with information and skills necessary to understand the energy exploration modeling process. Topics will include geophysical exploration, seismic acquisition, geophysical modeling, and reservoir characterization.

Cross Listed ERS 4010.

Prerequisite: GEOL 1100; MATH 2200 or MATH 2350.

GEOL4020 - Global Biogeochemistry

Credits: 3

Biogeochemistry is the exploration of the physical, chemical, and biological processes that govern the exchange of energy and elements between the biosphere and the geosphere. This course will examine pri

Prerequisite: GEOL/ESS 2000

GEOL4025 - Igneous and Metamorphic Petrology

Credits: 4

An advanced study of igneous and metamorphic rocks in hand sample and thin section. Covers optical techniques for identifying minerals, the use of phase diagrams and geochemistry to understand the evolution of igneous rocks and the formation conditions of metamorphic rocks. A field trip is required.

Prerequisite: GEOL 2020.

GEOL4030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 5030.

Prerequisite: MATH 2205 and GEOL 4444/GEOL 5444.

GEOL4050 - Geology of Wyoming

Credits: 3

Survey of the geologic history of Wyoming beginning in the Precambrian and extending to the present. Stratigraphic and sedimentation history, igneous activity, metamorphism, and orogenic activity are emphasized in the lectures. Occasional field trips are required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 1100 or an equivalent course.

GEOL4060 - Rocky Mountain Field Trip

Credits: 1

Max Credit (Max. 3)

A six-day geological field trip to various classic localities in the Rocky Mountains.

Prerequisite: senior standing and GEOL 2010 and GEOL 4610 or GEOL 4050.

GEOL4113 - Geological Remote Sensing

Credits: 4

Acquaints students with aircraft and spacecraft remote sensing of the environment, emphasizing geologic application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. Laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Cross Listed GEOG 4113.

Dual Listed GEOL 5113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 or MATH 1450.

GEOL4125 - Igneous Petrology

Credits: 2

Studies igneous rocks in thin section. Lectures cover mineralogy, geochemistry, phase equilibria and occurrence of igneous rocks. Labs study suites of igneous rocks in thin section.

When Offered (Offered fall semester of odd numbered years)

Prerequisite: GEOL 2010.

GEOL4130 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Prerequisite: Math 1400 and Math 1405 or consent from Instructor

GEOL4140 - Diversity Inclusion Geoscience

Credits: 1

The purpose of this course is to educate and promote the value of diversity and inclusion. We will discuss how our scientific community is affected by racial injustice. The goal of this class is to learn how to support equality, diversity, and inclusivity in our department and in the scientific community.

Cross Listed ENGL 1010 College Composition and Rhetoric OR ESL 1210 English Composition for International Students

Prerequisite: ENGL 1010 College Composition and Rhetoric OR ESL 1210 English Composition for International Students

GEOL4150 - Paleontology of Lower Vertebrates

Credits: 4

Explores evolutionary histories of lower vertebrates including fishes, amphibians, reptiles and birds. Optional field trip.

When Offered (Normally offered every third year)

Prerequisite: acceptable previous training in geology or zoology, 12 hours of biology and/or geology or ZOO 4000.

GEOL4160 - Regional Tectonics

Credits: 2

A field-based introduction to the Mesozoic to early Cenozoic tectonic evolution of the U. S. Cordillera.

Dual Listed GEOL 5160.

Prerequisite: GEOL majors and junior or senior level standing.

GEOL4170 - Paleontology of Cenozoic Placental Mammals

Credits: 4

Explores evolutionary histories of placental mammals' characteristic of Cenozoic era as documented through fossil record study. Optional field trip.

When Offered (Normally offered every third year)

Prerequisite: 12 hours of biology and/or geology or ZOO 4000.

GEOL4190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 5190.

Prerequisite: GEOL 2005 or PETE 2050.

GEOL4191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Dual Listed GEOL 5191.

Prerequisite: GEOL 4190.

GEOL4200 - Topics in Geology

Credits: 1-3

Max Credit (Max. 9)

Studies particular geology topics in-depth at undergraduate level.

Former Course Number [GEOL 4010]

Prerequisite: senior standing and 20 hours in geology.

GEOL4210 - Topics in Geophysics

Credits: 1-3
Max Credit (Max. 9)

Studies particular geophysics topics in-depth at undergraduate level.

Former Course Number [GEOL 4020]

Prerequisite: senior standing and 20 hours in geology.

GEOL4214 - Topics in Economic Geology

Credits: 1-2
Max Credit (Max. 2)

Seminar in economic geology: topics will be influenced by the interest of students who register. For undergraduates looking to enroll in GEOL 4214, it is highly suggested that you have taken GEOL 4270 Ore Deposits before taking this class.

Dual Listed GEOL 5214.

Prerequisite: C or better in GEOL 2020.

GEOL4250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 5250

Prerequisite: MATH 1400 and 1405 or consent of instructor.

GEOL4270 - Hydrogeophysics

Credits: 3

Estimating groundwater parameters, contaminant transport, porosity and other hydrologic properties using geophysics. Integrates literature review, discussion, exercises and writing to introduce students to hydrogeophysics research. Students will acquire skills at reading technical publications, writing, and gain knowledge about current trends in the

field. Emphasis on critical thinking and analysis of writing.

Prerequisite: 20 hours of geology or engineering courses.

GEOL4280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 4280.

Dual Listed GEOL 5280.

Prerequisite: a grade of C or better in LIFE 1010 or GEOL 1100.

GEOL4310 - Advanced Stratigraphy

Credits: 3

Deals with characterizing and predicting the vertical and lateral distribution of sedimentary rocks. Includes correlation methods; use of facies models; facies delineation; impact of tectonics and changes in relative sea level on sedimentary record; transgressions and regressions; concept and construction of stratigraphic framework; and sequence stratigraphy.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2100.

GEOL4320 - Cenozoic Stratigraphy

Credits: 4

Studies areal distribution, depositional environment, paleohydraulics, provenance, and correlation of global Cenozoic deposits. Required field trip.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 2100.

GEOL4420 - Sedimentary Rocks

Credits: 4

Encompasses origin, classification and interpretation of sedimentary rocks including sandstones, mudrocks and carbonates. Topics also include depositional environments and basin analysis. Field trip required.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 2010 and GEOL 2100.

GEOL4440 - High-Performance Computing for Scientists and Engineers

Credits: 3

Gives students an integrated introduction to the design, analysis and implementation of parallel codes on modern HPC systems. This course is interdisciplinary in nature, involving case studies in biology, physics, mathematics and geosciences. HPC systems at ARCC will be used for hands-on exercises.

GEOL4441 - Advanced Climate Variability

Credits: 3

Max Credit 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrologic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Cross Listed GEOG/GEOL 4441-5441

Prerequisite: GEOG 3450/ENR 3450 or instructor consent

GEOL4444 - Geohydrology

Credits: 4

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 5444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL4460 - Planetary Geology

Credits: 3

Examines basic principles of planetary geology and their application to specific planetary examples. Core topics include solar system formation, impact cratering, and comparative planetology. Provides an opportunity to test terrestrial theories under extreme conditions, and provides insight into both early earth history and ongoing geological processes.

Prerequisite: GEOL 2010 and GEOL 2100 and (MATH 1400/MATH 1405 or MATH 1450).

GEOL4470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG 4470/5470

Dual Listed GEOL 5470

Prerequisite: GEOG 4460, BOT 4700, or LIFE 3400; junior or senior standing.

GEOL4490 - Geochemistry

Credits: 4

Discusses chemical evolution of the Earth and details of chemical thermodynamics, phase rule chemistry, equilibrium reactions and reaction kinetics as applied to geology.

When Offered (Normally offered spring semester)

Prerequisite: GEOL 2010, CHEM 1020, MATH 2200, MATH 2205.

GEOL4525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 5525.

Prerequisite: A grade of C or better in STAT 2050 or STAT 2070 or MATH 2200, junior standing or higher, and completion of at least one upper-division course in the natural sciences or a related field.

GEOL4610 - Structural Geology and Tectonics

Credits: 4

Encompasses lectures, readings and problems dealing with character and causes of structures that deform Earth's crust. Field trips required.

When Offered (Normally offered fall semester)

Prerequisite: GEOL 2010.

GEOL4666 - Plate Tectonics

Credits: 3

Studies theory of plate tectonics including quantitative assessment of observations which lead to its acceptance. Includes geometry of plate tectonics, plate boundaries and plate motions at present and in the past, evolution of plates including sea floor spreading and subduction processes, as well as driving mechanisms. Two lectures, one laboratory/discussion per week.

Dual Listed GEOL 5666.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GEOL 4610, geology/geophysics math requirements.

GEOL4717 - Field Course in Geology

Credits: 1-8

Reviews field observation of geologic phenomena, methods of geologic mapping and interpretation of data collected. Course includes a six-week field trip.

When Offered (Offered early summer)
Former Course Number [GEOL 5100]

Prerequisite: GEOL 2100, GEOL 4610.

GEOL4720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 5720

When Offered (Normally offered fall semester)
Former Course Number [GEOL 4700]

Prerequisite: a grade of C or better in GEOL 2020.

GEOL4760 - Rates and Timescales of Surface Processes

Credits: 3

Explores methods for quantifying rates and timescales of weathering, erosion, soil formation, nutrient cycling and other surface processes. Focus includes cosmogenic nuclides, tracer thermochronometry, U-series disequilibrium, fallout radionuclides, and optically stimulated luminescence. Course features a mix of instructor-driven lectures on fundamentals and student-driven discussion of cutting-edge research from recent literature.

Dual Listed GEOL 5760.

Prerequisite: GEOL 2150 or GEOG 3010 or GEOL 4880 and MATH 2205 and CHEM 1020 and PHYS 1100.

GEOL4777 - Geochemistry of Natural Waters

Credits: 3

Studies physical chemistry applied to natural waters, and chemistry of rock weathering, sources and controls on major, minor and trace elements, plus problems related to introduced pollutants.

Cross Listed GEOL 5777.

Prerequisite: CHEM 1030 OR consent of instructor.

GEOL4800 - Independent Study

Credits: 1-3

Encompasses field, laboratory or library research for senior students in department.

Prerequisite: senior standing and not fewer than 20 hours in geology.

GEOL4820 - Capstone

Credits: 3

Critical examination of landmark papers and their influence on the Earth sciences. Through readings, lectures, discussions and in oral and written presentations, the student will gain a broad perspective over the impact of key issues in the field.

USP 2003-2014 Code U3WC

USP 2015 Code U5C3

Prerequisite: junior standing and 26 hours in the department.

GEOL4835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. It covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetics methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources, and environmental issues.

Dual Listed GEOL 5835.

Former Course Number [GEOL 4970]

Prerequisite: 1000-level GEOL course with lab, PHYS 1110 or PHYS 1210 and MATH 2200.

GEOL4850 - Principles of Digital Filtering and Time Series Analysis

Credits: 3

Studies principles and applications of data processing techniques as used in seismic exploration, oceanography, gravity and magnetic prospecting, remote sensing and other areas of earth science. Includes discrete versus continuous time series; fourier and Z-transforms; layer matrix analysis; reflectivity function; deconvolution and predictive deconvolution; digital filter design; array analysis; velocity filters; and migration.

When Offered (Normally offered fall semester)

Prerequisite: mathematics through calculus.

GEOL4880 - Earth Surface Processes

Credits: 3

Quantitative interpretation of Earth's surface processes. Uses a quantitative approach to demonstrate how the development of landforms can be modeled.

Prerequisite: MATH 2205 (MATH 2210 preferred), PHYS 1210.

GEOL4888 - Glaciology

Credits: 3

Dynamics of frozen water. Covers behavior of ice masses, in the form of glaciers or ice-sheets, and geomorphic aspects of glacial erosion and deposition. Includes forcing and feedbacks between cryosphere and global climate.

When Offered (Offered every second year spring semester)

Prerequisite: MATH 2205, PHYS 1210 (PHYS 1310).

GEOL5020 - Fundamentals of Research

Credits: 2

Lectures, discussion and projects centered on three fundamental aspects of research: development of research tools, understanding the scientific method, learning how to write a grant, read the literature and present a talk. Class is designed for all incoming graduate students in the department.

Prerequisite: graduate standing.

GEOL5030 - Groundwater Flow and Solute Transport Modeling

Credits: 3

Movement of groundwater and the dissolved solute is responsible for a variety of environmental, engineering, and geological processes of interest. Presents an overview of the analyses of groundwater flow and solute transport using numerical modeling. The principles of the Finite Difference Method are introduced.

Dual Listed GEOL 4030.

Prerequisite: MATH 2205, GEOL 5444.

GEOL5050 - Introduction to Isotope Geology

Credits: 3

Understanding of atomic structure, radioactive decay, mass spectrometry, dating techniques and petrologic uses of isotopic systems. Emphasis will be placed on evaluating dating methods in relation to particular geologic problems and possible sources of error. The use of isotopes in defining magmatic sources and crustal contamination are discussed.

Prerequisite: CHEM 1020, CHEM 1110, MATH 2200, MATH 2205.

GEOL5060 - Rocky Mt. Field Trip

Credits: 3

Max Credit 3

A five-day geological field trip to various classic localities in the Rocky Mountains.

Prerequisite: Graduate standing required. For undergraduates, GEOL 2100 and GEOL 4610 are required OR consent of the instructor.

Prerequisite/Corequisite: GEOL 4060

GEOL5113 - Geological Remote Sensing

Credits: 4

Acquaint students with aircraft and spacecraft remote sensing of the environment, emphasizing geological application to earth and other planetary bodies. Includes visible, infrared, ultraviolet, radio and radar sensing. The laboratory exercises are applications related to tectonics, geomorphology, paleoclimate, structure, stratigraphy, environmental geology and geologic hazards.

Dual Listed GEOL 4113.

Prerequisite: GEOL 1005 or GEOL 1100 or 1200 or GEOG 1010 and MATH 1400/MATH 1405 OR MATH 1450.

GEOL5120 - Tectonic Evolution of the North American Cordillera

Credits: 4

Phanerozoic tectonic evolution of western North America viewed through the paradigm of plate tectonics. Course involves intensive literature review, guest speakers, a possible field trip, and an in depth regional tectonic analysis to be done by each student.

Prerequisite: GEOL 2020, GEOL 2100, and GEOL 4610.

GEOL5140 - Diversity Inclusion Geoscience

Credits: 1

The purpose of this course is to educate and promote the value of diversity and inclusion. We will discuss how our scientific community is affected by racial injustice. The goal of this class is to learn how to support equality, diversity, and inclusivity in our department and in the scientific community.

Dual Listed dual listed with GEOL 4140

Prerequisite: ENGL 1010 College Composition and Rhetoric OR ESL 1210 English Composition for International Students

GEOL5150 - Metamorphic Petrology

Credits: 4

Lectures on field occurrence, macroscopic and microscopic characteristics of igneous rocks, followed by lectures on application of physical chemistry to genetic study of igneous rocks. Laboratory devoted to the study of suites of igneous rocks from classical areas.

Prerequisite: GEOL 2020 and GEOL 4490; graduate standing.

GEOL5160 - Regional Tectonics

Credits: 2

A field-based introduction to the Mesozoic to early Cenozoic tectonic evolution of the U. S. Cordillera.

Dual Listed GEOL 4160.

Prerequisite: graduate standing.

GEOL5180 - Reflection Seismology

Credits: 3

Lectures treating seismic methods applied to the study of earth structures ranging from exploration to crustal structure. Topics covered include wave propagation recording techniques, processing, modeling, resolution and interpretation. Laboratory exercises give practical experience on lecture topics and emphasize use of instruments and data analysis. Computer processing introduced.

Prerequisite: GEOL 1200, one year of calculus and one year of physics.

GEOL5190 - Petroleum Geology

Credits: 3

Principles governing the exploration for hydrocarbons; characteristics of reservoirs and traps; origin, migration and accumulation of hydrocarbons; subsurface evaluation techniques.

Dual Listed GEOL 4190.

Prerequisite: GEOL 2100, GEOL 4610.

GEOL5191 - Methods in Petroleum Geology

Credits: 3

Lectures and laboratory exercises are designed to give the student experience in working with various kinds of geoscientific data in relation to the exploration for and production of hydrocarbons. Most exercises utilize real data and real situations. Topics include recognition of hydrocarbons, interpretation of sample, mud and geophysical logs, geologic utilization of drill stem tests; subsurface correlation and mapping techniques; prospect generation.

Prerequisite: GEOL 5190.

GEOL5200 - Topics in Geology

Credits: 1-3

Max Credit (Max. 9)

Provides a detailed study at a graduate level of a particular topic in geology.

Prerequisite: graduate standing in geology and geophysics and permission of the instructor.

GEOL5210 - Topics in Geophysics

Credits: 1-3

Max Credit (Max. 9)

Provides a detailed study at a graduate level of a particular topic in geophysics.

Prerequisite: graduate standing in geology and geophysics and permission of instructor.

GEOL5211 - Seminar in Structural Geology and Tectonics

Credits: 1

Max Credit (Max. 6)

Selected topics in structural geology and tectonics. On-going research among undergraduate and graduate students is emphasized.

Prerequisite: GEOL 4610 or equivalent course.

GEOL5212 - Sedimentary Seminar

Credits: 1

Max Credit (Max. 3)

Seminar in selected topics in sedimentary geology. Designed to bring, and keep, graduate students up to date with the current literature and new, unpublished ideas. Visiting lecturers and presentations of student and faculty research.

Prerequisite: graduate standing.

GEOL5213 - Seminar in Tectonics

Credits: 2

Graduate topical seminar focused on tectonic. The class is a mixture of lectures, readings, and original research involving the compilation/ generation, analysis, and interpretation of data to understand geodynamic processes and events.

Prerequisite: graduate standing.

GEOL5214 - Topics in Economic Geology

Credits: 1-2

Max Credit (Max. 2)

Seminar in economic geology: topics will be influenced by the interest of students who register. For undergraduates looking to enroll in GEOL 4214, it is highly suggested that you have taken GEOL 4270 Ore Deposits before taking this class.

Dual Listed GEOL 4214.

GEOL5215 - Inverse Theory

Credits: 3

Inverse theory is about learning the techniques to invert data for an acceptable model. The simplest example is least-squares fitting of a line. Covers inversion of both over and under-determined inverse problems, regularization techniques, bayesian theory, along with probabilistic viewpoints.

Prerequisite: graduate standing in geology and geophysics; linear algebra, MATLAB programming.

GEOL5216 - Global Seismology

Credits: 3

Introductory class in theoretical seismology with emphasis on wave propagation. Topics include elastic wave theory for body and surface waves, normal modes, anisotropic wave propagation, source processes, and derivation of the wave equation, the ray theoretical approximation, representation theorems, stress/strain constitutive relations, normal modes, surface waves, and attenuation operators.

Prerequisite: graduate standing in geology or geophysics and permission of the instructor.

GEOL5217 - Geodynamics

Credits: 3

Examines the fundamental physical processes necessary for the understanding of plate tectonics and a variety of other geological phenomena. Provides a solid grounding for future study and research covering plate tectonics, stress & strain, elasticity, isostasy & the flexural strength of the lithosphere, gravity, and thermal processes.

Prerequisite: GEOL 1100, one year of college level Physics and MATH 2210.

GEOL5220 - Vertebrate Morphology and Evolution

Credits: 2

Course for paleontology majors and vertebrate anatomists involving advanced concepts, recent literature, and research training in the areas of morphology and evolution of fossil vertebrates.

Cross Listed ZOO 5220.

Prerequisite: GEOL 4150/ZOO 4150 or GEOL 4160/ZOO 4160, or GEOL 4170/ZOO 4170 or ZOO 4000.

GEOL5230 - Vertebrate Paleobiogeography

Credits: 2

Lectures and discussions devoted to use of data from the fossil record of vertebrates in interpreting ancient distributions of landmasses and seaways, recognizing paleoclimatic changes, and documenting the evolution of zoogeographic provinces.

Prerequisite: GEOL 4150/ZOO 4150, or GEOL 4160/ZOO 4160 or GEOL 4170/ZOO 4170.

GEOL5250 - Mathematical Geosciences

Credits: 3

The purpose of this course is to strengthen the quantitative skills of students in geosciences by reviewing basic concepts of linear algebra, precalculus, derivation and integration through applications to real datasets and problem sets, and introducing basic concepts of inverse theory, spatial science, data analytics, and geostatistics. The examples focus on applications to practical geoscience problems.

Dual Listed GEOL 4250

GEOL5270 - Hydrogeophysics

Credits: 3

Estimating groundwater parameters, contaminant transport, porosity and other hydrologic properties using geophysics. Integrates literature review, discussion, exercises and writing to introduce students to hydrogeophysics research. Students will acquire skills at reading technical publications, writing, and gain knowledge about current trends in the field. Emphasis on critical thinking and analysis of writing.

Prerequisite: 20 hours of geology or engineering courses.

GEOL5280 - Paleobotany

Credits: 4

An examination of the ecology and evolution of land plants throughout Earth history that emphasizes the profound impact plants have had on Earth's surface and atmosphere. Through a combination of lecture, discussion, and laboratory, the course will explore fossilized plant communities, their ecological properties, and effects of major environmental upheavals.

Cross Listed BOT 5280.

Dual Listed GEOL 4280.

Prerequisite: graduate standing.

GEOL5300 - Sedimentary Basins

Credits: 4

Sedimentary basin evolution are examined from the view point of plate tectonics, thermal histories, and lithospheric processes. Quantitative basin modeling techniques are applied to understanding subsidence histories, sea level changes, and the primary controls on the formation of stratigraphic sequences.

Prerequisite: 1 year of calculus.

GEOL5321 - Engineering and Environment Geophysics

Credits: 3

Theoretical background for electrical, electromagnetic, georadar, and other near-surface geophysical measurements. Practical exercises focused on modeling, inversion, data analysis and experimental design. Discussion of applications to engineering and environmental problems. Basic knowledge of MATLAB programming language is helpful, but not required.

Cross Listed CE 5321.

Prerequisite: MATH 2250 or MATH 2200.

GEOL5330 - Mechanics of Sediment Transport, Erosion and Deposition

Credits: 4

Erosion, transport, and deposition of sediments are examined from a first-principles basis. Physical processes are derived from fluid dynamics, statistical mechanics, and mass conservation. These topics are then used to explore landscape and seascape evolution, morphodynamics, and stratigraphic construction.

Prerequisite: GEOL 2100 or equivalent.

GEOL5340 - Advanced Tectonics and Sedimentation

Credits: 3

Lectures, seminars, and field observations on the relations between tectonism and the sedimentary record. Topics include a review of plate tectonic theory, characteristics of major types of sedimentary basins, techniques for evaluating tectonic activity from evidence in the sedimentary record and large-scale tectonosedimentary elements.

Prerequisite: graduate standing, GEOL 2100, and GEOL 4610.

GEOL5410 - Applied Geochemical Analysis

Credits: 3

Applied course in common geochemical analytical methods. Consists of lectures and laboratories with individual hands-on training. Includes sample handling, method development, and data interpretation for several analytical instruments including but not limited to inductively coupled argon plasma emission and ion chromatography. Other analytical methods are also treated.

Prerequisite: GEOL 4490.

GEOL5420 - Surfaces and Interfaces

Credits: 3

Examines the role of surfaces and solid-solution interfaces in regulating the chemistry of the Earth's surface. Subjects to be covered includes surface tension, capillarity, and the thermodynamics of surfaces; the equilibrium and kinetic chemistry of absorption-desorption; dissolution-precipitation kinetics and controlling factors; surface catalysis; and surface oxidation-reduction reactions. Presented in the context of geochemically and environmentally important processes such as chemical weathering, partitioning of solutes between water and surfaces, and the transport and degradation of pollutants.

Prerequisite: One of the following: GEOL 4490, GEOL 4777, GEOL 5777, CHEM 3020, CHEM 4507.

GEOL5441 - Advanced Climate Variability

Credits: 3

Max Credit 3

Climate varies. This fundamental aspect of the climate system can have major environmental and societal impacts to ecosystems, the hydrolic cycle and water resource management in arid environments such as the intermountain west. This course will utilize climate data and mapping tools to understand global and regional climate variability.

Cross Listed GEOG/GEOL 4441-5441

Prerequisite: GEOG 3450/ENR 3450 or instructor consent

GEOL5444 - Geohydrology

Credits: 3

Examines the physical principles governing the occurrence, movement, and extraction of water in aquifers.

Dual Listed GEOL 4444.

When Offered (Normally offered fall semester)

Prerequisite: MATH 2205.

GEOL5446 - Introduction to Geostatistics

Credits: 3

The development of the basic principles of geostatistics and its practical applications in the geosciences will be presented. Main topics include: spatial analysis, kriging, cokriging, geostatistical simulations (unconditional, conditional). If time permits additional topics include: simple kriging, indicator kriging and block kriging.

Prerequisite: MATH 2200, MATH 2205, MATH 2250 and STAT 2000.

GEOL5450 - Geochemical Modeling

Credits: 3

Modeling of geochemical processes in fluid-rock systems of the Earth's crust. Emphasizes development and application of conceptual models as well as quantitative numerical models. Reinforces and expands fundamental skills in aqueous and fluid-rock geochemistry to better understand geochemical processes and solve problems in fluid-rock systems.

Prerequisite: GEOL 4777/GEOL 5777 or GEOL 5610 or GEOL 4490.

GEOL5470 - Fire Ecology

Credits: 3

Fire is an important phenomenon affecting ecosystems and human communities throughout the world. Explores spatial and temporal patterns of fire with emphasis on ecology and management.

Cross Listed GEOG 4470/5470.

Dual Listed GEOL 4470

Prerequisite: GEOG 4460, BOT 4700, or LIFE 3400; or graduate standing.

GEOL5525 - Environmental Data Analysis

Credits: 4

Explores fundamentals of environmental data analysis including the display and description of data, uncertainty propagation, statistical significance and power, t-tests, ANOVA, time series, serial correlation, multiple regression, and sample collection strategies. Students must enroll in a computer-based lab session and complete a term project involving real world problems in data analysis.

Cross Listed ENR 4525/ENR 5525.

Dual Listed GEOL 4525.

GEOL5550 - Numerical Methods in Ground Water Geology I

Credits: 3

Numerical solution of ground water flow equations with emphasis on steady state and elementary time dependent finite difference techniques.

Prerequisite: GEOL 4444 or GEOL 5444, competence in FORTRAN programming.

GEOL5560 - Numerical Methods in Ground Water Geology II

Credits: 3

Time dependent digital simulation models designed to forecast impacts of ground water developments.

Prerequisite: GEOL 5550.

GEOL5570 - Advanced Geohydrology

Credits: 3

Aquifer performance and testing, ground water basin development and management, conjunctive use of ground and surface water, and regional water resource investigations.

Prerequisite: GEOL 4444 or GEOL 5444.

GEOL5600 - Theoretical Petrology

Credits: 3

Graphic and analytical techniques used to evaluate the genesis of igneous and metamorphic rocks. Principles of thermodynamics, activity-composition relations, and G-X diagrams will be reviewed. Igneous topics include: use of phase diagrams, heat and mass transfer, magma generation. Fluid rock equilibria and Schreinemakers' analysis will be used to evaluate the origin of metamorphic rocks.

Prerequisite: GEOL 4490.

GEOL5610 - Geological Thermodynamics I

Credits: 4

Laws of thermodynamics, conditions which constitute chemical equilibrium, and multiple component systems as

applied in geologic problems.

Prerequisite: MATH 2200, MATH 2205, CHEM 1030, consent of instructor.

GEOL5630 - Electronic Microprobe

Credits: 3

Lectures cover the theory of X-ray emission analysis, microprobe instrumentation, and data reduction procedures. Labs cover various uses of microprobe in solving geological problems.

Prerequisite: consent of instructor.

GEOL5640 - Advanced Igneous Petrology Seminar

Credits: 1-3

Max Credit (Max. 9)

Advanced training in igneous petrology emphasizing applications of chemical principles to the study of igneous rocks. Each year a different aspect of igneous petrology are covered in detail.

Prerequisite: GEOL 4490, GEOL 5050.

GEOL5650 - Advanced Metamorphic Petrology

Credits: 3

Review of the literature and study of the advanced concepts in metamorphic petrology.

Prerequisite: GEOL 5150.

GEOL5660 - Microstructural Analysis of Deformed Rocks

Credits: 4

The use of microscope in the interpretation of natural strain in rocks is emphasized. Lectures and extensive laboratory exercises are the principle components of the course. Microfabric analysis using the universal stage is introduced.

Prerequisite: GEOL 4610 required, GEOL 5150 recommended.

GEOL5666 - Plate Tectonics

Credits: 3

The theory of plate tectonics including a quantitative assessment of the observations which lead to its acceptance and limitations. Topics include: geometry of plate tectonics, plate boundaries and plate motions at present and in the past, evolution of plates including sea floor spreading and subduction processes, and driving mechanisms. Two lectures, one laboratory/discussion per week.

Dual Listed GEOL 4666.

Prerequisite: GEOL 4610, geology/geophysics math requirements.

GEOL5700 - Seminar in Structure and Development of the Earth's Crust

Credits: 3

Seminar in structure and development of the Earth's crust. Topics include structure and geochemistry of the Precambrian plate tectonics in the Precambrian early history of the Earth, seismic refraction crustal models, seismic reflection crustal models, and crustal genesis.

Prerequisite: admission is by consent of instructor, GEOL 4610 and one semester of geophysics.

GEOL5720 - Ore Deposits

Credits: 4

Teaches principles of economic geology of ore minerals. Lectures cover geochemistry of ore minerals and environments in which various ore minerals are found. Labs include identification of ore minerals in hand sample and under microscope and methodology of economic geology.

Dual Listed GEOL 4720.

Prerequisite: GEOL 2010.

GEOL5730 - Seismic Data Processing

Credits: 3

Fundamentals of seismic reflection data processing: processing of field tapes, cross-correlation, velocity analysis, stacking, and deconvolution. Statistics correct, migration, coherency filtering.

Prerequisite: GEOL 5180, MATH 4430, MATH 4440.

GEOL5760 - Rates and Timescales of Surface Processes

Credits: 3

Explores methods for quantifying rates and timescales of weathering, erosion, soil formation, nutrient cycling and other surface processes. Focus includes cosmogenic nuclides, tracer thermochronometry, U-series disequilibrium, fallout radionuclides, and optically stimulated luminescence. Course features a mix of instructor-driven lectures on fundamentals and student-driven discussion of cutting-edge research from recent literature.

Dual Listed GEOL 4760.

Prerequisite: GEOL 2150 or GEOG 3010 or GEOL 4880 and MATH 2205 and CHEM 1020 and PHYS 1100.

GEOL5777 - Geochemistry of Natural Waters

Credits: 3

Physical chemistry of solutions applied to natural waters. Chemistry of rock weathering, controls on major, minor, and trace element contents of natural waters. Problems of introduced pollutants.

Cross Listed GEOL 4777.

Prerequisite: CHEM 1030 OR consent of instructor.

GEOL5820 - Advanced Geomorphology

Credits: 1-3

Max Credit (Max. 6)

Graduate reading and discussion seminar on current topics in surficial processes. An indepth analysis of the literature and work, with the subject matter determined by student interest. May include lectures.

Prerequisite: senior or graduate standing in geology.

GEOL5835 - Applied/Exploration Geophysics

Credits: 3

Discusses the fundamentals of Applied or Exploration Geophysics, encompassing lecture, laboratory classes and discussion of case histories. Covers the Seismic Refraction, Seismic Reflection, Gravity, and Magnetics methods. Provides a solid grounding about the exploration of the Earth's subsurface for mineral and hydrocarbon resources and environmental issues.

Dual Listed GEOL 4835.

Prerequisite: graduate standing in geology.

GEOL5850 - Economic Geology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5851 - Environmental Geology

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5852 - Geochemistry

Credits: 1-6

Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5853 - Geomorphology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5854 - Geophysics

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5855 - Ground Water Hydrology

Credits: 1-6
Max Credit (Max. 7)

Prerequisite: graduate standing in geology.

GEOL5856 - Mathematical and Statistical Geology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5857 - Mineralogy and Crystallography

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5858 - Paleontology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5859 - Petrology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5860 - Sedimentology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5861 - Stratigraphy

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5862 - Structural Geology

Credits: 1-6
Max Credit (Max. 6)

Prerequisite: graduate standing in geology.

GEOL5900 - Practicum in College Teaching

Credits: 1-3
Max Credit (Max. 3)

Work in classroom with a major professor. Expected to give some lectures and gain classroom experience.

Prerequisite: graduate standing.

GEOL5920 - Continuing Registration: On Campus

Credits: 1-2
Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GEOL5940 - Continuing Registration: Off Campus¹

Credits: 2
Max Credit (Max 16)

Prerequisite: advanced degree candidacy.

GEOL5959 - Enrichment Studies

Credits: 1-3
Max Credit (Max. 99)

Designed to provide an enrichment experience in a variety of topics.

A&S College Core 2015 Note: credit in this course may not be included in a graduate program of study for degree purposes.

GEOL5960 - Thesis Research

Credits: 1-12
Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GEOL5980 - Dissertation Research

Credits: 1-12
Max Credit (Max. 48)

Designed for students who are involved in research for their dissertation project. Also used for students whose coursework is complete and are writing their dissertation.

Prerequisite: enrollment in a graduate level degree program.

GEOL5990 - Internship

Credits: 1-12
Max Credit (Max. 14)

Prerequisite: graduate standing.

Geospatial Information Science Technology

GIST1001 - GIST Orientation and Portfolio

Credits: 1
Introduces students to the GIST degree, the resources necessary to be successful in the program, and the broader geospatial field and its impact on society. Topics include a survey of domain applications, the ethical, legal and social implications of using geospatial data, and geospatial certifications and credentialing.

GIST1200 - Geospatial Foundations

Credits: 3
Provides fundamental knowledge of geospatial information and place-based science across disciplines, including spatial representation, scale, resolution, map projections, and coordinate systems. Students learn how to discover and access spatial data and read and analyze maps. Supports understanding of geospatial reasoning and cognition.

Former Course Number GIST 1100

GIST2110 - Techniques in Cartography

Credits: 3
Max Credit 3

This course covers cartographic theory, techniques, and hands-on map-making. Students design thematic and reference maps using different platforms including web mapping. Students learn principles of graphic design and data journalism for effective communication, and they evaluate map purpose, design, data quality, and cognitive and political bias in maps.

GIST2140 - Survey of Remote Sensing Applications

Credits: 3
This course introduces remote sensing by surveying applications across disciplines. It includes a brief overview of fundamentals followed by exploration of types of remote sensing including aerial photography, multispectral and hyperspectral satellite remote sensing, active remote sensing, and thermal remote sensing. The course also introduces remote sensing applications for global change.

USP 2015 Code U5PN
Former Course Number GIST 2160

Prerequisite: USP Q; sophomore or junior class standing.

GIST2150 - Introduction to Programming in Geospatial Information Science and Technology

Credits: 3
Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

GIST2190 - Intro to Programming

Credits: 3
Introductory geospatial programming course covering the basic concepts and features of the Python scripting language, including data structures and functions, and the development of basic GIS scripting skills. Students implement spatial data collection, processing, and presentation methods for automating geospatial analyses.

Former Course Number GIST 2150

GIST2200 - Spatial Data Visualization

Credits: 3
Covers fundamental principles, concepts, and applications of spatial data visualization. Students will learn to find, understand, and act on spatial patterns, associations and trends, and to use and critique powerful graphical representations of spatial data including 3D maps, web maps, interactive graphics, and animations.

GIST2310 - Intro to Geographic Information Systems

Credits: 4

Introductory course covering fundamental principles of geographic information systems (GIS). Students will be introduced to both the theory and application of GIS, including GIS components, the nature of geospatial data, methods for data acquisition, database models, and GIS operations. Includes hands-on laboratory exercises using widely-used software.

Former Course Number GIST 2100

GIST3140 - Introduction to Remote Sensing

Credits: 3

This is a combined lecture and computer lab course designed to present the physical principles of remote sensing, the application of airborne and satellite imagery to the study of the earth's surface with an emphasis on vegetation, and the hands-on application of remote sensing principles using digital image processing.

USP 2003-2014 Code Q

Former Course Number GIST 3111

GIST4130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Cross Listed RNEW 4130 and PLNT 4130.

Dual Listed GIST 5130.

Former Course Number [BOT 4130]

Prerequisite: QA/Q course and 9 credit hours in student's major field and junior/ senior standing.

GIST4211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 5211.

Former Course Number [BOT 4211; GEOG 4211]

Prerequisite: GIST 3111 or GIST 4130.

GIST4410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 5410.

GIST4420 - UAS Mission Planning

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 5420.

GIST4430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 5430.

GIST4440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 5440.

GIST4450 - UAS Photogrammetry and Image Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 5450.

Prerequisite: Junior/Senior standing or approval from the instructor.

GIST4790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 5790.

GIST4870 - Internship in Geospatial Information Science and Technology

Credits: 1-12

Max Credit (Max. 12)

Provide undergraduates with the opportunity to receive credit for practical experience in geospatial information science and technology. Internship opportunities must be approved by faculty and work supervisors.

GIST4950 - Undergraduate Research in Geospatial Information Science and Technology

Credits: 1-6

Max Credit (Max. 6)

Undergraduate research in Geospatial Information Science and Technology (GIST) under the mentorship of UW faculty. Students are encouraged to present their research at professional meetings and to publish their work. GIST is multidisciplinary, so research problems span a wide range of topics.

GIST5002 - Geospatial Forum

Credits: 1

Students attend a geospatial sciences speaker series and contribute by presenting their proposed or completed research to faculty and other students in a professional manner analogous to presenting scientific research at professional meetings.

GIST5050 - Basics of Spatial Data Science

Credits: 3

Centers on the role of information technology in support of scientific research. Through integration of multiple software packages (e.g. Relational databases, ProgramR and ArcGIS), proven database designs, and SQL scripting, increased efficiency and utility will occur during data analyses. These information science principles are demonstrated using project-based examples.

Former Course Number GEOG 5050] **Restricted** Grad students only

GIST5100 - Foundations of Geospatial Information Science and Technology

Credits: 3

This online and on-campus graduate-level course provides an introduction to key concepts in geospatial information science and technology (GIST) including spatial data structures, coordinate systems, cartographic principles, spatial

analysis, modeling, spatial cognition, and applications of GIS in a multidisciplinary context. Lecture and project-based (poster).

GIST5111 - Introduction to Remote Sensing

Credits: 3

Combined online lecture and laboratory course introduces students to fundamental principles and techniques of remote sensing and the application of digital satellite and aerial imagery to the study of the earth's surface. Includes hands-on application of digital imaging processing techniques discussed in lecture.

Former Course Number [BOT 5111; GEOG 5111]

GIST5120 - Integration of RS and GIS Data

Credits: 3

Many geospatial analyses involve combining remotely sensed (RS) data and products with other geospatial data stored in GIS. This 3-credit online course will overview the topics pertaining to the integration of RS data in raster format with GIS data stored in vector format.

Prerequisite: graduate standing.

GIST5130 - Applied Remote Sensing for Agricultural Management

Credits: 3

Covers remote sensing concepts and applications related to croplands, rangelands, forests, and water. Students learn techniques for monitoring plant growth and vigor, monitoring rangelands, distinguishing invasive species, categorizing forest fires, and mapping water bodies. Students integrate remotely sensed data with other geospatial data.

Dual Listed GIST 4130.

Former Course Number [BOT 5130; RNEW 5130]

GIST5150 - Advanced Programming in Spatial Sciences

Credits: 3

Introduces GIS programming to motivated students with little or no prior experience in programming; students develop programming skills used to understand geospatial data and to model geographical changes. Programming skills for handling emerging data types are emphasized.

GIST5200 - Geographic Visualization

Credits: 3

This online lecture and lab course emphasizes advanced theory and hands-on practice for creating applying interactive, dynamic, and multidimensional graphical representations of geographic data. Students will be introduced to web programming to allow them to develop mobile and online visualization tools.

GIST5211 - Advanced Remote Sensing

Credits: 3

On-campus and online course including lecture and digital image processing lab. Explores advanced remote sensing techniques including high spatial and spectral resolution data analysis, active remote sensing (radar and lidar), and advanced image classification. Other advanced topics may be discussed as needed.

Dual Listed GIST 4211.

Former Course Number [BOT 5211; GEOG 5211]

Prerequisite: GIST 5111 or GIST 5130.

GIST5220 - Spatial Modeling & Data Analysis

Credits: 3

Using raster modeling, hybrid vector/raster approaches, and geo-computational techniques, this course will explore a variety of modeling concepts and related issues. This course will examine a variety of both practical and theoretical issues, with special emphasis on understanding spatial questions that are not readily addressed by basic GIS. We will also consider issues related to error, resolution, scale, and a variety of other factors.

Former Course Number GEOG 5220

GIST5280 - Navigating GIST Professions

Credits: 1

An introduction to work in the geospatial profession for online GIST master's program students. Focus is on workplace, management and occupation-specific competencies across and within specific domain application areas. Topics include evaluation and appropriate use of technology and data, developing career pathway options, the role of professional certification, and the value of continuing education and professional network connections.

GIST5300 - Web Mapping and Internet GIS

Credits: 3

With a combination of lecture-based information and hands-on lab exercises, students learn to design, develop, and implement web- and internet-based GIS and mapping applications. Commonly used web and internet GIS tools are used, and students learn to assess the quality, utility, and legal aspects of web GIS products.

GIST5350 - Enterprise GIS

Credits: 3

This course provides a comprehensive overview of the design, development, and management of enterprise GIS platforms. In addition to learning about enterprise architecture, students set up cloud services for managing, sharing, and processing spatial data using proprietary and open source tools.

GIST5410 - UAS Sensors and Platforms

Credits: 1

This 1-credit online course taught over 8 weeks provides a detailed overview of the types of drones used for modern remote sensing and of the sensors that can be used with these different drone platforms to collect data, including RGB and multi-spectral cameras, thermal sensors, and lidar.

Dual Listed GIST 4410.

GIST5420 - UAS Mission Planning

Credits: 1

This 1-credit online course provides a detailed overview of mission planning for UAS (drone) data collection. Students learn to evaluate mission requirements for a variety of UAS applications, to choose appropriate hardware to accomplish these requirements, and to use mission planning software to translate requirements into flight plans and data collection strategies.

Dual Listed GIST 4420.

GIST5430 - UAS Regulations and Safety

Credits: 1

This 1-credit online course taught over 8 weeks provides students with a detailed overview of federal, state, and local regulations pertaining to UAS flights and data collection. Students also learn about how to operate drones safely in both personal and professional applications. Course content helps prepare students for FAA remote pilot certification.

Dual Listed GIST 4430.

GIST5440 - UAS Ground School and Operations

Credits: 2

This field course provides students with the practical experience to operate UAS (drones) safely, legally, and effectively for collecting data to be used in a variety of applications. Students learn about pertinent safety and regulations, and then spend much of the course time flying drones in the field and collecting data.

Dual Listed GIST 4440.

GIST5450 - UAS Photogrammetry and Imagery Process

Credits: 3

This 3-credit online course provides overviews of the photogrammetric principles related to imagery data acquired by unmanned aerial vehicles or drones, and the image processing techniques used for extracting information from the drone images. Students will gain experience in processing drone imagery collected with RGB cameras and multi-spectral sensors.

Dual Listed GIST 4450.

Prerequisite: graduate standing or approval from the instructor.

GIST5780 - GIS&T Capstone

Students demonstrate advanced competency in GIS&T by designing and completing a semi-independent geospatial project that applies GIS&T concepts, tools, and methods. Students share their project in the form of scientific reports.

and oral presentations at a formal geospatial forum.

Prerequisite: GIST 5002 (co-requisite).

GIST5790 - Special Topics in Geospatial Information Science and Technology

Credits: 3

Advanced and specialized topics in GIS&T are addressed through guided student discussions of current literature and possible hands-on analyses.

Dual Listed GIST 4790.

GIST5960 - GIST Thesis Research

Credits: 1-12

Max Credit 24

This course provides credit for students who are conducting thesis research and for students who have finished their coursework and are writing their master's degree thesis.

Restricted GIST Research M.S. students only

German

GERM1010 - First Year German I

Credits: 4

Explores fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

GERM1020 - First Year German II

Credits: 4

Examines fundamentals of grammar, composition, conversation and reading.

USP 2015 Code U5H

Prerequisite: GERM 1010 or two years of high school German.

GERM1101 - First-Year Seminar

Credits: 3

USP 2015 Code U5FY

GERM2030 - Second Year German I

Credits: 4

Includes reading simple novels, short stories, and dramas; grammar review; and conversation. Eight required laboratory exercises.

USP 2015 Code U5H

Prerequisite: GERM 1020 or three years of high school German.

GERM2040 - Second Year German II

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2015 Code U5H

Prerequisite: GERM 2030 or three years of high school German.

GERM3006 - 20th Century German Culture and Civilization

Credits: 3

Major political, ideological and cultural developments in Germany between 1871 and the present. An interdisciplinary approach (history, art history, film and literature) allows students to explore and assess a nation's culture and civilization as well as far-reaching events (WWI, WWII and the Holocaust) from various perspectives.

USP 2003-2014 Code U3CH, U3WC

Prerequisite: junior standing.

GERM3050 - Third Year German I

Credits: 3

Encompasses formal grammar review; weekly composition; as well as drill of oral skill including pronunciation, oral reports and free conversation.

USP 2003-2014 Code U3WB

USP 2015 Code U5C2

A&S College Core 2015 ASG

Prerequisite: GERM 2040.

GERM3060 - Introduction to German Literature

Credits: 3

Introduces literature of Germany. Analyzes major literary types and elements of criticism. Emphasizes compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Prerequisite: GERM 3050.

GERM3150 - German History and Culture

Credits: 3

Taught in English, this class engages students both theoretically and practically with German history and culture throughout the ages from the Middle Ages to today. Reading content is complemented with outings to culturally and historically significant sites in Germany as part of a summer study abroad program.

USP 2003-2014 Code U3CH, U3G

A&S College Core 2015 ASG

Prerequisite: WA or equivalent.

GERM3990 - Independent Study

Credits: 1-4

Focuses on books or periodicals of special interest to the student selected in consultation with a staff member; independent reading and reports.

Prerequisite: GERM 2030.

GERM4070 - Fourth Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts and group discussion on prepared topics.

Dual Listed GERM 5070.

When Offered (Offered every other year)

Prerequisite: GERM 3060.

GERM4080 - German-English and English- German Translation

Credits: 3

Encompasses written translation exercises based on contemporary and relevant texts in both English and German. Addresses specific translation problems arising in both English and German, when translating into the other language.

When Offered (Offered fall semester)

USP 2003-2014 Code U3WB

Prerequisite: GERM 3050 and/or GERM 3060.

GERM4100 - A Survey of German Literature I

Credits: 3

Studies German literature and civilization from the Middle Ages to the 17th century.

Dual Listed GERM 5100.

Prerequisite: GERM 2140 or equivalent.

GERM4110 - A Survey of German Literature II

Credits: 3

Studies German literature and civilization from the 18th century to the end of the 20th century.

Dual Listed GERM 5110.

Prerequisite: GERM 2140 or equivalent.

GERM4145 - Weimar Classicism

Credits: 3

Introduces student to Weimar Classicism, one of the crucial periods in German literature and culture. Explores the foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works during this period. Primary language for instruction for this course is German.

Dual Listed GERM 5145.

Prerequisite: GERM 2140 or equivalent.

GERM4180 - German Poetry

Credits: 3

Surveys poetry from the Middle Ages to the present. Emphasizes poetry after 1600. Treats formal elements and genre categories.

Dual Listed GERM 5180.

Prerequisite: GERM 2140.

GERM4200 - Introduction to Research

Credits: 3

Max Credit 9

Senior seminar on a topic varying from year to year. Includes study of standard bibliographical guides. Minimum of 3 hours recommended for majors.

USP 2015 Code U5C3

Prerequisite: 12 hours of 4000-5000-level courses.

GERM4240 - German Literature of the Romantic Period

Credits: 3

Introduces the philosophical bases of German Romanticism and analyzes representative works of prose and poetry.

Dual Listed GERM 5240.

Prerequisite: GERM 2140 or equivalent.

GERM4255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of significant German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 5255.

Prerequisite: GERM 2140 or equivalent.

GERM4275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural production by artists identified with immigrant communities or communities of color. Topics examined include intersections of gender, race, nation, culture, and class; experiences of different minorities; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Course is taught in German.

Dual Listed GERM 5275.

Prerequisite: GERM 2140 or equivalent.

GERM4285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary Germany.

Dual Listed GERM 5285.

Prerequisite: WB.

GERM4990 - Advanced Independent Study

Credits: 1-3

Encompasses special projects designed to meet needs of individual students, designed in consultation with instructor.

Prerequisite: GERM 2140 and consent of instructor.

GERM5070 - 4th Year German

Credits: 3

Emphasizes weekly compositions and corrective practice, stylistic analysis of representative texts, and group discussions on prepared topics.

Dual Listed GERM 4070.

Prerequisite: GERM 3060.

GERM5100 - A Survey of German Literature I

Credits: 3

A study of German literature and civilization from the Middle Ages to the seventeenth century.

Dual Listed GERM 4100.

Prerequisite: GERM 2140 or equivalent.

GERM5110 - A Survey of German Literature II

Credits: 3

A study of German literature and civilization from the eighteenth century to the end of the twentieth century.

Dual Listed GERM 4110.

Prerequisite: GERM 2140 or equivalent.

GERM5145 - Weimar Classicism

Credits: 3

Introduces students to Weimar Classicism, one of the crucial period in German literature and culture. Explores the foundation of the movement, its cultural and historical contexts, aesthetic and philosophical principles, and significant works written by Goethe and Schiller during this period. Taught in German. Students are expected to read, write and discuss in German.

Dual Listed GERM 4145.

Prerequisite: graduate standing.

GERM5160 - Graduate Readings

Credits: 1-5

Max Credit (Max. 6)

Prerequisite: undergraduate major or minor in the subject.

GERM5180 - German Poetry

Credits: 3

A survey of poetry from the Middle Ages to the present. Emphasis on poetry after 1600. Treatment of formal elements and genre categories.

Dual Listed GERM 4180.

Prerequisite: GERM 2140.

GERM5240 - German Literature of the Romantic Period

Credits: 3

An introduction to the philosophical bases of German Romanticism and analysis of representative works of prose and poetry.

Dual Listed GERM 4240.

Prerequisite: GERM 2140 or equivalent.

GERM5255 - 19th Century German Novellas

Credits: 3

Studies a wide selection of German novellas from the period when this genre flourished in the German-speaking world, with a popularity unparalleled in the rest of Europe. Examines the form's origins, evolution, reception, and theory.

Dual Listed GERM 4255.

Prerequisite: GERM 2140 or equivalent.

GERM5275 - Contemporary Migration Literature

Credits: 3

Introduces students to a range of recent cultural productions by artists identified with immigrant communities or communities of color. Topics examined include: the intersections of gender, race, culture, and class; experiences of different minorities in unified Germany; question of national and transnational identity, self-representation, immigration, multiculturalism and integration debates. Taught in German. Students are expected to read, write and discuss in German.

Dual Listed GERM 4275.

Prerequisite: GERM 2140 or equivalent.

GERM5285 - 20th/21st Century German Film

Credits: 3

Introduces students to classical German films, and thereby enhances their skills to conduct research in the Humanities. Themes to be discussed: representation of authority, issues of race and gender, German culture and history, the Americanization of German culture, minorities in contemporary German. Taught in English.

Dual Listed GERM 4285.

Prerequisite: graduate standing.

GERM5940 - Continuing Registration: Off Campus

Credits: 1-2

Max Credit (Max. 16)

Prerequisite: advanced degree candidacy.

GERM5960 - Thesis Research

Credits: 1-12

Max Credit (Max. 24)

Designed for students who are involved in research for their thesis project. Also used for students whose coursework is

complete and are writing their thesis.

Prerequisite: enrollment in a graduate degree program.

GERM5990 - Internship

Credits: 1-12
Max Credit (Max. 24)

Prerequisite: graduate standing.

Greek

GRK1010 - First Year Greek I

Credits: 4
Studies fundamentals of grammar, composition and reading in Classical Greek.

When Offered (Offered based on sufficient demand and resources)

GRK1020 - First Year Greek II

Credits: 4
Studies grammar, composition and reading in Classical Greek.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1010.

GRK2030 - Second Year Greek

Credits: 4
Explores reading simple texts, stories and dramas, as well as grammar review.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1020 or equivalent.

GRK2040 - Second Year Greek II

Credits: 4
Further studies in grammar and reading simple texts, stories, and dramas.

When Offered (Offered based on sufficient demand and resources.)

Prerequisite: GRK 2030 or the equivalent.

GRK3990 - Independent Study

Credits: 1-4

Encompasses independent reading, selected in consultation with instructor.

When Offered (Offered based on sufficient demand and resources)

Prerequisite: GRK 1020 or equivalent.

Higher Education

HIED5000 - Community College Leadership

Credits: 3

This course will introduce students to the challenges associated with instructional leadership at the community college. The course will identify and distinguish the macro (organizational) level of change but also the micro (individual) level of change in community college settings.

Prerequisite: Admission into MA program.

HIED5020 - Higher Education Systems

Credits: 3

The purpose of this course is to provide students with an overview of higher education as an industry, as a cultural institution, and social stability while also promoting social mobility. Special focus is given to the stratification and diversity of American higher education.

Prerequisite: Admission into MA program.

HIED5030 - Continuing and Professional Education

Credits: 3

This course will introduce graduate students to the main issues, trends, and problems that have defined the field of continuing and professional education. The course will also provide students with the foundational knowledge and skills needed to administer continuing and professional education programs.

Prerequisite: Admission into MA program.

HIED5040 - Higher Education Staffing

Credits: 3

This course provides students with a theoretical and practical overview of the research and best practices associated with the development of instructional staff at higher education institutions. Special attention is given to the use of mentoring higher education instructional staff.

Prerequisite: Admission into MA program.

HIED5050 - Workforce Training

Credits: 3

In this course, students study the process of preparing objectives, retaining instructional staff, defining content, selecting learning activities, and evaluating student learning in workforce education programs delivered by higher education institutions.

Prerequisite: Admission into MA program.

HIED5060 - Program Budgets and Instructions

Credits: 3

The purpose of this course is to familiarize managers with the core tasks needed for effective financial planning. Students are also introduced to the budgeting process in various public higher education institutions.

Prerequisite: Admission into MA program.

HIED5090 - Masters Capstone

Credits: 3

Provides exposure to situations students will likely encounter professionally. It establishes a forum where students apply and refine theories, principles, and skills learned during their programs. Students examine and critique current scholarship and document general degree specific competencies.

Cross Listed ITEC 5090.

Prerequisite: Check with advisor and complete required sequence of courses for Educational Administration (Adult and Postsecondary Education) or Instructional Technology masters degree programs prior to enrollment.

HIED5240 - Teaching Adults

Credits: 3

Developed upon the premise that individuals teach as they would expect to be taught. Focuses on methods for teaching adults in formal as well as informal settings. The learning styles literature is reviewed and implications for instructional settings are analyzed. Participants also critique their teaching performance through videotaped sessions.

Prerequisite: graduate standing.

HIED5260 - Educational Issues Race, Class, and Gender

Credits: 3

Designed to help participants examine the current issues and debates in the literature of race, class, and gender from theoretical and practical perspectives. Related areas of ethnicity, national origin, sexual orientation, language, physical appearance, body size, and other constructs of difference will also be addressed.

Prerequisite: graduate standing.

HIED5600 - Higher Education Finance

Credits: 3

Provides an overview of the economics and finance of higher education in the United States with an emphasis on the analysis of financial policies and current issues at the institutional, state, and national levels.

Prerequisite: Admission to the program.

HIED5610 - Planning and Evaluation of Instructional Systems

Credits: 3

Participants investigate the concepts, issues, methods, and attitudes involved in the planning and evaluation of instructional systems. Topics covered include planning processes, theory and technique, promotion, evaluation, setting objectives, and trend analysis.

Prerequisite: graduate standing.

HIED5630 - Advanced Organizational Leadership

Credits: 3

Examines central issues in advanced organizational leadership to prepare practitioners for leadership roles in educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and an organizational case study.

Prerequisite: Admission to the program.

HIED5640 - Leadership Development

Credits: 3

Examines central issues in the internal dimension of leadership to prepare leaders in postsecondary educational settings. Working individually and as a member of a group, students will conduct conceptual analyses and complete a literature review paper and a biographical case study of a postsecondary educational leader.

Prerequisite: Admission to the program.

HIED5650 - Law of Higher Education

Credits: 3

Examine specific legal issues encountered by instructional leaders in higher education settings. Critically examines the basic rights and duties of institutional employees and students. It also explains when and how instructional leaders should refer matters to legal counsel.

Prerequisite: Admission to the program.

HIED5660 - Community College

Credits: 3

Concerns the philosophy, organization, program, and administration of the community college.

Prerequisite: graduate standing and consent of instructor.

HIED5670 - Community College Issues and Leadership

Credits: 3

Examine, analyze, the primary responsibility of instructional leaders at the community college, management of the curriculum. In particular, focus on the remedial/ developmental education programs, general education, the liberal arts transfer curriculum, technical education, and noncredit and contract training programs.

Prerequisite: Admission to the program.

HIED5680 - Issues in Higher Education

Credits: 3

Through examination of historical foundations and current trends, ADED 5680 delves into pressing issues in the academy, including but not limited to topics of tenure, governance, professional colleges, access and equity, curriculum and international needs.

Prerequisite: graduate standing.

History

HIST1101 - FYS: Hamilton's America: Beyond the Musical

Credits: 3

Over the last few years, Hamilton: An American Musical has taken the world by storm. Taking the musical as a starting point, we will consider the real Alexander Hamilton's life and times; the relationship between history, memory, storytelling, and art: and the newfound love of an historical figure who was, in his own time, less than universally popular. This course fulfills the First-Year Seminar (FYS) requirement of the 2015 University Studies Program.

USP 2015 Code U5FY

HIST1110 - Western Civilization I

Credits: 3

Surveys basics of Western European civilization from decline of Roman Empire to 1700.

USP 2003-2014 Code U3CH

HIST1120 - Western Civilization II

Credits: 3

A broad survey of European history in the Western tradition from 1700 to present.

HIST1210 - United States History I

Credits: 3

Surveys U. S. history 1607-1865. Together with HIST 1220, it is the foundation on which all U. S. history courses offered by the department are based. Students cannot receive credit for both HIST 1210 and HIST 1211 .

USP 2003-2014 Code U3VT

HIST1211 - U.S. to 1865

Credits: 3

Surveys U.S. history through the Civil War which by itself meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the United States and Wyoming. Students cannot receive credit for both HIST 1210 and 1211.

When Offered Normally offered fall semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1220 - United States History II

Credits: 3

Surveys U.S. history from reconstruction to recent past. Together with HIST 1210, it is the foundation for all U. S. history courses offered by the department. Students cannot receive credit for both HIST 1220 and HIST 1221.

HIST1221 - U.S. From 1865

Credits: 3

Surveys U.S. history from the Civil War to the present and meets the requirements of the Wyoming statutes providing for instruction in the provisions and principles of the constitutions of the U. S. and of Wyoming. Students cannot receive credit for both HIST 1220 and 1221.

When Offered Normally offered spring semester

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1250 - History of Wyoming

Credits: 3

A study of Wyoming from its beginning to the present. Students cannot receive credit for both HIST 1250 and HIST 1251.

USP 2003-2014 Code U3VT

HIST1251 - Wyoming History

Credits: 3

A survey which encourages an understanding of Wyoming history, how it relates to the history of the West and the rest of America and how it has influenced the present. An important component is to learn about the U.S. and the Wyoming constitutions and how these two documents have influenced Wyoming history. Students cannot receive credit for both HIST 1250 and 1251.

USP 2003-2014 Code U3V

USP 2015 Code U5V

HIST1290 - History of the U.S. West

Credits: 3

An introductory survey of the American West, with consideration of developments in both the 19th and 20th centuries.

HIST1320 - World History to 1500

Credits: 3

A history of the world's peoples and societies from human prehistory to 1500, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

USP 2015 Code U5H

A&S College Core 2015 ASG

HIST1330 - World History since 1500

Credits: 3

A history of the world's peoples and societies from 1500 to the present, with an emphasis on the diversity and interconnectedness of human life in the past.

USP 2003-2014 Code U3CS, U3G

A&S College Core 2015 ASG

HIST2020 - American Military History

Credits: 3

Surveys military experiences of U.S. from colonial period to the present. In addition to specific wars, examines military doctrines and political, social and economic forces that shaped conduct of war in American history.

HIST2030 - History and Environmental Science

Credits: 3

This course is designed as an introduction to both the historical work of environmental historians and the scientific work of environmental scientists. No previous background in either history or science is required.

Cross Listed ENR 2030.

USP 2003-2014 Code [(none)< >H]

HIST2040 - Imperial China

Credits: 3

Surveys China's social, intellectual, political, cultural, technological and ethnohistory from earliest historical period through the last imperial dynasty, and China's role in greater E. Asian and world history. Provides background for other Asia-related courses and is part of year-long series; see HIST 2041.

USP 2003-2014 Code U3CS, U3G

HIST2041 - Modern China

Credits: 3

Surveys China's social, intellectual, political, cultural, and ethnohistory from mid-1800s to the present. Themes include colonialism, emergence of nation-state, Communist party, Mao's socio-political agenda, post-Mao reforms, and China's role in Asia. Background for other Asia-related courses and part of year-long series; see HIST 2040.

HIST2050 - Introduction to Public History

Credits: 3

Introduces the student to the non-teaching, professional uses of history. Topics for consideration include archival work, museum management, public information and publications, historic site development, oral history interviewing, preparation of government reports, historic preservation general concepts and historical programming.

HIST2060 - Topics in History

Credits: 2-3

Max Credit 6

Discusses special topics that fall outside traditional chronological and geographical framework of history; content varies from semester to semester in accordance with faculty interest and student demand.

HIST2080 - Holocaust

Credits: 3

Surveys the destruction of European Jewry, 1933-1945.

Cross Listed RELI 2080.

USP 2003-2014 Code U3CH

Former Course Number [4315]

HIST2105 - Medieval Europe in Film

Credits: 3

Historical depictions in films help to shape people's view of the past. Uses commercial films to study major themes in the development of western European civilization between 500 and 1500. Students view, discuss and write about films, learning to evaluate films historically and to view films critically, developing media literacy.

HIST2120 - Ancient Greece and the Near East

Credits: 3

Examines development of civilization in Eastern Mediterranean from prehistory to Alexander the Great.

HIST2130 - Ancient Rome

Credits: 3

Studies history of the growth of Roman power from city-state to world power.

HIST2225 - History of Christianity

Credits: 3

Traces Christianity from its beginnings to late 20th century.

Cross Listed RELI 2225.

USP 2015 Code U5H

HIST2230 - The History of Russia to 1855

Credits: 3

General survey of modern Russian history from earliest times to 1855.

HIST2240 - The History of Russia Since 1855

Credits: 3

General survey of modern Russian history from 1855 to the present.

HIST2250 - American Religious History I (To 1865)

Credits: 3

Traces the history of religion in America through the Civil War. We will pay particular attention to the intertwining of religion and colonialism; the tension between emerging Protestant hegemony and religious pluralism; and the roles religion has played in justifying oppression and pursuing liberty in American history.

Cross Listed RELI 2250.

USP 2003-2014 Code U3CH, U3D

USP 2015 Code U5H

A&S College Core 2015 ASD

HIST2252 - American Religious History II (1865 to 1945)

Credits: 3
